#### 20. Fair Value Measurements

#### A. Assets Measured at Fair Value

The Company had no financial assets or financial liabilities recorded at fair value as of December 31, 2019 or 2018.

The Company determines the fair value of its financial instruments based on the fair value hierarchy, which favors the use of observable inputs over the use of unobservable inputs when measuring fair value.

The Company has categorized its financial instruments into the three-level hierarchy, which gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The level assigned to a fair value measurement is based on the lowest-level input that is significant to the measurement. The fair value measurements for the Company's financial instruments not carried at fair value, but disclosed at fair value are categorized as follows:

- Level 1 Unadjusted quoted prices in active markets for identical instruments.
- Level 2 Quoted prices for similar instruments in active markets and model-derived valuations whose inputs are
  observable. This category includes those financial instruments that are valued using industry-standard pricing
  methodologies or models. All significant inputs are observable or derived from observable information in the
  marketplace.
- Level 3 Fair value estimates whose significant inputs are unobservable. This includes financial instruments for which fair value is estimated based on industry-standard pricing methodologies and internally developed models utilizing significant inputs not based on or corroborated by readily available market information. In limited circumstances, this may also utilize estimates based on non-binding broker quotes.
