NOTES TO FINANCIAL STATEMENTS

- 1. Summary of Significant Accounting Policies and Going Concern
 - The accompanying financial statements of the Association have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners as modified by Iowa Administrative Code Section 0371B for insurance companies domiciled in the State of Iowa.
 - b. The preparation of the financial statements of the Association in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.
 - Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned c. premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Asset values are generally stated as follows: Short-term investments at amortized cost; bonds at amortized cost for investment grade, and the lower of amortized cost or fair value for below investment grade; stocks at fair value. The pro rata method was used in the amortization of bonds in this statement. This method provides for amortization of the premium or the discount in equal amounts over the life of the bond. The pro rata method is applied by dividing the premium or discount by the number of years, or interest periods, over the contract life of the security until maturity.

The Association uses the straight line method of depreciation for all of its real estate holdings with the lives varying depending on the type of building. 20. Fair Value Measurement

A. A framework for measuring fair value has been established which provides a fair value hierarchy that priorities the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Association has the ability to access.

Level 2: Inputs to the valuation methodology include: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2020 and 2019.

Debt and Equity Securities: Equity securities are valued at current fair value based on unadjusted quoted prices in the active investment market at the Statement of Assets, Liabilities and Policyholders' Surplus - Statutory date. Debt securities below investment grade are valued at the lower of amortized cost or fair value at the Statement of Assets, Liabilities, and Policyholders' Surplus - Statutory date. These totaled \$3,208,488 and \$2,758,848 at December 31, 2020 and 2019, respectively.

NOTES TO FINANCIAL STATEMENTS

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Association believes its valuation methods are appropriate and consistent with market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
