

BEFORE THE COMMISSIONER OF INSURANCE FOR THE STATE OF IOWA

IN THE MATTER OF THE APRIL 1, 2018)
RATE FILING BY THE NATIONAL COUNCIL) ORDER
ON COMPENSATION INSURANCE, INC.)

Pursuant to the provisions of Iowa Code chapter 515A, the National Council on Compensation Insurance, Inc. (NCCI) submitted a rate filing on April 1, 2018. Notice of the filing was published on the Iowa Insurance Division's web site on April 15, 2018. No request for a hearing on the rate filing was received.

The rate filing proposes an overall decrease in voluntary and assigned risk rates of 1.9% from the current rates that became effective January 1, 2018. Based on an independent review of the NCCI proposal, the Commissioner finds the proposed rates not to be excessive, inadequate, or unfairly discriminatory.

It is **ORDERED** that the April 1, 2018 rate filing is **APPROVED** to be effective June 1, 2018.

Dated this 7th day of May, 2018.

Iowa Insurance Division

Doug Ommen
Commissioner of Insurance

Iowa

Voluntary and Assigned Risk Rates
and Rating Values Law-Only Filing

Proposed Effective June 1, 2018

March 30, 2018

Honorable Doug Ommen
Insurance Commissioner
Iowa Insurance Division
601 Locust St., 4th Floor
Des Moines, IA 50309-3738

Re: Iowa Voluntary and Assigned Risk Rates and Rating Values Law-Only Filing Proposed Effective June 1, 2018

Dear Commissioner Ommen:

In accordance with the applicable statutes and regulations of the state of Iowa, we are filing for your consideration and approval advisory prospective rates and rating values for the Iowa voluntary and assigned risk markets to become effective June 1, 2018 for new and renewal policies.

This filing proposes an overall decrease of 1.9% in voluntary and in assigned risk rates. The advisory prospective rates of the voluntary market are used as a basis for the rates in the assigned risk market.

This proposed decrease stems from the changes contained in the Tax Cuts and Jobs Act of 2017 ("TCJA"), as explained in Exhibit I.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies which, as of the time this filing is submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

**National Council on
Compensation Insurance**

The Honorable Doug Ommen

Workers Compensation Rate Filing – June 1, 2018

Disclosures

Purpose of the Report

The purpose of this report is to provide the proposed rates for workers compensation policies, proposed to be effective June 1, 2018. The intended users of this report are:

- The Iowa Department of Insurance
- Affiliated carriers, for their reference in determining workers compensation rates

Scope

Public Law No. 115-97, also known as the Tax Cuts and Jobs Act ("TCJA"), was signed into law on December 22, 2017. As a result, the current rates effective January 1, 2018, in Iowa are proposed to be adjusted to reflect the impact of the TCJA.

Data Sources and Dates

Rate level changes at the classification code level are based on Unit Statistical Data, which is the audited exposure, premium and loss information reported to NCCI on a policy level. In this filing, the Unit Statistical Data is the same as that used in the January 1, 2018, filing. NCCI's analysis also relies on other data sources, which are reviewed for reasonableness and are referenced in the filing where applicable.

This filing was prepared as of March 20, 2018. Therefore, events that occurred after this date that may have a material impact on workers compensation costs in this jurisdiction have not been considered in the analysis.

Risks and Uncertainty

This filing includes assumptions and projections concerning the future. As with any prospective analysis, there exists estimation uncertainty in these assumptions and projections. Areas of this analysis subject to estimation uncertainty that could have a material impact on the final results include the following:

- Expected insurance cash flow patterns
- Financial Inputs
- Potential impact of future tax regulations and/or TCJA guidance

In addition, any future changes to workers compensation law or regulations that apply retroactively to policies or benefit claims on policies in the proposed effective period may have a significant impact on the adequacy of the rates proposed in this filing.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Executive Summary

NCCI has conducted an in-depth analysis of the impact of the Tax Cuts and Jobs Act of 2017. Based on upon this analysis, NCCI has proposed an overall average workers compensation voluntary and assigned risk rate level change of -1.9% to become effective June 1, 2018.

<u>Key Components</u>	<u>Percentage Change</u>
Impact of change in Benefits	+ 0.8%
<u>Impact of change in Profit & Contingency</u>	- <u>2.7%</u>
Proposed Change in Overall Advisory Rate Level	- 1.9%
<u>Impact of change in Assigned Risk Differential</u>	<u>0.0%</u>
Proposed Change in Overall Assigned Risk Rate Level	- 1.9%

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit I – Analysis of Changes

The Tax Cuts and Jobs Act

Public law no. 115-97, also known as the Tax Cuts and Jobs Act (“TCJA”), was signed into law on December 22, 2017. Various changes in the TCJA impact workers compensation expenses via the Profit and Contingency provision, while the decrease in income tax rates due to the TCJA impacts workers compensation benefit costs in states, including Iowa, that base indemnity payments on spendable wages.

Profit and Contingency Provision

Summary of Tax Changes

NCCI has identified the following elements in the TCJA as relevant to NCCI’s Internal Rate of Return (IRR) Model for ratemaking:

1. The top corporate tax rate decreases from 35% to 21%.
2. The proration provision for tax-exempt income increases from 15% to 25%.
3. The deduction for qualifying dividends decreases from 70% to 50%.
4. Changes to reserve discount factors:
 - a. The discount rate used to determine reserve discounting factors will be based on the High Quality Market (HQM) corporate bond yield curve rather than the mid-Treasury yield curve. In addition, discretionary determination of the discount rate will be based on a lookback period of 60 months.
 - b. The computation of the extension of the loss payment pattern beyond ten years will be based on an average of the payments in the 7th, 8th, and 9th years after the accident year, and will extend for up to the 24th year after the accident year.
5. The deduction for business interest expense is limited to the sum of business interest income, which is the amount of interest includible in gross income, and not to exceed 30% of adjusted taxable income.

Analysis of Tax Changes

Tax changes under the TCJA impact NCCI’s IRR Model through three distinct channels: the tax treatment of underwriting income, the post-tax return on investment (RoI), and the post-tax cost of debt capital.

1. The decrease in the corporate tax rate directly impacts all three channels.
2. The proration provision affects tax treatment of otherwise tax-exempt interest and tax-deductible qualifying dividend income.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit I – Analysis of Changes

3. The deduction for qualifying dividends affects the share of qualifying dividends that may be deducted from investment income.
4. The changes to the reserve discount factors affect the timing of federal income taxes on income derived from underwriting.
5. The limitation on the deduction for business interest expense to the sum of business interest income can potentially affect tax timing.

NCCI is implementing tax changes 1 through 4 in its IRR Model in this filing. Currently, it is NCCI's judgment that the limitation on the deductibility of business interest expense (item 5) is likely to produce either no impact or an immaterial impact on the IRR Model, and is not being explicitly incorporated at this time.

Additional Changes and Considerations

In addition, the following updates to the model were made based on information currently available:

- Treasury forecasts used in the RoI and weighted-average cost of capital (WACC), valued as of 4th quarter 2017
- Reserve-to-Surplus ratio

All other standard annual updates, including updated treasury forecasts valued as of 1st quarter 2018, will be incorporated in the IRR Model for inclusion in the 1/1/2019 rate filing.

Absent IRS guidance, there is still uncertainty with respect to how some of the provisions of the TCJA will be implemented. In particular, the IRS has not published discount factors complying with the TCJA. Any additional information from guidance provided at a later time will be reflected in future NCCI rate filings in the state.

In addition, NCCI's IRR Model may not reflect the specific conditions of particular insurance companies writing in the state. NCCI's model contemplates a Workers' Compensation mono-line, wholly U.S. domestic, profitable insurance company, with no subsidiaries and no reinsurance. Therefore, the impact of provision changes such as the base erosion and anti-abuse tax (BEAT) and the alternative minimum tax (AMT) are not part of the NCCI Model.

Note that no potential indirect impacts of the TCJA have been incorporated in this analysis; any of these impacts would be realized through future loss experience and reflected in subsequent NCCI rate filings in the state.

Further information on the updated P&C selection and its impact can be found in Exhibit II, while details of the IRR model can be found in Exhibit III.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit I – Analysis of Changes

Note: The methodology and assumptions used in this filing may not be applicable to or relevant for another purpose, including but not limited to NCCI filings in other jurisdictions.

Spendable Wages

The TCJA of 2017 also lowered most individual income tax rates. This results in lower taxes and higher net pay or “spendable wages,” on average. Spendable wages, rather than gross wages, are the basis for indemnity benefits for injured workers in Iowa. Therefore, all else equal, higher spendable wages will lead to higher WC benefits.

Further information on the calculation and impact of this change can be found in Exhibit IV.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit II – Workers Compensation Expense Program

Comparison of Proposed and Current Expense Provisions

Overhead expense provisions are itemized below. These figures are expressed as percentages of standard premium (excluding expense constant) and are indicative of the expenses of the first \$10,000 of policy premium. Taken together these allowances represent that portion of the standard premium dollar necessary to operate the benefit system. The complementary portion corresponds to the portion of the premium dollar available to finance benefits, loss adjustment expenses and loss-based assessments, if applicable. It is referred to as the "target cost ratio."

	Expense Provisions Underlying Current Rates	Expense Provisions Underlying Proposed Rates
(1) Expense Constant	\$160	\$160
(2) Production Expense	18.3%	18.3%
(3) General Expense	5.0%	5.0%
(4) Taxes, Licenses and Fees (other than Federal Income Tax)		
Premium Tax	1.0%	1.0%
Miscellaneous	0.3%	0.3%
Second Injury Fund	1.0%	1.0%
Total	2.3%	2.3%
(5) Profit and Contingency Provision	2.0%	0.0%
(6) Total Overhead Provisions (2)+(3)+(4)+(5)	27.6%	25.6%
(7) Target Cost Ratio [100% - (6)]	72.4%	74.4%
(8) Loss Adjustment Expense	15.4%	15.4%
(9) Loss-based Assessment	0.0%	0.0%
(10) Permissible Loss Ratio (7) / [1+(8)+(9)]	62.7%	64.5%
(11) Impact of Change in Profit and Contingency Provision [Current (7) / Proposed (7)] - 1.0		-2.7%

Iowa
 Workers Compensation Rate Filing – June 1, 2018
 Exhibit III – Internal Rate of Return Model

Overview

According to actuarial principles, insurance rates must be determined such that insurers can be expected to earn an appropriate rate of return. Analysis and determination of a profit and contingency (P&C) provision is necessary to ensure this objective is achieved. To determine the profit and contingency provision, NCCI first uses market-based financial methods to estimate the rate of return (also known as the cost of capital) required by investors of securities with a similar risk profile to workers compensation insurance. NCCI then performs an Internal Rate of Return (IRR) analysis to estimate the profit and contingency provision that needs to be included in the proposed rates for insurers to earn the cost of capital, after accounting for investment income.

The IRR model is based on the principle that the internal rate of return from an investment opportunity equals the investor's cost of capital if the sum of all cash flows from that investment, discounted at the cost of capital, equals zero. In the case of workers compensation insurance, cash flows to the capital providers are comprised of insurance cash flows, investment income, and commitment and release of capital in support of the insurance transaction.

- Insurance cash flows consist of premiums earned less payments for expenses, losses, loss adjustment expenses (LAE), and federal income taxes. These cash flows are estimated based on the provisions included in this proposed rate filing.
- Investment income on reserves and surplus depends on an after-tax return on investment (RoI), which is estimated using a combination of current financial market data and forecasts.
- The cost of capital used is a weighted average cost of capital (WACC), which takes into account both debt and equity components of a representative insurer's capital structure.

IRR Model Inputs and Results

The model estimates the P&C provision necessary in order for the proposed rates to cover the cost of capital. The P&C provision is estimated using two different assumptions regarding the return on investment and cost of capital:

- The "Static" estimate of the P&C provision assumes that the return on investment and the WACC do not change over time, but remain static at their indicated market values at the time the model was run.
- The "Dynamic" estimate assumes that the return on investment and WACC vary over time. The investment portfolio is assumed to be reinvested at future forecasted yields as securities mature, and WACC varies to reflect future expected costs of equity and debt. The starting point for the Dynamic estimates is January 1, 2018.

The following table summarizes the inputs and results of the model under these two scenarios.

TABLE 1: IRR MODEL INPUTS AND RESULTS

<u>Inputs:</u>			
(1)	Expenses and Taxes as a Percentage of Net Premium at NCCI Level		19.70%
(2)	Reserve-to-Surplus Ratio		1.83
(3)	Cash Flow Patterns		See Table 2
		<u>Static</u>	<u>Dynamic*</u>
(4)	Return on Investments	2.83%	3.08% - 4.61%
(5)	Weighted Average Cost of Capital	7.48%	7.76% - 9.48%
<u>Results</u>			
		<u>Static</u>	<u>Dynamic</u>
(6)	Indicated Profit and Contingency Provision	0.63%	-0.51%
(7)	Loss and Loss Adjustment Expense Provision [100% - (6) - (1)]	79.67%	80.81%

Table Notes:

It is assumed that no policyholders dividends are paid and that there are no rate departures (deviations or schedule rating).

(1) Expense provisions and taxes derived from the filing.

(2) Calculated from Best's 2017 Aggregates & Averages, for Commercial Casualty Composite, as the weighted average of Loss, LAE, and Unearned Premium Reserves to Policyholder Surplus, for years 2012 - 2016.

Table 2 Notes:

Table 2 shows cumulative cash flows. For ease of reading no additional numbers are shown after a column reaches 100% cumulative cash flow.

- (1) Derived from estimates of premium distribution and payment terms by size of policy.
- (2) Based on written premium pattern assuming uniform writings within quarters and standard quarterly earning pattern.
- (3) Based on this jurisdiction's premium writings by quarter.
- (4) Expenses assumed paid as premium is collected; timing of taxes based on NCCI's Tax and Assessment Directory.
- (5) Derived from loss development data underlying this rate filing. Payouts for the first 29 years are based upon the ratio of paid losses to incurred losses from the most recent 29 policy years for which data is available. For the following years, loss payouts are assumed to trail off geometrically, with an adjustment so that the payout will be complete at 35 years.

Column Notes:

- (1) is Collected Premium by time period, expressed as a factor, = Table 2 col (1)
- (2) is Expenses and Taxes by time period, expressed as a factor, = Table 1 row (1) x Table 2 col (4)
- (3) is Paid Losses and LAE by time period, expressed as a factor, = Table 1 row (7, Static) x Table 2 col (5)
- (4) per the Tax Cuts and Jobs Act of 2017, federal income taxes are computed as the tax rate (21%) times the adjusted underwriting income calculated per IRS rules. See Appendix B for details.
- (5) is the Total Insurance Cash Flow by time period, expressed as a factor, = (1) - [(2) + (3) + (4)]

Calculation Details - Static Estimate (continued)

Column Notes:

- (1) is Unearned Premium Reserve (equal to Written Premium minus Earned Premium, per the cashflow pattern) plus Unpaid Loss and LAE Reserve (equal to Incurred minus Paid Losses and LAE) by time period, expressed as a factor,
= [Table 2 col (3) - Table 2 col (2)] + Table 1 row (7, Static) x [Table 2 col (2) - Table 2 col (5)]
- (2) is the Surplus derived from Reserves per the Reserve-to-Surplus Ratio by time period, expressed as a factor, = (1) / Table 1 row (2)
- (3) is Reserves plus Surplus minus Agent Balances by time period, expressed as a factor, = (1) + (2) - Agent Balances. Agent Balances exist when Written Premium exceeds Collected Premium, = [Table 2 col (3) - Table 2 col (1)].
- (4) is derived by applying the Return on Investments [Table 1 row (4, Static)] to the average Invested Funds (4) from the previous and current time periods, plus previous Income from Invested Funds, by time period expressed as a factor.
- (5) is Insurance Cash Flow plus Income from Invested Funds minus Total Invested Funds by time period, expressed as a factor,
= Table 4 col (5) + (4) - (3)
- (6) is the difference between Capital Provider Equity (5) at the current and previous time periods, expressed as a factor
- (7) is the Capital Provider Cash Flow (6) discounted by the Weighted Average Cost of Capital [Table 1 row (5, Static)], expressed as a factor

Iowa
Workers Compensation Rate Filing – June 1, 2018
Exhibit III – Internal Rate of Return Model

Column Notes:

- (1) is Unearned Premium Reserve (equal to Written Premium minus Earned Premium, per the cashflow pattern) plus Unpaid Loss and LAE Reserve (equal to Incurred minus Paid Losses and LAE) by time period, expressed as a factor,
= [Table 2 col (3) - Table 2 col (2)] + Table 1 row (7, Dynamic) x [Table 2 col (2) - Table 2 col (5)]
- (2) is the Surplus derived from Reserves per the Reserve-to-Surplus Ratio by time period, expressed as a factor, = (1) / Table 1 row (2)
- (3) is Reserves plus Surplus minus Agent Balances by time period, expressed as a factor, = (1) + (2) - Agent Balances. Agent Balances exist when Written Premium exceeds Collected Premium, = [Table 2 col (3) - Table 2 col (1)].
- (4) is derived by applying the Return on Investments [Table 3 col (1)] to the average Invested Funds (4) from the previous and current time periods, plus previous Income from Invested Funds, by time period expressed as a factor.
- (5) is Insurance Cash Flow plus Income from Invested Funds minus Total Invested Funds by time period, expressed as a factor,
= Table 6 col (5) + (4) - (3)
- (6) is the difference between Capital Provider Equity (5) at the current and previous time periods, expressed as a factor
- (7) is derived from the respective Weighted Average Cost of Capital [Table 3 col (2)] for each time period, expressed as a factor
- (8) is the Capital Provider Cash Flow (6) discounted by the Cumulative Discount Factor (7), expressed as a factor

Iowa
 Workers Compensation Rate Filing – June 1, 2018
 Exhibit III – Internal Rate of Return Model

APPENDIX A: CALCULATION OF WEIGHTED AVERAGE COST OF CAPITAL AND RETURN ON INVESTMENTS

The calculation of the Weighted Average Cost of Capital (WACC) is shown in Table A.1, and the calculation of the Return on Investments (RoI) is shown in Table A.2. The calculation for the Static estimate is shown in each. Calculations of the WACC and RoI under the Dynamic estimate for time periods 1, 2, and 5 are also provided for illustrative purposes. Note that the IRR model under the Dynamic estimate includes estimates of the WACC and RoI on a quarterly basis for the first five years and annually thereafter.

TABLE A.1: CALCULATION OF WEIGHTED AVERAGE COST OF CAPITAL

	Static	IRR Model Time (yrs)		
		1.00	2.00	5.00
(1) 5 year US T-note Yield	2.07%	3.27%	3.97%	3.87%
(2) US Equity Market Risk Premium	7.51%			
(3) Beta for Property/Casualty (P/C) Insurers	0.86			
(4) Equity Cost of Capital for P/C Insurers	8.53%	9.73%	10.43%	10.33%
(5) Share of Equity Capital for P/C Insurers	82%			
(6) Debt Cost of Capital for P/C Insurers	2.69%	3.64%	4.19%	4.12%
(7) Weighted Average Cost of Capital (WACC)	7.48%	8.64%	9.31%	9.21%

Column Notes:

- (1) Forward estimates of the 5-year US T-note yield are from Moody's forecasts and apply only to the Dynamic estimate of the WACC. Time periods provided are illustrative; the full model includes estimates on a quarterly basis for the first five years and annually thereafter.
- (3) & (5) P/C beta and share of equity capital are estimated from historical data for a collection of insurers with publicly traded equity and debt.
- (4) = (1) + (2) x (3)
- (6) P/C debt cost of capital is the sum of the 5-year US T-note yield plus the historical corporate spread, net of income tax.
- (7) = (4) x (5) + (6) x [1 - (5)]

Table Notes:

- Government Direct Obligations include US Government Issuer Obligations and Non-US Government Issuer Obligations. Collateralized Securities include Mortgage Backed, Loan Backed, or Structured Securities. Tax-exempt Bonds include Issuer Obligations of US States, Territories, and Possessions, US Political Subdivisions of States, Territories, and Possessions, and US Special Revenue and Special Assessment Obligations. Industrial and Hybrid Securities (unaffiliated) include Industrial and Miscellaneous and Hybrid Securities. Industrial and Hybrid Securities (affiliated) include Parents, Subsidiaries, and Affiliates.
- Bond and total portfolio distributions are 3-year averages for 2013-2015, calculated from various annual editions of Best's Aggregates & Averages (Property-Casualty), Assets for Commercial Casualty Composite, p. 276, Column 3, Net Admitted Assets. For each year 2013-2015, the maturity distribution pertains to all bonds owned as of December 31 at book/adjusted carrying value for Commercial Casualty Composite, Schedule D, Part 1A, Section 2.
- Spread to US treasury yields are either constant or varying by maturity (tax-exempt or corporate) as applicable. The tax-exempt spread is a term structure of average historical spreads in forward rates at different maturities between US municipal bonds and US Treasuries. Data on historical yields to US municipal bonds are from Bloomberg. The corporate spread is a term structure of average historical spreads in forward rates at different maturities between US corporate bonds and US Treasuries. Historical data on yields to US corporate bonds are from the US Department of Treasury.
- Applies only to the Dynamic estimate of the return on invested funds. The roll-over period is the time interval at which the estimated yield is updated for the given security in the investment portfolio. For bonds, the roll-over period is the bond's term to maturity. Forward yields for common and preferred stocks are updated quarterly.
- It is assumed that investment returns, except dividends and tax exempt municipal bond income, are taxed at 21%. With respect to dividends, it is assumed that 50% of dividends received are tax exempt. It is further assumed that in accordance with the "pro-ration" provision, 25% of otherwise exempt municipal bond income and dividends are taxed at 21%. The portion of income attributable to capital appreciation is assumed to equal 65.8% while the income portion is 34.2%. The percentages were obtained from Morningstar's Analyst Research Center containing Table 6-7 previously published in Ibbotson S&P Classic Yearbook, large company stocks, arithmetic mean.
- Static estimates of treasury yields are actual current yields.
- 9) Apply only to the Dynamic estimate of the return on invested funds. Forward estimates of treasury yields at various maturities are from Moody's.

* Yields to mortgage loans, real estate, and all other assets are not directly estimated, but are assumed to be equal to the weighted average portfolio yield net of these categories.

** Investment expense calculated from Annual Statement data for the Commercial Casualty Composite by dividing Total Investment Expense by Cash and Invested Assets.

Total investment expense for 2015 from the Annual Statement, Exhibit of Net Investment Income.

Average of 2014 and 2015 cash and invested assets from Best's Aggregates and Averages (Property-Casualty), Assets for Commercial Casualty Composite, p.276, Line 12.

APPENDIX B: FEDERAL INCOME TAX INCURRED FROM INSURANCE OPERATIONS

Federal taxes on underwriting income, based on the Tax Cuts and Jobs Act of 2017, are calculated in the following tables on an annual basis. Columns (1) through (4) are the same under both the Static and Dynamic Estimates; the paid losses and LAE factors (col (5)) vary by Estimate. Note that investment taxes are accounted for in Appendix A. Annual tax is prorated when quarterly amounts are required.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit IV – Change in Spendable Wages

The aforementioned Tax Cuts and Jobs Act of 2017 (TCJA) lowers most individual income tax rates beginning in tax year 2018, thereby resulting in higher net pay or “spendable wages” on average¹. In turn, this impacts the amount of indemnity benefits to be paid to injured workers in Iowa under the Workers Compensation Act, since the rate of compensation for fatal, total disability, and partial disability benefits is 80% of spendable wages, rather than gross wages. Hence, lower taxes and higher spendable wages will lead to higher workers compensation (WC) benefits, on average, in Iowa.

The approach used in calculating the effect of the TCJA on WC benefits resulting from the expected increase in spendable wages is as follows:

1. Begin with the 2017 Federal Withholding Tax Tables for Single and for Married Filing Jointly taxpayers.
2. Estimate the appropriate number of exemptions for taxpayers with children and without children (using countrywide distributions of the number of dependents in fatal cases).
3. Calculate spendable wages by gross earnings bracket, accounting for federal income tax, FICA² taxes, and state income taxes for each of the four situations, (i) Single, No Children, (ii) Single, With Children, (iii) Married, No Children, and (iv) Married, With Children,
4. Calculate the average weekly benefits (AWB) for the four situations using a countrywide distribution of workers and their wages³, indexed to the Iowa average weekly wage⁴, for each injury type (Fatal, Permanent Total, Permanent Partial, and Temporary Total).
5. Calculate the AWB for each injury type weighted across the four situations⁵.
6. Repeat steps 1 through 5 for calculations reflecting the TCJA, beginning with the 2018 Federal Withholding Tax Tables for Single and for Married Filing Jointly taxpayers.
 - a. Note that the standard deduction was doubled for all taxpayers, and the personal and dependent exemptions were eliminated from 2018 through 2025.

¹ Note that the elimination of exemptions and slight annual inflationary indexing of the maximum amount of wages in 2018 subject to the 6.2% Social Security tax (from \$127,200 to \$128,400) resulting from the TCJA could have a countering (i.e., downward) impact on spendable wages for some injured workers. Meanwhile, the slight annual indexing of Iowa state income tax brackets (which increase progressively with income) slightly increases spendable wages and increases WC benefits. Both changes are negligible when considered in isolation but are both considered when determining the overall change due to tax rate revisions.

² Federal Insurance Contributions Act (FICA) taxes are payroll taxes which go towards the funding of the Social Security program and Medicare.

³ Based on NCCI Detailed Claim Information data.

⁴ Forecasted using the Bureau of Labor Statistics Quarterly Census of Employment and Wages, for all private sector employment, and adjusted to reflect injured workers wages.

⁵ Based on countrywide distributions of average dependents by type (e.g., spouse, spouse with one child, parent, etc.) for fatal and for disability cases.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Exhibit IV – Change in Spendable Wages

- b. As a result, the four situations are now, (1) Single, (2) Single, Head of Household, (3) Married, Single Earner, and (4) Married, Dual Earner.
- 7. Calculate the ratios of the 2018 AWB to the 2017 AWB for each injury type.
- 8. Determine the indemnity cost distribution by injury type⁶.
- 9. Using the indemnity cost distribution (Step 8) and the changes in the AWB by injury type (Step 7), calculate the effect of the TCJA on total indemnity benefit costs.
- 10. Multiply the impact on total indemnity benefit costs (Step 9) by the percentage of losses attributed to indemnity benefits⁷ to determine the impact of the TCJA on overall benefit costs.

The results of the above calculations are as follows:

Type of Injury	Percentage of Losses	Effect (%)
Fatal	3.0%	+0.4%
Permanent Total	1.6%	+2.0%
Permanent Partial	29.5%	+2.0%
Temporary Total	8.3%	+2.0%
Total Indemnity	42.4%	+1.9%
Medical	57.6%	0.0%
Total	100.0%	+0.8%

⁶ NCCI Unit Statistical Plan data for the 24-month policy period ending 2/28/2014 on the 07/01/2017 law level and developed to an ultimate basis by type of injury.

⁷ NCCI Financial Call data for Iowa for Policy Years 2014 and 2015 projected to 1/1/2018.

1165D	0.06	S	3085D	0.11	S			

S=Silica

- F Rate provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Rate includes a provision for USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published rate is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding rate are applied in addition to the basic classification when determining premium.

Class Code	Non-Ratable Element Code
4771	0771
7405	7445
7431	7453

- P Classification is computed on a per capita basis.
- X Refer to special classification phraseology in these pages which is applicable in this state.

*** Class Codes with Specific Footnotes**

- 6702 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection code rate and elr each x 1.215.
- 6703 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate x 2.48 and elr x 2.299.
- 6704 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate and elr each x 1.35.

Effective June 1, 2018

MISCELLANEOUS VALUES

Basis of premium applicable in accordance with **Basic Manual** footnote instructions for Code 7370 -- "Taxicab Co.":

Employee operated vehicle.....	\$67,100
Leased or rented vehicle.....	\$44,700

Catastrophe (other than Certified Acts of Terrorism) - (Voluntary) 0.01

Expense Constant applicable in accordance with **Basic Manual** Rule 3-A-11..... \$160

Maximum Weekly Payroll applicable in accordance with **Basic Manual** Rule 2-E -- "Executive Officers" including members of limited liability companies, Rule 2-E-3 for Partners and Sole Proprietors, and **Basic Manual** footnote instructions for Code 9178 -- "Athletic Sports or Park: Non-Contact Sports", and Code 9179 -- "Athletic Sports or Park: Contact Sports" \$3,400

Minimum Weekly Payroll applicable in accordance with **Basic Manual** Rule 2-E -- "Executive Officers" and members of limited liability companies and Rule 2-E-3 for Partners and Sole Proprietors \$450

Premium Discount Percentages - (See Basic Manual Rule 3-A-19-a.) The following premium discounts are applicable to Standard Premiums:

		Type A	Type B
First	\$10,000	-	-
Next	190,000	9.1%	5.1%
Next	1,550,000	11.3%	6.5%
Over	1,750,000	12.3%	7.5%

Terrorism (Voluntary) 0.01

United States Longshore and Harbor Workers' Compensation Coverage Percentage applicable only in connection with **Basic Manual** Rule 3-A-4..... 106%

(Multiply a Non-F classification rate by a factor of 2.06 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in benefits (1.95) and the adjustment for differences in loss-based expenses (1.055).)

Experience Rating Eligibility

A risk qualifies for experience rating on an intrastate basis when it meets the premium eligibility requirements for the state in which it operates. The eligibility amount varies by rating effective date. The **Experience Rating Plan Manual** should be referenced for the latest approved eligibility amounts by state and by effective date.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Proposed Assigned Risk Rates and Rating Values

The following pages include proposed assigned risk rates and rating values:

- Assigned risk rates and minimum premiums by class code

The currently approved expected loss rates, d-ratios, associated footnotes, and miscellaneous values are also displayed for completeness.

FOOTNOTES

- a Rate for each individual risk must be obtained by NCCI Customer Service or the Rating Organization having jurisdiction.
- A Minimum Premium \$100 per ginning location for policy minimum premium computation.
- D Rate for classification already includes the specific disease loading shown in the table below. See **Basic Manual** Rule 3-A-7.

Disease			Disease			Disease		
Code No.	Loading	Symbol	Code No.	Loading	Symbol	Code No.	Loading	Symbol

S=Silica

- F Rate provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Rate includes a provision for USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published rate is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act. For the residual market, coverage under the Federal Employers' Liability Act (FELA) for employees of interstate railroads is not available for codes 6702, 6703, 6704, 7151, 7152, 7153, 8734, 8737, 8738, 8805, 8814, and 8815.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding rate are applied in addition to the basic classification when determining premium.

Class Code	Non-Ratable Element Code
4771	0771
7405	7445
7431	7453

- P Classification is computed on a per capita basis.
- X Refer to special classification phraseology in these pages which is applicable in this state.

*** Class Codes with Specific Footnotes**

- 6702 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection code rate and elr each x 1.215.
- 6703 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate x 2.48 and elr x 2.299.
- 6704 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate and elr each x 1.35.

Effective June 1, 2018

APPLICABLE TO ASSIGNED RISK POLICIES ONLY

MISCELLANEOUS VALUES

Basis of premium applicable in accordance with **Basic Manual** footnote instructions for Code 7370 -- "Taxicab Co.":

Employee operated vehicle.....	\$67,100
Leased or rented vehicle.....	\$44,700

Catastrophe (other than Certified Acts of Terrorism) - (Assigned Risk)..... 0.01

Expense Constant applicable in accordance with **Basic Manual** Rule 3-A-11..... \$160

Maximum Weekly Payroll applicable in accordance with **Basic Manual** Rule 2-E -- "Executive Officers" including members of limited liability companies, Rule 2-E-3 for Partners and Sole Proprietors, and **Basic Manual** footnote instructions for Code 9178 -- "Athletic Sports or Park: Non-Contact Sports", and Code 9179 -- "Athletic Sports or Park: Contact Sports" \$3,400

Minimum Weekly Payroll applicable in accordance with **Basic Manual** Rule 2-E -- "Executive Officers" and members of limited liability companies and Rule 2-E-3 for Partners and Sole Proprietors \$450

Terrorism - (Assigned Risk)..... 0.01

United States Longshore and Harbor Workers' Compensation Coverage Percentage applicable only in connection with **Basic Manual** Rule 3-A-4..... 106%

(Multiply a Non-F classification rate by a factor of 2.06 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in benefits 1.95 and the adjustment for differences in loss-based expenses (1.055).)

Experience Rating Eligibility

A risk qualifies for experience rating on an intrastate basis when it meets the premium eligibility requirements for the state in which it operates. The eligibility amount varies by rating effective date. The **Experience Rating Plan Manual** should be referenced for the latest approved eligibility amounts by state and by effective date.

Iowa

Workers Compensation Rate Filing – June 1, 2018

Proposed Values for Inclusion in the Retrospective Rating Plan Manual

The following pages include values for inclusion in the Retrospective Rating Plan Manual:

- Excess Loss Factors
- Excess Loss and Allocated Expense Factors
- Hazard Group Differentials
- Tax Multipliers
- Countrywide Expected Loss Ratio
- Countrywide Expected Loss and Allocated Expense Ratio
- Table of Expense Ratios
- Retrospective Development Factors

The following are also displayed for completeness:

Honorable Doug Ommen
Insurance Commissioner
Iowa Insurance Division
601 Locust St., 4th Floor
Des Moines, IA 50309-3738

Re: Iowa Voluntary and Assigned Risk Rates and Rating Values Law-Only Filing Proposed Effective June 1, 2018

Dear Commissioner Ommen:

In accordance with the applicable statutes and regulations of the state of Iowa, we are filing for your consideration and approval advisory prospective rates and rating values for the Iowa voluntary and assigned risk markets to become effective June 1, 2018 for new and renewal policies.

This filing proposes an overall decrease of 1.9% in voluntary and in assigned risk rates. The advisory prospective rates of the voluntary market are used as a basis for the rates in the assigned risk market.

This proposed decrease stems from the changes contained in the Tax Cuts and Jobs Act of 2017 ("TCJA"), as explained in Exhibit I.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies which, as of the time this filing is submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

**National Council on
Compensation Insurance**

The Honorable Doug Ommen
