This First Amended and Restated Form A Statement Regarding the Acquisition of Control of or Merger with a Domestic Insurer ("Application") seeks the approval of the Insurance Commissioner of the State of Iowa (the "Commissioner") pursuant to the requirements of Iowa Code Section 521A.3 for the acquisition of control of the Domestic Insurers by the Applicants (the "Proposed Acquisition").

This Application amends and restates in its entirety the Form A Statement Regarding the Acquisition of Control of or Merger with a Domestic Insurer filed with the Division on August 16, 2023 (the "Original Application").

The Applicants have requested by separate letter dated August 16, 2023 confidential treatment and nondisclosure of certain information identified by an asterisk in the Index of Exhibits set forth in Item 12 herein (the "Confidential Information") based on Iowa Code §§22.7(3) and (6) and 505.8 and Iowa Administrative Code §§191-2.12(1) because the Confidential Information constitutes (1) trade secrets recognized and protected by law and (2) reports made to the Division which, if released, would give an advantage to competitors and serve no public purpose.

ITEM 1. INSURER AND METHOD OF ACQUISITION

(a) Domestic Insurers

The name and address of each of the Domestic Insurers to which this Application relates are:

American Equity Investment Life Insurance Company ("AEILIC")
6000 Westown Parkway
West Des Moines, Iowa 50266

Eagle Life Insurance Company ("Eagle")
6000 Westown Parkway
West Des Moines, Iowa 50266

The Domestic Insurers are Iowa domestic life insurance companies. Eagle is a direct, wholly owned subsidiary of AEILIC, which is, in turn, a direct, wholly owned subsidiary of American Equity Investment Life Holding Company, an Iowa corporation ("AEL Holdco"). AEL Holdco is listed on the New York Stock Exchange ("NYSE") under the trading symbol "AEL."

(b) Method of Acquisition

As of July 4, 2023, Brookfield Reinsurance Ltd. (f/k/a Brookfield Asset Management Reinsurance Partners Ltd.), a Bermuda exempted company limited by shares ("Brookfield Reinsurance"), beneficially owns an approximate 20.38% interest in AEL Holdco, through its wholly owned indirect subsidiaries North End Re (Cayman) SPC ("North End Re"), which, as of July 4, 2023, holds an interest of approximately 15.43% in AEL Holdco, and Freestone Re Ltd.

1009261043v26

("Freestone" and, together with North End Re, the "Brookfield Reinsurance Group Shareholders"), which, as of July 4, 2023, holds an interest of approximately 4.95% in AEL Holdco (such ownership, the "Initial Investment"). The Initial Investment was consummated pursuant to the Investment Agreement, dated October 17, 2020, by and among AEL Holdco, Brookfield Corporation (f/k/a Brookfield Asset Management Inc.) and Burgundy Acquisitions I Ltd.[1]

In connection with the Initial Investment, North End Re, together with BAM Re Holdings Ltd., Brookfield Reinsurance, BAM Re Partners Trust, BAM Re Trustee Ltd., Partners FC Ltd., Partners FC II Ltd. (f/k/a Partners FC Inc.), Partners BK Ltd., Brian Kingston and James Bruce Flatt (collectively, the "Prior Applicants"), submitted an application for the acquisition of control of the Domestic Insurers to the Iowa Insurance Division (the "Division") on March 1, 2021, which was amended and restated on September 9, 2021 and further amended and restated on September 27, 2021 (collectively, the "Prior Application"). The Prior Application was approved by the Commissioner on December 27, 2021 and the Prior Applicants were approved as control persons of each of the Domestic Insurers (the "Prior Approval").

On July 4, 2023, AEL Holdco, Brookfield Reinsurance, Arches Merger Sub Inc., an Iowa corporation and an indirect, wholly owned subsidiary of Brookfield Reinsurance ("Merger Sub"), and, solely for certain limited purposes, Brookfield Asset Management Ltd., a company incorporated under the laws of the Province of British Columbia ("BAM"), entered into the Agreement and Plan of Merger (the "Merger Agreement"), which provides that, upon the terms and subject to the conditions set forth therein, and pursuant to applicable provisions of the Iowa Business Corporation Act, at the effective time of the transactions contemplated thereby, Merger Sub will merge with and into AEL Holdco (the "Merger"), with AEL Holdco surviving the Merger as an indirect, wholly owned subsidiary of Brookfield Reinsurance (the "Surviving Company"). Following the consummation of the Proposed Acquisition, Brookfield Reinsurance will indirectly own 100% of the common shares of the Surviving Company, which will indirectly own 100% of the issued and outstanding shares of capital stock of each of the Domestic Insurers. BAM will not acquire, directly or indirectly, any interest in, or control or influence over, the Domestic Insurers as a result of the Merger or otherwise, and accordingly is not an Applicant under this Application. A copy of the Merger Agreement (and its exhibits) is attached hereto as Exhibit 1 and incorporated herein by reference.

At the effective time of the Merger, each issued and outstanding share of common stock, par value $1.00 per share, of AEL Holdco (each, an "AEL Holdco Common Share"), but excluding AEL Holdco Common Shares (a) held by holders exercising appraisal rights, (b) held by AEL Holdco as treasury stock, (c) held by Brookfield Reinsurance, Merger Sub or their subsidiaries, including Freestone, or (d) subject to AEL Holdco restricted stock awards, will be converted into the right to receive stock and cash as follows: (i) $38.85 per share in cash, without interest, subject to certain adjustments set forth in Section 3.01(e) of the Merger Agreement (the "Cash Consideration") and (ii) a number of fully-paid and nonassessable class A limited voting

[1] North End Re and Freestone are successors and assignees of Burgundy Acquisitions I Ltd. under the Investment Agreement.

shares of BAM ("BAM Class A Stock") equal to the Exchange Ratio,[2] subject to certain adjustments set forth in Section 3.01(e) of the Merger Agreement, and cash in lieu of fractional shares of BAM Class A Stock (the "Stock Consideration" and together with the Cash Consideration, the "Merger Consideration"). The Merger values AEL Holdco at approximately $4.6 billion.

The currently issued and outstanding shares of Series A and Series B preferred stock, each par value $1.00 per share, of AEL Holdco will be unaffected by the Merger and remain outstanding.

Consummation of the Merger is subject to satisfaction or waiver of customary closing conditions, including approval of the Merger by AEL Holdco's shareholders[3], expiration or early termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the "HSR Act")[4], receipt of the regulatory approvals specified in the Merger Agreement, including the approval by the Commissioner of this Application, and the absence of any injunction or restraint making illegal or otherwise prohibiting the consummation of the Merger. Change of control filings, or equivalent exemption requests, have been filed with the Bermuda Monetary Authority and the domiciliary regulators of AEL Holdco's insurance company subsidiaries and captives domiciled in Arizona, Vermont and New York.

The foregoing summary of the terms of the Merger Agreement is qualified in its entirety by reference to the Merger Agreement.

In connection with the Merger, the Applicants intend to undertake an internal reorganization in order to promote operational efficiency, enhance the group capital structure and consolidate post-closing ownership of AEL Holdco (the "Internal Reorganization"). Specifically, pursuant to the Internal Reorganization:

1. Prior to the Merger, ownership of the AEL Holdco Common Shares acquired pursuant to the Initial Investment will be transferred as described below to simplify and consolidate ownership of the Domestic Insurers following the Merger.

    - American National Group, LLC ("ANAT") will acquire 100% of the AEL Holdco Common Shares currently held by its direct wholly-owned subsidiary, Freestone (representing an approximate 4.95% interest in AEL Holdco as of July 4, 2023).

---

2 The Exchange Ratio means: if the BAM Class A Stock price is (i) greater than $35.51, the quotient (rounded to five decimal places) obtained by dividing (x) $17.65 by (y) the BAM Class A Stock price; (ii) less than or equal to $35.51, but greater than or equal to $30.48, 0.49707; or (iii) less than $30.48, the quotient (rounded to five decimal places) obtained by dividing (x) $15.15 by (y) the BAM Class A Stock price.

3 AEL Holdco's shareholders approved the Merger at the Special Meeting of the Shareholders of AEL Holdco held on November 10, 2023.

4 Brookfield Reinsurance and AEL Holdco filed their respective notices under the HSR Act on August 16, 2023 and the 30-day waiting period expired at 11:59 p.m., ET, on September 15, 2023.

- BAM Re Holdings Ltd. ("BAM Re Holdings") will acquire 100% of the AEL Holdco Common Shares currently held by its direct wholly-owned subsidiary, North End Re (representing an approximate 15.43% interest in AEL Holdco as of July 4, 2023). Pursuant to Iowa Code Section 521A.3(1)(b), the Applicants are hereby providing the Commissioner with notice of North End Re's intent to divest its indirect controlling interest in the Domestic Insurers.

Prior to the Merger, BAMR US Holdings LLC ("BAMR US Holdings") will contribute 100% of the equity interests of ANAT ("ANAT Interests") to its direct subsidiary Topco (as defined below), who will in turn contribute the ANAT Interests to its direct subsidiary Midco (as defined below), in each case in exchange for equity issued by Topco and Midco respectively.

Attached hereto as Exhibit 3(a) is the abbreviated organizational structure chart of the Applicants immediately following completion of this Step 1 of the Internal Reorganization, but prior to completion of the Merger.

2. Immediately following, and on the same day as, the Merger, the transactions described below will be undertaken in order to implement the post-Merger holding company structure. Attached hereto as Exhibit 3(b) is the abbreviated organizational structure chart of the Applicants immediately following completion of the Merger.

    - BAM Re Holdings will transfer a number of AEL Holdco Common Shares representing an approximate 5% interest in AEL Holdco to ANAT.

    - ANAT will merge into the Surviving Company (the "Post-Closing Merger"), such that the surviving entity of the Post-Closing Merger is the Surviving Company (the "Surviving Holdco"). The Surviving Holdco will promptly thereafter be re-domiciled from Iowa to Delaware and will be renamed American National Group Inc. ("ANGI"). The Applicants have submitted Form A exemption requests to the domiciliary state insurance regulators of the insurance companies currently owned by ANAT in connection with the Surviving Holdco, Topco and Midco becoming controllers of such insurance companies as a result of this proposed merger. Approvals of the Form A exemption requests by such insurance regulators have been requested by the Applicants prior to closing of the transactions contemplated by the Merger Agreement (the "Closing"), but are not, nor would the failure to obtain them, on the requested terms or at all, contribute to the failure of, conditions to Closing.

    Attached hereto as Exhibit 3(c) is the abbreviated organizational structure chart of the Applicants and the Domestic Insurers following consummation of the Internal Reorganization.

As a result of the Merger and the Internal Reorganization, and upon implementation of the post-Merger holding company structure as described above, ANGI will be the direct shareholder of AEILIC and will therefore indirectly own Eagle, which will remain as a wholly owned subsidiary of AEILIC. The interests in ANGI will be held approximately 5% (and no more than 15%) by BAM Re Holdings and 95% (and no less than 85%) by BAMR US Holdings, which in turn are each wholly owned, directly or indirectly, by Brookfield Reinsurance.

ITEM 2. IDENTITY AND BACKGROUND OF EACH OF THE APPLICANTS

(a) Names and Addresses of the Applicants

The name and address of each of the Applicants seeking to acquire control over the Domestic Insurers are:

American National Group, LLC

(b) Business Operations of the Applicants

The principal business activity of each of the Applicants for the past five (5) years (or for such lesser period as such person and any predecessors thereof has been in existence) is described below.

American National Group, LLC (together with its subsidiaries, including Freestone, "American National")

Formed on January 3, 2020, ANAT is a Delaware limited liability company. It is a direct, wholly owned subsidiary of BAMR US Holdings. The principal business of ANAT is to serve as an intermediate holding company for the American National group of companies, which provides personal and commercial property and casualty insurance, life insurance and annuities. ANAT's operating subsidiaries are domiciled in Texas, Missouri, New York and Bermuda. As described above, as part of the Internal Reorganization, in connection with the Merger, ANAT will acquire (i) an approximate 4.95% interest in AEL Holdco from its wholly-owned subsidiary, Freestone and (ii) an approximate 5% interest in AEL Holdco from its indirect parent company, BAM Re Holdings.

ANG Midco I LLC ("Midco")

Formed on December 1, 2023, Midco is a Delaware limited liability company. It is a direct, wholly owned subsidiary of Topco (as defined below). The principal business of Midco is to serve as an intermediate holding company.

ANG Topco I LLC ("Topco")

Formed on December 1, 2023, Topco is a Delaware limited liability company. It is a direct, wholly owned subsidiary of BAMR US Holdings (as defined below). The principal business of Topco is to serve as an intermediate holding company.

BAMR US Holdings LLC

Formed on September 22, 2022, BAMR US Holdings is a Delaware limited liability company. It is a direct, wholly owned subsidiary of BAMR US (as defined below). The principal business of BAMR US Holdings is to serve as an intermediate holding company.

Prior to BAMR US Holdings' formation, the entity did not operate as a business.

BAMR US Holdings (Bermuda) I Ltd. ("BAMR US")

Formed on August 2, 2021, BAMR US is an exempted company established under the laws of Bermuda. It is a direct, wholly owned subsidiary of BAM Re Holdings. The principal business of BAMR US is to serve as an intermediate holding company.

Prior to BAMR US' formation, the entity did not operate as a business.

BAM Re Holdings

Formed on February 16, 2021, BAM Re Holdings is an exempted company established under the laws of Bermuda. It is a direct, wholly owned subsidiary of Brookfield Reinsurance. BAM Re Holdings owns all of the equity interests of Brookfield Annuity Holdings Inc., BAMR US Holdings (Bermuda) I Ltd., North End Re Ltd. and North End Re. The principal business of BAM Re Holdings is to serve as an intermediate holding company. As described above, as part of the Internal Reorganization, in connection with the Merger, BAM Re Holdings will transfer its approximate 5% interest in AEL Holdco to ANAT.

Prior to BAM Re Holdings' formation, the entity did not operate as a business.

Brookfield Reinsurance

On June 28, 2021, Brookfield Reinsurance (f/k/a Brookfield Asset Management Reinsurance Partners Ltd.) was spun off from Brookfield Corporation and became a separate, publicly traded company that owns and operates insurance and reinsurance businesses. Prior to the spin-off, Brookfield Reinsurance operated through its predecessor, Brookfield Annuity Holdings Inc. (Canada), for a period of over five years.

Brookfield Reinsurance is a Bermuda-based insurance and reinsurance holding company with a long-term commitment to the insurance sector and to the policyholders and clients of its insurance and reinsurance subsidiaries. At present, Brookfield Reinsurance operates through its subsidiaries in the United States, Canada, the Cayman Islands and Bermuda. Brookfield Reinsurance currently operates in the United States primarily through ANAT, which it acquired on May 26, 2022. ANAT provides personal and commercial property and casualty insurance, life insurance and annuities to policyholders throughout the United States, the District of Columbia and Puerto Rico. Brookfield Reinsurance also owns Brookfield Annuity Company, a leader in the Canadian pension risk transfer (group annuity) market, and North End Re, a reinsurer licensed in Bermuda and the Cayman Islands focused on providing reinsurance solutions to insurers with long duration liabilities.

On February 8, 2023, Brookfield Reinsurance and BNRE Bermuda Merger Sub Ltd., a Bermuda exempted company limited by shares and a wholly owned, indirect subsidiary of Brookfield Reinsurance, entered into an agreement and plan of merger with Argo Group International Holdings, Ltd. ("Argo Group"), pursuant to which Brookfield Reinsurance acquired ownership of Argo Group and its subsidiaries. In connection with Brookfield Reinsurance's acquisition of Argo Group, the Prior Applicants, other than North End Re, together with BAMR US Holdings LLC, BAMR US Holdings (Bermuda) I Ltd. and BNRE Triangle Acquisition Inc. (collectively, the "Argo Applicants") filed applications for the acquisition of control of Argo Group in Illinois, Virginia, Pennsylvania, New York, Bermuda and Italy (the "Argo Applications"). The Argo Applications were approved in the fourth quarter of 2023. As of the closing on November 16, 2023, the Argo Group is now a separate subsidiary and group of operating companies within Brookfield Reinsurance and is not within ANAT.

The Brookfield Reinsurance capital structure includes two classes of voting shares. The class A exchangeable limited voting shares of Brookfield Reinsurance (the "Brookfield Reinsurance Class A Shares") are publicly traded on the NYSE and the Toronto Stock Exchange ("TSX") under the symbol "BNRE." Shareholders of this class are entitled to elect half of the board of directors of Brookfield Reinsurance. Each Brookfield Reinsurance Class A Share has been structured to be economically equivalent to one Brookfield Corporation class A limited voting share and is entitled to receive distributions at the same time and in the same amount as dividends on the Brookfield Corporation class A limited voting shares. The Brookfield

Reinsurance Class A Shares are also exchangeable for Brookfield Corporation class A limited voting shares at the election of the holder on a one-for-one basis. To the knowledge of Brookfield Reinsurance, based on information filed with the SEC of the date of this Application, Bruce Flatt, an Applicant pursuant to this Application, is the only person holding (with the full power to vote) 10% or more of the Brookfield Reinsurance Class A Shares.[5]

If Brookfield Reinsurance elects to redeem the Brookfield Reinsurance Class A Shares, Brookfield Corporation may elect, subject to receipt of any required regulatory approvals, to acquire all of the outstanding Brookfield Reinsurance Class A Shares in exchange for Brookfield Corporation class A shares at an exchange rate of one Brookfield Corporation class A share per Brookfield Reinsurance Class A Share held (subject to adjustment to reflect certain capital events) or its cash equivalent based on the NYSE closing price of one Brookfield Corporation class A share on the trading day immediately preceding the announcement of such redemption plus all unpaid distributions, if any (the form of payment to be determined at the election of Brookfield Corporation).

In addition to the Brookfield Reinsurance Class A Shares, Brookfield Reinsurance has outstanding class A-1 exchangeable non-voting shares (the "Brookfield Reinsurance Class A-1 Shares"), class B limited voting shares (the "Brookfield Reinsurance Class B Shares") and class C non-voting shares (the "Brookfield Reinsurance Class C Non-Voting Shares").

The Brookfield Reinsurance Class A-1 Shares are non-voting. Each Class A-1 Share is (i) convertible into a Brookfield Reinsurance Class A Share and (ii) exchangeable into a Brookfield Corporation class A limited voting share, in each case on a one-for-one basis. No holder of Brookfield Reinsurance Class A-1 Shares may convert, and Brookfield Reinsurance will not accept for conversion, any Brookfield Reinsurance Class A-1 Share if, following conversion, such holder would hold more than 9.9% of the issued and outstanding Brookfield Reinsurance Class A Shares, unless such holder has received all necessary regulatory approvals to hold more than 9.9% of the Brookfield Reinsurance Class A Shares.

The Brookfield Reinsurance Class B Shares are entitled to elect the other half of the board of directors of Brookfield Reinsurance, to receive equivalent distributions as the Brookfield Reinsurance Class A Shares and to approve all matters put to shareholders of Brookfield Reinsurance for approval, voting separately as a class. All of the Brookfield Reinsurance Class B Shares are owned by BAM Re Class B Partnership (as defined below).

The Brookfield Reinsurance Class C Non-Voting Shares do not carry any voting rights; however, the holders of these shares are entitled to the residual economics of Brookfield

---

5 According to a Schedule 13G filed with the SEC on June 8, 2023 by Mawer Investment Management Ltd. ("Mawer"), a third party investment adviser unrelated to and unaffiliated with any Applicant, Mawer has beneficial ownership of 11.02% of the outstanding Brookfield Reinsurance Class A Shares and sole voting power over 6.75% of the outstanding Brookfield Reinsurance Class A Shares. Mawer is therefore not presumed to control the Domestic Insurers as defined under Iowa Code Section 521A.1(3). Additionally, in such Schedule 13G, Mawer certified that such Brookfield Reinsurance Class A Shares were not acquired and are not held for the purpose of or with the effect of changing or influencing the control of Brookfield Reinsurance and were not acquired and are not held in connection with or as a participant in any transaction having that purpose or effect.

Reinsurance following payment of distributions to holders of the Brookfield Reinsurance Class A Shares and Brookfield Reinsurance Class B Shares, and subject to the prior rights of holders of Brookfield Reinsurance's junior preferred shares and senior preferred shares (if any such shares are issued). All of the Brookfield Reinsurance Class C Non-Voting Shares are currently owned by Brookfield Corporation and one of its wholly owned subsidiaries, BAM Re LTIP Holdings ULC. The Brookfield Reinsurance Class C Non-Voting Shares held directly by Brookfield Corporation are expected to be contributed to certain other wholly owned subsidiaries of Brookfield Corporation (the "Class C Share Transferees"). The holders of the Brookfield Reinsurance Class C Non-Voting Shares are entitled to consent to: (a) any redemption of the Brookfield Reinsurance Class A Shares by Brookfield Reinsurance; (b) any amendment to Brookfield Reinsurance's memorandum of association or bye-laws; (c) any merger or similar reorganization of Brookfield Reinsurance (including a sale of all or substantially all of its assets); or (d) a continuance (*i.e.* re-domiciliation) of Brookfield Reinsurance to another jurisdiction of incorporation. The consent rights of the Brookfield Reinsurance Class C Non-Voting Shares pertain to actions directly related to Brookfield Reinsurance, rather than the operations or ownership by Brookfield Reinsurance of its regulated insurance and reinsurance companies. Any change in ownership of the insurance and reinsurance companies owned by Brookfield Reinsurance would be subject to the prior approval of applicable insurance regulators. Any holder of the Brookfield Reinsurance Class C Non-Voting Shares has the right to convert any Brookfield Reinsurance Class A Shares it receives from time to time through exchanges of Brookfield Reinsurance Class A Shares into Brookfield Reinsurance Class C Non-Voting Shares.

Concurrently with the filing of the Original Application, Brookfield Corporation, BAM Re LTIP Holdings ULC and the Class C Share Transferees filed letters with the Division disclaiming control of Brookfield Reinsurance and its subsidiaries.

The holders of the Brookfield Reinsurance Class C Non-Voting Shares also have the right, in certain limited circumstances, subject to applicable law, to require Brookfield Reinsurance to commence a liquidation of Brookfield Reinsurance following the occurrence of certain events specified in Brookfield Reinsurance's memorandum of association and bye-laws. The holders of Brookfield Reinsurance Class C Non-Voting Shares do not have any rights to commence a liquidation of any insurance or reinsurance subsidiaries of Brookfield Reinsurance. Upon any liquidation, dissolution or winding up of Brookfield Reinsurance, Brookfield Corporation may elect to acquire all (but not less than all) of the outstanding Brookfield Reinsurance Class A Shares for one Brookfield Corporation class A share per Brookfield Reinsurance Class A Share held (subject to adjustment to reflect certain capital events) plus all unpaid distributions, if any.

Based on the above, Brookfield Corporation and BAM Re LTIP Holdings ULC do not, and the Class C Share Transferees will not, control Brookfield Reinsurance or have any voting or approval rights with respect to Brookfield Reinsurance through the Brookfield Reinsurance Class C Non-Voting Shares, other than those limited liquidation and redemption rights described above.

Brookfield Corporation and Brookfield Reinsurance are parties to contractual arrangements under which Brookfield Corporation has agreed to provide certain services and support to Brookfield Reinsurance, as described below.

Brookfield Corporation has entered into a support agreement with Brookfield Reinsurance under which it has agreed to take various actions designed to support the economic equivalence of the Brookfield Reinsurance Class A Shares and the Brookfield Reinsurance Class A-1 Shares to the Brookfield Corporation class A limited voting shares for so long as the Brookfield Reinsurance Class A Shares are held by persons other than Brookfield Corporation and there has not been an amendment to the exchange feature attaching to such shares. Brookfield Corporation has provided Brookfield Reinsurance with an equity commitment in the amount of $2 billion and has provided BAM Re Holdings and certain of its subsidiaries with an extension of credit in the form of a revolving credit facility in the amount of $400 million for working capital purposes. Brookfield Corporation also provides Brookfield Reinsurance with the services of Brookfield Reinsurance's Chief Executive Officer, Chief Financial Officer and Chief Investment Officer and certain other administrative services at cost pursuant to an administrative services agreement.

BAM Re Partners Trust ("BAM Re Class B Partnership")

Formed on June 17, 2021, BAM Re Class B Partnership is a trust formed under the laws of Bermuda that beneficially owns 100% of the Brookfield Reinsurance Class B Shares. The trustee of BAM Re Class B Partnership is BAM Re Trustee Ltd. ("BAM Re Trustee"). In accordance with the governing documents of BAM Re Class B Partnership, all actions to be taken by BAM Re Class B Partnership in connection with its ownership of the Brookfield Reinsurance Class B Shares are determined by BAM Re Trustee, with no single individual or entity controlling BAM Re Class B Partnership.

As described above, as holder of the Brookfield Reinsurance Class B Shares, BAM Re Class B Partnership (i) is entitled to elect half of the board of directors of Brookfield Reinsurance, (ii) receives equivalent distributions as the Brookfield Reinsurance Class A Shares and (iii) has the right to approve matters put to Brookfield Reinsurance shareholders for approval, voting separately as a class.

The beneficial interests in BAM Re Class B Partnership, and the voting interests in its trustee, BAM Re Trustee, are held through entities owned by (i) Bruce Flatt (47.68%),[6] (ii) Brian Kingston (19%),[7] and (iii) Sachin Shah, Anuj Ranjan, Connor Teskey, Cyrus Madon and Sam Pollock (33.32%) in equal parts; being approximately 6.66% each, individually.

As described above, although no one person controls BAM Re Class B Partnership, as a result of his 47.68 % beneficial interest in BAM Re Class B Partnership, and his voting interest in BAM Re Class B Partnership and as the largest holder of the Brookfield Reinsurance Class A

---

6 As described below, Bruce Flatt owns his beneficial interest in BAM Re Class B Partnership and voting interests in BAM Re Trustee through Partners FC Ltd. and Partners FC II Ltd.

7 As described below, Brian Kingston owns his beneficial interest in BAM Re Class B Partnership and voting interests in BAM Re Trustee through Partners BK Ltd.

Shares, Bruce Flatt is listed as an Applicant, along with Partners FC Ltd. and Partners FC II Ltd., the entities through which he holds beneficial interests and voting interests in BAM Re Class B Partnership and BAM Re Trustee, respectively. As of the date of this Application, Mr. Flatt owns less than 19.9% of the Brookfield Reinsurance Class A shares.

Further, as a result of his 19% beneficial interest in BAM Re Class B Partnership and voting interest in BAM Re Trustee, Brian Kingston is listed as an Applicant, along with Partners BK Ltd., the entity through which he holds beneficial interests and voting interests in BAM Re Class B Partnership and BAM Re Trustee, respectively. As of the date of this Application, Mr. Kingston owns less than 1% of the Brookfield Reinsurance Class A Shares.

Both Mr. Flatt and Mr. Kingston were approved as controllers of the Domestic Insurers pursuant to the Division's order dated December 21, 2021.

Prior to BAM Re Class B Partnership's formation, the entity did not operate as a business.

<u>BAM Re Trustee</u>

Formed on June 2, 2021, BAM Re Trustee is an exempted company established under the laws of Bermuda. The principal business of BAM Re Trustee is to serve as the trustee of BAM Re Class B Partnership.

Prior to BAM Re Trustee's formation, the entity did not operate as a business.

<u>Partners FC Ltd.</u>

Formed on May 17, 2021, Partners FC Ltd. is an exempted company established under the laws of Bermuda. It is the vehicle through which Mr. Flatt owns a 47.68% beneficial interest in BAM Re Class B Partnership and a 47.68% voting interest in its trustee, BAM Re Trustee.

Partners FC II Ltd. is the sole shareholder of Partners FC Ltd.

Prior to Partners FC Ltd.'s formation, the entity did not operate as a business.

<u>Partners FC II Ltd.</u>

Formed on March 3, 2017 in the British Virgin Islands and continued into Bermuda on December 31, 2021, Partners FC II Ltd. is an exempted company governed by the laws of Bermuda. It is the sole shareholder of Partners FC Ltd.

Bruce Flatt is the sole shareholder of Partners FC II Ltd.

Prior to Partners FC II Ltd.'s formation, the entity did not operate as a business.

Partners BK Ltd. ("Partners BK")

Formed on May 17, 2021, Partners BK is an exempted company established under the laws of Bermuda. It is the vehicle through which Mr. Kingston owns a 19% beneficial interest in BAM Re Class B Partnership and a 19% voting interest in its trustee, BAM Re Trustee.

Brian Kingston is the sole shareholder of Partners BK.

Prior to Partners BK's formation, the entity did not operate as a business.

(c) Applicants' Organizational Charts

Attached hereto as Exhibit 2 is the organizational structure chart of the Domestic Insurers and the Applicants as of the date hereof, prior to the completion of the Proposed Acquisition. Attached hereto as Exhibit 3(a) is the abbreviated organizational structure chart of the Applicants immediately following completion of Step 1 of the Internal Reorganization, but prior to completion of the Merger. Attached hereto as Exhibit 3(b) is the abbreviated organizational structure chart of the Applicants immediately following the Merger. Attached hereto as Exhibit 3(c) is the abbreviated organizational structure chart of the Applicants immediately following consummation of the Internal Reorganization. These charts present on an abbreviated basis the identities of and the interrelationships among: (i) the Applicants and (ii) AEL Holdco and its subsidiaries. These charts list, as to each entity specified in the chart, the type of organization and the state or other jurisdiction of domicile. No court proceedings involving a reorganization or liquidation are pending with respect to any of the Applicants or any of their corporate affiliates.

ITEM 3. IDENTITY AND BACKGROUND OF INDIVIDUALS ASSOCIATED WITH THE APPLICANTS

An updated list of the directors and executive officers of each of the Applicants is attached hereto as Exhibit 4(a).

In accordance with the terms of the Merger Agreement, each of the current directors of AEL Holdco, including the current Chief Executive Officer of AEL Holdco (the "CEO") in his capacity as a director, will resign effective as of Closing, and the persons listed on Exhibit 4(b) as the directors of Merger Sub will become the directors of the Surviving Company. In connection with the Post-Closing Merger, the individuals named in Exhibit 4(b), being the current directors of ANAT, will be appointed as the directors of the Surviving Holdco (ANGI) and the individuals named in Exhibit 4(b), being the current executive officers of AEL Holdco (except for the CEO) and ANAT, respectively, will become the executive officers of the Surviving Holdco (ANGI). The Applicants are continuing to evaluate the composition of the board of directors of ANGI and may seek to appoint one or more additional directors following Closing. The Applicants will update the Division promptly to the extent there are any developments in this regard. The Applicants will also notify the Division of any changes to the proposed directors or officers of the Surviving Holdco (ANGI) that may occur in the ordinary course between the date of this Application and the Closing.

The NAIC Biographical Affidavits for the persons listed in Exhibit 4(a) and Exhibit 4(b) (other than individuals who are current executive officers of AEL Holdco) that do not have a cross were previously provided to the Division and submitted to a third-party background check service provider in connection with the Prior Application, and are incorporated herein by reference. The Applicants have confirmed that all of the information contained in such previously-submitted biographical affidavits remains true and correct in all material respects. The NAIC Biographical Affidavits for the persons listed in Exhibit 4(a) and Exhibit 4(b) (other than individuals who are current executive officers of AEL Holdco) that do have a cross have been provided as Exhibit 5 and were submitted to a third-party background check service provider. The business addresses, residence addresses, licenses and material occupations, offices or employment during the last five years are described in the Biographical Affidavits for each such person. To the knowledge of the Applicants, no person listed in Exhibit 4(a) or Exhibit 4(b) who is associated with the Applicants has been convicted in a criminal proceeding (excluding minor traffic violations) during the past ten years.

ITEM 4. NATURE, SOURCE AND AMOUNT OF CONSIDERATION

(a) Consideration

As described in Item 1, the aggregate amount of Merger Consideration to be paid to the holders of the AEL Holdco Common Shares in connection with the Closing will be: (i) cash in an amount equal to the Cash Consideration multiplied by the number of AEL Holdco Common Shares and (ii) shares of BAM Class A Stock having a value equal to the Stock Consideration (and cash in lieu of fractional shares of BAM Class A Stock) multiplied by the number of AEL Holdco Common Shares, in each case, outstanding as of immediately prior to the effective time of the Merger. The Merger values AEL Holdco at approximately $4.6 billion. Consummation of the Proposed Acquisition is not subject to any financing condition or contingency. Further details on the sources of the consideration are described in Exhibit 6.

In connection with the Proposed Acquisition, Brookfield Corporation, AEL Holdco, Brookfield Reinsurance and Merger Sub have entered into that certain Guaranty, dated as of July 4, 2023, pursuant to which Brookfield Corporation has guaranteed the obligation of Brookfield Reinsurance to deliver the Merger Consideration, reimburse expenses or indemnify AEL Holdco under the terms of the Merger Agreement and pay any monetary damages awarded to AEL Holdco by a court of competent jurisdiction for breach of the Merger Agreement. A copy of the Guaranty is attached hereto as Exhibit 8.

(b) Criteria

The terms of the Merger Agreement, including the nature and amount of the Merger Consideration, were agreed upon in an arms' length negotiation with advice of the parties' respective financial, legal and other advisors. The amount and type of consideration were determined in view of the consideration paid in other recent acquisitions of similar businesses, as well as the financial position and results of operation of the business to be acquired, including the past and present business operations, historical and potential earnings, financial condition and prospects, assets and liabilities and such other factors and information as Brookfield Reinsurance considered relevant under the circumstances. In addition, AEL Holdco's board of directors engaged J.P. Morgan Securities LLC and Ardea Partners LP to conduct a review of the transactions contemplated by the Merger Agreement and provide their opinion as to the fairness of the consideration to be paid in connection with the transactions contemplated by the Merger Agreement by Brookfield Reinsurance.

ITEM 5. FUTURE PLANS FOR INSURER

Pursuant to an Advisory Agreement (as described in Item 12(c)) between Brookfield Reinsurance and the CEO, the CEO will resign from his role as an officer and director of AEL Holdco and the Domestic Insurers effective as of Closing, and will transition to an advisory role with Brookfield Reinsurance. Brookfield Reinsurance has commenced a search for a replacement CEO and will keep the Division apprised of any developments in connection therewith.

Brookfield Reinsurance does not intend to deviate from the business and operating plan of the Domestic Insurers. Consistent with its philosophy and approach, Brookfield Reinsurance will manage AEL Holdco's financial condition with the goal of supporting anticipated organic growth and delivering on promises to policyholders and clients.

Brookfield Reinsurance intends to maintain and enhance AEL Holdco's presence and participation in the Iowa insurance community, including as an employer and as a leading Iowa-domiciled insurer. The Applicants intend to maintain the Domestic Insurers' headquarters and personnel in Des Moines.

Other than as noted in this Application (including the details on the sources, uses and nature of consideration described in Exhibit 6 and the three-year financial projections for each of the Domestic Insurers attached as Exhibit 9), neither the Applicants nor any person identified in Exhibit 4(a) or Exhibit 4(b) have any present plans to cause the Domestic Insurers to declare an extraordinary dividend, to liquidate the Domestic Insurers, to sell the Domestic Insurers' assets, to merge the Domestic Insurers with any person or persons, or to make any other material change to the Domestic Insurers' business operations, corporate structure, management or business plans previously filed with the Division. Any future change in the business operations of the Domestic Insurers would be undertaken in a manner consistent with sound business practices and the growth and stability of their respective businesses, and in accordance with applicable law, including any required regulatory approvals. Further details on the future plans of the Domestic Insurers are described in Exhibit 7.

Other than the resignation of the CEO noted above and in connection with any new hires or resignations that may occur in the ordinary course, the Applicants do not currently anticipate any changes to the directors or executive officers of the Domestic Insurers following the Closing. The Domestic Insurers will notify the Division of any changes to the directors or officers of the Domestic Insurers that may occur in the ordinary course between the date of this Application and the Closing.

See Exhibit 7 for further detail regarding the existing reinsurance agreement between North End Re and AEILIC, which was approved by the Commissioner on September 29, 2021 (submitted as Form D#1760) (the "AEILIC Reinsurance Agreement").

ITEM 6. VOTING SECURITIES TO BE ACQUIRED

Eagle currently has 2,500,000 shares of common stock issued and outstanding, all of which are directly owned by AEILIC. AEILIC currently has 2,500,000 shares of common stock issued and outstanding, all of which are directly owned by AEL Holdco.

Following the consummation of the Proposed Acquisition, the Applicants will become controlling persons of each of the Domestic Insurers as a result of Merger Sub merging with and into AEL Holdco, the indirect parent company of the Domestic Insurers. The terms and conditions of the transactions described in the prior paragraph are set forth in the Merger Agreement attached hereto as Exhibit 1 and are discussed in Items 1 and 4 above. The terms and conditions of the Merger Agreement were agreed upon in an arms' length negotiation with advice of the parties' respective financial, legal and other advisors.

The terms of the proposed Merger are summarized in Item 1(b) of this Application. A statement as to the method by which the fairness of the proposal was determined is included in Item 4(b) of this Application.

ITEM 7. OWNERSHIP OF VOTING SECURITIES

All of the issued and outstanding shares of common stock of Eagle are directly owned by AEILIC. In turn, all of the issued and outstanding shares of common stock of AEILIC are directly owned by AEL Holdco. Pursuant to the Initial Investment, the Brookfield Reinsurance Group Shareholders hold, as of July 4, 2023, approximately 20.38% of all of the issued and outstanding voting securities of AEL Holdco. Except as otherwise described in this Application, there are no voting securities of any class of the Domestic Insurers that are held of record, beneficially owned or concerning which there is a right to acquire beneficial ownership by the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a).

ITEM 8. CONTRACTS, ARRANGEMENTS, OR UNDERSTANDINGS WITH RESPECT TO VOTING SECURITIES OF THE INSURER

Concurrently with the execution of the Merger Agreement, AEL Holdco entered into a voting agreement (the "Voting Agreement") with the Brookfield Reinsurance Group Shareholders (*i.e.* Freestone and North End Re).

Pursuant to the Voting Agreement, subject to the terms and conditions set forth therein, each of Freestone and North End Re have agreed to vote all of the outstanding AEL Holdco Common Shares then beneficially owned by Freestone, North End Re or any of their respective affiliates (1) in favor of the approval of the Merger Agreement and the Merger and (2) against any other takeover proposal or other proposal or transaction that would in any manner impede, frustrate, prevent or nullify any provision of the Merger Agreement or the Merger. The Voting Agreement also includes waivers of certain provisions of the Investment Agreement, in order to, among other things, permit Brookfield Reinsurance to exercise certain rights under the Merger Agreement and to remove any limitations on voting under the Investment Agreement that would conflict with the Brookfield Reinsurance Group Shareholders' voting obligations under the Voting Agreement.

As of the date of the Voting Agreement, an aggregate of 15,886,066 AEL Holdco Common Shares, representing approximately 20.38% of the total voting power of the holders of capital stock of AEL Holdco, were beneficially owned by the Brookfield Reinsurance Group Shareholders subject to the Voting Agreement.

The foregoing description of the Voting Agreement does not purport to be complete and is subject to, and qualified in its entirety by reference to the full text of such agreement, a copy of which is attached hereto as Exhibit 10.

As part of the Internal Reorganization described above, in connection with, and prior to, the Merger, BAM Re Holdings will acquire 12,028,979 AEL Holdco Common Shares, representing approximately 15.43% of the total voting power of the holders of capital stock of AEL Holdco, from its wholly owned subsidiary, North End Re. BAM Re Holdings is expected to transfer approximately 5% of the total voting power of the holders of capital stock of AEL Holdco to ANAT immediately following, and on the same day as, the Merger. Also as part of the Internal Reorganization described above, in connection with and prior to the merger, ANAT will acquire 3,857,184 AEL Holdco Common Shares, representing approximately 4.95% of the total voting power of the holders of capital stock of AEL Holdco from its wholly-owned subsidiary, Freestone.

Other than as described above, the Merger Agreement, the Voting Agreement and the Investment Agreement, there are no contracts, arrangements or understandings with respect to any voting security of AEL Holdco or any of the Domestic Insurers in which the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a) is involved, including any transfer of any securities, joint ventures, loan or option arrangements, puts or calls, guarantees of loans, guarantees against loss or guarantees of profits, division of losses or profits or the giving or withholding of proxies.

ITEM 9. RECENT PURCHASES OF VOTING SECURITIES

None of the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a) has purchased any voting securities of AEL Holdco or any of the Domestic Insurers during the twelve (12) calendar months preceding the filing of this Application.

ITEM 10. RECENT RECOMMENDATIONS TO PURCHASE

Except in connection with the execution of the Merger Agreement, none of the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a) has made any recommendations to purchase any voting security of AEL Holdco or any of the Domestic Insurers, and no such recommendations have been made by anyone based upon interviews or at the suggestion of the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a), in each case during the twelve (12) calendar months preceding the filing of this Application.

ITEM 11. AGREEMENTS WITH BROKER-DEALERS

None of the Applicants, their respective affiliates or, to the knowledge of the Applicants, any person listed in Exhibit 4(a) has made any agreements, contracts or understandings with any broker-dealer as to solicitation of voting securities of AEL Holdco or any of the Domestic Insurers.

ITEM 12. FINANCIAL STATEMENTS AND EXHIBITS

(a) - (b) Listing of Exhibits; Financial Statements

As described in Item 2(b) of this Application, Brookfield Reinsurance was spun off from Brookfield Corporation on June 28, 2021. The audited financial statements of Brookfield Reinsurance for the years ended December 31, 2022, 2021 and 2020 are attached hereto as Exhibit 11(a). The audited financial statements of Brookfield Reinsurance for the years ended December 31, 2021, 2020 and 2019 are attached hereto as Exhibit 11(b).[8] Copies of the audited consolidated financial statements of Brookfield Annuity Holdings Inc., as the predecessor of Brookfield Reinsurance for financial reporting purposes, as at December 31, 2020 and 2019 and for the years ended December 31, 2020, 2019 and 2018, are attached hereto as Exhibit 11(c). The unaudited quarterly financial statements of Brookfield Reinsurance for the quarters ended March 31, 2023, June 30, 2023 and September 30,2023 are attached hereto as Exhibit 11(d). As a publicly traded company (New York Stock Exchange and Toronto Stock Exchange), Brookfield Reinsurance is subject to periodic and ongoing disclosure of its audited consolidated financial statements in the United States and Canada.

As described in Item 2(b) of this Application, Partners BK was formed on May 17, 2021. The unaudited annual financial statements of Partners BK for the years ended December 31, 2022 and 2021 are attached as Exhibit 11(e).

As described in Item 2(b) of this Application, BAM Re Trustee was formed on June 2, 2021. The unaudited annual financial statements of BAM Re Trustee for the years ended December 31, 2022 and 2021 are attached as Exhibit 11(f).

As described in Item 2(b) of this Application, BAM Re Class B Partnership was formed on June 17, 2021. The unaudited annual financial statements of BAM Re Class B Partnership for the years ended December 31, 2022 and 2021 are attached as Exhibit 11(g).

As described in Item 2(b) of this Application, ANAT was formed on January 3, 2020. The audited annual financial statements of ANAT for the years ended December 31, 2022, 2021

[8] The audited financial statements of Brookfield Reinsurance are prepared on a combined consolidated basis for a three year period.

and 2020 are attached as Exhibit 11(h). The unaudited quarterly financial statement of ANAT for the quarter ended March 31, 2023, June 30, 2023 and September 30, 2023 is attached hereto as Exhibit 11(i).

As described in Item 2(b) of this Application, BAM Re Holdings was formed on February 16, 2021. Stand-alone audited financial statements for BAM Re Holdings are not available because audit procedures are performed on the consolidated financial statements of its parent company, Brookfield Reinsurance (which are provided in Exhibit 11(a) and Exhibit 11(b)), rather than on BAM Re Holdings' stand-alone financial statements.

As described in Item 2(b) of this Application, BAMR US was formed on July 28, 2021. Stand-alone audited financial statements for BAMR US are not available because audit procedures are performed on the consolidated financial statements of its parent company, Brookfield Reinsurance (which are provided in Exhibit 11(a) and Exhibit 11(b)), rather than on BAMR US' stand-alone financial statements.

As described in Item 2(b) of this Application, BAMR US Holdings was formed on September 22, 2022. Stand-alone audited financial statements for BAMR US Holdings are not available because audit procedures are performed on the consolidated financial statements of its parent company, Brookfield Reinsurance (which are provided in Exhibit 11(a) and Exhibit 11(b)), rather than on BAMR US Holdings' stand-alone financial statements.

Attached as Exhibit 11(j) are the annual unaudited unconsolidated balance sheets of (i) BAM Re Holdings for the year ended December 31, 2021; (ii) BAMR US for the years ended December 31, 2022 and 2021 and (iii) BAMR US Holdings for the year ended December 31, 2022.

ANG Midco I LLC, ANG Topco I LLC, Partners FC Ltd. and Partners FC II Ltd. do not produce financial statements.

The Division has on file the personal financial statements of both Bruce Flatt and Brian Kingston in the form of a certified public accountant compilation for the years ended December 31, 2022, 2021 and 2020.

As noted in Item 5 of this Application, three-year financial projections of each of the Domestic Insurers are attached hereto as Exhibit 9.

A copy of the Voting Agreement, as described in Item 8 of this Application, is attached as Exhibit 10 hereto.

A copy of the Guaranty, as described in Item 4 of this Application, is attached as Exhibit 8 hereto.

Attached hereto as Exhibit 12(a) and Exhibit 12(b), respectively, are the annual reports issued to the stockholders of AEL Holdco for the years ended December 31, 2022 and 2021. The Domestic Insurers do not prepare annual reports to their stockholders.

Attached hereto as Exhibit 13(a) and Exhibit 13(b), respectively, are the annual reports issued to the stockholders of Brookfield Reinsurance for the years ended December 31, 2022 and 2021. Other than Brookfield Reinsurance, the Applicants do not prepare annual reports to their respective stockholders.

(c) Offers

Other than as described in this Application, the Applicants are not aware of any tender offers for, requests or invitations for, tenders of, exchange offers for, or agreements to acquire or exchange any voting securities of AEL Holdco or any of the Domestic Insurers, or any soliciting materials relating thereto.

Brookfield Reinsurance has entered into an advisory agreement with Anant Bhalla, the current CEO of AEL Holdco, who will be resigning from that position in connection with the transactions contemplated by the Merger Agreement (the "Advisory Agreement"). Pursuant to the Advisory Agreement, Mr. Bhalla will perform certain advisory services for Brookfield Reinsurance for up to 18 months following the effective time of the Merger. In exchange for such advisory services, Mr. Bhalla will earn an aggregate fee of $8 million, with (i) $6 million payable in the first 12 months (in monthly installments of $500,000) and (ii) $2 million payable in the final six months (in monthly installments of $333,333). If Mr. Bhalla is terminated by Brookfield Reinsurance without cause or resigns for good reason, in each case prior to the end of the 18-month advisory period, any unpaid portion of the $8 million advisory fee will become payable as of the date of such termination. The Advisory Agreement also provides that Mr. Bhalla will be subject to (i) a non-compete covenant as it relates to U.S. retail annuity insurance for the period beginning at the effective time of the Merger and ending on the earlier of (A) nine months after the effective time of the Merger and (B) September 30, 2024 (but subject to a minimum duration of six months) and (ii) a six-month post-engagement employee, client and distributor non-solicitation covenant.

In addition, it is anticipated that AEL Holdco will enter into retention agreements with certain executive officers of AEL Holdco and the parties are currently in the process of negotiating the final form of the retention agreement (the "Proposed Retention Agreement"). A copy of the Proposed Retention Agreement will be provided to the Division as soon as it is available. The Applicants plan to maintain the Domestic Insurers' headquarters and personnel in Des Moines. Other than the Advisory Agreement and the Proposed Retention Agreement, the Applicants are not contemplating entering into any proposed employment, consultation, advisory or management contracts concerning any of the Domestic Insurers except for the investment management agreements noted above.

ITEM 13. AGREEMENT REQUIREMENTS FOR ENTERPRISE RISK MANAGEMENT

The Applicants hereby designate Brookfield Reinsurance as the ultimate control person for purposes of providing the information required by Form F. Brookfield Reinsurance agrees to provide, to the best of its knowledge and belief, the information required by Form F within fifteen (15) days after the end of the month in which the acquisition of control occurs. Brookfield Reinsurance further agrees to annually provide the Form F as described in Iowa Code Section 521A.4 for so long as control exists. Brookfield Reinsurance further acknowledges that it and all subsidiaries within its insurance holding company system shall provide information to the Commissioner upon request as necessary to evaluate enterprise risk to the Domestic Insurers.

MISCELLANEOUS

AGREEMENT AND PLAN OF MERGER

This AGREEMENT AND PLAN OF MERGER (this "Agreement"), dated as of July 4, 2023, is by and among American Equity Investment Life Holding Company, an Iowa corporation (the "Company"), Brookfield Reinsurance Ltd., a Bermuda exempted company limited by shares ("Parent"), Arches Merger Sub Inc., an Iowa corporation and a wholly owned Subsidiary of Parent ("Merger Sub" and, together with Parent, the "Parent Entities"), and solely for purposes of Article VI and Sections 3.02(a)(ii)(B), 3.02(d), 7.02, 7.04, 7.14(d), 7.20 and 8.03(c), Brookfield Asset Management Ltd., a company incorporated under the laws of the Province of British Columbia ("BAM"). The Company, Parent, Merger Sub and BAM are each referred to in this Agreement as a "party" and collectively as the "parties".

WHEREAS, as of the date hereof, North End RE (Cayman) SPC and Freestone Re Ltd. (together, the "Parent Group Shareholders"), each an affiliate of Parent, collectively own 15,886,163 shares of common stock, par value $1.00, of the Company ("Common Stock");

WHEREAS, the Board of Directors of each of Parent (the "Parent Board") and Merger Sub (the "Merger Sub Board") have unanimously (i) determined that the terms of this Agreement are in the best interests of Parent and Merger Sub, as applicable, (ii) adopted this Agreement and the transactions provided for herein in which Merger Sub will, in accordance with the Laws of the State of Iowa and subject to the terms and conditions set forth herein, merge with and into the Company, with the Company surviving such merger (the "Merger") and (iii) declared the advisability of this Agreement and the Merger, and the Merger Sub Board has (x) directed that this Agreement and the transactions contemplated by this Agreement, including the Merger, be submitted to Parent (as Merger Sub's sole shareholder) for its approval and (y) resolved to recommend approval of the Merger and this Agreement to Parent (as Merger Sub's sole shareholder);

WHEREAS, the Board of Directors of the Company (the "Company Board") has unanimously (i) determined that this Agreement and the transactions contemplated by this Agreement, including the Merger, are advisable, fair to and in the best interests of the Company and its shareholders (other than the Parent Group Shareholders and any other Affiliates of Parent that are holders of Common Stock (collectively, "Parent Affiliated Shareholders")), including in consideration of community interest factors as authorized to be considered by Section 490.1108A of the IBCA ("community interest factors"), (ii) adopted this Agreement and the transactions contemplated by this Agreement, including the Merger, (iii) directed that this Agreement and the transactions contemplated by this Agreement, including the Merger, be submitted to the shareholders of the Company for their approval and (iv) resolved, subject to Section 7.03, to recommend approval of the Merger and this Agreement to the Company's shareholders;

WHEREAS, concurrently with the execution of this Agreement and as a condition to the willingness of Parent and Merger Sub to enter into this Agreement, the

Chief Executive Officer of the Company (the "CEO") has entered into a consulting agreement with Parent;

WHEREAS, concurrently with the execution of this Agreement, and as a condition to the willingness of the Company to enter into this Agreement, Parent has delivered to the Company a guaranty, dated as of the date hereof (the "Guaranty"), in favor of the Company and certain other Persons, and pursuant to which BN is guaranteeing certain obligations of certain persons under this Agreement;

WHEREAS, simultaneously with the execution and delivery of this Agreement, as a condition to the willingness of the Company to enter into this Agreement, the Parent Group Shareholders have entered into an agreement with the Company substantially in the form attached as Exhibit A (the "Voting Agreement"), pursuant to which, subject to the terms and conditions therein, the Parent Group Shareholders have agreed to vote all of their respective shares of Common Stock in favor of, and to otherwise support, the Merger; and

WHEREAS, the Company, the Parent Entities and BAM desire to make certain representations, warranties, covenants and agreements in connection with the Merger and also to prescribe various conditions to the Merger.

NOW, THEREFORE, in consideration of the foregoing, each party agrees as follows:

ARTICLE I

DEFINITIONS AND TERMS

SECTION 1.01. Definitions. As used in this Agreement, the following terms have the meanings ascribed thereto below:

"Acceptable Confidentiality Agreement" means any confidentiality agreement entered into by the Company from and after the date of this Agreement that contains provisions that are not materially less favorable in the aggregate to the Company than those contained in the Confidentiality Agreement and does not prohibit the Company from complying with its obligations set forth in Section 7.03 (it being understood that such confidentiality agreement need not contain a standstill provision or otherwise prohibit the making or amending of a Takeover Proposal if such Takeover Proposal is made directly to the Company and not publicly disclosed).

"Action" means any action, suit or proceeding by or before any Governmental Authority.

"Actuarial Appraisal" has the meaning set forth in Section 4.16(a).

"Adverse Recommendation Change" has the meaning set forth in Section 7.03(d).

"Affiliate" means, as to any Person, any other Person that, directly or indirectly, controls, or is controlled by, or is under common control with, such Person. For this purpose, "control" (including, with its correlative meanings, "controlled by" and "under common control with") shall mean the possession, directly or indirectly, of the power to direct or cause the direction of management or policies of a Person, whether through the ownership of securities or partnership or other ownership interests, by Contract or otherwise. For purposes of this Agreement, (a) Parent and its Subsidiaries shall be deemed not to be Affiliates or portfolio companies of BN, BAM and their respective Subsidiaries, (b) BAM shall be deemed not to be an Affiliate or portfolio company of BN and its Subsidiaries and (c) Parent, BN and BAM and their respective Subsidiaries shall be deemed not to be Affiliates of the Company or any of its Subsidiaries.

"Agreement" has the meaning set forth in the preamble.

"Anti-Bribery Legislation" means all and any of the following: the U.S. Foreign Corrupt Practices Act of 1977; the Organisation for Economic Cooperation and Development Convention on Combating Bribery of Foreign Public Officials in International Business Transactions and related implementing legislation; the relevant common law or legislation in England and Wales relating to bribery and/or corruption, including the Public Bodies Corrupt Practices Act 1889, the Prevention of Corruption Act 1906 as supplemented by the Prevention of Corruption Act 1916 and the Anti-Terrorism, Crime and Security Act 2001, the Bribery Act 2010, the Proceeds of Crime Act 2002, the Bermuda Bribery Act 2016 and any other applicable anti-bribery or anti-corruption related provisions in criminal and anti-competition Laws and/or other applicable Laws relating to bribery or corruption.

"Antitrust Laws" means the Sherman Antitrust Act of 1890, the Clayton Antitrust Act of 1914, the HSR Act, the Federal Trade Commission Act, all applicable non-U.S. antitrust Laws and all other applicable Laws issued by a Governmental Authority that are designed or intended to prohibit, restrict or regulate actions having the purpose or effect of monopolization or restraint of trade or lessening of competition through merger or acquisition.

"Applicable SAP" means, with respect to any Company Insurance Subsidiary, the applicable statutory accounting principles (or local equivalents in the applicable jurisdiction) prescribed or permitted by the Insurance Regulator of such Company Insurance Subsidiary's domiciliary jurisdiction.

"Ardea Partners" has the meaning set forth in Section 4.24.

"Articles of Merger" shall mean the articles of merger in the form mutually agreed to by Parent and the Company, as required by and executed in accordance with the IBCA.

"BAM" has the meaning set forth in the preamble.

"BAM Class A Fixed Stock Price" means an amount in cash equal to $16.15.

"BAM Class A Stock" has the meaning set forth in Section 6.02.

"BAM Class A Stock Price" means the volume-weighted average sales price per share taken to four decimal places of BAM Class A Stock on the US Consolidated Tape over the period of 10 consecutive trading days concluding with the market closing trade on the NYSE on the fifth trading day immediately preceding the Closing Date (such period, the "BAM Class A Stock Price Measuring Period"), as calculated by Bloomberg Financial LP under the function "VWAP" by using the instruction "BAM US Equity AQR" (or, if not available, in another authoritative source mutually selected by the Company and Parent).

"BAM Class A Stock Price Measuring Period" has the meaning set forth in the definition of "BAM Class A Stock Price".

"BAM Class B Stock" has the meaning set forth in Section 6.02.

"BAM Disclosure Letter" has the meaning set forth in Article VI.

"BAM Material Adverse Effect" means any effect, change, event, circumstance or development that, individually or in the aggregate with all other effects, changes, events, circumstances or developments, has or would reasonably be expected to have a material adverse effect on the business, assets, results of operations or condition (financial or otherwise) of BAM and its Subsidiaries taken as a whole; provided, however, that in no event shall any of the following, or any effect, change, event, circumstance or development arising out of, or resulting from, the following, constitute or be taken into account, individually or in the aggregate, in determining whether a BAM Material Adverse Effect has occurred or may occur (except to the extent contemplated by the proviso at the end of this definition): (a) general economic or regulatory, legislative or political conditions or securities, credit, financial or other capital markets conditions in any jurisdiction (including with respect to interest rates, exchange rates for currencies, monetary policy or inflation), (b) any failure, in and of itself, by BAM to meet any internal or published projections, forecasts, guidance, estimates, milestones, budgets or predictions in respect of internal or published revenues, earnings, expenses, cash flow, cash position or other financial or operating metrics for any period (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such failure that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a BAM Material Adverse Effect), (c) geopolitical conditions, the outbreak or escalation of hostilities, any acts of war (whether or not declared) (including civil war and including with respect to the Russian Federation and Ukraine or any matter arising therefrom), sabotage, terrorism (including cyber-terrorism), man-made disaster, epidemics, pandemics or disease outbreaks (including COVID-19 or any COVID Measures) or any escalation or worsening of any of the foregoing, (d) any volcano, tsunami, hurricane, tornado, windstorm, flood, earthquake, wildfire or other natural disaster or any conditions resulting from such natural disasters, (e) the negotiation, execution and delivery of this Agreement, the announcement, pendency or performance of the Transactions, or the identity of, or facts relating to, the Company, (f) the suspension of trading in securities of BAM on the NYSE or TSX or any change, in and of itself, in the market price, ratings or trading volume of BAM's or any of its Subsidiaries' securities (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such change that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a BAM Material Adverse Effect), (g) any change in applicable Law (including COVID Measures) (or interpretation or enforcement thereof) or GAAP (or interpretation or enforcement thereof), including but not limited to legal or regulatory requirements and accounting and financial reporting pronouncements by the SEC and the FASB or rating agency methodology or (h) any action taken or not taken by BAM or any of its Subsidiaries as expressly required by the terms of this Agreement (but, in the event of any such failure to take an action, only if the Company has refused to provide a waiver to the applicable prohibition in this Agreement); provided further, however, that any effect, change, event, circumstance or development referred to in clause (a), (c), (d) or (g) (other than with respect to interest rates) may be taken into account in determining whether or not there has been a BAM Material Adverse Effect to the extent such effect, change, event, circumstance or development has a disproportionate adverse effect on BAM and its Subsidiaries, taken as a whole, relative to other participants in BAM's industries in the geographic regions or product markets in which BAM and its Subsidiaries operate (in which case only the incremental disproportionate effect or effects may be taken into account in determining whether or not a BAM Material Adverse Effect has occurred).

"BAM Organizational Documents" means, collectively, BAM's Notice of Articles and Articles of BAM in each case, as amended up to and including the date of this Agreement.

"BAM SEC Documents" has the meaning set forth in Article VI.

"BAM ULC" means Brookfield Asset Management ULC, a company organized under the laws of British Columbia, Canada.

"Bankruptcy and Equity Exception" has the meaning set forth in Section 4.03(a).

"Barclays" has the meaning set forth in Section 5.11.

"BN" means Brookfield Corporation, a corporation organized under the laws of Ontario, Canada.

"Book-Entry Share" has the meaning set forth in Section 3.01(d)(ii).

"Broker-Dealer Subsidiary" means AEL Financial Services, LLC.

"Burdensome Condition" has the meaning set forth in Section 7.05(f).

"business day" means any day except a Saturday, a Sunday or other day on which the SEC or banks in the City of New York, the City of Toronto, Canada or the City of Des Moines, Iowa are authorized or required by applicable Law to be closed.

"Cap Amount" has the meaning set forth in Section 7.08(c).

"Capitalization Date" has the meaning set forth in Section 4.02(a).

"Cash Consideration" has the meaning set forth in Section 3.01(d)(i)(A).

"CEO" has the meaning set forth in the recitals.

"Certificate" has the meaning set forth in Section 3.01(d)(ii).

"Claim" has the meaning set forth in Section 7.08(b).

"Closing" has the meaning set forth in Section 2.02.

"Closing Date" has the meaning set forth in Section 2.02.

"Code" means the U.S. Internal Revenue Code of 1986, as amended.

"Common Stock" has the meaning set forth in the recitals.

"community interest factors" has the meaning set forth in the recitals.

"Company" has the meaning set forth in the preamble.

"Company 401(k) Plan" means the Company's Profit Sharing and 401(k) Plan.

"Company Acquisition Agreement" has the meaning set forth in Section 7.03(d).

"Company Awards" means, collectively, Company Restricted Stock, Company RSUs, Company PSUs and Company Options.

"Company Award Conversion Ratio" means the quotient of (i) the Merger Consideration (valuing the Stock Consideration at the BAM Class A Fixed Stock Price for this purpose) divided by (ii) the BAM Class A Stock Price.

"Company Board" has the meaning set forth in the recitals.

"Company Board Recommendation" has the meaning set forth in Section 4.03(b).

"Company Book-Entry Shares" has the meaning set forth in Section 3.02(b).

"Company Bylaws" means the Company's Amended and Restated Bylaws, as amended up to and including the date of this Agreement.

"Company Charter" means the Company's Articles of Incorporation, as amended up to and including the date of this Agreement.

"Company Disclosure Letter" has the meaning set forth in Article IV.

"Company Employee" has the meaning set forth in Section 7.10(a).

"Company Employee List" has the meaning set forth in Section 7.10(g).

"Company ESOP" means the Company's Employee Stock Ownership Plan, as amended and restated generally effective January 1, 2014, as may be amended from time to time.

"Company Insurance Approvals" has the meaning set forth in Section 4.04.

"Company Insurance Policies" means all insurance policies and contracts, together with all binders, slips, certificates, endorsements and riders thereto, that are issued by a Company Insurance Subsidiary.

"Company Insurance Subsidiary" means each Subsidiary of the Company that conducts the business of insurance or reinsurance as an insurance company or a reinsurance company.

"Company Intellectual Property" means all Intellectual Property owned or purported to be owned by the Company and its Subsidiaries.

"Company Lease" has the meaning set forth in Section 4.14(b).

"Company Material Adverse Effect" means any effect, change, event, circumstance or development that, individually or in the aggregate with all other effects, changes, events, circumstances or developments, has or would reasonably be expected to have a material adverse effect on the business, assets, results of operations or condition (financial or otherwise) of the Company and its Subsidiaries taken as a whole; provided, however, that in no event shall any of the following, or any effect, change, event, circumstance or development arising out of, or resulting from, the following, constitute or be taken into account, individually or in the aggregate, in determining whether a Company Material Adverse Effect has occurred or may occur (except to the extent contemplated by the proviso at the end of this definition): (a) effects, changes or events generally affecting the insurance, reinsurance or risk management industries in the geographic regions or product markets in which the Company and its Subsidiaries operate or underwrite insurance or reinsurance or manage risk (including changes to interest rates, general market prices and regulatory changes affecting such industries), (b) general economic or regulatory, legislative or political conditions or securities, credit, financial or other capital markets conditions in any jurisdiction (including with respect to interest rates, exchange rates for currencies, monetary policy or inflation and any changes in the Investment Assets resulting therefrom), (c) any failure, in and of itself, by the Company to meet any internal or published projections, forecasts, guidance, estimates, milestones, budgets or predictions in respect of internal or published revenues, earnings, premiums written, expenses, cash flow, cash position or other financial or operating metrics for any period (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such failure that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Company Material Adverse Effect), (d) geopolitical conditions, the outbreak or escalation of hostilities, any acts of war (whether or not declared) (including civil war and including with respect to the Russian Federation and Ukraine or any matter arising therefrom), sabotage, terrorism (including cyber-terrorism), man-made disaster, epidemics, pandemics or disease outbreaks (including COVID-19 or any COVID Measures) or any escalation or worsening of any of the foregoing, (e) any volcano, tsunami, hurricane, tornado, windstorm, flood, earthquake, wildfire or other natural disaster or any conditions resulting from such natural disasters, (f) the negotiation, execution and delivery of this Agreement, the announcement, pendency or performance of the Transactions, or the identity of, or facts relating to, Parent or any of its Affiliates, including the impact thereof on the relationships of the Company or any of its Subsidiaries with employees, customers, insureds, cedants, policyholders, brokers, agents, financing sources, investment managers, business partners, service providers, Governmental Authorities or reinsurance providers, and including any Action with respect to the Transactions, (g) any change or announcement of a potential change, in and of itself, in the Company's or any of its Subsidiaries' credit, financial strength or claims paying ratings or the ratings of any of the Company's or its Subsidiaries' businesses (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such ratings that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Company Material Adverse Effect), (h) the suspension of trading in securities of the Company on the NYSE or any change, in and of itself, in the market price, ratings or trading volume of the Company's or any of its Subsidiaries' securities (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such change that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Company Material Adverse Effect), (i) any change in applicable Law (including COVID Measures) (or interpretation or enforcement thereof), GAAP (or interpretation or enforcement thereof) or in Applicable SAP (or, other than with respect to any permitted practices, interpretation or enforcement thereof), including but not limited to legal or regulatory requirements and accounting and financial reporting pronouncements by the SEC, the National Association of Insurance Commissioners, any Insurance Regulator and the FASB or rating agency methodology, (j) any action taken or not taken by the

Company or any of its Subsidiaries as expressly required by the terms of this Agreement (but, in the event of any such failure to take an action, only if Parent has refused to provide a waiver to the applicable prohibition in this Agreement) or (k) any of the matters set forth on Section 4.06(b) of the Company Disclosure Letter; provided further, however, that any effect, change, event, circumstance or development referred to in clause (a), (b), (d) or (e) (other than with respect to interest rates) may be taken into account in determining whether or not there has been a Company Material Adverse Effect to the extent such effect, change, event, circumstance or development has a disproportionate adverse effect on the Company and its Subsidiaries, taken as a whole, relative to other participants engaged primarily in the insurance or reinsurance or risk management industries in the geographic regions or product markets in which the Company and its Subsidiaries operate or underwrite insurance or reinsurance or manage risk (in which case only the incremental disproportionate effect or effects may be taken into account in determining whether or not a Company Material Adverse Effect has occurred).

"Company Notice" has the meaning set forth in Section 7.03(d).

"Company Option" means each option (whether vested or unvested) to purchase Common Stock granted pursuant to a Company Stock Plan (including for the avoidance of doubt any Performance-Vesting Company Option).

"Company Organizational Documents" means the Company Charter and the Company Bylaws.

"Company Plan" means each plan, program, policy, agreement or other arrangement covering current or former directors, officers, employees or natural independent contractors of the Company or any of its Subsidiaries, that is (a) an "employee benefit plan" within the meaning of Section 3(3) of ERISA (whether or not such plan is subject to ERISA), (b) a share option, share purchase, share appreciation right, restricted share, restricted share unit or other share-based or equity-based compensation agreement, program or plan, (c) an individual employment, consulting, severance, retention, termination, restrictive covenant, change-in-control or other similar agreement between such Person and the Company or any of its Subsidiaries or (d) a bonus, incentive, deferred compensation, profit-sharing, retirement, post-employment or post-retirement health, medical, life insurance or other welfare benefit plan, program, policy or arrangement, spending or reimbursement account, paid time off, severance or termination pay, benefit or fringe-benefit plan, program, policy, agreement or other arrangement (other than, in each case, any such plan, program, policy, agreement or other arrangement required by applicable Law, sponsored by a Governmental Authority), whether or not in writing and whether or not funded, in each case, that is sponsored, maintained or contributed to by the Company or any of its Affiliates or with respect to which the Company or any of its Subsidiaries has any actual or contingent liability.

"Company PSU" means each award of Company RSUs subject to performance-based vesting conditions.

"Company Restricted Stock" means Common Stock granted pursuant to a Company Stock Plan that is subject to vesting restrictions.

"Company Rights" has the meaning set forth in Section 4.02(b).

"Company RSU" means each restricted stock unit payable in Common Stock or whose value is determined with reference to the value of Common Stock, granted pursuant to the Company Stock Plans, other than a Company PSU.

"Company SEC Documents" has the meaning set forth in Section 4.05(a).

"Company Securities" has the meaning set forth in Section 4.02(b).

"Company Shareholders Meeting" has the meaning set forth in Section 7.04(c).

"Company Stock Certificates" has the meaning set forth in Section 3.02(b).

"Company Stock Plans" means the Company's (a) 2023 Equity Incentive Plan, (b) Amended and Restated Equity Incentive Plan and (c) 2016 Employee Incentive Plan, in each case, as may be amended or restated from time to time and, in each case, the award agreements thereunder.

"Company Termination Fee" means a cash amount equal to $102,000,000.

"Confidentiality Agreement" has the meaning set forth in Section 7.07.

"Consent" means any consent, waiver, approval, license, Permit, order, non-objection or authorization.

"Contract" means any legally binding agreement, debenture, note, bond, mortgage, indenture, deed, lease, sublease, license or contract other than any Company Plan.

"COVID-19" means SARS-CoV-2 and its disease commonly known as COVID-19, including any intensification, resurgence and any evolutions or additional strains, variations, sequences or mutations thereof or any related or associated epidemics, pandemics, disease outbreaks or public health emergencies.

"COVID Measures" means (a) any quarantine, "shelter in place," "stay at home," workforce reduction, social distancing, shutdown, closure, sequester, safety or similar applicable Law, directive, guidelines or recommendations promulgated by any Governmental Authority, including the Centers for Disease Control and Prevention and the World Health Organization, in each case, in connection with or in response to COVID-19, including the CARES Act and the Families First Coronavirus Response Act, or any other response to COVID-19, and (b) the reversal or discontinuation of any of the foregoing.

"Credit Agreement" means the Credit Agreement, dated as of February 15, 2022, among the Company, the lenders party thereto, and Citizens Bank, N.A., as administrative agent thereunder.

"Credit Agreement Amendments" has the meaning set forth in Section 7.17(c).

"Credit Document" means each Contract pursuant to which the Company or any of its Subsidiaries has created, incurred, assumed or guaranteed any Indebtedness for borrowed money.

"Current D&O Insurance" has the meaning set forth in Section 7.08(c).

"Cybersecurity Incident" means unauthorized access to or use or corruption of the IT Systems (including a ransomware or denial-of-service attack), or the unauthorized access, disclosure, use, corruption or loss of Personal Information or other non-public information.

"Debt Financing" means any debt financing obtained by Parent or any of its Subsidiaries in connection with the Transactions.

"Debt Financing Sources" means the Persons that provide or arrange all or any part of any Debt Financing in connection with the Transactions, including the parties to any commitment letters, engagement letters, credit agreements, indentures or similar debt agreements entered into relating to such Debt Financing. Notwithstanding the foregoing, in no event shall Parent or any of its Affiliates constitute "Debt Financing Sources".

"Depositary Shares" has the meaning set forth in Section 3.01(f)(ii).

"Disclaiming Person Information" has the meaning set forth in Section 7.04(c) of the Parent Disclosure Letter.

"Dissenting Shares" means Common Stock held by a holder of Common Stock, who, as of the Effective Time, (a) neither voted in favor of the Merger nor consented thereto in writing, and (b) demanded properly in writing appraisal for such shares in accordance with Sections 490.1301 through 490.1303 and Sections 490.1320 through 490.1326 of the IBCA.

"DTC" means The Depositary Trust Company.

"Effective Time" means the date and time when the Merger becomes effective, as set forth in the Articles of Merger.

"ERISA" means the Employee Retirement Income Security Act of 1974.

"ERISA Affiliate" has the meaning set forth in Section 4.10(d).

"ESOP Loan" means loans outstanding under the Company ESOP.

"ESOP Termination Date" has the meaning set forth in Section 7.10(j).

"Exchange Act" has the meaning set forth in Section 4.04.

"Exchange Agent" has the meaning set forth in Section 3.02(a)(i).

"Exchange Fund" has the meaning set forth in Section 3.02(a)(ii).

"Exchange Ratio" means: if the BAM Class A Stock Price is (i) greater than $35.51, the quotient (rounded to five decimal places) obtained by dividing (x) $17.65 by (y) the BAM Class A Stock Price; (ii) less than or equal to $35.51, but greater than or equal to $30.48, 0.49707; or (iii) less than $30.48, the quotient (rounded to five decimal places) obtained by dividing (x) $15.15 by (y) the BAM Class A Stock Price, subject to reduction pursuant to Section 3.01(e).

"Exchanged RSU" has the meaning set forth in Section 3.03(e).

"FASB" means the Financial Accounting Standards Board.

"Filed SEC Documents" has the meaning set forth in Article IV.

"Filing Person Information" has the meaning set forth in Section 7.05(c) of the Parent Disclosure Letter.

"FINRA" has the meaning set forth in Section 4.04.

"Form F-4" has the meaning set forth in Section 5.03.

"Fraud" means an actual fraud involving a knowing and intentional misrepresentation by a party that resulted in a representation or warranty set forth in Article IV, Article V or Article VI being materially breached (made with the Knowledge that a representation or warranty set forth in Article IV, Article V or Article VI was actually breached when made), and made with the express intent of inducing the other party to enter into this Agreement and upon which such other party has relied to its detriment; provided, however, "Fraud" shall not include any fraud claim based on constructive knowledge, negligent misrepresentation or a similar theory.

"GAAP" means generally accepted accounting principles in the United States, consistently applied.

"Governmental Authority" means any government, legislature, political subdivision, court, board, regulatory or administrative agency, self-regulatory organization or agency, commission or authority or other legislative, executive or judicial governmental entity, whether federal, national, provincial, state, local, foreign or multinational, in each case of competent jurisdiction.

"Guaranty" has the meaning set forth in the recitals.

"HSR Act" means the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

"IBCA" shall mean the Iowa Business Corporation Act, Chapter 490 of the Iowa Code.

"IMA" has the meaning set forth in Section 4.18(c).

"Indebtedness" means, with respect to any Person at the time of determination, without duplication and regardless of the maturity or when due or payable, (a) any indebtedness for borrowed money, including loans or advances or the issuance and sale of debt securities, (b) any capitalized lease obligations or sale leaseback obligations as determined in accordance with GAAP, (c) any indebtedness under any credit agreement or facility or obligations evidenced by bonds, debentures, notes or other similar instruments, (d) any obligations to pay the deferred purchase price of property or services, except trade accounts payable and other current liabilities arising in the ordinary course of business consistent with past practice, (e) net cash payment obligations that will be payable upon termination of (assuming termination on the date of determination) any agreement in respect of any cap, swap, collar, future, derivative or similar transactions, or any option or similar agreement involving, or settled by reference to, any rate, currency, commodity, price of any equity or debt security or instrument, or economic, financial or pricing index or measure of economic, financial or pricing risk or value, or any similar transaction or combination of the foregoing transactions, (f) any obligations in respect of letters of credit or similar instruments issued or accepted by banks or financial institutions for the account of any Person (including surety bonds and off-balance sheet financing arrangements), to the extent drawn, (g) all interest, indemnities, premiums, penalties, breakage costs (including on interest rate swaps and any other hedging obligations (including foreign currency or exchange contracts)), fees and other obligations related to any of the foregoing, (h) all direct or indirect guarantees or other financial accommodations (or arrangements having the economic effect of a guarantee or financial accommodation) in respect of any of the foregoing for the benefit of another Person and (i) all other obligations which would be required to be shown as indebtedness on a balance sheet of such Person prepared in accordance with GAAP; provided that Indebtedness shall not include any intercompany indebtedness owing between or among the Company and/or any of its Subsidiaries.

"Indemnitee" has the meaning set forth in Section 7.08(a).

"Insurance Contract" means each insurance or annuity policy and contract, together with all binders, slips, certificates, endorsements and riders thereto, issued by any Company Insurance Subsidiary prior to the Closing.

"Insurance Law" means all Laws applicable to the business of insurance or reinsurance or the regulation of insurance or reinsurance companies, whether federal, national, provincial, state, local, foreign or multinational, and all applicable orders, directives of, and market conduct recommendations resulting from market conduct or other examinations by, Insurance Regulators.

"Insurance Producer" means the agents, general agents, sub-agents, brokers, wholesale brokers, insurance solicitors, producers or other Persons who solicit, negotiate or sell the Insurance Contracts.

"Insurance Regulators" means all Governmental Authorities regulating the business of insurance or reinsurance, or regulating insurance or reinsurance companies, under Insurance Laws.

"Intellectual Property" means all intellectual property rights in any and all jurisdictions worldwide, including all: (a) patents and patent applications, including all reissues, divisions, renewals, extensions, provisionals, continuations and continuations-in-part thereof; (b) trademarks, service marks, trade names, trade dress, acronyms, tag-lines, slogans, logos, URLs and Internet domain names, social media usernames and other digital identifiers and other indicia of origin, together with all goodwill associated with the foregoing; (c) copyrights and rights in copyrightable subject matter in published and unpublished works of authorship, database and design rights, and data collections; (d) trade secrets, inventions and invention disclosures (whether or not patentable), discoveries, techniques, research and development, data and databases, customer and supplier lists, and other confidential and proprietary information (collectively, "Trade Secrets"); (e) all registrations and applications to register or renew the registration of any of the foregoing; and (f) all intellectual property rights in Software and other technology.

"Intervening Event" means a material effect, change, event, circumstance or development that (a) was not known to, or reasonably foreseeable by, the Company Board on the date of this Agreement, which effect, change, event, circumstance or development becomes known to the Company Board prior to the receipt of the Required Shareholder Approval, or if known, the consequences of which were not known to, or reasonably foreseeable by, the Company Board on or prior to the date of this Agreement, and (b) does not relate to (i) a Takeover Proposal or (ii) any (x) changes in the market price or trading volume of the Company or (y) the Company's meeting, failing to meet or exceeding published or unpublished revenue or earnings projections, in each case in and of itself (it being understood that the effect, change, event, circumstance or development giving rise or contributing to the foregoing may be deemed to constitute or be taken into account in determining whether an Intervening Event has occurred).

"Investment Assets" has the meaning set forth in Section 4.18(a).

"Investment Guidelines" has the meaning set forth in Section 4.18(a).

"IRS" means the U.S. Internal Revenue Service.

"IT Systems" means the hardware, Software, data, databases, data communication lines, network and telecommunications equipment, Internet-related information technology infrastructure, wide area network and other information technology and communications equipment, owned, leased or licensed by the Company or any of its Subsidiaries.

"JPM" has the meaning set forth in Section 4.24.

"Knowledge" means, (a) with respect to the Company, the actual knowledge of the individuals listed on Section 1.01 of the Company Disclosure Letter, (b) with respect to Parent or Merger Sub, the actual knowledge of the individuals listed on Section 1.01 of the Parent Disclosure Letter and (c) with respect to BAM, the actual knowledge of the individuals listed on Section 1.01 of the BAM Disclosure Letter.

"Laws" has the meaning set forth in Section 4.08(a).

"Leased Real Property" means all material real property leased or subleased by the Company or any of its Subsidiaries.

"Liens" means any pledges, liens, charges, mortgages, encumbrances, leases, licenses, hypothecations or security interests of any kind or nature.

"Malware" means any virus, Trojan horse, time bomb, key-lock, spyware, worm, malicious code or other software designed or able to, without the knowledge or authorization of the Company or its Subsidiaries, disrupt, disable, or harm the operation of any IT Systems.

"Material Contract" has the meaning set forth in Section 4.15(a).

"Merger" has the meaning set forth in the recitals.

"Merger Consideration" has the meaning set forth in Section 3.01(d)(i).

"Merger Sub" has the meaning set forth in the preamble.

"Merger Sub Board" has the meaning set forth in the recitals.

"Merger Sub Shareholder Approval" has the meaning set forth in Section 7.12.

"Merger Sub Stock" has the meaning set forth in Section 3.01.

"NAIC" has the meaning set forth in Section 7.01(a).

"NYSE" means the New York Stock Exchange.

"OFAC" means the U.S. Treasury Department's Office of Foreign Assets Control.

"Open Source Software" has the meaning set forth in Section 4.12(d).

"Originally Scheduled Date" means the date of the Company Shareholders Meeting set forth in the definitive Proxy Statement/Prospectus mailed by the Company to its shareholders for the Company Shareholders Meeting.

"Outside Date" has the meaning set forth in Section 9.01(b)(i).

"Owned Real Property" means all real property owned in fee simple by the Company or any of its Subsidiaries.

"Parent" has the meaning set forth in the preamble.

"Parent Affiliated Shareholders" has the meaning set forth in the recitals.

"Parent Board" has the meaning set forth in the recitals.

"Parent Disclosure Letter" has the meaning set forth in Article V.

"Parent Entities" has the meaning set forth in the preamble.

"Parent Group Shareholders" has the meaning set forth in the recitals.

"Parent Insurance Approvals" has the meaning set forth in Section 5.03.

"Parent Material Adverse Effect" means any effect, change, event, circumstance or development that, individually or in the aggregate with all other effects, changes, events, circumstances or developments, has or would reasonably be expected to have a material adverse effect on the business, assets, results of operations or condition (financial or otherwise) of Parent and its Subsidiaries taken as a whole; provided, however, that in no event shall any of the following, or any effect, change, event, circumstance or development arising out of, or resulting from, the following, constitute or be taken into account, individually or in the aggregate, in determining whether a Parent Material Adverse Effect has occurred or may occur (except to the extent contemplated by the proviso at the end of this definition): (a) effects, changes or events generally affecting the insurance, reinsurance or risk management industries in the geographic regions or product markets in which Parent and its Subsidiaries operate or underwrite insurance or reinsurance or manage risk (including changes to interest rates, general market prices and regulatory changes affecting such industries), (b) general economic or regulatory, legislative or political conditions or securities, credit, financial or other capital markets conditions in any jurisdiction (including with respect to interest rates, exchange rates for currencies, monetary policy or inflation and any changes in the Investment Assets resulting therefrom), (c) any failure, in and of itself, by Parent to meet any internal or published projections, forecasts, guidance, estimates, milestones, budgets or predictions in respect of internal or published revenues, earnings, premiums written, expenses, cash flow, cash position or other financial or operating metrics for any period (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such failure that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Parent

Material Adverse Effect), (d) geopolitical conditions, the outbreak or escalation of hostilities, any acts of war (whether or not declared) (including civil war and including with respect to the Russian Federation and Ukraine or any matter arising therefrom), sabotage, terrorism (including cyber-terrorism), man-made disaster, epidemics, pandemics or disease outbreaks (including COVID-19 or any COVID Measures) or any escalation or worsening of any of the foregoing, (e) any volcano, tsunami, hurricane, tornado, windstorm, flood, earthquake, wildfire or other natural disaster or any conditions resulting from such natural disasters, (f) the negotiation, execution and delivery of this Agreement, the announcement, pendency or performance of the Transactions, or the identity of, or facts relating to, Company or any of its Affiliates, (g) any change or announcement of a potential change, in and of itself, in Parent's or any of its Subsidiaries' credit, financial strength or claims paying ratings or the ratings of any of Parent's or its Subsidiaries' businesses (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such ratings that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Parent Material Adverse Effect), (h) the suspension of trading in securities of Parent on the NYSE or any change, in and of itself, in the market price, ratings or trading volume of Parent's or any of its Subsidiaries' securities (it being understood that the effect, change, event, circumstance or development giving rise or contributing to such change that are not otherwise excluded pursuant to another clause of this definition may be deemed to constitute or be taken into account in determining whether there has been or would reasonably be expected to be a Parent Material Adverse Effect), (i) any change in applicable Law (including COVID Measures) (or interpretation or enforcement thereof), GAAP (or interpretation or enforcement thereof) or in Applicable SAP (or, other than with respect to any permitted practices, interpretation or enforcement thereof), including but not limited to legal or regulatory requirements and accounting and financial reporting pronouncements by the SEC, the National Association of Insurance Commissioners, any Insurance Regulator and the FASB or rating agency methodology or (j) any action taken or not taken by Parent or any of its Subsidiaries as expressly required by the terms of this Agreement (but, in the event of any such failure to take an action, only if Company has refused to provide a waiver to the applicable prohibition in this Agreement); provided further, however, that any effect, change, event, circumstance or development referred to in clause (a), (b), (d) or (e) (other than with respect to interest rates) may be taken into account in determining whether or not there has been a Parent Material Adverse Effect to the extent such effect, change, event, circumstance or development has a disproportionate adverse effect on Parent and its Subsidiaries, taken as a whole, relative to other participants engaged primarily in the insurance or reinsurance or risk management industries in the geographic regions or product markets in which Parent and its Subsidiaries operate or underwrite insurance or reinsurance or manage risk (in which case only the incremental disproportionate effect or effects may be taken into account in determining whether or not a Parent Material Adverse Effect has occurred).

"Parent SEC Documents" has the meaning set forth in Article V.

"party" has the meaning set forth in the preamble.

"Patriot Act" means the USA PATRIOT Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)).

"Payoff Amount" has the meaning set forth in Section 7.18.

"Payoff Indebtedness" means any Indebtedness of the Company that is required to be paid at the Closing as a result of the consummation of the Closing pursuant to the Credit Agreement or any other Credit Document evidencing such Indebtedness, other than to the extent a waiver or amendment is obtained with respect thereto as contemplated by Section 7.17.

"Payoff Letter" has the meaning set forth in Section 7.18.

"Performance-Vesting Company Option" means each Company Option subject to performance-based vesting conditions.

"Permits" has the meaning set forth in Section 4.08(a).

"Permitted Liens" means (a) statutory Liens for Taxes, assessments or other charges by Governmental Authorities not yet due and payable or the amount or validity of which is being contested in good faith and by appropriate proceedings and for which adequate reserves are being maintained in accordance with GAAP and Applicable SAP, (b) mechanics', materialmen's, carriers', workmen's, warehousemen's, repairmen's, landlords' and similar Liens granted or which arise in the ordinary course of business or the amount or validity of which is being contested in good faith and by appropriate proceedings and for which adequate reserves are being maintained in accordance with GAAP and Applicable SAP, (c) Liens securing payment, or any obligation, of the Company or its Subsidiaries with respect to outstanding Indebtedness, (d) Liens granted in the ordinary course of business in connection with the insurance or reinsurance business of the Company or its Subsidiaries on cash and cash equivalent instruments or other investments, including Liens granted (i) in connection with (A) pledges of such instruments or investments to collateralize letters of credit delivered by the Company or its Subsidiaries, (B) the creation of trust funds for the benefit of ceding companies, (C) underwriting activities of the Company or its Subsidiaries, (D) deposit liabilities, (E) statutory deposits, (F) ordinary-course securities lending, repurchase, reverse repurchase, short-sale, derivatives, swap or hedging transactions, (G) any collateral pledged in connection with reinsurance transactions, and (H) any collateral pledged to a Federal Home Loan Bank, and (ii) with respect to investment securities held in the name of a nominee, custodian, depository, clearinghouse or other record owner, (e) pledges or deposits by the Company or any of its Subsidiaries under workmen's compensation Laws, unemployment Insurance Laws or similar legislation, or good-faith deposits in connection with bids, tenders, Contracts (other than for the payment of Indebtedness) or leases to which such entity is a party, or deposits to secure public or statutory obligations of such entity or to secure surety or appeal bonds to which such entity is a party, or deposits as security for contested Taxes, in each case incurred or made in the ordinary course of business, (f) zoning, building codes, entitlement and other land use and environmental regulations by any Governmental Authority provided the same are not presently materially violated and do not, individually or in the aggregate, impair the continued use of the property or asset affected by such restrictions or exclusions that would be shown by a current title report or other similar report and any condition or other matter, if any, that may be shown or disclosed by a current and accurate survey or physical inspection, (g) licenses and other rights or immunities with respect to Intellectual Property, (h) Liens created by or through the actions of Parent or any of its Affiliates, (i) such other Liens or imperfections that are not material in amount or do not materially detract from the value of or materially impair the continued use of the property or asset affected by such Lien or imperfection, (j) Liens arising under or relating to applicable securities laws, (k) Liens that will be terminated at or prior to the Closing in accordance with this Agreement, (l) Liens permitted to be incurred under the Credit Agreement as in effect on the date hereof, (m) Liens arising in the ordinary course of business and not incurred in connection with the borrowing of money and (n) title of a lessor, sub-lessor, licensor or sub-licensor or secured by a lessor's, sub-lessor's, licensor's or sublicensor's interest under a capital or operating lease, sublease, license or sublicense.

"Person" means an individual, corporation, limited liability company, partnership, joint venture, association, trust, unincorporated organization or any other entity, including a Governmental Authority.

"Personal Information" means any information in possession or control of any of the Company or its Subsidiaries that enables a Person in possession thereof to identify a natural person or that is otherwise considered personally identifiable information or personal data under applicable Law.

"Preferred Stock" has the meaning set forth in Section 4.02(a).

"Privacy Obligations" has the meaning set forth in Section 4.12(g).

"Proxy Statement/Prospectus" has the meaning set forth in Section 4.04.

"Reinsurance Agreement" has the meaning set forth in Section 4.17(a).

"Representatives" means, with respect to any Person, (a) its officers, directors and employees and (b) its agents, financial advisors, investment bankers, consultants, attorneys, accountants and other advisors acting on such Person's behalf in connection with the Transactions.

"Required Regulatory Approvals" has the meaning set forth in Section 8.01(c).

"Required Shareholder Approval" has the meaning set forth in Section 4.03(d).

"Reserves" means the reserves of any Company Insurance Subsidiary for losses, claims, unearned premiums, policy benefits and expenses, including unearned premium reserves, reserves for incurred losses, technical reserves, incurred loss adjustment expenses, incurred but not reported losses and loss adjustment expenses, in respect of insurance policies issued, reinsured or assumed by such Company Insurance Subsidiary.

"Restraints" has the meaning set forth in Section 8.01(d).

"Rollover Company RSU" means each Company RSU that is granted following the date hereof and prior to the Closing Date in accordance with the terms set forth in Section 7.01(a)(vi) of the Company Disclosure Letter.

"Rule 1017 Application" has the meaning set forth in Section 4.04.

"Sanctioned Person" means any Person or Governmental Authority that is the subject or target of sanctions or trade/export restrictions under U.S., EU, UK or other applicable sanctions or export controls Laws, including: (a) any Person listed on any list of designated Persons maintained by OFAC; the U.S. Department of Commerce's Entity List, Denied Persons List, or Unverified List; any debarment or sanctions list maintained by the U.S. Department of State; or any other list maintained by U.S. or a non-U.S. Governmental Authority under sanctions or export control Laws; (b) where relevant under applicable sanctions Laws or export control Laws, any Person that is, in the aggregate, 50% or greater owned, directly or indirectly, or controlled by any such Person or Persons described in clause (a) or acting for or on behalf of such Person or Persons described in clause (a); (c) any person located, organized or resident in a country or territory which is itself the subject or target of any comprehensive U.S. sanctions (that is, at the time of this Agreement, the Crimea region of Ukraine, the so-called "Donetsk People's Republic" or "Luhansk People's Republic" regions of Ukraine, the non-government controlled areas of Ukraine in the oblasts of Kherson and Zaporizhzhia, Cuba, Iran, North Korea and Syria); or (d) the Government of Venezuela, or any other Person subject to asset-blocking sanctions under applicable sanctions Laws; provided that the representations and warranties contained in Sections 5.10 and 6.11 hereof shall not be made by any party in so far as such representation or warranty would result in a violation of, or conflict with, the Foreign Extraterritorial Measures (United States) Order, 1992.

"Sarbanes-Oxley Act" has the meaning set forth in Section 4.05(d).

"SEC" has the meaning set forth in Section 4.04.

"Securities Act" means the Securities Act of 1933 and the rules and regulations promulgated thereunder.

"Senior Notes" means the 5.000% Senior Notes due 2027 issued by the Company pursuant to the Senior Notes Indenture.

"Senior Notes Indenture" means the Senior Amended and Restated Indenture, dated as of April 22, 2004, between the Company and U.S. Bank National Association, as trustee, as supplemented by the Third Supplemental Indenture, dated as of June 16, 2017, between the Company and U.S. Bank National Association, as trustee.

"Series A Deposit Agreement" means the Deposit Agreement, dated November 21, 2019, among the Company, Computershare Inc. and Computershare Trust Company, N.A., collectively, as depositary (the "Depositary"), Computershare Inc., as registrar and transfer agent, and the holders from time to time of the depositary receipts described therein relating to the Series A Preferred Stock.

"Series A Depositary Share" has the meaning set forth in Section 3.01(f)(i).

"Series A Preferred Stock" has the meaning set forth in Section 4.02(a).

"Series B Deposit Agreement" means the Deposit Agreement, dated June 17, 2020, among the Company, the Depositary, Computershare Trust Company, N.A., as registrar and transfer agent, and the holders from time to time of the depositary receipts described therein relating to the Series B Preferred Stock.

"Series B Depositary Share" has the meaning set forth in Section 3.01(f)(ii).

"Series B Preferred Stock" has the meaning set forth in Section 4.02(a).

"Software" means any (a) computer programs, including all software implementations of algorithms, models and methodologies, whether in source code or object code, (b) databases, (c) descriptions, flow-charts and other work product used to design, plan, organize and develop any of the foregoing, screens, user interfaces, report formats, firmware, development tools, templates, menus, buttons and icons, in each case, in any and all forms of media, and (d) documentation, including user manuals and other training documentation, related to any of the foregoing.

"Specified Business Conduct Laws" means: (a) the Anti-Bribery Legislation; (b) all legal requirements imposing trade sanctions on any Person, including all legal requirements administered by OFAC, all sanctions laws or embargos imposed or administered by the U.S. Department of State, the United Nations Security Council, His Majesty's Treasury or the European Union and all anti-boycott or anti-embargo laws; (c) all legal requirements relating to the import, export, re-export, transfer of information, data, goods and technology, including the Export Administration Regulations administered by the U.S. Department of Commerce, the International Traffic in Arms Regulations administered by the U.S. Department of State and customs Laws and regulations administered by U.S. Customs and Border Protection; and (d) the Money Laundering Control Act of 1986, the Currency and Foreign Transactions Reporting Act of 1970, The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, and other applicable legal requirements relating to money laundering.

"Statutory Statements" has the meaning set forth in Section 4.23.

"Stock Consideration" has the meaning set forth in Section 3.01(d)(i)(B).

"Subsidiary" when used with respect to any party, means any corporation, limited liability company, partnership, association, trust or other entity of which securities or other ownership interests representing more than 50% of the equity or more than 50% of the ordinary voting power (or, in the case of a partnership, more than 50% of the general partnership interests) are, as of such date, owned by such party or one or more Subsidiaries of such party or by such party and one or more Subsidiaries of such party. For purposes of this Agreement, (a) BAM ULC shall be deemed a Subsidiary of BAM and (b) any joint ventures or any Investment Assets that are not wholly-owned and not controlled (as defined in the definition of "Affiliate") by the Company or any of its Subsidiaries shall be deemed not to be Subsidiaries of the Company.

"Superior Proposal" means any bona fide written Takeover Proposal that did not result from a breach of Section 7.03 and that the Company Board has determined in its good-faith judgment, after consultation with its financial advisors and outside legal counsel, and taking into account all relevant (in the view of the Company Board) legal, regulatory, financial and other aspects of such proposal (including the conditionality, timing and likelihood of consummation of such proposal and the payment of any termination fee, as well as community interest factors), would be reasonably likely to be consummated on the terms proposed and would be more favorable to the shareholders of the Company than the Merger; provided that for purposes of the definition of "Superior Proposal," the references to "20%" in the definition of Takeover Proposal shall be deemed to be references to "50%."

"Surviving Common Stock" has the meaning set forth in Section 3.01(a).

"Surviving Company" has the meaning set forth in Section 2.01.

"Takeover Law" has the meaning set forth in Section 4.13.

"Takeover Proposal" means any inquiry, proposal (whether or not in writing) or offer from any Person or group (other than Parent and its Affiliates) relating to, in a single transaction or series of related transactions, any direct or indirect (a) acquisition (including any reinsurance or retrocession transaction, or transaction that has similar risk transfer effects, and any asset management transaction) that if consummated would result in any Person or group owning or managing 20% or more of the consolidated assets (based on the fair market value thereof, as determined in good faith by the Company Board), reserves, revenues or net income of the Company and its Subsidiaries, (b) acquisition of Common Stock representing 20% or more of the outstanding Common Stock, (c) tender offer or exchange offer that if consummated would result in any Person or group having beneficial ownership of Common Stock representing 20% or more of the outstanding Common Stock, (d) merger, amalgamation, consolidation, share exchange, share purchase, business combination, recapitalization, liquidation, dissolution or similar transaction involving the Company or any of its Subsidiaries pursuant to which such Person or group (or the shareholders of any Person) would acquire, directly or indirectly, 20% or more of the aggregate voting power of the Company or of the surviving entity in such transaction or the resulting direct or indirect parent of the Company or such surviving entity or (e) any combination of the foregoing, in each case, other than by or on behalf of Parent or any of its Affiliates.

"Tax" means any federal, state, local or non-U.S. income, gross receipts, property, sales, use, license, excise, franchise, employment, payroll, premium, withholding, alternative or added minimum, ad valorem, transfer or excise tax, or any other tax, governmental fee or similar duty, fee or charge or assessment in the nature of a tax, together with any interest or penalty or additions thereto imposed by any Governmental Authority with respect to such amount.

"Tax Returns" means all reports, returns, statements, declarations or forms required or permitted to be filed with a Governmental Authority relating to Taxes, including any amendment thereof or schedule or supplement thereto.

"Trade Secrets" has the meaning set forth in the definition of "Intellectual Property."

"Transactions" means, collectively, the transactions contemplated by this Agreement, including the Merger.

"Trust" has the meaning as set forth in Section 4.10(l).

"Trustee" means, Principal Financial Group Inc, an Iowa corporation, not in its corporate capacity but solely in its capacity as trustee of the Company ESOP.

"TSX" has the meaning as set forth in Section 6.08(f).

"VWAP PSUs" means the Company PSUs granted pursuant to the employee restricted stock unit award agreement, dated November 29, 2022, by and between the Company and the CEO.

"Voting Agreement" has the meaning set forth in the recitals.

"Willful Breach" means, with respect to any party, a material breach of this Agreement by such party that is a consequence of an act or omission undertaken by the breaching party with the knowledge that the taking of or the omission of taking such act would, or would reasonably be expected to, cause or constitute a material breach of this Agreement.

SECTION 1.02. Interpretation.

(a) As used in this Agreement, references to the following terms have the meanings indicated:

(i) to the Preamble or to the Recitals, Sections, Articles, Exhibits or Schedules are to the Preamble or a Recital, Section or Article of, or an Exhibit or Schedule to, this Agreement unless otherwise clearly indicated to the contrary;

(ii) to any Contract (including this Agreement) or "organizational document" are to the Contract or organizational document as amended, modified, supplemented or replaced from time to time;

(iii) to any Law are to such Law as amended, modified, supplemented or replaced from time to time and any rules or regulations promulgated thereunder and to any section of any Law include any successor to such section;

(iv) to any Governmental Authority include any successor to the Governmental Authority and to any Affiliate include any successor to the Affiliate;

(v) to any "copy" of any Contract or other document or instrument are to a true and complete copy thereof;

(vi) to "hereof," "herein," "hereunder," "hereby," "herewith" and words of similar import refer to this Agreement as a whole and not to any particular Article, Section or clause of this Agreement, unless otherwise clearly indicated to the contrary;

(vii) to the "date of this Agreement," "the date hereof" and words of similar import refer to July 4, 2023; and

(viii) to "this Agreement" includes the Exhibits and Schedules (including the Company Disclosure Letter, the Parent Disclosure Letter and the BAM Disclosure Letter) to this Agreement.

(b) Whenever the words "include," "includes" or "including" are used in this Agreement, they will be deemed to be followed by the words "without limitation." The word "or" shall not be exclusive. Any singular term in this Agreement will be deemed to include the plural, and any plural term the singular. All pronouns and variations of pronouns will be deemed to refer to the feminine, masculine or neuter, singular or plural, as the identity of the Person referred to may require. Where a word or phrase is defined herein, each of its other grammatical forms shall have a corresponding meaning.

(c) Whenever the last day for the exercise of any right or the discharge of any duty under this Agreement falls on a day other than a business day, the party having such right or duty shall have until the next business day to exercise such right or discharge such duty. Unless otherwise indicated, the word "day" shall be interpreted as a calendar day. With respect to any determination of any period of time, unless otherwise set forth herein, the word "from" means "from and including" and the word "to" means "to but excluding."

(d) The table of contents and headings contained in this Agreement are for reference purposes only and will not affect in any way the meaning or interpretation of this Agreement.

(e) References to "dollars" or "$" mean United States dollars, unless otherwise clearly indicated to the contrary.

(f) Any document shall be determined to have been "delivered," "furnished," "provided" or "made available" to a Person if such document has been uploaded to the electronic data rooms established by the Company at Intralinks entitled "Project Janus" or electronically delivered to such Person or its Representatives at least by 11:59 p.m. New York City time on the date immediately preceding the date of this Agreement.

(g) The Parent Entities, BAM and the Company have participated jointly in the negotiation and drafting of this Agreement; consequently, in the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as jointly drafted by the Parent Entities, BAM and the Company and no presumption or burden of proof shall arise favoring or disfavoring any party by virtue of the authorship of any provision of this Agreement.

(h) No summary of this Agreement prepared by or on behalf of any party shall affect the meaning or interpretation of this Agreement.

(i) All capitalized terms used without definition in the Exhibits and Schedules (including the Company Disclosure Letter, the Parent Disclosure Letter and the BAM Disclosure Letter) to this Agreement shall have the meanings ascribed to such terms in this Agreement.

ARTICLE II

THE MERGER

SECTION 2.01. Merger. Upon the terms and subject to the conditions set forth in this Agreement, and pursuant to applicable provisions of the IBCA, at the Effective Time, Merger Sub shall be merged with and into the Company, the separate corporate existence of Merger Sub shall thereupon cease, and the Company shall be the surviving company in the Merger (such surviving company, the "Surviving Company").

SECTION 2.02. Closing; Effective Time. The closing (the "Closing") shall take place as soon as practicable, and in any event not later than five business days after the satisfaction or (to the extent permitted herein and by applicable Law) waiver by the party entitled to the benefits thereof of the conditions set forth in Article VIII (other than those conditions that by their nature are to be satisfied at the Closing, but subject to the satisfaction or (to the extent permitted herein and by applicable Law) waiver of those conditions at such time) or at such other time as each party hereto may agree in writing; provided that, notwithstanding the satisfaction or waiver of such conditions, in no event shall the Closing occur prior to January 5, 2024, unless Parent elects to waive this proviso in its sole discretion (which election must be made by Parent no later than December 11, 2023) (the date on which the Closing occurs is referred to in this Agreement as the "Closing Date"). The Closing shall take place remotely by the exchange of electronic documents by facsimile, PDF or other electronic means. The Merger shall become effective at the Effective Time as set forth in the Articles of Merger, which Merger Sub and the Company shall file with the Secretary of State of the State of Iowa on the Closing Date.

SECTION 2.03. Effects of Merger. From and after the Effective Time, the Merger shall have the effects set forth in this Agreement and the applicable provisions of the IBCA. Without limiting the generality of the foregoing, and subject thereto, at the Effective Time, all of the property owned, and every contractual right possessed, by the Company and Merger Sub shall vest in the Surviving Company, and all liabilities of the Company and Merger Sub shall become the liabilities of the Surviving Company.

SECTION 2.04. Articles of Incorporation and Bylaws of the Surviving Company. At the Effective Time, the articles of incorporation and bylaws of the Surviving Company shall be amended and, with respect to the bylaws, restated in substantially the form of the articles of incorporation and bylaws of Merger Sub as in effect immediately prior to the Effective Time, except (i) that the name of the Surviving Company shall remain as American Equity Investment Life Holding Company, until thereafter changed or amended as provided therein or pursuant to applicable Law (in each case, subject to Section 7.08), and (ii) as required pursuant to Section 3.01(f) with respect to the preferred stock of the Surviving Company.

SECTION 2.05. Board of Directors and Officers of Surviving Company. The directors of Merger Sub in office immediately prior to the Effective Time shall be the directors of the Surviving Company until the earlier of their death, resignation or removal or until their respective successors are duly elected or appointed and qualified, as the case may be, in accordance with the IBCA and the bylaws of the Surviving Company. Except to the extent requested in writing by Parent in advance of the Effective Time, the officers of the Company in office immediately prior to the Effective Time shall be the officers of the Surviving Company until the earlier of their death, resignation or removal or until their respective successors are duly elected or appointed and qualified, as the case may be, in accordance with the bylaws of the Surviving Company.

ARTICLE III

EFFECT ON THE SHARE CAPITAL OF THE CONSTITUENT ENTITIES; PAYMENT OF CONSIDERATION

SECTION 3.01. Effect of Merger on the Share Capital of Merger Sub and the Company. At the Effective Time, by virtue of the occurrence of the Merger, and without any action on the part of the Company, Parent, Merger Sub or any holder of any shares of Common Stock, any shares of Preferred Stock or any shares, par value $1.00 per share, of Merger Sub ("Merger Sub Stock"):

(a) Share Capital of Merger Sub. Each share of Merger Sub Stock issued and outstanding immediately prior to the Effective Time shall automatically be converted into and become one duly authorized, validly issued, fully paid and nonassessable share of common stock, par value $1.00 per share, of the Surviving Company ("Surviving Common Stock").

(b) Parent-Owned Common Stock. Each issued and outstanding share of Common Stock that is owned by Parent, any Parent Group Shareholder, Merger Sub or any other direct or indirect Subsidiary of Parent immediately prior to the Effective Time shall automatically become one duly authorized, validly issued, fully paid and nonassessable share of Surviving Common Stock.

(c) Cancelation of Treasury Stock. Each share of Common Stock owned by the Company as treasury stock and each share of Common Stock issued and outstanding immediately prior to the Effective Time and owned by the Company or any direct or indirect Subsidiary of the Company immediately prior to the Effective Time shall automatically be canceled and shall cease to exist and be outstanding, and no consideration shall be delivered in exchange therefor.

(d) Conversion of Common Stock.

(i) Subject to Section 3.01(b), Section 3.01(c) and Section 3.05, each share of Common Stock issued and outstanding immediately prior to the Effective Time, shall automatically be canceled and converted into and shall thereafter represent the right to receive the following consideration (the "Merger Consideration"):

(A) an amount in cash equal to $38.85, without interest (the "Cash Consideration"), subject to adjustment as provided for in Section 3.01(e); and

(B) a number of fully paid and nonassessable shares of BAM Class A Stock equal to the Exchange Ratio (the "Stock Consideration"), subject to adjustment as provided for in Section 3.01(e), and cash in lieu of fractional shares of BAM Class A Stock.

(ii) As of the Effective Time, each share of Common Stock canceled pursuant to Section 3.01(d)(i) shall no longer be issued and outstanding and shall automatically be canceled and shall cease to exist, and each holder of a certificate that immediately prior to the Effective Time evidenced any such shares of Common Stock (each, a "Certificate") or any such Common Stock in uncertified form through a direct registry system immediately prior to the Effective Time (each, a "Book-Entry Share") shall cease to have any rights with respect thereto, except the right to receive the Merger Consideration, cash in lieu of fractional shares of BAM Class A Stock, if any, and any unpaid dividends or other distributions pertaining to the Common Stock represented by such Certificate or Book-Entry Share, as applicable, to be paid in consideration therefor, in accordance with Section 3.02(b) without interest.

(e) Adjustments to Merger Consideration.

(i) If at any time during the period between the date of this Agreement and the Effective Time, any change in the outstanding BAM Class A Stock or Common Stock shall occur by reason of any reclassification, recapitalization, split or combination (including a reverse stock split), exchange, merger, consolidation or readjustment of shares, or any stock dividend thereon with a record date during such period, or any similar transaction or event, the Merger Consideration, the Exchange Ratio and any other similarly dependent items, as the case may be, shall be appropriately and equitably adjusted to provide the holders of Common Stock the same economic effect as contemplated by this Agreement prior to such event. Nothing in this Section 3.01(e)(i) shall be construed as permitting the Company or BAM to take any action or enter into any transaction otherwise prohibited by this Agreement.

(ii) Notwithstanding anything to the contrary in this Agreement, if the BAM Class A Stock Price is less than $30.48, Parent and BAM shall have the right (in their sole discretion) to elect to reduce (but not to below zero) the Exchange Ratio by delivering written notice of such election to the Company no later than 4:00 p.m. New York time on the second trading day immediately preceding the Closing Date; provided that, unless Parent and BAM elect to reduce the Exchange Ratio to zero, any such reduction in the Exchange Ratio shall not result in the value of the aggregate amount of Stock Consideration (determined on the basis of the BAM Class A Stock Price) after giving effect to such reduction being less than $200,000,000. If Parent and BAM make such an election, (A) the amount of the Cash Consideration shall be increased by an amount equal to the product of (1) the positive excess of (x) the Exchange Ratio as determined in accordance with the definition thereof prior to giving effect to such reduction, over (y) the Exchange Ratio after giving effect to such reduction, multiplied by (2) the BAM Class A Stock Price and (B) if such election reduces the Exchange Ratio to zero, (1) all of BAM's obligations pursuant to Sections 3.02(a)(ii)(B) and 3.02(d), Article VI and Sections 7.02, 7.04, 7.14(d), 7.20 and 8.03(c) shall automatically cease to have any further force and effect and (2) the conditions set forth in Sections 8.01(b), 8.01(e), 8.03(c) and 8.03(d) shall be deemed waived by all of the parties hereto and of no further force or effect (provided, however, that this subclause (1) shall not relieve BAM of any liability for any breach of any such provision by BAM prior to the making of such election).

(f) Preferred Stock. At the Effective Time, by virtue of the Merger and without any action on the part of any holder thereof,

(i) each share of Series A Preferred Stock issued and outstanding immediately prior to the Effective Time shall be unaffected by the Merger and remain outstanding as one share of Series A Preferred

Stock of the Surviving Company entitled to the same dividends and all other preferences and privileges, voting rights, relative, participating, optional and other special rights, and subject to the same qualifications, limitations and restrictions, set forth in the certificate of designations applicable thereto as of immediately prior to the Effective Time, and (B) each depositary share issued pursuant to the Series A Deposit Agreement, representing one-thousandth of one share of Series A Preferred Stock ("Series A Depositary Share") issued and outstanding immediately prior to the Effective Time shall be unaffected by the Merger and remain outstanding and represent one-thousandth of one share of Series A Preferred Stock of the Surviving Company; and

(ii) each share of Series B Preferred Stock issued and outstanding immediately prior to the Effective Time shall be unaffected by the Merger and remain outstanding as one share of Series B Preferred Stock of the Surviving Company entitled to the same dividends and all other preferences and privileges, voting rights, relative, participating, optional and other special rights, and subject to the same qualifications, limitations and restrictions, set forth in the certificate of designations applicable thereto as of immediately prior to the Effective Time, and (B) each depositary share issued pursuant to the Series B Deposit Agreement, representing one-thousandth of one share of Series B Preferred Stock ("Series B Depositary Share", together with the Series A Depositary Shares, the "Depositary Shares") issued and outstanding immediately prior to the Effective Time shall be unaffected by the Merger and remain outstanding and represent one-thousandth of one share of Series B Preferred Stock of the Surviving Company.

(g) Preferred Stock Dividends Declared Prior to Closing. Parent acknowledges and agrees on its behalf and on behalf of the Surviving Company that if, prior to the Closing Date, any dividend for which a record date prior to the Closing Date and a payment date following the Closing Date has been declared to holders of Preferred Stock, that such dividend shall be paid by or on behalf of the Surviving Company to holders of record as of such record date on the applicable payment date.

(h) Surviving Company Stock. At the Effective Time, if any Stock Consideration is included in the Merger Consideration, the Surviving Company will issue shares of Surviving Common Stock to Parent in consideration for Parent depositing or causing to be deposited such Stock Consideration pursuant to Section 3.02(a)(ii). The number of shares of Surviving Common Stock issued to Parent pursuant to this Section 3.01(h) will have a fair market value equal to the fair market value of such Stock Consideration.

SECTION 3.02. Exchange Fund.

(a) Exchange Agent.

(i) Not less than 30 days prior to the anticipated Closing Date, Parent shall designate a bank or trust company reasonably acceptable to the Company to act as agent (the "Exchange Agent") for the purpose of exchanging shares of Common Stock for the Merger Consideration in accordance with this Article III and, in connection therewith, shall enter into an agreement with the Exchange Agent prior to the Closing Date in a form reasonably acceptable to the Company.

(ii) Prior to the Effective Time, (A) Parent shall deposit or cause to be deposited with the Exchange Agent an amount in cash in U.S. dollars that is sufficient to pay the aggregate Cash Consideration, and any cash payable in lieu of fractional shares of BAM Class A Stock pursuant to Section 3.02(e); and (B) BAM and Parent shall deposit or cause to be deposited with the Exchange Agent evidence of BAM Class A Stock in book-entry form in the name of the Exchange Agent (or its designee) representing an aggregate number of shares of BAM Class A Stock sufficient to deliver the aggregate Stock Consideration (such cash and shares of BAM Class A Stock being hereinafter referred to as the "Exchange Fund"). Parent agrees to deposit, or cause to be deposited, with the Exchange Agent from time to time, as needed, cash in U.S. dollars sufficient to pay any dividends and other distributions pursuant to Section 3.02(h).

(iii) The Exchange Fund shall be held in trust by the Exchange Agent for the benefit of the holders of Common Stock that are entitled to receive the Merger Consideration. Pending its disbursement in accordance with this Section 3.02, the cash portion of the Exchange Fund shall be invested by the Exchange Agent as directed by Parent in (i) short-term direct obligations of the United States of America, (ii) short-term obligations for which the full faith and credit of the United States of America is pledged to provide for the payment of principal and interest, (iii) short-term commercial paper rated the highest quality by either Moody's Investors Service, Inc. or Standard and Poor's Ratings Services or (iv) certificates of deposit, bank repurchase agreements or banker's acceptances of commercial banks with capital exceeding $10,000,000,000 (based on the most recent financial statements of such bank that are then publicly available). Parent shall or shall cause the Surviving Company to promptly replace or restore the cash in the Exchange Fund so as to ensure that the Exchange Fund is at all times maintained at a level sufficient for the Exchange Agent to promptly make all payments to former holders of Common Stock of the Merger Consideration. No investment losses resulting from investment of the funds deposited with the Exchange Agent shall diminish the rights of any former holder of Common Stock to receive the Merger Consideration. The Exchange Fund shall not be used for any purpose other than the payment to holders of Common Stock of the Merger Consideration.

(b) Letter of Transmittal; Exchange of Common Stock. As soon as practicable after the Effective Time (but in no event later than three business days after the Effective Time), the Surviving Company or Parent shall cause the Exchange Agent to mail to each holder of record of a Certificate that immediately prior to the Effective Time evidenced any Common Stock to be canceled pursuant to Section 3.01(d)(i) ("Company

Stock Certificates") a form of letter of transmittal (which (i) shall specify that delivery of a Company Stock Certificate shall be effected, and risk of loss and title to such Company Stock Certificate shall pass, only upon delivery of such Company Stock Certificate to the Exchange Agent and (ii) shall be in such form and have such other customary provisions as the Surviving Company may specify, subject to the Company's reasonable approval (to be obtained prior to the Effective Time)), together with instructions thereto, setting forth, *inter alia*, the procedures by which holders of Company Stock Certificates may receive the Merger Consideration pursuant to this Article III. Upon the completion of such applicable procedures by a holder and the surrender of such holder's Company Stock Certificates (or affidavit of loss in lieu thereof in accordance with Section 3.02(c)) for cancellation to the Exchange Agent, and without any action by any holder of record of Book-Entry Shares that immediately prior to the Effective Time represented any Common Stock ("Company Book-Entry Shares"), the Exchange Agent shall deliver to such holder (other than any holder of Common Stock representing Dissenting Shares), (A) in the case of Company Book-Entry Shares, a notice of the effectiveness of the Merger, (B) the number of shares of BAM Class A Stock representing, in the aggregate, the whole number of shares of BAM Class A Stock, if any, that such holder has the right to receive as Stock Consideration and (C) an amount of cash that such holder has the right to receive as Cash Consideration and cash in lieu of fractional shares of BAM Class A Stock, if any, in each case, with respect to the shares of Common Stock represented by such Company Stock Certificate or Company Book-Entry Shares immediately prior to the Effective Time, and such Company Stock Certificates or Company Book-Entry Shares shall forthwith be canceled. If payment of the Merger Consideration is to be made to a Person other than the Person in whose name a Company Stock Certificate surrendered is registered, it shall be a condition of payment that (x) the Company Stock Certificate so surrendered shall be properly endorsed or shall otherwise be in proper form for transfer and (y) the Person requesting such payment shall have established to the reasonable satisfaction of the Surviving Company that any transfer and other Taxes required by reason of the payment of the Merger Consideration to a Person other than the registered holder either has been paid or is not applicable. Notwithstanding the foregoing, with respect to any shares of Common Stock held through DTC, Parent and the Company shall cooperate to establish procedures with the Exchange Agent and DTC to ensure that the Exchange Agent will transmit to DTC or its nominees as soon as reasonably practicable on or after the Closing Date, upon surrender of Common Stock held of record by DTC or its nominees in accordance with DTC's customary surrender procedures, the Merger Consideration, and cash in lieu of fractional shares of BAM Class A Stock, if any, in each case, that such holder has the right to receive pursuant to this Article III. Until satisfaction of the applicable procedures contemplated by this Section 3.02 and subject to Section 3.05, each Company Stock Certificate or Company Book-Entry Share shall be deemed at any time after the Effective Time to represent only the right to receive the Merger Consideration formerly represented by such Company Stock Certificate or Company Book-Entry Share as contemplated by this Article III. No interest shall be paid or shall accrue on the cash payable with respect to any Common Stock pursuant to this Article III.

(c) Lost, Stolen or Destroyed Company Stock Certificates. If any Company Stock Certificate shall have been lost, stolen or destroyed, upon the making of an affidavit of that fact by the Person claiming such Company Stock Certificate to be lost, stolen or destroyed and, if required by the Surviving Company, the posting by such Person of a bond, in such reasonable amount as Parent may direct, as indemnity against any claim that may be made against it with respect to such Company Stock Certificate, the Surviving Company shall cause the Exchange Agent to pay, in exchange for such lost, stolen or destroyed Company Stock Certificate, the applicable Merger Consideration as contemplated by this Article III.

(d) Termination of Exchange Fund. At any time following the first anniversary of the Closing Date, the Surviving Company shall be entitled to require the Exchange Agent to deliver to it any portion of the Exchange Fund (including any interest received with respect to the Exchange Fund and any shares of BAM Class A Stock) that had been delivered to the Exchange Agent and which has not been disbursed to former holders of Common Stock, and thereafter such former holders shall be entitled to look only to Parent, BAM and the Surviving Company for, and Parent, BAM and the Surviving Company shall remain liable for, payment of their claims of the Merger Consideration that such former holders have the right to receive pursuant to the provisions of this Article III. Any amounts remaining unclaimed by such holders at such time at which such amounts would otherwise escheat to or become property of any Governmental Authority shall become, to the extent permitted by applicable Law, the property of Parent or its designee, free and clear of all claims or interest of any Person previously entitled thereto.

(e) No Fractional Shares. No certificates, receipts or scrip representing fractional interests in BAM Class A Stock will be issued upon the surrender or transfer for exchange of Company Stock Certificates or Company Book-Entry Shares, no dividend or distribution of BAM will relate to such fractional BAM Class A Stock interests, and such fractional BAM Class A Stock interests will not entitle the owner thereof to vote or to any rights of a holder of BAM Class A Stock. Parent shall pay to the Exchange Agent an amount in cash to be deposited promptly following the Effective Time, sufficient for the Exchange Agent to pay each holder of Company Stock Certificates or Company Book-Entry Shares an amount in cash (rounded to the nearest cent) equal to the product of (1) the fraction of a share of BAM Class A Stock (rounded to the nearest thousandth when expressed in decimal form) to which such holder (after aggregating all fractional BAM Class A Stock interests to be received by such holder) would otherwise have been entitled to receive, multiplied by (2) an amount equal to the BAM Class A Stock Price.

(f) No Liability. Notwithstanding any provision of this Agreement to the contrary, none of the Company, BAM, the Parent Entities, the Surviving Company or the Exchange Agent shall be liable to any Person for Merger Consideration lawfully delivered to a public official pursuant to any applicable state, federal or other abandoned property, escheat or similar applicable Law.

(g) Transfer Books; No Further Ownership Rights in Common Stock. The Merger Consideration paid in respect of each share of Common Stock in accordance with the terms of this Article III shall be deemed to have been paid in full satisfaction of all rights pertaining to such Common Stock previously represented by such Certificates or Book-Entry Shares, subject, however, to Section 3.05. At the Effective Time, the share transfer books of the Company shall be closed and thereafter there shall be no further registration of transfers on the share transfer books of the Surviving Company of any shares of Common Stock that were issued and outstanding immediately prior to the Effective Time. From and after the Effective Time, the holders of Common Stock formerly represented by Certificates or Book-Entry Shares immediately prior to the Effective Time shall cease to have any rights with respect to such underlying Common Stock, except as otherwise provided for herein or by applicable Law. Subject to the last sentence of Section 3.02(d), if, at any time after the Effective Time, Certificates or Book-Entry Shares are presented to the Surviving Company for any reason, they shall be canceled and exchanged as provided in this Article III.

(h) Distributions with Respect to Un-surrendered Shares. All shares of BAM Class A Stock to be delivered as Stock Consideration to a holder of Common Stock pursuant to this Agreement shall be deemed delivered as of the Effective Time and whenever a dividend or other distribution is declared by BAM in respect of the BAM Class A Stock, the record date for which is at or after the Effective Time, that declaration shall include dividends or other distributions in respect of all shares of BAM Class A Stock to be delivered as Stock Consideration pursuant to this Agreement. No dividends or other distributions in respect of shares of BAM Class A Stock delivered as Stock Consideration pursuant to this Agreement shall be paid to any holder of any un-surrendered Company Stock Certificate until the Company Stock Certificate (or affidavit of loss in lieu of such Company Stock Certificate as provided in Section 3.02(c)) is surrendered for exchange in accordance with this Article III. Subject to applicable Law, following such surrender, there shall be issued or paid to the holder of record of the whole shares of BAM Class A Stock delivered as Stock Consideration in exchange for the Company Stock Certificates (and any Company Book-Entry Shares held by such holder) in accordance with this Article III, without interest, (i) at the time of such surrender, the dividends or other distributions with a record date after the Effective Time theretofore payable with respect to such whole shares of BAM Class A Stock and not paid and (ii) at the appropriate payment date, the dividends or other distributions payable with respect to such whole shares of BAM Class A Stock with a record date after the Effective Time and prior to surrender, but with a payment date subsequent to surrender. Such holder of Company Book-Entry Shares shall be entitled to vote after the Effective Time at any meeting of holders of BAM Class A Stock with a record date at or after the Effective Time the number of whole shares of BAM Class A Stock into which the shares represented by such Company Book-Entry Shares have been exchanged pursuant to this Agreement, regardless of whether such holder has exchanged its Company Stock Certificates.

(i) Withholding Taxes. Parent, Merger Sub, the Surviving Company and the Exchange Agent (without duplication) shall be entitled to deduct and withhold from the amounts otherwise payable pursuant to this Agreement (including in respect of Company Awards) such amounts as are required to be deducted and withheld with respect to the making of such payment under the Code, or any provision of other applicable Tax Law. To the extent amounts are so withheld and paid over to the appropriate Governmental Authority in accordance with applicable Law, the withheld amounts shall be treated for all purposes of this Agreement as having been paid to the Person in respect of which such deduction and withholding was made. The parties hereby agree to use commercially reasonable efforts to provide written notice to the party entitled to the relevant payment of any anticipated withholding or deduction prior to making any deduction or withholding from amounts payable pursuant to this Agreement, and further agree to take commercially reasonable efforts to cooperate to eliminate or reduce any such deduction or withholding.

SECTION 3.03. Company Awards. Prior to the Effective Time, the Company Board (or, if appropriate, any duly authorized committee thereof administering the Company Stock Plans) shall adopt such resolutions and take such other actions as may be required to provide for the following:

(a) Company Options. Each Company Option (whether vested or unvested) outstanding immediately prior to the Effective Time shall, as of the Effective Time, automatically and without any required action by the holder thereof, be canceled and the holder thereof shall then become entitled to receive, in full satisfaction of the rights of such holder with respect thereto, a cash payment, without interest, equal to the product, rounded to the nearest cent, of (i) the number of shares of Common Stock subject to such Company Option immediately prior to the Effective Time and (ii) the excess, if any, of the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(a) at the BAM Class A Fixed Stock Price) over the exercise price per share of such Company Option; provided that any Company Option with an exercise price per share that is equal to or greater than the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(a) at the BAM Class A Fixed Stock Price) shall be automatically canceled as of Closing for no consideration.

(b) Company RSUs. Each Company RSU (other than a Rollover Company RSU) outstanding immediately prior to the Effective Time shall, as of the Effective Time, automatically and without any required action by the holder thereof, vest and be canceled and the holder thereof shall then become entitled to receive, in full satisfaction of the rights of such holder with respect thereto, a cash payment, without interest, equal to the product, rounded to the nearest cent, of (i) the number of shares of Common Stock subject to such Company RSU immediately prior to the Effective Time and (ii) the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(b) at the BAM Class A Fixed Stock Price).

(c) Company PSUs. Each Company PSU outstanding immediately prior to the Effective Time shall, as of the Effective Time, automatically and without any required action by the holder thereof, vest and be canceled and the holder thereof shall then become entitled to receive, in full satisfaction of the rights of such holder with respect thereto, a cash payment, without interest, equal to the product, rounded to the nearest cent, of (i) the number of shares of Common Stock subject to such Company PSU immediately prior to the Effective Time (assuming for (A) Company PSUs other than VWAP PSUs, a performance level determined based on the greater of target and actual performance as reasonably determined by the Compensation and Talent Management

Committee of the Company Board immediately prior to the Effective Time and (B) for VWAP PSUs, attainment of applicable performance goals based on the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(c) at the BAM Class A Fixed Stock Price)) and (ii) the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(c) at the BAM Class A Fixed Stock Price).

(d) Company Restricted Stock. Each award of Company Restricted Stock outstanding immediately prior to the Effective Time shall, at the Effective Time, automatically and without any required action on the part of the holder thereof, have any restrictions thereon lapse and the holder thereof shall then become entitled to receive, in full satisfaction of the rights of such holder with respect thereto, a cash payment, without interest, equal to the product, rounded to the nearest cent, of (i) the number of shares of Company Restricted Stock held by such holder immediately prior to the Effective Time and (ii) the Merger Consideration (valuing the Stock Consideration for purpose of this Section 3.03(d) at the BAM Class A Fixed Stock Price).

(e) Rollover Company RSUs. Any Company RSU that is a Rollover Company RSU outstanding immediately prior to the Effective Time shall, at the Effective Time, automatically and without any required action by the holder thereof, cease to represent an award denominated in Common Stock and shall be converted into an award of cash-settled restricted stock units denominated in shares of BAM Class A Stock(an "Exchanged RSU"), with the number of shares subject to each such Exchanged RSU equal to the product (rounded to the nearest whole number) of (i) the number of shares of Common Stock subject to such Rollover Company RSU immediately prior to the Effective Time and (ii) the Company Award Conversion Ratio. Except as specifically provided above, following the Effective Time, each Exchanged RSU shall continue to be governed by the same material terms and conditions (including vesting schedule and termination protections established for the applicable Company RSU) as were applicable to the Rollover Company RSU immediately prior to the Effective Time.

SECTION 3.04. Payments with Respect to Company Awards. Notwithstanding anything in this Agreement to the contrary, all amounts payable pursuant to this Article III in respect of each Company Award (other than the Rollover Company RSUs) shall be paid as promptly as reasonably practicable after the Effective Time, but in no event later than the second regularly scheduled payroll date following the Effective Time, by the Surviving Company or any of its Subsidiaries through their payroll systems, less applicable Tax withholdings (or, in the case of non-employee directors, such other method as the Company typically utilizes for payments to such Persons), to the holders of the Company Awards; provided that, with respect to any Company Awards that constitute nonqualified deferred compensation subject to Section 409A of the Code and that are not permitted to be paid at the Effective Time without triggering a Tax or penalty under Section 409A of the Code, such payment shall be made at the earliest time permitted under the applicable Company Stock Plan and award agreement that will not trigger a Tax or penalty under Section 409A of the Code.

SECTION 3.05. Shares of Dissenting Holders.

(a) Notwithstanding any provision of this Agreement to the contrary, Dissenting Shares shall not be converted into, or represent the right to receive, the Merger Consideration. As of the Effective Time, each Dissenting Share shall no longer be issued and outstanding and shall automatically be canceled and shall cease to exist, and each holder of a Dissenting Share immediately prior to the Effective Time shall be entitled to receive payment of the appraised value of such shares of Common Stock held by them in accordance with the applicable provisions of the IBCA, except that all Dissenting Shares held by shareholders who shall have failed to perfect or who effectively shall have withdrawn or lost their rights to appraisal of such shares of Common Stock under the IBCA shall thereupon be deemed to have been converted into, and to have become exchangeable for, as of the Effective Time, the right to receive the Merger Consideration, without any interest thereon, upon completion of applicable procedures and surrender of the Company Stock Certificates in accordance with Section 3.02(b) or, in the case of holders of Company Book-Entry Shares, without any action by such holder in accordance with Section 3.02(b), and in each case, shall cease to be Dissenting Shares hereunder.

(b) The Company shall give Parent (i) prompt notice of any demands for appraisal received by the Company, withdrawals of such demands, and any other related instruments received by the Company; and (ii) the opportunity to direct all negotiations and proceedings with respect to demands for appraisal under the IBCA. The Company shall not, except with the prior written consent of Parent, make any payment with respect to any demands for appraisal or offer to settle or settle any such demands.

ARTICLE IV

REPRESENTATIONS AND WARRANTIES OF THE COMPANY

The Company represents and warrants to Parent and Merger Sub that, except as (A) set forth in the corresponding section of the disclosure letter delivered by the Company to Parent and Merger Sub on the date of this Agreement (the "Company Disclosure Letter") (it being agreed that disclosure set forth in one section or sub-section of the Company Disclosure Letter shall be deemed disclosure with respect to, and shall be deemed to apply to and qualify, the section or sub-section of this Article IV to which it corresponds in number and each other section or sub-section of this Article IV to the extent the qualifying nature of such disclosure with respect to such other section or sub-section is reasonably apparent on the face of such disclosure) or (B) disclosed in any report, schedule, form, statement or other document (including exhibits) filed with, or furnished to, the SEC by the Company and publicly available at least three business days prior to the date of this Agreement (the "Filed SEC Documents"), other than any disclosure contained in such Filed SEC Documents under the heading "Risk Factor" or "Forward-Looking Statements" or sections of such reports, or that otherwise constitute risk factors or forward-looking statements:

SECTION 4.01. Organization; Standing.

(a) The Company is an Iowa corporation duly incorporated and organized and validly existing under the IBCA. The Company has all requisite power and authority necessary to carry on its business as it is now being conducted, and to own, lease and operate its assets, rights and properties in all material respects. The Company is duly licensed or qualified to do business and is in good standing (where such concept is recognized under applicable Law) in each jurisdiction in which the nature of the business conducted by it or the character or location of the properties and assets owned or leased by it makes such licensing or qualification necessary, except where the failure to be so licensed, qualified or in good standing would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions.

(b) A true, complete and correct copy of each of the Company Organizational Documents is included in the Filed SEC Documents. The Company is not in material violation of any provision of the Company Organizational Documents, and no Subsidiary of the Company is in material violation of its certificates or articles of incorporation, memorandum of association, bylaws, bye-laws or other comparable charter or organizational documents except as would not be material to the Company and its Subsidiaries, taken as a whole. The Company has made available to Parent true, complete and correct copies of the organizational documents of each of the Company's Subsidiaries set forth in Section 4.01(b) of the Company Disclosure Letter, in each case as amended and in effect as of the date hereof.

(c) Each of the Company's Subsidiaries is duly incorporated or organized, validly existing and in good standing (where such concept is recognized under applicable Law) under the Laws of the jurisdiction of its incorporation or organization, except where the failure to be so incorporated or organized, existing and in good standing would not reasonably be expected to have a Company Material Adverse Effect, taken as a whole.

SECTION 4.02. Capitalization.

(a) The authorized share capital of the Company consists of 200,000,000 shares of Common Stock and 2,000,000 shares of Preferred Stock. At the close of business on June 30, 2023 (the "Capitalization Date"), (i) 77,885,597 shares of Common Stock (including 959,314 shares of Common Stock held by the Company ESOP, of which 959,314 shares are allocated and no shares are unallocated) were issued and outstanding, (ii) 2,895,500 shares of Common Stock under the Company Stock Plans of which (A) 196,394 are shares of Company Restricted Stock, (B) 447,308 shares are subject to outstanding Company RSUs, (C) 628,841 and 1,691,015 shares of Common Stock are subject to outstanding Company PSUs (assuming achievement of any applicable performance criteria at the target and maximum levels, respectively), and (D) 1,622,957 shares are subject to unexercised Company Options (whether vested or unvested, including 1,405,820 shares subject to vested and unexercised Company Options), (iii) 3,056,407 shares of Common Stock are reserved and available for issuance under the Company Stock Plans, (iv) 16,000 shares of 5.95% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series A, of the Company (the "Series A Preferred Stock") were issued and outstanding, (v) 12,000 shares of 6.625% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series B, of the Company (the "Series B Preferred Stock", and together with the Series A Preferred Stock, the "Preferred Stock") were issued and outstanding and (vi) 31,693,317 shares of Common Stock were held by the Company as treasury stock or held by its Subsidiaries. Since the Capitalization Date through the date of this Agreement, other than in connection with the vesting, settlement or exercise of Company Awards or pursuant to allocation under the Company ESOP, neither the Company nor any of its Subsidiaries has issued any Company Securities.

(b) Except as described in this Section 4.02, as of the Capitalization Date, there were (i) no outstanding shares of Common Stock, Preferred Stock or other equity or voting interests in the Company (including bonds, debentures, notes or other Indebtedness of the Company having the right to vote), (ii) no outstanding securities of the Company convertible into or exchangeable for Common Stock or other equity or voting interests in the Company, (iii) except pursuant to any Company Awards, any Company Stock Plan or the Company ESOP, no outstanding options, warrants, rights or other commitments or agreements to acquire from the Company, or that obligate the Company to issue, any Common Stock, Preferred Stock or other equity or voting interests in, or any securities convertible into or exchangeable for Common Stock, Preferred Stock or other equity or voting interests in the Company (collectively, "Company Rights," and the items in clauses (i), (ii) and (iii) being referred to collectively as "Company Securities") and (iv) no other obligations by the Company or any of its Subsidiaries to make any payments based on the price or value of any Company Securities or dividends paid thereon. Other than in connection with the Company Awards or pursuant to a Company Stock Plan, there are no outstanding agreements of any kind that obligate the Company or any of its Subsidiaries to repurchase, redeem or otherwise acquire any Company Securities or that grant from the Company or any of its Subsidiaries any preemptive rights, anti-dilutive rights, rights of first refusal or similar rights with respect to any Company Securities. Except as described in this Section 4.02, no direct or indirect Subsidiary of the Company owns any Common Stock or Preferred Stock. None of the Company or any Subsidiary of the Company is a party to any shareholders' agreement, voting trust agreement, registration rights agreement or other similar agreement or understanding relating to any Company Securities or any other agreement relating to the disposition or voting with respect to any Company Securities. All issued and outstanding Common Stock and Preferred Stock have been duly authorized and validly issued and are fully paid, nonassessable and free of preemptive rights. As of the date of this Agreement, there are no accrued and unpaid dividends with respect to the Common Stock or the Preferred Stock.

(c) The Common Stock and the Depositary Shares constitute the only issued classes of shares or other securities of the Company or its Subsidiaries registered under the Exchange Act.

(d) All of the issued and outstanding share capital or shares of capital stock of, or other equity or voting interests in, each Subsidiary of the Company (except for directors' qualifying shares or the like) are owned, directly or indirectly, beneficially and of record, by the Company free and clear of all Liens, except for Permitted Liens. Each issued and outstanding share capital or share of capital stock of each Subsidiary of the Company that is held, directly or indirectly, by the Company, is duly authorized, validly issued, fully paid, nonassessable and free of preemptive rights, and there are no subscriptions, options, warrants, rights, calls, contracts or other commitments that obligate the Company or any Subsidiary of the Company to issue any share capital or shares of capital stock or other equity or voting interests of any Subsidiary of the Company, including any right of conversion or exchange under any outstanding security, instrument or agreement, any agreements granting any preemptive rights, subscription rights, anti-dilutive rights, rights of first refusal or similar rights with respect to any securities of any Subsidiary of the Company. None of the Subsidiaries of the Company has any outstanding equity compensation plans relating to the share capital or capital stock of, or other equity or voting interests in, any Subsidiary of the Company.

(e) The Company has made available to Parent accurate and complete copies of all Company Stock Plans, any other Contracts pursuant to which any Company Awards are outstanding as of the date of this Agreement and the forms of all Company Award agreements (and any individual award agreements whose terms materially deviate from such forms) evidencing such Company Awards as of the date of this Agreement. The exercise price of each Company Option is no less than the fair market value of a share of Common Stock as determined on the date of grant of such Company Option. All grants of Company Awards were recorded on the Company's financial statements (including any related notes thereto) contained in all reports filed with the SEC in accordance with GAAP. All Company Awards have been issued and granted in compliance in all material respects with the terms of the applicable Company Stock Plan and all applicable Laws.

SECTION 4.03. Authority; Noncontravention; Voting Requirements.

(a) The Company has all necessary corporate power and authority to execute and deliver this Agreement, to perform its obligations hereunder and, subject to obtaining the Required Shareholder Approval, to consummate the Transactions. The execution, delivery and performance by the Company of this Agreement, and the consummation by the Company of the Transactions, have been duly and unanimously authorized and approved by the Company Board, and, except for obtaining the Required Shareholder Approval, no other corporate action (including any shareholder vote or other action) on the part of the Company is necessary to authorize the execution, delivery and performance by the Company of this Agreement and the consummation by the Company of the Transactions. This Agreement has been duly executed and delivered by the Company and, assuming due authorization, execution and delivery hereof by each other party, constitutes a legal, valid and binding obligation of the Company, enforceable against the Company in accordance with its terms, except that such enforceability (i) may be limited by bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium, rehabilitation, conservatorship, liquidation, receivership and other similar Laws of general application affecting or relating to the enforcement of creditors' rights generally and (ii) is subject to general principles of equity, whether considered in a proceeding at law or in equity (together, the "Bankruptcy and Equity Exception").

(b) The Company Board has unanimously (i) determined that this Agreement and the Transactions, including the Merger, are advisable, fair to and in the best interests of the Company and its shareholders (other than the Parent Group Shareholders and any other Parent Affiliated Shareholders), including in consideration of community interest factors, (ii) approved and adopted this Agreement and the Transactions, including the Merger, (iii) directed that this Agreement and the Transactions, including the Merger, be submitted to the shareholders of the Company for their approval and (iv) resolved, subject to Section 7.03, to recommend approval of the Merger and this Agreement to the Company's shareholders (such recommendation, the "Company Board Recommendation"), and, as of the date of this Agreement, such resolutions have not been subsequently rescinded, modified or withdrawn in any way.

(c) Neither the execution and delivery of this Agreement by the Company, nor the consummation by the Company of the Transactions, nor performance of or compliance by the Company with any of the terms or provisions hereof, will (i) conflict with or violate any provision of (A) the Company Organizational Documents or (B) the certificates or articles of incorporation, memorandums of association, bylaws, bye-laws or other comparable charter or organizational documents of any of the Company's Subsidiaries or (ii) assuming (A) compliance with the matters set forth in Section 5.02(c) (other than Section 5.02(c)(ii)(A)) (and assuming the accuracy of the representations and warranties made in such Section 5.02(c)), (B) that the actions described in Section 4.03(a) have been completed, (C) that the Consents referred to in Section 4.04 and the Required Shareholder Approval are obtained and (D) that the filings referred to in Section 4.04 are made and any waiting periods thereunder have terminated or expired, in the case of each of the foregoing clauses (A) through (D), prior to the Effective Time, (x) violate in any material respect any Law applicable to the Company or any of its Subsidiaries, (y) require any consent or notice, or conflict with, violate or constitute a default under any of the terms, conditions or provisions of any Material Contract, or any Reinsurance Agreement or IMA or give rise to any right of purchase, termination, amendment, acceleration or cancellation under, result in the loss of any benefit to the Company or, if applicable, its Subsidiaries under, or result in the triggering of any payments by the Company or, if applicable, its Subsidiaries pursuant to, any such Material Contract, or Reinsurance Agreement or IMA or (z) result in the creation of any Lien on any properties or assets of the Company or any of its Subsidiaries, except, in the case of clauses (ii)(y) and (ii)(z), as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions.

(d) A majority of the votes cast (in person or by proxy) in favor of the approval of this Agreement and the Merger by the holders of the Common Stock present and voting together as a single class at the Company Shareholders Meeting (the "Required Shareholder Approval"), is the only vote of, or approval by, the holders of any class or series of share capital of the Company or any of its Subsidiaries that is necessary to approve this Agreement and the Merger; provided that a quorum is established at the Company Shareholders Meeting by attendance (in person or by proxy) of the holders of a majority of the Common Stock issued and outstanding.

SECTION 4.04. Governmental Approvals. Except for (a) compliance with the applicable requirements of the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder (collectively, the "Exchange Act"), including the filing with the Securities and Exchange Commission (the "SEC") of a proxy statement on Schedule 14A relating to the Company Shareholders Meeting (as amended or supplemented from time to time, the "Proxy Statement/Prospectus"), (b) compliance with the rules and regulations of the NYSE, (c) the filing of the Articles of Merger as required by the IBCA, (d) filings required under, and compliance with other applicable requirements of, the HSR Act, and such other Consents, filings, declarations or registrations as are required to be made or obtained under any other Antitrust Laws set forth in Section 4.04(d) of the Company Disclosure Letter, (e) the filing with the Financial Industry Regulatory Authority ("FINRA") of an application by the Broker-Dealer Subsidiary under FINRA Rule 1017 (the "Rule 1017 Application") and the receipt of FINRA's approval of such application, (f) compliance with any applicable state securities or blue sky laws, (g) approvals, filings and notices under all applicable Insurance Laws as set forth in Section 4.04(g) of the Company Disclosure Letter (the "Company Insurance Approvals"), (h) the Parent Insurance Approvals (assuming the accuracy of the representations and warranties made in Section 5.03 and the completeness of Section 5.03 of the Parent Disclosure Letter) and (i) such other Consents, filings, declarations or registrations that, if not obtained, made or given, would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or impair the consummation by the Company of the Transactions on a timely basis, no Consent of, or filing, declaration or registration with, any Governmental Authority is necessary for the execution and delivery of this Agreement by the Company, the performance by the Company of its obligations hereunder and the consummation by the Company of the Transactions.

SECTION 4.05. Company SEC Documents; Undisclosed Liabilities.

(a) The Company has filed with or furnished to (as applicable) the SEC all reports, schedules, forms, statements, registration statements, prospectuses, proxy statements and other documents required to be filed or furnished by the Company with the SEC on a timely basis pursuant to the Securities Act or the Exchange Act since January 1, 2021 (collectively with any other reports, schedules, forms, certifications, statements, registration statements, prospectuses, proxy statements and other documents, including the exhibits and other information incorporated therein, filed or furnished by the Company with the SEC after the date hereof, the "Company SEC Documents") in all material respects. As of their respective effective dates (in the case of Company SEC Documents that are registration statements filed pursuant to the requirements of the Securities Act) or their respective SEC filing dates (in the case of all other Company SEC Documents), or, if supplemented, modified or amended since the time of filing, as of the date of the most recent supplement, modification or amendment, the Company SEC Documents complied in all material respects with the requirements of the Securities Act, the Exchange Act, the Sarbanes-Oxley Act and the applicable rules and regulations of the SEC promulgated thereunder, applicable to such Company SEC Documents, and none of the Company SEC Documents contained any untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading. As of the date of this

Agreement, there are no outstanding or unresolved comments from the SEC staff with respect to any Company SEC Document.

(b) Each of the consolidated financial statements of the Company (including all related notes or schedules) included or incorporated by reference in the Company SEC Documents complied as to form, as of the dates and for the periods referred to therein and as of their respective dates of filing with the SEC, in all material respects with the applicable accounting requirements and published rules and regulations of the SEC, the Securities Act and the Exchange Act with respect thereto, have been prepared in all material respects in accordance with GAAP as in effect on the date of such statement (except, in the case of unaudited quarterly statements, for normal and recurring year-end adjustments) applied on a consistent basis during the periods involved (except (i) as may be indicated in the notes thereto or (ii) as permitted by Regulation S-X) and fairly present in all material respects the consolidated financial position of the Company and its consolidated Subsidiaries as of the dates thereof and the consolidated results of their operations, changes in shareholders' equity and cash flows for the periods shown (subject, in the case of unaudited quarterly financial statements, to normal year-end adjustments). Since January 1, 2021, the Company has not made any material change in the accounting practices or policies applied in the preparation of its financial statements prepared in accordance with GAAP, except as required by GAAP, SEC rule or policy or applicable Law. None of the Company or its Subsidiaries is a party to, or has any obligation or other commitment to become a party to, any "off balance sheet arrangement" (as defined in Item 303(a) of Regulation S-K promulgated by the SEC).

(c) Neither the Company nor any of its Subsidiaries has any liabilities of any nature (whether accrued, absolute, contingent or otherwise) that would be required under GAAP, as in effect on the date of this Agreement, to be reflected on a consolidated balance sheet of the Company (including the notes thereto) except liabilities (i) reflected or reserved against in the balance sheet (or the notes thereto) of the Company and its Subsidiaries as of December 31, 2022, included in the Filed SEC Documents, (ii) incurred after December 31, 2022, in the ordinary course of business, (iii) as contemplated by this Agreement or otherwise incurred in connection with the Transactions, (iv) as relate to Taxes or (v) as would not reasonably be expected to be material to the Company and its Subsidiaries, taken as a whole.

(d) The Company is, and since January 1, 2021, has been, in compliance in all material respects with the provisions of the Sarbanes-Oxley Act of 2002 and the rules and regulations of the SEC promulgated thereunder (the "Sarbanes-Oxley Act") that are applicable to the Company.

(e) None of the information supplied or to be supplied by or on behalf of the Company or its Subsidiaries for inclusion or incorporation by reference in the Proxy Statement/Prospectus shall, on the date it is first mailed to shareholders of the Company, at the time of any amendment thereof or supplement thereto and at the time of any meeting of the Company's shareholders to be held in connection with the Merger, including the Company Shareholders Meeting, contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they are made, not misleading. The Proxy Statement/Prospectus will comply as to form with the requirements of the Exchange Act, the Securities Act and any other applicable Law governing the preparation, distribution or dissemination of such documents. Notwithstanding the foregoing, the Company makes no representation or warranty with respect to statements made or incorporated by reference therein based on information supplied by or on behalf of Parent, Merger Sub or any Affiliates thereof for inclusion or incorporation by reference in the Proxy Statement/Prospectus.

(f) No material weaknesses exist with respect to the internal control over financial reporting of the Company that would be required to be disclosed by the Company pursuant to Item 308(a)(3) of Regulation S-K promulgated by the SEC that have not been disclosed in the Company SEC Documents as filed with or furnished to the SEC prior to the date of this Agreement. The Company maintains a system of internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that is designed to provide reasonable assurances (x) regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, (y) that receipts and expenditures of the Company are being made only in accordance with authorizations of management and the directors of the Company and (z) regarding prevention or timely detection of the unauthorized acquisition, use or disposition of the Company's and its Subsidiaries' assets that could have a material effect on the Company's financial statements. The Company has established and maintains disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and Rule 15d-15(e), as applicable, under the Exchange Act) as required by Rule 13a-15 under the Exchange Act, designed to ensure that information required to be disclosed by the Company in the reports that it files and submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, including that information required to be disclosed by the Company in the reports that it files and submits under the Exchange Act is accumulated and communicated to management of the Company, as appropriate, to allow timely decisions regarding required disclosure and to make the certifications required pursuant to Sections 302 and 906 of the Sarbanes-Oxley Act. Since January 1, 2021, neither the Company nor any of its Subsidiaries has received any written complaint, allegation, assertion or claim regarding the accounting or auditing practices, procedures, methodologies or methods of the Company or any of its Subsidiaries or their respective internal accounting controls or any allegation of fraud that involves management of the Company or any other employee of the Company or any of its Subsidiaries who has a significant role in the Company's internal controls over financial reporting or disclosure controls and procedures. The Company has disclosed, based on its most recent evaluation, to the Company's outside auditors and the audit committee of the Company Board, (i) all significant deficiencies and material weaknesses in the design and operation of internal control over financial reporting which are reasonably likely to adversely affect in any material respect the Company's ability to record, process, summarize and report financial data and (ii) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal control over financial reporting.

(g) The Company is in compliance in all material respects with the applicable listing and corporate governance rules and regulations of the NYSE.

(h) As of the date hereof, except as disclosed in the Company SEC Documents, within the last twelve (12) months, no event has occurred and no relationship exists that would be required to be reported by the Company pursuant to Item 404 of Regulation S-K.

SECTION 4.06. Absence of Certain Changes. From December 31, 2022 through the date of this Agreement, except for the execution, delivery and performance of this Agreement and the discussions, negotiations and transactions related thereto (including the Transactions) and to alternative transactions to the Transactions and any COVID Measures, (a) the business of the Company and its Subsidiaries has been conducted in all material respects in the ordinary course of business and (b) there has not been any event or condition that has had, or would reasonably be expected to have, a Company Material Adverse Effect.

SECTION 4.07. Legal Proceedings. Except as would not reasonably be expected to, individually or in the aggregate, have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions, there is no (a) Action pending or, to the Knowledge of the Company, threatened in writing against the Company or any of its Subsidiaries or any of their respective officers, directors or employees (other than ordinary course claims made under or in connection with Contracts of insurance or reinsurance issued or assumed by the Company or any of its Subsidiaries) or (b) outstanding injunction, order, judgment, ruling, decree or writ imposed upon the Company or any of its Subsidiaries or, to the Knowledge of the Company, any director or officer of the Company or any of its Subsidiaries in connection with the officer's or director's relationship with the Company, in each case, by or before any Governmental Authority.

SECTION 4.08. Compliance with Laws; Permits.

(a) The Company and each of its Subsidiaries and their respective officers, directors, and personnel are, and since January 1, 2021, have been, in compliance with all federal, national, provincial, state, local or multinational laws, statutes, common laws, ordinances, codes, rules and regulations (collectively, "Laws"), judgments, decrees and orders of Governmental Authorities and Permits, in each case, applicable to the Company or any of its Subsidiaries, except as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions. The Company and each of its Subsidiaries hold, and since January 1, 2021, have held, all licenses, memberships, franchises, permits, certificates, approvals, authorizations and registrations from Governmental Authorities (collectively, "Permits") necessary for the lawful conduct of their respective businesses and all such Permits are in full force and effect, except where the failure to hold the same or the failure of the same to be in full force and effect would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the

Transactions. There are no Actions pending or, to the Knowledge of the Company, threatened, that seek the revocation, cancellation or adverse modification of any Permit.

(b) Except as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions, neither the Company nor any of its Subsidiaries is a party to any agreement or settlement with any Governmental Authority, under which it has any ongoing obligations or restrictions, with respect to any actual or alleged violation of any applicable Law.

(c) The Company, each of its Subsidiaries, and to the Knowledge of the Company, each of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) and any other third party acting on behalf of the Company or any of its Subsidiaries, has, since January 1, 2021, complied with all applicable Specified Business Conduct Laws, except as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions.

(d) Except as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions, since January 1, 2021, neither the Company nor any of its Subsidiaries, nor, to the Knowledge of the Company, any of their respective directors, officers or employees (each in their capacities as such) has been, subject to any actual, pending or threatened civil, criminal or administrative actions, suits, demands, claims, hearings, notices of violation, investigations, proceedings, demand letters, settlements or enforcement actions, or made any disclosures to any Governmental Authority, involving the Company or any of its Subsidiaries, in any way relating to any applicable Specified Business Conduct Laws.

(e) Neither the Company nor any of its Subsidiaries, nor, to the Knowledge of the Company, any of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) or any other third party acting on behalf of the Company or any of its Subsidiaries, is a Sanctioned Person.

(f) Except as would not reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions, since January 1, 2021, neither the Company nor any of its Subsidiaries, nor, to the Knowledge of the Company, any of their respective directors, officers, employees, agents, representatives, sales intermediaries or any other third party acting on their behalf, has engaged in any dealings, transactions, activity or conduct with, involving or for the benefit of, any Sanctioned Person in violation of any Specified Business Conduct Laws.

(g) Neither the Broker-Dealer Subsidiary, nor any person associated with it, is subject to a "statutory disqualification" as that term is used for purposes of the

Securities Exchange Act. The Broker-Dealer Subsidiary has in effect, and at all times required by legal or regulatory requirements has had in effect, such written supervisory policies and procedures as may be required by the SEC, FINRA and the Exchange Act, except where neither the failure to maintain any relevant components of such policies and procedures would not, either individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Company of the Transactions.

SECTION 4.09. Tax Matters.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect

(i) The Company and each of its Subsidiaries has prepared (or caused to be prepared) and timely filed (or caused to be timely filed) (taking into account valid extensions of time within which to file) all income or other Tax Returns required to be filed by any of them with the appropriate Governmental Authority in all jurisdictions in which Tax Returns are required to be filed. All such filed Tax Returns (taking into account all amendments thereto) are true, complete and accurate in all material respects, and all income or other material Taxes owed by the Company and each of its Subsidiaries that are due (whether or not shown as due on any Tax Return) have been timely paid or have been adequately reserved against in accordance with GAAP and Applicable SAP.

(ii) No Taxes with respect to any of the Company and its Subsidiaries are under audit or examination by any Governmental Authority, and there are no audits, claims, assessments, levies, administrative or judicial proceedings pending or threatened in respect of any Taxes of any of the Company and its Subsidiaries.

(iii) There are no Liens for Taxes on any of the assets of the Company or any of its Subsidiaries other than Permitted Liens.

(iv) Neither the Company nor any of its Subsidiaries has (A) waived any statute of limitations in respect of any Taxes or agreed to any extension of time with respect to an assessment or deficiency for any Taxes, which waiver or agreement, as applicable, remains in effect (other than pursuant to extensions of time to file Tax Returns obtained in the ordinary course), (B) applied for a private letter ruling or similar ruling from any Governmental Authority relating to Taxes that has not been granted or has proposed to enter into an agreement with a Governmental Authority relating to Taxes that is pending or (C) entered into any "closing agreement" as described in Section 7121 of the Code (or any similar provision of state, local or foreign Tax Law), offer in compromise or similar agreement with a Governmental Authority relating to Taxes or has been issued any private letter rulings, technical advice memoranda or similar agreement or rulings by any Governmental Authority.

(v) Neither the Company nor any of its Subsidiaries is a party to a Tax allocation, sharing, indemnity or similar agreement or arrangement, other than (A) Contracts solely between the Company and its Subsidiaries and (B) agreements or arrangements entered into in the ordinary course of business that does not relate principally to Taxes, or has any liability for Taxes of another Person (other than the Company or any of its Subsidiaries) under U.S. Treasury Regulation Section 1.1502-6 (or any similar provision of applicable Law), as a transferee or successor or by Contract (other than any Contract that does not relate principally to Taxes).

(vi) Neither the Company nor any of its Subsidiaries will be required to include any item of income in, or exclude any item of deduction from, taxable income for any taxable period (or portion thereof) ending after the Closing Date, as a result of any (A) change in method of accounting for a taxable period ending on or prior to the Closing Date under Section 481 of the Code (or any corresponding provision of state, local or foreign income Tax law), (B) disposition accounted for under the installment sale method made on or prior to the Closing Date or (C) prepaid amount received on or prior to the Closing Date. Section 4.09(a)(vi) of the Company Disclosure Letter sets forth a schedule of amounts that the Company or any of its Subsidiaries will be required to include in income after the Closing Date under Section 13517(c)(3) of the Tax Cuts and Jobs Act of 2017, Pub. L. No. 115-97.

(vii) All excise Tax Returns and excise Taxes under Section 4371 of the Code with respect to any reinsurance or retrocession agreement to which the Company or any of its Subsidiaries is a party have been duly and timely filed and paid.

(viii) The Company and each of its Subsidiaries have, within the time and manner prescribed by Law, withheld and paid over to the proper Governmental Authority all amounts required to have been so withheld and paid over, and have complied with all related Tax information reporting requirements under applicable Law.

(b) Neither the Company nor any of its Subsidiaries has been a "controlled corporation" or a "distributing corporation" in any distribution occurring during the two-year period ending on the date of this Agreement that was intended to be governed by Section 355 of the Code.

(c) Neither the Company nor any of its Subsidiaries has participated in any "listed transaction" within the meaning of U.S. Treasury Regulation Section 1.6011-4(b)(2).

(d) Neither the Company nor any of its Subsidiaries has or has ever had a permanent establishment in a jurisdiction outside of the jurisdiction in which the Company or its Subsidiaries, respectively, are organized. For the avoidance of doubt, the entire United States (as defined in Section 7701(a)(9) of the Code) shall be treated as a single jurisdiction for purposes of this representation.

(e) AEL Re Bermuda Ltd. has made a valid election under Section 953(d) of the Code to be treated as a domestic corporation. No other Subsidiary of the Company organized outside of the United States has made an election under Section 953(d) of the Code to be treated as a domestic corporation.

(f) Section 4.09(f) of the Company Disclosure Letter sets forth a true and correct list of any of the Company or its Subsidiaries that is a life insurance company under Section 816(a) of the Code as of the date of this Agreement.

(g) Each of the Company and its Subsidiaries (other than AEL Re Bermuda Ltd.) is a domestic corporation for U.S. federal income Tax purposes.

(h) Notwithstanding anything to the contrary in this Agreement, (i) except for the representations and warranties set forth in Sections 4.05, 4.10, and 4.22 and this Section 4.09, neither the Company nor any of its Subsidiaries makes, and each such party hereby expressly disclaims, any express or implied representations or warranties, statutory, common law or otherwise, of any nature, with respect to Taxes, (ii) the representations and warranties of the Company and its Subsidiaries in this Section 4.09 refer only to activities prior to the Closing and shall not serve as representations or warranties regarding, or a guarantee of, nor can they be relied upon with respect to, Taxes attributable to any taxable period (or portion thereof) beginning, or Tax positions taken, after the Closing Date, and (iii) nothing in this Agreement (including the representations and warranties in this Section 4.09), other than Section 4.05 shall be construed as providing a representation and warranty with respect to the existence, amount, expiration date or limitations on (or availability of) any Tax attribute of the Company or its Subsidiaries. None of the representations and warranties in this Section 4.09 are made with respect to the tax treatment of any Insurance Contract, or as to any obligation in respect of withholding, information reporting or record-keeping in respect thereof, which will be governed by Section 4.22.

SECTION 4.10. Employee Benefits.

(a) Section 4.10(a) of the Company Disclosure Letter contains a true and complete list, as of the date of this Agreement, of each material Company Plan. With respect to each material Company Plan, the Company has made available to Parent true and complete copies (to the extent applicable) of (i) the plan document, including any amendments thereto, or if such Company Plan is not in writing, a written description of such plan, (ii) the most recent summary plan description for each material Company Plan for which such summary plan description is required by applicable Law and each summary of material modifications (if any), (iii) if such Company Plan is funded through a trust or any other funding arrangement, a copy of such trust or other funding arrangement, (iv) the most recently received IRS determination letter (or opinion or advisory letter, if applicable) and (v) the most recent annual report on Form 5500 required to be filed with the IRS with respect thereto (if any).

(b) Except as would not be expected to have a Company Material Adverse Effect, each of the Company Plans (including any related trusts) (i) has been established, operated and administered in compliance with its terms and in accordance with applicable Laws, (ii) all contributions required to be made with respect to any Company Plan have been timely made and deposited and (iii) to the Knowledge of the Company, no circumstance, fact or event exists that could result in any material default under or material violation of any Company Plan.

(c) Each Company Plan that is intended to be "qualified" within the meaning of Section 401(a) of the Code has received a favorable determination letter from the IRS regarding the Tax-qualified status of such Company Plan or is entitled to rely upon a favorable opinion letter issued by the IRS regarding the plan's Tax-qualified status and each such related trust has not been revoked, and, to the Knowledge of the Company, no events have occurred or circumstances exist that could reasonably be expected to cause the loss of reliance on such determination or opinion letter or adversely affect the Tax-qualified status of any such Company Plan or related trust.

(d) The Company does not maintain, sponsor or contribute to, nor within the past six years has it maintained, sponsored or contributed to, or required to maintain, sponsor or contribute to, a plan subject to Title IV of ERISA or Section 412 of the Code, including any "single employer" defined benefit plan (within the meaning of Section 3(35) of ERISA) or any "multiemployer plan" (as defined in Section 4063 of ERISA). No Company Plan is, and none of the Company or any of its Subsidiaries has any actual or contingent liability under, any "multiple employer plan" (within the meaning of Section 413(c) of the Code) or any "multiple employer welfare arrangement" as defined in Section 3(40) of ERISA. Neither the Company nor any of its Subsidiaries has any current or contingent liability or obligation with respect to any Company Plan as a consequence of at any time being considered a single employer under Section 414 of the Code with any other Person, trade or business, whether or not incorporated (an "ERISA Affiliate"). In addition, during the past six years, no liability under (i) Title IV or Section 302 of ERISA or Sections 412 and 4971 of the Code or (ii) Section 4980B of the Code as a result of a failure to comply with the continuation coverage requirements of Section 601 et seq. of ERISA and Section 4980B of the Code, has, in either case, been incurred by the Company or any ERISA Affiliate that has not been satisfied in full and, to the Knowledge of the Company, no condition exists that presents a risk to the Company or any ERISA Affiliate of incurring such liability that would reasonably be expected to result in material liability to the Company or any of its Subsidiaries. There has been no non-exempt prohibited transaction (within the meaning of Section 406 of ERISA or Section 4975 of the Code) with respect to any Company Plan, except for transactions that would not reasonably be expected to result in any material liability to the Company and its Subsidiaries taken together as a whole.

(e) Except as required under applicable Law, no Company Plan provides health, medical, dental or life insurance benefits following retirement or other termination of employment.

(f) There are no pending, or to the Knowledge of the Company, anticipated or threatened Actions against the Company or any of its Subsidiaries with respect to any Company Plan, by or on behalf of any employee, former employee or beneficiary covered under any such Company Plan (other than routine claims for benefits) that would reasonably result in material liability to the Company and its Subsidiaries. No Company Plan is, or since January 1, 2021 has been, the subject of an examination, investigation or audit by a Governmental Authority.

(g) Neither the execution and delivery of this Agreement nor the consummation of the Transactions (either alone or in conjunction with any other event) will (i) result in any severance payment or benefit becoming due to any current or former employee, officer, director or other natural individual service provider of the Company or its Subsidiaries, (ii) increase, or enhance the terms of, any severance or other compensation or benefits otherwise payable to any current or former employee, officer, director or other natural individual service provider of the Company or its Subsidiaries, (iii) result in any acceleration of the time of payment, funding (through a grantor trust or otherwise) or vesting of any such compensation or benefits to any current or former employee, officer, director or other natural individual service provider of the Company or its Subsidiaries, (iv) trigger any increased or accelerated contributions to any Company Plan or trigger any change in the funding or covenant support arrangements for any Company Plan or (v) limit or restrict the right to amend, terminate or transfer the assets of any Company Plan on or following the Effective Time.

(h) The consummation of the Transactions (either alone or in combination with another event) will not result in the payment (or acceleration of vesting) of any amount or benefit that would, individually or in combination with any other payment, constitute an "excess parachute payment" within the meaning of Section 280G of the Code.

(i) No Person is entitled to receive any additional payment (including any Tax gross-up or other payment) from the Company or any of its Subsidiaries as a result of the imposition of the excise Taxes required by Section 4999 of the Code or any Tax, interest or penalties imposed by Section 409A of the Code (or any corresponding or similar provision of state, local or non-U.S. Law).

(j) Except as would not be expected to have a Company Material Adverse Effect, each Company Plan that constitutes a "nonqualified deferred compensation plan" within the meaning of Section 409A of the Code is and has been maintained and operated in documentary and operational compliance with Section 409A of the Code or an available exemption therefrom.

(k) Neither the Company nor any of its Subsidiaries maintains any Company Plan or other similar compensation or benefit arrangement that is subject to the Laws of any jurisdiction outside of the United States or that is registered or required to be registered or approved by a non-U.S. Governmental Authority.

(l) Except as would not be expected to have a Company Material Adverse Effect, (i) the Company ESOP was validly authorized, established and maintained in accordance with applicable Law, (ii) the trust under the Company ESOP (the "<u>Trust</u>") is a tax-exempt trust established in accordance with Section 501(a) of the

Code and is administered and interpreted in accordance with applicable Law, (iii) the Company ESOP has received a determination from the Internal Revenue Service that the Company ESOP meets the applicable qualification requirements of Section 401(a) of the Code and, to the Knowledge of the Company, since the date of such determination (A) such qualified status has not been revoked and (B) nothing has occurred that would reasonably be expected to cause revocation of such qualified status or inability to rely on such determination and (iv) the Common Stock held by the Trust constitute "employer securities" as defined in Section 409(l) of the Code and "qualifying employer securities" as defined in Section 407(d)(5) of ERISA. As of the date hereof, no loans have been granted to or are outstanding for any participant under the Company ESOP.

SECTION 4.11. Labor Matters.

(a) Except as would not be expected to have a Company Material Adverse Effect, (i) neither the Company nor any of its Subsidiaries is a party to, or bound by, any collective bargaining agreement, labor agreement or other labor-related agreement with a labor union, labor organization, trades council, works council or similar organization and (ii) (A) there are no, and since January 1, 2021, have been no, labor organizing activities or representation or certification demands, petitions or proceedings by any labor organization, labor union, trades council, works council or similar organization or group of employees of the Company or any of its Subsidiaries to organize or represent any employees of the Company or any of its Subsidiaries, and no pending demand for recognition or certification as the exclusive bargaining representative of any employees has been made by or on behalf of any labor union, labor organization, trades council, works council or similar organization, (B) the consent of, consultation of or the rendering of formal advice by any labor union, labor organization, trades council, works council, employee representative body or similar organization is not required for the execution and delivery of this Agreement by the Company or the consummation by the Company of the Transactions, (C) since January 1, 2021, there has been no actual, or, to the Knowledge of the Company, threatened strike, lockout, slowdown, work stoppage, unfair labor practice charge, grievance or arbitration against or affecting the Company or any of its Subsidiaries, (D) neither the Company nor any of its Subsidiaries is engaged in any unfair labor practice and there are not any unfair labor practice charges or complaints against the Company or any of its Subsidiaries pending or, to the Knowledge of the Company, threatened before the National Labor Relations Board and (E) there is no material charge of discrimination in employment or employment practices by the Company, including with respect to age, gender, race, religion or other legally protected category pending or, to the Knowledge of the Company, threatened before the United States Equal Employment Opportunity Commission or any other Governmental Authority responsible for the prevention of unlawful employment practices in any jurisdiction in which the Company or any Subsidiary has employed or currently employs any person.

(b) Since January 1, 2021, (i) there have been no allegations of sexual harassment, sexual abuse or other sexual misconduct made against any member of the Company Board or officer of the Company subject to the reporting requirements of Section 16(a) of Exchange Act and (ii) there are no Actions pending or, to the Knowledge of the Company, threatened related to any allegations of sexual harassment, sexual abuse or other sexual misconduct by any member of the Company Board or officer of the Company subject to the reporting requirements of Section 16(a) of the Exchange Act. Since January 1, 2021, neither the Company nor any of its Subsidiaries has entered into any settlement agreements related to allegations of sexual harassment, sexual abuse or other sexual misconduct by any member of the Company Board or officer of the Company subject to the reporting requirements of Section 16(a) of the Exchange Act.

(c) Except as would not reasonably be expected to have a Company Material Adverse Effect, the Company and its Subsidiaries are in compliance with applicable Laws respecting labor and employment matters, including discrimination in employment, employment practices, equal employment opportunity, terms and conditions of employment, disability rights or benefits, reasonable accommodations, hiring, training and/or promotion, payroll, tax withholding, worker classification (including the proper classification of workers as contingent workers, independent contractors and consultants), immigration (including applicable I-9 Laws), wages, hours, workers' compensation, plant closings, labor and collective bargaining, employee leave issues, unemployment insurance, mandatory social security and pension schemes, privacy, employee record keeping and occupational safety and health, other than instances of noncompliance that would not reasonably be expected to result in material liability to the Company or any of its Subsidiaries. Neither the Company nor any of its Subsidiaries has taken any action during the past three (3) years that would trigger the notice and other requirements under the Worker Adjustment and Retraining Notification Act of 1988 and any other similar applicable foreign, state or local statutes or regulations of any jurisdiction relating to any plant closing or mass layoff or similar triggering event for which any material liability remains unsatisfied.

SECTION 4.12. Intellectual Property; Data Privacy and Cybersecurity.

(a) Section 4.12(a) of the Company Disclosure Letter sets forth a true and complete list, as of the date of this Agreement, of all material Company Intellectual Property that is issued, registered or subject to an application for issuance or registration, indicating for each item (i) the current owner (including, with respect to domain names, the current registrant), (ii) the jurisdiction where the application, registration or issuance is filed, (iii) the application, registration and issue number (as applicable) and (iv) the application, registration and issue date (as applicable). Except as would not reasonably be expected to have a Company Material Adverse Effect, all Company Intellectual Property that is issued or registered is subsisting and, to the Knowledge of the Company, valid and enforceable.

(b) Except as would not reasonably be expected to have a Company Material Adverse Effect, the Company and its Subsidiaries are the exclusive owners of the Company Intellectual Property, free and clear of all Liens other than Permitted Liens, and have sufficient rights (which rights are, to the Knowledge of the Company, valid and enforceable) to use all other Intellectual Property used in the conduct of the business of the Company and its Subsidiaries as currently conducted.

(c) Except as would not reasonably be expected to have a Company Material Adverse Effect, (i) all Persons (including current and former employees and independent contractors) who are or were involved in or contributed to the development of, or otherwise would have rights in or to, any Company Intellectual Property have irrevocably assigned to the Company or one of its Subsidiaries all of their rights in and to such Company Intellectual Property (and such assignments are, to the Knowledge of the Company, valid), or the Company or one of its Subsidiaries owns such Company Intellectual Property by operation of Laws; and (ii) the Company and each of its Subsidiaries have taken commercially reasonable actions to protect and preserve the secrecy of all Trade Secrets owned by the Company or any of its Subsidiaries.

(d) Except as would not reasonably be expected to have a Company Material Adverse Effect, (i) the Company and its Subsidiaries do not use or distribute, nor have used or distributed, any Software licensed, provided or distributed under any open source license, including any license meeting the Open Source Definition or the Free Software Definition (as promulgated by the Open Source Initiative or the Free Software Foundation, respectively) or any Software that contains or is derived from any such Software ("Open Source Software") in any manner that would require any source code of any proprietary Software owned or purported to be owned by the Company or its Subsidiaries to be disclosed, licensed for free, publicly distributed or dedicated to the public; and (ii) the Company and its Subsidiaries are in compliance with the terms and conditions of all relevant licenses (including all requirements relating to notices and making source code available to third parties) for all Open Source Software used in the business of the Company and its Subsidiaries.

(e) Except as would not reasonably be expected to have a Company Material Adverse Effect, no claims, disputes or other Actions are pending or, to the Knowledge of the Company, threatened in writing (in each case, that has not since been resolved) challenging the ownership, enforceability, scope, validity or use by the Company or any of its Subsidiaries of any Company Intellectual Property or alleging that the Company or any of its Subsidiaries is infringing, misappropriating or otherwise violating the Intellectual Property of any Person.

(f) Except as would not reasonably be expected to have a Company Material Adverse Effect, (i) to the Knowledge of the Company, no Person is infringing, misappropriating or otherwise violating any Company Intellectual Property and (ii) the operation of the business of the Company and its Subsidiaries as currently conducted does not infringe, misappropriate or otherwise violate the Intellectual Property of any other Person.

(g) Except as would not reasonably be expected to have a Company Material Adverse Effect, since January 1, 2021, the Company and its Subsidiaries have at all times posted privacy policies addressing the collection, retention, use and distribution of Personal Information. The Company and its Subsidiaries are not in violation of, and the Company's and its Subsidiaries' use and dissemination of Personal Information are in compliance with (i) any requirements of self-regulatory frameworks or organizations with which the Company and its Subsidiaries are contractually obligated to comply, including the Company's and its Subsidiaries' binding and customer-facing privacy policies and (ii) all applicable Laws or directives of any Governmental Authority, together with all binding regulatory guidance, rules and requirements promulgated thereunder, each as amended from time to time that relate to data privacy, data security, data protection, cybersecurity and marketing with respect to the collection, storage, use, disclosure, destruction or other processing, and transfer of Personal Information (collectively, "Privacy Obligations"), in each case, except as would not reasonably be expected to have a Company Material Adverse Effect.

(h) Except as would not reasonably be expected to have a Company Material Adverse Effect, since January 1, 2021: (i) there has not been any violation of any Privacy Obligations; (ii) no Actions alleging noncompliance with Privacy Obligations in connection with the conduct of the business of the Company and its Subsidiaries are pending or threatened in writing against the Company and its Subsidiaries with respect to any of the foregoing; and (iii) the Company and its Subsidiaries have not been impacted by any Cybersecurity Incident or otherwise required under any Privacy Obligations to give notice to any Person of any actual or alleged Cybersecurity Incident.

(i) Except as would not reasonably be expected to have a Company Material Adverse Effect, the IT Systems are sufficient for the current needs of the business of the Company and its Subsidiaries and, to the Knowledge of the Company, do not contain any Malware. Except as would not reasonably be expected to have a Company Material Adverse Effect, there have been no failures, breakdowns, outages or unavailability of any of the foregoing that have caused any material disruption to the business of the Company or its Subsidiaries. Except as would not reasonably be expected to have a Company Material Adverse Effect, (i) the Company and its Subsidiaries own or have valid rights to use and access all IT Systems and (ii) the Company and its Subsidiaries have taken commercially reasonable actions to protect the integrity and security of the IT Systems and maintain reasonable information security, backup and disaster recovery plans and procedures, and such actions, plans and procedures are designed to be consistent with applicable Privacy Obligations with respect to the foregoing and the data stored or processed thereby.

SECTION 4.13. Anti-Takeover Provisions. No "fair price," "moratorium," "control share acquisition" or other similar anti-takeover statute or similar statute or regulation (each, a "Takeover Law") applies to the Company with respect to this Agreement or the Merger.

SECTION 4.14. Real Property.

(a) Except as would not reasonably be expected to have a Company Material Adverse Effect, either the Company or one of its Subsidiaries owns good and valid title in fee simple to the Owned Real Property, free and clear of all Liens, other than Permitted Liens.

(b) Except as would not reasonably be expected to have a Company Material Adverse Effect, the Company or one of its Subsidiaries has a good and valid leasehold or subleasehold interest in each Leased Real Property pursuant to a lease or sublease agreement (each, a "Company Lease"), free and clear of all Liens (other than Permitted Liens). Each Company Lease is in full force and effect, except as enforceability thereof may be limited by the Bankruptcy and Equity Exception.

(c) Except as would not reasonably be expected to have a Company Material Adverse Effect, neither the Company nor any of its Subsidiaries, nor, to the Knowledge of the Company, any other party under any Company Lease, is in material default under any Company Lease, and no event has occurred that, with notice or lapse of time or both, would constitute a material default of any Company Lease.

(d) The Company or one of its Subsidiaries, as applicable, have obtained all certificates of occupancy and other permits or approvals required with respect to the use and occupancy of the Leased Real Property, except where a failure to obtain any such material permits or approvals would not reasonably be expected to have a Company Material Adverse Effect.

SECTION 4.15. Contracts.

(a) Except for (A) this Agreement, (B) each Company Plan, (C) each Contract filed as an exhibit to the Filed SEC Documents, Section 4.15(a) of the Company Disclosure Letter sets forth a list of all Material Contracts as of the date of this Agreement and (D) each arrangement disclosed under Item 404(a) of Regulation S-K under the Exchange Act in the Filed SEC Documents. For purposes of this Agreement, "Material Contract" means all Contracts to which the Company or any of its Subsidiaries is a party or by which the Company, any of its Subsidiaries or any of their respective properties or assets is bound (other than any Contracts to which Parent, BAM or any of their respective Affiliates is a counterparty, Company Plans, IMAs, any Contracts in respect of Investment Assets and insurance, reinsurance or retrocession treaties, agreements, slips, binders, cover notes, including the Reinsurance Agreements, or other similar arrangements) that:

(i) are or would be required to be filed by the Company as a "material contract" pursuant to Item 601(b)(10) of Regulation S-K under the Securities Act;

(ii) are with an affiliate that would be required to be disclosed under Item 404(a) of Regulation S-K under the Exchange Act;

(iii) relate to the formation or management of any joint venture, partnership or other similar agreement that is material to the business of the Company and its Subsidiaries, taken as a whole (excluding Investment Assets acquired in the ordinary course of business);

(iv) provide for Indebtedness for borrowed money or guarantees thereof of the Company or any of its Subsidiaries having an outstanding principal amount in excess of $25,000,000 individually, other than any Indebtedness between or among any of the Company and any of its Subsidiaries;

(v) have been entered into since January 1, 2021, and involve the acquisition from another Person or disposition to another Person of capital stock or other equity interests of another Person or of a business, in each case, that are material to the Company and its Subsidiaries, taken as a whole (excluding, for the avoidance of doubt, acquisitions or dispositions of investments made pursuant to the Investment Guidelines, or of supplies, products, properties or other assets in the ordinary course of business);

(vi) prohibit the payment of dividends or distributions in respect of the capital of the Company or any of its wholly owned Subsidiaries, prohibit the pledging of the capital of the Company or any wholly owned Subsidiary of the Company or prohibit the issuance of any guarantee by the Company or any Subsidiary of the Company (other than pursuant to applicable Laws);

(vii) contain provisions that prohibit the Company or any of its Subsidiaries from competing in any material respect in any material line of business or grant a right of exclusivity to any Person which prevents the Company or any Subsidiary of the Company from entering any material territory, market or field or freely engaging in business anywhere in the world in any material respect, other than Contracts that can be terminated (including such restrictive provisions) by the Company or any of its Subsidiaries on 180 or fewer days' notice without payment by the Company or any Subsidiary of the Company of any material penalty;

(viii) involve the settlement of any pending or threatened claim, action or proceeding that requires payment obligations of the Company or any of its Subsidiaries after the date hereof in excess of $25,000,000, other than claims settled under Company Insurance Policies in the ordinary course of business and within applicable policy limits;

(ix) (A) grant any right of first refusal, right of first offer or similar right with respect to any material assets, rights or properties of the Company or any of its Subsidiaries or (B) obligate the Company or any of its Subsidiaries to conduct business on an exclusive or preferential basis or that contains a "most favored nation" or similar covenant with any third party and that are material to the Company and its Subsidiaries, taken as a whole; or

(x) contain a license or grant of rights in, to or under material Intellectual Property (excluding (A) non-exclusive licenses granted in the ordinary course of business, (B) licenses granted to or for the benefit of the Company or any of its Subsidiaries of commercially available, "off-the-shelf" Software available on standard terms, and (C) licenses of Open Source Software).

(b) (i) Each Material Contract is valid and binding on the Company and/or any of its Subsidiaries to the extent such Person is a party thereto, as applicable, and, to the Knowledge of the Company, each other party thereto, and is in full force and effect, except where the failure to be valid, binding or in full force and effect would not reasonably be expected to have a Company Material Adverse Effect, (ii) the Company and each of its Subsidiaries has, as of the date of this Agreement, performed all obligations required to be performed by it under each Material Contract, except where such noncompliance would not reasonably be expected to have a Company Material Adverse Effect, (iii) neither the Company nor any of its Subsidiaries has received written notice, as of the date of this Agreement, of the existence of any event or condition which constitutes, or, after notice or lapse of time or both, will constitute, a default on the part of the Company or any of its Subsidiaries under any Material Contract, except where such default would not reasonably be expected to have a Company Material Adverse Effect, (iv) to the Knowledge of the Company, there are no events or conditions which constitute, or, after notice or lapse of time or both, will constitute a default on the part of any counterparty under such Material Contract, except as would not reasonably be expected to have a Company Material Adverse Effect and (v) neither the Company nor any of its Subsidiaries has received written notice, as of the date of this Agreement, from any other party to a Material Contract that such other party intends to terminate, not renew or renegotiate in any material respect the terms of any such Material Contract, except as would not reasonably be expected to have a Company Material Adverse Effect.

SECTION 4.16. Actuarial Appraisals; Reserves.

(a) As of the date hereof, to the Knowledge of the Company, no actuarial appraisal prepared by third-party or internal actuaries with respect to any in-force business, or blocks or lines of business, of any of the Company Insurance Subsidiaries prepared since January 1, 2021 that the Company has delivered to Parent (each such appraisal, an "Actuarial Appraisal") is inaccurate in any material respect. The factual information and data provided by the Company and its Subsidiaries for use in connection with the preparation of each Actuarial Appraisal was complete and accurate in all material respects as of the date so provided, subject in each case to any limitations and qualifications contained in such Actuarial Appraisal.

(b) The Reserves of each Company Insurance Subsidiary contained in its respective Statutory Statements as of and for the annual periods ended December 31, 2020, 2021 and 2022, in each case: (i) were determined in all material respects in accordance with generally accepted actuarial standards consistently applied throughout the specified period and were fairly stated in accordance with sound actuarial principles and Applicable SAP (in each case, except as otherwise noted in such Statutory Statements) and (ii) satisfied the requirements of all applicable Law in all material respects, except as otherwise noted in such Statutory Statements.

SECTION 4.17. Reinsurance.

(a) Section 4.17 of the Company Disclosure Letter sets forth a complete and correct list of all reinsurance agreements to which any of the Company

Insurance Subsidiaries is a party, whether as ceding company or assuming company, under which such Company Insurance Subsidiary has any material rights or material obligations (each, a "Reinsurance Agreement"). The Company has made available to Parent a true and correct copy or a summary of material terms of each Reinsurance Agreement. Each Reinsurance Agreement is valid and binding on the Company or its applicable Company Insurance Subsidiary party thereto and, to the Knowledge of the Company, each other party thereto, and is in full force and effect, except where the failure to be valid, binding or in full force and effect would not reasonably be expected to have a Company Material Adverse Effect. Neither the Company nor any Company Insurance Subsidiary has received written notice of the existence of any event or condition which constitutes, or, after notice or lapse of time or both, will constitute, a material default on the part of the Company or any Company Insurance Subsidiary under any Reinsurance Agreement and, to the Knowledge of the Company, there does not exist any event, condition or omission that would constitute, after notice or lapse of time or both, such a material default. To the Knowledge of the Company, there are no events or conditions which constitute, or, after notice or lapse of time or both, will constitute, a material default on the part of any counterparty under such Reinsurance Agreement. Neither the Company nor any Company Insurance Subsidiary has received written notice from any other party to a Reinsurance Agreement that such other party intends to cancel, terminate or amend in any material respect the terms of any such Reinsurance Agreement. There are no pending or, to the Knowledge of the Company, threatened in writing Actions with respect to any Reinsurance Agreement, except as would not reasonably be expected to have a Company Material Adverse Effect.

(b) Except as set forth in Section 4.17 of the Company Disclosure Letter, (i) to the Knowledge of the Company, no party to a Reinsurance Agreement is insolvent or the subject of a rehabilitation, liquidation, conservatorship, receivership, bankruptcy or similar proceeding, (ii) to the Knowledge of the Company, the financial condition of each party to a Reinsurance Agreement is not impaired to the extent that a default thereunder is reasonably anticipated, (iii) there are no, and since January 1, 2021 there have been no, material disputes under any Reinsurance Agreement other than disputes (A) in the ordinary course for which adequate loss reserves have been established or (B) that otherwise have been fully resolved, and (iv) each Company Insurance Subsidiary that is party to a Reinsurance Agreement is entitled under any applicable Insurance Laws and Applicable SAP to take full reinsurance credit in its Statutory Statements for all amounts reflected therein that are recoverable by it pursuant to any Reinsurance Agreement, and no Governmental Authority has objected in writing to the Statutory Statements reflecting such reinsurance credit.

SECTION 4.18. Investment Assets.

(a) The Company has provided Parent with a true, correct and complete list of all bonds, stocks, mortgage loans and other investment assets that were subject to the Reinsurance Agreements, carried on the books and records of, or that were otherwise owned by, the Company or any of its Subsidiaries as of May 31, 2023 (such bonds, stocks, mortgage loans and other investment assets, together with all such other bonds, stocks, mortgage loans and other investment assets acquired by the Company and its Subsidiaries between such date and the date of this Agreement, the "Investment Assets"). Except for Investment Assets sold in the ordinary course of business since May 31, 2023, or otherwise contemplated by this Agreement, the Company and its Subsidiaries, or a trustee acting on behalf of the Company or any such Subsidiary, has, and will have as of the Closing Date, good and valid title to all of the Investment Assets it purports to own (including pursuant to the Reinsurance Agreements), free and clear of all Liens except Permitted Liens. The Company has provided Parent with a true, correct and complete copy of the applicable policies of the Company with respect to the investment of the Investment Assets, including investment guidelines that apply to Investment Assets subject to Reinsurance Agreements (the "Investment Guidelines"), and except as approved by the Company's investment committee, (i) the Company's Investment Assets comply in all material respects with such Investment Guidelines and (ii) all transactions involving Investment Assets have complied in all material respects with the Investment Guidelines since January 1, 2021.

(b) Except as set forth in Section 4.18(b) of the Company Disclosure Letter, (i) the Company has no material funding obligations of any kind, or obligation to make any material additional advances or investments (including any obligation relating to any investment funds or vehicles, separate managed accounts, limited partnerships, currency or interest rate swap, hedge or similar arrangement) in respect of, any of the Investment Assets and (ii) there are no material outstanding commitments, options, put agreements or other arrangements relating to the Investment Assets to which the Company or any of its Subsidiaries would be subject upon or after the Closing.

(c) Section 4.18(c) of the Company Disclosure Letter sets forth a complete and correct list of all material investment management agreements relating to the assets of the Company and its Subsidiaries (each, an "IMA"). The Company has made available to Parent a true and correct copy or a summary of material terms of each IMA. Each IMA is valid and binding on the Company or its applicable Subsidiary party thereto and, to the Knowledge of the Company, each other party thereto, and is in full force and effect, except where the failure to be valid, binding or in full force and effect would not reasonably be expected to have a Company Material Adverse Effect. As of the date hereof, the Company and each of its applicable Subsidiaries and, to the Knowledge of the Company, any other party thereto, has performed all obligations required to be performed by it under each IMA. Neither the Company nor any of its Subsidiaries has received written notice of the existence of any event or condition which constitutes, or, after notice or lapse of time or both, will constitute, a material default on the part of the Company or any of its Subsidiaries under any IMA and, to the Knowledge of the Company, there does not exist any event, condition or omission that would constitute, after notice or lapse of time or both, such a material default. To the Knowledge of the Company, there are no events or conditions which constitute, or, after notice or lapse of time or both, will constitute, a material default on the part of any counterparty under such IMA. Neither the Company nor any of its Subsidiaries has received written notice from any other party to an IMA that such other party intends to cancel, terminate, not renew, change the scope of rights and obligations under or renegotiate in any material respect the terms of any such IMA. There are no pending or, to the Knowledge of the Company, threatened in writing Actions with respect to any IMA, except as would not reasonably be expected to have a Company Material Adverse Effect.

SECTION 4.19. Insurance Business.

(a) Section 4.19(a) of the Company Disclosure Letter contains a true, complete and correct list, as of the date of this Agreement, of the Company Insurance Subsidiaries, together with the jurisdiction of domicile thereof. Except as set forth in Section 4.19(a) of the Company Disclosure Letter, since January 1, 2021 (i) no Insurance Regulator has alleged in writing that any Company Insurance Subsidiary has violated in any material respect, nor is there any pending or, to the Knowledge of the Company, threatened in writing, investigation by any applicable Insurance Regulator related to alleged violations by any Company Insurance Subsidiary of, any applicable Insurance Laws, and (ii) each Company Insurance Subsidiary has filed all material reports, forms, rates, notices and materials required to be filed by it with any applicable Insurance Regulator, and none of such reports, forms, rates, notices and other materials has been objected to by such Insurance Regulator within the period provided for objection, except where such objections have been cured or otherwise resolved.

(b) Section 4.19(b) of the Company Disclosure Letter sets forth a true and correct list of all permitted accounting practices utilized by the Company Insurance Subsidiaries in the preparation of their respective Statutory Statements.

(c) Except as set forth in Section 4.19(c) of the Company Disclosure Letter, none of the Company Insurance Subsidiaries is commercially domiciled under the Laws of any jurisdiction or is otherwise treated as domiciled in a jurisdiction other than that of its jurisdiction of incorporation.

(d) Except as set forth in Section 4.19(d) of the Company Disclosure Letter, either the Company nor any of the Company Insurance Subsidiaries is subject to any requirement imposed by a Governmental Authority to maintain specified capital or surplus amounts or levels or is subject to any restriction on the payment of dividends or other distributions on its shares of capital stock, except for any such requirements or restrictions imposed by applicable Laws of general application.

(e) The Company has made available to Parent and its advisors true and complete copies of (i) any material reports on financial examination and (ii) any material reports on market conduct examination, in the case of each of (i) and (ii), delivered by any Insurance Regulator in respect of any Company Insurance Subsidiary since January 1, 2021.

(f) Except as required by Insurance Laws of general applicability and the insurance or reinsurance Permits maintained by the Company Insurance Subsidiaries, there are no material written agreements, memoranda of understanding, commitment letters or similar undertakings binding on the Company or any of its Subsidiaries or to which the Company or any of its Subsidiaries is a party, on one hand, and any Governmental Authority is a party or addressee, on the other hand, or any orders or directives by, or supervisory letters or cease-and-desist orders from, any Governmental Authority, nor has the Company nor any of its Subsidiaries adopted any board resolution at the request of any Governmental Authority, in each case specifically with respect to it or any of its Subsidiaries, which materially restrict the conduct of the Company Insurance Subsidiaries' business.

SECTION 4.20. Insurance Policies.

(a) All policy and contract forms on which any Company Insurance Subsidiary has issued an Insurance Contract and all amendments, applications, marketing materials, brochures, illustrations and certificates pertaining thereto have, to the extent required by applicable Law, been approved by all applicable Governmental Authorities or filed with such Governmental Authorities, subject to such exceptions as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(b) Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, the Company Insurance Subsidiaries have since January 1, 2021, been in compliance with applicable Law regulating the marketing and sale of Insurance Contracts, including (i) all applicable requirements and prohibitions relating to suitability of sales and replacement of policies and annuity products, (ii) all applicable requirements relating to the disclosure of the nature of insurance products as policies of insurance, (iii) all applicable requirements relating to insurance product projections and illustrations and (iv) all applicable requirements relating to the advertising, sales and marketing of insurance and annuity products.

(c) All premium rates and rating plans in use by each Company Insurance Subsidiary with respect to any Insurance Contract have to the extent required by applicable Law been approved by all applicable Governmental Authorities or filed with such Governmental Authorities, subject to such exceptions as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(d) Except for regular periodic assessments in the ordinary course of business or assessments based on developments that are publicly known within the insurance industry, as of the date hereof, there are no material unpaid claims or assessments made by any state insurance guaranty association in connection with such association's fund relating to insolvent insurance companies.

SECTION 4.21. Insurance Producers. Except as, individually or in the aggregate, is not and would not be reasonably expected to have a Company Material Adverse Effect, since January 1, 2021, (a) each employee who is an Insurance Producer and, to the Knowledge of the Company, each other Insurance Producer, (i) at the time such Insurance Producer solicited, negotiated, marketed, underwrote or sold or produced any Insurance Contract, was duly and appropriately appointed by a Company Insurance Subsidiary, in compliance with applicable Law, to act as an Insurance Producer for such

Insurance Contract, and was duly and appropriately licensed as an Insurance Producer (for the type of business sold or produced by such Insurance Producer on behalf of such Company Insurance Subsidiary), in each jurisdiction in which such Insurance Producer was required to be so licensed and (ii) has not been enjoined, indicted, convicted or made the subject of any consent decree or judgment on account of any violation of applicable Law in connection with such Insurance Producer's actions in his, her or its capacity as an Insurance Producer for any Company Insurance Subsidiary, and (b) the Company and its Subsidiaries have not received any written notice from any Governmental Authority with respect to any failures by such Insurance Producers to be so licensed or appointed. There are no outstanding disputes between the Company or any Company Insurance Subsidiary, on the one hand, and an Insurance Producer, on the other hand, concerning material amounts of commissions or other incentive compensation.

SECTION 4.22. Insurance Product-Related Tax Matters.

Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect:

(a) Each Insurance Contract (i) provides (and since the date of issuance, assumption, exchange, modification or purchase of such Insurance Contract has provided) the purchaser, policyholder, account holder, other holder or intended beneficiary thereof with a Tax treatment under the Code (including, but not limited to, Sections 72, 101, 817, 7702, 7702A and 7702B of the Code) and any similar provision of state, local, and non-U.S. Law that is not less favorable than the Tax treatment (A) that was purported to apply in written materials provided at the time of issuance, assumption, exchange, modification or purchase or (B) for which such Insurance Contract was intended or reasonably expected to qualify under the Code (including, but not limited to, Sections 72, 101, 817, 7702, 7702A and 7702B of the Code) and any similar provision of state, local and non-U.S. Law at the time of issuance, assumption, exchange, modification or purchase and (ii) complies with, and since the date of issuance, assumption, exchange, modification or purchase of such Insurance Contract has complied with, the requirements applicable to, or intended to be applicable to, such Insurance Contract under the provisions of the Code (including, but not limited to, Sections 72, 101, 817, 7702, 7702A and 7702B of the Code) and any similar provision of state, local and non-U.S. Law relating to such Insurance Contract and any Treasury Regulations and administrative guidance issued thereunder.

(b) No Insurance Contract is a "modified endowment contract" within the meaning of Section 7702A of the Code, except any Insurance Contract that is being administered as a "modified endowment contract" and with respect to which the policyholder has consented in writing to the treatment of such Insurance Contract as a "modified endowment contract" and has not acted to revoke such consent.

(c) None of the Company and its Subsidiaries has entered into any agreement or has been within the last five years involved in any discussions or negotiations with the IRS or any other Governmental Authority, or otherwise has requested within the last five years relief from the IRS or any other Governmental

Authority, regarding the failure of any Insurance Contract currently in force to meet its intended Tax treatment.

(d) None of the Company and its Subsidiaries is a party to or has received written notice of any federal, state, local or foreign audits or other administrative or judicial Action with regard to the Tax treatment of any Insurance Contract currently in force, or of any claims by the purchasers, holders or intended beneficiaries thereof regarding the Tax treatment thereof.

(e) None of the Company and its Subsidiaries is a party to any "hold harmless" or indemnification agreement or tax sharing agreement or similar arrangement under which it is liable for the Tax treatment of any Insurance Contract currently in force.

(f) The Company and its Subsidiaries have complied with all reporting, withholding and disclosure requirements of the Code, Treasury Regulations and forms issued by the IRS and other applicable Laws that are applicable to the Insurance Contracts and distributions thereunder.

(g) Notwithstanding anything to the contrary in this Agreement, except for the representations and warranties set forth in this Section 4.22, neither of the Company nor any of its Subsidiaries makes, and each such party hereby expressly disclaims, any express or implied representations or warranties, statutory, common law or otherwise, of any nature, with respect to the Tax treatment of any Insurance Contract, and as to any obligations in respect of withholding, information reporting or record-keeping in respect thereof.

SECTION 4.23. Statutory Statements. The Company has made available to Parent copies of the following statutory statements, in each case together with the exhibits, schedules and notes thereto (collectively, the "Statutory Statements"): (i) the statutory annual statement of each Company Insurance Subsidiary as of and for the annual periods ended December 31, 2020, 2021 and 2022, in each case as filed with the applicable Insurance Regulator for such Company Insurance Subsidiary, and (ii) the statutory quarterly statements of each Company Insurance Subsidiary as of and for the quarterly period ended March 31, 2023, in each case as filed with the Insurance Regulator of such Company Insurance Subsidiary, subject, in the case of Statutory Statements with respect to quarterly periods, to the absence of full footnote disclosure and normal year-end audit adjustments. The Statutory Statements were prepared in conformity with Applicable SAP applied consistently throughout the periods presented, and present fairly, in all material respects the statutory financial position and results of operations of the Company Insurance Subsidiaries as of their respective dates and for the respective periods covered thereby. Except as set forth on Section 4.23 of the Company Disclosure Letter, as of its filing date, and, if amended, as of the date of the last amendment prior to the date hereof, each such filing complied with applicable Law in all material respects. No Governmental Authority has asserted any material deficiency related to any such filing that has not been resolved, to the Knowledge of the Company, to the material satisfaction of such Governmental Authority prior to the date hereof.

SECTION 4.24. Opinion of Financial Advisor. The Company Board has received an oral opinion (to be confirmed by delivery of a written opinion promptly after the date hereof) of each of J.P. Morgan Securities LLC ("JPM") and Ardea Partners LP ("Ardea Partners"), to the effect that, as of the date of such opinion, and based upon and subject to the various assumptions, qualifications and limitations set forth therein, the Merger Consideration to be paid to the holders (other than Parent and its Affiliates) of Common Stock is fair from a financial point of view to such holders of Common Stock. It is agreed and understood that such opinion is for the benefit of the Company Board and may not be relied on by Parent or Merger Sub for any purpose.

SECTION 4.25. Brokers and Other Advisors. Except for JPM and Ardea Partners, the fees and expenses of which will be paid by the Company pursuant to the applicable engagement letter, no broker, investment banker, financial advisor or other Person is entitled to any broker's, finder's, financial advisor's or other similar fee or commission in connection with the Transactions based upon arrangements made by or on behalf of the Company, any of its Subsidiaries or any of their respective directors, officers or employees. The Company has provided an estimated calculation as of the date of this Agreement of such fees and expenses payable to JPM and Ardea Partners pursuant to their respective engagement letters.

SECTION 4.26. Critical Technology. Neither the Company nor any of its Subsidiaries produces, designs, tests, manufactures, fabricates, or develops one or more "critical technologies" as that term is defined in 31 C.F.R. § 800.215, and none of them has any current intention of engaging in such activities in the future.

ARTICLE V

REPRESENTATIONS AND WARRANTIES OF PARENT AND MERGER SUB

Parent and Merger Sub jointly and severally represent and warrant to the Company that except as (A) set forth in the corresponding section of the disclosure letter delivered by Parent and Merger Sub to the Company on the date of this Agreement (the "Parent Disclosure Letter") (it being agreed that disclosure set forth in one section or sub-section of the Parent Disclosure Letter shall be deemed disclosure with respect to, and shall be deemed to apply to and qualify, the section or sub-section of this Article V to which it corresponds in number and each other section or sub-section of this Article V to the extent the qualifying nature of such disclosure with respect to such other section or sub-section is reasonably apparent on the face of such disclosure) or (B) disclosed in any report, schedule, form, statement or other document (including exhibits) filed with, or furnished to, the SEC by Parent and publicly available at least three business days prior to the date of this Agreement (the "Parent SEC Documents"), other than any disclosure contained in such Parent SEC Documents under the heading "Risk Factor" or "Forward-Looking Statements" or sections of such reports, or that otherwise constitute risk factors or forward-looking statements:

SECTION 5.01. Organization; Standing. Parent is a Bermuda exempted company limited by shares duly incorporated and organized, validly existing and in good standing under the Laws of Bermuda, and Merger Sub is an Iowa corporation duly organized and validly existing under the IBCA. Each of Parent and Merger Sub has all requisite power and authority necessary to carry on its business as it is now being conducted, except as would not reasonably be expected to have a Parent Material Adverse Effect. Each of Parent and Merger Sub is duly licensed or qualified to do business and is in good standing (where such concept is recognized under applicable Law) in each jurisdiction in which the nature of the business conducted by it or the character or location of the properties and assets owned or leased by it makes such licensing or qualification necessary, except where the failure to be so licensed, qualified or in good standing would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions. Parent has made available to the Company true, complete and correct copies of Parent's certificate of incorporation and memorandum of association and bylaws, and Merger Sub's articles of incorporation and bylaws, each as amended to the date of this Agreement.

SECTION 5.02. Authority; Noncontravention.

(a) Each of Parent and Merger Sub has all necessary power and authority to execute and deliver this Agreement, to perform its obligations hereunder and, subject to obtaining the Merger Sub Shareholder Approval, to consummate the Transactions. The execution, delivery and performance by Parent and Merger Sub of this Agreement, and the consummation by Parent and Merger Sub of the Transactions, have been duly and unanimously authorized and approved by each of the Parent Board and the Merger Sub Board, as applicable, and, except for obtaining the Merger Sub Shareholder Approval (which approval shall be provided by the written consent of Arches Acquisition Holdco II Inc. immediately following the execution of this Agreement), no other action (including any shareholder vote or other action) on the part of Parent or Merger Sub or any of their Affiliates is necessary to authorize the execution, delivery and performance by Parent and Merger Sub of this Agreement and the consummation by Parent and Merger Sub of the Transactions (including the delivery of BAM Class A Stock as Stock Consideration pursuant to this Agreement). This Agreement has been duly executed and delivered by Parent and Merger Sub and, assuming due authorization, execution and delivery hereof by each other party, constitutes a legal, valid and binding obligation of each of Parent and Merger Sub, enforceable against each of them in accordance with its terms, except that such enforceability may be limited by and is subject to the Bankruptcy and Equity Exception.

(b) Each of the Parent Board and the Merger Sub Board have unanimously (i) determined that the terms of this Agreement are in the best interests of Parent or Merger Sub, as applicable, (ii) approved and adopted and declared the advisability of this Agreement and the Transactions, including the Merger, as of the date of this Agreement, and such resolutions have not been subsequently rescinded, modified or withdrawn in any way.

(c) Neither the execution and delivery of this Agreement by Parent and Merger Sub, nor the consummation by Parent or Merger Sub of the Transactions, nor performance of or compliance by Parent or Merger Sub with any of the terms or provisions hereof, will (i) conflict with or violate any provision of the certificates or articles of incorporation, memorandums of association, bylaws, bye-laws or other comparable charter or organizational documents of (A) Parent or Merger Sub or (B) any of Parent's other Subsidiaries or (ii) assuming (A) compliance with the matters set forth in Section 4.03(c) (other than Section 4.03(c)(ii)(A)) (and assuming the accuracy of the representations and warranties made in such Section 4.03(c)), (B) that the actions described in Section 5.02(a) have been completed, (C) that the Consents referred to in Section 5.03 and, in the case of Merger Sub, the Merger Sub Shareholder Approval are obtained and (D) that the filings referred to in Section 5.03 are made and any waiting periods thereunder have terminated or expired, in the case of each of the foregoing clauses (A) through (D), prior to the Effective Time, (x) assuming the accuracy of the representations and warranties made in Section 4.26, violate any Law applicable to Parent or any of its Subsidiaries, (y) require any consent or notice, or conflict with, violate or constitute a default under any of the terms, conditions or provisions of any material Contract to which Parent or any of its Subsidiaries is a party or give rise to any right of purchase, termination, amendment, acceleration or cancellation under, result in the loss of any benefit under, or result in the triggering of any payments pursuant to, obligations under any such material Contract or (z) result in the creation of any Lien on any properties or assets of Parent or any of its Subsidiaries, except, in the case of clauses (ii)(y) and (ii)(z), as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions.

(d) The Merger Sub Shareholder Approval (which approval shall be provided by the written consent of Arches Acquisition Holdco II Inc. as contemplated by Section 7.12) is the only vote or approval of the holders of any class or series of shares of Merger Sub that is necessary to approve this Agreement and the Merger.

SECTION 5.03. Governmental Approvals. Except for (a) compliance with the applicable requirements of the Exchange Act and Securities Act and the rules and regulations thereunder, including the filing with the SEC of (i) the Proxy Statement/Prospectus, (ii) solely if any Stock Consideration is included in the Merger Consideration, a registration statement on Form F-4 relating to the registration under the Securities Act of the shares of BAM Class A Stock that will constitute Stock Consideration (the "Form F-4") and declaration of effectiveness of the Form F-4 and (iii) such other reports as are required in connection with the Transactions, (b) solely if any Stock Consideration is included in the Merger Consideration, filings required under, and compliance with, the rules and regulations of the NYSE, including the approvals of the NYSE to authorize the listing of such shares of BAM Class A Stock, (c) filings required under, and compliance with other applicable requirements of, the HSR Act, and such other Consents, filings, declarations or registrations as are required to be made or obtained under any other Antitrust Laws, (d) the filing with FINRA of an application by the Broker-Dealer Subsidiary under FINRA Rule 1017 and the receipt of FINRA's approval of such application, (e) compliance with any applicable state securities or blue sky laws, (f) approvals, filings and notices under all applicable Insurance Laws as set forth in Section 5.03 of the Parent Disclosure Letter (the "Parent Insurance Approvals"),

(g) the Company Insurance Approvals (assuming the accuracy of the representations and warranties made in Section 4.04(g) and the completeness of Section 4.04(g) of the Company Disclosure Letter) and (h) such other Consents, filings, declarations or registrations that, if not obtained, made or given, would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or impair the consummation by the Parent Entities of the Transactions on a timely basis, and assuming the accuracy of the representations and warranties made in Section 4.26, no Consent of, or filing, declaration or registration with, any Governmental Authority is necessary for the execution and delivery of this Agreement by Parent and Merger Sub, the performance by Parent and Merger Sub of their obligations hereunder and the consummation by Parent and Merger Sub of the Transactions.

SECTION 5.04. Ownership and Operations of Merger Sub. Parent owns beneficially and of record, indirectly through one or more wholly owned Subsidiaries as set forth on Section 5.04 of the Parent Disclosure Schedule, all of the issued and outstanding shares of Merger Sub, free and clear of all Liens. Merger Sub was formed solely for the purpose of engaging in the Transactions, has no assets, liabilities or obligations of any nature other than those incident to its formation and pursuant to the Transactions, and prior to the Effective Time, will not have engaged in any business activities other than those relating to the Transactions.

SECTION 5.05. Sufficient Funds. Parent and Merger Sub collectively have, or have available to them, as of the date of this Agreement and will continue to have, or have available to them, through and at the Effective Time unencumbered cash or cash equivalents that are sufficient to permit Parent to pay the aggregate Cash Consideration, consideration payable to holders of Company Awards pursuant to Section 3.03 and any other amount required to be paid in connection with the consummation of the Transactions, including the Payoff Amount and any amounts that become payable in respect of the redemption of the Senior Notes, and to pay all related fees and expenses of Parent and Merger Sub. For the avoidance of doubt, in no event shall the receipt or availability of any funds or financing by or to Parent or any Affiliate of Parent be a condition to any of Parent's or Merger Sub's obligations hereunder.

SECTION 5.06. Guaranty and Voting Agreement. Concurrently with the execution of this Agreement, BN has delivered to the Company a true, complete and correct copy of its duly executed Guaranty, and the Parent Group Shareholders have delivered to the Company a true, complete and correct copy of their duly executed Voting Agreement. The Guaranty and the Voting Agreement are in full force and effect, have not been amended or modified and constitute a legal, valid and binding obligation of the BN and the Parent Group Shareholders, respectively, enforceable against them in accordance with their terms, subject to the Bankruptcy and Equity Exception. No event has occurred that, with notice or lapse of time or both, would, or would reasonably be expected to, constitute a default on the part of BN or the Parent Group Shareholders pursuant to the Guaranty or the Voting Agreement, as applicable.

SECTION 5.07. Certain Arrangements. As of the date of this Agreement, there are no Contracts or other arrangements or understandings (whether oral or written) or commitments to enter into Contracts or other arrangements or understandings (whether oral or written) (a) between Parent, Merger Sub or any of their Affiliates, on the one hand, and any member of the Company's management or the Company Board, on the other hand, that relate in any way to the Company or any of its Subsidiaries or the Transactions, (b) pursuant to which any shareholder of the Company would be entitled to receive consideration of a different amount or nature than the Merger Consideration or pursuant to which any shareholder of the Company agrees to vote to approve the Merger and this Agreement or agrees to vote against any Superior Proposal or (c) between Parent, Merger Sub or any of their Affiliates, on the one hand, and any holder of Company Awards, on the other hand, pursuant to which such holder would be entitled to receive consideration of a different amount or nature than the consideration payable pursuant to Section 3.03.

SECTION 5.08. Information Supplied. None of the information supplied or to be supplied by or on behalf of Parent or Merger Sub for inclusion or incorporation by reference in the Form F-4 or the Proxy Statement/Prospectus to be sent to the Company's shareholders in connection with the Company Shareholders Meeting (including any amendment or supplement thereto or document incorporated by reference therein) shall, on the date the Proxy Statement/Prospectus is first mailed to the Company's shareholders, at the time of any amendment thereof or supplement thereto and at the time of the Company Shareholders Meeting or at the time the Form F-4 (and any amendment or supplement thereto) is declared effective, contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they are made, not misleading or omit to state a material fact necessary to correct any statement in any earlier communication with respect to the solicitation of proxies for the Company Shareholders Meeting which has become false or misleading.

SECTION 5.09. Legal Proceedings. Except as would not reasonably be expected to, individually or in the aggregate, have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions, as of the date of this Agreement, there is no (a) Action pending or, to the Knowledge of Parent, threatened in writing, against Parent or any of its Affiliates or (b) outstanding injunction, order, judgment, ruling, decree or writ imposed upon the Parent Entities or any of their Affiliates, in each case, by or before any Governmental Authority.

SECTION 5.10. Compliance with Laws.

(a) Parent, Merger Sub and each of their respective Affiliates and their respective officers, directors, and personnel are, and since January 1, 2021, have been, in compliance with all Laws, judgments, decrees and orders of Governmental Authorities and Permits, in each case, applicable to Parent, Merger Sub and their respective Affiliates, except as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions.

(b) Except as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions, none of Parent, Merger Sub or any of their respective Affiliates is a party to any agreement or settlement with any Governmental Authority, under which it has any ongoing obligations or restrictions, with respect to any actual or alleged violation of any applicable Law.

(c) Parent, Merger Sub and each of their respective Affiliates, and, to the Knowledge of Parent, each of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) and any other third party acting on behalf of any of Parent, Merger Sub or any of their respective Affiliates, has, since January 1, 2021, complied with all applicable Specified Business Conduct Laws, except as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions.

(d) Except as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions, since January 1, 2021, none of Parent, Merger Sub or any of their respective Affiliates, nor, to the Knowledge of Parent, any of their respective directors, officers or employees (each in their capacities as such) has been, subject to any actual, pending or threatened civil, criminal or administrative actions, suits, demands, claims, hearings, notices of violation, investigations, proceedings, demand letters, settlements or enforcement actions, or made any disclosures to any Governmental Authority, involving Parent, Merger Sub or any of their respective Affiliates, in any way relating to any applicable Specified Business Conduct Laws.

(e) None of Parent, Merger Sub or any of their respective Affiliates, nor, to the Knowledge of Parent, any of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) or any other third party acting on behalf of Parent, Merger Sub or any of their respective Affiliates, is a Sanctioned Person.

(f) Except as would not reasonably be expected to have a Parent Material Adverse Effect or prevent, materially delay or materially impair the consummation by the Parent Entities of the Transactions, since January 1, 2021, none of Parent, Merger Sub or any of their respective Affiliates, nor, to the Knowledge of Parent, any of their respective directors, officers, employees, agents, representatives, sales intermediaries or any other third party acting on their behalf, has engaged in any dealings, transactions, activity or conduct with, involving or for the benefit of, any Sanctioned Person in violation of any Specified Business Conduct Laws.

SECTION 5.11. Ownership of Common Stock or Preferred Stock. Except as set forth in Section 5.11 of the Parent Disclosure Letter, none of Parent, Merger Sub or any of their Affiliates beneficially owns (within the meaning of Section 13 of the Exchange Act), or will prior to the Closing Date beneficially own, any Common Stock or Preferred Stock, or is a party, or will prior to the Closing Date become a party, to any

Contract, other arrangement or understanding (whether written or oral) (other than this Agreement) for the purpose of acquiring, holding, voting or disposing of any Common Stock or Preferred Stock.

SECTION 5.12. Brokers and Other Advisors. Except for Barclays Capital Inc. ("Barclays"), the fees and expenses of which will be paid by Parent, no broker, investment banker, financial advisor or other Person is entitled to any broker's, finder's, financial advisor's or other similar fee or commission in connection with the Transactions based upon arrangements made by or on behalf of Parent, any of its Subsidiaries or any of their respective directors, officers or employees.

SECTION 5.13. Pending Transactions. As of the date hereof, to the Knowledge of Parent, neither Parent nor any of its Affiliates is party to any transaction pending (a) to acquire or agree to acquire by merging or consolidating with, or by purchasing a substantial portion of the assets of or equity in, or by any other manner, any Person or portion thereof, or (b) to otherwise acquire or agree to acquire any assets, where the entering into of a definitive agreement relating to or the consummation of such acquisition, merger or consolidation, in each case, would, or would reasonably be expected to, (x) impose any material delay in the obtaining of, or significantly increase the risk of not obtaining, any consents, approvals, licenses, permits, orders, qualifications, authorizations of, or registrations or other actions by, or any filings with or notifications to, any Governmental Authority necessary to consummate the Transactions or the expiration or termination of any applicable waiting period, (y) significantly increase the risk of any Governmental Authority entering a governmental order prohibiting the consummation of the Transactions, or (z) materially delay the consummation of the Transactions.

SECTION 5.14. Ownership Structure. Section 5.14 of the Parent Disclosure Letter sets forth a true, correct and complete list of: (i) Merger Sub and each person who or which, as of the date hereof, "controls" (as such term is defined under the Insurance Laws of the Company Insurance Subsidiaries' domiciliary jurisdictions), directly or indirectly, Merger Sub (such persons, the "Control Persons"), and (ii) all Persons who or which, as of the date hereof, "control" (as such term is defined under the Insurance Laws of the Company Insurance Subsidiaries' domiciliary jurisdictions), directly or indirectly, each of the Control Persons.

ARTICLE VI

REPRESENTATIONS AND WARRANTIES OF BAM

BAM represents and warrants to the Company that except as (A) set forth in the corresponding section of the disclosure letter delivered by BAM to the Company on the date of this Agreement (the "BAM Disclosure Letter") (it being agreed that disclosure set forth in one section or sub-section of the BAM Disclosure Letter shall be deemed disclosure with respect to, and shall be deemed to apply to and qualify, the section or sub-section of this Article VI to which it corresponds in number and each other section or sub-section of this Article VI to the extent the qualifying nature of such disclosure with respect to such other section or sub-section is reasonably apparent on the face of such disclosure) or (B) disclosed in any report, schedule, form, statement, registration statement, prospectus, proxy statement or other document required to be filed or furnished by BAM with the SEC on a timely basis pursuant to the Securities Act or the Exchange Act since November 21, 2022 and publicly available at least three business days prior to the date of this Agreement (collectively with any other reports, schedules, forms, certifications, statements, registration statements, prospectuses, proxy statements and other documents, including the exhibits and other information incorporated therein, filed or furnished by BAM with the SEC after the date hereof, the "BAM SEC Documents"), other than any disclosure contained in such BAM SEC Documents under the heading "Risk Factor" or "Forward-Looking Statements" or sections of such reports, or that otherwise constitute risk factors or forward-looking statements:

SECTION 6.01. Organization; Standing. BAM is a British Columbia company duly organized, validly existing and in good standing under the laws of British Columbia. BAM has all requisite power and authority necessary to carry on its business as it is now being conducted, except as would not reasonably be expected to have a BAM Material Adverse Effect. BAM is duly licensed or qualified to do business and is in good standing (where such concept is recognized under applicable Law) in each jurisdiction in which the nature of the business conducted by it or the character or location of the properties and assets owned or leased by it makes such licensing or qualification necessary, except where the failure to be so licensed, qualified or in good standing would not reasonably be expected to have a BAM Material Adverse Effect. BAM has made available to the Company true, complete and correct copies of BAM Organizational Documents.

SECTION 6.02. Capitalization. BAM has an authorized capitalization as of the date of this Agreement consisting of an unlimited number of class A preference shares, an unlimited number of class A limited voting shares ("BAM Class A Stock") and 21,280 class B limited voting shares ("BAM Class B Stock"), and as of the May 31, 2023, no shares of class A preference shares were issued and outstanding, 412,439,447 shares of BAM Class A Stock were issued and outstanding and 21,280 shares of BAM Class B Stock were issued and outstanding. All the outstanding shares of capital stock or other equity interests of BAM and of BAM ULC that are owned by BAM have been duly and validly authorized and issued, are fully paid and non-assessable and, in the case of shares of BAM ULC owned by BAM, are owned free and clear of any lien, charge, encumbrance, security interest, restriction on voting or transfer or any other claim of any third party, except where the failure to be so authorized and issued, fully paid and non-assessable, owned by BAM, free and clear of any lien, charge, encumbrance, security interest, restriction on voting or transfer or any other claim could not reasonably be expected to have a BAM Material Adverse Effect. The shares of BAM Class A Stock to be delivered as Stock Consideration pursuant to this Agreement are, and shall be as of their delivery in accordance with the terms of this Agreement to the holders of Common Stock as of immediately prior to the Effective Time, free and clear of any Lien or restriction on voting or transfer, other than Liens created by or through the actions of such holders or any of their respective Affiliates, and any Liens arising under or relating to applicable securities laws.

SECTION 6.03. Authority; Noncontravention.

(a) BAM has all necessary power and authority to execute and deliver this Agreement, to perform its obligations hereunder and to consummate the Transactions. The execution, delivery and performance by BAM of this Agreement, and the consummation by BAM of the Transactions, have been duly authorized by BAM, and no other action (including any shareholder vote or other action) on the part of BAM or any of its Affiliates is necessary to authorize the execution, delivery and performance by BAM of this Agreement and the consummation by BAM of the Transactions (including the delivery BAM Class A Stock as Stock Consideration pursuant to this Agreement). This Agreement has been duly executed and delivered by BAM and, assuming due authorization, execution and delivery hereof by each other party, constitutes a legal, valid and binding obligation of BAM, enforceable against it in accordance with its terms, except that such enforceability may be limited by and is subject to the Bankruptcy and Equity Exception.

(b) Neither the execution and delivery of this Agreement by BAM, nor the consummation by BAM of the Transactions, nor performance of or compliance by BAM with any of the terms or provisions hereof, will (i) conflict with or violate any provision of the BAM Organizational Documents or other comparable charter or organizational documents of (A) BAM or (B) any of BAM's other Subsidiaries or (ii) assuming (A) compliance with the matters set forth in Section 4.03(c) (other than Section 4.03(c)(ii)(A)) (and assuming the accuracy of the representations and warranties made in such Section 4.03(c)), (B) that the actions described in Section 6.03(a) have been completed, (C) that the Consents referred to in Section 6.04 are obtained and (D) that the filings referred to in Section 6.04 are made and any waiting periods thereunder have terminated or expired, in the case of each of the foregoing clauses (A) through (D), prior to the Effective Time, (x) assuming the accuracy of the representations and warranties in Section 4.26, violate any Law applicable to BAM or any of its Affiliates, (y) require any consent or notice, or conflict with, violate or constitute a default under any of the terms, conditions or provisions of any material Contract to which BAM or any of its Subsidiaries is a party or give rise to any right of purchase, termination, amendment, acceleration or cancellation under, result in the loss of any benefit under or result in the triggering of any payments pursuant to, obligations under any such material Contract or (z) result in the creation of any Lien on any properties or assets of BAM or any of its Subsidiaries, except, in the case of clauses (ii)(y) and (ii)(z), as would not reasonably be expected to have a BAM Material Adverse Effect.

SECTION 6.04. Governmental Approvals. Except for (a) compliance with the applicable requirements of the Exchange Act and Securities Act and the rules and regulations thereunder, including the filing with the SEC of (i) the Proxy Statement/Prospectus, (ii) a registration statement on Form F-4 and declaration of effectiveness of the Form F-4 and (iii) such other reports required in connection with the Transactions, (b) filings required under, and compliance with the rules and regulations of the NYSE, including the approvals of the NYSE to authorize the listing of such shares of BAM Class A Stock, (c) filings required under, and compliance with other applicable requirements of, the HSR Act, and such other Consents, filings, declarations or registrations as are required to be made or obtained under any other Antitrust Laws, (d) compliance with any applicable state securities or blue sky laws, (e) the Company Insurance Approvals (assuming the accuracy of the representations and warranties made in Section 4.04(g) and the completeness of Section 4.04(g) of the Company Disclosure Letter) and (f) such other Consents, filings, declarations or registrations that, if not obtained, made or given, would not reasonably be expected to have a BAM Material Adverse Effect, and assuming the accuracy of the representations and warranties made in Section 4.26, no Consent of, or filing, declaration or registration with, any Governmental Authority is necessary for the execution and delivery of this Agreement by BAM, the performance by BAM of its obligations hereunder and the consummation by BAM of the Transactions.

SECTION 6.05. Investment Company Act. BAM is not, and after giving effect to the exchange of BAM Class A Stock for Common Stock by the holders thereof, will not be an "investment company" or an entity "controlled" by an "investment company" within the meaning of the Investment Company Act of 1940, as amended, and the rules and regulations of the SEC thereunder.

SECTION 6.06. Certain Arrangements. As of the date of this Agreement, there are no Contracts or other arrangements or understandings (whether oral or written) or commitments to enter into Contracts or other arrangements or understandings (whether oral or written) (a) between BAM or any of its Affiliates, on the one hand, and any member of the Company's management or the Company Board, on the other hand, that relate in any way to the Company or any of its Subsidiaries or the Transactions, (b) pursuant to which any shareholder of the Company would be entitled to receive consideration of a different amount or nature than the Merger Consideration or pursuant to which any shareholder of the Company agrees to vote to approve the Merger and this Agreement or agrees to vote against any Superior Proposal or (c) between BAM or any of its Affiliates, on the one hand, and any holder of Company Awards, on the other hand, pursuant to which such holder would be entitled to receive consideration of a different amount or nature than the consideration payable pursuant to Section 3.03.

SECTION 6.07. Information Supplied. None of the information supplied or to be supplied by or on behalf of BAM or any of its Affiliates for inclusion or incorporation by reference in the Form F-4 or the Proxy Statement/Prospectus to be sent to the Company's shareholders in connection with the Company Shareholders Meeting (including any amendment or supplement thereto or document incorporated by reference therein) shall, on the date the Proxy Statement/Prospectus is first mailed to the Company's shareholders, at the time of any amendment thereof or supplement thereto and at the time of the Company Shareholders Meeting, or at the time the Form F-4 (and any amendment or supplement thereto) is declared effective, contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they are made, not misleading or omit to state a material fact necessary to correct any statement in any earlier communication with respect to the solicitation of proxies for the Company Shareholders Meeting which has become false or misleading.

SECTION 6.08. <u>BAM SEC Documents; Undisclosed Liabilities</u>.

(a) BAM has filed with or furnished to (as applicable) the SEC the BAM SEC Documents. As of their respective effective dates (in the case of BAM SEC Documents that are registration statements filed pursuant to the requirements of the Securities Act) or their respective SEC filing dates (in the case of all other BAM SEC Documents), or, if supplemented, modified or amended since the time of filing, as of the date of the most recent supplement, modification or amendment, the BAM SEC Documents complied in all material respects with the requirements of the Securities Act, the Exchange Act, the Sarbanes-Oxley Act and the applicable rules and regulations of the SEC promulgated thereunder, applicable to such BAM SEC Documents, and none of the BAM SEC Documents contained any untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading. As of the date of this Agreement, there are no outstanding or unresolved comments from the SEC staff with respect to any BAM SEC Document.

(b) Each of the consolidated financial statements of BAM (including all related notes or schedules) included or incorporated by reference in the BAM SEC Documents complied as to form, as of the dates and for the periods referred to therein and as of their respective dates of filing with the SEC, in all material respects with the applicable accounting requirements and published rules and regulations of the SEC, the Securities Act and the Exchange Act with respect thereto, have been prepared in all material respects in accordance with GAAP as in effect on the date of such statement (except, in the case of unaudited quarterly statements, for normal and recurring year-end adjustments) applied on a consistent basis during the periods involved (except (i) as may be indicated in the notes thereto or (ii) as permitted by Regulation S-X) and fairly present in all material respects the consolidated financial position of BAM and its consolidated Subsidiaries as of the dates thereof and the consolidated results of their operations, changes in shareholders' equity and cash flows for the periods shown (subject, in the case of unaudited quarterly financial statements, to normal year-end adjustments). Since November 21, 2022, BAM has not made any material change in the accounting practices or policies applied in the preparation of its financial statements, except as required by GAAP, SEC rule or policy or applicable Law. None of BAM or its Subsidiaries is a party to, or has any obligation or other commitment to become a party to, any "off balance sheet arrangement" (as defined in Item 303(a) of Regulation S-K promulgated by the SEC).

(c) Neither BAM nor any of its Subsidiaries has any liabilities of any nature (whether accrued, absolute, contingent or otherwise) that would be required under GAAP, as in effect on the date of this Agreement, to be reflected on a consolidated balance sheet of BAM (including the notes thereto) except liabilities (i) reflected or reserved against in the balance sheet (or the notes thereto) of BAM and its Subsidiaries as of December 31, 2022, included in the Filed SEC Documents, (ii) incurred after December 31, 2022, in the ordinary course of business, (iii) as contemplated by this Agreement or otherwise incurred in connection with the Transactions, (iv) as relate to Taxes or (v) as would not reasonably be expected to prevent or to impede, interfere with, hinder or delay in any material respect the consummation of the Transactions or be material to BAM and its Subsidiaries, taken as a whole.

(d) BAM is, and since November 21, 2022, has been, in compliance in all material respects with the provisions of the Sarbanes-Oxley Act that are applicable to BAM.

(e) No material weaknesses exist with respect to the internal control over financial reporting of BAM that would be required to be disclosed by BAM pursuant to Item 308(a)(3) of Regulation S-K promulgated by the SEC that have not been disclosed in the BAM SEC Documents as filed with or furnished to the SEC prior to the date of this Agreement. BAM maintains a system of internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that is designed to provide reasonable assurances (x) regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, (y) that receipts and expenditures of BAM are being made only in accordance with authorizations of management and the directors of BAM and (z) regarding prevention or timely detection of the unauthorized acquisition, use or disposition of BAM's and its Subsidiaries' assets that could have a material effect on BAM's financial statements. BAM has established and maintains disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and Rule 15d-15(e), as applicable, under the Exchange Act) as required by Rule 13a-15 under the Exchange Act, designed to ensure that information required to be disclosed by BAM in the reports that it files and submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, including that the information required to be disclosed by BAM in the reports that it files and submits under the Exchange Act is accumulated and communicated to management of BAM, as appropriate, to allow timely decisions regarding required disclosure and to make the certifications required pursuant to Sections 302 and 906 of the Sarbanes-Oxley Act. Since November 22, 2022, neither BAM nor any of its Subsidiaries has received any written complaint, allegation, assertion or claim regarding the accounting or auditing practices, procedures, methodologies or methods of BAM or any of its Subsidiaries or their respective internal accounting controls or any allegation of fraud that involves management of BAM or any other employee of BAM or any of its Subsidiaries who has a significant role in BAM's internal controls over financial reporting or disclosure controls and procedures. BAM has disclosed, based on its most recent evaluation, to BAM's outside auditors and the audit committee of the Board of Directors of BAM, (i) all significant deficiencies and material weaknesses in the design and operation of internal control over financial reporting which are reasonably likely to adversely affect in any material respect BAM's ability to record, process, summarize and report financial data and (ii) any fraud, whether or not material, that involves management or other employees who have a significant role in BAM's internal control over financial reporting.

(f) BAM is in compliance in all material respects with the applicable listing and corporate governance rules and regulations of the NYSE and the Toronto Stock Exchange ("TSX").

(g) As of the date hereof, except as disclosed in the BAM SEC Documents, within the last twelve (12) months, no event has occurred and no relationship exists that would be required to be reported by BAM pursuant to Item 404 of Regulation S-K.

SECTION 6.09. Absence of Certain Changes. From December 31, 2022 through the date of this Agreement, except for (a) the execution, delivery and performance of this Agreement and the discussions, negotiations and transactions related thereto (including the Transactions) and to alternative transactions to the Transactions and (b) any COVID Measures, (i) the business of BAM has been conducted in all material respects in the ordinary course of business and (ii) there has not been any event or condition that has had, or would reasonably be expected to have, a BAM Material Adverse Effect.

SECTION 6.10. Legal Proceedings. Except as would not reasonably be expected to, individually or in the aggregate, have a BAM Material Adverse Effect, as of the date of this Agreement, there is no (a) Action pending or, to the Knowledge of BAM, threatened in writing, against BAM or any of its Affiliates or (b) outstanding injunction, order, judgment, ruling, decree or writ imposed upon BAM or any of its Affiliates, in each case, by or before any Governmental Authority.

SECTION 6.11. Compliance with Laws.

(a) BAM and each of its Affiliates and their respective officers, directors, and personnel are, and since July 4, 2022, have been, in compliance with all Laws, judgments, decrees and orders of Governmental Authorities and Permits, in each case, applicable to BAM or any of its Affiliates, except as would not reasonably be expected to have a BAM Material Adverse Effect.

(b) Except as would not reasonably be expected to have a BAM Material Adverse Effect neither BAM nor any of its Affiliates is a party to any agreement or settlement with any Governmental Authority, under which it has any ongoing obligations or restrictions, with respect to any actual or alleged violation of any applicable Law.

(c) BAM, each of its Affiliates, and, to the Knowledge of BAM, each of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) and any other third party acting on behalf of BAM or any of its Affiliates, has, since July 4, 2022, complied with all applicable Specified Business Conduct Laws, except as would not reasonably be expected to have a BAM Material Adverse Effect.

(d) Except as would not reasonably be expected to have a BAM Material Adverse Effect, since July 4, 2022, neither BAM nor any of its Affiliates, nor, to the Knowledge of BAM, any of their respective directors, officers or employees (each in their capacities as such) has been, subject to any actual, pending or threatened civil, criminal or administrative actions, suits, demands, claims, hearings, notices of violation, investigations, proceedings, demand letters, settlements or enforcement actions, or made any disclosures to any Governmental Authority, involving BAM or any of its Affiliates, in any way relating to any applicable Specified Business Conduct Laws.

(e) Neither BAM nor any of its Affiliates, nor, to the Knowledge of BAM, any of their respective directors, officers, employees, agents, representatives or sales intermediaries (each in their capacities as such) or any other third party acting on behalf of BAM or any of its Affiliates, is a Sanctioned Person.

(f) Except as would not reasonably be expected to have a BAM Material Adverse Effect, since July 4, 2022, neither BAM nor any of its Affiliates, nor, to the Knowledge of BAM, any of their respective directors, officers, employees, agents, representatives, sales intermediaries or any other third party acting on their behalf, has engaged in any dealings, transactions, activity or conduct with, involving or for the benefit of, any Sanctioned Person in violation of any Specified Business Conduct Laws.

SECTION 6.12. Brokers and Other Advisors. No broker, investment banker, financial advisor or other Person is entitled to any broker's, finder's, financial advisor's or other similar fee or commission in connection with the Transactions based upon arrangements made by or on behalf of BAM, any of its Subsidiaries or any of their respective directors, officers or employees.

ARTICLE VII

ADDITIONAL COVENANTS AND AGREEMENTS

SECTION 7.01. Conduct of Business by the Company.

(a) During the period from the date of this Agreement through the earlier of the Closing and the termination of this Agreement, except as required by applicable Law, as expressly required by an Insurance Regulator, a Governmental Authority or the National Association of Insurance Commissioners ("NAIC") or as expressly required or permitted by this Agreement or described in Section 7.01(a) of the Company Disclosure Letter, unless Parent otherwise requests or consents in writing (such consent not to be unreasonably withheld, conditioned or delayed), (w) the Company shall, and shall cause each of its Subsidiaries to, carry on its business in all material respects in the ordinary course, (x) to the extent consistent with clause (w) and subject to clause (y), the Company shall, and shall cause its Subsidiaries to, use its and their commercially reasonable efforts to (1) preserve their respective business organizations substantially intact, (2) preserve existing relations with Governmental Authorities, policyholders, reinsurance providers, rating agencies, producers, service providers and other Persons with whom the Company or its Subsidiaries have significant business relationships, and (3) retain the services of its and their current officers and key employees, in each case, in all material respects and (y) the Company shall not, and shall not permit any of its Subsidiaries to (it being understood that no act or omission by the Company or any of its Subsidiaries with respect to the matters specifically addressed by any provision of this clause (y) below shall be deemed to be a breach of clause (w) or (x)):

(i) (A) issue, sell or grant, or authorize the issue, sale or grant of, any Common Stock, Preferred Stock or other equity or voting interests of the Company, or any securities or rights convertible into, exchangeable or exercisable for, or evidencing the right to subscribe for, any Common Stock, Preferred Stock or other equity or voting interests of the Company or any of its Subsidiaries, or any options, rights, warrants or other commitments or agreements to acquire from the Company or any of its Subsidiaries, or that obligate the Company or any of its Subsidiaries to issue, any share capital of, or other equity or voting interests in, or any securities convertible into or exchangeable for shares of, or other equity or voting interests in, the Company or any of its Subsidiaries; provided that the Company may issue Common Stock, Preferred Stock or other securities as required pursuant to the vesting, settlement or exercise of Company Awards or Company Rights, in either case, that are (x) outstanding on the date of this Agreement in accordance with the terms of the applicable Company Award or Company Right in effect on the date of this Agreement or (y) granted after the date of this Agreement in accordance with Section 7.01(a) of the Company Disclosure Letter; provided, further, that the Subsidiaries of the Company may make any such issuances, sales or grants to the Company or a direct or indirect wholly owned Subsidiary of the Company, (B) redeem, purchase or otherwise acquire, or propose to redeem, purchase or otherwise acquire, any outstanding Common Stock, Preferred Stock or other equity or voting interests of the Company, or any other securities or indebtedness of the Company, or any rights, warrants or options to acquire any Common Stock, Preferred Stock or other equity or voting interests of the Company, or any other securities or indebtedness of the Company, except (x) the acquisition by the Company of Common Stock in connection with the surrender of Common Stock by a holder of a Company Option in order to pay the exercise price of such Company Option or (y) the withholding or disposition of Common Stock to satisfy Tax withholding obligations with respect to Company Awards, (C) in the case of the Company, establish a record date for, declare or propose to declare, set aside for payment or pay any dividend on, or make any other distribution in respect of the Preferred Stock or other equity or voting interests of the Company, in each case, other than cash dividends with respect to the Common Stock and the Preferred Stock as set forth in Section 7.01(a)(i) of the Company Disclosure Letter or (D) adjust, split, combine, subdivide or reclassify, or propose to adjust, split, combine, subdivide or reclassify, any Common Stock, Preferred Stock or other equity or voting interests of the Company or any of its Subsidiaries, or any other securities in respect thereof, in lieu thereof or in substitution therefor;

(ii) (A) incur, assume, guarantee or otherwise become responsible for any Indebtedness for borrowed money, except for (v) Indebtedness incurred solely between the Company and any of its Subsidiaries or solely between its Subsidiaries, (w) subject to Section 7.01(a)(xx), any incurrence, assumption or guarantee of indebtedness by any Company Insurance Subsidiary in the ordinary course (including any letters of credit issued in connection with ordinary course reinsurance transactions), (x) guarantees of Indebtedness incurred in compliance with this Section 7.01(a)(ii), (y) Indebtedness in replacement of or to refinance existing Indebtedness, provided that such replacement or refinancing indebtedness is in an aggregate principal amount not greater than the principal amount of debt so replaced or prepaid (plus any fees, premiums or penalties payable in connection with such replacement or refinancing) and (z) any other incurrence, assumption or guarantee of Indebtedness so long as the aggregate principal amount thereof does not exceed $25,000,000, or (B) enter into any swap or hedging transaction or other derivative agreements (or amend or modify any such transaction or agreement) other than in the ordinary course of business and in compliance with the Investment Guidelines; provided that, in each case under this clause (ii), the incurrence or replacement of any Indebtedness that is extinguished in full prior to, or concurrently with, the Closing in an amount not to exceed $25,000,000 in the aggregate shall not be deemed to be a breach of this provision;

(iii) sell, lease or place under management to or by any Person, in a single transaction or series of related transactions, any of its owned properties or assets (other than Intellectual Property, which is the subject of Section 7.01(a)(xix)) whose value or purchase price exceeds $10,000,000 individually, or $25,000,000 in the aggregate, except for (A) dispositions of obsolete, surplus or worn out assets or assets that are no longer used or useful in the conduct of the business of the Company or any of its Subsidiaries, (B) transfers among the Company and its Subsidiaries, (C) leases and subleases of real property owned or leased by the Company and any of its Subsidiaries, (D) pursuant to Contracts in effect on the date of this Agreement (or entered into after the date of this Agreement in compliance with this Agreement) or (E) subject to Section 7.01(a)(xx), other transactions in the ordinary course of business (including portfolio management transactions by Company Insurance Subsidiaries) or consistent with the Investment Guidelines (including in connection with cash management or investment portfolio activities);

(iv) make any loans, advances or capital contributions to, or investments in, any other person (other than any Subsidiary of the Company) other than (A) loans by any Company Insurance Subsidiary that constitute Investment Assets subject to Section 7.01(a)(xx) or made in the ordinary course of business not to exceed $1,000,000 individually, or $25,000,000 in the aggregate, (B) advances for expenses incurred in the ordinary course of business, (C) subject to Section 7.01(a)(xx), as relates to Investment Assets made in the ordinary course of business and (D) in connection with transactions permitted pursuant to Section 7.01(a)(v);

(v) make any acquisition (including by merger or amalgamation) of the share capital or other equity or voting interests of any other Person or a material portion of the assets of any other Person or any business or any corporation, partnership, joint venture, association or other business organization or division thereof, in each case for consideration in excess of $10,000,000 individually or $25,000,000 in the aggregate, except for and subject to Section 7.01(a)(xx), Investment Assets acquired in the ordinary course of business;

(vi) except as required pursuant to the terms of any Company Plan in effect on the date of this Agreement, (A) grant to any Company Employee with an annual base salary or annualized base wage rate (as applicable) of (1) $250,000 or above, any increase in compensation or benefits (or pay any bonus to, or grant any loan to any such Company Employees) and (2) below $250,000 an increase in excess of 5% of such employee's annual base salary or annualized base wage rate (as applicable) in effect as of the date hereof, (B) grant any new (or increase any existing) rights to any current or former director, officer or employee of the Company or any of its Subsidiaries in respect of any severance, change in control, retention, termination or similar compensation or benefits, (C) make any bonus, bonus opportunity, incentive award, equity or equity-based award to any current, former or prospective director, officer, employee, agent or consultant of the Company or any Company Subsidiary, (D) take any action to accelerate the vesting or lapse of restrictions or payment, or to fund or secure the payment of, any compensation or benefits, (E) establish, adopt, enter into, terminate, modify or amend any material Company Plan (other than ministerial or other administrative changes that do not materially increase the cost to the Company and its Subsidiaries of administering the Company Plan) or collective bargaining agreement or other agreement with a labor union, works council, trade union, labor association or other employee representative organization, (F) hire or terminate (other than for "cause") the employment of any individual who is or would be (as applicable) a Company Employee with an annual base salary or annualized base wage rate (as applicable) of $250,000 or above; provided, however, that the foregoing shall not restrict the Company or any of its Subsidiaries from entering into or making available to newly hired employees or to current Company Employees with an annual base salary or annualized base wage rate (as applicable) below $250,000 in the context of promotions based on job performance or workplace requirements, in each case, in the ordinary course of business, plans, agreements, benefits and compensation arrangements (excluding equity-based incentive grants) that have terms and a value that is consistent with the past practice of making compensation and benefits available to newly hired or promoted employees in similar positions;

(vii) issue or forgive any loans (other than routine travel or business expense advances issued in the ordinary course of business) to any employee, director or independent contractor (who is a natural person) of the Company or any of its Subsidiaries;

(viii) make any material changes, alterations or departures in financial accounting methods, principles or practices materially affecting the consolidated assets, liabilities or results of operations of the Company and its Subsidiaries, except insofar as may be required by (or in the reasonable good faith judgment of the Company, advisable under) (A) GAAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the FASB or any similar organization, (B) Applicable SAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the NAIC or (C) any applicable Laws, including Regulation S-X under the Securities Act, or any Governmental Authority;

(ix) except as may be required by (or, in the reasonable good faith judgment of the Company, advisable under) (A) GAAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the FASB or any similar organization, (B) Applicable SAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the NAIC or (C) any applicable Laws or any Governmental Authority, alter, amend or depart from in any material respect any existing financial accounting practice guideline, policy or principle of the Company or any of its Subsidiaries;

(x) except as may be required by (or, in the reasonable good faith judgment of the Company, advisable under) (A) GAAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the FASB or any similar organization, (B) Applicable SAP (or any interpretation thereof), including pursuant to standards, guidelines and interpretations of the NAIC or (C) any applicable Laws or any Governmental Authority, alter, amend or depart, in each case, that would result in a material deviation (with materiality measured relative to the Company and its Subsidiaries, taken as a whole) from any existing underwriting, reserving, claim handling, actuarial, loss control, investment, reinsurance or retrocession practice guideline, policy or principle of the Company and its Subsidiaries;

(xi) (A) amend the Company Organizational Documents or (B) amend in any material respect the comparable organizational documents of any of the Subsidiaries of the Company in a manner that would reasonably be expected to prevent or to impede, interfere with, hinder or delay in any material respect the consummation of the Transactions;

(xii) adopt a plan or agreement of complete or partial liquidation or dissolution, merger, amalgamation, consolidation, restructuring, recapitalization or other reorganization of the Company or any of its Subsidiaries (other than dormant Subsidiaries or, with respect to any merger, amalgamation or consolidation, other than among the Company and any wholly owned Subsidiary of the Company or among wholly owned Subsidiaries of the Company);

(xiii) grant any Lien (other than Permitted Liens) on any of its material assets other than to secure Indebtedness permitted pursuant to Section 7.01(a)(ii);

(xiv) other than in connection with claims under Insurance Contracts or Reinsurance Agreements, settle or compromise any pending or threatened Action against the Company or any of its Subsidiaries for a cash settlement amount of more than $10,000,000 individually or $25,000,000 in the aggregate (net of amounts reserved for such matters by the Company or any of its Subsidiaries or amounts covered by insurance), or which settlement imposes any material restrictions on any of the future activities of the Company and its Subsidiaries or that imposes equitable relief on, or the admission of wrongdoing by, the Company, any of its Subsidiaries or any of their respective officers or directors;

(xv) (A) make (inconsistent with past practice), change or revoke any Tax election that is material to the Company and its Subsidiaries, taken as a whole; (B) settle or compromise any audit, claim, assessment or other proceeding relating to a material amount of Tax; (C) make any change to any annual Tax accounting period or method of Tax accounting, which change is material to the Company and its Subsidiaries, taken as a whole; (D) amend, refile or otherwise revise any previously filed material Tax Return; (E) request a ruling relating to Tax (other than requests for automatic changes to methods of Tax accounting, which requests are exclusively addressed in clause (C) above); (F) enter into or terminate any agreement with any Tax authority with respect to Tax (other than agreements to settle or compromise such audits, claims, assessments or other proceedings referred to in clause (B), which are exclusively addressed in clause (B)); (G) surrender any right to claim a refund of material Taxes; (H) consent to any extension or waiver of the limitation period applicable to any Tax claim or Tax assessment that is, in each case, material to the Company and its Subsidiaries, taken as a whole; or (I) enter into any Tax sharing, indemnity or similar agreement (other than any such agreement (1) solely among the Company or any of its Subsidiaries or (2) that does not relate principally to Taxes);

(xvi) (A) enter into any new material line of business that is not an annuity line of business and in which the Company and its Subsidiaries do not operate as of the date of this Agreement and which is not complementary to any existing lines of business of the Company and its Subsidiaries; provided, that the aggregate amount of the Company's and its Subsidiaries' general account assets used or reserved for use with respect to all such new lines of business do not exceed $200,000,000 in the aggregate; or (B) withdraw from any existing material line of business;

(xvii) (A) commute, recapture, terminate, materially amend or cause or permit (to the extent within the control of the Company and its Subsidiaries) the acceleration of any material amounts payable under any third-party Reinsurance Agreement, IMA or Material Contract, other than, in the case of any Material Contract evidencing Indebtedness, any amendment or waiver obtained pursuant to, and in accordance with, Section 7.17(c) or (B) enter into any Contract that would have been a Reinsurance Agreement with a third-party or an IMA or a Material Contract had it been entered into before the execution of this Agreement;

(xviii) amend the Investment Guidelines set forth in Section 7.01(a)(xviii) of the Company Disclosure Letter in any material respect;

(xix) voluntarily (A) abandon, dispose of or permit to lapse any Company Intellectual Property material to the Company and its Subsidiaries, taken as a whole, other than in the ordinary course of business or at the end of the statutory term for such Company Intellectual Property, or (B) fail to maintain the secrecy of any material Trade Secrets included in the Company Intellectual Property, other than in the ordinary course of business;

(xx) acquire or make any commitment to acquire Investment Assets, other than as set forth in Section 7.01(a)(xx) of the Company Disclosure Letter; or

(xxi) authorize any of, or commit or agree, in writing or otherwise, to take any of, the foregoing actions.

(b) Nothing in this Agreement is intended to give Parent, directly or indirectly, the right to control or direct the Company's or its Subsidiaries' operations prior to the Effective Time, and nothing in this Agreement is intended to give the Company, directly or indirectly, the right to control or direct Parent's or its Subsidiaries' operations. Prior to the Effective Time, each of Parent and the Company shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and its Subsidiaries' respective operations.

SECTION 7.02. Conduct of Business by BAM.

(a) During the period from the date of this Agreement through the earlier of the Closing and the termination of this Agreement, except as required by applicable Law or as expressly required or permitted by this Agreement or described in Section 7.02(a) of the BAM Disclosure Letter, unless the Company otherwise consents in writing (such consent not to be unreasonably withheld, conditioned or delayed), (x) BAM shall, and shall cause each of its Subsidiaries to, carry on their respective businesses in all material respects in the ordinary course, and (y) BAM shall not, and shall not permit any of its Subsidiaries to (it being understood that no act or omission by BAM or any of its Subsidiaries with respect to the matters specifically addressed by any provision of this clause (y) below shall be deemed to be a breach of clause (x)):

(i) establish a record date for, declare or propose to declare, set aside for payment or pay in respect of the BAM Class A Stock any (A) non-cash dividend or other non-cash distribution or (B) any cash dividend or other distribution other than regular quarterly cash dividends declared in the ordinary course of business consistent with BAM's dividend policy as in effect on the date hereof and set forth in the BAM SEC Documents;

(ii) (A) amend the BAM Organizational Documents or (B) amend in any material respect the comparable organizational documents of any of the Subsidiaries of BAM in a manner that would reasonably be expected to prevent or impede, interfere with, hinder or delay in any material respect the consummation of the Transactions;

(iii) adopt a plan or agreement of complete or partial liquidation or dissolution, merger, amalgamation, consolidation, restructuring, recapitalization or other reorganization of or involving BAM or any of its Subsidiaries (other than dormant Subsidiaries or, with respect to any merger, amalgamation or consolidation, other than among BAM and any wholly owned Subsidiary of BAM or among wholly owned Subsidiaries of BAM); or

(iv) authorize any of, or commit or agree, in writing or otherwise, to take any of, the foregoing actions.

(b) During the period that begins five business days before the BAM Class A Stock Price Measuring Period through the earlier of the Closing and the termination of this Agreement, except as required by applicable Law or as expressly required or permitted by this Agreement or described in Section 7.02(b) of the BAM Disclosure Letter, unless the Company otherwise consents in writing (such consent not to be unreasonably withheld, conditioned or delayed), BAM shall not, and shall not permit any of its Subsidiaries to redeem, purchase or otherwise acquire, or propose to redeem, purchase or otherwise acquire, any outstanding BAM Class A Stock or other equity or voting interests of BAM, or any other securities or indebtedness of BAM, or any rights, warrants or options to acquire any BAM Class A Stock or other equity or voting interests of BAM, or any other securities or indebtedness of BAM.

SECTION 7.03. No Solicitation by the Company; Change in Recommendation.

(a) Except as permitted by this Section 7.03, from and after the date hereof and continuing until the earlier of the Effective Time and the termination of this Agreement and abandonment of the Transactions pursuant to Article IX, the Company shall, and the Company shall cause each of its Subsidiaries, and its and their respective directors, officers and employees to, and shall use its reasonable best efforts to cause its other Representatives to, (i) immediately cease any solicitation, encouragement, discussions or negotiations of or with any Persons that may be ongoing with respect to a Takeover Proposal and (ii) during the period from the date of this Agreement through the earlier of the Closing and the termination of this Agreement, not, directly or indirectly, (A) solicit, encourage, initiate or knowingly facilitate the submission of any inquiry or the making of any proposal, in each case, that constitutes, or would reasonably be expected to lead to, a Takeover Proposal, (B) engage in or otherwise participate in any discussions or negotiations regarding, or furnish to any other Person any material non-public information for the purpose of facilitating, a Takeover Proposal or (C) approve or recommend, make any public statement approving or recommending, or enter into any letter of intent, agreement or agreement in principle that constitutes or would reasonably be expected to lead to a Takeover Proposal. Promptly following the execution of this Agreement, the Company shall, to the extent it had not previously done so prior to the date of this Agreement, deliver a request to each Person that has previously executed a confidentiality agreement with the Company during the twelve (12) months prior to the date of this Agreement in connection with considering or making a Takeover Proposal to promptly return to the Company or destroy all non-public information previously furnished or made available to such Person or any of its Representatives by or on behalf of the Company or any of its Subsidiaries in accordance with the terms of the applicable confidentiality agreement and immediately terminate all physical and electronic dataroom access previously granted to any such Persons or their Representatives. The Company shall be liable for any action taken by any Representative of the Company that if taken by the Company would constitute a breach of this Section 7.03. Notwithstanding the foregoing, the Company shall be permitted to waive any standstill provision to allow any Person to make a Takeover Proposal to the Company Board on a non-public basis if the Company Board has determined in good faith, after consultation with the Company's outside legal counsel, that failure to take such action would reasonably be expected to be inconsistent with the directors' fiduciary duties under applicable Law.

(b) Notwithstanding anything contained in Section 7.03(a) or any other provision of this Agreement to the contrary, if at any time prior to obtaining the Required Shareholder Approval the Company receives a bona fide Takeover Proposal, then (i) the Company and its Representatives may contact such Person or group of Persons making the Takeover Proposal to clarify the terms and conditions thereof or to request that any Takeover Proposal made orally be made in writing and (ii) if the Company Board has determined in good faith, after consultation with the Company's financial advisors and outside legal counsel, that such Takeover Proposal constitutes or could reasonably be expected to lead to a Superior Proposal, then the Company and its Representatives may (x) enter into an Acceptable Confidentiality Agreement with the Person or group of Persons making the Takeover Proposal and furnish pursuant thereto information (including non-public information) with respect to the Company and its Subsidiaries to the Person or group of Persons who has made such Takeover Proposal; provided that the Company shall simultaneously provide to Parent any information with respect to the Company and its Subsidiaries that is provided to any Person to the extent access to such information was not previously provided to Parent and its Representatives and (y) after entering into an Acceptable Confidentiality Agreement, engage in or otherwise participate in discussions or negotiations with the Person or group of Persons making such Takeover Proposal. In no event may the Company or any of its Subsidiaries or any of their respective Representatives directly or indirectly reimburse or pay, or agree to reimburse or pay, the fees, costs or expenses of, or provide or agree to provide any compensation to, any Person or group of Persons (or any of its or their representatives or potential financing sources) making a Takeover Proposal in connection with any of the foregoing.

(c) The Company shall promptly (and in any event within forty-eight (48) hours) notify Parent in the event that the Company or any of its Subsidiaries or its or their Representatives receives a Takeover Proposal and shall disclose to Parent a summary of the material terms and conditions of any such Takeover Proposal, including, if applicable, copies of any written requests, proposals or offers, including proposed agreements, but not the identity of the Person or group of Persons making such Takeover Proposal. The Company shall keep Parent reasonably informed on a prompt basis of any material developments with respect to any such Takeover Proposal (including any material changes thereto). For the avoidance of doubt, all information provided to Parent pursuant to this Section 7.03 will be subject to the terms of the Confidentiality Agreement.

(d) Neither the Company Board nor any committee thereof shall (x)(A) withhold or withdraw the Company Board Recommendation, (B) modify, qualify or amend the Company Board Recommendation in a manner adverse to Parent, (C) fail to include the Company Board Recommendation in the Proxy Statement/Prospectus, (D) approve, adopt or publicly endorse or recommend any Takeover Proposal, (E) refrain from recommending against any Takeover Proposal that is a tender offer or exchange offer, within 10 business days after the commencement of such tender offer or exchange offer pursuant to Rule 14d-2 of the Exchange Act (or such fewer number of business days as remain prior to the Company Shareholders Meeting as it may be adjourned or postponed) or (F) fail to publicly reaffirm the Company Board Recommendation within 10 business days after receipt of a written request by Parent to make such public reaffirmation following the receipt by the Company of a Takeover Proposal that has not been withdrawn (or, if the Company Shareholders Meeting is scheduled to be held within 10 business days of such request, within five business days of such request and in any event, prior to the date of the Company Shareholders Meeting) (other than in the case of a Takeover Proposal in the form of a tender offer or exchange offer which shall be governed by clause (D)); provided that Parent may make any such request only once in any 10 business day period and only once for each such Takeover Proposal and once for each material amendment to such Takeover Proposal (any prohibited action described in this clause (x) being referred to as an "Adverse Recommendation Change") or (y) authorize, cause or permit the Company or any of its Subsidiaries to execute or enter into any letter of intent, memorandum of understanding, agreement in principle, merger agreement, acquisition agreement, amalgamation agreement or other similar agreement related to any Takeover Proposal, other than any Acceptable Confidentiality Agreement pursuant to Section 7.03(b) (each, a "Company Acquisition Agreement"). Notwithstanding the foregoing or any other provision of this Agreement to the contrary, prior to the time the Required Shareholder Approval is obtained, the Company Board may:

(i) in response to an Intervening Event, if the Company Board has determined in good faith, after consultation with the Company's financial advisors and outside legal counsel, that failure to take such action would be inconsistent with the directors' fiduciary duties under applicable Law, make an Adverse Recommendation Change; and

(ii) in response to a Superior Proposal, if the Company Board has determined in good faith, after consultation with the Company's financial advisors and outside legal counsel, that failure to take such action would be inconsistent with the directors' fiduciary duties under applicable Law, (A) make an Adverse Recommendation Change or (B) cause the Company to terminate this Agreement pursuant to Section 9.01(d)(ii) and enter into a Company Acquisition Agreement with respect to such Superior Proposal;

provided that the Company has given Parent at least five business days' prior written notice (a "Company Notice") of its intention to make an Adverse Recommendation Change or has caused the Company to terminate this Agreement pursuant to Section 9.01(d)(ii), which notice (I) in the case of an Intervening Event, specifies the material effects, changes or events comprising such Intervening Event and (II) in the case of a Superior Proposal, discloses (1) the material terms and conditions of such Superior Proposal and the identity of the Person or group of Persons making such Superior Proposal and (2) a copy of the most current version of the Company Acquisition Agreement (if any) with respect to such Superior Proposal; provided, further, that, (X) during such five business day period (it being understood and agreed that any change to the financial or other material terms and conditions of a Superior Proposal shall require an additional Company Notice to Parent of two business days running from the date of such notice), the Company shall have, and shall have caused its Representatives to, negotiate with Parent in good faith (to the extent Parent wishes to negotiate) to make such amendments to the terms and conditions of this Agreement as would enable the Company Board to no longer make an Adverse Recommendation Change or a determination that a Takeover Proposal constitutes a Superior Proposal and (Y) the Company Board shall have determined following the end of such five business day period (as it may be extended pursuant to this Section 7.03(d)), after considering the results of such negotiations and any amendments to this Agreement, the Guaranty and/or the Voting Agreement committed to in writing by Parent, if any, and any other information offered by Parent, after consultation with the Company's financial advisors and outside legal counsel, (i) that the Superior Proposal giving rise to such Company Notice continues to be a Superior Proposal or (ii) that failure to make an Adverse Recommendation Change in respect of the applicable Intervening Event would continue to be inconsistent with the directors' fiduciary duties under applicable Law.

(e) Nothing contained in this Section 7.03 or elsewhere in this Agreement shall prohibit the Company or the Company Board or any committee thereof from (i) taking and disclosing to shareholders of the Company a position or communication contemplated by Rule 14e-2(a), Rule 14d-9 or Item 1012(a) of Regulation M-A promulgated under the Exchange Act (it being understood that any such communication to the shareholders of the Company shall not be deemed to be an Adverse Recommendation Change) or (ii) making any disclosure or communication to shareholders of the Company that the Company Board determines in good faith, based on the advice of its outside legal counsel, is required by the directors' fiduciary duties, applicable Law or the rules and policies of the NYSE.

(f) As used in this Section 7.03, "group" has the meaning ascribed to it in Rule 13d-5 promulgated under the Exchange Act.

SECTION 7.04. Preparation of the Proxy Statement/Prospectus, Form F-4; Shareholders Meeting and Approval.

(a) As soon as reasonably practicable following the date of this Agreement, the Company shall prepare and file with the SEC the Proxy Statement/Prospectus and Parent and BAM shall prepare and file with the SEC the Form F-4, in each case, in preliminary form. The Proxy Statement/Prospectus will be included in and will constitute a part of the Form F-4. Parent, BAM and the Company shall make available to each other all information, and provide such other assistance, as may be reasonably requested in connection with the preparation, filing and distribution of the

Proxy Statement/Prospectus and the Form F-4. Such information and assistance shall include, if requested by Parent or BAM, the provision of such financial statements or other information of the Company and the Company Subsidiaries that are required to be included or incorporated by reference into the Form F-4, and BAM and the Company shall use reasonable best efforts, in each case, to cause their auditors (and any other current or former auditors of BAM or any BAM Subsidiary or the Company or any Company Subsidiary, as the case may be) to deliver any required consents in respect of any financial statements of BAM or any BAM Subsidiary or the Company or any Company Subsidiary, as the case may be, to be included or incorporated by reference into the Form F-4. The Company hereby consents to the inclusion or incorporation by reference into the Form F-4 of any financial statements or other information relating to the Company or any Company Subsidiary required to be included or incorporated by reference therein. Each of Parent, BAM and the Company shall use its reasonable best efforts to respond as promptly as reasonably practicable to any comments of the SEC with respect thereto and to have the Proxy Statement/Prospectus cleared by the SEC, and the Form F-4 declared effective by the SEC, in each case as promptly as reasonably practicable. Parent, BAM and the Company shall notify each other promptly of the receipt of any comments from the SEC or its staff and of any request by the SEC or its staff for amendments or supplements to the Proxy Statement/Prospectus or Form F-4 or for additional information and promptly shall supply each other with copies of all correspondence between it or any of its Representatives, on the one hand, and the SEC or its staff, on the other hand, with respect to the Proxy Statement/Prospectus or Form F-4. Notwithstanding the foregoing, prior to filing or mailing the Proxy Statement/Prospectus or Form F-4 (or any amendment or supplement thereto) or responding to any comments of the SEC with respect thereto, each of Parent, BAM and the Company, as the case may be, (i) shall provide the other party with a reasonable opportunity to review and comment on such document or response (including the proposed final version of such document or response), (ii) shall consider in good faith all comments reasonably proposed by such other party and (iii) shall not file or mail such document or respond to the SEC prior to receiving such other party's approval, which approval shall not be unreasonably withheld, conditioned or delayed. Each of the Company and the Parent Entities shall advise the other, promptly after receipt of notice thereof, of the time of effectiveness of the Form F-4, the issuance of any stop order relating thereto or the suspension of the qualification of the shares of BAM Class A Stock to be issued as Stock Consideration for offering or sale in any jurisdiction, and each of the Company, Parent and BAM will use its reasonable best efforts to have any such stop order or suspension lifted, reversed or otherwise terminated. Each of the Company and the Parent Entities will also take any other action (other than qualifying to do business in any jurisdiction in which it is not now so qualified) required to be taken under the Securities Act, the Exchange Act, any applicable state securities or "blue sky" laws and the rules and regulations thereunder in connection with the Transactions.

(b) If, prior to (i) receipt of the Required Shareholder Approval in the case of the Proxy Statement/Prospectus or (ii) the Effective Time in the case of the Form F-4, any event or change occurs that is required to be described in an amendment of, or a supplement to, the Proxy Statement/Prospectus or Form F-4, BAM, Parent or the Company, as the case may be, shall promptly notify the other party of such event or change, and BAM, Parent and the Company shall cooperate to promptly prepare and file with the SEC any necessary amendment or supplement to the Proxy Statement/Prospectus or Form F-4 and, as required by applicable Law, disseminate the information contained in any such amendment or supplement to the Proxy Statement/Prospectus or Form F-4 to the Company's shareholders.

(c) Subject to Section 7.04(a), the Company shall take all necessary actions in accordance with applicable Law, the Company Organizational Documents and the rules of the NYSE to establish a record date for, duly call, give notice of, convene and hold a meeting of its shareholders (including any adjournment, recess, reconvening or postponement thereof, the "Company Shareholders Meeting") for the purpose of obtaining the Required Shareholder Approval, as soon as reasonably practicable after the Form F-4 is declared effective under the Securities Act. The Company shall not change the record date for the Company Shareholders Meeting without the prior written consent of Parent (not to be unreasonably withheld, conditioned or delayed). In furtherance of the foregoing and in consultation with Parent, as soon as reasonably practicable after the date hereof, the Company shall set one or more preliminary record dates for the Company Shareholders Meeting and commence a broker search pursuant to Section 14a-13 of the Exchange Act. Subject to Section 7.03, the Company shall use its reasonable best efforts to obtain the Required Shareholder Approval. Notwithstanding anything to the contrary in this Agreement, the Company may, in its sole discretion, adjourn, recess, reconvene or postpone the Company Shareholders Meeting if the Company reasonably believes that (i) such adjournment, recess, reconvening or postponement is necessary to ensure that any required supplement or amendment to the Proxy Statement/Prospectus is provided to the Company's shareholders within a reasonable amount of time in advance of the Company Shareholders Meeting, (ii) after consultation with Parent, at the time of the Originally Scheduled Date, (A) there will be an insufficient number of shares of Common Stock present (either in person or by proxy) to constitute a quorum necessary to conduct the business of the Company Shareholders Meeting or (B) there will be an insufficient number of proxies to obtain the Required Shareholder Approval or (iii) such adjournment, recess, reconvening or postponement is required by Law or a court or other Governmental Authority of competent jurisdiction in connection with any Actions in connection with this Agreement or the Transactions or has been requested by the SEC or its staff; provided that, in the case of an adjournment, recess, reconvening or postponement pursuant to clause (ii) of this Section 7.04(c), the Company Shareholders Meeting shall not be adjourned, recessed, reconvened or postponed (x) to a date later than the third business day preceding the Outside Date or (y) for more than 15 business days from the Originally Scheduled Date, in each case, without the prior written consent of Parent. The Company shall keep Parent updated with reasonable frequency with respect to proxy solicitation results with respect to obtaining the Required Shareholder Approval.

(d) Subject to the provisions of Section 7.03, the Company shall use its reasonable best efforts to solicit from its shareholders proxies in favor of the approval of this Agreement and the Merger and use its reasonable best efforts to take all other actions reasonably necessary or advisable to secure the Required Shareholder Approval (to the extent permitted by Law). Without limiting the generality of the foregoing, if, at the time of the Originally Scheduled Date, (A) there will be an insufficient number of

Common Stock present (either in person or by proxy) to constitute a quorum necessary to conduct the business of the Company Shareholders Meeting or (B) there will be an insufficient number of proxies to obtain the Required Shareholder Approval, then the Company shall, at the request of Parent (to the extent permitted by Law) adjourn, recess, reconvene or postpone the Company Shareholders Meeting; provided that the Company shall not be required pursuant to this sentence to adjourn the Company Shareholders Meeting more than two times or for more than 15 business days in the aggregate from the Originally Scheduled Date. Without the prior written consent of Parent (not to be unreasonably withheld, conditioned or delayed), the approval of this Agreement and Transactions shall be the only matters (other than matters of procedure and matters required by Law to be voted on by the shareholders of the Company in connection with the approval of this Agreement and the Transactions) that the Company shall propose to be acted on by the shareholders of the Company at the Company Shareholders Meeting. The Company agrees that, unless this Agreement shall have been terminated in accordance with Article IX, the Company's obligations to hold the Company Shareholders Meeting pursuant to this Section 7.04 shall not be affected by the commencement, public proposal, public disclosure or communication to the Company of any Takeover Proposal or by any Adverse Recommendation Change.

SECTION 7.05. Reasonable Best Efforts.

(a) Subject to the terms and conditions of this Agreement, each of Parent, Merger Sub and the Company shall, and shall cause its respective Affiliates, to, use its reasonable best efforts to (i) take, or cause to be taken, all actions, and do, or cause to be done, and assist and cooperate with each other party in doing, all things necessary, proper or advisable to cause the conditions to Closing to be satisfied as promptly as reasonably practicable (including, without limitation, with respect to obtaining all applicable regulatory approvals and consents) and to consummate and make effective, in the most expeditious manner reasonably practicable, the Merger, including (A) using reasonable best efforts to prepare and file promptly and fully all documentation to effect all necessary filings, notices, petitions, statements, registrations, submissions of information, applications and other documents and (B) using reasonable best efforts to execute and deliver any additional instruments necessary, proper or advisable to consummate the Transactions, (ii) obtain all Consents from any Governmental Authority or third party necessary, proper or advisable to consummate the Transactions (including any such Consents required with respect to the Company Insurance Approvals, the Parent Insurance Approvals and under applicable Antitrust Laws), including by providing (following a reasonable opportunity for consultation) to a Governmental Authority any information requested by such Governmental Authority in connection with such Consents, and (iii) take any and all steps that are necessary, proper or advisable to avoid each and every impediment under any applicable Law that may be asserted by, or Action that may be entered by, any Governmental Authority with respect to this Agreement or the Transactions, as promptly as practicable. In accordance with Section 10.12, each party shall bear its own costs and expenses for making its respective filings with, and obtaining its respective Consents from, Governmental Authorities.

(b) In furtherance and not in limitation of the foregoing, the Company and Parent shall each use its reasonable best efforts to (i) take all actions necessary to ensure that no Takeover Law is or becomes applicable to any of the Transactions or this Agreement and refrain from taking any actions that would cause the applicability of such Laws and (ii) if the restrictions of any Takeover Law become applicable to any of the Transactions, take all actions necessary to ensure that the Transactions may be consummated as promptly as practicable on the terms contemplated by this Agreement and otherwise lawfully minimize the effect of such Takeover Law on the Transactions.

(c) Without limiting the general applicability of Section 7.05(a), each of the Company and Parent shall, in consultation and cooperation with the other and as promptly as practicable and in no event later than 30 business days following the date of this Agreement, file (i) with the United States Federal Trade Commission and the Antitrust Division of the United States Department of Justice the notification and report form, if any, required under the HSR Act with respect to the Transactions, (ii) all appropriate documents, forms, filings or submissions required under any non-U.S. Antitrust Laws and (iii) with applicable Insurance Regulators, all documents, forms, filings or other submissions required under applicable Insurance Laws with respect to the Merger, or otherwise requested by domiciliary Insurance Regulators of any of the Company Insurance Subsidiaries (other than to the extent required, biographical affidavits, fingerprint cards and background checks, which shall follow as promptly as reasonably practicable thereafter), including as reasonably determined by Parent in consultation with the Company, "Form A" exemption requests or equivalent exemption requests where available; provided that Parent shall not submit a "Form A" exemption request or equivalent exemption request to an Insurance Regulator that has requested to receive a "Form A" Acquisition of Control Statement in connection with the Transactions. All such filings shall comply in all material respects with the requirements of applicable Law. Without limiting Parent's other obligations in this Section 7.05, Parent shall use its reasonable best efforts to direct (i) the Persons specified in Section 7.05(c) of the Parent Disclosure Letter to provide the Filing Person Information and (ii) the Persons specified in Section 7.05(c) of the Parent Disclosure Letter to provide the Disclaiming Person Information.

(d) Without limiting the general applicability of Section 7.05(a), the Company shall use its reasonable best efforts to cause the Broker-Dealer Subsidiary to file, promptly after the date hereof, the Rule 1017 Application with FINRA and shall use its reasonable best efforts to obtain FINRA's approval of such application. Parent will provide, as promptly as practicable following a request therefor, the Company, the Broker-Dealer Subsidiary, their counsel or FINRA, as applicable, with such information and documentation pertaining to Parent as are reasonably requested by the Company, its counsel or FINRA in order to prepare the Rule 1017 Application or obtain approval thereof.

(e) Each of the Company, Parent and Merger Sub shall consult with one another with respect to the obtaining of all Consents from any Governmental Authority necessary, proper or advisable to consummate the Transactions and each of the Company, Parent and Merger Sub shall keep the others reasonably apprised on a prompt basis of the status of matters relating to such Consents. The Company and Parent shall have the right to review in advance and, subject to any restrictions under applicable Law, each shall consult the other on, any filing made with, or written materials submitted to, any Governmental Authority in connection with the Transactions and each party agrees to in good faith consider and reasonably accept comments of each other party thereon. Parent and the Company shall promptly furnish to each other copies of all such filings and written materials after their filing or submission, in each case subject to applicable Laws. The Company and Parent shall promptly advise each other upon receiving any communication from any Governmental Authority with respect to any filing or Consent necessary, proper or advisable to consummate the Transactions, including promptly furnishing each other copies of all written or electronic communications from or with such Governmental Authorities, and shall promptly advise each other when any such communication causes such party to believe that there is a reasonable likelihood that any such Consent will not be obtained or that the receipt of any such Consent will be materially delayed or conditioned. The Company and Parent shall not, and shall cause their respective Affiliates not to, permit any of their respective Representatives to participate in any meeting or engage in any conversation (other than non-substantive or administrative telephone calls) with any Governmental Authority in respect of any filings, investigation or other inquiry relating to the Transactions unless it consults with the other in advance and, to the extent permitted by applicable Law and by such Governmental Authority, gives the other party the opportunity to attend and participate in such meeting or conversation. If any Governmental Authority requires that a hearing or meeting be held in connection with the Consent thereof or the Transactions, Parent shall use its reasonable best efforts to arrange for such hearing or meeting to be held as promptly as practicable after the notice that such hearing or meeting is required has been received by Parent, its Subsidiaries or any other Affiliates. Notwithstanding the foregoing, in no event will any party be required to disclose to any other party any Personal Information.

(f) Notwithstanding anything to the contrary set forth in this Agreement, Parent shall not be obligated by a Governmental Authority in connection with a Required Regulatory Approval to take or refrain from taking or to agree to it, its Subsidiaries or the Company or its Subsidiaries taking or refraining from taking any action (including any amendment, waiver or termination of any agreement, exhibit or schedule, including this Agreement and the Exhibits and Schedules to this Agreement) or to suffer to exist any limitation, action, restriction, condition or requirement which, individually or together with all other such limitations, actions, restrictions, conditions or requirements by a Governmental Authority in connection with a Required Regulatory Approval, would, or would reasonably be expected to, (i) impose any requirement on BN, BAM or any of their respective Affiliates to make, or commit to make, any capital contribution or enter into or issue any capital guarantee or keepwell, (ii) impose any requirement on Parent or any of its Subsidiaries to make, or commit to make, any material capital contribution or enter into or issue any material capital guarantee or material keepwell, (iii) impose any requirement on BN, BAM or any of their respective Affiliates to sell, license, assign, transfer, divest, hold separate or otherwise dispose of, before or after the Closing, any assets or businesses, (iv) impose any requirement on Parent or any of its Subsidiaries to sell, license, assign, transfer, divest, hold separate or otherwise dispose of, before or after the Closing, any material assets or material businesses, (v) impose any limitation, action, restriction, condition or requirement on any of BN, BAM or any of their respective Affiliates, investment funds, permanent capital vehicles, or other collective investment vehicles or portfolio companies of the foregoing, (vi) impose any limitation, action, restriction, condition or requirement on Parent or any of its Subsidiaries that is material and adverse to Parent and its Subsidiaries, taken as a whole, or (vii) impose any limitation, action, restriction, condition or requirement on the business or operations of Company or any of its Subsidiaries following the Closing that would constitute a Company Material Adverse Effect (each, a "Burdensome Condition"). Without the prior written consent of Parent, the Company shall not (and shall cause its Subsidiaries not to) take any action or agree to the taking or refraining from any action or accept any limitation, action, restriction, condition or requirement that, individually or in the aggregate, would, or would be reasonably expected to, result in a Burdensome Condition.

SECTION 7.06. Public Announcements. The Company and Parent shall agree on a press release announcing the entering into of this Agreement and the Transactions. Thereafter, the Company and Parent shall consult with each other before issuing any press release or otherwise making any public statements (including scheduling of a press conference or conference call with investors or analysts) with respect to this Agreement or any of the Transactions and shall not issue any such press release or make any such public statement without the prior consent of the other party, which consent shall not be unreasonably withheld, conditioned or delayed; provided, however, that a party may, without the prior consent of the other party, issue such press release or make such public statement (a) as may be required by Law or order, the applicable rules and regulations of the NYSE or any listing agreement with the NYSE, but only if such party provides the other party an opportunity to first review the content of the proposed disclosure considers such other party's comments thereon in good faith, (b) with respect to any Adverse Recommendation Change made in accordance with this Agreement or (c) if such press release or public statement is not materially inconsistent in tone or substance with previous press releases or public statements made by such party in compliance with this Section 7.06.

SECTION 7.07. Access to Information; Confidentiality. Subject to applicable Law, upon reasonable notice, the Company shall afford to Parent and Parent's Representatives reasonable access during normal business hours to the Company's officers, employees, properties, books, Contracts and records, and the Company shall furnish to Parent and Parent's Representatives such information concerning its business, personnel, assets, liabilities and properties as Parent may reasonably request; provided that Parent and its Representatives shall conduct any such activities in such a manner as not to interfere unreasonably with the business or operations of the Company; provided, further, however, that the Company shall not be obligated to provide such access or information if the Company determines, in good faith and in its reasonable judgment, that doing so could violate applicable Law or a Contract or obligation of confidentiality owing to a third party, waive the protection of an attorney-client privilege or other legal privilege or expose the Company to risk of liability for disclosure of Personal Information. Without limiting the foregoing, in the event that the Company does not provide access or information in reliance on the immediately preceding sentence, it shall provide notice to Parent that it is withholding such access or information and shall use its reasonable best efforts to communicate, to the extent feasible, the applicable information in a way that would not violate the applicable Law, Contract or obligation, risk waiver of such privilege or expose the Company to such risk, including through the use of customary "clean room" or other similar procedures designed to limit the disclosure of competitively sensitive information. All requests for information made pursuant to this Section 7.07 shall be directed to the Person designated by the Company. Until the Closing, the information provided will be subject to the terms of the Confidentiality Agreement, dated as of June 2, 2023, by and between the Company and Parent (as may in the future be amended from time to time, the "Confidentiality Agreement"); provided that, prior to the Effective Time, nothing in this Section 7.07 shall limit any customary disclosures made by Parent or any of its Subsidiaries to the Debt Financing Sources, rating agencies, prospective Debt Financing Sources, underwriters, existing lenders (and related agents) or otherwise in connection with efforts or activities by Parent, any of its Subsidiaries or the Debt Financing Sources to obtain the Debt Financing, so long as such recipients agree to customary confidentiality arrangements (which may include customary "click through" confidentiality agreements and/or confidentially provisions contained in marketing materials used in connection with the Debt Financing).

SECTION 7.08. Indemnification and Insurance.

(a) From and after the Effective Time, the Surviving Company shall, and Parent shall cause the Surviving Company to, (i) indemnify and hold harmless each individual who at the Effective Time is, or at any time prior to the Effective Time was, a director or officer of the Company or of a Subsidiary of the Company (each, together with such Person's heirs, executors and administrators, an "Indemnitee") with respect to all claims, liabilities, losses, damages, judgments, fines, penalties, costs (including amounts paid in settlement or compromise) and expenses (including fees and expenses of legal counsel) in connection with any Action (whether civil, criminal, administrative or investigative), whenever asserted, based on or arising out of, in whole or in part, (A) the fact that an Indemnitee is or was a director or officer of the Company or such Subsidiary or (B) acts or omissions by an Indemnitee in the Indemnitee's capacity as a director, officer, employee or agent of the Company or such Subsidiary or taken at the request of the Company or such Subsidiary (including in connection with serving at the request of the Company or such Subsidiary as a director, officer, employee, agent, trustee or fiduciary of another Person (including any employee benefit plan)), in each case under clause (A) or (B), at, or at any time prior to, the Effective Time (including any Action relating in whole or in part to the Transactions or relating to the enforcement of this provision or any other indemnification or advancement right of any Indemnitee), to the fullest extent permitted under applicable Law and (ii) assume all obligations of the Company and such Subsidiaries to the Indemnitees in respect of indemnification and exculpation from liabilities for acts or omissions occurring at or prior to the Effective Time as provided in the Company Organizational Documents and the organizational documents of such Subsidiaries as in effect on the date of this Agreement or in any agreement in existence as of the date of this Agreement providing for indemnification between the Company or any of its Subsidiaries and any Indemnitee. Without limiting the foregoing, Parent, from and after the Effective Time, shall cause, to the fullest extent permitted under applicable Law, the articles of incorporation and bylaws of the Surviving Company to contain provisions no less favorable to the Indemnitees with respect to limitation of liabilities of directors and officers and indemnification than are set forth as of the date of this Agreement in the Company Organizational Documents, which provisions shall not be amended, repealed or otherwise modified in a manner that would adversely affect the rights thereunder of the Indemnitees. In addition, from the Effective Time, Parent shall cause the Surviving Company to advance the reasonable and documented expenses (including reasonable and documented fees and expenses of legal counsel) of any Indemnitee under this Section 7.08 (including in connection with enforcing the indemnity and other obligations referred to in this Section 7.08) as incurred to the fullest extent permitted under applicable Law; provided that the individual to whom expenses are advanced provides an undertaking to repay such advances if it shall be finally determined by a court of competent jurisdiction that such Person is not entitled to be indemnified pursuant to this Section 7.08(a).

(b) Neither Parent nor the Surviving Company shall settle, compromise or consent to the entry of any judgment in any threatened or actual Action, litigation, claim or proceeding relating to any acts or omissions covered under this Section 7.08 (each, a "Claim") for which indemnification has been sought by an Indemnitee hereunder, unless such settlement, compromise or consent includes an unconditional release of such Indemnitee from all liability arising out of such Claim or such Indemnitee otherwise consents in writing to such settlement, compromise or consent. Each of Parent, the Surviving Company and the Indemnitees shall cooperate in the defense of any Claim and shall provide access to properties and individuals as reasonably requested and furnish or cause to be furnished records, information and testimony, and attend such conferences, discovery proceedings, hearings, trials or appeals, as may be reasonably requested in connection therewith.

(c) The Company may, prior to the Effective Time, purchase or, if not so purchased by the Company, Parent shall cause the Surviving Company to put in place effective as of the Effective Time, and Parent or the Company, as applicable, shall fully prepay no later than immediately prior to the Closing, prepaid and non-cancellable "tail" insurance with a claims reporting or discovery period of six years from the Effective Time on terms and conditions providing at least equivalent benefits and coverage as the directors' and officers' liability, employment practices liability and fiduciary liability insurance of the Company and its Subsidiaries in effect as of the Effective Time ("Current D&O Insurance") with respect to matters existing or occurring at or prior to the Effective Time, including the Transactions, and Parent shall cause such policy to be maintained in full force and effect without amendment to any of the policies' terms and conditions, for their full term, and to honor all of the Surviving Company's obligations thereunder; provided, however, that Parent may elect in its sole discretion, but shall not be required, to spend (or cause the Surviving Company to spend) more than 350% of the Current D&O Insurance annual premium (the "Cap Amount") with respect to the annual premium for the six years of coverage under such "tail" policies; provided, further, that if the cost of such insurance exceeds the Cap Amount, and Parent elects not to spend more than the Cap Amount for such purpose, then Parent shall purchase and obtain insurance with the greatest coverage available for a cost equal to such Cap Amount. If such "tail" insurance has been obtained by the Company, it shall be deemed to satisfy all obligations to obtain insurance pursuant to this Section 7.08(c), and Parent shall cause the Surviving Company to cause such "tail" insurance to be maintained in full force and effect without amendment to any of the policies' terms and conditions, for their full term, and to honor all of the Surviving Company's obligations thereunder.

(d) The provisions of this Section 7.08 are (i) intended to be for the benefit of, and shall be enforceable by, each Indemnitee and his or her heirs and (ii) in addition to, and not in substitution for, any other rights to indemnification or contribution that any such individual may have under the Company Organizational Documents, by contract or otherwise.

(e) In the event that Parent, the Surviving Company or any of their respective successors or assigns (i) consolidates or amalgamates with or merges into any other Person and is not the continuing or surviving company or entity of such consolidation, amalgamation or merger or (ii) transfers or conveys all or substantially all of its properties and assets to any Person, then, and in each such case, proper provision shall be made so that the successors and assigns of Parent or the Surviving Company shall assume all of the obligations thereof set forth in this Section 7.08.

(f) Nothing in this Agreement is intended to, shall be construed to or shall release, waive or impair any rights to directors' and officers' insurance claims under any policy that is or has been in existence with respect to the Company or any of its Subsidiaries for any of their respective directors, officers or other employees, it being understood and agreed that the indemnification provided for in this Section 7.08 is not prior to or in substitution for any such claims under such policies.

SECTION 7.09. Rule 16b-3. Prior to the Effective Time, the Company shall take such steps as may be reasonably necessary or advisable to cause any dispositions of Company equity securities (including derivative securities) resulting from the Transactions by each individual who is a director or officer of the Company subject to the reporting requirements of Section 16 of the Exchange Act (or who will become subject to the reporting requirements of Section 16 of the Exchange Act as a result of the Transactions) to be exempt under Rule 16b-3 promulgated under the Exchange Act.

SECTION 7.10. Employee Matters.

(a) For a period of one year following the Effective Time (or such longer period required by applicable Law), Parent shall provide, or shall cause the Surviving Company to provide, each individual who is employed by the Company or any of its Subsidiaries immediately prior to the Effective Time (each, a "Company Employee") and continues to be employed with the Company and its Subsidiaries with (i) an annual base salary or annualized wage rate (as applicable) that is no less than the annual base salary or annualized wage rate (as applicable) provided to such Company Employee by the Company and any of its Subsidiaries immediately prior to the Effective Time, (ii) target short-term cash incentive opportunities that are no less favorable than those provided to such Company Employee by the Company and any of its Subsidiaries immediately prior to the Effective Time, (iii) target long-term incentive opportunities (including deferred cash and equity and equity-based incentive opportunities, but excluding any change in control and retention or other non-recurring compensation) that are no less favorable than the target long-term incentive opportunities (including deferred cash and equity and equity-based incentive opportunities) provided to such Company Employee by the Company and any of its Subsidiaries immediately prior to the Effective Time; subject to the conditions set forth in Item 1 of Section 7.10(a) of the Company Disclosure Letter; (iv) compensation and benefits provided in connection with the Company ESOP no less than the compensation and benefits provided in connection with the Company ESOP to such Company Employee by the Company and any of its Subsidiaries immediately prior to the Effective Time; provided, however that the foregoing clause (iv) may be satisfied by (A) contributions to other defined contribution plans, (B) equity or equity-based awards or (C) cash payments, and (v) other employee benefits (excluding non-qualified deferred compensation, defined benefit pension, post-employment health and welfare benefits and change in control, retention or other non-recurring compensation and benefits) that are substantially comparable in the aggregate to those provided to such Company Employee by the Company and any of its Subsidiaries immediately prior to the Effective Time.

(b) For a period of one year following the Effective Time, Parent shall honor and provide, or shall cause the Surviving Company to honor and provide, for each Company Employee (except as provided otherwise in Section 7.01(a)(vi) of the Company Disclosure Letter), severance and termination benefits in an amount equal to the severance and termination benefits that would have been provided to such Company Employee under the Transition Benefit Plan as in effect immediately prior to the Effective Time if such Company Employee experiences a termination of employment pursuant to which severance would be owed from the Company under such plan if the termination of employment had occurred immediately prior to the Effective Time (but including, for the avoidance of doubt, any changes to such benefits as a result of credit for such Company Employee’s service with Parent and its Subsidiaries in accordance with Section 7.10(d) or any increases in a Company Employee’s base salary or annualized wage rate or cash incentive bonus opportunities (excluding, for the avoidance of doubt, long-term incentives (including equity and equity-based incentive opportunities) during the one year following the Effective Time)).

(c) With respect to the employee benefit plans maintained by Parent or its Subsidiaries (including, following the Closing, the Surviving Company and its Subsidiaries and Affiliates) in which the Company Employee is eligible to participate on or following the Effective Time (including any paid time off and severance plans) and subject to applicable Law, for purposes of determining eligibility to participate, level of benefits and vesting, the Surviving Company shall cause each Company Employee’s service with the Company or any of its Subsidiaries (as well as service with any predecessor employer of the Company or any such Subsidiary, to the extent service with the predecessor employer was recognized by the Company or such Subsidiary) to be treated as service with the Surviving Company or any of its Subsidiaries or its Affiliates; provided, however, that such service need not be recognized (i) for benefit accruals under any defined benefit pension plan, (ii) for purposes of any post-employment welfare benefit plan or (iii) to the extent that such recognition would result in any duplication of benefits.

(d) Parent shall, or shall cause the Surviving Company to use commercially reasonable efforts to, (i) waive, or cause to be waived, any pre-existing condition limitations and exclusions and (ii) waive, or cause to be waived, any actively-at-work requirements and waiting periods, in each case, under any welfare benefit plan maintained by Parent (including, following the Closing, the Surviving Company or any of its Subsidiaries or Affiliates) in which Company Employees (and their eligible dependents) will be eligible to participate from and after the Effective Time, except to the extent that such pre-existing condition limitations, exclusions, actively-at-work requirements and waiting periods would not have been satisfied or waived under the comparable Company Plan immediately prior to the Effective Time. Parent shall, or shall cause the Surviving Company or any of its Affiliates to, use commercially reasonable efforts to recognize the dollar amount of all co-payments, deductibles and out-of-pocket expenses incurred by each Company Employee (and his or her eligible dependents) during the calendar year in which the Effective Time occurs for purposes of satisfying such year's deductible and co-payment limitations under the relevant welfare benefit plans in which they will be eligible to participate from and after the Effective Time.

(e) The parties agree that the consummation of the Transactions shall constitute a "change in control," "change of control" or term of similar import under each applicable Company Plan; provided that, for purposes of any such plans that provide for deferred compensation within the meaning of Section 409A of the Code, the foregoing shall not accelerate the time of payment or distribution of any such deferred compensation (but shall accelerate vesting if provided for in accordance with the terms thereof) if the transactions contemplated by this Agreement do not otherwise constitute a "change in control," "change of control" or term of similar import under the applicable plan and to so declare as a "change in control," "change of control" or term of similar import would result in an impermissible payment or distribution for purposes of Section 409A of the Code.

(f) Prior to making any broad-based written communications to the directors, officers or employees of the Company or any of its Subsidiaries pertaining to any compensation or benefit matters related to the Transactions or any other matter contemplated hereunder, whether relating to employment, employee benefits, including Company Plans, and post-Closing terms of employment or otherwise, the Company shall consult with Parent and consider Parent's comments to such communication in good faith.

(g) No later than 15 business days following the date of this Agreement, the Company shall deliver to Parent a complete and correct list of each Company Employee, as of the date of this Agreement including, with respect to each such individual, the following information, as applicable: (i) name (or other unique identifier), (ii) job title, (iii) date of hire and work location (city and state, if applicable),

(iv) exempt or non-exempt classification status under the Fair Labor Standards Act, (v) leave of absence status and anticipated date of return, if known, (vi) annual base salary or annualized base wage rate (as applicable), (vii) annual target short-term incentive or bonus compensation opportunities for the current fiscal year (on a plan-by-plan basis) and (viii) target long-term incentive compensation opportunities (on a plan-by-plan basis) (the "Company Employee List"). The Company shall deliver to Parent an updated Company Employee List no later than five (5) days prior to the Effective Time to reflect any changes in accrued but unused vacation, terminations and new hires and reallocations not in violation of this Agreement or as otherwise consented to by Parent.

(h) No later than 15 business days following the date of this Agreement, the Company shall deliver to Parent a complete and accurate list of each outstanding Company Award, including: (i) on an employee-by-employee basis, the name (or other unique identifier) of the holder of such outstanding Company Award; (ii) on an award-by-award basis, the number of Common Stock subject to or underlying such outstanding Company Award (with the number of Common Stock underlying Performance-Vesting Company Options and Company PSUs, in each case, reported assuming each such Company Award's target level of performance); and (iii) the date on which such outstanding Company Award was granted or issued.

(i) If requested by Parent in writing no later than 10 business days prior to the Effective Time, with respect to the Company 401(k) Plan, the Company Board (or, if appropriate, any committee thereof administering such Company 401(k) Plan) shall adopt such resolutions or take such other actions as may be required to terminate, effective at least one day prior to the Effective Time, such Company 401(k) Plan. Prior to the Effective Time, the Company shall provide Parent with executed resolutions of the Company Board (or the appropriate committee thereof) authorizing such termination. As soon as practicable after the Effective Time, the Company shall cause, to the extent permitted by Section 401(k)(10) of the Code, the Company 401(k) Plan administrator to make distributions available to the Company 401(k) Plan participants. In connection with any termination of the Company 401(k) Plan, Parent shall permit each Company Employee who is a participant in the Company 401(k) Plan to (i) become a participant in a 401(k) plan of Parent that is an "eligible retirement plan" (within the meaning of Section 401(a)(31) of the Code) (the "Parent 401(k) Plan") immediately after the Effective Time and (ii) to make rollover contributions of "eligible rollover distributions" (within the meaning of Section 401(a)(31) of the Code, including all participant loans) in cash or notes (in the case of participant loans) in an amount equal to the eligible rollover distribution portion of the account balance distributed to each such Company Employee from the Company 401(k) Plan to the Parent 401(k) Plan effective as of the Closing Date.

(j) To the extent permitted by applicable Law, the Trustee and the Company shall take or cause to be taken all such actions as may be necessary to effect the actions set forth below relating to the Company ESOP prior to or simultaneous with the Closing, as applicable: (i) effective at least five business days prior to the Closing (with relevant materials provided to Parent for its review and comment at least three business days prior to such date), the Company ESOP shall be terminated (the "ESOP Termination

Date"), no new participants shall be admitted on or after the ESOP Termination Date, no further distributions in the form of "qualifying employer securities" (as defined in Section 407 of ERISA) will be permitted and all existing Company ESOP participants' accounts shall be fully vested and 100% non-forfeitable, (ii) the Company shall cause the Company ESOP's plan administrator to direct the Trustee to remit a sufficient number of Common Stock to the Company to repay the outstanding ESOP Loan in full, and the proceeds of the sale of such Common Stock shall be used to repay the outstanding balance of the ESOP Loan as of the Effective Time, with each remitted share of Common Stock to be valued equal to the Merger Consideration, (iii) all remaining Common Stock held by the Company ESOP as of the Effective Time shall be exchanged for the Merger Consideration within the Company ESOP in accordance with Section 3.01(a) and (iv) promptly, after the execution of this Agreement, the Company will take such actions as may be necessary to request a favorable determination letter with respect to the Company ESOP's termination. No benefit distributions shall be made from the Company ESOP without the prior written consent of Parent before the IRS issues a favorable determination letter with respect to the tax-qualified status of the Company ESOP on termination, except that distributions from the Company ESOP may be made earlier if required by Law or upon the occurrence of the Company ESOP participant's retirement, death, disability or termination of employment or any other event, other than plan termination, that requires a distribution from the Company ESOP. The Company also shall take such other actions in furtherance of terminating the Company ESOP as Parent may reasonably request prior to the Closing, including the adoption of amendments to the Company ESOP. Notwithstanding the foregoing, the Company will continue to make regularly scheduled payments on the ESOP Loan and related share allocations through the ESOP Termination Date.

(k) The provisions of this Section 7.10 are solely for the benefit of the parties to this Agreement. Nothing in this Agreement shall be construed to confer on any Person, other than the parties, their successors and permitted assigns, any right to enforce the provisions of this Section 7.10 or be construed as an amendment, or waiver of any provision, of any Company Plan or any employee benefit plan maintained by the Company, Parent or their respective Affiliates, or the establishment or adoption of or an amendment to any employee benefit plan for purposes of ERISA or otherwise. In addition, nothing expressed or implied in this Section 7.10 shall confer upon any of the employees of the Company, Parent or their respective Subsidiaries or any other Person any additional rights or remedies, including any additional right to employment, or continued employment for any specified period, of any nature or kind whatsoever under or by reason of this Agreement, and nothing in this Agreement shall prevent Parent, the Surviving Company or any of their Affiliates from, after the Effective Time, (i) amending or terminating any of their benefit plans in accordance with their terms or (ii) terminating the employment of any Company Employee.

SECTION 7.11. Notification of Certain Matters; Shareholder Litigation. During the period from the date of this Agreement through the earlier of the Closing or the termination of this Agreement in accordance with its terms, Parent shall give prompt notice to the Company, and the Company shall give prompt notice to Parent, of any Actions commenced or, to such party's Knowledge, threatened against such party which relate to this Agreement or the Transactions. Each party shall provide the other with any pleadings and correspondence relating to any Actions involving it, any of its officers or directors or any other of its Representatives relating to this Agreement or the Transactions and will keep the other reasonably and promptly informed regarding the status of any Actions. Subject to applicable Law, each party shall give the other party the opportunity to participate, at such other party's sole cost and expense, in the defense and settlement of any litigation by any shareholder of either party against either party or its directors relating to this Agreement or the Transactions, and no such settlement shall be agreed to without such other party's prior written consent (such consent not to be unreasonably withheld, conditioned or delayed). Without limiting the preceding sentence, each party shall give the other party the right to review and comment on all filings or responses to be made by it in connection with any such Actions, and it will in good faith take such comments into account; provided, however, that such party shall not be obligated to provide such access or information if such party determines, in good faith and in its reasonable judgment, that doing so could waive the protection of an attorney-client privilege or other legal privilege; provided, further, that such party shall use its reasonable best efforts to provide such access or information in a manner that would not risk waiver of such privilege.

SECTION 7.12. Merger Sub Shareholder Approval. Immediately following the execution of this Agreement, Parent shall cause Arches Acquisition Holdco II Inc. to execute and deliver, in accordance with applicable Law and in its capacity as the sole shareholder of Merger Sub, a written consent approving the Merger and this Agreement (the "Merger Sub Shareholder Approval").

SECTION 7.13. Stock Exchange De-listing. The Company and Parent shall cooperate and shall use their respective reasonable best efforts to take, or cause to be taken, all actions, and to do or cause to be done all things, necessary, proper or advisable under applicable Laws and the rules and policies of the NYSE and the SEC to cause the Common Stock to be de-listed from the NYSE and de-registered under the Exchange Act as soon as reasonably practicable following the Effective Time in compliance with applicable Law. In connection therewith, Parent shall (a) reasonably assist in enabling the Company or NYSE to be in a position to promptly file and cause the Surviving Company or NYSE to file with the SEC a Form 25 on the Closing Date and (b) use reasonable best efforts to cause the Surviving Company to file a Form 15 on the first business day that is at least ten days after the date the Form 25 is filed.

SECTION 7.14. Continued Listing of Depositary Shares. From and after the Effective Time, Parent shall cause the Surviving Company to continue to cause the Depositary Shares to be listed on the NYSE in accordance with the terms of certificate of designations establishing the Series A Preferred Stock and Series B Preferred Stock, as applicable, as set forth in Section 3.01(f).

SECTION 7.15. Notices of Certain Events.

From the date hereof until the earlier of the Effective Time and the termination of this Agreement in accordance with the terms of Article IX;

(a) each of the Company and Parent shall promptly notify the other party of:

(i) any written notice or other written communication received by the notifying party or any of its Affiliates or Representatives from any Person alleging that the consent of such Person is or may be required in connection with the Transactions; and

(ii) any Actions (A) commenced or (B) to its Knowledge, threatened against such party or any of its Subsidiaries that, if pending on the date of this Agreement, would have been required to have been disclosed pursuant to Section 4.07 (in the event that the Company is the notifying party) or Section 5.09 (in the event that Parent is the notifying party);

(b) the Company shall give prompt written notice to Parent of any change, circumstance, condition, development, effect, event or occurrence that has had or would reasonably be expected to have a Company Material Adverse Effect, or would reasonably be expected to make the satisfaction of any of the conditions in Section 8.02 impossible or unlikely;

(c) Parent shall give prompt written notice to the Company of any change, circumstance, condition, development, effect, event or occurrence that has had or would reasonably be expected to have a Parent Material Adverse Effect, or would reasonably be expected to make the satisfaction of any of the conditions in Section 8.03(a) or Section 8.03(b) impossible or unlikely; and

(d) BAM shall give prompt written notice to the Company of any change, circumstance, condition, development, effect, event or occurrence that has had or would reasonably be expected to have a BAM Material Adverse Effect, or would reasonably be expected to make the satisfaction of any of the conditions in Section 8.03(c) or Section 8.03(d) impossible or unlikely;

provided, however, that no such notification required by clause (a), (b), (c) or (d) above (and no other notification required to be given under any other Section of this Agreement) shall affect the representations, warranties, covenants or agreements of any party or the conditions to the obligations of any party under this Agreement.

SECTION 7.16. Investment Assets. The Company shall, or shall cause its applicable Subsidiaries to, deliver to Parent, within 15 business days following the end of each calendar month, starting with the first delivery to occur within 15 business days following the end of August 2023, a summary report of (a) all Investment Assets (other than real estate) owned by the Company or any of its Subsidiaries as of such month end, and if available, the market value thereof as of such month end, (b) all Investment Assets that are real estate owned by the Company or any of its Subsidiaries as of such month end and the carrying values thereof as of such month end as determined on a basis consistent with the Company's current practices with respect to its real estate (and, if there has been any third-party appraisal or report completed and delivered to the Company during such month that speaks to the value of any particular real estate property, such information will be included in the report for that month), (c) all Investment Assets sold or otherwise disposed of during the preceding month, (d) all Investment Assets purchased by the Company or any of its Subsidiaries during the preceding month and (e) all Investment Assets that are in arrears or breach or default in the payment of principal or interest or dividends or are, or should be, classified as non-performing, non-accrual, 90 days past due, still accruing and doubtful of collection, in foreclosure or any comparable classification, or are permanently impaired to any extent. From and after the date hereof until the Closing, subject to applicable Law, the Company shall cause the applicable employees having primary responsibility for Investment Assets to consult with Representatives of Parent on all investment-related matters, including future planned or potential sales and purchases of Investment Assets and the treatment of any impaired or potentially impaired Investment Assets, and the Company shall consider in good faith the recommendations of Representatives of Parent in making investment decisions from and after the date of this Agreement, provided that any such investment decisions shall be determined by the Company acting reasonably and in good faith.

SECTION 7.17. Financing.

(a) Prior to the Closing, the Company shall use commercially reasonable efforts, and shall cause its Subsidiaries and its and their respective Representatives to use commercially reasonable efforts, to provide such assistance in connection with any Debt Financing as may be reasonably requested by Parent; provided that the Company shall in no event be required to provide (or cause its Subsidiaries or its or their Representatives to provide) such assistance that shall unreasonably interfere with its or its Subsidiaries' business operations. For the avoidance of doubt, obtaining the Debt Financing shall not be a condition to Closing. If reasonably requested in writing by Parent, such assistance shall include, with reasonable prior notice and at Parent's sole cost and expense:

(i) furnishing to (A) Parent and any Debt Financing Source such customary and reasonably requested financial information and other pertinent information regarding the Company and its Subsidiaries as promptly as reasonably practicable following the reasonable request therefor by Parent or by any Debt Financing Source and (B) Parent such other historical financial information reasonably necessary to enable Parent to prepare pro forma financial information (provided that the Company and its Subsidiaries shall not have any obligation to prepare such pro forma financial information);

(ii) providing reasonable assistance to Parent in its preparation of (A) customary rating agency presentations and (B) bank books and confidential information memoranda, lender presentation materials and similar documents customary for any Debt Financing (including (1) a "private" supplement to any such materials and (2) customary representation and authorization letters with respect thereto (it being understood that the Company shall not be required to make any representations with respect to projections contained in any such materials or other forward looking information));

(iii) facilitating the execution and delivery at the Closing of customary definitive financing documents (including any schedules or exhibits thereto), including by requesting that the appropriate officers of the Company and its Subsidiaries that will continue in their positions after the Closing be available upon reasonable notice to Parent and its counsel to sign such documents, including customary officer's certificates and secretary's certificates (in each case to be held in escrow pending the Closing), in anticipation of the Closing; provided, however, that no obligation of the Company under any such document, and no such certificate, shall be effective until the Closing (other than any representation and authorization letters referred to in clause (ii) above and any prepayment notices referred to in clause (vi) below required by the Payoff Indebtedness);

(iv) cooperating with Parent to satisfy the conditions precedent to the Debt Financing at the Closing to the extent within the control of the Company;

(v) providing at least three business days prior to the Closing all documentation and other information about the Company and its Subsidiaries as is reasonably requested by Parent or any Debt Financing Sources at least ten business days prior to the Closing Date with respect to applicable "beneficial ownership", "know your customer" and anti-money laundering rules and regulations, including the Patriot Act and 31 C.F.R. § 1010.230; and

(vi) providing reasonable cooperation in connection with the termination and pay-off of any Payoff Indebtedness, including, as applicable, delivering prepayment notices (if such notices may be conditioned on the consummation of the Closing) and the Payoff Letters.

(b) Parent shall indemnify, defend and hold harmless the Company and each of its Subsidiaries and each of their respective officers, directors, managers, employees or other Representatives from and against any and all claims, losses, liabilities, damages, out-of-pocket costs or expenses (including reasonable attorneys' fees), judgments, fines or amounts paid in settlement that are incurred, directly or indirectly, in connection with the Debt Financing and the Credit Agreement Amendments and any cooperation provided pursuant to Section 7.17(a) and (c). Parent shall promptly reimburse the Company for all reasonable and documented out-of-pocket costs (including reasonable attorneys' fees) incurred by the Company or any of its Subsidiaries and each of their respective officers, directors, managers, employees or other Representatives in connection with the Debt Financing and any cooperation provided pursuant to Section 7.17(a).

(c) The Company shall use commercially reasonable efforts to, and shall cause its Subsidiaries and its and their respective Representatives to use commercially reasonable efforts to, cooperate with Parent in connection with the efforts of Parent to obtain, as soon as reasonably practicable after the date hereof, waivers of, or amendments to, change of control or other provisions in the Credit Agreement (the "Credit Agreement Amendments"), on such terms and conditions as specified and reasonably requested by Parent subject to the consent of the Company (not to be unreasonably withheld, conditioned or delayed), in each case in accordance with the terms of the Credit Agreement; provided that the Company shall in no event be required to provide (or cause its Subsidiaries or its or their Representatives to provide) such assistance that shall unreasonably interfere with its or its Subsidiaries' business operations. For the avoidance of doubt, obtaining any Credit Agreement Amendment shall not be a condition to Closing. If reasonably requested in writing by Parent, with reasonable prior notice and at Parent's sole cost and expense, such assistance shall include:

(i) furnishing to Parent and the parties to the Credit Agreement such customary and reasonably requested financial information and other pertinent information regarding the Company and its Subsidiaries as promptly as reasonably practicable following the reasonable request therefor by Parent or by any such party;

(ii) providing reasonable assistance to Parent in its preparation of bank books and confidential information memoranda, lender presentation materials and similar documents customary for any Credit Agreement Amendment (including (1) a "private" supplement to any such materials and (2) customary representation and authorization letters with respect thereto (it being understood that the Company shall not be required to make any representations with respect to projections or other forward looking information contained in any such materials));

(iii) facilitating the execution and delivery of any Credit Agreement Amendment (including any schedules or exhibits thereto) (it being understood that the effectiveness of such Credit Agreement Amendment may occur prior to the Closing Date, but any waivers and amendments set forth therein shall be conditioned upon the consummation of the Closing), including by requesting that the appropriate officers of the Company and its Subsidiaries be available upon reasonable notice to Parent and its counsel to sign such Credit Agreement Amendment and any customary officer's certificates and secretary's certificates related thereto; and

(iv) cooperating with Parent to satisfy the conditions precedent to the effectiveness of any Credit Agreement Amendment to the extent within the control of the Company.

For the avoidance of doubt, any cooperation provided for in this clause (c) shall be subject to the indemnification and expense reimbursement provisions in clause (b) above and the other limitations set forth in clause (d) below, and nothing in this clause (c) shall require the Company to pay (or agree to pay) any fee or other amount prior to the Closing (and any such fee or other amount payable at Closing shall only be payable with funds provided by or on behalf of Parent) or to incur any liability that is not indemnifiable or reimbursable pursuant to clause (b).

(d) Notwithstanding anything else in this Section 7.17, (A) none of the Company or any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to (x) pay (or agree to pay) any commitment or other fee, pay any expense, provide any indemnities or incur any liability in connection with any Debt Financing prior to the Closing Date (and any such fees or other expenses payable at Closing shall only be payable with funds provided by or on behalf of Parent) or (y) pay (or agree to pay) any fee or other amount in connection with the Credit Agreement Amendment prior to the Closing (and any such fee or other amount payable at Closing shall only be payable with funds provided by or on behalf of Parent) or to incur any liability in connection with the Credit Agreement Amendment that is not indemnifiable or reimbursable pursuant to clause (b), (B) nothing in this Section 7.17 shall require any director, manager, officer or other Representative of the Company or any of its Subsidiaries to execute or deliver any document or instrument (1) if such Person believes in good faith that any representation, warranty or certification contained therein is not true or (2) if such Person believes in good faith that execution or delivery of such document or instrument would reasonably be expected to result in personal liability, (C) none of the Company, any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to take any action that would reasonably be expected to unreasonably interfere with the operation of their respective businesses, (D) none of the Company, any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to disclose any information that is legally privileged, (E) none of the Company, any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to take any action or provide any information to the extent it would or could reasonably be expected to conflict with, or result in any violation of or default under, any Law, organizational documents, material Contract, or confidentiality obligation applicable to such Person, (F) neither the Company nor any of its Affiliates will be required to make any filings with the SEC in connection with any Debt Financing, (G) none of the Company or any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to execute, deliver or enter into, or perform any document in connection with the Debt Financing that is contemplated to be effective prior to the Closing (and any such execution, delivery or performance at Closing shall be performed by such officers, directors, managers, employees or other Representatives as constituted after the Effective Time and Closing) (other than any representation and authorization letters referred to in Section 7.17(a)(ii) above and any prepayment notices referred to in Section 7.17(a)(vi) above required by the Payoff Indebtedness), (H) none of the board of directors (or other similar governing body) or committee or subcommittee thereof of the Company or any of its Subsidiaries shall be required to adopt resolutions approving the Debt Financing and the documentation relating thereto that are contemplated to be effective prior to the Closing (and any such adoption or approval at Closing shall be performed by such board of directors (or other similar governing body) or committee or subcommittee thereof as constituted after the Effective Time and Closing), (I) none of the Company, any of its Subsidiaries or any of their respective officers, directors, managers, employees or other Representatives shall be required to take any action or provide any information to the extent it would or could reasonably be expected to (w) require the Company or any of its Subsidiaries to waive or amend the terms of this Agreement or result in a breach of this Agreement or a failure of any condition to Closing set forth in this Agreement, (x) constitute a default under, or give rise to any right of termination, cancellation or acceleration of any right or obligation of the Company or such Subsidiary or to a loss of any benefit to which the Company or such Subsidiary is entitled under any provision of any material Contract, (y) result in the creation or imposition of any Lien on any asset of the Company or such Subsidiary (except any Lien on any of the Company's or such Subsidiary's respective assets that becomes effective only upon the Closing), or (z) result in the Company's or any of its Affiliates' directors, managers, officers, general or limited partners, employees, counsel, financial advisors, auditors, agents and other authorized Representatives incurring any personal liability with respect to any matters relating to any financing. The Company hereby consents to the use of the trademarks, trade names and logos of the Company and its Subsidiaries by Parent and any Debt Financing Sources, in each case, only as reasonably required in connection with any Debt Financing; provided that Parent shall ensure that any such trademarks, trade names and logos are used by the above permitted parties solely in a manner that is not intended, or that is not reasonably likely, to harm, disparage or otherwise adversely affect the Company's reputation or goodwill. To the extent identifying the Company or any of its Subsidiaries by name, the Company shall have the right to review and comment on marketing materials used in connection with the arrangement of any Debt Financing prior to the dissemination of such materials to potential Debt Financing Sources or other counterparties to any proposed financing transaction. Any information with respect to the prospects and projections for the Company and its Subsidiaries in connection with any Debt Financing will be the sole responsibility of Parent, and neither the Company nor any of its Affiliates nor any of their respective officers, directors, managers, employees or other Representatives shall have any liability or incur any damages with respect thereto or be required to provide any projections or information or make any presentations with respect to capital structure, or the incurrence of any or other pro forma information relating thereto or the manner in which Parent intends to operate, or cause to be operated, the Company and its Subsidiaries after the Closing. The Company and its Subsidiaries shall not be required to deliver, or cause to be delivered, any legal opinions in connection with the Debt Financing or the Credit Agreement Amendment.

SECTION 7.18. Payoff Letters. The Company shall, and shall cause its applicable Subsidiaries to, use commercially reasonable efforts to deliver to Parent, on or prior to the Closing Date, duly executed payoff and release letters in respect of all Payoff Indebtedness (such letters, the "Payoff Letters"), in form and substance reasonably satisfactory to Parent, providing for the satisfaction and discharge of all obligations of the Company and its Subsidiaries in respect of all such Payoff Indebtedness (other than contingent obligations for which no claim has been made), effective upon the payment of the amounts set forth in such Payoff Letters (such amounts, the "Payoff Amount"). Parent shall on behalf of the Company irrevocably pay off or cause to be paid off at or prior to the Effective Time the Payoff Amount and cooperate as may be reasonably requested by the Company to assist the Company in connection with its obligation under this Section 7.18.

SECTION 7.19. Pre-Closing Actions.

(a) Within five business days from the date hereof, the Company shall make available to Parent true, complete and correct copies of the organizational documents of each of the Company's Subsidiaries set forth in Section 7.19(a) of the Company Disclosure Letter, in each case as amended and in effect as of the date so provided.

(b) Prior to the Closing, the Company and Parent shall, and shall cause each applicable Affiliate to, cause the actions contemplated by Section 7.19(b) of the Parent Disclosure Letter to occur at the times and in the manner specified therein. To the extent such actions would require an approval or non-disapproval by and Insurance Regulator, the applicable filing shall indicate that approval or non-disapproval of such action is not a condition to the Closing.

SECTION 7.20. Stock Exchange Listing. BAM shall use its reasonable best efforts to cause the BAM Class A Stock to be delivered as Stock Consideration to be approved for listing on the NYSE, subject to official notice of issuance, prior to the Effective Time. BAM shall use its reasonable best efforts to obtain conditional approval for the listing and posting for trading on the TSX of the BAM Class A Stock to be delivered as Stock Consideration, subject only to satisfaction of the customary listing conditions of the TSX.

ARTICLE VIII

CONDITIONS PRECEDENT

SECTION 8.01. Conditions to Each Party's Obligation To Effect the Merger. The respective obligations of the Company, Parent, Merger Sub and BAM to effect the Merger shall be subject to the satisfaction (or waiver, if permissible under applicable Law) on or prior to the Closing Date of the following conditions:

(a) Required Shareholder Approval. The Required Shareholder Approval shall have been obtained.

(b) Listing. The shares of BAM Class A Stock constituting the Stock Consideration shall have been approved for listing on the NYSE, subject to official notice of issuance, and conditionally approved for listing on the TSX, subject to the satisfaction of customary listing conditions of the TSX.

(c) Other Approvals. (i) Any waiting period (or extension thereof) applicable to the Transactions under the HSR Act shall have been terminated or shall have expired, (ii) the Consents of, or declarations, notifications or filings with, and the other terminations or expirations of waiting periods required from, the Governmental Authorities set forth in Section 8.01(c) of the Company Disclosure Letter shall have been filed, have occurred or been obtained (collectively, the "Required Regulatory Approvals") and shall be in full force and effect and (iii) any timing agreement(s) with a Governmental Authority applicable to the consummation of the Transactions shall have expired or otherwise not prohibit consummation of the Transactions.

(d) No Injunctions or Restraints. No injunction, judgment or ruling enacted, promulgated, issued, entered, amended or enforced by any Governmental Authority of competent jurisdiction (collectively, "Restraints") shall be in effect enjoining, restraining or otherwise making illegal, preventing or prohibiting consummation of the Transactions.

(e) Form F-4. The Form F-4 shall have been declared effective under the Securities Act and shall not be the subject of any stop order suspending the effectiveness of such registration statement or initiated or threatened proceedings seeking such a stop order.

SECTION 8.02. Conditions to Obligations of Parent, Merger Sub and BAM. The obligations of Parent, Merger Sub and BAM to effect the Merger are further subject to the satisfaction (or waiver, if permissible under applicable Law) on or prior to the Closing Date of the following conditions:

(a) Representations and Warranties of the Company. The representations and warranties of the Company (i) set forth in Section 4.02(a) and clause (ii) of Section 4.06 shall be true and correct in all respects (except for *de minimis* inaccuracies) as of the date of this Agreement and as of the Closing Date as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date), (ii) set forth in Sections 4.02(b), 4.03(a), 4.03(b), 4.03(d) and 4.25 shall be true and correct in all material respects (without regard to any materiality qualifiers specified therein) as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date) and (iii) set forth in this Agreement, other than those Sections specifically identified in clauses (i) or (ii) of this Section 8.02(a), shall be true and correct (disregarding all qualifications or limitations as to "materiality," "Company Material Adverse Effect" and words of similar import set forth therein, other than Section 4.15(a) and any use of the defined term "Material Contract") as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date), except, in the case of this clause (iii), where the failure to be so true and correct would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect. Parent shall have received a certificate signed on behalf of the Company by an executive officer of the Company to such effect.

(b) Obligations and Agreements of the Company. The Company shall have performed or complied in all material respects with the obligations and agreements required to be performed or complied with by it under this Agreement at or prior to the Closing. Parent shall have received a certificate signed on behalf of the Company by an executive officer of the Company to such effect.

(c) Company Material Adverse Effect. Since the date hereof, no Company Material Adverse Effect shall have occurred.

(d) Burdensome Condition. No Burdensome Condition shall have been imposed.

(e) FINRA Approval. FINRA's approval of the Rule 1017 Application, provided, that Parent may, in its sole discretion and upon written notice to the Company, waive the receipt of FINRA's approval of the Rule 1017 Application as a condition upon which the obligations of any party to effect the Merger shall be subject, but Parent shall only have the right to exercise such waiver option in the circumstance where: (A) the passing of 12:01 am New York time on the thirty-first (31st) calendar day following the date on which FINRA accepts as "substantially complete" the Rule 1017 Application, and (B) FINRA has not provided notice to the Broker-Dealer Subsidiary expressly stating that the Closing may not occur until FINRA approves the Rule 1017 Application (or if FINRA has provided such notice to Broker-Dealer Subsidiary, such notice has been withdrawn).

SECTION 8.03. Conditions to Obligations of the Company. The obligations of the Company to effect the Merger are further subject to the satisfaction (or waiver, if permissible under applicable Law) on or prior to the Closing Date of the following conditions:

(a) Representations and Warranties of the Parent Entities. The representations and warranties of Parent and Merger Sub (i) set forth in Sections 5.02 and 5.06 shall be true and correct in all material respects (without regard to any materiality qualifiers specified therein) as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date) and (ii) set forth in this Agreement, other than those Sections specifically identified in clause (i) of this Section 8.03(a), shall be true and correct (disregarding all qualifications or limitations as to "materiality," "Parent Material Adverse Effect" and words of similar import set forth therein) as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date), except, in the case of this clause (ii), where the failure to be true and correct would not, individually or in the aggregate, reasonably be expected to have a Parent Material Adverse Effect. The Company shall have received a certificate signed on behalf of Parent and Merger Sub by an executive officer of Parent and an executive officer of Merger Sub to such effect.

(b) Obligations and Agreements of the Parent Entities. Parent and Merger Sub shall have performed or complied in all material respects with the obligations and agreements required to be performed or complied with by them under this Agreement at or prior to the Closing. The Company shall have received a certificate signed on behalf of Parent and Merger Sub by an executive officer of Parent and an executive officer of Merger Sub to such effect.

(c) Representations and Warranties of BAM. The representations and warranties of BAM (i) set forth in Section 6.02 and clause (ii) of Section 6.09 shall be true and correct in all respects (except for *de minimis* inaccuracies) as of the date of this

Agreement and as of the Closing Date as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date), (ii) set forth in Sections 6.03 and 6.12 shall be true and correct in all material respects (without regard to any materiality qualifiers specified therein) as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date) and (iii) set forth in this Agreement, other than those Sections specifically identified in clauses (i) or (ii) of this Section 8.03(c), shall be true and correct (disregarding all qualifications or limitations as to "materiality," "BAM Material Adverse Effect" and words of similar import set forth therein) as of the date of this Agreement and as of the Closing Date with the same effect as though made as of the Closing Date (except to the extent expressly made as of an earlier date, in which case as of such date), except, in the case of this clause (iii), where the failure to be true and correct would not, individually or in the aggregate, reasonably be expected to have a BAM Material Adverse Effect. The Company shall have received a certificate signed on behalf of BAM by an executive officer of BAM to such effect.

(d) Obligations and Agreements of BAM. BAM shall have performed or complied in all material respects with the obligations and agreements required to be performed or complied with by them under this Agreement at or prior to the Closing. The Company shall have received a certificate signed on behalf of BAM by an executive officer of BAM to such effect.

SECTION 8.04. Frustration of Closing Conditions. None of the parties hereto may rely, either as a basis for not consummating the Transactions or for terminating this Agreement, on the failure of any condition set forth in Sections 8.01, 8.02 or 8.03, as the case may be, to be satisfied if such failure was caused by such party's breach in any material respect of any provision of this Agreement.

ARTICLE IX

TERMINATION

SECTION 9.01. Termination. This Agreement may be terminated and the Transactions abandoned at any time prior to the Effective Time, whether before or after receipt of the Required Shareholder Approval (except as otherwise expressly noted):

(a) by the mutual written consent of the Company and Parent duly authorized by each of the Company Board and the Parent Board;

(b) by either of the Company or Parent:

(i) if the Merger shall not have been consummated on or prior to April 4, 2024 (the "Outside Date"); provided, however, that if the conditions to the Closing set forth in Section 8.01(c) have not been satisfied or waived on or prior to such date but all other conditions to Closing set forth in Article VIII have been satisfied or waived (other than those conditions that by their nature are to be satisfied or waived at the Closing (so long as such conditions are reasonably capable of being satisfied)), the Outside Date may be extended by either party to a date not beyond July 5, 2024, by providing a written notice thereof to the other party prior to 5:00 p.m. (New York time) on such date; provided, further that the right to terminate this Agreement under this Section 9.01(b)(i) shall not be available to any party if the breach by such party of its representations and warranties set forth in this Agreement or the failure of such party to perform any of its obligations under this Agreement, its failure to act in good faith or its failure to use its reasonable best efforts to consummate the Transactions, including to the extent required by and subject to Section 7.05, has been a proximate cause of the failure of the Merger to be consummated on or prior to such date (it being understood that Parent, BAM and Merger Sub shall be deemed a single party for purposes of the foregoing proviso);

(ii) if any Restraint having the effect set forth in Section 8.01(d) shall be in effect and shall have become final and nonappealable; provided that the party seeking to terminate this Agreement pursuant to this Section 9.01(b)(ii) shall have performed in all material respects its obligations under this Agreement, acted in good faith and used reasonable best efforts to prevent the entry of and to remove such Restraint in accordance with its obligations under this Agreement (it being understood that Parent, BAM and Merger Sub shall be deemed a single party for purposes of the foregoing proviso); or

(iii) if the Required Shareholder Approval shall not have been obtained following a vote thereon having been taken at the Company Shareholders Meeting or at any postponement, recess or adjournment thereof taken in accordance with this Agreement;

(c) by Parent:

(i) if the Company shall have breached any of its representations or warranties or failed to perform any of its obligations or agreements set forth in this Agreement, which breach or failure to perform (A) would give rise to the failure of a condition set forth in Section 8.02(a) or Section 8.02(b) and (B) is not reasonably capable of being cured prior to the Outside Date, or if reasonably capable of being cured, shall not have been cured by the earlier of the Outside Date and 30 days following receipt by the Company of written notice of such breach or failure to perform from Parent stating Parent's intention to terminate this Agreement pursuant to this Section 9.01(c)(i) and the basis for such termination; provided that Parent shall not have the right to terminate this Agreement pursuant to this Section 9.01(c)(i) if Parent, Merger Sub or BAM is then in material breach of any of its representations, warranties, obligations or agreements hereunder; or

(ii) prior to receipt of the Required Shareholder Approval, if the Company Board shall have effected and not withdrawn an Adverse Recommendation Change; or

(d) by the Company:

(i) if Parent, Merger Sub or BAM shall have breached any of its representations or warranties or failed to perform any of its obligations or agreements set forth in this Agreement, which breach or failure to perform (A) would give rise to the failure of a condition set forth in Sections 8.03(a), 8.03(b), 8.03(c) or 8.03(d) and (B) is not reasonably capable of being cured prior to the Outside Date, or if reasonably capable of being cured, shall not have been cured by the earlier of the Outside Date and 30 days following receipt by Parent, Merger Sub or BAM, as applicable, of written notice of such breach or failure to perform from the Company stating the Company's intention to terminate this Agreement pursuant to this Section 9.01(d)(i) and the basis for such termination; provided that the Company shall not have the right to terminate this Agreement pursuant to this Section 9.01(d)(i) if the Company is then in material breach of any of its representations, warranties, obligations or agreements hereunder; or

(ii) prior to receipt of the Required Shareholder Approval, in connection with entering into a Company Acquisition Agreement in accordance with Section 7.03(d)(ii); provided that, prior to or concurrently with such termination, the Company pays the Company Termination Fee in accordance with Section 9.03.

SECTION 9.02. Effect of Termination. In the event of the termination of this Agreement as provided in Section 9.01, written notice thereof shall be given to the other party or parties, specifying the provision hereof pursuant to which such termination is made, and this Agreement shall forthwith become null and void (other than Sections 9.02 and 9.03, Article X, the Confidentiality Agreement and the Guaranty, all of which shall survive termination of this Agreement), and there shall be no liability on the part of Parent, Merger Sub, the Company or their respective former, current or future directors, officers, partners, shareholders, managers, members and Affiliates arising out of or in connection with this Agreement, any of the Transactions or any matters forming the basis of such termination, except (a) as liability may exist pursuant to the provisions specified in the immediately preceding parenthetical that survive such termination, (b) as liability may exist pursuant to the terms and conditions of the Guaranty or the Voting Agreement, and (c) that no such termination shall relieve any party from liability for any Willful Breach or Fraud.

SECTION 9.03. Termination Fee.

(a) In the event that this Agreement is terminated (A) by Parent pursuant to Section 9.01(c)(ii) or (B) by the Company pursuant to Section 9.01(d)(ii), then the Company shall pay Parent the Company Termination Fee. If the Company Termination Fee is payable pursuant to clause (A) of the preceding sentence, the

Company Termination Fee shall be paid within four business days after the date of such termination, and if the Company Termination Fee is payable pursuant to clause (B) of the preceding sentence, the Company Termination Fee shall be paid as described in Section 9.01(d)(ii), in each case, by wire transfer of immediately available funds to an account designated by Parent in writing (it being understood that in no event shall the Company be required to pay the Company Termination Fee more than once).

(b) If this Agreement is terminated by either Parent or the Company pursuant to Section 9.01(b)(iii) and (A) at any time after the date of this Agreement and prior to such termination, a Takeover Proposal shall have been publicly announced or publicly made known to the Company Board or the shareholders of the Company and not withdrawn and (B) within 12 months of such termination, the Company consummates such a Takeover Proposal or enters into a definitive agreement to consummate such a Takeover Proposal and the Company thereafter consummates such Takeover Proposal (whether or not within such 12 month period), then the Company shall pay Parent the Company Termination Fee; provided that for purposes of this Section 9.03(b), the references to "20%" in the definition of Takeover Proposal shall be deemed to be references to "50%." If the Company Termination Fee is payable pursuant to this Section 9.03(b), the Company Termination Fee shall be paid upon the consummation of such Takeover Proposal by wire transfer of immediately available funds to an account designated by Parent in writing (it being understood that in no event shall the Company be required to pay the Company Termination Fee more than once).

(c) Each of the parties acknowledges that the agreements contained in this Section 9.03 are an integral part of the Transactions, and that without these agreements, the other parties would not enter into this Agreement; accordingly, if the Company fails to timely pay any amount due pursuant to this Section 9.03, and, in order to obtain the payment, Parent commences an Action which results in a judgment against the Company for the payment set forth in this Section 9.03, the Company shall pay Parent for its reasonable and documented costs and expenses (including reasonable and documented attorneys' fees) in connection with such Action, together with interest on such amount at the prime rate as published in *The Wall Street Journal* in effect on the date such payment was required to be made through the date such payment was actually received.

ARTICLE X

MISCELLANEOUS

SECTION 10.01. No Survival of Representations and Warranties. This Article X and the agreements of the Company, Parent and Merger Sub contained in Article III and in Sections 7.08, 7.10 and 7.11 shall survive the Effective Time. No other representations, warranties, obligations or agreements in this Agreement shall survive the Effective Time, expect for those representations, warranties, obligations or agreements set forth in this Agreement that by their terms apply, or that are to be performed in whole or in part, after the Effective Time.

SECTION 10.02. Amendment or Supplement. At any time prior to the Closing, this Agreement may be amended or supplemented in any and all respects, whether before or after receipt of the Required Shareholder Approval, only by written agreement of the parties, by action taken by the Parent Board, an authorized officer of BAM and the Company Board; provided, however, that following receipt of the Required Shareholder Approval, there shall be no amendment or change to the provisions hereof which by applicable Law would require further approval by the Company's shareholders without such approval.

SECTION 10.03. Extension of Time, Waiver, Etc. At any time prior to the Closing, Parent and the Company may, subject to applicable Law, (a) waive any inaccuracies in the representations and warranties of the other party, (b) extend the time for the performance of any of the obligations or acts of the other party or (c) subject to the requirements of applicable Law, waive compliance by the other party with any of the agreements contained herein or, except as otherwise provided herein, waive any of such party's conditions (it being understood that Parent and Merger Sub shall be deemed a single party for purposes of the foregoing). Notwithstanding the foregoing, no failure or delay by the Company, Parent or Merger Sub in exercising any right hereunder shall operate as a waiver thereof nor shall any single or partial exercise thereof preclude any other or further exercise thereof or the exercise of any other right hereunder. Any agreement on the part of a party to any such extension or waiver shall be valid only if set forth in an instrument in writing signed on behalf of such party.

SECTION 10.04. Assignment. Neither this Agreement nor any of the rights, interests or obligations hereunder shall be assigned, in whole or in part, by operation of Law or otherwise, by any of the parties without the prior written consent of the other parties. No assignment by any party shall relieve such party of any of its obligations hereunder. Subject to the immediately preceding two sentences, this Agreement shall be binding upon, inure to the benefit of, and be enforceable by, the parties and their respective successors and permitted assigns. Any purported assignment not permitted under this Section 10.04 shall be null and void.

SECTION 10.05. Counterparts. This Agreement may be executed in one or more counterparts (including by electronic mail), each of which shall be deemed to be an original but all of which taken together shall constitute one and the same agreement, and shall become effective when one or more counterparts have been signed by each of the parties and delivered to the other parties.

SECTION 10.06. Entire Agreement; No Third-Party Beneficiaries. This Agreement, together with the Exhibits and Schedules attached hereto, the Company Disclosure Letter, the Parent Disclosure Letter, the BAM Disclosure Letter, the Guaranty, the Voting Agreement and the Confidentiality Agreement, constitute the entire agreement, and supersede all other prior agreements and understandings, both written and oral, among the parties and their Affiliates, or any of them, with respect to the subject matter hereof and thereof. Except for: (i) if the Effective Time occurs, (A) the right of the holders of Common Stock to receive the Merger Consideration payable in accordance with Article III and (B) the right of the holders of Preferred Stock to receive preferred stock of the Surviving Company in accordance with Article III and (ii) the Indemnitees with respect to the provisions set forth in Section 7.08 of this Agreement, nothing in this Agreement, express or implied, is intended to or shall confer upon any Person other than the parties any rights or remedies hereunder. Notwithstanding the foregoing, the Company shall have the right to recover, through an Action brought by the Company, damages from Parent (or against BN to the extent provided for in the Guaranty) in the event of a breach of this Agreement by Parent, in which event the damages recoverable by the Company for itself and on behalf of the Company's shareholders shall be determined by reference to the total amount that would have been recoverable by such holders if all such holders brought an action against Parent and were recognized as third-party beneficiaries hereunder. The representations, warranties, covenants and agreements in this Agreement are the product of negotiations among the parties and are for the sole benefit of the parties and may, in certain instances, be qualified, limited or changed by confidential disclosure letters. Any inaccuracies in such representations or warranties or failure to perform or breach of such covenants or agreements are subject to waiver by the parties in accordance with Section 10.03 without notice or liability to any other Person. In some instances, the representations, warranties, covenants and agreements in this Agreement may represent an allocation among the parties of risk associated with particular matters regardless of the knowledge of any of the parties. Consequently, Persons other than the parties may not rely upon the representations, warranties, covenants and agreements in this Agreement as characterizations of actual facts or circumstances as of the date of this Agreement or as of any other date.

SECTION 10.07. Governing Law; Jurisdiction.

(a) This Agreement shall be governed by, and construed in accordance with, the Laws of the State of Iowa applicable to contracts executed in and to be performed entirely within that state, regardless of the laws that might otherwise govern under any applicable conflict of laws principles.

(b) All Actions arising out of or relating to the interpretation and enforcement of the provisions of this Agreement and in respect of the Transactions shall be heard and determined in the Iowa District Court for Polk County, or, if the Iowa District Court declines to accept jurisdiction over a particular matter, any federal court within the State of Iowa, or, if both the Iowa District Court and the federal courts within the State of Iowa decline to accept jurisdiction over a particular matter, any other state court within the State of Iowa, and, in each case, any appellate court therefrom. The parties hereby irrevocably submit to the exclusive jurisdiction and venue of such courts in any such Actions and irrevocably waive the defense of an inconvenient forum or lack of jurisdiction to the maintenance of any such Action. The consents to jurisdiction and venue set forth in this Section 10.07(b) shall not constitute general consents to service of process in the State of Iowa and shall have no effect for any purpose except as provided in this paragraph and shall not be deemed to confer rights on any Person other than the parties. Each party agrees that service of process upon such party in any Action arising out of or relating to this Agreement shall be effective if notice is given by overnight courier at the address set forth in Section 10.10 of this Agreement. The parties agree that a final judgment in any such Action shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by applicable Law; provided, however, that nothing contained in the foregoing shall restrict any party's rights to seek any post-judgment relief regarding, or any appeal from, a final trial court judgment.

SECTION 10.08. Specific Enforcement. The parties agree that irreparable damage for which monetary relief, even if available, would not be an adequate remedy, would occur in the event that any provision of this Agreement is not performed in accordance with its specific terms or is otherwise breached, including if the parties fail to take any action required of them hereunder to consummate this Agreement, subject to the terms and conditions of this Agreement. The parties acknowledge and agree that (a) the parties shall be entitled to an injunction or injunctions, specific performance or other equitable relief to prevent breaches of this Agreement and to enforce specifically the terms and provisions hereof (including, for the avoidance of doubt, the right of the Company to cause the Merger to be consummated on the terms and subject to the conditions set forth in this Agreement and to enforce the obligations of BN pursuant to the terms of the Guaranty and the Voting Agreement) in the courts described in Section 10.07(b) without proof of damages or otherwise, this being in addition to any other remedy to which they are entitled under this Agreement and (b) the right of specific enforcement is an integral part of the Transactions and without that right, neither the Company nor Parent would have entered into this Agreement. The parties agree not to assert that a remedy of specific enforcement is unenforceable, invalid, contrary to Law or inequitable for any reason, and not to assert that a remedy of monetary damages would provide an adequate remedy or that the parties otherwise have an adequate remedy at law. The parties acknowledge and agree that any party seeking an injunction or injunctions to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 10.08 shall not be required to provide any bond or other security in connection with any such order or injunction.

SECTION 10.09. WAIVER OF JURY TRIAL. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES, AND THEREFORE IT HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS AGREEMENT AND ANY OF THE AGREEMENTS DELIVERED IN CONNECTION HEREWITH OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER, (B) IT UNDERSTANDS AND HAS CONSIDERED THE IMPLICATIONS OF SUCH WAIVER, (C) IT MAKES SUCH WAIVER VOLUNTARILY AND (D) IT HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVER AND CERTIFICATIONS IN THIS SECTION 10.09.

SECTION 10.10. Notices. All notices, requests and other communications to any party hereunder shall be in writing and shall be deemed given if delivered personally, emailed (but only if confirmation of receipt of such email is requested and received, provided that each notice party shall use reasonable best efforts to confirm receipt of any such email correspondence promptly upon receipt of such request) or sent by overnight courier (providing proof of delivery) to the parties at the following addresses:

If to Parent or Merger Sub, to:

or such other address or email address as such party may hereafter specify by like notice to the other parties. All such notices, requests and other communications shall be deemed received on the date of actual receipt by the recipient thereof if received prior to 5:00 p.m. local time in the place of receipt and such day is a business day in the place of receipt. Otherwise, any such notice, request or communication shall be deemed not to have been received until the next succeeding business day in the place of receipt.

SECTION 10.11. Severability. If any term, condition or other provision of this Agreement is finally determined by a court of competent jurisdiction to be invalid, illegal or incapable of being enforced by any applicable Law or public policy, all other terms, provisions and conditions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the Transactions is not affected in any manner materially adverse to any party or such party waives its rights under this Section 10.11 with respect thereto. Upon such determination that any term, condition or other provision is invalid, illegal or incapable of being enforced, the parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible to the fullest extent permitted by applicable Law in an acceptable manner to the end that the Transactions are fulfilled to the extent possible.

SECTION 10.12. Fees and Expenses. Whether or not the Transactions are consummated, all fees and expenses incurred in connection with the Transactions and this Agreement shall be paid by the party incurring or required to incur such fees or expenses, except as otherwise set forth in this Agreement.

SECTION 10.13. Transfer Taxes. Except as otherwise provided in Section 3.02(b), all transfer, documentary, sales, use, stamp, registration, value-added and other similar Taxes and fees incurred in connection with the Transactions shall be paid by Parent and Merger Sub when due and expressly shall not be a liability of any holders of the Common Stock or the Company Awards or the Company.

SECTION 10.14. No Other Representations and Warranties.

(a) Except for the representations and warranties expressly set forth in Article IV, neither the Company nor any other Person on behalf of the Company makes any express or implied representation or warranty with respect to the Company, its Subsidiaries or their respective businesses or with respect to any other information provided to Parent, Merger Sub, BAM or their Representatives or Affiliates in connection with the Transactions. Neither the Company nor any other Person will have or be subject to any liability to Parent, Merger Sub, BAM or any other Person resulting from the distribution to Parent, Merger Sub, BAM or their respective Representatives or Affiliates, or Parent's, Merger Sub's, BAM's or their Representatives' or Affiliates' use of, any such information, including any information, documents, projections, forecasts or any other material made available to Parent, Merger Sub, BAM or their Representatives or Affiliates in the "data rooms" or management presentations in connection with Parent's, Merger Sub's and BAM's consideration and review of the Transactions, unless any such information is expressly included in a representation or warranty set forth in Article IV. Except for the representations and warranties set forth in Article IV, each of Parent, Merger Sub and BAM acknowledges that neither the Company nor any Person on behalf of the Company makes any other express or implied representation or warranty with respect to the Company or any of its Subsidiaries or with respect to any other information provided or made available to Parent, Merger Sub or BAM in connection with the Transactions.

(b) Except for the representations and warranties expressly set forth in Article V, the Guaranty or the Voting Agreement, neither Parent nor Merger Sub nor any other Person on behalf of Parent or Merger Sub makes any express or implied representation or warranty with respect to Parent, Merger Sub or their respective Subsidiaries or their respective businesses or with respect to any other information provided to the Company or its Representatives or Affiliates in connection with the Transactions. Except for the representations and warranties set forth in Article V, the Guaranty or the Voting Agreement, the Company acknowledges that none of Parent, Merger Sub or any Person on behalf of Parent or Merger Sub makes any other express or implied representation or warranty with respect to Parent or Merger Sub or with respect to any other information provided or made available to the Company in connection with the Transactions.

(c) Except for the representations and warranties expressly set forth in Article VI, the Guaranty or the Voting Agreement, neither BAM nor any other Person on behalf of BAM makes any express or implied representation or warranty with respect to BAM, or its respective Subsidiaries or its respective businesses or with respect to any other information provided to the Company or its Representatives or Affiliates in connection with the Transactions. Except for the representations and warranties set forth in Article VI, the Guaranty or the Voting Agreement, the Company acknowledges that none of BAM or any Person on behalf of BAM makes any other express or implied representation or warranty with respect to BAM or with respect to any other information provided or made available to the Company in connection with the Transactions.

(d) Notwithstanding anything to the contrary contained in this Agreement or any other agreement, document or instrument, each of Parent, Merger Sub and BAM acknowledges and agrees that the Company and its Subsidiaries make no representations or warranties with respect to, and nothing contained in this Agreement or in any other agreement, document or instrument to be delivered in connection herewith is intended or shall be construed to be a representation or warranty, express or implied, of the Company or any of its Subsidiaries, for any purposes of this Agreement or any other agreement, document or instrument to be delivered in connection herewith, in respect of (i) the adequacy or sufficiency of reserves of the Company or any of its Subsidiaries, (ii) the effect of the adequacy or sufficiency of reserves of the Company or any of its Subsidiaries on any line item, asset, liability or equity amount on any financial or other document, (iii) whether or not reserves of the Company or any of its Subsidiaries were determined in accordance with any actuarial, statutory, regulatory or other standard or (iv) the collectability of any amounts under any Reinsurance Agreement.

SECTION 10.15. No Other Duties and Obligations. Except for the duties and obligations expressly set forth in Sections 3.02(a)(ii)(B), 3.02(d), 7.02, 7.04, 7.14(d), 7.20 and 8.03(c), neither BAM nor any other Person on behalf of BAM makes any express or implied duties or obligations with respect to BAM or its respective Subsidiaries or its respective businesses in connection with the Transactions. Except for the duties and obligations expressly set forth in Sections 3.02(a)(ii)(B), 3.02(d), 7.02, 7.04, 7.14(d), 7.20 and 8.03(c), the Company acknowledges that none of BAM or any Person on behalf of BAM makes any other express or implied duties or obligations with respect to BAM or its respective Subsidiaries or its respective businesses in connection with the Transactions.

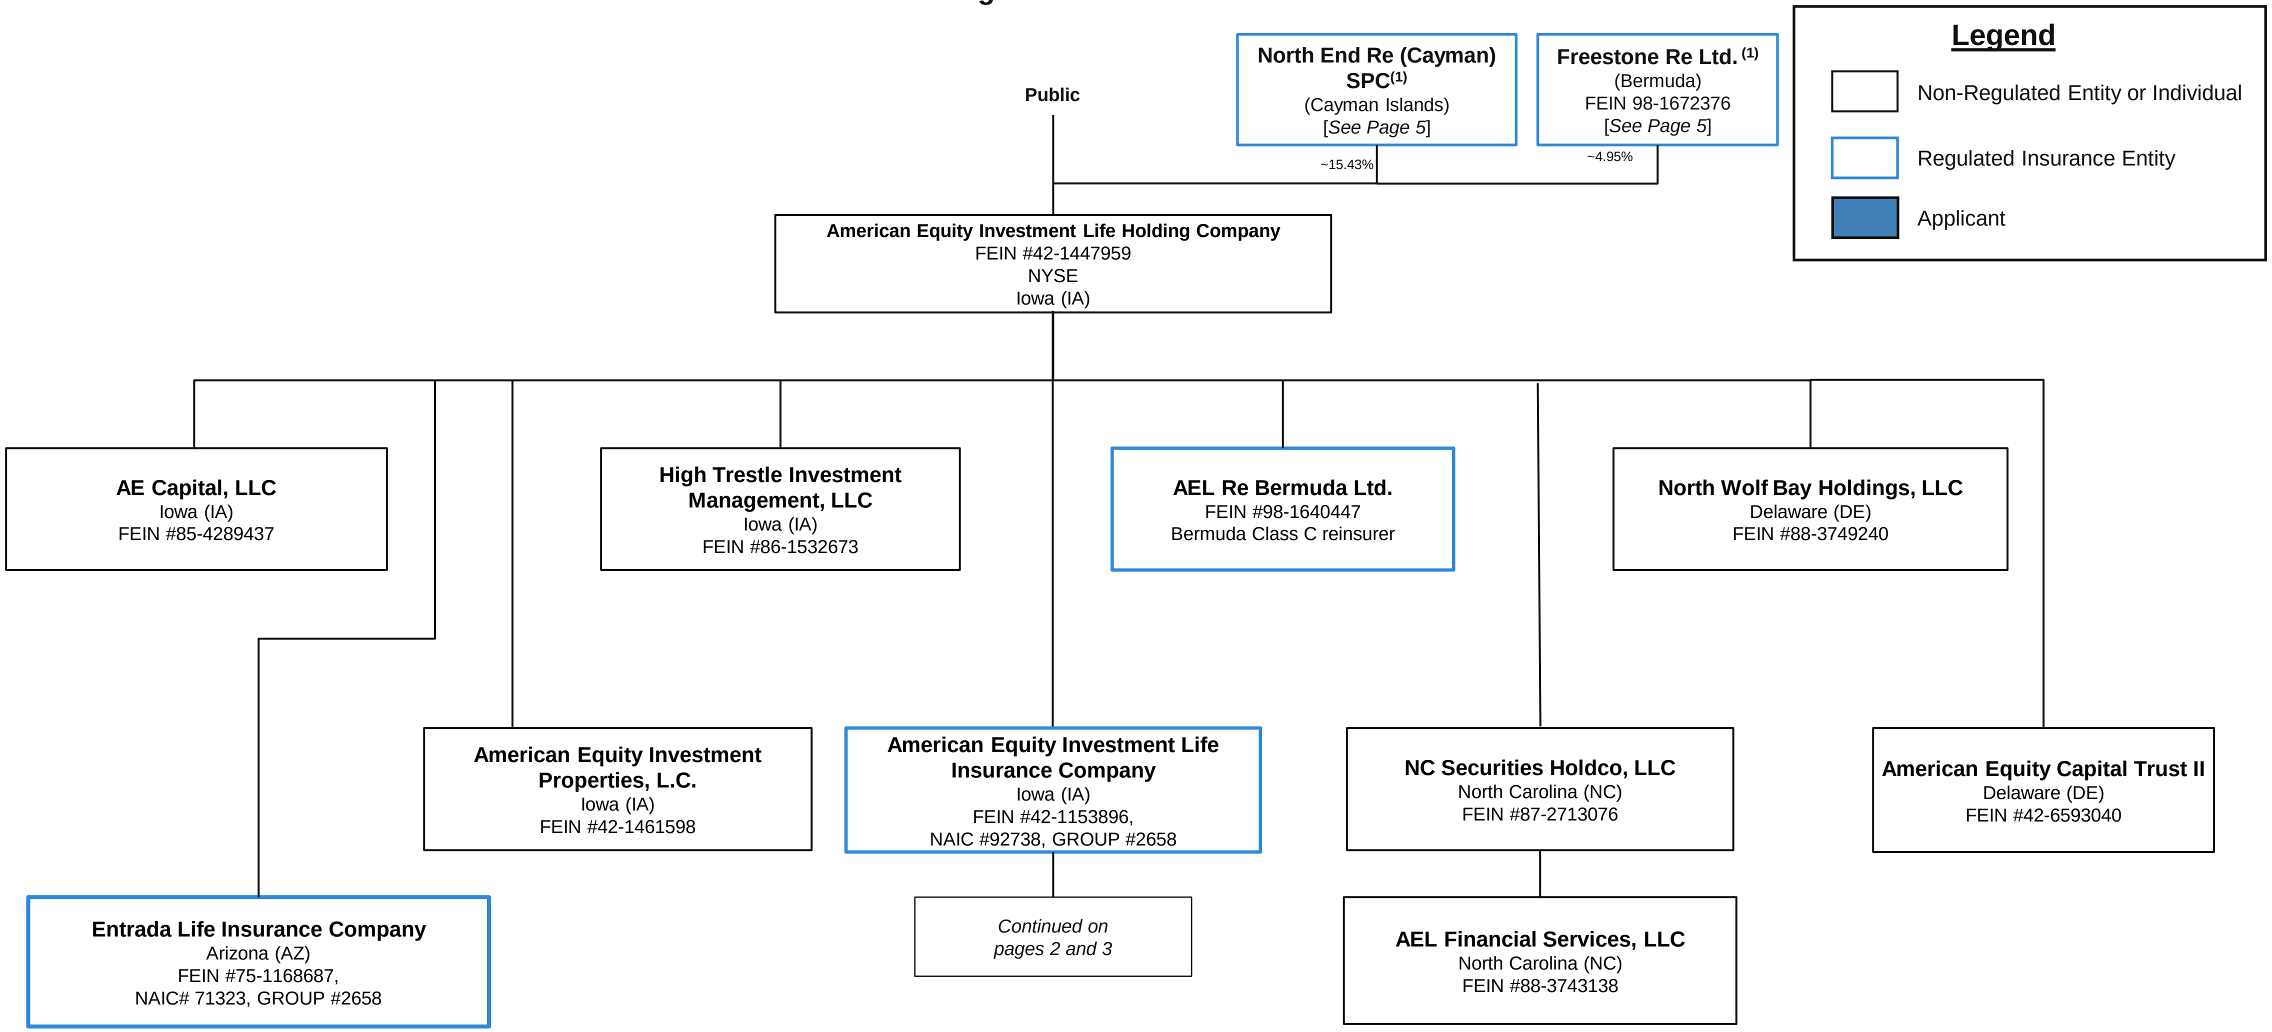
Exhibit 2

Abbreviated Current Organizational Chart of the Domestic Insurers



(1) As of July 4, 2023, Brookfield Reinsurance Ltd. beneficially owns an approximate 20.38% interest in American Equity Investment Life Holding Company ("AEL Holdco"), through its wholly owned indirect subsidiaries, North End Re (Cayman) SPC ("North End Re") and Freestone Re Ltd. ("Freestone"). This investment was consummated pursuant to the Investment Agreement (the "Investment Agreement"), dated October 17, 2020, by and among AEL Holdco, Brookfield Corporation (f/k/a Brookfield Asset Management Inc.) and Burgundy Acquisitions I Ltd. North End Re and Freestone are successors and assignees of Burgundy Acquisitions I Ltd. under the Investment Agreement.

Notes:

- All ownership 100%, unless otherwise noted.
- This organizational chart omits certain holding companies and administrative companies within Brookfield Reinsurance Ltd.'s structure.

Voting Agreement

VOTING AGREEMENT (this "Agreement") dated as of July 4, 2023, among American Equity Investment Life Holding Company, an Iowa corporation (the "Company"), and each party listed on Schedule A hereto (each, a "Stockholder" and, collectively, the "Stockholders"). The Company and Stockholders are each referred to in this Agreement as a "party" and collectively as the "parties".

WHEREAS, simultaneously with the execution and delivery of this Agreement, the Company, Brookfield Reinsurance Ltd., a Bermuda exempted company limited by shares ("Parent"), Arches Merger Sub Inc., an Iowa corporation and wholly owned subsidiary of Parent, and, solely for the limited purposes set for therein, Brookfield Asset Management Ltd., a company incorporated under the laws of the Province of British Columbia, have entered into an Agreement and Plan of Merger dated as of the date hereof (the "Merger Agreement"; capitalized terms used but not defined herein shall have the meanings set forth in the Merger Agreement);

WHEREAS, each Stockholder owns the number of shares of Common Stock set forth opposite its name on Schedule A hereto (such shares of Common Stock, together with any other shares of Common Stock acquired by such Stockholder after the date hereof and during the term of this Agreement, being collectively referred to herein as the "Subject Shares" of such Stockholder); and

WHEREAS, as a condition to its willingness to enter into the Merger Agreement, the Company has requested that each Stockholder enter into this Agreement.

NOW, THEREFORE, the parties, intending to be legally bound, agree as follows:

SECTION 1. *Representations and Warranties of Each Stockholder*. Each Stockholder hereby, severally and not jointly, represents and warrants to the Company as of the date hereof in respect of itself as follows:

(a) Authority; Execution and Delivery; Enforceability. The Stockholder has all requisite power and authority to execute and deliver this Agreement, to perform its obligations hereunder and to consummate the transactions contemplated hereby. The execution and delivery by the Stockholder of this Agreement, the performance by it of its obligations hereunder and the consummation by it of the transactions contemplated hereby have been duly authorized by all necessary action on the part of such Stockholder. The Stockholder has duly executed and delivered this Agreement, and, assuming this Agreement constitutes a valid and binding obligation of the Company, this Agreement constitutes a legal, valid and binding obligation of the Stockholder, enforceable against it in accordance with its terms, except, in each case, as enforcement may be limited by bankruptcy, insolvency, reorganization or similar Laws affecting creditors' rights generally and by general principles of equity.

(b) No Conflicts; Consents.

(i) The execution and delivery by the Stockholder of this Agreement and the performance by it of its obligations hereunder do not, and the consummation by it of the transactions contemplated hereby and compliance with the terms hereof will not, (A) conflict with, or result in any violation of any provision of, the organizational documents of such Stockholder, (B) conflict with, or result in any violation of or default (with or without notice or lapse of time, or both) under, or give rise to a right of termination, cancelation or acceleration of any obligation or to loss of a material benefit under, or to increased, additional, accelerated or guaranteed rights or entitlements of any person under, or result in the creation of any Lien upon any of the properties or assets of such Stockholder under, any provision of any material Contract to which such Stockholder is a party or by which any of its properties or assets is bound (other than any Contract to which the Company or any Subsidiary of the Company is a party or by which any of their respective properties or assets is bound) or (C) conflict with, or result in any violation of any provision of, subject to the filings and other matters referred to in Section 1(b)(ii), any judgments, decrees and orders of Governmental Authorities or Law, in each case applicable to such Stockholder or its properties or assets, other than, in the case of clauses (B) and (C) above, any such items that, individually or in the aggregate, would not reasonably be expected to prevent or materially impair the ability of the Stockholder to perform its obligations hereunder or to consummate the transactions contemplated hereby.

(ii) No Consent of or from, or registration, declaration, notice or filing with or made to, any Governmental Authority, or the expiry of any related waiting period, is required to be obtained or made by or with respect to the Stockholder in connection with the execution, delivery and performance by the Stockholder of this Agreement or the consummation by it of the transactions contemplated hereby, other than (A) the filing with the SEC of such reports under Section 13 and Section 16 of the Exchange Act as may be required in connection with this Agreement, the Merger Agreement and the transactions contemplated hereby and thereby, (B) any filings or Consents contemplated by the Merger Agreement and (C) such other items that the failure of which to obtain or make, individually or in the aggregate, would not reasonably be expected to prevent or materially impair the ability of the Stockholder to perform its obligations hereunder or to consummate the transactions contemplated hereby.

(c) The Subject Shares. The Stockholder is the record and beneficial owner of, and has good and valid title to, the Subject Shares, free and clear of any Liens. As of the date hereof, the Stockholder does not own, of record or beneficially, any shares of capital stock of the Company other than the Subject Shares set forth opposite its name on Schedule A attached hereto. None of the Stockholder's Subject Shares is subject to any voting trust or other agreement, arrangement or restriction with respect to the voting or the transfer of such Stockholder's Subject Shares, except as set forth in this Agreement, the organizational documents of the Company or the Investment Agreement, dated October 17, 2020, by and among the Company, Brookfield Corporation (formerly, Brookfield Asset Management Inc.), and the Stockholders (as successors and assigns of Burgundy Acquisitions I Ltd.) (as amended, restated or otherwise modified from time to time, the "Investment Agreement").

SECTION 2. *Representations and Warranties of the Company*. The Company hereby represents and warrants to each Stockholder as follows:

(a) Authority; Execution and Delivery; Enforceability. The Company has all requisite corporate power and authority to execute and deliver this Agreement, to perform its obligations hereunder and to consummate the transactions contemplated hereby. The execution and delivery by the Company of this Agreement, the performance by it of its obligations hereunder and the consummation by it of the transactions contemplated hereby have been duly authorized by all necessary corporate action on the part of the Company. The Company has duly executed and delivered this Agreement, and, assuming this Agreement constitutes a valid and binding obligation of the Stockholders, this Agreement constitutes a legal, valid and binding obligation of the Company, enforceable against it in accordance with its terms, except, in each case, as enforcement may be limited by bankruptcy, insolvency, reorganization or similar Laws affecting creditors' rights generally and by general principles of equity.

(b) No Conflicts; Consents.

(i) The execution and delivery by the Company of this Agreement and the performance by it of its obligations hereunder do not, and the consummation by it of the transactions contemplated hereby and compliance with the terms hereof will not, (A) conflict with, or result in any violation of any provision of, the Company Charter or the Company Bylaws, (B) conflict with, or result in any violation of or default (with or without notice or lapse of time, or both) under, or give rise to a right of termination, cancelation or acceleration of any obligation or to loss of a material benefit under, or to increased, additional, accelerated or guaranteed rights or entitlements of any person under, or result in the creation of any Lien upon any of the properties or assets of the Company or any Subsidiary of the Company under, any provision of any material Contract to which the Company or any Subsidiary of the Company is a party or by which any of their properties or assets are bound (other than any Contract to which either Stockholder is a party or by which any of their respective properties or assets are bound) or (C) conflict with, or result in any violation of any provision of, subject to the filings and other matters referred to in Section 2(b)(ii), any judgments, decrees and orders of Governmental Authorities or Law, in each case applicable to the Company or any Company Subsidiary or their respective properties or assets, other than, in the case of clauses (B) and (C) above, any such items that, individually or in the aggregate, would not reasonably be expected to prevent or materially impair the ability of the Company to perform its obligations hereunder or to consummate the transactions contemplated hereby.

(ii) No Consent of or from, or registration, declaration, notice or filing with or made to, any Governmental Authority, or the expiry of any related waiting period, is required to be obtained or made by or with respect to the Company in connection with the execution, delivery and performance by it of this Agreement or the consummation by it of the transactions contemplated hereby other than (A) the filing with the SEC of (1) the Proxy Statement and (2) such reports under Section 13 and Section 16 of the Exchange Act as may be required in connection with this Agreement, the Merger Agreement and the transactions contemplated hereby and thereby, (B) any filings or Consents contemplated by the Merger Agreement and (C) such other items that the failure of which to obtain or make, individually or in the aggregate, would not reasonably be expected to prevent or materially impair the ability of the Company to perform its obligations hereunder or to consummate the transactions contemplated hereby.

SECTION 3. *Covenants of Each Stockholder.* Unless this Agreement is terminated in accordance with its terms, each Stockholder, severally and not jointly, covenants and agrees as follows:

(a) At any meeting of the shareholders of the Company called to seek the Required Shareholder Approval or at any adjournment thereof or in any other circumstances upon which a vote, consent or other approval (including by written consent) with respect to the Merger Agreement or the Merger is sought, the Stockholder shall, including by executing a written consent solicitation if requested by the Company, cause its Subject Shares to be present in person or by proxy for purposes of constituting a quorum and vote (or cause to be voted) the Subject Shares of the Stockholder in favor of granting the Required Shareholder Approval.

(b) At any meeting of stockholders of the Company or at any adjournment thereof or in any other circumstances upon which the Stockholder's vote, consent or other approval (including by written consent) is sought, the Stockholder shall cause its Subject Shares to be present in person or by proxy for purposes of constituting a quorum and vote (or cause to be voted) the Subject Shares against (i) any Takeover Proposal and (ii) any amendment of the Company Charter or the Company Bylaws or other proposal or transaction involving the Company or any Subsidiary of the Company, which amendment or other proposal or transaction would in any manner impede, frustrate, prevent or nullify any provision of the Merger Agreement or the Merger. The Stockholder shall not commit or agree to take any action inconsistent with the foregoing.

(c) Other than this Agreement, the Stockholder shall not (i) sell, transfer, pledge, assign or otherwise dispose of (including by gift) (collectively, "Transfer"), or enter into any Contract, option or other arrangement (including any profit-sharing arrangement) with respect to the Transfer of, any Subject Shares to any person other than pursuant to the Transactions, unless prior to any such Transfer the transferee of such Stockholder's Subject Shares is a party to this Agreement, enters into a voting agreement with the Company on terms substantially identical to the terms of this Agreement or agrees to become a party to this Agreement pursuant to a customary joinder agreement, or (ii) enter into any voting arrangement, whether by proxy, voting agreement or otherwise, with respect to any Subject Shares and shall not commit or agree to take any of the foregoing actions.

SECTION 4. *Waiver.*

(a) The Company hereby waives compliance by the Stockholders with the terms and conditions of:

(i) Section 7.4 of the Investment Agreement to the extent that such terms and conditions would require the Stockholders to dispose of any Common Stock;

(ii) Section 7.5 of the Investment Agreement to the extent necessary to permit Parent to exercise its rights pursuant to Section 7.03 of the Merger Agreement; and

(iii) Section 7.7 of the Investment Agreement, solely in order for the Stockholders to comply with their obligations set forth in Sections 3(a) and 3(b) and to the extent that such terms and conditions would require the Stockholders to vote any of the Subject Shares in the same proportion as the unaffiliated shareholders of the Company with respect to vote any matter described in Sections 3(a) and 3(b).

(b) The waivers in Sections 4(a) shall expire upon the termination of the Merger Agreement in accordance with its terms.

SECTION 5. *Termination.* This Agreement shall terminate, other than with respect to the liability of any party for breach hereof prior to such termination, upon the earliest of: (a) the Effective Time; (b) the termination of the Merger Agreement in accordance with its terms; (c) at any time prior to the time, but not after, the Required Shareholder Approvals are obtained, if the Company Board, or any committee thereof has made an Adverse Recommendation Change; and (d) the termination of this Agreement by the mutual written consent of the parties.

SECTION 6. *Additional Matters.* Each Stockholder shall, from time to time, execute and deliver, or cause to be executed and delivered, such additional or further consents, documents and other instruments as the Company may reasonably require for the purpose of effectively carrying out the transactions contemplated by this Agreement.

SECTION 7. *General Provisions*.

(a) Amendment. This Agreement may not be amended except by an instrument in writing signed on behalf of each of the parties.

(b) Notices. All notices, requests and other communications to any party hereunder shall be in writing and shall be deemed given if delivered personally, emailed or sent by overnight courier (providing proof of delivery) to the parties at the following addresses

(i) if to any Stockholder, to:

or such other address or email address as such party may hereafter specify by like notice to the other parties. All such notices, requests and other communications shall be deemed received on the date of actual receipt by the recipient thereof if received prior to 5:00 p.m. local time in the place of receipt and such day is a business day in the place of receipt. Otherwise, any such notice, request or communication shall be deemed not to have been received until the next succeeding business day in the place of receipt.

(c) Interpretation. When a reference is made in this Agreement to an Article, Section or subsection, such reference shall be to an Article, Section or subsection to this Agreement unless otherwise indicated. The headings contained in this Agreement are for reference purposes only and shall not affect in any way the meaning or interpretation of this Agreement. Whenever the words "include", "includes" or "including" are used in this Agreement, they shall be deemed to be followed by the words "without limitation". The words "hereof", "herein", "hereto" and "hereunder" and words of similar import when used in this Agreement shall refer to this Agreement as a whole and not to any particular provision of this Agreement. The term "or" is not exclusive. The word "extent" in the phrase "to the extent" shall mean the degree to which a subject or other thing extends, and such phrase shall not mean simply "if". The definitions contained in this Agreement are applicable to the singular as well as the plural forms of such terms. Any agreement, instrument or Law defined or referred to herein or in any agreement or instrument that is referred to herein means such agreement, instrument or Law as from time to time amended, modified or supplemented, unless otherwise specifically indicated. References to a person are also to its permitted successors and assigns. Each of the parties has participated in the drafting and negotiation of this Agreement. If an ambiguity or question of intent or interpretation arises, this Agreement must be construed as if it is drafted by all of the parties, and no presumption or burden of proof will arise favoring or disfavoring any party by virtue of authorship of any of the provisions of this Agreement.

(d) Severability. If any term, condition or other provision of this Agreement is finally determined by a court of competent jurisdiction to be invalid, illegal or incapable of being enforced by any applicable Law or public policy, all other terms, provisions and conditions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any party. Upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible to the fullest extent permitted by applicable Law in an acceptable manner to the end that the transactions contemplated hereby are fulfilled to the extent possible.

(e) Counterparts. This Agreement may be executed in one or more counterparts (including by electronic mail), each of which shall be deemed to be an original but all of which taken together shall constitute one and the same agreement, and shall become effective when one or more counterparts have been signed by each of the parties and delivered to the other parties.

(f) Entire Agreement; No Third-Party Beneficiaries. This Agreement (i) constitutes the entire agreement and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter hereof and (ii) is not intended to confer upon any person (including any shareholder of any party) other than the parties any rights or remedies.

(g) Governing Law; Consent to Jurisdiction.

(i) This Agreement shall be governed by, and construed in accordance with, the Laws of the State of Iowa applicable to contracts executed in and to be performed entirely within that state, regardless of the laws that might otherwise govern under any applicable conflict of laws principles.

(ii) All Actions arising out of or relating to the interpretation and enforcement of the provisions of this Agreement and in respect of the Transactions shall be heard and determined in the Iowa District Court for Polk County, or, if the Iowa District Court declines to accept jurisdiction over a particular matter, any federal court within the State of Iowa, or, if both the Iowa District Court and the federal courts within the State of Iowa decline to accept jurisdiction over a particular matter, any other state court within the State of Iowa, and, in each case, any appellate court therefrom. The parties hereby irrevocably submit to the exclusive jurisdiction and venue of such courts in any such Actions and irrevocably waive the defense of an inconvenient forum or lack of jurisdiction to the maintenance of any such Action. The consents to jurisdiction and venue set forth in this Section 7(g)(ii) shall not constitute general consents to service of process in the State of Iowa and shall have no effect for any purpose except as provided in this paragraph and shall not be deemed to confer rights on any Person other than the parties. Each party agrees that service of process upon such party in any Action arising out of or relating to this Agreement shall be effective if notice is given by overnight courier at the address set forth in Section 7(b). The parties agree that a final judgment in any such Action shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by applicable Law; provided, however, that nothing contained in the foregoing shall restrict any party's rights to seek any post-judgment relief regarding, or any appeal from, a final trial court judgment.

(h) Assignment. Neither this Agreement nor any of the rights, interests or obligations hereunder shall be assigned, in whole or in part, by operation of Law or otherwise, by any of the parties without the prior written consent of the other parties. No assignment by any party shall relieve such party of any of its obligations hereunder. Subject to the immediately preceding two sentences, this Agreement shall be binding upon, inure to the benefit of, and be enforceable by, the parties and their respective successors and permitted assigns. Any purported assignment not permitted under this Section 7(h) shall be null and void.

(i) Enforcement. This Agreement is intended to be a voting agreement under Section 490.731 of the Iowa Business Corporations Act ("IBCA") and shall be specifically enforceable as provided in the IBCA. The parties agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached, and that monetary damages, even if available, would not be an adequate remedy therefor. It is accordingly agreed that, prior to the termination of this Agreement pursuant to Section 5, the parties shall be entitled to an injunction or injunctions to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement, without proof of actual damages (and each party hereby waives any requirement for the securing or posting of any bond in connection with such remedy), this being in addition to any other remedy to which they are entitled at law or in equity. The parties further agree not to assert that a remedy of specific performance is unenforceable, invalid, contrary to Law or inequitable for any reason, nor to assert that a remedy of monetary damages would provide an adequate remedy for any such breach.

(j) Waiver of Jury Trial. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES, AND THEREFORE IT HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS AGREEMENT OR ANY OF THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER, (B) IT UNDERSTANDS AND HAS CONSIDERED THE IMPLICATIONS OF SUCH WAIVER, (C) IT MAKES SUCH WAIVER VOLUNTARILY AND (D) IT HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVER AND CERTIFICATIONS IN THIS SECTION 7(J).

for the Years-Ended December 31, 2022, 2021 and 2020

Brookfield

2022

ANNUAL REPORT

Brookfield Reinsurance Ltd.

COMBINED CONSOLIDATED FINANCIAL STATEMENTS OF BROOKFIELD REINSURANCE LTD. AS AT DECEMBER 31, 2022 AND 2021, AND FOR THE YEARS ENDED DECEMBER 31, 2022, 2021 AND 2020

INDEX

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Brookfield Reinsurance Ltd.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Brookfield Reinsurance Ltd. and subsidiaries (the "Company") as of December 31, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the combined consolidated financial statements as of and for the year ended December 31, 2022, of the Company and our report dated March 31, 2023, expressed an unqualified opinion on those financial statements.

As described in Management's Annual Report on Internal Control over Financial Reporting, management excluded from its assessment the internal control over financial reporting at American National Group, LLC, which was acquired on May 25, 2022, and whose financial statements constitute 68% of total assets, 44% of revenues, and 56% of net income of the combined consolidated financial statement amounts as of and for the year ended December 31, 2022. Accordingly, our audit did not include the internal control over financial reporting at American National Group, LLC.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

March 31, 2023

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Brookfield Reinsurance Ltd.

Opinion on the Financial Statements

We have audited the accompanying combined consolidated statements of financial position of Brookfield Reinsurance Ltd. and subsidiaries (the "Company") as of December 31, 2022 and 2021, the related combined consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows, for each of the three years in the period ended December 31, 2022, and the related notes, and the schedule of the Condensed Financial Statements of Brookfield Reinsurance Ltd. (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2022, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 31, 2023, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

American National Insurance Company Acquisition – Future policy benefits – Refer to Notes 2 and 3 to the financial statements

Critical Audit Matter Description

The Company acquired 100% of the equity of American National Insurance Company ("American National") and recognized an estimate of the initial fair value of net assets acquired, including future policy benefits. The estimate of the assumed future policy benefits required the use of complex valuation models using best estimate assumptions.

While there were a number of estimates and assumptions required to determine the initial fair value of the future policy benefits, the assumptions with the greatest estimation uncertainty are those related to discount rates, net to gross premium ratio and mortality assumptions. Auditing of certain valuation models and assumptions required a high degree of auditor judgment and an increased extent of audit effort, including the need to involve actuarial specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related the valuation models and assumptions related to discount rates, net to gross premium ratio and mortality as it relates to the assumed future policy benefits included the following, among others:

- With the assistance of actuarial specialists, tested the reasonableness of valuation assumptions, by:
  - Evaluating whether management's assumptions were determined in accordance with actuarial principles and practices;
  - Testing the inputs used in the determination of discount rates, net to gross premium and mortality assumptions, including an assessment of the use of experience studies, and considering industry and other external sources of data, where applicable;
  - Analyzing management's interpretation and judgments based on the relative inputs, considering reasonable possible alternative assumptions, and considering industry and other external sources of data, where applicable.
- With the assistance of actuarial specialists, tested the appropriateness of valuation methodologies used in the estimation process by:
  - Testing the accuracy of the actuarial models for implementation of key assumptions and valuation methodology;
  - Evaluating a sample of underlying insurance contracts to assess that the appropriate actuarial models were selected and key assumptions were incorporated in those actuarial models; and,
  - Calculating an independent estimate of the insurance contract liability for a sample of insurance policies and comparing the results to the Company's results.

Future Policy Benefits — Refer to Notes 2(aa) and 13 to the financial statements

Critical Audit Matter Description

The Company has significant future policy benefits representing the majority of its total liabilities. The Company uses different actuarial methodologies to determine future policy benefits depending on the nature of the underlying contract products and applicable jurisdictional guidance, as is permitted by IFRS 4, Insurance Contracts, some of which involve high levels of complexity.

While there are many assumptions which management makes to determine future policy benefits, excluding businesses acquired in the year, the assumptions with the greatest uncertainty are those related to mortality and surrender, lapse and withdrawal rates (collectively "policyholder behaviour"). These assumptions required subjective and complex auditor judgment in certain circumstances, including where (i) there is limited Company and industry experience data, (ii) the historical experience may not be a good indicator of the future, and (iii) the policyholder behaviour may be irrational. Auditing of certain valuation methodologies and assumptions required a high degree of auditor judgment and an increased extent of audit effort, including the need to involve actuarial specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to valuation methodologies and assumptions related to mortality and policyholder behaviour included the following, among others:

- With the assistance of actuarial specialists, tested the reasonableness of mortality and policyholder behaviour assumptions, by:
    - Evaluating management's methods and assumptions in accordance with applicable actuarial principles and practices under actuarial standards of practice;
    - Testing inputs used in the determination of the mortality and policyholder behaviour assumptions; and,
    - Analyzing management's methods and interpretation of data used to adjust industry tables, applying industry guidance, evaluating triggers and drivers for revisions of assumptions, assessing reasonably possible alternative assumptions, and considering industry and other external sources of data, where applicable.
- With the assistance of actuarial specialists, tested the appropriateness of valuation methodologies used in the estimation process by:
    - Testing the accuracy of the actuarial models for implementation of key assumptions and valuation methodology;
    - Evaluating a sample of underlying insurance contracts to assess that the appropriate actuarial models were selected and key assumptions were incorporated in those actuarial models; and,
    - Calculating an independent estimate of the insurance contract liability for a sample of insurance policies and comparing the results to the Company's results.

NOTE 1. ORGANIZATION AND DESCRIPTION OF THE COMPANY

(a) Brookfield Reinsurance Ltd.

Brookfield Reinsurance Ltd. (“Brookfield Reinsurance” or the “Company”) is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The company’s class A exchangeable shares are listed on the New York Stock Exchange (NYSE) and the Toronto Stock Exchange (TSX) under the symbol "BNRE". In December 2022, the company changed its name from Brookfield Asset Management Reinsurance Partners Ltd. to Brookfield Reinsurance Ltd. and changed its trading symbol from "BAMR" to "BNRE". The company’s operations are located primarily in Bermuda, the United States, Canada, and the Cayman Islands. The company’s registered head office is Ideation House, 1st Floor, 94 Pitts Bay Road, Pembroke, HM08, Bermuda.

The company holds a direct 100% ownership interest in BAM Re Holdings Ltd. (“BAM Re Holdings”), which holds the company’s interest in its operating subsidiaries North End Re Ltd. (“NER Ltd.”), North End Re (Cayman) SPC ("NER SPC"), Brookfield Annuity Company ("BAC") and American National Insurance Group, LLC (“American National”).

The company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, the company offers a broad range of insurance products including life insurance and annuities, and personal and commercial property and casualty insurance. The business is presently conducted through our subsidiaries under three operating segments: Reinsurance, Pension Risk Transfer ("PRT") and Direct Insurance.

(b) Spin-off of Brookfield Reinsurance Ltd.

On June 28, 2021, Brookfield Corporation (“Brookfield”), formerly Brookfield Asset Management Inc., completed the spin-off of the company (the “Spin-off”), which was affected by way of a special dividend of the class A exchangeable limited voting shares (“class A exchangeable shares”) of the company to holders of Brookfield Class A limited voting shares (“Brookfield Class A Shares”) and Class B limited voting shares (“Brookfield Class B Shares”) as of June 18, 2021 (the “record date”). Pursuant to the special dividend, as of the record date, holders of Brookfield Class A Shares and Class B Shares received one class A exchangeable share for every 145 Brookfield Class A Shares or Class B Shares held. Brookfield holds all the class C non-voting shares (“class C shares”), giving it the residual economic interest in the company, but no voting interest in it.

Prior to the Spin-off, Brookfield effected a reorganization so that the company’s PRT business (the “Business”) and other investments that were historically owned and operated by Brookfield, through its operating entities, were acquired by BAM Re Holdings, a subsidiary of the company.

The following describes the transactions and agreements resulting from the Spin-off:

(i) Class A exchangeable shares

As part of the Spin-off, Brookfield subscribed for 11 million class A exchangeable shares for approximately $538 million in cash. Upon Spin-off, Brookfield distributed the 11 million class A exchangeable shares as a special dividend to the Brookfield shareholders who hold Brookfield Class A Shares and Brookfield Class B Shares.

(ii) Class B shares

As part of the Spin-off, holders of class B shares (“Brookfield Reinsurance Class B Partners”), through a voting trust, subscribed for 24,000 class B shares for $1 million.

(iii) Class C shares

As part of the Spin-off, Brookfield transferred its ownership in the Business along with its holdings of American Equity Investment Life Holding Company ("AEL Holdings") common shares and additional cash for working capital purposes to the company. The total value of the consideration provided to the company was approximately $712 million, which was exchanged for 17 million class C shares. In October 2021, the company issued an additional 7 million class C shares to Brookfield for consideration of $250 million. In May 2022, the company issued an additional 11 million class C shares to Brookfield for consideration of $450 million. As at December 31, 2022, there were 41 million class C shares outstanding (December 31, 2021 - 24 million). Brookfield owns all the issued and outstanding class C shares.

(iv) Equity Commitment

As part of the Spin-off, Brookfield provided to the company an equity commitment in the amount of $2.0 billion to fund future growth, which the company may draw on from time to time. The equity commitment may be called by the company in exchange for the issuance of a number of class C shares or junior preferred shares. Further details of the equity commitment are described in Note 23.

(v) Credit Agreement

As part of the Spin-off, the company entered into a credit agreement with Brookfield (the "Brookfield Credit Agreement") as lender on June 28, 2021, providing for a three-year revolving $200 million credit facility. On March 9, 2022, the revolving credit facility agreement was increased to $400 million. Further details of the Brookfield Credit Agreement are described in Note 23.

(vi) Support Agreement

As part of the Spin-off, the company entered into a support agreement with Brookfield (the "Support Agreement"). Brookfield has agreed to support the economic equivalence of the class A exchangeable shares and Brookfield Class A Shares for so long as class A exchangeable shares not owned by Brookfield are outstanding, and there has not been an amendment to the exchange feature by agreeing to, among other things, take all actions reasonably necessary to enable the company to pay quarterly distributions, the liquidation amount, or the amount payable on a redemption of class A exchangeable shares, as the case may be. Further details of the Support Agreement are described in Note 23.

(vii) Rights Agreement

As part of the Spin-off, the company entered into a rights agreement with Brookfield (the "Rights Agreement"), pursuant to which Brookfield has agreed that on the applicable specified exchange date with respect to any class A exchangeable shares submitted for exchange, Brookfield will satisfy, or cause to be satisfied, the obligations pursuant to our memorandum of association and by-laws to exchange such subject class A exchangeable shares for Brookfield Class A Shares or its cash equivalent plus any unpaid distributions. Further details of the Rights Agreement are described in Note 23.

(viii) Administration Agreement

As part of the Spin-off, the company entered into an administration agreement with Brookfield (the "Administration Agreement"), pursuant to which Brookfield has agreed to provide administrative services to the company, including the services of our Chief Executive Officer and Chief Investment Officer and certain other administrative services, on a cost-recovery basis. On August 5, 2022, the Administration Agreement was amended to include providing the services of the Chief Financial Officer. Further details of the Administration Agreement are described in Note 23.

(ix) Investment Management Agreement

As part of the Spin-off, the company entered into one or more Investment Management Agreements appointing Brookfield as the investment manager of certain assets and accounts, including assets backing the liabilities assumed by the company under the insurance and future reinsurance arrangements, and any assets held as surplus. Further details of the Brookfield Investment Management Agreements are described in Note 23.

(x) Licensing Agreement

As part of the Spin-off, the company entered into a licensing agreement with Brookfield (the "Brookfield Licensing Agreement"), pursuant to which Brookfield has granted a non-exclusive, royalty-free sub-license to use the name "Brookfield" and the Brookfield logo. Further details of the Brookfield Licensing Agreement are described in Note 23.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of Compliance

These Combined Consolidated Financial Statements ("financial statements") have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS"). The financial statements are prepared on a going concern basis and have been presented in U.S. dollars ("USD") rounded to the nearest million unless otherwise indicated.

The financial statements were authorized for issue by the Board of Directors of the company on March 31, 2023.

(b) Basis of Consolidation

The financial statements include the accounts of the company and its consolidated subsidiaries, which are the entities over which the company has control. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Certain comparative amounts have been reclassified to be consistent with the current year's presentation.

(c) Continuity of Interest

As described above, Brookfield Reinsurance was established on December 10, 2020 by Brookfield and on June 28, 2021 Brookfield completed the spin-off of the Business to the company and the special dividend declaration to holders of Brookfield's Class A and B Shares. Brookfield controlled the Business prior to the Spin-off and has significant influence over the company subsequent to the spin-off through its interests in the company. The Business was transferred before spin-off, as part of the reorganization, and therefore the transactions were common control transactions. In accordance with the company's and Brookfield's accounting policy, the company has reflected the Business in its financial position and results of operations using Brookfield's carrying values prior to the spin-off.

In addition, certain investments were transferred as part of the reorganization. These are treated as asset acquisitions and are also considered common control transactions. The company's accounting policy is to record the common control asset acquisitions on the date of occurrence at the historical carrying value, with any gain or loss against the consideration paid being recorded in equity. To reflect this continuity of interest, these financial statements provide comparative information of the Business for the periods prior to the spin-off, as previously reported by Brookfield. The economic and accounting impact of contractual relationships created or modified in conjunction with the spin-off have been reflected prospectively from the date of the spin-off and have not been reflected in the results of operations or financial position of the company prior to June 28, 2021, as such items were in fact not created or modified prior thereto. Accordingly, the financial information for the periods prior to June 28, 2021 is presented based on the historical financial information for the Business as previously reported by Brookfield. For the period after completion of the Spin-off, the results are based on the actual results of the company, including the adjustments associated with the spin-off and the execution of several agreements (see Note 23). Therefore, net income (loss) and comprehensive income (loss) not attributable to interests of others in operating subsidiaries has been allocated to Brookfield prior to June 28, 2021 and allocated to the shareholders of class A exchangeable shares, class B shares and class C shares on and after June 28, 2021.

(d) Class A exchangeable shares

As described in Note 1 (b)(i), the company's equity interests include the class A exchangeable shares held by public shareholders. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Each class A exchangeable share is structured with the intention of providing an economic return equivalent to one Brookfield Class A Share (subject to adjustment to reflect certain capital events). Each class A exchangeable share is exchangeable with Brookfield at the option of the holder for one Brookfield Class A Share (subject to adjustment to reflect certain capital events) or its cash equivalent (the form of payment to be determined at the discretion of Brookfield), plus unpaid distributions. Brookfield currently intends to satisfy any exchange requests on the class A exchangeable shares through the delivery of Brookfield Class A Shares rather than cash. Each class A exchangeable share, held on the record date, has voting rights and is entitled to cast one vote at a meeting of shareholders of the company.

The class A exchangeable shares are classified as equity instruments. The class A exchangeable shares are issued capital of the company and as a result are not adjusted for changes in market value.

(e) Class B shares

As described in Note 1 (b)(ii), the company's equity interests include the class B shares held by Brookfield Reinsurance Class B Partners. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Distributions on the class B shares will be paid, or in the case of a distribution made pursuant to a capital reduction, will be returned, in each case, at the same time and in the same amount per share as dividends on a Brookfield Class A Shares. The Brookfield Reinsurance Class B Partners are entitled to one vote on any matter and can cast one vote for each class B share held at the record date.

The class B shares are classified as equity instruments. The class B shares are issued capital of the company and as a result are not adjusted for changes in market value.

(f) Class C shares

As described in Note 1 (b)(iii), the company's equity interests include the class C shares held by Brookfield. The class C shares are non-voting shares that are entitled to the residual economic interest in the company after payment in full of the amount due to holders of our class A exchangeable shares and our class B shares and subject to the prior rights of holders of the Preferred Shares.

The class C shares are classified as equity instruments. The class C shares are issued capital of the company and as a result are not adjusted for changes in market value.

(g) Preferred shares

On May 25, 2022, the company issued 98,351,547 Class A Junior Preferred Shares, Series 1 ("preferred shares"), to Brookfield, for proceeds of $2.5 billion. Each preferred share is non-voting and is redeemable at $25 per share. On December 9, 2022, Brookfield Reinsurance issued 2,108,733 Class A Junior Preferred Shares, Series 2 ("preferred shares") for $53 million to Brookfield. Each of these preferred shares is redeemable, together with any accrued and unpaid dividends, at the option of the issuer, subject to certain restrictions. Further, these preferred shares entitle the holders thereof to a fixed cumulative 4.5% preferential cash dividend payable annually as and when declared by the issuer's board of directors. At December 31, 2022, there was $67 million of accrued dividends (December 31, 2021 - $Nil).

The Class A Junior Preferred Shares are retractable by the holder, at par value together with an amount equal to all dividends accrued and unpaid, on demand, at any point on or after seventh anniversary of the date of issue. The preferred shares are recognized as liability due to the redemption nature on the Combined Consolidated Statements of Financial Position ("Statements of Financial Position") and are classified as amortized cost. The dividends are recognized as interest expense on the Combined Consolidated Statements of Operations ("Statements of Operations").

(h) Business Combinations

Business combinations are accounted for using the acquisition method. The cost of a business acquisition is measured at the aggregate of the fair values at the date of exchange of assets given, liabilities incurred or assumed, and equity instruments issued in exchange for control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at their fair values at the acquisition date. The interest of non-controlling shareholders in the acquiree, if applicable, is initially measured at the non-controlling shareholders' proportion of the net fair value of the identifiable assets, liabilities and contingent liabilities recognized.

To the extent the fair value of consideration paid exceeds the fair value of the net identifiable tangible and intangible assets, the excess is recorded as goodwill. To the extent the fair value of consideration paid is less than the fair value of net identifiable tangible and intangible assets, the excess is recognized in net income.

Transaction costs are recorded as operating expenses on the Statements of Operations.

(i) Cash and cash equivalents

Cash and cash equivalents include cash, demand deposits and short-term investments with original maturities of 90 days or less. The company classifies cash and cash equivalents at amortized cost.

Cash and cash equivalents exclude cash balances, demand deposits and short term investments that are for use by the company as part of the reinsurance funds withheld arrangement (Note 2(m)).

(j) Short term investments

Short term investments are primarily term deposit and commercial paper with original maturities of over 90 days and less than one year.

(k) Investments

Investments are financial assets which are comprised of debt securities, equity securities and loans and receivables. The company uses settlement date to account for private investment transactions and trade date to account for other investment transactions.

Financial assets are classified into one of the following categories:

- Available for sale ("AFS") assets are measured at fair value, with changes in fair value recognized in other comprehensive income (loss);
- Fair value through profit or loss ("FVTPL") assets are measured at fair value, with changes in fair value recognized in net income (loss); and
- Loans and receivables are measured at amortized cost.

Financial assets supporting future policy benefits within our PRT business are classified as loans and receivables or designated as FVTPL. Financial assets supporting modified coinsurance reserves within reinsurance treaties are designated as FVTPL. Any changes in the fair value of the underlying assets matched to the future policy benefits are directly reflected in the future policy benefits. Unless the asset is deemed to be impaired, changes in the fair value of assets matching these liabilities and changes in the corresponding future policy benefits are directly recognized in the Statements of Operations in order to avoid a mismatch that would otherwise arise. Transaction costs related to FVTPL investments are recognized within net investment income on the Statements of Operations as incurred.

Loans and receivables are measured at amortized cost using the effective interest method, less any applicable provision for impairment. Transaction costs and certain fees the company receives related to loans and receivables are capitalized as a part of the carrying value at initial recognition.

Financial assets are classified according to their nature and use by the company at the time of initial recognition. The remaining financial assets other than FVTPL and loans and receivables are classified as AFS. Unrealized gains (losses) are recognized in other comprehensive income. Upon realization, gains or losses are reclassified to the Statements of Operations and recorded in net investment income. Transaction costs related to AFS investments are capitalized as a part of the carrying value at initial recognition.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the company has transferred substantially all the risks and rewards of ownership.

Any gain or loss arising on derecognition is recognized directly in net income and presented in realized gains (losses) on investments within net investment income.

(l) Derivative financial instruments and hedge accounting

The company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, cross currency swaps, interest rate swaps, equity-indexed options and bond futures. Derivative financial instruments are classified as held for trading which are measured as FVTPL investments. Derivative financial instruments are recorded at fair value on acquisition date and subsequently revalued at fair value at each reporting date. Derivative financial instruments with positive values are recorded as derivative assets and negative fair values are reported as derivative liabilities. Changes in the fair value of derivatives are recorded in net investment income in the Statements of Operations.

Hedge accounting is applied when the derivative is designated as a hedge of a specific exposure and there is assurance that it will continue to be effective as a hedge based on an expectation of offsetting fair values. Hedge accounting is discontinued prospectively when the derivative no longer qualifies as a hedge or the hedging relationship is terminated. For those derivatives which qualify and have been designated as fair value hedges, net income includes the changes in the fair value of both the derivative instrument and the hedged risk. The hedged item carrying amount shall be adjusted for the gain or loss.

In some instances, the company holds collateral to offset exposure from its counterparties relating to its derivative instruments. Collateral that supports credit risk is reported in the Statements of Financial Position as an offset to other invested assets with an associated payable to other liabilities for excess collateral.

Derivatives embedded in reinsurance contracts which are not closely related to the host contract are separated and measured at fair value in the Statements of Financial Position. Changes in the fair value are included in the net investment results from funds withheld in the Statements of Operations.

(m) Reinsurance funds withheld

Reinsurance funds withheld is a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which NER Ltd. and NER SPC, indirect wholly owned subsidiaries of the company, act as reinsurers. The receivable represents assets that are held in custodial accounts that are legally segregated from the third-party ceding companies' general accounts and are managed by NER Ltd. and NER SPC. The assets are typically cash and cash equivalents and fixed income asset types. In the event of ceding companies' insolvency, NER Ltd. and NER SPC would need to assert a claim on the assets supporting the reserve liabilities. However, NER Ltd. and NER SPC have the ability to offset amounts owed to the ceding companies. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets, in a fashion similar to the invested assets held directly by NER Ltd. and NER SPC. The underlying agreements contain embedded derivatives as discussed in Derivative financial instruments (Note 2(l)).

(n) Investment in associates, joint ventures and other limited partnership interests

Associates are entities over which the company exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but without control or joint control over those policies. Joint ventures are joint arrangements whereby the parties that have joint control of the arrangement have the rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control over an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Other limited partnership interests are partnership arrangements in which the company has the ability to exercise significant influence over the investee's operations, but it does not have a controlling interest and is not the primary beneficiary.

The equity method is used to account for the company's investments in associates, joint ventures and other limited partnership interests within the Statements of Financial Position and the Statements of Operations.

Interests in associates, joint ventures and other limited partnership interests accounted for using the equity method are initially recognized at cost. At the time of initial recognition, if the cost of the associate or joint venture or other limited partnership interests is lower than the proportionate share of the investment's underlying fair value, the company records a gain on the difference between the cost and the underlying fair value of the investment in net income. If the cost of the associate or joint venture or other limited partnership interests is greater than the company's proportionate share of the underlying fair value, goodwill relating to the associate or joint venture or other limited partnership interests is included in the carrying amount of the investment.

Subsequent to initial recognition, the carrying value of the company's interest in an associate or joint venture or other limited partnership interests is adjusted for the company's share of comprehensive income and distributions of the investee. Profit and losses resulting from transactions with an associate or joint venture or other limited partnership interests are recognized in the financial statements based on the interests of unrelated investors in the investee. The carrying value of associates or joint ventures or other limited partnership interests is assessed for impairment indicators at each reporting date. Impairment losses on equity accounted investments may be subsequently reversed in net income. Further information on equity accounted investments is available in Note 7.

(o) Property and equipment

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset. The costs of assets include the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, and the cost of dismantling and removing the items and restoring the site on which they are located.

Depreciation of property and equipment commences when it is available for use. Property and equipment are depreciated on a straight-line basis over the estimated useful lives of each component of the property and equipment. The estimated useful lives of the property and equipment are three to thirty years.

Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter, on a straight-line basis. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each annual reporting period, with the effect of any changes recognized on a prospective basis.

(p) Intangible assets

Intangible assets consist of capitalized costs of estimated fair value of computer software, distributor relationships, trade name and insurance licenses. Intangible assets are included in other assets within the Statements of Financial Position.

Definite-lived intangible assets are carried at cost less accumulated amortization. Amortization expense is primarily calculated using the straight-line amortization method.

The company assesses the impairment of definite-lived intangible assets in accordance with its policy for the impairment of property and equipment. The company assesses the impairment of indefinite-lived intangible assets in accordance with its policy for the impairment of goodwill.

(i) Distributor Relationships

The distribution assets reflect relationships American National has with third-party intermediaries that sell new business for the company. These assets are valued using the multi-period excess-earnings method, which derives value based on the present value of the after-tax cash flows attributable to the intangible asset only. The average useful life of distributor relationships is 19 years.

(ii) Trade Name

This represents American National's trade name and was valued using the relief from royalty method, which derives value based on present value of the after-tax royalty savings attributable to owning the intangible asset. The useful life of the trade name is 10 years.

(iii) Insurance Licenses

Given the highly regulated nature of the insurance industry, companies are required to hold certain licenses to operate. These licenses are valued using the comparable transaction method based on observable license transactions in the insurance industry. Insurance licenses represent an indefinite-lived intangible asset.

(q) Deferred acquisition costs and value of business acquired

Deferred policy acquisition costs ("DAC") are capitalized costs related directly to the successful acquisition of new or renewal insurance contracts. Significant costs are incurred to acquire insurance, reinsurance, and annuity contracts, including commissions and certain underwriting, policy issuance, and processing expenses.

DAC on Reinsurance business is amortized over the life of the policies in proportion to the estimated gross profits. Costs that are directly related to the successful acquisition of reinsurance contracts are capitalized as DAC to the extent that they are recoverable from gross profits. These costs consist of commission and policy issuance costs, as well as sales inducements credited to policyholder account balances.

Effective October 1, 2022, the company made a change in accounting policy to treat the difference between the amount paid for reinsurance contracts and the amount of the liabilities for policy benefits relating to the underlying reinsured contracts as the cost of reinsurance that is deferred and amortized over the reinsurance contract. This was applied retrospectively as it resulted in reliable and more relevant information about the effects of the reinsurance treaty on the company's financial conditions and performance.

DAC on traditional life, including limited-pay contracts, and health products is amortized with interest over the anticipated premium-paying period of the related policies in proportion to the ratio of annual premium revenue expected to be received over the life of the policies. Expected premium revenue is estimated by using the same mortality, morbidity, and withdrawal assumptions used in computing liabilities for future policy benefits.

DAC on universal life and investment-type contracts is amortized as a level percentage of the present value of anticipated gross profits from investment yields, mortality, and surrender charges. The effect of the realization of unrealized gains (losses) on DAC is recognized in net unrealized loss on available for sale securities in the Statements of Financial Position as of the reporting date. A change in interest rates could have a significant impact on DAC calculated for these contracts.

DAC associated with property and casualty business is amortized over the coverage period of the related policies, in relation to premiums earned.

DAC on participating whole life products is amortized in proportion to estimated gross margins. Estimated gross margins are equal to premiums, plus investment income, less benefits, less expenses not included in DAC, less the change in reserves, less dividends.

For short-duration and long-duration contracts, DAC is grouped consistent with the manner in which insurance contracts are acquired, serviced, and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. Investment income is anticipated in assessing the recoverability of DAC for short-duration contracts.

Value of Business Acquired ("VOBA") is the intangible asset representing the value assigned to contracts already in force.

In conjunction with the acquisition of insurance policies or investment contracts, a portion of the purchase price is allocated to the right to receive future gross profits from cash flows and earnings of associated insurance policies and investment contracts. This intangible asset is based on the actuarially estimated present value of future cash flows from associated insurance policies and investment contracts acquired. The estimated present value of future cash flows used in the calculation of VOBA is based on certain assumptions, including mortality, persistency, expenses and interest rates that the company believes to be those of a market participant. The company amortizes VOBA based on the estimated premium earning patterns.

(r) Reinsurance assets

In the normal course of business, BAC and American National are users of reinsurance in order to limit the potential for losses arising from certain exposures. To the extent that third party reinsurers are unable to meet their obligations, BAC and American National remain liable to its policyholders for the portion reinsured.

Reinsurance assets are estimated amounts due to the company from reinsurers related to paid and unpaid ceded claims and claim adjustment expenses ("CAE") and are presented net of a reserve for collectability. Recoveries of gross ultimate losses under our non-catastrophe reinsurance are estimated by a review of individual large claims and the ceded portion of IBNR using assumed distribution of loss by percentage retained. Recoveries of gross ultimate losses under our catastrophe reinsurance are estimated by applying reinsurance treaty terms to estimates of gross ultimate losses. The most significant assumption is the average size of the individual losses for those claims that have occurred but have not yet been reported and our estimate of gross ultimate losses. The ultimate amount of the reinsurance ceded recoverable is unknown until all losses settle.

At each reporting date, the reinsurance assets, if any, are assessed for impairment. If there is objective evidence that the reinsurance assets are not recoverable and the impact of the event can be reliably measured, an impairment loss is recognized for the amount by which the carrying amount exceeds the recoverable amount.

(s) Investment properties

Investment properties are held primarily to earn rental income or capital appreciation or for both, but are not for sale in the ordinary course of business. The company accounts for its investment properties in accordance with IAS 40 Investment Property ("IAS 40"). Investment properties including related improvements are stated at cost less accumulated depreciation. Depreciation is provided on a straight-line basis over the estimated useful life of the asset (typically 15 to 50 years). Rental income is recognized on a straight-line basis over the term of the respective lease and is measured, depreciated and assessed for impairment in the same manner as property and equipment.

(t) Goodwill

Goodwill is measured as the excess of the sum of the consideration transferred over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. Goodwill is allocated to the cash-generating unit or units to which it relates. The company identifies cash-generating units as identifiable groups of assets that are largely independent of the cash inflows from other assets or groups of assets.

Goodwill is evaluated for impairment annually or more often if events or circumstances indicate there may be impairment. Impairment is determined for goodwill by assessing if the carrying value of a cash-generating unit, including the allocated goodwill, exceeds its recoverable amount determined as the greater of the estimated value-in-use and fair value less costs of disposal. Impairment losses recognized in respect of a cash-generating unit are first allocated to the carrying value of goodwill and any excess is allocated to the carrying amount of assets in the cash-generating unit. Any goodwill impairment is charged to profit or loss in the period in which the impairment is identified. Impairment losses on goodwill are not subsequently reversed. In the year of a business acquisition, the recoverability of the acquired goodwill is assessed by revisiting the assumptions of the related underwriting model.

The company assesses the impairment of goodwill by reviewing the value-in-use or fair value less costs of disposal of the cash-generating units to which goodwill has been allocated. The company uses the following significant assumptions and estimates: the circumstances that gave rise to the goodwill, timing and amount of future cash flows expected from the cash-generating unit, discount rates, terminal capitalization rates, terminal valuation dates, useful lives and residual values.

(u) Separate account assets and liabilities

Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of the company. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. The company reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from the company's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, the company's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the Statements of Operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of the company.

(v) Assets pledged as collateral

The company receives and pledges collateral in respect to certain derivative contracts, in order to meet its contractual obligations. The amount of collateral required is determined by the valuation of each contract on a mark-to-market basis and the type of collateral to be deposited is specified within the agreement with each counterparty.

Collateral pledged continues to be recognized in the Statements of Financial Position as the company retains all rights related to these assets.

Collateral received is not recognized in the Statements of Financial Position unless the company acquires the rights relating to the economic risks and rewards related to these assets.

(w) Collateralized borrowing transactions

Securities sold under repurchase agreements are collateralized borrowing transactions. A repurchase agreement provides the lender of securities the right to receive from the counterparty sufficient cash to purchase the same securities at the maturity of the agreement. These transactions are measured at amortized cost and are recorded at amounts at which the securities were initially sold.

The company recognizes an asset in the Statements of Financial Position, representing the cash received, and a liability for the same amount, representing the obligation to repurchase the loaned bonds. Repurchase agreements with the same counterparty are presented net in the Statements of Financial Position, when the criteria to offset are met.

(x) Classification of financial instruments

Accrued investment income, reinsurance recoverable, premium due and other receivables, due from related party, private loans, mortgage loans, other loans and other assets have been classified as loans and receivables. Due to related party, reinsurance payable, note payable, corporate borrowings, subsidiary borrowings, and other liabilities have been classified as other financial liabilities. Loans and receivables and other financial liabilities are measured at amortized cost. Further details of the financial instruments are described in Note 4.

(y) Right of offset

Amounts presented in these financial statements are presented on a net basis when there exists both a legally enforceable right to offset the recognized amounts and an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

For derivative financial instruments, the company has a right of offset in the event of default, insolvency, bankruptcy or other early termination under the master netting agreements. As our rights of offset are conditional, derivative financial instruments are not offset in the Statements of Financial Position.

(z) Impairment

At each reporting date, financial assets are assessed for impairment indicators. The company considers an impairment loss if it deems it unlikely that it will be able to recover all amounts due according to the contractual terms of the obligation. For AFS equity investments, a significant and prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment. For all other financial assets, there must be observable data about the loss events, such as, but not limited to, the issuer's financial difficulty, a bankruptcy, default of payment of principal or interest, or specific adverse conditions affecting an industry or a region.

For financial assets measured at amortized cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows. The impairment loss is recorded in the Statements of Operations.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized. In respect to AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increases in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss. The reversal cannot exceed the impairment expense amount. The amount of reversal is recorded in the Statements of Operations.

At each reporting date, or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, non-financial assets that are measured at amortized cost are reviewed for impairment. In addition, irrespective of whether there is any indication of impairment, intangible assets not yet available for use are tested for impairment annually. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

(aa) Future policy benefits

Contract classifications

Contracts under which the company accepts significant insurance risk from a policyholder are classified as insurance contracts in accordance with IFRS 4 Insurance Contracts ("IFRS 4") on the Statements of Financial Position. A contract is considered to have significant insurance risk if, and only if, an insured event could cause an insurer to make significant additional payments in any scenario, excluding scenarios that lack commercial substance at the inception of the contract. Contracts under which the company does not accept significant insurance risk are classified as either investment contracts or considered a service contract and are accounted for in accordance with IAS 39 Financial Instruments: Recognition and Measurement or IFRS 15 Revenue from Contracts with Customers, respectively. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its term, even if the insurance risk reduces significantly during the year, unless all rights and obligations are extinguished or expire. Investment contracts can be reclassified as insurance contracts if insurance risk subsequently becomes significant.

Measurement

Future policy benefits are determined by BAC using the Canadian Asset Liability Method ("CALM"), in accordance with the standards of the Canadian Institute of Actuaries ("CIA") and as permitted by IFRS 4. BAC's Appointed Actuary is responsible for determining the amount of future policy benefits in accordance with standards established by the CIA. CALM is used to determine future policy benefits and incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation and inflation. Margins for adverse deviation are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions, and provide reasonable assurance that future policy benefits cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

Future policy benefits are determined by NER Ltd. using a reserve methodology under accounting principles generally accepted in the United States of America ("US GAAP"), as permitted by IFRS 4. Future policy benefits are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges. These are equal to the balance that accrues to the benefit of the policyholders as of the reporting date (commonly referred to as the account value), including policyholders' accumulated net deposits plus a guaranteed rate of interest credited, less policyholder deaths and withdrawals. Future policy benefits are further evaluated using accepted actuarial valuation methods based on assumptions related to mortality, withdrawals, surrender and deposit rates, determined when the policies are assumed.

Future policy benefits are determined by NER SPC using US GAAP reserve methodology, as permitted by IFRS 4. Future policy benefits for fixed index annuity contracts (with embedded derivatives) are carried at fair value with an explicit margin added to the mortality, lapse and partial withdrawal assumptions. The host contract and the embedded derivative are bifurcated. The embedded derivative cash flows incorporate a risk margin and are discounted using a rate that reflects our own credit rating. The host contract is established at contract inception as the initial value less the initial fair value of the embedded derivative and accreted over the policy's life. The host value's accretion rate is updated each quarter so that the present value of the actual and expected guaranteed cash flows is equal to the initial host.

An additional liability is established for Life Income Benefit Rider ("LIBR") benefits -withdrawals paid after the contract account value is exhausted. The liability accrues in proportion to contractual assessments using the crediting interest rate. The present value of expected excess benefits and assessments is projected over a range of stochastic equity scenarios. Retrospective unlocking is performed by replacing mean stochastic projected assessments and benefits with actual, revising projections of future experience and resolving for the portion of assessments required.

Key reserve assumptions are based on industry standard data adjusted to align with actual experience, if necessary. The company periodically reviews actual and anticipated experience compared to the assumptions used to establish future policy benefit reserves. Due to the many assumptions and estimates used in establishing reserves, and the long-term nature of the reinsurance contracts, the reserving process, while based on standard actuarial practices, is inherently uncertain.

Future policy benefits are determined by American National using US GAAP reserve methodology, as permitted by IFRS 4. Liabilities for future policy benefits for traditional products have been provided on a net level premium method based on estimated investment yields, withdrawals, mortality, and other assumptions that were appropriate at the time the policies were issued. Upon acquisition, the fair value of future policy benefits was determined using a Defined Valuation Net Premium (DVMP) method. Key assumptions used in calculating the fair value of future policy benefits include the net to gross premium ratio, discount rates and Provisions for Adverse Deviation (PADs) including mortality and inflation. Estimates are based on historical experience adjusted for possible adverse deviation. These estimates are periodically reviewed and compared with actual experience. When it is determined that future expected experience differs significantly from existing assumptions, the estimates are revised for current and future issues.

Included within future policy benefits are amounts related to certain contracts or blocks of business that have negative VOBA. Negative VOBA is amortized over the duration of the respective contracts, being 30 years using the straight-line method. We record the fair value of the liabilities assumed in two components: reserves and VOBA. Reserves are established using our best estimate assumptions consistent with the policies described below for future policy benefits and interest sensitive contract liabilities. VOBA is the difference between the fair value of the liabilities and the reserves. Any negative VOBA is recorded within the associated reserves.

(ab) Policyholders' account balances

Policyholders' account balances represent the contract value that has accrued to the benefit of the policyholders related to universal-life and investments-type contracts. For fixed products, these are generally equal to the accumulated deposits plus interest credited, reduced by withdrawals, payouts, and accumulated policyholder assessments. Indexed product account balances are equal to the sum of host and embedded derivative reserves computed per derivative accounting guidance.

(ac) Policy and contract claims

Policy and contract claims are established to provide for the estimated costs of paying claims. These reserves include estimates for both case reserves and incurred but not reported claims ("IBNR") liabilities. Case reserves include the liability for reported but unpaid claims. IBNR liabilities include a provision for potential development on case reserves, losses on claims currently closed which may reopen in the future, as well as IBNR claims. These liabilities also include an estimate of the expense associated with settling claims, including legal and other fees, and the general expenses of administering the claims adjustment process.

(ad) Other policyholder funds

Other policyholder funds consist of liabilities related to dividends payable on participating business. For the majority of this participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends, less net income allocated to stockholders, as well as a pro rata portion of unrealized investment gains (losses), net of tax.

(ae) Structured entities

The company invests a portion of its assets in structured entities that issue debt and preferred securities to subsidiaries of the company, and its reinsurance treaty accounts. The company controls these entities, and as a result, these entities are consolidated within the company's financial statements. The company assesses the variable returns determination for the structured entities on an ongoing basis.

Liabilities of the entities that do not eliminate upon consolidation are recorded as liabilities of structured entities.

The carrying amount of the company's investment in the consolidated structured entities is determined in accordance with the company's accounting policies for the underlying securities held within the structured entities.

(af) Funds withheld liabilities

Funds withheld liabilities represent the payable for amounts contractually withheld in accordance with reinsurance agreements where BAC acts as a cedant. While the assets in the funds withheld liabilities are legally owned by BAC, the reinsurer is subject to all investment performance and economic rights and obligations to the funds withheld assets similar to invested assets held directly by the reinsurer. BAC's funds withheld liabilities balance includes cash and cash equivalents, fixed income securities and derivatives carried at fair value and is credited with premiums, investment income (loss), benefits payable and other expenses deducted as incurred at cost.

(ag) Reinsurance assumed

NER Ltd. closed a retrocession agreement on September 3, 2021 with a third party insurance company to reinsure multi-year guarantee fixed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of April 1, 2021, representing the date on which the company has the reinsurance contractual obligations.

NER Ltd. assumes insurance contracts under modified coinsurance arrangements ("Modco arrangements").

Assets and liabilities assumed under Modco arrangements are presented gross on the balance sheet. For insurance contracts, the change in assumed reserves and benefits are presented as change in insurance reserves on the Statements of Operations. Assumed premiums are included in premiums on the Statements of Operations. Expenses outside of account value, such as commissions and federal excise taxes, are included in other reinsurance expenses in the Statements of Operations.

NER SPC closed a retrocession agreement on October 8, 2021 with an insurance company which was the company's associate to reinsure fixed indexed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of July 1, 2021, representing the date on which the company has the reinsurance contractual obligations.

NER SPC assumes insurance contracts under Modco arrangements and Coinsurance. NER SPC generally has the right of offset on reinsurance contracts but have elected to present reinsurance settlement amounts due to and from the cedant on a gross basis.

(ah) Deferred revenue

The deferred revenue for interest-sensitive life and investment-type contracts is amortized over the life of the policies. Different amortization methods are permissible, one of these methods being present value of estimated gross profits. However, if estimated gross profits are expected to be negative, alternative amortization techniques are to be used. Given the absence of initial profits for NER Ltd., the deferred revenue is amortized by number of in-force policies. Estimates of in-force policy numbers are based on assumptions using accepted actuarial methods. Amortization is recorded in total revenue within the Statements of Operations.

(ai) Participating insurance policies

For the majority of participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies, which is limited to the greater of 10% of the profit on participating business, or 50 cents per thousand dollars of the face amount of participating life insurance in-force. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends (less net income allocated to stockholders as indicated above) as well as a pro rata portion of unrealized investment gains (losses).

For all other participating business, the allocation of dividends to participating policy owners is based upon a comparison of experienced rates of mortality, interest and expenses, as determined periodically for representative plans of insurance, issue ages and policy durations, with the corresponding rates assumed in the calculation of premiums.

(aj) Premium, benefits, claims incurred, and expenses

Traditional ordinary life and health premiums are recognized as revenue when due. Benefits and expenses are associated with earned premiums to result in recognition of profits over the term of the insurance contracts.

Annuity premiums received on limited-pay and supplemental annuity contracts involving a significant life contingency are recognized as revenue when due. Deferred annuity premiums are recorded as deposits rather than recognized as revenue. Revenues from deferred annuity contracts are principally surrender charges and, in the case of variable annuities, administrative fees assessed to contract holders.

Universal life and single premium whole life revenues represent amounts assessed to policyholders including mortality charges, surrender charges actually paid, and earned policy service fees. Amounts included in benefits are claims in excess of account balances returned to policyholders and interest credited to account balances.

Property and casualty premiums are recognized as revenue over the period of the contract in proportion to the amount of insurance protection, which is generally evenly over the contract period. Claims incurred consist of claims and CAE paid and the change in reserves.

Gross premiums for PRT and reinsurance issued are recognized as revenue when due and collection is reasonably assured. When premiums are recognized, future policy benefits are computed, the result being that benefits and expenses are matched with such revenue. Premiums ceded are recognized when due and in accordance with the terms of the contractual agreement between the company and reinsurer. Premium refunds, if any, are recognized on an accrual basis. Gross benefits and benefits ceded are recorded in the Statements of Operations when they are due and incurred.

(ak) Pension and postretirement benefit plans

Pension and postretirement benefit obligations and costs for our frozen benefit plans are estimated using assumptions including demographic factors such as retirement age and mortality.

The company uses a discount rate to determine the present value of future benefits on the measurement date. The guideline for setting this rate is a high-quality long-term corporate bond rate. For this purpose, a hypothetical bond portfolio to match the expected monthly benefit payments under the pension plan was constructed with the resulting yield of the portfolio used as a discount rate.

In developing the investment return assumption, we relied on a model that utilizes the following factors:

- Current yield to maturity of fixed income securities
- Forecasts of inflation, GDP growth, and total return for each asset class
- Historical plan performance
- Target asset allocation
- Standard deviations and correlations related to historical and expected future returns of each asset class and inflation

The resulting assumption is the assumed rate of return for the plans' target asset allocation, net of investment expenses, and reflects anticipated returns of the plans' current and future assets.

Using this approach, the calculated return will fluctuate from year to year; however, it is the company's policy to hold this long-term assumption relatively constant.

(al) Net investment income

Interest income is calculated using the effective interest method.

Dividend income is recognized when the right to receive payments is established.

Realized gains (losses) on investments and derivatives represent the difference between net sale proceeds and the purchase price.

Unrealized gains (losses) on investments and derivatives measure the difference between the fair value of investments at the end of each reporting date and their purchase price. The net movement reflects both unrealized gains and losses recognized during the year adjusted for any prior period unrealized gains and losses which have been realized in the current accounting period.

Investment upfront fees are considered to be loan origination fees and are capitalized as part of the carrying value of the loans and receivables as received and amortized over the life of the loans.

(am) Net investment results from funds withheld

Net investment results from funds withheld include investment income on funds withheld investments and changes in the fair value of derivatives embedded in reinsurance contracts, as discussed in Note 2(l). Changes in the fair value of the embedded derivative are included in the net investment results from funds withheld in the Statements of Operations.

(an) Leases

IFRS 16 Leases ("IFRS 16") specifies how to recognize, measure, present, and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases.

The company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

If a contract contains a lease, the company will recognize a right-of-use ("ROU") asset and a lease liability at the lease commencement date. The ROU asset and lease liability are initially measured as an amount equal to the present value of the remaining lease payments over the lease. The discount rate used is the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate. Generally, the company uses its incremental borrowing rate as the discount rate.

The ROU asset is depreciated to the earlier of the end of the useful life or lease term using the straight-line method as this reflects the expected pattern of use. At each reporting date, the company assesses whether there is any indication that the ROU asset may be impaired. If an impairment indicator exists, then the company will adjust the value of the ROU asset to its recoverable amount and an impairment loss is recognized. The ROU asset is included in property and equipment in the Statements of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. It is remeasured when there is a change in future lease payments arising from a change in rates or there is a change in the company's estimate of the amount expected to be payable. The lease liability is included in other liabilities in the Statements of Financial Position.

(ao) Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to taxation authorities within a year. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the end of each year.

Deferred income tax assets are recognized to the extent that it is probable that taxable profits will be available against which the unused tax losses or unused tax credits can be utilized by the company. To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credit can be utilized, the deferred tax asset is not recognized.

Deferred income tax liabilities are provided for using the liability method on temporary differences between the tax bases used in the computation of taxable income and carrying amounts of assets and liabilities in the financial statements. Deferred income tax liabilities are recognized for taxable temporary differences, except where the company is able to control the reversal of the temporary difference and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority within a single taxable entity, or the company intends to settle its current tax assets and liabilities on a net basis in the case where there exists different taxable entities in the same taxation authority and when there is a legally enforceable right to set off current tax assets against current tax liabilities.

(ap) Provisions

Provisions are recognized when the company has a present obligation, either legal or constructive, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense is recognized in the Statements of Operations, net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

(aq) Foreign currencies

The USD is the functional and presentation currency of the company.

Foreign currency denominated monetary assets and liabilities of the company are translated using the rate of exchange prevailing at the reporting date and non-monetary assets and liabilities measured at fair value are translated at the rate of exchange prevailing at the date when the fair value was determined. Revenues and expenses are measured at average rates during the year. Gains or losses on translation of these items are included in net income. Foreign currency denominated non-monetary assets and liabilities, measured at historic cost, are translated at the rate of exchange at the transaction date.

For purposes of presenting the financial statements, assets and liabilities of the company are translated using the exchange rate prevailing at the reporting date. Revenue and expenses are measured at transactional or average rates during the year. Gains or losses on translation of these items are included in other comprehensive income.

(ar) Segments

In accordance with IFRS 8 Operating Segments, the company uses a management approach to determine operating segments. The management approach considers the internal organization and reporting used by the company's chief operating decision maker ("CODM") for making decisions, allocation of resources and assessing performance. The company's CODM has been identified as the Chief Executive Officer who reviews the results of operations when making decisions about allocating resources and assessing performance of the company. Our operations were reorganized into three reportable segments during the second quarter of 2022: Reinsurance, PRT and Direct Insurance (see Note 24).

(as) Earnings per share

The holders of the class C shares are entitled to receive distributions if, and when declared or authorized. Our Board of Directors has adopted a policy that class C share distributions will be paid quarterly in an amount equal to the company's distributable earnings (as determined by management of the company) after payment of distributions on the class A exchangeable shares, class B shares and any other shares ranking senior to the class C shares and after provision for expenses, anticipated cash needs, and other similar adjustments. Total outstanding class C shares have been used to calculate basic earnings per share. Class A exchangeable shares and class B shares are not considered participating securities nor considered to be ordinary shares, and consequently per share amounts for these classes of shares have not been presented.

Basic earnings per share attributable to class C shareholders are calculated by dividing the company's net income for the year, less distributions payable to class A exchangeable and class B shareholders, by the weighted average number of class C shares outstanding during the year.

Basic and diluted earnings per share for the year ended December 31, 2020 of $18.92, were calculated by dividing the net income attributable to Brookfield for the year by the weighted average number of the common shares from Brookfield Annuity Holdings Inc., which was a wholly owned subsidiary of Brookfield (2020 – 85 million). The earnings per share amount for December 31, 2020 is not comparable to the earnings per share amount for the years ended December 31, 2021 and December 31, 2022 as a result of the Spin-off and the issuance of Class A exchangeable shares, class B shares and class C shares on June 28, 2021. Further details of the Spin-off are described in Note 1(b).

(at) Interest rate benchmark reform

Various interest rate benchmarks including London Interbank Offered Rate ("LIBOR") are the subject of international regulatory guidance and proposals for reform. Regulators in various jurisdictions have advocated for the transition from Interbank Offered Rates ("IBORs") to alternative reference rates, based on risk-free rates determined using actual market transactions. As a result, many LIBOR values, including 1-week and 2-month US LIBOR, were discontinued on December 31, 2021. The remaining US LIBOR values will be discontinued on June 30, 2023.

Similarly, on May 16, 2022, it was announced that the publication and calculation of all tenors of Canadian Dollar Offered Rate ("CDOR") will be permanently ceased after June 28, 2024. Concurrently, OSFI published their expectation that Federally Regulated Financial Institutions transition all derivatives and securities to alternative reference rates by June 30, 2023, with no new CDOR exposures after that date, with limited exceptions.

As at December 31, 2022, the company had $641 million non-derivative financial assets benchmarked to US LIBOR (2021 – $425 million) with a maturity date beyond June 30, 2023 for US LIBOR. In addition, with respect to the company's derivative instruments, the notional amounts of $5 million were benchmarked to US LIBOR (2021 – $6 million) and $14 million benchmarked to CDOR (2021 – $84 million) with a maturity date beyond June 30, 2023 for US LIBOR and June 28, 2024 for CDOR.

As at December 31, 2022, the company has completed the transition to the Secured Overnight Financing Rate ("SOFR") for the debt benchmarked to LIBOR.

(au) Accounting estimates and judgements

The preparation of the financial statements in accordance with IFRS requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates are subject to uncertainty and can therefore differ significantly from actual results. The items most susceptible to changes in estimates and assumptions include the measurement of future policy benefits, policy and contract claims, reinsurance assets, the fair value of financial assets determined using valuation techniques, the impairment of financial instruments and purchase price accounting. Actual results may differ from our estimates thereby impacting the financial statements. Outcomes within the next financial year that are different from assumptions could require a material adjustment to the carrying amount of the asset or liability affected.

Management judgment is also used in applying the accounting policies used to prepare the financial statements. The items most susceptible to changes in estimate and judgements are the measurement of embedded derivatives (Note 5), reinsurance assets (Note 13 and 14), future policy benefits (Note 13) and policy and contract claims (Note 14), and impairment of available-for-sale securities and loans and receivables (Note 4) and goodwill (Note 11).

(av) Recently adopted accounting standards

Amendments to IFRS 3 - Business Combinations ("IFRS 3")

The amendments add an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising from liabilities and contingent liabilities that would be within the scope of IAS 37, Provisions, Contingent Liabilities and Contingent Assets ("IAS 37"), or IFRIC 21, Levies ("IFRIC 21"), if incurred separately. The exception requires entities to apply the criteria in IAS 37 or IFRIC 21, respectively, instead of the Conceptual Framework, to determine whether a present obligation exists at the acquisition date. At the same time, the amendments add a new paragraph to IFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date. The amendments apply to annual reporting periods beginning on or after January 1, 2022.

The adoption did not have a significant impact on the company's financial reporting.

NOTE 3. ACQUISITION OF BUSINESS

On May 25, 2022, American National was acquired by a wholly-owned subsidiary of the company. American National offers a broad portfolio of insurance products, including individual and group life insurance, annuities, health insurance, and property and casualty insurance. Under the terms of the Merger Agreement, the company acquired 100% of all American National issued and outstanding shares in exchange for $190 per share, which is equivalent to $5.1 billion. The consideration was all cash. The company acquired all assets and assumed all liabilities of American National as of the closing date, and consolidates the business for financial statement purposes.

The following summarizes the consideration transferred, fair value of assets acquired and liabilities assumed at the acquisition date:

(in US$ millions)

Total consideration transferred for the acquisition	$	5,107
Assets acquired		
Cash and cash equivalents		1,021
Investments		22,519
Accrued investment income		101
Reinsurance recoverables		45
Premiums due and other receivables		437
Deferred tax assets		369
Property and equipment		175
Prepaid pension		149
Equity accounted investment		1,402
Deferred acquisition costs and value of business acquired		571
Reinsurance assets		410
Investment properties		541
Other assets		198
Separate account assets		1,123
Total assets acquired		**29,061**
Liabilities assumed		
Future policy benefits		5,333
Policyholders' account balances		13,880
Policy and contract claims		1,706
Unearned premium reserve		1,073
Other policyholder funds		324
Notes payable		158
Other liabilities		449
Separate account liabilities		1,123
Total liabilities assumed		**24,046**
Less: Non-controlling interest		(10)
Net assets acquired		**5,005**
Goodwill	**$**	**102**

Accounting for the acquisition is not finalized, and there remains some measurement uncertainty on the valuation and December 31, 2022 balances, pending completion of a comprehensive evaluation of the net assets acquired. The financial statements as at December 31, 2022 reflect management's current best estimate of the purchase price allocation. Final valuation of the assets acquired and liabilities assumed and the completion of the purchase price will occur by the end of the first quarter for 2023. As a result, the excess of the purchase price over the fair value of net assets acquired, representing goodwill of $102 million as at December 31, 2022, may be adjusted in future periods. Goodwill of approximately $102 million was recognized as a result of the acquisition. Goodwill recognized is not deductible for income tax purposes. Acquisition costs of $13 million were expensed at the acquisition date and recorded as Operating expenses on the Statements of Operations.

The acquired business contributed revenues of $2.3 billion and net profit of $277 million to the company for the period from May 25 to December 31, 2022.

If the acquisition had occurred on January 1, 2022, consolidated pro forma revenue and profit for the year ended December 31, 2022 would have been $3.9 billion and $454 million, respectively. These amounts have been calculated using the subsidiary's results and adjusting them for:

- differences in the accounting standards and policies between the company and American National, and
- the revised depreciation and amortization that would have been charged assuming the fair value adjustments to investments, property and equipment and intangible assets had applied from January 1, 2022, together with the consequential tax effects.

NOTE 4. FINANCIAL INSTRUMENTS

a) Summary of cash and cash equivalents, investments and derivative assets and liabilities

The summary of financial assets and financial liabilities is as follows:

AS AT DEC. 31 US$ MILLIONS	2022 FVTPL[1]	AFS	Amortized Cost	Total
Cash and cash equivalents

1. All financial instruments measured at FVTPL have been designated as FVTPL at initial recognition except for derivative assets and liabilities, which are financial assets that are held for trading.

As at December 31, 2022, the fair value of loans and receivables was $7.2 billion. (2021 - $756 million)

The carrying value of investments and separate account assets, excluding equity, cash and cash equivalents and short term investments, are shown by contractual maturity of investments.

AS AT DEC.31, 2022 US$ MILLIONS	Within 1 year	1-3 years	4-5 years	Over 5 years	Total
Bonds	$ 2,939	$ 1,528	$ 3,154	$ 9,525	**$ 17,146**

AFS investments and investments measured at amortized cost are individually evaluated for impairment. For the year ended December 31, 2022, the company did not incur any impairment expense (December 31, 2021 – $Nil).

The company had collateral pledged of $45 million as at December 31, 2022 (December 31, 2021 – $23 million) for the benefit of the company's counterparties primarily to its derivative instrument contracts, Federal Home Loan Bank agreements, reinsurance agreements, financing and worker's compensation.

b) Fair value hierarchy

Investments measured at fair value are classified in accordance with a valuation hierarchy that reflects the significance of the inputs used in determining their fair value, as per IFRS 13 Fair Value Measurement. Under Level 1 of this hierarchy, fair value is derived from unadjusted quoted prices in active markets for identical investments. Under Level 2, fair value is derived from market inputs that are directly or indirectly observable other than unadjusted quoted prices for identical investments. Under Level 3, fair value is derived from inputs that are not based on observable market data.

The following sets out the financial assets and financial liabilities classified in accordance with the above-mentioned fair value hierarchy, excluding financial assets and financial liabilities that are carried at amortized cost.

AS AT DEC. 31 US$ MILLIONS	2022 Level 1	 Level 2	 Level 3	 Total

The following table summarizes the valuation techniques and key inputs used in the fair value measurement of Level 2 financial instruments:

Type of Financial Instruments	Valuation Techniques and Key Inputs
Bonds and other equities	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs. The company evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.
Asset-backed securities	Valuation model is based on quoted prices of similar traded securities in active markets. The primary inputs to the valuation include quoted prices for identical assets, or similar assets in markets that are not active, contractual cash flows, weighted-average coupon and weighted-average maturity, issuer rating, structure of the security, expected prepayment speeds and volumes, collateral type, current and forecasted loss severity, average delinquency rates, vintage of the loans, geographic region, debt-service coverage ratios, payment priority with the tranche, benchmark yields and credit spreads.
Derivative assets/Derivative liabilities	Foreign currency forward contracts—discounted cash flow model—forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate. Interest rate contracts - discounted cash flow model - forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate. Warrants – intrinsic value based on the difference between strike prices and the unadjusted quoted prices of underlying equity investments in active markets.
Reinsurance funds withheld	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.
Separate account assets and liabilities	The separate account assets included in the quantitative disclosures fair value hierarchy table are comprised of short-term investments, equity securities, and fixed maturity bonds available-for-sale. Short-term investments and fixed maturity securities are classified as Level 2 measurements. The classifications for separate assets reflect the fair value methodologies of the underlying asset and liability fair value methodologies listed above.
Funds withheld liabilities	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

The company performs initial and ongoing analysis and review of the valuation techniques utilized in determining fair value to ensure that they are appropriate and consistently applied, and that the valuation assumptions are reasonable. The company analyzes and reviews the data, assumptions and valuation model to ensure that the fair value represents a reasonable estimate as at reporting period end and to monitor controls around fair value measurement, which includes quantitative and qualitative analysis and is overseen by the company's investment and accounting personnel.

Fair values determined using valuation models requiring the use of unobservable inputs (Level 3 financial assets and liabilities) include assumptions concerning the amount and timing of estimated future cash flows and discount rates. In determining those unobservable inputs, the company uses observable external market inputs such as interest rate yield curves, currency rates and price and rate volatilities, as applicable, to develop assumptions regarding those unobservable inputs.

The following table summarizes the valuation techniques and significant unobservable inputs used in the fair value measurement of Level 3 financial instruments:

Type of Asset	**Valuation Techniques**	**Significant Unobservable Inputs**	**Significant unobservable inputs and relationship of unobservable inputs to fair value**
Equity-index Option	Heston and Black-Scholes Valuation models	• Interest rate (risk-free rate assumptions) • Underlying equity quoted index prices	• Increases (decreases) in interest rate assumptions decrease (increase) fair value • Increases (decreases) in underlying equity index prices increase (decrease) fair value
Bonds and asset-backed securities	Bonds • Discounted cash flows (yield analysis) • Income approach	Bonds • Contractual cash flows • Duration • Call provisions	Bonds • Increases (decreases) in contractual cash flows increase (decrease) fair value • Increases (decreases) in duration increase (decrease) fair value
	Asset-backed securities • Broker quotes • Income approach	Asset-backed securities • Contractual cash flows • Weighted-average coupon and maturity • Collateral type • Loss severity • Geography	Asset-backed securities • Increases (decreases) in contractual cash flows increase (decrease) fair value • Increases (decreases) in interest rate assumptions decrease (increase) fair value
Private debt	• Income approach	• Weighted-average life • Risk premium	• Increases (decreases) in weighted-average life increase (decrease) fair value • Increases (decreases) in interest rate assumptions decrease (increase) fair value
Common shares, preferred shares and private equity	• Broker quotes • Income approach	• Security structure	

Separately managed accounts	Common Stock and Warrants • Guideline public company method uses price multiples from data on comparable public companies. • Option pricing method • Current Value Method ("CVM")	Common Stock and Warrants • Next Calendar Year Multiple • Next Calendar Year +1 Earnings before interest, tax, depreciation and amortization ("EBITDA") Multiple •Last Twelve Months Revenue Multiple valuation metric shows revenue for the past 12 month period. • Last Twelve Months EBITDA Multiple valuation metric shows earnings before interest, taxes, depreciation and amortization adjustments for the past 12 month period. • Term • Volatility • Discount for lack of marketability ("DLOM")	• Increases (decreases) in Next Calendar Year Multiple increase (decrease) fair value • Increases (decreases) in Next Calendar Year EBITDA Multiple increase (decrease) fair value • Increases (decreases) in Last Twelve Months Revenue Multiple increase (decrease) fair value • Increases (decreases) in Last Twelve Months EBITDA Multiple increase (decrease) fair value • Increases (decreases) in term increase (decrease) fair value • Increases (decreases) in volatility increase (decrease) fair value • Increases (decreases) in DLOM decrease (increase) fair value • Increases (decreases) in discount rate decrease (increase) fair value
	Preferred Stock • Guideline public company method uses price multiples from data on comparable public companies. • CVM	Preferred Stock • Next Calendar Year Revenue Multiple • Next Calendar Year +1 EBITDA Multiple • Last Twelve Months Revenue Multiple valuation metric shows revenue for the past 12 month period. • Last Twelve Months EBITDA Multiple valuation metric shows earnings before interest, taxes, depreciation and amortization adjustments for the past 12 month period.	• Increases (decreases) in Next Calendar Year Revenue Multiple increase (decrease) fair value • Increases (decreases) in Next Calendar Year EBITDA Multiple increase (decrease) fair value • Increases (decreases) in Last Twelve Months Revenue Multiple increase (decrease) fair value • Increases (decreases) in Last Twelve Months EBITDA Multiple valuation increase (decrease) fair value

	Fixed Income • Discounted cash flows (yield analysis) • market transactions approach • CVM • Cost	Fixed Income • Discount rate • Next Calendar Year EBITDA	• Increases (decreases) in discount rate decrease (increase) fair value • Increases (decreases) in Next Calendar Year EBITDA increase (decrease) fair value
Separate account assets and liabilities	Equity method	• Proportionate share of net income of the underlying investment fund • Proportionate share of other comprehensive income of the underlying investment fund • Proportionate share of distribution received from the underlying investment fund	• Increases (decreases) in proportionate share of net income of the underlying investment fund increase (decrease) fair value • Increases (decreases) in proportionate share of other comprehensive income of the underlying investment fund increase (decrease) fair value • Increases (decreases) in proportionate share of distribution received from the underlying investment fund decrease (increase) fair value

The following table presents the changes in the balance of financial assets and liabilities classified as Level 3 as at December 31, 2022 and 2021:

	2022		2021	
AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	Financial assets	Financial liabilities	Financial assets	Financial liabilities
Balance, beginning of year	**$ 309**	**$ —**	$ —	$ —
Fair value changes in net income	**(14)**	**3**	—	—
Fair value changes in other comprehensive income	**(33)**	**—**	—	—
Additions	**3,095**	**32**	309	—
Disposals	**(91)**	**(8)**	—	—
Balance, end of year	**$ 3,266**	**$ 27**	$ 309	**$ —**

Certain comparative amounts have been reclassified to be consistent with the current year's presentation.

There were no transfers between Level 1, Level 2 or Level 3 during the years ended December 31, 2022 and December 31, 2021.

c) Net investment income

Net investment income is comprised of income earned from the following:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Interest income			
Cash and cash equivalents	**$ 34**	$ 1	$ —
FVTPL investments	**106**	51	28

Total unrealized losses on investments and derivatives attributable to funds withheld	**157**	(20)	—
Other investment income	**1**	75	—
Net investment results from funds withheld	**$ 281**	$ 78	**$ —**

e) Derivative financial instruments

The company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, options, cross currency swaps, interest rate swaps and warrants. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments.

Foreign exchange forwards, options, cross currency swaps, interest rate swaps and warrants are over-the-counter (OTC) contractual agreements negotiated between counterparties. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default.

The following table presents the fair values of derivative assets and liabilities categorized by type of hedge for accounting purposes and derivative investments:

AS AT DEC. 31 US$ MILLIONS	2022 Total notional amount	2022 Fair value Assets	2022 Fair value Liabilities	2021 Total notional amount	2021 Fair value Assets	2021 Fair value Liabilities
Derivative investments	**$ 11,478**	**$ 44**	**$ (32)**	$ 7,469	$ 146	$ (1)
Fair value hedges	**140**	**—**	**(6)**	—	—	—
Total derivatives[1]	**$ 11,618**	**$ 44**	**$ (38)**	$ 7,469	$ 146	$ (1)

Notional principal by terms of maturity and the fair value of derivatives are presented in the table below.

AS AT DEC. 31, 2022 US$ MILLIONS	Fair value asset	Fair value liabilities	Collateral pledged	Notional amount Within 1 year	Notional amount 1-3 years	Notional amount 4-5 years	Notional amount Over 5 years	Notional amount Notional principal

Foreign exchange forwards	10	—	1	787	59	—	—	846
Warrants	—	—	—	1	—	—	—	1
Cross currency swaps	—	—	—	—	10		8	18
Interest rate swaps	—	(1)	—	—	—	1	71	72
Options	127	—	—	5,802	—	—	—	5,802
Total	**$ 146**	**$ (1)**	**$ 23**	**$ 7,320**	**$ 69**	**$ 1**	**$ 79**	**$ 7,469**

The company monitors the fair values of bond futures and forwards on a daily basis, with additional cash collateral obtained or refunded as necessary.

Bond futures and most foreign exchange forwards, cross currency swaps and options mature in less than 1 year. Interest rate swaps mature in over 5 years and settle on a semi-annual or annual basis. Derivatives are measured at FVTPL and are reported on the Statements of Financial Position as derivative assets or derivative liabilities. The fair value of exchange-traded futures contracts is determined based on Level 1 inputs. OTC foreign currency forwards, options, currency swaps and interest rate swaps are valued on the contract notional amounts, which is the difference between contract and market rates. These inputs are derived from observable market data and as such are classified as Level 2 instruments.

For OTC derivatives, collateral is collected from and pledged to derivative counterparties according to the Credit Support Annexes, which form part of the International Swaps and Derivatives Associations' master agreements, when the exposure exceeds a specified threshold. For exchange-traded derivatives, their positions are margined on a daily basis (both initial margin and variation margin) subject to derivative clearing agreements with the exchanges and clearing houses. As at December 31, 2022, the company has pledged $182 million of financial assets as collateral under the terms of the derivative contracts (2021 – $23 million).

For an analysis of the company’s risks arising from financial instruments and the policies and procedures to manage these risks refer to Note 22 Risk Management.

NOTE 5. REINSURANCE FUNDS WITHHELD

AS AT DEC. 31 US$ MILLIONS	2022	2021
Reinsurance funds withheld	$ 5,603	$ 4,819
Embedded derivatives	151	(19)
Reinsurance funds withheld payable	(144)	(150)
Net reinsurance funds withheld	**$ 5,610**	$ 4,650

The company has embedded derivatives on the reinsurance funds withheld, which are required to be separated from the host contracts and reported on a fair value basis. The value of the embedded derivative at December 31, 2022, was $151 million (2021 - $19 million).

Embedded derivatives from Modco arrangements are fair valued using a total return swap. During the year, the company changed fair value methodologies, as described in Note 2(m). In the old methodology of valuing the embedded derivative, the company was subject to the investment performance of the withheld assets with the total investment return impacting the host contract and embedded derivative value. Under the new Market Calibration Approach methodology, the fixed loan interest rate over the notional loan term is calibrated such that loan cash flows, discounted at the forward swap rates, equals the market value or starting reserve at calibration date.

NOTE 6. PROPERTY AND EQUIPMENT

The company's property and equipment consist of the following:

US$ MILLIONS	Computers and office equipment	Furniture and fixtures	Leasehold improvements	ROU asset	Total
Cost					
As at December 31, 2021	$ 1	$ —	$ —	$ 1	$ 2
Acquisitions through business combinations	73	2	100	—	175
Additions	25	—	15	1	41
Disposals	(9)	—	(8)	—	(17)
As at December 31, 2022	**$ 90**	**$ 2**	**$ 107**	**$ 2**	**$ 201**
Accumulated depreciation					
As at December 31, 2021	$ —	$ —	$ —	$ —	$ —
Depreciation	(2)	—	(3)	—	(5)
Disposals	(2)	—	—	—	(2)
As at December 31, 2022	**$ (4)**	**$ —**	**$ (3)**	**$ —**	**$ (7)**
Carrying amount					
December 31, 2021	$ 1	$ —	$ —	$ 1	$ 2
December 31, 2022	**$ 86**	**$ 2**	**$ 104**	**$ 2**	**$ 194**

For the year ended December 31, 2022, the company did not incur an impairment expense (2021 – $Nil).

NOTE 7. EQUITY ACCOUNTED INVESTMENTS

The company's equity accounted investments relate to its investment in associates and investments in real estate joint ventures and other limited partnership interests.

The following table presents the change in the company's equity accounted investment in AEL Holdings:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021
Balance, beginning of year	**$ 344**	$ —
Additions	**254**	294
Share of net income	**98**	8
Share of other comprehensive (loss) income	**—**	44
Distributions received	**—**	(2)
Derecognition of equity accounted investments upon loss of significant influence	**(696)**	—
Balance, end of year	**$ —**	$ 344

As at December 31, 2021, the company's ownership interest in AEL Holdings represented an equity accounted investment as a result of the company's common equity ownership in AEL Holdings, a material reinsurance transaction with American Equity Investment Life Insurance Company ("AEILIC"), a wholly-owned subsidiary of AEL Holdings, and the membership of Brookfield Reinsurance's CEO on AEL Holdings board of directors. On November 8, 2022, Brookfield Reinsurance appointed board member resigned from AEL's board of directors resulting in the loss of significant influence and therefore the discontinuation of the Brookfield Reinsurance's common share holding of AEL Holdings as an associate and it became a financial asset on November 8, 2022. The company recognized a $607 million gain on the discontinuation of equity method accounting on its investment in AEL Holdings during the year.

The company's equity in earnings of real estate partnerships is the company's share of operating earnings and realized gains from investments in real estate joint ventures and other limited partnership interests using the equity method of accounting.

The following table presents the change in the company's joint ventures and other limited partnership interests during the year:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021
Balance, beginning of year	**$ —**	$ —
Acquisition from business combination	**1,402**	—
Additions	**443**	—
Share of net income	**124**	—
Distributions received	**(233)**	—
Foreign currency translation and other	**(63)**	—
Balance, end of year	**$ 1,673**	$ —

The company recognizes its share of income and OCI from its weighted average ownership interest in the equity accounted investments one quarter in arrears or less, depending on the most up to date information available to the company.

NOTE 8. DEFERRED ACQUISITION COSTS AND VALUE OF BUSINESS ACQUIRED

The following table presents movement in deferred acquisition costs and VOBA, as well as the impact on expenses:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021
Balance, beginning of year	**$ 776**	$ —
Acquisition from business combination	**571**	—
Costs capitalized	**720**	775
Amortization and other	**(335)**	1
Balance, end of year	**$ 1,732**	$ 776

VOBA recognized in connection with the acquisition of American National represents the difference between the fair value of liabilities acquired and reserves established using a weighted-average cost of capital discount rate and other relevant assumptions as at the acquisition date. The acquisition resulted in VOBA of $571 million within direct business written. VOBA is amortized based on the estimated premium earning patterns. Amortization expense of VOBA was $125 million since the acquisition date.

NOTE 9. INVESTMENT PROPERTIES

The company's investment properties are as follows:

AS AT DEC. 31 US$ MILLIONS	2022	2021
Cost	**$ 576**	$ —
Accumulated depreciation	**(14)**	**—**
Net carrying amount	**$ 562**	$ —

As at December 31, 2022, the fair value of investment properties is $562 million.

The following table presents the changes in the company's investment properties:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021
Balance, beginning of year	**$ —**	$ —
Acquisition from business combination	**541**	—
Additions from expenditure capitalization	**37**	—
Disposals	**(4)**	—
Depreciation	**(14)**	—
Foreign currency translation and other	**2**	—
Balance, end of year	**$ 562**	$ —

The following table presents the rental income and direct operating expenses of the investment properties:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021	2020
Rental income from investment properties	**$ 60**	$ —	$ —
Direct operating expenses of rental investment properties	**(36)**	—	—
Direct operating expenses of non-rental investment properties	**(8)**	—	—
Total	**$ 16**	$ —	$ —

NOTE 10. OTHER ASSETS

The company's other assets consist of the following:

AS AT DEC. 31 US$ MILLIONS	2022	2021
Accounts receivable	**$ 15**	$ —
Prepaid reinsurance premium	**47**	—
Taxes recoverable	**34**	—
Due from related party	**2**	10
Intangible assets	**52**	3
Reinsurance receivable	**26**	12
Other	**86**	4
Total other assets	**$ 262**	$ 29

The company's intangible assets consist of computer software, distributor relationships, trade name, and insurance licenses. For the year ended December 31, 2022, the company did not incur an impairment expense (2021 – $Nil).

NOTE 11. GOODWILL

Goodwill is the excess of cost over the estimated fair value of net assets acquired. As at December 31, 2022, the company had $102 million in goodwill which was related to the Direct Insurance segment. There is no accumulated impairment balance associated with goodwill. The company performs a goodwill impairment analysis annually as of December 31, and more frequently if facts and circumstances indicate that goodwill may be impaired.

The reconciliation of the carrying value of goodwill is in the following table:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021
Balance, beginning of year	**$ —**	**$ —**
Acquisition from business combination	**102**	—
Impairment	**—**	—
Balance, end of year	**$ 102**	$ —

NOTE 12. SEPARATE ACCOUNT ASSETS AND LIABILITIES

The following table presents the details of investments in the company's separate account assets and liabilities:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021
Cash and cash equivalents	**$ 4**	$ —
Bonds	**115**	—
Equity securities	**894**	—
Investment funds	**27**	—
Other assets	**5**	—
Total	**$ 1,045**	$ —

The following table presents the change of the company's separate account assets and liabilities:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021
Balance, beginning of year	**$ —**	$ —
Additions (deductions)		
Acquisition from business combination	**1,123**	—
Policyholder deposits	**44**	—
Net investment income	**32**	—
Net realized capital gains on investments	**(72)**	—
Policyholder benefits and withdrawals	**(66)**	—
Net transfer to or from separate account	**(10)**	—
Policy charges	**(6)**	—
Total changes	**1,045**	—
Balance, end of year	**$ 1,045**	$ —

NOTE 13. FUTURE POLICY BENEFITS AND POLICYHOLDERS' ACCOUNT BALANCES

The company's future policy benefits and policyholders' account balances are as follows:

a. Future Policy Benefits

(i) Key methodologies and assumptions

<u>Direct Insurance</u>

American National estimates future policy benefits for amounts payable under insurance and annuity policies. Generally, amounts are payable over an extended period of time and related liabilities are calculated as the present value of expected benefit payments reduced by the present value of expected premiums. Such future policy benefits are established on a block of business based on methods and underlying assumptions and applicable actuarial standards. Principal assumptions used in the establishment of future policy benefits are mortality, morbidity, policy lapse, renewal, retirement, disability incidence, disability termination, investment return, inflation, expenses, and other contingent events as appropriate to the respective product type.

Future policy benefits for non-participating traditional life insurance are equal to the aggregate of the present value of expected benefit payments and related expenses less the present value of expected net premiums. Assumptions as to mortality and persistency are based upon American National's experience when the basis of the liability is established. Interest rates for the aggregate future policy benefits range from 3.0% to 8.0%.

Future policy benefits for participating traditional life insurance are equal to the aggregate of (i) net level premium reserves for death and endowment policy benefits (calculated based upon the non-forfeiture interest rate, ranging from 2.5% to 5.5%) and mortality rates guaranteed in calculating the cash surrender values described in such contracts; and (ii) the liability for terminal dividends.

Future policy benefits for individual fixed deferred annuities after annuitization and single premium immediate annuities are equal to the present value of expected future payments. The interest rate used in establishing such liabilities range from 3.0% to 6.0% for all policies in-force.

Future policy benefits for non-medical health insurance are calculated using the net level premium method and assumptions as to future morbidity, withdrawals and interest, which provide a margin for adverse deviation. The interest rate used in establishing such liabilities range from 3.5% to 8.0%.

Future policy benefits for disabled lives are estimated using the present value of benefits method and experience assumptions as to claim terminations, expenses and interest. The interest rates used in establishing such liabilities range from 3.0% to 6.0%.

Liabilities for universal life secondary guarantees and paid-up guarantees are determined by estimating the expected value of death benefits payable when the account balance is projected to be zero and recognizing those benefits ratably over the accumulation period based on total expected assessments. American National regularly evaluates estimates used and adjusts the additional liability balances with a related charge or credit to benefit expense, if actual experience or other evidence suggests that earlier assumptions should be revised. The assumptions used in estimating the secondary and paid-up guarantee liabilities are consistent with those used for amortizing DAC, and are thus subject to the same variability and risk. The assumptions of investment performance and volatility for variable products are consistent with historical Standard & Poor's experience. The benefits used in calculating the liabilities are based on the average benefits payable over a range of scenarios.

American National periodically reviews its estimates of actuarial liabilities for future policy benefits and compares them with its actual experience. Differences between actual experience and the assumptions used in pricing these policies, guarantees and riders and in the establishment of the related liabilities result in variances in profit and could result in losses. The effects of changes in such estimated liabilities are included in the company's Statements of Operations in the period in which the changes occur.

Reinsurance

NER SPC's future policy benefits represent Fixed Indexed Annuity ("FIA") contracts that provide contract owners the possibility of earning returns linked to the performance of a specified market index, predominantly the S&P 500 Index, while providing principal protection. The contracts include a provision for a minimum guaranteed surrender value in accordance with applicable law. The products allow policyholders to allocate funds periodically among several different crediting strategies, including index-based strategies and a traditional fixed rate strategy. High surrender charges apply for early withdrawal.

The policyholder account value of the FIA is equal to the sum of deposit paid, premium bonus, and index credits based in the relevant market index (subject to cap, spread and/or participation rate which can typically be reset) less any fees for riders and any withdrawals taken to-date.

NER SPC's future policy benefits are based on actuarial assumptions related to the underlying policies' terms, lives of the policies, duration of the contract, yield on investments supporting the liabilities, level of expenses. Significant assumptions also include policyholder behavior assumptions, such as surrender, lapse, withdrawal rates. NER SPC uses a combination of actual and industry experience when setting and updating policyholder behavior assumptions. Assumptions are at best estimate with margins for adverse deviation. These margins are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Best-estimate assumptions and margins are reviewed periodically for continued appropriateness.

NER Ltd.'s insurance reserves represent multi-year guaranteed annuity contracts that provide owners a guaranteed rate of return. Premiums and credited interest are protected from market volatility, which provides long-term financial security and predictability for policyholders.

NER Ltd.'s future policy benefits have no actuarial assumptions as the reserves are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges.

PRT

The future policy benefits represent contracts that provide immediate annuities for current pensioners and deferred annuities for members who have not reached pensionable age. The company's insurance contracts are a mixture of group annuity "buy-in" policies, where the policyholder is the pension fund, and group annuity "buy-out" policies, where the policyholder is the administrator. The company provides group annuity policies across Canada.

The future policy benefits represent the present value of the future annuity payments and expenses measured in accordance with the CALM described in Note 2 Summary of significant accounting policies, section (aa) Future Policy Benefits. It incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation, and inflation. These margins are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Best-estimate assumptions and margins are reviewed periodically for continued appropriateness.

The principal valuation assumptions and the methods for arriving at these valuation assumptions are outlined below.

Longevity

Mortality assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors including, but not limited to, gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data comprises of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

Mortality improvement assumptions follow the prescribed mortality improvement scales issued by the CIA.

Investment returns

Projected cash flows from the current assets and liabilities are used in CALM to determine insurance reserves. Assumptions are made regarding rates of returns on supporting assets. Projected cash flows from assets used in the actuarial calculations are reduced to provide for potential asset default losses. The calculation for future credit losses on assets is based on the credit quality underlying the asset portfolio.

Other assumptions

The internal costs of maintaining the insurance reserves, the fees paid to third-party administrators engaged to manage payments under the in-force policies, and fees due to reinsurers and investment management expenses, as well as inflation are factored into the calculation of the insurance reserves where applicable.

(ii) Net change in future policy benefits

The following tables summarize the movements of future policy benefits, policy and contract claims, and policyholders' account balances for the years ended December 31, 2022 and December 31, 2021 by its major components:

FOR THE YEAR ENDED DEC. 31 2022 US$ MILLIONS	**Life**	**Annuities**	**Health**	**Gross reserves**	**Reinsurance assets**	**Net**
Beginning of year	$ —	$ 8,497	$ —	**$ 8,497**	$ 169	**$ 8,328**
Changes during the year						
Acquisition from business combination	3,533	1,754	46	**5,333**	90	**5,243**
New business	10	1,906	—	**1,916**	—	**1,916**
Normal changes	38	(784)	1	**(745)**	(48)	**(697)**
Management actions and changes in assumptions	—	974	—	**974**	—	**974**
	3,581	3,850	47	**7,478**	42	**7,436**
Impact of foreign exchange[1]	—	(204)	—	**(204)**	(9)	**(195)**
Balance at end of year	**$ 3,581**	**$ 12,143**	**$ 47**	**$ 15,771**	**$ 202**	**$ 15,569**

FOR THE YEAR ENDED DEC. 31 2021 US$ MILLIONS	Life	Annuities	Health	Gross reserves	Reinsurance assets	Net
Beginning of year	$ —	$ 1,339	$ —	**$ 1,339**	$ 190	**$ 1,149**
Changes during the year						
New business	—	7,180	—	**7,180**	—	**7,180**
Normal changes	—	(310)	—	**(310)**	(20)	**(290)**
Management actions and changes in assumptions	—	282	—	**282**	(2)	**284**
	—	7,152	—	**7,152**	(22)	**7,174**
Impact of foreign exchange[1]	—	6	—	**6**	1	**5**
Balance at end of year	**$ —**	**$ 8,497**	**$ —**	**$ 8,497**	**$ 169**	**$ 8,328**

1. Foreign currency translation reported as a separate component of other comprehensive income.

Under fair value accounting required by our Canadian PRT business, movement in the fair value of the supporting assets is a primary driver of the movement of future policy benefits. In a duration matched portfolio, changes in the fair value of assets are largely offset by corresponding changes in the fair value of liabilities. The change in the value of the future policy benefits associated with the change in the value of the supporting assets is included within normal changes above. The future policy benefits from reinsurance activities is not sensitive to the fair value of the supporting assets under US GAAP reserve methodology.

The increases in future policy benefits in 2022 were mainly due to the new business of $2 billion, offset by the negative impact of normal changes of $697 million, which was primarily driven by the market value changes from increases in interest rates. Management actions and changes in assumptions increased future policy benefits by $974 million, resulting in net increases in future policy benefits, before the negative impact of foreign exchange of $195 million.

The acquisition of American National resulted in negative VOBA of $781 million related to the life and annuity business, and has been recognized in the company's future policy benefits (life and annuities). Negative VOBA is amortized over 30 years using the straight-line method. Amortized negative VOBA revenue of $13 million was recorded since the acquisition date during 2022.

b. Policyholders' account balances

Policyholders' account balances relate to investment-type contracts and universal life-type policies. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase and non-variable group annuity contracts. Policyholder account balances are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest, ranging from 1.0% to 8.0% (some annuities have enhanced first year crediting rates ranging from 1.0% to 7.0%), less expenses, mortality charges, and withdrawals; and (iii) fair value adjustment.

The following table summarizes the movement of policyholders' account balances:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021
Beginning of year	**$ —**	$ —
Changes during the year		
Acquisition from business combination	**13,880**	—
Policyholders' account deposits	**1,407**	—
Interest credited to policyholders' account balances	**156**	—
Policyholders' account withdrawals	**(921)**	—
Charges to policyholders' account balances	**(212)**	—
Balance at end of year	**$ 14,310**	**$ —**

NOTE 14. POLICY AND CONTRACT CLAIMS

The liability for unpaid claims and claim adjustment expenses ("claims") for health and property and casualty insurance is included in "Policy and contract claims" in the Statements of Financial Position and is the amount estimated for incurred but not reported ("IBNR") claims and claims that have been reported but not settled. The liability for unpaid claims is estimated based upon American National's historical experience and actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs, less anticipated salvage and subrogation. The effects of the changes are included in the Statements of Operations in the year in which the changes occur. The time value of money is not taken into account for the purposes of calculating the liability for unpaid claims. There have been no significant changes in methodologies or assumptions used to calculate the liability for unpaid claims and claim adjustment expenses.

a. Key methodologies and assumptions

Property and Casualty Reserving Methodology—The following methods are utilized:

- Initial Expected Loss Ratio—This method calculates an estimate of ultimate losses by applying an estimated loss ratio to actual earned premium for each calendar/accident year. This method is appropriate for classes of business where the actual paid or reported loss experience is not yet mature enough to influence initial expectations of the ultimate loss ratios.

- Pegged Frequency and Severity—This method uses actual claims count data and emergence patterns of older accident periods to project the ultimate number of reported claims for a given accident year. A similar process projects the ultimate average severity per claim so that the product of the two projections results in a projection of ultimate loss for a given accident year.

- Bornhuetter-Ferguson—This method uses, as a starting point, either an assumed Initial Expected Loss Ratio Method or Pegged Frequency and Severity method and blends in the loss ratio or frequency and severity implied by the claims experience to date by using loss development patterns based on our historical experience. This method is generally appropriate where there are few reported claims and an unstable pattern of reported losses.

- Loss or Expense Development (Chain Ladder)—This method uses actual loss or defense and cost containment expense data and the historical development profiles on older accident periods to project more recent, less developed periods to their ultimate total. This method is appropriate when there is a relatively stable pattern of loss and expense emergence and a relatively large number of reported claims.

- Ratio of Paid Defense and Cost Containment Expense to Paid Loss Development—This method uses the ratio of paid defense and cost containment expense to paid loss data and the historical development profiles on older accident periods to project more recent, less developed periods to their ultimate total. In this method, an ultimate ratio of paid defense and cost containment expense to paid loss is selected for each accident period. The selected paid defense and cost containment expense to paid loss ratio is then applied to the selected ultimate loss for each accident period to estimate the ultimate defense and cost containment expense. Paid defense and cost containment expense is then subtracted from the ultimate defense and cost containment expense to calculate the unpaid defense and cost containment expense for that accident period.

- Calendar Year Paid Adjusting and Other Expense to Paid Loss—This method uses a selected prior calendar years' paid expense to paid loss ratio to project ultimate loss adjustment expenses for adjusting and other expense. A percentage of the selected ratio is applied to the case reserves (depending on the line of insurance) and 100% to the indicated IBNR reserves. These ratios assume that a percentage of the expense is incurred when a claim is opened and the remaining percentage is paid throughout the claim's life.

For most credit property and casualty products, IBNR liability is calculated as a percentage of pro rata unearned premium, with the specific percentage for a given product line informed by a traditional completion factor claim reserve analysis.

The expected development on reported claims is the sum of a pay-to-current reserve and a future reserve. The pay-to-current reserve is calculated for each open claim having a monthly indemnity and contains the amount required to pay the open claim from the last payment date to the current valuation date. The future reserve is calculated by assigning to each open claim a fixed reserve amount based on the historical average severity. For debt cancellation products and involuntary unemployment insurance, this reserve is calculated using published valuation tables.

Cumulative claim frequency information is calculated on a per claim basis. Claims that do not result in a liability are not considered in the determination of unpaid liabilities.

For any given line of business, none of these methods are relied on exclusively. With minor exceptions, multiple methods may be used for a line of business as a check for reasonableness of our reselected reserve value.

b. Changes in policy and contract claims

The following table summarizes the movement of policy and contract claims:

FOR THE YEAR ENDED DEC. 31 2022 US$ MILLIONS	Gross reserves	Reinsurance assets	Net
Beginning of year	$ —	$ —	**$ —**
Changes during the year			
Acquisition from business combination	1,706	320	**1,386**
New business	242	40	**202**
Normal changes	(162)	8	**(170)**
Management actions and changes in assumptions	—	—	**—**
	1,786	368	**1,418**
Impact of foreign exchange	—	—	**—**
Balance at end of year	**$ 1,786**	**$ 368**	**$ 1,418**

For December 31, 2022, the policy and contract claims increased by $1.4 billion primarily driven by the additions from the acquisition of American National. There was no policy and contract claims in 2021.

c. Claims and claim adjustment expenses

The reconciliation of the net incurred and paid claims development tables to the liability for claims and claim adjustments in the consolidated statement of financial position is as follows:

	Incurred Claims and Allocated Claim Adjustment Expenses, Net of Reinsurance									
	Years ended December 31,									
Accident Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
2013	$ 503	489	481	474	467	465	463	338	461	460
2014		485	462	456	448	450	447	348	445	445
2015			481	475	469	469	464	368	464	463
2016				531	518	513	509	385	504	502
2017					579	578	570	420	564	562
2018						698	683	514	648	581
2019							713	557	691	618
2020								465	671	616
2021									1,116	1,061
2022										1,225
									Total	$ 6,533

	Cumulative Paid Claims and Allocated Claim Adjustment Expenses, Net of Reinsurance									
	Years ended December 31,									
Accident Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
2013	$ 217	319	375	412	431	440	449	451	454	453
2014		192	300	350	387	413	426	432	435	436
2015			187	301	359	402	431	442	447	451
2016				216	333	394	438	458	474	482
2017					232	392	456	490	512	528
2018						285	467	529	565	530
2019							290	469	531	523
2020								305	468	488
2021									623	823
2022										681
									Total	$ 5,395
					All outstanding liabilities before 2013, net of reinsurance					32
					Liabilities for claims and claim adjustment expenses, net of reinsurance					$ 1,170

The reconciliation of the net incurred and paid claims development table to the policy and contract claims in the Statements of Financial Position is as follows:

AS AT AND FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	2022	2021
Liabilities for unpaid claims and claim adjustment expenses, net of reinsurance	$ 1,170	$ —
Reinsurance recoverable on unpaid claims	346	—
Insurance lines other than short-duration	199	—
Unallocated claim adjustment expenses	71	—
Total policy and contract claims	**$ 1,786**	$ —

NOTE 15. REINSURANCE CEDED

Any gains or losses on reinsurance transactions are recognized in income on inception of the transactions and are included in change in insurance contract liabilities ceded in the Statements of Operations.

In December 2020, PRT segment entered into two longevity reinsurance transactions which resulted in after-tax losses on inception of approximately $1 million. In December 2021, our PRT segment entered into another longevity reinsurance transaction which resulted in an after-tax loss on inception of approximately $1 million. There was no new reinsurance agreement entered in 2022.

As at December 31, 2022, our PRT segment's total expected fixed payments and actual costs of benefit expenses to be reimbursed under longevity reinsurance transactions used in valuing reinsurance assets were $914 million and $899 million (2021 - $1.1 billion and $1.1 billion) respectively. The difference between fixed payments and actual costs on past service is recognized in the same period as the related claim is incurred within benefits ceded in the Statements of Operations.

Our Direct Insurance segment reinsures portions of certain life insurance policies to provide a greater diversification of risk and manage exposure on larger risks.

For the property and casualty, our Direct Insurance segment retains the first $2 million of loss per risk. Reinsurance covers up to $6 million of property and liability losses per risk. Additional excess property per risk coverage is purchased to cover risks up to $20 million, and excess casualty clash coverage is purchased to cover losses up to $60 million. Corporate catastrophe coverage is in place for losses up to $470 million ($500 million if the top layer of the Property Catastrophe Top and Drop contract is included). The Direct Insurance segment retains the first $35 million of each catastrophe.

The first contract is the Property Catastrophe Top and Drop cover that consists of $30 million of annual limit available either wholly or in part across two layers of coverage. The second aggregate contract provides for $30 million of coverage after $160 million of annual aggregated catastrophe losses has been reached.

The Direct Insurance segment remains primarily liable with respect to any reinsurance ceded and would bear the entire loss if the reinsurer does not meet their obligations under any reinsurance treaties.

As at December 31, 2022, reinsurance payable was $5 million, representing the amounts payable from third-party cedants. None of the amount outstanding at December 31, 2022 is the subject of litigation or is in dispute with the reinsurers involved. Management believes the unfavorable resolution of any dispute that may arise would not have a material impact on the financial statements.

NOTE 16. CORPORATE AND SUBSIDIARY BORROWINGS

The company and its subsidiaries have bilateral revolving credit facilities backed by third-party financial institutions. The total available amount on the credit facilities is $500 million. The credit facilities bear interest at the specified SOFR, CDOR, or bankers' acceptance rate plus a spread and have a maturity date of June 2027. As at December 31, 2022, $356 million was drawn on the bilateral credit facilities.

The company has a $1.0 billion 364-day revolving credit facility for the purpose of temporarily warehousing investments that will ultimately be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings. As at December 31, 2022, the facility had $804 million outstanding.

In April 2022, the company entered into a $1.0 billion 364-day secured facility. As at December 31, 2022, the facility was fully drawn.

The facilities require the company to maintain a minimum net worth covenant. As at December 31, 2022, the company was in compliance with its financial covenants.

The company also has a revolving credit facility with Brookfield that, as at December 31, 2022, permitted borrowings of up to $400 million. As at December 31, 2022, there were no amounts drawn on the facility.

Subsidiary borrowings of $1.5 billion relate to debt issued at American National. $1.0 billion matures in 2027 and the remaining $500 million matures in 2032.

NOTE 17. OTHER LIABILITIES

The company's other liabilities consist of the following:

AS AT DEC. 31 US$ MILLIONS	**2022**	2021
Accounts payable and accrued liabilities	**$ 61**	$ 57
Liability for retirement benefits	**67**	—
Escrow fund on mortgage loans	**138**	—
Accrued commissions and other expenses	**185**	—
Other	**280**	7
Total other liabilities	**$ 731**	$ 64

NOTE 18. OPERATING EXPENSES

Operating expenses include the following:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Salaries and benefits expense	**$ 190**	$ 10	$ 3
Professional services	**77**	18	2
Rent	**24**	—	—
Technology	**42**	2	1
Sales and capital taxes	**48**	1	—
Depreciation of property and equipment	**13**	—	—
Other	**39**	4	—
Total operating expenses	**$ 433**	$ 35	$ 6

NOTE 19. INCOME TAXES

Income taxes are recognized for the amount of taxes payable by the company's corporate subsidiaries and for the impact of deferred income tax assets and liabilities related to such subsidiaries.

The company's income tax expense is as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Current tax:			
Current tax on profits for the year	**$ 36**	$ —	$ 1
Adjustments in respect of prior years	**(15)**	—	—
Total current tax expense	**21**	—	1
Deferred tax:			
Origination and reversal of temporary differences	**33**	2	—
Adjustments in respect of prior years	**14**	—	—
Total deferred tax expense	**47**	2	—
Total income tax expense	**$ 68**	$ 2	$ 1

The below reconciliation has been prepared using a statutory income tax rate of 16.4% (2021 – 6.4% and 2020 – 26.5%). The statutory income tax rate is calculated using domestic tax rates applicable to the jurisdictions in which the company's corporate subsidiaries operate in the given year.

The company's income tax expense is reconciled as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Net (loss) income before income tax	**$ 560**	$ (42)	$ 2
Income tax at statutory tax rate	**92**	(3)	1
Tax effect of:			
International operations subject to different tax rates	**(20)**	5	—
Other	**(4)**	—	—
Total income tax expense	**$ 68**	$ 2	$ 1

The company's effective tax rate is different from the company's statutory income tax rate due to the following differences set out below:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Statutory income tax rate	**16.4%**	6.4%	26.5%
Increase (reduction) in rate resulting from:			
International operations subject to different tax rates	**(3.6)%**	(11.1)%	15.9 %
Other	**(0.7)%**	— %	(13.0)%
Effective income tax rate	**12.1 %**	(4.7)%	29.4 %

The gross movement on the deferred tax asset is as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021
Deferred tax asset, beginning of year	**$ 20**	$ —
Recognized in net income (loss)	**(47)**	(2)
Business combination	**369**	2
Recognized in equity	**188**	—
Foreign exchange and other	**1**	20
Deferred tax assets, end of year	**$ 531**	$ 20

Deferred tax asset recognized relates to the following temporary differences:

AS AT DEC. 31 US$ MILLIONS	**2022**	2021
Non-capital loss carryforwards	**$ 7**	$ 18
Investments	**404**	—
Future policy benefits	**107**	—
Participating policyholder liabilities	**55**	—
Deferred acquisition costs	**(41)**	—
Tax credit carryforwards	**4**	2
Other	**(5)**	—
Deferred tax asset	**$ 531**	$ 20

The company evaluates the deferred tax asset based on, amongst other factors, historical operating results, expectation of future profitability, and the duration of the applicable statutory carryforward periods for tax attributes. Based on the evaluation of the deferred tax asset as of December 31, 2022, the company determined that the deferred tax asset would be realized within the applicable statutory carryforward period.

Income tax recovery recognized in other comprehensive income consist of the following:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Fair value through OCI securities	**$ (186)**	$ —	$ —
Revaluation of pension obligation	**(2)**	—	—
Total income tax recovery in other comprehensive income	**$ (188)**	$ —	$ —

NOTE 20. SHARE CAPITAL

As at December 31, 2022 and 2021, the company is authorized to issue:

i. 1,000,000,000 Exchangeable Class A Limited Voting Shares with a par value of $33.70 per share;

ii. 500,000,000 Exchangeable Class A-1 Limited Non-Voting Shares with a par value of $33.70 per share;

iii. 500,000 Class B Limited Voting Shares with a par value of $33.70 per share;

iv. 1,000,000,000 Class C Non-Voting Shares with a par value of $1 per share;

v. 100,000,000 Class A Senior Preferred Shares (issuable in series) with a par value of $25 per share;

vi. 100,000,000 Class B Senior Preferred Shares (issuable in series) with a par value of CAD$25 per share;

vii. 1,000,000,000 Class A Junior Preferred Shares (issuable in series) with a par value of $25 per share;

viii. 1,000,000,000 Class B Junior Preferred Shares (issuable in series) with a par value of CAD$25 per share.

The share capital of the company as at December 31, 2022 and December 31, 2021 comprises the following:

	December 31, 2022		December 31, 2021	
	Number of shares	Value	Number of shares	Value
Issued				
Class A exchangeable shares	**9,594,989**	**$ 422**	10,877,989	$ 535
Class B shares	**24,000**	**1**	24,000	1
Class C shares	**40,934,623**	**1,467**	23,544,548	963
Class A junior preferred shares[1]	**100,460,280**	**2,512**	—	—

1. The company's class A junior preferred shares are classified as liabilities on the Statements of Financial Position.

The movement of shares issued and outstanding is as follows:

AS AT AND FOR THE YEAR ENDED DEC.31, 2022	Class A exchangeable shares	Class B shares	Class C shares	Class A junior preferred shares
Outstanding, beginning of year	10,877,989	24,000	23,544,548	—
Issued (Repurchased)				
Issuances	—	—	17,390,075	100,460,280
Repurchases	(1,283,000)	—	—	—
Outstanding, end of year	**9,594,989**	**24,000**	**40,934,623**	**100,460,280**

AS AT AND FOR THE YEAR ENDED DEC.31, 2021	Class A exchangeable shares	Class B shares	Class C shares	Class A junior preferred shares
Outstanding, beginning of year	—	—	—	—
Issued (Repurchased)				
Issuances	10,877,989	24,000	23,544,548	—
Repurchases	—	—	—	—
Outstanding, end of year	**10,877,989**	**24,000**	**23,544,548**	**—**

On May 25, 2022, the company issued 11,270,466 class C shares for $450 million and 98,351,547 class A junior preferred shares for $2.5 billion to Brookfield.

On November 4, 2022, Brookfield converted its holdings of 675,000 Brookfield Reinsurance class A exchangeable shares for $27 million into 1,066,471 class C shares.

On December 1, 2022, Brookfield converted its holdings of 608,000 Brookfield Reinsurance class A exchangeable shares for $24 million into 5,053,138 class C shares.

On December 9, 2022, Brookfield Reinsurance issued 2,108,733 class A junior preferred shares for $53 million to Brookfield.

NOTE 21. EARNINGS PER SHARE

The components of basic earnings per share are summarized in the following table:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS, EXCEPT PER SHARE AMOUNTS	**2022**	2021
Net income (loss) for the year	**$ 492**	$ (44)
Attributable to:		
Brookfield Corporation	**—**	5
Class A exchangeable and Class B shareholders	**6**	3
Class C shareholders	**484**	(52)
Non-controlling interests	**2**	—
Weighted average shares – Class C shares	**30,919,577**	19,903,823
Earnings per share per class C share - basic	**$ 15.68**	$ (2.58)

NOTE 22. RISK MANAGEMENT

The management of risk is central to the success of the business. The company seeks to create and protect enterprise value by enabling risk-informed decision making and by balancing risk and return in business processes.

The Board has overall responsibility for the management of risk and is supported through formal committees of the Board.

The company manages risk by applying the principles and guidelines outlined in the enterprise risk management framework presented to the Brookfield Reinsurance Board (the "ERM Framework"). The ERM Framework establishes the overall risk management framework that includes the following:

- Risk inventory – identifies and defines the risks arising from the company's business strategy and operations using a consistent language that enables an enterprise-wide approach to measurement, reporting and disclosure of risk;
- Risk appetite – determines the nature and amount of risk the company is prepared to take, the adherence to which is measured and reported through an extensive set of Board-approved risk appetite tolerances;
- Risk governance – establishes clear ownership and accountability for risk management oversight and a risk-aware culture across the company; and
- Risk management process – codifies a consistent approach to the identification, assessment, measurement, control, monitoring and reporting of risks faced by the company.

As part of the risk governance framework, the company operates a three lines of defense model. Under this model, the accountabilities of each line of defense are:

- First line – business management: day to day responsibility for managing and identifying risks, ensuring activities are within risk appetite and established policies, and designing and implementing effective internal controls;
- Second line – risk management function: establish enterprise governance, risk and control strategies and policies; provide oversight and independent effective challenge to the first line, as well as training, tools and advice; and

- Third line – internal audit: independently verify the adequacy and effectiveness of the first and second lines of defense, and that the enterprise risk management framework is operating effectively.

An Own Risk and Solvency Assessment ("ORSA") is undertaken by BAC, NER SPC and American National at least annually. The primary purpose of the ORSA exercise is to allow the entities to incorporate an analysis of the internal capital needs into the risk management frameworks. The ORSA involves a comprehensive assessment of the company's risks, capital needs and solvency position, as well as solvency forecasting across a range of scenarios including plausible stresses that could jeopardize the entities' business plans. It also ensures that both capital needs and available capital resources are considered in the development of business strategies and decision-making over the near and long term. The ORSA provides a perspective of the capital resources necessary to achieve the entities' business strategies and remain solvent given their risk profile, as well as insight into the risk management and governance procedures surrounding these processes. BAC also evaluates its exposure to sustained adverse scenarios through other stress testing techniques such as the Financial Condition Testing ("FCT").

A Commercial Insurers' Solvency Self-Assessment ("CISSA") is undertaken by NER Ltd. at least annually. The primary purpose of the CISSA exercise is to allow NER Ltd. to incorporate an analysis of the internal capital needs into the risk management frameworks. It also ensures that both capital needs and available capital resources are considered in the development of business strategies and decision-making over the near and long term, including factoring in the impact of catastrophic shocks. The CISSA framework provides a perspective of the capital resources necessary to achieve NER Ltd.'s business strategies and remain solvent given their risk profile, as well as insight into the risk management and governance procedures surrounding these processes.

The company has established recurring routines for monitoring and reporting on risks. Risks are monitored on an ongoing basis and risk management reports are provided to management on a monthly basis and to the Board on a quarterly basis. The reports include risk exposures measured against Board-approved risk appetite tolerances, and where relevant, management actions are identified to ensure risk mitigation and controls are effective. Segments and functional groups are responsible for identifying and assessing key and emerging risks on an ongoing basis.

The principal risk factors that affect the company's operations and financial condition include financial risks such as market risk, credit risk and liquidity risk, insurance risk and other risks such as regulatory risk and operational risk.

The following sections describe the primary financial risks and associated risk management strategies in place that affect the company's operations and financial condition.

a. Market risk

Market risk is defined for these purposes as the risk that the fair value or future cash flows of a financial instrument held by the company will fluctuate because of changes in market prices. Market risk includes the risk of changes in interest rates, currency exchange rates and changes in market prices due to factors other than interest rates or currency exchange rates, such as changes in equity prices, or credit spreads.

The company manages market risk from foreign currency assets and liabilities and the impact of changes in currency exchange rates and interest rates by funding assets with financial liabilities in the same currency and with similar interest rate characteristics, and by holding financial contracts such as interest rate and foreign exchange derivatives to minimize residual exposures.

Financial instruments held by the company that are subject to market risk include financial assets, borrowings and derivative instruments.

(i) Interest rate risk

The observable impacts on the fair values and future cash flows of financial instruments that can be directly attributable to interest rate risk include changes in the net income from financial instruments whose cash flows are determined with reference to floating interest rates and changes in the value of financial instruments whose cash flows are fixed in nature.

The company is exposed to interest rate risk within the investment portfolio it maintains to meet the obligations and commitments under its insurance contracts, in that the proceeds from the assets may not be sufficient to meet the company's obligations to policyholders. In addition, the company's borrowing consist of fixed-rate and floating-rate debt.

The company manages interest rate risk through an asset liability management ("ALM") framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance contract liabilities. Within the context of the ALM framework, the company may use derivatives including interest rate swaps and bond futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

The Investment Policy outlines the duration constraints that have been approved by the Board. In operationalizing these constraints, considerably more confining duration-based targets have been established that are closely monitored and reported to management in monthly business updates and to the Board on a quarterly basis.

The Investment Policy is reviewed at least annually and approved by the Board.

The following table shows the sensitivity to changes in interest rates:

	2022		2021	
AS AT DEC. 31 US$ MILLIONS	**50 bps increase**	**50 bps decrease**	50 bps increase	50 bps decrease
Impact on profit and loss	**$ 121**	**$ (127)**	$ (143)	$ 222
Impact on equity	**91**	**(95)**	(148)	227

(ii) Foreign exchange risk

Changes in currency rates will impact the carrying value of financial instruments denominated in currencies other than USD.

The company's obligations under its insurance contracts are denominated in USD or Canadian dollars ("CAD") but a portion of the assets supporting these liabilities are denominated in non-USD.

The company manages foreign exchange risk using foreign exchange forwards and currency swaps. The Investment Policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

The company holds financial instruments with net unmatched exposures in non-USD currencies, with changes in the translated value recorded in net income. As at December 31, 2022, a 1% fluctuation in USD against non-USD currencies would have an impact of approximately $20 million on net income and $20 million on equity (December 31, 2021 - $1 million on net income and $1 million on equity).

(iii) Other price risk

Other price risk is the risk of variability in fair value due to movements in equity prices or other market prices such as commodity prices and credit spreads.

At December 31, 2022, the company held approximately $1.4 billion of equity investments, approximately 4% of total investment assets, which are subject to equity risk. The company's exposure to the equity markets is managed by sector and individual security and is intended to track the S&P 500 with minor variations. The company mitigates the equity risk by diversification of the investment portfolio.

The company also has equity risk associated with the equity-indexed life and annuity products the company issues. The company has entered into derivative transactions, primarily over-the-counter equity call options, to hedge the exposure to equity-index changes.

b. Credit risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance.

The company is primarily exposed to credit risk through its investments in debt securities and loans and receivables. The company is also exposed to risks created by changes in market prices and cash flows associated with fluctuations in the credit spread or the market's perception of the relative risk and reward to hold fixed maturity securities of borrowers with different credit characteristics or credit ratings. The company manages exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in the Investment Policy.

The company is subject to credit risk associated with the reinsurance agreements. The reinsurance results in liability to pay the policyholders, and the company remains primarily liable to the policyholders for the risks . The company regularly monitors the financial strength of the reinsurers and the levels of concentration to individual reinsurers to verify they meet established thresholds.

The company's use of derivative instruments exposes it to credit risk in the event of non-performance by the counterparties. The company has a policy of only dealing with counterparties that are creditworthy and obtaining sufficient collateral where appropriate, as a means of mitigating the financial loss from defaults. The company holds collateral in cash and notes secured by U.S. government backed assets. The non-performance risk from derivative instruments is the net counterparty exposure based on the fair value of the open contracts, less the fair value of collateral held.

The carrying amount of assets included in the Statements of Financial Position represents the maximum credit exposure. No impairment provision has been made.

(i) Asset quality

The following table summarizes the external credit ratings for investments and reinsurance funds withheld:

AS AT DEC.31, 2022 US$ MILLIONS	AAA	AA	A	BBB	BB and below	Unrated	Total
Bonds	$ 1,094	$ 2,014	$ 6,517	$ 6,057	$ 1,464	$ —	$ 17,146
Asset-backed securities	218	205	629	414	133	3	1,602
Private debt	—	—	133	—	—	123	256
Preferred shares	—	—	2	30	3	38	73
Private loans	—	—	4	18	411	739	1,172
Mortgage loans	—	—	1,583	2,370	1,827	150	5,930
Reinsurance funds withheld	925	278	1,136	2,427	144	700	5,610
Total exposure to credit risk	**$ 2,237**	**$ 2,497**	**$ 10,004**	**$ 11,316**	**$ 3,982**	**$ 1,753**	**$ 31,789**

AS AT DEC.31, 2021 US$ MILLIONS	AAA	AA	A	BBB	BB and below	Unrated	Total
Bonds	$ 500	$ 48	$ 1,450	$ 1,209	$ 188	$ —	$ 3,395
Asset-backed securities	12	7	51	61	37	—	168
Private debt	—	—	—	—	—	137	137
Preferred shares	—	—	7	—	2	10	19
Private loans	—	—	60	55	188	265	568
Mortgage loans	—	—	—	—	—	188	188
Reinsurance funds withheld	819	228	891	2,484	135	93	4,650
Total exposure to credit risk	**$ 1,331**	**$ 283**	**$ 2,459**	**$ 3,809**	**$ 550**	**$ 693**	**$ 9,125**

The company's overall target credit quality for the portfolio is a credit rating of BBB+ (2021 - BBB+). As at December 31, 2022 and 2021, the company met this requirement.

(ii) Concentration

Concentrations of credit risk arise from exposures to a single issuer or a group of related issuers or groups of issuers that have similar risk characteristics, such as groups of issuers in the same economic or geographic regions or in similar industries.

The carrying value of debt securities and loans and receivables by geographic location is shown in the following table. The geographic location is based on the country of the creditor's parent.

AS AT DEC. 31 US$ MILLIONS	**2022**		2021	
United States	**$ 21,721**	**83 %**	$ 2,826	64 %
Canada	**1,836**	**7 %**	1,352	30 %
Other	**2,602**	**10 %**	278	6 %
Total	**$ 26,159**	**100 %**	$ 4,456	100 %

The carrying value of debt securities and loans and receivables by sector and industry is shown in the following table:

AS AT DEC. 31 US$ MILLIONS	**2022**		2021	
Financials	**$ 5,096**	**19 %**	$ 649	15 %
Utilities	**1,333**	**5 %**	196	4 %
Industrials	**1,158**	**4 %**	199	4 %
Energy	**1,714**	**7 %**	752	17 %
Real estate	**6,589**	**25 %**	391	9 %
Consumer	**1,824**	**7 %**	187	4 %
Information technology	**975**	**4 %**	310	7 %
Others	**7,470**	**29 %**	1,772	40 %
Total	**$ 26,159**	**100 %**	$ 4,456	100 %

(iii) Derivative counterparties

Credit risk also arises in respect of derivative contracts to the extent that there is the potential for the counterparties to default on their obligations. To manage this risk, derivative transactions are limited to an approved list of counterparties and in some cases are fully collateralized with highly rated instruments. The derivative counterparty risk as of December 31, 2022 and 2021 was $44 million and $146 million, respectively. As at December 31, 2022, these counterparties have a credit rating of BBB- or higher (2021 - A or higher).

(iv) Reinsurance counterparties

The company has reinsurance contracts with third-party reinsurers with a total exposure of $570 million at December 31, 2022 (December 31, 2021 – $169 million). To manage counterparty risk, reinsurance transactions are limited to an approved list of reinsurers with concentration limits to any single reinsurer.

Under the reinsurance contracts with third-party unregistered reinsurers, highly rated assets are required to be pledged to the company to fully support the ceded reserves. The company maintains a valid and enforceable security interest that has priority over any other security interest in the collateral. In the event of default by the reinsurer, the company has the right to liquidate or take legal possession of these assets, in a timely manner.

As at December 31, 2022, the credit ratings of the reinsurers are BBB+ or higher (December 31, 2021 - A+).

NER Ltd. and NER SPC have reinsurance contracts with third-party cedants with a total exposure of $5.6 billion at December 31, 2022 (December 31, 2021 – $6.3 billion).

As at December 31, 2022, the credit ratings of the third-party cedants are A- or higher (December 31, 2021 - A- or higher).

(v) Impaired Assets

The company reviews all reinsurance assets at each reporting date and determined that there was no evidence of impairment as at December 31, 2022 and 2021.

c. Liquidity risk

Liquidity risk is the risk that the company will not be able to raise the necessary funds, at the appropriate time, to meets its financial liabilities.

Cash outflows primarily consist of benefit payments to policyholders and to a lesser extent, operating expenses and settlement of derivative contracts.

The following table sets out the expected maturity profile of the company's financial liabilities:

AS AT DEC.31, 2022 US$ MILLIONS	Within 1 year	1-3 years	4-5 years	Over 5 years	Total
Future policy benefits	$ 1,078	$ 2,142	$ 1,793	$ 10,758	$ 15,771
Policyholders' account balances	1,288	2,576	1,717	8,729	14,310
Policy and contract claims	162	321	214	1,089	1,786

Total	**$ 1,593**	**$ 827**	**$ 814**	**$ 6,824**	**$ 10,058**

To manage liquidity risk, the company as part of its ALM framework, purchases assets to support the liabilities under its insurance contracts. The effective and key rate duration of these investments are constructed to closely match those of the annuity policy liabilities. The company has established liquidity risk tolerances and operational targets that are closely monitored. Stress testing is conducted to ensure that there are sufficient liquid assets at all times to meet obligations.

In addition, the company has a credit agreement with Brookfield as lender, providing for a three-year $400 million revolving credit facility in addition to $500 million third-party revolving credit facilities with external banks. As at December 31, 2022 there were no amounts drawn on the Brookfield Credit Agreement (December 31, 2021 – $Nil), and $356 million drawn on the third-party revolving credit facilities (December 31, 2021 – $37 million).

In addition, a subsidiary of the company has access to a CAD$300 million repurchase agreement (December 31, 2021 - CAD$150 million). As at December 31, 2022, there were no amounts outstanding under the repurchase agreement (December 31, 2021 – $Nil).

d. Insurance risk

PRT

Insurance risk is the risk that actual experience related to benefit payments and expenses does not emerge as expected. The company is primarily exposed to longevity risk.

Longevity risk is the risk that mortality experience occurs at lower rates than that assumed at the time of pricing which exposes the company to benefit payments that will be paid for longer periods than anticipated.

Longevity assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors established at the time of pricing. These factors take into consideration the characteristics of the annuitants including but not limited to gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data is comprised of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

These inputs and analytics support the company's assessment of longevity risk.

To reduce longevity risk within our PRT business, the company enters into longevity reinsurance transactions with third party reinsurers. Under these contracts, the company commits to pay the reinsurers a schedule of fixed payments relating to a proportion of defined blocks of policyholder benefits. In return, the reinsurers reimburse the actual cost of their proportion of benefit expenses on those blocks to the company. As at December 31, 2022, the company has entered into longevity reinsurance contracts and has reinsured approximately 42% of its longevity risk (December 31, 2021 – 71%).

The following table shows the sensitivity to changes in longevity risk. These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

AS AT DEC.31, 2022 US$ MILLIONS	Mortality Rate 5% Increase	Mortality Rate 5% Decrease	Mortality Improvement 50% Increase	Mortality Improvement 50% Decrease
Impact on profit and loss	**$ 21**	**$ (22)**	**$ (26)**	**$ 26**
Impact on equity	**21**	**(22)**	**(26)**	**26**

AS AT DEC.31, 2021 US$ MILLIONS	Mortality Rate 5% Increase	Mortality Rate 5% Decrease	Mortality Improvement 50% Increase	Mortality Improvement 50% Decrease
Impact on profit and loss	$ 10	$ (9)	$ (12)	$ 13
Impact on equity	10	(9)	(12)	13

Reinsurance

NER SPC reinsures fixed indexed annuity products only. Generally, the assumptions that are the most sensitive for fixed indexed annuity products are changes to investment yields, utilization rates, partial withdrawal rates, lapse rates and mortality. However, our reserves are less sensitive to changes in assumption at this point in time considering the mechanics of our reserving process.

At treaty inception, projected base contract cash flows are bifurcated into two parts: a host liability that reserves for contractually guaranteed payments and an embedded derivative that represents the value of payments in excess of guarantees; for the current treaty, the host liability makes up the vast majority of the reserve liability. The host liability after inception is calculated using an effective yield approach based on a host accrual rate that equates the present value of actual and projected future guaranteed benefit payments to the initial host liability. The host accrual rate is revised as experience emerges, actual cash flows replace projected, and best estimate assumptions about the future are updated. Given this financial year end is only six months following treaty inception, the impact of rolling forward at a different accrual rate recalibrated from changing assumptions is minimized by the short period.

Investment yield risk is a shift in market interest rates associated with investment fixed income instruments. T he embedded derivative, measured at fair value, is most sensitive to investment yields as this directly affects its discount rate.

The following table shows the impact on the overall liability to changes in mortality (as described in PRT sensitivity) and changes to investment yields:

	Mortality Rate		Yield	
AS AT DEC.31, 2022 US$ MILLIONS	10% Increase	10% Decrease	50 bps Increase	50 bps Decrease
Impact on profit and loss	**$ (1)**	**$ 2**	**$ (10)**	**$ 10**
Impact on equity	**(1)**	**2**	**(10)**	**10**

	Mortality Rate		Yield	
AS AT DEC.31, 2021 US$ MILLIONS	10% Increase	10% Decrease	50 bps Increase	50 bps Decrease
Impact on profit and loss	$ (1)	$ 1	$ (11)	$ 12
Impact on equity	(1)	1	(11)	12

Direct insurance

The insurance products are designed to balance features desired by the marketplace with provisions that mitigate the risk exposures across the insurance products portfolio. The company employ underwriting standards to help ensure proper rates are charged to different classes of risks. In the life insurance and annuity products, the company seeks to mitigate disintermediation risk, the risk of large outflows of cash at times when it is disadvantageous to he company to dispose of invested assets, with surrender charges and market value adjustment features.

The process of linking the timing and the amount of payment obligations related to our insurance and annuity contracts and the cash flows and valuations of the invested assets supporting those obligations is commonly referred to as ALM. The ALM Committee, including many of the company's senior executive officers, regularly monitors the level of risk in the interaction of assets and liabilities and helps shape actions intended to attain the desired risk-return profile. Investment allocations and duration targets are also intended to manage the risk exposure in the annuity products by setting the credited rate within a range supported by our investments. Tools that help shape investment decisions include deterministic and stochastic interest rate scenario analyses using a licensed third-party economic scenario generator and detailed insurance ALM models. These models also use experience related to surrenders and claims.

The company also manages risk by purchasing reinsurance to limit exposure in the Life, Health, and Property and Casualty. In the Life line, the company currently retains 100% of newly developed permanent and term products up to the retention limit and cede the excess exposure to reinsurers that are evaluated for their credit strength. Consistent with the corporate risk management strategy, the company periodically adjusts the Life reinsurance program and retention limits as market conditions warrant. In the Health line, the company uses reinsurance on an excess of loss basis for the Managing General Underwriter ("MGU") stop-loss business. In the Property and Casualty line, the reinsurance program provides coverage for some individual risks with exposures above certain amounts as well as exposure to catastrophes including hurricanes, tornadoes, wind and hail events, earthquakes, fires following earthquakes, winter storms, and wildfires. In all product lines, the company purchases reinsurance from multiple providers and regularly review the financial strength ratings of the reinsurers. Reinsurance does not remove the liability to pay the policyholders, and the company remain liable to the policyholders for the risks the company insures.

In the Property and Casualty line, the use of catastrophic event models is an important element of risk management. These models assist in the measurement and management of exposure concentrations and the amount and structure of reinsurance purchases. In addition to reinsurance, we manage exposure to catastrophic risk by limiting property exposure in areas with heightened brush fire risks and exposures and in coastal areas, implementing hurricane, wind and hail deductible requirements where appropriate, and not renewing coverage, when permitted by applicable law, in regions where we believe exposure to risky events exceeds our risk appetite.

The following table shows the sensitivity to changes in insurance risk. These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

AS AT DEC.31, 2022 US$ MILLIONS	Mortality Rate 3% Increase	Mortality Rate 3% Decrease	Lapse Rate 5% Increase	Lapse Rate 5% Decrease
Impact on profit and loss	**$ (86)**	**$ 86**	**$ (45)**	**$ 45**
Impact on equity	**(86)**	**86**	**(45)**	**45**

e. Operational risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The company's internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

The company has significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board.

Disaster recovery and business continuity plans have also been established to manage the company's ability to operate under adverse conditions.

f. Regulatory risk

Regulatory risk stems principally from the risk of changes to the regulatory environment in which the company operates. To manage this risk, the company seeks to a have a regular dialogue with regulators to ensure compliance. Furthermore, senior management participates in industry groups and professional bodies to stay apprised of regulatory changes.

NOTE 23. RELATED PARTY TRANSACTIONS

In the normal course of operations, the company entered into the transactions below with related parties.

a) Brookfield Reinsurance agreements

As described in Note 1(b)(iv), Brookfield provided to the company an equity commitment in the amount of $2.0 billion to fund future growth, which the company may draw on from time to time. As of December 31, 2022, there were no amounts drawn under the equity commitment.

As described in Note 1(b)(v), as of December 31, 2022, there were no amounts drawn on the credit facilities under the Brookfield Credit Agreement.

As described in Note 1(b)(vi), the company entered into the Support Agreement on June 28, 2021. The base fee for the year ended December 31, 2022 was $Nil (December 31, 2021 - $Nil).

As described in Note 1(b)(vii), the company entered into the Rights Agreement on June 28, 2021. The base fee for the year ended December 31, 2022 was $Nil (December 31, 2021 - $Nil).

As described in Note 1(b)(viii), the company entered into the Administration Agreement on June 28, 2021. The base and other fees for the year ended December 31, 2022 was $2 million (December 31, 2021 - $0.4 million). On August 5, 2022, the Administration Agreement was amended to include providing the services of the Chief Financial Officer.

As described in Note 1(b)(ix), the company entered into an Investment Management Agreement with Brookfield Asset Management on June 28, 2021. The base investment management fee for the year ended December 31, 2022 was $40 million (December 31, 2021 - $4 million).

As described in Note 1(b)(x), the company entered into the Brookfield Licensing Agreement on June 28, 2021. The base fee for the year ended December 31, 2022 was $Nil (December 31, 2021 - $Nil).

b) Other related party transactions

On March 10, 2020, BAC entered into lease and building service arrangements with Brookfield Properties (Canada) Inc. and BPO Ontario Properties Ltd. (collectively, "BPO"), subsidiaries of Brookfield. The amount paid to BPO for the leased office facilities and building maintenance for the year ended December 31, 2022 totaled $0.7 million (December 31, 2021 – $0.4 million). As at December 31, 2022, lease liabilities relating to this arrangement were $1 million (December 31, 2021 – $1 million).

BAC entered into outsourcing arrangements with Brookfield related to information technology, investment fund management, building maintenance, and internal audit services. The amount paid to Brookfield for these services for the year ended December 31, 2022 totaled $1 million (December 31, 2021 – $0.3 million). Amounts due to Brookfield related to outsourcing arrangements at December 31, 2022 totaled $0.7 million (December 31, 2021 – $0.5 million).

On January 7, 2022, Brookfield International Holdings Inc. ("BIHI"), a subsidiary of Brookfield, issued a $255 million loan to NER SPC. This amount was fully repaid during the year.

On December 23, 2022, Brookfield Reinsurance Investments LP ("BRILP"), a subsidiary of the company, entered into two loan agreements with the subsidiaries of Brookfield in the amount of $100 million and CAD $300 million, respectively.

During the year, NER SPC made a $379 million full repayment and interest of its outstanding loan balance with BIHI.

During the year, Brookfield Treasury Management Inc. ("BTMI") advanced BAM Re Holdings $269 million via promissory notes. BAM Re Holdings made a $50 million partial repayment of its outstanding loan balance with BTMI.

During the year, subsidiaries of the company purchased investments of $3.3 billion from Brookfield and its subsidiaries. Investment transactions with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

As at December 31, 2022, the company and its subsidiaries held investments in affiliated companies in total of $4 billion.

The company had $779 million of cash on deposit with wholly-owned subsidiaries of Brookfield as at December 31, 2022 (December 31, 2021 – $64 million).

NOTE 24. SEGMENT REPORTING

Effective as of the second quarter of 2022, the company's operations are organized into three operating segments: Reinsurance, PRT and Direct Insurance. These segments are regularly reviewed by the company’s chief operating decision maker (“CODM”) for the purpose of allocating resources to the segment and to assess its performance. Prior to this, operations were attributable to two segments: Reinsurance and PRT. During the second quarter of 2022, the company acquired American National and thus, reporting to the CODM was changed. The periods presented prior to the acquisition of American National reflect the company's operations attributable to two segments.

The key measure used by the CODM in assessing performance and in making resource allocation decisions is Distributable Operating Earnings ("Distributable Operating Earnings", or "DOE").

Distributable Operating Earnings is calculated as net income excluding the impact of depreciation and amortization, deferred income taxes, net income from our equity accounted investments, mark-to-market on investments and derivatives, breakage and transaction costs, and is inclusive of our proportionate share of adjusted earnings from our investments in associates. DOE allows the CODM to evaluate the company’s segments on the basis of return on invested capital generated by its operations and allows the company to evaluate the performance of its segments.

The tables below provide each segment's results in the format that the CODM reviews its reporting segments to make decisions and assess performance.

FOR THE YEAR ENDED DEC. 31 2022 US$ MILLIONS	Reinsurance[1]	Pension Risk Transfer[2]	Direct Insurance[3]	**Total**
Net premiums and other policy related revenues	$ 1,246	$ 1,560	$ 1,678	**$ 4,484**

Our Reinsurance business is focused primarily on the reinsurance of annuity-based products and transacts with direct insurers and other reinsurers. All existing reinsurance contracts are with U.S. based insurance companies. Total premium revenues recorded within our Reinsurance segment for the year ended December 31, 2022 were from transactions with two United States ceding companies and represented 27% (2021 - 63%) and 1% (2021 - 22%) of total premium revenues,respectively.

Total premium revenues recorded within our PRT segment for the years ended December 31, 2022, 2021 and 2020 were from Canadian counterparties, with the exception of one PRT transaction closed in late 2022 for $2 million dollars with a U.S. corporate sponsor.

Total premium revenues recorded within our Direct Insurance segment for the year ended December 31, 2022 were from transactions with U.S. retail customers.

For the purpose of monitoring segment performance and allocating resources between segments, the CODM monitors the assets, including investments accounted for using the equity method, liabilities and common equity attributable to each segment.

AS AT DEC.31, 2022 US$ MILLIONS	Reinsurance	Pension Risk Transfer	Direct Insurance	Other[1]	**Total**

Total non-current assets	**$ 2,028**	$ 1,126	$ 2

NOTE 25. PENSION AND POSTRETIREMENT BENEFIT

Savings Plans

American National sponsors a qualified defined contribution (401(k) plan) for all employees, and non-qualified defined contribution plans for certain employees whose otherwise eligible earnings exceed the statutory limits under the qualified plans.

The total expense associated with matching contributions to these plans was $11 million for 2022 (2021 - $Nil).

Pension Benefits

American National sponsors qualified and non-qualified defined benefit pension plans, all of which have been frozen. As such, no additional benefits are accrued through these plans for additional years of service credit or future salary increase credit, and no new participants are added to the plans. Benefits earned by eligible employees prior to the plans being frozen have not been affected.

The qualified pension plans are noncontributory. The plans provide benefits for salaried and management employees and corporate clerical employees subject to a collective bargaining agreement based on years of service and employee compensation. The non-qualified pension plans cover key employees and restore benefits that would otherwise be curtailed by statutory limits on qualified plan benefits.

Amount recognized in the Statements of Financial Position consist of:

American National's funding policy for the qualified pension plans is to make annual contributions to meet the minimum funding standards of the Pension Protection Act of 2006. American National and its affiliates did not contribute to its qualified plans in 2022, 2021 and 2020 due to the substantial contribution over minimum funding standards of $60 million made in 2018. The benefits paid from the non-qualified plans were $5 million in 2022 (2021 - $Nil). Future payments from the non-qualified pension benefit plans will be funded out of general corporate assets.

The following table shows pension benefit payments expected to be paid:

2023	**$**	**46**
2024		**39**
2025		**31**
2026		**30**
2027-2031		**158**

The investment policy for the retirement plan assets is designed to provide the highest return commensurate with sound and prudent underwriting practices. The investment diversification goals are to have investments in cash and cash equivalents as necessary for liquidity, debt securities up to 100% and equity securities up to 75% of the total invested plan assets. The amount invested in any particular investment is limited based on credit quality, and no single investment may at the time of purchase be more than 5% of the total invested assets.

Postretirement Life and Health Benefits

Under American National's various group benefit plans for active employees, life insurance benefits are provided upon retirement for eligible participants who meet certain age and length of service requirements.

The accrued postretirement benefit obligation, included in the liability for retirement benefits, was $7 million at December 31, 2022 (2021 - $Nil). These amounts were approximately equal to the unfunded accumulated postretirement benefit obligation.

NOTE 26. FINANCIAL COMMITMENTS AND CONTINGENCIES

Commitments

As at December 31, 2022, subsidiaries of the company had investment commitment agreements with third parties to the maximum of approximately $5.4 billion exclusive of taxes and other operating expenses (December 31, 2021 - $463 million). As at December 31, 2022, the total unfunded commitment amounts were $2.8 billion.

American National and its subsidiaries lease insurance sales office space, technological equipment, and automobiles. The remaining long-term lease commitments at December 31, 2022 were approximately $10 million and are included in the company's Statements of Financial Position within other liabilities.

American National had aggregate commitments at December 31, 2022 to purchase, expand or improve real estate, to fund fixed interest rate mortgage loans, and to purchase other invested assets of $2.0 billion of which $1.3 billion is expected to be funded in 2023, with the remainder funded in 2024 and beyond. American National had outstanding letters of credit in the amount of $4 million as of December 31, 2022.

Federal Home Loan Bank (FHLB) Agreements

The company has access to the FHLB's financial services including advances that provide an attractive funding source for short term borrowing and for access to other funding agreements. As of December 31, 2022, certain municipal bonds and collateralized mortgage obligations with a fair value of approximately $14 million and commercial mortgage loans of approximately $1.3 billion were on deposit with the FHLB as collateral for borrowing. As of December 31, 2022, the collateral provided borrowing capacity of approximately $776 million. The deposited securities and commercial mortgage loans are included in the company's Statements of Financial Position within fixed maturity securities and mortgage loans on real estate, net of allowance, respectively.

Guarantees

American National has guaranteed bank loans for customers of a third-party marketing operation. The bank loans are used to fund premium payments on life insurance policies issued by American National. The loans are secured by the cash values of the life insurance policies. If the customer were to default on a bank loan, American National would be obligated to pay off the loan. As the cash values of the life insurance policies always equal or exceed the balance of the loans, management does not foresee any loss on these guarantees. The total amount of the guarantees outstanding as of December 31, 2022, was approximately $121 million, while the total cash value of the related life insurance policies was approximately $143 million.

Litigation

American National and certain subsidiaries are defendants in various lawsuits concerning alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain of these lawsuits include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing these matters with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on the company's Statements of Financial Position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our condensed consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote. Accruals for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, an accrual is recorded based on the midpoint of the range.

NOTE 27. CAPITAL MANAGEMENT

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the company's growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying with the regulatory capital requirements.

The company takes an integrated approach to risk management that involves the company's risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board of Directors. The operating capital levels are determined by the company's risk appetite and Own Risk and Solvency Assessment ("ORSA"). Furthermore, stress techniques that include the Financial Conditions Testing ("FCT") are used to evaluate the company's capital adequacy under sustained adverse scenarios.

BAC is subject to Life Insurance Capital Adequacy Test (“LICAT”) as determined by OSFI. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits.

NER SPC and American National are required to follow Risk Based Capital (“RBC”) requirements based on guidelines of the National Association of Insurance Commissioners (“NAIC”). RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant.

NER Ltd. is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin and the enhanced capital requirement as determined by the Bermuda Monetary Authority ("BMA"). The Enhanced Capital Requirement ("ECR") is calculated based on the Bermuda Solvency Capital Requirement model, a risk-based model that takes into account the risk characteristics of different aspects of the company's business.

The company has determined that it is in compliance with all capital requirements as at December 31, 2022 and December 31, 2021.

NOTE 29. SUBSEQUENT EVENTS

On February 8, 2023, the company announced a definitive merger agreement to acquire Argo Group International Holdings, Ltd. ("Argo") in an all-cash transaction for approximately $1.1 billion. The merger is expected to close in the second half of 2023, subject to approval by Argo shareholders and other closing conditions.

Since December 31, 2022, the company has issued 1,165,000 of class A shares from treasury to third-parties in exchange for 1,165,000 Brookfield shares. The shares were distributed to Brookfield as a dividend on its Class C shares, valued at $38 million. During this time, Brookfield also converted its holdings of 309,307 Brookfield Reinsurance class A exchangeable shares valued at $10 million into 380,268 class C shares.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

This management's discussion and analysis ("MD&A"), covers the financial position as of December 31, 2022 and 2021 and the results of operations for the years ended December 31, 2022, 2021 and 2020. The information in this MD&A should be read in conjunction with the Combined Consolidated Financial Statements ("the financial statements") as of December 31, 2022 and 2021 and for the years ended December 31, 2022, 2021 and 2020. The financial statements are prepared in accordance with the International Financial Reporting Standards issued by the International Accounting Standards Board ("IFRS").

On December 14, 2022, the company changed its name from Brookfield Asset Management Reinsurance Partners Ltd. to Brookfield Reinsurance Ltd. and changed its trading symbol from "BAMR" to "BNRE".

Unless the context requires otherwise, when used in this MD&A, the terms "we", "us", "our", or the "company" means Brookfield Reinsurance Ltd. together with all of its subsidiaries and the term "Brookfield" means Brookfield Corporation (formerly Brookfield Asset Management Inc.), its subsidiaries and controlled companies and any investment fund sponsored, managed or controlled by Brookfield Corporation or its subsidiaries, and does not, for greater certainty, include us or Oaktree Capital Group, LLC and Atlas OCM Holdings, LLC and its subsidiaries.

In addition to historical information, this MD&A contains forward-looking statements. Readers are cautioned that these forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. See "Forward-Looking Information".

Overview of Our Business

Our company is an exempted company limited by shares incorporated under the laws of Bermuda on December 10, 2020. Our company operates a capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, our company offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. Our business is presently conducted through our subsidiaries under three operating segments, which we refer to as our Reinsurance business, our Pension Risk Transfer ("PRT") business and our Direct Insurance business. Refer to the "Lines of Business" section of the MD&A for further details on our operating segments' business.

Continuity of Interest

Our company was established on December 10, 2020 by Brookfield, and on June 28, 2021 Brookfield completed the Spin-off of the company by way of a special dividend to holders of Brookfield's Class A and Class B Limited Voting Shares. Prior to the Spin-off, Brookfield controlled the portion of our business that was spun off to form our company (the "Business"). The Business transferred in connection with the Spin-off represented common control transactions recorded at historical carrying values. In accordance with the company accounting policy, the company has reflected the Business in its financial position and results of operations using Brookfield's carrying value, prior to the Spin-off. To reflect this continuity of interest, the financial statements provide comparative information of the Business for the periods prior to the Spin-off, as previously reported by Brookfield. The economic and accounting impact of contractual relationships created or modified in conjunction with the Spin-off have been reflected prospectively from the date of the Spin-off and have not been reflected in the results of operations or financial position of the company prior to June 28, 2021, as such items were in fact not created or modified prior thereto. Accordingly, the financial information for the periods prior to June 28, 2021 is presented based on the historical financial information for the Business as previously reported by Brookfield. For the period after completion of the Spin-off, the results are based on the actual results of the company, including the adjustments associated with the Spin-off and the execution of several agreements. Therefore, net income (loss) and comprehensive income (loss) not attributable to interests of others in operating subsidiaries has been allocated to Brookfield prior to June 28, 2021 and allocated to the shareholders of class A exchangeable shares, class B shares and class C shares on and after June 28, 2021.

Basis of Presentation

The company holds a direct 100% ownership interest in BAM Re Holdings Ltd. (“BAM Re Holdings”), which holds the company’s interest in its operating subsidiaries North End Re Ltd. (“NER Ltd.”), North End Re (Cayman) SPC ("NER SPC"), Brookfield Annuity Company ("BAC") and American National Group, LLC. (“American National”).

Through its operating subsidiaries, our company offers a broad range of insurance products and services to individuals and institutions, including life insurance, individual and group annuities, health insurance, credit insurance and property and casualty insurance for personal lines, agribusiness and certain commercial exposures. The principal operating entities of the company generally maintain their own independent management and infrastructure.

The following financial data is derived from our financial statements that are prepared in accordance with IFRS. Non-IFRS measures used in this MD&A are reconciled to or calculated from such values. All dollar references, unless otherwise stated, are in U.S. Dollars.

Key Financial Data

The following present key financial data of the company:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Total assets	**$ 43,499**	$ 11,493	$ 1,440
Net income (loss)	**492**	(44)	1
Adjusted equity[1]	**4,852**	1,451	79
Distributable Operating Earnings[1,2]	**388**	30	1

1. Distributable operating earnings and adjusted equity are Non-IFRS measures. See “Reconciliation of Non-IFRS Measures”.
2. Distributable operating earnings for the year ended 2022 is inclusive of $66 million of net corporate costs relating to activities outside of our three operating segments (2021 - $6 million; 2020 - Nil)

Operating Results and Financial Review

CONSOLIDATED RESULTS OF OPERATIONS

The following table summarizes the financial results of our business for the years ended December 31, 2022, 2021 and 2020.

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020

Net income (loss) for the year	**$ 492**	$ (44)	$ 1

2022 vs. 2021

For the year ended December 31, 2022, we reported net income of $492 million, compared to a net loss of $44 million in the prior year.

Net premiums and other policy revenue of $4.5 billion decreased by $2.7 billion for the year ended December 31, 2022, relative to the same period in 2021. During the year, the company closed 28 PRT deals, representing $1.6 billion of premiums (December 31, 2021 - 26 deals, $1.1 billion premiums). We recorded $1.7 billion of premiums and other policy revenues related to American National, for the period following the close of the acquisition on May 25, 2022. The increase in new business within our Direct Insurance and PRT segments in 2022 was partially offset by the absence of $6.2 billion of large-block reinsurance transactions which closed in September and October 2021. During 2022, we wrote $1.2 billion of flow reinsurance premiums on existing reinsurance transactions.

Net investment income, including funds withheld increased by $538 million for the year ended December 31, 2022, relative to the same period in 2021. Net investment income is comprised of interest and dividends received as well as realized and unrealized gains and losses on financial instruments.

Interest and dividends received increased by $648 million as a result of the growth in our investment portfolio and capital redeployed within recently closed transactions, as well as rising interest rates. Across each of our business segments, we deployed the capital from transactions closed during the year into accretive, higher yielding investments, driving a step up in our net investment spreads. During the year, across our Direct Insurance, Reinsurance and PRT businesses we redeployed approximately $7 billion of existing assets (2021 - $5 billion).

Realized net investment income, including funds withheld, increased by $147 million for the year ended December 31, 2022, relative to the same period in 2021. The increase was as a result of growth in the investment portfolio and capital redeployment, as well as realized gains on the unwind of corporate hedges, which totaled $108 million in the year.

The unrealized net investment loss of $421 million (2021 - loss of $19 million) recorded in the year is primarily due to negative mark-to-market movements on investments measured under fair value through profit and loss as a result of rising interest rates and market volatility experienced during the period, partially offset by unrealized gains from embedded derivatives recorded within our reinsurance funds withheld assets. As the duration of our investment portfolio is currently shorter than the duration of our insurance contract liabilities, the negative mark-to-market on the investment portfolio was more than offset by fair value changes in our future policy benefits balances.

Equity accounted income of $222 million includes approximately $124 million related to investments in associates within our American National subsidiary, and includes a further $98 million related to the company's investment in the common equity of American Equity Investment Life Holding Company ("AEL Holdings"). In the fourth quarter of 2022, the company discontinued the use of the equity method for its investment in AEL Holdings, as a result of the loss of significant influence over the investee following the resignation of our appointed member from the AEL Holdings' Board of Directors. Equity accounted income from 2021 includes $8 million related to the company's investment in the common equity of AEL Holdings, which was recorded as an equity accounted investment starting third quarter of 2021.

Benefits and claims paid to policyholders increased by $1.3 billion for the year ended December 31, 2022, relative to the same period in 2021. The increase is due to contributions from American National, representing $1.2 billion, as well as an increase from prior year within our existing reinsurance and PRT businesses as a result of the two reinsurance transactions closed in the third and fourth quarters of 2021 and an increase in annuitants in-pay in new PRT business since the prior year.

The change in future policy benefits in the year ended December 31, 2022 decreased by $4.8 billion compared to the same period in 2021, primarily due to the absence of the two large-block reinsurance transactions in the prior year, which was partially offset by flow business from our reinsurance transactions and new business contributed since the acquisition of American National in May 2022.

The increase in interest credited to policyholders' account balances, commissions for acquiring and servicing policies were also a result of the acquisition of American National.

The change in deferred acquisition costs increased by $339 million compared to the same period in 2021, as a result of capitalized reinsurance costs associated with flow business within our Reinsurance segment, as well as new business written at American National for the period from May 25, 2022 to December 31, 2022.

Other reinsurance expenses, which includes ceding commissions and sales inducements, increased by $106 million in 2022 compared to the same period in 2021 due to a full year of contribution from reinsurance transactions in late 2021, resulting in additional reinsurance related expenses settled during the period.

Operating expenses increased by $398 million in 2022 compared to the same period in 2021, primarily driven by the inclusion of seven months of expenses from American National representing $334 million, and as a result of additional personnel, professional services and transaction expenses related to the growth of our business as well as one-time transaction costs. Operating expenses in 2022 included $31 million of transaction related expenses (2021 - $8 million).

Interest expense on borrowings increased by $120 million during the year primarily as a result of interest on subsidiary borrowings, representing $1.5 billion of acquisition financing issued at American National, as well as corporate borrowings used to temporarily warehouse investments that will be moved into our insurance companies' investment portfolios.

During the year, the company issued $2.5 billion of preferred shares to Brookfield, in connection with the acquisition of American National. While subordinated to the company's Class A and Class B equity, the junior preferred shares are treated as a liability for accounting purposes, as a result, included with interest expense is $67 million of dividends accrued on the company's preferred shares.

During the year, DOE increased by $358 million to $388 million. The increase was driven by contributions from American National, as well as increased net investment income on our corporate investments, contributions from our investment in AEL Holdings and new business and spread earnings within our PRT and Reinsurance businesses as we made progress redeploying the investments within the portfolios.

2021 vs. 2020

For the year ended December 31, 2021, we reported a net loss of $44 million, compared to net income of $1 million in 2020.

Gross premiums increased by $6.8 billion in 2021 relative to the same period in 2020. The increase included $6.2 billion related to the closing of two large-block reinsurance transactions and a higher volume of PRT deals closed as compared to 2020. During 2021, the company closed 26 PRT deals (2020 - 15), representing $1.1 billion of premiums and approximately 20% of the Canadian PRT market in 2021.

Net investment income including funds withheld decreased by $5 million for the year ended December 31, 2021, relative to the same period in 2020. Net investment income comprises of interest and dividends received, net hedging expenses, as well as realized and unrealized gains and losses on financial instruments. Interest and dividends received increased reflecting the growth in the investment portfolio. Realized gains on investments increased in period as a result of funds withheld income from our first large-block reinsurance transaction. Net hedging expenses relate to costs incurred and mark to market movement associated with derivative contracts not directly related to the company's insurance operating companies' investment portfolios or insurance reserves. Net hedging expenses of $59 million in the year relate to costs incurred to entered into corporate hedges and are partially offset by positive mark to market of hedges entered into as at December 31, 2021. The decrease from 2020 was mainly due to net hedging expenses, partially offset by the increase in other type of net investment income.

Equity accounted income in 2021 of $8 million related to the company's investment in the common equity of AEL Holdings. The company originally acquired a 9.5% interest in AEL Holdings at the time of Spin-Off and the investment was treated as a financial asset. During 2021, as a result of a firm commitment to enter into the reinsurance agreement with American Equity Investment Life Insurance Company ("AEILIC"), we concluded that we had significant influence over AEL Holdings, and as such, derecognized the financial asset and recorded an equity accounted investment.

Gross benefits paid to policyholders increased by $247 million in 2021 due to the new reinsurance transactions and an increase in annuitants in-pay in new PRT business since the prior year period. Ceded benefits represent amounts received from reinsurers. Ceded benefits for the year ended December 31, 2021 decreased by $7 million as a result of the deferred financing associated with the ceding contract.

The gross change in insurance reserves in 2021 increased by $6.5 billion compared to the same period in 2020, primarily due to the two large-block reinsurance transactions closed as noted above, new PRT transactions closed and the impact of market movements.

Other reinsurance expenses increased by $19 million in 2021 due to the reinsurance transactions entered into during the year, resulting in additional reinsurance related expenses settled since the treaty effective dates.

Operating expenses increased by $29 million during 2021 compared to 2020 as a result of additional personnel, professional services and transaction expenses related to the build out of our business. We also recorded unrealized gains and premium cost of the options on our corporate hedging activities as at December 31, 2021 of $59 million. Subsequent to year end, in January 2022, we unwound the hedge positions for a life to date gain on the positions, and the realized gains were reflected in net income in the first quarter of 2022.

During 2021, DOE increased $29 million from the prior year to $30 million. The increase in DOE was a result of increased spread earnings within our PRT segment as a result of new business closed during the year, our proportionate share of earnings from our investment in AEL Holdings, and net earnings on our corporate investment portfolio.

CONSOLIDATED FINANCIAL POSITION

Comparison as at December 31, 2022 and December 31, 2021

The following table summarizes the financial position as at December 31, 2022 and December 31, 2021:

AS AT DEC. 31 US$ MILLIONS	2022	2021

December 31, 2022 vs. December 31, 2021

Total assets increased by $32.0 billion during the year to $43.5 billion. The increase in total assets included $29.7 billion related to assets of American National, as well as additional transactions closed within our PRT business and flow premiums from our existing reinsurance treaties.

Cash increased by $1.8 billion during the year primarily as a result of the acquisition of American National, contributing $1.4 billion of cash and cash equivalents as at December 31, 2022.

Investments increased by $23.2 billion over the year, primarily as a result of $21.9 billion of assets associated with the acquisition of American National, as well as assets from new business written within our PRT and Reinsurance segments, partially offset by the negative mark-to-market movements on fair valued investments.

Reinsurance funds withheld increased by $960 million over the year, primarily as a result of new flow business written within our AEILIC reinsurance treaty which included the addition of new products, as well as the contribution of positive mark-to-market valuations on the embedded derivative related to reinsurance funds withheld assets.

Deferred acquisition costs, which are costs that are directly related to writing new policyholder contracts are capitalized as deferred acquisition costs to the extent that they are recoverable from gross profits, increased by $956 million as a result of capitalized reinsurance costs associated with flow business within our Reinsurance segment, as well as new business written at American National for the period from May 25, 2022 to December 31, 2022. Deferred acquisitions costs are amortized over the life of the policies in proportion to the estimated gross profits.

Equity accounted investments increased $1.3 billion during the year, including $1.7 billion related to investments in associates within our American National subsidiary. The increase was partially offset by the equity accounted investment in AEL Holdings of $344 million as at December 31, 2021, which was reclassified to financial assets at the end of 2022.

Deferred tax assets increased $511 million during the year, primarily as a result of our acquisition of American National and was partially offset by deferred tax expenses generated within our PRT business.

Other assets increased $579 million during the year, primarily as a result of property, plant and equipment, prepaid pensions obligations and intangible assets within American National.

The increase in accrued investment income and reinsurance assets, as well as the addition of premiums due, investment properties, separate account assets and goodwill are also a result of the acquisition of American National.

Future policy benefits and policyholder account balances increased $21.6 billion during the year and included $19.7 billion related to American National policyholders, as well as new business written within our PRT and Reinsurance business during the year, partially offset by settlements and negative mark-to-market valuations on the fair value of reserves within our PRT business.

Corporate and subsidiary borrowings increased by $3.0 billion during the year, primarily as a result of $1.5 billion of acquisition financing related to the acquisition of American National, as well as $1.5 billion of short-term secured corporate borrowings and additional drawings on the company's revolving credit facility for the purpose of temporarily warehousing attractive investment opportunities that will be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings.

Due to related parties decreased by $158 million during the year, primarily as a result of the repayment of short-term loans from Brookfield in connection with the reinsurance transactions closed in 2021.

The company issued $2.5 billion of junior preferred shares to Brookfield during the year. While subordinate to the company's class A and B shares, the preferred shares are treated as a liability for accounting purposes.

The increase in policy and contract claims, unearned premium reserve, other policyholder funds, separate account liabilities and other liabilities were also a result of contributions from the acquisition of American National.

Adjusted equity, which represents the total economic equity of our Company through its Class A, B, and C shares, and Junior Preferred Shares, but excluding accumulated other comprehensive income, increased $3.4 billion to $4.9 billion, as a result of positive retained earnings and the Class C and preferred share issuances to Brookfield during the year, used to fund a portion of the American National acquisition.

SEGMENT REVIEW

The company's operations are organized into three operating segments: direct insurance, reinsurance and PRT.

We measure operating performance primarily using DOE which measures our ability to acquire net insurance assets at a positive margin, and invest these assets at a return that is greater than the cost of policyholder liabilities.

Direct Insurance

The following table presents Distributable Operating Earnings of our Direct Insurance segment for the years ended December 31, 2022, 2021 and 2020:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
DOE	**$ 394**	$ —	$ —

Comparison of the years ended December 31, 2022, 2021 and 2020

DOE within our Direct Insurance business represents contribution from American National for the period of May 25, 2022 to December 31, 2022. DOE in the year included contributions from our direct origination life and annuities business, benefiting from competitive sales performance and increasing investment performance. Our strong life and annuity earnings were further supplemented with P&C earnings, benefiting from our conservative approach to underwriting products. DOE related to our Direct Insurance business also includes financing costs associated with subsidiary borrowings and corporate overhead directly related to the segment.

Reinsurance

The following table presents Distributable Operating Earnings of our Reinsurance segment for the years ended December 31, 2022, 2021 and 2020:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
DOE	**$ 39**	$ 13	$ —

Comparison of the years ended December 31, 2022, 2021 and 2020

The company's Reinsurance operating companies commenced their operations in 2021 and closed its first two large-block transactions in the last four months of 2021. The company received cash and cash equivalents upon close of the transactions, and to date, we have redeployed over $5 billion of the assets, actively increasing our net investment yield relative to our cost of funds. DOE from our Reinsurance segment also includes our proportionate share of DOE from AEL Holdings, which we account for as an equity accounted investment from the third quarter of 2021 to the third quarter of 2022.

Pension Risk Transfer

The following table presents Distributable Operating Earnings of our PRT segment for the years ended December 31, 2022, 2021 and 2020:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
DOE	**$ 21**	$ 11	$ 1

Comparison of the years ended December 31, 2022, 2021 and 2020

For the year, the company closed 28 PRT deals (2021 - 26, 2020 - 15), representing $1.6 billion (2021 - $1.1 billion, 2020 - $432 million) of premiums. The increase in DOE from the prior year was a result of new business closed and the redeployment of assets into higher yielding investments, driving higher spread earnings from the prior periods, as well as the benefit of efficiencies as we scale our PRT business.

Liquidity and Capital Resources

CAPITAL RESOURCES

We attempt to maintain sufficient financial liquidity at all times so that we are able to participate in attractive opportunities as they arise, better withstand sudden adverse changes in economic circumstances within our operating subsidiaries and maintain payments to policyholders, as well as maintain distributions to our shareholders. Our principal sources of liquidity are cash flows from our operations, and access to the company's third-party credit facility, and our credit facility and equity commitment with Brookfield. We proactively manage our liquidity position to meet liquidity needs and continue to develop relationships with lenders who provide borrowing capacity at competitive rates, while looking to minimize adverse impacts on investment returns. We look to structure the ownership of our assets to enhance our ability to monetize them to provide additional liquidity, if needed. Our corporate liquidity for the periods noted below consisted of the following:

AS AT DEC. 31 US$ MILLIONS	2022	2021
Cash and cash equivalents	**$ 784**	$ 70
Liquid financial assets	**241**	243
Undrawn credit facilities	**544**	313
Total Corporate liquidity[1]	**$ 1,569**	$ 626

1. See "Performance Measures used by Management".

As of the date of this MD&A, our liquidity is sufficient to meet our present requirements for the foreseeable future. As part of the Spin-off, Brookfield provided to the company an equity commitment in the amount of $2.0 billion to fund future growth, which the company may draw on from time to time. The equity commitment may be called by the company in exchange for the issuance of class C shares or junior preferred shares. In addition, in connection with the Spin-off we entered into a credit agreement with Brookfield as the lender, providing for a three year revolving $400 million credit facility in addition to our $500 million revolving credit facility with external banks. We use the liquidity provided by our credit facilities for working capital purposes, and we may use the proceeds from the capital commitment to fund growth capital investments and acquisitions. The determination of which of these sources of funding the company will access in any particular situation will be a matter of optimizing needs and opportunities at that time. As of the date of this MD&A, there were no amounts drawn on the Brookfield facility.

Today, we have significant liquidity within our insurance portfolios, giving us flexibility to invest in a rising rate environment and secure attractive investment opportunities. Liquidity within our operating subsidiaries may be restricted from time to time due to regulatory constraints. As at December 31, 2022, the company's cash and cash equivalents included $784 million of unrestricted cash resources that can be deployed to fund corporate activities as needed.

AS AT DEC. 31 US$ MILLIONS	2022	2021
Cash and cash equivalents	**$ 2,145**	$ 393
Liquid financial assets	**17,769**	6,813
Undrawn credit facilities	**544**	313
Total liquidity[1]	**$ 20,458**	$ 7,519

1. See "Performance Measures used by Management".

Comparison of the years ended December 31, 2022, 2021 and 2020

The following table presents a summary of our cash flows and ending cash balances for the years ended December 31, 2022, 2021 and 2020:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Operating activities	**$ 107**	$ 1,581	$ 399
Investing activities	**(4,341)**	(3,864)	(385)
Financing activities	**5,994**	2,640	13
Cash and cash equivalents			
Cash and cash equivalents, beginning of the year	**393**	35	13
Net change during the year	**1,760**	357	27
Foreign exchange on cash balances held in foreign currencies	**(8)**	1	(5)
Cash and cash equivalents, end of the year	**$ 2,145**	$ 393	$ 35

Operating Activities

2022 vs. 2021

For the year ended December 31, 2022, we generated $107 million of cash from operating activities compared to $1.6 billion during 2021. The net decrease in the amount of cash generated in 2022 was primarily attributable to the absence of the large block coinsurance treaty closed in the prior year, which contributed $1.6 billion of net cash received on close of the transaction, which was partially offset by deferred acquisition costs on the reinsurance treaty.

2021 vs. 2020

For the year ended December 31, 2021, we generated $1.6 billion of cash from operating activities compared to $399 million during 2020. The greater amount of cash generated was primarily due to the coinsurance portion of the large block reinsurance treaty closed during the fourth quarter of 2021, which contributed $1 billion of net cash received on close of the transaction, net of total deferred acquisition costs.

Investing Activities

2022 vs. 2021

For the year ended December 31, 2022, we deployed $24 billion into new investments, including $4.1 billion relating to the acquisition of a 100% interest in American National, net of cash acquired, as well as $14 billion of redeployment into new investments within our insurance operating subsidiaries investment portfolios, which was primarily funded by the sales and maturities of liquid securities as we redeploy into higher-yielding strategies. The purchase and sales, net of maturities, resulted in net deployment of $4.3 billion of cash from investing activities, compared to $3.9 billion during the same period in 2021.

2021 vs. 2020

For the year ended December 31, 2021, we deployed $3.9 billion of cash from investing activities compared to $385 million during 2020. The greater amount of cash used in 2021 was primarily due to additional assets acquired from the reinsurance transactions, the larger number of PRT transactions during the year, portfolio rebalancing activities and additional investments held on the company's balance sheet outside of insurance and reinsurance agreements. The increase of cash used is mainly comprised of $6.0 billion of purchase of investments, partially offset by $2.1 billion of proceeds on disposal of investments.

Financing Activities

2022 vs. 2021

For the year ended December 31, 2022, we generated $6.0 billion of cash from financing activities compared to $2.6 billion generated in 2021. The cash generated in the current year primarily relates to the issuance of $2.5 billion of junior preferred shares, $450 million of Class C shares issued to Brookfield, and $1.5 billion of acquisition financing in connection with the purchase of American National, as well as $2.2 billion in additional borrowings to fund temporary corporate investments, the majority of which will be transferred into our insurance entities in the near term.

2021 vs. 2020

For the year ended December 31, 2021, we generated $2.6 billion of cash from financing activities compared to $13 million generated in the same period in 2020. The cash generated in 2021 related to $1.4 billion of cash received from the issuance of the class A exchangeable shares, class B shares and class C shares of the company during the year, and $1.1 billion of net corporate borrowings that temporarily funded corporate investments that were subsequently transferred into our insurance accounts in 2021.

Financial Instruments

To the extent that we believe it is economic to do so, our strategy is to hedge a portion of our equity investments and/or cash flows exposed to foreign currencies by the company. The following key principles form the basis of our foreign currency hedging strategy:

- We leverage any natural hedges that may exist within our operations;
- We utilize local currency debt financing to the extent possible; and
- We may utilize derivative contracts to the extent that natural hedges are insufficient.

As at December 31, 2022, our common equity was $1.5 billion and our adjusted equity was $4.9 billion. Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income.

Included in equity and adjusted equity was approximately $300 million invested in Canadian dollars. All cumulative translation adjustments recorded for the years ended December 31, 2022 and 2021 were related to foreign exchange movements on the Canadian dollar relative to the U.S. dollar.

As at December 31, 2022, we had a notional $2.6 billion (December 31, 2021 - $846 million) of foreign exchange forward contracts in place to hedge against foreign currency risk.

For additional information, see Note 4, “Financial Instruments” of the financial statements.

Future Capital Obligations and Requirements

Subsidiaries of the company have investment commitment agreements to the maximum of $5.4 billion exclusive of taxes and other operating expenses (December 31, 2021 - $463 million). As at December 31, 2022, $2.6 billion was funded (December 31, 2021 - $81 million). The amounts are recognized as loans and receivables, unrated bonds and private equity investments.

For additional information, see Note 26, “Financial Commitments and Contingencies” of the financial statements.

AS AT DEC. 31 2022 US$ MILLIONS	Payments due by year				
	Total	Less than 1 year	1- 3 years	4 - 5 years	More than 5 years
Future policy benefits	**$ 15,771**	$ 1,078	$ 2,142	$ 1,793	$ 10,758
Policyholders' account balances	**14,310**	1,288	2,576	1,717	8,729
Policy and contract claims	**1,786**	162	321	214	1,089

Brookfield Operating Results

An investment in the class A exchangeable shares of the company is intended to be, as nearly as practicable, functionally and economically, equivalent to an investment in Brookfield. A summary of Brookfield’s 2022 operating results is provided below:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Revenues	**$ 92,769**	$ 75,731	$ 62,752
Net income	**5,195**	12,388	707

Each class A exchangeable share has been structured with the intention of providing an economic return equivalent to one Brookfield Class A Share. We therefore expect that the market price of the class A exchangeable shares should be impacted by the market price of Brookfield Class A Shares and the business performance of Brookfield as a whole. In addition to carefully considering the disclosure made in this MD&A, you should carefully consider the disclosure made by Brookfield in its continuous disclosure filings. Copies of the Brookfield’s continuous disclosure filings are available electronically on EDGAR on the SEC’s website at www.sec.gov or on SEDAR at www.sedar.com.

Lines of Business

Direct Insurance

Following closing of the acquisition of American National, American National has become the platform for our third primary operating line: direct origination of life, annuity and property and casualty insurance policies, which we refer to as direct insurance.

American National, founded in 1905 and headquartered in Galveston, Texas, offers a broad spectrum of products and services through its subsidiaries, which include life insurance, annuities, property and casualty insurance, health insurance, credit insurance, and pension products. The American National companies operate in all 50 states, the District of Columbia and Puerto Rico.

Life Insurance

Whole Life. Whole life products provide a guaranteed benefit upon the death of the insured in return for the periodic payment of a fixed premium over a predetermined period. Premium payments may be required for the entire life of the contract, to a specified age or a fixed number of years, and may be level or change in accordance with a predetermined schedule. Whole life insurance includes some policies that provide a participation feature in the form of dividends. Policyholders may receive dividends in cash or apply them to increase death benefits or cash values available upon surrender, or reduce the premiums required to maintain the contract in-force.

Universal Life. Universal life insurance products provide coverage through a contract that gives the policyholder flexibility in premium payments and coverage amounts. Universal life products may allow the policyholder, within certain limits, to increase or decrease the amount of death benefit coverage over the term of the contract and to adjust the frequency and amount of premium payments. Universal life products are interest rate sensitive, and we determine the interest crediting rates during the contract period, subject to policy specific minimums. An equity-indexed universal life product is credited with interest using a return that is based, in part, on changes in an index, such as the Standard & Poor's 500 Index ("S&P 500"), subject to a specified minimum.

Variable Universal Life. Variable universal life products provide insurance coverage on a similar basis as universal life, except that the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the securities selected by the policyholder held in the separate account.

Credit Life Insurance. Credit life insurance products are sold in connection with a loan or other credit account. Credit life insurance products are designed to pay to the lender the borrower's remaining debt on a loan or credit account if the borrower dies during the coverage period.

Annuities

Deferred Annuities. A deferred annuity is an asset accumulation product. Deposits are received as a single premium deferred annuity or in a series of payments for a flexible premium deferred annuity. Deposits are credited with interest at our determined rates subject to policy minimums. For certain limited periods of time, usually from one to ten years, interest rates are guaranteed not to change. Deferred annuities usually have surrender charges that begin at issue and reduce over time and may have market value adjustments that can increase or decrease any surrender value. An equity-indexed deferred annuity is credited with interest using a return that is based, in part, on changes in an index, such as the S&P 500, subject to a specified minimum.

Single Premium Immediate Annuity ("SPIA"). A SPIA is purchased with one premium payment, providing periodic (usually monthly or annual) payments to the annuitant for a specified period, such as for the remainder of the annuitant's life. Return of the original deposit may or may not be guaranteed, depending on the terms of the annuity contract.

Variable Annuities. With a variable annuity, the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the separate account investment options selected by the policyholder. Our variable annuity products have no guaranteed minimum withdrawal benefits.

Property and Casualty

Personal Lines. Personal lines include insurance policies sold to individuals for auto, homeowners, and other similar exposures. Auto insurance covers specific risks involved in owning and operating an automobile. Homeowner insurance provides coverage that protects the insured owner's property against loss from perils. Other personal insurance provides coverage for property such as boats, motorcycles and recreational vehicles, and umbrella protection coverage.

Commercial Lines. Commercial lines are primarily focused on providing insurance to agricultural related operations and small to midsize businesses. This includes property and casualty coverage tailored for a farm, ranch, or other agricultural-related businesses. Commercial auto insurance is typically issued in conjunction with the sale of our policies covering farms, ranches, and businesses and covers specific risks involved in owning and operating motor vehicles. Business owners' property and liability insurance, workers' compensation insurance, and other commercial insurance encompassing umbrella protection coverage and other liability coverages, are also offered.

Specialty Markets. Specialty Markets products include renters, mortgage security, aviation, private flood, and credit insurance. Credit insurance provides protection to borrowers and the creditors that extend credit to them against unpaid indebtedness as a result of death, disability, involuntary unemployment, or untimely loss to the collateral securing a personal or mortgage loan.

- *Collateral* or *Creditor Protection Insurance* ("CPI"). CPI provides insurance against loss, expense to recover, or damage to personal property pledged as collateral (typically automobiles and homes) resulting from fire, burglary, collision, or other loss occurrence that would either impair a creditor's interest or adversely affect the value of the collateral. The coverage is purchased from us by the lender according to the terms of the credit obligation and charged to the borrower by the lender when the borrower fails to provide the required insurance.
- *Guaranteed Auto Protection* or *Guaranteed Asset Protection* ("GAP"). GAP insures the excess outstanding indebtedness over the primary property insurance benefits that may occur when there is a total loss to or an unrecovered theft of the collateral. GAP can be written on a variety of assets that are used as collateral to secure credit; however, it is most commonly written on automobiles.

As of December 31, 2022, American National and its subsidiaries had $19.7 billion of future policy benefits and policyholder account balances.

Reinsurance

Within our Reinsurance business, we are focused primarily on the reinsurance of annuity-based products, and will primarily seek to transact with direct insurers and other reinsurers.

Annuities are insurance contracts that provide a defined income stream, typically for retirement planning. Policyholders deposit money with an insurance company in return for a fixed stream of cash flows either immediately or in the future. Reinsurance is an arrangement whereby an insurance company, the reinsurer, agrees to indemnify another insurance company, referred to as the ceding company or cedant, for all or a portion of the insurance risks that are underwritten by the ceding company. Reinsurance serves multiple purposes, including to (1) transfer insurance risk off of a ceding company's balance sheet, enabling it to more efficiently manage balance sheet capacity to increase the volume of business it can underwrite (2) stabilize a ceding company's operating results, (3) assist the cedant in achieving applicable regulatory requirements, and (4) optimize the overall financial strength and capital structure of the cedant.

Reinsurance may be structured as a block transaction, pursuant to which a reinsurer contractually assumes assets and liabilities associated with an in-force book of business, or as a flow arrangement, pursuant to which a reinsurer contractually agrees to assume assets and liabilities for future business.

We primarily seek to reinsure three types of annuity products: fixed annuities, fixed index annuities and payout annuities.

Fixed Annuities

A fixed annuity ("FA") is a type of insurance contract that provides a fixed rate of investment return (often referred to as a crediting rate) for a specified period of time. Fixed rate reset annuities have a crediting rate that is typically guaranteed for a period of one year, after which insurers are able to change the crediting rate at their discretion, generally to any rate at or above a previously guaranteed minimum rate.

Insurers earn income on FA contracts by generating a net investment spread, which is based on the difference between income earned on the investments supporting the liabilities and the crediting rate owed to customers.

Fixed Index Annuities

A fixed index annuity ("FIA") is an insurance contract in which the policyholder makes one or more premium deposits that earn interest at a crediting rate based on a specified market index. Policyholders are entitled to recurring or lump sum payments for a specified period of time. FIAs provide policyholders with the ability to earn interest without significant downside risk to their principal balance. A market index tracks the performance of a specific group of stocks or other assets representing a particular segment of the market, or in some cases, an entire market. A policyholder's crediting rate in relation to a market index is based on the change in the relevant market index, subject to a pre-defined cap (a maximum rate that may be credited), spread (a credited rate determined by reducing a specific rate from the index return) and/or a participation rate (a credited rate equal to a percentage of the index return).

Insurers earn income on FIA contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

Payout Annuities

A payout annuity is an income-generating insurance product. In exchange for a lump-sum premium, the policyholder receives a series of guaranteed income payments for one lifetime, two lifetimes, or a specified period of time.

Insurers earn income on payout annuity contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

We operate our Reinsurance business through licensed operating companies, North End Re (Cayman) SPC ("NER SPC") and North End Re Ltd ("NER Ltd."). As of the date of this MD&A, our subsidiaries have reinsurance and retrocession agreements with two third parties to reinsure a block of U.S. annuities and fixed indexed annuities. As of December 31, 2022, NER SPC and NER Ltd. had $5.9 billion and $1.5 billion (December 31, 2021 - $4.7 billion and $1.6 billion, respectively) of future policy benefits, respectively.

Pension Risk Transfer

PRT is the transfer by a corporate sponsor of the risks (or some of the risks) associated with the sponsorship and administration of a pension plan, in particular, investment risk and longevity risk, which is the risk of an increase in life expectancy of plan beneficiaries. These risks can be transferred either to an insurer like us through a group annuity transaction, or to an individual through a lump-sum settlement payment. PRT using insurance typically involves a single premium group annuity contract that is issued by an insurer, permitting the corporate pension plan sponsor to discharge certain pension plan liabilities from its balance sheet.

A PRT insurance transaction may be structured as either a buy-out annuity or a buy-in annuity. Under a buy-out annuity, a direct insurer enters into a group annuity contract with the plan sponsor and assumes the liability to fund, administer, and pay benefits covered under the contract directly to the individual pension plan members covered under the contract. Under a buy-in annuity, the insurer enters into a group annuity contract with the plan sponsor and is liable to fund and pay the benefits covered under the contract to the pension plan fund, with the plan sponsor retaining the liability to administer and pay pension benefits to plan members. In both cases, the insurer assumes the investment and longevity risk.

Insurers earn income on buy-out and buy-in group annuities by generating a net investment spread, which is based on the difference between income earned on the investments supporting the annuity contract and the cost of the pension liabilities assumed.

Today, our PRT business is operated in Canada and the United States. Our Canadian PRT business is operated through Brookfield Annuity Company ("BAC"), a Canadian domiciled, licensed and regulated direct life insurance company that provides PRT solutions to organizations across Canada. Under American National, we also operate a U.S. PRT business, and successfully completed its first PRT transaction in December 2022. Our North American PRT businesses are led by a team of experts in group annuities, pensions, insurance and investments.

As of December 31, 2022, we had $3.0 billion (December 31, 2021 - $2.2 billion) of future policy benefits related to PRT.

Industry Trends and Factors Affecting Our Performance

As a financial services business providing capital based solutions to the insurance industry, we are affected by numerous factors, including global economic and financial market conditions. Price fluctuations within equity, credit, commodity and foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the performance of our business. We also monitor factors such as consumer spending, business investment, the volatility of capital markets, interest rates, unemployment and the risk of inflation or deflation, which affect the business and economic environment and, in turn, impact the demand for the type of financial and insurance products offered by our business. We believe the following current trends present significant opportunities for us to grow our business.

- **Financial market volatility and dislocations across asset classes favor insurers with diverse investment portfolios and access to alternative credit.** Insurers primarily invest in public market fixed income products and are exposed to public market valuations. Insurers with an ability to diversify investment portfolios to include alternative and private credit assets provides more favorable investment performance.
- **Many insurers are looking for ways to shift toward less asset-intensive insurance products.** Given the capital-intensive nature of life and annuity liabilities, many insurance companies with diversified exposure are looking to reduce their exposure to life and annuity products, including through reinsurance, in order to free up capital that they can deploy in support of less asset-intensive products and business lines.
- **Recent market conditions are exposing under-capitalized companies.** Some writers of annuity products are facing higher hedging costs amidst volatile markets, and changes in regulatory standards are increasing the transparency of liability valuations in the current low-rate environment. This has necessitated a need to raise or otherwise free up capital, and the reinsurance market offers writers of annuity products an opportunity to do so. We have access to capital and are able to provide capital support to these companies.
- **Public market valuations have compressed while capital needs have grown.** Insurers are trading at cyclical lows, and given the prevailing market environment, are looking to partner with organizations like ours that can provide solutions to address capital needs.

Market Risk

Our Statements of Financial Position within our financial statements include substantial amounts of assets and liabilities whose fair values are subject to market risks. Our significant market risks are primarily associated with interest rates, foreign currency exchange rates and credit risk. The fair values of our investment portfolios remain subject to considerable volatility. The following sections address the significant market risks associated with our business activities.

Foreign Exchange Rate Risk

The company's obligations under its insurance contracts are denominated in Canadian and United States dollars but a portion of the assets supporting these liabilities are denominated in non-Canadian and non-United States dollars. We manage foreign exchange risk using foreign exchange forwards. Our investment policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

Our net assets are subject to financial statement translation into U.S. Dollars. All of our financial statement translation-related impact from changes in foreign currency rates is recorded in other comprehensive income.

Interest Rate Risk

Interest rates currently increased in many jurisdictions in which we operate in 2022 but remain at relatively low levels by historical standards. The company's asset liability management practices and interest rate risk management allows the company to mitigate the impact of interest rate volatility on the business. However, sudden or unexpected changes in interest rates may cause certain market dislocations that could negatively impact our financial performance. Interest rate increases would also increase the amount of cash required to service our obligations and our earnings could be adversely impacted as a result thereof.

The company manages interest rate risk through their asset liability management, which we refer to as ALM, the framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance reserves. Within the context of the ALM framework, we use derivatives including interest rate swaps and futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

Other Price Risk

Other price risk is the risk of variability in fair value due to movements in equity prices or other market prices such as commodity prices and credit spreads.

The company's exposure to the equity markets is managed by sector and individual security and is intended to track the S&P 500 with minor variations. The company mitigates the equity risk by diversification of the investment portfolio.

The company also has equity risk associated with the equity-indexed life and annuity products the company issues. The company has entered into derivative transactions, primarily over-the-counter equity call options, to hedge the exposure to equity-index changes.

Credit Risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The company is primarily exposed to credit risk through its investments in debt securities.

We manage exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in our investment policy.

Insurance Risk

The company makes assumptions and estimates when assessing reinsurance and insurance risks, and significant deviations, particularly with regards to longevity and policyholder behavior, could adversely affect our business, financial condition, results of operations, liquidity and cash flows. All transaction terms are likely to be determined by qualitative and quantitative factors, including our estimates. If we reinsure a block of business, there can be no assurance that the transaction will achieve the results expected at the time of the block’s acquisition. These transactions expose us to the risk that actual results materially differ from those estimates.

We manage insurance risk through choosing whether to purchase reinsurance for certain amounts of risk underwritten within our pension risk transfer business, and we may also look to further reinsure certain amounts of risk we assume under our reinsurance agreements.

Legal Risk

In the future we may be parties in actions that routinely arise out of the normal course of business, including legal actions seeking to establish liability directly through insurance contracts or indirectly through reinsurance contracts issued by our subsidiaries. Plaintiffs occasionally seek punitive or exemplary damages. We do not believe that such normal and routine litigation will have a material effect on our financial condition or results of operations. We are also involved from time to time in other kinds of legal actions, some of which assert or may assert claims or seek to impose fines and penalties. We believe that any liability that may arise as a result of other pending legal actions will not have a material effect on our financial statements.

Operational Risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The company’s internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

We have significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board of Directors.

Disaster recovery and business continuity plans have also been established to manage the company's ability to operate under adverse conditions.

Critical Accounting Policy and Estimates

The preparation of the financial statements requires management to make critical judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses that are not readily apparent from other sources, during the reporting period. These estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years.

Critical judgments made by management and used in preparing the financial statements, are summarized below:

i. Future policy benefits

Contract classifications

Contracts under which the company accepts significant insurance risk from a policyholder are classified as insurance contracts in accordance with IFRS 4 Insurance Contracts ("IFRS 4") on the Statements of Financial Position. A contract is considered to have significant insurance risk if, and only if, an insured event could cause an insurer to make significant additional payments in any scenario, excluding scenarios that lack commercial substance at the inception of the contract. Contracts under which the company does not accept significant insurance risk are classified as either investment contracts or considered a service contract and are accounted for in accordance with IAS 39 Financial Instruments: Recognition and Measurement or IFRS 15 Revenue from Contracts with Customers, respectively. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its term, even if the insurance risk reduces significantly during the year, unless all rights and obligations are extinguished or expire. Investment contracts can be reclassified as insurance contracts if insurance risk subsequently becomes significant.

Measurement

Future policy benefits are determined by BAC using the Canadian Asset Liability Method ("CALM"), in accordance with the standards of the Canadian Institute of Actuaries ("CIA") and as permitted by IFRS 4. BAC's Appointed Actuary is responsible for determining the amount of future policy benefits in accordance with standards established by the CIA. CALM is used to determine future policy benefits and incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation and inflation. Margins for adverse deviation are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions, and provide reasonable assurance that future policy benefits cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

Future policy benefits are determined by NER Ltd. using a reserve methodology under accounting principles generally accepted in the United States of America ("US GAAP"), as permitted by IFRS 4. Future policy benefits are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges. These are equal to the balance that accrues to the benefit of the policyholders as of the reporting date (commonly referred to as the account value), including policyholders' accumulated net deposits plus a guaranteed rate of interest credited, less policyholder deaths and withdrawals. Future policy benefits are further evaluated using accepted actuarial valuation methods based on assumptions related to mortality, withdrawals, surrender and deposit rates, determined when the policies are assumed.

Future policy benefits are determined by NER SPC using US GAAP reserve methodology, as permitted by IFRS 4. Future policy benefits for fixed index annuity contracts (with embedded derivatives) are carried at fair value with an explicit margin added to the mortality, lapse and partial withdrawal assumptions. The host contract and the embedded derivative are bifurcated. The embedded derivative cash flows incorporate a risk margin and are discounted using a rate that reflects our own credit rating. The host contract is established at contract inception as the initial value less the initial fair value of the embedded derivative and accreted over the policy's life. The host value's accretion rate is updated each quarter so that the present value of the actual and expected guaranteed cash flows is equal to the initial host.

An additional liability is established for Life Income Benefit Rider ("LIBR") benefits -withdrawals paid after the contract account value is exhausted. The liability accrues in proportion to contractual assessments using the crediting interest rate. The present value of expected excess benefits and assessments is projected over a range of stochastic equity scenarios. Retrospective unlocking is performed by replacing mean stochastic projected assessments and benefits with actual, revising projections of future experience and resolving for the portion of assessments required.

Key reserve assumptions are based on industry standard data adjusted to align with actual experience, if necessary. The company periodically reviews actual and anticipated experience compared to the assumptions used to establish future policy benefit reserves. Due to the many assumptions and estimates used in establishing reserves, and the long-term nature of the reinsurance contracts, the reserving process, while based on standard actuarial practices, is inherently uncertain.

Future policy benefits are determined by American National using US GAAP reserve methodology, as permitted by IFRS 4. Liabilities for future policy benefits for traditional products have been provided on a net level premium method based on estimated investment yields, withdrawals, mortality, and other assumptions that were appropriate at the time the policies were issued. Upon acquisition, the fair value of future policy benefits was determined using a Defined Valuation Net Premium (DVMP) method. Key assumptions used in calculating the fair value of future policy benefits include the net to gross premium ratio, discount rates and Provisions for Adverse Deviation (PADs) including mortality and inflation. Estimates are based on historical experience adjusted for possible adverse deviation. These estimates are periodically reviewed and compared with actual experience. When it is determined that future expected experience differs significantly from existing assumptions, the estimates are revised for current and future issues.

Included within future policy benefits are amounts related to certain contracts or blocks of business that have negative VOBA. Negative VOBA is amortized over the duration of the respective contracts, being 30 years using the straight-line method. We record the fair value of the liabilities assumed in two components: reserves and VOBA. Reserves are established using our best estimate assumptions consistent with the policies described below for future policy benefits and interest sensitive contract liabilities. VOBA is the difference between the fair value of the liabilities and the reserves. Any negative VOBA is recorded within the associated reserves.

ii. Deferred acquisition costs and value of business acquired

Deferred policy acquisition costs ("DAC") are capitalized costs related directly to the successful acquisition of new or renewal insurance contracts. Significant costs are incurred to acquire insurance, reinsurance, and annuity contracts, including commissions and certain underwriting, policy issuance, and processing expenses.

DAC on Reinsurance business is amortized over the life of the policies in proportion to the estimated gross profits. Costs that are directly related to the successful acquisition of reinsurance contracts are capitalized as DAC to the extent that they are recoverable from gross profits. These costs consist of commission and policy issuance costs, as well as sales inducements credited to policyholder account balances.

Effective October 1, 2022, the company made a change in accounting policy to treat the difference between the amount paid for reinsurance contracts and the amount of the liabilities for policy benefits relating to the underlying reinsured contracts as the cost of reinsurance that is deferred and amortized over the reinsurance contract. This was applied retrospectively as it resulted in reliable and more relevant information about the effects of the reinsurance treaty on the company's financial conditions and performance.

DAC on traditional life, including limited-pay contracts, and health products is amortized with interest over the anticipated premium-paying period of the related policies in proportion to the ratio of annual premium revenue expected to be received over the life of the policies. Expected premium revenue is estimated by using the same mortality, morbidity, and withdrawal assumptions used in computing liabilities for future policy benefits.

DAC on universal life and investment-type contracts is amortized as a level percentage of the present value of anticipated gross profits from investment yields, mortality, and surrender charges. The effect of the realization of unrealized gains (losses) on DAC is recognized in net unrealized loss on available for sale securities in the Statements of Financial Position as of the reporting date. A change in interest rates could have a significant impact on DAC calculated for these contracts.

DAC associated with property and casualty business is amortized over the coverage period of the related policies, in relation to premiums earned.

DAC on participating whole life products is amortized in proportion to estimated gross margins. Estimated gross margins are equal to premiums, plus investment income, less benefits, less expenses not included in DAC, less the change in reserves, less dividends.

For short-duration and long-duration contracts, DAC is grouped consistent with the manner in which insurance contracts are acquired, serviced, and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. Investment income is anticipated in assessing the recoverability of DAC for short-duration contracts.

Value of Business Acquired ("VOBA") is the intangible asset representing the value assigned to contracts already in force.

In conjunction with the acquisition of insurance policies or investment contracts, a portion of the purchase price is allocated to the right to receive future gross profits from cash flows and earnings of associated insurance policies and investment contracts. This intangible asset is based on the actuarially estimated present value of future cash flows from associated insurance policies and investment contracts acquired. The estimated present value of future cash flows used in the calculation of VOBA is based on certain assumptions, including mortality, persistency, expenses and interest rates that the company believes to be those of a market participant. The company amortizes VOBA based on the estimated premium earning patterns.

iii. Reinsurance funds withheld

Reinsurance funds withheld is a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which NER Ltd. and NER SPC, indirect wholly owned subsidiaries of the company, act as reinsurers. The receivable represents assets that are held in custodial accounts that are legally segregated from the third-party ceding companies' general accounts and are managed by NER Ltd. and NER SPC. The assets are typically cash and cash equivalents and fixed income asset types. In the event of ceding companies' insolvency, NER Ltd. and NER SPC would need to assert a claim on the assets supporting the reserve liabilities. However, NER Ltd. and NER SPC have the ability to offset amounts owed to the ceding companies. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets, in a fashion similar to the invested assets held directly by NER Ltd. and NER SPC. The underlying agreements contain embedded derivatives as discussed in Derivative financial instruments (Note 2(l)).

iv. Reinsurance assumed

NER Ltd. closed a retrocession agreement on September 3, 2021 with a third party insurance company to reinsure multi-year guarantee fixed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of April 1, 2021, representing the date on which the company has the reinsurance contractual obligations.

NER Ltd. assumes insurance contracts under modified coinsurance arrangements ("Modco arrangements").

Assets and liabilities assumed under Modco arrangements are presented gross on the balance sheet. For insurance contracts, the change in assumed reserves and benefits are presented as change in insurance reserves on the Statements of Operations. Assumed premiums are included in premiums on the Statements of Operations. Expenses outside of account value, such as commissions and federal excise taxes, are included in other reinsurance expenses in the Statements of Operations.

NER SPC closed a retrocession agreement on October 8, 2021 with an insurance company which was the company's associate to reinsure fixed indexed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of July 1, 2021, representing the date on which the company has the reinsurance contractual obligations.

NER SPC assumes insurance contracts under Modco arrangements and Coinsurance. NER SPC generally has the right of offset on reinsurance contracts but have elected to present reinsurance settlement amounts due to and from the cedant on a gross basis.

v. Reinsurance assets

In the normal course of business, BAC and American National are users of reinsurance in order to limit the potential for losses arising from certain exposures. To the extent that third party reinsurers are unable to meet their obligations, BAC and American National remain liable to its policyholders for the portion reinsured.

Reinsurance assets are estimated amounts due to the company from reinsurers related to paid and unpaid ceded claims and claim adjustment expenses ("CAE") and are presented net of a reserve for collectability. Recoveries of gross ultimate losses under our non-catastrophe reinsurance are estimated by a review of individual large claims and the ceded portion of IBNR using assumed distribution of loss by percentage retained. Recoveries of gross ultimate losses under our catastrophe reinsurance are estimated by applying reinsurance treaty terms to estimates of gross ultimate losses. The most significant assumption is the average size of the individual losses for those claims that have occurred but have not yet been reported and our estimate of gross ultimate losses. The ultimate amount of the reinsurance ceded recoverable is unknown until all losses settle.

At each reporting date, the reinsurance assets, if any, are assessed for impairment. If there is objective evidence that the reinsurance assets are not recoverable and the impact of the event can be reliably measured, an impairment loss is recognized for the amount by which the carrying amount exceeds the recoverable amount.

vi. Policyholders’ account balances

Policyholders' account balances represent the contract value that has accrued to the benefit of the policyholders related to universal-life and investments-type contracts. For fixed products, these are generally equal to the accumulated deposits plus interest credited, reduced by withdrawals, payouts, and accumulated policyholder assessments. Indexed product account balances are equal to the sum of host and embedded derivative reserves computed per derivative accounting guidance.

vii. Policy and contract claims

Policy and contract claims are established to provide for the estimated costs of paying claims. These reserves include estimates for both case reserves and incurred but not reported claims (“IBNR”) liabilities. Case reserves include the liability for reported but unpaid claims. IBNR liabilities include a provision for potential development on case reserves, losses on claims currently closed which may reopen in the future, as well as IBNR claims. These liabilities also include an estimate of the expense associated with settling claims, including legal and other fees, and the general expenses of administering the claims adjustment process.

viii. Other policyholder funds

Other policyholder funds consist of liabilities related to dividends payable on participating business. For the majority of this participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends, less net income allocated to stockholders, as well as a pro rata portion of unrealized investment gains (losses), net of tax.

ix. Deferred revenue

The deferred revenue for interest-sensitive life and investment-type contracts is amortized over the life of the policies. Different amortization methods are permissible, one of these methods being present value of estimated gross profits. However, if estimated gross profits are expected to be negative, alternative amortization techniques are to be used. Given the absence of initial profits for NER Ltd., the deferred revenue is amortized by number of in-force policies. Estimates of in-force policy numbers are based on assumptions using accepted actuarial methods. Amortization is recorded in total revenue within the Statements of Operations.

x. Premium, benefits, claims incurred, and expenses

Traditional ordinary life and health premiums are recognized as revenue when due. Benefits and expenses are associated with earned premiums to result in recognition of profits over the term of the insurance contracts.

Annuity premiums received on limited-pay and supplemental annuity contracts involving a significant life contingency are recognized as revenue when due. Deferred annuity premiums are recorded as deposits rather than recognized as revenue. Revenues from deferred annuity contracts are principally surrender charges and, in the case of variable annuities, administrative fees assessed to contract holders.

Universal life and single premium whole life revenues represent amounts assessed to policyholders including mortality charges, surrender charges actually paid, and earned policy service fees. Amounts included in benefits are claims in excess of account balances returned to policyholders and interest credited to account balances.

Property and casualty premiums are recognized as revenue over the period of the contract in proportion to the amount of insurance protection, which is generally evenly over the contract period. Claims incurred consist of claims and CAE paid and the change in reserves.

Gross premiums for PRT and reinsurance issued are recognized as revenue when due and collection is reasonably assured. When premiums are recognized, future policy benefits are computed, the result being that benefits and expenses are matched with such revenue. Premiums ceded are recognized when due and in accordance with the terms of the contractual agreement between the company and reinsurer. Premium refunds, if any, are recognized on an accrual basis. Gross benefits and benefits ceded are recorded in the Statements of Operations when they are due and incurred.

xi. Investment in associates, joint ventures and other limited partnership interests

Associates are entities over which the company exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but without control or joint control over those policies. Joint ventures are joint arrangements whereby the parties that have joint control of the arrangement have the rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control over an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Other limited partnership interests are partnership arrangements in which the company has the ability to exercise significant influence over the investee's operations, but it does not have a controlling interest and is not the primary beneficiary.

The equity method is used to account for the company's investments in associates, joint ventures and other limited partnership interests within the Statements of Financial Position and the Statements of Operations.

Interests in associates, joint ventures and other limited partnership interests accounted for using the equity method are initially recognized at cost. At the time of initial recognition, if the cost of the associate or joint venture or other limited partnership interests is lower than the proportionate share of the investment's underlying fair value, the company records a gain on the difference between the cost and the underlying fair value of the investment in net income. If the cost of the associate or joint venture or other limited partnership interests is greater than the company's proportionate share of the underlying fair value, goodwill relating to the associate or joint venture or other limited partnership interests is included in the carrying amount of the investment.

Subsequent to initial recognition, the carrying value of the company's interest in an associate or joint venture or other limited partnership interests is adjusted for the company's share of comprehensive income and distributions of the investee. Profit and losses resulting from transactions with an associate or joint venture or other limited partnership interests are recognized in the financial statements based on the interests of unrelated investors in the investee. The carrying value of associates or joint ventures or other limited partnership interests is assessed for impairment indicators at each reporting date. Impairment losses on equity accounted investments may be subsequently reversed in net income. Further information on equity accounted investments is available in Note 7.

xii. Structured entities

The company invests a portion of its assets in structured entities that issue debt and preferred securities to subsidiaries of the company, and its reinsurance treaty accounts. The company controls these entities, and as a result, these entities are consolidated within the company's financial statements. The company assesses the variable returns determination for the structured entities on an ongoing basis.

Liabilities of the entities that do not eliminate upon consolidation are recorded as liabilities of structured entities.

The carrying amount of the company's investment in the consolidated structured entities is determined in accordance with the company's accounting policies for the underlying securities held within the structured entities.

xiii. Goodwill

Goodwill is measured as the excess of the sum of the consideration transferred over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. Goodwill is allocated to the cash-generating unit or units to which it relates. The company identifies cash-generating units as identifiable groups of assets that are largely independent of the cash inflows from other assets or groups of assets.

Goodwill is evaluated for impairment annually or more often if events or circumstances indicate there may be impairment. Impairment is determined for goodwill by assessing if the carrying value of a cash-generating unit, including the allocated goodwill, exceeds its recoverable amount determined as the greater of the estimated value-in-use and fair value less costs of disposal. Impairment losses recognized in respect of a cash-generating unit are first allocated to the carrying value of goodwill and any excess is allocated to the carrying amount of assets in the cash-generating unit. Any goodwill impairment is charged to profit or loss in the period in which the impairment is identified. Impairment losses on goodwill are not subsequently reversed. In the year of a business acquisition, the recoverability of the acquired goodwill is assessed by revisiting the assumptions of the related underwriting model.

The company assesses the impairment of goodwill by reviewing the value-in-use or fair value less costs of disposal of the cash-generating units to which goodwill has been allocated. The company uses the following significant assumptions and estimates: the circumstances that gave rise to the goodwill, timing and amount of future cash flows expected from the cash-generating unit, discount rates, terminal capitalization rates, terminal valuation dates, useful lives and residual values.

Future Accounting Policy Changes

Our Company will be converting from IFRS to US GAAP as our accounting framework for the period beginning January 1, 2023. The purpose of the conversion is to better align our financial statements and related disclosures with our peer set and use a framework that we think will be more familiar to potential ceding company clients. The conversion for the period beginning January 1, 2023 was determined given the new accounting standards for Insurance Contracts under US GAAP (ASU 2018-12 Long-Duration Targeted Improvement, or LDTI) has an effective implementation date of January 1, 2023. However, the company's financial statements for the year ended December 31, 2022 will be reported under IFRS and our financial statements will be reported under US GAAP beginning with the first quarter of 2023.

Performance Measures Used by Management

To measure performance, we focus on net income and total assets, as well as certain non-IFRS measures, including Distributable Operating Earnings and Adjusted Equity. In addition, we provide certain metrics such as Total Corporate Liquidity and Total Liquidity which we believe are useful to investors to provide additional insights into assets within the business available for redeployment. Refer to the "Segment Review" section of this MD&A for further discussion on our performance measures as at December 31, 2022, and for the years ended December 31, 2022, 2021 and 2020.

Non-IFRS Measures

We regularly monitor certain Non-IFRS measures that are used to evaluate our performance and analyze underlying business performance and trends. We use these measures to establish budgets and operational goals, manage our business and evaluate our performance. We also believe that these measures help investors compare our operating performance with our results in prior years. These Non-IFRS financial measures are provided as supplemental information to the financial measures presented in this MD&A that are calculated and presented in accordance with IFRS. These Non-IFRS measures are not comparable to IFRS and may not be comparable to similarly described Non-IFRS measures reported by other companies, including those within our industry. Consequently, our Non-IFRS measures should not be evaluated in isolation, but rather, should be considered together with the most directly comparable IFRS measure in our consolidated financial statements for the years presented. The Non-IFRS financial measures we present in this MD&A should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with IFRS. During the year, Excess Capital and Net Reserve capital were no longer used as Non-IFRS measures as following the completion of the American National acquisition, the majority of equity within the business is deployed into insurance operating companies.

Distributable Operating Earnings

Distributable Operating Earnings is a key measure of our financial performance. We use Distributable Operating Earnings to assess operating results and the performance of our businesses. We define distributable operating earnings as net income excluding the impact of depreciation and amortization, deferred income taxes, income from equity accounted investments, mark-to-market on investments, reserves and derivatives, breakage and transaction costs, and is inclusive of our share of adjusted earnings from our investments in associates.

Distributable operating earnings is a measure of operating performance. We use distributable operating earnings to assess our operating results. Distributable Operating Earnings is a measure of operating performance that is not calculated in accordance with, and does not have any standardized meaning prescribed by IFRS as issued by the IASB. Distributable Operating Earnings is therefore unlikely to be comparable to similar measures presented by other issuers.

We believe our presentation of Distributable Operating Earnings is useful to investors because it supplements investors' understanding of our operating performance by providing information regarding our ongoing performance that excludes items we believe do not directly affect our core operations. Our presentation of Distributable Operating Earnings also provide investors enhanced comparability of our ongoing performance across years.

Adjusted Equity

Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. We use Adjusted Equity to assess our return on our equity.

For further details regarding our use of our Non-IFRS measures, as well as a reconciliation of net income and total equity to these measures, see the "Reconciliation of Non-IFRS Measures" section of this MD&A.

Reconciliation of Non-IFRS Measures

The following table reconciles our net income to Distributable Operating Earnings:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2022**	2021	2020
Net income	**$ 492**	$ (44)	$ 1
Deferred income tax expense	**47**	2	—
Junior preferred share dividends	**67**	—	—
Transaction costs	**31**	8	—
Equity accounted (income) loss	**(54)**	(8)	—
Depreciation	**13**	—	—
Mark-to-market on investments and reserves	**(208)**	72	—
Distributable Operating Earnings	**$ 388**	$ 30	$ 1

The following table reconciles our equity to Adjusted Equity:

AS AT DEC. 31 US$ MILLIONS	**2022**	2021	2020
Total equity	**$ 1,457**	$ 1,435	$ 83
Add:			
Accumulated Other Comprehensive Loss (Income)	**883**	16	(4)
Preferred shares	**2,512**	—	—
Adjusted equity	**$ 4,852**	$ 1,451	$ 79

Forward-Looking Information

In addition to historical information, this MD&A contains "forward-looking information" within the meaning of applicable securities laws. Forward-looking information may relate to the company and Brookfield's outlook and anticipated events or results and may include information regarding the financial position, business strategy, growth strategy, budgets, operations, financial results, taxes, dividends, distributions, plans and objectives of the company. Particularly, information regarding future results, performance, achievements, prospects or opportunities of the company, Brookfield's or the Canadian, U.S. or international markets is forward-looking information. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "targets", "expects" or "does not expect", "is expected", "an opportunity exists", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate" or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might", "will" or "will be taken", "occur" or "be achieved".

The forward-looking statements are based on our beliefs, assumptions and expectations of future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or within our control. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. The following factors, among others, could cause our actual results to vary from our forward-looking statements:

We caution that the factors that may affect future results described in this MD&A are not exhaustive. The forward-looking statements represent our views as of the date of this MD&A and should not be relied upon as representing our views as of any date subsequent to the date of this MD&A. While we anticipate that subsequent events and developments may cause our views to change, we disclaim any obligation to update the forward-looking statements, other than as required by applicable law. For further information on these known and unknown risks, please see "Risk Factors" included in our most recent Annual Report on Form 20-F and other risks and factors that are described therein.

In addition to the “Risk Factors” included in our most recent Annual Report on Form 20-F and other risks and factors that are described therein, the company has identified new risk factors following the company’s acquisition of American National on May 25, 2022. You should carefully consider these risk factors in addition to the “Risk Factors” set forth in our most recent Annual Report on Form 20-F and other information in this MD&A.

Risks Relating to Our Operating Subsidiaries and Industry

Changes in interest rates and credit spreads, which are out of our control, can materially and adversely affect our financial condition and results of operations.

Interest rates have a significant impact on our business and on consumer demand for our products. Low interest rates reduce the spreads between the amounts we credit to fixed annuity and individual life policyholders in our U.S. Direct Insurance business and the amounts we earn on the investments that support these obligations, which in turn may impact the performance of our business. Although we seek to mitigate the impact of low interest rates through actions such as reducing the guaranteed minimum crediting rates on new fixed annuity contracts and reducing crediting rates on in-force contracts, where permitted to do so, there is no guarantee that such actions will completely offset the impact of a low interest rate, and our sales volume may be negatively impacted as a result. Our ability to decrease product crediting rates in response may be limited by market and competitive conditions and by regulatory or contractual minimum rate guarantees.

A gradual increase in longer-term interest rates relative to short-term rates generally will have a favorable effect on the profitability of products within our U.S. Direct Insurance business – particularly interest-sensitive life insurance and fixed annuities. However, rapidly rising interest rates could result in reduced persistency of our spread-based products if contract holders shift assets into higher yielding investments. Increasing rates on other insurance or investment products offered by competitors may also lead to higher surrenders by customers within certain segments of our U.S. Direct Insurance business. We may react to market conditions by increasing crediting rates, which narrows our “spread,” or the difference between the amounts we earn on investments and the amount we must pay under our contracts.

While we maintain a diversified investment portfolio comprised of assets with various maturities to support product liabilities and ensure liquidity and use asset liability management processes to mitigate the effect on our spreads of changes in interest rates, they may not be fully effective.

The interest rate environment affects estimated future profit projections, which could impact the amortization of our deferred policy acquisition costs ("DAC") assets and the estimates of policyholder liabilities within our U.S. domestic insurance business. Significantly lower future estimated profits may cause us to accelerate the amortization of DAC or require us to establish additional policyholder liabilities, thereby reducing earnings. We periodically review assumptions with respect to future earnings to ensure they remain appropriate considering the current interest rate environment.

Low interest rates are also challenging for property and casualty insurers. Investment income is an important element in earning an acceptable return on capital. Lower interest rates resulting in lower investment income require us to achieve better underwriting results. Within our U.S. Direct Insurance business, we have adjusted policy prices to help mitigate the adverse impact of low interest rates on our property and casualty business.

In a low interest rate environment, we may be forced to reinvest proceeds from investments that have matured or have been prepaid or sold at lower yields, which will reduce our “net investment spread” or the difference between the amounts that we are required to pay under the contracts in our general account and the rate of return we earn on general account investments intended to support the obligations under such contracts. A decline in market interest rates or credit spreads could have an adverse effect on our investment income as we invest cash in new investments that may earn less than the portfolio’s average yield. Furthermore, a low-interest rate environment with reduced investment market returns could encourage alternative capital providers to enter the insurance market in order to achieve higher returns. This could have the effect of increasing the level of competition in the insurance market and applying pressure on premiums, which could affect the gross written premium that we are able to generate.

Fluctuations in credit spreads can also contribute to the industry's cyclicality and may materially and adversely affect our investment performance including investment income or cause realized and unrealized losses. We are subject to risks associated with potential declines in credit quality related to specific issuers or specific industries and a general weakening in the economy, which are typically reflected through credit spreads. Our exposure to credit spreads primarily relates to market price volatility and investment risk associated with the fluctuation in credit spreads. Credit spreads increase or decrease in response to the market's perception of risk and liquidity of a specific issuer or specific sector and are influenced by the credit ratings, and the reliability of those ratings, published by external rating agencies. Widening credit spreads may cause unrealized losses in our investment portfolio and increase losses associated with written credit protection derivatives used in replication transactions. Increases in credit spreads of issuers due to credit deterioration may result in higher levels of impairments. Tightening credit spreads may reduce our investment income and cause an increase in the reported value of certain liabilities that are valued using a discount rate that reflects our own credit spread.

One key factor that contributes to the cyclicality in insurers' underwriting results are interest rate movements. In a high-interest rate environment, increased investment returns may reduce insurers' required contribution from underwriting performance to achieve an attractive overall return. This may result in a less-disciplined approach to underwriting in the market generally as some underwriters could be inclined to offer lower premium rates to generate more business. An increase in market interest rates or credit spreads could also have an adverse effect on the value of our investment portfolio by decreasing the fair values of the fixed income securities in our investment portfolio. Further, an increase in market interest rates could reduce the value of certain of our alternative investments held as collateral under reinsurance agreements and require us to provide additional collateral, thereby reducing our available capital and potentially creating a need for additional capital which may not be available to us on favorable terms, or at all.

Interest rate fluctuations and other events may require us to accelerate the amortization of DAC.

When interest rates rise, life and annuity surrenders and withdrawals may increase as policyholders seek to buy products with higher or perceived higher returns, impacting estimates of future profits. When interest rates fall, we would have the opposite effect. Significantly lower future profits may cause us to accelerate DAC amortization, and such acceleration could adversely affect our results of operations to the extent such amortization exceeds any surrender or other charges earned as income upon surrender and withdrawal.

Our business operations depend on our ability to appropriately distribute, execute and administer our policies and claims.

The success of our U.S. Direct Insurance business is primarily dependent on writing and servicing life, annuity, property and casualty, and health insurance for individuals, families and businesses. Any problems or discrepancies that arise in our pricing, underwriting, billing, processing, claims handling or other practices, whether as a result of employee error, vendor error, or technological problems, could have a negative effect on operations and reputation, particularly if such problems or discrepancies are replicated through multiple policies.

Advances in medical technology may adversely affect certain segments of our business.

Genetic testing and diagnostic imaging technology is advancing rapidly. Increases in the prevalence, availability (particularly in the case of direct to consumer genetic testing) and accuracy of such testing may increase our adverse selection risk, as people who learn that they are predisposed to certain medical conditions associated with reduced life expectancy may be more likely to purchase and maintain life insurance. Conversely, people who learn that they lack genetic predisposition to conditions associated with reduced life expectancy may forego the purchase of life insurance, or permit existing policies to lapse, and may be more likely to purchase certain annuity products. Our access to and ability to use medical information, including the results of genetic and diagnostic testing, that is known to our prospective policyholders is important to our underwriting of life insurance and annuities. Some states restrict insurers' access and use of genetic information, and similar additional regulations and legislation may be adopted. Such regulation and legislation likely would exacerbate adverse risk selection related to genetic and diagnostic testing, which may in turn have an adverse effect on our U.S. Direct Insurance business.

In addition to earlier diagnosis and knowledge of disease risk, medical advances may increase overall health and longevity. If this were to occur, the duration of payments made under certain of our annuity products would be extended beyond our actuarial assumptions, reducing the profitability of such business. This may require us to modify our assumptions, models or reserves.

We may incur significant losses resulting from catastrophic events.

Property and casualty operations within our U.S. Direct Insurance business are exposed to catastrophes caused by natural events, such as hurricanes, tornadoes, wildfires, droughts, earthquakes, snow, hail and windstorms, and manmade events, such as terrorism, riots, explosions, hazardous material releases, and utility outages. Life and health insurance operations within our U.S. Direct Insurance business are exposed to the risk of catastrophic mortality or illness, such as a pandemic, an outbreak of an easily communicable disease, or another event that causes a large number of deaths or high morbidity. Our investment operations are exposed to catastrophes as a result of direct investments and mortgages related to real estate and certain similarly structured infrastructure loans. Our operating results may vary significantly from one period to the next since the likelihood, timing, severity, number or type of catastrophe events cannot be accurately predicted. Our losses in connection with catastrophic events are primarily a function of the severity of the event and the amount of our exposure in the affected area.

Climate change, and increasing regulation with respect to climate change, may adversely impact our results of operations.

There are concerns that the increased frequency and severity of weather-related catastrophes and other losses, such as hurricanes and wildfires, incurred by the industry in recent years are indicative of changing weather patterns, whether as a result of global climate change caused by human activities or otherwise, which could cause such events to persist. Increased weather-related catastrophes would lead to higher overall losses, which we may not be able to recoup, particularly in a highly regulated and competitive environment, and higher reinsurance costs. Increased weather-related catastrophes could also result in increased credit exposure to reinsurers and other counterparties with which we do business. Certain catastrophe models assume an increase in frequency and severity of certain weather or other events, which could result in a disproportionate impact on insurers with certain geographic concentrations of risk. This would likely increase the risks of writing property insurance in coastal areas or areas susceptible to wildfires or flooding, particularly in jurisdictions that restrict pricing and underwriting flexibility. The threat of rising seas or other catastrophe losses as a result of climate change may also cause property values in coastal or such other communities to decrease, reducing the total amount of insurance coverage that is required. Climate change-related risks also present challenges to our ability to effectively underwrite, model and price risk.

In addition, climate change could have an impact on assets in which we invest, resulting in realized and unrealized losses in future periods that could have a material adverse impact on our results of operations and/or financial position. Such investment risks can include, but are not limited to, changes in supply and demand characteristics for fossil fuels, advances in low-carbon technology and renewable energy development, effects of extreme weather events on the physical and operating exposure of industries and issuers, and the transition that issuers make towards addressing climate risk in their own businesses. It is not possible to foresee with certainty which, if any, assets, industries or markets will be materially and adversely affected, nor is it possible to foresee the magnitude of such effect.

Moreover, we cannot predict how legal, regulatory and social responses to concerns about climate change will impact our business or the value of our investments. We are subject to complex and changing regulation and public policy debates relating to climate change that are difficult to predict and quantify and that may have an adverse impact on our business. For example, in November of 2021, NYDFS finalized its "Guidance for Domestic Insurers on Managing the Financial Risks from Climate Change." In general, the guidance provides that a New York-domiciled insurer should integrate consideration of climate risks into its governance structure at the insurer or group level, consider the impact of climate-related factors on its business decisions using time horizons that are tailored to the insurer and its activities, incorporate climate risks into its existing financial risk management framework, use scenario analysis to inform business strategies and risk identification and assessment, and disclose its climate risks and engage with the Task Force on Climate-related Financial Disclosures and other initiatives when developing disclosure approaches. In addition, the NAIC and federal agencies, including the SEC and Federal Insurance Office, are increasingly focused on assessment and disclosure of climate change risks. In March 2022, the SEC proposed new rules that, among other matters, will seek to standardize and establish a framework for reporting of climate-related risks. To the extent the proposed rules impose additional reporting obligations, we could face increased costs. Separately, the SEC has also announced that it is scrutinizing existing climate-change related disclosures in public filings, increasing the potential for enforcement if the SEC were to allege our existing climate disclosures are misleading or deficient. In April 2022, the NAIC Climate Risk & Resiliency Task Force released a new climate risk disclosure survey, and the NAIC Plenary adopted the redesigned climate risk disclosure survey as a voluntary risk management tool available for state insurance regulators to use to assess an insurer's climate-related risks. The domestic insurance companies within our holding company system that are required to respond to the climate risk disclosure survey must comply with the new reporting standard by November 30, 2022. The NAIC also continues to contemplate enhancements to the Financial Condition Examiners Handbook and the ORSA Guidance Manual to address climate change risks and their impact on solvency. Governmental guidance or regulations relating to climate change, or our own leadership decisions implemented as a result of assessing the impact of climate change on our business, may increase our costs of doing business.

The reinsurance and insurance industries are highly competitive; competitive pressures may result in fewer reinsurance contracts underwritten, lower premium rates, increased expense for customer acquisition and retention and less favorable policy terms and conditions.

We operate in highly competitive markets. Customers may evaluate us and our competitors on a number of factors, including capital and perceived financial strength, underwriting capacity, expertise, innovation, local presence, reputation, experience and qualifications of employees, client relationships, geographic scope of business, products and services offered (including ease of doing business over the electronic placement platforms), premiums charged, ratings assigned by independent rating agencies, contract terms and conditions and the speed of claims payment.

Within our U.S. Direct Insurance business, strong competition for customers has led to increased marketing and advertising by our competitors, many of whom have well-established national reputations and greater financial and marketing resources, as well as the introduction of new insurance products and aggressive pricing. These competitive pressures could result in increased pricing pressures on a number of our products and services, particularly as competitors seek to win market share, and may limit our ability to maintain or increase our profitability. Because of its relatively low cost of entry, the Internet has emerged as a significant place of new competition, both from existing competitors and new competitors. In addition, product development and life-cycles have shortened in many product segments, leading to intense competition with respect to product features.

We compete for customers' funds with a variety of investment products offered by financial services companies other than insurance companies, such as banks, investment advisors, mutual fund companies and other financial institutions. Moreover, customer expectations are evolving as technology advances and consumers become accustomed to enjoying tailored, easy to-use-services and products from various industries. This is reshaping and raising consumer expectations when dealing with insurance. We are addressing these changing consumer expectations by investing in technology with a particular focus on consumer-facing sales and service platforms, by internally promoting a strategically-focused innovative culture initiative, and by creating internal forums to drive next generation solutions based on consumer insights. However, if we cannot effectively respond to increased competition and such increased consumer expectations, we may not be able to grow our business or we may lose market share.

We compete with other insurers for producers primarily on the basis of our financial position, reputation, longevity, support services, compensation, product features and pricing. We may be unable to compete for producers with insurers that adopt more aggressive pricing or compensation, that offer a broader array of products or packages of products, or that have extensive promotional and advertising campaigns. Attracting qualified individuals and retaining existing employees continues to be a challenge for employers. Businesses have become extremely competitive in the ever-changing landscape of the talent marketplace. As a result, it is an increasing challenge to distinguish us as an employer of choice.

Within our PRT and annuities business, we directly compete with a number of well-established players and new entrants in the industries, including reinsurance and insurance companies, financial institutions, and traditional and alternative asset managers. Our competitors vary by offered product line and covered territory. Our competition primarily includes other reinsurance and insurance companies, larger-scale pension plans and asset management firms that provide long duration capital. There are currently six large-scale national institutions who we consider competitors of our PRT business in Canada, and there is the potential for the entry of global insurers into the Canadian market. These competitors primarily include annuity reinsurance and insurance companies and diversified financial institutions. Some of these competitors have greater financial resources, have established long term and continuing business relationships throughout the industry, have greater market share, assume a greater level of risk while maintaining financial strength ratings, or have higher financial strength, claims-paying or credit ratings than we do, each of which can be a significant competitive advantage. In addition, the lack of strong barriers to entry into the Reinsurance business and the entry of alternative capital markets products and vehicles provide additional sources of reinsurance and insurance capacity and increased competition.

We compete with new companies that enter the reinsurance and insurance markets, particularly companies with new or "disruptive" technologies or business models. Certain technology companies and other third parties have created, and may in the future create, technology-enabled business models, processes or platforms that may adversely impact our competitive position. New services and technologies can affect the demand for insurance and reinsurance products and services, the premiums payable, the profitability of such products and services and the risks associated with underwriting certain lines of business. In addition, certain capital markets participants have created alternative products that are intended to compete with reinsurance products. Recently, the insurance industry has faced increased competition from new underwriting capacity, such as the investment of significant amounts of capital by pension funds, mutual funds, hedge funds and other sources of alternative capital primarily into the natural catastrophe reinsurance and insurance businesses. The failure of our company to assess new services and technologies that may be applicable or disruptive to the reinsurance and insurance industries may have an adverse effect on our business, financial condition and results of operations.

The nature of the competition we face may be affected by disruption and deterioration in global financial markets and economic downturns, including as a result of the effects of COVID-19, as well as by governmental responses thereto. For example, (i) government intervention might result in capital or other support for our competitors, (ii) governments may provide reinsurance and insurance capacity in markets and to consumers that we target or (iii) governments may take actions to reduce interest rates, impacting the value of and returns on fixed income investments. In addition, since numerous aspects of our business are subject to regulation, legislative and other changes affecting the regulatory environment for our business may have, over time, the effect of supporting or burdening some aspects of the financial services industry. This can affect our competitive position within the annuities industry, and within the broader financial services industry.

Because of the highly competitive nature of the insurance industry, there can be no assurance that we will maintain or grow our market share, continue to identify attractive opportunities in either our individual or institutional channels, or that competitive pressure will not have a material adverse effect on our business, results of operations and financial condition.

Risks Relating to Regulation

Our insurance business is highly regulated, and such regulation and any supervisory and enforcement policies, or changes thereto, may materially impact our capitalization or cash flows, reduce our profitability and limit our growth.

We are subject to extensive insurance laws and regulations that affect nearly every aspect of our business. We are also subject to additional laws and regulations administered and enforced by a number of different governmental authorities in the jurisdictions in which we operate.

The laws and regulations applicable to us are complex and subject to change, and compliance is time consuming and personnel-intensive. Changes in these laws and regulations, or interpretations by courts or regulators, may materially increase our costs of doing business and may result in changes to our practices that may limit our ability to grow and improve our profitability. Regulatory developments or actions against us could have material adverse financial effects and could harm our reputation. Among other things, we could be fined, prohibited from engaging in some or all of our business activities, or made subject to limitations or conditions on our business activities.

We face the risk that any particular regulator's or enforcement authority's interpretation of a legal issue may conflict with that of another regulator or enforcement authority or may change over time to our detriment. Regulatory investigations and examinations, which can be broad and unpredictable, may raise issues not identified previously and could result in new legal actions against us and industry-wide regulations that could adversely affect us. Further, we are experiencing increasing information requests from regulators without corresponding direct regulation being applicable to us, on issues such as climate change, diversity and our investments in certain companies or industries. Responding to such requests adds to our compliance costs.

Insurance company supervision and regulation is generally intended for the benefit of policyholders and creditors rather than shareholders or other investors of the business. Among other things, the insurance laws and regulations applicable to us may:

- impose rules and restrictions on the marketing, distribution, administration and amendment of our annuity products and insurance policies;
- require the maintenance of certain solvency levels, including minimum levels of capital and surplus;
- require the maintenance of target capital levels, general and long-term business minimum solvency margins, enhanced capital requirements and a minimum liquidity ratio;
- require periodic examinations of our financial condition;
- require offices and representatives in the relevant jurisdiction;
- restrict agreements with large revenue-producing agents;
- require us to obtain licenses or authorizations from regulators;
- regulate transactions, including investments in or transactions with affiliates or related parties (which may include Brookfield) and intra-group guarantees;
- in certain jurisdictions, restrict the payment of dividends or other distributions of capital;
- require the disclosure of financial and other information to regulators, including financial statements, financial conditions reports, and annual capital and solvency returns;
- impose restrictions on the nature, quality and concentration of investments;
- regulate the admissibility of assets and capital;
- provide for involvement in the payment or adjudication of claims beyond the terms of the policies;
- establish certain minimum operational requirements or customer service standards such as the timeliness of finalized policy language or lead time for notice of non-renewal or changes in terms and conditions; and
- allow for the performance of certain periodic examinations of its financial condition.

The impact of these regulations, including, in particular the restrictions on investments in affiliates or related parties, may have an adverse effect on our investment portfolio returns. As part of regular, mandated risk assessments, regulators may take steps that have the effect of restricting our business activities, which may in turn have a material impact on our ability to achieve growth objectives and earnings targets. All of our insurance subsidiaries are subject to minimum capital and surplus requirements. Any failure to meet applicable requirements or minimum statutory capital requirements could subject us to examination or corrective action by regulators, including limitations on our writing additional business or engaging in finance activities, supervision, receivership, or liquidation. In addition, each regulated insurance business we operate is subject to a number of restrictions on assets we may hold under relevant regulations and tax rules, and regulators may, as has happened in the past, alter such restrictions, thus potentially affecting our investment policy and any associated projected income or growth return from our investments. In addition, based on our perceived risk profile, regulators may require additional regulatory capital to be held by us (including as part of guidance provided by the regulator to us on a confidential basis), which, among other things, may affect the business we can write and the amount of dividends we are able to pay out.

As a result, in connection with the conduct of our various businesses, we believe it is crucial to establish and maintain good working relationships with the various regulatory authorities having jurisdiction over our businesses. If those relationships and that reputation were to deteriorate, our businesses could be materially and adversely affected. For example, we require various consents and approvals from our regulators, both with respect to transactions we enter into and in the ordinary course of the conduct of our businesses. If we fail to maintain good working relationships with our regulators, it may become more difficult or impossible for us to obtain those consents and approvals, either on a timely basis or at all.

The reinsurance and insurance industries have experienced substantial volatility as a result of investigations, litigation and regulatory activity by various insurance, governmental and enforcement authorities, concerning various practices within the reinsurance and insurance industry. If we or any of our subsidiaries were to be found to be in breach of any existing or new laws or regulations now or in the future, we would be exposed to the risk of intervention by regulatory authorities, including investigation and surveillance, and judicial or administrative proceedings. In addition, our reputation could suffer and we could be fined, sanctioned or suspended or prohibited from engaging in some or all of our business activities or could be sued by counterparties, as well as forced to devote significant resources to cooperate with regulatory investigations, any of which could have a material adverse effect on our results of operations. These events, if they occur, could affect the competitive market and the way we conduct our business and manage our capital and could result in lower revenues and higher costs.

Lastly, international standards continue to emerge in response to the globalization of the insurance industry and evolving standards of regulation, privacy, solvency measurement and risk management. Any international conventions or mandates that directly or indirectly impact or influence the nature of regulation or industry operations in the jurisdictions in which we operate could negatively affect us.

EXHIBIT 11(b)

Audited Financial Statements of Brookfield Reinsurance for the Years-Ended December 31, 2021, 2020 and 2019

Exhibit 9(b)

BROOKFIELD ASSET MANAGEMENT REINSURANCE PARTNERS LTD.

INDEX TO FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Brookfield Asset Management Reinsurance Partners Ltd.

Opinion on the Financial Statements

We have audited the accompanying combined consolidated statements of financial position of Brookfield Asset Management Reinsurance Partners Ltd. and subsidiaries (the "Company") as of December 31, 2021 and 2020, the related combined consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows, for each of the three years in the period ended December 31, 2021, and the related notes, and the schedule of the Condensed Financial Statements of Brookfield Asset Management Reinsurance Partners Ltd. (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2021, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Valuation of Insurance Reserves - Refer to Notes 2(r) and 10 to the financial statements

Critical Audit Matter Description

The Company has significant insurance reserves representing the majority of its total liabilities. The Company uses different actuarial methodologies to determine insurance reserves depending on the nature of the underlying contract products and applicable jurisdictional guidance, as is permitted by IFRS 4, Insurance Contracts, some of which involve high levels of complexity.

While there are many assumptions which management makes to determine insurance reserves, the assumptions with the greatest uncertainty are those related to mortality and surrender, lapse and withdrawal rates (collectively "policyholder behaviour"). These assumptions required subjective and complex auditor judgment in certain circumstances, including where (i) there is limited company and industry experience data, (ii) the historical experience may not be a good indicator of the future, and (iii) the policyholder behaviour may be irrational. Auditing of certain valuation methodologies and assumptions required a high degree of auditor judgment and an increased extent of audit effort, including the need to involve actuarial specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to valuation methodologies and assumptions related to mortality and policyholder behaviour included the following, among others:

- With the assistance of actuarial specialists, we tested the reasonableness of mortality and policyholder behaviour assumptions, by:
    - Evaluating management's methods and assumptions in accordance with applicable actuarial principles and practices under actuarial standards of practice.
    - Testing inputs used in the determination of the mortality and policyholder behaviour assumptions.
    - Analyzing management's methods and interpretation of data used to adjust industry tables, applying industry guidance, evaluating triggers and drivers for revisions of assumptions, assessing reasonably possible alternative assumptions, and considering industry and other external sources of data, where applicable.
    - With the assistance of actuarial specialists, we tested the appropriateness of valuation methodologies used in the estimation process by:
    - Testing the accuracy of the actuarial models for implementation of key assumptions and valuation methodology.
    - Evaluating a sample of underlying insurance contracts to assess that the appropriate actuarial models were selected and key assumptions were incorporated in those actuarial models for the reinsurance deals undertaken.
    - Calculating an independent estimate of the insurance contract liability for a sample of insurance policies included in the reinsurance deals undertaken and comparing the results to the Company's results.

Accounting for Structured Entities - Refer to Note 2(ai) to the financial statements

Critical Audit Matter Description

The Company invests a portion of its assets in structured entities ("entities"). These entities issued debt and preferred share securities to the Company's reinsurance treaty accounts, including modified coinsurance accounts held by third party insurance companies. The Company is not involved in the investment decision process and has a residual economic interest in the entities. The Company determined that it has control over the entities, and as such has consolidated the entities.

The determination of the accounting treatment for the entities required management to evaluate whether the Company exercised control or significant influence over the entities. This involved significant management judgment to interpret the key agreements and related party relationships associated with the entities. Auditing whether the Company exercised control or significant influence over the entities required a high degree of subjectivity which resulted in an increased extent of audit effort including the need to involve technical accounting specialists.

How the Critical Audit Matter Was Addressed in the Audit

With the assistance of technical accounting specialists, our audit procedures related to the evaluation of whether the Company exercised control or significant influence over the entities included the following, among others:

- Assessed the executed agreements with counterparties to understand the nature of the instruments that were issued by the entities to determine which party was exposed, or had rights, to variable returns from their investment in the financial instruments issued by the entities.
- Evaluated related party relationships to understand whether the Company, through such relationships, had power over the entities and the ability to use such power to affect the amount of returns to the Company.
- Evaluated management's assessment of whether the Company exercised control or significant influence over the entities by analyzing specific facts and circumstances against relevant accounting guidance.

NOTE 1. ORGANIZATION AND DESCRIPTION OF THE COMPANY

(a) Brookfield Asset Management Reinsurance Partners Ltd.

Brookfield Asset Management Reinsurance Partners Ltd. ("BAM Re" or the "Company") is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The Company was established to become a reinsurance business focused on providing capital-based solutions to insurance companies and their stakeholders. The Company's class A exchangeable shares are listed on the New York Stock Exchange (NYSE) and the Toronto Stock Exchange (TSX) under the symbol "BAMR". The Company's operations are located primarily in Bermuda, Canada, and the Cayman Islands. The Company's original registered head office was 73 Front Street 5th Floor, Hamilton HM 12, Bermuda. During the third quarter, the registered head office was changed to Wellesley House South, 2nd Floor, 90 Pitts Bay Road, Pembroke, HM08, Bermuda.

The Company holds a direct 100% ownership interest in BAM Re Holdings Ltd. ("BAM Re Holdings"), which holds the Company's interest in its operating subsidiaries North End Re Ltd. ("NER Ltd.") and North End Re (Cayman) SPC ("NER SPC") and Brookfield Annuity Company ("BAC").

Through its operating subsidiaries, the Company acts as a direct issuer of pension risk transfer products for pension plan sponsors and provides annuity-based reinsurance products to insurance and reinsurance companies. The Company currently has two operating segments, Reinsurance and Pension Risk Transfer ("PRT").

(b) Spin-off of Brookfield Asset Management Reinsurance Partners Ltd.

On June 28, 2021, Brookfield Asset Management Inc. ("Brookfield Asset Management") completed the spin-off of the Company (the "Spin-off"), which was affected by way of a special dividend of the class A exchangeable limited voting shares ("class A exchangeable shares") of the Company to holders of Brookfield Class A limited voting shares ("Brookfield Class A Shares") and Class B limited voting shares ("Brookfield Class B Shares") as of June 18, 2021 (the "record date"). Pursuant to the special dividend, as of the record date, holders of Brookfield Class A Shares and Class B Shares received one class A exchangeable share for every 145 Brookfield Class A Shares or Class B Shares held. Brookfield Asset Management holds all the class C non-voting shares ("class C shares"), giving it the residual economic interest in the Company, but no voting interest in it.

Prior to the Spin-off, Brookfield Asset Management effected a reorganization so that the Company's PRT business (the "Business") and other investments that were historically owned and operated by Brookfield Asset Management, through its operating entities, were acquired by BAM Re Holdings, a subsidiary of the Company.

The following describes the transactions and agreements resulting from the Spin-off:

(i) Class A exchangeable shares

As part of the Spin-off, Brookfield Asset Management subscribed for 11 million class A exchangeable shares for approximately $538 million in cash. Upon Spin-off, Brookfield Asset Management distributed the 11 million class A exchangeable shares as a special dividend to the Brookfield Asset Management shareholders who hold Brookfield Class A Shares and Brookfield Class B Shares.

(ii) Class B shares

As part of the Spin-off, holders of class B shares ("BAM Re Class B Partners"), through a voting trust, subscribed for 24,000 class B shares for $1 million.

(iii) Class C shares

As part of the Spin-off, Brookfield Asset Management transferred its ownership in the Business along with its holdings of American Equity Investment Life Holding Company ("AEL Holdings") common shares and additional cash for working capital purposes to the Company. The total value of the consideration provided to the Company was approximately $712 million, which was exchanged for 17 million class C shares. In October 2021, the Company issued an additional 7 million class C shares to Brookfield Asset Management for consideration of $250 million. As at December 31, 2021, there were 24 million class C shares outstanding. Brookfield Asset Management owns all the issued and outstanding class C shares.

(iv) Equity Commitment

As part of the Spin-off, Brookfield Asset Management provided to the Company an equity commitment in the amount of $2.0 billion to fund future growth, which the Company may draw on from time to time. The equity commitment may be called by the Company in exchange for the issuance of a number of class C shares or junior preferred shares. Further details of the equity commitment are described in Note 17.

(v) Credit Agreement

As part of the Spin-off, the Company entered into a credit agreement with Brookfield Asset Management (the "Brookfield Credit Agreement") as lender on June 28, 2021, providing for a three-year revolving $200 million credit facility. On March 9, 2022, the revolving credit facility agreement was increased to $400 million. Further details of the Brookfield Credit Agreement are described in Note 17.

(vi) Support Agreement

As part of the Spin-off, the Company entered into a support agreement with Brookfield Asset Management (the "Support Agreement"). Brookfield Asset Management has agreed to support the economic equivalence of the class A exchangeable shares and Brookfield Class A Shares for so long as class A exchangeable shares not owned by Brookfield Asset Management are outstanding, and there has not been an amendment to the exchange feature by agreeing to, among other things, take all actions reasonably necessary to enable the Company to pay quarterly distributions, the liquidation amount, or the amount payable on a redemption of class A exchangeable shares, as the case may be. Further details of the Support Agreement are described in Note 17.

(vii) Rights Agreement

As part of the Spin-off, the Company entered into a rights agreement with Brookfield Asset Management (the "Rights Agreement"), pursuant to which Brookfield Asset Management has agreed that on the applicable specified exchange date with respect to any class A exchangeable shares submitted for exchange, Brookfield Asset Management will satisfy, or cause to be satisfied, the obligations pursuant to our memorandum of association and by-laws to exchange such subject class A exchangeable shares for Brookfield Class A Shares or its cash equivalent plus any unpaid distributions. Further details of the Rights Agreement are described in Note 17.

(viii) Administration Agreement

As part of the Spin-off, the Company entered into an administration agreement with Brookfield Asset Management (the "Administration Agreement"), pursuant to which Brookfield Asset Management has agreed to provide administrative services to the Company, including the services of our Chief Executive Officer and Chief Investment Officer and certain other administrative services, on a cost-recovery basis. Further details of the Administration Agreement are described in Note 17.

(ix) Investment Management Agreement

As part of the Spin-off, the Company entered into one or more Investment Management Agreements appointing Brookfield Asset Management as the investment manager of certain assets and accounts, including assets backing the liabilities assumed by the Company under the insurance and future reinsurance arrangements, and any assets held as surplus. Further details of the Brookfield Investment Management Agreements are described in Note 17.

(x) Licensing Agreement

As part of the Spin-off, the Company entered into a licensing agreement with Brookfield Asset Management (the “Brookfield Licensing Agreement”), pursuant to which Brookfield Asset Management has granted a non-exclusive, royalty-free sub-license to use the name “Brookfield” and the Brookfield logo. Further details of the Brookfield Licensing Agreement are described in Note 17.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of Compliance

These Combined Consolidated Financial Statements (“financial statements”) have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (“IASB”). The financial statements are prepared on a going concern basis and have been presented in U.S. dollars (“USD”) rounded to the nearest million unless otherwise indicated.

The financial statements were authorized for issue by the Board of Directors of the Company on March 22, 2022.

(b) Basis of Consolidation

The financial statements include the accounts of the Company and its consolidated subsidiaries, which are the entities over which the Company has control. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Certain comparative amounts have been reclassified to be consistent with the current year's presentation.

(c) Continuity of Interest

As described above, BAM Re was established on December 10, 2020 by Brookfield and on June 28, 2021 Brookfield Asset Management completed the Spin-off of the Business to the Company and the special dividend declaration to holders of Brookfield's Class A and B Shares. Brookfield Asset Management controlled the Business prior to the Spin-off and has significant influence over the Company subsequent to the Spin-off through its interests in the Company. The Business was transferred before Spin-off, as part of the reorganization, and therefore the transactions are common control transactions. In accordance with the Company and Brookfield Asset Management's accounting policy, the Company has reflected the Business in its financial position and results of operations using Brookfield Asset Management's carrying values, prior to the Spin-off.

In addition, certain investments were transferred as part of the reorganization. These are treated as asset acquisitions and are also considered common control transactions. The accounting policy is to record the common control asset acquisitions on the date of occurrence at the historical carrying value, with any gain or loss against the consideration paid being recorded in equity. To reflect this continuity of interest, these financial statements provide comparative information of the Business for the periods prior to the Spin-off, as previously reported by Brookfield. The economic and accounting impact of contractual relationships created or modified in conjunction with the Spin-off (see Note 1(b)) have been reflected prospectively from the date of the Spin-off and have not been reflected in the results of operations or financial position of the Company prior to June 28, 2021, as such items were in fact not created or modified prior thereto. Accordingly, the financial information for the periods prior to June 28, 2021 is presented based on the historical financial information for the Business as previously reported by Brookfield. For the period after completion of the Spin-off, the results are based on the actual results of the Company, including the adjustments associated with the Spin-off and the execution of several agreements (see Note 17). Therefore, net income (loss) and comprehensive income (loss) not attributable to interests of others in operating subsidiaries has been allocated to Brookfield prior to June 28, 2021 and allocated to the shareholders of class A exchangeable shares, class B shares and class C shares on and after June 28, 2021.

(d) Class A exchangeable shares

As described in Note 1 (b)(i), the Company's equity interests include the class A exchangeable shares held by public shareholders. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Each class A exchangeable share is structured with the intention of providing an economic return equivalent to one Brookfield Class A Share (subject to adjustment to reflect certain capital events). Each class A exchangeable share is exchangeable with Brookfield Asset Management at the option of the holder for one Brookfield Class A Share (subject to adjustment to reflect certain capital events) or its cash equivalent (the form of payment to be determined at the discretion of Brookfield Asset Management), plus unpaid distributions. Brookfield Asset Management currently intends to satisfy any exchange requests on the class A exchangeable shares through the delivery of Brookfield Class A Shares rather than cash. Each class A exchangeable share, held on the record date, has voting rights and is entitled to cast one vote at a meeting of shareholders of the Company.

The class A exchangeable shares are classified as equity instruments. The class A exchangeable shares are issued capital of the Company and as a result are not adjusted for changes in market value.

(e) Class B shares

As described in Note 1 (b)(ii), the Company's equity interests include the class B shares held by BAM Re Class B Partners. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Distributions on the class B shares will be paid, or in the case of a distribution made pursuant to a capital reduction, will be returned, in each case, at the same time and in the same amount per share as dividends on a Brookfield Class A Shares. The BAM Re Class B Partners are entitled to one vote on any matter and can cast one vote for each class B share held at the record date.

The class B shares are classified as equity instruments. The class B shares are issued capital of the Company and as a result are not adjusted for changes in market value.

(f) Class C shares

As described in Note 1 (b)(iii), the Company's equity interests include the class C shares held by Brookfield Asset Management. The class C shares are non-voting shares that are entitled to the residual economic interest in the Company after payment in full of the amount due to holders of our class A exchangeable shares and our class B shares and subject to the prior rights of holders of the Preferred Shares.

The class C shares are classified as equity instruments. The class C shares are issued capital of the Company and as a result are not adjusted for changes in market value.

(g) Cash and cash equivalents

Cash and cash equivalents include cash and short-term investments with original maturities of 90 days or less. The Company classifies cash and cash equivalents at amortized cost.

Cash and cash equivalents exclude cash balances and short-term investments that are for use by the Company as part of the reinsurance funds withheld arrangement (Note 2(i)).

(h) Investments

Investments are financial assets which are comprised of common shares, preferred shares, bonds and fixed-income instruments. The Company uses the trade date to account for investment transactions.

Financial assets are classified into one of the following categories:

- AFS assets are measured at fair value, with changes in fair value recognized in other comprehensive income (loss);
- FVTPL assets are measured at fair value, with changes in fair value recognized in net income (loss); and
- Loans and receivables are measured at amortized cost.

Financial assets are classified according to their nature and use by the Company at the time of initial recognition. Financial assets supporting capital and surplus and coinsurance reserves are classified as AFS or as loans and receivables. Unrealized gains (losses) are recognized in other comprehensive income (loss). Upon realization, gains or losses are reclassified to the Combined Consolidated Statements of Operations and recorded in net investment income (loss).

Financial assets supporting insurance reserves under PRT and modified coinsurance reserves under reinsurance are designated as FVTPL or as loans and receivables. Any changes in the fair value of the underlying assets matched to the insurance reserves are directly reflected in the insurance reserves. Unless the asset is deemed to be impaired, changes in fair value of assets matching these liabilities and changes in the corresponding insurance reserves are directly recognized in the Combined Consolidated Statements of Operations in order to avoid a mismatch that would otherwise arise.

Loans and receivables are measured at amortized cost using the effective interest method, less any applicable provision for impairment.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

Any gain or loss arising on derecognition is recognized directly in net income (loss) and presented in realized gains (losses) on investments which is included in net investment income.

(i) Reinsurance funds withheld

Reinsurance funds withheld is a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which NER Ltd. and NER SPC, indirect wholly owned subsidiaries of the Company, act as reinsurers. The receivable represents assets that are held in custodial accounts that are legally segregated from the third-party ceding companies' general accounts and are managed by NER Ltd. and NER SPC. The assets are typically cash and cash equivalents and fixed income asset types. In the event of ceding companies' insolvency, NER Ltd. and NER SPC would need to assert a claim on the assets supporting the reserve liabilities. However, NER Ltd. and NER SPC have the ability to offset amounts owed to the ceding companies. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The Company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets, in a fashion similar to the invested assets held directly by NER Ltd. and NER SPC. The underlying agreements contain embedded derivatives as discussed in Derivative financial instruments (Note 2(k)).

(j) Funds withheld liabilities

Funds withheld liabilities represent the payable for amounts contractually withheld in accordance with reinsurance agreements where BAC acts as a cedant. While the assets in the funds withheld liabilities are legally owned by BAC, the reinsurer is subject to all investment performance and economic rights and obligations to the funds withheld assets similar to invested assets held directly by the reinsurer. BAC's funds withheld liabilities balance includes cash and cash equivalents, fixed income securities and derivatives carried at fair value and is credited with premiums, investment income (loss), benefits payable and other expenses deducted as incurred at cost.

(k) Derivative financial instruments

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, cross currency swaps, interest rate swaps, and bond futures. Derivative financial instruments are classified as held for trading which are measured as FVTPL investments. Derivative financial instruments are recorded at fair value on acquisition date and subsequently revalued at fair value at each reporting date. Derivative financial instruments with positive values are recorded as derivative assets and negative fair values are reported as derivative liabilities. Changes in fair value of derivatives are recorded in net investment income (loss), in the Combined Consolidated Statements of Operations.

Derivatives embedded in reinsurance contracts which are not closely related to the host contract are separated and measured at fair value in the Combined Consolidated Statements of Financial Position. Changes in the fair value are included in the net investment results from funds withheld in the Combined Consolidated Statements of Operations.

(l) Assets pledged as collateral

The Company receives and pledges collateral in respect to certain derivative contracts, in order to meet its contractual obligations. The amount of collateral required is determined by the valuation of each contract on a mark-to-market basis and the type of collateral to be deposited is specified within the agreement with each counterparty.

Collateral pledged continues to be recognized in the Combined Consolidated Statements of Financial Position as the Company retains all rights related to these assets.

Collateral received is not recognized in the Combined Consolidated Statements of Financial Position unless the Company acquires the rights relating to the economic risks and rewards related to these assets.

(m) Collateralized borrowing transactions

Securities sold under repurchase agreements are collateralized borrowing transactions. A repurchase agreement provides the lender of securities the right to receive from the counterparty sufficient cash to purchase the same securities at the maturity of the agreement. These transactions are measured at amortized cost and are recorded at amounts at which the securities were initially sold.

The Company recognizes an asset in the Combined Consolidated Statements of Financial Position, representing the cash received, and a liability for the same amount, representing the obligation to repurchase the loaned bonds. Repurchase agreements with the same counterparty are presented net in the Combined Consolidated Statements of Financial Position.

(n) Right to offset

Amounts presented in these financial statements are presented on a net basis when there exists both a legally enforceable right to offset the recognized amounts and an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

(o) Impairment

At each reporting date, financial assets are assessed for impairment indicators. The Company considers an impairment loss if it deems it unlikely that it will be able to recover all amounts due according to the contractual terms of the obligation. For AFS equity investments, a significant and prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment. For all other financial assets, there must be observable data about the loss events, such as, but not limited to, the issuer's financial difficulty, a bankruptcy, default of payment of principal or interest, or specific adverse conditions affecting an industry or a region.

For financial assets measured at amortized cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows. The impairment loss is recorded in the Combined Consolidated Statements of Operations.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized. In respect to AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increases in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss. The reversal cannot exceed the impairment expense amount. The amount of reversal is recorded in the Combined Consolidated Statements of Operations.

At each reporting date, or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, non-financial assets that are measured at amortized cost are reviewed for impairment. In addition, irrespective of whether there is any indication of impairment, intangible assets not yet available for use are tested for impairment annually. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

(p) Classification of Financial Instruments

Accrued investment income, reinsurance receivable, due from related party, private loans, mortgages, and other assets have been classified as loans and receivables. Due to related party, reinsurance payable, accounts payable and accrued liabilities, and other liabilities have been classified as other financial liabilities. Loans and receivables and other financial liabilities are measured at amortized cost. For these items, carrying value approximates fair value due to their short-term nature. Further details of the financial instruments are described in Note 3.

(q) Leases

IFRS 16 Leases ("IFRS 16") specifies how to recognize, measure, present, and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases.

The Company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

If a contract contains a lease, the Company will recognize a right-of-use ("ROU") asset and a lease liability at the lease commencement date. The ROU asset and lease liability are initially measured as an amount equal to the present value of the remaining lease payments over the lease. The discount rate used is the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The ROU asset is depreciated to the earlier of the end of the useful life or lease term using the straight-line method as this reflects the expected pattern of use. At each reporting date, the Company assesses whether there is any indication that the ROU asset may be impaired. If an impairment indicator exists, then the Company will adjust the value of the ROU asset to its recoverable amount and an impairment loss is recognized. The ROU asset is included in property and equipment in the Combined Consolidated Statements of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. It is remeasured when there is a change in future lease payments arising from a change in rates or there is a change in the Company's estimate of the amount expected to be payable.

(r) Insurance reserves

Contract classifications

Contracts under which the Company accepts significant insurance risk from a policyholder are classified as insurance contracts in accordance with IFRS 4 Insurance Contracts ("IFRS 4") on the Combined Consolidated Statements of Financial Position. A contract is considered to have significant insurance risk if, and only if, an insured event could cause an insurer to make significant additional payments in any scenario, excluding scenarios that lack commercial substance at the inception of the contract. Contracts under which the Company does not accept significant insurance risk are classified as either investment contracts or considered a service contract and are accounted for in accordance with IAS 39 Financial Instruments: Recognition and Measurement or IFRS 15 Revenue from Contracts with Customers, respectively. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its term, even if the insurance risk reduces significantly during the year, unless all rights and obligations are extinguished or expire. Investment contracts can be reclassified as insurance contracts if insurance risk subsequently becomes significant.

Measurement

In accordance with IFRS 4, the Company has applied existing accounting practices for insurance and participating investment contracts, modified as appropriate to comply with the IFRS framework and applicable standards.

The long-term insurance reserves are calculated separately for each product type, based either on local regulatory requirements or existing local GAAP (at the later of the date of transition to IFRS or the date of the acquisition of the entity); and actuarial principles consistent with those applied in each local market.

Insurance reserves are determined by BAC using the Canadian Asset Liability Method ("CALM"), in accordance with the standards of the Canadian Institute of Actuaries ("CIA") and as permitted by IFRS 4.

Insurance reserves represent the amount required to provide for future benefits payments and administrative expenses on policies in force with BAC. Insurance reserves are presented gross of reinsurance assets on the Combined Consolidated Statements of Financial Position. BAC's Appointed Actuary is responsible for determining the amount of insurance reserves in accordance with standards established by the CIA. CALM is used to determine insurance reserves and incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation and inflation. Margins for adverse deviation are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions, and provide reasonable assurance that insurance reserves cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

BAC has designated invested assets supporting insurance reserves as FVTPL or as loans and receivables. Since the value of the insurance reserves is determined by reference to the assets supporting those reserves, changes in the insurance reserves offset a significant portion of the changes in fair value of these FVTPL assets recorded in net income (loss).

Insurance reserves are determined by NER Ltd. using US GAAP reserve methodology, as permitted by IFRS 4. Insurance reserves are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges. These are equal to the balance that accrues to the benefit of the policyholders as of the reporting date (commonly referred to as the account value), including policyholders' accumulated net deposits plus a guaranteed rate of interest credited, less policyholder deaths and withdrawals. Insurance reserves are further evaluated using accepted actuarial valuation methods based on assumptions related to mortality, withdrawals, surrender and deposit rates, determined when the policies are assumed.

Insurance reserves are determined by NER SPC using US GAAP reserve methodology, as permitted by IFRS 4. Insurance reserves for fixed index annuity contracts (with embedded derivatives) are carried at fair value with an explicit margin added to the mortality, lapse and partial withdrawal assumptions. The host contract and the embedded derivative are bifurcated. The embedded derivative cash flows incorporate a risk margin and are discounted using a rate that reflects our own credit rating. The host contract is established at contract inception as the initial value less the initial fair value of the embedded derivative and accreted over the policy's life. The host value's accretion rate is updated each quarter so that the present value of the actual and expected guaranteed cash flows is equal to the initial host.

An additional liability is established for Life Income Benefit Rider ("LIBR") benefits -withdrawals paid after the contract account value is exhausted. The liability accrues in proportion to contractual assessments using the crediting interest rate. The present value of expected excess benefits and assessments is projected over a range of stochastic equity scenarios. Retrospective unlocking is performed by replacing mean stochastic projected assessments and benefits with actual, revising projections of future experience and resolving for the portion of assessments required.

Key reserve assumptions are based on industry standard data adjusted to align with actual experience, if necessary. The Company periodically reviews actual and anticipated experience compared to the assumptions used to establish future policy benefit reserves. Due to the many assumptions and estimates used in establishing reserves, and the long-term nature of the reinsurance contracts, the reserving process, while based on standard actuarial practices, is inherently uncertain.

(s) Reinsurance assumed

NER Ltd. closed a retrocession agreement on September 3, 2021 with a third party insurance company to reinsure multi-year guarantee fixed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of April 1, 2021, representing the date on which the Company has the reinsurance contractual obligations.

NER Ltd. assumes insurance contracts under modified coinsurance arrangements ("Modco"). NER Ltd. generally has the right of offset on reinsurance contracts but have elected to present reinsurance settlement amounts due to and from the cedant on a gross basis.

Assets and liabilities assumed under Modco are presented gross on the balance sheet. For insurance contracts, the change in assumed reserves and benefits are presented as change in insurance reserves on the Combined Consolidated Statements of Operations. Assumed premiums are included in premiums on the Combined Consolidated Statements of Operations. Expenses outside of account value, such as commissions and federal excise taxes, are included in other reinsurance expenses in the Combined Consolidated Statements of Operations.

NER SPC closed a retrocession agreement on October 8, 2021 with an insurance company which was the Company's associate to reinsure fixed indexed annuities. At the time of closing, the retrocession agreement had a retrospective effective date of July 1, 2021, representing the date on which the Company has the reinsurance contractual obligations.

NER SPC assumes insurance contracts under Modco and Coinsurance. NER SPC generally has the right of offset on reinsurance contracts but have elected to present reinsurance settlement amounts due to and from the cedant on a gross basis.

(t) Reinsurance ceded

In the normal course of business, BAC is a user of reinsurance in order to limit the potential for losses arising from certain exposures. To the extent that third party reinsurers are unable to meet their obligations, BAC remains liable to its policyholders for the portion reinsured.

At each reporting date, the reinsurance asset and reinsurance receivable, if any, are assessed for impairment. If there is objective evidence that the reinsurance asset or reinsurance receivable are not recoverable and the impact of the event can be reliably measured, an impairment loss is recognized for the amount by which the carrying amount exceeds the recoverable amount.

BAC has two types of reinsurance arrangements.

Longevity reinsurance

BAC enters into longevity reinsurance transactions with third party reinsurers. As part of the agreements, the Company commits to pay the reinsurers a schedule of fixed payments relating to a proportion of defined blocks of policyholder benefits. In return, the reinsurers reimburse the actual cost of their proportion of benefit expenses on those blocks to BAC. Settlement of fixed and actual payments between BAC and the reinsurers are on a net basis. The difference between fixed and actual payments on past service is recognized in the same period as the related claim is incurred within benefits ceded in the Combined Consolidated Statements of Operations. Any unsettled amounts on past service from the reinsurers is recognized as a reinsurance receivable or payable in the Combined Consolidated Statements of Financial Position.

BAC is liable for reinsurance fees for the transactions. The fees are recognized as incurred and are included in ceded premiums in the Combined Consolidated Statements of Operations.

The benefits to which BAC is entitled under its reinsurance transactions are recognized as reinsurance assets in the Combined Consolidated Statements of Financial Position. The reinsurance assets related to longevity reinsurance is the difference between the schedule of fixed and actual benefit payments on a proportion of defined blocks of business.

Quota share reinsurance

BAC enters into quota share reinsurance transactions with third-party reinsurers. The agreement covers policyholder benefits for a proportion of business reinsured. The proportion varies for certain discrete blocks of business.

At the inception of each quota share reinsurance contract, premiums ceded and a corresponding decrease in cash or payable is recognized in proportion to the business reinsured by the external reinsurer. BAC also recognizes a reinsurance asset and a change in insurance reserves ceded in the Combined Consolidated Statements of Financial Position and the Combined Consolidated Statements of Operations, respectively. The benefits to which BAC is entitled under its reinsurance contracts are recognized as reinsurance assets.

The reinsurer is committed to pay BAC a proportion of actual benefit expenses. The amounts are reported in benefits ceded in the same period as the related benefit expense is incurred. In cases where the benefit payments are due but not fully received from the reinsurer, BAC will recognize a reinsurance receivable. In cases where benefit payments are due, but amounts are received in excess from the reinsurer, BAC will recognize a reinsurance payable.

Under reinsurance contracts with unregistered reinsurers, assets are required to be pledged to BAC in order to secure payment of liabilities under the reinsurance agreement. Unregistered reinsurers are reinsurers which are not regulated by OSFI. The pledged assets are held in Canada by a Canadian financial institution that is not affiliated with the third party reinsurer. BAC maintains a valid and enforceable security interest that has priority over any other security interest in the collateral. In the event of default by the reinsurer, BAC has the right to liquidate or take legal possession of these assets, in a timely manner.

(u) Deferred revenue

The deferred revenue for interest-sensitive life and investment-type contracts is amortized over the life of the policies. Different amortization methods are permissible, one of these methods being present value of estimated gross profits. However, if estimated gross profits are expected to be negative, alternative amortization techniques are to be used. Given the absence of initial profits for NER Ltd., the deferred revenue is amortized by number of in-force policies. Estimates of in-force policy numbers are based on assumptions using accepted actuarial methods. Amortization is recorded in total revenue within the Combined Consolidated Statements of Operations.

(v) Deferred acquisition costs

The Company incurs costs in connection with acquiring or renewal of reinsurance business. Costs that are directly related to the successful acquisition of reinsurance contracts are capitalized as deferred acquisitions costs (“DAC”) to the extent that they are recoverable from gross profits. These costs consist of commission and policy issuance costs, as well as sales inducements credited to policyholder account balances. The DAC is amortized over the life of the policies in proportion to the estimated gross profits.

(w) Premiums

Gross premiums are recognized as revenue when due and collection is reasonably assured. When premiums are recognized, insurance reserves are computed, the result being that benefits and expenses are matched with such revenue. Premiums ceded are recognized when due and in accordance with the terms of the contractual agreement between the Company and reinsurer. Premium refunds, if any, are recognized on an accrual basis.

(x) Benefits paid

Gross benefits and benefits ceded are recorded in the Combined Consolidated Statements of Operations when they are due and incurred.

(y) Net investment income

Interest income is calculated using the effective interest method.

Dividend income is recognized when the right to receive payments is established.

Realized gains (losses) on investments and derivatives represent the difference between net sale proceeds and the purchase price.

Unrealized gains (losses) on investments and derivatives measure the difference between the fair value of investments at the end of each reporting date and their purchase price. The net movement reflects both unrealized gains and losses recognized during the year adjusted for any prior period unrealized gains and losses which have been realized in the current accounting period.

Investment upfront fees are recognized when the performance obligation has been satisfied under the contractual terms and customary business practice, which may be satisfied over time or at a point in time, in accordance with IFRS 15. The amounts are included in net investment income.

(z) Net investment results from funds withheld

Net investment results from funds withheld include investment income on funds withheld investments and changes in the fair value of derivatives embedded in reinsurance contracts, as discussed in Note 2(k). Changes in the fair value of the embedded derivative are included in the net investment results from funds withheld in the Combined Consolidated Statements of Operations.

(aa) Net hedging expenses

Net hedging expenses relate to costs incurred and mark to market movement associated with derivative contracts not directly related to the Company's insurance operating companies' investment portfolios or insurance reserves.

(ab) Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to taxation authorities within a year. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the end of each year.

Deferred income tax assets are recognized to the extent that it is probable that taxable profits will be available against which the unused tax losses or unused tax credits can be utilized by the Company. To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credit can be utilized, the deferred tax asset is not recognized.

(ac) Foreign currencies

The Company’s functional currency was changed from Canadian Dollar (“CAD”) to USD during the fourth quarter as the primary economic activities which influenced the services provided, investment portfolio and financing activities were based in the United States. Foreign currency denominated monetary assets and liabilities of the Company are translated using the rate of exchange prevailing at the reporting date and non-monetary assets and liabilities measured at fair value are translated at the rate of exchange prevailing at the date when the fair value was determined. Revenues and expenses are measured at average rates during the year. Gains or losses on translation of these items are included in net income.

For purposes of presenting the financial statements, assets and liabilities of the Company are translated using the exchange rate prevailing at the reporting date. Revenue and expenses are measured at transactional or average rates during the year. Gains or losses on translation of these items are included in other comprehensive income.

There was no impact on the financial statements as a result of the change in functional currency, as the Company's presentation was previously determined to be USD.

(ad) Investment in associates

Associates are entities over which the Company exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but without control or joint control over those policies. We use the equity method to account for our investments in associates within the Combined Consolidated Statements of Financial Position.

Interests in associates accounted for using the equity method are initially recognized at cost. At the time of initial recognition, if the cost of the associate is lower than the proportionate share of the investment's underlying fair value, the Company records a gain on the difference between the cost and the underlying fair value of the investment in net income. If the cost of the associate is greater than the Company’s proportionate share of the underlying fair value, goodwill relating to the associate is included in the carrying amount of the investment.

Subsequent to initial recognition, the carrying value of the Company’s interest in an associate is adjusted for the Company’s share of comprehensive income and distributions of the investee. Profit and losses resulting from transactions with an associate are recognized in the financial statements based on the interests of unrelated investors in the investee. The carrying value of associates is assessed for impairment indicators at each reporting date. Impairment losses on equity accounted investments may be subsequently reversed in net income. Further information on equity accounted investments is available in Note 8.

(ae) Property and equipment

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset. The costs of assets include the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, and the cost of dismantling and removing the items and restoring the site on which they are located.

Depreciation of property and equipment commences when it is available for use. Property and equipment are depreciated on a straight-line basis over the estimated useful lives of each component of the property and equipment. The estimated useful lives of the property and equipment are three to five years.

Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter, on a straight-line basis. The ROU asset is depreciated on the straight-line basis over the lease term. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each annual reporting period, with the effect of any changes recognized on a prospective basis.

(af) Segments

In accordance with IFRS 8 Operating Segments, the Company uses a management approach to determine operating segments. The management approach considers the internal organization and reporting used by the Company's chief operating decision maker ("CODM") for making decisions, allocation of resources and assessing performance. The Company's CODM has been identified as the Chief Executive Officer who reviews the results of operations when making decisions about allocating resources and assessing performance of the Company. Our operations were reorganized into two reportable segments during the fourth quarter: Reinsurance and PRT (see Note 18).

(ag) Earnings per share

The holders of the class C shares are entitled to received distributions if, as and when declared or authorized. Our Board of Directors has adopted a policy that class C share distributions will be paid quarterly in an amount equal to the Company's distributable earnings (as determined by management of the Company) after payment of distributions on the class A exchangeable shares, class B shares and any other shares ranking senior to the class C shares and after provision for expenses, anticipated cash needs, and other similar adjustments.

Total outstanding class C shares have been used to calculate basic and diluted earnings per share. Class A exchangeable shares and class B shares are not considered participating securities nor considered to be ordinary shares, and consequently per share amounts for these classes of shares has not been presented.

Basic earnings per share attributable to class C shareholders are calculated by dividing the Company's net income for the year, less distributions payable to class A exchangeable and class B shareholders, by the weighted average number of class C shares outstanding during the year. Diluted earnings per share are determined by adjusting the weighted average number of shares outstanding for the effects of all dilutive potential shares.

Basic and diluted earnings per share for the year ended December 31, 2020 and 2019 of $18.92 and $67.72, respectively, were calculated by dividing the net income attributable to Brookfield for the year by the weighted average number of BAH common shares (2020 – 85 million, 2019 – 81.6 million, respectively). The earnings per share amounts for December 31, 2020 and 2019 are not comparable to the earnings per share amount for the year ended December 31, 2021 as a result of the Spin-off and the issuance of Class A exchangeable shares, class B shares and class C shares on June 28, 2021. Further details of the Spin-off are described in Note 1(b).

(ah) Accounting estimates and judgements

The preparation of the financial statements in accordance with IFRS requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates are subject to uncertainty and can therefore differ significantly from actual results. The items most susceptible to changes in estimates and assumptions include the measurement of insurance reserves, reinsurance assets, the fair value of financial assets determined using valuation techniques and the impairment of financial instruments. Actual results may differ from our estimates thereby impacting the financial statements. Outcomes within the next financial year that are different from assumptions could require a material adjustment to the carrying amount of the asset or liability affected.

Management judgment is also used in applying the accounting policies used to prepare the financial statements. The items most susceptible to changes in estimate and judgements are the measurement of reinsurance assets (Note 10), insurance reserves (Note 10), and impairment of available-for-sale securities and loans and receivables (Note 3).

(ai) Structured entities

The Company invests a portion of its assets in structured entities that issue debt and preferred securities to subsidiaries of the Company, and its reinsurance treaty accounts.

The Company is the primary beneficiary of the variable returns of assets held within the entities, and while the Company is not involved in the investment decision process, the investment manager for the structured entities is a related party with significant residual economic interest in the Company. As a result, these entities are consolidated within the Company's financial statements. We assess the variable returns determination for our structured entities on an ongoing basis. Liabilities of the entities that do not eliminate upon consolidation are recorded as liabilities of structured entities.

The carrying amount of the Company's investment in the consolidated structured entities is determined in accordance with the Company's accounting policies for the underlying securities held within the structured entities.

(aj) Amendments adopted during the current year

(i) Interest Rate Benchmark Reform

In August 2020, the IASB published Interest Rate Benchmark Reform—Phase 2, which issued amendments to IFRS 9, IAS 39, IFRS 7 Financial Instruments: Disclosures, IFRS 4 and IFRS 16. The amendments complement Interest Rate Benchmark Reform—Phase 1, which was issued in 2019, and focus on the effects on financial statements when the old interest rate benchmark is replaced with an alternative benchmark rate as a result of the reform. The amendments provide relief from remeasurement impacts on financial instruments and discontinuance of hedge relationships arising from reform of an interest rate benchmark, including its replacement with alternative benchmark rates. The amendments were effective for annual reporting periods beginning on or after January 1, 2021.

Most US London Interbank Offered Rate ("LIBOR") values will be discontinued on June 30, 2023. Transition activities in the market are ongoing and are focused on two broad streams of work: (i) developing new alternative risk-free rate linked products and (ii) converting existing LIBOR-based contracts to alternative risk-free rates. Transition activities for the Company include incorporation of contractual provisions for new LIBOR-based financial instruments that provide a means to determining new alternative benchmark rates upon the expiry of LIBOR. The Company invests in the debt securities that pay interest based on floating interest rates indexed to either one-month, three-month or six-month US LIBOR. As at December 31, 2021, the carrying value of these debt securities was $425 million. The Company does not expect the transition to an alternative risk-free rate to have a material impact on its Combined Consolidated Financial Statements and its risk management strategy. The Company does not have any further exposure to LIBOR as at December 31, 2021.

(ak) Future accounting policy changes

(i) IFRS 17

In May 2017, the IASB issued IFRS 17 Insurance Contracts ("IFRS 17") which will replace IFRS 4 and will be applied retrospectively. In June 2020, the IASB issued the amendment to IFRS 17, which include deferral of the effective date to annual periods beginning on or after January 1, 2023. In addition, the IASB extended the exemption for qualifying insurers to apply IFRS 9 Financial Instruments ("IFRS 9"), so that both IFRS 9 and IFRS 17 will have the same effective date.

IFRS 17 sets out the requirements for the recognition, measurement, presentation and disclosures of insurance contracts a company issues and reinsurance contracts it holds.

The future profit for providing insurance coverage is recognized in profit or loss over time as the insurance coverage is provided.

IFRS 17 will affect how the Company accounts for its insurance contracts and how it reports financial performance in the Combined Consolidated Statements of Operations. The Company continues to assess the impact of IFRS 17, which is expected to have a significant impact on the timing of earnings recognition, as well as presentation and disclosure, for its insurance contracts.

(ii) *IFRS 9*

In July 2014, the IASB published the complete version of IFRS 9, which replaces IAS 39 and is effective for annual periods beginning on or after January 1, 2018, with retrospective application. IFRS 9 provides changes to the classification and measurement of financial assets and liabilities, an expected credit loss model that replaces the existing incurred loss impairment model, and new hedge accounting guidance. In September 2016, the IASB issued an amendment to IFRS 4 to provide qualifying insurance companies with an optional temporary exemption from applying IFRS 9. The Company qualifies and has elected to take the deferral approach as its activities are predominantly connected with insurance.

In December 2021, the IASB published a narrow-scope amendment to IFRS 9, which allow insurers to apply the classification overlay to address possible accounting mismatches between financial assets and insurance contract liabilities in the comparative information presented on the initial application of IFRS 9 and IFRS 17.

The Company is currently assessing the impact of implementing IFRS 9 on the Combined Consolidated Financial Statements. Further details are disclosed in Note 3(h).

(iii) *Amendments to IFRS 3*

In May 2020, the IASB issued Reference to the Conceptual Framework, which includes amendments to IFRS 3 Business Combinations. The amendments update an outdated reference to the Conceptual Framework in IFRS 3 without significantly changing the requirements in the standard. The amendments apply to business combinations for which the acquisition date is on or after January 1, 2022. The Company is currently assessing the impact of the adoption of these amendments on the Combined Consolidated Financial Statements.

(iv) *Amendments to IAS 37*

In May 2020, the IASB issued Onerous Contracts - Cost of Fulfilling a Contract, which includes amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets. The amendments specify that the ‘cost of fulfilling’ a contract comprises the ‘costs that relate directly to the contract’. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract or an allocation of other costs that relate directly to fulfilling contracts. The amendments are effective for annual periods beginning on or after January 1, 2022. The Company is currently assessing the impact of the adoption of these amendments on the Combined Consolidated Financial Statements.

(v) *Annual Improvements to IFRS Standards 2018-2020*

In May 2020, the IASB issued Annual Improvements to IFRS Standards 2018-2020, which includes minor amendments to three IFRS standards applicable to our Combined Consolidated Financial Statements. The amendments apply prospectively. The amendments are effective for annual periods beginning on or after January 1, 2022.

(vi) Amendments to IAS 1

In February 2021, IASB issued 'Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2)' with amendments that are intended to help preparers in deciding which accounting policies to disclose in their financial statements. The amendments are effective for annual periods beginning on or after January 1, 2023. The Company is currently assessing the impact of the adoption of these amendments on the Combined Consolidated Financial Statements.

(vii) Amendments to IAS 8

In February 2021, IASB published 'Definition of Accounting Estimates (Amendments to IAS 8)' to help entities distinguish between accounting policies and accounting estimates. The amendments are effective for annual periods beginning on or after 1 January 2023. The Company is currently assessing the impact of the adoption of these amendments on the Combined Consolidated Financial Statements.

(viii) Amendments to IAS 12

In May 2021, the IASB published Deferred Tax related to Assets and Liabilities arising from a Single Transaction, which amended IAS 12, Income Taxes. The amendments relate to the recognition of deferred tax when an entity accounts for transactions, such as leases or decommissioning obligations, by recognizing both an asset and a liability. The amendments are effective for annual reporting period beginning on or after January 1, 2023. The Company is evaluating the impact of the adoption of these amendments on its Combined Consolidated Financial Statements.

(al) Impact of COVID-19

Since the outbreak of COVID-19, emergency measures taken in response to the spread of the virus have resulted in significant disruption to business operations globally, resulting in an economic slowdown. Global equity and capital markets have also experienced significant volatility and weakness. The governments have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. These developments are constantly evolving and the duration and impact of the COVID-19 pandemic is highly uncertain and cannot be predicted at this time but could have a material impact on the future performance of the assets. Where COVID-19 relates specifically to our business, specifically in valuing our insurance and reinsurance liabilities, we have allowed for identified deaths but we have not made any changes to our longevity assumptions as it remains too early to quantify the potential long-term impacts from COVID-19 on longevity.

NOTE 3. FINANCIAL INSTRUMENTS

a) Summary of cash and cash equivalents, investments and derivative assets and liabilities

The summary of financial assets and financial liabilities is as follows:

AS AT DEC. 31 US$ MILLIONS	2021 FVTPL[1]	AFS	Amortized Cost	Total
Cash and cash equivalents				
Cash	$ —	$ —	$ 320	**$ 320**
Cash equivalents	—	—	73	**73**
Total cash and cash equivalents	**—**	**—**	**393**	**393**
Derivatives

1. All financial instruments measured at FVTPL have been designated as FVTPL at initial recognition except for derivative assets and liabilities, which are financial assets that are held for trading.

The Company assesses that the carrying value of the financial assets measured by amortized cost approximates their fair value.

The fair value of investments, excluding common shares, preferred shares and cash and cash equivalents, are shown by contractual maturity of investments.

AS AT DEC. 31 US$ MILLIONS	2021	2020
Terms to maturity:		
Bonds:		
Within 1 year	**$ 1,223**	$ 31
1-3 years	**50**	46
4-5 years	**116**	40
Over 5 years	**2,167**	1,052
Private debt:		
Within 1 year	**96**	—
1-3 years	**—**	—
4-5 years	**—**	—
Over 5 years	**112**	—
Loans and receivables		
Within 1 year	**170**	—
1-3 years	**117**	3
4-5 years	**116**	—
Over 5 years	**236**	18
Total	**$ 4,403**	$ 1,190

AFS investments and investments measured at amortized cost are individually evaluated for impairment in establishing the allowance for impairment. For the year ended December 31, 2021, the Company did not incur any impairment expense (December 31, 2020 – $Nil).

b) Fair value hierarchy

Investments measured at fair value are classified in accordance with a valuation hierarchy that reflects the significance of the inputs used in determining their fair value, as per IFRS 13 Fair Value Measurement. Under Level 1 of this hierarchy, fair value is derived from unadjusted quoted prices in active markets for identical investments. Under Level 2, fair value is derived from market inputs that are directly or indirectly observable other than unadjusted quoted prices for identical investments. Under Level 3, fair value is derived from inputs that are not based on observable market data.

The following sets out the financial assets and financial liabilities classified in accordance with the above-mentioned fair value hierarchy, excluding financial assets and financial liabilities that are carried at amortized cost.

AS AT DEC. 31 US$ MILLIONS	2021 Level 1	Level 2	Level 3	Total
Financial assets				
Fair value through profit or loss:				
Bonds	$ —	$ 1,963	$ —	**$ 1,963**

The following table summarizes the valuation techniques and key inputs used in the fair value measurement of Level 2 financial instruments:

Type of Asset	Valuation Techniques and Key Inputs
Bonds	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.
Derivative assets/Derivative liabilities	Foreign currency forward contracts—discounted cash flow model—forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate. Valuation model is based on interest rate contracts—discounted cash flow model—forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate.
Warrants	Valuation model is based on intrinsic value calculated by the difference between strike prices and the unadjusted quoted prices of underlying equity investments in active markets.
Reinsurance funds withheld	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.
Funds withheld liabilities	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

The Company performs initial and ongoing analysis and review of the valuation techniques utilized in determining fair value to ensure that they are appropriate and consistently applied, and that the valuation assumptions are reasonable. The Company analyzes and reviews the data, assumptions and valuation model to ensure that the fair value represents a reasonable estimate as at reporting period end and to monitor controls around fair value measurement, which includes quantitative and qualitative analysis and is overseen by the Company’s investment and accounting personnel.

Fair values determined using valuation models requiring the use of unobservable inputs (Level 3 financial assets and liabilities) include assumptions concerning the amount and timing of estimated future cash flows and discount rates. In determining those unobservable inputs, the Company uses observable external market inputs such as interest rate yield curves, currency rates and price and rate volatilities, as applicable, to develop assumptions regarding those unobservable inputs.

The following table summarizes the valuation techniques and significant unobservable inputs used in the fair value measurement of Level 3 financial instruments:

Type of Asset	**Valuation Techniques**	**Significant Unobservable Inputs**	**Significant unobservable inputs and relationship of unobservable inputs to fair value**
Private equity	Discounted cash flows	• Future cash flows The future cash flows are based on cash flows flowing to the underlying investment • Discount rate The discount rate reflects the inherent risk of the underlying investment	• Increases (decreases) in future cash flows increase (decrease) fair value • Increases (decreases) in discount rate increase (decrease) fair value
Private debt	Discounted cash flows	• Future cash flows The future cash flows include expected interest and principal payments. • Discount rate The discount rate reflects the credit spreads used and the liquidity conditions of the debt instrument.	• Increases (decreases) in future cash flows increase (decrease) fair value • Increases (decreases) in discount rate increase (decrease) fair value

The following table presents the change in the balance of financial assets and liabilities classified as Level 3 as at December 31, 2021 and 2020:

AS AT DEC. 31 US$ MILLIONS	**2021**	2020
Balance, beginning of year	**$ —**	$ —
Fair value changes in other comprehensive income	**4**	—
Additions	**1,021**	—
Disposals	**(8)**	—
Balance, end of year	**$ 1,017**	**$ —**

There were no transfers between Level 1, Level 2 or Level 3 during the years ended December 31, 2021 and 2020.

c) **Net investment income**

Net investment income is comprised of income earned from the following:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020	2019
Interest income			
Cash and cash equivalents	**$ 1**	$ —	$ —
FVTPL investments	**51**	28	19

Other investment income	**75**	—	—
Net investment results from funds withheld	**$ 78**	**$ —**	**$ —**

e) Derivative financial instruments

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, bond forwards, currency swaps, interest rate swaps and warrants. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments.

Foreign exchange forwards, bond forwards, currency swaps, interest rate swaps and warrants are over-the-counter (OTC) contractual agreements negotiated between counterparties. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default. As at December 31, 2021, the derivative counterparty credit risk was $146 million (2020 – $7 million) and the counterparties credit rating was A- or higher (2020 – A+ or higher).

Notional principal by terms of maturity and the fair value of derivatives are presented in the table below.

AS AT DEC. 31, 2021
US$ MILLIONS

	Fair value asset	Fair value liabilities	Collateral pledged	Notional amount: Within 1 year	1-3 years	4-5 years	Over 5 years	Notional principal
Exchange traded								
Bond futures	$ 9	$ —	$ 22	$ 730	$ —	$ —	$ —	$ 730
Over-the-counter

Currency swaps	—	—	—	—	10	—	8	18
Interest rate swaps	—	(1)	—	—	—	1	71	72
Options	127	—	—	5,802	—	—	—	5,802
Total	**$ 146**	**$ (1)**	**$ 23**	**$ 7,320**	**$ 69**	**$ 1**	**$ 79**	**$ 7,469**

[1]Derivative liabilities are included in the Note 9 Accounts Payable and Other.

AS AT DEC. 31, 2020
US$ MILLIONS

	Fair value asset	Fair value liabilities	Collateral pledged	Notional amount: Within 1 year	1-3 years	4-5 years	Over 5 years	Notional principal
Exchange traded								
Bond futures	$ 2	$ —	$ 13	$ 192	$ —	$ —	$ —	$ 192
Over-the-counter								
Foreign exchange forwards	5	—	—	235	—	—	—	235
Interest rate swaps	—	—	—	—	—	—	7	7
Total	**$ 7**	**$ —**	**$ 13**	**$ 427**	**$ —**	**$ —**	**$ 7**	**$ 434**

The Company monitors the fair values of bond futures and forwards on a daily basis, with additional cash collateral obtained or refunded as necessary.

Bond futures, foreign exchange forwards and options mature in less than 1 year. Interest rate swaps mature in over 4 years and settle on a semi-annual basis. Derivatives are measured at FVTPL and are reported on the Combined Consolidated Statements of Financial Position as derivative assets or derivative liabilities. The fair value of exchange-traded futures contracts is determined based on Level 1 inputs. OTC foreign currency forwards, bond forwards, currency swaps and interest rate swaps are valued on the contract notional amounts, which is the difference between contract and market rates. These inputs are derived from observable market data and as such are classified as Level 2 instruments.

For OTC derivatives, collateral is collected from and pledged to derivative counterparties according to the Credit Support Annexes, which form part of the International Swaps and Derivatives Associations' master agreements, when the exposure exceeds a specified threshold. For exchange-traded derivatives, their positions are margined on a daily basis (both initial margin and variation margin) subject to derivative clearing agreements with the exchanges and clearing houses. As at December 31, 2021, the Company has pledged $23 million of financial assets as collateral under the terms of the derivative contracts (2020 – $13 million).

For an analysis of the Company’s risks arising from financial instruments and the policies and procedures to manage these risks refer to Note 12 Risk Management.

f) Securities sold under repurchase agreements

Securities sold under repurchase agreements are accounted for as collateralized borrowing transactions, are measured at amortized cost and are recorded at the amounts at which the securities were initially sold. Under these agreements, the Company may sell securities from its portfolio for periods of time. In exchange, the Company obtains possession of cash from the financial institution with market values equal to the principal amount sold under these agreements. As at December 31, 2021, the Company did not have amounts outstanding under repurchase agreements (2020 – $Nil). For the year ended December 31, 2021, interest expense paid related to the use of the repurchase agreements was $Nil (2020 – $Nil).

The cash received by the Company is equal to the market value of the securities sold on the trade date. As a result, there is no significant exposure to credit risk associated with these agreements.

g) Summary of investments

AS AT DEC. 31 US$ MILLIONS	2021 Carrying Amount	2021 Percent	2020 Carrying Amount	2020 Percent

h) Solely Payments of Principal and Interest ("SPPI") Disclosure

As noted in Note 2 (aj)(ii), the Company has taken the temporary exemption to apply IFRS 9 until IFRS 17 is adopted on January 1, 2023 on the basis that the Company's activities are predominantly connected with insurance, and it has not previously applied IFRS 9. The percentage of the total carrying amount of the liabilities connected with insurance relative to the total carrying amount of all its liabilities was less than or equal to 90 per cent but greater than 80 per cent, and the Company determined that it did not engage in a significant activity unconnected with insurance.

As a consequence of deferring the introduction of IFRS 9, we will provide additional disclosures until we apply the standard for the first time in order to compare our presentation of investments and other financial instruments with those of companies that already apply IFRS 9.

The following additional disclosure, required by IFRS 4 for eligible insurers, presents the fair value and the amount of change in the fair value of the Company's financial assets as of and for the years ended December 31, 2021 and December 31, 2020, showing separately the fair value of financial assets with contractual terms that give rise to cash flows that are SPPI on the principal amount outstanding and the fair value of financial assets that do not give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding ("Non-SPPI").

AS AT DEC. 31, 2021 US$ MILLIONS	SPPI		Non-SPPI	
	Fair value	Change in fair value	Fair value	Change in fair value
Financial assets				
Debt securities	$ 1,884	$ 2	$ 2,023	$ 2

Equities	—	—	3	—
Loans and receivables	21	—	—	—
Total	**$ 64**	**$ 1**	**$ 1,128**	**$ —**

The following additional disclosure, required by IFRS 4 for eligible insurers, presents the credit risk ratings of SPPI financial assets:

AS AT DEC. 31, 2021 US$ MILLIONS	Credit risk	Carrying value (Fair value)	% of fair value
Debt securities			
AAA	Low	$ 113	5 %
AA	Low	19	1 %
A	Low	1,203	48 %
BBB	Low	100	4 %
BB	Other	104	4 %
B	Other	32	1 %
Unrated	Other	313	12 %
Loans and receivables			
A	Low	$ 60	2 %
BBB	Low	36	1 %
BB	Other	152	6 %
Unrated	Other	391	16 %
Total		**$ 2,523**	**100 %**

AS AT DEC. 31, 2020 US$ MILLIONS	Credit risk	Carrying value (Fair value)	% of fair value
Debt securities			
AAA	Low	$ 22	34 %
AA	Low	7	11 %
A	Low	10	16 %
BBB	Low	4	6 %
Loans and receivables			
Unrated	Other	$ 21	33 %
Total		**$ 64**	**100 %**

NOTE 4. ACCOUNTS RECEIVABLE AND OTHER

The Company's accounts receivable and other consist of the following:

AS AT DEC. 31 US$ MILLIONS	2021	2020
Reinsurance receivable	**$ 12**	$ 2
Accrued investment income	**21**	7
Due from related party	**10**	—
Other assets	**4**	4
Total accounts receivable and other	**$ 47**	$ 13

In 2021 and 2020, reinsurance receivable relates to amounts recoverable from third-party reinsurers and cedants. All amounts are expected to be settled within a year.

NOTE 5. PROPERTY AND EQUIPMENT

The Company’s property and equipment consists primarily of a ROU asset. As at December 31, 2021 the property and equipment balance was $2 million (2020 - $2 million). The additions, amortization and disposals to property and equipment during 2021 were $Nil (2020 - $1 million, $Nil, $Nil).

NOTE 6. INTANGIBLE ASSETS

In 2021, the Company recognized $3 million of computer software as intangible assets, which are not yet available for use as at December 31, 2021. Intangible assets not yet available for use are assessed for impairment irrespective of whether there is any indication of impairment. For the year ended December 31, 2021, the Company did not incur an impairment expense (2020 – $Nil).

NOTE 7. DEFERRED ACQUISITION COSTS

The following table presents movement in deferred acquisition costs and the impact on expenses:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS		2021		2020
Deferred acquisition costs, beginning of year	$	—	$	—
Costs capitalized under reinsurance contracts		775		—
Amortization and other		1		—
Deferred acquisition costs, end of year	**$**	**776**	**$**	**—**

NOTE 8. EQUITY ACCOUNTED INVESTMENTS

The following table presents the change in the Company's investments in associates during the year:

FOR THE YEAR ENDED DEC. 31 2021 US$ MILLIONS		
Balance, beginning of year	$	—
Additions		294
Share of net income		8
Share of comprehensive income		44
Dividends received		(2)
Balance, end of year	**$**	**344**

The addition of $294 million during the year relates to the Company's equity accounted investment in AEL Holdings. AEL Holdings, through its wholly-owned subsidiaries, is a leading issuer of fixed index annuities through independent agents, banks and broker-dealers in the United States with its corporate headquarters in Des Moines, Iowa.

The Company originally acquired a 9.5% interest in AEL Holdings at the time of Spin-Off and the investment was treated as a financial asset. During the third quarter, as a result of a firm commitment to enter into the reinsurance agreement with American Equity Investment Life Insurance Company (“AEILIC”), a subsidiary of AEL Holdings, management concluded that they had significant influence over AEL Holdings, and as such, derecognized the financial asset and recorded an equity accounted investment. As at December 31, 2021 the Company's ownership interest was 9.8% as a result of common share repurchases and cancellations completed by AEL Holdings during the period.

The Company accounts for AEL Holdings using the equity method of accounting by recognizing its share of income and OCI from its 9.8% ownership interest in the equity accounted investment one quarter in arrears, which is the most up to date information available to the Company. AEL Holdings does not present a classified balance sheet. The summarized financial information below represents amounts in AEL Holdings' financial statements, adjusted by the Company for equity accounting purposes:

AS AT AND FOR THE SIX MONTHS ENDED SEP. 30, 2021 US$ MILLIONS		
Total assets	$	78,318
Total liabilities		71,943
Accumulated other comprehensive income		1,957
Other stockholders' equity		4,418
Total revenues		1,618
Total expenses		(1,491)
Income tax expense		(29)
Preferred stock dividends		(22)
Net income		76
Other comprehensive income		452

AEL Holding"s shares are traded on the New York Stock Exchange. The fair value of the Company's shares in AEL Holdings is $354 million based on the quoted price as at December 31, 2021. The Company received $2 million of dividends from AEL Holdings during the year.

NOTE 9. ACCOUNTS PAYABLE AND OTHER

The Company's accounts payable and other consist of the following:

AS AT DEC. 31 US$ MILLIONS		**2021**		2020
Accounts payable and accrued liabilities	**$**	**57**	$	4
Derivative liabilities		**1**		—
Other		**7**		2
Total accounts payable and other	**$**	**65**	$	6

NOTE 10. INSURANCE RESERVES

The Company's insurance reserves are as follows:

AS AT DEC. 31 US$ MILLIONS		**2021**		2020
Gross	**$**	**8,497**	$	1,339
Reinsurance assets		**(169)**		(190)
Total insurance reserves	**$**	**8,328**	$	1,149

Reinsurance assets reflect immediate and deferred annuity payments ceded under the longevity reinsurance and quota share reinsurance arrangements.

a. Nature and composition

Reinsurance

NER SPC's insurance reserves represent Fixed Indexed Annuity ("FIA") contracts that provide contract owners the possibility of earning returns linked to the performance of a specified market index, predominantly the S&P 500 Index, while providing principal protection. The contracts include a provision for a minimum guaranteed surrender value in accordance with applicable law. The products allow policyholders to allocate funds periodically among several different crediting strategies, including index-based strategies and a traditional fixed rate strategy. High surrender charges apply for early withdrawal.

The policyholder account value of the FIA is equal to the sum of deposit paid, premium bonus, and index credits based in the relevant market index (subject to cap, spread and/or participation rate which can typically be reset) less any fees for riders and any withdrawals taken to-date.

NER Ltd.'s insurance reserves represent multi-year guaranteed annuity contracts that provide owners a guaranteed rate of return. Premiums and credited interest are protected from market volatility, which provides long-term financial security and predictability for policyholders.

PRT

The insurance reserves represent contracts that provide immediate annuities for current pensioners and deferred annuities for members who have not reached pensionable age. The Company's insurance contracts are a mixture of group annuity "buy-in" policies, where the policyholder is the pension fund, and group annuity "buy-out" policies, where the policyholder is the administrator. The Company provides group annuity policies across Canada.

b. Valuation assumptions

Reinsurance

NER SPC's insurance reserves are based on actuarial assumptions related to the underlying policies' terms, lives of the policies, duration of the contract, yield on investments supporting the liabilities, level of expenses. Significant assumptions also include policyholder behavior assumptions, such as surrender, lapse, withdrawal rates. NER SPC uses a combination of actual and industry experience when setting and updating policyholder behavior assumptions. Assumptions are at best estimate with margins for adverse deviation. These margins are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Best-estimate assumptions and margins are reviewed periodically for continued appropriateness.

NER Ltd.'s insurance reserves have no actuarial assumptions as the reserves are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges.

PRT

The insurance reserves represent the present value of the future annuity payments and expenses measured in accordance with the CALM described in Note 2 Summary of significant accounting policies, section (r) Insurance Reserves. It incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation, and inflation. These margins are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Best-estimate assumptions and margins are reviewed periodically for continued appropriateness.

The principal valuation assumptions and the methods for arriving at these valuation assumptions are outlined below.

Longevity

Mortality assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors including, but not limited to, gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data comprises of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the Company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

Mortality improvement assumptions follow the prescribed mortality improvement scales issued by the CIA.

Investment returns

Projected cash flows from the current assets and liabilities are used in CALM to determine insurance reserves. Assumptions are made regarding rates of returns on supporting assets. Projected cash flows from assets used in the actuarial calculations are reduced to provide for potential asset default losses. The calculation for future credit losses on assets is based on the credit quality underlying the asset portfolio.

Other assumptions

The internal costs of maintaining the insurance reserves, the fees paid to third-party administrators engaged to manage payments under the in-force policies, and fees due to reinsurers and investment management expenses, as well as inflation are factored into the calculation of the insurance reserves where applicable.

c. Net change in insurance reserves

The following table summarizes the movement between insurance reserves for the years ended December 31, 2021 and 2020 by its major components:

FOR THE YEAR ENDED DEC. 31 2021 US$ MILLIONS	Gross reserve	Reinsurance assets	Net
Beginning of year	$ 1,339	$ 190	**$ 1,149**
Changes during the year

	7,152	(22)	**7,174**
Impact of foreign exchange[1]	6	1	**5**
Balance at end of year	**$ 8,497**	**$ 169**	**$ 8,328**

FOR THE YEAR ENDED DEC. 31 2020 US$ MILLIONS	Gross reserve	Reinsurance assets	Net
Beginning of year	$ 856	$ 197	**$ 659**
Changes during the year			
New business	414	—	**414**
Normal changes	67	(9)	**76**
Management actions and changes in assumptions	(24)	(2)	**(22)**
	457	(11)	**468**
Impact of foreign exchange[1]	26	4	**22**
Balance at end of year	**$ 1,339**	**$ 190**	**$ 1,149**

1. Foreign currency translation reported as a separate component of other comprehensive income. See Note 2(ac) Foreign currencies

Under fair value accounting adopted by RPT business, movement in the fair value of the supporting assets is a major factor in the movement of insurance reserves. Changes in the fair value of assets are largely offset by corresponding changes in the fair value of liabilities. The change in the value of the insurance reserves associated with the change in the value of the supporting assets is included within normal changes above. The insurance reserve from reinsurance activities is not sensitive to the fair value of the supporting assets under US GAAP reserve methodology.

In 2021, the gross reserves consist of $2.2 billion from BAC, $1.6 billion from NER Ltd. and $4.7 billion from NER SPC. The main contributors to the increase in net insurance reserves were the impact of new business of $$7.2 billion partially offset by reinsurance transactions of $22 million. Management actions and changes in assumptions increased reserves by $284 million. The increase was primarily due to revisions to expense assumptions to reflect the most recent experience analysis, offset by revisions to interest rate risk assumptions and the execution of longevity swaps.

On October 8, 2021, NER SPC closed a retrocession agreement with an effective date of July 1, 2021 with an insurance company which was the Company's associate. At the effective date, NER SPC assumed embedded derivative insurance reserves in the amount of $193 million which subsequently increased to $204 million at December 31, 2021.

In 2020, the entire gross reserve related to BAC. The main contributors to the increase in net insurance contract liabilities were the impact of new business of $414 million and the impact of normal changes of $76 million. Management actions and changes in assumptions lowered the reserves by $22 million. The decrease was primarily due to modelling enhancements related to the reinvestment assumption and asset cash flows.

The Company’s risks arising from insurance contract liabilities are principally interest rate and longevity. The policies and procedures to manage these risks and sensitivity analysis are described in Note 12 Risk Management.

d. Reinsurance ceded results

Any gains or losses on reinsurance transactions are recognized in income on inception of the transactions and are included in change in insurance contract liabilities ceded in the Combined Consolidated Statements of Operations. In December 2020, BAC entered into two longevity reinsurance transactions which resulted in after-tax losses on inception of approximately $1 million. In December 2021, BAC entered into another longevity reinsurance transaction which resulted in an after-tax loss on inception of approximately $1 million.

As at December 31, 2021, BAC’s total expected fixed payments and actual costs of benefit expenses to be reimbursed under longevity reinsurance transactions used in valuing reinsurance assets were $1.1 billion and $1.1 billion (2020 - $493 million and $483 million) respectively. The difference between fixed payments and actual costs on past service is recognized in the same period as the related claim is incurred within benefits ceded in the Combined Consolidated Statements of Operations.

Reinsurance fees in respect of longevity reinsurance arrangements are recognized when due to reinsurers and are included in premiums ceded in the Combined Consolidated Statements of Operations:

AS AT DEC. 31 US$ MILLIONS	**2021**	2020
Reinsurance fees in respect of longevity reinsurance arrangements	**$ 1**	$ —

NOTE 11. SHARE CAPITAL

The Company is authorized to issue:

i. 1,000,000,000 Exchangeable Class A Limited Voting Shares with a par value of $39.74 per share;
ii. 500,000 Class B Limited Voting Shares with a par value of $39.74 per share;
iii. 1,000,000,000 Class C Non-Voting Shares with a par value of $1 per share;
iv. 100,000,000 Class A Senior Preferred Shares (issuable in series) with a par value of $25 per share;
v. 100,000,000 Class B Senior Preferred Shares (issuable in series) with a par value of CAD$25 per share;
vi. 1,000,000,000 Class A Junior Preferred Shares (issuable in series) with a par value of $25 per share;
vii. 1,000,000,000 Class B Junior Preferred Shares (issuable in series) with a par value of CAD$25 per share.

The share capital of the Company as at December 31, 2021 and December 31, 2020 comprises the following:

	December 31, 2021		**December 31, 2020**	
	Number of shares	Value	Number of shares	Value
Issued				
Class A exchangeable shares	10,877,989	$ 535	—	$ —
Class B shares	24,000	1	—	—
Class C shares	23,544,548	963	—	—
Share capital		**$ 1,499**		**$ —**

NOTE 12. RISK MANAGEMENT

The management of risk is central to the success of the business. The Company seeks to create and protect enterprise value by enabling risk-informed decision making and by balancing risk and return in business processes.

The Board has overall responsibility for the management of risk and is supported through formal committees of the Board including the Risk Committee.

The Company manages risk by applying the principles and guidelines outlined in the enterprise risk management framework presented to the BAM Re Board (the "ERM Framework"). The ERM Framework establishes the overall risk management framework that includes the following:

- Risk inventory – identifies and defines the risks arising from the Company's business strategy and operations using a consistent language that enables an enterprise-wide approach to measurement, reporting and disclosure of risk;

- Risk appetite – determines the nature and amount of risk the Company is prepared to take, the adherence to which is measured and reported through an extensive set of Board-approved risk appetite tolerances;

- Risk governance – establishes clear ownership and accountability for risk management oversight and a risk-aware culture across the Company; and

- Risk management process – codifies a consistent approach to the identification, assessment, measurement, control, monitoring and reporting of risks faced by the Company.

As part of the risk governance framework, the Company operates a three lines of defense model. Under this model, the accountabilities of each line of defense are:

- First line – business management: day to day responsibility for managing and identifying risks, ensuring activities are within risk appetite and established policies, and designing and implementing effective internal controls;

- Second line – risk management function: establish enterprise governance, risk and control strategies and policies; provide oversight and independent effective challenge to the first line, as well as training, tools and advice; and

- Third line – internal audit: independently verify the adequacy and effectiveness of the first and second lines of defense, and that the enterprise risk management framework is operating effectively.

An Own Risk and Solvency Assessment ("ORSA") is undertaken by BAC at least annually. The ORSA involves a comprehensive assessment of the Company's risks, capital needs and solvency position, as well as solvency forecasting across a range of scenarios including plausible stresses that could jeopardize the Company's business plans. BAC also evaluates its exposure to sustained adverse scenarios through other stress testing techniques such as the Financial Condition Testing ("FCT").

A Commercial Insurers' Solvency Self-Assessment ("CISSA") is undertaken by NER Ltd. at least annually. The primary purpose of the CISSA exercise is to allow NER Ltd. to incorporate an analysis of the internal capital needs into the risk management frameworks. It also ensures that both capital needs and available capital resources are considered in the development of business strategies and decision-making over the near and long term, including factoring in the impact of catastrophic shocks. The CISSA framework provides a perspective of the capital resources necessary to achieve NER Ltd.'s business strategies and remain solvent given their risk profile, as well as insight into the risk management and governance procedures surrounding these processes.

The Company has established recurring routines for monitoring and reporting on risks. Risk management reports are provided to management on a monthly basis and to the Board and Risk Committee on a quarterly basis. The reports include risk exposures measured against Board-approved risk appetite tolerances, and where relevant, management actions are identified to ensure risk mitigation and controls are effective.

The principal risk factors that affect the Company's operations and financial condition include financial risks such as market risk, credit risk and liquidity risk, insurance risk and other risks such as regulatory risk and operational risk.

The following sections describe the primary financial risks and associated risk management strategies in place that affect the Company's operations and financial condition.

a. Market risk

Market risk is defined for these purposes as the risk that the fair value or future cash flows of a financial instrument held by the Company will fluctuate because of changes in market prices. Market risk includes the risk of changes in interest rates, currency exchange rates and changes in market prices due to factors other than interest rates or currency exchange rates, such as changes in equity prices, or credit spreads.

The Company manages market risk from foreign currency assets and liabilities and the impact of changes in currency exchange rates and interest rates by funding assets with financial liabilities in the same currency and with similar interest rate characteristics, and by holding financial contracts such as interest rate and foreign exchange derivatives to minimize residual exposures.

Financial instruments held by the Company that are subject to market risk include other financial assets, borrowings and derivative instruments.

1. *Interest rate risk*

The Company manages interest rate risk through an asset liability management ("ALM") framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance contract liabilities. Within the context of the ALM framework, the Company uses derivatives including interest rate swaps and bond futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

The Investment Policy outlines the duration constraints that have been approved by the Board. In operationalizing these constraints, considerably more confining duration-based targets have been established that are closely monitored and reported to management in monthly business updating meeting and to the Board and Risk Committees on a quarterly basis.

The following table shows the sensitivity to changes in interest rates:

	2021		2020	
AS AT DEC. 31 US$ MILLIONS	**50 bps increase**	**50 bps decrease**	50 bps increase	50 bps decrease
Movement in liabilities	**$ 103**	**$ (105)**	$ 63	$ (63)
Movement in assets	**(248)**	**329**	(62)	62
Tax effect	**(4)**	**4**	—	—
Impact on comprehensive income	**$ (149)**	**$ 228**	$ 1	$ (1)

The Investment Policy is reviewed at least annually and approved by the Board.

2. *Foreign exchange risk*

Changes in currency rates will impact the carrying value of financial instruments denominated in currencies other than the USD.

The Company manages foreign exchange risk using foreign exchange forwards. The Investment Policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

The Company holds financial instruments with net unmatched exposures in several currencies, changes in the translated value of which are recorded in net income. As at December 31, 2021, a 1% fluctuation in USD against non-USD currencies would have an impact of approximately $1 million on net income and $1 million on OCI (2020 – $Nil million on net income and $Nil on OCI).

b. Credit risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The Company is primarily exposed to credit risk through its investments in debt securities and reinsurance funds withheld.

The Company manages exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in the Investment Policy.

1. *Asset quality*

The following table summarizes the external credit ratings for cash and cash equivalents and investments:

AS AT DEC. 31, US$ MILLIONS		2021			2020	
Cash and cash equivalents	**$**	**393**	**4 %**	$	35	3 %
Bonds and other debt securities						
AAA		512	5 %		409	33 %
AA		55	1 %		11	1 %
A		1,516	15 %		121	10 %
BBB		1,306	13 %		617	50 %
BB		151	1 %		10	1 %
B		54	— %		1	— %
Unrated		170	2 %		—	— %
		3,764	**37 %**		1,169	95 %
Preferred shares						
P2		7	— %		3	— %
BB		1	— %		—	— %
Unrated		10	— %		—	— %
		18	**— %**		3	— %
Common shares						
A+		243	2 %		—	— %
Unrated		32	**— %**		—	— %
		275	**2 %**		—	— %
Other equity						
Unrated		**247**	**2 %**		—	— %
Private loans						
A		60	1 %		—	— %
BBB		55	1 %		—	— %
BB		151	2 %		—	— %
Unrated		251	3 %		—	— %
		517	**7 %**		—	— %
Mortgages						
Unrated		122	1 %		21	2 %
		122	**1 %**		21	2 %
Reinsurance Funds Withheld						
AAA		819	8 %		—	— %
AA		228	2 %		—	— %
A		891	9 %		—	— %
BBB		2,484	26 %		—	— %
BB		105	1 %		—	— %
B		30	— %		—	— %
Unrated		93	1 %		—	— %
		4,650	**47 %**		—	— %
Total cash and cash equivalents and investments	**$**	**9,986**	**100 %**	$	1,229	100 %

The Company's overall target credit quality for the portfolio is a credit rating of BBB+. As at December 31, 2021 and 2020, the Company met this requirement.

2. *Concentration*

Concentrations of credit risk arise from exposures to a single issuer or a group of related issuers or groups of issuers that have similar risk characteristics.

Bonds

The following table provides the fair value of investments by groups of issuers of bonds:

	2021		2020	
Government bond holdings	$ 1,664	47 %	$ 401	34 %
Corporate and other bond holdings	1,892	53 %	768	66 %
Total bond holdings	**$ 3,556**	**100 %**	$ 1,169	100 %

The following table discloses the Company's top 5 holdings of issuers (excluding governments), as well as exposure to the largest single issuer of corporate bonds.

	2021	2020
Exposure to the top 5 largest issuers of corporate bonds	**$ 161**	$ 90
% of total cash and cash equivalents and investments	**3 %**	7 %
Exposure to the largest single issuer of corporate bonds	**32**	18
% of total cash and cash equivalents and investments	**1 %**	2 %

3. *Derivative counterparties*

Credit risk also arises in respect of derivative contracts to the extent that there is the potential for the counterparties to default on their obligations. To manage this risk, derivative transactions are limited to an approved list of counterparties and in some cases are fully collateralized with highly rated instruments. The derivative counterparty risk as of December 31, 2021 and 2020 was $146 million and $7 million, respectively. As at December 31, 2021, these counterparties have a credit rating of A or higher (2020 - A+ or higher).

4. *Reinsurance counterparties*

BAC has reinsurance contracts with third-party registered reinsurers and one third-party unregistered reinsurer with a total exposure of $169 million at December 31, 2021 (2020 – $190 million). To manage counterparty risk, reinsurance transactions are limited to an approved list of reinsurers with concentration limits to any single reinsurer.

Under the reinsurance contracts with third-party unregistered reinsurers, highly rated assets are required to be pledged to the Company to fully support the ceded reserves. The Company maintains a valid and enforceable security interest that has priority over any other security interest in the collateral. In the event of default by the reinsurer, the Company has the right to liquidate or take legal possession of these assets, in a timely manner.

As at December 31, 2021, the credit ratings of the reinsurers are A+ (2020 - A+).

NER Ltd. and NER SPC have reinsurance contracts with third-party cedants with a total exposure of $6,253 million at December 31, 2021 (2020 – $Nil).

As at December 31, 2021, the credit ratings of the third-party cedants are A- or higher.

5. *Impaired Assets*

The Company reviews all reinsurance assets at each reporting date and determined that there was no evidence of impairment as at December 31, 2021 and 2020.

c. Liquidity risk

Liquidity risk is the risk that the Company will not be able to raise the necessary funds, at the appropriate time, to meets its financial liabilities.

Cash outflows primarily consist of benefit payments to policyholders and to a lesser extent, operating expenses and settlement of derivative contracts.

The following table sets out the expected maturity profile of the Company's financial liabilities:

AS AT DEC.31, 2021 US$ MILLIONS	Within 1 year	1-3 years	4-5 years	Over 5 years	Total
Accounts payable and other	$ 65	$ —	$ —	$ —	**$ 65**
Due to related party	467	—	—	—	**467**
Reinsurance payable	21	14	15	25	**75**
Corporate borrowings	656	37	—	—	**693**
Insurance reserves	368	769	792	6,568	**8,497**
Deferred revenue	4	7	7	64	**82**
Liabilities of structured entities	—	—	—	167	**167**
Funds withheld liabilities	12	—	—	—	**12**
Total	**$ 1,593**	**$ 827**	**$ 814**	**$ 6,824**	**$ 10,058**

AS AT DEC.31, 2020 US$ MILLIONS	Within 1 year	1-3 years	4-5 years	Over 5 years	Total
Accounts payable and other	$ 5	$ 1	$ —	$ —	**$ 6**
Insurance reserves	21	85	85	1,148	**1,339**
Funds withheld liabilities	12	—	—	—	**12**
Total	**$ 38**	**$ 86**	**$ 85**	**$ 1,148**	**$ 1,357**

To manage liquidity risk, the Company as part of its ALM framework, purchases assets to support the liabilities under its insurance contracts. The effective and key rate duration of these investments are constructed to closely match those of the annuity policy liabilities. The Company has established liquidity risk tolerances and operational targets that are closely monitored. Stress testing is conducted to ensure that there are sufficient liquid assets at all times to meet obligations.

In addition, the company has a credit agreement with Brookfield Asset Management as lender, providing for a three-year $200 million revolving credit facility, and an agreement for a $150 million third-party revolving credit facility. As at December 31, 2021 there was $nil drawn on the Brookfield Credit Agreement (December 31, 2020 – $Nil), and $37 million drawn on the third-party revolving credit facility (December 31, 2020 – $Nil).

In addition, a subsidiary of the the Company has access to a CAD$150 million repurchase agreement (2020 - CAD$150 million). As at December 31, 2021, there were no amounts outstanding under the repurchase agreement (2020 – $Nil).

d. Insurance risk

PRT

Insurance risk is the risk that actual experience related to benefit payments and expenses does not emerge as expected. The Company is primarily exposed to longevity risk.

Longevity risk is the risk that mortality experience occurs at lower rates than that assumed at the time of pricing which exposes the Company to benefit payments that will be paid for longer periods than anticipated.

Longevity assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors established at the time of pricing. These factors take into consideration the characteristics of the annuitants including but not limited to gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data is comprised of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the Company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

These inputs and analytics support the Company's assessment of longevity risk.

To reduce longevity risk within our PRT business, the Company enters into longevity reinsurance transactions with third party reinsurers. Under these contracts, the Company commits to pay the reinsurers a schedule of fixed payments relating to a proportion of defined blocks of policyholder benefits. In return, the reinsurers reimburse the actual cost of their proportion of benefit expenses on those blocks to the Company. As at December 31, 2021, the Company has entered into longevity reinsurance contracts and has reinsured approximately 71% of its longevity risk (2020 – 54%).

The following table shows the sensitivity to changes in longevity risk. These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

	Mortality Rate		Mortality Improvement	
AS AT DEC. 31, 2021 US$ MILLIONS	5% Increase	5% Decrease	50% Increase	50% Decrease
Impact on comprehensive income	**$ 10**	**$ (9)**	**$ (12)**	**$ 13**

	Mortality Rate		Mortality Improvement	
AS AT DEC. 31, 2020 US$ MILLIONS	5% Increase	5% Decrease	50% Increase	50% Decrease
Impact on comprehensive income	**$ 6**	**$ (6)**	**$ (8)**	**$ 8**

Reinsurance

NER SPC reinsures fixed indexed annuity products only. Generally, the assumptions that are the most sensitive for fixed indexed annuity products are changes to investment yields, utilization rates, partial withdrawal rates, lapse rates and mortality. However, our reserves are less sensitive to changes in assumption at this point in time considering the mechanics of our reserving process.

At treaty inception, projected base contract cash flows are bifurcated into two parts: a host liability that reserves for contractually guaranteed payments and an embedded derivative that represents the value of payments in excess of guarantees; for the current treaty, the host liability makes up the vast majority of the reserve liability. The host liability after inception is calculated using an effective yield approach based on a host accrual rate that equates the present value of actual and projected future guaranteed benefit payments to the initial host liability. The host accrual rate is revised as experience emerges, actual cash flows replace projected, and best estimate assumptions about the future are updated. Given this financial year end is only six months following treaty inception, the impact of rolling forward at a different accrual rate recalibrated from changing assumptions is minimized by the short period.

Investment yield risk is a shift in market interest rates associated with investment fixed income instruments. The embedded derivative, measured at fair value, is most sensitive to investment yields as this directly affects its discount rate.

The following table shows the impact on the overall liability to changes in mortality (as described in PRT sensitivity) and changes to investment yields:

	Mortality Rate		Yield	
AS AT DEC. 31, 2021 US$ MILLIONS	10% Increase	10% Decrease	50 bps Increase	50 bps Decrease
Impact on comprehensive income	**$ (1)**	**$ 1**	**$ (11)**	**$ 12**

e. Operational risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The Company's internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

The Company has significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board.

Disaster recovery and business continuity plans have also been established to manage the Company's ability to operate under adverse conditions.

f. Regulatory risk

Regulatory risk stems principally from the risk of changes to the regulatory environment in which the Company operates. To manage this risk, the Company seeks to a have a regular dialogue with regulators to ensure compliance. Furthermore, senior management participates in industry groups and professional bodies to stay apprised of regulatory changes.

NOTE 13. CORPORATE BORROWINGS

The Company and its subsidiaries have bilateral revolving credit facilities backed by global banks. The total available amount on the credit facilities is $150 million. The credit facilities are available in U.S. and Canadian dollars and advances under the credit facilities bear interest at the specified LIBOR, CDOR, or bankers' acceptance rate plus a spread. The credit facilities have a maturity date of June 28, 2024. As at December 31, 2021, $37 million was drawn on the bilateral credit facilities.

In addition, the Company has a 364-day revolving credit facility for the purpose of temporarily warehousing investments that will ultimately be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings. As at December 31, 2021, $656 million was drawn.

The facilities require the Company to maintain a minimum net worth covenant. At at December 31, 2021, the Company was in compliance with its financial covenants.

The Company also has a revolving credit facility with Brookfield Asset Management, as described in Note 1(b)(v) that as at December 31, 2021 permitted borrowings of up to $200 million. As at December 31, 2021, there were no amounts drawn on the facility.

NOTE 14. OPERATING EXPENSES

Operating expenses include the following:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020	2019
Salaries and benefits expense	**$ 10**	$ 3	$ 3
Professional services	**18**	2	2
Software	**2**	1	1
Sales and capital taxes	**1**	—	—
Licenses and fees	**1**	—	—
Other	**3**	—	—
Total operating expenses	**$ 35**	$ 6	$ 6

NOTE 15. INCOME TAXES

Income taxes are recognized for the amount of taxes payable by the Company's corporate subsidiaries and for the impact of deferred income tax assets and liabilities related to such subsidiaries.

The Company's income tax expense is as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020	2019
Current tax:			
Current tax on profits for the year	**$ —**	$ 1	$ —
Adjustments in respect of prior years	**—**	—	$ —
Total current tax expenses	**—**	1	—
Deferred tax:			
Origination and reversal of temporary differences	**2**	—	—
Total deferred tax expenses	**2**	—	—
Total income tax expense	**$ 2**	$ 1	**$ —**

The below reconciliation has been prepared using a statutory income tax rate for jurisdictions where the Company's subsidiaries operate.

The Company's income tax expense is reconciled as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020	2019
Net (loss) income before income tax	**$ (42)**	$ 2	$ 6
Income tax at statutory tax rate	**(11)**	1	2
Tax effect of:			
International operations subject to different tax rates	**13**	—	—
Derecognition (Recognition) of deferred tax assets	**—**	—	(2)
Total income tax expense	**$ 2**	$ 1	$ —

The Company's effective tax rate is different from the Company's statutory income tax rate due to the following differences set out below:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020	2019
Statutory income tax rate	**26.5%**	26.5%	26.5%
Increase (reduction) in rate resulting from:			
International operations subject to different tax rates	**(30.9)%**	15.9 %	— %
Derecognition (recognition) of deferred tax assets	**— %**	— %	(24.7)%
Other	**— %**	(13.0)%	0.7 %
Effective income tax rate	**(4.4)%**	29.4 %	2.5 %

The gross movement on the deferred tax asset is as follows:

FOR THE YEARS ENDED DEC. 31 US$ MILLIONS	**2021**	2020
Deferred tax asset, beginning of year	$ —	$ —
Tax booked to income statement	**(2)**	—
Tax booked to balance sheet	**2**	—
Tax booked to equity	**20**	—
Deferred tax assets, end of year	**$ 20**	**$ —**

AS AT DEC. 31 US$ MILLIONS	**2021**	2020
Non-capital loss carryforwards	**$ 18**	$ —
Tax credit carryforwards	**2**	—
Deferred tax asset	**$ 20**	**$ —**

Deferred tax asset recognized relates to non-temporary differences relating to non-capital loss carryforwards and tax credit carryforwards. The Company evaluates the deferred tax asset based on, amongst other factors, historical operating results, expectation of future profitability, and the duration of the applicable statutory carryforward periods for tax attributes. Based on the evaluation of the deferred tax assets as of December 31, 2021, the Company determined that the deferred tax assets would be realized within the applicable statutory carryforward period.

NOTE 16. EARNINGS PER SHARE

Basic and diluted earnings per class C share for the year ended December 31, 2021 have been calculated using the weighted average number of class C shares outstanding of 19,903,823, and represent the class C shares outstanding for the period of June 28, 2021 to December 31, 2021.

The components of basic and diluted earnings per share are summarized in the following table:

FOR THE YEAR ENDED DEC. 31 2021 US$ MILLIONS		2021
Net loss for the year	$	(44)
Attributable to:		
Brookfield Asset Management Inc.		5
Class A exchangeable and Class B shareholders		3
Class C shareholders		(52)
Earnings per share per class C share - basic and diluted	**$**	**(2.58)**

NOTE 17. RELATED PARTY TRANSACTIONS

In the normal course of operations, the Company entered into the transactions below with related parties.

a) Spin-off related transactions

On April 13, 2021 Brookfield US Holdings Inc. ("BUSHI"), a wholly-owned-subsidiary of Brookfield Asset Management, loaned $10 million to BAM Re Holdings as a non-interest bearing USD denominated demand note. The amount was fully repaid upon completion of the spin-off.

On June 18, 2021, Burgundy Acquisitions I Ltd. (“Burgundy”), a wholly-owned subsidiary of Brookfield Asset Management, sold its 9.1 million common shares of AEL Holdings to NER SPC for fair market value of $291 million.

On June 18, 2021, Brookfield Annuity Holdings Inc. (“BAH”) sold its ordinary shares of NER SPC to BAM Re Holdings for fair market value consideration of $5 million. The transaction represents a common control transaction and is recorded at NER SPC’s historical carrying value, net of amounts due to related parties, of $5 million. Subsequently, BAH declared and executed a $5 million return of capital on its common shares to Brookfield Asset Management.

On June 18, 2021, BAM Re loaned $25 million to Brookfield International Holdings Inc. (“BIHI”), a wholly-owned subsidiary of Brookfield Asset Management, in exchange for the issuance by BIHI of a demand note in the amount of $25 million.

On June 18, 2021, Brookfield Asset Management advanced cash of $30 million via a non-interest bearing, USD denominated promissory note to the Company. This amount was fully repaid with proceeds of the Spin-off.

On June 24, 2021, Brookfield Asset Management transferred $151 million to the Company in exchange for 3,582,510 BAM Re Class C Non-Voting Shares.

On June 24, 2021, the Company acquired all of the issued and outstanding shares of BAH from its sole shareholder, Brookfield Asset Management, for total consideration of $111 million. The transaction represents a common control transaction and is recorded at BAH’s historical carrying value, net of amounts due to related parties, of $110 million.

On June 24, 2021, Brookfield Asset Management sold its limited partnership and general partnership interest in Brookfield Reinsurance Investments L.P. (“BRILP”) to BAM Re Holdings for cash consideration of $40 million. The transaction represents a common control transaction and is recorded at BRILP’s historical carrying value, net of amounts due to related parties, of $43 million.

b) BAM Re agreements

As described in Note 1(b)(iv), Brookfield Asset Management provided to the Company an equity commitment in the amount of $2 billion to fund future growth, which the Company may draw on from time to time. As of December 31, 2021, there was no amount drawn under the equity commitment.

As described in Note 1(b)(v), as of December 31, 2021, there were no amounts drawn on the credit facilities under the Brookfield Credit Agreement.

As described in Note 1(b)(vi), the Company entered into the Support Agreement on June 28, 2021. The base fee for the year ended December 31, 2021 was $Nil .

As described in Note 1(b)(vii), the Company entered into the Rights Agreement on June 28, 2021. The base fee for the year ended December 31, 2021 was $Nil .

As described in Note 1(b)(viii), the Company entered into the Administration Agreement on June 28, 2021. The base fee for the year ended December 31, 2021 was $0.4 million.

As described in Note 1(b)(ix), the Company entered into an Investment Management Agreement with Brookfield Asset Management on June 28, 2021. The base investment management fee for the year ended December 31, 2021 was $4.1 million.

As described in Note 1(b)(x), the Company entered into the Brookfield Licensing Agreement on June 28, 2021. The base fee for the year ended December 31, 2021 was $Nil.

c) Other related party transactions

On March 10, 2020, BAC entered into a lease arrangement with Brookfield Properties (Canada) Inc. (“BPO”), a related party of Brookfield Asset Management. The lease arrangement was conducted in the normal course of operations and on market terms. The amount paid to BPO for the leased office facilities and building maintenance for the year ended December 31, 2021 totaled $0.4 million (December 31, 2020 - $0.2 million). As at December 31, 2021, lease liabilities relating to this arrangement were $1 million.

BAC entered into outsourcing arrangements with Brookfield Asset Management related to information technology, investment fund management, building maintenance, and internal audit services. The amount paid to Brookfield Asset Management for these services for the year ended December 31, 2021 totaled $0.3 million (December 31, 2020 – $0.4 million). Amounts due to Brookfield Asset Management related to outsourcing arrangements at December 31, 2021 totaled $0.5 million (2020 – $Nil).

During the year, BAC issued group annuity policies of $5 million with certain of Brookfield Asset Management's subsidiaries and collected all the premiums. Premiums, gross benefits and insurance contract liabilities with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

On March 29, 2021, the Company’s parent, BAM, transferred $79 million of deductions related to Part VI.1 tax at a cost of $0.99 per $1.00 of tax savings. The total value of tax deductions acquired was $20 million dollars. In exchange, the Company paid cash of $20 million.

During the year, subsidiaries of the Company purchased investments of $0.9 billion from Brookfield Asset Management and its subsidiaries, from which net investment income of $5 million was recognized in the Combined Consolidated Statements of Operations. Investment transactions with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

On October 8, 2021, BIHI provided a $377 million interest-bearing loan to NER SPC. NER SPC used the loan to finance the excess reserve capital associated with the reinsurance transaction that closed in October. The loan is expected to be repaid with third-party financing arrangements within the next year.

The Company had $64 million of cash on deposit with wholly-owned subsidiaries of Brookfield Asset Management as at December 31, 2021. During the year, the Company drew on approximately $742 million of the deposit to fund new reinsurance and PRT transactions, as well as various investments.

NOTE 18. SEGMENT REPORTING

Effective in the fourth quarter of 2021, the Company's operations are organized into two operating segments: Reinsurance and PRT. These segments are regularly reviewed by the CODM for the purpose of allocating resources to the segment and to assess its performance. Prior to this, operations were attributable to one segment: Insurance. During the fourth quarter, management entered into significant reinsurance arrangements and thus, reporting to the CODM was changed. The prior year results have been restated to reflect this change.

The key measure used by the CODM in assessing performance and in making resource allocation decisions is Distributable Operating Earnings ("Distributable Operating Earnings", or "DOE").

Distributable Operating Earnings is calculated as net income excluding the impact of depreciation and amortization, income taxes, income from equity accounted investments, mark-to-market on hedging items, breakage and transaction costs, and is inclusive of our proportionate share of adjusted earnings from our investments in associates. DOE allows the CODM to evaluate the Company’s segments on the basis of return on invested capital generated by its operations and allows the Company to evaluate the performance of its segments

The tables below provide each segment’s results in the format that the CODM reviews its reporting segments to make decisions and assess performance.

FOR THE YEAR ENDED DEC. 31, 2021 US$ MILLIONS	Reinsurance[1]	Pension Risk Transfer[2]	Total
Net premiums	$ 6,190	$ 1,016	**$ 7,206**

Operating expenses excluding transactions costs	—	(6)	**(6)**
Segment DOE			**6**
Net income			**$ 6**

1. Net premiums in our PRT segment include $179 million of insurance contracts ceded to other counterparties.

Our Reinsurance business is focused primarily on the reinsurance of annuity-based products and transacts with direct insurers and other reinsurers.

Our PRT business is focused on the transfer of pension plan liabilities from corporate sponsors, and all premium revenues recorded for the years ended December 31, 2021, 2020 and 2019 were from Canadian counterparties.

Total premium revenues recorded within our Reinsurance segment for the year ended December 31, 2021 were from transactions with two United States ceding companies and represented 63% and 22% of total premium revenues, respectively.

For the purpose of monitoring segment performance and allocating resources between segments, the CODM monitors the assets, including investments accounted for using the equity method, liabilities and common equity attributable to each segment.

Bermuda	**1**	—	—
Total non-current assets	**$ 1,126**	$ 2	**$ —**

NOTE 19. FINANCIAL COMMITMENT

As at December 31, 2021, subsidiaries of the Company had loan commitment agreements with third parties to the maximum of $463 million exclusive of taxes and other operating expenses (2020 - $15 million). As at December 31, 2021, $81 million was loaned (2020 - $10 million). The amount were recognized as loans and receivables and unrated bonds.

As at December 31, 2021, BAC had undiscounted lease liabilities of $1 million which are within one to three years.

NOTE 20. CAPITAL MANAGEMENT

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the Company's growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying with the regulatory capital requirements.

The Company takes an integrated approach to risk management that involves the Company's risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board of Directors. The operating capital levels are determined by the Company's risk appetite and Own Risk and Solvency Assessment ("ORSA"). Furthermore, stress techniques that include the Financial Conditions Testing ("FCT") are used to evaluate the Company's capital adequacy under sustained adverse scenarios.

BAC is subject to Life Insurance Capital Adequacy Test ("LICAT") as determined by OSFI. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits.

NER SPC is required to follow Risk Based Capital ("RBC") requirements based on guidelines of the National Association of Insurance Commissioners ("NAIC"). RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant.

NER Ltd. is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin and the enhanced capital requirement as determined by the Bermuda Monetary Authority ("BMA"). The Enhanced Capital Requirement ("ECR") is calculated based on the Bermuda Solvency Capital Requirement model, a risk-based model that takes into account the risk characteristics of different aspects of the company's business.

The Company has determined that it is in compliance with all the capital requirements as at December 31, 2021 and December 31, 2020.

NOTE 22. SUBSEQUENT EVENTS

On January 7, 2022, the Company announced that it has purchased an additional 6,775,000 shares of common stock of AEL Holdings, bringing its total combined equity interest in AEL Holdings to approximately 16%. The Company acquired the additional shares issued from treasury at a price of $37.33 per share, being AEL Holdings's adjusted book value as of September 30, 2021, for total consideration of approximately $253 million.

On March 9, 2022, the Company's credit agreement with Brookfield Asset Management was increased to $400 million. As at the date of these financial statements, there were no amounts drawn on the credit facility

COMBINED CONDENSED FINANCIAL STATEMENTS OF
BROOKFIELD ASSET MANAGEMENT REINSURANCE PARTNERS LTD.

(PARENT COMPANY)

All operating activities of Brookfield Asset Management Reinsurance Partners Ltd. (the “Parent Company”) are conducted by its operating subsidiaries, Brookfield Annuity Company (“BAC”), North End Re Ltd. ("NER Ltd.") and North End Re (Cayman) SPC (“NER SPC”). The Parent Company holds a direct 100% ownership interest in BAM Re Holdings Ltd. (“BAM Re Holdings”), which holds the Parent Company’s interest in its operating subsidiaries. The Parent Company is a holding company that does not conduct any substantive business operations and does not have any assets other than cash and cash equivalents and investments in its subsidiaries. The operating subsidiaries are regulated insurance companies and therefore have restrictions on the ability to pay dividends, loan funds and make other upstream distributions to the Parent Company without prior approval by local regulators.

These Combined Condensed Parent Company financial statements have been prepared using the same accounting principles and policies described in the notes to the Combined Consolidated Financial Statements. Refer to the consolidated financial statements and notes presented above for additional information and disclosures with respect to these combined condensed financial statements.

PARENT COMPANY INFORMATION

BROOKFIELD ASSET MANAGEMENT REINSURANCE PARTNERS LTD.

SCHEDULE I – NOTES TO THE COMBINED CONDENSED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Brookfield Asset Management Reinsurance Partners Ltd. (the “Parent Company”) is a holding company that conducts all of its business operations through its subsidiaries. The Parent Company holds a direct 100% ownership interest in BAM Re Holdings Ltd., which holds the Parent Company’s interest in its operating subsidiaries, Brookfield Annuity Company (“BAC”), North End Re Ltd. ("NER Ltd.") and North End Re (Cayman) SPC (“NER SPC”).

The Parent Company is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The Parent Company was established to become a reinsurance business focused on providing capital-based solutions to insurance companies and their stakeholders, and through its operating subsidiaries, acts as a direct issuer of pension risk transfer products for pension plan sponsors and provides annuity-based reinsurance products to insurance and reinsurance companies.

The Parent Company has accounted for the earnings of its subsidiaries under the equity method in these unconsolidated combined condensed financial statements.

The comparatives reflect the financial information of Brookfield Annuity Holdings Inc. (“BAH”), the predecessor of our Parent Company for financial reporting purposes, as at December 31, 2020 and for the years ended December 31, 2020 and 2019.

No dividends have been received from any of our subsidiaries in the past three years.

NOTE 2. COMMITMENTS AND CONTINGENCIES

The Parent Company has guaranteed the borrowings on the revolving bi-lateral credit facilities entered into by its subsidiaries. The total revolving credit facilities size is $150 million, and as at December 31, 2021, the subsidiaries had drawn $37 million. The Parent Company has no other material commitments or contingencies during the reported periods.

EXHIBIT 11(c)

Audited Consolidated Financial Statements of Brookfield Annuity Holdings Inc., as the predecessor of Brookfield Reinsurance for financial reporting purposes, as at December 31, 2020 and 2019, and for the Years-Ended December 31, 2020, 2019 and 2018

CONSOLIDATED FINANCIAL STATEMENTS OF BROOKFIELD ANNUITY HOLDINGS INC. AS AT DECEMBER 31, 2020 AND DECEMBER 31, 2019 AND FOR THE YEARS ENDED DECEMBER 31, 2020, 2019 AND 2018

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Brookfield Annuity Holdings Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial position of Brookfield Annuity Holdings Inc. and subsidiaries (the "Company") as at December 31, 2020 and 2019, and the related consolidated statements of operating results, comprehensive income (loss), changes in equity, and cash flows, for each of the three years in the period ended December 31, 2020, and the related notes and the schedule of the Condensed Financial Statements of Brookfield Annuity Holdings Inc. (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2020 and 2019, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2020, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

December 31, 2020, 2019 and 2018**

NOTE 1. ORGANIZATION AND DESCRIPTION OF THE BUSINESS

Brookfield Annuity Holdings Inc. (the "Company") is a holding company incorporated on August 13, 2015. The registered address of the Company is 333 Bay Street, Suite 1200, Toronto, Ontario, M5H 2R2, Canada. The Company is domiciled in Canada and wholly owns Brookfield Annuity Company ("BAC"), Brookfield Annuity US Inc., North End Re (Bermuda) Ltd. ("NER Ltd."), and North End Re (Cayman) SPC ("NER SPC"). BAC is a life insurance company incorporated under the Insurance Companies Act of Canada (the "Act") on August 11, 2016.

BAC received its order to commence business from the Office of the Superintendent of Financial Institutions ("OSFI") on October 3, 2016 and has obtained its licenses in all provinces of Canada. BAC provides pension de-risking solutions through group annuity policies.

NER Ltd. was incorporated on July 13, 2018 in Bermuda under the Bermuda Companies Act 1981. Under the provisions of Section 14, the status of NER Ltd. is that of an exempted company within the meaning of Section 127. NER Ltd. is currently in the process of obtaining a license to conduct commercial long-term life and annuity reinsurance business with third party direct insurers.

NER SPC was incorporated on April 17, 2019 under the laws of the Cayman Islands. NER SPC is approved as a Class B (iii) insurer under the Cayman Islands' Insurance Act, 2010 (as amended). NER SPC is licensed to conduct commercial long-term life and annuity reinsurance business with third-party direct insurers.

The Company is a wholly-owned subsidiary of Brookfield Asset Management Inc. ("BAM"). The Company will enter into a series of transactions with BAM, whereby BAM will contribute all of the net assets and operations of the Company into a newly formed entity, Brookfield Asset Management Reinsurance Partners Ltd. ("BAM Re"). BAM Re was incorporated on December 10, 2020, and is a wholly owned subsidiary of BAM. Subsequent to BAM contributing the net assets of the Company into BAM Re, BAM will distribute the shares of BAM Re on a pro rata basis to BAM's shareholders and BAM Re will become a stand-alone public company. The Company is the predecessor of BAM Re.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of Compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The consolidated financial statements were authorized for issue by the Board of Directors of the Company on March 5, 2021.

b. Basis of presentation

The consolidated financial statements are comprised of the financial results of the Company and its subsidiaries. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

The assets and liabilities in the consolidated financial statements have been presented on a historical cost basis, as immediately prior to the spin-off, all the assets and liabilities presented are wholly owned by BAM. The consolidated financial statements represent the assets, liabilities, revenues, expenses, and cash flows of the business that will be contributed to BAM Re. The Company maintains its own independent management and infrastructure and does not rely on any resources from BAM. As a result, no corporate costs have been allocated to the Company.

In accordance with IFRS, presentation of assets and liabilities on the Consolidated Statement of Financial Position is in order of liquidity.

The Company uses a management approach to determine operating segments. The management approach considers the internal organization and reporting used by the Company's chief operating decision maker ("CODM") for making decisions, allocation of resource and assessing performance. The Company's CODM has been identified as the Chief Executive Officer who reviews the results of operations when making decisions about allocating resources and assessing performance of the Company which is currently managed as a single segment; pension risk transfer. All of the Company's revenue for the years ended December 31, 2020, 2019 and 2018 was generated from the pension risk transfer operating segment and was earned in Canada. All of the long-lived assets of the Company were included in the pension risk transfer operating segment and reside in Canada.

c. Accounting estimates and judgements

The preparation of financial statements in accordance with IFRS requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Estimates are subject to uncertainty and can therefore differ significantly from actual results. The items most susceptible to changes in estimates and assumptions include the measurement of reinsurance assets, insurance contract liabilities, and impairment of financial instruments. Actual results may differ from our estimates thereby impacting the consolidated financial statements. Information on our use of estimates and assumptions is discussed in Note 2(d).

Management judgment is also used in applying the accounting policies used to prepare financial statements. The item most susceptible to changes in judgements is the evaluation of indicators of impairment of our investments.

d. Significant accounting policies

The significant accounting policies used in preparing these consolidated financial statements are summarized below.

Effective January 1, 2020, the Company changed its accounting policy for longevity reinsurance transactions such that the fixed payments made by the Company to the reinsurer relating to defined blocks of policyholder benefits (the "fixed leg") are recognized on a net basis with payments received from the reinsurer (the "variable leg") within benefits ceded in the Consolidated Statements of Operating Results. Previously, the Company's policy was to record the fixed leg in premiums ceded and the variable leg in benefits ceded on a gross basis. IFRS 4, Insurance Contracts ("IFRS 4") does not specify the presentation for this type of arrangement and the Company believes that the revised policy and presentation provides more reliable and relevant information to users of the consolidated financial statements as the presentation more clearly aligns the cashflows between the Company and the reinsurer, as contractual terms require settlement of the amounts on a net basis and as both the fixed and variable legs relate to the payment of benefits to the annuitant. The change in accounting policy has been applied retrospectively. The Company has restated the comparative figures in the Consolidated Statements of Operating Results resulting in a reduction to both premiums ceded and benefits ceded in the amount of $9,963 thousand for the year ended December 31, 2019. There is no impact on net income, net income per share or shareholder's equity in the current or any prior year.

i. Cash and cash equivalents

Cash and cash equivalents include short-term investments with original maturities of 90 days or less. The Company has classified cash and cash equivalents as fair value through profit or loss ("FVTPL") if the asset supports insurance contract liabilities or available for sale ("AFS") if the asset supports capital and surplus.

Cash and cash equivalents include cash balances and short-term investments that are not available for use by the Company as part of the funds withheld ("FWH") arrangement (Note 2(d)(iii)).

ii. Investments

Investments are financial assets which are comprised of bonds and fixed-income instruments. The Company uses the trade date to account for investment transactions.

Financial assets are classified into one of the following categories:

- AFS assets are measured at fair value, with changes in fair value recognized in other comprehensive income (loss);
- FVTPL assets are measured at fair value, with changes in fair value recognized in net income (loss); and
- Loans and receivables are measured at amortized cost.

Financial assets are classified according to their nature and use by the Company at the time of initial recognition. Financial assets supporting capital and surplus are classified as AFS and are measured at fair value. Unrealized gains (losses) are recognized in other comprehensive income (loss). Upon realization, gains or losses are reclassified to the Consolidated Statements of Operating Results and recorded in Net investment income.

Financial assets supporting insurance contract liabilities are designated as FVTPL or as loans and receivables. Any changes in the fair value of the underlying assets matched to the insurance contract liabilities are directly reflected in the insurance contract liabilities. Unless the asset is deemed to be impaired, changes in fair value of assets matching these liabilities and changes in the corresponding insurance contract liabilities are directly recognized in the Consolidated Statements of Operating Results in order to avoid a mismatch that would otherwise arise.

Loans and receivables are measured at amortized cost using the effective interest method, less any applicable provision for impairment.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

Any gain or loss arising on derecognition is recognized directly in net income (loss) and presented in realized gains (losses) on investments.

CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018

iii. Funds withheld

Funds withheld ("FWH") represents a payable for amounts contractually withheld by the Company in accordance with reinsurance agreements where the Company acts as cedant. In 2020 the Company entered into a FWH arrangement with a third-party reinsurer. Under the FWH arrangement, the Company retained funds of the reinsurer. While the assets in the FWH are legally owned by the Company, the reinsurer is subject to all investment performance and economic rights and obligations to the FWH assets similar to invested assets held directly by the reinsurer. The Company's FWH balance includes cash and cash equivalents, investments, and derivatives carried at fair value and is credited with premiums, investment income (loss), benefits payable and other expenses deducted as incurred at cost.

iv. Derivative financial instruments

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, bond forwards and interest rate swaps. Derivative financial instruments are classified as held for trading which are measured as FVTPL investments. Derivative financial instruments are recorded at fair value on acquisition date and subsequently revalued at fair value at each reporting date. Derivative financial instruments with positive values are recorded as derivative assets and negative fair values are reported as derivative liabilities. Changes in fair value of derivatives are recorded in Net investment income, in the Consolidated Statement of Operations.

v. Assets Pledged as Collateral

The Company receives and pledges collateral in respect of certain derivative contracts, in order to meet its contractual obligations. The amount of collateral required is determined by the valuation of each contract on a mark-to-market basis and the type of collateral to be deposited is specified within the agreement with each counterparty.

Collateral pledged continues to be recognized in the Consolidated Statement of Financial Position as the Company retains all rights related to these assets.

Collateral received is not recognized in the Consolidated Statement of Financial Position unless the Company acquires the rights relating to the economic risks and rewards related to these assets.

vi. Collateralized Financing Transactions

Securities sold under agreements to repurchase ("repurchase agreements") are collateralized financing transactions. A repurchase agreement provides the lender of securities the right to receive from the counterparty sufficient cash to purchase the same securities at the maturity of the agreement. These transactions are measured at cost plus accrued interest.

The Company recognizes an asset in the Consolidated Statement of Financial Position, representing the cash received, and a liability for the same amount, representing the obligation to repurchase the loaned bonds. Repurchase agreements with the same counterparty are presented net in the Consolidated Statement of Financial Position.

vii. Right to Offset

Amounts presented in these consolidated financial statements are presented on a net basis when there exists both a legally enforceable right to offset the recognized amounts and an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

viii. Impairment

At each reporting date, financial assets are tested for impairment. The Company considers an impairment loss if it deems it unlikely that it will be able to recover all amounts due according to the contractual terms of the obligation. Evidence of impairment must be objective. For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment. For all other financial assets, there must be observable data about the loss events, such as, but not limited to, the issuer's financial difficulty, a bankruptcy, default of payment of principal or interest, or specific adverse conditions affecting an industry or a region.

For financial assets measured at amortized cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows. The impairment loss is recorded in the Consolidated Statement of Operations.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not have been recognized. In respect to AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increases in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss. The reversal cannot exceed the impairment expense amount. The amount of reversal is recorded in the Consolidated Statement of Operations.

At each reporting date, or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, non-financial assets that are measured at amortized cost are reviewed for impairment. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

ix. Classification of Financial Instruments

Accrued investment income, reinsurance receivable and other assets have been classified as loans and receivables. Due to related party, reinsurance payable, and accounts payable and accrued liabilities have been classified as other financial liabilities. Loans and receivables and other liabilities are measured at amortized cost. For these items, carrying value approximates fair value due to their short-term nature.

x. Leases

IFRS 16 Leases ("IFRS 16") specifies how to recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases.

The Company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

If a contract contains a lease, the Company will recognize a right-of-use ("ROU") asset and a lease liability at the lease commencement date. The ROU asset and lease liability are initially measured as an amount equal to the present value of the remaining lease payments over the lease. The discount rate used is the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

As of December 31, 2020, the Company has one lease. The Company leases an office suite for its own use. As of December 31, 2020, the lease has a remaining term of 4.5 years.

The ROU is depreciated to the earlier of the end of the useful life or lease term using the straight-line method as this reflects the expected pattern of use. At each reporting date, the Company assesses whether there is any indication that the ROU asset may be impaired. If an impairment indicator exists, then the Company will adjust the value of the ROU asset to its recoverable amount and an impairment loss is recognized.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. It is remeasured when there is a change in future lease payments arising from a change in rates or there is a change in the Company's estimate of the amount expected to be payable.

xi. Insurance contract liabilities

Liabilities for insurance contracts are determined using the Canadian Asset Liability Method ("CALM"), in accordance with the standards of the Canadian Institute of Actuaries ("CIA") and as permitted by IFRS 4 Insurance Contracts ("IFRS 4").

Contract classifications

Contracts under which the Company accepts significant insurance risk from a policyholder are classified as insurance contracts in accordance with IFRS 4 on the Consolidated Statement of Financial Position. A contract is considered to have significant insurance risk if, and only if, an insured event could cause an insurer to make significant additional payments in any scenario, excluding scenarios that lack commercial substance at the inception of the contract. Contracts under which the Company does not accept significant insurance risk are classified as either investment contracts or considered a service contract and are accounted for in accordance with IAS 39 Financial Instruments: Recognition and Measurement or IFRS 15 Revenue from Contracts with Customers, respectively. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its term, even if the insurance risk reduces significantly during the year, unless all rights and obligations are extinguished or expire. Investment contracts can be reclassified as insurance contracts if insurance risk subsequently becomes significant.

Measurement

Insurance contract liabilities represent the amount required to provide for future benefits payments and administrative expenses on policies in force with the Company. Insurance contract liabilities are presented gross of reinsurance assets on the Consolidated Statement of Financial Position. The Company's Appointed Actuary is responsible for determining the amount of insurance contract liabilities in accordance with standards established by the CIA. Insurance contract liabilities have been determined using CALM as permitted by IFRS 4. It is used to determine insurance contract liabilities and incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation and inflation. Margins for adverse deviation are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

The Company has designated invested assets supporting insurance contract liabilities as FVTPL or as loans and receivables. Since the value of the insurance contract liabilities is determined by reference to the assets supporting those liabilities, changes in the insurance contract liabilities offset a significant portion of the changes in fair value of these FVTPL assets recorded in net income (loss).

xii. Reinsurance

BAC, in the normal course of business, is also a user of reinsurance in order to limit the potential for losses arising from certain exposures. To the extent that third party reinsurers are unable to meet their obligations, BAC remains liable to its policyholders for the portion reinsured. At each reporting date, the reinsurance asset and reinsurance receivable, if any, are tested for impairment. If there is objective evidence that the reinsurance asset or reinsurance receivable are not recoverable and the impact of the event can be reliably measured, an impairment loss is recognized for the amount by which the carrying amount exceeds the recoverable amount.

BAC has two types of reinsurance arrangements.

Longevity reinsurance

BAC enters into longevity reinsurance transactions with third party reinsurers. As part of the agreements, BAC commits to pay the reinsurers a schedule of fixed payments relating to defined blocks of policyholder benefits. In return, the reinsurers reimburse the actual cost of benefit expenses on those blocks to BAC. Settlement of fixed and actual payments between BAC and the reinsurers are on a net basis. The difference between fixed and actual payments on past service is recognized in the same period as the related claim is incurred within benefits ceded in the Consolidated Statement of Operations. Any unsettled amounts on past service from the reinsurers is recognized as a reinsurance receivable or payable in the Consolidated Statement of Financial Position.

BAC is liable for reinsurance fees for the transactions. The fees are recognized as incurred and are included in ceded premiums in the Consolidated Statement of Operations.

The benefits to which BAC is entitled under its reinsurance transactions are recognized as reinsurance assets in the Consolidated Statement of Financial Position and change in insurance contract liabilities ceded on the Consolidated Statement of Operating Results.

Quota share reinsurance

BAC enters into quota share reinsurance transactions with third-party reinsurers. The agreement covers policyholder benefits for a proportion of business reinsured. The proportion varies for certain discrete blocks of business. At the inception of each quota share reinsurance contract, Premiums ceded and a corresponding decrease in cash or payable is recognized in proportion to the business reinsured by the external reinsurer. BAC recognizes a reinsurance asset on the Consolidated Statement of Financial Position and change in insurance contract liabilities ceded on the Consolidated Statement of Operating Results. The benefits to which BAC is entitled under its reinsurance contracts are recognized as reinsurance assets.

The reinsurer is committed to pay BAC a proportion of actual benefit expenses. The amounts are reported in benefits ceded in the same period as the related benefit expense is incurred. In cases where the benefit payments are due but not fully received from the reinsurer, BAC will recognize a reinsurance receivable. In cases where benefit payments are due, but amounts are received in excess from the reinsurer, BAC will recognize a reinsurance payable.

Under reinsurance contracts with unregistered reinsurers, assets are required to be pledged to BAC in order to secure payment of liabilities under the reinsurance agreement. Unregistered reinsurers are reinsurers which are not regulated by OSFI. The pledged assets are held in Canada by a Canadian financial institution that is not affiliated with the third party reinsurer. BAC maintains a valid and enforceable security interest that has priority over any other security interest in the collateral. In the event of default by the reinsurer, BAC has the right to liquidate or take legal possession of these assets, in a timely manner.

At each reporting date, the reinsurance asset and reinsurance receivable, if any, are tested for impairment. If there is objective evidence that the reinsurance asset or reinsurance receivable are not recoverable and the impact of the event can be reliably measured, an impairment loss is recognized for the amount by which the carrying amount exceeds recoverable amount.

xiii. Premiums

Gross premiums are recognized as revenue when due and collection is reasonably assured. When premiums are recognized, insurance contract liabilities are computed, with the result that benefits and expenses are matched with such revenue. Premiums ceded are recognized when due and in accordance with the terms of the contractual agreement between the Company and reinsurer. Premium refunds, if any, are recognized on an accrual basis.

xiv. Benefits paid

Gross benefits and benefits ceded are recorded in the Consolidated Statement of Operations when they are due and incurred.

xv. Net investment income

Interest income is calculated using the effective interest method.

Dividend income is recognized when the right to receive payments is established.

Realized gains (losses) on investments represent the difference between net sale proceeds and the purchase price.

Unrealized gains (losses) on FVTPL investments measure the difference between the fair value of investments at the end of each reporting date and their purchase price. The net movement reflects both unrealized gains and losses recognized during the year adjusted for any prior period unrealized gains and losses which have been realized in the current accounting period.

xvi. Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to taxation authorities within a year. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the end of each year.

Deferred income tax assets are recognized to the extent that it is probable that taxable profits will be available against which the unused tax losses or unused tax credits can be utilized by the Company. To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credit can be utilized, the deferred tax asset is not recognized.

xvii. Foreign currencies

The Company's functional currency is CAD. The Company's consolidated financial statements are presented in USD as the functional currency of BAM Re is USD. Foreign currency denominated monetary assets and liabilities of the Company are translated using the rate of exchange prevailing at the reporting date and non-monetary assets and liabilities measured at fair value are translated at the rate of exchange prevailing at the date when the fair value was determined. Revenues and expenses are measured at average rates during the period. Gains or losses on translation of these items are included in net income.

For purposes of presenting the consolidated financial statements, assets and liabilities of the Company are translated using the exchange rate prevailing at the reporting date. Revenue and expenses are measured at transactional or average rates during the period. Gains or losses on translation of these items are included in other comprehensive income.

xviii. Future accounting policy changes

IFRS 17 Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts ("IFRS 17") which will replace IFRS 4 and will be applied retrospectively. In June 2020, the IASB proposed an amendment to IFRS 17 providing a one-year deferral on the effective date of the standard to January 1, 2023. In addition, the IASB extended the exemption for insurers to apply IFRS 9 Financial Instruments ("IFRS 9"), so that both IFRS 9 and IFRS 17 will have the same effective date. OSFI expects life insurers to adopt IFRS 9 and IFRS 17 simultaneously for periods beginning on or after January 1, 2023.

IFRS 17 sets out the requirements for the recognition, measurement, presentation and disclosures of insurance contracts a company issues and reinsurance contracts it holds.

The future profit for providing insurance coverage is recognized in profit or loss over time as the insurance coverage is provided.

IFRS 17 will affect how the Company accounts for its insurance contracts and how it reports financial performance in the Consolidated Statement of Operations. The Company continues to assess the impact for IFRS 17, which is expected to be significant on the timing of earnings recognition, as well as presentation and disclosure, for its insurance contracts.

CONSOLIDATED FINANCIAL STATEMENTS OF BROOKFIELD ANNUITY HOLDINGS INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS As at December 31, 2020 and December 31, 2019 and for the years ended December 31, 2020, 2019 and 2018

IFRS 9 Financial Instruments

In July 2014, the IASB published the complete version of IFRS 9, which is effective for annual periods beginning on or after January 1, 2018, with retrospective application and replaces IAS 39. IFRS 9 provides changes to the classification and measurement of financial assets and liabilities, an expected credit loss model that replaces the existing incurred loss impairment model and new hedge accounting guidance.

The Company has deferred the implementation of IFRS 9 until IFRS 17 is adopted on January 1, 2023 on the basis that the Company's activities are predominantly connected with insurance, with insurance contract liabilities making up over 99% of the Company's Total liabilities.

The disclosure for the measurement and classification of the Company's investments provides most of the information required by IFRS 9.The Company is currently assessing the impact of implementing IFRS 9 on its consolidated financial statements.

NOTE 3. REINSURANCE RECEIVABLE / PAYABLE

In 2020 and 2019, reinsurance receivable and payable relate to amounts recoverable from or payable to third-party reinsurers. All amounts are expected to be settled within a year.

NOTE 4. OTHER ASSETS

AS AT DEC. 31 US$ THOUSANDS	**2020**	2019
Accounts receivable	**$ 979**	$ 48
Prepaid expenses	**2,867**	2,329
	$3,846	$2,377

Accounts receivable relate to amounts recoverable from third parties. All amounts are expected to be recovered within one year. These financial instruments are short-term in nature and their fair values approximate carrying values. Prepaid expenses relates to benefit payments made to policyholders in advance.

NOTE 5. FINANCIAL INSTRUMENTS

a. Designation

Assets supporting insurance contract liabilities are designated as FVTPL or amortized cost. Assets supporting capital and surplus are classified as AFS. Assets with fixed or determinable payments not quoted in an active market are classified as amortized cost. Derivatives are classified as held for trading and are measured as FVTPL.

Bond futures	(661)	—	—	**(661)**
Total derivative liabilities	(661)	—	—	**(661)**

The Company has assessed and determined that the fair value of loans and receivables approximates their carrying values.

c. Fair value hierarchy

Investments measured at fair value are classified in accordance with a valuation hierarchy that reflects the significance of the inputs used in determining their fair value, as per IFRS 13 Fair Value Measurement. Under Level 1 of this hierarchy, fair value is derived from unadjusted quoted prices in active markets for identical investments. Under Level 2, fair value is derived from market inputs that are directly or indirectly observable other than unadjusted quoted prices for identical investments. Under Level 3, fair value is derived from inputs that are not based on observable market data.

Table of Contents

The following sets out the financial assets and financial liabilities classified in accordance with the above-mentioned fair value hierarchy. Also included are financial assets and financial liabilities that are measured at amortized cost.

AS AT DEC. 31 US$ THOUSANDS	2020 Level 1	 Level 2	 Total
Financial Assets			
Fair value through profit or loss			
Cash	$ 14,108	$ —	**$ 14,108**

Financial Liabilities			
Fair value through profit or loss			
Derivative liabilities	$ (661)	$ —	**$ (661)**
Total financial liabilities	**$ (661)**	**$ —**	**$ (661)**

The following table summarizes the valuation techniques and key inputs used in the fair value measurement of Level 2 financial instruments:

Type of Asset	Valuation Techniques and Key Inputs
Bonds	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.
Derivative assets/Derivative liabilities	Foreign currency forward contracts — discounted cash flow model — forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate. Interest rate contracts — discounted cash flow model — forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate.
Funds withheld liabilities	Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

Investments measured at amortized cost are individually evaluated for impairment in establishing the allowance for impairment. For the year ended December 31, 2020, the Company recorded an impairment expense of $nil (2019 — $406 thousand).

Net investment results from FWH	**$(117)**	$—	$—

f. Derivative financial instruments

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, bond forwards and interest rate swaps. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments.

Foreign exchange forwards are over-the-counter (OTC) contractual agreements negotiated between counterparties. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default. As at December 31, 2020, the derivative counterparty credit risk was $7.2 million (2019 — $2.3 million) and the counterparties credit rating was A+ or higher (2019 — A+ or higher).

Notional principal and the fair value of derivatives are presented in the table below.

AS AT DEC. 31 US$ THOUSANDS	2020			
	Notional principal	**Fair value assets**	**Fair value liabilities**	**Collateral pledged**
Exchange traded				
Bond futures	$192,099	$ 2,441	$ —	$ 12,639
Over-the-counter				
Foreign exchange forwards	235,070	4,723	(122)	—
Bond forwards	401	1	—	—
Interest rate swaps	6,973	34	—	—
Total	**$434,543**	**$ 7,199**	**$ (122)**	**$ 12,639**

AS AT DEC. 31 US$ THOUSANDS	2019			
	Notional principal	**Fair value assets**	**Fair value liabilities**	**Collateral pledged**
Exchange traded				
Bond futures	$154,441	$ —	$ (661)	$ 5,010
Over-the-counter				
Foreign exchange forwards	125,093	2,344	—	—
Total	**$279,534**	**$ 2,344**	**$ (661)**	**$ 5,010**

The Company monitors the fair values of bond futures and forwards on a daily basis, with additional cash collateral obtained or refunded as necessary.

Bond futures, bond forwards and foreign exchange forward contracts mature in less than two years. Interest rate swaps mature in two years and settle on a semi-annual basis. Derivatives are measured at FVTPL and are reported on the Consolidated Statement of Financial Position as Derivative assets or Derivative liabilities. The fair value of exchange-traded futures contracts is determined based on Level 1 inputs. OTC foreign currency forwards and interest rate swaps are valued on the contract notional amounts, which is the difference between contract and market rates. These inputs are derived from observable market data and as such are classified as Level 2 instruments.

As at December 31, 2020, the Company has pledged $13 million of financial assets as collateral under the terms of the derivative contracts (2019 — $5.0 million).

For an analysis of the Company’s risks arising from financial instruments and the policies and procedures to manage these risks refer to Note 10 Risk Management.

g. Securities Sold under Agreements to Repurchase

Securities sold under agreements to repurchase are accounted for as collateralized financing transactions and are recorded at contract price. Under these agreements, the Company may sell securities from its portfolio for periods of time. In exchange, the Company obtains possession of cash from the financial institution with market

**CONSOLIDATED FINANCIAL STATEMENTS OF

values equal to the principal amount sold under these agreements. As at December 31, 2020, the Company did not have amounts outstanding under repurchase agreements (2019 — $nil). For the year ended December 31, 2020, interest expense paid related to the use of the repurchase agreements was $45 thousand (2019 — $153 thousand, 2018 — $66 thousand).

The cash received by the Company is equal to the market value of the securities sold on the trade date. As at December 31, 2020 and 2019, all of the Company's repurchase agreements mature within two years.

h. Summary of Investments

The following table summarizes the Company's investments in financial assets:

NOTE 7. RELATED PARTY TRANSACTIONS

On March 10, 2020, the Company entered into a lease arrangement with Brookfield Properties (Canada) Inc. ("BPO"), a related party of BAM. The lease arrangement was conducted in the normal course of operations and on market terms. The amount paid to BPO for the leased office facilities and building maintenance for 2020 totaled $230 thousand (2019 — $Nil).

In May 2020, a loan to Cardone Industries, Inc. was extinguished and replaced with warrants of Cardone Partners, LP. Subsequently, the Company entered into a sale transaction with Brookfield Private Equity Direct Investments Holdings LP ("BPEDIH") relating to its warrants in Cardone Partners, LP. The amount paid by BPEDIH to the Company was $5,965 thousand resulting in a gain of $195 thousand. As at December 31, 2020, all amounts were collected. There were no transactions in 2019 with BPEDIH.

The Company entered into outsourcing arrangements with BAM related to information technology, investment fund management, building maintenance, and internal audit services. The amount paid to BAM for these services for the year ended December 31, 2020 totaled $411 thousand (2019 — $355 thousand, 2018 — $315 thousand). Amounts due to BAM related to outsourcing arrangements at December 31, 2020 totaled $nil (2019 — $28 thousand).

The Company entered into derivative arrangements related to foreign exchange forwards and interest rate swaps with third party financial institutions through BAM. Amounts outstanding related to unsettled derivative arrangements at December 31, 2020 totaled $7.2 million (2019 — $2.1 million). The amounts were repaid in full on settlement.

Lastly, the Company has a C$50 million revolving demand credit facility with BAM that matures at the earlier of when repayment is demanded or maturity. The facility is renewed annually for the period of one year. The facility's current maturity is December 2021. The facility is unsecured and bears interest at a money market rate plus a margin. As at December 31, 2020, there were no amounts owing under the facility (2019 — $nil). Interest expense paid in 2020 relating to the use of the credit facility with BAM was $nil (2019 — $nil, 2018 — $31 thousand).

Key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any director of the Company.

For the year ended December 31, 2020, short-term employee benefits were paid to key management personnel in the amount of $1.4 million (2019 — $1.3 million, 2018 — $1.3 million).

NOTE 8. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

The Company's accounts payable and accrued liabilities consist of the following:

AS AT DEC. 31 US$ THOUSANDS	2020	2019
Premium owing to pension plans	**$1,269**	$1,873
Accrued liabilities	**2,162**	655
Lease liabilities	**1,246**	198
Trade payables	**94**	778
Other	**—**	46
Total accounts payable and accrued liabilities	**$4,771**	**$3,550**

Details relating to the Company's lease liabilities balance, which is reported within Accounts payable and accrued liabilities, is as follows:

AS AT DEC. 31 US$ THOUSANDS	2020	2019
Less than one year	**$ 316**	$144
One to five years	**1,052**	204
Total undiscounted lease liabilities	**$1,368**	**$348**

Interest expense on lease obligations for the year ended December 31, 2020 was $50 thousand (2019 — $10 thousand, 2018 — $15 thousand). Total cash outflow for leases was $316 thousand (2019 — $144 thousand, 2018 — $137 thousand).

NOTE 9. INSURANCE CONTRACT LIABILITIES

The Company's insurance contract liabilities are as follows:

AS AT DEC. 31 US$ THOUSANDS	2020	2019
Gross	**$1,338,730**	$ 856,364
Reinsurance	**(190,070)**	(197,164)
Total insurance contract liabilities	**$1,148,660**	$ 659,200

Reinsurance assets reflect immediate and deferred annuity payments ceded under the longevity reinsurance and quota share reinsurance arrangements.

a. Nature and composition

The Company's insurance liabilities represent contracts that provide immediate annuities for current pensioners and deferred annuities for members who have not reached pensionable age. The Company's insurance contracts are a mixture of group annuity "buy-in" policies, where the policyholder is the pension fund and group annuity "buy-out" policies, where the policyholder is the administrator. The Company provides group annuity policies across Canada.

b. Valuation assumptions

The insurance contract liabilities represent the present value of the future annuity payments and expenses measured according to the CALM described in *Note 2(d) Summary of significant accounting policies, section xi) Insurance contract liabilities*. It incorporates best-estimate assumptions for longevity, future investment yields, administration costs, margins for adverse deviation and inflation. These margins are necessary to provide for possibilities of misestimation and future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Best-estimate assumptions and margins are reviewed periodically for continued appropriateness.

The principal valuation assumptions and the methods for arriving at these valuation assumptions are outlined below.

Longevity

Mortality assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors including, but not limited to, gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data comprises of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the Company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

Mortality improvement assumptions follow the prescribed mortality improvement scales issued by the CIA.

CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018

Investment returns

Projected cash flows from the current assets and liabilities are used in CALM to determine insurance contract liabilities. Assumptions are made regarding rates of returns on supporting assets. Projected cash flows from assets used in the actuarial calculations are reduced to provide for potential asset default losses. The calculation for future credit losses on assets is based on the credit quality underlying the asset portfolio.

Other assumptions

The internal costs of maintaining the insurance contract liabilities, the fees paid to third-party administrators engaged to manage payments under the in-force policies, and fees due to reinsurers and investment management expenses, as well as inflation are factored into the calculation of liabilities where applicable.

c. Net change in insurance contract liabilities

The following table summarizes the movement of insurance contract liabilities from the beginning of the year by its major components:

FOR THE YEAR ENDED DEC. 31, 2020 US$ THOUSANDS	Gross liability	Reinsurance assets	Net
Beginning of year	$ 856,364	$ 197,164	**$ 659,200**
Changes during the year			
New business	413,716	—	**413,716**
Normal changes	52,673	(8,703)	**61,376**
Management actions and changes in assumptions	(24,195)	(1,792)	**(22,403)**
	442,194	(10,495)	**452,689**
Impact of foreign exchange[1]	40,172	3,401	**36,771**
Balance at end of year	**$ 1,338,730**	**$ 190,070**	**$ 1,148,660**

FOR THE YEAR ENDED DEC. 31, 2019 US$ THOUSANDS	Gross liability	Reinsurance assets	Net
Beginning of year	$292,369	$ —	**$ 292,369**
Changes during the year			
New business	521,537	—	**521,537**
Reinsurance entered into in the year	—	198,670	**(198,670)**
Normal changes	17,583	(9,607)	**27,190**
Management actions and changes in assumptions	(1,311)	3,970	**(5,281)**
	537,809	193,033	**344,776**
Impact of foreign exchange[1]	26,186	4,131	**22,055**
Balance at end of year	**$856,364**	**$ 197,164**	**$ 659,200**

1. Presentation currency translation reported as a separate component of Other comprehensive income. See Note 2d*(xvii) Foreign currencies*.

Under fair value accounting, movement in the fair value of the supporting assets is a major factor in the movement of insurance contract liabilities. Changes in the fair value of assets are largely offset by corresponding changes in the fair value of liabilities. The change in the value of the insurance contract liabilities associated with the change in the value of the supporting assets is included in the normal changes above. In 2020, the main contributors to the increase in net insurance contract liabilities were the impact of new business of $414 million and the impact of normal changes of $61 million. Management actions and changes in assumptions lowered the reserves by $22 million. The decrease was primarily due to modelling enhancements related to the reinvestment assumption and asset cash flows.

In 2019, the main contributors to the increase in net insurance contract liabilities were the impact of new business of $521.5 million partially offset by reinsurance transactions of $198.7 million. Management actions and changes in assumptions lowered the reserves by $5.3 million. The decrease was primarily due to updating the expense assumption to reflect the most recent experience analysis, the execution of longevity swaps offset by a revision to the methodology in setting the interest rate risk assumption.

The Company's risks arising from insurance contract liabilities are principally interest rate and longevity. The policies and procedures to manage these risks and sensitivity analysis are described in Note 10 Risk Management.

d. Reinsurance results

For the year ended December 31, 2020, BAC entered into a FWH arrangement with a third-party reinsurer which did not result in after-tax gains on inception. In December 2020, the Company entered into a third-party longevity reinsurance arrangement which resulted in after-tax losses on inception of approximately $1.3 million.

For the year ended December 31, 2019, BAC entered into two longevity reinsurance arrangements which resulted in after-tax gains on inception of approximately $4 million. In 2019, BAC also entered into a quota share reinsurance arrangement which resulted in no after-tax gains on inception recognized by BAC on the ceded portion to the reinsurer.

In 2020, the Company's total fixed and actual payments under longevity reinsurance transactions are $13.8 million and $22.7 million (2019 — $10.0 million and $15.2 million). The difference between fixed and actual payments on past service is recognized in the same period as the related claim is incurred within benefits ceded in the Consolidated Statement of Operations.

Amounts payable relating to reinsurance fees in respect of longevity reinsurance contracts are included in premiums ceded in the Consolidated Statement of Operations:

FOR THE YEAR ENDED	2020	2019
Amounts payable in respect of reinsurance fees	**$481**	$329

NOTE 10. RISK MANAGEMENT

The management of risk is central to the success of the business. The Company seeks to create and protect enterprise value by enabling risk-informed decision making and by balancing risk and return in business processes.

The Board has overall responsibility for the management of risk and is supported through formal committees of the Board including the Risk Committee.

The Company manages risk by applying the principles and guidelines outlined in the enterprise risk management policy (the "ERM Policy"). The ERM Policy establishes the overall risk management framework that includes the following:

- Risk inventory — identifies and defines the risks arising from the Company's business strategy and operations using a consistent language that enables an enterprise-wide approach to measurement, reporting and disclosure of risk;
- Risk appetite — determines the nature and amount of risk the Company is prepared to take, the adherence to which is measured and reported through an extensive set of Board-approved risk appetite tolerances;
- Risk governance — establishes clear ownership and accountability for risk management oversight and a risk-aware culture across the Company; and
- Risk management process — codifies a consistent approach to the identification, assessment, measurement, control, monitoring and reporting of risks faced by the Company.

As part of the risk governance framework, the Company operates a three lines of defense model. Under this model, the accountabilities of each line of defense are:

- First line — business management: day to day responsibility for managing and identifying risks, ensuring activities are within risk appetite and established policies, and designing and implementing effective internal controls;
- Second line — risk management function: establish enterprise governance, risk and control strategies and policies; provide oversight and independent effective challenge to the first line, as well as training, tools and advice; and
- Third line — internal audit: independently verify the adequacy and effectiveness of the first and second lines of defense, and that the enterprise risk management framework is operating effectively.

An Own Risk and Solvency Assessment ("ORSA") is undertaken at least annually. The ORSA involves a comprehensive assessment of the Company's risks, capital needs and solvency position, as well as solvency forecasting across a range of scenarios including plausible stresses that could jeopardize the Company's business plans. The Company also evaluates its exposure to sustained adverse scenarios through other stress testing techniques such as Dynamic Capital Adequacy Testing (the "DCAT"). Effective 2020, the Company adopted the Financial Condition Testing ("FCT"). FCT is a modernization of the DCAT with the objective of providing a more robust approach to satisfying reporting requirements on expected future financial condition as well as for allowing for better alignment with ORSA.

The Company has established recurring routines for monitoring and reporting on risks. Risk management reports are provided to the Management Oversight Committee ("MOC") on a monthly basis and to the Board and Risk Committee on a quarterly basis. The reports include risk exposures measured against Board-approved risk appetite tolerances, and where relevant, management actions are identified to ensure risk mitigation and controls are effective.

The principal risk factors that affect the Company's operating results and financial condition include financial risks such as market risk, credit risk and liquidity risk, insurance risk and other risks such as regulatory risk.

CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018

The following sections describe the primary financial risks and associated risk management strategies in place that affect the Company's operating results and financial condition.

a. Market risk

The Company's most significant market risks are interest rate risk and foreign exchange risk.

i. Interest rate risk

The Company manages interest rate risk through an asset liability management ("ALM") framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance contract liabilities. Within the context of the ALM framework, the Company uses derivatives including interest rate swaps and bond futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

The Investment Policy outlines the duration constraints that have been approved by the Board. In operationalizing these constraints, considerably more confining duration-based targets have been established that are closely monitored and reported to the MOC on a monthly basis and to the Board and Risk Committees on a quarterly basis.

The following table shows the sensitivity to changes in interest rates:

AS AT DEC . 31 US$ THOUSANDS	**2020**		**2019**	
	50 bps increase	**50 bps decrease**	**50 bps increase**	**50 bps decrease**
Movement in liabilities	**$ 62,847**	**$(62,604)**	$ 33,434	$(33,247)
Movement in assets	**(62,240)**	**62,240**	(35,897)	35,897
Tax effect	**(161)**	**96**	653	(702)
Impact on comprehensive income	**$ 446**	**$ (268)**	$ (1,810)	$ 1,948

The Investment Policy is reviewed at least annually and approved by the Board.

ii. Foreign exchange risk

The Company's obligations under its insurance contracts are denominated in CAD but a portion of the assets supporting these liabilities are denominated in non-Canadian dollars ("non-CAD"). The percentage of assets denominated in non-CAD as at December 31, 2020 and 2019 is 25% and 17%, respectively.

The Company manages foreign exchange risk using foreign exchange forwards. The Investment Policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

As at December 31, 2020, a 10% fluctuation in CAD against non-CAD currencies would have an impact of approximately $188 thousand on net income and $nil on OCI (2019 — $37 thousand on net income and $nil on OCI, 2018 — $2 thousand on net income, $nil on OCI).

**CONSOLIDATED FINANCIAL STATEMENTS OF

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018**

b. Credit risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The Company is primarily exposed to credit risk through its investments in debt securities.

The Company manages exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in the Investment Policy.

i. Asset quality

The following table summarizes the external credit ratings for cash and cash equivalents and investments:

AS AT DEC. 31 US$ THOUSANDS	2020		2019	
Cash and cash equivalents	**$ 35,461**	3%	$ 13,361	2%
Bonds				
AAA	**407,608**	33%	43,442	6%
AA	**11,487**	1%	155,634	22%
A	**121,486**	10%	132,004	18%
BBB	**617,060**	50%	335,816	47%
BB	**9,574**	1%	8,719	1%
B	**967**	<1%	1,252	<1%
Unrated	**21,136**	2%	21,309	3%
	1,189,318	97%	698,176	97%
Preferred shares				
P2	**3,019**	<1%	2,872	1%
Mortgages				
Guaranteed by Canada Mortgage and Housing Corporation (“CMHC”)	**128**	<1%	490	<1%
Total cash and cash equivalents and investments	**$1,227,926**	100%	$714,899	100%

The Company’s overall target credit quality for the portfolio is a credit rating of A minus. As at December 31, 2020 and 2019, the Company met this requirement.

ii. Concentration

Concentrations of credit risk arise from exposures to a single issuer or a group of related issuers or groups of issuers that have similar risk characteristics.

**CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018**

Bonds

The following table provides the fair value of investments by groups of issuers of bonds:

AS AT DEC. 31 US$ THOUSANDS	2020		2019	
Government bond holdings	**$ 401,049**	**34%**	$200,567	29%
Corporate and other bond holdings	**788,269**	**66%**	497,609	71%
Total bond holdings	**$1,189,318**	**100%**	$698,176	100%

The following table discloses the Company's top 5 holdings of issuers (excluding governments), as well as exposure to the largest single issuer of corporate bonds.

AS AT DEC. 31	Unit	2020	2019
Exposure to the top 5 largest issuers of corporate bonds	US$ (000's)	**90,123**	67,998
% of total cash and cash equivalents and investments	%	**7**	10
Exposure to the largest single issuer of corporate bonds	US$ (000's)	**18,173**	13,889
% of total cash and cash equivalents and investments	%	**2**	2

Preferred shares

The Company's holdings of preferred shares are all issued by Canadian companies, with 100% (2019 — 100%) of these investments rated as P-2.

Mortgages

All mortgages are guaranteed by CMHC (2019 — 100%).

iii. Derivative counterparties

Credit risk also arises in respect of derivative contracts to the extent that there is the potential for the counterparties to default on their obligations. To manage this risk, derivative transactions are limited to an approved list of counterparties and in some cases are fully collateralized with highly rated instruments. The derivative counterparty risk as of December 31, 2020 and 2019 was $7.2 million and $2.3 million, respectively. As at December 31, 2020 and 2019, these counterparties have a credit rating of A+ or higher.

iv. Reinsurance counterparties

The Company has reinsurance contracts with third-party registered reinsurers and one third-party unregistered reinsurer with a total exposure of $190.1 million at December 31, 2020 (2019 — $197.2 million). To manage counterparty risk, reinsurance transactions are limited to an approved list of reinsurers with concentration limits to any single reinsurer.

Under the reinsurance contracts with third-party unregistered reinsurers, highly rated assets are required to be pledged to the Company to fully support the ceded liabilities. The Company maintains a valid and enforceable security interest that has priority over any other security interest in the collateral. In the event of default by the reinsurer, the Company has the right to liquidate or take legal possession of these assets, in a timely manner.

**CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018**

As at December 31, 2020, the credit ratings of the reinsurers are A+.

v. Impaired Assets

The Company reviews all reinsurance assets at each reporting date and determined that there is no evidence of impairment as at December 31, 2020 and 2019.

c. Liquidity risk

Liquidity risk is the risk that the Company will not be able to raise the necessary funds, at the appropriate time, to meets its financial liabilities.

Cash outflows primarily consist of benefit payments to policyholders and to a lesser extent, operating expenses and settlement of derivative contracts.

The following table sets out the expected maturity profile of the Company's financial liabilities:

AS AT DEC. 31 US$ THOUSANDS	2020			
	Within 1 year	1 – 5 years	Over 5 years	Total
Insurance contract liabilities	**$ 21,482**	**$ 168,772**	**$ 1,148,476**	**$ 1,338,730**
Due to related party	**4**	**—**	**—**	**4**
Reinsurance payable	**410**	**—**	**—**	**410**
Derivative liabilities	**122**	**—**	**—**	**122**
Current tax liability	**676**	**—**	**—**	**676**
Accounts payable and accrued liabilities	**3,793**	**978**	**—**	**4,771**
Funds withheld liabilities	**12,379**	**—**	**—**	**12,379**
Total	**$ 38,866**	**$ 169,750**	**$ 1,148,476**	**$ 1,357,092**

AS AT DEC. 31 US$ THOUSANDS	2019			
	Within 1 year	1 – 5 years	Over 5 years	Total
Insurance contract liabilities	$ 17,128	$128,455	$ 710,781	$856,364
Due to related party	28	—	—	28
Reinsurance payable	480	—	—	480
Derivative liabilities	661	—	—	661
Current tax liability	172	—	—	172
Accounts payable and accrued liabilities	3,550	—	—	3,550
Total	$ 22,019	$128,455	$ 710,781	$861,255

To manage liquidity risk, the Company as part of its ALM framework, purchases assets to support the liabilities under its insurance contracts. The effective and key rate duration of these investments are constructed to closely match those of the annuity policy liabilities. The Company has established liquidity risk tolerances and operational targets that are closely monitored. Stress testing is conducted to ensure that there are sufficient liquid assets at all times to meet obligations.

CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018

In addition, the Company has access to a $50 million CAD revolving credit facility with BAM, $118 million repurchase agreement, and $3 million CAD revolving credit facility with highly rated financial institutions. As at December 31, 2020 and December 31, 2019 there were no amounts outstanding under these facilities.

The Management Investment Committee ("MIC") continuously monitors market, credit and liquidity risk. The MIC meets monthly and reports quarterly to the Investment Committee of the Board.

d. Insurance risk

Insurance risk is the risk that actual experience related to benefit payments and expenses does not emerge as expected. The Company is primarily exposed to longevity risk.

Longevity risk is the risk that mortality experience occurs at lower rates than that assumed at the time of pricing which exposes the Company to benefit payments that will be paid for longer periods than anticipated.

Longevity assumptions are derived by adjusting a base mortality table and applying mortality multipliers that vary by plan based on factors established at the time of pricing. These factors take into consideration the characteristics of the annuitants including but not limited to gender, age, job description, latest known salary, geography, and pension amount. These characteristics are further analyzed using a supporting database of over 500,000 Canadian pensioner lives. The data is comprised of a diverse range of survival patterns reflective of the recent past. Models generated from this data are mapped into curves which can then be applied for analysis on an annuitant basis. Further, the Company monitors views and research published by governments, industry and academia on the factors influencing mortality changes and maintains longevity assumptions that are consistent with emerging trends.

These inputs and analytics support the Company's assessment of longevity risk.

To reduce longevity risk, the Company enters into longevity reinsurance transactions with third party reinsurers. Under these contracts, the Company commits to pay the reinsurers a schedule of fixed payments relating to defined blocks of policyholder benefits. In return, the reinsurers reimburse the actual cost of benefit expenses on those blocks to the Company. As at December 31, 2020, the Company has entered into longevity reinsurance contracts and has reinsured approximately 54% of its longevity risk (2019 — 59%, 2018 — No reinsurance transactions).

The following table shows the sensitivity to changes in longevity risk:

AS AT DEC. 31, 2020 US$ THOUSAND	Mortality Rate		Mortality Improvement	
	5% Increase	5% Decrease	50% Increase	50% Decrease
(Increase) decrease in insurance contract liabilities	**$ 7,793**	**$ (8,138)**	**$ (10,693)**	**$ 10,855**
Tax effect	**(1,948)**	**2,035**	**2,673**	**(2,714)**
Impact on comprehensive income	**$ 5,845**	**$ (6,103)**	**$ (8,020)**	**$ 8,141**

Impact on comprehensive income	$ 2,725	$ (3,071)	$ (4,508)	$ 3,884

e. Operational risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The Company's internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

The Company has significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board.

Disaster recovery and business continuity plans have also been established to manage the Company's ability to operate under adverse conditions.

f. Regulatory risk

Regulatory risk stems principally from the risk of changes to the regulatory environment in which the Company operates. To manage this risk, the Company seeks to a have a regular dialogue with regulators to ensure compliance. Furthermore, senior management participates in industry groups and professional bodies to stay apprised of regulatory changes.

NOTE 11. CAPITAL MANAGEMENT

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the Company's growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying the regulatory capital requirements.

The Company takes an integrated approach to risk management that involves the Company's risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board. The operating capital levels are determined by the Company's risk appetite and ORSA. Furthermore, stress techniques that include the FCT are used to evaluate the Company's capital adequacy under sustained adverse scenarios.

Effective as of January 1, 2018, the Life Insurance Capital Adequacy Test ("LICAT") replaced the prior Minimum Continuing Capital and Surplus Requirements. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The Base Solvency Buffer, defined by OSFI, is the aggregate of all defined capital requirements multiplied by a scalar of 1.05. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits. As a Canadian life insurer, BAC is subject to LICAT. With a LICAT ratio of 137%, 164% and 202% as at December 31, 2020, 2019 and 2018, BAC's LICAT ratio is above OSFI's Supervisory Target Total Ratio of 100% and minimum Total Ratio of 90%.

The Company's capital base consists entirely of total equity of $83.0 million and $65.5 million as at December 31, 2020 and 2019.

NOTE 12. SHARE CAPITAL

On December 17, 2020, the Company issued an additional 17,000 common shares to BAM for cash consideration of $13 million (2019 — 5,000 common shares at $4 million). The Company's shares have no stated par value.

BAH's authorized share capital comprises an unlimited number of common shares of which a total of 101,314 were issued and outstanding as at December 31, 2020 (2019 — 84,314), all of which were issued by the Company for total cash consideration of $78 million (2019 — $65 million).

Shares issued and outstanding changed as follows:

AS AT DEC. 31	**2020**		2019	
	Number of Shares (000's)	**Value**	Number of Shares (000's)	Value
Outstanding, beginning of year	**84**	**$64,612**	78	$59,890
Issued	**17**	**13,364**	6	4,722
Outstanding, end of year	**101**	**77,976**	84	64,612

There were no preferred share distributions during the period and the Company has no dilutive instruments outstanding. The components of basic earnings per share are summarized in the following table:

FOR THE YEARS ENDED DEC. 31 US$ THOUSANDS	**2020**	2019	2018
Net income (loss) attributable to shareholders	**$1,608**	$5,527	$(507)
Weighted average — common shares	**85.0**	81.6	70.4
Common shares	**85.0**	81.6	70.4

1. Due to new information and experience in 2020, the Company recognized the effect of a change in accounting estimate prospectively in profit and loss.

NOTE 14. INCOME TAXES

Reconciliation to statutory income tax rate:

FOR THE YEARS ENDED DEC. 31 US$ THOUSANDS	2020	2019	2018
Current tax:			
Current tax on profits for the year	**$596**	$158	$—
Adjustments in respect of prior years	**(13)**	—	—
Total current tax	**583**	158	—
Deferred tax:			
Origination and reversal of temporary differences	**(42)**	—	—
Income tax expense	**$541**	$158	$—

**CONSOLIDATED FINANCIAL STATEMENTS OF
BROOKFIELD ANNUITY HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As at December 31, 2020 and December 31, 2019 and for the years ended
December 31, 2020, 2019 and 2018**

The Company's effective income tax rate differs from the statutory income tax rate is as follows:

FOR THE YEARS ENDED DEC. 31 US$ THOUSANDS	2020	2019	2018
Net income (loss) before income taxes	**$2,149**	$ 5,685	$(507)
Statutory income tax rate	**25%**	26.7%	26.7%
Income tax at statutory rates	**537**	1,518	(135)
Tax effect of:			
Non-taxable investment income	**(36)**	—	—
Non-deductible items	**2**	43	—
Adjustments relating to prior years	**(13)**	—	—
Unrecognized (recognized) deferred taxes	**(47)**	(1,459)	135
Other	**98**	56	—
Total income tax expense	**541**	158	—

The tax expense relating to components of other comprehensive income is as follows:

Unrealized gain/(loss) on AFS assets	**938**	381	(103)
Tax (charge)/credit	**(237)**	(11)	—
After tax	**701**	267	(103)
Current tax expense	**237**	11	—
Deferred tax expense	**—**	—	—
Total tax expense	**237**	11	—

The current enacted corporate tax rate as it impacts the Company in 2020 is 25.0% (2019 — 26.7%). Due to new information and experience in 2020, the Company prospectively changed its estimate for sales and capital taxes that had been paid in years prior to 2020, resulting in a refund and a change to the tax rate for 2020. Non-taxable investment income includes dividend income from Canadian corporations. Nondeductible items and adjustments relating to prior years relate to differences in property, equipment, leases and meals & entertainment. Unrecognized (recognized) deferred taxes recorded in 2019 primarily relate to non-capital loss carryforwards. Other includes the effects of change in accounting estimates due to new information and experience in 2020 relating to the effective tax rate, operations in a low tax foreign jurisdiction and foreign exchange translation.

NOTE 17. SUBSEQUENT EVENTS

In December 2020, the Company issued 17,000 common shares to BAM for a total value of $13.4 million.

In March 2020, the World Health Organization declared a global pandemic related to COVID-19. To date, there have been restrictions on the conduct of business in many jurisdictions. The longer-term impacts of the global pandemic will depend on future developments which are highly uncertain, constantly evolving and difficult to predict. These impacts may differ in magnitude depending on a number of scenarios, which we continue to monitor and take into consideration in our decision making as we continue to assess medium to long-term impacts on our business.

CONDENSED FINANCIAL STATEMENTS OF BROOKFIELD ANNUITY HOLDINGS INC.

(PARENT COMPANY)

All operating activities of Brookfield Annuity Holdings Inc. (the “Parent Company”) are conducted by its subsidiaries, Brookfield Annuity Company (“BAC”), Brookfield Annuity US Inc. (“BAUS”), North End Re (Bermuda) Ltd. (“NER Ltd.”), and North End Re (Cayman) SPC (“NER SPC”). BAUS is a wholly owned subsidiary of BAC. The Company is a holding company that does not conduct any substantive business operations and does not have any assets other than investments in its subsidiaries. The operating subsidiaries are regulated insurance companies and therefore have restrictions on the ability to pay dividends, loan funds and make other upstream distributions to the Company without prior approval by local regulators.

These condensed parent company financial statements have been prepared using the same accounting principles and policies described in the notes to the consolidated financial statements. Refer to the consolidated financial statements and notes presented above for additional information and disclosures with respect to these condensed financial statements.

PARENT COMPANY INFORMATION

BROOKFIELD ANNUITY HOLDINGS INC.

SCHEDULE I — NOTES TO THE CONDENSED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Brookfield Annuity Holdings Inc (the "Parent Company") is a holding company that conducts all of its business operations through its subsidiaries. The Parent Company (an Ontario corporation) was incorporated on August 13, 2015.

The Parent Company is domiciled in Canada and wholly owns Brookfield Annuity Company ("BAC"), Brookfield Annuity US Inc. ("BAUS"), North End Re (Bermuda) Ltd. ("NER Ltd."), and North End Re (Cayman) SPC ("NER SPC"). BAC is a life insurance company incorporated under the Insurance Companies Act of Canada (the "Act") on August 11, 2016.

BAC received its order to commence business from the Office of the Superintendent of Financial Institutions ("OSFI") on October 3, 2016 and has obtained its licenses in all provinces of Canada. BAC provides pension de-risking solutions through group annuity policies.

NER Ltd. was incorporated on July 13, 2018 in Bermuda under the Bermuda Companies Act 1981. Under the provisions of Section 14, the status of NER Ltd. is that of an exempted company. NER Ltd. is currently in the process of obtaining a license to conduct commercial long-term life and annuity reinsurance business with third party direct insurers.

NER SPC was incorporated on April 17, 2019 under the laws of the Cayman Islands. NER SPC is approved as a Class B (iii) insurer under the Cayman Islands' Insurance Act, 2010 (as amended). The Company is licensed to conduct commercial long-term life and annuity reinsurance business with third-party direct insurers.

The Parent Company has accounted for the earnings of its subsidiaries under the equity method in these unconsolidated condensed financial statements.

The Parent Company's functional currency is CAD. The Company's consolidated financial statements are presented in USD as the functional currency of BAM Re is USD. Foreign currency denominated monetary assets and liabilities of the Company are translated using the rate of exchange prevailing at the reporting date and non-monetary assets and liabilities measured at fair value are translated at the rate of exchange prevailing at the date when the fair value was determined. Revenues and expenses are measured at average rates during the period. Gains or losses on translation of these items are included in net income.

For purposes of presenting the consolidated financial statements, assets and liabilities of the Company are translated using the exchange rate prevailing at the reporting date. Revenue and expenses are measured at transactional or average rates during the period. Gains or losses on translation of these items are included in other comprehensive income.

No dividends have been received from any of our subsidiaries in the past three years.

NOTE 2. COMMITMENTS AND CONTINGENCIES

The Parent Company has no material commitments or contingencies during the reported periods.

NOTE 1. NATURE OF OPERATIONS

Brookfield Reinsurance Ltd. (“Brookfield Reinsurance” or the “Company”) is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The Company’s class A exchangeable shares are listed on the New York Stock Exchange ("NYSE") and the Toronto Stock Exchange ("TSX") under the symbol “BNRE”.

On June 28, 2021, Brookfield Corporation ("Brookfield") completed the spin-off of the Pension Risk Transfer business (the "Business") to the Company and the special dividend declaration to holders of Brookfield's Class A and B Shares. Brookfield controlled the Business prior to the spin-off and has significant influence over the Company subsequent to the spin-off through its interests in the Company. The Business was transferred before spin-off, as part of the reorganization, and therefore the transactions were common control transactions.

In December 2022, the Company changed its name from Brookfield Asset Management Reinsurance Partners Ltd. to Brookfield Reinsurance Ltd. and changed its trading symbol from “BAMR” to “BNRE”. The Company’s operations are located primarily in Bermuda, the United States, Canada, and the Cayman Islands. The Company’s registered head office is Ideation House, 1st Floor, 94 Pitts Bay Road, Pembroke, HM08, Bermuda.

The Company holds a direct 100% ownership interest in BAM Re Holdings Ltd. (“BAM Re Holdings”), which holds the Company’s interest in its operating subsidiaries North End Re Ltd. ("NER Ltd.”), North End Re (Cayman) SPC (“NER SPC”), Brookfield Annuity Company (“BAC”) and American National Group, LLC (“American National”).

The Company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, Brookfield Reinsurance offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. The business is presently conducted through our subsidiaries under three operating segments: Direct Insurance, Reinsurance, and PRT.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PRACTICES

The accompanying unaudited interim condensed consolidated financial statements ("financial statements") and notes thereto, including all prior periods presented, have been presented under accounting principles generally accepted in the United States of America (“GAAP”). The financial statements are prepared on a going concern basis and have been presented in U.S. dollars (“USD”) rounded to the nearest million unless otherwise indicated.

The financial statements include the accounts of the Company and its consolidated subsidiaries, which are the entities over which the Company has control. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

The preparation of financial statements requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, disclosure of contingent assets and liabilities during the reporting period.

Included among the material (or potentially material) reported amounts and disclosures that require use of estimates are: fair value of certain financial assets, derivatives, allowances for credit losses, deferred acquisition costs (“DAC”), value of business acquired (“VOBA”), goodwill and other intangibles, market risk benefits, future policy benefits, pension plans, income taxes including the recoverability of our deferred tax assets, and the potential effects of resolving litigated matters. Such estimates and assumptions are subject to inherent uncertainties, which may result in actual amounts differing from reported amounts.

Class A exchangeable shares: the Company's equity interests include the class A exchangeable shares held by public shareholders. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Each class A exchangeable share is structured with the intention of providing an economic return equivalent to one Brookfield Class A Share (subject to adjustment to reflect certain capital events). Each class A exchangeable share is exchangeable with Brookfield at the option of the holder for one Brookfield Class A Share (subject to adjustment to reflect certain capital events) or its cash equivalent (the form of payment to be determined at the discretion of Brookfield), plus unpaid distributions. Each class A exchangeable share, held on the record date, has voting rights and is entitled to cast one vote at a meeting of shareholders of the Company.

The class A exchangeable shares are classified as equity instruments. The class A exchangeable shares are issued capital of the Company and as a result are not adjusted for changes in market value. As class A exchangeable shares rank in priority to the class C shares, they are not considered common stock of the Company.

Class B shares: the Company's equity interests include the class B shares held by Brookfield Reinsurance Class B Partners. Subject to applicable law, quarterly cash distributions may be made in the form of a dividend or a capital reduction resulting in a return of capital or a combination thereof. Distributions on the class B shares will be paid, or in the case of a distribution made pursuant to a capital reduction, will be returned, in each case, at the same time and in the same amount per share as dividends on a Brookfield Class A Shares. The Brookfield Reinsurance Class B Partners are entitled to one vote on any matter and can cast one vote for each class B share held at the record date.

The class B shares are classified as equity instruments. The class B shares are issued capital of the Company and as a result are not adjusted for changes in market value. As class B shares rank in priority to the Class C shares, they are not considered common stock of the Company.

Class C shares: the Company's equity interests include the class C shares held by Brookfield. The class C shares are non-voting shares that are entitled to the residual economic interest in the Company after payment in full of the amount due to holders of our class A exchangeable shares and our class B shares and subject to the prior rights of holders of the Preferred Shares.

The class C shares are classified as equity instruments. The class C shares are issued capital of the Company and as a result are not adjusted for changes in market value.

Preferred shares: on May 25, 2022, the Company issued 98,351,547 Class A Junior Preferred Shares, Series 1 ("preferred shares"), to Brookfield, for proceeds of $2.5 billion. Each preferred share is non-voting and is redeemable at $25 per share. On December 9, 2022, Brookfield Reinsurance issued 2,108,733 Class A Junior Preferred Shares, Series 2 ("preferred shares") for $53 million to Brookfield. Each of these preferred shares is redeemable, together with any accrued and unpaid dividends, at the option of the issuer, subject to certain restrictions. Further, these preferred shares entitle the holders thereof to a fixed cumulative 4.5% preferential cash dividend payable annually as and when declared by the issuer's board of directors.

The Class A Junior Preferred Shares are retractable by the holder, at par value together with an amount equal to all dividends accrued and unpaid, on demand, at any point on or after the seventh anniversary of the date of issue. The preferred shares are recognized as temporary equity on the unaudited condensed consolidated statements of financial position ("statements of financial position") due to their redemption feature and are subsequently measured at accreted redemption value which is subject to a floor equal to the initial carrying amount. The dividends are recognized as a reduction of retained earnings on the unaudited condensed consolidated statements of changes in equity ("statements of equity").

Business combinations are accounted for using the acquisition method. The cost of a business acquisition is measured at the aggregate of the fair values at the date of exchange of assets given, liabilities incurred or assumed, and equity instruments issued in exchange for control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at their fair values at the acquisition date. The interest of non-controlling shareholders in the acquiree, if applicable, is initially measured at the non-controlling shareholders' proportion of the net fair value of the identifiable assets, liabilities and contingent liabilities recognized.

To the extent the fair value of consideration paid exceeds the fair value of the net identifiable tangible and intangible assets, the excess is recorded as goodwill. To the extent the fair value of consideration paid is less than the fair value of net identifiable tangible and intangible assets, the excess is recognized in net income.

Transaction costs are recorded as operating expenses on the condensed consolidated statements of operations ("statements of operations").

Available-for-sale fixed maturity securities primarily include bonds, asset backed securities (“ABS”) and private debt. Available-for-sale fixed maturity securities, which may be sold prior to their contractual maturity, are designated as available-for-sale (“AFS”) and are carried at fair value with changes in fair value recognized in other comprehensive income.

For available-for-sale fixed maturity securities in an unrealized loss position, the Company first assesses whether it intends to sell the security or will be required to sell the security before recovery of its amortized cost basis. If either of these criteria are met, the security’s amortized cost basis is written down to fair value through income in "Investment related gains (losses), net". For those that do not meet either indicated criteria, the Company evaluates whether the decline in fair value has resulted from credit loss or market factors. In making this assessment, management first calculates the extent to which fair value is less than amortized cost, and then may consider any changes to the rating of the security by a rating agency, and any specific conditions related to the security. If this qualitative assessment indicates that a credit loss exists, the present value of expected cash flows is compared to the amortized cost basis of the security. The net present value of the expected cash flows is calculated by discounting management’s best estimate of expected cash flows at the effective interest rate implicit in the available-for-sale fixed maturity security when acquired. If the present value of expected cash flows is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded through income in "Investment related gains (losses), net" limited to the amount fair value is less than amortized cost. If the fair value is less than the net present value of its expected cash flows at the impairment measurement date, a non-credit loss exists which is recorded in other comprehensive income (loss) for the difference between the fair value and the net present value of the expected cash flows.

Additions to or releases of the allowance on all available-for-sale fixed maturity securities are reported in "Investment related gains (losses)" in the statements of operations.

Equity securities primarily include common stocks, preferred stocks and private equity. Equity securities are carried at fair value with changes in fair value recognized in earnings.

Mortgage loans on real estate are stated at amortized cost, which includes the unamortized principal, interest, discounts or premiums and deferred expenses, net of allowances for expected credit loss. Premiums and discounts are amortized using the effective yield method over the life of the loan. Interest income, prepayment fees, and amortization of premiums and discounts and origination fees are reported in “Net investment income” in the statements of operations. However, interest ceases to accrue for loans on which interest is more than 90 days past due, when the collection of interest is not probable, or when a loan is in foreclosure. Income on impaired loans is reported on a cash basis. When collection of a loan becomes probable, it is placed back into accrual status. Cash receipts on impaired loans are recorded as a reduction of principal, interest income, expense reimbursement, or other manner in accordance with the loan agreement. In the statements of operations, gains and losses from the sale of loans and changes in allowances are reported in “Investment related gains (losses)”.

Mortgage loans are presented net of the Company's recorded allowance for expected credit loss, which represents the portion of amortized cost basis on mortgage loans that the Company does not expect to collect. In determining the Company’s allowance for credit losses, management: (i) pools and evaluates mortgage loans with similar risk characteristics, (ii) considers expected lifetime credit losses adjusted for prepayments and extensions, and (iii) considers past events, current economic conditions and forecasts of future economic conditions. The allowance is calculated quarterly for each property type based on inputs unique to each loan property type. The Company is using the discounted cash flow model to assess expected credit loss.

On an ongoing basis, mortgage loans with dissimilar risk characteristics (i.e., loans with significant declines in credit quality) and collateral dependent mortgage loans (i.e., when the borrower is experiencing financial difficulty, including when foreclosure is probable), may be evaluated individually for credit loss. The allowance for credit losses for loans evaluated individually is established using the same methodologies for the overall mortgage portfolio except for collateral dependent loans. The allowance for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan's underlying collateral, less selling cost when foreclosure is reasonably possible or probable. Accordingly, the change in the estimated fair value of collateral dependent loans is recorded as a change in the allowance for credit losses which is recorded on a quarterly basis as a charge or credit to earnings.

The Company's mortgage loans are primarily originated and are not purchased in the secondary market; as such, the mortgage loans would not generally be subject to purchased credit deteriorated considerations.

Policy loans are carried at the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, the carrying value of policy loans approximates fair value.

Real estate and real estate partnerships comprise of investment real estate, as well as real estate joint ventures and other limited partnerships.

Investment real estate including related improvements that are stated at cost less accumulate depreciation, depreciation is provided on a straight-line basis over the estimated useful life of the asset (typically 15 to 50 years). Rental income is recognized on a straight-line basis over the term of the respective lease. The Company classifies a property as held-for-sale if it commits to a plan to sell a property within one year and actively markets the property in its current condition for a price that is reasonable in comparison to its estimated fair value. Real estate held-for-sale is stated at the lower of depreciated cost or estimated fair value less expected disposition costs and is not depreciated while it is classified as held-for-sale. The Company periodically reviews its investment real estate for impairment and tests properties for recoverability whenever events or changes in circumstances indicate the carrying amount of the asset may not be recoverable and the carrying value of the property exceeds its estimated fair value. Properties whose carrying values are greater than their undiscounted cash flows are written down to their estimated fair value, with the impairment loss included as an adjustment to "Investment related gains (losses)" in the statements of operations. Impairment losses are based upon the estimated fair value of real estate, which is generally computed using the present value of expected future cash flows from the real estate discounted at a rate commensurate with the underlying risks as well as other appraisal methods. Real estate acquired upon foreclosure is recorded at the lower of its cost or its estimated fair value at the date of foreclosure.

Real estate joint ventures and other limited partnership interests in which the Company has significant interest or influence over the investee's operations without a controlling financial interest, are accounted for using the equity method of accounting. These investments are reported as "Real estate and real estate partnerships" in the statements of financial position. For certain joint ventures, the Company records its share of earnings using a lag methodology of one to three months when timely financial information is not available, and the contractual right does not exist to receive such financial information. In addition to the investees' impairment analysis of their underlying investments, the Company routinely evaluates its investments in those investees for impairments. The Company considers financial and other information provided by the investee, other known information, and inherent risks in the underlying investments, as well as future capital commitments, in determining whether impairment has occurred. When an impairment is deemed to have occurred at the joint venture level, the Company recognizes its share as an adjustment to "Net investment income" to record the investment at its fair value. When an impairment results from the Company's separate analysis, an adjustment is made through "Investment related gains (losses)" to record the investment at its fair value.

Investment funds are primarily comprised of various funds and corporate investment holdings for which the Company is not the primary beneficiary. The Company recognizes the share of the earnings in "Net investment income" under the equity method of accounting. Cash distributions are received from the earnings and from liquidation of underlying investments.

Short-term investments include highly liquid securities and other investments with original maturities of over 90 days and less than one year at the date of acquisition. Securities included within short-term investments are stated at fair value with amortized cost used as an approximation of fair value for certain investments.

Derivative instruments are carried at fair value and may be collateralized by counterparties; such collateral is restricted to the Company’s use. Derivative instruments are purchased to manage foreign currency exposure and other market risks associated with certain assets and liabilities. Derivative instruments are recorded at fair value on the acquisition date and subsequently revalued at fair value at each reporting date. Derivative instruments with positive values are recorded as derivative assets and negative fair values are reported as derivative liabilities in the statements of financial position. Changes in the fair value of derivatives are recorded in “Investment related gains (losses)” in the statements of operations. The Company does not apply hedge accounting treatment to its derivative instruments.

In some instances, the Company holds collateral to offset exposure from its counterparties relating to its derivative instruments. The Company elects to offset collateral that supports credit risk is reported in the statements of financial position.

Private loans are stated at amortized cost, net of allowances for expected credit loss.

Credit loss allowances for private loans are estimates of expected credit losses, established for loans upon origination or purchase, and are established considering all relevant information available, including past events, current conditions, and reasonable and supportable forecasts over the life of the loans. Loans are evaluated on a pooled basis when they share similar risk characteristics; otherwise, they are evaluated individually.

Other invested assets are primarily comprised of derivatives instruments. Separately managed accounts and Federal Home Loan Bank stock are also included in other invested assets and are carried at cost or market value if available from the account manager. Other invested assets also include tax credit partnerships and mineral rights less allowance for depletion, where applicable.

Credit loss allowances The Company records an allowance for expected lifetime credit loss in earnings within investment related gains (losses), net, in an amount that represents the portion of the amortized cost basis of mortgage and private loans that the Company does not expect to collect, resulting in the loans being presented at the net amount expected to be collected. In determining the Company’s credit loss allowances, management applies significant judgment to estimate expected lifetime credit loss, including: (i) pooling loans that share similar risk characteristics, (ii) considering expected lifetime credit loss over the contractual term of its loans adjusted for expected prepayments and any extensions, and (iii) considering past events and current and forecasted economic conditions.

Reinsurance funds withheld are receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which the subsidiaries of the Company act as reinsurers. The receivable represents assets that are held in custodial accounts that are legally segregated from the third-party ceding companies’ general accounts and are managed by our subsidiaries. The assets are typically cash and cash equivalents and fixed income asset types. In the event of ceding companies' insolvency, the subsidiaries would need to assert a claim on the assets supporting the reserve liabilities. However, the subsidiaries have the ability to offset amounts owed to the ceding companies. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The subsidiaries are subject to the investment performance and have all economic rights and obligations on the funds withheld assets, in a fashion similar to the invested assets held directly by the subsidiaries. The underlying agreements contain embedded derivatives. Derivatives embedded in reinsurance contracts which are not closely related to the host contract are separated and measured at fair value in the statements of financial position and presented within “Reinsurance funds withheld”. Changes in the fair value are included in the “Net investment results from funds withheld” in the statements of operations, as discussed in Derivative Instruments (Note 7).

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset. The costs of assets include the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, and the cost of dismantling and removing the items and restoring the site on which they are located.

Depreciation of property and equipment commences when it is available for use. Property and equipment are depreciated on a straight-line basis over the estimated useful lives of each component of the property and equipment. The estimated useful lives of the property and equipment are three to thirty years.

Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter, on a straight-line basis. The ROU asset is depreciated on the straight-line basis over the lease term. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each annual reporting period, with the effect of any changes recognized on a prospective basis.

The Company reviews its property and equipment for impairment at least annually and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

Intangible assets consist of capitalized costs of estimated fair value of computer software, distributor relationships, trade name and insurance licenses. Intangible assets are included in other assets within the statements of financial position.

Definite-lived intangible assets are carried at cost less accumulated amortization. Amortization expense is primarily calculated using the straight-line amortization method.

The Company assesses the impairment of definite-lived intangible assets in accordance with its policy for the impairment of property and equipment. The Company assesses the impairment of indefinite-lived intangible assets in accordance with its policy for the impairment of goodwill.

(i) Distributor Relationships

The distribution assets reflect relationships American National has with third-party intermediaries that sell new business for the Company. These assets are valued using the multi-period excess-earnings method, which derives value based on the present value of the after-tax cash flows attributable to the intangible asset only. The average useful life of distributor relationships is 19 years.

(ii) Trade Name

This represents American National's trade name and was valued using the relief from royalty method, which derives value based on present value of the after-tax royalty savings attributable to owning the intangible asset. The useful life of the trade name is 10 years.

(iii) Insurance Licenses

Given the highly regulated nature of the insurance industry, companies are required to hold certain licenses to operate. These licenses are valued using the comparable transaction method based on observable license transactions in the insurance industry. Insurance licenses represent an indefinite-lived intangible asset.

Deferred policy acquisition costs (“DAC”) are capitalized costs related directly to the successful acquisition of new or renewal insurance contracts. Significant costs are incurred to successfully acquire insurance, reinsurance, and annuity contracts, including commissions and certain underwriting, policy issuance, and processing expenses.

Insurance contracts are grouped by contract type and issue year into cohorts consistent with estimating the associated liability for future policy benefits. DAC is amortized on constant level basis for the grouped contracts over the expected term of the related contracts to approximate straight-line amortization. DAC will be amortized over the bases on a straight-line basis, all of which provide a constant level representation of contract term.

Product (s)	Amortization base
Traditional life products	Nominal face amount
Life contingent payout annuities	Annualized benefit amount in force
Health products	Original annual premium
Fixed deferred annuities, fixed indexed annuities, variable annuities	Policy count
Universal life products	Initial face amount

We review and update actuarial experience assumptions (such as mortality, surrenders, lapse, and premium persistency) serving as inputs to the models that establish the expected life for DAC and other actuarial balances during the third quarter of each year, or more frequently if evidence suggests assumptions should be revised. We make model refinements as necessary, and any changes resulting from these assumption updates are applied prospectively.

Amortization of DAC is included in the “Net change in deferred policy acquisition costs” on the statement of operations.

For short-duration contracts, DAC is grouped consistent with the manner in which insurance contracts are acquired, serviced, and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. Investment income is anticipated in assessing the recoverability of DAC for short-duration contracts. DAC for short-duration contracts is charged to expense in proportion to premium revenue recognized.

Value of business acquired (“VOBA”) is an intangible asset or liability resulting from a business combination that represents the difference between the policyholder liabilities measured in accordance with the acquiring company's accounting policies and the estimated fair value of the same acquired policyholder liabilities in-force at the acquisition date. VOBA can be either positive or negative. Positive VOBA is recorded in DAC. Negative VOBA occurs when the estimated fair value of in-force contracts in a life insurance company acquisition is less than the amount recorded as insurance contract liabilities, and is recorded in the "future policy benefits" in the statements of financial position.

VOBA is amortized on a straight-line basis over the remaining life of the underlying policies.

Reinsurance recoverables include the reinsurance receivables from cedants or reinsurers, and reinsurance recoverables from reinsurers.

In the normal course of business, the Company is a user of reinsurance in order to limit the potential for losses arising from certain exposures. To the extent that third party reinsurers are unable to meet their obligations, the Company remains liable to its policyholders for the portion reinsured.

For long term duration contracts, reinsurance recoverables include amounts due from reinsurers for paid or unpaid claims, claims incurred but not reported or policy benefits and are presented net of a reserve for collectability. The Company cedes disability, medical and long-term care insurance as well as pension risk transfer contracts with significant insurance risk to other insurance companies through reinsurance.

For short term duration contracts, reinsurance recoverables are estimated amount due to the Company from reinsurers related to paid and unpaid ceded claims and claim adjustment expenses (“CAE”) and are presented net of a reserve for collectability. Recoveries of gross ultimate losses under the non-catastrophe reinsurance are estimated by a review of individual large claims and the ceded portion of incurred but not reported ("IBNR") using assumed distribution of loss by percentage retained. Recoveries of gross ultimate losses under our catastrophe reinsurance are estimated by applying reinsurance treaty terms to estimates of gross ultimate losses. The most significant assumption is the average size of the individual losses for those claims that have occurred but have not yet been reported and the estimate of gross ultimate losses. The ultimate amount of the reinsurance ceded recoverable is unknown until all losses settle.

Reinsurance receivables include amounts receivable from third party reinsurers and cedants which are expected to be settled within a year. Reinsurance receivables are short-term in nature, and their fair values approximate carrying value.

Goodwill represents the excess of amounts paid for acquiring businesses over the fair value of the net assets acquired, less any impairment of goodwill recognized. Goodwill is recognized when acquired.

Goodwill is not amortized but is tested for impairment at least annually. Goodwill is assessed for impairment whenever events or changes in circumstances, such as deteriorating or adverse market conditions, indicate that it is more likely than not that the carrying amount of the reporting unit including goodwill may exceed the fair value.

Goodwill impairment is measured and recognized as the amount by which a reporting unit's carrying value, including goodwill, exceeds its fair value, not to exceed the carrying amount of goodwill of the reporting unit. There were no impairment adjustments made to goodwill for the period.

Goodwill is included within Other Assets in the statements of financial position.

Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of the Company. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. The Company reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from the Company's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, the Company's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of the Company.

Assets pledged as collateral: the Company receives and pledges collateral in respect to certain derivative contracts, in order to meet its contractual obligations. The amount of collateral required is determined by the valuation of each contract on a mark-to-market basis and the type of collateral to be deposited is specified within the agreement with each counterparty.

Collateral pledged continues to be recognized in the statements of financial position as the Company retains all rights related to these assets.

Collateral received is not recognized in the statements of financial position unless the Company acquires the rights relating to the economic risks and rewards related to these assets.

Collateralized borrowing transactions: Securities sold under repurchase agreements are collateralized borrowing transactions. A repurchase agreement provides the lender of securities the right to receive from the counterparty sufficient cash to purchase the same securities at the maturity of the agreement. These transactions are measured at amortized cost and are recorded at amounts at which the securities were initially sold.

The Company recognizes an asset in the statements of financial position, representing the cash received, and a liability for the same amount, representing the obligation to repurchase the loaned bonds. Repurchase agreements with the same counterparty are presented as net in the statements of financial position when the criteria to offset are met.

Future policy benefits (“FPB”) is calculated as the present value of expected future policy benefits to be paid or on behalf of policyholders and certain related expenses, reduced by the present value of expected net premiums to be collected from policyholders. Principal assumptions used in the establishment of the FPB mortality, lapse, incidence, terminations, claim-related expenses, and other contingent events as appropriate to the respective product type. The Company groups contracts into annual cohorts based on product type and contract inception date for the purposes of calculating the liability for future policy benefits.

The Company updates its estimate of cash flows over the entire life of a group of contracts using actual historical experience and current future cash flow assumptions. The Company reviews cash flow assumptions, including assumptions for claim-related expenses annually in the third quarter. Assumption revisions will be reflected in the net premium ratio and FPB calculation in the quarter in which assumptions are revised. The change in the liability due to actual experience are recognized in "Claims and Policyholder benefits" in the statements of operations.

The Company measures the FPB at each reporting period using both the locked-in discount rate and the current discount rate curve. To determine the locked in-discount rate, the Company solves for a single scalar rate by cohort that is equivalent to the Bloomberg BVSC curve of single-A bond yields. For remeasurement at current discount rates, the prevailing forward curve of Bloomberg BVSC single-A bond yields is used. The same net premium ratio, calculated using the locked-in discount rate, will be used for both FPB measurements. The curve is derived by solving for the locked-in discount rate by calculating a moving monthly average of each point (i.e., tenor) on the Bloomberg BVSC curve. For certain long-tailed life insurance liabilities with expected future cash flows longer than the last observable tenor (30 years) the discount rate for future cash flows beyond 30 years will be held constant at the ultimate (30 year) observable forward rate. The difference between the updated carrying amount of the liability for future policy benefits measured using the current discount rate assumption and the original discount rate assumption is recognized in other comprehensive income during the period.

Should the present value of actual and future expected benefits less transition FPB balance exceed the present value of actual and future expected gross premiums, the net premium ratio will be capped at 100% and a gross premium FPB will be held. The immediate charge will be the amount by which the uncapped net premium ratio exceeds 100% times the present value of future expected gross premium. This assessment will be performed at the cohort level.

The Company periodically reviews its estimates of actuarial liabilities for future policy benefits and compares them with its actual experience. Differences between actual experience and the assumptions used in pricing these policies, guarantees and riders and in the establishment of the related liabilities result in variances in profit and could result in losses. The effects of changes in such estimated liabilities are included in the consolidated statements of operations in the period in which the changes occur.

Deferred Profit Liability

For limited-payment products, gross premiums received in excess of net premiums are deferred at initial recognition as a deferred profit liability (“DPL”). Gross premiums are measured using assumptions consistent with those used in the measurement of the liability for future policy benefits, including discount rate, mortality, lapses and expenses.

The DPL is amortized and recognized as claims and policyholder benefits in proportion to expected future benefit payments from annuity contracts. Interest is accreted on the balance of the DPL using the discount rate determined at contract issuance. The Company reviews and updates its estimate of cash flows from the DPL at the same time as the estimates of cash flows for the liability for future policy benefits. When cash flows are updated, the updated estimates are used to recalculate the DPL at contract issuance. The recalculated DPL as of the beginning of the current reporting period is compared to the carrying amount of the DPL as of the beginning of the current reporting period, and any difference is recognized as either a charge or credit to premium revenue.

DPL is recorded in future policy benefits and included as a reconciling item within the disaggregated rollforwards.

Policyholders' account balances represent the contract value that has accrued to the benefit of the policyholders related to universal-life and investments-type contracts. For fixed products, these are generally equal to the accumulated deposits plus interest credited, reduced by withdrawals, payouts, and accumulated policyholder assessments. Indexed product account balances are equal to the sum of host and embedded derivative reserves computed. Changes in the fair value of the embedded derivative are included in the “Interest sensitive contract benefits” in the statements of operations, as discussed in Derivative Instruments (Note 7).

Liabilities for unpaid claims and claim adjustment expenses (“CAE”) are established to provide for the estimated costs of paying claims. These reserves include estimates for both case reserves and incurred but not reported claims (“IBNR”) liabilities. Case reserves include the liability for reported but unpaid claims. IBNR liabilities include a provision for potential development on case reserves, losses on claims currently closed which may reopen in the future, as well as IBNR claims. These liabilities also include an estimate of the expense associated with settling claims, including legal and other fees, and the general expenses of administering the claims adjustment process. Liabilities for unpaid claims and claim adjustment expenses for health and property and casualty insurance in included in “Policy and contract claims” in the statements of financial position.

Deposit liability: Reinsurance agreements that do not expose the reinsurer to a reasonable possibility of a significant loss from insurance risk are accounted for as deposits. At initial recognition, the funds withheld or deposit liability is measured based on consideration paid or received, less any explicitly identified premiums or fees to be retained by the insurer or reinsurer. Any commission paid is recorded as a contra-liability offsetting the deposit liability and amortized to expense over the life of the agreements. The amount of the funds withheld or liability and any balances receivable from or payable to the cedant will be adjusted at subsequent reporting dates with the effective yield on the deposit to reflect actual payments to date and expected future payments with a corresponding credit or charge to interest sensitive contract benefits.

Market risk benefits ("MRB"), which are contracts or contract features that provide protection to the policyholder from other-than-nominal capital market risk and expose the Company to other-than-nominal capital market risk, are measured at fair value, at the individual contract level. The periodic change in fair value is recognized in net income with the exception of the periodic change in fair value related to the instrument-specific credit risk, which is recognized in other comprehensive income. The Company classifies the Lifetime Income Rider ("LIR") as an MRB. The LIR is a rider offering guaranteed minimum withdrawal benefits type benefits available on certain fixed indexed annuity products.

Total attributed fees will include explicit rider fees and will not be negative or exceed total contract fees and assessments collectible from the contract holder. There are only rider charges and surrender charges. Surrender charges will not be included in the fair value measurement, as surrender charges do not fund any future benefits. Cash flows are projected using risk-neutral scenarios generated by the Company.

The actuarial assumptions used in the MRB calculation are the Company's best estimate assumptions. Assumptions are adjusted to reflect fair value by applying a margin for non-hedgeable risk and an adjustment for own credit spread through the discount rate. The risk-free discount rate is the scenario specific US treasury rate.

Market risk benefits with positive values are recorded as other assets and negative fair values are reported as market risk benefit liabilities in the statements of financial position.

Structured entities: The Company invests a portion of its assets in structured entities that issue investments, such as debt and preferred securities to subsidiaries of the Company, and its reinsurance treaty accounts. The Company is the primary beneficiary of the variable returns of assets held within the entities as the investment manager for the structured entities is a related party and the Company has a significant economic interest in the structured entities. As a result, these entities are consolidated within the Company's financial statements.

Liabilities of the entities that do not eliminate upon consolidation are recorded as liabilities of structured entities.

The carrying amount of the Company's investment in the consolidated structured entities is determined in accordance with the Company's accounting policies for the underlying securities held within the structured entities.

Funds withheld liabilities represent the payable for amounts contractually withheld in accordance with reinsurance agreements where BAC acts as a cedant. While the assets in the funds withheld liabilities are legally owned by BAC, the reinsurer is subject to all investment performance and economic rights and obligations to the funds withheld assets similar to invested assets held directly by the reinsurer. BAC's funds withheld liabilities balance includes cash and cash equivalents, fixed income securities and derivatives carried at fair value and is credited with premiums, investment income (loss), benefits payable and other expenses deducted as incurred at cost. Funds withheld liabilities are recorded in "Other liabilities" in the statement of financial position.

Reinsurance assumed: NER Ltd. closed a retrocession agreement on September 3, 2021 with a third-party insurance company to reinsure multi-year guarantee fixed annuities.

NER Ltd. assumes insurance contracts under modified coinsurance arrangements ("Modco arrangements"). NER Ltd. generally has the right of offset on reinsurance contracts but has elected to present reinsurance settlement amounts due to and from the cedant on a gross basis.

Assets and liabilities assumed under Modco arrangements are presented gross on the balance sheet. Since this treaty does not transfer significant insurance risk, it is recorded on a deposit method of accounting.

NER SPC closed a retrocession agreement on October 8, 2021, with an insurance company to reinsure fixed indexed annuities.

NER SPC assumes insurance contracts under Modco arrangements and Coinsurance. Changes in the interest sensitive contract liabilities, excluding deposits and withdrawals, are recorded in “Interest sensitive contract benefits” in the statements of operations. Expenses outside of account value, such as commissions and federal excise taxes, are included in “Other reinsurance expenses” in the statements of operations.

Participating insurance policies: for the majority of participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies, which is limited to the greater of 10% of the profit on participating business, or 50 cents per thousand dollars of the face amount of participating life insurance in-force. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends (less net income allocated to stockholders as indicated above) as well as a pro rata portion of unrealized investment gains (losses).

For all other participating business, the allocation of dividends to participating policy owners is based upon a comparison of experienced rates of mortality, interest and expenses, as determined periodically for representative plans of insurance, issue ages and policy durations, with the corresponding rates assumed in the calculation of premiums.

It i included within Other policyholder funds in the statements of financial position.

Premium, benefits, claims incurred, and expenses

Traditional ordinary life and health premiums are recognized as revenue when due. Benefits and expenses are associated with earned premiums to result in recognition of profits over the term of the insurance contracts.

Annuity premiums received on limited-pay and supplemental annuity contracts involving a significant life contingency are recognized as revenue when due. Deferred annuity premiums are recorded as deposits rather than recognized as revenue. Revenues from deferred annuity contracts are principally surrender charges and, in the case of variable annuities, administrative fees assessed to contract holders.

Universal life and single premium whole life revenues represent amounts assessed to policyholders including mortality charges, surrender charges actually paid, and earned policy service fees. Amounts included in benefits are claims in excess of account balances returned to policyholders and interest credited to account balances.

Property and casualty premiums are recognized as revenue over the period of the contract in proportion to the amount of insurance protection, which is generally evenly over the contract period. Claims incurred consist of claims and CAE paid and the change in reserves.

Gross premiums for PRT issued are recognized as revenue when due and collection is reasonably assured. When premiums are recognized, future policy benefits are computed, the result being that benefits and expenses are matched with such revenue. Premiums ceded are recognized when due and in accordance with the terms of the contractual agreement between the Company and reinsurer. Premium refunds, if any, are recognized on an accrual basis. Policyholder benefits are recorded in the statements of operations when they are due and incurred.

Pension and postretirement benefit obligations and costs for our frozen benefit plans are estimated using assumptions including demographic factors such as retirement age and mortality.

The Company uses a discount rate to determine the present value of future benefits on the measurement date. The guideline for setting this rate is a high-quality long-term corporate bond rate. For this purpose, a hypothetical bond portfolio to match the expected monthly benefit payments under the pension plan was constructed with the resulting yield of the portfolio used as a discount rate.

In developing the investment return assumption, we relied on a model that utilizes the following factors:

- Current yield to maturity of fixed income securities
- Forecasts of inflation, GDP growth, and total return for each asset class
- Historical plan performance

- Target asset allocation
- Standard deviations and correlations related to historical and expected future returns of each asset class and inflation

The resulting assumption is the assumed rate of return for the plans' target asset allocation, net of investment expenses, and reflects anticipated returns of the plans' current and future assets.

Using this approach, the calculated return will fluctuate from year to year; however, it is the Company's policy to hold this long-term assumption relatively constant.

Interest income on investments measured at amortized cost is calculated using the effective interest method.

Dividend income is recognized when the right to receive payments is established.

Investment related gains (losses) include realized gains and losses on investments representing the difference between net sale proceeds and the purchase price, marked to market gains or losses on investments measuring the difference between the fair value of investments at the end of each reporting date and their purchase price, allowance of credit loss and foreign exchange gains (losses).

Investment upfront fees are considered to be loan origination fees and are capitalized as part of the carrying value of the loans and receivables as received and amortized over the life of the loans.

Net investment results from funds withheld include investment income on funds withheld investments and changes in the fair value of derivatives embedded in reinsurance contracts. Changes in the fair value of the embedded derivative are included in the net investment results from funds withheld in the statements of operations.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to taxation authorities within a year. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the end of each year.

Deferred income tax assets are recognized to the extent that it is probable that taxable profits will be available against which the unused tax losses or unused tax credits can be utilized by the Company. To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credit can be utilized, the deferred tax asset is not recognized.

Deferred income tax liabilities are provided for using the liability method on temporary differences between the tax bases used in the computation of taxable income and carrying amounts of assets and liabilities in the financial statements. Deferred income tax liabilities are recognized for taxable temporary differences, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority within a single taxable entity, or the Company intends to settle its current tax assets and liabilities on a net basis in the case where there exists different taxable entities in the same taxation authority and when there is a legally enforceable right to set off current tax assets against current tax liabilities.

Foreign currencies: the local currency of the Company's foreign subsidiaries is deemed to be the functional currency of the country in which these subsidiaries operate. The financial statements of the Company's foreign subsidiaries are translated into USD at the exchange rate in effect at the end of a reporting period for assets and liabilities and at average exchange rates during the period for the statements of operations.

The unrealized gains and losses from the translation of the net assets are recorded as unrealized foreign currency translation adjustments and included in accumulated other comprehensive income ("AOCI"). Changes in unrealized foreign currency translation adjustments are included in other comprehensive income ("OCI"). Gains and losses from foreign currency transactions are reported in "Net investment income" or "Net investment results from funds withheld" in the statements of operations.

Segments: in accordance with ASC 280 Operating Segments, the Company uses a management approach to determine operating segments. The management approach considers the internal organization and reporting used by the Company's chief operating decision maker ("CODM") for making decisions, allocation of resources and assessing performance. The Company's CODM has been identified as the Chief Executive Officer who reviews the results of operations when making decisions about allocating resources and assessing the performance of the Company. Our operations were reorganized into three reportable segments: Direct Insurance, Reinsurance, and PRT (see Note 24).

Earnings per share: the holders of the class C shares are entitled to receive distributions if, as and when declared or authorized. Our Board of Directors has adopted a policy that class C share distributions will be paid quarterly in an amount equal to the Company's distributable earnings (as determined by management of the Company) after payment of distributions on the class A exchangeable shares, class B shares and any other shares ranking senior to the class C shares and after provision for expenses, anticipated cash needs, and other similar adjustments. Total outstanding class C shares have been used to calculate basic earnings per share. Class A exchangeable shares and class B shares are not considered participating securities nor considered to be common stock, and consequently earnings per share is not applicable to these classes of shares.

Basic earnings per share attributable to class C shareholders are calculated by dividing the Company's net income for the year, less distributions payable to class A exchangeable shareholders, class B shareholders and preferred shareholders, by the weighted average number of class C shares outstanding during the year.

Litigation contingencies: Existing and potential litigation is reviewed quarterly to determine if any adjustments to liabilities for probable losses are necessary. Reserves for losses are established whenever they are probable and reasonably estimable. If not one estimate within the range of possible losses is more probable than any other, a reserve is recorded based on the lowest amount of the range.

Adoption of new accounting standards

For long duration insurance contracts, ASU 2018-12, Targeted Improvements to the Accounting for Long-Duration Contracts (LDTI), issued in August 2018, changes the measurement and disclosures of insurance liabilities and deferred acquisition cost for long-duration contracts issued by insurers. The amendments are effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. The Company adopted LDTI effective January 1, 2023 with a transition date of January 1, 2021. Initial adoption for the liability for future policy benefits and DAC is required to be reported using either a full retrospective or modified retrospective approach. MRB are contracts or contract features that both provide protection to the contract holder from other-than-nominal capital market risk and expose the Company to other-than-nominal capital market risk. For MRB, full retrospective application is required. The Company has elected to apply a modified retrospective transition method for the liability for future policy benefits and DAC. Certain company subsidiary insurance companies either began writing business or was purchased by the Company during the transition period. Therefore, such companies LDTI adoption date was as of the business inception or purchase date.

The LDTI guidance is not prescriptive as to the appropriate level of aggregation for disclosures; however, amounts from different reportable segments cannot be aggregated. Factors considered in determining the level of aggregation for disclosures include the type of coverage, geography and market or type of customer. We have identified the following levels of aggregation for LDTI disclosures: direct insurance, reinsurance and PRT. The disclosures do not include levels of aggregation for insignificant balances. At transition as at January 1, 2021, the adoption of LDTI did not result in any material adjustments to retained earnings or future policy benefits liabilities.

Future Accounting policy changes

The Company has continued to assess the impacts of future accounting policy changes as below:

Standard	Description	Effective Date and Method of Adoption	Impact on Financial Statements
ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting	The amendments in this guidance provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance only applies to contracts, hedging relationships, and other transactions that reference London Inter-Bank Offered Rate ("LIBOR") or another reference rate expected to be discontinued because of reference rate reform.	The amendments in this guidance are effective for all entities as of March 12, 2020, and will sunset through March 31, 2023, at which time the application of exceptions and optional expedients will no longer be permitted. The FASB is currently deliberating an ASU that would extend the sunset date through December 31, 2024	The inventory of LIBOR exposures has been completed and is primarily limited to floating rate bonds, alternative investments, and borrowings within joint venture investments. Certain contracts included in these categories matured prior to December 31, 2021, the start of LIBOR rates cessations. The transition from LIBOR is not expected to have a material impact to the Company's financial statements or Notes to the financial statements.

NOTE 3. INVESTMENTS IN AVAILABLE-FOR-SALE FIXED MATURITY SECURITIES

The amortized cost and fair value of available-for-sale fixed maturity securities are shown below:

AS AT MAR. 31, 2023 US$ MILLIONS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Carrying Value / Fair Value
Available-for-sale fixed maturity securities					
U.S. treasury and government	$ 148	$ —	$ (33)	$ —	**$ 115**
U.S. states and political subdivisions	854	1	(16)	—	**839**
Foreign governments	393	1	(19)	—	**375**
Corporate debt securities	14,430	37	(711)	(13)	**13,743**
Residential mortgage-backed securities	130	—	(5)	—	**125**
Commercial mortgage-backed securities	419	5	(21)	—	**403**
Collateralized debt securities	978	15	(19)	(9)	**965**
Total investments in available-for-sale fixed maturity securities	**$ 17,352**	**$ 59**	**$ (824)**	**$ (22)**	**$ 16,565**

AS AT DEC. 31, 2022 US$ MILLIONS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Carrying Value / Fair Value
Available-for-sale fixed maturity securities					
U.S. treasury and government	$ 148	$ —	$ (38)	$ —	**$ 110**
U.S. states and political subdivisions	880	—	(25)	—	**855**
Foreign governments	353	1	(36)	—	**318**
Corporate debt securities	14,667	35	(1,136)	(24)	**13,542**
Residential mortgage-backed securities	133	—	(6)	—	**127**
Commercial mortgage-backed securities	422	5	(19)	—	**408**
Collateralized debt securities	1,291	9	(51)	(6)	**1,243**
Total investments in available-for-sale fixed maturity securities	**$ 17,894**	**$ 50**	**$ (1,311)**	**$ (30)**	**$ 16,603**

The amortized cost and fair value, by contractual maturity, of available-for-sale fixed maturity securities are shown below:

	March 31, 2023		December 31, 2022	
US$ MILLIONS	**Amortized Cost**	**Fair Value**	Amortized Cost	Fair Value
Due in one year or less	**$ 689**	**$ 682**	$ 494	$ 489
Due after one year through five years	**5,251**	**5,106**	5,244	5,072
Due after five years through ten years	**5,211**	**5,022**	5,907	5,436
Due after ten years	**6,201**	**5,755**	6,249	5,606
Total	**$ 17,352**	**$ 16,565**	$ 17,894	$ 16,603

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Residential and commercial mortgage-backed securities, which are not due at a single maturity, have been presented based on the year of final contractual maturity.

Proceeds from sales of available-for-sale fixed maturity securities, with the related gross realized gains and losses, are shown below:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Proceeds from sales of available-for-sale fixed maturity securities	**$ 2,017**	$ 282
Gross realized gains	**24**	89
Gross realized losses	**(59)**	(91)

Gains and losses are determined using first-in-first-out of the securities sold. In addition, the Company has pledged bonds in connection with certain agreements and transactions, such as financing and reinsurance agreements. The carrying value of bonds pledged was $44 million and $45 million at March 31, 2023 and December 31, 2022, respectively.

In accordance with various regulations, the Company has securities on deposit with regulating authorities with a carrying value of $30 million and $51 million at March 31, 2023 and December 31, 2022, respectively.

The gross unrealized losses and fair value of available-for-sale fixed maturity securities, aggregated by investment category and length of time individual securities have been in a continuous unrealized loss position due to market factors are shown below:

AS AT MAR. 31, 2023 US$ MILLIONS, EXCEPT NUMBER OF ISSUES	Less than 12 months			12 months or more			Total		
	Number of issues	Gross Unrealized Losses	Fair Value	Number of issues	Gross Unrealized Losses	Fair Value	Number of issues	Gross Unrealized Losses	Fair Value

Allowance for Credit Losses

Several assumptions and underlying estimates are made in the evaluation of allowance for credit loss. Examples include financial condition, near term and long-term prospects of the issue or issuer, including relevant industry conditions and trends and implications of rating agency actions and offering prices. Based on this evaluation, unrealized losses on bonds available-for-sale where an allowance for credit loss was not recorded were concentrated in the Company's available-for-sale fixed maturity securities within the transportation sector.

The rollforward of the allowance for credit losses for available-for-sale fixed maturity securities is shown below for the three months ended March 31, 2023. There were no accumulated credit losses on January 1, 2022 and no credit losses incurred during the three months ended March 31, 2022.

FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	U.S. State and Political Subdivisions	Corporate Debt Securities	Collateralized Debt Securities	Total
Balance at January 1, 2023	$ (1)	$ (23)	$ (5)	**$ (29)**
Credit losses recognized on securities for which credit losses were not previously recorded	—	(1)	(5)	**(6)**
Reductions for securities sold during the period	1	12	2	**15**
Allowance on securities that had an allowance recorded in a previous period	—	(1)	(1)	**(2)**
Balance at March 31, 2023	**$ —**	**$ (13)**	**$ (9)**	**$ (22)**

No accrued interest receivables were written off as of March 31, 2023.

NOTE 4. EQUITY SECURITIES

The components of the change in net gains (losses) on equity securities recognized in net investment related gains (losses) on the statements of operations are shown below:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	2023	2022
Unrealized gains (losses) on equity securities	**$ (89)**	$ (50)
Net gains (losses) on equity securities	**$ (89)**	**$ (50)**

Equity securities by market sector distribution are shown below, based on fair value:

US$ MILLIONS	March 31, 2023	December 31, 2022
Consumer goods	**6.0 %**	5.0 %
Energy and utilities	**3.0 %**	3.0 %
Finance	**70.0 %**	66.0 %
Healthcare	**2.0 %**	5.0 %
Industrials	**1.0 %**	2.0 %
Information technology	**18.0 %**	14.0 %
Other	**— %**	5.0 %
Total	**100.0 %**	100.0 %

NOTE 5. MORTGAGE LOANS ON REAL ESTATE

Generally, commercial mortgage loans are secured by first liens on income-producing real estate. Non-accrual balances are those more than 90 days past due. The age analysis of loans by property type is shown below:

AS AT MAR. 31, 2023 US$ MILLIONS	Current	Non-accrual	Total	Percentage
Apartment	$ 915	$ —	$ 915	15 %
Hotel	1,105	—	1,105	18 %
Industrial	1,059	—	1,059	18 %
Office	1,088	27	1,115	19 %
Parking	418	—	418	7 %
Retail	869	—	869	14 %
Storage	120	—	120	2 %
Other	414	—	414	7 %
Total	$ 5,988	$ 27	$ 6,015	100 %
Allowance for credit losses			(52)	
Total, net of allowance			$ 5,963	

AS AT DEC. 31, 2022 US$ MILLIONS	Current	Non-accrual	Total	Percentage
Apartment	$ 907	$ —	$ 907	15 %
Hotel	1,114	—	1,114	19 %
Industrial	1,050	—	1,050	18 %
Office	1,160	27	1,187	20 %
Parking	420	—	420	7 %
Retail	874	—	874	15 %
Storage	120	—	120	2 %
Other	257	—	257	4 %
Total	$ 5,902	$ 27	$ 5,929	100 %
Allowance for credit losses			(41)	
Total, net of allowance			$ 5,888	

Allowance for Credit Losses

The rollforward of the allowance for credit losses for mortgage loans is shown below:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Balance at January 1	**$ (41)**	$ (1)
Net changes in loan loss allowance	**(11)**	(2)
Balance at March 31	**$ (52)**	$ (3)

The asset and allowance balances for credit losses for mortgage loans by property-type are shown below:

US$ MILLIONS	March 31, 2023 Asset Balance	March 31, 2023 Allowance	December 31, 2022 Asset Balance	December 31, 2022 Allowance
Apartment	**$ 915**	**$ (4)**	$ 907	$ (1)
Hotel	**1,105**	**(8)**	1,114	(6)
Industrial	**1,059**	**(4)**	1,050	(4)
Office	**1,115**	**(23)**	1,187	(17)
Parking	**418**	**(5)**	420	(6)
Retail	**869**	**(4)**	874	(4)
Storage	**120**	**—**	120	(2)
Other	**414**	**(4)**	257	(1)
Total	**$ 6,015**	**$ (52)**	$ 5,929	$ (41)

Credit Quality Indicators

Mortgage loans are segregated by property-type and quantitative and qualitative allowance factors are applied. Qualitative factors are developed quarterly based on the pooling of assets with similar risk characteristics and historical loss experience adjusted for the expected trend in the current market environment. Credit losses are pooled by property type as it represents the most similar and reliable risk characteristics in our portfolio. The amortized cost of mortgage loans by year of origination by property-type are shown below:

AS AT MAR. 31, 2023 US$ MILLIONS	Amortized Cost Basis by Origination Year 2023	2022	2021	2020	2019	Prior	Total
Apartment	$ —	$ 359	$ 178	83	$ 126	$ 169	**$ 915**
Hotel	35	216	135	39	77	603	**1,105**

Total	**$ 178**	**$ 1,463**	**$ 707**	**$ 429**	**$ 452**	**$ 2,786**	**$ 6,015**
Allowance for credit losses							**(52)**
Total, net of allowance							**$ 5,963**

Generally, mortgage loans are secured by first liens on income-producing real estate with a loan-to-value ratio of up to 75%. It is the Company's policy to not accrue interest on loans that are 90 days delinquent and where amounts are determined to be uncollectible. At March 31, 2023, two commercial loans were past due over 90 days or in non-accrual status.

NOTE 6. REAL ESTATE AND REAL ESTATE PARTNERSHIPS

The carrying amount of investment real estate, net of accumulated depreciation, and real estate partnerships by property-type are as follows:

AS AT US$ MILLIONS, EXCEPT FOR PERCENTAGES	**March 31, 2023** Amount	**March 31, 2023** Percentage	December 31, 2022 Amount	December 31, 2022 Percentage
Hotel	**$ 87**	**8 %**	$ 77	7 %
Industrial	**162**	**15 %**	168	16 %
Land	**49**	**4 %**	48	5 %
Office	**289**	**26 %**	243	23 %
Retail	**211**	**19 %**	212	21 %
Apartments	**249**	**22 %**	254	25 %
Other	**60**	**6 %**	34	3 %
Total	**$ 1,107**	**100 %**	$ 1,036	100 %

The Company regularly invests in real estate partnerships and frequently participates in the design with the sponsor, but in most cases, its involvement is limited to financing. Some of these partnerships have been determined to be variable interest entities ("VIEs"). In certain instances, in addition to an economic interest in the entity, the Company holds the power to direct the most significant activities of the entity and is deemed the primary beneficiary. The assets of the consolidated VIEs are restricted and must first be used to settle their liabilities. Creditors or beneficial interest holders of these VIEs have no recourse to the general credit of the Company, as the Company's obligation is limited to the amount of its committed investment. The Company has not provided financial or other support to the VIEs in the form of liquidity arrangements, guarantees, or other commitments to third-parties that may affect the fair value or risk of its variable interest in the VIEs in March 31, 2023 or December 31, 2022.

The assets and liabilities relating to the VIEs included in the condensed consolidated financial statements are as follows:

US$ MILLIONS	**March 31, 2023**	December 31, 2022
Real estate and real estate partnerships	**$ 139**	$ 124
Available-for-sale fixed maturity securities	**478**	346
Equity securities, at fair value	**1**	84
Investment funds	**1,264**	1,175
Mortgage loan	**65**	44
Private loans	**560**	390
Cash and cash equivalents	**45**	153
Other assets	**93**	77
Total assets of consolidated VIEs	**$ 2,645**	$ 2,393
Notes payable	**184**	151
Other liabilities	**1,193**	2,230
Total liabilities of consolidated VIEs	**$ 1,377**	$ 2,381

The notes payable in the statements of financial position pertain to the borrowings of the consolidated VIEs. The liability of the Company relating to notes payable of the consolidated VIEs is limited to the amount of its direct or indirect investment in the respective ventures, which totaled $10 million and $11 million at March 31, 2023 and December 31, 2022, respectively.

For other unconsolidated real estate partnership VIEs, the Company is not the primary beneficiary as major decisions impacting the economic activities of the VIE require consent from both partners. The Company accounts for its interests in such VIEs using the equity method when it has significant influence over the operating and financing policies of these investees. The carrying amount and maximum exposure to loss relating to these unconsolidated VIEs follows:

	March 31, 2023		December 31, 2022	
US$ MILLIONS	**Carrying Amount**	**Maximum Exposure to Loss**	Carrying Amount	Maximum Exposure to Loss
Real estate and real estate partnerships	**$ 307**	**$ 307**	$ 317	$ 317
Mortgage loans on real estate	**590**	**590**	601	601
Accrued investment income	**2**	**2**	2	2
Total	**$ 899**	**$ 899**	$ 920	$ 920

The Company's total investment in investment funds, real estate partnerships, and other partnerships of which substantially all are limited liability companies ("LLCs") or limited partnerships as at March 31, 2023 and December 31, 2022, was $1.8 billion and $1.7 billion, respectively.

NOTE 7. DERIVATIVE INSTRUMENTS

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, options, cross currency swaps, interest rate swaps and warrants. The Company purchases equity-indexed options as economic hedges against fluctuations in the equity markets to which equity-indexed products are exposed. These options are not designated as hedging instruments for accounting purposes under GAAP. Equity-indexed contracts include a fixed host universal-life insurance or annuity contract and an equity- indexed embedded derivative. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments. The Company does not invest in derivatives for speculative purposes. Please reference Note 2(k) for further information on derivative investments.

Foreign exchange forwards, options, cross currency swaps, interest rate swaps and warrants are over-the-counter (OTC) contractual agreements negotiated between counterparties. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default.

Derivatives, except for embedded derivatives, are included in Other invested Assets or Other Liabilities, at fair value. Embedded derivative assets and liabilities on Modco arrangements and embedded derivative liabilities on indexed annuity and variable annuity products are included on the statements of financial position within the Reinsurance Funds Withheld, and Policyholders' Account Balances lines respectively, at fair value.

The detail of derivative instruments is shown below:

US$ MILLIONS **Derivatives not designated as hedging instruments**	**Primary underlying risk**	**Location in the Consolidated Statements of Financial Position**	**March 31, 2023** **Notional Amount**	**March 31, 2023 Gross Fair Value** **Assets**	**March 31, 2023 Gross Fair Value** **Liabilities**	December 31, 2022 Notional Amount	December 31, 2022 Gross Fair Value Assets	December 31, 2022 Gross Fair Value Liabilities

Embedded derivatives in:			
Modco arrangement	Net investment results from funds withheld	**(37)**	18
Indexed annuity and variable annuity product	Interest sensitive contract benefits	**4**	3

The Company's use of derivative instruments exposes it to credit risk in the event of non-performance by counterparties. The Company has a policy of only dealing with counterparties it believes are creditworthy and obtaining sufficient collateral where appropriate, as a means of mitigating the financial loss from defaults. The Company holds collateral in cash and notes secured by U.S. government-backed assets. The non-performance risk is the net counterparty exposure based on fair value of open contracts less fair value of collateral held. The Company maintains master netting agreements with its current active trading partners. A right of offset has been applied to collateral that supports credit risk and has been recorded in the condensed consolidated statements of financial position as an offset to "Other invested assets" with an associated payable to "Other liabilities" for excess collateral.

Information regarding the Company's exposure to credit loss on the derivatives it holds is presented below:

AS AT MAR. 31, 2023
US$ MILLIONS

Derivative Type	Derivative Fair Value	Collateral Held in Cash	Collateral Held in Invested Assets	Total Collateral Held	Collateral Amounts Used to Offset Exposure	Excess Collateral	Exposure Net of Collateral
Equity-indexed options	$ 222	$ 135	$ 21	$ 156	$ 156	$ —	$ 66

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. The Company has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities
Level 2	Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect The Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation

Valuation Techniques for Financial Instruments Recorded at Fair Value

Available-for-sale Fixed Maturity Securities and Equity Options — The Company utilizes pricing services to estimate fair value measurements. The fair value for available-for-sale fixed maturity securities that are disclosed as Level 1 measurements are based on unadjusted quoted market prices for identical assets that are readily available in an active market. The estimates of fair value for most available-for-sale fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for available-for-sale fixed maturity securities that have quoted prices in active markets. Since available-for-sale fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received from the pricing service. The pricing service utilized by The Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

The Company holds a small amount of private placement debt and available-for-sale fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from an independent pricing source (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate the price is indicative only, the Company includes these fair value estimates in Level 3.

For securities priced using a quote from an independent pricing source, such as the equity-indexed options and certain available-for-sale fixed maturity securities, The Company uses a market-based fair value analysis to validate the reasonableness of prices received. Price variances above a certain threshold are analyzed further to determine if any pricing issue exists. This analysis is performed quarterly.

Equity Securities — For publicly-traded equity securities, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements. For certain preferred stock, current market quotes in active markets are unavailable. In these instances, an estimated fair value is received from the pricing service. The service utilizes similar methodologies to price preferred stocks as it does for available-for-sale fixed maturity securities. If applicable, these estimates would be disclosed as Level 2 measurements. The Company tests the accuracy of the information provided by reference to other services annually.

Short-term Investments — Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

Separate Account Assets and Liabilities — Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of The Company. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. The Company reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from The Company's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, The Company's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the condensed consolidated statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of The Company.

The separate account assets included on the quantitative disclosures fair value hierarchy table are comprised of short-term investments, equity securities, and available-for-sale fixed maturity. Equity securities are classified as Level 1 measurements. Short-term investments and available-for-sale fixed maturity securities are classified as Level 2 measurements. These classifications for separate account assets reflect the same fair value level methodologies as listed above as they are derived from the same vendors and follow the same process.

The separate account assets also include cash and cash equivalents, investment funds, accrued investment income, and receivables for securities. These are not included in the quantitative disclosures of fair value hierarchy table.

No gains or losses were recognized on assets transferred to separate accounts for the three months ended March 31, 2023 and 2022, respectively.

Reinsurance Funds Withheld — Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

Market Risk Benefits are classified as Level 3 fair value measurements as the fair value is based on unobservable inputs. The key assumptions for calculating the fair value of the MRBs are market assumptions such as equity market returns, interest rate levels, market volatility and correlations and policyholder behavior assumptions such as lapse, mortality, utilization and withdrawal patterns. Risk margins are included in the policyholder behavior assumptions. The assumptions are based on a combination of historical data and actuarial judgment. The MRBs are valued using stochastic models that incorporate a spread reflecting our nonperformance risk.

Derivative Assets/Derivative Liabilities

- Foreign currency forward contracts — discounted cash flow model — forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate.
- Interest rate contracts - discounted cash flow model - forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate.

- Warrants – intrinsic value based on the difference between strike prices and the unadjusted quoted prices of underlying equity investments in active markets.

Embedded Derivatives — The amounts reported within policyholder contract deposits include equity linked interest crediting rates based on the S&P 500 within indexed annuities and indexed life. The following unobservable inputs are used for measuring the fair value of the embedded derivatives associated with the policyholder contract liabilities:

- Lapse rate assumptions are determined by company experience. Lapse rates are generally assumed to be lower during a contract's surrender charge period and then higher once the surrender charge period has ended. Decreases to the assumed lapse rates generally increase the fair value of the liability as more policyholders persist to collect the crediting interest pertaining to the indexed product. Increases to the lapse rate assumption decrease the fair value.
- Mortality rate assumptions vary by age and gender based on company and industry experience. Decreases to the assumed mortality rates increase the fair value of the liabilities as more policyholders earn crediting interest. Increases to the assumed mortality rates decrease the fair value as higher decrements reduce the potential for future interest credits.
- Equity volatility assumptions begin with current market volatilities and grow to long-term values. Increases to the assumed volatility will increase the fair value of liabilities, as future projections will produce higher increases in the linked index.

Fair values of indexed life and annuity liabilities are calculated using the discounted cash flow technique. Shown below are the significant unobservable inputs used to calculate the Level 3 fair value of the embedded derivatives within policyholder contract deposits (in millions, except range percentages):

AS AT MAR. 31, 2023 US$ MILLIONS	Fair Value March 31, 2023	 December 31, 2022	Unobservable Input
Embedded derivative			
Indexed Annuities and indexed life	$ 965	$ 907	Lapse Rate
			Mortality Multiplier
			Equity Volatility

Funds withheld liabilities— Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

The fair value hierarchy measurements of the financial instruments are shown below:

US$ MILLIONS	Assets and Liabilities Carried at Fair Value by Hierarchy Level at March 31, 2023

Separate account liabilities	1,013	314	699	—
Total Financial liabilities	**$ 2,092**	**$ 339**	**$ 903**	**$ 850**

There were no transfers between Level 1 and Level 2 fair value hierarchies during the periods presented. The Company's valuation of financial instruments categorized as Level 3 in the fair value hierarchy are based on valuation techniques that use significant inputs that are unobservable or had a decline in market activity that obscured observability. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and discounted cash flow methodology based on spread/yield assumptions.

Equity-Index Options — Certain over the counter equity options are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility and forward price/dividend assumptions. Other primary inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Available-for-sale fixed maturity Securities — These bonds use cost as the best estimate of fair value. They are valued at cost because the value would not change unless there is a fundamental deterioration in the portfolio. There is no observable market valuation price or third-party sources that provide market values for these securities since they are not publicly traded. The common and preferred stock are valued at market transaction, option pricing method, or guideline public company method based on the best available information.

Separately Managed Accounts — The separately managed account manager uses the mid-point of a range from a third-party to price these securities. Discounted cash flows (yield analysis) and market transactions approach are used in the valuation. They use discount rates which is considered an unobservable input.

Fair Value Information About Financial Instruments Not Recorded at Fair Value

Information about fair value estimates for financial instruments not measured at fair value is discussed below:

Mortgage Loans — The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan-by-loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property-type, lien priority, payment type and current status.

Separately Managed Accounts — The amounts reported in separately managed accounts consist primarily of notes and private equity. These investments are private placements and do not have a readily determinable fair value. The carrying value of the separately managed accounts is cost or market value, if available from the separately managed account manager. Market value is provided by the separately managed account manager in subsequent quarters. The Company believes that cost approximates fair value at initial recognition during the quarter of investment.

Policy Loans — The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, as such the carrying value of policy loans approximates fair value.

Corporate and Subsidiary Borrowings — Corporate and Subsidiary Borrowings are carried at outstanding principal balance. The carrying value approximates fair value because the carrying value represents the amount owing and payable to the creditor at the balance sheet date.

Notes Payable — Notes payable are carried at outstanding principal balance. The carrying value of the notes payable approximates fair value because the underlying interest rates approximate market rates at the balance sheet date.

The carrying value and estimated fair value of financial instruments not recorded at fair value on a recurring basis are shown below:

AS AT MAR. 31, 2023 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,963	$ 5,586
Private loans, net of allowance	3	1,199	1,056
Policy loans	3	376	376
Separately managed accounts	3	128	128

Total financial assets		**$ 7,754**	**$ 7,234**
Financial liabilities			
Corporate and Subsidiary Borrowings	3	$ 3,542	$ 3,528
Notes payable	3	184	184
Total financial liabilities		**$ 3,726**	**$ 3,712**

AS AT DEC. 31, 2022 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,888	$ 5,637
Private loans, net of allowance	3	1,144	1,086
Policy loans	2	374	374
Separately managed accounts	3	127	127
Other invested assets, excluding derivatives and separately managed accounts	3	40	40
Total financial assets		**$ 7,573**	**$ 7,264**
Financial liabilities			
Corporate and Subsidiary Borrowings	3	$ 3,652	$ 3,625
Notes payable	3	151	151
Total financial liabilities		**$ 3,803**	**$ 3,776**

For financial instruments measured at fair value on a recurring basis using Level 3 inputs during the period, a reconciliation of the beginning and ending balances is shown below:

FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	Assets Investment Securities	 Derivative Assets
Beginning balance	$ 2,649	$ 1
Net gain included in net investment income	1	(11)
Net change included in interest sensitive contract benefits		
Net fair value change included in other comprehensive income	77	—
Purchases, sales and settlements or maturities		
Purchases	1,256	30
Sales	(311)	—
Settlements or maturities	—	(9)
Premiums less benefits	—	—
Transfers into Level 3	—	—
Transfers out of Level 3	—	—
Ending balance at March 31, 2023	**$ 3,672**	**$ 11**

FOR THE THREE MONTHS ENDED MAR. 31, 2022 US$ MILLIONS	Assets Investment Securities
Beginning balance	$ 107
Net gain included in net investment income	—
Net change included in interest sensitive contract benefits	—
Net fair value change included in other comprehensive income	1
Ending balance at March 31, 2022	**$ 108**

The following summarizes the fair value, valuation techniques and unobservable inputs of the Level 3 fair value measurements:

Type of Asset	Valuation Techniques	Significant Unobservable Inputs
Equity-index Option	Heston and Black-Scholes Valuation models	• Interest rate (risk-free rate assumptions) • Underlying equity quoted index prices
Available-for-sale fixed maturity securities	Corporate debt securities • Discounted cash flows (yield analysis) • Income approach • Price at cost	Corporate debt securities • Contractual cash flows • Duration • Call provisions • Weighted-average life • Risk premium • Coupon rate
	Collateralized debt securities • Broker quotes • Income approach	Collateralized debt securities • Contractual cash flows • Weighted-average coupon and maturity • Collateral type • Loss severity • Geography
Common shares, preferred shares and private equity	• Broker quotes • Income approach • Current Value Method ("CVM") • Guideline public company method[1]	• Security structure • Last Twelve Months ("LTM") Revenue Multiple[3] • Next Calendar Year ("NCY") Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM EBITDA Multiple[2]
Separately managed accounts	Common Stock and Warrants • Guideline public company method uses price multiples from data on comparable public companies. • Option pricing method • CVM	Common Stock and Warrants • NCY Multiple • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2] • Term • Volatility • Discount for lack of marketability ("DLOM")
	Preferred Stock • Guideline public company method uses price multiples from data on comparable public companies. • CVM	Preferred Stock • NCY Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2]
	Fixed Income • Discounted cash flows (yield analysis) • market transactions approach • CVM • Cost	Fixed Income • Discount rate • NCY EBITDA

1. Guideline public company method uses price multiples from data on comparable public companies. Multiples are then adjusted to account for differences between what is being valued and comparable firms.
2. Last Twelve Months (“LTM”) EBITDA Multiple valuation metric shows earnings before interest, taxes, depreciation and amortization adjustments for the past 12-month period.
3. LTM Revenue Multiple valuation metric shows revenue for the past 12-month period.
4. Next Calendar Year (“NCY”) EBITDA Multiple is the forecasted EBITDA expected to be achieved over the next calendar year.
5. NCY Revenue forecast revenue over the next calendar year.

NOTE 10. REINSURANCE

NER SPC and NER Ltd. are the reinsurers of the Company's operation. The reinsurance transactions are majorly structured as Modco arrangements with reinsurance funds withheld.

The following table summarized the Company's reinsurance funds withheld, deposit liability, policyholders' account balances and embedded derivatives by accounting classification related to its reinsurance business.

AS AT MAR. 31, 2023 US$ MILLIONS	Deposit accounting	Interest sensitive investment type	Total
Asset			
Reinsurance funds withheld, net	$ 1,600	$ 4,305	$ 5,905
Embedded derivatives	17	82	99
Liability			
Policyholders' account balance	$ —	$ 6,057	$ 6,057
Embedded derivatives	—	181	181
Deposit liability	1,643	—	1,643

AS AT DEC. 31, 2022 US$ MILLIONS	Deposit accounting	Interest sensitive investment type	Total
Asset			
Reinsurance funds withheld, net	$ 1,603	$ 4,049	$ 5,652
Embedded derivatives	17	137	154
Liability			
Policyholders' account balance	$ —	$ 5,651	$ 5,651
Embedded derivatives	—	181	181
Deposit liability	1,657	—	1,657

The Company reinsures its business through a diversified group of reinsurers. However, the Company remains liable to the extent its reinsurers do not meet their obligations under the reinsurance agreements. The Company monitors trends in arbitration and any litigation outcomes with its reinsurers. Collectability of reinsurance balances are evaluated by monitoring ratings and evaluating the financial strength of its reinsurers.

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Premiums:		
Direct premiums	**$ 1,087**	$ 109
Reinsurance ceded	**(287)**	—

Net claims incurred and benefits paid	**$ 742**	$ 105

NOTE 11. SEPARATE ACCOUNT ASSETS AND LIABILITIES

The following table presents the change of the Company's separate account assets and liabilities:

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	2023
Balance, beginning of period	**$ 1,045**
Additions (deductions)	
Policyholder deposits	**21**
Net investment income	**9**
Net realized capital gains on investments	**52**
Policyholder benefits and withdrawals	**(25)**
Net transfer to or from separate account	**(1)**
Policy charges	**(3)**
Total changes	**53**
Balance, end of period	**$ 1,098**

There were no separate account assets and liabilities for the prior year quarter ended March 31, 2022.

NOTE 12. DEFERRED ACQUISITION COSTS AND VALUE OF BUSINESS ACQUIRED

The following table presents a rollforward of deferred acquisition costs and value of business acquired for the periods indicated:

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	Direct Insurance	Reinsurance	Total
Balance, beginning of period	$ 668	$ 927	**$ 1,595**
Additions	176	79	**255**
Amortization	(132)	(15)	**(147)**
Net change	44	64	**108**
Balance, end of period	**$ 712**	**$ 991**	**$ 1,703**

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2022 US$ MILLIONS	Reinsurance	Total
Balance, beginning of period	$ 710	**$ 710**
Additions	40	**40**
Amortization	(12)	**(12)**
Net change	28	**28**
Balance, end of period	**$ 738**	**$ 738**

On May 25, 2022, American National was acquired by a wholly-owned subsidiary of the Company. The acquisition of American National resulted in a VOBA intangible asset of $522 million and an intangible liability of $884 million. The accumulated amortization expense of VOBA is approximately $141 million. The following table presents a rollforward of VOBA for the periods indicated:

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	VOBA Asset	VOBA Liability
Balance, beginning of period	$ 404	$ 884
Amortization	(37)	(13)
Balance, end of period	**$ 367**	**$ 871**

The following table provides the projected VOBA amortization expenses for a five-year period and thereafter:

Years	VOBA Asset	VOBA Liability
2023	$ 71	$ 53
2024	31	51
2025	28	48
2026	25	46
2027	23	43
Thereafter	226	643
Total amortization expense (credit)	**$ 404**	**$ 884**

NOTE 13. ACQUISITION OF BUSINESS

On May 25, 2022, the Company acquired American National. American National offers a broad portfolio of insurance products, including individual and group life insurance, annuities, health insurance, and property and casualty insurance. Under the terms of the Merger Agreement, the Company acquired 100% of all American National issued and outstanding shares in exchange for $190 per share, which is equivalent to $5.1 billion. The consideration was all cash. The company acquired all assets and assumed all liabilities of American National as of the closing date, and consolidates the business for financial statement purposes. As part of re-assessing the provisional valuations of certain assets, such as intangible assets and goodwill, and certain liabilities, an adjustment was made to reflect the final value of one of our insurance products, with an increase to deferred tax asset and future policy benefits of $5 million and $4 million, respectively, as well as a decrease of $20 million to deferred policy acquisition costs, with a corresponding increase to goodwill for $19 million. The valuation will be finalized in the second quarter of 2023. The updated fair value of assets acquired and liabilities as of March 31, 2023 assumed are as follows:

Total consideration transferred for the acquisition	$ 5,107
Assets acquired	
Cash and cash equivalents	1,021
Investments	22,519
Accrued investment income	101
Reinsurance recoverables	45
Premiums due and other receivables	437
Deferred tax assets	374
Property and equipment	175
Prepaid pension	149
Equity accounted investment	1,402
Deferred acquisition costs and value of business acquired	551
Reinsurance assets	410
Investment properties	541
Other assets	198
Separate account assets	1,123
Total assets acquired	**29,046**
Liabilities assumed	—
Future policy benefits	5,337
Policyholders' account balances	13,880
Policy and contract claims	1,706
Unearned premium reserve	1,073
Other policyholder funds	324
Notes payable	158
Other liabilities	449
Separate account liabilities	1,123
Total liabilities assumed	**24,050**
Less: Non-controlling interest	(10)
Net assets acquired	**4,986**
Goodwill	**$ 121**

NOTE 14. FUTURE POLICY BENEFITS

The reconciliation of the balances described int the table below to the future policy benefits in the statements of financial position is as follows.

AS AT MAR. 31, 2023 AND DEC. 31, 2022 US$ MILLIONS	**2023**	2022
Liability of future policy benefits		
Direct Insurance	**3,418**	3,136
Pension Risk Transfer	**3,045**	2,998
Deferred profit liability		
Direct Insurance	**33**	24
Pension Risk Transfer	**163**	109
Other contracts and VOBA	**1,690**	1,699
Total future policy benefits	**$ 8,349**	$ 7,966

a. Future Policy Benefits

The balances and changes in the liability for future policy benefits are as follows:

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	Direct Insurance	Pension Risk Transfer	Total
Present value of Expected Net Premiums			
Balance at current discount rate, beginning of period	$ 3,773	$ —	**$ 3,773**

Balance, end of period	2,069	**2,069**
Net liability for future policy benefits	2,069	**2,069**
Less: Reinsurance recoverables	(113)	**(113)**
Net liability for future policy benefits, after reinsurance recoverable	**$ 1,956**	**$ 1,956**

As at March 31, 2022, there was no present value of expected net premiums.

AS AT MAR. 31, 2023 US$ MILLIONS	Direct Insurance	Pension Risk Transfer
Weighted-average liability duration of the liability for future policy benefits (years)	13	9

AS AT MAR. 31, 2022 US$ MILLIONS	Direct Insurance	Pension Risk Transfer
Weighted-average liability duration of the liability for future policy benefits (years)	—	10

The amount of undiscounted expected gross premiums and expected future benefit payments follows:

AS AT MAR. 31 US$ MILLIONS	2023	2022
Direct Insurance		
Expected future benefit payments	**$ 14,880**	$ —
Expected future gross premiums	**9,524**	—
Pension Risk Transfer		
Expected future benefit payments	**4,936**	3,177
Expected future gross premiums	**—**	—
Total		
Expected future benefit payments	**19,816**	3,177
Expected future gross premiums	**9,524**	—

The amount of revenue and interest recognized in the statements of operations follows:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	Gross Premiums or Assessments		Interest Expense	
	2023	2022	2023	2022
Direct Insurance	**$ 287**	$ —	**$ 23**	$ —
Pension Risk Transfer	**21**	109	**—**	—

The weighted-average interest rate follows:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	2023	2022
Direct Insurance		
Interest accretion rate	**5 %**	— %
Current discount rate	**5 %**	— %
Pension Risk Transfer		
Interest accretion rate	**4 %**	3 %
Current discount rate	**5 %**	1 %

b. Deferred Profit Liability

For limited-pay products, gross premiums received in excess of net premiums are deferred at initial recognition as deferred profit liability ("DPL"). The assumptions and reflection of experience for DPL will be consistent with those used in the liability for future policy benefits, including the remeasurement methodology. The discount rate used in calculating DPL will be consistent with the locked-in rate used for the liability for future policy benefits.

DPL is amortized in income on a constant basis in relation with benefit payments. For life contingent payout annuities DPL is amortized over expected future benefit payments.

For limited payment traditional life permanent contracts, DPL is amortized over face amount for limited payment traditional life permanent contracts.

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	Direct Insurance	Pension Risk Transfer	Total
Balance, beginning of period, at locked-in discount rate	$ 24	$ 158	**$ 182**

Balance, end of period, at locked-in discount rate	**$ 133**	**$ 133**

NOTE 15. POLICYHOLDERS' ACCOUNT BALANCES

Policyholders' account balances relate to investment-type contracts and universal life-type policies. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase and non-variable group annuity contracts. Policyholder account balances are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest, ranging from 1.0% to 8.0% (some annuities have enhanced first year crediting rates ranging from 1.0% to 7.0%), less expenses, mortality charges, and withdrawals; and (iii) fair value adjustment.

The balances and changes in policyholders' account balances follow.

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023 US$ MILLIONS	Direct Insurance	Reinsurance	Total
Balance, beginning of period	$ 13,949	$ 5,833	**$ 19,782**

Balance, end of period, net of reinsurance	**$ 62**	**$ 62**

The reconciliation of market risk benefits by amounts in an asset position and in a liability position to the market risk benefits amount in the statements of financial position follows.

AS AT MAR. 31, 2023 AND DEC. 31, 2022 US$ MILLIONS	**2023**			2022		
	Asset	**Liability**	**Net**	Asset	Liability	Net
Direct insurance	$ 9	$ 67	$ 58	$ 10	$ 54	$ 44
Reinsurance	—	52	52	—	70	70
Total	**$ 9**	**$ 119**	**$ 110**	**$ 10**	**$ 124**	**$ 114**

NOTE 17. LIABILITY FOR UNPAID CLAIMS AND CLAIM ADJUSTMENT EXPENSES

The liability for unpaid claims and claim adjustment expenses ("claims") for health and property and casualty insurance is included in "Policy and contract claims" in the statements of financial position and is the amount estimated for incurred but not reported ("IBNR") claims and claims that have been reported but not settled. The liability for unpaid claims is estimated based upon American National's historical experience and actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs, less anticipated salvage and subrogation. The effects of the changes are included in the statements of operations in the year in which the changes occur. The time value of money is not taken into account for the purpose of calculating the liability for unpaid claims. There have been no significant changes in methodologies or assumptions used to calculate the liability for unpaid claims and claim adjustment expenses.

Information regarding the liability for unpaid claims is shown below:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	2023
Unpaid claims balance, beginning	$ 1,569
Less: Reinsurance recoverables	306
Net beginning balance	1,263
Incurred related to	
Current	375
Prior years	(11)
Total incurred claims	364
Paid claims related to	
Current	108
Prior years	230
Total paid claims	338
Net balance	1,289
Plus: Reinsurance recoverables	300
Unpaid claims balance, ending	**$ 1,589**

The net and gross reserve calculations have shown favourable development as a result of favourable loss emergence compared to what was implied by the loss development patterns used in the original estimation of losses in prior years. The estimates for ultimate incurred claims attributable to insured events of prior years decreased by approximately $10 million during the first three months of 2023 and decreased $6 million during the same period in 2022. The favorable development in 2023 was a reflection of lower-than-anticipated losses arising from agribusiness, business owners, commercial automotive, and commercial other lines of business.

For short-duration health insurance claims, the total of IBNR plus expected development on reported claims included in the liability for unpaid claims and claim adjustment expenses at March 31, 2023 and December 31, 2022 was $16 million and $16 million respectively.

NOTE 18. CORPORATE AND SUBSIDIARY BORROWINGS

The Company and its subsidiaries have bilateral revolving credit facilities backed by third-party financial institutions. The total available amount on the credit facilities is $500 million. The credit facilities bear interest at the specified SOFR, CDOR, or bankers' acceptance rate plus a spread and have a maturity date of June 2027. As at March 31, 2023, $296 million was drawn on the bilateral credit facilities.

The Company has a $1.0 billion 364-day revolving credit facility for the purpose of temporarily warehousing investments that will ultimately be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings. As at March 31, 2023, the facility had $753 million outstanding.

In April 2022, the Company entered into a $1.0 billion 364-day secured facility. As at March 31, 2023, the facility was fully drawn.

The facilities require the Company to maintain a minimum net worth covenant. As at March 31, 2023, the Company was in compliance with its financial covenants.

The Company also has a revolving credit facility with Brookfield that, as at March 31, 2023, permitted borrowings of up to $400 million. As at March 31, 2023, there were no amounts drawn on the facility.

Subsidiary borrowings of $1.5 billion relate to debt issued at American National. $1.0 billion matures in 2027 and the remaining $500 million matures in 2032.

NOTE 19. INCOME TAXES

For the three months ended March 31, 2023, the effective tax rate on pre-tax income was a recovery of 10.1%. The Company's effective tax rate differed from the statutory tax rate of 17% primarily due to international operations subject to different tax rates.

For the three months ended March 31, 2022, the effective tax rate on pre-tax income was 3.3%. The Company's effective tax rate differed from the statutory tax rate of 16.4% primarily due to international operations subject to different tax rates.

NOTE 20. SHARE CAPITAL

As at March 31, 2023 and December 31, 2022, the Company is authorized to issue:

i. 1,000,000,000 Exchangeable Class A Limited Voting Shares with a par value of $33.63 per share;

ii. 500,000,000 Exchangeable Class A-1 Limited Non-Voting Shares with a par value of $33.63 per share;

iii. 500,000 Class B Limited Voting Shares with a par value of $33.63 per share;

iv. 1,000,000,000 Class C Non-Voting Shares with a par value of $1 per share;

v. 100,000,000 Class A Senior Preferred Shares (issuable in series) with a par value of $25 per share;

vi. 100,000,000 Class B Senior Preferred Shares (issuable in series) with a par value of CAD$25 per share;

vii. 1,000,000,000 Class A Junior Preferred Shares (issuable in series) with a par value of $25 per share;

viii. 1,000,000,000 Class B Junior Preferred Shares (issuable in series) with a par value of CAD$25 per share.

The share capital of the Company as at March 31, 2023 and December 31, 2022 comprises the following:

	March 31, 2023		December 31, 2022	
	Number of shares	Value	Number of shares	Value
Issued				
Class A exchangeable shares	**10,450,952**	**$ 449**	9,594,989	$ 422
Class B shares	**24,000**	**1**	24,000	1
Class C shares	**41,314,891**	**1,477**	40,934,623	1,467
Class A junior preferred shares	**100,460,280**	**2,607**	100,460,280	2,580

At March 31, 2023, there were $95 million of accrued dividends on Class A junior preferred shares (December 31, 2022 – $68 million).

The movement of shares issued and outstanding is as follows:

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2023	Class A junior preferred shares	Class A exchangeable shares	Class B shares	Class C shares
Outstanding, beginning of period	100,460,280	9,594,989	24,000	40,934,623
Issued (Repurchased)				
Issuances	—	1,165,000	—	380,268
Repurchases	—	(309,037)	—	—
Outstanding, end of period	**100,460,280**	**10,450,952**	**24,000**	**41,314,891**

AS AT AND FOR THE THREE MONTHS ENDED MAR. 31, 2022	Class A exchangeable shares	Class B shares	Class C shares
Outstanding, beginning of period	10,877,989	24,000	23,544,548
Issued (Repurchased)			
Issuances	—	—	—
Repurchases	—	—	—
Outstanding, end of period	**10,877,989**	**24,000**	**23,544,548**

On March 3, 2023, the Company issued 915,000 class A exchangeable shares in exchange for 915,000 class A shares of Brookfield.

On March 3, 2023, the Company converted 309,037 class A exchangeable shares for $12 million into 380,268 class C shares.

On March 14, 2023, the Company issued 250,000 class A exchangeable shares in exchange for 250,000 class A shares of Brookfield.

NOTE 21. EARNINGS PER SHARE

The components of basic earnings per share are summarized in the following table:

FOR THE THREE MONTHS ENDED MAR. 31 (MILLIONS), EXCEPT PER SHARE AMOUNTS	**2023**	2022
Net income (loss) for the period	**$ (93)**	$ 156
Dividends on Class A junior preferred shares	**(28)**	—
	(121)	156
Attributable to:		
Class A exchangeable and Class B shareholders	**1**	2

Balance at March 31, 2022	**$ (21)**	**$ (236)**	**$ —**	**$ (7)**	**$ 134**	**$ (130)**

1. To be reclassed to "Investment related gains (losses), net"
2. To be reclassed to "Operating expenses"
3. To be reclassed to "Change in fair value of market risk benefit"
4. To be reclassed to "Claims and policyholder benefits"

NOTE 23. RELATED PARTY TRANSACTIONS

In the normal course of operations, the Company entered into the transactions below with related parties.

a) Brookfield Reinsurance agreements

The Company has an outstanding equity commitment in the amount of $2.0 billion from Brookfield to fund future growth, which the Company may draw on from time to time. As of March 31, 2023, there were no amounts drawn under the equity commitment.

In 2021, the Company entered into a credit agreement with Brookfield (the "Brookfield Credit Agreement") as lender for a three-year revolving credit facility which subsequently increased to $400 million in March 2022. As of March 31, 2023, there were no amounts drawn on the credit facilities under the Brookfield Credit Agreement.

The following table reflects the related party agreements and transactions for the three months ended March 31 in the statements of operations:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Credit agreement fees with Brookfield	**$ —**	$ —
Support agreement fees with Brookfield	**—**	—
Rights agreement fees to Brookfield	**—**	—
Administration fees with Brookfield	**1.7**	0.3
Investment management fees to Brookfield Asset Management	**14.6**	3.9
Brookfield licensing agreement fees	**—**	—
Outsourcing fees paid to Brookfield	**0.7**	0.2
Outsourcing arrangements payable	**0.3**	0.1

b) Other related party transactions

On March 10, 2020, BAC entered into lease and building service arrangements with Brookfield Properties (Canada) Inc. and BPO Ontario Properties Ltd. (collectively, "BPO"), subsidiaries of Brookfield. The amount paid to BPO for the leased office facilities and building maintenance for the three months ended March 31, 2023 totaled $0.2 million (March 31, 2022 – $0.1 million). As at March 31, 2023, lease liabilities relating to this arrangement were $1 million (March 31, 2022 – $2 million).

During the period, subsidiaries of the Company purchased investments of $0.6 billion from Brookfield and its subsidiaries. Investment transactions with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

The Company had $714 million of cash on deposit with wholly-owned subsidiaries of Brookfield as at March 31, 2023 (March 31, 2022 – $10 million).

NOTE 24. SEGMENT REPORTING

The Company's operations are organized into three operating segments: Reinsurance, Direct Insurance and PRT. These segments are regularly reviewed by the Company's chief operating decision maker ("CODM") for the purpose of allocating resources to the segment and to assess its performance.

The key measure used by the CODM in assessing performance and in making resource allocation decisions is Distributable Operating Earnings ("Distributable Operating Earnings", or "DOE").

Distributable Operating Earnings is calculated as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of our share of adjusted earnings from our investments in certain associates. DOE allows the CODM to evaluate the Company's segments on the basis of return on invested capital generated by its operations and allows the Company to evaluate the performance of its segments.

The tables below provide each segment's results in the format that the CODM reviews its reporting segments to make decisions and assess performance.

FOR THE THREE MONTHS ENDED MAR. 31, 2023 (MILLIONS)	Direct Insurance	Reinsurance	Pension Risk Transfer	**Total**
Net premiums and other policy related revenues	$ 722	$ —	$ 175	**$ 897**

Net investments gains and losses, including funds withheld			**98**
Unrealized mark to market within insurance contracts			**56**
Equity accounted (income) loss			**3**
Other corporate activities, net			**2**
Net income			**$ 156**

Our Reinsurance business is focused primarily on the reinsurance of annuity-based products and transacts with direct insurers and other reinsurers. All existing reinsurance contracts are with U.S. based insurance companies. Total premium revenues recorded within our Reinsurance segment for the three months ended March 31, 2023 were from transactions with two United States ceding companies.

Total premium revenues recorded within our PRT segment for the three months ended March 31, 2023, and 2022 were from Canadian and U.S. counterparties.

Total premium revenues recorded within our Direct Insurance segment for the three months ended March 31, 2023 were from transactions with U.S. retail customers. There were no activities in the Direct Insurance segment as the business was acquired in May 2022.

For the purpose of monitoring segment performance and allocating resources between segments, the CODM monitors the assets, including investments accounted for using the equity method, liabilities and common equity attributable to each segment.

AS AT MAR. 31, 2023 (MILLIONS)	Reinsurance	Pension Risk Transfer	Direct Insurance	Other[1]	**Total**
Assets	$ 9,591	$ 3,640	$ 30,656	$ 1,064	**$ 44,951**
Liabilities	7,990	3,396	26,660	2,470	**40,516**
Equity and other	1,601	244	3,996	(1,406)	**4,435**

AS AT DEC. 31, 2022 US$ MILLIONS	Reinsurance	Pension Risk Transfer	Direct Insurance	Other[1]	**Total**
Assets	$ 9,314	$ 3,410	$ 29,583	$ 1,143	**$ 43,450**
Liabilities	7,644	3,173	25,796	2,545	**39,158**
Equity and other	1,670	237	3,787	(1,402)	**4,292**

1. Other represents assets, liabilities and common equity attributable to other activities that do not constitute a segment.

NOTE 25. FINANCIAL COMMITMENTS AND CONTINGENCIES

Commitments

As at March 31, 2023, subsidiaries of the Company had investment commitment agreements with third parties to the maximum of approximately $8.2 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at March 31, 2023, the total unfunded commitment amounts were $5.2 billion.

The Company's subsidiary had aggregate commitments at March 31, 2023 to purchase, expand or improve real estate, to fund fixed interest rate mortgage loans, and to purchase other invested assets of $1.8 billion of which $1.1 billion is expected to be funded in 2023, with the remainder funded in 2024 and beyond.

In addition, the Company's subsidiary had revolving commitments of $113 million expected to be funded during 2023 and 2024, and outstanding letters of credit in the amount of $4 million as of March 31, 2023.

Federal Home Loan Bank (FHLB) Agreements

The Company has access to the FHLB's financial services including advances that provide an attractive funding source for short-term borrowing and for access to other funding agreements. As of March 31, 2023, certain municipal bonds and collateralized mortgage obligations with a fair value of approximately $12 million and commercial mortgage loans of approximately $1.1 billion were on deposit with the FHLB as collateral for borrowing. As of March 31, 2023, the collateral provided borrowing capacity of approximately $680 million. The deposited securities and commercial mortgage loans are included in the Company's statements of financial position within available-for-sale fixed maturity securities and mortgage loans on real estate, net of allowance, respectively.

Guarantees

American National has guaranteed bank loans for customers of a third-party marketing operation. The bank loans are used to fund premium payments on life insurance policies issued by American National. The loans are secured by the cash values of the life insurance policies. If the customer were to default on a bank loan, American National would be obligated to pay off the loan. As the cash values of the life insurance policies always equal or exceed the balance of the loans, management does not foresee any loss on these guarantees. The total amount of the guarantees outstanding as of March 31, 2023, was approximately $121 million, while the total cash value of the related life insurance policies was approximately $144 million.

Litigation

American National and certain subsidiaries are defendants in various lawsuits concerning alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain lawsuits include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing these matters with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on the Company's statements of financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our condensed consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote. Accruals for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, an accrual is recorded based on the lowest amount of the range

NOTE 26. SUBSEQUENT EVENTS

Subsequent to quarter end, the Company repaid $500 million of its 364-day secured facility on maturity with the remaining $500 million extended for an additional 364 days, now maturing in April 2024.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

This management's discussion and analysis ("MD&A"), covers the financial position as of March 31, 2023 and December 31, 2022 and the results of operations for the three months ended March 31, 2023, and 2022. Unless the context requires otherwise, when used in this MD&A, the terms "we", "us", "our", or the "company" means Brookfield Reinsurance Ltd. together with all of its subsidiaries and the term "Brookfield" means Brookfield Corporation, its subsidiaries and controlled companies and any investment fund sponsored, managed or controlled by Brookfield Corporation or its subsidiaries, and does not, for greater certainty, include us or Oaktree Capital Group, LLC and Atlas OCM Holdings, LLC and its subsidiaries.

In addition to historical information, this MD&A contains forward-looking statements. Readers are cautioned that these forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. See "Forward-Looking Information".

The information in this MD&A should be read in conjunction with the Unaudited Condensed Consolidated Financial Statements ("the financial statements") as of March 31, 2023 and December 31, 2022 and for the three months ended March 31, 2023, and 2022. Interim operating results for the three months ended March 31, 2023 are not necessarily indicative of the results expected for the entire year.

Overview of Our Business

Our company is an exempted company limited by shares incorporated under the laws of Bermuda on December 10, 2020. The company holds a direct 100% ownership interest in BAM Re Holdings Ltd. ("BAM Re Holdings"), which holds the company's interest in its operating subsidiaries North End Re Ltd. ("NER Ltd."), North End Re (Cayman) SPC ("NER SPC"), Brookfield Annuity Company ("BAC") and American National Group, LLC. ("American National").

Our company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, our company offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. Our business is presently conducted through our subsidiaries under three operating segments, which we refer to as our Direct Insurance, Reinsurance, and our Pension Risk Transfer ("PRT") businesses. The principal operating entities of the company generally maintain their own independent management and infrastructure. Refer to the "Lines of Business" section of the MD&A for further details on our operating segments' business.

Conversion and Adoption of Accounting Standards

Effective January 1, 2023, the Company transitioned from International Financial Reporting Standards ("IFRS") to US generally accepted accounting principles ("GAAP"). The accompanying MD&A, including all periods presented, have been presented and analyzed under GAAP. On January 1, 2023, we adopted Accounting Standards Update 2018-12 ("ASU 2018-12") , requiring targeted improvements to the accounting for long-duration contracts ("LDTI"). As such, results for 2022 have been recast and are also presented under the new guidance. As a result of the transition from IFRS to GAAP, including the impact of the adoption of LDTI, the Company recorded a $255 million increase, net of tax, to opening equity reported under IFRS as of January 1, 2023, mainly from the recognition of an allowance for credit losses and the retrospective impact of LDTI.

The significant differences between IFRS and GAAP as they relate to these financial statements are as follows:

a) *Investment impairment*

Under IFRS, prior to the adoption of GAAP, at each reporting date, financial assets were assessed for impairment indicators. The Company considered an impairment loss if it deemed it unlikely that it would be able to recover all amounts due according to the contractual terms of the obligation.

Under GAAP, ASU 2016-13, Measurement of Credit Losses on Financial Instruments uses a current expected credit loss ("CECL") model to measure impairment on certain types of financial instruments. It requires an entity to estimate lifetime expected credit losses, under the new CECL model, based on relevant information about historical events, current conditions, and reasonable and supportable forecasts. The guidance also modifies the impairment model for available-for-sale fixed maturity securities. This difference in the timing of the impairment recognition is the primary driver for differences between accounting standards. As a result of the transition to GAAP, the Company recorded a $71 million decrease, net of tax, to retained earnings as of December 31, 2022 reported under IFRS related to mortgage loans and private loans.

b) Insurance contract liabilities

Under GAAP, to the extent that an insurance or reinsurance contract does not, despite its form, provide for indemnification of the ceding entity or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained shall be accounted for as a deposit. At inception, a deposit asset or liability shall be recognized for insurance and reinsurance contracts accounted for under deposit accounting.

For long duration insurance contracts, ASU 2018-12, LDTI, issued in August 2018, changes the measurement and disclosures of insurance liabilities and deferred acquisition cost for long-duration contracts issued by insurers. The amendments are effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years.

Initial adoption for the liability for future policy benefits and deferred acquisition cost ("DAC") is required to be reported using either a full retrospective or modified retrospective approach. Market risk benefits ("MRB") are contracts or contract features that both provide protection to the contract holder from other-than-nominal capital market risk and expose the Company to other-than-nominal capital market risk. For MRB, full retrospective application is required. The Company has elected to apply a modified retrospective transition method for the liability for future policy benefits and DAC.

The Company recorded a $94 million increase, net of tax, to retained earnings as of January 1, 2023, as well as a favorable impact to AOCI of approximately $462 million, after tax resulting from the remeasurement of future policy benefits and reinsurance recoverable using discount rates applicable under the LDTI requirements per GAAP.

c) Investment classification

The Company's investment in financial assets includes debt securities, equity securities and loans and receivables. Under IFRS, these assets were classified into one of the following categories:

- Available for sale ("AFS") assets are measured at fair value, with changes in fair value recognized in other comprehensive income (loss);
- Fair value through profit or loss ("FVTPL") assets are measured at fair value, with changes in fair value recognized in net income (loss); and
- Loans and receivables are measured at amortized cost. Financial assets supporting future policy benefits within our pension risk transfer (PRT) business are classified as loans and receivables or designated as FVTPL. Financial assets supporting modified coinsurance reserves within reinsurance treaties are designated as FVTPL.

Under GAAP, all equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) are measured at fair value through net income. The Company's fixed maturity securities are designated as available-for-sale. Available-for-sale fixed maturity securities are reported at fair value and unrealized capital gains (losses) on these securities are recorded directly in accumulated other comprehensive income ("AOCI"). In connection with funds withheld reinsurance treaties, the Company has elected the fair value option (FVO) for certain of its fixed maturities to better match the measurement of those assets and related embedded derivative in the Consolidated Statements of Operations. As a result of the transition from IFRS to GAAP, the Company recorded a $138 million decrease, net of tax, to retained earnings reported under IFRS as of January 1, 2023 and a corresponding increase for the same amount, net of tax, to AOCI related to the reclassification of its equity and debt securities under GAAP.

Controls and Procedures

The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. During the first quarter of 2023, the Company implemented and modified certain internal controls over financial reporting relating to the adoption and ongoing operation of ASU 2018-12

Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. There was no change in the Company's internal control over financial reporting during the quarter ended March 31, 2023, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting besides those related to LDTI. .

The following financial data is derived from our financial statements that are prepared in accordance with GAAP. Non-GAAP measures used in this MD&A are reconciled to or calculated from such values. All dollar references, unless otherwise stated, are in U.S. Dollars.

Key Financial Data

The following present key financial data of the company:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Total assets	**$ 44,951**	$ 11,648
Net income (loss)	**(93)**	156
Adjusted equity[1]	**4,752**	1,576
Distributable Operating Earnings[1,2]	**145**	13

1. Distributable operating earnings and adjusted equity are Non-GAAP measures. See "Reconciliation of Non-GAAP Measures".
2. Distributable operating earnings for the three months ended 2023 is inclusive of $4 million relating to activities outside of our three operating segments (2022 - $8 million)

Operating Results and Financial Review

CONSOLIDATED RESULTS OF OPERATIONS

The following table summarizes the financial results of our business for the three months ended March 31, 2023 and 2022:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Net premiums	**$ 800**	$ 109
Other policy revenue	**97**	—
Net investment income	**400**	56

Income tax recovery (expense)	**11**	(5)
Net income (loss) for the period	**$ (93)**	$ 156

Three Months Ended March 31, 2023 vs. 2022

For the three months ended March 31, 2023, we reported a net loss of $93 million, compared to net income of $156 million in the prior year quarter due to unrealized mark-to-market losses on investments and embedded derivatives.

Net premiums were $800 million for the quarter, compared to $109 million in the prior year quarter, mainly as a result of $625 million in contributions from direct insurance premiums within American National, which we acquired in May 2022. The acquisition also contributed $97 million of other policy revenue in the quarter. During the quarter, the company closed 18 PRT deals, representing approximately $175 million of premiums, compared to 7 deals in the prior year quarter with $109 million of premiums.

Net investment income was $400 million in the quarter, compared to $56 million in the prior year quarter, driven by the growth in our investment portfolio and capital redeployed within recently closed transactions.

Investment related gains (losses), net was a loss of $106 million in the quarter, compared to a gain of $28 million in the prior year quarter, mainly due to unrealized mark-to-market movements on our embedded derivatives related to reinsurance contracts, as well as some of our equity securities that have since partially recovered their value subsequent to the quarter-end.

Net investment income, including funds withheld, was $12 million in the quarter, compared to $85 million in the prior year quarter. During the quarter, we received interest income of $344 million, compared to $26 million in the prior year quarter, more than offset by the unrealized losses on financial instruments within our reinsurance funds withheld.

Claims and policyholder benefits were $742 million in the quarter, compared to $105 million in the prior year quarter, which corresponds to the increase in our premium revenues as a result of contributions from American National. The increase is also partly due to additional flow reinsurance transactions closed, as well as higher annuitants in-pay in our PRT business since the prior year.

Interest sensitive contract benefits represent interest credited to policyholders' account balances from our investment contracts with customers, as well as amortization of deferred revenue. Commissions for acquiring and servicing policies represent any sales commission payments or incremental costs of obtaining the contract that are amortized over the contract term subsequent to the initial capitalization. During the quarter, interest sensitive contract benefits and commissions for acquiring and servicing policies increased by $223 million and $180 million, respectively. Both balances increased in the quarter as a result of the acquisition of American National.

Change in fair value of market risk benefit represents the mark-to-market movements of our liability based on protection to the policyholder from capital market risk. The loss of $6 million in the period is primarily due to change in interest rate used in the valuation of these liabilities.

Operating expenses were $176 million in the current quarter compared to $17 million in the prior year quarter, mainly as a result of the acquisition of American National, as well as additional personnel, professional services and transaction expenses related to the growth of our business.

The increase of $55 million of interest expense on borrowings in the current quarter primarily relates to our subsidiary borrowings, representing $1.5 billion of acquisition financing issued at American National, as well as corporate borrowings used to temporarily warehouse investments that will be moved into our insurance companies' investment portfolios over time.

During the quarter, DOE increased by $132 million to $145 million. The increase was driven by contributions from American National, as well as higher net investment income within our PRT and Reinsurance businesses as we made progress redeploying the investments within the portfolios.

CONSOLIDATED FINANCIAL POSITION

Comparison as at March 31, 2023 and December 31, 2022

The following table summarizes the financial position as at March 31, 2023 and December 31, 2022:

AS AT MAR. 31, 2023 AND DEC. 31, 2022 US$ MILLIONS, EXCEPT SHARE DATA	2023	2022

Non-controlling interests	**9**	8
Total equity	**1,828**	1,712
Total liabilities and equity	**$ 44,951**	$ 43,450

March 31, 2023 vs. December 31, 2022

Total assets increased by $1.5 billion during the quarter to $45.0 billion.

Cash and cash equivalent increased by $209 million during the quarter. For further information, refer to Liquidity and Capital Resources and our Consolidated Statements of Cash Flows.

Total investments increased by $780 million over the quarter, primarily as a result of the partial recovery in the market value of our debt securities, as well as the deployment of new premiums received during the quarter.

Deferred acquisition costs, which are capitalized costs that are directly related to writing new policyholder contracts. During the quarter, the balance increased by $108 million mainly as a result of new insurance contracts entered with policyholders, partially offset by amortization.

Reinsurance funds withheld increased by $198 million over the quarter, primarily as a result of net reinsurance settlements, partially offset by mark to market adjustments on the total return swap due to the impact of decreasing interest rates over the period on our shorter duration asset portfolio.

Deferred tax assets decreased by $37 million during the quarter, primarily as a result of unrealized mark-to-market gains on our debt securities.

Reinsurance recoverables are estimated amounts due to the Company from reinsurers related to paid and unpaid ceded claims and expenses, and are presented net of reserves for collectability. The amount increased by $20 million in the current quarter primarily as a result of balances collected over the quarter.

Other assets primarily include intangible assets, goodwill, and prepaid pension receivables from related parties. The balance increased by $120 million during the quarter, mainly due to higher prepaid reinsurance premiums.

Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of the Company, and both increased by $53 million in the quarter mainly due to changes in the valuation during the quarter.

Future policy benefits and policyholder account balances increased by $1.0 billion during the quarter mainly due to new contracts written across our operations, partially offset by settlements in the quarter.

Corporate and subsidiary borrowings decreased by $110 million during the period, primarily as a result of repayments of our warehouse and credit facility borrowings. Due to related parties was $247 million as at quarter-end and relates to short-term loans from Brookfield in connection with the reinsurance transactions closed in 2021.

In the prior year, we issued junior preferred shares to Brookfield which are redeemable by the Company at any time at the issuance price plus accumulated and unpaid dividends. Additionally, holders of the junior preferred shares have the right to redeem the shares at an amount equal to the issuance price plus accumulated and unpaid dividends. As a result of the redemption right held by the holders, the junior preferred shares are classified as temporary equity, and the corresponding dividends of $28 million in the quarter have be reflected in our retained earnings as dividends paid.

Lines of Business

Direct Insurance

Following closing of the American National acquisition in May 2022, American National became the platform for our third primary operating line: direct origination of life, annuity and property and casualty insurance policies, which we refer to as direct insurance.

American National, founded in 1905 and headquartered in Galveston, Texas, offers a broad spectrum of products and services through its subsidiaries, which include life insurance, annuities, property and casualty insurance, health insurance, credit insurance, and pension products. The American National companies operate in all 50 states, the District of Columbia and Puerto Rico.

Life Insurance

Whole Life. Whole life products provide a guaranteed benefit upon the death of the insured in return for the periodic payment of a fixed premium over a predetermined period. Premium payments may be required for the entire life of the contract, to a specified age or a fixed number of years, and may be level or change in accordance with a predetermined schedule. Whole life insurance includes some policies that provide a participation feature in the form of dividends. Policyholders may receive dividends in cash or apply them to increase death benefits or cash values available upon surrender, or reduce the premiums required to maintain the contract in-force.

Universal Life. Universal life insurance products provide coverage through a contract that gives the policyholder flexibility in premium payments and coverage amounts. Universal life products may allow the policyholder, within certain limits, to increase or decrease the amount of death benefit coverage over the term of the contract and to adjust the frequency and amount of premium payments. Universal life products are interest rate sensitive, and we determine the interest crediting rates during the contract period, subject to policy specific minimums. An equity-indexed universal life product is credited with interest using a return that is based, in part, on changes in an index, such as the Standard & Poor's 500 Index ("S&P 500"), subject to a specified minimum.

Variable Universal Life. Variable universal life products provide insurance coverage on a similar basis as universal life, except that the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the securities selected by the policyholder held in the separate account.

Credit Life Insurance. Credit life insurance products are sold in connection with a loan or other credit account. Credit life insurance products are designed to pay to the lender the borrower's remaining debt on a loan or credit account if the borrower dies during the coverage period.

Annuities

Deferred Annuities. A deferred annuity is an asset accumulation product. Deposits are received as a single premium deferred annuity or in a series of payments for a flexible premium deferred annuity. Deposits are credited with interest at our determined rates subject to policy minimums. For certain limited periods of time, usually from one to ten years, interest rates are guaranteed not to change. Deferred annuities usually have surrender charges that begin at issue and reduce over time and may have market value adjustments that can increase or decrease any surrender value. An equity-indexed deferred annuity is credited with interest using a return that is based, in part, on changes in an index, such as the S&P 500, subject to a specified minimum.

Single Premium Immediate Annuity ("SPIA"). A SPIA is purchased with one premium payment, providing periodic (usually monthly or annual) payments to the annuitant for a specified period, such as for the remainder of the annuitant's life. Return of the original deposit may or may not be guaranteed, depending on the terms of the annuity contract.

Variable Annuities. With a variable annuity, the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the separate account investment options selected by the policyholder. Our variable annuity products have no guaranteed minimum withdrawal benefits.

Property and Casualty

Personal Lines. Personal lines include insurance policies sold to individuals for auto, homeowners, and other similar exposures. Auto insurance covers specific risks involved in owning and operating an automobile. Homeowner insurance provides coverage that protects the insured owner's property against loss from perils. Other personal insurance provides coverage for property such as boats, motorcycles and recreational vehicles, and umbrella protection coverage.

Commercial Lines. Commercial lines are primarily focused on providing insurance to agricultural related operations and small to midsize businesses. This includes property and casualty coverage tailored for a farm, ranch, or other agricultural-related businesses. Commercial auto insurance is typically issued in conjunction with the sale of our policies covering farms, ranches, and businesses and covers specific risks involved in owning and operating motor vehicles. Business owners' property and liability insurance, workers' compensation insurance, and other commercial insurance encompassing umbrella protection coverage and other liability coverages, are also offered.

Specialty Markets. Specialty Markets products include renters, mortgage security, aviation, private flood, and credit insurance. Credit insurance provides protection to borrowers and the creditors that extend credit to them against unpaid indebtedness as a result of death, disability, involuntary unemployment, or untimely loss to the collateral securing a personal or mortgage loan.

- *Collateral* or *Creditor Protection Insurance* ("CPI"). CPI provides insurance against loss, expense to recover, or damage to personal property pledged as collateral (typically automobiles and homes) resulting from fire, burglary, collision, or other loss occurrence that would either impair a creditor's interest or adversely affect the value of the collateral. The coverage is purchased from us by the lender according to the terms of the credit obligation and charged to the borrower by the lender when the borrower fails to provide the required insurance.
- *Guaranteed Auto Protection* or *Guaranteed Asset Protection* ("GAP"). GAP insures the excess outstanding indebtedness over the primary property insurance benefits that may occur when there is a total loss to or an unrecovered theft of the collateral. GAP can be written on a variety of assets that are used as collateral to secure credit; however, it is most commonly written on automobiles.

As of March 31, 2023, American National and its subsidiaries had $19.7 billion (December 31, 2022 - $19.1 billion) of future policy benefits and policyholder account balances.

Reinsurance

Within our Reinsurance business, we are focused primarily on the reinsurance of annuity-based products, and will primarily seek to transact with direct insurers and other reinsurers.

Annuities are insurance contracts that provide a defined income stream, typically for retirement planning. Policyholders deposit money with an insurance company in return for a fixed stream of cash flows either immediately or in the future. Reinsurance is an arrangement whereby an insurance company, the reinsurer, agrees to indemnify another insurance company, referred to as the ceding company or cedant, for all or a portion of the insurance risks that are underwritten by the ceding company. Reinsurance serves multiple purposes, including to (1) transfer insurance risk off of a ceding company's balance sheet, enabling it to more efficiently manage balance sheet capacity to increase the volume of business it can underwrite (2) stabilize a ceding company's operating results, (3) assist the cedant in achieving applicable regulatory requirements, and (4) optimize the overall financial strength and capital structure of the cedant.

Reinsurance may be structured as a block transaction, pursuant to which a reinsurer contractually assumes assets and liabilities associated with an in-force book of business, or as a flow arrangement, pursuant to which a reinsurer contractually agrees to assume assets and liabilities for future business.

We primarily seek to reinsure three types of annuity products: fixed annuities, fixed index annuities and payout annuities.

Fixed Annuities

A fixed annuity ("FA") is a type of insurance contract that provides a fixed rate of investment return (often referred to as a crediting rate) for a specified period of time. Fixed rate reset annuities have a crediting rate that is typically guaranteed for a period of one year, after which insurers are able to change the crediting rate at their discretion, generally to any rate at or above a previously guaranteed minimum rate.

Insurers earn income on FA contracts by generating a net investment spread, which is based on the difference between income earned on the investments supporting the liabilities and the crediting rate owed to customers.

Fixed Index Annuities

A fixed index annuity ("FIA") is an insurance contract in which the policyholder makes one or more premium deposits that earn interest at a crediting rate based on a specified market index. Policyholders are entitled to recurring or lump sum payments for a specified period of time. FIAs provide policyholders with the ability to earn interest without significant downside risk to their principal balance. A market index tracks the performance of a specific group of stocks or other assets representing a particular segment of the market, or in some cases, an entire market. A policyholder's crediting rate in relation to a market index is based on the change in the relevant market index, subject to a pre-defined cap (a maximum rate that may be credited), spread (a credited rate determined by reducing a specific rate from the index return) and/or a participation rate (a credited rate equal to a percentage of the index return).

Insurers earn income on FIA contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

Payout Annuities

A payout annuity is an income-generating insurance product. In exchange for a lump-sum premium, the policyholder receives a series of guaranteed income payments for one lifetime, two lifetimes, or a specified period of time.

Insurers earn income on payout annuity contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

We operate our Reinsurance business through licensed operating companies, North End Re (Cayman) SPC ("NER SPC") and North End Re Ltd ("NER Ltd."). As of the date of this MD&A, our subsidiaries have reinsurance and retrocession agreements with two third parties to reinsure a block of U.S. annuities and fixed indexed annuities. As of March 31, 2023, NER SPC had $6.2 billion of policyholder's account balances and NER Ltd. had $1.6 billion of deposit liabilities related to their reinsurance treaties (December 31, 2022 – $5.9 billion and $1.7 billion, respectively).

Pension Risk Transfer

PRT is the transfer by a corporate sponsor of the risks (or some of the risks) associated with the sponsorship and administration of a pension plan, in particular, investment risk and longevity risk, which is the risk of an increase in life expectancy of plan beneficiaries. These risks can be transferred either to an insurer like us through a group annuity transaction, or to an individual through a lump-sum settlement payment. PRT using insurance typically involves a single premium group annuity contract that is issued by an insurer, permitting the corporate pension plan sponsor to discharge certain pension plan liabilities from its balance sheet.

A PRT insurance transaction may be structured as either a buy-out annuity or a buy-in annuity. Under a buy-out annuity, a direct insurer enters into a group annuity contract with the plan sponsor and assumes the liability to fund, administer, and pay benefits covered under the contract directly to the individual pension plan members covered under the contract. Under a buy-in annuity, the insurer enters into a group annuity contract with the plan sponsor and is liable to fund and pay the benefits covered under the contract to the pension plan fund, with the plan sponsor retaining the liability to administer and pay pension benefits to plan members. In both cases, the insurer assumes the investment and longevity risk.

Insurers earn income on buy-out and buy-in group annuities by generating a net investment spread, which is based on the difference between income earned on the investments supporting the annuity contract and the cost of the pension liabilities assumed.

Today, our PRT business is operated in Canada and the United States. Our Canadian PRT business is operated through Brookfield Annuity Company ("BAC"), a Canadian domiciled, licensed and regulated direct life insurance company that provides PRT solutions to organizations across Canada. Under American National, we also operate a U.S. PRT business, which became licensed during 2022 and successfully completed its first PRT transaction in December 2022. Our North American PRT businesses are led by a team of experts in group annuities, pensions, insurance and investments.

As of March 31, 2023, we had $3.2 billion (December 31, 2022 – $3.1 billion) of future policy benefits related to PRT.

SEGMENT REVIEW

The Company's operations are organized into three operating segments: Direct Insurance, Reinsurance and PRT.

We measure operating performance primarily using DOE which measures our ability to acquire net insurance assets at a positive margin, and invest these assets at a return that is greater than the cost of policyholder liabilities.

Direct Insurance

The following table presents Distributable Operating Earnings of our Direct Insurance segment for the three months ended March 31, 2023 and 2022:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
DOE	**$ 110**	$ —

Comparison of the three months ended March 31, 2023 and 2022

DOE within our Direct Insurance business represents contribution from our direct origination annuity, life, P&C and health businesses operated by American National, which was acquired in the second quarter of 2022. We benefited from strong contributions from our life and annuities business and the continued repositioning of investments into higher yielding investments. DOE related to our Direct Insurance business also includes financing costs associated with subsidiary borrowings and corporate overhead directly related to the segment.

Reinsurance

The following table presents Distributable Operating Earnings of our Reinsurance segment for the three months ended March 31, 2023 and 2022:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
DOE	**$ 20**	$ 4

Comparison of the three months ended March 31, 2023 and 2022

DOE within our Reinsurance business increased to $20 million in the quarter. During the quarter, we recorded flow premiums on our AEL reinsurance treaty of approximately $330 million, bringing total premiums reinsured under the treaty to over $6 billion of premiums to-date. DOE also benefited from rising interest rates over the last twelve months and the redeployment of assets into higher yielding investments in the period.

Pension Risk Transfer

The following table presents Distributable Operating Earnings of our PRT segment for the three months ended March 31, 2023 and 2022:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
DOE	**$ 11**	$ 1

Comparison of the three months ended March 31, 2023 and 2022

During the quarter, the Company closed 18 PRT deals (2022 – 7), representing $175 million (2022 – $109 million) of premiums. The increase in DOE from the prior year was a result of more business closed over the last twelve months, as well as higher investment income due to redeployment of assets into higher yielding investments.

Liquidity and Capital Resources

CAPITAL RESOURCES

We attempt to maintain sufficient financial liquidity at all times so that we are able to participate in attractive opportunities as they arise, better withstand sudden adverse changes in economic circumstances within our operating subsidiaries and maintain payments to policyholders, as well as maintain distributions to our shareholders. Our principal sources of liquidity are cash flows from our operations, and access to the Company's third-party credit facility, and our credit facility and equity commitment with Brookfield. We proactively manage our liquidity position to meet liquidity needs and continue to develop relationships with lenders who provide borrowing capacity at competitive rates, while looking to minimize adverse impacts on investment returns. We look to structure the ownership of our assets to enhance our ability to monetize them to provide additional liquidity, if needed. Our corporate liquidity for the periods noted below consisted of the following:

AS AT MAR. 31, 2023 AND DEC. 31, 2022 US$ MILLIONS		**2023**		2022
Cash and cash equivalents	**$**	**711**	$	784
Liquid financial assets		**279**		241
Undrawn credit facilities		**604**		544
Total Corporate liquidity[1]	**$**	**1,594**	$	1,569

1. See "Performance Measures used by Management".

As of the date of this MD&A, our liquidity is sufficient to meet our present requirements for the foreseeable future. In June 2021, Brookfield provided to the Company an equity commitment in the amount of $2.0 billion to fund future growth, which the Company may draw on from time to time. The equity commitment may be called by the Company in exchange for the issuance of class C shares or junior preferred shares. In addition, in connection with the Spin-off we entered into a credit agreement with Brookfield as the lender, providing for a three year revolving $400 million credit facility in addition to our $500 million revolving credit facility with external banks. We use the liquidity provided by our credit facilities for working capital purposes, and we may use the proceeds from the capital commitment to fund growth capital investments and acquisitions. The determination of which of these sources of funding the Company will access in any particular situation will be a matter of optimizing needs and opportunities at that time. As of the date of this MD&A, there were no amounts drawn on the Brookfield facility.

Today, we have significant liquidity within our insurance portfolios, giving us flexibility to invest in a rising rate environment and secure attractive investment opportunities. In addition to a portfolio of highly liquid financial assets, our operating companies have additional access to the liquidity from sources such as the Federal Home Loan Bank ("FHLB") within our direct insurance business and short-term repurchase agreements within our pension risk transfer business to manage market exposure between the timing of transaction agreements being entered into and the receipt of assets. As at March 31, 2023, the Company had drawn $17 million of a total $1.1 billion of commitments available relating to these programs.

Liquidity within our operating subsidiaries may be restricted from time to time due to regulatory constraints. As at March 31, 2023, the company's cash and cash equivalents included $711 million of unrestricted cash resources that can be deployed to fund corporate activities as needed.

AS AT MAR. 31, 2023 AND DEC. 31, 2022 US$ MILLIONS		**2023**		2022
Cash and cash equivalents	**$**	**2,354**	$	2,145
Liquid financial assets		**15,696**		17,769
Undrawn credit facilities		**1,685**		1,659
Total liquidity[1]	**$**	**19,735**	$	21,573

1. See "Performance Measures used by Management".

Comparison of the three months ended March 31, 2023 and 2022

The following table presents a summary of our cash flows and ending cash balances for the three months ended March 31, 2023 and 2022:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Operating activities	**$ 198**	$ 77
Investing activities	**(74)**	(269)
Financing activities	**86**	122
Cash and cash equivalents		
Cash and cash equivalents, beginning of the period	**2,145**	393
Net change during the period	**210**	(70)
Foreign exchange on cash balances held in foreign currencies	**(1)**	—
Cash and cash equivalents, end of the period	**$ 2,354**	$ 323

Operating Activities

For the three months ended March 31, 2023, we generated $198 million of cash from operating activities compared to $77 million during 2022.

Investing Activities

For the three months ended March 31, 2023, we reinvested liquid short term and fixed maturity investments that matured during the period and we deployed $2 billion into new higher-yielding investments within our insurance operating subsidiaries' portfolios. These investments were primarily funded by new premiums and the sales and maturities of liquid securities. The purchase and sales, net of maturities, resulted in net deployment of $74 million of cash from investing activities, compared to $269 million during the same period in 2022.

Financing Activities

For the three months ended March 31, 2023, we generated $86 million of cash from financing activities compared to $122 million generated in 2022, inclusive of $338 million in additional borrowings to fund temporary corporate investments, the majority of which will be transferred into our insurance entities in the near term, and offset by repayments on our warehouse and revolving credit facilities.

Financial Instruments

To the extent that we believe it is economic to do so, our strategy is to hedge a portion of our equity investments and/or cash flows exposed to foreign currencies by the company. The following key principles form the basis of our foreign currency hedging strategy:

- We leverage any natural hedges that may exist within our operations;
- We utilize local currency debt financing to the extent possible; and
- We may utilize derivative contracts to the extent that natural hedges are insufficient.

As at March 31, 2023, our common equity was $1.8 billion and our adjusted equity was $4.8 billion. Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income.

Included in equity and adjusted equity was approximately $244 million invested in Canadian dollars. All cumulative translation adjustments recorded for the three months ended March 31, 2023 and 2022 were related to foreign exchange movements on the Canadian dollar relative to the U.S. dollar.

As at March 31, 2023, we had a notional $2.2 billion (December 31, 2022 – $2.6 billion) of foreign exchange forward contracts in place to hedge against foreign currency risk.

For additional information, see Note 3, “Financial Instruments” of the financial statements.

Future Capital Obligations and Requirements

Subsidiaries of the Company have investment commitment agreements to the maximum of $8.2 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at March 31, 2023, $3.0 billion was funded (December 31, 2022 – $2.6 billion). The amounts are recognized as loans and receivables, unrated bonds and private equity investments.

For additional information, see Note 25, “Financial Commitments and Contingencies” of the financial statements.

The following is the maturity by year on corporate borrowings, subsidiary borrowings and junior preferred shares:

	Payments due by year				
AS AT MAR. 31 2023 US$ MILLIONS	**Total**	Less than 1 year	1- 3 years	4 - 5 years	More than 5 years
Corporate borrowings	**2,049**	1,753	—	296	—
Subsidiary borrowings	**1,493**	—	—	1,000	493
Preferred shares	**2,607**	—	—	—	2,607

Capital management

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the Company’s growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying with the regulatory capital requirements.

The Company takes an integrated approach to risk management that involves the Company’s risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board of Directors. The operating capital levels are determined by the Company’s risk appetite and Own Risk and Solvency Assessment (“ORSA”). Furthermore, stress techniques that include the Financial Conditions Testing (“FCT”) are used to evaluate the Company’s capital adequacy under sustained adverse scenarios.

BAC is subject to Life Insurance Capital Adequacy Test (“LICAT”) as determined by OSFI. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits.

NER SPC and American National are required to follow Risk Based Capital (“RBC”) requirements based on guidelines of the National Association of Insurance Commissioners (“NAIC”). RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant.

NER Ltd. is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin and the enhanced capital requirement as determined by the Bermuda Monetary Authority (“BMA”). The Enhanced Capital Requirement (“ECR”) is calculated based on the Bermuda Solvency Capital Requirement model, a risk-based model that takes into account the risk characteristics of different aspects of the company's business.

The Company has determined that it is in compliance with all capital requirements as at March 31, 2023 and December 31, 2022.

Brookfield Operating Results

An investment in the class A exchangeable shares of the company is intended to be, as nearly as practicable, functionally and economically, equivalent to an investment in Brookfield. A summary of Brookfield's three months ended March 31, 2023 operating results is provided below:

FOR THE THREE MONTHS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Revenues	**$ 23,297**	$ 21,882
Net income	**424**	2,960

Each class A exchangeable share has been structured with the intention of providing an economic return equivalent to one Brookfield Class A Share. We therefore expect that the market price of the class A exchangeable shares should be impacted by the market price of Brookfield Class A Shares and the business performance of Brookfield as a whole. In addition to carefully considering the disclosure made in this MD&A, you should carefully consider the disclosure made by Brookfield in its continuous disclosure filings. Copies of the Brookfield's continuous disclosure filings are available electronically on EDGAR on the SEC's website at www.sec.gov or on SEDAR at www.sedar.com.

Industry Trends and Factors Affecting Our Performance

As a financial services business providing capital based solutions to the insurance industry, we are affected by numerous factors, including global economic and financial market conditions. Price fluctuations within equity, credit, commodity and foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the performance of our business. We also monitor factors such as consumer spending, business investment, the volatility of capital markets, interest rates, unemployment and the risk of inflation or deflation, which affect the business and economic environment and, in turn, impact the demand for the type of financial and insurance products offered by our business. We believe the following current trends present significant opportunities for us to grow our business.

- **Financial market volatility and dislocations across asset classes favor insurers with diverse investment portfolios and access to alternative credit.** Insurers primarily invest in public market fixed income products and are exposed to public market valuations. Insurers with an ability to diversify investment portfolios to include alternative and private credit assets provides more favorable investment performance.
- **Many insurers are looking for ways to shift toward less asset-intensive insurance products.** Given the capital-intensive nature of life and annuity liabilities, many insurance companies with diversified exposure are looking to reduce their exposure to life and annuity products, including through reinsurance, in order to free up capital that they can deploy in support of less asset-intensive products and business lines.
- **Recent market conditions are exposing under-capitalized companies.** Some writers of annuity products are facing higher hedging costs amidst volatile markets, and changes in regulatory standards are increasing the transparency of liability valuations in the current low-rate environment. This has necessitated a need to raise or otherwise free up capital, and the reinsurance market offers writers of annuity products an opportunity to do so. We have access to capital and are able to provide capital support to these companies.
- **Public market valuations have compressed while capital needs have grown.** Insurers are trading at cyclical lows, and given the prevailing market environment, are looking to partner with organizations like ours that can provide solutions to address capital needs.

Market Risk

Our statements of financial position within our financial statements include substantial amounts of assets and liabilities whose fair values are subject to market risks. Our significant market risks are primarily associated with interest rates, foreign currency exchange rates and credit risk. The fair values of our investment portfolios remain subject to considerable volatility. The following sections address the significant market risks associated with our business activities.

Foreign Exchange Rate Risk

The company's obligations under its insurance contracts are denominated in Canadian and United States dollars but a portion of the assets supporting these liabilities are denominated in non-Canadian and non-United States dollars. We manage foreign exchange risk using foreign exchange forwards. Our investment policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

Our net assets are subject to financial statement translation into U.S. Dollars. All of our financial statement translation-related impact from changes in foreign currency rates is recorded in other comprehensive income.

Interest Rate Risk

Interest rates currently increased in many jurisdictions in which we operate in 2022 but remain at relatively low levels by historical standards. The company's asset liability management practices and interest rate risk management allows the company to mitigate the impact of interest rate volatility on the business. However, sudden or unexpected changes in interest rates may cause certain market dislocations that could negatively impact our financial performance. Interest rate increases would also increase the amount of cash required to service our obligations and our earnings could be adversely impacted as a result thereof.

The company manages interest rate risk through their asset liability management, which we refer to as ALM, the framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance reserves. Within the context of the ALM framework, we use derivatives including interest rate swaps and futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

Other Price Risk

Other price risk is the risk of variability in fair value due to movements in equity prices or other market prices such as commodity prices and credit spreads.

The Company's exposure to the equity markets is managed by sector and individual security and is intended to track the S&P 500 with minor variations. The Company mitigates the equity risk by diversification of the investment portfolio.

The Company also has equity risk associated with the equity-indexed life and annuity products the Company issues. The Company has entered into derivative transactions, primarily over-the-counter equity call options, to hedge the exposure to equity-index changes.

Credit Risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The company is primarily exposed to credit risk through its investments in debt securities.

We manage exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in our investment policy.

Insurance Risk

The company makes assumptions and estimates when assessing reinsurance and insurance risks, and significant deviations, particularly with regards to longevity and policyholder behavior, could adversely affect our business, financial condition, results of operations, liquidity and cash flows. All transaction terms are likely to be determined by qualitative and quantitative factors, including our estimates. If we reinsure a block of business, there can be no assurance that the transaction will achieve the results expected at the time of the block's acquisition. These transactions expose us to the risk that actual results materially differ from those estimates.

We manage insurance risk through choosing whether to purchase reinsurance for certain amounts of risk underwritten within our pension risk transfer business, and we may also look to further reinsure certain amounts of risk we assume under our reinsurance agreements.

Legal Risk

In the future we may be parties in actions that routinely arise out of the normal course of business, including legal actions seeking to establish liability directly through insurance contracts or indirectly through reinsurance contracts issued by our subsidiaries. Plaintiffs occasionally seek punitive or exemplary damages. We do not believe that such normal and routine litigation will have a material effect on our financial condition or results of operations. We are also involved from time to time in other kinds of legal actions, some of which assert or may assert claims or seek to impose fines and penalties. We believe that any liability that may arise as a result of other pending legal actions will not have a material effect on our financial statements.

Operational Risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The company's internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

We have significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board of Directors.

Disaster recovery and business continuity plans have also been established to manage the company's ability to operate under adverse conditions.

Critical Accounting Policy and Estimates

The preparation of the financial statements requires management to make critical judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses that are not readily apparent from other sources, during the reporting period. These estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years. Refer to the Notes to the Financial Statements.

Performance Measures Used by Management

To measure performance, we focus on net income and total assets, as well as certain non-GAAP measures, including Distributable Operating Earnings and Adjusted Equity. In addition, we provide certain metrics such as Total Corporate Liquidity and Total Liquidity which we believe are useful to investors to provide additional insights into assets within the business available for redeployment. Refer to the "Segment Review" section of this MD&A for further discussion on our performance measures as at March 31, 2023, and for the three months ended March 31, 2023 and 2022.

Non-GAAP Measures

We regularly monitor certain Non-GAAP measures that are used to evaluate our performance and analyze underlying business performance and trends. We use these measures to establish budgets and operational goals, manage our business and evaluate our performance. We also believe that these measures help investors compare our operating performance with our results in prior years. These Non-GAAP financial measures are provided as supplemental information to the financial measures presented in this MD&A that are calculated and presented in accordance with GAAP. These Non-GAAP measures are not comparable to GAAP and may not be comparable to similarly described Non-GAAP measures reported by other companies, including those within our industry. Consequently, our Non-GAAP measures should not be evaluated in isolation, but rather, should be considered together with the most directly comparable GAAP measure in our consolidated financial statements for the years presented. The Non-GAAP financial measures we present in this MD&A should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP.

Distributable Operating Earnings

We use Distributable Operating Earnings to assess operating results and the performance of our businesses. We define distributable operating earnings as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of returns on equity invested in certain variable interest entities and our share of adjusted earnings from our investments in certain associates. Distributable operating earnings is a measure of operating performance. We use distributable operating earnings to assess our operating results.

Distributable operating earnings is a measure of operating performance. We use distributable operating earnings to assess our operating results. Distributable Operating Earnings is a measure of operating performance that is not calculated in accordance with, and does not have any standardized meaning prescribed by GAAP as issued by the Financial Accounting Standards Board. Distributable Operating Earnings is therefore unlikely to be comparable to similar measures presented by other issuers.

We believe our presentation of Distributable Operating Earnings is useful to investors because it supplements investors' understanding of our operating performance by providing information regarding our ongoing performance that excludes items we believe do not directly affect our core operations. Our presentation of Distributable Operating Earnings also provide investors enhanced comparability of our ongoing performance across years.

Adjusted Equity

Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. We use Adjusted Equity to assess our return on our equity.

The followings contain further details regarding our use of our Non-GAAP measures, as well as a reconciliation of net income and total equity to these measures:

Reconciliation of Non-GAAP Measures

The following table reconciles our net income to Distributable Operating Earnings:

FOR THE PERIODS ENDED MAR. 31 US$ MILLIONS	**2023**	2022
Net (loss) income	**$ (93)**	$ 156
Net investment gains and losses, including funds withheld	**145**	(98)
Mark-to-market on insurance contracts and other net assets	**97**	(56)
	149	2
Deferred income tax expense	**(13)**	4
Transaction costs	**4**	4
Equity accounted (income) loss	**—**	3
Depreciation	**5**	—
Distributable Operating Earnings	**$ 145**	$ 13

The following table reconciles our equity to Adjusted Equity:

AS AT MAR. 31 US$ MILLIONS	**2023**	2022
Total equity	**$ 1,828**	$ 1,446
Add:		
Accumulated Other Comprehensive Loss (Income)	**317**	130
Junior preferred shares	**2,607**	—
Adjusted equity	**$ 4,752**	$ 1,576

Forward-Looking Information

In addition to historical information, this MD&A contains "forward-looking information" within the meaning of applicable securities laws. Forward-looking information may relate to the company and Brookfield's outlook and anticipated events or results and may include information regarding the financial position, business strategy, growth strategy, budgets, operations, financial results, taxes, dividends, distributions, plans and objectives of the company. Particularly, information regarding future results, performance, achievements, prospects or opportunities of the company, Brookfield's or the Canadian, U.S. or international markets is forward-looking information. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "targets", "expects" or "does not expect", "is expected", "an opportunity exists", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate" or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might", "will" or "will be taken", "occur" or "be achieved".

The forward-looking statements are based on our beliefs, assumptions and expectations of future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or within our control. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. The following factors, among others, could cause our actual results to vary from our forward-looking statements:

We caution that the factors that may affect future results described in this MD&A are not exhaustive. The forward-looking statements represent our views as of the date of this MD&A and should not be relied upon as representing our views as of any date subsequent to the date of this MD&A. While we anticipate that subsequent events and developments may cause our views to change, we disclaim any obligation to update the forward-looking statements, other than as required by applicable law. For further information on these known and unknown risks, please see "Risk Factors" included in our most recent Annual Report on Form 20-F and other risks and factors that are described therein.

NOTE 1. NATURE OF OPERATIONS

Brookfield Reinsurance Ltd. (“Brookfield Reinsurance” or the “Company”) is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The Company’s class A exchangeable shares are listed on the New York Stock Exchange ("NYSE") and the Toronto Stock Exchange ("TSX") under the symbol “BNRE”.

The Company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, Brookfield Reinsurance offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. The business is presently conducted through our subsidiaries under three operating segments: Direct Insurance, Reinsurance, and Pension Risk Transfer ("PRT").

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited interim condensed consolidated financial statements ("financial statements") and notes thereto, including all prior periods presented, have been prepared under accounting principles generally accepted in the United States of America (“GAAP”). The financial statements are prepared on a going concern basis and have been presented in U.S. dollars (“USD”) rounded to the nearest million unless otherwise indicated. The interim condensed consolidated financial statements should be read in conjunction with the December 31, 2022 audited consolidated financial statements of the Company and accompanying notes included with the Form 6-K filed with the SEC on June 28, 2023. The results of operations for the three and six months ended June 30, 2023 are not necessarily indicative of the results for any subsequent periods or the entire fiscal year ending December 31, 2023. The interim condensed consolidated financial statements are unaudited and reflect all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim periods presented in accordance with GAAP.

Adoption of new accounting standards

For long duration insurance contracts, ASU 2018-12, Targeted Improvements to the Accounting for Long-Duration Contracts (LDTI), issued in August 2018, changes the measurement and disclosures of insurance liabilities and deferred acquisition cost for long-duration contracts issued by insurers. The amendments are effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. The Company adopted LDTI effective January 1, 2023 with a transition date of January 1, 2021. The adoption of LDTI resulted in a decrease of $1 million and $135 million in retained earnings and accumulated other comprehensive income, respectively. Refer to the Company's financial statements for the year ended December 31, 2022 for adoption impact.

On April 1, 2023, the Company adopted ASU 2020-04 Topic 848. The amendments in this guidance provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance only applies to contracts, hedging relationships, and other transactions that reference London Inter-Bank Offered Rate (“LIBOR”) or another reference rate expected to be discontinued because of reference rate reform. The inventory of LIBOR exposures is primarily limited to floating rate bonds, alternative investments, and borrowings within joint venture investments. Certain contracts included in these categories matured prior to December 31, 2021, the start of LIBOR rates cessations. The transition from LIBOR did not have a material impact to the Company's financial statements or notes to the financial statements.

NOTE 3. INVESTMENTS IN AVAILABLE-FOR-SALE FIXED MATURITY SECURITIES

The amortized cost and fair value of available-for-sale fixed maturity securities are shown below:

AS AT JUN. 30, 2023 US$ MILLIONS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Fair Value
U.S. treasury and government	$ 174	$ —	$ (37)	$ —	**$ 137**
U.S. states and political subdivisions	835	—	(24)	—	**811**
Foreign governments	542	2	(19)	—	**525**
Corporate debt securities	13,659	21	(1,017)	(23)	**12,640**
Residential mortgage-backed securities	127	—	(4)	—	**123**
Commercial mortgage-backed securities	465	3	(24)	—	**444**
Collateralized debt securities	1,185	13	(29)	(16)	**1,153**
Total investments in fixed maturity securities	**$ 16,987**	**$ 39**	**$ (1,154)**	**$ (39)**	**$ 15,833**

AS AT DEC. 31, 2022 US$ MILLIONS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Fair Value
U.S. treasury and government	$ 148	$ —	$ (38)	$ —	**$ 110**
U.S. states and political subdivisions	880	—	(25)	—	**855**
Foreign governments	353	1	(36)	—	**318**
Corporate debt securities	14,379	35	(1,135)	(24)	**13,255**
Residential mortgage-backed securities	133	—	(6)	—	**127**
Commercial mortgage-backed securities	422	5	(19)	—	**408**
Collateralized debt securities	1,291	9	(51)	(6)	**1,243**
Total investments in fixed maturity securities	**$ 17,606**	**$ 50**	**$ (1,310)**	**$ (30)**	**$ 16,316**

The amortized cost and fair value, by contractual maturity, of available-for-sale fixed maturity securities are shown below:

AS AT US$ MILLIONS	**June 30, 2023**		December 31, 2022	
	Amortized Cost	**Fair Value**	Amortized Cost	Fair Value
Due in one year or less	**$ 660**	**$ 653**	$ 494	$ 489
Due after one year through five years	**5,179**	**4,990**	5,244	5,072
Due after five years through ten years	**5,112**	**4,736**	5,907	5,436
Due after ten years	**6,036**	**5,454**	5,961	5,319
Total	**$ 16,987**	**$ 15,833**	$ 17,606	$ 16,316

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Residential and commercial mortgage-backed securities, which are not due at a single maturity, have been presented based on the year of final contractual maturity.

Proceeds from sales of available-for-sale fixed maturity securities, with the related gross realized gains and losses, are shown below:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
Proceeds from sales of available-for-sale fixed maturity securities	**$ 1,513**	$ 3,477	**$ 3,530**	$ 3,759
Gross realized gains	**2**	10	**26**	99
Gross realized losses	**(30)**	(63)	**(89)**	(154)

Gains and losses are determined using first-in-first-out of the securities sold. In addition, the Company has pledged bonds in connection with certain agreements and transactions, such as financing and reinsurance agreements. The carrying value of bonds pledged was $126 million and $117 million at June 30, 2023 and December 31, 2022, respectively.

In accordance with various regulations, the Company has securities on deposit with regulating authorities with a carrying value of $30 million and $51 million at June 30, 2023 and December 31, 2022, respectively.

The gross unrealized losses and fair value of available-for-sale fixed maturity securities, aggregated by investment category and length of time individual securities have been in a continuous unrealized loss position due to market factors are shown below:

AS AT JUN. 30, 2023 US$ MILLIONS, EXCEPT NUMBER OF ISSUES	Less than 12 months			12 months or more			Total

Allowance for Credit Losses

Several assumptions and underlying estimates are made in the evaluation of allowance for credit loss. Examples include financial condition, near term and long-term prospects of the issue or issuer, including relevant industry conditions and trends and implications of rating agency actions and offering prices. Based on this evaluation, unrealized losses on bonds available-for-sale where an allowance for credit loss was not recorded were concentrated in the Company's available-for-sale fixed maturity securities within the transportation sector.

The rollforward of the allowance for credit losses for available-for-sale fixed maturity securities is shown below for the three and six months ended June 30, 2023.

FOR THE THREE MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	Corporate Debt Securities	Collateralized Debt Securities	Total
Beginning balance	$ (13)	$ (10)	**$ (23)**
Credit losses recognized on securities for which credit losses were not previously recorded	(17)	(13)	**(30)**
Reductions for securities sold during the period	1	—	**1**
Changes in previously recorded allowance	6	7	**13**
Balance at June 30, 2023	**$ (23)**	**$ (16)**	**$ (39)**

FOR THE SIX MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	Corporate Debt Securities	Collateralized Debt Securities	Total
Beginning balance	$ (24)	$ (6)	**$ (30)**
Credit losses recognized on securities for which credit losses were not previously recorded	(18)	(18)	**(36)**
Reductions for securities sold during the period	14	2	**16**
Changes in previously recorded allowance	5	6	**11**
Balance at June 30, 2023	**$ (23)**	**$ (16)**	**$ (39)**

No accrued interest receivables were written off as of June 30, 2023.

FOR THE SIX MONTHS ENDED JUN. 30, 2022 US$ MILLIONS	Corporate Debt Securities	Residential Mortgage Backed Securities	Collateralized Debt Securities	Total
Beginning balance	$ —	$ —	$ —	**$ —**
Acquisition from business combination	(11)	(1)	(1)	**(13)**
Reductions for securities sold during the period	11	1	1	**13**
Balance at June 30, 2022	**$ —**	**$ —**	**$ —**	**$ —**

There were no accumulated credit losses and no credit losses incurred during the three months ended March 31, 2022.

NOTE 4. EQUITY SECURITIES

The components of the change in net gains (losses) on equity securities recognized in net investment related gains (losses) on the statements of operations are shown below:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
Net gains (losses) on equity securities	**$ 245**	$ 25	**$ 156**	$ (25)

Equity securities by market sector distribution are shown below, based on fair value:

US$ MILLIONS	**June 30, 2023**	December 31, 2022
Consumer goods	**7 %**	**5 %**
Energy and utilities	**14 %**	**3 %**
Finance	**61 %**	**66 %**
Healthcare	**1 %**	**5 %**

Information technology	**13 %**	**14 %**
Other	**3 %**	**5 %**
Total	**100 %**	**100 %**

NOTE 5. MORTGAGE LOANS ON REAL ESTATE

Generally, commercial mortgage loans are secured by first liens on income-producing real estate. Non-accrual balances are those more than 90 days past due. The age analysis of loans by property type is shown below:

AS AT JUN. 30, 2023 US$ MILLIONS	**Current**	**Non-accrual**	**Total**	**Percentage**
Apartment	$ 1,020	$ —	$ 1,020	17 %
Hotel	1,028	—	1,028	17 %
Industrial	1,090	—	1,090	18 %
Office	1,049	27	1,076	18 %
Parking	417	—	417	7 %
Retail	836	25	861	15 %
Storage	128	—	128	2 %
Other	385	—	385	6 %
Total	$ 5,953	$ 52	$ 6,005	100 %
Allowance for credit losses			(47)	
Total, net of allowance			$ 5,958	

AS AT DEC. 31, 2022 US$ MILLIONS	Current	Non-accrual	Total	Percentage
Apartment	$ 907	$ —	$ 907	15 %
Hotel	1,114	—	1,114	19 %
Industrial	1,050	—	1,050	18 %
Office	1,160	27	1,187	20 %
Parking	420	—	420	7 %
Retail	874	—	874	15 %
Storage	120	—	120	2 %
Other	257	—	257	4 %
Total	$ 5,902	$ 27	$ 5,929	100 %
Allowance for credit losses			(41)	
Total, net of allowance			$ 5,888	

Allowance for Credit Losses

The rollforward of the allowance for credit losses for mortgage loans is shown below:

FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	**2023**	2022
Balance at January 1	**$ (41)**	$ (1)
Provision	**(11)**	(2)
Balance at March 31	**(52)**	(3)
Recovery (provision)	**5**	(35)
Balance at June 30	**$ (47)**	$ (38)

The asset and allowance balances for credit losses for mortgage loans by property-type are shown below:

AS AT US$ MILLIONS	**June 30, 2023**		December 31, 2022	
	Asset Balance	**Allowance**	Asset Balance	Allowance
Apartment	**$ 1,020**	**$ (8)**	$ 907	$ (1)
Hotel	**1,028**	**(8)**	1,114	(6)
Industrial	**1,090**	**(9)**	1,050	(4)
Office	**1,076**	**(8)**	1,187	(17)
Parking	**417**	**(3)**	420	(6)
Retail	**861**	**(7)**	874	(4)
Storage	**128**	**(1)**	120	(2)
Other	**385**	**(3)**	257	(1)
Total	**$ 6,005**	**$ (47)**	$ 5,929	$ (41)

Credit Quality Indicators

Mortgage loans are segregated by property-type and quantitative and qualitative allowance factors are applied. Qualitative factors are developed quarterly based on the pooling of assets with similar risk characteristics and historical loss experience adjusted for the expected trend in the current market environment. Credit losses are pooled by property type as it represents the most similar and reliable risk characteristics in our portfolio. The amortized cost of mortgage loans by year of origination by property-type are shown below:

	Amortized Cost Basis by Origination Year						
US$ MILLIONS	2023	2022	2021	2020	2019	Prior	Total
Apartment	$ 1	$ 472	$ 223	83	$ 140	$ 101	**$ 1,020**
Hotel	35	225	99	39	130	500	**1,028**
Industrial	—	310	183	217	130	250	**1,090**
Office	1	119	29	24	46	857	**1,076**
Parking	—	55	29	27	13	293	**417**
Retail	—	264	118	65	35	379	**861**
Storage	8	8	22	36	38	16	**128**
Other	105	139	45	—	28	68	**385**
Total	**$ 150**	**$ 1,592**	**$ 748**	**$ 491**	**$ 560**	**$ 2,464**	**$ 6,005**
Allowance for credit losses							**(47)**
Total, net of allowance							**$ 5,958**

Generally, mortgage loans are secured by first liens on income-producing real estate with a loan-to-value ratio of up to 75%. It is the Company's policy to not accrue interest on loans that are 90 days delinquent and where amounts are determined to be uncollectible. At June 30, 2023, two commercial loans were past due over 90 days or in non-accrual status (December 31, 2022 - one commercial loan).

NOTE 6. PRIVATE LOANS

The following table summarizes the credit ratings for private loans:

AS AT US$ MILLIONS	June 30, 2023	December 31, 2022
A or higher	$ 53	$ 4
BBB	34	17

NOTE 7. REAL ESTATE AND REAL ESTATE PARTNERSHIPS

The carrying amount of investment real estate, net of accumulated depreciation, and real estate partnerships by property-type are as follows:

AS AT US$ MILLIONS, EXCEPT FOR PERCENTAGES	June 30, 2023		December 31, 2022	
	Amount	Percentage	Amount	Percentage
Hotel	$ 85	4 %	$ 77	7 %
Industrial	161	7 %	168	16 %
Land	48	2 %	48	5 %
Office	1,296	58 %	243	23 %
Retail	211	9 %	212	20 %
Apartments	420	19 %	254	25 %
Other	3	1 %	34	4 %
Total	**$ 2,224**	**100 %**	$ 1,036	100 %

The Company regularly invests in real estate partnerships and frequently participates in the design with the sponsor, but in most cases, its involvement is limited to financing. Some of these partnerships have been determined to be variable interest entities ("VIEs"). In certain instances, in addition to an economic interest in the entity, the Company holds the power to direct the most significant activities of the entity and is deemed the primary beneficiary. The assets of the consolidated VIEs are restricted and must first be used to settle their liabilities. Creditors or beneficial interest holders of these VIEs have no recourse to the general credit of the Company, as the Company's obligation is limited to the amount of its committed investment. The Company has not provided financial or other support to the VIEs in the form of liquidity arrangements, guarantees, or other commitments to third-parties that may affect the fair value or risk of its variable interest in the VIEs as at June 30, 2023 or December 31, 2022.

NOTE 8. EQUITY METHOD INVESTMENTS

The Company's total investment in investment funds, real estate partnerships, and other partnerships of which substantially all are limited liability companies ("LLCs") or limited partnerships as at June 30, 2023 and December 31, 2022, was $3.3 billion and $2.8 billion, respectively.

The Company generally recognizes its share of earnings in its equity method investments within net investment income using a three-month lag in instances where the investee's financial information is not sufficiently timely or when the investee's reporting period differs from the Company's reporting period. Aggregate net investment income from these equity method investments exceeded 10% of the Company's consolidated pre-tax income (loss) for the most recent annual period and 20% for the interim period.

Aggregate total assets of these entities totaled $4.1 billion and $2.4 billion as at June 30, 2023 and December 31, 2022, respectively. Aggregate net income (loss) of these entities totaled $94 million and $46 million for the six months ended June 30, 2023 and six months ended June 30, 2022, respectively. Aggregate net income (loss) from the underlying entities in which the Company invests is primarily comprised of investment income, including recurring investment income (loss) and realized and unrealized investment gains (losses).

NOTE 9. DERIVATIVE INSTRUMENTS

The Company manages foreign currency exposure and other market risks associated with certain assets and liabilities by using derivative financial instruments such as foreign exchange forwards, bond futures, options, cross currency swaps, interest rate swaps and warrants. The Company purchases equity-indexed options as economic hedges against fluctuations in the equity markets to which equity-indexed products are exposed. These options are not designated as hedging instruments. Equity-indexed contracts include a fixed host universal-life insurance or annuity contract and an equity-indexed embedded derivative. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments. The Company does not invest in derivatives for speculative purposes.

Foreign exchange forwards, options, cross currency swaps, interest rate swaps and warrants are over-the-counter (OTC) contractual agreements negotiated between counterparties. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default.

Derivatives, except for embedded derivatives, are included in Other Invested Assets or Other Liabilities, at fair value. Embedded derivative assets and liabilities on Modco arrangements and embedded derivative liabilities on indexed annuity and variable annuity products are included on the statements of financial position within the Reinsurance Funds Withheld, and Policyholders' Account Balances lines respectively, at fair value.

The detail of derivative instruments is shown below:

US$ MILLIONS **Derivatives not designated as hedging instruments**	**Primary underlying risk**	**Location in the Consolidated Statements of Financial Position**	**June 30, 2023** **Notional Amount**	**June 30, 2023 Carrying Value / Fair Value** **Assets**	**June 30, 2023 Carrying Value / Fair Value** **Liabilities**	December 31, 2022 Notional Amount	December 31, 2022 Carrying Value / Fair Value Assets	December 31, 2022 Carrying Value / Fair Value Liabilities

The Company's use of derivative instruments exposes it to credit risk in the event of non-performance by counterparties. The Company has a policy of only dealing with counterparties it believes are creditworthy and obtaining sufficient collateral where appropriate, as a means of mitigating the financial loss from defaults. The Company holds collateral in cash and notes secured by U.S. government-backed assets. The non-performance risk is the net counterparty exposure based on fair value of open contracts less fair value of collateral held. The Company maintains master netting agreements with its current active trading partners. A right of offset has been applied to collateral that supports credit risk and has been recorded in the condensed consolidated statements of financial position as an offset to "Other invested assets" with an associated payable to "Other liabilities" for excess collateral.

Information regarding the Company's exposure to credit loss on the derivatives it holds is presented below:

AS AT JUN. 30, 2023 US$ MILLIONS **Derivative Type**	**Derivative Fair Value**	**Collateral Held in Cash[1]**	**Collateral Held in Invested Assets[1]**	**Total Collateral Held**	**Collateral Amounts Used to Offset Exposure**	**Excess Collateral**	**Exposure Net of Collateral**

Total financial liabilities	**$ 5,731**	**$ 5,706**	$ 5,927	$ 5,900

1. Balance includes $30 million and $33 million of assets, and corresponding liabilities, that are not subject to fair value hierarchy as at June 30, 2023 and December 31, 2022, respectively.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. The Company has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities
Level 2	Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect The Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation

Valuation Techniques for Financial Instruments Recorded at Fair Value

Available-for-sale Fixed Maturity Securities and Equity Options — The Company utilizes pricing services to estimate fair value measurements. The fair value for available-for-sale fixed maturity securities that are disclosed as Level 1 measurements are based on unadjusted quoted market prices for identical assets that are readily available in an active market. The estimates of fair value for most available-for-sale fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for available-for-sale fixed maturity securities that have quoted prices in active markets. Since available-for-sale fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received from the pricing service. The pricing service utilized by The Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

The Company holds a small amount of private placement debt and available-for-sale fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from an independent pricing source (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate the price is indicative only, the Company includes these fair value estimates in Level 3.

For securities priced using a quote from an independent pricing source, such as the equity-indexed options and certain available-for-sale fixed maturity securities, The Company uses a market-based fair value analysis to validate the reasonableness of prices received. Price variances above a certain threshold are analyzed further to determine if any pricing issue exists. This analysis is performed quarterly.

Equity Securities — For publicly-traded equity securities, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements. For certain preferred stock, current market quotes in active markets are unavailable. In these instances, an estimated fair value is received from the pricing service. The service utilizes similar methodologies to price preferred stocks as it does for available-for-sale fixed maturity securities. If applicable, these estimates would be disclosed as Level 2 measurements. The Company tests the accuracy of the information provided by reference to other services annually.

Short-term Investments — Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

Separate Account Assets and Liabilities — Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of The Company. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. The Company reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from The Company's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, The Company's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the condensed consolidated statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of The Company.

The separate account assets included on the quantitative disclosures fair value hierarchy table are comprised of short-term investments, equity securities, and available-for-sale fixed maturity. Equity securities are classified as Level 1 measurements. Short-term investments and available-for-sale fixed maturity securities are classified as Level 2 measurements. These classifications for separate account assets reflect the same fair value level methodologies as listed above as they are derived from the same vendors and follow the same process.

The separate account assets also include cash and cash equivalents, investment funds, accrued investment income, and receivables for securities. These are not included in the quantitative disclosures of fair value hierarchy table.

No gains or losses were recognized on assets transferred to separate accounts for the three and six months ended June 30, 2023 and 2022, respectively.

Reinsurance Funds Withheld — Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

Market Risk Benefits are classified as Level 3 fair value measurements as the fair value is based on unobservable inputs. The key assumptions for calculating the fair value of the MRBs are market assumptions such as equity market returns, interest rate levels, market volatility and correlations and policyholder behavior assumptions such as lapse, mortality, utilization and withdrawal patterns. Risk margins are included in the policyholder behavior assumptions. The assumptions are based on a combination of historical data and actuarial judgment. The MRBs are valued using stochastic models that incorporate a spread reflecting our nonperformance risk.

Derivative Assets/Derivative Liabilities

- Foreign currency forward contracts — discounted cash flow model — forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate.
- Interest rate contracts - discounted cash flow model - forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate.

- Warrants – intrinsic value based on the difference between strike prices and the unadjusted quoted prices of underlying equity investments in active markets.
- Equity-index options – inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Embedded Derivatives — The amounts reported within policyholder contract deposits include equity linked interest crediting rates based on the S&P 500 within indexed annuities and indexed life. The following unobservable inputs are used for measuring the fair value of the embedded derivatives associated with the policyholder contract liabilities:

- Lapse rate assumptions are determined by company experience. Lapse rates are generally assumed to be lower during a contract's surrender charge period and then higher once the surrender charge period has ended. Decreases to the assumed lapse rates generally increase the fair value of the liability as more policyholders persist to collect the crediting interest pertaining to the indexed product. Increases to the lapse rate assumption decrease the fair value.
- Mortality rate assumptions vary by age and gender based on company and industry experience. Decreases to the assumed mortality rates increase the fair value of the liabilities as more policyholders earn crediting interest. Increases to the assumed mortality rates decrease the fair value as higher decrements reduce the potential for future interest credits.
- Equity volatility assumptions begin with current market volatilities and grow to long-term values. Increases to the assumed volatility will increase the fair value of liabilities, as future projections will produce higher increases in the linked index.

Fair values of indexed life and annuity liabilities are calculated using the discounted cash flow technique. Shown below are the significant unobservable inputs used to calculate the Level 3 fair value of the embedded derivatives within policyholder contract deposits (in millions, except range percentages):

AS AT US$ MILLIONS	Fair Value June 30, 2023	 December 31, 2022	Unobservable Input
Embedded derivative			
Indexed Annuities and indexed life	$ 808	$ 726	Lapse Rate
			Mortality Multiplier
			Equity Volatility

Funds withheld liabilities — Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

The fair value hierarchy measurements of the financial instruments are shown below:

US$ MILLIONS	Assets and Liabilities Carried at Fair Value by Hierarchy Level at June 30, 2023

There were no transfers between Level 1 and Level 2 fair value hierarchies during the periods presented. The Company's valuation of financial instruments categorized as Level 3 in the fair value hierarchy are based on valuation techniques that use significant inputs that are unobservable or had a decline in market activity that obscured observability. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and discounted cash flow methodology based on spread/yield assumptions.

Equity-Index Options — Certain over the counter equity options are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility and forward price/dividend assumptions. Other primary inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Available-for-sale fixed maturity Securities — These bonds use cost as the best estimate of fair value. They are valued at cost because the value would not change unless there is a fundamental deterioration in the portfolio. There is no observable market valuation price or third-party sources that provide market values for these securities since they are not publicly traded. The common and preferred stock are valued at market transaction, option pricing method, or guideline public company method based on the best available information.

Separately Managed Accounts — The separately managed account manager uses the mid-point of a range from a third-party to price these securities. Discounted cash flows (yield analysis) and market transactions approach are used in the valuation. They use discount rates which is considered an unobservable input.

Fair Value Information About Financial Instruments Not Recorded at Fair Value

Information about fair value estimates for financial instruments not measured at fair value is discussed below:

Mortgage Loans — The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan-by-loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property-type, lien priority, payment type and current status.

Policy Loans — The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, as such the carrying value of policy loans approximates fair value.

Corporate and Subsidiary Borrowings — Corporate and Subsidiary Borrowings are carried at outstanding principal balance. The carrying value approximates fair value because the carrying value represents the amount owing and payable to the creditor at the balance sheet date.

Notes Payable — Notes payable are carried at outstanding principal balance. The carrying value of the notes payable approximates fair value because the underlying interest rates approximate market rates at the balance sheet date.

The carrying value and estimated fair value of financial instruments not recorded at fair value on a recurring basis are shown below:

AS AT JUN. 30, 2023 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,958	$ 5,752
Private loans, net of allowance	3	1,337	1,336
Policy loans	3	381	381
Other invested assets, excluding derivatives and separately managed accounts	3	130	116
Total financial assets		**$ 7,806**	**$ 7,585**
Financial liabilities			
Corporate and subsidiary borrowings	3	$ 3,234	$ 3,209
Notes payable	3	158	158
Total financial liabilities		**$ 3,392**	**$ 3,367**

AS AT DEC. 31, 2022 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,888	$ 5,637

There were no level 3 financial liabilities recorded at fair value on a recurring basis during the six months ended June 30, 2023 and June 30, 2022.

The following summarizes the fair value, valuation techniques and unobservable inputs of the Level 3 fair value measurements:

Type of Asset	Valuation Techniques	Significant Unobservable Inputs
Equity-index Option	Heston and Black-Scholes Valuation models	• Interest rate (risk-free rate assumptions) • Underlying equity quoted index prices
Available-for-sale fixed maturity securities	Corporate debt securities • Discounted cash flows (yield analysis) • Income approach • Price at cost	Corporate debt securities • Contractual cash flows • Duration • Call provisions • Weighted-average life • Risk premium • Coupon rate
	Collateralized debt securities • Broker quotes • Income approach	Collateralized debt securities • Contractual cash flows • Weighted-average coupon and maturity • Collateral type • Loss severity • Geography
Common shares, preferred shares and private equity	• Broker quotes • Income approach • Current Value Method ("CVM") • Guideline public company method[1]	• Security structure • Last Twelve Months ("LTM") Revenue Multiple[3] • Next Calendar Year ("NCY") Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM EBITDA Multiple[2]
Separately managed accounts	Common Stock and Warrants • Guideline public company method uses price multiples from data on comparable public companies. • Option pricing method • CVM	Common Stock and Warrants • NCY Multiple • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2] • Term • Volatility • Discount for lack of marketability ("DLOM")
	Preferred Stock • Guideline public company method uses price multiples from data on comparable public companies. • CVM	Preferred Stock • NCY Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2]
	Fixed Income • Discounted cash flows (yield analysis) • market transactions approach • CVM • Cost	Fixed Income • Discount rate • NCY EBITDA

1. Guideline public company method uses price multiples from data on comparable public companies. Multiples are then adjusted to account for differences between what is being valued and comparable firms.
2. Last Twelve Months ("LTM") EBITDA Multiple valuation metric shows earnings before interest, taxes, depreciation and amortization adjustments for the past 12-month period.
3. LTM Revenue Multiple valuation metric shows revenue for the past 12-month period.
4. Next Calendar Year ("NCY") EBITDA Multiple is the forecasted EBITDA expected to be achieved over the next calendar year.
5. NCY Revenue forecast revenue over the next calendar year.

NOTE 12. REINSURANCE

NER SPC and NER Ltd. are the reinsurers of the Company's operation. The reinsurance transactions are majorly structured as Modco arrangements with reinsurance funds withheld.

The following table summarized the Company's reinsurance funds withheld, deposit liability, policyholders' account balances and embedded derivatives by accounting classification related to its reinsurance business.

AS AT JUN. 30, 2023 US$ MILLIONS	Deposit accounting	Interest sensitive investment type	Total
Asset			
Reinsurance funds withheld, net	$ 1,586	$ 4,828	$ 6,414
Embedded derivatives	16	110	126
Reinsurance funds withheld, total			**6,540**
Liability			
Policyholders' account balance, excluding embedded derivatives	$ —	$ 6,758	6758
Embedded derivatives	—	236	236
Policyholders' account balance, total			**$ 6,994**
Deposit liability	$ 1,632	$ —	$ 1,632

AS AT DEC. 31, 2022 US$ MILLIONS	Deposit accounting	Interest sensitive investment type	Total
Asset			
Reinsurance funds withheld, net	$ 1,603	$ 4,049	$ 5,652
Embedded derivatives	17	137	154
Reinsurance funds withheld, total			**5,806**
Liability			
Policyholders' account balance, excluding embedded derivatives	$ —	$ 5,652	5652
Embedded derivatives	—	181	181
Policyholders' account balance, total			**$ 5,833**
Deposit liability	$ 1,657	$ —	$ 1,657

The Company reinsures its business through a diversified group of reinsurers. However, the Company remains liable to the extent its reinsurers do not meet their obligations under the reinsurance agreements. The Company monitors trends in arbitration and any litigation outcomes with its reinsurers. Collectability of reinsurance balances are evaluated by monitoring ratings and evaluating the financial strength of its reinsurers.

FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	2023	2022
Premiums:		
Direct premiums	**$ 2,528**	$ 1,392
Reinsurance ceded	**(629)**	(82)
Net premiums	**$ 1,899**	$ 1,310
Claims and policyholder benefits:		
Claims incurred and benefits paid	**$ (2,217)**	$ (1,332)
Reinsurance ceded	**342**	79
Net claims incurred and benefits paid	**$ (1,875)**	$ (1,253)

NOTE 13. SEPARATE ACCOUNT ASSETS AND LIABILITIES

The following table presents the change of the Company's separate account assets and liabilities:

AS AT AND FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	2023	2022
Balance, beginning of period	**$ 1,045**	$ —
Additions (deductions)		
Acquisition from business combination	**—**	1,123
Policyholder deposits	**38**	6
Net investment income	**13**	2
Net realized capital gains on investments	**114**	(60)
Policyholder benefits and withdrawals	**(58)**	(10)
Net transfer from separate account	**(1)**	(1)
Policy charges	**(6)**	(1)
Total changes	**100**	1,059
Balance, end of period	**$ 1,145**	$ 1,059

NOTE 14. DEFERRED ACQUISITION COSTS AND VALUE OF BUSINESS ACQUIRED

The following table presents a rollforward of deferred acquisition costs and value of business acquired for the periods indicated:

FOR THE SIX MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	Direct Insurance	Reinsurance	Total
Balance, beginning of period	$ 661	$ 924	**$ 1,585**
Additions	441	253	**694**
Amortization	(262)	(31)	**(293)**
Net change	179	222	**401**
Balance, end of period	**$ 840**	**$ 1,146**	**$ 1,986**

Balance, end of period	**$ 541**	**$ 793**	**$ 1,334**

The following table presents a rollforward of VOBA for the periods indicated:

AS AT AND FOR THE SIX MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	VOBA Asset	VOBA Liability
Balance, beginning of period	$ 404	$ (884)
Additions	36	—
Amortization	(55)	67
Balance, end of period	**$ 385**	**$ (817)**

AS AT AND FOR THE SIX MONTHS ENDED JUN. 30, 2022 US$ MILLIONS	VOBA Asset	VOBA Liability
Balance, beginning of period	$ —	$ —
Acquisition from business combination	538	(913)
Amortization	(16)	4
Balance, end of period	**$ 522**	**$ (909)**

The following table provides the projected VOBA asset amortization expenses for a five-year period and thereafter:

Years	VOBA Asset
2023	$ 17
2024	31
2025	28
2026	25
2027	22
Thereafter	262
Total amortization expense	**$ 385**

NOTE 15. ACQUISITION OF BUSINESS

On May 25, 2022, the Company acquired American National. American National offers a broad portfolio of insurance products, including individual and group life insurance, annuities, health insurance, and property and casualty insurance. Under the terms of the Merger Agreement, the Company acquired 100% of all American National issued and outstanding shares in exchange for $190 per share, which is equivalent to $5.1 billion. The consideration was all cash. The Company acquired all assets and assumed all liabilities of American National as of the closing date, and consolidates the business for financial statement purposes. The acquired business contributed revenues of $223 million and net profit of $16 million to the Company for the period from May 25 to June 30, 2022.

As part of re-assessing the final valuations of certain assets, such as intangible assets and goodwill, and certain liabilities, the Company recognized measurement period adjustments to reflect new information obtained about facts and circumstances that existed as of the acquisition date. Measurement period adjustments consist primarily with a decrease of $37 million to property and equipment, a decrease of $16 million to value of business acquired, an increase of $19 million to goodwill, a decrease of $29 million to future policy benefits, and a decrease of $5 million to other liabilities. The valuation has been finalized in the second quarter of 2023. The updated fair value of assets acquired and liabilities as of June 30, 2023 assumed are as follows:

Assets acquired	
Cash and cash equivalents	$ 1,021
Investments	22,519
Accrued investment income	101
Reinsurance recoverables	45
Premiums due and other receivables	437
Deferred tax assets	374
Property and equipment	138
Prepaid pension	149
Equity accounted investment	1,402
Deferred acquisition costs and value of business acquired	555
Reinsurance assets	410
Investment properties	541
Other assets	198
Separate account assets	1,123
Total assets acquired	**29,013**
Liabilities assumed	
Future policy benefits	5,304
Policyholders' account balances	13,880
Policy and contract claims	1,706
Unearned premium reserve	1,073
Other policyholder funds	324
Notes payable	158
Other liabilities	449
Separate account liabilities	1,123
Total liabilities assumed	**24,017**
Less: Non-controlling interest	**(10)**
Net assets acquired	**4,986**
Goodwill	**$ 121**

NOTE 16. ASSETS HELD FOR SALE

On June 2023, American National finalized an agreement to sell its health insurance business to a third party. The business is being acquired by the third party for cash through the acquisition of 100% of the stock of one of American National's wholly-owned subsidiaries and certain reinsurance transactions. The completion of the transaction will be conditional upon obtaining the required regulatory approvals and is expected to close in the fourth quarter of 2023.

The carrying amounts of the major classes of assets and liabilities classified as held-for-sale are shown below:

AS AT JUN. 30, 2023 US$ MILLIONS		**2023**
Cash and cash equivalents	$	38
Reinsurance recoverables		174
Premiums due and other receivables		37
Other assets		13
Total assets		**262**
Policy and contract claims		175
Other liabilities		56
Total liabilities	**$**	**231**

There were no assets held for sale as at December 31, 2022.

NOTE 17. FUTURE POLICY BENEFITS

The reconciliation of the balances described in the table below to the future policy benefits in the statements of financial position is as follows.

AS AT JUN. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS		**2023**		2022
Future policy benefits				
Direct Insurance	**$**	**3,218**	$	3,136
Pension Risk Transfer		**3,676**		2,964
Deferred profit liability				
Direct Insurance		**58**		24
Pension Risk Transfer		**229**		187
Other contracts and VOBA liability		**1,682**		1,700
Total future policy benefits	**$**	**8,863**	$	8,011

a. Future Policy Benefits

The balances and changes in the liability for future policy benefits are as follows:

AS AT AND FOR THE SIX MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	Direct Insurance	Pension Risk Transfer	Total

Total				
Expected future benefit payments	**20,465**	**10,651**	19,086	10,211
Expected future gross premiums	**9,516**	**4,948**	9,743	5,249

The amount of revenue and interest recognized in the statements of operations follows:

FOR THE THREE MONTHS ENDED JUN. 30 US$ MILLIONS	**Gross Premiums or Assessments**		**Interest Expense**	
	2023	2022	**2023**	2022
Direct Insurance	**$ 160**	$ 47	**$ 51**	$ 5
Pension Risk Transfer	**499**	1,128	**37**	15

FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	**Gross Premiums or Assessments**		**Interest Expense**	
	2023	2022	**2023**	2022
Direct Insurance	**$ 292**	$ 47	**$ 74**	$ 5
Pension Risk Transfer	**675**	1,237	**37**	15

The weighted-average interest rate follows:

FOR THE SIX MONTHS ENDED JUN. 30	**2023**	2022
Direct Insurance		
Interest accretion rate	**5 %**	4 %
Current discount rate	**5 %**	5 %
Pension Risk Transfer		
Interest accretion rate	**5 %**	3 %
Current discount rate	**6 %**	4 %

b. Deferred Profit Liability

For limited-pay products, gross premiums received in excess of net premiums are deferred at initial recognition as deferred profit liability ("DPL"). The assumptions and reflection of experience for DPL will be consistent with those used in the liability for future policy benefits, including the remeasurement methodology. The discount rate used in calculating DPL will be consistent with the locked-in rate used for the liability for future policy benefits.

DPL is amortized in income on a constant basis in relation with benefit payments. For life contingent payout annuities DPL is amortized over expected future benefit payments.

For limited payment traditional life permanent contracts, DPL is amortized over face amount for limited payment traditional life permanent contracts.

AS AT AND FOR THE SIX MONTHS ENDED JUN. 30, 2023 US$ MILLIONS	**Direct Insurance**	**Pension Risk Transfer**	**Total**

NOTE 18. POLICYHOLDERS' ACCOUNT BALANCES

Policyholders' account balances relate to investment-type contracts and universal life-type policies. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase and non-variable group annuity contracts. Policyholder account balances are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest, ranging from 1.0% to 8.0% (some annuities have enhanced first year crediting rates ranging from 1.0% to 7.0%), less expenses, mortality charges, and withdrawals; and (iii) fair value adjustment.

The balances and changes in policyholders' account balances follow.

Reinsurance	—	(65)	(65)	—	(70)	(70)
Total	**$ 13**	**$ (131)**	**$ (118)**	**$ 10**	**$ (124)**	**$ (114)**

NOTE 20. LIABILITY FOR UNPAID CLAIMS AND CLAIM ADJUSTMENT EXPENSES

The liability for unpaid claims and claim adjustment expenses ("claims") for health and property and casualty insurance is included in "Policy and contract claims" in the statements of financial position and is the amount estimated for incurred but not reported ("IBNR") claims and claims that have been reported but not settled. The liability for unpaid claims is estimated based upon American National's historical experience and actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs, less anticipated salvage and subrogation. The effects of the changes are included in the statements of operations in the year in which the changes occur. The time value of money is not taken into account for the purpose of calculating the liability for unpaid claims. There have been no significant changes in methodologies or assumptions used to calculate the liability for unpaid claims and claim adjustment expenses.

Information regarding the liability for unpaid claims is shown below:

FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	2023	2022
Unpaid claims balance, beginning	**$ 1,555**	$ —
Less: Reinsurance recoverables	**(305)**	—
Net beginning balance	**1,250**	—
Acquisition from business combination	**—**	1,215
Incurred related to		
Current	**816**	137
Prior years	**(22)**	(6)
Total incurred claims	**794**	131
Paid claims related to		
Current	**(342)**	(78)
Prior years	**(348)**	(38)
Total paid claims	**(690)**	(116)
Net balance	**1,354**	1,230
Add: Reinsurance recoverables	**303**	290
Unpaid claims balance, ending	**$ 1,657**	$ 1,520

The net and gross reserve calculations have shown favourable development as a result of favourable loss emergence compared to what was implied by the loss development patterns used in the original estimation of losses in prior years. The estimates for ultimate incurred claims attributable to insured events of prior years decreased by approximately $22 million and $6 million respectively during the first six months of 2023 and 2022. The favorable development in 2023 was a reflection of lower-than-anticipated losses arising from agribusiness, business owners, commercial automotive, and commercial other lines of business.

For short-duration health insurance claims, the total of IBNR plus expected development on reported claims included in the liability for unpaid claims and claim adjustment expenses at June 30, 2023 and December 31, 2022 was $16 million and $16 million respectively.

NOTE 21. CORPORATE AND SUBSIDIARY BORROWINGS

The Company and its subsidiaries have bilateral revolving credit facilities backed by third-party financial institutions. The total available amount on the credit facilities is $550 million. The credit facilities bear interest at the specified SOFR, CDOR, or bankers' acceptance rate plus a spread and have a maturity date of June 2028. As at June 30, 2023, $417 million was drawn on the bilateral credit facilities.

The Company has a $1.0 billion 364-day revolving credit facility for the purpose of temporarily warehousing investments that will ultimately be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings. As at June 30, 2023, the facility had $823 million outstanding.

In April 2022, the Company entered into a $1.0 billion 364-day secured facility. In April 2023, the Company repaid $500 million and extended the maturity on the remaining balance to April 2024.

The facilities require the Company to maintain a minimum net worth covenant. As at June 30, 2023, the Company was in compliance with its financial covenants.

The Company also has a revolving credit facility with Brookfield that, as at June 30, 2023, permitted borrowings of up to $400 million. As at June 30, 2023, there were no amounts drawn on the facility.

Subsidiary borrowings of $1.5 billion relate to debt issued at American National. $1.0 billion matures in 2027 and the remaining $500 million matures in 2032.

NOTE 22. INCOME TAXES

For the three months and six months ended June 30, 2023, the effective tax rates on pre-tax income were 3% and 1% respectively. The Company's effective tax rate differed from the statutory tax rate of 17% and 15% for the same respective periods, primarily due to international operations subject to different tax rates.

For the three months and six months ended June 30, 2022, the effective tax rate on pre-tax income were a recovery of 14% and expense of 1% respectively. The Company's effective tax rate differed from the statutory tax rate of 16% for the same respective periods, primarily due to international operations subject to different tax rates.

NOTE 23. SHARE CAPITAL

As at June 30, 2023 and December 31, 2022, the Company is authorized to issue:

i. 1,000,000,000 Exchangeable Class A Limited Voting Shares with a par value of $33.56 per share;

ii. 500,000,000 Exchangeable Class A-1 Limited Non-Voting Shares with a par value of $33.56 per share;

iii. 500,000 Class B Limited Voting Shares with a par value of $33.56 per share;

iv. 1,000,000,000 Class C Non-Voting Shares with a par value of $1 per share;

v. 100,000,000 Class A Senior Preferred Shares (issuable in series) with a par value of $25 per share;

vi. 100,000,000 Class B Senior Preferred Shares (issuable in series) with a par value of CAD$25 per share;

vii. 1,000,000,000 Class A Junior Preferred Shares (issuable in series) with a par value of $25 per share;

viii. 1,000,000,000 Class B Junior Preferred Shares (issuable in series) with a par value of CAD$25 per share.

The share capital of the Company as at June 30, 2023 and December 31, 2022 comprises the following:

AS AT US$ MILLIONS, EXCEPT SHARE AMOUNTS	**June 30, 2023**		December 31, 2022	
	Number of shares	**Value**	Number of shares	Value
Issued				
Class A exchangeable shares	**10,450,952**	**$ 448**	9,594,989	$ 422

NOTE 26. RELATED PARTY TRANSACTIONS

In the normal course of operations, the Company entered into the transactions below with related parties.

a) Brookfield Reinsurance agreements

The Company has an outstanding equity commitment in the amount of $2.0 billion from Brookfield to fund future growth, which the Company may draw on from time to time. As of June 30, 2023, there were no amounts drawn under the equity commitment.

In 2021, the Company entered into a credit agreement with Brookfield (the "Brookfield Credit Agreement") as lender for a three-year revolving credit facility which subsequently increased to $400 million in March 2022. As of June 30, 2023, there were no amounts drawn on the credit facilities under the Brookfield Credit Agreement.

The following table reflects the related party agreements and transactions for the six months ended June 30 in the statements of operations:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
Credit agreement fees with Brookfield	**$ —**	$ —	**$ —**	$ —
Support agreement fees with Brookfield	**—**	—	**—**	—
Rights agreement fees to Brookfield	**—**	—	**—**	—
Administration fees with Brookfield	**1.7**	0.3	**3.4**	0.5
Investment management fees to Brookfield Asset Management	**15.0**	7.0	**30.0**	11.0
Brookfield licensing agreement fees	**—**	—	**—**	—
Outsourcing fees paid to Brookfield	**0.2**	0.2	**0.9**	0.5
Outsourcing arrangements payable	**—**	0.1	**0.3**	0.2

b) Other related party transactions

On March 10, 2020, Brookfield Annuity Corporation ("BAC") entered into lease and building service arrangements with Brookfield Properties (Canada) Inc. and BPO Ontario Properties Ltd. (collectively, "BPO"), subsidiaries of Brookfield. The amount paid to BPO for the leased office facilities and building maintenance for the six months ended June 30, 2023 totaled $0.3 million (June 30, 2022 – $0.3 million). As at June 30, 2023, lease liabilities relating to this arrangement were $1 million (June 30, 2022 – $2 million).

During the six month period, subsidiaries of the Company purchased investments of $1.6 billion from Brookfield and its subsidiaries. Investment transactions with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

The Company had $339 million of cash on deposit with wholly-owned subsidiaries of Brookfield as at June 30, 2023 (June 30, 2022 – $70 million).

NOTE 27. SEGMENT REPORTING

The Company's operations are organized into three operating segments: Reinsurance, Direct Insurance and PRT. These segments are regularly reviewed by the Company's chief operating decision maker ("CODM") for the purpose of allocating resources to the segment and to assess its performance.

The key measure used by the CODM in assessing performance and in making resource allocation decisions is Distributable Operating Earnings ("Distributable Operating Earnings", or "DOE").

Distributable Operating Earnings is calculated as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of returns on equity invested in certain variable interest entities and the Company's share of adjusted earnings from investments in certain associates. DOE allows the CODM to evaluate the Company's segments on the basis of return on invested capital generated by its operations and allows the Company to evaluate the performance of its segments.

The tables below provide each segment's results in the format that the CODM reviews its reporting segments to make decisions and assess performance.

FOR THE THREE MONTHS ENDED JUN. 30, 2023 (MILLIONS)	Direct Insurance	Reinsurance	Pension Risk Transfer	**Total**

Our Reinsurance business is focused primarily on the reinsurance of annuity-based products and transacts with direct insurers and other reinsurers. All existing reinsurance contracts are with U.S. based insurance companies. Total premium revenues recorded within our Reinsurance segment for the six months ended June 30, 2023 were from transactions with two United States ceding companies.

Total premium revenues recorded within our PRT segment for the six months ended June 30, 2023, and 2022 were from Canadian and U.S. counterparties.

Total premium revenues recorded within our Direct Insurance segment for the six months ended June 30, 2023 were from transactions with U.S. retail customers.

For the purpose of monitoring segment performance and allocating resources between segments, the CODM monitors the assets, including investments accounted for using the equity method, liabilities and common equity attributable to each segment.

1. Other represents assets, liabilities and common equity attributable to other activities that do not constitute a segment.

NOTE 28. FINANCIAL COMMITMENTS AND CONTINGENCIES

Commitments

As at June 30, 2023, subsidiaries of the Company had investment commitment agreements with third parties to the maximum of approximately $6.2 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at June 30, 2023, the total unfunded commitment amounts were $3.0 billion.

The Company's subsidiary had aggregate commitments at June 30, 2023 to purchase, expand or improve real estate, to fund fixed interest rate mortgage loans, and to purchase other invested assets of $1.5 billion of which $0.8 billion is expected to be funded in 2023, with the remainder funded in 2024 and beyond.

In addition, the Company's subsidiary had revolving commitments of $113 million expected to be funded during 2023 and 2024, and outstanding letters of credit in the amount of $379 million as of June 30, 2023.

Federal Home Loan Bank (FHLB) Agreements

The Company has access to the FHLB’s financial services including advances that provide an attractive funding source for short-term borrowing and for access to other funding agreements. As of June 30, 2023, certain municipal bonds and collateralized mortgage obligations with a fair value of approximately $10 million and commercial mortgage loans of approximately $1.1 billion were on deposit with the FHLB as collateral for borrowing. As of June 30, 2023, the collateral provided borrowing capacity of approximately $745 million. The deposited securities and commercial mortgage loans are included in the Company’s statements of financial position within available-for-sale fixed maturity securities and mortgage loans on real estate, net of allowance, respectively.

Litigation

American National and certain subsidiaries are defendants in various lawsuits concerning alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain lawsuits include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing these matters with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on the Company's statements of financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our condensed consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote. Accruals for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, an accrual is recorded based on the lowest amount of the range.

NOTE 29. SUBSEQUENT EVENTS

Subsequent to quarter end, the Company entered into a definitive agreement to acquire all of the outstanding shares of common stock of American Equity Investment Life Holdings Company ("AEL"), valued at $4.3 billion. Each AEL shareholder will receive $55.00 per AEL share, consisting of $38.85 in cash and 0.49707 of a Brookfield Asset Management Ltd ("BAM") class A limited voting shares having a value equal to $16.15, subject to adjustment related to changes in share price of BAM.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

This management's discussion and analysis ("MD&A") covers the financial position as of June 30, 2023 and December 31, 2022 and the results of operations for the three and six months ended June 30, 2023, and 2022. Unless the context requires otherwise, when used in this MD&A, the terms "we", "us", "our", or the "Company" means Brookfield Reinsurance Ltd. together with all of its subsidiaries and the term "Brookfield" means Brookfield Corporation, its subsidiaries and controlled companies and any investment fund sponsored, managed or controlled by Brookfield Corporation or its subsidiaries, and does not, for greater certainty, include us or Oaktree Capital Group, LLC and Atlas OCM Holdings, LLC and its subsidiaries.

In addition to historical information, this MD&A contains forward-looking statements. Readers are cautioned that these forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. See "Forward-Looking Information".

The information in this MD&A should be read in conjunction with the Unaudited Condensed Consolidated Financial Statements ("the financial statements") as of June 30, 2023 and for the three and six months ended June 30, 2023, and 2022 and the annual audited financial statements for the year ended December 31, 2022 that were filed on Form 6K with the SEC on June 28, 2023. Interim operating results for the three and six months ended June 30, 2023 are not necessarily indicative of the results expected for the entire year.

Overview of Our Business

Our Company is an exempted company limited by shares incorporated under the laws of Bermuda on December 10, 2020. The Company holds a direct 100% ownership interest in BAM Re Holdings Ltd. ("BAM Re Holdings"), which holds the Company's interest in its operating subsidiaries North End Re Ltd. ("NER Ltd."), North End Re (Cayman) SPC ("NER SPC"), Brookfield Annuity Company ("BAC") and American National Group, LLC. ("American National").

Our Company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, our Company offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. Our business is presently conducted through our subsidiaries under three operating segments, which we refer to as our Direct Insurance, Reinsurance, and Pension Risk Transfer ("PRT") businesses. The principal operating entities of the company generally maintain their own independent management and infrastructure. Refer to the "Lines of Business" section of the MD&A for further details on our operating segments' business.

Controls and Procedures

The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. During the second quarter of 2023, the Company implemented and modified certain internal controls over financial reporting relating to the adoption and ongoing operation of ASU 2018-12, Financial Services - Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts.

Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. There was no change in the Company's internal control over financial reporting during the quarter ended June 30, 2023, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting besides those related to Long Duration Targeted Improvements ("LDTI"). The following financial data is derived from our financial statements that are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Non-GAAP measures used in this MD&A are reconciled to or calculated from such values. All dollar references, unless otherwise stated, are in U.S. Dollars.

Key Financial Data

The following table presents key financial data of the Company:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
Total assets	**$ 47,994**	$ 40,700	**$ 47,994**	$ 40,700

Three Months Ended June 30, 2023 vs. 2022

For the three months ended June 30, 2023, we reported net income of $360 million, compared to net income of $25 million in the prior year quarter primarily due to contributions from our acquisition of American National, higher investment related gains, as well as growth in our investment portfolio and higher spread earnings from investment repositioning into higher yielding investments.

We completed a record level of sales during the quarter, representing over $3 billion of new policies. Sales represent gross new policies written, and include new policies that are not considered premium revenues for the purposes of GAAP. Net premiums were $1.1 billion for the quarter, largely in line with the prior year quarter. Contributions from our acquisition of American National were offset by lower PRT premiums. During the quarter, the Company closed 26 PRT deals with premiums of $530 million, compared to 7 PRT deals with premiums of $1.0 billion in the prior year quarter.

Net investment income was $440 million in the quarter, compared to $195 million in the prior year quarter, driven by increased spread earnings from growth in our investment portfolio and capital redeployed into higher yielding assets, particularly from available-for-sale fixed maturity securities which generated $216 million in the current quarter, compared to $84 million in the prior year quarter.

The Company had net investment related gains of $292 million in the quarter, compared to a loss of $135 million in the prior year quarter, mainly driven by higher unrealized mark-to-market gains on equity securities of $245 million in the current quarter.

Net investment results from funds withheld was $106 million in the quarter, compared to a loss of $12 million in the prior year quarter. This improvement is primarily driven by mark-to-market gains on the embedded derivative in our modified coinsurance ("modco") reinsurance treaties as a result of changes in interest rate, compared to mark-to-market losses in the comparative period. During the quarter, we had interest income of $70 million, compared to $36 million in the prior year quarter.

Interest sensitive contract benefits represent interest credited to policyholders' account balances from our investment contracts with customers, as well as amortization of deferred revenue. Commissions for acquiring and servicing policies represent sales commission payments or incremental costs of obtaining the contract that are amortized over the contract term subsequent to the initial capitalization. During the quarter, interest sensitive contract benefits and commissions for acquiring and servicing policies increased by $298 million and $151 million, respectively, primarily driven by the increase in sales and premiums from the prior quarter.

Change in fair value of market risk benefit represents the mark-to-market movements of our liability based on protection to the policyholder from capital market risk. The gain of $14 million in the period is primarily due to change in interest rate used in the valuation of these liabilities.

Operating expenses were $186 million in the current quarter compared to $75 million in the prior year quarter, mainly as a result of the acquisition of American National which incurred $152 million of operating costs in the full quarter of 2023, compared to $44 million in the prior year quarter as the transaction closed in May of 2022. The increase is also partly related continued growth of the business with higher additional personnel, professional services and transaction expenses.

The increase of $42 million of interest expense on borrowings in the current quarter primarily relates to incurring a full quarter of expense on our subsidiary borrowings, particularly non-recourse acquisition financing issued at American National.

During the quarter, Distributable Operating Earnings increased by $114 million to $160 million. The increase was driven by a full quarter of contributions from American National, as well as higher net investment income within our PRT and Reinsurance businesses as we continued to redeploy our capital into higher yielding investments within the portfolios.

Six Months Ended June 30, 2023 vs. 2022

For the six months ended June 30, 2023, we reported net income of $267 million, compared to net income of $181 million in the prior year period primarily due to growth in the business, redeployment of capital into higher yielding investments and unrealized mark-to-market gains on investments and derivatives.

Net premiums were $1.9 billion for the six months ended, compared to $1.3 billion in the same period in 2022. The increase is mainly due to contribution of $1.4 billion in the six months ended June 30, 2023 from the aforementioned acquisition of American National which closed in May 2022, compared to $223 million in the prior period.

Net investment income increased by $589 million for the six months ended June 30, 2023, relative to the same period in 2022, driven by the growth in our investment portfolio and capital redeployed into higher yielding assets, particularly from our available-for-sale fixed maturity securities which generated $420 million in the current period, compared to $107 million in the prior period.

Investment related gains (losses), net was a gain of $186 million in the first six months of 2023, compared to a loss of $107 million in the prior year period, mainly due to unrealized mark-to-market movements on our equity securities of $156 million in the current period compared to a loss of $25 million in the prior period.

Net investment results from funds withheld increased by $45 million in the first six months of 2023 compared to the same period in 2022. The increase was driven by higher interest income from the growth in our reinsurance business. These increases were partially offset by negative mark-to-market movement in the embedded derivative due to a decrease in rates in 2023.

During the period, interest sensitive contract benefits and commissions for acquiring and servicing policies increased by $521 million and $331 million, respectively. The increases are driven by higher sales and a larger policyholders' account balance.

Change in fair value of market risk benefit represents the mark-to-market movements of our liability based on protection to the policyholder from capital market risk. The gain of $8 million in the period is primarily due to movements in interest rates used in the valuation of these liabilities.

Operating expenses were $362 million in the first six months of 2023, compared to $92 million in the prior year period, mainly as a result of the acquisition of American National which contributed $302 million in the current period, compared to $44 million in the prior period, as well as additional personnel and professional services expenses related to the growth of our business.

The increase of $97 million of interest expense on borrowings from prior year is primarily due to increased interest on subsidiary borrowings related to the acquisition of American National, which occurred at the end of May 2022.

During the period, Distributable Operating Earnings increased by $246 million to $305 million. The increase was primarily due to contributions from American National and net investment income on our investments. DOE also benefited from new business and spread earnings within our PRT and Reinsurance businesses as we made progress redeploying the investments within the portfolios.

CONSOLIDATED FINANCIAL POSITION

Comparison as at June 30, 2023 and December 31, 2022

The following table summarizes the financial position as at June 30, 2023 and December 31, 2022:

Non-controlling interests	**9**	8
Total equity	**1,911**	1,685
Total liabilities, mezzanine equity, and equity	**$ 47,994**	$ 43,458

June 30, 2023 vs. December 31, 2022

Total assets increased by $4.5 billion during the quarter to $48.0 billion.

Cash and cash equivalent increased by $748 million during the period. For further information, refer to "Liquidity and Capital Resources" section of the MD&A and our Consolidated Statements of Cash Flows.

Total investments increased by $2.1 billion over the period, primarily as a result of deployment of capital from new annuity sales and premiums in the first six months in the year, as well as partial recovery in the market value of equity securities.

Deferred acquisition costs are capitalized costs that are directly related to writing new policyholder contracts. During the quarter, the balance increased by $401 million mainly as a result of new insurance contracts entered with policyholders which contributed to an increase of $694 million, partially offset by amortization of $293 million.

Reinsurance funds withheld increased by $728 million over the quarter, primarily as a result of flow premiums received in the current period, partially offset by mark-to-market adjustments on the total return swap due to the impact of decreasing interest rates over the period on our shorter duration asset portfolio.

Reinsurance recoverables are estimated amounts due to the Company from reinsurers or cedants, related to paid and unpaid ceded claims and expenses, and are presented net of reserves for collectability. The amount increased by $38 million in the period primarily as a result of increased sales.

Other assets were $849 million at the end of the quarter, compared to $405 million at year-end. The balance primarily includes intangible assets and prepaid pension receivables from related parties, and increased mainly due to higher market risk benefits and current tax assets during the quarter.

Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of the Company, and both increased by $100 million since the year-end mainly due to net realized gains of underlying assets of $114 million and $38 million of policyholder deposits, partially offset by $58 million of policyholder benefits and withdrawals.

Future policy benefits and policyholder account balances increased by $3.7 billion during the period due to new contracts written across our operations, partially offset by settlements in the quarter.

Corporate and subsidiary borrowings decreased by $418 million during the period, primarily as a result of the $500 million repayment of the Company's 364-day secured facility in April 2023.

In the prior year, we issued junior preferred shares to Brookfield which are redeemable by the Company at any time at the issuance price plus accumulated and unpaid dividends.

Lines of Business

Direct Insurance

American National became the platform for our Direct insurance line, providing insurance in the following segments: direct origination of life, annuity, and property and casualty.

Life Insurance

Whole Life. Whole life products provide a guaranteed benefit upon the death of the insured in return for the periodic payment of a fixed premium over a predetermined period. Premium payments may be required for the entire life of the contract, to a specified age or a fixed number of years, and may be level or change in accordance with a predetermined schedule. Whole life insurance includes some policies that provide a participation feature in the form of dividends. Policyholders may receive dividends in cash or apply them to increase death benefits or cash values available upon surrender, or reduce the premiums required to maintain the contract in-force.

Universal Life. Universal life insurance products provide coverage through a contract that gives the policyholder flexibility in premium payments and coverage amounts. Universal life products may allow the policyholder, within certain limits, to increase or decrease the amount of death benefit coverage over the term of the contract and to adjust the frequency and amount of premium payments. Universal life products are interest rate sensitive, and we determine the interest crediting rates during the contract period, subject to policy specific minimums. An equity-indexed universal life product is credited with interest using a return that is based, in part, on changes in an index, such as the Standard & Poor's 500 Index ("S&P 500"), subject to a specified minimum.

Variable Universal Life. Variable universal life products provide insurance coverage on a similar basis as universal life, except that the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the securities selected by the policyholder held in the separate account.

Credit Life Insurance. Credit life insurance products are sold in connection with a loan or other credit account. Credit life insurance products are designed to pay the lender the borrower's remaining debt on a loan or credit account if the borrower dies during the coverage period.

Annuities

Deferred Annuities. A deferred annuity is an asset accumulation product. Deposits are received as a single premium deferred annuity or in a series of payments for a flexible premium deferred annuity. Deposits are credited with interest at our determined rates subject to policy minimums. For certain limited periods of time, usually from one to ten years, interest rates are guaranteed not to change. Deferred annuities usually have surrender charges that begin at issue and reduce over time and may have market value adjustments that can increase or decrease any surrender value. An equity-indexed deferred annuity is credited with interest using a return that is based, in part, on changes in an index, such as the S&P 500, subject to a specified minimum.

Single Premium Immediate Annuity ("SPIA"). A SPIA is purchased with one premium payment, providing periodic (usually monthly or annual) payments to the annuitant for a specified period, such as for the remainder of the annuitant's life. Return of the original deposit may or may not be guaranteed, depending on the terms of the annuity contract.

Variable Annuities. With a variable annuity, the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the separate account investment options selected by the policyholder. Our variable annuity products have no guaranteed minimum withdrawal benefits. This product accounts for less than 1% of our annuity business.

Property and Casualty

Personal Lines. Personal lines include insurance policies sold to individuals for auto, homeowners, and other similar exposures. Auto insurance covers specific risks involved in owning and operating an automobile. Homeowner insurance provides coverage that protects the insured owner's property against loss from perils. Other personal insurance provides coverage for property such as boats, motorcycles and recreational vehicles, and umbrella protection coverage.

Commercial Lines. Commercial lines are primarily focused on providing insurance to agricultural related operations and small to midsize businesses. This includes property and casualty coverage tailored for a farm, ranch, or other agricultural-related businesses. Commercial auto insurance is typically issued in conjunction with the sale of our policies covering farms, ranches, and businesses and covers specific risks involved in owning and operating motor vehicles. Business owners' property and liability insurance, workers' compensation insurance, and other commercial insurance encompassing umbrella protection coverage and other liability coverages, are also offered.

Specialty Markets. Specialty Markets products include renters, mortgage security, aviation, private flood, and credit insurance. Credit insurance provides protection to borrowers and the creditors that extend credit to them against unpaid indebtedness as a result of death, disability, involuntary unemployment, or untimely loss to the collateral securing a personal or mortgage loan.

- *Collateral* or *Creditor Protection Insurance* ("CPI"). CPI provides insurance against loss, expense to recover, or damage to personal property pledged as collateral (typically automobiles and homes) resulting from fire, burglary, collision, or other loss occurrence that would either impair a creditor's interest or adversely affect the value of the collateral. The coverage is purchased from us by the lender according to the terms of the credit obligation and charged to the borrower by the lender when the borrower fails to provide the required insurance.
- *Guaranteed Auto Protection* or *Guaranteed Asset Protection* ("GAP"). GAP insures the excess outstanding indebtedness over the primary property insurance benefits that may occur when there is a total loss to or an unrecovered theft of the collateral. GAP can be written on a variety of assets that are used as collateral to secure credit; however, it is most commonly written on automobiles.

Reinsurance

Within our Reinsurance business, we are focused primarily on the reinsurance of annuity-based products, and will primarily seek to transact with direct insurers and other reinsurers.

Annuities are insurance contracts that provide a defined income stream, typically for retirement planning. Policyholders deposit money with an insurance company in return for a fixed stream of cash flows either immediately or in the future. Reinsurance is an arrangement whereby an insurance company, the reinsurer, agrees to indemnify another insurance company, referred to as the ceding company or cedant, for all or a portion of the insurance risks that are underwritten by the ceding company. Reinsurance serves multiple purposes, including to (1) transfer insurance risk off of a ceding company's balance sheet, enabling it to more efficiently manage balance sheet capacity to increase the volume of business it can underwrite (2) stabilize a ceding company's operating results, (3) assist the cedant in achieving applicable regulatory requirements, and (4) optimize the overall financial strength and capital structure of the cedant.

Reinsurance may be structured as a block transaction, pursuant to which a reinsurer contractually assumes assets and liabilities associated with an in-force book of business, or as a flow arrangement, pursuant to which a reinsurer contractually agrees to assume assets and liabilities for future business.

We primarily seek to reinsure three types of annuity products: fixed annuities, fixed index annuities and payout annuities.

Fixed Annuities

A fixed annuity ("FA") is a type of insurance contract that provides a fixed rate of investment return (often referred to as a crediting rate) for a specified period of time. Fixed rate reset annuities have a crediting rate that is typically guaranteed for a period of one year, after which insurers are able to change the crediting rate at their discretion, generally to any rate at or above a previously guaranteed minimum rate.

Insurers earn income on FA contracts by generating a net investment spread, which is based on the difference between income earned on the investments supporting the liabilities and the crediting rate owed to customers.

Fixed Index Annuities

A fixed index annuity ("FIA") is an insurance contract in which the policyholder makes one or more premium deposits that earn interest at a crediting rate based on a specified market index. Policyholders are entitled to recurring or lump sum payments for a specified period of time. FIAs provide policyholders with the ability to earn interest without significant downside risk to their principal balance. A market index tracks the performance of a specific group of stocks or other assets representing a particular segment of the market, or in some cases, an entire market. A policyholder's crediting rate in relation to a market index is based on the change in the relevant market index, subject to a pre-defined cap (a maximum rate that may be credited), spread (a credited rate determined by reducing a specific rate from the index return) and/or a participation rate (a credited rate equal to a percentage of the index return).

Insurers earn income on FIA contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

Payout Annuities

A payout annuity is an income-generating insurance product. In exchange for a lump-sum premium, the policyholder receives a series of guaranteed income payments for one lifetime, two lifetimes, or a specified period of time.

Insurers earn income on payout annuity contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

We operate our Reinsurance business through licensed operating companies, North End Re (Cayman) SPC ("NER SPC") and North End Re Ltd ("NER Ltd."). As of the date of this MD&A, our subsidiaries have reinsurance and retrocession agreements with two third parties to reinsure a block of U.S. annuities and fixed indexed annuities.

Pension Risk Transfer

PRT is the transfer by a corporate sponsor of the risks (or some of the risks) associated with the sponsorship and administration of a pension plan, in particular, investment risk and longevity risk, which is the risk of an increase in life expectancy of plan beneficiaries. These risks can be transferred either to an insurer like us through a group annuity transaction, or to an individual through a lump-sum settlement payment. PRT using insurance typically involves a single premium group annuity contract that is issued by an insurer, permitting the corporate pension plan sponsor to discharge certain pension plan liabilities from its balance sheet.

A PRT insurance transaction may be structured as either a buy-out annuity or a buy-in annuity. Under a buy-out annuity, a direct insurer enters into a group annuity contract with the plan sponsor and assumes the liability to fund, administer, and pay benefits covered under the contract directly to the individual pension plan members covered under the contract. Under a buy-in annuity, the insurer enters into a group annuity contract with the plan sponsor and is liable to fund and pay the benefits covered under the contract to the pension plan fund, with the plan sponsor retaining the liability to administer and pay pension benefits to plan members. In both cases, the insurer assumes the investment and longevity risk.

Insurers earn income on buy-out and buy-in group annuities by generating a net investment spread, which is based on the difference between income earned on the investments supporting the annuity contract and the cost of the pension liabilities assumed.

Today, our PRT business is operated in Canada and the United States. Our Canadian PRT business is operated through Brookfield Annuity Company ("BAC"), a Canadian domiciled, licensed and regulated direct life insurance company that provides PRT solutions to organizations across Canada. Under American National, we also operate a U.S. PRT business, which became licensed during 2022 and successfully completed its first PRT transaction in December 2022. Our North American PRT businesses are led by a team of experts in group annuities, pensions, insurance and investments.

SEGMENT REVIEW

The Company's operations are organized into three operating segments: Direct Insurance, Reinsurance, and PRT.

We measure operating performance primarily using DOE which measures our ability to acquire net insurance assets at a positive margin, and invest these assets at a return that is greater than the cost of policyholder liabilities.

Direct Insurance

The following table presents Distributable Operating Earnings of our Direct Insurance segment for the three and six months ended June 30, 2023 and 2022:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
DOE	**$ 150**	$ 44	**$ 260**	$ 44

Comparison of the three and six months ended June 30, 2023 and 2022

DOE within our Direct Insurance business represents contribution from our direct origination annuity, life, P&C and health businesses operated by American National, which was acquired in the second quarter of 2022. We benefited from strong contributions from our life and annuities business and the continued repositioning of investments into higher yielding investments. The benefits were partly offset by higher homeowner's catastrophic ("CAT") losses from severe storms. DOE related to our Direct Insurance business also includes financing costs associated with subsidiary borrowings and corporate overhead directly related to the segment.

Reinsurance

The following table presents Distributable Operating Earnings of our Reinsurance segment for the three and six months ended June 30, 2023 and 2022:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
DOE	**$ 28**	$ 6	**$ 48**	$ 10

Comparison of the three and six months ended June 30, 2023 and 2022

DOE within our Reinsurance business increased to $28 million in the quarter, primarily as a result of increase in interest income of $11 million due to market rates and deployment of capital. During the quarter, we recorded flow premiums on our reinsurance treaty with AEL of approximately $650 million, bringing total premiums reinsured under the treaty to approximately $7 billion of premiums to-date. DOE also benefited from rising interest rates over the last twelve months and the redeployment of assets into higher yielding investments in the period.

Pension Risk Transfer

The following table presents Distributable Operating Earnings of our PRT segment for the three and six months ended June 30, 2023 and 2022:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended		Six Months Ended	
	2023	2022	**2023**	2022
DOE	**$ 10**	$ 5	**$ 21**	$ 6

Comparison of the three and six months ended June 30, 2023 and 2022

During the quarter, the Company closed 8 PRT deals in the Canadian market and 18 PRT deals in the US market (2022 – 7), representing $530 million (2022 – $1 billion) of premiums. The increase in DOE from the prior year was a result of more business closed over the last twelve months, as well as higher investment income due to redeployment of assets into higher yielding investments.

Liquidity and Capital Resources

CAPITAL RESOURCES

We attempt to maintain sufficient financial liquidity at all times so that we are able to participate in attractive opportunities as they arise, better withstand sudden adverse changes in economic circumstances within our operating subsidiaries and maintain payments to policyholders, as well as maintain distributions to our shareholders. Our principal sources of liquidity are cash flows from our operations, and access to the Company's third-party credit facility, and our credit facility and equity commitment with Brookfield. We proactively manage our liquidity position to meet liquidity needs and continue to develop relationships with lenders who provide borrowing capacity at competitive rates, while looking to minimize adverse impacts on investment returns. We look to structure the ownership of our assets to enhance our ability to monetize them to provide additional liquidity, if needed. Our corporate liquidity for the periods noted below consisted of the following:

AS AT JUN. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS		2023		2022
Cash and cash equivalents	**$**	**415**	$	784
Liquid financial assets		**228**		241
Undrawn credit facilities		**533**		544
Total Corporate liquidity[1]	**$**	**1,176**	$	1,569

1. See "Performance Measures used by Management".

As of the date of this MD&A, our liquidity is sufficient to meet our present requirements for the foreseeable future. In June 2021, Brookfield provided to the Company an equity commitment in the amount of $2.0 billion to fund future growth, which the Company may draw on from time to time. The equity commitment may be called by the Company in exchange for the issuance of class C shares or junior preferred shares. In addition, in connection with the Spin-off we entered into a credit agreement with Brookfield as the lender, providing for a three year revolving $400 million credit facility in addition to our $550 million revolving credit facility with external banks. We use the liquidity provided by our credit facilities for working capital purposes, and we may use the proceeds from the capital commitment to fund growth capital investments and acquisitions. The determination of which of these sources of funding the Company will access in any particular situation will be a matter of optimizing needs and opportunities at that time. As of the date of this MD&A, there were no amounts drawn on the Brookfield facility.

Today, we have significant liquidity within our insurance portfolios, giving us flexibility to invest in a rising rate environment and secure attractive investment opportunities. In addition to a portfolio of highly liquid financial assets, our operating companies have additional access to the liquidity from sources such as the Federal Home Loan Bank ("FHLB") within our direct insurance business and short-term repurchase agreements within our pension risk transfer business to manage market exposure between the timing of transaction agreements being entered into and the receipt of assets. As at June 30, 2023, the Company had drawn $56 million of a total $1.0 billion of commitments available relating to these programs.

Liquidity within our operating subsidiaries may be restricted from time to time due to regulatory constraints. As at June 30, 2023, the company's cash and cash equivalents included $415 million of unrestricted cash resources that can be deployed to fund corporate activities as needed.

AS AT JUN. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS		2023		2022
Cash and cash equivalents	**$**	**2,893**	$	2,145
Liquid financial assets		**15,772**		17,769
Undrawn credit facilities		**533**		544
Total liquidity[1]	**$**	**19,198**	$	20,458

1. See "Performance Measures used by Management".

Comparison of the three and six months ended June 30, 2023 and 2022

The following table presents a summary of our cash flows and ending cash balances for the three and six months ended June 30, 2023 and 2022:

FOR THE SIX MONTHS ENDED JUN. 30 US$ MILLIONS	**2023**	2022
Operating activities	**$ 762**	$ 389
Investing activities	**(1,560)**	(3,954)
Financing activities	**1,545**	5,257
Cash and cash equivalents		
Cash and cash equivalents, beginning of the period	**2,145**	393
Net change during the period	**747**	1,692
Foreign exchange on cash balances held in foreign currencies	**1**	(1)
Cash and cash equivalents, end of the period	**$ 2,893**	$ 2,084

Operating Activities

For the six months ended June 30, 2023, we generated $762 million of cash from operating activities compared to $389 million during 2022, mainly driven by interest and dividend income of $493 million received from our investment portfolios in the current period as well as premiums written from new flow reinsurance and PRT transactions.

Investing Activities

For the six months ended June 30, 2023, we reinvested liquid short term and fixed maturity investments that matured during the period and we deployed over $3 billion into new higher-yielding investments within our insurance operating subsidiaries' portfolios. These investments were primarily funded by new premiums and the sales and maturities of liquid securities. The purchase and sales, net of maturities, resulted in net deployment of $1.6 billion of cash from investing activities, compared to net deployment of $4.0 billion in the prior year period, which was mostly as a result of the acquisition of American National in May 2022.

Financing Activities

For the six months ended June 30, 2023, we received $1.5 billion of cash from financing activities, compared to $5.3 billion received in the same period in 2022. The proceeds in the current year period were mainly as a result of $1.6 billion net payments received on policyholders' account deposits policyholders' account deposits and an increase of $268 million in our related party payables, partially offset by the net repayment of $420 million on our borrowings.

Financial Instruments

To the extent that we believe it is economic to do so, our strategy is to hedge a portion of our equity investments and/or cash flows exposed to foreign currencies by the Company. The following key principles form the basis of our foreign currency hedging strategy:

- We leverage any natural hedges that may exist within our operations;
- We utilize local currency debt financing to the extent possible; and
- We may utilize derivative contracts to the extent that natural hedges are insufficient.

As at June 30, 2023, our common equity was $1.9 billion and our adjusted equity was $5.0 billion. Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. Refer to discussion on Non-GAAP Measures.

Included in equity and adjusted equity was approximately $180 million invested in Canadian dollars. As at June 30, 2023, we had a notional $2.6 billion (December 31, 2022 – $2.8 billion) of foreign exchange forward contracts in place to hedge against foreign currency risk.

For additional information, see Note 9, “Derivative Instruments” of the financial statements.

Future Capital Obligations and Requirements

Subsidiaries of the Company have investment commitment agreements to the maximum of $6.2 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at June 30, 2023, $3.0 billion was funded (December 31, 2022 – $2.6 billion). The amounts are recognized as loans and receivables, unrated bonds and private equity investments.

For additional information, see Note 28, “Financial commitments and contingencies” of the financial statements.

The following is the maturity by year on corporate borrowings and subsidiary borrowings:

	Payments due by year				
AS AT JUN. 30 2023 US$ MILLIONS	**Total**	Less than 1 year	1- 3 years	4 - 5 years	More than 5 years
Corporate borrowings	**$ 1,740**	$ 1,323	$ —	$ 417	$ —
Subsidiary borrowings	**1,494**	—	—	997	497

Capital management

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the Company’s growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying with the regulatory capital requirements.

The Company takes an integrated approach to risk management that involves the Company’s risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board of Directors. The operating capital levels are determined by the Company’s risk appetite and Own Risk and Solvency Assessment (“ORSA”). Furthermore, stress techniques that include the Financial Conditions Testing (“FCT”) are used to evaluate the Company’s capital adequacy under sustained adverse scenarios.

BAC is subject to Life Insurance Capital Adequacy Test (“LICAT”) as determined by OSFI. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits.

NER SPC and American National are required to follow Risk Based Capital (“RBC”) requirements based on guidelines of the National Association of Insurance Commissioners (“NAIC”). RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant.

NER Ltd. is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin and the enhanced capital requirement as determined by the Bermuda Monetary Authority (“BMA”). The Enhanced Capital Requirement (“ECR”) is calculated based on the Bermuda Solvency Capital Requirement model, a risk-based model that takes into account the risk characteristics of different aspects of the company's business.

The Company has determined that it is in compliance with all capital requirements as at June 30, 2023 and December 31, 2022.

Brookfield Operating Results

An investment in the class A exchangeable shares of the company is intended to be, as nearly as practicable, functionally and economically, equivalent to an investment in Brookfield. A summary of Brookfield's three months ended June 30, 2023 operating results is provided below:

FOR THE PERIOD ENDED JUN. 30 US$ MILLIONS	Three months ended		Six months ended	
	2023	2022	**2023**	2022
Revenues	**$ 23,668**	$ 23,256	**$ 46,965**	$ 45,138
Net income	**1,512**	1,475	**1,936**	4,435

Each class A exchangeable share has been structured with the intention of providing an economic return equivalent to one Brookfield Class A Share. We therefore expect that the market price of the class A exchangeable shares should be impacted by the market price of Brookfield Class A Shares and the business performance of Brookfield as a whole. In addition to carefully considering the disclosure made in this MD&A, you should carefully consider the disclosure made by Brookfield in its continuous disclosure filings. Copies of the Brookfield's continuous disclosure filings are available electronically on EDGAR on the SEC's website at www.sec.gov or on SEDAR at www.sedar.com.

Industry Trends and Factors Affecting Our Performance

As a financial services business providing capital based solutions to the insurance industry, we are affected by numerous factors, including global economic and financial market conditions. Price fluctuations within equity, credit, commodity and foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the performance of our business. We also monitor factors such as consumer spending, business investment, the volatility of capital markets, interest rates, unemployment and the risk of inflation or deflation, which affect the business and economic environment and, in turn, impact the demand for the type of financial and insurance products offered by our business. We believe the following current trends present significant opportunities for us to grow our business.

- **Financial market volatility and dislocations across asset classes favor insurers with diverse investment portfolios and access to alternative credit.** Insurers primarily invest in public market fixed income products and are exposed to public market valuations. Insurers with an ability to diversify investment portfolios to include alternative and private credit assets provide more favorable investment performance.

- **Many insurers are looking for ways to shift toward less asset-intensive insurance products.** Given the capital-intensive nature of life and annuity liabilities, many insurance companies with diversified exposure are looking to reduce their exposure to life and annuity products, including through reinsurance, in order to free up capital that they can deploy in support of less asset-intensive products and business lines.

- **Recent market conditions are exposing under-capitalized companies.** Some writers of annuity products are facing higher hedging costs amidst volatile markets, and changes in regulatory standards are increasing the transparency of liability valuations in the current low-rate environment. This has necessitated a need to raise or otherwise free up capital, and the reinsurance market offers writers of annuity products an opportunity to do so. We have access to capital and are able to provide capital support to these companies.

- **Public market valuations have compressed while capital needs have grown.** Insurers are trading at cyclical lows, and given the prevailing market environment, are looking to partner with organizations like ours that can provide solutions to address capital needs.

Market Risk

Our statements of financial position within our financial statements include substantial amounts of assets and liabilities whose fair values are subject to market risks. Our significant market risks are primarily associated with interest rates, foreign currency exchange rates and credit risk. The fair values of our investment portfolios remain subject to considerable volatility. The following sections address the significant market risks associated with our business activities.

Foreign Exchange Rate Risk

The company's obligations under its insurance contracts are denominated in Canadian and United States dollars but a portion of the assets supporting these liabilities are denominated in non-Canadian and non-United States dollars. We manage foreign exchange risk using foreign exchange forwards. Our investment policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

Our net assets are subject to financial statement translation into U.S. Dollars. All of our financial statement translation-related impact from changes in foreign currency rates is recorded in other comprehensive income.

Interest Rate Risk

Interest rates currently increased in many jurisdictions in which we operate in 2023 but remain at relatively low levels by historical standards. The company's asset liability management practices and interest rate risk management allows the company to mitigate the impact of interest rate volatility on the business. However, sudden or unexpected changes in interest rates may cause certain market dislocations that could negatively impact our financial performance. Interest rate increases would also increase the amount of cash required to service our obligations and our earnings could be adversely impacted as a result thereof.

The company manages interest rate risk through their asset liability management, which we refer to as ALM, the framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance reserves. Within the context of the ALM framework, we use derivatives including interest rate swaps and futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

Other Price Risk

Other price risk is the risk of variability in fair value due to movements in equity prices or other market prices such as commodity prices and credit spreads.

The Company's exposure to the equity markets is managed by sector and individual security and is intended to track the S&P 500 with minor variations. The Company mitigates the equity risk by diversification of the investment portfolio.

The Company also has equity risk associated with the equity-indexed life and annuity products the Company issues. The Company has entered into derivative transactions, primarily over-the-counter equity call options, to hedge the exposure to equity-index changes.

Credit Risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The company is primarily exposed to credit risk through its investments in debt securities.

We manage exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in our investment policy.

Insurance Risk

The company makes assumptions and estimates when assessing reinsurance and insurance risks, and significant deviations, particularly with regards to longevity and policyholder behavior, could adversely affect our business, financial condition, results of operations, liquidity and cash flows. All transaction terms are likely to be determined by qualitative and quantitative factors, including our estimates. If we reinsure a block of business, there can be no assurance that the transaction will achieve the results expected at the time of the block's acquisition. These transactions expose us to the risk that actual results materially differ from those estimates.

We manage insurance risk through choosing whether to purchase reinsurance for certain amounts of risk underwritten within our pension risk transfer business, and we may also look to further reinsure certain amounts of risk we assume under our reinsurance agreements.

Legal Risk

In the future we may be parties in actions that routinely arise out of the normal course of business, including legal actions seeking to establish liability directly through insurance contracts or indirectly through reinsurance contracts issued by our subsidiaries. Plaintiffs occasionally seek punitive or exemplary damages. We do not believe that such normal and routine litigation will have a material effect on our financial condition or results of operations. We are also involved from time to time in other kinds of legal actions, some of which assert or may assert claims or seek to impose fines and penalties. We believe that any liability that may arise as a result of other pending legal actions will not have a material effect on our financial statements.

Operational Risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The company's internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

We have significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board of Directors.

Disaster recovery and business continuity plans have also been established to manage the company's ability to operate under adverse conditions.

Critical Accounting Estimates

The preparation of the financial statements requires management to make critical judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses that are not readily apparent from other sources, during the reporting period. These estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years. Refer to Critical Accounting Estimates in the financial statements for the year ended December 31, 2022 filed with the SEC on June 28th, 2023.

Performance Measures Used by Management

To measure performance, we focus on net income and total assets, as well as certain non-GAAP measures, including Distributable Operating Earnings and Adjusted Equity. In addition, we provide certain metrics such as Total Corporate Liquidity and Total Liquidity which we believe are useful to investors to provide additional insights into assets within the business available for redeployment. Refer to the “Segment Review” section of this MD&A for further discussion on our performance measures for the three and six months ended June 30, 2023 and 2022.

Non-GAAP Measures

We regularly monitor certain Non-GAAP measures that are used to evaluate our performance and analyze underlying business performance and trends. We use these measures to establish budgets and operational goals, manage our business and evaluate our performance. We also believe that these measures help investors compare our operating performance with our results in prior years. These Non-GAAP financial measures are provided as supplemental information to the financial measures presented in this MD&A that are calculated and presented in accordance with GAAP. These Non-GAAP measures are not comparable to GAAP and may not be comparable to similarly described Non-GAAP measures reported by other companies, including those within our industry. Consequently, our Non-GAAP measures should not be evaluated in isolation, but rather, should be considered together with the most directly comparable GAAP measure in our consolidated financial statements for the years presented. The Non-GAAP financial measures we present in this MD&A should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP.

Distributable Operating Earnings

We use Distributable Operating Earnings to assess operating results and the performance of our businesses. We define distributable operating earnings as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of returns on equity invested in certain variable interest entities and our share of adjusted earnings from our investments in certain associates.

Distributable Operating Earnings is a measure of operating performance that is not calculated in accordance with, and does not have any standardized meaning prescribed by GAAP. Distributable Operating Earnings is therefore unlikely to be comparable to similar measures presented by other issuers.

We believe our presentation of Distributable Operating Earnings is useful to investors because it supplements investors’ understanding of our operating performance by providing information regarding our ongoing performance that excludes items we believe do not directly affect our core operations. Our presentation of Distributable Operating Earnings also provide investors enhanced comparability of our ongoing performance across years.

Adjusted Equity

Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. We use Adjusted Equity to assess our return on our equity.

The followings contain further details regarding our use of our Non-GAAP measures, as well as a reconciliation of net income and total equity to these measures:

Reconciliation of Non-GAAP Measures

The following table reconciles our net income to Distributable Operating Earnings:

FOR THE PERIODS ENDED JUN. 30 US$ MILLIONS	Three Months Ended **2023**	Three Months Ended 2022	Six Months Ended **2023**	Six Months Ended 2022
Net income	**$ 360**	$ 25	**$ 267**	$ 181
Net investment gains and losses, including funds withheld	**(313)**	190	**(168)**	92
Mark-to-market on insurance contracts and other net assets	**92**	(165)	**189**	(218)
Deferred income tax expense	**11**	7	**(2)**	11
Transaction costs	**5**	20	**9**	24
Equity accounted (income) loss	**—**	(34)	**—**	(34)
Depreciation	**5**	3	**10**	3

The following table reconciles our equity to Adjusted Equity:

AS AT JUN. 30 US$ MILLIONS	**2023**	2022
Total equity	**$ 1,911**	$ 1,470
Add:		
Accumulated Other Comprehensive Loss (Income)	**501**	561
Junior preferred shares	**2,635**	2,470
Adjusted equity	**$ 5,047**	$ 4,501

Forward-Looking Information

In addition to historical information, this MD&A contains "forward-looking information" within the meaning of applicable securities laws. Forward-looking information may relate to the company and Brookfield's outlook and anticipated events or results and may include information regarding the financial position, business strategy, growth strategy, budgets, operations, financial results, taxes, dividends, distributions, plans and objectives of the company. Particularly, information regarding future results, performance, achievements, prospects or opportunities of the company, Brookfield's or the Canadian, U.S. or international markets is forward-looking information. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "targets", "expects" or "does not expect", "is expected", "an opportunity exists", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate" or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might", "will" or "will be taken", "occur" or "be achieved".

The forward-looking statements are based on our beliefs, assumptions and expectations of future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or within our control. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements.

The following factors, among others, could cause our actual results to vary from our forward-looking statements:

We caution that the factors that may affect future results described in this MD&A are not exhaustive. The forward-looking statements represent our views as of the date of this MD&A and should not be relied upon as representing our views as of any date subsequent to the date of this MD&A. While we anticipate that subsequent events and developments may cause our views to change, we disclaim any obligation to update the forward-looking statements, other than as required by applicable law. NOTE 1. NATURE OF OPERATIONS

Brookfield Reinsurance Ltd. (“Brookfield Reinsurance” or the “Company”) is a Bermuda corporation incorporated on December 10, 2020 and governed by the laws of Bermuda. The Company’s class A exchangeable shares are listed on the New York Stock Exchange ("NYSE") and the Toronto Stock Exchange ("TSX") under the symbol “BNRE”.

The Company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, Brookfield Reinsurance offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. The business is presently conducted through our subsidiaries under three operating segments: Direct Insurance, Reinsurance, and Pension Risk Transfer ("PRT").

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited interim condensed consolidated financial statements ("financial statements") and notes thereto, including all prior periods presented, have been prepared under accounting principles generally accepted in the United States of America (“GAAP”). The financial statements are prepared on a going concern basis and have been presented in U.S. dollars (“USD”) rounded to the nearest million unless otherwise indicated. The interim condensed consolidated financial statements should be read in conjunction with the December 31, 2022 audited consolidated financial statements of the Company and accompanying notes included with the Form 6-K ("2022 Form 6-K") filed with the SEC on June 28, 2023. The results of operations for the three and nine months ended September 30, 2023 are not necessarily indicative of the results for any subsequent periods or the entire fiscal year ending December 31, 2023. The interim condensed consolidated financial statements are unaudited and reflect all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim periods presented in accordance with GAAP.

The preparation of the financial statements in accordance with GAAP requires management to make estimates that affect the amounts reported in the financial statements and accompanying notes. Included among the material (or potentially material) reported amounts and disclosures that require use of estimates are: fair value of certain financial assets, derivatives, allowances for credit losses, deferred acquisition costs (“DAC”), value of business acquired (“VOBA”), goodwill and other intangibles, market risk benefits, future policy benefits, pension plans, income taxes including the recoverability of our deferred tax assets, and the potential effects of resolving litigated matters. Such estimates and assumptions are subject to inherent uncertainties, which may result in actual amounts differing from reported amounts.

Adoption of new accounting standards

For long duration insurance contracts, ASU 2018-12, Targeted Improvements to the Accounting for Long-Duration Contracts (LDTI), issued in August 2018, changes the measurement and disclosures of insurance liabilities and deferred acquisition cost for long-duration contracts issued by insurers. The amendments are effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Refer to the 2022 Form 6-K filed with the SEC on June 28, 2023 for adoption information.

The Company adopted LDTI effective January 1, 2023 with a transition date of January 1, 2021. The adoption of LDTI resulted in a decrease of $1 million and $135 million in retained earnings and accumulated other comprehensive income, respectively. As part of the LDTI adoption, the Company reviews for updates to cash flow assumptions at least annually, and at the same time every year by cohort or product. The Company also reviews more frequently and updates its cash flow assumptions during an interim period if evidence suggests cash flow assumptions should be revised.

On April 1, 2023, the Company adopted ASU 2020-04 Topic 848. The amendments in this guidance provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance only applies to contracts, hedging relationships, and other transactions that reference London Inter-Bank Offered Rate ("LIBOR") or another reference rate expected to be discontinued because of reference rate reform. The inventory of LIBOR exposures is primarily limited to floating rate bonds, alternative investments, and borrowings within joint venture investments. Certain contracts included in these categories matured prior to December 31, 2021, the start of LIBOR rates cessations. The transition from LIBOR did not have a material impact to the Company's financial statements or notes to the financial statements.

Recently issued accounting pronouncements

On October 9, 2023, the Financial Accounting Standards Board issued Accounting Standards Update 2023-06—Disclosure Improvements: Codification Amendments in Response to the SEC's Disclosure Update and Simplification Initiative ("ASU 2023-06"). The amendments modify the disclosure or presentation requirements of a variety of Topics in the Codification. Certain of the amendments represent clarifications to or technical corrections of the current requirements and also facilitate the comparison of entities subject to the SEC's existing disclosures with those entities that were not previously subject to the SEC's requirements. Further, the amendments align the requirements in the Codification with the SEC's regulations.

The effective date for each amendment will be the date on which the SEC's removal of that related disclosure from Regulation S-X or Regulation S-K becomes effective, with early adoption prohibited. The amendments in this update should be applied prospectively.

We are currently evaluating the requirements of ASU 2023-06. However, as they apply to disclosure requirements, the adoption of the standard is not anticipated to have a material impact on our profitability, financial position or cash flows.

NOTE 3. INVESTMENTS IN AVAILABLE-FOR-SALE FIXED MATURITY SECURITIES

The amortized cost and fair value of available-for-sale fixed maturity securities are shown below:

The amortized cost and fair value, by contractual maturity, of available-for-sale fixed maturity securities are shown below:

AS AT US$ MILLIONS	**September 30, 2023**		December 31, 2022	
	Amortized Cost	**Fair Value**	Amortized Cost	Fair Value
Due in one year or less	**$ 474**	**$ 469**	$ 494	$ 489
Due after one year through five years	**4,929**	**4,714**	5,244	5,072
Due after five years through ten years	**4,352**	**4,003**	5,907	5,436
Due after ten years	**6,390**	**5,546**	5,961	5,319
Total	**$ 16,145**	**$ 14,732**	$ 17,606	$ 16,316

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Residential and commercial mortgage-backed securities, which are not due at a single maturity, have been presented based on the year of final contractual maturity.

Proceeds from sales of available-for-sale fixed maturity securities, with the related gross realized gains and losses, are shown below:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended		Nine Months Ended	
	2023	2022	**2023**	2022
Proceeds from sales of available-for-sale fixed maturity securities	**$ 1,213**	$ 782	**$ 4,743**	$ 4,541
Gross realized gains	**6**	7	**32**	106
Gross realized losses	**(32)**	(34)	**(121)**	(188)

Gains and losses are determined using first-in-first-out of the securities sold. In addition, the Company has pledged bonds in connection with certain agreements and transactions, such as financing and reinsurance agreements. The carrying value of bonds pledged was $58 million and $117 million at September 30, 2023 and December 31, 2022, respectively.

In accordance with various regulations, the Company has securities on deposit with regulating authorities with a carrying value of $28 million and $51 million at September 30, 2023 and December 31, 2022, respectively.

The gross unrealized losses and fair value of available-for-sale fixed maturity securities, aggregated by investment category and length of time individual securities have been in a continuous unrealized loss position due to market factors are shown below:

Allowance for Credit Losses

Several assumptions and underlying estimates are made in the evaluation of allowance for credit loss. Examples include financial condition, near term and long-term prospects of the issue or issuer, including relevant industry conditions and trends and implications of rating agency actions and offering prices. Based on this evaluation, unrealized losses on bonds available-for-sale where an allowance for credit loss was not recorded were concentrated in the Company's available-for-sale fixed maturity securities within the transportation sector.

The rollforward of the allowance for credit losses for available-for-sale fixed maturity securities is shown below for the three and nine months ended September 30, 2023.

FOR THE THREE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	Corporate Debt Securities	Residential Mortgage Backed Securities	Commercial Mortgage Backed Securities	Collateralized Debt Securities	Total
Beginning balance	$ (23)	$ —	$ —	$ (16)	**$ (39)**
Credit losses recognized on securities for which credit losses were not previously recorded	(1)	—	(7)	—	**(8)**
Reductions for securities sold during the period	1	(1)	—	—	**—**

Other	257	—	257	4 %
Total	$ 5,902	$ 27	$ 5,929	100 %
Allowance for credit losses			(41)	
Total, net of allowance			$ 5,888	

Allowance for Credit Losses

The rollforward of the allowance for credit losses for mortgage loans is shown below:

FOR THE NINE MONTHS ENDED SEP. 30 US$ MILLIONS	2023	2022
Balance at January 1	$ (41)	$ (1)
Provision	(6)	(37)
Balance at June 30	$ (47)	$ (38)
Recovery (provision)	14	(2)
Balance at September 30	$ (33)	$ (40)

The asset and allowance balances for credit losses for mortgage loans by property-type are shown below:

AS AT	September 30, 2023		December 31, 2022	
US$ MILLIONS	Asset Balance	Allowance	Asset Balance	Allowance
Apartment	$ 1,108	$ (6)	$ 907	$ (1)
Hotel	1,043	(6)	1,114	(6)
Industrial	1,089	(6)	1,050	(4)
Office	971	(5)	1,187	(17)
Parking	415	(2)	420	(6)
Retail	846	(5)	874	(4)
Storage	131	(1)	120	(2)
Other	349	(2)	257	(1)
Total	$ 5,952	$ (33)	$ 5,929	$ (41)

Credit Quality Indicators

Mortgage loans are segregated by property-type and quantitative and qualitative allowance factors are applied. Qualitative factors are developed quarterly based on the pooling of assets with similar risk characteristics and historical loss experience adjusted for the expected trend in the current market environment. Credit losses are pooled by property type as it represents the most similar and reliable risk characteristics in our portfolio. The amortized cost of mortgage loans by year of origination by property-type are shown below:

	Amortized Cost Basis by Origination Year						
US$ MILLIONS	2023	2022	2021	2020	2019	Prior	Total
Apartment	$ 4	$ 505	$ 275	84	$ 140	$ 100	**$ 1,108**
Hotel	129	227	39	39	129	480	**1,043**
Industrial	—	314	185	216	129	245	**1,089**
Office	10	120	31	24	46	740	**971**
Parking	—	55	29	27	13	291	**415**
Retail	—	264	117	64	35	366	**846**
Storage	11	8	22	36	38	16	**131**
Other	58	147	45	—	28	71	**349**
Total	**$ 212**	**$ 1,640**	**$ 743**	**$ 490**	**$ 558**	**$ 2,309**	**$ 5,952**
Allowance for credit losses							**(33)**
Total, net of allowance							**$ 5,919**

Generally, mortgage loans are secured by first liens on income-producing real estate with a loan-to-value ratio of up to 75%. It is the Company's policy to not accrue interest on loans that are 90 days delinquent and where amounts are determined to be uncollectible. At September 30, 2023, two commercial loans were past due over 90 days or in non-accrual status (December 31, 2022 - one commercial loan).

NOTE 6. PRIVATE LOANS

The following table summarizes the credit ratings for private loans:

AS AT US$ MILLIONS	September 30, 2023	December 31, 2022
A or higher	$ 50	$ 4
BBB	82	17
BB and below	742	395
Unrated	830	728
Total	$ 1,704	$ 1,144

Allowance for Credit Losses

The rollforward of the allowance for credit losses for private loans is shown below:

FOR THE PERIOD ENDED SEP. 30 US$ MILLIONS	2023	2022
Balance at January 1	$ (28)	$ (12)
Recoveries	1	3
Balance at March 31	(27)	(9)
Provision	(3)	(4)
Balance at June 30	(30)	(13)
Provision	(12)	(9)
Balance at September 30	$ (42)	$ (22)

NOTE 7. REAL ESTATE AND REAL ESTATE PARTNERSHIPS

The carrying amount of investment real estate, net of accumulated depreciation, and real estate partnerships by property-type are as follows:

AS AT US$ MILLIONS, EXCEPT FOR PERCENTAGES	September 30, 2023		December 31, 2022	
	Amount	Percentage	Amount	Percentage
Hotel	$ 478	13 %	$ 77	7 %
Industrial	439	11 %	168	16 %
Land	49	1 %	48	5 %
Office	1,890	49 %	243	23 %
Retail	212	6 %	212	20 %
Apartments	492	13 %	254	25 %
Student housing	85	2 %	—	— %
Other	179	5 %	34	4 %
Total	$ 3,824	100 %	$ 1,036	100 %

The Company regularly invests in real estate partnerships and frequently participates in the design with the sponsor, but in most cases, its involvement is limited to financing. Some of these partnerships have been determined to be variable interest entities ("VIEs"). In certain instances, in addition to an economic interest in the entity, the Company holds the power to direct the most significant activities of the entity and is deemed the primary beneficiary. The assets of the consolidated VIEs are restricted and must first be used to settle their liabilities. Creditors or beneficial interest holders of these VIEs have no recourse to the general credit of the Company, as the Company's obligation is limited to the amount of its committed investment. The Company has not provided financial or other support to the VIEs in the form of liquidity arrangements, guarantees, or other commitments to third-parties that may affect the fair value or risk of its variable interest in the VIEs as at September 30, 2023 or December 31, 2022.

NOTE 8. EQUITY METHOD INVESTMENTS

The Company's total investment in investment funds, real estate partnerships, and other partnerships of which substantially all are limited liability companies ("LLCs") or limited partnerships as at September 30, 2023 and December 31, 2022, was $5.0 billion and $2.8 billion, respectively.

The Company generally recognizes its share of earnings in its equity method investments within net investment income using a three-month lag in instances where the investee's financial information is not sufficiently timely or when the investee's reporting period differs from the Company's reporting period.

Aggregate net income of these entities totaled $128 million and $93 million for the nine months ended September 30, 2023 and 2022, respectively. Aggregate net income (from the underlying entities in which the Company invests is primarily comprised of investment income, including recurring investment income (loss) and realized and unrealized investment gains (losses).

NOTE 9. DERIVATIVE INSTRUMENTS

The Company manages risks associated with certain assets and liabilities by using derivative financial instruments. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates or other financial instruments. The Company does not invest in derivatives for speculative purposes.

Foreign exchange forwards, options, cross currency swaps, interest rate swaps and warrants are over-the-counter contractual agreements negotiated between counterparties. The Company purchases equity-indexed options as economic hedges against fluctuations in the equity markets to which equity-indexed products are exposed. Equity-indexed contracts include a fixed host universal-life insurance or annuity contract and an equity-indexed embedded derivative. Futures contracts are traded on an organized market and are contractual obligations to buy or to sell a financial instrument at a predetermined future time at a given price.

The notional principal represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments which have a positive value, should the counterparty default.

Derivatives, except for embedded derivatives, are included in Other Invested Assets or Other Liabilities, at fair value. Embedded derivative assets and liabilities on Modco arrangements and embedded derivative liabilities on indexed annuity and variable annuity products are included on the Statements of Financial Position within the Reinsurance Funds Withheld, and Policyholders' Account Balances lines respectively, at fair value.

The notional and fair values of derivative instruments, presented on the balance sheet, are shown below:

US$ MILLIONS	Primary underlying risk	Location in the Consolidated Statements of Financial Position	**September 30, 2023** Notional Amount	**September 30, 2023** Carrying Value / Fair Value Assets	**September 30, 2023** Carrying Value / Fair Value Liabilities	December 31, 2022 Notional Amount	December 31, 2022 Carrying Value / Fair Value Assets	December 31, 2022 Carrying Value / Fair Value Liabilities

			$ 15,637	**$ 213**	**$ (1,026)**	$ 11,797	$ 317	$ (944)

Derivatives Designated as Hedging Instruments

The Company has designated and accounted for certain foreign exchange forwards as fair value hedges to protect a portion of available-for-sale fixed maturity securities against changes in fair value due to changes in exchange rates.

For derivative financial instruments that were designated and qualified as fair value hedges, the gain or loss on the portion of the derivative instrument included in the assessment of hedge effectiveness and the offsetting gain or loss on the hedged item attributable to the hedged risk were recognized in the same line item in the Statements of Operations. The unrealized gain or loss attributable to changes in exchange rates on the available-for-sale fixed maturity securities that were designated as part of the hedge were reclassified out of Accumulated other comprehensive income (loss) into Investment related gains (losses), net in the Statements of Operations. The remaining change in unrealized gain or loss on the hedged item not associated with the risk being hedged remained as a component of Other comprehensive income (loss).

The following represents the carrying amount and cumulative fair value hedging adjustments for items designated and qualifying as hedged items in fair value hedges:

US$ MILLIONS	**September 30, 2023**		December 31, 2022	
Location in the Consolidated Statements of Financial Position	**Carrying Amount of the Hedged Assets**	**Cumulative Amount of Fair Value Hedging Adjustments Included in the Carrying Amount of Hedged Assets**	Carrying Amount of the Hedged Assets	Cumulative Amount of Fair Value Hedging Adjustments Included in the Carrying Amount of Hedged Assets
Available-for-sale fixed maturity securities	**$ 1,430**	**$ 36**	$ —	$ —

Derivative Exposure

The Company's use of derivative instruments exposes it to credit risk in the event of non-performance by counterparties. The Company has a policy of only dealing with counterparties it believes are creditworthy and obtaining sufficient collateral where appropriate, as a means of mitigating the financial loss from defaults. The Company holds collateral in cash and notes secured by U.S. government-backed assets. The non-performance risk is the net counterparty exposure based on fair value of open contracts less fair value of collateral held. The Company maintains master netting agreements with its current active trading partners. A right of offset has been applied to collateral that supports credit risk and has been recorded in the condensed consolidated statements of financial position as an offset to "Other invested assets" with an associated payable to "Other liabilities" for excess collateral.

Information regarding the Company's exposure to credit loss on the derivatives it holds is presented below:

AS AT SEP. 30, 2023 US$ MILLIONS **Derivative Type**	**Derivative Fair Value**	**Collateral Held in Cash**	**Collateral Held in Invested Assets**	**Total Collateral Held**	**Collateral Amounts Used to Offset Exposure**	**Excess Collateral**	**Exposure Net of Collateral**

Total financial liabilities	**$ 5,241**	**$ 5,199**	$ 5,927	$ 5,900

1. Balance includes $32 million and $33 million of assets, and corresponding liabilities, that are not subject to fair value hierarchy as at September 30, 2023 and December 31, 2022, respectively.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. The Company has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities
Level 2	Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation

Valuation Techniques for Financial Instruments Recorded at Fair Value

Available-for-sale Fixed Maturity Securities and Equity Options — The Company utilizes pricing services to estimate fair value measurements. The fair value for available-for-sale fixed maturity securities that are disclosed as Level 1 measurements are based on unadjusted quoted market prices for identical assets that are readily available in an active market. The estimates of fair value for most available-for-sale fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for available-for-sale fixed maturity securities that have quoted prices in active markets. Since available-for-sale fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received from the pricing service. The pricing service utilized by The Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

The Company holds a small amount of private placement debt and available-for-sale fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from an independent pricing source (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate the price is indicative only, the Company includes these fair value estimates in Level 3.

For securities priced using a quote from an independent pricing source, such as the equity-indexed options and certain available-for-sale fixed maturity securities, The Company uses a market-based fair value analysis to validate the reasonableness of prices received. Price variances above a certain threshold are analyzed further to determine if any pricing issue exists. This analysis is performed quarterly.

Equity Securities — For publicly-traded equity securities, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements. For certain preferred stock, current market quotes in active markets are unavailable. In these instances, an estimated fair value is received from the pricing service. The service utilizes similar methodologies to price preferred stocks as it does for available-for-sale fixed maturity securities. If applicable, these estimates would be disclosed as Level 2 measurements. The Company tests the accuracy of the information provided by reference to other services annually.

Short-term Investments — Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

Separate Account Assets and Liabilities — Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of The Company. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. The Company reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from The Company's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, The Company's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the condensed consolidated statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of The Company.

The separate account assets included on the quantitative disclosures fair value hierarchy table are comprised of short-term investments, equity securities, and available-for-sale fixed maturity. Equity securities are classified as Level 1 measurements. Short-term investments and available-for-sale fixed maturity securities are classified as Level 2 measurements. These classifications for separate account assets reflect the same fair value level methodologies as listed above as they are derived from the same vendors and follow the same process.

The separate account assets also include cash and cash equivalents, investment funds, accrued investment income, and receivables for securities. These are not included in the quantitative disclosures of fair value hierarchy table.

No gains or losses were recognized on assets transferred to separate accounts for the three and nine months ended September 30, 2023 and 2022, respectively.

Reinsurance Funds Withheld — Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

Market Risk Benefits are classified as Level 3 fair value measurements as the fair value is based on unobservable inputs. The key assumptions for calculating the fair value of the MRBs are market assumptions such as equity market returns, interest rate levels, market volatility and correlations and policyholder behavior assumptions such as lapse, mortality, utilization and withdrawal patterns. Risk margins are included in the policyholder behavior assumptions. The assumptions are based on a combination of historical data and actuarial judgment. The MRBs are valued using stochastic models that incorporate a spread reflecting our nonperformance risk.

Derivative Assets/Derivative Liabilities

- Foreign currency forward contracts — discounted cash flow model — forward exchange rates (from observable forward exchange rates at the end of the reporting period); discounted at a credit adjusted rate.
- Interest rate contracts - discounted cash flow model - forward interest rates (from observable yield curves) and applicable credit spreads discounted at a credit adjusted rate.

- Warrants – intrinsic value based on the difference between strike prices and the unadjusted quoted prices of underlying equity investments in active markets.
- Equity-index options – inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Embedded Derivatives — The amounts reported within policyholder contract deposits include equity linked interest crediting rates based on the S&P 500 within indexed annuities and indexed life. The following unobservable inputs are used for measuring the fair value of the embedded derivatives associated with the policyholder contract liabilities:

- Lapse rate assumptions are determined by company experience. Lapse rates are generally assumed to be lower during a contract's surrender charge period and then higher once the surrender charge period has ended. Decreases to the assumed lapse rates generally increase the fair value of the liability as more policyholders persist to collect the crediting interest pertaining to the indexed product. Increases to the lapse rate assumption decrease the fair value.
- Mortality rate assumptions vary by age and gender based on company and industry experience. Decreases to the assumed mortality rates increase the fair value of the liabilities as more policyholders earn crediting interest. Increases to the assumed mortality rates decrease the fair value as higher decrements reduce the potential for future interest credits.
- Equity volatility assumptions begin with current market volatilities and grow to long-term values. Increases to the assumed volatility will increase the fair value of liabilities, as future projections will produce higher increases in the linked index.

Fair values of indexed life and annuity liabilities are calculated using the discounted cash flow technique. Shown below are the significant unobservable inputs used to calculate the Level 3 fair value of the embedded derivatives within policyholder contract deposits (in millions, except range percentages):

AS AT US$ MILLIONS	Fair Value September 30, 2023	 December 31, 2022	Unobservable Input
Embedded derivative			
Indexed Annuities and indexed life	**$ 825**	$ 726	Lapse Rate Mortality Multiplier Equity Volatility

Funds withheld liabilities — Valuation model is based on quoted prices of similar traded securities in active markets. For example, interest rates and yield curves observed at commonly quoted intervals, implied volatility, credit spread and market-corroborated inputs.

Equity-Index Options — Certain over-the-counter equity options are valued using models that are widely accepted in the financial services industry with non-market observable inputs such as volatility and forward price/dividend assumptions. Other primary inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Available-for-sale fixed maturity Securities — These bonds use cost as the best estimate of fair value. They are valued at cost because the value would not change unless there is a fundamental deterioration in the portfolio. There is no observable market valuation price or third-party sources that provide market values for these securities since they are not publicly traded. The common and preferred stock are valued at market transaction, option pricing method, or guideline public company method based on the best available information.

Separately Managed Accounts — The separately managed account manager uses the mid-point of a range from a third-party to price these securities. Discounted cash flows (yield analysis) and market transactions approach are used in the valuation. They use discount rates which is considered an unobservable input.
The fair value hierarchy measurements of the financial instruments are shown below:

	Assets and Liabilities Carried at Fair Value by Hierarchy Level at September 30, 2023			
US$ MILLIONS	**Total Fair Value**	**Level 1**	**Level 2**	**Level 3**

Fair Value Information About Financial Instruments Not Recorded at Fair Value

Information about fair value estimates for financial instruments not measured at fair value is discussed below:

Mortgage Loans — The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan-by-loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property-type, lien priority, payment type and current status.

Policy Loans — The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, as such the carrying value of policy loans approximates fair value.

Corporate and Subsidiary Borrowings — Corporate and Subsidiary Borrowings are carried at outstanding principal balance. The carrying value approximates fair value because the carrying value represents the amount owing and payable to the creditor at the balance sheet date.

Notes Payable — Notes payable are carried at outstanding principal balance. The carrying value of the notes payable approximates fair value because the underlying interest rates approximate market rates at the balance sheet date.

The carrying value and estimated fair value of financial instruments not recorded at fair value on a recurring basis are shown below:

AS AT SEP. 30, 2023 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,919	$ 5,587
Private loans, net of allowance	3	1,704	1,713
Policy loans	3	383	383
Other invested assets, excluding derivatives and separately managed accounts	3	48	31
Total financial assets		**$ 8,054**	**$ 7,714**
Financial liabilities			
Corporate and subsidiary borrowings	3	$ 2,737	$ 2,695
Notes payable	3	170	170
Total financial liabilities		**$ 2,907**	**$ 2,865**

AS AT DEC. 31, 2022 US$ MILLIONS	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Mortgage loans on real estate, net of allowance	3	$ 5,888	$ 5,637
Private loans, net of allowance	3	1,144	1,086
Policy loans	3	374	374
Other invested assets, excluding derivatives and separately managed accounts	3	127	127

There were no transfers between Level 1 and Level 2 fair value hierarchies during the periods presented. The Company's valuation of financial instruments categorized as Level 3 in the fair value hierarchy are based on valuation techniques that use significant inputs that are unobservable or had a decline in market activity that obscured observability. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and discounted cash flow methodology based on spread/yield assumptions.

The following summarizes the fair value, valuation techniques and unobservable inputs of the Level 3 fair value measurements:

Type of Asset	Valuation Techniques	Significant Unobservable Inputs
Equity-index Option	Heston and Black-Scholes Valuation models	• Interest rate (risk-free rate assumptions) • Underlying equity quoted index prices
Available-for-sale fixed maturity securities	Corporate debt securities • Discounted cash flows (yield analysis) • Income approach • Price at cost	Corporate debt securities • Contractual cash flows • Duration • Call provisions • Weighted-average life • Risk premium • Coupon rate
	Collateralized debt securities • Broker quotes • Income approach	Collateralized debt securities • Contractual cash flows • Weighted-average coupon and maturity • Collateral type • Loss severity • Geography
Common shares, preferred shares and private equity	• Broker quotes • Income approach • Current Value Method ("CVM") • Guideline public company method[1]	• Security structure • Last Twelve Months ("LTM") Revenue Multiple[3] • Next Calendar Year ("NCY") Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM EBITDA Multiple[2]
Separately managed accounts	Common Stock and Warrants • Guideline public company method uses price multiples from data on comparable public companies. • Option pricing method • CVM	Common Stock and Warrants • NCY Multiple • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2] • Term • Volatility • Discount for lack of marketability ("DLOM")
	Preferred Stock • Guideline public company method uses price multiples from data on comparable public companies. • CVM	Preferred Stock • NCY Revenue Multiple[5] • NCY +1 EBITDA Multiple[4] • LTM Revenue Multiple[3] • LTM EBITDA Multiple[2]
	Fixed Income • Discounted cash flows (yield analysis) • market transactions approach • CVM • Cost	Fixed Income • Discount rate • NCY EBITDA

1. Guideline public company method uses price multiples from data on comparable public companies. Multiples are then adjusted to account for differences between what is being valued and comparable firms.
2. Last Twelve Months ("LTM") EBITDA Multiple valuation metric shows earnings before interest, taxes, depreciation and amortization adjustments for the past 12-month period.
3. LTM Revenue Multiple valuation metric shows revenue for the past 12-month period.
4. Next Calendar Year ("NCY") EBITDA Multiple is the forecasted EBITDA expected to be achieved over the next calendar year.
5. NCY Revenue forecast revenue over the next calendar year.

NOTE 12. SEPARATE ACCOUNT ASSETS AND LIABILITIES

The following table presents the change of the Company's separate account assets and liabilities:

AS AT AND FOR THE NINE MONTHS ENDED SEP. 30 US$ MILLIONS	**2023**	2022
Balance, beginning of period	**$ 1,045**	$ —

Balance, end of period	**$ 1,090**	$ 1,003

NOTE 13. DEFERRED ACQUISITION COSTS AND VALUE OF BUSINESS ACQUIRED

The following table presents a rollforward of deferred acquisition costs and value of business acquired for the periods indicated:

FOR THE NINE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	**Direct Insurance**	**Reinsurance**	**Total**
Balance, beginning of period	$ 661	$ 925	**$ 1,586**
Additions	648	518	**1,166**
Amortization	(398)	(52)	**(450)**
Net change	250	466	**716**
Balance, end of period	**$ 911**	**$ 1,391**	**$ 2,302**

FOR THE NINE MONTHS ENDED SEP. 30, 2022 US$ MILLIONS	**Direct Insurance**	**Reinsurance**	**Total**
Balance, beginning of period	$ —	$ 710	$ 710
Acquisition from business combinations and additions	797	201	998
Amortization	(168)	(38)	(206)
Net change	629	163	792
Balance, end of period	**$ 629**	**$ 873**	**$ 1,502**

The following table presents a rollforward of VOBA for the periods indicated:

AS AT AND FOR THE NINE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	VOBA Asset
Balance, beginning of period	$ 404
Additions	36
Amortization	(63)
Balance, end of period	**$ 377**

AS AT AND FOR THE NINE MONTHS ENDED SEP. 30, 2022 US$ MILLIONS	VOBA Asset
Balance, beginning of period	$ —
Acquisition from business combination	538
Amortization	(88)
Net change	450
Balance, end of period	**$ 450**

The following table provides the projected VOBA asset amortization expenses for a five-year period and thereafter:

Years	**VOBA Asset**
2023	$ 8
2024	31
2025	27
2026	25
2027	22
Thereafter	264
Total amortization expense	**$ 377**

NOTE 14. ACQUISITION OF BUSINESS

On May 25, 2022, the Company acquired American National. American National offers a broad portfolio of insurance products, including individual and group life insurance, annuities, health insurance, and property and casualty insurance. Under the terms of the Merger Agreement, the Company acquired 100% of all American National issued and outstanding shares in exchange for $190 per share, which is equivalent to $5.1 billion. The consideration was all cash. The Company acquired all assets and assumed all liabilities of American National as of the closing date, and consolidates the business for financial statement purposes. The acquired business contributed revenues of $223 million and net profit of $16 million to the Company for the period from May 25 to June 30, 2022.

As part of re-assessing the final valuations of certain assets, such as intangible assets and goodwill, and certain liabilities, the Company recognized measurement period adjustments to reflect new information obtained about facts and circumstances that existed as of the acquisition date. Measurement period adjustments consist primarily with a decrease of $37 million to property and equipment, a decrease of $16 million to value of business acquired, an increase of $19 million to goodwill, a decrease of $29 million to future policy benefits, and a decrease of $5 million to other liabilities. The valuation has been finalized in the second quarter of 2023 as follows:

Assets acquired	
Cash and cash equivalents	$ 1,021
Investments	22,519
Accrued investment income	101
Reinsurance recoverables	45
Premiums due and other receivables	437
Deferred tax assets	374
Property and equipment	138
Prepaid pension	149
Equity accounted investment	1,402
Deferred acquisition costs and value of business acquired	555
Reinsurance assets	410
Investment properties	541
Other assets	198
Separate account assets	1,123
Total assets acquired	**29,013**
Liabilities assumed	
Future policy benefits	5,304
Policyholders' account balances	13,880
Policy and contract claims	1,706
Unearned premium reserve	1,073
Other policyholder funds	324
Notes payable	158
Other liabilities	449
Separate account liabilities	1,123
Total liabilities assumed	**24,017**
Less: Non-controlling interest	**(10)**
Net assets acquired	**4,986**
Goodwill	**$ 121**

NOTE 15. ASSETS HELD FOR SALE

In June 2023, the Company finalized an agreement to sell its health insurance business to a third party. The business is being acquired by a third party for cash through the acquisition of 100% of the stock of one wholly-owned subsidiaries and certain reinsurance transactions. The completion of the transaction will be conditional upon obtaining the required regulatory approvals and is expected to close in the fourth quarter of 2023.

The carrying amounts of the major classes of assets and liabilities classified as held-for-sale are shown below:

AS AT SEP. 30, 2023 US$ MILLIONS	**2023**
Cash and cash equivalents	$ 13
Accrued investment income	8
Reinsurance recoverables	186
Premiums due and other receivables	43
Other assets	11
Total assets	**261**
Policy and contract claims	189
Other liabilities	56
Total liabilities	**$ 245**

There were no assets held for sale as at December 31, 2022.

NOTE 16. FUTURE POLICY BENEFITS

The reconciliation of the balances described in the table below to the future policy benefits in the statements of financial position is as follows.

AS AT SEP. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS	**2023**	2022
Future policy benefits		
Direct Insurance	**$ 2,874**	$ 3,136
Pension Risk Transfer	**3,619**	2,964
Deferred profit liability		
Direct Insurance	**68**	24
Pension Risk Transfer	**219**	187
Other contracts and VOBA liability	**1,797**	1,700
Total future policy benefits	**$ 8,577**	$ 8,011

a. Future Policy Benefits

The balances and changes in the liability for future policy benefits are as follows:

AS AT AND FOR THE NINE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	Direct Insurance	Pension Risk Transfer	Total
Present value of expected net premiums			
Balance, beginning of period	$ 3,775	$ —	**$ 3,775**

Pension Risk Transfer	**955**	2,628	**80**	77

The weighted-average interest rate follows:

FOR THE NINE MONTHS ENDED SEP. 30	**2023**	2022
Direct Insurance		
Interest accretion rate	**5 %**	4 %
Current discount rate	**6 %**	5 %
Pension Risk Transfer		
Interest accretion rate	**4 %**	4 %
Current discount rate	**6 %**	5 %

b. Deferred Profit Liability

For limited-pay products, gross premiums received in excess of net premiums are deferred at initial recognition as deferred profit liability ("DPL"). The assumptions and reflection of experience for DPL will be consistent with those used in the liability for future policy benefits, including the remeasurement methodology. The discount rate used in calculating DPL will be consistent with the locked-in rate used for the liability for future policy benefits.

DPL is amortized in income on a constant basis in relation with benefit payments. For life contingent payout annuities, DPL is amortized over expected future benefit payments.

For limited payment traditional life permanent contracts, DPL is amortized over face amount for limited payment traditional life permanent contracts.

NOTE 17. POLICYHOLDERS' ACCOUNT BALANCES

Policyholders' account balances relate to investment-type contracts and universal life-type policies. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase and non-variable group annuity contracts. Policyholder account balances are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest, ranging from 1.0% to 8.0% (some annuities have enhanced first year crediting rates ranging from 1.0% to 7.0%), less expenses, mortality charges, and withdrawals; and (iii) fair value adjustment.

The balances and changes in policyholders' account balances follow.

AS AT AND FOR THE NINE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	Direct Insurance	Reinsurance	Total

Total	**$ 14**	**$ (184)**	**$ (170)**	$ 10	$ (124)	$ (114)

NOTE 19. LIABILITY FOR UNPAID CLAIMS AND CLAIM ADJUSTMENT EXPENSES

The liability for unpaid claims and claim adjustment expenses (“claims”) for health and property and casualty insurance is included in “Policy and contract claims” in the statements of financial position and is the amount estimated for incurred but not reported (“IBNR”) claims and claims that have been reported but not settled. The liability for unpaid claims is estimated based upon American National’s historical experience and actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs, less anticipated salvage and subrogation. The effects of the changes are included in the statements of operations in the year in which the changes occur. The time value of money is not taken into account for the purpose of calculating the liability for unpaid claims. There have been no significant changes in methodologies or assumptions used to calculate the liability for unpaid claims and claim adjustment expenses.

Information regarding the liability for unpaid claims is shown below:

FOR THE NINE MONTHS ENDED SEP. 30 US$ MILLIONS	**2023**	2022
Unpaid claims balance, beginning	**$ 1,555**	$ —
Less: Reinsurance recoverables	**(305)**	—
Net beginning balance	**1,250**	—
Acquisition from business combination	—	1,215
Incurred related to		
Current	**1,227**	510
Prior years	**(25)**	(20)
Total incurred claims	**1,202**	490
Paid claims related to		
Current	**656**	324
Prior years	**432**	123
Total paid claims	**1,088**	447
Net balance	**1,364**	1,258
Add: Reinsurance recoverables	**316**	316
Unpaid claims balance, ending	**$ 1,680**	$ 1,574

The estimates for ultimate incurred claims attributable to insured events of prior years decreased by approximately $25 million and $20 million respectively during the first nine months of 2023 and 2022. The favorable development in 2023 was a reflection of lower-than-anticipated settlement of losses emerging from commercial lines of business.

For short-duration health insurance claims, the total of IBNR plus expected development on reported claims included in the liability for unpaid claims and claim adjustment expenses at September 30, 2023 and December 31, 2022 was $17 million and $16 million, respectively.

NOTE 20. CORPORATE AND SUBSIDIARY BORROWINGS

The Company and its subsidiaries have bilateral revolving credit facilities backed by third-party financial institutions. The total available amount on the credit facilities is $550 million. The credit facilities bear interest at the specified SOFR, CDOR, or bankers' acceptance rate plus a spread and have a maturity date of June 2028. As at September 30, 2023, $16 million was drawn on the bilateral credit facilities.

The Company has a $1.0 billion 364-day revolving credit facility, maturing in October 2023, for the purpose of temporarily warehousing investments that will ultimately be transferred into our insurance investment portfolios in the near term. The facility borrowings are secured by the underlying investments related to the credit facility drawings. As at September 30, 2023, the facility had $726 million outstanding. The facility has been subsequently extended to October 2024.

The Company also has a $500 million 364-day secured facility, maturing in April 2024. As at September 30, 2023, the facility was fully drawn.

The above noted facilities require the Company to maintain a minimum net worth covenant. As at September 30, 2023, the Company was in compliance with its financial covenants.

The Company also has a revolving credit facility with Brookfield Corporation[1] ("Brookfield") that, as at September 30, 2023, permitted borrowings of up to $400 million. As at September 30, 2023, there were no amounts drawn on the facility.

Subsidiary borrowings of $1.5 billion relate to debt issued at American National. $1.0 billion matures in 2027 and the remaining $500 million matures in 2032.

NOTE 21. INCOME TAXES

For the three and nine months ended September 30, 2023, the effective tax rates on pre-tax income were recoveries of 14% and 2%, respectively. The Company's effective tax rate differed from the statutory tax rate of 18% and 17% for the same respective periods, primarily due to international operations subject to different tax rates.

For the three and nine months ended September 30, 2022, the effective tax rates on pre-tax income were expenses of 19% and 10%, respectively. The Company's effective tax rate differed from the statutory tax rate of 16% for the same respective periods, primarily due to international operations subject to different tax rates.

1. Brookfield Corporation and its subsidiaries , controlled companies, and any investment funds sponsored, managed, or controlled by Brookfield Corporation

NOTE 22. SHARE CAPITAL

As at September 30, 2023 and December 31, 2022, the Company is authorized to issue:

i. 1,000,000,000 Exchangeable Class A Limited Voting Shares with a par value of $33.49 per share;

ii. 500,000,000 Exchangeable Class A-1 Limited Non-Voting Shares with a par value of $33.49 per share;

iii. 500,000 Class B Limited Voting Shares with a par value of $33.49 per share;

iv. 1,000,000,000 Class C Non-Voting Shares with a par value of $1 per share;

v. 100,000,000 Class A Senior Preferred Shares (issuable in series) with a par value of $25 per share;

vi. 100,000,000 Class B Senior Preferred Shares (issuable in series) with a par value of CAD$25 per share;

vii. 1,000,000,000 Class A Junior Preferred Shares (issuable in series) with a par value of $25 per share;

viii. 1,000,000,000 Class B Junior Preferred Shares (issuable in series) with a par value of CAD$25 per share.

The share capital of the Company as at September 30, 2023 and December 31, 2022 comprises the following:

AS AT US$ MILLIONS, EXCEPT SHARE AMOUNTS	**September 30, 2023**		December 31, 2022	
	Number of shares	**Value**	Number of shares	Value
Issued				
Class A exchangeable shares	**10,450,952**	**$ 447**	9,594,989	$ 422
Class B shares	**24,000**	**1**	24,000	1
Class C shares	**102,056,784**	**3,607**	40,934,623	1,467
Class A junior preferred shares	**100,460,280**	**2,663**	100,460,280	2,580

The movement of shares issued and outstanding is as follows:

FOR THE PERIODS ENDED SEP. 30	**2023**			
	Redeemable junior preferred shares	**Class A exchangeable shares**	**Class B shares**	**Class C shares**
Outstanding, January 1	100,460,280	9,594,989	24,000	40,934,623
Issuances	—	1,165,000	—	380,268
Repurchases	—	(309,037)	—	—
Outstanding, June 30	**100,460,280**	**10,450,952**	**24,000**	**41,314,891**
Issuances	**—**	**—**	**—**	60,741,893
Outstanding, September 30	**100,460,280**	**10,450,952**	**24,000**	**102,056,784**

FOR THE PERIODS ENDED SEP. 30	2022			
	Redeemable junior preferred shares	Class A exchangeable shares	Class B shares	Class C shares
Outstanding, January 1	—	10,877,989	24,000	23,544,548
Issuances	98,351,347	—	—	11,270,466
Outstanding, June 30	**98,351,347**	**10,877,989**	**24,000**	**34,815,014**
Changes in the period	**—**	**—**	**—**	**—**
Outstanding, September 30	**98,351,347**	**10,877,989**	**24,000**	**34,815,014**

At September 30, 2023, there were $151 million of accrued dividends on Class A junior preferred shares (December 31, 2022 – $68 million). The redemption value is equal to the carrying value as of September 30, 2023 and December 31, 2022.

NOTE 23. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The components of and changes in the accumulated other comprehensive income ("AOCI"), and the related tax effects, are shown below:

Class C shareholders	**47**	105	**253**	274
Non-controlling interests	**1**	4	**3**	2
Earnings per share per class C share - basic	**$ 0.65**	$ 3.03	**$ 4.92**	$ 9.51
Weighted average shares – Class C shares	**71,685,838**	34,815,014	**51,463,427**	28,828,869

NOTE 25. RELATED PARTY TRANSACTIONS

In the normal course of operations, the Company entered into the transactions below with related parties.

a) Brookfield Reinsurance agreements

The Company has an outstanding equity commitment in the amount of $2.0 billion from Brookfield to fund future growth, which the Company may draw on from time to time. As of September 30, 2023, there were no amounts drawn under the equity commitment.

In 2021, the Company entered into a credit agreement with Brookfield as lender for a three-year revolving credit facility which subsequently increased to $400 million in March 2022. As of September 30, 2023, there were no amounts drawn on the credit facilities under this agreement.

The following table reflects the related party agreements and transactions for the nine months ended September 30 in the statements of operations:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended		Nine Months Ended	
	2023	2022	**2023**	2022
Administration fees with Brookfield	**2.1**	0.6	**5.5**	1.6
Investment management fees to Brookfield Asset Management	**16.4**	14.0	**46.4**	25.0
Outsourcing fees paid to Brookfield	**0.9**	—	**1.8**	0.5
Outsourcing arrangements payable	**0.5**	—	**0.8**	0.2

b) Other related party transactions

On March 10, 2020, Brookfield Annuity Corporation ("BAC") entered into lease and building service arrangements with Brookfield Properties (Canada) Inc. and BPO Ontario Properties Ltd. (collectively, "BPO"), subsidiaries of Brookfield. The amount paid to BPO for the leased office facilities and building maintenance for the nine months ended September 30, 2023 totaled $0.5 million (September 30, 2022 – $0.5 million). As at September 30, 2023, lease liabilities relating to this arrangement were $1 million (September 30, 2022 – $1.5 million).

In the current period, the Company purchased related party investments of $3.0 billion, of which $1.6 billion relates to an investment associated with a Brookfield real estate private fund. Investment transactions with related parties are accounted for in the same manner as those with unrelated parties in the financial statements.

The Company had $430 million of cash on deposit with wholly-owned subsidiaries of Brookfield as at September 30, 2023 (September 30, 2022 – $40 million).

NOTE 26. SEGMENT REPORTING

The Company's operations are organized into three operating segments: Direct Insurance, Reinsurance and PRT. These segments are regularly reviewed by the Company’s chief operating decision maker (“CODM”) for the purpose of allocating resources to the segment and to assess its performance.

The key measure used by the CODM in assessing performance and in making resource allocation decisions is Distributable Operating Earnings (“Distributable Operating Earnings”, or “DOE”).

Distributable Operating Earnings is calculated as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of returns on equity invested in certain variable interest entities and the Company’s share of adjusted earnings from investments in certain associates. DOE allows the CODM to evaluate the Company’s segments on the basis of return on invested capital generated by its operations and allows the Company to evaluate the performance of its segments.

The tables below provide each segment’s results in the format that the CODM reviews its reporting segments to make decisions and assess performance.

FOR THE THREE MONTHS ENDED SEP. 30, 2023 US$ MILLIONS	Direct Insurance	Reinsurance	Pension Risk Transfer	**Total**
Net premiums and other policy related revenues	$ 741	$ —	$ 278	**$ 1,019**

Our Reinsurance business is focused primarily on the reinsurance of annuity-based products and transacts with direct insurers and other reinsurers. All existing reinsurance contracts are with U.S.-based insurance companies. Total premium revenues recorded within our Reinsurance segment for the nine months ended September 30, 2023 were from transactions with two U.S. ceding companies.

Total premium revenues recorded within our PRT segment for the nine months ended September 30, 2023, and 2022 were from Canadian and U.S. counterparties.

Total premium revenues recorded within our Direct Insurance segment for the nine months ended September 30, 2023 were from transactions with U.S. retail customers.

For the purpose of monitoring segment performance and allocating resources between segments, the CODM monitors the assets, including investments accounted for using the equity method, liabilities and common equity attributable to each segment.

AS AT SEP. 30, 2023 US$ MILLIONS	Reinsurance	Pension Risk Transfer	Direct Insurance	Other[1]	**Total**
Assets	$ 11,605	$ 4,174	$ 34,190	$ 1,208	**$ 51,177**

Equity and other	1,672	204	3,755	(1,366)	**4,265**

1. Other represents assets, liabilities and common equity attributable to other activities that do not constitute a segment.

NOTE 27. FINANCIAL COMMITMENTS AND CONTINGENCIES

Commitments

As at September 30, 2023, subsidiaries of the Company had investment commitment agreements with third parties to the maximum of approximately $12.6 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at September 30, 2023, the total unfunded commitment amounts were $5.6 billion.

The Company's subsidiary had aggregate commitments at September 30, 2023 to purchase, expand or improve real estate, to fund fixed interest rate mortgage loans, and to purchase other invested assets of $1.7 billion of which $701 million is expected to be funded in 2023, with the remaining balance of $1.0 billion funded in 2024 and beyond.

In addition, the Company's subsidiary had revolving commitments of $113 million expected to be funded during 2023 and 2024, and outstanding letters of credit in the amount of $479 million as of September 30, 2023.

Federal Home Loan Bank (FHLB) Agreements

The Company has access to the FHLB's financial services including advances that provide an attractive funding source for short-term borrowing and for access to other funding agreements. As of September 30, 2023, certain municipal bonds and collateralized mortgage obligations with a fair value of approximately $9 million and commercial mortgage loans of approximately $1.1 billion were on deposit with the FHLB as collateral for borrowing. As of September 30, 2023, the collateral provided borrowing capacity of approximately $657 million. The deposited securities and commercial mortgage loans are included in the Company's statements of financial position within available-for-sale fixed maturity securities and mortgage loans on real estate, net of allowance, respectively.

Litigation

American National and certain subsidiaries are defendants in various lawsuits concerning alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain lawsuits include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing these matters with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on the Company's statements of financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our condensed consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote. Accruals for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, an accrual is recorded based on the lowest amount of the range.

NOTE 28. SUBSEQUENT EVENTS

On October 11, 2023, the Company announced that it has commenced its exchange offer (the “Offer”) whereby holders of Class A Limited Voting Shares (“BN Shares”) of Brookfield Corporation have the opportunity to voluntarily exchange up to 40,000,000 BN Shares for newly-issued Brookfield Reinsurance Shares on a one-for-one basis.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

This management's discussion and analysis ("MD&A") covers the financial position as of September 30, 2023 and December 31, 2022 and the results of operations for the three and nine months ended September 30, 2023, and 2022. Unless the context requires otherwise, when used in this MD&A, the terms "we", "us", "our", or the "Company" means Brookfield Reinsurance Ltd. together with all of its subsidiaries and the term "Brookfield" means Brookfield Corporation, its subsidiaries and controlled companies and any investment fund sponsored, managed or controlled by Brookfield Corporation or its subsidiaries, and does not, for greater certainty, include us or Oaktree Capital Group, LLC and Atlas OCM Holdings, LLC and its subsidiaries.

In addition to historical information, this MD&A contains forward-looking statements. Readers are cautioned that these forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. See "Forward-Looking Information".

The information in this MD&A should be read in conjunction with the Unaudited Condensed Consolidated Financial Statements ("the financial statements") as of September 30, 2023 and for the three and nine months ended September 30, 2023, and 2022 and the annual audited financial statements for the year ended December 31, 2022 that were filed on Form 6K with the SEC on June 28, 2023. Interim operating results for the three and nine months ended September 30, 2023 are not necessarily indicative of the results expected for the entire year.

Overview of Our Business

Our Company is an exempted company limited by shares incorporated under the laws of Bermuda on December 10, 2020. The Company holds a direct 100% ownership interest in BAM Re Holdings Ltd. ("BAM Re Holdings"), which holds the Company's interest in its operating subsidiaries North End Re Ltd. ("NER Ltd."), North End Re (Cayman) SPC ("NER SPC"), Brookfield Annuity Company ("BAC") and American National Group, LLC. ("American National").

Our Company operates a leading capital solutions business providing insurance and reinsurance services to individuals and institutions. Through its operating subsidiaries, our Company offers a broad range of insurance products and services, including life insurance and annuities, and personal and commercial property and casualty insurance. Our business is presently conducted through our subsidiaries under three operating segments, which we refer to as our Direct Insurance, Reinsurance, and Pension Risk Transfer ("PRT") businesses. The principal operating entities of the Company generally maintain their own independent management and infrastructure. Refer to the "Lines of Business" section of the MD&A for further details on our operating segments' business.

Controls and Procedures

The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report.

Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. There was no change in the Company's internal control over financial reporting during the quarter ended September 30, 2023, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting. The following financial data is derived from our financial statements that are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Non-GAAP measures used in this MD&A are reconciled to or calculated from such values. All dollar references, unless otherwise stated, are in U.S. Dollars.

Key Financial Data

The following table presents key financial data of the Company:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended **2023**	 2022	Nine Months Ended **2023**	 2022
Total assets	**$ 51,177**	$ 41,068	**$ 51,177**	$ 41,068
Net income	**77**	139	**344**	320
Adjusted equity[1]	**7,251**	4,633	**7,251**	4,633
Distributable Operating Earnings[1,2]	**182**	159	**487**	218

1. Distributable operating earnings and adjusted equity are Non-GAAP measures. See "Reconciliation of Non-GAAP Measures".
2. Distributable operating earnings for the three and nine months ended September 30, 2023 is inclusive of net costs of $6 million and $59 million relating to corporate activities outside of our three operating segments, respectively (2022 – $35 million and $36 million, respectively).

Operating Results and Financial Review

CONSOLIDATED RESULTS OF OPERATIONS

The following table summarizes the financial results of our business for the three and nine months ended September 30, 2023 and 2022:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended		Nine Months Ended

Net income before income taxes	**67**	172	**336**	355
Income tax recovery (expense)	**10**	(33)	**8**	(35)
Net income for the period	**$ 77**	$ 139	**$ 344**	$ 320

Three Months Ended September 30, 2023 vs. 2022

For the three months ended September 30, 2023, we reported net income of $77 million, compared to net income of $139 million in the prior year quarter primarily due to higher investment income more than offset by changes in policyholder benefits and claims incurred, and higher interest sensitive contract benefits.

During the quarter, we originated over $2 billion of new gross policies, which include new policies that are not considered premium revenues for the purposes of GAAP. Net premiums were $913 million in the quarter, decreasing moderately compared to prior year quarter, as contributions from our acquisition of American National were offset by lower PRT premiums compared to the prior year quarter.

Net investment income was $442 million in the quarter, compared to $394 million in the prior year quarter, driven by increased spread earnings from growth in our investment portfolio and capital redeployed into higher yielding assets, particularly from available-for-sale fixed maturity securities and investment funds.

The Company had a net investment related loss of $82 million in the quarter, compared to a loss of $218 million in the prior year quarter, mainly driven by lower unrealized mark-to-market losses on equity securities of $54 million in the current quarter, compared to $123 million in the prior year quarter. The current year quarter also had lower losses by $40 million on short-term investments and other invested assets, primarily due to a positive mark-to-market valuation on derivatives.

Net investment results from funds withheld was $71 million in the quarter, compared to $142 million in the prior year quarter. This decline is primarily driven by lower mark-to-market gains on the embedded derivatives within our modified coinsurance ("modco") reinsurance treaties as a result of changes in actuarial assumptions.

Interest sensitive contract benefits represent interest credited to policyholders' account balances from our investment contracts with customers. During the quarter, interest sensitive contract benefits increased by $176 million primarily driven by new businesses entered in the quarter, as well as higher market rates, partially offset by amortization of deferred revenue. Increase in interest sensitive contract benefits related to new investment contracts has an offsetting impact to the net changes in deferred acquisition costs, which resulted in a change of $167 million in the period.

Commissions for acquiring and servicing policies represent sales commission payments or incremental costs of obtaining the contract that are amortized over the contract term subsequent to the initial capitalization, which increased by $14 million, mainly as a result of the increase in reserves since the prior year quarter.

Change in fair value of market risk benefit represents the mark-to-market movements of our liability based on protection to the policyholder from capital market risk. The loss of $35 million in the current quarter is primarily due to the change in interest rates used in the valuation of these liabilities.

Operating expenses were $191 million in the current quarter compared to $169 million in the prior year quarter, mainly as a result of continued growth of the business with higher additional personnel, professional services and transaction expenses.

The increase of $24 million of interest expense on borrowings in the current quarter due to higher interest rates and borrowings on our warehoused investments credit facility.

Compared to the prior year quarter, Distributable Operating Earnings increased by $23 million to $182 million. The increase was driven by higher net investment income given the significant progress made over the last twelve months repositioning assets into higher yielding investment strategies, as well as an overall growth in our investment portfolio.

Nine Months Ended September 30, 2023 vs. 2022

For the nine months ended September 30, 2023, we reported net income of $344 million, compared to net income of $320 million in the prior year period primarily due to growth in the business, redeployment of capital into higher yielding investments and unrealized mark-to-market gains on investments and derivatives.

Net premiums were $2.8 billion for the nine months ended, compared to $2.3 billion in the same period in 2022, primarily due to higher sales and continued growth in the overall business.

Net investment income increased by $637 million for the nine months ended September 30, 2023, relative to the same period in 2022, driven by the growth in our investment portfolio and capital redeployed into higher yielding assets, particularly from our available-for-sale fixed maturity securities and mortgage loans which generated $626 million and $229 million in the current period, respectively, compared to $287 million and $120 million, respectively, in the prior period.

Investment related gains (losses), net was a gain of $104 million in the first nine months of 2023, compared to a loss of $325 million in the prior year period, mainly due to unrealized mark-to-market movements on our equity securities of $87 million gain in the current period compared to a loss of $148 million in the prior period, as well as $112 million gain in the current period compared to $23 million loss in the prior year period from short-term investments and other invested assets.

Net investment results from funds withheld decreased by $26 million in the current year period compared to the same period in 2022. This decline is primarily driven by lower mark-to-market gains on the embedded derivative in our modco reinsurance treaties as a result of changes in actuarial assumptions.

During the period, interest sensitive contract benefits and commissions for acquiring and servicing policies increased by $697 million and $345 million, respectively. The increases are driven by higher sales and an increase in policyholders' account balances, partly as a result of the growth in the business and the acquisition of American National in May 2022, which accounted for $431 million (2022 - $32 million) and $591 million (2022 - $245 million) of the total $847 million interest sensitive contract benefits and $591 million commissions for acquiring and servicing policies, respectively in the current period.

Change in fair value of market risk benefit represents the mark-to-market movements of our liability based on protection to the policyholder from capital market risk. The loss of $27 million in the period is primarily due to movements in interest rates used in the valuation of these liabilities.

Operating expenses were $553 million in the first nine months of 2023, compared to $261 million in the prior year period, mainly as a result of the acquisition of American National, as well as additional personnel and professional services expenses related to the growth of our business.

The increase of $121 million of interest expense on borrowings from prior year is primarily due to increased interest on subsidiary borrowings related to the acquisition of American National in May 2022.

During the period, Distributable Operating Earnings increased by $269 million to $487 million. The increase was primarily due to contributions from American National for the full nine month period in 2023, since the acquisition, and higher net investment income on our investments. DOE also benefited from new business and spread earnings within our PRT and Reinsurance businesses as we made progress redeploying the investments within the portfolios.

CONSOLIDATED FINANCIAL POSITION

Comparison as at September 30, 2023 and December 31, 2022

The following table summarizes the financial position as at September 30, 2023 and December 31, 2022:

AS AT US$ MILLIONS, EXCEPT SHARE DATA	2023	2022
Assets

September 30, 2023 vs. December 31, 2022

Total assets increased by $7.7 billion during the period to $51.2 billion.

Cash and cash equivalent increased by $1.3 billion during the period. For further information, refer to "Liquidity and Capital Resources" section of the MD&A and our Consolidated Statements of Cash Flows.

Total investments increased by $4.0 billion over the period, primarily as a result of $2.1 billion of real estate and other assets contributed from Brookfield Corporation in exchange for Class C shares in the current quarter, as well as the deployment of new premiums received in the year, partially offset by unrealized losses from available-for-sale securities due to higher interest rates in the year.

Deferred acquisition costs are capitalized costs that are directly related to writing new policyholder contracts. During the period, the balance increased by $717 million mainly as a result of new insurance contracts entered with policyholders which contributed to an increase of $1.2 billion, partially offset by amortization of $450 million.

Reinsurance funds withheld increased by $1.4 billion over the period, primarily as a result of flow premiums received in the current period, partially offset by an increase in commissions payable and other reinsurance expenses.

Reinsurance recoverables are estimated amounts due to the Company from reinsurers or cedants, related to paid and unpaid ceded claims and expenses, and are presented net of reserves for collectability. The amount decreased by $133 million in the period primarily as a result of a $186 million reclassified into assets held for sale.

Other assets were $548 million at the end of the quarter, compared to $405 million at year-end. The balance primarily includes intangible assets, prepaid reinsurance premiums, prepaid pension, and other miscellaneous receivables. The balance increased primarily due to investment and derivative settlements to be received as at September 30, 2023.

Separate account assets and liabilities both increased by $45 million since the year-end, mainly due to net realized gains of underlying assets of $78 million and $59 million of policyholder deposits, partially offset by $96 million of policyholder benefits and withdrawals.

Future policy benefits and policyholder account balances increased by $5.3 billion during the period mainly driven by new premiums and interest sensitive contract benefits as the business continues to expand.

Corporate and subsidiary borrowings decreased by $915 million during the period, primarily as a result of the $500 million repayment of the Company's 364-day secured facility and $450 million repayment on the revolving credit facility in the second and third quarters of the year, respectively.

In the prior year, we issued junior preferred shares to Brookfield which are redeemable by the Company at any time at the issuance price plus accumulated and unpaid dividends.

Lines of Business

Direct Insurance

American National became the platform for our Direct insurance line, providing insurance in the following businesses: direct origination of life, annuity, and property and casualty.

Life Insurance

Whole Life. Whole life products provide a guaranteed benefit upon the death of the insured in return for the periodic payment of a fixed premium over a predetermined period. Premium payments may be required for the entire life of the contract, to a specified age or a fixed number of years, and may be level or change in accordance with a predetermined schedule. Whole life insurance includes some policies that provide a participation feature in the form of dividends. Policyholders may receive dividends in cash or apply them to increase death benefits or cash values available upon surrender, or reduce the premiums required to maintain the contract in-force.

Universal Life. Universal life insurance products provide coverage through a contract that gives the policyholder flexibility in premium payments and coverage amounts. Universal life products may allow the policyholder, within certain limits, to increase or decrease the amount of death benefit coverage over the term of the contract and to adjust the frequency and amount of premium payments. Universal life products are interest rate sensitive, and we determine the interest crediting rates during the contract period, subject to policy specific minimums. An equity-indexed universal life product is credited with interest using a return that is based, in part, on changes in an index, such as the Standard & Poor's 500 Index ("S&P 500"), subject to a specified minimum.

Variable Universal Life. Variable universal life products provide insurance coverage on a similar basis as universal life, except that the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the securities selected by the policyholder held in the separate account.

Credit Life Insurance. Credit life insurance products are sold in connection with a loan or other credit account. Credit life insurance products are designed to pay the lender the borrower's remaining debt on a loan or credit account if the borrower dies during the coverage period.

Annuities

Deferred Annuities. A deferred annuity is an asset accumulation product. Deposits are received as a single premium deferred annuity or in a series of payments for a flexible premium deferred annuity. Deposits are credited with interest at our determined rates subject to policy minimums. For certain limited periods of time, usually from one to ten years, interest rates are guaranteed not to change. Deferred annuities usually have surrender charges that begin at issue and reduce over time and may have market value adjustments that can increase or decrease any surrender value. An equity-indexed deferred annuity is credited with interest using a return that is based, in part, on changes in an index, such as the S&P 500, subject to a specified minimum.

Single Premium Immediate Annuity ("SPIA"). A SPIA is purchased with one premium payment, providing periodic (usually monthly or annual) payments to the annuitant for a specified period, such as for the remainder of the annuitant's life. Return of the original deposit may or may not be guaranteed, depending on the terms of the annuity contract.

Variable Annuities. With a variable annuity, the policyholder bears the investment risk because the value of the policyholder's account balance varies with the investment experience of the separate account investment options selected by the policyholder. Our variable annuity products have no guaranteed minimum withdrawal benefits. This product accounts for less than 1% of our annuity business.

Property and Casualty

Personal Lines. Personal lines include insurance policies sold to individuals for auto, homeowners, and other similar exposures. Auto insurance covers specific risks involved in owning and operating an automobile. Homeowner insurance provides coverage that protects the insured owner's property against loss from perils. Other personal insurance provides coverage for property such as boats, motorcycles and recreational vehicles, and umbrella protection coverage.

Commercial Lines. Commercial lines are primarily focused on providing insurance to agricultural related operations and small to midsize businesses. This includes property and casualty coverage tailored for a farm, ranch, or other agricultural-related businesses. Commercial auto insurance is typically issued in conjunction with the sale of our policies covering farms, ranches, and businesses and covers specific risks involved in owning and operating motor vehicles. Business owners' property and liability insurance, workers' compensation insurance, and other commercial insurance encompassing umbrella protection coverage and other liability coverages, are also offered.

Specialty Markets. Specialty Markets products include renters, mortgage security, aviation, private flood, and credit insurance. Credit insurance provides protection to borrowers and the creditors that extend credit to them against unpaid indebtedness as a result of death, disability, involuntary unemployment, or untimely loss to the collateral securing a personal or mortgage loan.

- *Collateral* or *Creditor Protection Insurance* ("CPI"). CPI provides insurance against loss, expense to recover, or damage to personal property pledged as collateral (typically automobiles and homes) resulting from fire, burglary, collision, or other loss occurrence that would either impair a creditor's interest or adversely affect the value of the collateral. The coverage is purchased from us by the lender according to the terms of the credit obligation and charged to the borrower by the lender when the borrower fails to provide the required insurance.
- *Guaranteed Auto Protection* or *Guaranteed Asset Protection* ("GAP"). GAP insures the excess outstanding indebtedness over the primary property insurance benefits that may occur when there is a total loss to or an unrecovered theft of the collateral. GAP can be written on a variety of assets that are used as collateral to secure credit; however, it is most commonly written on automobiles.

Reinsurance

Within our Reinsurance business, we are focused primarily on the reinsurance of annuity-based products, and will primarily seek to transact with direct insurers and other reinsurers.

Annuities are insurance contracts that provide a defined income stream, typically for retirement planning. Policyholders deposit money with an insurance company in return for a fixed stream of cash flows either immediately or in the future. Reinsurance is an arrangement whereby an insurance company, the reinsurer, agrees to indemnify another insurance company, referred to as the ceding company or cedant, for all or a portion of the insurance risks that are underwritten by the ceding company. Reinsurance serves multiple purposes, including to (1) transfer insurance risk off of a ceding company's balance sheet, enabling it to more efficiently manage balance sheet capacity to increase the volume of business it can underwrite (2) stabilize a ceding company's operating results, (3) assist the cedant in achieving applicable regulatory requirements, and (4) optimize the overall financial strength and capital structure of the cedant.

Reinsurance may be structured as a block transaction, pursuant to which a reinsurer contractually assumes assets and liabilities associated with an in-force book of business, or as a flow arrangement, pursuant to which a reinsurer contractually agrees to assume assets and liabilities for future business.

We primarily seek to reinsure three types of annuity products: fixed annuities, fixed index annuities and payout annuities.

Fixed Annuities

A fixed annuity ("FA") is a type of insurance contract that provides a fixed rate of investment return (often referred to as a crediting rate) for a specified period of time. Fixed rate reset annuities have a crediting rate that is typically guaranteed for a period of one year, after which insurers are able to change the crediting rate at their discretion, generally to any rate at or above a previously guaranteed minimum rate.

Insurers earn income on FA contracts by generating a net investment spread, which is based on the difference between income earned on the investments supporting the liabilities and the crediting rate owed to customers.

Fixed Index Annuities

A fixed index annuity ("FIA") is an insurance contract in which the policyholder makes one or more premium deposits that earn interest at a crediting rate based on a specified market index. Policyholders are entitled to recurring or lump sum payments for a specified period of time. FIAs provide policyholders with the ability to earn interest without significant downside risk to their principal balance. A market index tracks the performance of a specific group of stocks or other assets representing a particular segment of the market, or in some cases, an entire market. A policyholder's crediting rate in relation to a market index is based on the change in the relevant market index, subject to a pre-defined cap (a maximum rate that may be credited), spread (a credited rate determined by reducing a specific rate from the index return) and/or a participation rate (a credited rate equal to a percentage of the index return).

Insurers earn income on FIA contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

Payout Annuities

A payout annuity is an income-generating insurance product. In exchange for a lump-sum premium, the policyholder receives a series of guaranteed income payments for one lifetime, two lifetimes, or a specified period of time.

Insurers earn income on payout annuity contracts based on a net investment spread, which is the difference between income generated on investments supporting the liabilities and the interest that is credited to policyholders.

We operate our Reinsurance business through licensed operating companies, North End Re (Cayman) SPC (“NER SPC”) and North End Re Ltd (“NER Ltd.”). As of the date of this MD&A, our subsidiaries have reinsurance and retrocession agreements with two third parties to reinsure a block of U.S. annuities and fixed indexed annuities.

Pension Risk Transfer

PRT is the transfer by a corporate sponsor of the risks (or some of the risks) associated with the sponsorship and administration of a pension plan, in particular, investment risk and longevity risk, which is the risk of an increase in life expectancy of plan beneficiaries. These risks can be transferred either to an insurer like us through a group annuity transaction, or to an individual through a lump-sum settlement payment. PRT using insurance typically involves a single premium group annuity contract that is issued by an insurer, permitting the corporate pension plan sponsor to discharge certain pension plan liabilities from its balance sheet.

A PRT insurance transaction may be structured as either a buy-out annuity or a buy-in annuity. Under a buy-out annuity, a direct insurer enters into a group annuity contract with the plan sponsor and assumes the liability to fund, administer, and pay benefits covered under the contract directly to the individual pension plan members covered under the contract. Under a buy-in annuity, the insurer enters into a group annuity contract with the plan sponsor and is liable to fund and pay the benefits covered under the contract to the pension plan fund, with the plan sponsor retaining the liability to administer and pay pension benefits to plan members. In both cases, the insurer assumes the investment and longevity risk.

Insurers earn income on buy-out and buy-in group annuities by generating a net investment spread, which is based on the difference between income earned on the investments supporting the annuity contract and the cost of the pension liabilities assumed.

Today, our PRT business is operated in Canada and the United States. Our Canadian PRT business is operated through Brookfield Annuity Company (“BAC”), a Canadian domiciled, licensed and regulated direct life insurance company that provides PRT solutions to organizations across Canada. Under American National, we also operate a U.S. PRT business, which became licensed during 2022 and successfully completed its first PRT transaction in December 2022. Our North American PRT businesses are led by a team of experts in group annuities, pensions, insurance and investments.

SEGMENT REVIEW

The Company's operations are organized into three operating segments: Direct Insurance, Reinsurance, and PRT.

We measure operating performance primarily using DOE which measures our ability to acquire net insurance assets at a positive margin, and invest these assets at a return that is greater than the cost of policyholder liabilities.

Direct Insurance

The following table presents Distributable Operating Earnings of our Direct Insurance segment for the three and nine months ended September 30, 2023 and 2022:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended		Nine Months Ended	
	2023	2022	**2023**	2022
DOE	**$ 132**	$ 172	**$ 392**	$ 216

Comparison of the three and nine months ended September 30, 2023 and 2022

DOE within our Direct Insurance business represents contribution from our direct origination annuity, life, and P&C businesses operated by American National that the Company acquired in May 2022, as well as the health business that has been held-for-sale since the second quarter of 2023.

DOE from our life and annuity business increased by $21 million compared to the prior year quarter due to increased investment income in the current market environment. The increase was more than offset by the absence of one-time realizations from our real estate portfolio in the segment in the prior year quarter. For the nine months ended September 30, 2023, DOE increased by $176 million, mostly due to the full nine months contribution from the business in the current year.

DOE related to our Direct Insurance business also includes financing costs associated with subsidiary borrowings and corporate overhead directly related to the segment.

Reinsurance

The following table presents Distributable Operating Earnings of our Reinsurance segment for the three and nine months ended September 30, 2023 and 2022:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended		Nine Months Ended	
	2023	2022	**2023**	2022
DOE	**$ 47**	$ 16	**$ 95**	$ 26

Comparison of the three and nine months ended September 30, 2023 and 2022

DOE within our Reinsurance business increased to $47 million and $95 million in three and nine months ended September 30, 2023, respectively, primarily as a result of increase in interest income due to higher interest rates and deployment of capital. During the quarter, we recorded $763 million of flow premiums on our reinsurance treaty with AEL, bringing total premiums reinsured under the treaty to approximately $7.5 billion to-date.

Pension Risk Transfer

The following table presents Distributable Operating Earnings of our PRT segment for the three and nine months ended September 30, 2023 and 2022:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended 2023	Three Months Ended 2022	Nine Months Ended 2023	Nine Months Ended 2022
DOE	**$ 9**	$ 6	**$ 30**	$ 12

Comparison of the three and nine months ended September 30, 2023 and 2022

During the quarter, the Company closed 9 PRT deals in the Canadian market (2022 – 6 deals) and 7 PRT deals in the US market (2022 – nil), representing $278 million (2022 – $328 million) of premiums. The increase in DOE from the prior year was primarily a result of higher investment income due to new businesses over the last twelve months as well as redeployment of assets into higher yielding investments.

Liquidity and Capital Resources

CAPITAL RESOURCES

We attempt to maintain sufficient financial liquidity at all times so that we are able to participate in attractive opportunities as they arise, better withstand sudden adverse changes in economic circumstances within our operating subsidiaries and maintain payments to policyholders, as well as maintain distributions to our shareholders. Our principal sources of liquidity are cash flows from our operations, and access to the Company's third-party credit facilities, and our credit facility and equity commitment with Brookfield. We proactively manage our liquidity position to meet liquidity needs and continue to develop relationships with lenders who provide borrowing capacity at competitive rates, while looking to minimize adverse impacts on investment returns. We look to structure the ownership of our assets to enhance our ability to monetize them to provide additional liquidity, if needed. Our corporate liquidity for the periods noted below consisted of the following:

AS AT SEP. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS	2023	2022
Cash and cash equivalents	**$ 451**	$ 784
Liquid financial assets	**237**	241
Undrawn credit facilities	**934**	544
Total Corporate liquidity[1]	**$ 1,622**	$ 1,569

1. See "Performance Measures used by Management".

As of the date of this MD&A, our liquidity is sufficient to meet our present requirements for the foreseeable future. In June 2021, Brookfield provided to the Company an equity commitment in the amount of $2.0 billion to fund future growth, which the Company may draw on from time to time. The equity commitment may be called by the Company in exchange for the issuance of Class C shares or junior preferred shares. In addition, in connection with the Spin-off we entered into a credit agreement with Brookfield as the lender, providing for a three-year revolving $400 million credit facility in addition to our $550 million revolving credit facilities with external banks. We use the liquidity provided by our credit facilities for working capital purposes, and we may use the proceeds from the capital commitment to fund growth capital investments and acquisitions. The determination of which of these sources of funding the Company will access in any particular situation will be a matter of optimizing needs and opportunities at that time. As of the date of this MD&A, there were no amounts drawn on the Brookfield facility.

Today, we have significant liquidity within our insurance portfolios, giving us flexibility to invest in a rising rate environment and secure attractive investment opportunities. In addition to a portfolio of highly liquid financial assets, our operating companies have additional access to liquidity from sources such as the Federal Home Loan Bank ("FHLB") within our direct insurance business and short-term repurchase agreements within our PRT business to manage market exposure between the timing of transaction agreements being entered into and the receipt of assets. As at September 30, 2023, the Company had drawn $43 million of a total $878 million of commitments available relating to these programs.

Liquidity within our operating subsidiaries may be restricted from time to time due to regulatory constraints. As at September 30, 2023, the Company's total liquidity was $23.4 billion, of which cash and cash equivalents included $451 million of unrestricted cash resources that can be deployed to fund corporate activities as needed.

AS AT SEP. 30, 2023 AND DEC. 31, 2022 US$ MILLIONS		**2023**		2022
Cash and cash equivalents	**$**	**3,448**	$	2,145
Liquid financial assets		**18,972**		17,769
Undrawn credit facilities		**934**		544
Total liquidity[1]	**$**	**23,354**	$	20,458

1. See "Performance Measures used by Management".

Comparison of the three and nine months ended September 30, 2023 and 2022

The following table presents a summary of our cash flows and ending cash balances for the nine months ended September 30, 2023 and 2022:

FOR THE NINE MONTHS ENDED SEP. 30 US$ MILLIONS		**2023**		2022
Operating activities	**$**	**954**	$	683
Investing activities		**(1,776)**		(3,452)
Financing activities		**2,125**		5,534
Cash and cash equivalents				
Cash and cash equivalents, beginning of the period		**2,145**		393
Net change during the period		**1,303**		2,765
Foreign exchange on cash balances held in foreign currencies		**—**		(5)
Cash and cash equivalents, end of the period	**$**	**3,448**	$	3,153

Operating Activities

For the nine months ended September 30, 2023, we generated $954 million of cash from operating activities compared to $683 million during 2022, mainly driven by higher interest and dividend income received from our investment portfolios in the current period, in particular from available-for-sale securities, mortgage loans, private loans and short-term investments, as well as from premiums written from new flow reinsurance and PRT transactions.

Investing Activities

For the nine months ended September 30, 2023, we reinvested liquid short-term and fixed maturity investments that matured during the period and we deployed approximately $$4.0 billion into new higher-yielding investments within our insurance operating subsidiaries' portfolios. These investments were primarily funded by new premiums and the sales and maturities of liquid securities. The purchase and sales, net of maturities, resulted in net deployment of $1.8 billion of cash from investing activities, compared to net deployment of $3.5 billion in the prior year period.

Financing Activities

For the nine months ended September 30, 2023, we received $2.1 billion of cash from financing activities, compared to $5.5 billion received in the same period in 2022. The proceeds in the current year period were mainly as a result of $2.6 billion net payments received on policyholders' account deposits, partially offset by the net repayment of $920 million on our borrowings.

Financial Instruments

To the extent that we believe it is economic to do so, our strategy is to hedge a portion of our equity investments and/or cash flows exposed to foreign currencies by the Company. The following key principles form the basis of our foreign currency hedging strategy:

- We leverage any natural hedges that may exist within our operations;
- We utilize local currency debt financing to the extent possible; and
- We may utilize derivative contracts to the extent that natural hedges are insufficient.

As at September 30, 2023, our common equity was $4.1 billion and our adjusted equity was $7.3 billion. Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. Refer to discussion on Non-GAAP Measures.

Included in equity and adjusted equity was approximately $207 million invested in Canadian dollars. As at September 30, 2023, we had a notional $2.4 billion (December 31, 2022 – $2.8 billion) of foreign exchange forward contracts in place to hedge against foreign currency risk.

For additional information, see Note 9, "Derivative Instruments" of the financial statements.

Future Capital Obligations and Requirements

Subsidiaries of the Company have investment commitment agreements to the maximum of $12.6 billion exclusive of taxes and other operating expenses (December 31, 2022 – $5.4 billion). As at September 30, 2023, $7.0 billion was funded (December 31, 2022 – $2.6 billion). The amounts are recognized as loans and receivables, unrated bonds and private equity investments.

For additional information, see Note 27, "Financial commitments and contingencies" of the financial statements.

The following is the maturity by year on corporate borrowings and subsidiary borrowings:

	Payments due by year				
AS AT SEP. 30 2023 US$ MILLIONS	**Total**	Less than 1 year	1- 3 years	4 - 5 years	More than 5 years
Corporate borrowings	**$ 1,243**	$ 1,227	$ —	$ 16	$ —
Subsidiary borrowings	**1,494**	—	—	997	497

Capital management

Capital management is the on-going process of determining and maintaining the quantity and quality of capital appropriate to take advantage of the Company's growth opportunities, to support the risks associated with the business and to optimize shareholder returns while fully complying with the regulatory capital requirements.

The Company takes an integrated approach to risk management that involves the Company's risk appetite and capital requirements. The enterprise risk management framework includes a capital management policy that describes the key processes related to capital management. The capital management policy is reviewed at least annually and approved by the Board of Directors. The operating capital levels are determined by the Company's risk appetite and Own Risk and Solvency Assessment ("ORSA"). Furthermore, stress techniques that include the Financial Conditions Testing ("FCT") are used to evaluate the Company's capital adequacy under sustained adverse scenarios.

BAC is subject to Life Insurance Capital Adequacy Test ("LICAT") as determined by OSFI. The LICAT ratio compares the regulatory capital resources of a company to its Base Solvency Buffer or required capital. The total capital resources are provided by the sum of Available Capital, Surplus Allowance and Eligible Deposits.

NER SPC and American National are required to follow Risk Based Capital ("RBC") requirements based on guidelines of the National Association of Insurance Commissioners ("NAIC"). RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant.

NER Ltd. is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin and the enhanced capital requirement as determined by the Bermuda Monetary Authority ("BMA"). The Enhanced Capital Requirement ("ECR") is calculated based on the Bermuda Solvency Capital Requirement model, a risk-based model that takes into account the risk characteristics of different aspects of the company's business.

The Company has determined that it is in compliance with all capital requirements as at September 30, 2023 and December 31, 2022.

Brookfield Operating Results

An investment in the Class A exchangeable shares of the Company is intended to be, as nearly as practicable, functionally and economically, equivalent to an investment in Brookfield. A summary of Brookfield's three and nine months ended September 30, 2023 operating results is provided below:

FOR THE PERIOD ENDED SEP. 30 US$ MILLIONS	Three months ended **2023**	 2022	Nine months ended **2023**	 2022
Revenues	**$ 24,441**	$ 23,418	**$ 71,406**	$ 68,556
Net income	**35**	716	**1,971**	5,151

Each Class A exchangeable share has been structured with the intention of providing an economic return equivalent to one Brookfield Class A Share. We therefore expect that the market price of the Class A exchangeable shares should be impacted by the market price of Brookfield Class A Shares and the business performance of Brookfield as a whole. In addition to carefully considering the disclosure made in this MD&A, you should carefully consider the disclosure made by Brookfield in its continuous disclosure filings. Copies of the Brookfield's continuous disclosure filings are available electronically on EDGAR on the SEC's website at www.sec.gov or on SEDAR at www.sedar.com.

Industry Trends and Factors Affecting Our Performance

As a financial services business providing capital based solutions to the insurance industry, we are affected by numerous factors, including global economic and financial market conditions. Price fluctuations within equity, credit, commodity and foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the performance of our business. We also monitor factors such as consumer spending, business investment, the volatility of capital markets, interest rates, unemployment and the risk of inflation or deflation, which affect the business and economic environment and, in turn, impact the demand for the type of financial and insurance products offered by our business. We believe the following current trends present significant opportunities for us to grow our business.

- **Financial market volatility and dislocations across asset classes favor insurers with diverse investment portfolios and access to alternative credit.** Insurers primarily invest in public market fixed income products and are exposed to public market valuations. Insurers with an ability to diversify investment portfolios to include alternative and private credit assets provide more favorable investment performance.
- **Many insurers are looking for ways to shift toward less asset-intensive insurance products.** Given the capital-intensive nature of life and annuity liabilities, many insurance companies with diversified exposure are looking to reduce their exposure to life and annuity products, including through reinsurance, in order to free up capital that they can deploy in support of less asset-intensive products and business lines.
- **Recent market conditions are exposing under-capitalized companies.** Some writers of annuity products are facing higher hedging costs amidst volatile markets, and changes in regulatory standards are increasing the transparency of liability valuations in the current low-rate environment. This has necessitated a need to raise or otherwise free up capital, and the reinsurance market offers writers of annuity products an opportunity to do so. We have access to capital and are able to provide capital support to these companies.
- **Public market valuations have compressed while capital needs have grown.** Insurers are trading at cyclical lows, and given the prevailing market environment, are looking to partner with organizations like ours that can provide solutions to address capital needs.

Market Risk

Our statements of financial position within our financial statements include substantial amounts of assets and liabilities whose fair values are subject to market risks. Our significant market risks are primarily associated with interest rates, foreign currency exchange rates and credit risk. The fair values of our investment portfolios remain subject to considerable volatility. The following sections address the significant market risks associated with our business activities.

Foreign Exchange Rate Risk

The Company's obligations under its insurance contracts are denominated in Canadian and United States dollars but a portion of the assets supporting these liabilities are denominated in non-Canadian and non-United States dollars. We manage foreign exchange risk using foreign exchange forwards. Our investment policy sets out the foreign currency exposure limits and types of derivatives permitted for hedging purposes.

Our net assets are subject to financial statement translation into U.S. Dollars. All of our financial statement translation-related impact from changes in foreign currency rates is recorded in other comprehensive income.

Interest Rate Risk

Interest rates currently increased in many jurisdictions in which we operate in 2023 but remain at relatively low levels by historical standards. The Company's asset liability management practices and interest rate risk management allows the Company to mitigate the impact of interest rate volatility on the business. However, sudden or unexpected changes in interest rates may cause certain market dislocations that could negatively impact our financial performance. Interest rate increases would also increase the amount of cash required to service our obligations and our earnings could be adversely impacted as a result thereof.

The Company manages interest rate risk through their asset liability management, which we refer to as ALM, the framework whereby the effective and key rate durations of the investment portfolio are closely matched to that of the insurance reserves. Within the context of the ALM framework, we use derivatives including interest rate swaps and futures to reduce market risk. For the annuity business, where the timing and amount of the benefit payment obligations can be readily determined, the matching of asset and liability cash flows is effectively controlled through this comprehensive duration management process.

Other Price Risk

Other price risk is the risk of variability in fair value due to movements in equity prices or other market prices such as commodity prices and credit spreads.

The Company's exposure to the equity markets is managed by sector and individual security and is intended to track the S&P 500 with minor variations. The Company mitigates the equity risk by diversification of the investment portfolio.

The Company also has equity risk associated with the equity-indexed life and annuity products the Company issues. The Company has entered into derivative transactions, primarily over-the-counter equity call options, to hedge the exposure to equity-index changes.

Credit Risk

Credit risk is the risk of loss from amounts owed by counterparties and arises any time funds are extended, committed, owed or invested through actual or implied contractual arrangements including reinsurance. The Company is primarily exposed to credit risk through its investments in debt securities.

We manage exposure to credit risk by establishing concentration limits by counterparty, credit rating and asset class. To further minimize credit risk, the financial condition of the counterparties is monitored on a regular basis. These requirements are outlined in our investment policy.

Insurance Risk

The Company makes assumptions and estimates when assessing reinsurance and insurance risks, and significant deviations, particularly with regards to longevity and policyholder behavior, could adversely affect our business, financial condition, results of operations, liquidity and cash flows. All transaction terms are likely to be determined by qualitative and quantitative factors, including our estimates. If we reinsure a block of business, there can be no assurance that the transaction will achieve the results expected at the time of the block’s acquisition. These transactions expose us to the risk that actual results materially differ from those estimates.

We manage insurance risk through choosing whether to purchase reinsurance for certain amounts of risk underwritten within our pension risk transfer business, and we may also look to further reinsure certain amounts of risk we assume under our reinsurance agreements.

Legal Risk

In the future we may be parties in actions that routinely arise out of the normal course of business, including legal actions seeking to establish liability directly through insurance contracts or indirectly through reinsurance contracts issued by our subsidiaries. Plaintiffs occasionally seek punitive or exemplary damages. We do not believe that such normal and routine litigation will have a material effect on our financial condition or results of operations. We are also involved from time to time in other kinds of legal actions, some of which assert or may assert claims or seek to impose fines and penalties. We believe that any liability that may arise as a result of other pending legal actions will not have a material effect on our financial statements.

Operational Risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes, people and systems, or from external events. The Company’s internal control processes are supported by the maintenance of a risk register and independent internal audit review. The risk of fraud is managed through a number of processes including background checks on staff on hire, annual code of conduct confirmations, anti-bribery training and segregation of duties.

We have significant outsourcing arrangements in respect of pension administration and other functions. These arrangements are subject to agreements with formal service levels, operate within agreed authority limits and are subject to regular review by senior management. Material outsourcing arrangements are approved and monitored by the Board of Directors.

Disaster recovery and business continuity plans have also been established to manage the Company’s ability to operate under adverse conditions.

Critical Accounting Estimates

The preparation of the financial statements requires management to make critical judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses that are not readily apparent from other sources, during the reporting period. These estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years. Refer to Critical Accounting Estimates in the financial statements for the year ended December 31, 2022 filed with the SEC on June 28, 2023.

Performance Measures Used by Management

To measure performance, we focus on net income and total assets, as well as certain non-GAAP measures, including DOE and Adjusted Equity. In addition, we provide certain metrics such as Total Corporate Liquidity and Total Liquidity which we believe are useful to investors to provide additional insights into assets within the business available for redeployment. Refer to the "Segment Review" section of this MD&A for further discussion on our performance measures for the three and nine months ended September 30, 2023 and 2022.

Non-GAAP Measures

We regularly monitor certain Non-GAAP measures that are used to evaluate our performance and analyze underlying business performance and trends. We use these measures to establish budgets and operational goals, manage our business and evaluate our performance. We also believe that these measures help investors compare our operating performance with our results in prior years. These Non-GAAP financial measures are provided as supplemental information to the financial measures presented in this MD&A that are calculated and presented in accordance with GAAP. These Non-GAAP measures are not comparable to GAAP and may not be comparable to similarly described Non-GAAP measures reported by other companies, including those within our industry. Consequently, our Non-GAAP measures should not be evaluated in isolation, but rather, should be considered together with the most directly comparable GAAP measure in our consolidated financial statements for the years presented. The Non-GAAP financial measures we present in this MD&A should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP.

Distributable Operating Earnings ("DOE")

We use DOE to assess operating results and the performance of our businesses. We define distributable operating earnings as net income excluding the impact of depreciation and amortization, deferred income taxes, and breakage and transaction costs, as well as certain investment and insurance reserve gains and losses, including gains and losses related to asset and liability matching strategies and change in market risk benefits, and is inclusive of returns on equity invested in certain variable interest entities and our share of adjusted earnings from our investments in certain associates.

DOE is a measure of operating performance that is not calculated in accordance with, and does not have any standardized meaning prescribed by GAAP. DOE is therefore unlikely to be comparable to similar measures presented by other issuers.

We believe our presentation of DOE is useful to investors because it supplements investors' understanding of our operating performance by providing information regarding our ongoing performance that excludes items we believe do not directly affect our core operations. Our presentation of DOE also provide investors enhanced comparability of our ongoing performance across years.

Adjusted Equity

Adjusted Equity represents the total economic equity of our Company through its Class A, B, and C shares and the Junior Preferred Shares issued by our Company, excluding accumulated other comprehensive income. We use Adjusted Equity to assess our return on our equity.

The followings contain further details regarding our use of our Non-GAAP measures, as well as a reconciliation of net income and total equity to these measures:

Reconciliation of Non-GAAP Measures

The following table reconciles our net income to Distributable Operating Earnings:

FOR THE PERIODS ENDED SEP. 30 US$ MILLIONS	Three Months Ended 2023	Three Months Ended 2022	Nine Months Ended 2023	Nine Months Ended 2022
Net income	**$ 77**	$ 139	**$ 344**	$ 320
Net investment gains and losses, including funds withheld	**94**	133	**(74)**	225
Mark-to-market on insurance contracts and other net assets	**29**	(123)	**218**	(375)
Deferred income tax (recovery) expense	**(31)**	3	**(33)**	14
Transaction costs	**7**	2	**16**	26
Depreciation	**6**	5	**16**	8
Distributable Operating Earnings	**$ 182**	$ 159	**$ 487**	$ 218

The following table reconciles our equity to Adjusted Equity:

AS AT SEP. 30 US$ MILLIONS	2023	2022
Total equity	**$ 4,143**	$ 1,082
Add:		
Accumulated other comprehensive loss (income)	**445**	1,054
Junior preferred shares	**2,663**	2,497
Adjusted Equity	**$ 7,251**	$ 4,633

Forward-Looking Information

In addition to historical information, this MD&A contains “forward-looking information” within the meaning of applicable securities laws. Forward-looking information may relate to the Company and Brookfield’s outlook and anticipated events or results and may include information regarding the financial position, business strategy, growth strategy, budgets, operations, financial results, taxes, dividends, distributions, plans and objectives of the Company. Particularly, information regarding future results, performance, achievements, prospects or opportunities of the Company, Brookfield's or the Canadian, U.S. or international markets is forward-looking information. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as “plans”, “targets”, “expects” or “does not expect”, “is expected”, “an opportunity exists”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate” or “believes”, or variations of such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “might”, “will” or “will be taken”, “occur” or “be achieved”.

The forward-looking statements are based on our beliefs, assumptions and expectations of future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or within our control. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements.

The following factors, among others, could cause our actual results to vary from our forward-looking statements:

We caution that the factors that may affect future results described in this MD&A are not exhaustive. The forward-looking statements represent our views as of the date of this MD&A and should not be relied upon as representing our views as of any date subsequent to the date of this MD&A. While we anticipate that subsequent events and developments may cause our views to change, we disclaim any obligation to update the forward-looking statements, other than as required by applicable law. For further information on these known and unknown risks, please see "Risk Factors" included in our most recent Annual Report on Form 20-F and other risks and factors that are described therein.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Index to Annual Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of
American National Group, Inc.
Galveston, Texas

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statement of financial position of American National Group, Inc. and subsidiaries (the "Company") as of December 31, 2020, the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the year ended December 31, 2020, and the related notes and the schedules listed in the Index at Item 15 (collectively referred to as the "financial statements"). We also have audited the Company’s internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020, and the results of its operations and its cash flows for the year ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by COSO.

Basis for Opinions

The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, *Controls and Procedures*. Our responsibility is to express an opinion on these financial statements and an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audit of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Policyholders' Account Balances - Valuation of embedded derivative liabilities for equity-indexed contracts - Refer to Notes 7 and 9 to the financial statements

Critical Audit Matter Description

The Company sells equity-indexed universal life and equity-indexed deferred annuity contracts with guaranteed minimum benefits, some of which contain embedded derivatives that are required to be bifurcated from a host reserve, separately accounted for, and measured at fair value. The embedded derivative represents future benefit cash flows in excess of the minimum guarantee cash flows. As of December 31, 2020, the fair value of the embedded derivative liabilities was $705 million. Management utilizes various assumptions in order to measure the fair value of the embedded derivatives including assumptions related to lapse rate and equity volatility. These assumptions are evaluated annually by management with any changes in the estimated fair value resulting in a cumulative charge or credit to income from operations.

Given the valuation of the embedded derivative liabilities is sensitive to changes in these assumptions, the related audit effort in evaluating management's selection of the assumptions related to the lapse rate and equity volatility required a high degree of auditor judgment and an increased extent of effort, including involvement of our actuarial and fair value specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our principal audit procedures related to the lapse rate and equity volatility assumptions selected by management for the valuation of embedded derivative liabilities included the following, among others:

•We tested the effectiveness of management's controls over the valuation of embedded derivative liabilities, including those over the development, selection, and implementation of the assumptions related to lapse rate and equity volatility.

•With the assistance of our fair value specialists, we tested the completeness and accuracy of the underlying data used to determine the equity volatility assumptions.

•We tested the completeness and accuracy of the historical company experience used to determine the lapse rate assumptions.

•With the assistance of our actuarial specialists, we evaluated the appropriateness of the assumptions, evaluated the consistency of the selected assumptions used in the Company's valuation model, and tested the mathematical accuracy of the valuation model.

Policy and Contract Claims - Property and casualty liability for unpaid claims and claim adjustment expenses - Refer to Notes 2 and 12 to the financial statements

Critical Audit Matter Description

The Company establishes a liability for unpaid claims and claim adjustment expenses to provide for the estimated costs of paying claims under property and casualty insurance policies written by the Company. The property and casualty liability for unpaid claims is included within Policy and Contract Claims in the statements of financial position, which had a balance of $1.6 billion as of December 31, 2020. This liability, which includes estimates for both claims that have been reported and claims that have been incurred but not reported, represents the estimate of all claim and claim adjustment expenses associated with processing and settling the claims. The liability for unpaid claims is estimated using actuarial assumptions for loss development patterns that are based upon the Company's historical experience and consider the effects of current developments, anticipated trends and risk management programs.

Given the subjectivity of estimating the ultimate cost to settle the liability for property and casualty insurance reported and incurred but not reported claims, the related audit effort in evaluating the assumptions for loss development patterns required a high degree of auditor judgment and an increased extent of effort, including involvement of our actuarial specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our principal audit procedures related to the assumptions for loss development patterns selected by management to estimate the property and casualty liability for unpaid claims and claim adjustment expenses included the following, among others:

•We tested the effectiveness of management's controls over the property and casualty liability for unpaid claims and claim adjustment expenses, including those over the development, selection, and implementation of the assumptions for loss development patterns used in the actuarial estimates.

•With the assistance of our actuarial specialists, we tested the completeness and accuracy of the underlying data, including historical claims, used to determine the assumptions for loss development patterns, evaluated the appropriateness of the assumptions, evaluated the consistency of the selected assumptions used in the Company's valuation model, and tested the mathematical accuracy of the valuation model.

•We evaluated the reasonableness of the Company's estimated property and casualty liability for unpaid losses and loss adjustment expenses by comparing to those independently derived by our actuarial specialists.

Mortgage Loans on Real Estate - Allowance for Credit Losses - Refer to Notes 2, 3, and 5 to the financial statements

Critical Audit Matter Description

The Company measures credit losses for instruments measured at amortized cost, including its portfolio of commercial mortgage loans. The allowance for credit losses for mortgage loans, which was recorded on a net basis within Mortgage Loans on Real Estate in the statements of financial position, had a balance of $126 million as of December 31, 2020. The value of the allowance for credit losses on mortgage loans is estimated by management using the current expected credit loss model, which considers quantitative and qualitative allowance factors based on past loss experience, current economic conditions, and reasonable and supportable forecasts of future conditions. The qualitative allowance factors are developed quarterly based on the pooling of assets with similar risk characteristics and historical loss experience adjusted for the expected trend in the current market environment.

Given the subjectivity of estimating the qualitative allowance factors applied in developing the allowance for credit losses, performing audit procedures to evaluate whether the allowance for credit losses on mortgage loans was appropriately valued required a high degree of auditor judgment and an increased extent of effort, including involvement of our credit specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our principal audit procedures related to the assumptions surrounding qualitative allowance factors used by management to estimate the allowance for credit losses on mortgage loans included the following, among others:

•We tested the effectiveness of management's controls over the allowance for credit losses on mortgage loans, including those over the development, selection, and implementation of the assumptions related to the qualitative allowance factors.

•With the assistance of our credit specialists, we evaluated the appropriateness of the model methodology, which includes the application of the qualitative allowance factors. We also evaluated the appropriateness of these assumptions and the consistency of the selected assumptions used in the Company's valuation model.

•We evaluated management's qualitative allowance factors by comparing them to current market data to identify potential bias in the determination of the allowance for credit losses on mortgage loans.

/s/ DELOITTE & TOUCHE LLP

Houston, Texas
March 4, 2021

We have served as the Company's auditor since 2020.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
American National Group, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statement of financial position of American National Group, Inc. (formerly American National Insurance Company) and subsidiaries (the Company) as of December 31, 2019, the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for each of the years in the two-year period ended December 31, 2019, and the related notes and financial statement schedules I to IV (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2019, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2019, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We served as the Company's auditor from 2000 to 2020.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Nature of Operations

On July 1, 2020, American National Insurance Company, a Texas insurance company (“ANICO”), completed its previously announced holding company reorganization. As a result of such reorganization, ANICO became a wholly owned subsidiary of American National Group, Inc., a Delaware corporation (“ANAT”), and ANAT replaced ANICO as the publicly held company. Consequently, all filings with the Securities and Exchange Commission from July 2, 2020 forward will be filed by ANAT under CIK No. 0001801075. For purposes of filing this Form 10-K for the year ended December 31, 2020, the accompanying consolidated financial statements and notes thereto have been titled “American National Group, Inc.” to reflect the current name of the public registrant, with the parenthetical notation “formerly American National Insurance Company” to reflect the reporting entity for the prior periods covered therein. Upon the effective date of the holding company reorganization, ANAT retired 3,945,249 shares of common stock that were held in treasury at ANICO prior to the reorganization. The amount of retired treasury stock in excess of par value was charged to retained earnings. Before and after the reorganization, the issuer had 50,000,000 authorized shares of common stock and 26,887,200 common shares outstanding. As a result of the reorganization, each share of ANICO common stock, par value $1.00 per share, was automatically converted into one duly issued, fully paid and non-assessable share of ANAT common stock, par value $0.01 per share. As a result of the reorganization, the directors and officers of ANICO became directors and officers of ANAT. There is no change in the ultimate ownership of the organization and business operations will continue from our current office locations and companies. ANAT, through its consolidated subsidiaries (collectively “American National” or the "Company”) offers a broad portfolio of insurance products, including individual and group life insurance, annuities, health insurance, and property and casualty insurance. Business is conducted in all 50 states, the District of Columbia, and Puerto Rico.

Note 2 - Summary of Significant Accounting Policies and Practices

The consolidated financial statements and notes thereto have been prepared in conformity with GAAP and are reported in U.S. currency. American National consolidates entities that are wholly-owned and those in which American National owns less than 100% but controls the voting rights, as well as variable interest entities in which American National is the primary beneficiary. Intercompany balances and transactions with consolidated entities have been eliminated. Investments in unconsolidated affiliates are accounted for using the equity method of accounting. Certain amounts in prior years have been reclassified to conform to current year presentation.

The preparation of the consolidated financial statements in conformity with GAAP requires the use of estimates and assumptions that affect the reported consolidated financial statement balances. Actual results could differ from those estimates.

Investments

Investment securities are comprised of bonds classified as held-to-maturity that are carried at amortized cost net of credit loss allowance and bonds classified as available-for-sale that are carried at fair value. In addition, equity investments, other than those accounted for under the equity method or those that result in consolidation of the investee, are measured at fair value with changes in fair value recognized in earnings.

Mortgage loans on real estate are stated at unpaid principal balance, adjusted for any unamortized discount, deferred expenses, and allowances. Accretion of discounts is recorded using the effective yield method. Interest income, prepayment fees, and accretion of discounts and origination fees are reported in “Net investment income” in the consolidated statements of operations. Interest income earned is accrued on the principal amount of the loan based on contractual interest rate. However, interest ceases to accrue for loans on which interest is more than 90 days past due, when the collection of interest is not probable, or when a loan is in foreclosure. Income on past due loans is reported on a cash basis. When a loan becomes current, it is placed back into accrual status. Cash receipts on impaired loans are recorded as a reduction of principal, interest income, expense reimbursement, or other manner in accordance with the loan agreement. In the consolidated statements of operations, gains and losses from the sale of loans are reported in “Net realized investment gains,” and changes in allowances are reported in "Change in investment credit loss."

Note 2 - Summary of Significant Accounting Policies and Practices - (Continued)

Mortgage loans are presented net of the Company's recorded allowance for expected credit loss, which represents the portion of amortized cost basis on mortgage loans that the Company does not expect to collect. In determining the Company’s allowance for credit losses, management: (i) pools and evaluates mortgage loans with similar risk characteristics, (ii) considers expected lifetime credit losses adjusted for prepayments and extensions, and (iii) considers past events, current economic conditions and forecasts of future economic conditions. The allowance is calculated quarterly for each property type based on inputs unique to each loan property type.

On an ongoing basis, mortgage loans with dissimilar risk characteristics (i.e., loans with significant declines in credit quality), collateral dependent mortgage loans (i.e., when the borrower is experiencing financial difficulty, including when foreclosure is reasonably possible or probable), and reasonably expected troubled debt restructurings (i.e., the Company grants concessions to borrower that is experiencing financial difficulties) may be evaluated individually for credit loss. The allowance for credit losses for loans evaluated individually is established using the same methodologies for the overall commercial portfolio segment except for collateral dependent loans. The allowance for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan’s underlying collateral, less selling cost when foreclosure is probable. Accordingly, the change in the estimated fair value of collateral dependent loans is recorded as a change in the allowance for credit losses which is recorded on a quarterly basis as a charge or credit to earnings.

Policy loans are carried at the outstanding balance plus any accrued interest which approximates fair value.

Investment real estate including related improvements are stated at cost less accumulated depreciation. Depreciation is provided on a straight-line basis over the estimated useful life of the asset (typically 15 to 50 years). Rental income is recognized on a straight-line basis over the term of the respective lease. American National classifies a property as held-for-sale if it commits to a plan to sell a property within one year and actively markets the property in its current condition for a price that is reasonable in comparison to its estimated fair value. Real estate held-for-sale is stated at the lower of depreciated cost or estimated fair value less expected disposition costs and is not depreciated while it is classified as held-for-sale. American National periodically reviews its investment real estate for impairment and tests properties for recoverability whenever events or changes in circumstances indicate the carrying amount of the asset may not be recoverable and the carrying value of the property exceeds its estimated fair value. Properties whose carrying values are greater than their undiscounted cash flows are written down to their estimated fair value, with the impairment loss included as an adjustment to “Net realized investment gains” in the consolidated statements of operations. Impairment losses are based upon the estimated fair value of real estate, which is generally computed using the present value of expected future cash flows from the real estate discounted at a rate commensurate with the underlying risks as well as other appraisal methods. Real estate acquired upon foreclosure is recorded at the lower of its cost or its estimated fair value at the date of foreclosure.

Real estate joint ventures and other limited partnership interests in which the Company has more than a minor interest or influence over the investee’s operations, but it does not have a controlling interest and is not the primary beneficiary, are accounted for using the equity method. These investments are reported as “Investments in unconsolidated affiliates” in the consolidated statements of financial position. For certain joint ventures, American National records its share of earnings using a lag methodology of one to three months when timely financial information is not available, and the contractual right does not exist to receive such financial information. In addition to the investees’ impairment analysis of their underlying investments, American National routinely evaluates its investments in those investees for impairments. American National considers financial and other information provided by the investee, other known information, and inherent risks in the underlying investments, as well as future capital commitments, in determining whether impairment has occurred. When an impairment is deemed to have occurred at the joint venture level, American National recognizes its share as an adjustment to “Equity in earnings of unconsolidated affiliates” to record the investment at its fair value. When an impairment results from American National’s separate analysis, an adjustment is made through “Net realized investment gains” to record the investment at its fair value.

Short-term investments comprised of commercial paper are carried at amortized cost, which approximates fair value. Short-term investments have a maturity of less than one year.

Other invested assets comprised primarily of equity-indexed options are carried at fair value and may be collateralized by counterparties; such collateral is restricted to the Company’s use. Separately managed accounts and Federal Home Loan Bank stock are also included in other invested assets and are carried at cost or market value if available from the account manager. Other invested assets also include tax credit partnerships and mineral rights less allowance for depletion, where applicable.

Credit losses on fixed maturity securities, **held-to-maturity**, receive a lifetime expected credit loss allowance upon initial recognition of the security representing the net amount expected to be collected. Expected credit losses are measured on a collective (pool) basis by major security type with the credit loss allowance determined based on the difference between the net present value of the expected cash flows from those pooled securities with the amortized cost basis. The expected cash flows are discounted at the effective interest rate of the security and consider historical credit loss information that is adjusted for current market conditions and reasonable and supportable economic forecasts based upon a third-party valuation model. The valuation model calculates expected cash flows based on scenario conditioned probability of default and loss given default. Probability of default measures the likelihood of default over a specified time period, and the loss given default measures the amount that the Company could lose in the event of a counterparty default.

For fixed maturity securities, available-for-sale, in unrealized loss positions which American National does not intend to sell and for which it is not more-likely-than-not that it will be required to sell before its anticipated recovery, American National assesses whether the amortized cost basis of securities will be recovered by comparing the net present value of the expected cash flows from those securities with its amortized cost basis. Management estimates the expected cash flows using a third-party valuation model similar to that used for held-to-maturity securities. The net present value of the expected cash flows is calculated by discounting management's best estimate of expected cash flows at the effective interest rate implicit in the fixed maturity security when acquired. If the net present value of the expected cash flows is less than the amortized cost, a credit loss allowance is recorded. The credit loss is recorded as the excess of amortized cost over the net present value of the expected cash flows limited by the amount the fair value is less than the amortized cost (fair-value floor). If the fair value is less than the net present value of its expected cash flows at the impairment measurement date, a non-credit loss exists which is recorded in other comprehensive income (loss) for the difference between the fair value and the net present value of the expected cash flows.

Additions to or releases of the allowance on all fixed maturity securities are reported in "Change in investment credit loss" in the consolidated statements of operations.

Prior to January 1, 2020, an other-than-temporary impairment ("OTTI") loss was recorded when management believed the carrying value would not be realized. After the recognition of a credit loss, fixed maturity securities were accounted for as if they had been purchased on the OTTI measurement date, with a cost basis equal to their previous amortized cost less the related OTTI losses recognized in earnings. The new cost basis of an other-than-temporarily impaired security was not adjusted for subsequent increases in estimated fair value. Should there have been a significant increase in the estimate of cash flows expected to be collected from previously impaired securities, the increase would have been accounted for prospectively by accreting it as interest income over its remaining life.

Derivative instruments are purchased to hedge against future interest rate increases in liabilities indexed to market rates and are recorded in the consolidated statements of financial position at fair value net of collateral provided by counterparties. The change in fair value of derivative assets and liabilities is reported in the consolidated statements of operations as "Net investment income" and "Interest credited to policyholders' account balances," respectively. American National does not apply hedge accounting treatment to its derivative instruments. The Company uses derivative instruments to hedge its business risk and holds collateral to offset exposure from its counterparties. Collateral that supports credit risk is reported in the consolidated statements of financial position as an offset to "Other invested assets" with an associated payable to "Other liabilities" for excess collateral.

Cash and cash equivalents have durations that do not exceed 90 days at the date of acquisition, include cash on-hand and in banks, as well as amounts invested in money market funds, and are reported as "Cash and cash equivalents" in the consolidated statements of financial position.

Property and equipment consist of buildings occupied by American National, data processing equipment, software, furniture and equipment, and automobiles which are carried at cost, less accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful life of the asset (typically 3 to 50 years).

Note 2 - Summary of Significant Accounting Policies and Practices - (Continued)

Insurance specific assets and liabilities

Deferred policy acquisition costs ("DAC") are capitalized costs related directly to the successful acquisition of new or renewal insurance contracts. Significant costs are incurred to acquire insurance and annuity contracts, including commissions and certain underwriting, policy issuance, and processing expenses.

DAC on traditional life, including limited-pay contracts, and health products is amortized with interest over the anticipated premium-paying period of the related policies in proportion to the ratio of annual premium revenue expected to be received over the life of the policies. Expected premium revenue is estimated by using the same mortality, morbidity, and withdrawal assumptions used in computing liabilities for future policy benefits. DAC is reduced by a provision for possible inflation of maintenance and settlement expenses determined by means of grading interest rates.

DAC on universal life and investment-type contracts is amortized as a level percentage of the present value of anticipated gross profits from investment yields, mortality, and surrender charges. The effect of the realization of unrealized gains (losses) on DAC is recognized within AOCI in the consolidated statements of financial position as of the reporting date. A change in interest rates could have a significant impact on DAC calculated for these contracts.

DAC associated with property and casualty business is amortized over the coverage period of the related policies, in relation to premiums earned.

For short-duration and long-duration contracts, DAC is grouped consistent with the manner in which insurance contracts are acquired, serviced, and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. Investment income is anticipated in assessing the recoverability of DAC for short-duration contracts.

Liabilities for future policy benefits for traditional products have been provided on a net level premium method based on estimated investment yields, withdrawals, mortality, and other assumptions that were appropriate at the time the policies were issued. Estimates are based on historical experience adjusted for possible adverse deviation. These estimates are periodically reviewed and compared with actual experience. When it is determined that future expected experience differs significantly from existing assumptions, the estimates are revised for current and future issues.

Policyholders' account balances represent the contract value that has accrued to the benefit of the policyholders related to universal-life and investments-type contracts. For fixed products, these are generally equal to the accumulated deposits plus interest credited, reduced by withdrawals, payouts, and accumulated policyholder assessments. Indexed product account balances are equal to the sum of host and embedded derivative reserves computed per derivative accounting guidance.

Liabilities for unpaid claims and claim adjustment expenses ("CAE") are established to provide for the estimated costs of paying claims. These reserves include estimates for both case reserves and IBNR claim liabilities. Case reserves include the liability for reported but unpaid claims. IBNR liabilities include a provision for potential development on case reserves, losses on claims currently closed which may reopen in the future, as well as IBNR claims. These liabilities also include an estimate of the expense associated with settling claims, including legal and other fee, and the general expenses of administering the claims adjustment process.

Reinsurance recoverables are estimated amounts due to American National from reinsurers related to paid and unpaid ceded claims and CAE and are presented net of a reserve for collectability. Recoveries of gross ultimate losses under our non-catastrophe reinsurance are estimated by a review of individual large claims and the ceded portion of IBNR using assumed distribution of loss by percentage retained. Recoveries of gross ultimate losses under our catastrophe reinsurance are estimated by applying reinsurance treaty terms to estimates of gross ultimate losses. The most significant assumption is the average size of the individual losses for those claims that have occurred but have not yet been reported and our estimate of gross ultimate losses. The ultimate amount of the reinsurance ceded recoverable is unknown until all losses settle.

Separate account assets and liabilities

Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of American National. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. American National reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from American National's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, American National's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the consolidated statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of American National.

Premiums, benefits, claims incurred, and expenses

Traditional ordinary life and health premiums are recognized as revenue when due. Benefits and expenses are associated with earned premiums to result in recognition of profits over the term of the insurance contracts.

Annuity premiums received on limited-pay and supplemental annuity contracts involving a significant life contingency are recognized as revenue when due. Deferred annuity premiums are recorded as deposits rather than recognized as revenue. Revenues from deferred annuity contracts are principally surrender charges and, in the case of variable annuities, administrative fees assessed to contract holders.

Universal life and single premium whole life revenues represent amounts assessed to policyholders including mortality charges, surrender charges actually paid, and earned policy service fees. Amounts included in expenses are benefits in excess of account balances returned to policyholders.

Property and casualty premiums are recognized as revenue over the period of the contract in proportion to the amount of insurance protection, which is generally evenly over the contract period, net of reinsurance ceded. Claims incurred consist of claims and CAE paid and the change in reserves, net of reinsurance received and recoverable.

Participating insurance policies

Participating business comprised approximately 4.2% of the life insurance in-force at December 31, 2020 and 15.8% of life premiums in 2020.

For the majority of this participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies, which is limited to the greater of 10% of the profit on participating business, or 50 cents per thousand dollars of the face amount of participating life insurance in-force. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends (less net income allocated to stockholders as indicated above) as well as a pro rata portion of unrealized investment gains (losses) net of tax. Dividends to participating policyholders were $7.0 million, $8.4 million, and $7.6 million for the years ended 2020, 2019, and 2018, respectively. Additional income of $5.8 million, $34.0 million, and $4.2 million was allocated to participating policyholders for the years ended 2020, 2019, and 2018, respectively.

For all other participating business, the allocation of dividends to participating policyowners is based upon a comparison of experienced rates of mortality, interest and expenses, as determined periodically for representative plans of insurance, issue ages and policy durations, with the corresponding rates assumed in the calculation of premiums.

Federal income taxes

American National files a consolidated life and non-life federal income tax return. Certain subsidiaries that are consolidated for financial reporting are not eligible to be included in the consolidated federal income tax return; accordingly, they file separate returns.

Note 2 - Summary of Significant Accounting Policies and Practices - (Continued)

Deferred income tax assets and liabilities are recognized to reflect the future tax consequences attributable to differences between the financial statement amounts of assets and liabilities and their respective tax bases. Deferred taxes are measured using enacted tax rates expected to apply in the years in which those temporary differences are expected to be recovered or settled.

American National recognizes tax benefits on uncertain tax positions if it is “more-likely-than-not” the position based on its technical merits will be sustained by taxing authorities. American National recognizes the largest benefit that is greater than 50% likely of being ultimately realized upon settlement. Tax benefits not meeting the “more-likely-than-not” threshold, if applicable, are included with “Other liabilities” in the consolidated statements of financial position. American National recognizes interest expense and penalties related to uncertain tax positions, if applicable, as income tax expense in the consolidated statements of operations. Accrued interest expense and penalties related to uncertain tax positions are reported as "Other liabilities" in the consolidated statements of financial position.

Pension and postretirement benefit plans

Pension and postretirement benefit obligations and costs for our frozen benefit plans are estimated using assumptions including demographic factors such as retirement age and mortality.

American National uses a discount rate to determine the present value of future benefits on the measurement date. The guideline for setting this rate is a high-quality long-term corporate bond rate. For this purpose, a hypothetical bond portfolio to match the expected monthly benefit payments under the pension plan was constructed with the resulting yield of the portfolio used as a discount rate.

In developing the investment return assumption, we relied on a model that utilizes the following factors:

•Current yield to maturity of fixed income securities
•Forecasts of inflation, GDP growth, and total return for each asset class
•Historical plan performance
•Target asset allocation
•Standard deviations and correlations related to historical and expected future returns of each asset class and inflation

The resulting assumption is the assumed rate of return for the plans’ target asset allocation, net of investment expenses, and reflects anticipated returns of the plans’ current and future assets.

Using this approach, the calculated return will fluctuate from year to year; however, it is American National’s policy to hold this long-term assumption relatively constant.

Stock-based compensation

Stock Appreciation Rights (“SARs”) liability and compensation cost is based on the fair value of the grants and is remeasured each reporting period through the settlement date. The fair value of the SARs is calculated using the Black-Scholes-Merton option-pricing model. The key assumptions used in the model include: the grant date and remeasurement date stock prices, expected life of the SARs, and the risk-free rate of return. The compensation liability related to the SAR award is reported as “Other liabilities” in the consolidated statements of financial position.

Restricted Stock (“RS”) equity and compensation cost is based on the fair value of the underlying stock at grant date. The compensation cost accrued is reported as “Additional paid-in capital” in the consolidated statements of financial position.

Restricted Stock Units (“RSUs”) are settled in cash, resulting in classifying RSUs as a liability award. The liability is remeasured each reporting period through the vesting date and is adjusted for changes in fair value. The compensation liability related to the RSUs is reported as “Other Liabilities” in the consolidated statements of financial position.

Litigation contingencies

Existing and potential litigation is reviewed quarterly to determine if any adjustments to liabilities for possible losses are necessary. Reserves for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, a reserve is recorded based on the lowest amount of the range.

Note 3 - Recently Issued Accounting Pronouncements

Adoption of New Accounting Standards

Standard	Description	Effective Date and Method of Adoption	Impact on Financial Statements
ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	The new standard significantly changes how entities measure credit losses for most financial assets, reinsurance recoverables and certain other instruments that are not measured at fair value through net income. The guidance replaces the current "incurred loss" approach with an "expected loss" model for instruments measured at amortized cost. The measurement of credit losses for available-for-sale debt securities measured at fair value is not affected except that credit losses recognized are limited to the amount by which the fair value is below amortized cost, and the credit loss is recognized through a valuation allowance. Previously, the credit loss adjustments for available-for-sale debt securities were recognized through a direct write down of the investment under the other-than-temporary impairment model. The standard also requires additional disclosures.	The Company adopted this standard on its required effective date of January 1, 2020 using a modified retrospective transition.	Adoption of this guidance resulted in an allowance for credit losses primarily on the commercial mortgage loans and related off-balance sheet unfunded loan commitments, held-to-maturity bonds, and reinsurance recoverables. The Company recorded a cumulative effect adjustment to retained earnings of $33.5 million, net of tax, which reduced stockholders' equity. The impact is attributable to a $42.4 million allowance for credit losses on the aforementioned financial assets. See table below for additional detail.
ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement	The new guidance modifies the disclosure requirements on fair value measurements. Certain disclosure requirements are removed, modified, or added to improve the relevancy of the fair value measurement disclosures.	The Company adopted this standard on its required effective date of January 1, 2020 using a prospective transition for certain amendments and retrospective transition for all other amendments.	The adoption of this standard did not have a material impact to the Company's Notes to the Consolidated Financial Statements.
ASU 2018-14, Compensation-Retirement Benefits-Defined Benefit Plans-General (Subtopic 715-20): Disclosure Framework-Changes to the Disclosure Requirements for Defined Benefit Plans	The new standard modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. The guidance removes certain defined benefit pension or other postretirement plan disclosures that are no longer cost beneficial, clarifies the specific requirements for each disclosure, and adds disclosure requirements.	The Company adopted this standard on its required effective date of December 31, 2020, using a retrospective transition.	The adoption of this standard did not have a material impact to the Company's Consolidated Financial Statements or Notes to the Consolidated Financial Statements.
ASU 2018-15, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract	The new standard aligns the requirements for capitalizing implementation costs incurred in a cloud computing arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. Current GAAP does not specifically address the implementation costs of a cloud computing arrangement that is service contract.	The Company adopted this standard on its required effective date of January 1, 2020 using a prospective transition.	The adoption of this standard did not have a material impact to the Company's Consolidated Financial Statements or Notes to the Consolidated Financial Statements.

As of January 1, 2020, changes related to the adoption of ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments ("ASC 326"), had the following effect on assets and liabilities:

	Pre-ASC 326 Adoption	Adjustment to Adopt ASC 326	Balance as of January 1, 2020
Assets:			
Allowance for credit losses			
Fixed maturity, bonds held-to-maturity, at amortized cost	$ -	$ (21,664)	$ (21,664)
Mortgage loans on real estate	(19,160)	(11,216)	(30,376)
Reinsurance recoverables	(8,220)	(7,920)	(16,140)
Liabilities:			
Allowance for credit losses			
Other policyholder funds	-	1,518	1,518
Other liabilities	-	(3,126)	(3,126)
Total	**$ (27,380)**	**$ (42,408)**	**$ (69,788)**

Note 3 - Recently Issued Accounting Pronouncements - (Continued)

Future Adoption of New Accounting Standards - The FASB issued the following accounting guidance relevant to American National:

Standard	Description	Effective Date and Method of Adoption	Impact on Financial Statements
ASU 2018-12, Financial Services-Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts	The guidance will improve the timeliness of recognizing changes in the liability for future policy benefits for traditional and limited payment long-duration contracts and will modify the rate used to discount future cash flows. The guidance will also simplify the accounting for certain market-based options or guarantees associated with deposit (or account balance) contracts (market risk benefits), simplify the amortization of deferred acquisition costs, and add significant qualitative and quantitative disclosures.	This standard will become effective for the Company for all annual and interim periods beginning January 1, 2023, which was extended from the previous effective date of January 1, 2022 through the issuance of ASU 2020-11. The guidance allows for one of two adoption methods, a modified retrospective transition or a full retrospective transition, except for the changes to accounting for market risk benefits which will require a retrospective transition.	We are currently evaluating the impact of the amendment to the Company. Based on the nature of the standard, we expect the impact to be material to our Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
ASU 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes	The amendments simplify the accounting for income taxes by removing certain exceptions in the existing guidance including those related to intra-period tax allocation when there is a loss from continuing operations and income or a gain from other items. The amendments require that an entity recognize a franchise tax (or similar tax) that is partially based on income as an income-based tax and account for any incremental amount incurred as a non-income-based tax as well as other minor changes.	This standard became effective for the Company for all annual and interim periods beginning January 1, 2021. The new guidance specifies which amendments should be applied prospectively, retrospective to all periods presented, or on a modified retrospective basis through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption.	The adoption of this standard did not have a material impact to the Company's Consolidated Financial Statements or Notes to the Consolidated Financial Statements.
ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting	The amendments in this Update provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance only applies to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform.	The amendments in this Update are effective for all entities as of March 12, 2020 and will sunset through December 31, 2022, at which time the application of exceptions and optional expedients will no longer be permitted.	The inventory of LIBOR exposures has been completed and is primarily limited to floating rate bonds, alternative investments, and borrowings within joint venture investments. Some of the contracts included in these categories will mature prior to December 31, 2021, the start of LIBOR rates cessations. The transition from LIBOR is expected to result in an immaterial impact to the Company.

Table of Contents

Note 4 - Investment in Securities

The cost or amortized cost and fair value of investments in securities are shown below (in thousands):

	December 31, 2020				
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Allowance for Credit Losses	Fair Value
Fixed maturity, bonds held-to-maturity					
U.S. states and political subdivisions	$ 109,445	$ 4,101	$ (11)	$ -	$ 113,535
Foreign governments	3,851	374	-	-	4,225
Corporate debt securities	6,992,095	623,233	(9,117)	(7,475)	7,598,736

Total investments in fixed maturity	**$ 15,066,931**	**$ 647,889**	**$ (21,045)**	**$ -**	**$ 15,693,775**

Note 4 - Investment in Securities - (Continued)

The amortized cost and fair value, by contractual maturity, of fixed maturity securities are shown below (in thousands):

	December 31, 2020			
	Bonds Held-to-Maturity		Bonds Available-for-Sale	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	$ 672,904	$ 681,748	$ 416,924	$ 421,798
Due after one year through five years	2,901,055	3,115,358	3,259,188	3,481,552
Due after five years through ten years	2,842,667	3,171,376	2,295,372	2,517,433
Due after ten years	950,786	1,014,699	1,101,658	1,176,397
Total	**$ 7,367,412**	**$ 7,983,181**	**$ 7,073,142**	**$ 7,597,180**

Actual maturities differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Residential and commercial mortgage-backed securities, which are not due at a single maturity, have been presented based on the year of final contractual maturity.

Proceeds from sales of bonds available-for-sale, with the related gross realized gains and losses, are shown below (in thousands):

	Years ended December 31,		
	2020	2019	2018
Proceeds from sales of fixed maturity, bonds available-for-sale	$ 164,372	$ 45,017	$ 85,590
Gross realized gains	624	250	376
Gross realized losses	(4,145)	(1,124)	(2,298)

Gains and losses are determined using specific identification of the securities sold. During 2020 and 2019, bonds below investment grade with a carrying value of $
142.7 million and $157.9 million, respectively, were transferred from held-to-maturity to available-for-sale after a deterioration in the issuers' creditworthiness.

In accordance with various regulations, American National has bonds on deposit with regulating authorities with a carrying value of $47.7 million and $48.0 million at December 31, 2020 and 2019, respectively. In addition, American National has pledged bonds in connection with agreements and transactions, such as financing and reinsurance agreements. The carrying value of bonds pledged was $111.0 million and $162.2 million at December 31, 2020 and 2019, respectively.

The components of the change in net unrealized gains (losses) on debt securities are shown below (in thousands):

	Years ended December 31,		
	2020	2019	2018
Bonds available-for-sale: change in unrealized gains (losses)	$ 242,105	$ 335,473	$ (233,465)
Adjustments for			
Deferred policy acquisition costs	(68,474)	(87,003)	51,920
Participating policyholders' interest	(3,010)	(16,056)	11,157
Deferred federal income tax benefit (expense)	(36,306)	(48,258)	34,127
Change in net unrealized gains (losses) on debt securities, net of tax	**$ 134,315**	**$ 184,156**	**$ (136,261)**

The components of the change in net gains on equity securities are shown below (in thousands):

	Years ended December 31,	
	2020	2019

Unrealized losses on bonds available-for-sale where an allowance for credit loss was not recorded are due to noncredit related factors caused by market liquidity events related to COVID-19 and the related economic downturn. A number of assumptions and estimates are inherent in evaluating whether an allowance for credit loss is necessary, which include the financial condition, near term and long-term prospects of the issue or issuer, including relevant industry conditions and trends and implications of rating agency actions and offering prices.

Equity securities by market sector distribution are shown below, based on fair value:

Allowance for Credit Losses

Held-to-Maturity Securities-Management measures expected credit losses on bonds held-to-maturity on a qualitative adjustment basis by major security type: corporate bonds, structured products, municipals, specialty products and treasuries. Accrued interest receivable on held-to maturity debt securities are excluded from the estimate of credit losses. The estimate of expected credit losses considers historical credit loss information that is adjusted for current market conditions and reasonable and supportable economic forecasts based upon a third-party valuation model.

Available-for-Sale Securities-For bonds available-for-sale in an unrealized loss position, the Company first assesses whether it intends to sell the security or will be required to sell the security before recovery of its amortized cost basis. If either of these criteria is met, the security's amortized cost basis is written down to fair value through income. For bonds available-for-sale that do not meet either indicated criteria, the Company evaluates whether the decline in fair value has resulted from credit events or market factors. In making this assessment, management first calculates the extent to which fair value is less than amortized cost, and then may consider any changes to the rating of the security by a rating agency, and any specific conditions related to the security. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security is compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded through income, limited to the amount fair value is less than amortized cost. Any remaining unrealized loss is recognized in other comprehensive income.

When the discounted cash flow method is used to determine the allowance for credit losses, management's estimates incorporate expected prepayments, if any. Model inputs are considered reasonable and supportable for three years. A mean reversion is applied in years four and five. Credit loss allowance is not measured on accrued interest receivable because the balance is written off to net investment income in a timely manner, within 90 days. Changes in the allowance for credit losses are recognized through the consolidated statement of operations as changes in estimated credit loss.

No accrued interest receivables were written off as of December 31, 2020.

The rollforward of the allowance for credit losses for bonds held-to-maturity is shown below (in thousands):

**Quarterly amounts in the table above are unaudited*

The allowance fluctuated from quarter to quarter in 2020 reflecting market volatility during the year. The impact of COVID-19, the oil price shocks, and the elevated unemployment rate were variables that increased default risk for borrowers in North America and globally. During 2020, energy, retail, construction and transportation sectors were most impacted by the market conditions leading to increased loss allowances; however, in the last quarter of 2020, the default risk forecast had shown that government policies and vaccine development succeeded in mitigating the credit risk to a certain extent. As a result, the expected loss on U.S. corporate debt securities classified as held-to-maturity decreased with the recovery in the market by the end of the year. The outcome drove held-to-maturity allowances to become more in line with available-for-sale results.

Note 4 - Investment in Securities - (Continued)

Credit Quality Indicators

The Company monitors the credit quality of bonds held-to-maturity through the use of credit ratings, which are updated on a monthly basis. The two traditional metrics for assessing interest rate risks are interest-coverage ratios and capitalization ratios which can also be used in the assessment of credit risk. These risks are fairly mitigated through the diversification of all bond investments. Categories of diversification include credit ratings, geographic locations, maturities, and market sector.

The credit quality indicators for the amortized cost of bonds held-to-maturity are shown below (in thousands):

	December 31, 2020					
	Amortized cost of held-to-maturity debt securities by credit rating					
Fixed maturity, bonds held-to-maturity	AAA	AA	A	BBB	BB and below	Total

Note 5 - Mortgage Loans

Generally, commercial mortgage loans are secured by first liens on income-producing real estate. American National attempts to maintain a diversified portfolio by considering both the location of the underlying collateral as well as the type of mortgage loan. The geographic categories come from the U.S. Census Bureau's "Census Regions and Divisions of the United States."
The distribution based on carrying amount of mortgage loans by location is as follows (in thousands, except percentages):

	December 31,			
	2020		2019	
East North Central	$ 783,614	14.9%	$ 667,150	13.1%
East South Central	146,052	2.8	144,887	2.8
Mountain	1,284,555	24.5	1,200,434	23.6
Pacific	806,426	15.4	852,574	16.7
South Atlantic	619,405	11.8	621,875	12.2
West South Central	1,313,848	25.1	1,272,522	25.0
Other	288,631	5.5	337,575	6.6
Total	**$ 5,242,531**	**100.0%**	**$ 5,097,017**	**100.0%**

Note 5 - Mortgage Loans - (Continued)

As of December 31, 2020 and 2019, loans in foreclosure and loans foreclosed are as follows (in thousands, except number of loans):

	December 31,			
	2020		2019	
Foreclosure and foreclosed	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment
In foreclosure	1	$ 5,168	2	$ 13,345

Allowance for loan losses						(19,160)	
Total, net of allowance						**$ 5,097,017**	

As a result of the economic impact associated with COVID-19, as of December 31, 2020,
93 loans with a total balance of $1.6 billion primarily related to hotels, retail and parking operations were modified. The terms of the modifications of these loans include forbearance of principal and interest payments for a period of up to six months, extensions of maturity dates, and/or provision for interest only payments. Of these modified loans, three loans totaling $60.5 million are over 60 days past due and one loan totaling $25.8 million is over 90 days past due. Prior to December 31, 2020, eight loans totaling $230 million which had been modified earlier in the year were modified again. The terms of these modifications were for additional forbearance of up to six months and extensions of interest only payments for up to twelve month and generally included a requirement for the payment of at least 20% of the total interest due during the modification period. The remaining loans are current under their modified terms. The modified loans are presented according to their referenced status under their modified terms in the aging table above. The modified loans had an aggregate deferred interest of $18.3 million as of December 31, 2020.

There were no unamortized purchase discounts as of December 31, 2020 and 2019. Total mortgage loans were net of unamortized origination fees of $26.1 million and $29.3 million at December 31, 2020 and 2019, respectively. No unearned income is included in these amounts.

Note 5 - Mortgage Loans - (Continued)

Troubled Debt Restructurings

American National has granted concessions to certain mortgage loan borrowers. Concessions are generally one of, or a combination of, a delay in payment of principal or interest, a reduction of the contractual interest rate or an extension of the maturity date. Loans that have these concessions could be classified as troubled debt restructurings. The carrying value after the allowance, before and after modification in a troubled debt restructuring, may not change significantly, or may increase if the expected recovery is higher than the pre-modification recovery assessment. Loan modifications executed due to COVID-19 resulting in a total delay of more than six months were evaluated for troubled debt restructured status under current GAAP guidance.

Troubled debt restructuring mortgage loan information is as follows (in thousands, except number of loans):

	Years ended December 31,					
	2020			2019		
	Number of Loans	Recorded Investment Pre-Modification	Recorded Investment Post Modification	Number of Loans	Recorded Investment Pre-Modification	Recorded Investment Post Modification
Office	7	$ 76,220	$ 76,220	2	$ 21,211	$ 21,211
Retail	6	79,943	79,943	1	38,248	38,248
Industrial	2	11,565	11,565	-	-	-
Hotel	34	811,131	811,131	-	-	-
Parking	16	248,465	248,465	-	-	-
Apartment	2	40,097	40,097	-	-	-
Total	**67**	**$ 1,267,421**	**$ 1,267,421**	**3**	**$ 59,459**	**$ 59,459**

American National considers the amount, timing and extent of concessions in determining credit loss allowances for loan losses recorded in connection with a troubled debt restructuring.

There were 67 loans determined to be a troubled debt restructuring for the year ended December 31, 2020. There are $3.9 million of commitments to lend additional funds to debtors whose loans have been modified in a troubled debt restructuring during the periods presented. The increase in loans determined to be a troubled debt restructuring in 2020 is attributable to COVID-19 related loan modifications where the concessions granted were in excess of six-months in duration.

Note 5 - Mortgage Loans - (Continued)

Allowance for Credit Losses

Mortgage loans on real estate are stated at unpaid principal balance, adjusted for any unamortized discount, deferred expenses and allowances. The allowance for current expected losses per ASU No. 2016-13 Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments ("ASC 326"), at the effective date, January 1, 2020, was based upon the current expected credit loss model. Refer to Note 3, Recently Issued Accounting Pronouncements. The model considers past loss experience, current economic conditions, and reasonable and supportable forecasts of future conditions. Reversion for the allowance calculation is implicit in the models used to determine the allowance. The methodology uses a discounted cash flow approach based on expected cash flows.

The rollforward of the allowance for credit losses for mortgage loans is shown below (in thousands):

	Commercial Mortgage Loans**
Balance at December 31, 2017	**$ (18,866)**
Change in allowance	(2,467)
Balance at December 31, 2018	**(21,333)**
Change in allowance	2,173
Balance at December 31, 2019	**(19,160)**
Cumulative adjustment at January 1, 2020*	(11,216)
Provision	(29,069)
Balance at March 31, 2020	**(59,445)**
Provision	(52,035)
Balance at June 30, 2020	**(111,480)**
Provision	(1,436)
Balance at September 30, 2020	**(112,916)**
Provision	(12,787)
Balance at December 31, 2020	**$ (125,703)**

**Effective January 1, 2020, the Company adopted ASU No. 2016-13. Adoption of this guidance resulted in an allowance for credit losses primarily on the commercial mortgage loans and related off-balance sheet unfunded loan commitments, held-to-maturity bonds and reinsurance recoverables. Prior periods have not been restated to conform to the current presentation. See Note 3, Recently Issued Accounting Pronouncements.*

***Quarterly amounts in the table above are unaudited*

The change in allowance for December 31, 2020 was driven by the economic disruption caused by COVID-19.

The asset and allowance balances for credit losses for mortgage loans by property-type are shown below (in thousands):

	December 31, 2020	
	Asset Balance	Allowance
Apartment	$ 557,159	$ (8,845)
Hotel	913,995	(45,596)

Retail	791,677	(10,856)
Parking	364,287	(18,178)
Storage	165,561	(2,509)
Other	163,121	(3,830)
Total	**$ 5,368,234**	**$ (125,703)**

Note 5 - Mortgage Loans - (Continued)

Credit Quality Indicators

Mortgage loans are segregated by property-type and quantitative and qualitative allowance factors are applied. Qualitative factors are developed quarterly based on the pooling of assets with similar risk characteristics and historical loss experience adjusted for the expected trend in the current market environment. Credit losses are pooled by collateral type as it represents the most similar and reliable risk characteristics in our portfolio. The amortized cost of mortgage loans by year of origination by property-type are shown below (in thousands):

	Amortized Cost Basis by Origination Year						
	2020	2019	2018	2017	2016	Prior	Total
Apartment	$ 43,000	$ 179,817	$ 48,316	$ 180,073	$ 68,465	$ 37,488	$ 557,159

Allowance for loan losses							(125,703)
Total, net of allowance							**$ 5,242,531**

Generally, mortgage loans are secured by first liens on income-producing real estate with a loan-to-value ratio of up to 75%. It is the Company's policy to not accrue interest on loans that are 90 days delinquent and where amounts are determined to be uncollectible. At December 31, 2020, commercial loans of $40.2 million were past due over 90 days and are in non-accrual status.

Off-Balance Sheet Credit Exposures

The Company has off-balance sheet credit exposures related to non-cancellable unfunded commitment amounts on commercial mortgage loans. We estimate the allowance for these exposures by applying the allowance rate we computed for each property type to the related outstanding commitment amounts. As of December 31, 2020, we have included an $11.8 million liability in other liabilities on the consolidated statements of financial position based on unfunded loan commitments of $686.5 million.

Note 6 - Real Estate and Other Investments

The carrying amount of investment real estate, net of accumulated depreciation, by property-type and geographic distribution are as follows (in thousands, except percentages):

	December 31, 2020		December 31, 2019	
	Carrying Amount	Percent	Carrying Amount	Percent
Industrial	$ 37,764	7.3%	$ 68,809	12.5%
Office	237,246	45.9	219,490	39.8

American National regularly invests in real estate partnerships and joint ventures. American National frequently participates in the design of these entities with the sponsor, but in most cases, its involvement is limited to financing. Through analysis performed by American National, some of these partnerships and joint ventures have been determined to be variable interest entities (“VIEs”). In certain instances, in addition to an economic interest in the entity, American National holds the power to direct the most significant activities of the entity and is deemed the primary beneficiary or consolidator of the entity. The assets of the consolidated VIEs are restricted and must first be used to settle their liabilities. Creditors or beneficial interest holders of these VIEs have no recourse to the general credit of American National, as American National’s obligation is limited to the amount of its committed investment. American National has not provided financial or other support to the VIEs in the form of liquidity arrangements, guarantees, or other commitments to third-parties that may affect the fair value or risk of its variable interest in the VIEs in 2020 or 2019.

The assets and liabilities relating to the VIEs included in the consolidated financial statements are as follows (in thousands):

	December 31,	
	2020	2019
Investment real estate	$ 131,405	$ 134,534
Short-term investments	500	500
Cash and cash equivalents	8,070	11,155
Other receivables	3,484	3,673
Other assets	13,796	15,355
Total assets of consolidated VIEs	**$ 157,255**	**$ 165,217**
Notes payable	$ 153,703	$ 157,997
Other liabilities	8,490	9,731
Total liabilities of consolidated VIEs	**$ 162,193**	**$ 167,728**

The notes payable in the consolidated statements of financial position pertain to the borrowings of the consolidated VIEs. The liability of American National relating to notes payable of the consolidated VIEs is limited to the amount of its direct or indirect investment in the respective ventures, which totaled $
3.0 million and $4.3 million at December 31, 2020 and 2019, respectively.

Note 6 - Real Estate and Other Investments - (Continued)

The total long-term notes payable of the consolidated VIE's consists of the following (in thousands):

Interest rate	Maturity	December 31, 2020	December 31, 2019
LIBOR	2021	$ 10,819	$ 10,836
4% fixed	2022	78,565	81,709
4.18% fixed	2024	64,319	65,452
Total		**$ 153,703**	**$ 157,997**

For other VIEs in which American National is a partner, it is not the primary beneficiary, and these entities are not consolidated, as the major decisions that most significantly impact the economic activities of the VIE require consent of all partners. The carrying amount and maximum exposure to loss relating to unconsolidated VIEs follows (in thousands):

	December 31, 2020		December 31, 2019	
	Carrying Amount	Maximum Exposure to Loss	Carrying Amount	Maximum Exposure to Loss
Investment in unconsolidated affiliates	$ 368,588	$ 368,588	$ 332,742	$ 332,742
Mortgage loans	722,917	722,917	657,528	657,528
Accrued investment income	4,980	4,980	2,198	2,198

As of December 31, 2020, one real estate investment with a carrying value of $3.4 million met the criteria as held-for-sale.

The Company's equity in earnings of unconsolidated affiliates is the Company's share of operating earnings and realized gains from fixed income and equity funds and investments in real estate joint ventures ("joint ventures") using the equity method of accounting. In 2020 and 2019 certain joint ventures took advantage of market opportunities to generate realized gains on the sale of real estate held or developed by the ventures.

Fixed income and equity funds are primarily comprised of senior secured and second lien private loans that are secured by assets, revenues, or credit/balance sheet lending.

The Company's income from and investment in each joint venture did not exceed 20% and therefore no separate financial disclosure is required. The Company's income from, assets held, and investment in each joint venture did not exceed 10% of operating income before tax. Additionally, the Company's investment in joint ventures is less than 3% of the Company's total assets, and investments in individual joint ventures is not considered to be material to the Company in relation to its financial position or ongoing results of operations. Therefore, summarized financial information of equity method investees has not been included.

The Company's total investment in and equity in earnings of unconsolidated affiliates, of which substantially all are limited liability companies ("LLCs") or limited partnerships, were comprised of the following (in thousands):

	December 31, 2020	December 31, 2019
Fixed income and equity funds	$ 458,776	$ 278,611
Real estate joint ventures	443,279	402,780
Other	18,359	24,330
Total investments in unconsolidated affiliates	**$ 920,414**	**$ 705,721**

	Years ended December 31, 2020	2019	2018
Income from operations	$ 14,958	$ 7,407	$ 7,595
Net gain on sales	27,509	96,094	13,686
Equity in earnings of unconsolidated affiliates	**$ 42,467**	**$ 103,501**	**$ 21,281**

Table of Content

Note 7 - Derivative Instruments

American National purchases over-the-counter equity-indexed options as economic hedges against fluctuations in the equity markets to which equity-indexed products are exposed. These options are not designated as hedging instruments for accounting purposes under GAAP. Equity-indexed contracts include a fixed host universal-life insurance or annuity contract and an equity-indexed embedded derivative.
The detail of derivative instruments is shown below (in thousands, except number of instruments):

		December 31,					
		2020			2019		
Derivatives Not Designated as Hedging Instruments	Location in the Consolidated Statements of Financial Position	Number of Instruments	Notional Amounts	Estimated Fair Value	Number of Instruments	Notional Amounts	Estimated Fair Value
Equity-indexed options	Other invested assets	455	$ 2,867,600	$ 242,201	473	$ 2,654,600	$ 256,005
Equity-indexed embedded derivative	Policyholders' account balances	112,103	2,748,540	705,013	101,950	2,527,205	731,552

		Gains (Losses) Recognized in Income on Derivatives		
		Years ended December 31,		
Derivatives Not Designated as Hedging Instruments	Location in the Consolidated Statements of Operations	2020	2019	2018
Equity-indexed options	Net investment income	$ 51,931	$ 144,980	$ (54,951)
Equity-indexed embedded derivative	Interest credited to policyholders' account balances	(22,977)	(162,011)	17,862

The Company's use of derivative instruments exposes it to credit risk in the event of non-performance by the counterparties. The Company has a policy of only dealing with counterparties it believes are creditworthy and obtaining sufficient collateral where appropriate, as a means of mitigating the financial loss from defaults. The Company holds collateral in cash and notes secured by U.S. government backed assets. The non-performance risk is the net counterparty exposure based on the fair value of the open contracts, less the fair value of collateral held. The Company maintains master netting agreements with its current active trading partners. As such, a right of offset has been applied to collateral that supports credit risk and has been recorded in the consolidated statements of financial position as an offset to "Other invested assets" with an associated payable to "Other liabilities" for excess collateral.

Information regarding the Company's exposure to credit loss on the options it holds is presented below (in thousands):

		December 31, 2020

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. American National has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect American National's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Note 9 - Fair Value of Financial Instruments - (Continued)

Valuation Techniques for Financial Instruments Recorded at Fair Value

Fixed Maturity Securities and Equity Options-American National utilizes a pricing service to estimate fair value measurements. The estimates of fair value for most fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

American National has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant’s assumptions. American National does not adjust quotes received from the pricing service. The pricing service utilized by American National has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

American National holds a small amount of private placement debt and fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from an independent broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate the price is indicative only, American National includes these fair value estimates in Level 3.

For securities priced using a quote from an independent broker, such as the equity-indexed options and certain fixed maturity securities, American National uses a market-based fair value analysis to validate the reasonableness of prices received. Price variances above a certain threshold are analyzed further to determine if any pricing issue exists. This analysis is performed quarterly.

Equity Securities-For publicly-traded equity securities, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements. For certain preferred stock, current market quotes in active markets are unavailable. In these instances, an estimated fair value is received from the pricing service. The service utilizes similar methodologies to price preferred stocks as it does for fixed maturity securities. If applicable, these estimates would be disclosed as Level 2 measurements. American National tests the accuracy of the information provided by reference to other services annually.

Short-Term Investments-Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

Note 9 - Fair Value of Financial Instruments - (Continued)

Separate Account Assets and Liabilities-Separate account assets and liabilities are funds that are held separate from the general assets and liabilities of American National. Separate account assets include funds representing the investments of variable insurance product contract holders, who bear the investment risk of such funds. Investment income and investment gains and losses from these separate funds accrue to the benefit of the contract holders. American National reports separately, as assets and liabilities, investments held in such separate accounts and liabilities of the separate accounts if (i) such separate accounts are legally recognized; (ii) assets supporting the contract liabilities are legally insulated from American National's general account liabilities; (iii) investments are directed by the contract holder; and (iv) all investment performance, net of contract fees and assessments, is passed through to the contract holder. In addition, American National's qualified pension plan assets are included in separate accounts. The assets of these accounts are carried at fair value. Deposits, net investment income and realized investment gains and losses for these accounts are excluded from revenues, and related liability increases are excluded from benefits and expenses in the consolidated statements of operations. Separate accounts are established in conformity with insurance laws and are not chargeable with liabilities that arise from any other business of American National.

The separate account assets included on the quantitative disclosures fair value hierarchy table are comprised of short-term investments, equity securities, and fixed maturity bonds available-for-sale. Equity securities are classified as Level 1 measurements. Short-term investments and fixed maturity securities are classified as Level 2 measurements. These classifications for separate account assets reflect the same fair value level methodologies as listed above as they are derived from the same vendors and follow the same process.

The separate account assets also include cash and cash equivalents, investments in unconsolidated affiliates, accrued investment income, and receivables for securities. These are not financial instruments and are not included in the quantitative disclosures of fair value hierarchy table.

No gains or losses were recognized on assets transferred to separate accounts for the years ended December 31, 2020, 2019, and 2018.

Embedded Derivative-The amounts reported within policyholder contract deposits include equity linked interest crediting rates based on the S&P 500 within indexed annuities and indexed life. The following unobservable inputs are used for measuring the fair value of the embedded derivatives associated with the policyholder contract liabilities:

•Lapse rate assumptions are determined by company experience. Lapse rates are generally assumed to be lower during a contract's surrender charge period and then higher once the surrender charge period has ended. Decreases to the assumed lapse rates generally increase the fair value of the liability as more policyholders persist to collect the crediting interest pertaining to the indexed product. Increases to the lapse rate assumption decrease the fair value.

•Mortality rate assumptions vary by age and gender based on company and industry experience. Decreases to the assumed mortality rates increase the fair value of the liabilities as more policyholders earn crediting interest. Increases to the assumed mortality rates decrease the fair value as higher decrements reduce the potential for future interest credits.

•Equity volatility assumptions begin with current market volatilities and grow to long-term values. Increases to the assumed volatility will increase the fair value of liabilities, as future projections will produce higher increases in the linked index. At December 31, 2020 and 2019, the one-year implied volatility used to estimate embedded derivative value was 17.6% and 11.3%, respectively.

Fair values of indexed life and annuity liabilities are calculated using the discounted cash flow technique. Shown below are the significant unobservable inputs used to calculate the Level 3 fair value of the embedded derivatives within policyholder contract deposits (in millions, except range percentages):

	Fair Value			Range	
	December 31,			December 31,	
	2020	2019	Unobservable Input	2020	2019
Indexed Annuities	$ 670.8	$ 706.5	Lapse Rate	1-50%	1-70%
			Mortality Multiplier	100%	90-100%
			Equity Volatility	16-69%	11-46%

Note 9 - Fair Value of Financial Instruments - (Continued)

For financial instruments measured at fair value on a recurring basis using Level 3 inputs during the period, a reconciliation of the beginning and ending balances is shown below (in thousands):

	Level 3			
	Assets			Liability
	Investment Securities	Equity-Indexed Options	Separately Managed Accounts	Embedded Derivative
Balance at December 31, 2017	**$ -**	**$ 220,190**	**$ -**	**$ 512,526**
Net loss for derivatives included in net investment income	-	(55,093)	-	-
Net change included in interest credited	-	-	-	(17,862)
Purchases, sales and settlements or maturities				
Purchases	4,346	72,033	16,532	-
Sales	-	(18)	-	-
Settlements or maturities	-	(89,106)	-	-
Premiums less benefits	-	-	-	101,411
Balance at December 31, 2018	**4,346**	**148,006**	**16,532**	**596,075**
Net gain for derivatives included in net investment income	-	144,980	-	-
Net change included in interest credited	-	-	-	162,011
Net fair value change included in other comprehensive income	-	-	60	-
Purchases, sales and settlements or maturities				
Purchases	45,307	75,163	33,911	-
Sales	(113)	(13,396)	-	-
Settlements or maturities	-	(98,748)	-	-
Premiums less benefits	-	-	-	(26,534)
Gross transfers out of Level 3	(4,233)	-	-	-
Balance at December 31, 2019	**45,307**	**256,005**	**50,503**	**731,552**
Net gain for derivatives included in net investment income	-	51,931	-	-
Net change included in interest credited	-	-	-	22,977
Net fair value change included in other comprehensive income	80	-	(312)	-
Purchases, sales and settlements or maturities				
Purchases	191,960	80,705	25,343	-
Sales	(70,842)	(8,063)	(11,110)	-
Settlements or maturities	-	(138,377)	-	-
Premiums less benefits	-	-	-	(49,516)
Gross transfers out of Level 3	(55,000)	-	-	-
Balance at December 31, 2020	**$ 111,505**	**$ 242,201**	**$ 64,424**	**$ 705,013**

Within the net gain (loss) for derivatives included in net investment income were unrealized losses of $11.2 million, unrealized gains of $113.3 million, and unrealized losses of $94.9 million relating to assets still held at December 31, 2020, 2019, and 2018, respectively.

The associated embedded derivative decrease is largely driven by classification changes to declared funds within indexed products and by changes to the embedded derivative discount rate.

There were
no transfers between Level 1 and Level 2 fair value hierarchies during the periods presented. Unless information is obtained from the brokers that indicates observable inputs were used in their pricing, there are not enough observable inputs to enable American National to classify the securities priced by the brokers as other than Level 3. American National’s valuation of these securities involves judgment regarding assumptions market participants would use including quotes from independent brokers. The inputs used by the brokers include recent transactions in the security, similar bonds with same name, ratings, maturity and structure, external dealer quotes in the security, Bloomberg evaluated pricing and prior months pricing. None of these inputs were observable to American National as of December 31, 2020. The transfers out of Level 3 during the years ended December 31, 2020 and 2019 were the result of securities being priced by the third-party service at the end of the period, using inputs that were observable or derived from market data, which resulted in classification of these assets as Level 2.

Note 9 - Fair Value of Financial Instruments - (Continued)

Fair Value Information About Financial Instruments Not Recorded at Fair Value

Information about fair value estimates for financial instruments not measured at fair values is discussed below:

Fixed Maturity Securities-The fair value of bonds held-to-maturity is determined to be consistent with the disclosure under Valuation Techniques for the Financial Instrument Recorded at Fair Value section.

Mortgage Loans-The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan by loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property type, lien priority, payment type and current status.

Policy Loans-The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, American National believes the carrying value of policy loans approximates fair value.

Separately Managed Accounts-The amounts reported in separately managed accounts consist primarily of notes and private equity. These investments are private placements and do not have a readily determinable fair value. The carrying value of the separately managed accounts is cost or market value, if available from the separately managed account manager. Market value is provided by the separately managed account manager in subsequent quarters. American National believes that cost approximates fair value at initial recognition during the quarter of investment.

Investment Contracts-The carrying value of investment contracts is equivalent to the accrued account balance. The accrued account balance consists of deposits, net of withdrawals, net of interest credited, fees and charges assessed and other adjustments. American National believes that the carrying value of investment contracts approximates fair value because the majority of these contracts' interest rates reset at anniversary.

Notes Payable-Notes payable are carried at outstanding principal balance. The carrying value of the notes payable approximates fair value because the underlying interest rates approximate market rates at the balance sheet date.

Federal Home Loan Bank Advance-The Federal Home Loan Bank advance is carried at outstanding principal balance. The fair value of the advance is obtained from the Federal Home Loan Bank of Dallas.

Note 9 - Fair Value of Financial Instruments - (Continued)

The carrying value and estimated fair value of financial instruments not recorded at fair value on a recurring basis are shown below (in thousands):

	December 31, 2020		
	FV Hierarchy Level	Carrying Amount	Fair Value
Financial assets			
Fixed maturity, bonds held-to-maturity			
U.S. states and political subdivisions	Level 2	$ 109,445	$ 113,535

Additions	139,336	70,272	19,940	313,710	543,258
Amortization	(113,300)	(79,746)	(21,322)	(316,141)	(530,509)
Effect of change in unrealized gains on available-for-sale debt securities	(12,269)	(74,734)	-	-	(87,003)
Net change	**13,767**	**(84,208)**	**(1,382)**	**(2,431)**	**(74,254)**
Balance at December 31, 2019	**852,900**	**415,380**	**32,578**	**122,149**	**1,423,007**
Additions	148,142	55,411	15,926	335,744	555,223
Amortization	(94,386)	(103,709)	(15,619)	(335,831)	(549,545)
Effect of change in unrealized gains on available-for-sale debt securities	(10,448)	(58,026)	-	-	(68,474)
Net change	**43,308**	**(106,324)**	**307**	**(87)**	**(62,796)**
Balance at December 31, 2020	**$ 896,208**	**$ 309,056**	**$ 32,885**	**$ 122,062**	**$ 1,360,211**

Commissions comprise the majority of the additions to deferred policy acquisition costs.

Note 11 - Liability for Future Policy Benefits and Policyholder Account Balances

American National estimates liabilities for amounts payable under insurance and annuity policies. Generally, amounts are payable over an extended period of time and related liabilities are calculated as the present value of expected benefit payments reduced by the present value of expected premiums. Such liabilities are established on a block of business based on methods and underlying assumptions in accordance with GAAP and applicable actuarial standards. Principal assumptions used in the establishment of liabilities for future policy benefits are mortality, morbidity, policy lapse, renewal, retirement, disability incidence, disability termination, investment return, inflation, expenses, and other contingent events as appropriate to the respective product type.

Future policy benefits for non-participating traditional life insurance are equal to the aggregate of the present value of expected benefit payments and related expenses less the present value of expected net premiums. Assumptions as to mortality and persistency are based upon American National's experience when the basis of the liability is established. Interest rates for the aggregate future policy benefit liabilities range from 3.0% to 8.0%.

Future policy benefit liabilities for participating traditional life insurance are equal to the aggregate of (i) net level premium reserves for death and endowment policy benefits (calculated based upon the non-forfeiture interest rate, ranging from 2.5% to 5.5%) and mortality rates guaranteed in calculating the cash surrender values described in such contracts; and (ii) the liability for terminal dividends.

Future policy benefit liabilities for individual fixed deferred annuities after annuitization and single premium immediate annuities are equal to the present value of expected future payments. The interest rate used in establishing such liabilities range from 3.0% to 6.0% for all policies in-force.

Future policy benefit liabilities for non-medical health insurance are calculated using the net level premium method and assumptions as to future morbidity, withdrawals and interest, which provide a margin for adverse deviation. The interest rate used in establishing such liabilities range from 3.5% to 8.0%.

Future policy benefit liabilities for disabled lives are estimated using the present value of benefits method and experience assumptions as to claim terminations, expenses and interest. The interest rates used in establishing such liabilities range from 3.0% to 6.0%.

Liabilities for universal life secondary guarantees and paid-up guarantees are determined by estimating the expected value of death benefits payable when the account balance is projected to be zero and recognizing those benefits ratably over the accumulation period based on total expected assessments. American National regularly evaluates estimates used and adjusts the additional liability balances with a related charge or credit to benefit expense, if actual experience or other evidence suggests that earlier assumptions should be revised. The assumptions used in estimating the secondary and paid-up guarantee liabilities are consistent with those used for amortizing DAC, and are thus subject to the same variability and risk. The assumptions of investment performance and volatility for variable products are consistent with historical Standard & Poor's experience. The benefits used in calculating the liabilities are based on the average benefits payable over a range of scenarios.

American National periodically reviews its estimates of actuarial liabilities for future policy benefits and compares them with its actual experience. Differences between actual experience and the assumptions used in pricing these policies, guarantees and riders and in the establishment of the related liabilities result in variances in profit and could result in losses. The effects of changes in such estimated liabilities are included in the consolidated statements of operations in the period in which the changes occur.

Policyholder account balances relate to investment-type contracts and universal life-type policies. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase and non-variable group annuity contracts. Policyholder account balances are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest, ranging from 1.0% to 8.0% (some annuities have enhanced first year crediting rates ranging from 1.0% to 7.0%), less expenses, mortality charges, and withdrawals; and (iii) fair value adjustment.

Note 12 - Liability for Unpaid Claims and Claim Adjustment Expenses

The liability for unpaid claims and claim adjustment expenses (“claims”) for health and property and casualty insurance is included in “Policy and contract claims” in the consolidated statements of financial position and is the amount estimated for incurred but not reported (“IBNR”) claims and claims that have been reported but not settled. The liability for unpaid claims is estimated based upon American National’s historical experience and actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs, less anticipated salvage and subrogation. The effects of the changes are included in the consolidated results of operations in the period in which the changes occur. The time value of money is not taken into account for the purposes of calculating the liability for unpaid claims. There have been no significant changes in methodologies or assumptions used to calculate the liability for unpaid claims and claim adjustment expenses.

Information regarding the liability for unpaid claims is shown below (in thousands):

	Years ended December 31,		
	2020	2019	2018
Unpaid claims balance, beginning	$ 1,322,837	$ 1,305,225	$ 1,218,652
Less: Reinsurance recoverables	246,447	254,466	241,301
Net beginning balance	1,076,390	1,050,759	977,351
Incurred related to			
Current	1,177,634	1,207,796	1,193,216
Prior years	(61,659)	(57,979)	(19,852)
Total incurred claims	1,115,975	1,149,817	1,173,364
Paid claims related to			
Current	681,960	688,544	688,493
Prior years	399,276	435,642	411,463
Total paid claims	1,081,236	1,124,186	1,099,956
Net balance	1,111,129	1,076,390	1,050,759
Plus: Reinsurance recoverables	243,084	246,447	254,466
Unpaid claims balance, ending	$ 1,354,213	$ 1,322,837	$ 1,305,225

The net and gross reserve calculations have shown favorable development as a result of favorable loss emergence compared to what was implied by the loss development patterns used in the original estimation of losses in prior years. Estimates for ultimate incurred claims attributable to insured events of prior years decreased by approximately $61.7 million, $58.0 million, $19.9 million in 2020, 2019, and 2018, respectively. The favorable development in 2020 was a reflection of lower rates of claim severity emergence than previously expected in the worker's compensation line of business , and lower liability claim settlement costs emerging from agribusiness and private passenger automobile lines of business. The favorable development in 2019 reflected lower rates of claim severity emergence than previously expected in the workers compensation line of business , and lower liability claim settlement costs emerging from private passenger automobile line of business.

For short-duration health insurance claims, the total of IBNR plus expected development on reported claims included in the liability for unpaid claims and claim adjustment expenses at December 31, 2020 and December 31, 2019 was $20.5 million and $21.4 million respectively.

Note 12 - Liability for Unpaid Claims and Claim Adjustment Expenses - (Continued)

The reconciliation of the net incurred and paid claims development tables to the liability for claims and claim adjustment expenses in the consolidated statement of financial position is as follows (in thousands):

	December 31, 2020
Net outstanding liabilities	
Auto Liability	$ 449,779
Non-Auto Liability	282,681
Commercial Multi-Peril	125,321
Homeowners	82,010
Short Tail Property	39,528
Credit Property and Casualty	18,870
Credit Life	1,123
Health	25,089
Credit Health	4,689
Other	796
Liabilities for unpaid claims and claim adjustment expenses, net of reinsurance	**1,029,886**
Reinsurance recoverable on unpaid claims	
Auto Liability	9,240
Non-Auto Liability	38,496
Commercial Multi-Peril	5,972
Homeowners	9,520
Short Tail Property	6,018
Credit Property and Casualty	14,220
Credit Life	752
Health	165,436
Credit Health	1,903
Other	7,159
Total reinsurance recoverable on unpaid claims	**258,716**
Insurance lines other than short-duration	229,209
Unallocated claim adjustment expenses	57,477
	286,686
Total gross liability for unpaid claims and claim adjustment expense	**$ 1,575,288**

Note 12 - Liability for Unpaid Claims and Claim Adjustment Expenses - (Continued)

Property and Casualty Reserving Methodology-The following methods are utilized:

•**Initial Expected Loss Ratio**-This method calculates an estimate of ultimate losses by applying an estimated loss ratio to actual earned premium for each calendar/accident year. This method is appropriate for classes of business where the actual paid or reported loss experience is not yet mature enough to influence initial expectations of the ultimate loss ratios.

•**Pegged Frequency and Severity**-This method uses actual claims count data and emergence patterns of older accident periods to project the ultimate number of reported claims for a given accident year. A similar process projects the ultimate average severity per claim so that the product of the two projections results in a projection of ultimate loss for a given accident year.

•**Bornhuetter-Ferguson**-This method uses, as a starting point, either an assumed Initial Expected Loss Ratio Method or Pegged Frequency and Severity method and blends in the loss ratio or frequency and severity implied by the claims experience to date by using loss development patterns based on our historical experience. This method is generally appropriate where there are few reported claims and an unstable pattern of reported losses.

•**Loss or Expense Development (Chain Ladder)**-This method uses actual loss or defense and cost containment expense data and the historical development profiles on older accident periods to project more recent, less developed periods to their ultimate total. This method is appropriate when there is a relatively stable pattern of loss and expense emergence and a relatively large number of reported claims.

•**Ratio of Paid Defense and Cost Containment Expense to Paid Loss Development**-This method uses the ratio of paid defense and cost containment expense to paid loss data and the historical development profiles on older accident periods to project more recent, less developed periods to their ultimate total. In this method, an ultimate ratio of paid defense and cost containment expense to paid loss is selected for each accident period. The selected paid defense and cost containment expense to paid loss ratio is then applied to the selected ultimate loss for each accident period to estimate the ultimate defense and cost containment expense. Paid defense and cost containment expense is then subtracted from the ultimate defense and cost containment expense to calculate the unpaid defense and cost containment expense for that accident period.

•**Calendar Year Paid Adjusting and Other Expense to Paid Loss**-This method uses a selected prior calendar years' paid expense to paid loss ratio to project ultimate loss adjustment expenses for adjusting and other expense. A percentage of the selected ratio is applied to the case reserves (depending on the line of insurance) and 100% to the indicated IBNR reserves. These ratios assume that a percentage of the expense is incurred when a claim is opened and the remaining percentage is paid throughout the claim's life.

For most credit property and casualty products, IBNR liability is calculated as a percentage of pro rata unearned premium, with the specific percentage for a given product line informed by a traditional completion factor claim reserve analysis.

The expected development on reported claims is the sum of a pay-to-current reserve and a future reserve. The pay-to-current reserve is calculated for each open claim having a monthly indemnity and contains the amount required to pay the open claim from the last payment date to the current valuation date. The future reserve is calculated by assigning to each open claim a fixed reserve amount based on the historical average severity. For debt cancellation products and involuntary unemployment insurance, this reserve is calculated using published valuation tables.

Cumulative claim frequency information is calculated on a per claim basis. Claims that do not result in a liability are not considered in the determination of unpaid liabilities.

For any given line of business, none of these methods are relied on exclusively. With minor exceptions, multiple methods may be used for a line of business as a check for reasonableness of our reselected reserve value.

The following contains information about incurred and paid claims development as of December 31, 2020, net of reinsurance, as well as cumulative claim frequency and the total of IBNR liabilities plus expected development on reported claims included within the net incurred claims amounts. The information about incurred and paid claims development for the years ended December 31, 2011 to 2019 is presented as supplementary information.

All outstanding liabilities before 2019, net of reinsurance*		-
Liabilities for claims and claim adjustment expenses, net of reinsurance		$ 1,123

**Unaudited supplementary information.*

Note 12 - Liability for Unpaid Claims and Claim Adjustment Expenses - (Continued)

Health Reserving Methodology-The following methods are utilized:

•**Completion Factor Approach**-This method assumes that the historical claim patterns will be an accurate representation of unpaid claim liabilities. An estimate of the unpaid claims is calculated by subtracting period-to-date paid claims from an estimate of the ultimate "complete" payment for all incurred claims in the period. Completion factors are calculated which "complete" the current period-to-date payment totals for each incurred month to estimate the ultimate expected payout.

•**Tabular Claims Reserves**-This method is used to calculate the reserves for long-term care and disability income blocks of business. These reserves rely on published valuation continuance tables created using industry experience regarding assumptions of continued morbidity and subsequent recovery. Reserves are calculated by applying these continuance tables, along with appropriate company experience adjustments, to the stream of contractual benefit payments. These expected benefit payments are discounted at the required interest rate.

•**Future Policy Benefits**-Reserves are equal to the aggregate of the present value of expected future benefit payments, less the present value of expected future premiums. Morbidity and termination assumptions are based on our experience or published valuation tables when available and appropriate.

•**Premium Deficiency Reserves**-Deficiency reserves are established when the expected future claim payments and expenses for a classification of policies are in excess of the expected premiums for these policies. The determination of a deficiency reserve takes into consideration the likelihood of premium rate increases, the timing of these increases, future net investment income, and the expected benefit utilization patterns. We have established premium deficiency reserves for portions of the major medical business and the long-term care business that are in run-off. The assumptions and methods used to determine the deficiency reserves are reviewed periodically for reasonableness, and the reserve amount is monitored against emerging losses.

There is no expected development on reported claims in the health blocks. Claim frequency is determined by totaling the number of unique claim numbers during the period as each unique claim number represents a claim event for an individual claimant.

Health-Consists of stop-loss and other supplemental health products. This line of business has substantially all claims settled and paid in less than five years. Claims and claim adjustment expenses are shown below (in thousands):

				Total	**$ 200,902**
				All outstanding liabilities before 2016, net of reinsurance*	4,676
				Liabilities for claims and claim adjustment expenses, net of reinsurance	**$ 25,089**

**Unaudited supplementary information.*

Note 12 - Liability for Unpaid Claims and Claim Adjustment Expenses - (Continued)

Credit Health Reserving Methodology-The following methods are utilized:

Tabular Claims Reserves-These reserves rely on published valuation continuance tables. The insureds age at disablement, the duration of the claim and the remaining term of the policy are used to provide a factor which is applied to the remaining exposure to calculate the present value of future benefits for insureds on claim.

The claim liability consists of IBNR and Due/Unpaid. The IBNR utilizes an inventory type method based on historical patterns of claim payments incurred but not reported within the last six months of the valuation date.

The Due/Unpaid reserves are the amount needed to pay an open claim from the last date of payment to the reserve valuation date.

Credit Health-The claim liability consists of credit disability. This line of business has substantially all claims settled and paid in less than five years. Claims and claim adjustment expenses are shown below (in thousands):

	Incurred Claims and Allocated Claim Adjustment Expenses, Net of Reinsurance					As of December 31, 2020	
	Years ended December 31,

Table of Contents

Note 13 - Reinsurance

American National reinsures portions of certain life insurance policies to provide a greater diversification of risk and manage exposure on larger risks.
The maximum amounts that would be retained by one life insurance company (ANICO) by issue ages are shown below (in thousands):

	0-75 Years	76-80 Years	81 and Over
Individual life	$ 5,000	$ 2,000	$ 1,000
Individual accidental death	250	250	250
Credit life	100	100	100
Group life	100	100	100
Total	**$ 5,450**	**$ 2,450**	**$ 1,450**

For the Property and Casualty segment, American National retains the first $
1 million of loss per workers' compensation risk and $1.5 million of loss per non-workers' compensation risk. Reinsurance covers up to $6 million of property and liability losses per risk. Additional excess property per risk coverage is purchased to cover risks up to $20 million, and excess casualty clash coverage is purchased to cover losses up to $60 million. Excess casualty clash covers losses incurred as a result of one casualty event involving multiple policies, excess policy limits and extra contractual obligations. Facultative reinsurance is purchased for individual risks attaching at $20 million as needed. Corporate catastrophe coverage is in place for losses up to $500 million. American National retains the first $17.5 million of each catastrophe. Catastrophe aggregate reinsurance coverage is also purchased and is provided by two contracts. The first contract provides for $30 million of coverage after $104 million of aggregated catastrophe losses has been reached. The first $25 million of each catastrophe loss net of other reinsurance contributes to the $104 million aggregation of losses. The second aggregate contract is the Second and Third Event Property Catastrophe Excess cover. This cover provides $15 million of protection excess of the $10 million retention per catastrophe. The reinsurance protection follows satisfaction of a $13.5 million AAD. This cover acts to reduce the retention on large second and third catastrophe events to $10 million following a first large catastrophe and includes one automatic reinstatement at 100%.

American National remains primarily liable with respect to any reinsurance ceded and would bear the entire loss if the reinsurer does not meet their obligations under any reinsurance treaties. American National had the following recoverables from reinsurance, net of allowance for credit losses (in thousands):

	December 31,	
	2020	2019
Reinsurance recoverables	$ 414,359	$ 411,830

None of the amount outstanding at December 31, 2020 is the subject of litigation or is in dispute with the reinsurers involved. Management believes the unfavorable resolution of any dispute that may arise would not have a material impact on American National's consolidated financial statements.

The amounts in the consolidated financial statements include the impact of reinsurance. Premiums written and earned are shown below (in thousands):

	Years ended December 31,

Return to provision	-	-	1,007	0.1	(20,301)	(12.5)
Other items, net	2,397	0.4	(65)	(0.1)	1,155	0.6
Total	**$ 116,607**	**20.1%**	**$ 165,417**	**20.5%**	**$ 1,445**	**0.8%**

As of December 31, 2020, American National had no material net operating loss or tax credit carryforwards.

American National's federal income tax returns for tax years 2016 to 2019 are subject to examination by the Internal Revenue Service. In April 2019, American National received notice from the Internal Revenue Service of its intent to audit tax years 2013 to 2016. In September 2020, American National reached a settlement with the Internal Revenue Service and the audit of tax years 2013, 2014, 2015 and 2016 is now closed. The settlement had no impact on our consolidated statements of financial position or consolidated statements of operations. In the opinion of management, all prior year deficiencies have been paid or adequate provisions have been made for any tax deficiencies that may be upheld.

As of December 31, 2020, American National had no provision for uncertain tax positions and no provision for penalties or interest. In addition, management does not believe there are any uncertain tax benefits that could be recognized within the next twelve months that would impact American National's effective tax rate.

Note 14 - Federal Income Taxes - (Continued)

The tax effects of temporary differences that gave rise to the deferred tax assets and liabilities are shown below (in thousands):

	December 31,	
	2020	2019
DEFERRED TAX ASSETS		
Invested assets, principally due to impairment losses	$ 19,413	$ 16,760
Investment in real estate and other invested assets, principally due to investment valuation allowances	33,583	9,680
Policyholder funds, principally due to policy reserve discount	57,572	76,506
Policyholder funds, principally due to unearned premium reserve	23,225	25,726
Participating policyholders' surplus	41,593	41,533
Commissions and other expenses	9,057	3,495
Other assets	2,492	11,291
Tax carryforwards	1,638	2,344
Gross deferred tax assets before valuation allowance	**188,573**	**187,335**
Valuation allowance	(2,458)	(3,083)
Gross deferred tax assets after valuation allowance	**186,115**	**184,252**
DEFERRED TAX LIABILITIES		
Marketable securities, principally due to net unrealized gains	388,004	278,144
Investment in bonds, principally due to differences between GAAP and tax basis	16,041	15,004
Deferred policy acquisition costs, due to difference between GAAP and tax amortization methods	199,152	218,795
Property, plant and equipment, principally due to difference between GAAP and tax depreciation methods	19,185	20,812
Pension	1,549	1,833
Other liabilities	40,531	44,192
Gross deferred tax liabilities	**664,462**	**578,780**
Total net deferred tax liability	**$ 478,347**	**$ 394,528**

GAAP requires us to evaluate the recoverability of our deferred tax assets and establish a valuation allowance, if necessary, to reduce our deferred tax assets to an amount that is more-likely-than-not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. There were no material changes to our valuation allowance recorded during the years ended December 31, 2020 and 2019. Although realization is not assured, management believes it is more-likely-than-not that our remaining deferred tax assets will be realized and that as of December 31, 2020, no additional valuation allowance is required.

Note 16 - Stockholders' Equity and Noncontrolling Interests

The holding company reorganization effective July 1, 2020, provided for the automatic conversion of each share of ANICO common stock, par value of $1.00 per share, issued and outstanding immediately prior to the effective time of the reorganization, into one duly issued, fully paid and non-assessable share of the common stock, par value $0.01 per share, of ANAT. ANAT has one class of common stock with 50,000,000 authorized shares. Upon the effective date of the holding company reorganization, ANAT retired 3,945,249 shares of common stock that were held in treasury at ANICO prior to the reorganization.
The number of shares outstanding at the dates indicated are shown below:

	Years ended December 31,		
	2020	2019	2018
Common stock

Stock-based Compensation

American National has made grants of Stock Appreciation Rights ("SAR"), Restricted Stock ("RS"), and Restricted Stock Units ("RSU"), pursuant to a stock-based compensation plan. The term for granting additional awards under such plan expired in 2019. Pursuant to the plan, grants were made to certain officers meeting established performance objectives, and grants were made to directors as compensation and to align their interests with those of other shareholders. In addition, American National has made grants to directors and advisory directors of RSUs that are cash-settled only, with no provision for conversion to stock. 8,250 of such cash-settled RSUs were granted during the third quarter of 2020 and are currently outstanding as shown in the table below.

SAR, RS and RSU information for the periods indicated are shown below:

	SAR		RS Shares		RSUs	
	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value	Units	Weighted-Average Grant Date Fair Value

Note 16 - Stockholders' Equity and Noncontrolling Interests - (Continued)

	SAR	RS Shares	RSUs
Weighted-average contractual remaining life (in years)	0.0	2.2	0.3
Exercisable shares	-	N/A	N/A
Weighted-average exercise price	$ -	$ 80.05	$ 75.35
Weighted-average exercise price exercisable shares	-	N/A	N/A
Compensation expense (credit)			
Year ended December 31, 2020	$ (1,000)	$ 80,000	$ 449,000
Year ended December 31, 2019	15,000	80,000	1,168,000
Year ended December 31, 2018	(28,000)	328,000	1,098,000
Fair value of liability award			
December 31, 2020	$ -	N/A	$ 793,000
December 31, 2019	1,000	N/A	971,000

The SARs give the holder the right to cash compensation based on the difference between the stock price on the grant date and the stock price on the exercise date. The SARs vest at a rate of 20% per year for five years and expire five years after vesting. All remaining SARs expired on May 1, 2020.

RS awards entitle the participant to full dividend and voting rights. Each RS share awarded has the value of one share of restricted stock and vests 10 years from the grant date. Unvested shares are restricted as to disposition, and are subject to forfeiture under certain circumstances. Compensation expense is recognized over the vesting period. The restrictions on these awards lapse after 10 years and most of these awards feature a graded vesting schedule in the case of the retirement, death or disability of an award holder. Restricted stock awards for 350,334 shares have been granted at an exercise price of zero, of which 10,000 shares are unvested.

RSU awards to our directors and advisory directors are settled in cash based upon the market price of our common stock after one-year or earlier upon death, disability or retirement from service after age 65. During the twelve months ended December 31, 2020, 8,250 RSUs were granted and will vest on May 1, 2021 and will be settled in cash.

Earnings per Share

Basic earnings per share were calculated using a weighted average number of shares outstanding. Diluted earnings per share include RS and RSU award shares issued in 2019 and 2018. RSUs issued in 2020 may only be settled in cash.

	Years ended December 31,		
	2020	2019	2018
Weighted average shares outstanding	26,878,679	26,882,691	26,886,357

Net income attributable to American National (in thousands)	$ 467,505	$ 620,363	$ 158,995
Basic earnings per share	$ 17.39	$ 23.08	$ 5.91
Diluted earnings per share	$ 17.38	$ 23.07	$ 5.91

Statutory Capital and Surplus

Risk Based Capital ("RBC") is a measure insurance regulators use to evaluate the capital adequacy of American National's insurance subsidiaries. RBC is calculated using formulas applied to certain financial balances and activities that consider, among other things, investment risks related to the type and quality of investments, insurance risks associated with products and liabilities, interest rate risks and general business risks. Insurance companies that do not maintain capital and surplus at a level at least 200% of the authorized control level RBC are required to take certain actions. At December 31, 2020 and 2019, ANICO's statutory capital and surplus was $3.6 billion and $3.5 billion, respectively. All of our other insurance subsidiaries had statutory capital and surplus at December 31, 2020 and 2019, above 200% of the authorized control level, except for ANPAC Louisiana Insurance Company ("ANPLA") at December 31, 2020. At December 31, 2020 and December 31, 2019, ANPLA's statutory capital and surplus was $68.5 million and $77.0 million, which resulted in an RBC level of 194% and 280% of the authorized control level, respectively. This decrease in RBC of ANPLA is primarily driven by an increase in homeowners catastrophe losses impacting the current year operating results in 2020. We are actively managing our homeowners exposure of ANPLA, will continue to monitor the surplus levels and will be addressing rate adequacy through future planned underwriting and rate actions.

Note 16 - Stockholders' Equity and Noncontrolling Interests - (Continued)

American National's insurance subsidiaries prepare financial statements in accordance with statutory accounting practices prescribed or permitted by the insurance department of each subsidiary's state of domicile, which include certain components of the National Association of Insurance Commissioners' Codification of Statutory Accounting Principles ("NAIC Codification"). NAIC Codification is intended to standardize regulatory accounting and reporting to state insurance departments. However, statutory accounting practices continue to be established by individual state laws and permitted practices. Modifications by the various state insurance departments may impact the statutory capital and surplus of our insurance subsidiaries.

Statutory accounting differs from GAAP primarily by charging policy acquisition costs to expense as incurred, establishing future policy benefit liabilities using different actuarial assumptions, and valuing securities on a different basis. In addition, certain assets are not admitted under statutory accounting principles and are charged directly to surplus.

One of American National's insurance subsidiaries has been granted a permitted practice from the Missouri Department of Insurance to record as the valuation of its investment in a wholly-owned subsidiary that is the attorney-in-fact for a Texas domiciled insurer, the statutory capital and surplus of the Texas domiciled insurer. This permitted practice increases the statutory capital and surplus of both ANICO and the Missouri domiciled insurance subsidiary by $75.3 million and $70.3 million at December 31, 2020 and 2019, respectively. The statutory capital and surplus of both ANICO and the Missouri domiciled insurance subsidiary would have remained above the Company action level RBC had it not used the permitted practice.

The statutory capital and surplus and net income (loss) of our life and property and casualty insurance entities in accordance with statutory accounting practices are shown below (in thousands):

	December 31,	
	2020	2019
Statutory capital and surplus		
Life insurance entities	$ 2,188,808	$ 2,159,770
Property and casualty insurance entities	1,463,179	1,329,782

	Years ended December 31,		
	2020	2019	2018
Statutory net income (loss)			
Life insurance entities	$ (25,178)	$ 47,133	$ 59,909
Property and casualty insurance entities	127,207	96,269	66,680

Dividends

Dividends are paid on a quarterly basis. We paid a quarterly dividend of $0.82 per share for each quarter for the years ended December 31, 2020 and 2019, and we expect to continue to pay regular cash dividends, although there is no assurance as to future dividends because they depend on future earnings, capital requirements and financial conditions.

The amount of dividends paid by our insurance company subsidiaries is restricted by insurance law. These restrictions are based, in part, on the prior year's statutory income and surplus. In general, dividends up to specified levels are considered ordinary and may be paid without prior regulatory approval. Dividends in larger amounts, or extraordinary dividends, are subject to approval by the insurance commissioner of the relevant state of domicile. For example, restrictions applicable to Texas-domiciled life insurance companies like ANICO limit the payment of dividends to the greater of the prior year's statutory net income from operations, or 10% of prior year statutory surplus, in each case determined in accordance with statutory accounting principles. ANICO is permitted, without prior approval of the Texas Department of Insurance, to pay total dividends of $363.9 million during 2021.

Noncontrolling Interests

American National County Mutual Insurance Company ("County Mutual") is a mutual insurance company owned by its policyholders. ANICO has a management agreement that effectively gives it control of County Mutual. As a result, County Mutual is included in the consolidated financial statements of American National. Policyholder interests in the financial position of County Mutual are reflected as noncontrolling interest of $6.8 million at December 31, 2020 and 2019.

American National Group, Inc. and its subsidiaries exercise control or ownership of various joint ventures, resulting in their consolidation into American National's consolidated financial statements. The interests of the other partners in the consolidated joint ventures are shown as a noncontrolling deficit of $0.9 million and $0.7 million at December 31, 2020 and 2019, respectively.

Table of Contents

Note 17 - Segment Information

Management organizes the business into five operating segments:

•**Life**-consists of whole, term, universal, indexed and variable life insurance. Products are primarily sold through career, multiple-line, and independent agents as well as direct marketing channels.

•**Annuity**-consists of fixed, indexed, and variable annuity products. Products are primarily sold through independent agents, brokers, and financial institutions, along with multiple-line and career agents.

•**Health**-consists of Medicare Supplement, stop-loss, other supplemental health products and credit disability insurance. Products are typically distributed through independent agents and managing general underwriters.

•**Property and Casualty**-consists of personal, agricultural and targeted commercial coverages and credit-related property insurance. Products are primarily sold through multiple-line and independent agents or managing general agents.

•**Corporate and Other**-consists of net investment income from investments and certain expenses not allocated to the insurance segments and revenues and related expenses from non-insurance operations.

The accounting policies of the segments are the same as those described in Note 2, Summary of Significant Accounting Policies and Practices, of the Notes to the Consolidated Financial Statements. All revenues and expenses specifically attributable to policy transactions are recorded directly to the appropriate operating segment. Revenues and expenses not specifically attributable to policy transactions are allocated to each segment as follows:

•Recurring income from bonds and mortgage loans is allocated based on the assets allocated to each line of business at the average yield available from these assets.

•Net investment income from all other assets is allocated to the insurance segments in accordance with the amount of capital allocated to each segment, with the remainder recorded in the Corporate and Other segment.

•Expenses are charged to segments through direct identification and allocations based upon various factors.

The following summarizes total assets by operating segments (in thousands):

	Years ended December 31,	
	2020	**2019**
Total assets		
Life	$ 7,111,991	$ 6,825,120
Annuity	13,642,357	13,808,302
Health	515,841	511,440
Property and Casualty	2,716,896	2,570,818
Corporate and Other	5,480,730	4,881,886
Total	**$ 29,467,815**	**$ 28,597,566**

Note 17 - Segment Information - (Continued)

The results of operations measured as the income (loss) before federal income taxes and other items by operating segments are summarized below (in thousands):

Note 18 - Pension and Postretirement Benefits

Savings Plans

American National sponsors a qualified defined contribution (401(k) plan) for all employees, and non-qualified defined contribution plans for certain employees whose otherwise eligible earnings exceed the statutory limits under the qualified plans. The total expense associated with matching contributions to these plans was $
9.9 million, $9.5 million, and $10.2 million for 2020, 2019, and 2018, respectively.

Pension Benefits

American National sponsors qualified and non-qualified defined benefit pension plans, all of which have been frozen. As such, no additional benefits are accrued through these plans for additional years of service credit or future salary increase credit, and no new participants are added to the plans. Benefits earned by eligible employees prior to the plans being frozen have not been affected.

The qualified pension plans are noncontributory. The plans provide benefits for salaried and management employees and corporate clerical employees subject to a collective bargaining agreement based on years of service and employee compensation. The non-qualified pension plans cover key employees and restore benefits that would otherwise be curtailed by statutory limits on qualified plan benefits.

Note 18 - Pension and Postretirement Benefits - (Continued)

Amounts recognized in the consolidated statements of financial position consist of (in thousands):

	Qualified		Non-qualified	
	2020	2019	2020	2019
Reconciliation of benefit obligation				
Obligation at beginning of year	$ 387,273	$ 344,974	$ 65,733	$ 68,035
Service cost	543	524	-	-
Interest cost on projected benefit obligation	13,079	14,867	1,789	2,554

Actual return on plan assets	65,700	88,827	-	-
Employer contributions	-	-	8,506	8,703
Benefits paid	(23,812)	(21,305)	(8,506)	(8,703)
Fair value of plan assets at end of year	**511,989**	**470,101**	**-**	**-**
Funded status at end of year	**$ 84,244**	**$ 82,828**	**$ (65,791)**	**$ (65,733)**

The components of net periodic benefit cost for the defined benefit pension plans are shown below (in thousands):

	Years ended December 31,		
	2020	2019	2018
Service cost	$ 543	$ 523	$ 499
Interest cost	14,868	17,421	15,846
Expected return on plan assets	(26,109)	(24,248)	(24,164)
Amortization of net actuarial loss	4,848	7,070	8,560
Net periodic cost (benefit)	**$ (5,850)**	**$ 766**	**$ 741**

Amounts related to the defined benefit pension plans recognized as a component of AOCI are shown below (in thousands):

	Years ended December 31,		
	2020	2019	2018
Actuarial gain (loss)	$ (15,061)	$ 19,615	$ 28,260
Deferred tax benefit (expense)	3,163	(4,120)	(5,934)
Cumulative effect of change in accounting	-	(16,491)	-
Other comprehensive income (loss), net of tax	**$ (11,898)**	**$ (996)**	**$ 22,326**

Amounts recognized as a component of AOCI that have not been recognized as a component of the combined net periodic benefit cost of the defined benefit pension plans, are shown below (in thousands):

	Years ended December 31,	
	2020	2019
Net actuarial loss	$ (84,976)	$ (69,915)
Deferred tax benefit	17,846	14,683
Amounts included in AOCI	**$ (67,130)**	**$ (55,232)**

Note 18 - Pension and Postretirement Benefits - (Continued)

The weighted average assumptions used are shown below:

	Used for Net Benefit Cost for year ended December 31, 2020	Used for Benefit Obligations as of December 31, 2020
Discount rate	3.51%	2.52%
Long-term rate of return	5.75	N/A

American National's funding policy for the qualified pension plans is to make annual contributions to meet the minimum funding standards of the Pension Protection Act of 2006. American National and its affiliates did not contribute to its qualified plans in 2020 and 2019 due to the substantial contribution over minimum funding standards of $60 million made in 2018. The benefits paid from the non-qualified plans were $8.5 million, $8.7 million and $8.9 million in 2020, 2019 and 2018, respectively. Future payments from the non-qualified pension benefit plans will be funded out of general corporate assets.

The following table shows pension benefit payments expected to be paid (in thousands):

2021	$	49,063
2022		32,847
2023		33,168
2024		32,882
2025		30,108
2026-2029		140,784

American National utilizes third-party pricing services to estimate fair value measurements of its pension plan assets. Refer to Note 9, Fair Value of Financial Instruments for further information concerning the valuation methodologies and related inputs utilized by the third-party pricing services. The fair values (hierarchy measurements) of the pension plan assets by asset category are shown below (in thousands):

	December 31, 2020			
	Total	Level 1	Level 2	Level 3

The investment policy for the retirement plan assets is designed to provide the highest return commensurate with sound and prudent underwriting practices. The investment diversification goals are to have investments in cash and cash equivalents as necessary for liquidity, debt securities up to 100% and equity securities up to 75% of the total invested plan assets. The amount invested in any particular investment is limited based on credit quality, and no single investment may at the time of purchase be more than 5% of the total invested assets.

The corporate debt securities category are investment grade bonds of U.S. and foreign issuers denominated and payable in U.S. dollars from diverse industries, with a maturity of 1 to 30 years. Foreign bonds in the aggregate shall not exceed 20% of the bond portfolio. Residential mortgage-backed securities represent asset-backed securities with a maturity date 1 to 30 years with a Level 1 or 2 rating.

Equity portfolio managers have discretion to choose the degree of concentration in various issues and industry sectors for the equity securities. Permitted securities are those for which there is an active market providing liquidity for the specific security.

Commercial paper investments generally have a credit rating of A2 Moody’s or P2 by Standard & Poor’s with at least BBB rating on the issuer’s outstanding debt, or selected issuers with no outstanding debt.

Postretirement Life and Health Benefits

Under American National’s various group benefit plans for active employees, life insurance benefits are provided upon retirement for eligible participants who meet certain age and length of service requirements.

The accrued postretirement benefit obligation, included in the liability for retirement benefits, was $5.3 million and $4.7 million at December 31, 2020 and 2019, respectively. These amounts were approximately equal to the unfunded accumulated postretirement benefit obligation.

Note 19 - Commitments and Contingencies

Commitments

American National and its subsidiaries lease insurance sales office space, technological equipment, and automobiles. The remaining long-term lease commitments at December 31, 2020 were approximately $
7.4 million.

American National had aggregate commitments at December 31, 2020 to purchase, expand or improve real estate, to fund fixed interest rate mortgage loans, and to purchase other invested assets of $1.2 billion of which $582.7 million is expected to be funded in 2021 with the remainder funded in 2022 and beyond.

American National had a $100 million short-term variable rate borrowing facility containing a $55 million sub-feature for the issuance of letters of credit. Borrowings under the facility were at the discretion of the lender and would be used only for funding working capital requirements. As of December 31, 2020 and 2019, the outstanding letters of credit issued under the sub-feature were $3.5 million and $3.5 million, respectively, and there were no other borrowings on this facility. American National chose to non-renew the facility at the October 31, 2020 expiration date.

Federal Home Loan Bank (FHLB) Agreements

In May 2018, the Company became a member of the Federal Home Loan Bank of Dallas ("FHLB") to augment its liquidity resources. The Company initially purchased $7 million of stock to meet the FHLB's membership requirement. The FHLB member stock is recorded in other invested assets on the Company's consolidated statements of financial position. Through its membership, the Company has access to the FHLB's financial services including advances that provide an attractive funding source for short-term borrowing and for access to other funding agreements. As of December 31, 2020, certain municipal bonds and collateralized mortgage obligations with a fair value of approximately $72.4 million and commercial mortgage loans of approximately $1.5 billion were on deposit with the FHLB as collateral for borrowing. As of December 31, 2020, the collateral provided borrowing capacity for the $
250 million in outstanding advances. The additional borrowing capacity as of February 22, 2021 was approximately $775.2 million. The deposited securities and commercial mortgage loans are included in the Company's consolidated statements of financial position within fixed maturity securities and mortgage loans on real estate, net of allowance, respectively.

FHLB outstanding advance as of December 31, 2020 is shown below (in thousands, except percentages):

	Principal Amount	Interest Rate	Maturity Date
At December 31, 2020			
FHLB advance, fixed rate	$ 250,000	0.38%	4/28/2021

Guarantees

ANICO has guaranteed bank loans for customers of a third-party marketing operation. The bank loans are used to fund premium payments on life insurance policies issued by ANICO. The loans are secured by the cash values of the life insurance policies. If the customer were to default on a bank loan, ANICO would be obligated to pay off the loan. As the cash values of the life insurance policies always equal or exceed the balance of the loans, management does not foresee any loss on these guarantees. The total amount of the guarantees outstanding as of December 31, 2020, was approximately $121.4 million, while the total cash value of the related life insurance policies was approximately $142.8 million.

Note 19 - Commitments and Contingencies - (Continued)

Litigation

American National and certain subsidiaries are defendants in various lawsuits concerning alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain of these lawsuits include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing these matters with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on American National's consolidated financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote and no estimate of range can be made for loss contingencies that are at least reasonably possible but not accrued.

Note 20 - Related Party Transactions

American National has entered into recurring transactions and agreements with certain related parties. These include mortgage loans, management contracts, agency commission contracts, marketing agreements, health insurance contracts, and legal services.
The impact on the consolidated financial statements of significant related party transactions is shown below (in thousands):

		Dollar Amount of Transactions			Amount due from American National	
		Years ended December 31,			December 31,

Mortgage Loans to Gal-Tex Hotel Corporation ("Gal-Tex"): American National held a first mortgage loan which originated in 1999, with an interest rate of
7.25% and final maturity date of April 1, 2019 issued to a subsidiary of Gal-Tex, which was collateralized by a hotel property in San Antonio, Texas. This loan has been paid in full. The Moody Foundation owns 34.0% of Gal-Tex and 22.75% of American National, and the Libbie Shearn Moody Trust owns 50.2% of Gal-Tex and 37.0% of American National.

Transactions with Greer, Herz & Adams, LLP: Irwin M. Herz, Jr. is a member of the Board of Directors of American National Group, Inc. and certain of its subsidiaries, and a Partner with Greer, Herz & Adams, LLP, which serves as American National's General Counsel.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Nature of Operations

American National Group, LLC ("ANAT", or the "Company"), through its consolidated subsidiaries (collectively "American National") offers a broad portfolio of insurance products, including individual and group life insurance, annuities, pension risk transfer, health insurance, and property and casualty insurance. Business is conducted in all 50 states, the District of Columbia and Puerto Rico.

On August 6, 2021, ANAT entered into an Agreement and Plan of Merger (the "Merger Agreement") with Brookfield Reinsurance Ltd., formerly known as Brookfield Asset Management Reinsurance Partners Ltd., an exempted company limited by shares existing under the laws of Bermuda, and Freestone Merger Sub Inc., a Delaware corporation and an indirect wholly-owned subsidiary of Brookfield Reinsurance ("Merger Sub"). On May 25, 2022 (the "Closing Date" or "Merger Date"), upon the terms and subject to the conditions of the Merger Agreement, Merger Sub merged with and into the Company (the "Merger"), with the Company continuing as the surviving entity, which became an indirect, wholly-owned subsidiary of Brookfield Reinsurance. The Merger was unanimously approved by the Company's board of directors. The Company received the requisite stockholder approval required under Delaware law for the adoption of the Merger Agreement. The Company has ceased being a registrant with the Securities and Exchange Commission as of the Closing Date. Effective September 30, 2022, the Company converted from a Delaware corporation to a Delaware limited liability company. As a result, the successor period consists of the three months ended March 31, 2023 and the predecessor period consists of the three months ended March 31, 2022.

Note 2 – Summary of Significant Accounting Policies and Practices

Basis Presentation

The condensed consolidated financial statements and notes thereto have been prepared in conformity with Generally Accepted Accounting Principles ("GAAP") and are reported in U.S. currency. American National consolidates entities that are wholly-owned and those in which American National owns less than 100% but controls the voting rights, as well as variable interest entities in which American National is the primary beneficiary. Intercompany balances and transactions with consolidated entities have been eliminated. Investments in unconsolidated affiliates, which include real estate partnerships and investment funds, are accounted for using the equity method of accounting. Certain amounts in prior years have been reclassified to conform to current year presentation.

The accompanying interim condensed consolidated financial statements are unaudited and reflect all adjustments (including normal recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows for the interim periods presented in conformity with GAAP. The interim condensed consolidated financial statements and notes should be read in conjunction with the annual consolidated financial statements and notes thereto as of and for the year ended December 31, 2022, which are posted on the Company website at www.americannational.com. The condensed consolidated results of operations for the interim periods should not be considered indicative of results to be expected for the full year.

The preparation of the consolidated financial statements in conformity with GAAP requires the use of estimates and assumptions that affect the reported consolidated financial statement balances. Actual results could differ from those estimates. Except for balances affected by the adoption of Accounting Standards Update (ASU) 2018-12 noted below, the December 31, 2022 consolidated balance sheet data was derived from audited consolidated financial statements which include all disclosures required by GAAP.

Business Combination

Business combinations are accounted for using the acquisition method. The cost of a business acquisition is measured at the aggregate of the fair values at the date of exchange of assets given, liabilities incurred or assumed, and equity instruments issued in exchange for control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at their fair values at the acquisition date. The interest of non-controlling shareholders in the acquiree, if applicable, is initially measured at the noncontrolling shareholders' proportion of the net fair value of the identifiable assets, liabilities and contingent liabilities recognized.

To the extent the fair value of consideration paid exceeds the fair value of the net identifiable tangible and intangible assets, the excess is recorded as goodwill. To the extent the fair value of consideration paid is less than the fair value of net identifiable tangible and intangible assets, the excess is recognized in net income.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Based on the criteria outlined in ASC 805, *Business Combinations* the Company was deemed the accounting acquiree in the Merger. As a result of the completed Merger, for accounting purposes, our financial statements and notes are presented as "Predecessor" for historical periods prior to the Closing Date and "Successor" for the period after the Closing Date. In accordance with accounting for business combinations, assets and liabilities were adjusted to their fair values as of the Closing Date ("Purchase GAAP Accounting" or "PGAAP"). Additionally, we have elected to apply push-down accounting to reflect the Company's assets and liabilities at fair value. To differentiate between periods, our financial statements and notes include a black line division between columns titled "Predecessor" and "Successor". This black line division has been placed to recognize Purchase GAAP Accounting adjustments made and the resulting effect on comparability between the two periods.

ASC 805, *Business Combinations* allows for a measurement period of up to 12 months from the business combination date. Accounting for the business combination is not finalized as of December 31, 2022, and is pending completion of purchase accounting. The financial statements at December 31, 2022 reflect management's current best estimate of the purchase price allocation. Final valuation of the assets acquired and liabilities assumed and the completion of the purchase price allocation will occur before the end of the measurement period.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Under the acquisition method of accounting, the assets acquired and liabilities assumed are recorded at fair value at the date of acquisition. The following table summarizes the fair value of assets acquired and liabilities assumed as of May 25, 2022:

American National Group Inc. Consolidated Balance Sheet*		Company Opening Balance Sheet

*These amounts have not been adjusted for the adoption of ASU 2018-12, Financial Services—Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts ("LDTI") (refer to transition date disclosure below)

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Adoption of ASU 2018-12 - Targeted Improvements to the Accounting for Long-Duration Contracts

The Company adopted ASU 2018-12, Financial Services—Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts ("LDTI") effective January 1, 2023 with a transition date of May 25, 2022 using a full retrospective approach. LDTI resulted in significant changes to the measurement, presentation and disclosure requirements for long-duration insurance contracts. A summary of the most significant changes follows:

(1) Guaranteed benefits associated with certain annuity contracts have been classified and presented separately on the consolidated balance sheets as Market Risk Benefits (MRB). MRBs are now measured at estimated fair value through net income and reported separately on the consolidated statements of operations, except for nonperformance risk changes, which will be recognized in OCI.

(2) Cash flow assumptions used to measure the liability for LFPBs on traditional long-duration contracts (including term and non-participating whole life insurance and immediate annuities) have been updated on an annual basis.

(3) The discount rate assumption used to measure the liability for traditional long-duration contracts is now based on an upper-medium grade discount rate with changes recognized in OCI.

(4) DAC for all insurance products are required to be amortized on a constant-level basis over the expected term of the contracts, using amortization methods that are not a function of revenue or profit emergence.

(5) There was a significant increase in required disclosures, including disaggregated rollforwards of insurance contract assets and liabilities supplemented by qualitative and quantitative information regarding the cash flows, assumptions, methods and judgements used to measure those balances.

The following table presents the Company's significant accounting policies which have changed as a result of the adoption of LDTI with cross-references to the notes which provide additional information on such policies.

Accounting Policy	Note
Deferred policy acquisition costs, value of business acquired, unearned revenue and other intangibles	10
Future policy benefit liabilities	18
Policyholder account balances	18
Market risk benefits	19

Deferred policy acquisition costs ("DAC") are capitalized costs related directly to the successful acquisition of new or renewal insurance contracts. Significant costs are incurred to acquire insurance and annuity contracts, including commissions and certain underwriting, policy issuance, and processing expenses. In accordance with ASC 805, *Business Combinations* existing DAC balance was written off as a result of the Merger. The beginning balance as of May 25, 2022 consists of the Value of Business Acquired "VOBA" at that date.

Insurance contracts are grouped into cohorts by contract type and issue year consistent with estimating the associated liability for future policy benefits. DAC is amortized on constant level basis for the grouped contracts over the expected term of the related contracts to approximate straight-line amortization. DAC will be amortized over the following bases, all of which provide a constant level representation of contract term:

Product(s)	Amortization base
Traditional life products	Nominal face amount
Life contingent payout annuities	Annualized benefit amount in force
Health products	Original annual premium
Fixed deferred annuities, fixed indexed annuities, variable annuities	Policy count
Universal life products	Initial face amount

The bases used for amortization are projected using mortality and lapse assumptions that are based on American National's experience, industry data, and other factors consistent with those used for the liability for future policy benefits.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Amortization of DAC is included in the change in deferred acquisition costs in the consolidated statement of operations.

For short-duration contracts, DAC is grouped consistent with the manner in which insurance contracts are acquired, serviced, and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. Investment income is anticipated in assessing the recoverability of DAC for short-duration contracts. DAC for short duration contracts is charged to expense in proportion to premium revenue recognized.

Value of business acquired ("VOBA") is an intangible asset or liability resulting from a business combination that represents the difference between the policyholder liabilities measured in accordance with the acquiring company's accounting policies and the estimated fair value of the same acquired policyholder liabilities in-force at the acquisition date. VOBA can be either positive or negative. Positive VOBA is recorded as a component of DAC. Negative VOBA occurs when the estimated fair value of in-force contracts in a life insurance company acquisition is less than the amount recorded as insurance contract liabilities, and is recorded in future policyholder benefits in the consolidated statement of financial condition.

VOBA is amortized on a straight-line basis over the remaining life of the underlying policies consistent with DAC.

Liability for future policy benefits ("LFPB") is equal to the present value of expected benefit payments and claim related expenses to be paid or on behalf of policyholders less the present value of expected net premiums to be collected from policyholders. Principal assumptions used in the establishment of the LFPB are mortality, lapse, incidence, terminations, claim-related expenses, and other contingent events as appropriate to the respective product type. American National groups contracts into annual cohorts based on product type and contract inception date for the purposes of calculating the liability for future policy benefits. A set of qualitative cohorts includes all business issued prior to the acquisition date. Another set of qualitative cohorts includes business issued between the acquisition date and year end 2022. In 2023 and beyond, there is a set of qualitative cohorts for each issue year.

American National updates its estimate of cash flows over the entire life of a group of contracts using actual historical experience and current future cash flow assumptions. American National will review cash flow assumptions, including assumptions for claim-related expenses annually in the third quarter. Assumption revisions will be reflected in the net premium ratio and LFPB calculation in the quarter in which assumptions are revised. The net premium ratio reflects cash flows from contract inception to contract termination (ie: through the claim paying period) and cannot exceed 100%. Change in the liability due to actual experience are recognized in reserve remeasurement (gains) losses in the consolidated statement of earnings.

American National measures the LFPB at each reporting period. The discount rate assumption is determined by developing a yield curve based on market observable yields for upper-medium fixed income instruments derived from an external index. The net premium ratio is not updated for changes in discount rate assumptions. The difference between the updated carrying amount of the liability for future policy benefits measured using the current discount rate assumption and the original discount rate assumption is recognized in other comprehensive income during the period.

Should the present value of actual and future expected benefits less transition LFPB balance exceed the present value of actual and future expected gross premiums, the net premium ratio is capped at 100% and a gross premium LFPB is held. The immediate charge is the amount by which the uncapped net premium ratio exceeds 100% times the present value of future expected gross premium. This assessment is performed at the cohort level.

American National periodically reviews its estimates of actuarial liabilities for future policy benefits and compares them with its actual experience. Differences between actual experience and the assumptions used in pricing these policies, guarantees and riders and in the establishment of the related liabilities result in variances in profit and could result in losses. The effects of changes in such estimated liabilities are included in the consolidated statements of operations in the period in which the changes occur.

Payout annuities include single premium immediate annuities, annuitizations of deferred annuities, and pension risk transfer. These contracts subject the insurer to risks over a period that extends beyond the period or periods in which premiums are collected. These contracts may be either non-life contingent or life contingent. Non-life contingent annuities are accounted for as investment contracts. For life contingent annuities, the Company records a liability at the present value of future annuity payments and estimated future expenses calculated using expected mortality and costs, and expense assumptions. Any gross premiums received in excess of the net premium is the DPL and is recognized separately in income in a constant relationship with the discounted amount of the insurance in-force or expected future benefit payments. These liabilities are recorded in policy liabilities in the consolidated statement of financial position.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

For the majority of this participating business, profits earned are reserved for the payment of dividends to policyholders, except for the stockholders' share of profits on participating policies, which is limited to the greater of 10% of the profit on participating business, or 50 cents per thousand dollars of the face amount of participating life insurance in-force. Participating policyholders' interest includes the accumulated net income from participating policies reserved for payment to such policyholders in the form of dividends (less net income allocated to stockholders as indicated above) as well as a pro rata portion of unrealized investment gains (losses). Dividends to participating policyholders were $9.0 million and $8.1 million at March 31, 2023 and 2022, respectively. Income of $19.0 million and $18.3 million was allocated to participating policyholders at March 31, 2023 and 2022, respectively.

For all other participating business, the allocation of dividends to participating policyowners is based upon a comparison of experienced rates of mortality, interest and expenses, as determined periodically for representative plans of insurance, issue ages and policy durations, with the corresponding rates assumed in the calculation of premiums.

Market risk benefits ("MRB") are measured at fair value at the cohort level. Total attributed fees will include explicit rider fees and will not be negative or exceed total contract fees and assessments collectible from the contract holder. There are only rider charges and surrender charges. Surrender charges will not be included in the fair value measurement, as surrender charges do not fund any future benefits. Cash flows are projected using risk-neutral scenarios generated by the company. The Company establishes MRB assets and liabilities for guaranteed minimum withdraw benefits ("GMWB") associated with equity-indexed annuity contracts.

The actuarial assumptions used in the MRB calculation are the company's best estimate assumptions. Assumptions are adjusted to reflect fair value by applying a margin for non-hedgeable risk and an adjustment for own credit spread through the discount rate. The risk-free discount rate is the scenario specific US treasury rate. The assumptions used for MRB are consistent with other fair value calculations performed by American National.

Policyholders' account balances represent the contract value that has accrued to the benefit of the policyholders related to universal-life and investments-type contracts. For fixed products, these are generally equal to the accumulated deposits plus interest credited, reduced by withdrawals, payouts, and accumulated policyholder assessments. Indexed product account balances are equal to the sum of host and embedded derivative reserves computed.

Liabilities for unpaid claims and claim adjustment expenses ("CAE") are established to provide for the estimated costs of paying claims. These reserves include estimates for both case reserves and IBNR claim liabilities. Case reserves include the liability for reported but unpaid claims. IBNR liabilities include a provision for potential development on case reserves, losses on claims currently closed which may reopen in the future, as well as IBNR claims. These liabilities also include an estimate of the expense associated with settling claims, including legal and other fees, and the general expenses of administering the claims adjustment process.

Reinsurance recoverables are estimated amounts due to American National from reinsurers related to paid and unpaid ceded claims and CAE and are presented net of a reserve for collectability. Recoveries of gross ultimate losses under our non-catastrophe reinsurance are estimated by a review of individual large claims and the ceded portion of IBNR using assumed distribution of loss by percentage retained. Recoveries of gross ultimate losses under our catastrophe reinsurance are estimated by applying reinsurance treaty terms to estimates of gross ultimate losses. The most significant assumption is the average size of the individual losses for those claims that have occurred but have not yet been reported and our estimate of gross ultimate losses. The ultimate amount of the reinsurance ceded recoverable is unknown until all losses settle.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Transition Date Impacts

Due to the acquisition of American National by Brookfield Reinsurance Partners on May 25, 2022 and the guidelines under ASC 805, Business Combinations, the inception date for all contracts issued before that date become May 25, 2022. Under purchase accounting guidelines, fair value of equity must be equal to the purchase price at the acquisition date. As a result, there will not be any impact to the opening balances of retained earnings or accumulated other comprehensive income due to the adoption of the standard on the transition date of May 25, 2022.

The transition impact of the MRBs and LFPB will be recorded to value of business acquired (VOBA) liability resulting in no impact to shareholders equity, as noted above.

The following table presents a summary of the Transition Date impacts associated with the implementation of LDTI to the consolidated balance sheet (in thousands):

	Future Policy Benefits	Market Risk Benefits	VOBA Liability
As previously reported May 25th, 2022	$ 4,662,434	$ —	$ 440,907
Reclassification of carrying amount of contracts and contract features that are market risk benefits	(107,432)	107,432	—
Adjustment to reflect transition impact to balance established as part of purchase accounting upon the Brookfield acquisition	(315,561)	64,580	250,981
As adjusted May 25th, 2022	**$ 4,239,441**	**$ 172,012**	**$ 691,888**

The following table represents transition impacts for future policy benefits by segment.

	Term Life	Whole Life	Annuity
As previously reported May 25th, 2022	$ 615,782	$ 1,694,351	$ 1,439,449
Adjustment to reflect transition impact to balance established as part of purchase accounting upon the Brookfield acquisition	(84,761)	(223,213)	(7,586)
As adjusted May 25th, 2022	**$ 531,021**	**$ 1,471,138**	**$ 1,431,863**

The following table represents the transition impact to market risk benefits by segment.

	Annuity
As previously reported May 25th, 2022	$ 107,432
Adjustment to reflect transition impact to balance established as part of purchase accounting upon the Brookfield acquisition	64,580
As adjusted May 25th, 2022	**$ 172,012**

The Transition Date impacts associated with the implementation of LDTI were applied as follows:

Market risk benefits - The full retrospective transition approach for MRBs required assessing products to determine whether contract or contract features expose the Company to other than nominal capital market risk. The population of MRBs identified was then reviewed to determine the historical measurement model prior to adoption of LDTI.

At the Transition Date, the impacts to the financial statements of the full retrospective approach for MRBs include the following:

- The amounts previously recorded for these contracts within additional insurance liabilities and other insurance liabilities were reclassified to MRB liabilities;
- The difference between the fair value of the MRBs and the previously recorded carrying value at the Transition Date, included the cumulative effect of changes in nonperformance risk of the Company, was recorded as an adjustment to the opening balance of VOBA liability.

Note 2 – Summary of Significant Accounting Policies and Practices - (Continued)

Liability for future policy benefits - The full retrospective transition approach for LFPB utilized a defined valuation premium method. This process required grouping contracts in-force as of the Transition Date into cohorts, and then calculating revised LFPB using an updated net premium ratio, best estimate cash flow assumptions without a provision for adverse deviation and the locked-in discount rate. The decrease to the liability for future policy benefits at at transition is driven by unlocking of assumptions and measurement at upper medium grade discount rates for traditional life and life contingent payout annuity business.

Due to the acquisition of American National by Brookfield Reinsurance on May 25, 2022 , the balances of deferred acquisition costs, deferred profit liability, unearned revenue, and sales inducement assets were written down to $0 at the acquisition date. As a result, there is no impact to these balances at transition.

Note 3 – Recently Issued Accounting Pronouncements

The following table presents amounts previously reported in 2022, the effect on those amounts of the change due to the adoption of ASU 2018-12 as described in Note 2, and the currently reported amounts in the Unaudited Interim Consolidated Statement of Financial Position (in thousands).

	December 31, 2022		
	As Previously Reported	Effect of Adoption	As Adjusted
Reinsurance recoverables, net of allowance for credit losses	$ 447,124	$ (2,954)	$ 444,170
Deferred policy acquisition costs	681,708	(17,230)	664,478
Deferred tax asset	527,768	(88,654)	439,114
Other assets	291,875	10,330	302,205
Total assets	**$ 29,642,716**	**$ (98,508)**	**$ 29,544,208**
Future policy benefits			
Life	$ 3,584,520	$ (248,379)	$ 3,336,141
Annuity	1,713,528	(247,336)	1,466,192
Health	47,045	9,893	56,938
Market risk benefit liabilities	—	54,340	54,340
Total liabilities	**26,220,236**	**(431,481)**	**25,785,250**
Retained earnings	264,752	59,068	323,820
Accumulated other comprehensive income (loss)	(721,612)	273,905	(447,707)
Total liabilities and equity	**$ 29,642,716**	**$ (98,508)**	**$ 29,544,208**

Other Adopted Accounting Pronouncements

The Company adopted ASU (ASU 2022-02, Financial Instruments-Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures. The Company adopted this standard on January 1, 2023. This ASU eliminates TDR recognition and measurement guidance and, instead, requires that an entity evaluate whether the modification represents a new loan or a continuation of an existing loan. The amendments also enhance existing disclosure requirements and introduce new requirements related to certain modifications of receivables made to borrowers experiencing financial difficulty. This ASU was applied prospectively and did not have a material impact on the consolidated financial statements upon adoption but could change the future recognition and measurement of modified loans.

Future Adoption of Accounting Standards

ASUs not listed below were assessed and either determined to be not applicable or are not expected to have a material impact on the Company's interim condensed consolidated financial statements or disclosures.

Standard	Description	Effective Date and Method of Adoption	Impact on Financial Statements
ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting	The amendments in this guidance provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance only applies to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform.	The amendments in this guidance are effective for all entities as of March 12, 2020 and will sunset through December 31, 2022, at which time the application of exceptions and optional expedients will no longer be permitted. The FASB issued ASU 2022-06 that delayed the sunset date to December 31, 2024.	The inventory of LIBOR exposures has been completed and is primarily limited to floating rate bonds, alternative investments, and borrowings within joint venture investments. Certain contracts included in these categories matured prior to December 31, 2021, the start of LIBOR rates cessations. The transition from LIBOR is not expected to have a material impact to the Company's Consolidated Financial Statements or Notes to the Consolidated Financial Statements.

Note 4 – Investment in Securities

The cost or amortized cost and fair value of investments in securities are shown below (in thousands):

	March 31, 2023				
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Fair Value
Fixed maturity securities, bonds available-for-sale					
U.S. treasury and government	$ 41,739	$ 79	$ (981)	$ —	$ 40,837
U.S. states and political subdivisions	854,075	965	(16,275)	(214)	838,551
Foreign governments	9,336	—	(339)	—	8,997
Corporate debt securities	11,828,200	8,367	(456,292)	(11,510)	11,368,765
Collateralized debt securities	1,401,711	12,796	(38,305)	(9,717)	1,366,485
Residential mortgage-backed securities	129,907	100	(5,313)	(118)	124,576

Total investments in fixed maturity securities	**$ 14,264,968**	**$ 22,307**	**$ (517,505)**	**$ (21,559)**	**$ 13,748,211**

	December 31, 2022				
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credit Losses	Fair Value
Fixed maturity securities, bonds available-for-sale					
U.S. treasury and government	$ 41,384	$ 30	$ (1,405)	$ —	$ 40,009
U.S. states and political subdivisions	880,186	123	(24,706)	(742)	854,861
Foreign governments	9,314	—	(298)	(12)	9,004
Corporate debt securities	12,104,754	6,020	(830,095)	(23,049)	11,257,630
Collateralized debt securities	1,279,102	5,300	(55,261)	(4,574)	1,224,567
Residential mortgage-backed securities	132,797	23	(5,741)	(331)	126,748
Total bonds available-for-sale	**14,447,537**	**11,496**	**(917,506)**	**(28,708)**	**13,512,819**
Total investments in fixed maturity securities	**$ 14,447,537**	**$ 11,496**	**$ (917,506)**	**$ (28,708)**	**$ 13,512,819**

Note 4 – Investment in Securities – (Continued)

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Residential and commercial mortgage-backed securities, which are not due at a single maturity, have been presented based on the year of final contractual maturity.

Proceeds from sales of bonds available-for-sale, with the related gross realized gains and losses, are shown below (in thousands):

	Three months ended March 31,	
	Successor	Predecessor
	2023	2022
Proceeds from sales of fixed maturity securities, bonds available-for-sale	$ 970,333	$ 20,247
Gross realized gains	608	—
Gross realized losses	25,145	—

Gains and losses are determined using specific identification of the securities sold. All held-to-maturity securities were transferred to available-for-sale through a management election allowed under business combination guidance.

In accordance with various regulations, American National has bonds on deposit with regulating authorities with a carrying value of $30.2 million and $51.1 million at March 31, 2023 and December 31, 2022, respectively. In addition, American National has pledged bonds in connection with certain agreements and transactions, such as financing and reinsurance agreements. The carrying value of bonds pledged was $43.6 million and $44.8 million at March 31, 2023 and December 31, 2022, respectively.

The components of the change in net unrealized gains (losses) on debt securities are shown below, on a pre-tax basis (in thousands):

	Three months ended March 31,	
	Successor	Predecessor
	2023	2022
Fixed maturity securities: change in unrealized losses	$ 425,792	$ (605,983)
Short-term change in unrealized losses	4,164	—
Adjustments for		
Deferred policy acquisition costs	—	122,095
Participating policyholders' interest	(88)	9,744
Deferred federal income tax (expense) benefit	(90,238)	99,124
Change in net unrealized gains (losses) on debt securities, net of tax	**$ 339,630**	**$ (375,020)**

Note 4 – Investment in Securities – (Continued)

The components of the change in net gains (losses) on equity securities are shown below (in thousands):

	Three months ended March 31,	
	Successor	Predecessor
	2023	2022
Unrealized losses on equity securities	$ (28,599)	$ (1,270)
Net gains (losses) on equity securities sold	303	(8,212)
Net losses on equity securities	**$ (28,296)**	**$ (9,482)**

The gross unrealized losses and fair value of bonds available-for-sale, aggregated by investment category and length of time individual securities have been in a continuous unrealized loss position due to market factors are shown below (in thousands, except number of issues):

	March 31, 2023								
	Less than 12 months			12 months or more			Total		
	Number of Issues	Gross Unrealized Losses	Fair Value	Number of Issues	Gross Unrealized Losses	Fair Value	Number of Issues	Gross Unrealized Losses	Fair Value

Several assumptions and underlying estimates are made in the evaluation of allowance for credit loss. Examples include financial condition, near term and long-term prospects of the issue or issuer, including relevant industry conditions and trends and implications of rating agency actions and offering prices.

Note 4 – Investment in Securities – (Continued)

Equity securities by market sector distribution are shown below, based on fair value:

	March 31, 2023		December 31, 2022	
Energy and utilities	$ 28,686	6.6 %	$ 30,722	7.2 %
Finance	383,053	88.6	374,688	87.4
Other	20,627	4.8	22,959	5.4
Total	**$ 432,366**	**100.0 %**	**$ 428,369**	**100.0 %**

Allowance for Credit Losses

Available-for-Sale Securities—For available-for-sale bonds in an unrealized loss position, the Company first assesses whether it intends to sell the security or will be required to sell the security before recovery of its amortized cost basis. If either of these criteria are met, the security's amortized cost basis is written down to fair value through income. For bonds available-for-sale that do not meet either indicated criteria, the Company evaluates whether the decline in fair value has resulted from credit events or market factors. In making this assessment, management first calculates the extent to which fair value is less than amortized cost, and then may consider any changes to the rating of the security by a rating agency, and any specific conditions related to the security. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security is compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded through income, limited to the amount fair value is less than amortized cost. Any remaining unrealized loss is recognized in other comprehensive income.

When the discounted cash flow method is used to determine the allowance for credit losses, management's estimates incorporate expected prepayments, if any. Model inputs are considered reasonable and supportable for three years. A mean reversion is applied in years four and five. Credit loss allowance is not measured on accrued interest receivable because the balance is written off to net investment income in a timely manner, within 90 days. Changes in the allowance for credit losses are recognized through the condensed consolidated statement of operations as "(Increase) decrease in investment credit loss."

No accrued interest receivables were written off as of March 31, 2023 and 2022.

The rollforward of the allowance for credit losses for available-for-sale debt securities is shown below (in thousands):

Successor	**U.S. State and Political Subdivisions**	**Foreign governments**	**Corporate Debt Securities**	**Collateralized Debt Securities**	**Residential Mortgage Backed Securities**	**Total**
Balance at January 1, 2023	**$ (742)**	**$ (12)**	**$ (23,049)**	**$ (4,574)**	**$ (331)**	**$ (28,708)**
Increase in allowance related to purchases	—	—	(16)	—	—	(16)

Note 4 – Investment in Securities – (Continued)

Credit Quality Indicators

The Company monitors the credit quality of bonds held-to-maturity through the use of credit ratings provided by third party rating agencies, which are updated on a monthly basis. Information is also gathered regarding the asset performance of held-to-maturity bonds. The two traditional metrics for assessing interest rate risks are interest-coverage ratios and capitalization ratios, which can also be used in the assessment of credit risk. These risks are mitigated through the diversification of bond investments. Categories of diversification include credit ratings, geographic locations, maturities, and market sector.

Note 5 – Mortgage Loans

Generally, commercial mortgage loans are secured by first liens on income-producing real estate. American National attempts to maintain a diversified portfolio by considering both the location of the underlying collateral as well as the type of mortgage loan. The geographic categories come from the U.S. Census Bureau's "Census Regions and Divisions of the United States." The distribution based on carrying amount of mortgage loans by location is as follows (in thousands, except percentages):

	March 31, 2023		December 31, 2022	
	Amount	Percentage	Amount	Percentage
East North Central	$ 905,218	15.9 %	$ 898,915	16.2 %
East South Central	44,698	0.8	65,548	1.2
Mountain	1,376,981	24.2	1,360,837	24.5
Pacific	909,329	15.9	924,187	16.7
South Atlantic	1,021,296	17.9	967,353	17.4
West South Central	1,128,902	19.8	1,068,239	19.3
Other	314,068	5.5	261,096	4.7
Total	**$ 5,700,492**	**100.0 %**	**$ 5,546,175**	**100.0 %**

As of March 31, 2023 and December 31, 2022, loans in foreclosure and loans foreclosed are as follows (in thousands, except number of loans):

	March 31, 2023		December 31, 2022	
Foreclosure and foreclosed	**Number of Loans**	**Recorded Investment**	**Number of Loans**	**Recorded Investment**
In foreclosure	2	$ 54,488	1	$ 27,001
Filed for bankruptcy	—	—	—	—
Total in foreclosure	**2**	**$ 54,488**	**1**	**$ 27,001**
Foreclosed	**—**	**$ —**	**1**	**$ —**
