SCHEDULE A
RULES FOR IDENTIFYING DEATH MATCHES

In comparing Company's records of its insured's, annuitants, Annuity Contract owners, and retained asset account owners against the DMF and any updates thereto, the governing principle to be followed shall be establishing whether or not a unique biological individual identified within the Company's data is the same as a unique biological individual identified on the DMF in a case where a benefit is due and payable. In comparing the Company's records of its insured's, annuitants, Annuity Contract owners, and retained asset account holders against the DMF, the Company shall utilize the following criteria set forth below as the minimum standard for determining what constitutes a match.

Category 1: "Exact Social Security Number Match" occurs when the Social Security Number contained in the data found in the Company's records matches exactly to the Social Security Number contained in the DMF.

Category 2: Non-Social Security Number Match occurs in any of the following circumstances:

1. The Social Security Number contained in the data found in the Company's records matches in accordance with the Fuzzy Match Criteria listed below to the Social Security Number contained in the DMF, the First and Last Names match either exactly or in accordance with the Fuzzy Match Criteria listed below and the Date of Birth matches "exactly."
2. The Company's records do not include a Social Security Number or where the Social Security Number is incomplete (less than 7 digits) or otherwise invalid (e.g., 111111111, 999999999, 123456789), and there is a First Name, Last Name, and Date of Birth combination in the data produced by the Company that is a match against the data contained in the DMF where the First and Last Names match either exactly or in accordance with the Fuzzy Match Criteria listed below and the Date of Birth matches "exactly" subject to paragraph 3 immediately below.
3. If there is more than one potentially matched individual returned as a result of the process described in paragraphs 1 and 2 immediately above immediately above, or if both the Social Security Number and Date of Birth found in the Company's Records match in accordance with the Fuzzy Match Criteria listed below then the Company shall run the Social Security Numbers obtained from the DMF for the potential matched individuals against Accurint for Insurance or an equivalent database. If a search of those databases shows that the Social Security Number is listed at the address in the Company's records for the insured, then a Non-Social Security Number Match will be considered to have been made only for individuals with a matching address.

4. If the Company's systems do not contain a complete "Date of Birth," then a "Date of Birth" exact match will be found to exist where the data that is available on the Company's systems does not conflict with the data contained in the DMF. By way of example, if the Company's systems only contain a month and year of birth, an exact "Date of Birth" match will exist if the DMF record contains the same month and year of birth. Additionally, if the Company's systems only contain a year of birth or contain a complete date of birth that includes a month and day of 1/1 (e.g., January 1) followed by a year of birth, the Date of Birth will be deemed to match exactly where the year of birth in the data that is available on the Company's systems is within one (1) year of the year of birth listed in the DMF. By way of example, if the Company's systems contain 1/1/1934, an "exact" Date of Birth match will exist if the DMF record contains a year of birth of 1933, 1934 or 1935.

Fuzzy Match Criteria:

1. A "First Name" fuzzy match includes one or more of the following:
 - a. "First Name" "Nick Names": "JIM" and "JAMES." The Company shall utilize a Nickname database, such as the pd Nickname database from Peacock Data, Inc. or an equivalent database, as well as publicly available lists of names and nicknames to identify matching First Names where a nickname is used on one or both sides of the match.
 - b. "Initial" instead of full First Name: "J FOX" and "JAMES FOX."
 - c. "Metaphone" (a recognized and accepted phonetic name matching algorithm created by Lawrence Philips and originally published in 1990): "BUDDY" and "BUDDIE."
 - d. Data entry mistakes with a maximum difference of one character for a First Name at least five characters in length: "HARRIETTA" and "HARRIETA."
 - e. If First Name is provided together with Last Name in a "Full Name" format and "First Name" and "Last Name" cannot be reliably distinguished from one another: "ROBERT JOSEPH," both "JOSEPH ROBERT" and "ROBERT JOSEPH."
 - f. Use of interchanged First Name and "Middle Name": "ALBERT E GILBERT" and "EARL A GILBERT."
 - g. Compound First Name: "SARAH JANE" and "SARAH," or "MARY ANN" and "MARY."

h. Use of "MRS." + "HUSBAND'S First Name + Last Name:" "MRS DAVID KOOPER" and "BERTHA KOOPER" where the Date of Birth and Social Security Number match exactly and the Last Name matches exactly or in accordance with the Fuzzy Match Criteria listed herein.

2. A "Last Name" fuzzy match includes one or more of the following:

a. "Anglicized" forms of last names: "MACDONALD" and "MCDONALD."

b. Compound last name: "SMITH" and "SMITH-JONES."

c. Blank spaces in last name: "VON HAUSEN" and "VONHAUSEN."

d. "Metaphone" (a recognized and accepted phonetic name matching algorithm created by Lawrence Philips and originally published in 1990): "GONZALEZ" and "GONZALES."

e. First Name is provided together with Last Name in a "Full Name" format and First Name and Last Name cannot be reliably distinguished from one another: "ROBERT JOSEPH," both "JOSEPH ROBERT" and "ROBERT JOSEPH."

f. Use of apostrophe or other punctuation characters in Last Name: "O'NEAL" and "ONEAL."

g. Data entry mistakes with a maximum difference of one character for Last Name: "MACHIARELLI" and "MACHIAVELLI."

h. Last Name Cut-off. A match will be considered to have been made where due to the length of the Last Name, some of the last letters were not saved in the database: "Brezzinnows" and "Brezzinnowski" and "Tohightower" and "Tohightowers."

i. Married Female Last Name Variations: A fuzzy Last Name match will be considered to have been made even though the data does not match on the Last Name of a female if the Date of Birth and Social Security Number match exactly and the First Name matches exactly or in accordance with the Fuzzy Match Criteria listed herein.

3. A "Social Security Number" fuzzy match includes one of the following:

a. Two Social Security Numbers with a maximum of two digits in difference, any number position: "123456789" and "123466781."

b. Two consecutive numbers are transposed: "123456789" and "123457689."

- c. If a Social Security Number is less than nine digits in length (with a minimum of 7 digits) and is entirely embedded within the other Social Security Number: "1234567" and "0123456789.

Other Matches and Mismatches

Notwithstanding the fact that a policy is listed as a match in accordance with the foregoing rules, there will not be a reportable match if the Company is able to produce competent evidence to establish that the unique biological individual identified in the Company's data is not the same as a unique biological individual identified on the DMF or such individual is not dead.
