Our investment portfolio's returns have benefited historically from investment opportunities and general market conditions that currently may not exist and may not repeat themselves, and there can be no assurance that either AAM or AAME will be able to avail itself of profitable investment opportunities in the future. Furthermore, the historical returns of our investments managed by AAM and AAME are not directly linked to returns on our common shares, which are affected by various factors, one of which is the value of our investment portfolio. In addition, each of AAM and AAME are compensated based solely on our assets which they manage rather than by investment return targets. Accordingly, there can be no guarantee that either AAM or AAME will be able to achieve any particular return for our investment portfolio in the future.

We evaluate AAM's past performance, in part, based upon the total return that AAM is able to generate in managing our investment portfolio. Such total return values have been included in *Item 1. Business-Investment Management*. Such values are prepared by AAM and involve the use of estimates and assumptions that are not within our control and further involve the use of certain figures that are not derived from our books and records and may be unaudited.

If either AAM or AAME loses or fails to retain its senior executives or other key personnel and is unable to attract qualified personnel, its ability to provide us with investment management and advisory services could be impeded or adversely affected, which could significantly and negatively affect our business.

AAM and AAME depend in large part on their ability to attract and retain key people, including senior executives, finance professionals and information technology professionals. Intense competition exists for key employees with demonstrated ability, and AAM or AAME may be unable to hire or retain such employees. Accordingly, the loss of services of one or more of the members of AAM's or AAME's senior management could delay or prevent AAM or AAME from fully implementing our investment strategy and, consequently, significantly and negatively impact our business. The unexpected loss of members of AAM's or AAME's senior management or other key employees could have a material adverse effect on AAM's or AAME's operations due to the loss of their skills, knowledge of AAM's or AAME's business and their years of industry experience as well as the potential difficulty of promptly finding qualified replacement employees. A loss of such employees could adversely impact AAM's or AAME's ability to execute key operational functions and could adversely affect our investment portfolio and results of operations.

Increased regulation or scrutiny of alternative investment advisers and certain trading methods may affect AAM's and AAME's ability to manage our investment portfolio or affect our business reputation.

The regulatory environment for investment managers is evolving, and changes in the regulation of investment managers may adversely affect the ability of AAM and AAME to effect transactions that utilize leverage or to pursue their strategies in managing our investment portfolio. In addition, the securities and futures markets are subject to comprehensive statutes, regulations and margin requirements. Furthermore, our German Group Companies and their investments are subject to additional investment restrictions that may prevent our German Group

Companies from investing in assets with sufficient yields to meet our targeted returns. The Securities and Exchange Commission (SEC), other regulators and self-regulatory organizations and exchanges are authorized to take extraordinary actions in the event of market emergencies. Due to our reliance on AAM and AAME to manage our investment portfolio, any regulatory action or enforcement against AAM or AAME could have an adverse effect on our financial condition. Additionally, the regulation of derivatives transactions is an evolving area of law and is subject to modification by government and judicial action. Any future regulatory change could have a significant negative impact on our financial condition and results of operations.

Risks Relating to Insurance and Other Regulatory Matters

Our industry is highly regulated and we are subject to significant legal restrictions, regulations and regulatory oversight in connection with the operations of our business, including the discretion of various governmental entities in applying such restrictions and regulations. These restrictions may have a material adverse effect on our business, financial condition, liquidity, results of operations, cash flows and prospects.

U.S. State Regulation

Our domestic insurance subsidiaries' businesses are subject to government regulation in each of the states in which they conduct business. Such regulation is vested in state agencies having broad administrative, and in some instances discretionary, authority with respect to many aspects of our business, which may include, among other things, the investments we can acquire and hold, reserve requirements, marketing practices, advertising, maintaining policyholder privacy, policy forms, restrictions on the ability of our subsidiaries to pay dividends or other distributions to us, reinsurance and other transactions with our affiliates, acquisitions, mergers and capital adequacy. These requirements are concerned primarily with the protection of policyholders rather than shareholders. Regulators and other authorities have the power to bring administrative or judicial proceedings against us, which could result, among other things, in suspension or revocation of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action which could materially harm our results of operations and financial condition. If we fail to address, or appear to fail to address, appropriately any of these matters, our reputation could be harmed and we could be subject to additional legal risk, which could increase the size and number of claims and damages asserted against us or subject us to enforcement actions, fines and penalties.

Each state has legislation in place that requires U.S. insurers domiciled in such state to furnish certain information concerning their operations and the interrelationships and transactions among companies within their holding company systems and their respective affiliates that may materially affect the operations, management or financial condition of the insurers within the system. Generally, these laws require that all transactions between insurers and affiliates be fair and reasonable and sometimes require prior notice to the regulators and regulatory approval. Changes to these laws that result in more stringent requirements could negatively impact our ability to conduct transactions with our affiliates, including investments into funds managed by Apollo and its affiliates, dividends or distributions from our subsidiaries to us (as described more fully below) and by us to our shareholders, reinsurance agreements among our affiliates or our acquisition strategy. Such changes and any resulting inability to or increased cost associated with transactions with our affiliates could materially adversely impact our business, financial condition, results of operations and cash flows.

Current law of two of the domiciliary states of Athene, Delaware and Iowa, permits the payment of dividends or distributions which, together with dividends or distributions paid during the preceding twelve months, do not exceed the *greater* of (a) 10% of the insurer's surplus as regards policyholders as of the immediately preceding year end or (b) the net gain from operations of the insurer for the preceding twelve-month period ending as of the immediately preceding year end. Current law of New York permits the payment of dividends or distributions which, together with dividends or distributions paid during any calendar year, (1) do not exceed the *greater* of (a) 10% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (b) the net gain from operations of the insurer for the immediately preceding calendar year, not including realized capital gains, not to exceed 30% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (2) do not exceed the *lesser* of (a) 10% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (b) the net gain from operations of the insurer for the immediately preceding calendar year, not including realized capital gains. Any proposed dividend in excess of this amount is considered an extraordinary dividend or extraordinary distribution and may not be paid until it has been approved, or a 30-day waiting period has passed during which it has not been disapproved, by a Commissioner. These restrictions limit our U.S. insurance subsidiaries' ability to pay dividends to us. Any further changes to state regulations that further restrict our U.S. insurance subsidiaries' ability to declare and pay dividends or pay distributions to us could have a materially adverse effect on our financial condition and results of operations.

At any given time, we and our domestic insurance subsidiaries may be the subject of a number of ongoing financial or market conduct examinations, audits or inquiries. From time to time, regulators raise issues during such examinations that could, if determined adversely, have a material impact on our insurance subsidiaries' businesses or result in fines for improper market conduct. As part of their routine regulatory oversight process, state insurance departments conduct periodic detailed examinations, generally once every three to five years, of the books, records, accounts and operations of insurance companies that are domiciled in their states. Examinations are generally carried out in cooperation with the insurance departments of other, non-domiciliary states under guidelines promulgated by the NAIC. Financial examinations of our domestic insurance subsidiaries were recently completed in each domiciliary state of Athene with no findings that are expected to have a material adverse effect on our domestic insurance subsidiaries. Additionally, our domestic insurance subsidiaries are also subject to periodic market conduct examinations in each state in which they do business, pursuant to which state regulators examine an insurer's compliance with applicable insurance laws and regulations, including, among other things, the form and content of disclosure to consumers, illustrations, advertising, sales practices and complaint handling of any insurance company doing business in that state.

Another topic of which various regulators and state officials have had an interest in recent years is the topic of unclaimed property and the use of the Death Master File. In 2013, prior to our acquisition of the company, Aviva USA entered into multi-state settlement agreements with the insurance regulators and treasurers for 48 states in connection with certain of its subsidiaries' use of the Death Master File. As part of the settlement, AAIA and its subsidiary ALICNY agreed to pay a $4 million assessment for examination, compliance and monitoring costs without admitting any liability or wrongdoing, and further agreed to adopt policies and procedures reasonably designed to ensure timely payment of valid claims to beneficiaries in accordance with insurance laws and to timely report and remit unclaimed proceeds to the appropriate states in connection with unpaid property laws. Our U.S. insurance subsidiaries could continue to be subject to risks related to unpaid benefits, the Death Master File, and the procedures required by the prior multi-state settlement as they relate to our annuity business. Furthermore, administrative challenges associated with implementing the procedures described above may make compliance with the multi-state settlement and applicable law difficult and could have a material and adverse effect on our results of operations. Moreover, AADE is currently undergoing a multi-state unclaimed property examination led by Verus Financial, on behalf of California, Florida, Georgia, Indiana, Louisiana, North Carolina, Ohio, Pennsylvania, Tennessee and Texas. Further, AADE is a defendant in a lawsuit filed by the West Virginia Treasurer, State of West Virginia ex rel. John D. Perdue v. Liberty Life Ins. Co., Case No. 12-C-419, pursuant to which the Treasurer alleges that Liberty Life, now known as AADE, failed to adopt reasonable procedures, such as using the Death Master File, to identify deceased insureds with unpaid death benefits and timely escheat those unclaimed benefits to the state. The Treasurer accordingly seeks to recover unpaid death benefits, statutory interest and penalties. We are unable to determine with any certainty whether such unclaimed property examination and litigation could result in a finding of unpaid benefits or other liability, but given the nature of such examinations, litigation and past settlements at our other subsidiaries and within the life insurance industry in general, it is possible the examination could result in a material and adverse effect on our results of operations.

Another area of focus by state insurance regulators has been on the use of TPAs to administer insurance policies. Our U.S. insurance subsidiaries rely on TPAs to service certain annuity and life insurance policies and have experienced increased service and administration complaints related to the conversion and administration of the Aviva USA life insurance policies reinsured to affiliates of Global Atlantic by the TPA retained by such Global Atlantic affiliates to provide services on such policies, as well as on certain annuity policies that were on Aviva USA's life systems that were also converted to and are being administered by the same TPA. As a result of these increased complaints and service-related issues, our U.S. insurance subsidiaries may be subject to increased regulatory scrutiny, including fines and penalties, and policyholder litigation.

We are also subject to state regulation regarding any potential acquisitions or changes of control, both with regards to our own subsidiaries and to those companies or businesses which we may in the future acquire. Most state insurance holding company system acts require consents from applicable insurance departments prior to the direct or indirect acquisition or change of control of an insurer or its holding company. Generally, acquiring a 10% or greater voting interest in an insurance company or its parent company is presumptively considered a change of control under these statutes, and the acquirer is presumptively a controlling person of the insurer or its holding company. Current regulatory barriers to acquisitions of insurers and any new regulatory barriers adopted may increase the costs of implementing our acquisition strategy or may prevent certain acquisitions entirely. Additionally, these regulatory barriers and limitations on ownership that potential purchasers of our common shares may observe in order to avoid being deemed controlling persons may decrease the attractiveness of any future offering of our common shares and may delay, defer or prevent a change of control of us or impede a merger, takeover or other business combination which our shareholders may otherwise view favorably.

Most, if not all, of the states where we are licensed to transact business require that insurers doing business within the state participate in a guaranty association, which is organized to pay contractual benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations have the right to assess insurance companies doing business in their state in order to help pay the obligations of insolvent insurance companies to policyholders and claimants. Because the amount and timing of an assessment is beyond our control, liabilities we have currently established for these potential assessments may not be adequate.

Other U.S. Regulation

Our subsidiaries' insurance, annuity, retirement and investment products are subject to a complex and extensive array of laws that are administered and enforced by state securities administrators, state banking authorities, the SEC, FINRA, the DOL, the IRS and the Office of the Comptroller of the Currency. Failure to comply with these laws and limitations could subject us to administrative penalties imposed by a particular governmental or self-regulatory authority, unanticipated costs associated with remedying such failure or other claims, harm to our reputation, interruption of our operations or an adverse impact on our profitability.

We also may be subject to regulation by the DOL when providing a variety of products and services to employee benefit plans governed by ERISA. Severe penalties are imposed for breach of duties under ERISA. In addition, we will be subject to regulation by the DOL with respect to recommendations involving an IRA.

In addition to the foregoing risks, the financial services industry is the focus of increased regulatory scrutiny as various state and federal governmental agencies and self-regulatory organizations conduct inquiries and investigations into the products and practices of the financial services industries. The 2008 economic crisis has changed the way the financial services industry is regulated. Governmental authorities in the United States and worldwide have become increasingly interested in potential risks posed by the insurance industry as a whole, and to commercial and financial systems in general. Among the proposals that are at present being considered are the possible introduction of global regulatory standards for the amount of capital that insurance groups must maintain across the group. While we cannot predict the exact nature, timing or scope of possible governmental initiatives, there may be increased regulatory intervention in the insurance and financial services industry in the future.

Item 1A. Risk Factors

Bermuda Licensing

Because we are a Bermuda company, we are subject to changes in Bermuda law and regulation that may have an adverse impact on our operations, including through the imposition of tax liability or increased regulatory supervision. As a holding company, AHL is not subject to the laws of Bermuda governing insurance companies; however, ALRe is registered in Bermuda under the Bermuda Insurance Act as a Class E insurer and is subject to the Bermuda Insurance Act and the rules and regulations promulgated thereunder.

Additionally, the BMA sought regulatory equivalency, which enables Bermuda's commercial insurers to transact business with the EU on a "level playing field." In connection with its initial efforts to achieve equivalency under Solvency II, the BMA implemented and imposed additional requirements on the companies it regulates, such as ALRe. On November 26, 2015, via delegated act, the EC granted Bermuda's commercial insurers full equivalence in all areas of Solvency II for an indefinite period of time. The EC's act was reviewed and approved by the European Parliament and Council and no objection was made. On March 4, 2016, the delegated act was published in the official journal of the EU. The grant of full equivalence came into force on March 24, 2016, and applies from January 1, 2016.

Additionally, changes to applicable Bermuda laws and regulations regarding dividends or distributions from our subsidiaries to us could adversely affect us. All Bermuda companies must comply with the provisions of the Companies Act regulating the payment of dividends and distributions from contributed surplus. Under the Companies Act, a Bermuda company may not declare or pay a dividend or make a distribution out of contributed surplus if the company has reasonable grounds for believing that it is or will after the payment be unable to pay its liabilities as they become due or the realizable value of the company's assets would thereby be less than its liabilities. As ALRe is a licensed reinsurer and regulated by the BMA, it is additionally required to comply with the provisions of the Bermuda Insurance Act regarding payments of dividends and distributions. Under the Bermuda Insurance Act, an insurer is prohibited from declaring or paying a dividend if in breach of its ECR or MMS or if the declaration or payment of such dividend would cause such a breach. Where an insurer fails to meet its solvency margin on the last day of any financial year, it is prohibited from declaring or paying any dividends during the next financial year without the approval of the BMA.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's total statutory capital and surplus, unless at least two members of ALRe's board of directors and its principal representative in Bermuda sign and submit to the BMA an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MMS and ECR, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of its total statutory capital. Distributions in excess of this amount require the approval of the BMA.

Further, ALRe must obtain the BMA's prior approval before reducing its total statutory capital as shown in its previous financial year statutory balance sheet by 15% or more. ALRe is also required to obtain a certification from its approved actuary prior to declaring or paying any dividends and such certificate will not be given unless the value of its long-term business assets exceeds its long-term business liabilities, as certified by its approved actuary, by the amount of the dividend and at least the MMS.

German Laws and Regulation

Our German Group Companies licensed as insurers are subject to the relevant laws and regulations applicable to insurers in Germany which regulate and mandate, among other things, eligibility criteria for investments, policyholder participation in income, accounting principles, corporate governance requirements, regulatory capital, reporting of insurance undertakings, insurance contracts, consumer protection laws, data protection requirements and anti-money-laundering requirements. Our German Group Companies are subject to supervision by BaFin. BaFin is the central financial regulatory authority for Germany and has wide powers to interpret and execute the insurance supervisory law in Germany, in particular via issuing regulatory ordinances and guidelines. Further, BaFin plays a significant role in interpreting the requirements of the Solvency II regime which became effective as of January 1, 2016. While we strive to ensure strict regulatory compliance, in particular compliance with all regulations and guidelines as issued by BaFin, we may be subject to non-compliance with these regulations which could result in unforeseen rectification costs and/or regulatory fines, which could adversely affect our business.

We are also subject to German laws and regulations regarding potential future acquisitions of German companies or businesses. Pursuant to German regulatory law, the direct or indirect acquisition of a significant interest in a German insurance undertaking or the increase of a qualified participating interest in a German insurance undertaking exceeding certain thresholds is subject to BaFin approval or the expiration of a statutory non-objection period. Generally, indirectly or directly acquiring a 10% or greater capital or voting interest in an insurance undertaking or obtaining the ability to significantly influence the management of the insurance undertaking is considered a qualified participating interest under German regulatory laws. Laws such as these prevent any person from directly or indirectly acquiring qualified participating interests in any of our German insurance subsidiaries unless that person has filed a notification requiring specified information with BaFin and has obtained BaFin's prior approval or waited for the expiration of a statutory non-objection period. Since we are indirectly holding a 100% capital and voting interest in German insurance undertakings, the acquisition of a capital or voting interest of 10% or more in AHL could qualify as an indirect acquisition of a qualified participating interest in German insurance undertakings. Persons directly or indirectly holding a qualified participating interest in a German insurance undertaking are subject to notification and other regulatory obligations imposed by BaFin.

Current and future regulatory barriers to acquisitions of insurers may increase the costs of implementing our acquisition strategy or may prevent certain acquisitions entirely. Additionally, regulatory barriers on acquisitions or the increase of qualified participating interests (among other

things, the avoidance of an acquisition of capital or voting interest of 10% or more in AHL) that potential purchasers of our common shares may be required to observe in order to avoid being deemed a person acquiring or increasing a qualified participating interest may decrease the attractiveness of purchasing our common shares, including in connection with a future offering thereof. These regulatory barriers may also delay, defer or prevent a change of control if the potential purchaser acquires a qualified participating interest, as BaFin effectively has the right to void such a purchase.

Further, purchases of our common shares significantly in excess of 10% may result in the formation of a Solvency II group, resulting in the application of Solvency II to the purchaser or its ultimate parent, thereby subjecting such entity to requirements including group solvency requirements and group corporate governance provisions. Formation of a Solvency II group may occur if the purchaser qualifies as an indirect parent of the German insurers (if the purchaser acquires more than 50% of capital or voting interest in AHL or otherwise controls AHL). This applies regardless of the home state of the ultimate parent, but excludes countries with regulatory regimes deemed equivalent to Solvency II.

Luxembourg Regulation

Our Luxembourg subsidiary is subject to supervision by the CSSF and Luxembourg regulation for management companies of investment funds. We do not believe that our Luxembourg subsidiary is governed by directive 2011/61/EU of the European Parliament and of the Council of June 8, 2011 on Alternative Investment Fund Managers and it is currently registered accordingly with the CSSF on the basis of a self-assessment. In the absence of a final decision by the relevant Luxembourg authorities and subject to any policy changes and changes in circumstances on which the self-assessment is based, namely regarding the holding and investment structure, we cannot eliminate the risk of our Luxembourg subsidiary qualifying as an Alternative Investment Fund Manager, which would subject our subsidiary to enhanced administrative and operating requirements and require us to support our subsidiary with more capital, and could thus adversely affect our financial condition and results of operations. The Luxembourg investment fund managed by our Luxembourg subsidiary is regulated as a specialized investment fund under Luxembourg law and thus is also subject to legislative and/or regulatory developments, which may impact, directly or indirectly, the position and performance of our Luxembourg subsidiary.

Our failure to obtain or maintain approval of insurance regulators and other regulatory authorities as required for the operations of our insurance subsidiaries may have a material adverse effect on our business, financial condition, results of operations, liquidity and prospects.

U.S. state regulators retain the authority to license insurers in their states and an insurer generally may not operate in a state in which it is not licensed. We have U.S. domiciled insurance subsidiaries that are currently licensed to do business in all 50 states and the District of Columbia. Our ability to retain these licenses depends on our and our subsidiaries' ability to meet requirements established by the NAIC and adopted by each state such as RBC standards and surplus requirements. Further, our German Group Companies operating insurance businesses are licensed by BaFin. Maintaining such licenses requires compliance with the relevant regulatory provisions, including in particular MCRs as set out under German law and under the Solvency II regime.

Some of the factors influencing these licensing requirements, particularly factors such as changes in equity market levels, the value of certain derivative instruments that do not receive hedge accounting, the value and credit ratings of certain fixed-income and equity securities in our investment portfolio, interest rate changes and changes to the RBC formulas and the interpretation of the NAIC's instructions with respect to RBC calculation methodologies, are out of our control. If these factors adversely affect us and we are unable to meet the requirements above, our subsidiaries could lose their licenses to do business in certain states, be subject to additional regulatory oversight, have their licenses suspended or be subject to seizure of assets. A loss or suspension of any of our subsidiaries' licenses may negatively impact our reputation in the insurance market and result in our subsidiaries' inability to write new business, distribute funds or pursue our investment/overall business strategy.

ALRe, as a Bermuda domiciled insurer, is also required to maintain licenses. ALRe is licensed as a reinsurer only in Bermuda. Bermuda insurance statutes and regulations and policies of the BMA require that ALRe, among other things, maintain a minimum level of capital and surplus, satisfy solvency standards, restrict dividends and distributions, obtain prior approval or provide notification to the BMA, as the case may be, of ownership, transfer and disposition of Shareholder Controller shares, maintain a head office, and have certain officers and a director resident in Bermuda, appoint and maintain a principal representative in Bermuda and provide for the performance of certain periodic examinations of itself and its financial conditions. A failure to meet these conditions may result in the suspension or revocation of ALRe's license to do business as a reinsurance company in Bermuda, which would mean that ALRe would not be able to enter into any new reinsurance contracts until the suspension ended or it became licensed in another jurisdiction. For any or a number of reasons, the BMA could revoke or suspend ALRe's license. Any such suspension or revocation of ALRe's license would negatively impact its and our reputation in the reinsurance marketplace and could have a material adverse effect on our results of operations.

The process of obtaining licenses is time consuming and costly, and we may not be able to become licensed in jurisdictions other than those in which our subsidiaries are currently licensed. The modification of the conduct of our business resulting from our and our subsidiaries becoming licensed in certain jurisdictions could significantly and negatively affect our business. In addition, our inability to comply with insurance statutes and regulations could significantly and adversely affect our business by limiting our ability to conduct business as well as subjecting us to penalties and fines.

Item 1A. Risk Factors

Changes in the laws and regulations governing the insurance industry or otherwise applicable to our business, including the DOL fiduciary regulation, may have a material adverse effect on our business, financial condition, liquidity, results of operations and prospects.

U.S. Federal Oversight

The 2008 economic crisis has resulted in numerous changes to regulation and oversight of the financial industry, the full impact of which has yet to be realized. The Dodd-Frank Act makes sweeping changes to the regulation of financial services entities, products and markets. Historically, the federal government has not regulated the insurance business, however, the Dodd-Frank Act generally provides for enhanced federal supervision of financial institutions, including insurance companies in certain circumstances, and financial activities that represent a systemic risk to financial stability or the economy. Certain provisions of the Dodd-Frank Act are or may become applicable to us, our competitors or those entities with which we do business, including, but not limited to: the establishment of a comprehensive federal regulatory regime with respect to derivatives; the establishment of consolidated federal regulation and resolution authority over SIFIs; the establishment of the Federal Insurance Office; changes to the regulation of broker-dealers and investment advisors; changes to the regulation of reinsurance; changes to regulations affecting the rights of shareholders; the imposition of additional regulation over credit rating agencies; the imposition of concentration limits on financial institutions that restrict the amount of credit that may be extended to a single person or entity; and mandatory on-facility execution and clearing of certain derivative contracts.

Numerous provisions of the Dodd-Frank Act require the adoption or implementation of rules or regulations. The process of adopting such implementing rules and/or regulations have in some instances been delayed beyond the timeframes imposed by the Dodd-Frank Act. Further, changes in general political, economic or market conditions, including as a result of the recent U.S. presidential and congressional elections, could affect the scope, timing and final implementation of the Dodd-Frank Act. Until the various final regulations are promulgated, the full impact of the regulations on the Company will remain unclear. In addition, the Dodd-Frank Act mandated multiple studies, which could result in additional legislation or regulation applicable to the insurance industry, us, our competitors or those entities with which we do business. Legislative or regulatory requirements imposed by or promulgated in connection with the Dodd-Frank Act may impact us in many ways, including, but not limited to: placing us at a competitive disadvantage relative to our competition or other financial services entities; changing the competitive landscape of the financial services sector or the insurance industry; making it more expensive for us to conduct our business; requiring the reallocation of significant company resources to government affairs; increasing our legal and compliance related activities and the costs associated therewith as the Dodd-Frank Act may permit the preemption of certain state laws when inconsistent with international agreements; and otherwise having a material adverse effect on the overall business climate as well as our financial condition and results of operations.

On April 6, 2016, the DOL issued a new regulation more broadly defining the circumstances under which a person is considered to be a fiduciary by reason of giving investment advice or recommendations to an employee benefit plan or a plan's participants or to IRA holders. In addition to releasing the investment advice regulation, the DOL: (1) issued a new prohibited transaction class exemption, referred to as BICE, to be used in connection with the sale of FIAs or variable annuities, and (2) updated the previously prohibited transaction class exemption 84-24, to be used in connection with the sale of traditional fixed rate annuities. The April 10, 2017 effective date for the DOL regulation may be delayed in response to a recent memorandum issued to the DOL by the President of the United States. For the year ended December 31, 2016, of our total deposits of approximately $8.8 billion from our organic channels, 42% was associated with sales of FIAs to employee benefit plans and IRAs and 14% was associated with traditional fixed annuities sold to employee benefit plans and IRAs. We cannot predict with any certainty the impact of the new regulation and exemptions, but the regulation and exemptions could alter the way our products and services are marketed and sold, particularly to purchasers of IRAs and individual retirement annuities. If implemented in its current form, the DOL regulation could have an adverse effect on our ability to write new business. The SEC also has indicated that it may propose rules creating a uniform standard of conduct applicable to broker-dealers and investment advisers, which, if adopted may affect the distribution of our products. Should the SEC rules, if adopted, not align with the finalized DOL regulations related to conflicts of interest in the provision of investment advice, the distribution of our products could be further complicated.

Heightened standards of conduct as a result of the DOL regulation, the SEC proposed rules or another similar proposed rule or regulation could also increase the compliance and regulatory burdens on our representatives, and could lead to increased litigation and regulatory risks, changes to our business model, a decrease in the number of our securities-licensed representatives and a reduction in the products we offer to our clients, any of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we expect the worldwide demographic trend of population aging will cause policymakers to continue to focus on the framework of U.S. and non-U.S. retirement systems, which may drive additional changes regarding the manner in which individuals plan for and fund their retirement, the extent of government involvement in retirement savings and funding, the regulation of retirement products and services and the oversight of industry participants. Any incremental requirements, costs and risks imposed on us in connection with such current or future legislative or regulatory changes, may constrain our ability to market our products and services to potential customers, and could negatively impact our profitability and make it more difficult for us to pursue our growth strategy.

Non-Bank SIFIs

Title I of the Dodd-Frank Act established the FSOC, which has authority to designate non-bank financial companies as SIFIs, thereby subjecting them to enhanced prudential standards and supervision by the Federal Reserve. The prudential standards for non-bank SIFIs include enhanced RBC requirements, leverage limits, liquidity requirements, single counterparty exposure limits, governance requirements for risk management, stress test requirements, special debt-to-equity limits for certain companies, early remediation procedures, and recovery and resolution planning.

Athene USA and certain of its subsidiaries are above the initial quantitative threshold for treatment as non-bank SIFIs (total consolidated assets of $50 billion, including the assets of its subsidiaries). If the FSOC were to designate Athene USA or any of its subsidiaries as a non-bank SIFI, Athene USA or the respective subsidiary would become subject to certain of these enhanced prudential standards.

FIAs

In recent years, the SEC and state securities regulators have questioned whether FIAs, such as those sold by us, should be treated as securities under the federal and state securities laws rather than as insurance products exempted from such laws. Under the Dodd-Frank Act, annuities that meet specific requirements are specifically exempted from being treated as securities by the SEC. We expect that the types of FIAs that we currently sell will meet applicable requirements for exemption from treatment as securities and therefore will remain exempt from being treated as securities by the SEC and state securities regulators. However, there can be no assurance that federal or state securities laws or state insurance laws and regulations will not be amended or interpreted to impose further requirements on FIAs. Treatment of these products as securities would require additional registration and licensing of these products and the agents selling them, as well as cause us to seek new or additional marketing relationships for these products, any of which may impose significant restrictions on our ability to conduct business as currently operated.

Regulation of Over-The-Counter (OTC) Derivatives

We use derivatives to mitigate a wide range of risks in connection with our businesses, including options purchased to hedge the derivatives embedded in the FIAs that we have issued, and swaps, futures and/or options may be used to manage the impact of increased benefit exposures from our annuity products that offer guaranteed benefits. Title VII of the Dodd-Frank Act creates a comprehensive framework for the federal oversight and regulation of the OTC derivatives market and entities, such as Athene, that participate in the market, and requires U.S. regulators to promulgate rules and regulations implementing its provisions. Regulations have been finalized and implemented in many areas and are being finalized for implementation in others.

The Dodd-Frank Act divides the regulatory responsibility for swaps in the United States between the SEC and the CFTC. The CFTC regulates swaps and swap entities, and the SEC regulates security-based swaps and security-based swap entities. The CFTC and the SEC have jointly finalized certain regulations under the Dodd-Frank Act, including critical rulemakings on the definitions of “swap,” “security-based swap,” “swap dealer,” “security-based swap dealer,” “major swap participant” and “major security-based swap participant.” In addition, the CFTC has substantially finalized its required rulemaking under the Dodd-Frank Act, including regulations relating to the registration and regulation of swap dealers, major swap participants and swap execution facilities, reporting, recordkeeping, mandatory clearing and mandatory on-facility trade execution. The SEC has yet to implement its regulatory regime for security-based swaps and market participants transacting in security-based swaps, including security-based swap dealers and major security-based swap participants subject to the SEC’s oversight. As a result of this bifurcation and the different pace at which the agencies have promulgated and implemented regulations, different transactions are subject to different levels of regulation.

The Dodd-Frank Act and the CFTC rules thereunder require us, in connection with certain swap transactions, to comply with mandatory clearing and on-facility trade execution requirements, and it is anticipated that the types of swaps subject to these requirements will be expanded over time. In addition, new regulations require us to comply with mandatory minimum margin requirements for uncleared swaps and, in some instances, uncleared security-based swaps. Uncleared swap variation margin regulations issued by U.S. bank prudential regulators, the CFTC and regulators in certain other jurisdictions, such as the European Union and Canada, are scheduled to take effect on March 1, 2017. These regulations require market participants to enter into agreements consistent with the requirements thereunder and a failure to do so could result in trading disruptions. Derivative clearing requirements and mandatory margin requirements could increase the cost of our risk mitigation and could have other implications. For example, increased margin requirements, combined with netting restrictions and restrictions on securities that qualify as eligible collateral, could reduce our liquidity and require increased holdings of cash and highly liquid securities with lower yields causing a reduction in income. In addition, the requirement that certain trades be centrally cleared through clearinghouses subjects us to documentation that is significantly more counterparty-favorable and may entitle counterparties to unilaterally change such terms as trading limits and the amount of margin required. The ability of any such counterparty to take such actions could create trading disruptions and liquidity concerns. Finally, the requirement that certain trades be centrally cleared through clearinghouses concentrates counterparty risk in both clearinghouses and clearing members. The failure of a clearinghouse could have a significant impact on the financial system. Even if a clearinghouse does not fail, large losses could force significant capital calls on clearinghouse members during a financial crisis, which could lead clearinghouse members to default. Because clearinghouses are still developing and the related bankruptcy process is untested, it is difficult to anticipate or identify all actual risks related to the default of a clearinghouse.

The Dodd-Frank Act and new regulations thereunder and similar regulations issued by non-U.S. jurisdictions that may indirectly apply to us could significantly increase the cost of derivative contracts, reduce the availability of derivatives to protect against risks we encounter, reduce our ability to monetize or restructure our existing derivative contracts, and increase our credit risk exposure. If we reduce our use of derivatives as a result of the Dodd-Frank Act and the regulations thereunder and other similar regulations, our results of operations may become more volatile and our cash flows may be less predictable which could adversely affect our financial performance. Additionally, we have always been subject to the risk that hedging and other management procedures might prove ineffective in reducing the risks to which insurance policies expose us or that unanticipated policyholder behavior or mortality, combined with adverse market events, could produce economic losses beyond the scope of the risk management techniques employed. Any such losses could be increased by the increased cost of entering into derivatives and the reduced availability of customized derivatives that might result from the implementation of the Dodd-Frank Act.

Item 1A. Risk Factors

Notwithstanding the foregoing, the future of Title VII of the Dodd-Frank Act and the related regulations implemented by the CFTC and the SEC and their impact on us remain uncertain and unpredictable, particularly in light of actions taken by the Trump administration. On February 3, 2017, President Trump signed an Executive Order that establishes core principles for regulating the U.S. financial system and provides a framework for comprehensive change to current financial regulation, and on February 24, 2017, President Trump also signed an Executive Order that requires federal agencies to designate a "Regulatory Reform Officer" and a "Regulatory Reform Task Force" to evaluate existing regulations and make recommendations to repeal, replace or modify regulations that, among others, inhibit job creation, are ineffective or impose costs that exceed benefits. At this point it is difficult to predict the impact of these Executive Orders on Title VII of the Dodd-Frank Act, derivatives regulatory schemes in other jurisdictions and our derivatives activities.

U.S. Consumer Protection Laws and Privacy and Data Security Regulation

As part of the Dodd-Frank Act, Congress established the CFPB to supervise and regulate institutions that provide certain financial products and services to consumers. The consumer financial services subject to the CFPB's jurisdiction generally exclude insurance business of the kind in which we engage. The CFPB is, however, exploring the possibility of regulating the way Americans manage their retirement savings and is considering the extent of its authority in that area. We are unable at this time to predict the impact of these activities on our business.

We are subject to numerous federal and state laws and regulations governing the security and confidentiality of nonpublic personal information. The issues surrounding data security and the safeguarding of consumers' protected information are under increasing regulatory scrutiny by state and federal regulators, particularly in light of the number and severity of recent U.S. companies' data breaches. The Federal Trade Commission, the Federal Bureau of Investigation, the Federal Communications Commission, the NYSDFS and the NAIC have undertaken various studies, reports and actions regarding data security for entities under their respective supervision. Some states have recently enacted new insurance laws that require certain regulated entities to implement and maintain comprehensive information security programs to safeguard the personal information of insureds and enrollees. If the NAIC's model law is adopted in its current form, it could add another legal framework to which we would be subject and could thereby, upon the occurrence of a data breach, subject us to two separate and different data breach legal regimes. We cannot predict the effect or the compliance costs if state and federal regulators pursue investigations and increase the regulatory requirements for the security of protected information.

In addition to the NAIC's proposed model law, state lawmakers and regulatory bodies may consider additional or more detailed regulation regarding these subjects and the privacy and security of nonpublic personal information. The NYSDFS recently published a new regulation, which became effective on March 1, 2017, with ongoing compliance deadlines over the next 24 months. We are in the process of updating processes and procedures to comply with the new requirements. We cannot predict the effect or the amount of compliance costs that will be incurred if state and federal regulators pursue investigations and increase the regulatory requirements for the security of protected information.

NAIC

Although our businesses are subject to regulation in each state in which they conduct business, in many instances the state insurance laws and regulations emanate from the NAIC. State insurance regulators and the NAIC regularly re-examine existing laws and regulations applicable to insurance companies and their products. Any proposed or future legislation or NAIC initiatives, if adopted, may be more restrictive on our ability to conduct business than current regulatory requirements or may result in higher costs or increased statutory capital and reserve requirements. Changes in these laws and regulations or interpretations thereof are often made for the benefit of the consumer and at the expense of the insurer and could have a material adverse effect on our domestic insurance subsidiaries' businesses, operations and financial conditions. We and they are also subject to the risk that compliance with any particular regulator's interpretation of a legal or accounting issue may not result in compliance with another regulator's interpretation of the same issue, particularly when compliance is judged in hindsight. There is an additional risk that any particular regulator's interpretation of a legal or accounting issue may change over time to our detriment, or that changes to the overall legal or market environment, even absent any change of interpretation by a particular regulator, may cause us to change our views regarding the actions we need to take from a legal risk management perspective, which could necessitate changes to our practices that may, in some cases, limit our ability to grow and improve profitability.

Risks Relating to Taxation

AHL or ALRe may be subject to U.S. federal income taxation.

AHL and ALRe are incorporated under the laws of Bermuda and intend to operate in a manner that will not cause either to be treated as being engaged in a trade or business within the United States or subject to current U.S. federal income taxation on their net income. However, because there is considerable uncertainty as to when a foreign corporation is engaged in a trade or business within the United States, as the law is unclear and the determination is highly factual and must be made annually, there can be no assurance that the IRS will not contend successfully that AHL or ALRe is engaged in a trade or business in the United States. If AHL or ALRe were considered to be engaged in a trade or business in the United States, it could be subject to U.S. federal income taxation on a net basis on its income that is effectively connected with such U.S. trade or business (including branch profits tax on the portion of its earnings and profits that is attributable to such income). Any such U.S. federal income taxation could result in substantial tax liabilities and consequently could have a material adverse effect on our financial condition and results of future operations.

Item 1A. Risk Factors

U.S. persons who own our Class A common shares may be subject to U.S. federal income taxation at ordinary income rates on our undistributed earnings and profits.

AHL's bye-laws generally limit the voting power of our Class A common shares (and certain other of our voting securities) such that no person owns (or is treated as owning) more than 9.9% of the total voting power of our common shares (with certain exceptions). AHL's bye-laws also generally reduce the voting power of Class B common shares held by certain holders if (A) one or more U.S. persons that own (or are treated as owning) more than 9.9% of the total voting power of our common shares own (or are treated as owning) individually or in the aggregate more than 24.9% of the voting power or the value of our common shares or (B) a U.S. person that is classified as an individual, an estate or a trust for U.S. federal income tax purposes owns (or is treated as owning) more than 9.9% of the total voting power of our common shares. Additionally, AHL's bye-laws require the board of AHL to refer certain decisions with respect to our non-U.S. subsidiaries to our shareholders, and to vote our shares accordingly. These provisions are intended to reduce the likelihood that AHL, ALRe, or any of the German Group Companies will be treated as a controlled foreign corporation (CFC) in any taxable year, other than for purposes of taking into account related person insurance income (RPII). If these provisions were not in force or effective and AHL, ALRe or a German Group Company were treated as a CFC in a taxable year, each U.S. person treated as a "10% U.S. Shareholder" with respect to AHL, ALRe or such German Group Company that held our common shares directly or indirectly through non-U.S. entities as of the last day in such taxable year that AHL, ALRe or such German Group Company was a CFC would generally be required to include in gross income as ordinary income its pro rata share of AHL's, ALRe's or such German Group Company's insurance and reinsurance income and certain other investment income, regardless of whether that income was actually distributed to such U.S. person (with certain adjustments). For these purposes, a "10% U.S. Shareholder" of a non-U.S. corporation generally is any U.S. person that owns (or is treated as owning) stock of the non-U.S. corporation possessing 10% or more of the total voting power of such non-U.S. corporation's stock. In general, a non-U.S. corporation is a CFC if 10% U.S. Shareholders, in the aggregate, own (or are treated as owning) stock of the non-U.S. corporation possessing more than 50% of the voting power or value of such corporation's stock. However, this threshold is lowered to more than 25% for purposes of taking into account the insurance income of a non-U.S. corporation. Special rules apply for purposes of taking into account any RPII of a non-U.S. corporation, as described below.

In addition, if a U.S. person disposes of shares in a non-U.S. corporation and the U.S. person was a 10% U.S. Shareholder at any time when the corporation was a CFC during the five-year period ending on the date of disposition, any gain from the disposition will generally be treated as a dividend to the extent of the U.S. person's share of the corporation's undistributed earnings and profits that were accumulated during the period or periods that the U.S. person owned the shares while the corporation was a CFC (with certain adjustments). Also, a U.S. person may be required to comply with specified reporting requirements, regardless of the number of shares owned.

Because of the limitations in AHL's bye-laws referred to above, among other factors, we believe it is unlikely that any U.S. person that acquires our Class A common shares would thereby become a 10% U.S. Shareholder of AHL, ALRe or any German Group Company. However, because the relevant attribution rules are complex and there is no definitive legal authority on whether the voting provisions included in AHL's organizational documents are effective for purposes of the CFC provisions, there can be no assurance that this will be the case. Further, our ability to obtain information that would permit us to enforce the limitation described above may be limited. We will take reasonable steps to obtain such information, but there can be no assurance that such steps will be adequate or that we will be successful in this regard. Accordingly, we may not be able to fully enforce the limitation described above.

U.S. persons who own our Class A common shares may be subject to U.S. federal income taxation at ordinary income rates on a disproportionate share of our undistributed earnings and profits attributable to RPII.

If ALRe is treated as recognizing RPII in a taxable year and ALRe is treated as a CFC for such taxable year, each U.S. person that owns our Class A common shares directly or indirectly through non-U.S. entities as of the last day in such taxable year must generally include in gross income its pro rata share of the RPII, determined as if the RPII were distributed proportionately only to all such U.S. persons, regardless of whether that income is distributed (with certain adjustments). For this purpose, ALRe generally will be treated as a CFC if U.S. persons in the aggregate own (or are treated as owning) 25% or more of the total voting power or value of AHL's or ALRe's stock for an uninterrupted period of 30 days or more during the taxable year. We believe that ALRe will be treated as a CFC for this purpose based on the expected ownership of our shares.

RPII generally is any income of a non-U.S. corporation attributable to insuring or reinsuring risks of a U.S. person that owns (or is treated as owning) stock of such non-U.S. corporation, or risks of a person that is "related" to such a U.S. person. For this purpose, (1) a person is "related" to another person if such person "controls," or is "controlled" by, such other person, or if both are "controlled" by the same persons, and (2) "control" of a corporation means ownership (or deemed ownership) of stock possessing more than 50% of the total voting power or value of such corporation's stock and "control" of a partnership, trust or estate for U.S. federal income tax purposes means ownership (or deemed ownership) of more than 50% by value of the beneficial interests in such partnership, trust or estate.

Athene and Apollo have considerable overlap in ownership. If it is determined that the same persons "control" both us and Apollo through owning (or being treated as owning) more than 50% of the vote or value of Athene and Apollo, substantially all of ALRe's income might constitute RPII. This would trigger the adverse RPII consequences described above to all U.S. persons that hold our Class A common shares directly or indirectly through non-U.S. entities and would have a material adverse effect on the value of their investment in our Class A common shares.

Item 1A. Risk Factors

Existing voting restrictions set forth in AHL’s bye-laws are generally intended to prevent a person who owns (or is treated as owning) shares in Apollo from owning (or being treated as owning) any of the voting power of our Class A common shares, thus preventing persons who own (or are treated as owning) both AHL and Apollo from owning (or being treated as owning) more than 50% of the voting power of our stock. However, these restrictions do not prevent members of the Apollo Group from retaining the right to vote on newly acquired Class A common shares, should they choose to do so nor do they prevent persons who own (or are treated as owning) both AHL and Apollo from owning (or being treated as owning) more than 50% of the value of our stock. AHL’s bye-laws also generally provide that no person (nor certain direct or indirect beneficial owners or related persons to such person) who owns our common shares, other than a member of the Apollo Group, may acquire any shares of Apollo or otherwise make any investment that would cause such person, or any other person that is a U.S. person, to own (or be treated as owning) more than 50% of the vote or value of AHL’s stock. Any holder of our common shares that violates this provision may be required, at the board’s discretion, to sell its common shares or take any other reasonable action that the board deems necessary.

Because of the restrictions described above, among other factors, we believe it is likely that one or more exceptions under the RPII rules will apply such that U.S. persons will not be required to include any RPII in their gross income with respect to ALRe or the German Group Companies. However, there can be no assurance that this will be the case. Further, our ability to obtain information that would permit us to enforce the restrictions described above may be limited. We will take reasonable steps to obtain such information, but there can be no assurance that such steps will be adequate or that we will be successful in this regard. Accordingly, we may not be able to fully enforce these restrictions.

U.S. persons who dispose of our Class A common shares may be required to treat any gain as ordinary income for U.S. federal income tax purposes and comply with other specified reporting requirements.

If a U.S. person disposes of shares in a non-U.S. corporation that is an insurance company that had RPII and the 25% threshold described above is met at any time when the U.S. person owned any shares in the corporation during the five-year period ending on the date of disposition, any gain from the disposition will generally be treated as a dividend to the extent of the U.S. person’s share of the corporation’s undistributed earnings and profits that were accumulated during the period that the U.S. person owned the shares (possibly whether or not those earnings and profits are attributable to RPII). In addition, the shareholder will be required to comply with specified reporting requirements, regardless of the amount of shares owned. We believe that these rules should not apply to a disposition of our Class A common shares because AHL is not itself directly engaged in the insurance business. We cannot assure you, however, that the IRS will not successfully assert that these rules apply to a disposition of our Class A common shares.

U.S. tax-exempt organizations that own our Class A common shares may recognize unrelated business taxable income.

A U.S. tax-exempt organization that directly or indirectly owns our Class A common shares generally will recognize unrelated business taxable income and be subject to additional U.S. tax filing obligations to the extent such tax-exempt organization is required to take into account any of our insurance income or RPII pursuant to the CFC and RPII rules described above. U.S. tax-exempt organizations should consult their own tax advisors regarding the risk of recognizing unrelated business taxable income as a result of the ownership of our Class A common shares.

U.S. persons who own our Class A common shares may be subject to adverse tax consequences if AHL, ALRe or any of the German Group Companies is considered a passive foreign investment company for U.S. federal income tax purposes.

If AHL, ALRe or any of the German Group Companies is considered a passive foreign investment company (PFIC) for U.S. federal income tax purposes, a U.S. person who directly or, in certain cases, indirectly owns our Class A common shares could be subject to adverse tax consequences, including a greater tax liability than might otherwise apply, an interest charge on certain taxes that are deemed deferred as a result of AHL’s, ALRe’s or any of the German Group Companies’ non-U.S. status and additional U.S. tax filing obligations, regardless of the number of shares owned. We currently do not expect that AHL, ALRe or any of the German Group Companies will be a PFIC for U.S. federal income tax purposes in the current taxable year or the foreseeable future because ALRe, the German Group Companies, and, through its insurance subsidiaries, AHL each intend to be predominantly engaged in the active conduct of an insurance and reinsurance business. We cannot assure you, however, that AHL, ALRe and the German Group Companies will not be deemed to be PFICs by the IRS. No final or temporary regulations currently exist regarding the application of the PFIC provisions to an insurance company. Proposed regulations have recently been issued, which will not be effective until adopted in final form. At this time it is unclear whether and how such regulations would affect the characterization of AHL and its subsidiaries. Additionally, legislation has been introduced in a previous Congress that, if enacted, would have characterized a non-U.S. insurance company with insurance liabilities of 25% or less of such company’s assets as a PFIC unless it could qualify for a temporary exception based on both an asset test and a facts and circumstances test. Members of Congress may re-introduce similar legislation in the new Congress or introduce other legislation that could affect our status under the PFIC rules. We cannot predict what effect, if any, any new legislation would have on an investor that is subject to U.S. federal income taxation.

Changes in U.S. tax law might adversely affect us or our shareholders.

The tax treatment of non-U.S. companies and their U.S. and non-U.S. insurance subsidiaries has been the subject of Congressional discussion and legislative proposals. Legislative proposals relating to the tax treatment of non-U.S. companies have been introduced in the past that could, if enacted, materially affect us. One legislative proposal, the Stop Tax Haven Abuse Act (S. 174, H.R. 297), introduced in both the U.S. Senate and the U.S. House of Representatives in January 2015, would cause certain entities otherwise treated as non-U.S. corporations to be treated as U.S. corporations for U.S. federal income tax purposes if the “management and control” of such corporations occurs, directly or indirectly, primarily within the United States.

Both the U.S. Congress and President Trump's administration have indicated a desire to reform the Internal Revenue Code. Although the 2016 U.S. House of Representatives Blueprint, "A Better Way" and the tax plans proposed by President Trump during the presidential campaign do not align on all tax reform proposals, substantial proposed changes to the US corporate tax regime include: reduction of the maximum corporate tax rate, repeal of the corporate alternative minimum tax, elimination of net operating loss carryback, immediate expensing of business assets, and elimination of a deduction for net interest expense as well as substantial changes to the international tax system including border tax adjustments, a destination based cash flow tax and moving to a territorial based tax system.

A reduction in the corporate tax rate would have a positive impact on the earnings and cash flow of our U.S. companies, but it could also reduce the value of our deferred tax assets. Although it is not known at this time how border tax adjustments will (if enacted) be applied to insurers and reinsurers, it is possible that such adjustments will involve denying a deduction to U.S. insurance companies for reinsurance premiums paid to a foreign reinsurer, which would materially increase our overall U.S. tax expense. In addition, it is not yet known whether potential tax reform will include further changes impacting the current tax treatment of insurance companies under the Internal Revenue Code. At this time it is not possible to determine the impact of potential legislative changes on our financial condition and results of operations.

Additionally, interpretations of U.S. federal income tax law, including those regarding whether a company is engaged in a trade or business (or has a permanent establishment) within the United States or is a PFIC, or whether U.S. persons are required to include in their gross income "subpart F income" or RPII of a CFC, are subject to change, possibly on a retroactive basis. Regulations regarding the application of the PFIC rules to insurance companies and regarding RPII are only in proposed form. New regulations or pronouncements interpreting or clarifying such regulations may be forthcoming. We cannot be certain if, when or in what form such regulations or pronouncements may be provided and whether such guidance will have a retroactive effect.

We cannot assure you that future legislative, administrative or judicial developments will not result in an increase in the amount of U.S. tax payable by us or by an investor in our Class A common shares or reduce the attractiveness of our products. If any such developments occur, an investment in our common shares could be materially adversely affected.

Changes in U.S. tax law might adversely affect demand for our products.

Many of the products that we sell and reinsure benefit from one or more forms of tax-favored status under current U.S. federal and state income tax regimes. For example, we sell and reinsure annuity contracts that allow the policyholders to defer the recognition of taxable income earned within the contract. Changes in U.S. federal or state tax law could reduce or eliminate the attractiveness of such products, which could affect the sale of our products or increase the expected lapse rate with respect to products that have already been sold.

There is U.S. income tax risk associated with reinsurance between U.S. insurance companies and their Bermuda affiliates.

If a reinsurance agreement is entered into among related parties, the IRS is permitted to reallocate or recharacterize income, deductions or certain other items, and to make any other adjustment, to reflect the proper amount, source or character of the taxable income of each of the parties. If the IRS were to successfully challenge our reinsurance arrangements, our financial condition and results of operations could be adversely affected and the price of our Class A common shares could be adversely affected.

We may become subject to U.S. withholding tax under certain U.S. tax provisions commonly known as FATCA.

Certain U.S. tax provisions commonly known as the Foreign Account Tax Compliance Act (FATCA) impose a 30% withholding tax on certain payments of U.S. source income and the proceeds from the disposition after December 31, 2018, of property of a type that can produce U.S. source interest or dividends, in each case, to certain "foreign financial institutions" and "non-financial foreign entities." The withholding tax also applies to certain "foreign passthru payments" made by foreign financial institutions after December 31, 2018. The U.S. government has signed intergovernmental agreements to facilitate the implementation of FATCA with the governments of Bermuda and Germany (the Bermuda IGA and German IGA, respectively). AHL and its foreign subsidiaries intend to comply with the obligations imposed on them under FATCA and the Bermuda IGA and German IGA, as applicable, to avoid being subject to withholding under FATCA on payments made to them or penalties. To avoid any withholding under FATCA or penalties, we may be required to report the identity of, and certain other information regarding, certain U.S. persons that directly or indirectly own our common shares or exercise control over our shareholders to counterparties or governmental authorities, including the IRS or the Bermuda government. We may also be required to withhold on payments and/or take other actions with respect to holders of our common shares who do not provide us with certain information or documentation required to fully comply with FATCA. However, we expect that the shareholders who purchase our Class A common shares in the secondary market will not be subject to such requirements pursuant to an exception for equity interests that are regularly traded on an established securities market, provided that the shareholder (and any intermediaries through which the shareholder holds its shares) is not a foreign financial institution that is treated as a "nonparticipating FFI" under FATCA. However, no assurance can be provided in this regard. We may become subject to withholding tax or penalties if we are unable to comply with FATCA.

Item 1A. Risk Factors

If AHL is treated as engaged in a U.S. trade or business in any taxable year, all or a portion of the dividends on our Class A common shares may be treated as U.S. source income and may be subject to withholding and information reporting under FATCA unless a shareholder (and any intermediaries through which the shareholder holds its shares) establishes an exemption from such withholding and information reporting. In addition, any gross proceeds from the sale or other disposition of our Class A common shares after December 31, 2018, might also be subject to withholding and information reporting under FATCA in such circumstances, absent an exemption. As discussed above, we currently intend to limit our U.S. activities so that AHL is not considered to be engaged in a U.S. trade or business, although no assurances can be provided in this regard.

Our operations may be affected by the introduction of the Common Reporting Standard.

The Common Reporting Standard (CRS) has been introduced as an initiative by the Organisation for Economic Co-operation and Development (OECD). CRS is imposed on members of the EU by the European Directive on Administrative Co-operation. Countries outside the EU may enter into the Multilateral Competent Authority Agreement, in which they agree to exchange information with participating jurisdictions. Similar to FATCA introduced by the U.S., CRS requires financial institutions which are subject to the rules to report certain information in respect of account holders. German financial institutions are presently subject to certain requirements under CRS, and they must report information beginning in 2017. We intend to operate in compliance with CRS. Any inadvertent failure to do so may have an adverse effect on our results.

We are subject to the risk that Bermuda tax laws may change and that we may become subject to new Bermuda taxes following the expiration of a current exemption after 2035.

The Bermuda Minister of Finance, under the Exempted Undertakings Tax Protection Act 1966 of Bermuda, as amended, has given us an assurance that if any legislation is enacted in Bermuda that would impose tax computed on profits or income, or computed on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then the imposition of any such tax will not be applicable to us or any of our operations, shares, debentures or other obligations until March 31, 2035, except insofar as such tax applies to persons ordinarily resident in Bermuda or to any taxes payable by us in respect of real property owned or leased by us in Bermuda. Given the limited duration of the Bermuda Minister of Finance’s assurance, we cannot assure you that we will not be subject to any Bermuda tax after March 31, 2035.

The impact of the OECD’s recommendations on base erosion and profit shifting is uncertain and could impose adverse tax consequences on us.

In 2015, the OECD published final recommendations on base erosion and profit shifting (BEPS). These BEPS recommendations propose the development of rules directed at counteracting the effects of tax havens and preferential tax regimes in countries around the world. Beginning with 2017, some countries in which we do business, including Bermuda, will require multinational enterprises, like ours, to report detailed information regarding allocation of revenue, profit, and other information, on a country-by-country basis, which could increase scrutiny by foreign tax authorities.

The BEPS recommendations also include revisions to the definition of a “permanent establishment” and the rules for attributing profit to a permanent establishment. Other recommended actions relate to the goal of ensuring that transfer pricing outcomes are in line with value creation, noting that the current rules may facilitate the transfer of risks or capital away from countries where the economic activity takes place. We expect many countries to change their tax laws in response to this project, and several countries have already changed or proposed changes to their tax laws. Changes to tax laws could increase their complexity and the burden and costs of compliance. Additionally, such changes could also result in significant modifications to the existing transfer pricing rules and could potentially have an impact on our taxable profits in various jurisdictions.

Risks Relating to Investment in Our Class A Common Shares

There may be sales of a substantial amount of our common shares by our current shareholders as certain restrictions on sale expire, and these sales could cause the price of our common shares to fall.

Our directors, executive officers and shareholders holding 100% of our common shares outstanding prior to our initial public offering (IPO) agreed that they would not sell any shares prior to the expiration of certain time periods after the date upon which the SEC declared the registration statement for our IPO effective (effective date). Lock-up expiration periods applicable to existing holders end with respect to one-third of the shares owned by such holders at each of 225 days, 365 days and 450 days after the effective date, provided that certain of our shareholders, executive officers, and directors representing approximately 6.5% and 8.0% of our common shares have agreed not to sell any shares for 450 days and two years, respectively, from the effective date. Approximately 45,463,664, 45,463,664, 59,161,548 and 15,134,346 of our common shares will be eligible for future sale at the expiration of such 225 day, 365 day, 450 day and two-year periods, respectively. These restrictions are subject to waiver by our board of directors, including in the event that holders are permitted to sell their shares in follow-on registered offerings by us after the date of the IPO. In addition, our executive officers, directors, the selling shareholders and the substantial majority of our existing shareholders holding common shares outstanding prior to the IPO are subject to a 180 day lock-up entered into with the underwriters in connection with the IPO. As these lock-up periods end, the market price of our common shares could decline if the holders of those shares sell them or are perceived by the market as intending to sell them. Additionally, existing holders of our common shares have registration rights under the Third Amended and Restated Registration Rights Agreement (Registration Rights Agreement), subject to certain conditions, which require us to file registration statements covering the sale of their shares or to include their shares in registration statements that we may file for ourselves or other shareholders in the future.

Item 1A. Risk Factors

The interest of the Apollo Group, which controls and is expected to continue to control 45% of the total voting power of AHL and holds a number of the seats on our board of directors, may conflict with those of other shareholders and could make it more difficult for you and other shareholders to influence significant corporate decisions.

The Apollo Group controls and is expected to continue to control 45% of the total voting power of AHL. As a result, the Apollo Group could exercise significant influence over all matters requiring shareholder approval for the foreseeable future, including approval of significant corporate transactions, appointment of members of our management, election of directors, approval of the termination of our IMAs and determination of our corporate policies, which may reduce the market price of our common shares. Even if the Apollo Group reduces its beneficial ownership below its current holdings or we raise additional equity from investors other than members of the Apollo Group, because of its control over 45% of our aggregate voting power, for so long as any member of the Apollo Group owns at least one Class B common share, such member will still be able to assert significant influence over our board of directors and certain corporate actions.

The interests of our existing shareholders, particularly members of the Apollo Group, may conflict with the interests of our other shareholders. Actions that members of the Apollo Group take as shareholders may not be favorable to our other shareholders. For example, the concentration of voting power held by the Apollo Group, the significant representation on our board of directors by the Apollo Group or the limitations on our ability to terminate any IMA with AAM or AAME could delay, defer or prevent a change of control of us or impede a merger, takeover or other business combination which another shareholder may otherwise view favorably. Members of the Apollo Group may, in their role as shareholders, vote in favor of a merger, takeover or other business combination transaction which our other shareholders might not consider in their best interests. In addition, as long as a business combination transaction were deemed to be in the best interests of the Company, our charter and bye-laws would not prevent us from entering into a business combination transaction that provided for the payment of differential consideration to holders of the Class B common shares, which are held by the Apollo Group or its affiliates, and the Class A common shares. Our conflicts committee and our disinterested directors with respect to a transaction analyze certain of these conflicts to protect against potential harm resulting from conflicts of interest in connection with transactions that we have entered into or will enter into with Apollo or its affiliates. Specifically, our bye-laws require that the conflicts committee (in accordance with its charter and procedures) must approve of certain material transactions by and between us and Apollo or its affiliates, including entering into material agreements or the imposition of any new fee or increase in the rate at which fees are charged to us, subject to certain exceptions. See *Item 13. Certain Relationships and Related Transactions, and Director Independence.* In addition, our conflicts committee may exclusively rely on information provided by AAM, including with respect to fees charged by AAM or Apollo or its affiliates, and with respect to the historical performance or fees of unrelated service providers used for comparison purposes, and may not independently verify the information so provided. However, these conflicts guidelines will not, by themselves, prohibit transactions with Apollo or its affiliates.

Additionally, our investment manager, AAM, and our investment adviser, AAME, are indirect subsidiaries of Apollo and charge us management fees that are based on our assets. Under our IMAs with AAM and AAME, substantially all of our invested assets are managed by AAM and AAME. Our investment policies permit AAM to invest in securities of issuers affiliated with Apollo, including funds managed by Apollo, and to retain on our behalf and at our cost sub-advisors, including Apollo. AAM may make such investments or retain such sub-advisors at its discretion, subject only to the approval of our conflicts committee in certain cases and/or certain regulatory approvals. Accordingly, AAM may have a conflict of interest in managing our investments, including by retaining its affiliate, Apollo, to act as its sub-advisor, which would increase amounts payable by us for investment advisory services or could cause us to receive less return on our investments than if our investment portfolio was managed by another party. In addition, asset management fees are paid based on the amount of our AUM regardless of the results of our operations. Therefore, Apollo could be incentivized to exercise its influence to cause us to increase our AUM, which may have an adverse impact on our financial condition or results of operations.

Certain of our investments are managed by other Apollo affiliates retained as sub-advisors by AAM to manage such investments. Currently, substantially all of the assets subject to sub-advisory arrangements are managed by Apollo affiliates. In addition, we have made investments in collective investment vehicles managed by Apollo affiliates, including seed investments in new investment vehicles or investment strategies offered by Apollo which have limited track records, as well as junior and subordinated tranches of structured investment vehicles which may assist Apollo in meeting certain regulatory requirements applicable to Apollo as the sponsor of such vehicles. Such Apollo affiliates charge us a sub-advisory fee, or charge such vehicles management fees, that independently, or when taken together with the fees charged by AAM, may not be the lowest fee available for similar sub-advisory or investment management services offered by unrelated managers. In addition, it is possible that such unrelated managers may perform better than the Apollo affiliates retained by AAM as sub-advisors or which manage such collective investment funds. Apollo is not obligated to devote any specific amount of time to the affairs of our company, or to the funds in which we are invested and we have limited rights to terminate any IMA or sub-advisory arrangement. Affiliates of Apollo manage and expect to continue to manage other client accounts, some of which have objectives similar to ours, including collective investment vehicles managed by Apollo and in which Apollo may have an equity interest. We will compete with other Apollo clients not only in terms of time spent on management of our portfolio, but also for allocation of assets that do not have significant supply. In addition, there may be different investment teams for AAM and Apollo investing in the same strategies for different clients, including us. As a result, we may compete with other Apollo clients for the same investment opportunities, potentially disadvantaging us. Apollo may also manage accounts whose advisory fee schedules, investment objectives and policies differ from ours, which may cause Apollo to allocate securities in a manner that may have an adverse effect on our ability to source appropriate assets and meet our strategic objectives. In addition, where AAM has retained an Apollo affiliate as our sub-advisor, it is possible that due to the fees charged by such sub-advisor in addition to the AAM fees that we pay, we may either experience a reduced return on an investment or may forego purchasing an investment that we would have purchased if such investment opportunity were sourced directly by AAM.

Item 1A. Risk Factors

From time to time, AAM or Apollo may acquire investments on our behalf which are senior or junior to other instruments of the same issuer that are held by, or acquired for, another AAM or Apollo client (for example, we may acquire junior debt while another Apollo client may acquire senior debt). In the event such an issuer enters bankruptcy or becomes otherwise insolvent, the client holding securities which are senior in preference may have the right to aggressively pursue the issuer's assets to fully satisfy the issuer's indebtedness to the client, and the client holding the investment which is junior in the capital structure may not have access to sufficient assets of the issuer to completely satisfy its claim against the issuer and may suffer a loss. AAM and Apollo have adopted procedures that are designed to enable AAM and Apollo to address such conflicts and to ensure that clients are treated fairly and equitably in these situations. However, given AAM's or Apollo's fiduciary obligations to the other client, AAM and Apollo may be unable to manage our investment in the same manner as would have been possible without the conflict of interest. In such event, we may receive less return on such investment than if another AAM or Apollo client was not in a different part of the capital structure of the issuer.

Apollo and its affiliates have diverse and expansive private equity, credit and real estate investment platforms, investing in numerous companies across many industries. If Apollo acquires or forms a company with a business strategy competing with ours, additional conflicts may arise between us and Apollo or between us and such company in executing our plans, including with respect to the allocation of investments or the ability to execute on corporate opportunities. Our bye-laws provide that Apollo and its members and affiliates (including certain of our directors) generally have no duty to refrain from engaging, directly or indirectly, in the same or similar business activities or lines of business that we do.

Apollo and its affiliates regularly obtain material non-public information regarding various potential acquisition or trading targets. When Apollo and its affiliates obtain material non-public information regarding a potential acquisition or trading target, AAM and Apollo become restricted from trading such acquisition or trading target's outstanding securities. Some of such securities may be potential investment opportunities for us, or may be owned by us and be potential disposition opportunities. The inability of AAM or Apollo to purchase or sell such investments on our behalf as a result of these restrictions may result in us acquiring investments that may otherwise underperform the restricted investments that AAM or Apollo would have acquired, or incurring losses on investments that AAM or Apollo would have sold, on our behalf, had such restrictions not been in place.

Certain of AAM's executives and employees have incentive compensation tied to our financial performance. This compensation arrangement may incentivize such executives and employees to invest in riskier assets in an attempt to achieve higher returns.

James R. Belardi, our Chief Executive Officer, also serves as Chief Executive Officer of AAM, owns a profits interest in the equity of AAM and receives compensation from AAM for services he provides to AAM. Accordingly, his involvement as a member of our board of directors and management team and as an officer and director of AAM may lead to a conflict of interest. Furthermore, certain members of our board of directors also serve on the board of directors of AAM or are employees of Apollo or its affiliates, which could also lead to potential conflicts of interest. See *Item 13. Certain Relationships and Related Transactions, and Director Independence.*

Our bye-laws contain provisions that cause a holder of Class A common shares to lose the right to vote the shares if the holder owns an equity interest in Apollo, AP Alternative Assets, L.P. (AAA) or certain other entities.

Our bye-laws contain provisions that impose restrictions on certain Class A common shares in order to reduce the likelihood that U.S. persons that directly or indirectly own our common shares will experience adverse tax consequences attributable to RPII. These provisions could cause a holder to lose the right to vote its Class A common shares if the holder or one of its affiliates owns (or is treated as owning) any equity interests (or instruments treated as equity interests) in Apollo or AAA, if the holder or one of its affiliates owns (or is treated as owning) any of our Class B common shares or if the holder or one of its affiliates is a member of the Apollo Group. These restrictions do not affect the transferability of Class A common shares and do not apply unless the holder or one of its affiliates meets one of these conditions.

Investors may experience dilution in the future.

We have issued restricted Class M common shares to certain of our employees and to employees of AAM which enable them, upon meeting certain vesting criteria, to acquire Class A common shares at prices below the NYSE trading price of our Class A common shares. To the extent the outstanding restricted Class M common shares are ultimately exercised and/or to the extent we issue additional equity in the future, there may be dilution to investors.

Item 1A. Risk Factors

Our bye-laws contain provisions that could discourage takeovers and business combinations that our shareholders might consider in their best interests, including provisions that prevent a holder of Class A common shares from having a significant stake in Athene.

Our bye-laws include certain provisions that could have the effect of delaying, deferring, preventing or rendering more difficult a change of control that holders of our Class A common shares might consider in their best interests. For example, our bye-laws prohibit holders of our Class A common shares and certain other classes of our common shares (other than those owned by the Apollo Group) from having more than 9.9% of the total voting power of our common shares. Subject to certain exceptions determined by our board on the basis set forth in our bye-laws, the votes attributable to a holder of Class A common shares above 9.9% of the total voting power of our common shares are redistributed to other holders of Class A common shares *pro rata* based on the then current voting power of each holder. Such adjustments are likely to result in a shareholder having voting rights in excess of its *pro rata* share of the voting power of our Class A common shares. Therefore, a shareholder's voting rights may increase above 5% of the aggregate voting power of the outstanding common shares, thereby possibly resulting in the shareholder becoming a reporting person subject to Schedule 13D or 13G filing requirements under the Securities Exchange Act of 1934, as amended (Exchange Act). These requirements could discourage any potential investment in our Class A common shares. In addition, our board is classified into three classes of directors, with directors of each class serving staggered three-year terms. Any change in the number of directors is required by our bye-laws to be apportioned among the classes so as to maintain the number of directors in each class as nearly equal as possible, and any additional director of any class elected to fill a vacancy resulting from an increase in such class or from the removal of a director will hold such directorship for a term that coincides with the remaining term of that class. Moreover, our bye-laws require specific advance notice procedures and other protocols for holders of common shares to make shareholder proposals and nominate directors. Among other requirements, a shareholder must meet the minimum requirements for eligible shareholders to submit shareholder proposals under Rule 14a-8 of the Exchange Act, and submit specific information and make specific undertakings in relation to the shareholder proposal or director nomination.

Any or all of these provisions could prevent holders of our Class A common shares from receiving the benefit from any premium to the market price of our Class A common shares offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of any of these provisions could adversely affect the prevailing market price of our Class A common shares if they were viewed as discouraging takeover attempts in the future.

AHL is a holding company with limited operations of its own. As a consequence, AHL's ability to pay dividends on its common shares and to make timely payments on its debt obligations will depend on the ability of its subsidiaries to make distributions or other payments to it, which may be restricted by law.

AHL is a holding company with limited business operations of its own. AHL's primary subsidiaries are insurance and reinsurance companies that own substantially all of its assets and conduct substantially all of its operations. Accordingly, AHL's payment of dividends and ability to make timely payments on its debt obligations is dependent, to a significant extent, on the generation of cash flow by its subsidiaries and their ability to make such cash or other assets available to it, by dividend or otherwise. Dividends or distributions that may be paid by AHL's insurance subsidiaries to it are limited or restricted by applicable insurance or other laws that are based in part on the prior year's statutory income and surplus, or other sources. See *Risks Relating to Insurance and Other Regulatory Matters.* AHL's subsidiaries may not be able to, or may not be permitted to, make distributions to enable AHL to meet its obligations and pay dividends. In particular, as a condition to the New York State Department of Financial Services' (NYSDFS) approval of our acquisition of ALICNY in connection with the broader Aviva USA acquisition, we have agreed not to cause ALICNY to declare, distribute or pay any dividend for five years from the date of acquisition of control of ALICNY without the prior written consent of the NYSDFS, which period expires on October 2, 2018. Similarly, as a condition to the approval of the Iowa Insurance Division (IID) of our acquisition of Aviva USA's Iowa-domiciled subsidiaries, we have agreed not to cause AAIA to pay any dividend or other distribution to shareholders for five years, which period expires on August 15, 2018, without the prior approval of the IID. Further, any dividends paid to AHL by its U.S. subsidiaries would be subject to a 30% withholding tax under the Internal Revenue Code, which creates a significant disincentive for AHL's subsidiaries to pay such dividends and could have the effect of significantly reducing dividends or other amounts payable to AHL by its U.S. subsidiaries. These limitations on AHL's U.S. subsidiaries' abilities to pay dividends to it as a shareholder may negatively impact its financial condition, results of operations and cash flows.

Each subsidiary is a distinct legal entity and legal and contractual restrictions may also limit AHL's ability to obtain cash from its subsidiaries. In addition to the specific restrictions described above, AHL's subsidiaries, as members of its insurance holding company system, are subject to various statutory and regulatory restrictions on their ability to pay dividends to AHL, as further described in *Item 1. Business*.

AHL may in the future incur indebtedness in order to pay dividends to shareholders. If AHL did determine to incur additional indebtedness in order to pay dividends, such dividends would be subject to the terms of AHL's existing indebtedness as well as any credit agreement that AHL may enter into in the future. AHL does not currently anticipate paying any regular cash dividends on its common shares. Any decision to declare and pay dividends in the future will be made at the discretion of AHL's board of directors and will depend on, among other things, AHL's results of operations, financial condition, cash requirements, contractual restrictions and other factors that AHL's board of directors may deem relevant. Therefore, any return on investment in AHL's common stock may be solely dependent upon the appreciation of the price of AHL's common stock on the open market, which may not occur.

Item 1A. Risk Factors

Fulfilling our obligations with respect to the requirements of and related rules under the Sarbanes-Oxley Act of 2002 will be expensive and time-consuming, and any delays or difficulties in satisfying these obligations could have a material adverse effect on our future results of operations and our share price.

We completed the IPO for our Class A common shares in December 2016. Following the transition period established by the rules of the Securities and Exchange Commission for newly public companies, the Sarbanes-Oxley Act of 2002 will require us to document and test the effectiveness of our internal control over financial reporting in accordance with an established internal control framework, and to report on our conclusions as to the effectiveness of our internal controls. Likewise, our independent registered public accounting firm will be required to provide an attestation report on the effectiveness of our internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act of 2002, starting with the filing of our annual report on Form 10-K for the year ended December 31, 2017. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations. If we are unable to conclude that we have effective internal control over financial reporting, investors could lose confidence in the reliability of our financial statements. This could result in a decrease in the value of our common shares. Failure to comply with the Sarbanes-Oxley Act of 2002 could potentially subject us to sanctions or investigations by the SEC, the NYSE or other regulatory authorities.

Holders of our shares may have difficulty effecting service of process on us or enforcing judgments against us in the United States.

AHL is incorporated pursuant to the laws of Bermuda and is domiciled in Bermuda. In addition, certain of our directors and officers reside outside the United States, and a substantial portion of our assets are located in jurisdictions outside the United States. As such, we have been advised that there is doubt as to whether:

- a holder of our shares would be able to enforce, in the courts of Bermuda, judgments of U.S. courts against us or against persons who reside in Bermuda based upon the civil liability provisions of the U.S. federal securities laws; or
- a holder of our shares would be able to bring an original action in the Bermuda courts to enforce liabilities against us or our directors and officers who reside outside the United States based solely upon U.S. federal securities laws.

Further, we have been advised that there is no treaty in effect between the United States and Bermuda providing for the enforcement of judgments of U.S. courts, and there are grounds upon which Bermuda courts may not enforce judgments of U.S. courts. Because judgments of U.S. courts are not automatically enforceable in Bermuda, it may be difficult for you to recover against us based upon such judgments. Additionally, we have been advised that the United States and Bermuda do not currently have a treaty providing for reciprocal recognition and enforcement of judgments in civil and commercial matters. A Bermuda court may, however, impose civil liability on us or our directors or officers in a suit brought in the Supreme Court of Bermuda provided that the facts alleged constitute or give rise to a cause of action under Bermuda law. Certain remedies available under the laws of U.S. jurisdictions, including certain remedies under the U.S. federal securities laws, would not be allowed in Bermuda courts to the extent that they are contrary to public policy.

Our choice of forum provisions in our bye-laws may limit your ability to bring suits against us or our directors and officers.

Our bye-laws currently provide that if any dispute arises concerning the Companies Act or out of or in connection with our bye-laws, including any question regarding the existence and scope of any bye-law and/or whether there has been a breach of the Companies Act or our bye-laws by an officer or director (whether or not such a claim is brought in the name of a shareholder or in the name of the Company), any such dispute shall be subject to the exclusive jurisdiction of the Supreme Court of Bermuda. This choice of forum provision may limit a shareholder’s ability to bring a claim in a judicial forum that the shareholder believes is favorable for disputes with us or our directors or officers, which may discourage lawsuits against us and our directors and officers. Alternatively, if a court were to find this provision of our bye-laws inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business and financial condition.

U.S. persons who own our shares may have more difficulty in protecting their interests than U.S. persons who are shareholders of a U.S. corporation.

The Companies Act, which applies to AHL, differs in certain material respects from laws generally applicable to U.S. corporations and their shareholders. Set forth below is a summary of certain significant provisions of the Companies Act and our bye-laws which differ in certain respects from provisions of Delaware corporate law. Because the following statements are summaries, they do not discuss all aspects of Bermuda law that may be relevant to us and our shareholders.

Interested Directors

Bermuda law provides that we cannot void any transaction we enter into in which a director has an interest, nor can such director be liable to us for any profit realized pursuant to such transaction, provided the nature of the interest is disclosed at the first opportunity at a meeting of directors, or in writing, to the directors. Under Delaware law such transaction would not be voidable if:

- the material facts as to such interested director’s relationship or interests were disclosed or were known to the board of directors and the board of directors had in good faith authorized the transaction by the affirmative vote of a majority of the disinterested directors;

- such material facts were disclosed or were known to the shareholders entitled to vote on such transaction and the transaction was specifically approved in good faith by vote of the majority of shares entitled to vote thereon; or
- the transaction was fair to the corporation as of the time it was authorized, approved or ratified.

Under Delaware law, the interested director could be held liable for a transaction in which the director derived an improper personal benefit.

Shareholders' Suits

The rights of shareholders under Bermuda law are not as extensive as the rights of shareholders in many U.S. jurisdictions. Class actions and derivative actions are generally not available to shareholders under the laws of Bermuda. However, the Bermuda courts ordinarily would be expected to follow English case law precedent, which would permit a shareholder to commence an action in the name of the company to remedy a wrong done to the company where an act is alleged to be beyond the corporate power of the company, is illegal or would result in the violation of our memorandum of association or bye-laws. Furthermore, a court would consider acts that are alleged to constitute a fraud against the minority shareholders or acts requiring the approval of a greater percentage of our shareholders than actually approved it. The winning party in such an action generally would be able to recover a portion of attorneys' fees incurred in connection with such action. Class actions and derivative actions generally are available to shareholders under Delaware law for, among other things, breach of fiduciary duty, corporate waste and actions not taken in accordance with applicable law. In such actions, the court has discretion to permit the winning party to recover attorneys' fees incurred in connection with such action.

Indemnification of Directors

We have entered into indemnification agreements with our directors and officers which provide that we will indemnify our directors and officers or any person appointed to any committee by the board of directors acting in their capacity as such for any loss arising or liability attaching to them by virtue of any rule of law in respect of any negligence, default, breach of duty or breach of trust of which such person may be guilty in relation to Athene other than in respect of his own fraud or dishonesty. However, we are required to indemnify our directors and officers in any proceeding in which they are successful. The indemnification agreements are limited to those payments that are lawful under Bermuda law.
Furthermore, pursuant to our bye-laws, our shareholders have agreed to waive any claim or right of action such shareholder may have, whether individually or by or in right of AHL, against any director or officer of AHL on account of any action taken by such director or officer, or the failure of such director or officer to take any action in the performance of his or her duties with or for AHL or any subsidiary of AHL; provided that such waiver does not extend to any matter in respect of any fraud or dishonesty which may attach to such director or officer.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We own our headquarters for U.S. operations, which is located in West Des Moines, IA. We lease our head office for Bermuda operations, which is located in Pembroke, Bermuda, and we lease our office for our German operations, which is located in Wiesbaden, Germany. Our Retirement Services segment includes our Iowa and Bermuda offices, whereas our German office is included in a non-reportable segment within Corporate and other. We believe that for the foreseeable future our West Des Moines, Bermuda and German properties will be sufficient for us to conduct our current operations.

Item 3. Legal Proceedings

We are subject to litigation arising in the ordinary course of our business, including litigation principally relating to our FIA business. We cannot assure you that our insurance coverage will be adequate to cover all liabilities arising out of such claims. We are not engaged in any legal proceeding that we believe will be material to our business, financial condition, results of operations or cash flows. From time to time, in the ordinary course of business and like others in the insurance and financial services industries, we receive requests for information from government agencies in connection with such agencies' regulatory or investigatory authority. Such requests can include financial or market conduct examinations, subpoenas or demand letters for documents to assist the government in audits or investigations. We and each of our U.S. insurance subsidiaries review such requests and notices and take appropriate action. We have been subject to certain requests for information and investigations in the past and could be subject to them in the future.

For a description of certain legal proceedings affecting us, refer to *Note 18 - Commitments and Contingencies* to the consolidated financial statements.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our Class A common shares began trading on the NYSE under the symbol "ATH" on December 9, 2016.

The following table summarizes high and low closing prices for our Class A common shares on the NYSE for the periods indicated:

	2016			
	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
High	$ -	$ -	$ -	$ 47.99
Low	$ -	$ -	$ -	$ 44.05

Shareholders

As of March 1, 2017, there were 77,410,448 Class A common shares outstanding and held of record by 311 shareholders, 111,852,897 Class B common shares outstanding and held of record by 17 shareholders, 3,445,767 Class M-1 common shares outstanding and held of record by 5 shareholders, 1,005,625 Class M-2 common shares outstanding and held of record by 12 shareholders, 1,293,200 Class M-3 common shares are outstanding and held of record by 24 shareholders, and 5,348,992 Class M-4 common shares outstanding and held of record by 119 shareholders.

Dividends

We do not currently pay dividends on any of our common shares and we currently intend to retain all available funds and any future earnings for use in the operation of our business. We may, however, pay cash dividends on our common shares, including our Class A common shares, in the future. Any future determination to pay dividends will be made at the discretion of our board of directors and will depend upon many factors, including our financial condition, earnings, legal and regulatory requirements, restrictions in our debt agreements and other factors our board of directors deems relevant. While we do not currently have any preference shares, if we issue such shares in the future, our board of directors may declare and pay a dividend on one or more classes of shares to the extent one or more classes of shares ranks senior to or has a priority over another class of shares. Our ability to pay dividends on our Class A common shares is limited by the terms of our existing indebtedness and may be restricted by the terms of any future credit agreement or any future debt or preferred securities of ours or of our subsidiaries. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources* and *Note 10 - Debt* of the consolidated financial statements for further discussion.

Furthermore, AHL is a holding company and has no direct operations. All of AHL's business operations are conducted through its subsidiaries. Any dividends AHL pays will depend upon its funds legally available for distribution, including dividends from its subsidiaries. AHL's U.S. insurance subsidiaries are highly regulated and are required to comply with various conditions before they are able to pay dividends or make distributions to AHL. See *Item 1. Business-Regulation* and *Note 16 - Statutory Requirements* of the consolidated financial statements for further discussion. In addition, any dividends payable to AHL by its U.S. insurance subsidiaries, if permitted, would be subject to a 30% withholding tax.

Securities Authorized for Issuance under Equity Compensation Plans

See *Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters* for information regarding our equity compensation plans.

Recent Sales of Unregistered Securities

During the year ended December 31, 2016, we issued the following unregistered equity instruments to our employees and employees of AAM in connection with our equity and long-term incentive plans: 104,758 Class A common shares, 990,650 Class M-4 and M-4 Prime common shares convertible to our Class A common shares at a weighted average conversion price of $33.78 per share, 28,250 restricted stock units (RSUs) at a weighted average conversion price of $28.74 per share, and 470,644 options at a weighted average exercise price of $33.95 per share.

During the year ended December 31, 2016, we issued 3,065,461 unregistered Class A common shares upon the conversion of equity instruments initially issued to our employees and employees of AAM in connection with our equity and long-term incentive plans.

During the year ended December 31, 2016, we issued 129,985 unregistered Class A common shares to members of our board of directors as compensation for their board service.

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

On March 14, 2016, we issued and sold an aggregate of 20,750 Class M-4 Prime common shares with a conversion price of $28.26 per share and 2,500 Class M-4 Prime RSUs with a conversion price of $28.26 per share to AAM for approximately $217,466.

During the year ended December 31, 2016, we also issued and sold to certain of our employees fully-paid unregistered Class A common shares as follows: (1) on February 19, 2016, approximately 23,000 shares for approximately $650,000 and (2) on August 16, 2016, 4,120 shares for approximately $150,000.

No underwriters were involved in the foregoing sales of securities.

The sales and issuances of shares described above were effected in reliance on the exemptions for sales of securities not involving a public offering, as set forth in Rule 506 promulgated under the Securities Act and in Section 4(a)(2) of the Securities Act, based on the following: (1) the investors confirmed to us that they were either “accredited investors,” as defined in Rule 501 of Regulation D promulgated under the Securities Act or had such background, education and experience in financial and business matters as to be able to evaluate the merits and risks of an investment in the securities; (2) the investors acknowledged that all securities being purchased were “restricted securities” for purposes of the Securities Act, and agreed to transfer such securities only in a transaction registered under the Securities Act or exempt from registration under the Securities Act; and (3) a legend was placed on the certificates representing each such security stating that it was restricted and could only be transferred if subsequently registered under the Securities Act or transferred in a transaction exempt from registration under the Securities Act.

Issuer Purchases of Securities

Purchases of common stock made by or on behalf of us or our affiliates during the three months ended December 31, 2016 are set forth below:

Period	(a) Total number of shares purchased	(b) Average price paid per share	(c) Total number of shares purchased as part of publicly announced programs[1]	(d) Maximum number (or approximate dollar value) of shares that may yet be purchased under the plans or programs[1]
October 1 - October 31, 2016[2]	261,194	$ 19.01	-	$ -
November 1 - November 30, 2016	-	$ -	-	$ -
December 1 - December 31, 2016[3]	3,776	$ 40.00	-	$ -

[1] *As of December 31, 2016, our Board of Directors had not authorized any purchases of common stock in connection with a publicly announced plan or program.*

[2] *Purchases relate to Class A common shares purchased from employees upon the occurrence of a termination event.*

[3] *Purchases relate to shares withheld (under the terms of employee stock compensation plans) to offset tax withholding obligations that occur upon the delivery of outstanding shares underlying restricted stock units or upon the exercise of stock options.*

Item 6. Selected Financial Data

The following tables set forth our selected historical consolidated financial and operating data, which should be read in conjunction with *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* and *Item 8. Financial Statements and Supplementary Data*. The information has been derived from our historical consolidated financial statements. Our historical results are not necessarily indicative of future operating results.

	Years ended December 31,				
(In millions, except percentages, share, and per share data)	**2016**[1]	**2015**[1,2]	**2014**	**2013**[2]	**2012**[2]

Item 6. Selected Financial Data

Non-GAAP Measures-In addition to our results presented in accordance with GAAP, our results of operations include certain non-GAAP measures commonly used in our industry. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides a better understanding of our results of operations and the underlying profitability drivers of our business. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Key Operating and Non-GAAP Measures* for additional discussions regarding non-GAAP measures.

The following are reconciliations of operating income, net of tax, weighted average shares outstanding - operating diluted Class A common shares and operating income, net of tax - per operating diluted Class A common share to their corresponding GAAP measures, net income available to AHL shareholders, basic weighted average shares outstanding - Class A common shares and basic earnings per share - Class A common shares, respectively:

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the *Forward-Looking Statements, Item 1A. Risk Factors, Item 6. Selected Financial Data, and Item 8. Financial Statements* included within this report.

Overview

We are a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. We generate attractive financial results for our policyholders and shareholders by combining our two core competencies of (1) sourcing long-term, generally illiquid liabilities and (2) investing in a high quality investment portfolio, which takes advantage of the illiquid nature of our liabilities. Our steady and significant base of earnings generates capital that we opportunistically invest across our business to source attractively-priced liabilities and capitalize on opportunities. Our differentiated investment strategy benefits from our strategic relationship with Apollo and its indirect subsidiary, AAM. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services, including investment compliance, tax, legal and risk management support. Our relationship with Apollo and AAM also provides us with access to Apollo’s investment professionals across the world as well as Apollo’s global asset management infrastructure that, as of December 31, 2016, supported more than $191 billion of AUM across a broad array of asset classes. We are led by a highly skilled management team with extensive industry experience. We are based in Bermuda with our U.S. subsidiaries' headquarters located in Iowa.

We began operating in 2009 when the burdens of the financial crisis and resulting capital demands caused many companies to exit the retirement market, creating the need for a well-capitalized company with an experienced management team to fill the void. Taking advantage of this market dislocation, we have been able to acquire substantial blocks of long-duration liabilities and reinvest the related investments to produce profitable returns. We have established a significant base of earnings and as of December 31, 2016, have an expected annual investment margin of 2-3% over the 7.8 year weighted-average life of our deferred annuities, which make up a substantial portion of our reserve liabilities. Even as we have grown to $72.4 billion in investments, including related parties, $71.8 billion in invested assets and $86.7 billion of total assets as of December 31, 2016, we have continued to approach both sides of the balance sheet with an opportunistic mindset because we believe quickly identifying and capitalizing on market dislocations allows us to generate attractive, risk-adjusted returns for our shareholders. Further, our multiple distribution channels support growing origination across market environments and better enable us to achieve continued balance sheet growth while maintaining attractive profitability. We believe that in a typical market environment, we will be able to profitably grow through our organic channels, including retail, flow reinsurance and institutional products. In more challenging market environments, we believe that we will see additional opportunities to grow through our inorganic channels, including acquisitions and block reinsurance, due to market stress during those periods.

As a result of our focus on issuing, reinsuring and acquiring attractively-priced liabilities, our differentiated investment strategy and our significant scale, for the year ended December 31, 2016, in our Retirement Services segment described below, we generated an investment margin on deferred annuities of 2.77% and operating ROE excluding AOCI of 19.1%. We currently maintain what we believe to be high capital ratios for our rating and hold more than $1.5 billion of excess capital, and view this excess as strategic capital available to reinvest into organic and inorganic growth opportunities. Because we hold such strategic capital to implement our opportunistic strategy and to enable us to explore deployment opportunities as they arise, and because we are investing for future growth, our consolidated ROE for the year ended December 31, 2016 was 13.1% and our consolidated operating ROE excluding AOCI was 12.5%.

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other. Retirement Services is comprised of our U.S. and Bermuda operations which issue and reinsure retirement savings products and institutional products. Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products.

We have developed organic and inorganic channels to address the retirement services market and grow our assets and liabilities. By focusing on the retirement services market, we believe that we will benefit from several demographic and economic trends, including the increasing number of retirees in the United States, the lack of tax advantaged alternatives for people trying to save for retirement and expectations of a rising interest rate environment. To date, most of our products sold and acquired have been fixed annuities, which offer people saving for retirement a product that is tax advantaged, has a minimum guaranteed rate of return or minimum cash value and provides protection against investment loss. Our policies often include surrender charges (86% of our deferred annuity products, as of December 31, 2016) or MVAs (73% of our deferred annuity products, as of December 31, 2016), both of which increase persistency and protect our ability to meet our obligations to policyholders. Our organic channels, including retail, flow reinsurance and institutional products, provided deposits of $8.8 billion, $3.9 billion and $2.9 billion for the years ended December 31, 2016, 2015 and 2014, respectively. We believe the 2015 upgrade of our financial strength ratings to A- by each of S&P, Fitch and A.M. Best, as well as our 2016 outlook upgrade to positive by A.M. Best and our recent FIA and MYGA new product launches, have enabled and will continue to enable us to increase penetration in our existing organic channels, and access new markets within our retail channel, such as financial institutions. This increased penetration will allow us to source additional volumes of profitably underwritten liabilities. Our inorganic channels, including acquisitions and block reinsurance, have contributed significantly to our growth. We believe our internal acquisitions team, with support from Apollo, has an industry-leading ability to source, underwrite, and expeditiously close transactions, which makes us a competitive counterparty for acquisition or block reinsurance transactions. The aggregate purchase price of our acquisitions was less than the aggregate statutory book value of the businesses acquired.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We plan to grow organically by expanding our retail, reinsurance and institutional product distribution channels. We believe that we have the right people, infrastructure and scale to position us for continued growth. Within our retail channel we had fixed annuity sales of $5.3 billion, $2.5 billion and $2.5 billion for the years ended December 31, 2016, 2015 and 2014, respectively. We aim to grow our retail channel in the United States by deepening our relationships with our approximately 60 IMOs and approximately 28,000 independent agents. Our strong financial position and capital efficient products allow us to be a dependable partner with IMOs and consistently write new business. We work with our IMOs to develop customized, and at times exclusive, products that help drive sales. We expect our retail channel to continue to benefit from the ratings upgrade in 2015, our improving credit profile and recent product launches. We believe this should support growth in sales at our desired cost of crediting through increased volumes via current IMOs and access to new distribution channels, including small to mid-sized banks and regional broker-dealers. We are implementing the necessary technology platform, hiring and training a specialized sales force, and have created products to capture new potential distribution opportunities. Our reinsurance channel also benefited from the 2015 ratings upgrade. We target reinsurance business consistent with our preferred liability characteristics, and as such, reinsurance provides another opportunistic channel for us to source long-term liabilities with attractive crediting rates. We generated deposits through our flow reinsurance channel of $3.5 billion, $1.1 billion and $349 million for the years ended December 31, 2016, 2015 and 2014, respectively. In addition, after having sold our first funding agreement under our FABN program in 2015 and funding agreements in the aggregate principal amount of $650 million in the first quarter of 2017, we expect to grow this channel over time.

Acquisition Summary Included in Results of Operations

On October 1, 2015, we acquired 100% of the outstanding shares of DLD from Delta Lloyd N.V., an Amsterdam-based financial services provider. As a result of the acquisition, we acquired $5.9 billion of assets and $5.9 billion of liabilities (as of the acquisition date) and began operating in Germany. The impact of this transaction has an effect on the comparability of our historical results. For this reason in particular, historical discussions of changes between periods are not necessarily indicative of future results. To enhance comparability of December 31, 2016, 2015 and 2014 results, we highlight the financial results applicable to the acquisition of DLD where meaningful.

Industry Trends and Competition

Market Conditions

Our business and results of operations are materially affected by conditions in the global capital markets and the economy generally. A general economic slowdown could adversely affect us in the form of changes in consumer behavior and decreases in the returns on and value of our investment portfolio. Concerns over the slow economic recovery, the level of U.S. national debt, currency fluctuations and volatility, the stability of the EU, Brexit and the potential exit of certain other EU members, the rate of growth of China and other Asian economies, unemployment, the availability and cost of credit, the U.S. housing market, inflation levels, low or negative interest rates, energy costs and geopolitical issues have contributed to increased volatility and diminished expectations for the economy and the markets. Declining economic growth rates globally and resultant diverging paths of monetary policy could increase volatility in the credit markets, potentially impacting the availability and cost of credit. Factors such as equity prices, equity market volatility, interest rates, counterparty risks, availability of credit, inflation rates, economic uncertainty, changes in laws or regulations (including laws relating to the financial markets generally or the taxation or regulation of the insurance industry), trade barriers, commodity prices, currency exchange rates and controls and national and international political circumstances (including governmental instability, wars, terrorist acts or security operations) can have a material impact on the value of our investment portfolio and our ability to sell our products. We adjust the structure of our products depending on the economic environment, the behavior of customers and other factors, including mortality rates, morbidity rates, cap rates, rollup rates, annuitization rates and lapse rates, which can vary in response to changes in market conditions. We believe continued economic growth, stable financial markets and a potentially rising interest rate environment may ultimately enhance the attractiveness of our product portfolio. However, we remain exposed to potential slowdowns in economic activity, which could be characterized by rising unemployment, falling interest rates, widening credit spreads and an increase in corporate credit and real estate-related defaults.

Interest Rate Environment

As a retirement services company focused on issuing and reinsuring fixed annuities, we are affected by the monetary policy of the Federal Reserve in the United States as well as other central banks around the world. In spite of the Federal Reserve increasing federal funds rates in December 2015 for the first time in almost a decade and again in December 2016, interest rates in the United States remain lower than historical levels. The lower interest rates in part are due to a number of actions taken in recent years by the Federal Reserve in an effort to stimulate economic activity. Any future increases in federal funds rates are uncertain and will depend on the economic outlook.

Our investment portfolio consists predominantly of fixed maturity investments. See *Consolidated Investment Portfolio*. If prevailing interest rates were to rise, we believe the yield on our new investment purchases would also rise and our investment income from floating rate investments would increase while the value of our existing investments may decline. If prevailing interest rates were to decline, it is likely that the yield on our new investment purchases would decline and our investment income from floating rate investments would decrease while the value of our existing investments may increase. We address interest rate risk through managing the duration of the liabilities we source with assets we acquire and through ALM modeling. We endeavor to limit reinvestment risk related to cash flows by managing our asset portfolio to ensure it provides adequate cash flows to meet our expected policyholder benefit cash flows to within tolerable risk management limits. Our strategy is to achieve sustainable yields that allow us to maintain an attractive investment margin. As part of our investment strategy, we purchase floating rate investments, which we expect will perform well in a rising interest rate environment. Our investment portfolio includes $20.8 billion of floating rate investments, or approximately 29% of our total invested assets as of December 31, 2016. As part of our reinvestment strategy for the investment portfolios of our acquired companies, we generally seek to reinvest assets at yields higher than the related assets being liquidated for reinvestment. We continuously seek to optimize our investment portfolio to achieve favorable returns over the long term.

If prevailing interest rates were to rise, we believe our products would be more attractive to consumers and our sales would likely increase. In periods of prolonged low interest rates, the investment margin earned on deferred annuities may be negatively impacted by reduced investment income and to the extent our ability to reduce policyholder crediting rates are limited by policyholder guarantees in the form of minimum crediting rates. As of December 31, 2016, most of our products were fixed annuities with approximately 35% of our FIAs at the minimum guarantees and approximately 51% of our fixed rate annuities at the minimum crediting rates. As of December 31, 2016, minimum guarantees on all of our deferred annuities, including those with crediting rates already at their minimum guarantees, were, on average, 75 to 85 basis points below the crediting rates on such deferred annuities, allowing us room to reduce rates before reaching the minimum guarantees. The remaining liabilities are associated with immediate annuities, funding agreements or life contracts which have crediting rates or costs that are less sensitive or insensitive to interest rate movements. A significant majority of our products have crediting rates that we may reset annually upon renewal following the expiration of the current guaranteed period. While we have the contractual ability to lower these crediting rates to the guaranteed minimum levels, our willingness to do so may be limited by competitive pressures.

See *Item 7A. Quantitative and Qualitative Disclosures About Market Risk* for more detail on market risk, which includes interest rate and other significant risks and our strategies for managing these risks.

Demographics

Over the next four decades, the retirement-age population is expected to experience unprecedented growth. Technological advances and improvements in healthcare are projected to continue to contribute to increasing average life expectancy, and aging individuals must be prepared to fund retirement periods that will last longer than ever before. Further, many working households in the United States do not have adequate retirement savings. As a tool for addressing the unmet need for retirement planning, we believe that many Americans have begun to look to tax-efficient savings products with low-risk or guaranteed return features and potential equity market upside, particularly as federal, state and local marginal tax rates have increased. Our tax-efficient savings products are well positioned to meet this increasing customer demand. The impact of this growth in demand may be offset to some extent by asset outflows as an increasing percentage of the population begins withdrawing assets to convert their savings into income.

We believe that our strong presence in the FIA market and strength of our relationships with IMOs position us to effectively serve consumers' demand in the rapidly growing retirement savings market. We expect our retail channel to continue to benefit from the ratings upgrade in 2015, our improving credit profile and recent product launches. We believe this should help us to grow sales at our desired cost of crediting through increased volumes via current IMOs and access to new distribution channels, including small to mid-sized banks and regional broker-dealers. We also believe that the 2015 financial strength ratings upgrades and our 2016 outlook upgrade to positive by A.M. Best have enabled and will continue to enable us to increase penetration in our existing organic channels, such as flow reinsurance and the FABN market, while also helping us enter into the pension risk transfer market.

Competition

We operate in highly competitive markets. We face a variety of large and small industry participants, including diversified financial institutions and insurance and reinsurance companies. These companies compete in one form or another for the growing pool of retirement assets driven by a number of external factors such as the continued aging of the population and the reduction in safety nets provided by governments and private employers. In many segments, product differentiation is difficult as product development and life cycles have shortened. In addition, we have experienced pressure on fees as product unbundling and lower cost alternatives have emerged. As a result, scale and the ability to provide value-added services and build long-term relationships are important factors to compete effectively. We believe that our leading presence in the retirement market, diverse range of capabilities and broad distribution network uniquely position us to effectively serve consumers' increasing demand for retirement solutions, particularly in the FIA market.

According to LIMRA, total fixed annuity market sales in the United States were $117.4 billion for the twelve months ended December 31, 2016, a 14.0% increase from the same time period in 2015. This increase was driven by an increase in traditional fixed rate deferred annuities of $7.8 billion, or 25.2%, and an increase in FIA products of $6.4 billion, or 11.7%. In the total fixed annuity market, for the nine months ended September 30, 2016 (the most recent period for which specific market share data is available), we were the 7th largest company based on sales

with a 4.2% market share and $3.8 billion in sales. For the nine months ended September 30, 2015, our market share was 2.6% with sales of $1.9 billion.

FIAs are one of the fastest growing annuity products having grown from $27.3 billion in 2005 to $60.9 billion in sales for the year ended December 31, 2016. According to LIMRA, for the nine months ended September 30, 2016 (the most recent period for which specific market share data is available), we were the 3rd largest provider of FIAs in terms of sales, and our market share for the same period was 6.9% with sales of $3.2 billion. For the nine months ended September 30, 2015, our market share was 4.9% with sales of $1.9 billion.

Regulatory Developments

On April 6, 2016, the DOL issued a new regulation more broadly defining the circumstances under which a person is considered to be a fiduciary by reason of giving investment advice or recommendations to an employee benefit plan or a plan's participants or to IRA holders. In addition to releasing the investment advice regulation, the DOL: (1) issued a new prohibited transaction class exemption titled the "Best Interest Contract Exemption," to be used in connection with the sale of FIAs or variable annuities, and (2) updated the previously prohibited transaction class exemption 84-24, to be used in connection with the sale of traditional fixed rate annuities. On February 3, 2017, the President of the United States issued an executive memorandum directing the DOL to examine the fiduciary rule to determine whether the fiduciary rule has harmed or is likely to cause harm to investors by limiting access to certain retirement products or related financial advice, whether the fiduciary rule has resulted in dislocations in the retirement services industry that may adversely affect investors or retirees, or whether the fiduciary rule is likely to cause increased litigation and increased costs for investors and retirees. In direct response to the memorandum, the acting secretary of the DOL stated that the DOL will consider its legal options to delay the applicability date of the rule in order to comply with the memorandum. The DOL has published a proposed amendment to the fiduciary rule that will delay the applicability date for 60-days to allow the DOL to fully review the rule in light of the executive memorandum. The DOL has provided a 15-day comment period to respond to the proposed delay and it is anticipated it will issue the final rule officially delaying the applicability date in late March 2017. In addition to the 15-day comment period relating to the delay, the DOL has opened a 45-day comment period to collect responses to the questions raised in the executive memorandum. We anticipate a delay, with a possible replacement of the rule that is less burdensome but still requires sales to be in the best interest of clients. However, until the rule is officially delayed, we continue to move forward in preparation for the April 10, 2017 applicability date.

Both the U.S. Congress and President Trump's administration have indicated a desire to reform the Internal Revenue Code. Although the 2016 U.S. House of Representatives Blueprint, "A Better Way" and the tax plans proposed by President Trump during the presidential campaign do not align on all tax reform proposals, substantial proposed changes to the U.S. corporate tax regime include: reduction of the maximum corporate tax rate, repeal of the corporate alternative minimum tax, elimination of net operating loss carryback, immediate expensing of business assets, and elimination of a deduction for net interest expense as well as substantial changes to the international tax system including border tax adjustments, a destination based cash flow tax and moving to a territorial based tax system. A reduction in the corporate tax rate would have a positive impact on the earnings and cash flow of our U.S. companies, but it could also reduce the value of our deferred tax assets. Although it is not known at this time how border tax adjustments will (if enacted) be applied to insurers and reinsurers, it is possible that such adjustments will involve denying a deduction to U.S. insurance companies for reinsurance premium paid to a foreign reinsurer, which would materially increase our overall U.S. tax expense. In addition, it is not yet known whether potential tax reform will include further changes impacting the current tax treatment of insurance companies under the Internal Revenue Code. At this time it is not possible to determine the impact of potential legislative changes on our financial condition and results of operations.

Key Operating and Non-GAAP Measures

In addition to our results presented in accordance with GAAP, our results of operations include certain non-GAAP measures commonly used in our industry. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides a better understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers or likely to re-occur in the foreseeable future, as such items fluctuate from period-to-period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. See *Non-GAAP Measure Reconciliations* for the appropriate reconciliations to the GAAP measures.

Operating Income, Net of Tax

Operating income, net of tax, a commonly used operating measure in the life insurance industry, is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation, and other expenses. Our operating income, net of tax, equals net income available to AHL's shareholders adjusted to eliminate the impact of the following (collectively, the "non-operating adjustments"):

- **Investment Gains (Losses), Net of Offsets-**Investment gains (losses), net of offsets, consist of the realized gains and losses on the sale of AFS securities, the change in assumed modco and funds withheld reinsurance embedded derivatives, unrealized gains and losses, impairments, and other investment gains and losses. Unrealized, impairments and other investment gains and losses are comprised of the fair value adjustments of trading securities (other than CLOs) and investments held under the fair value

option, derivative gains and losses not hedging FIA index credits, and the net OTTI impacts recognized in operations net of the change in AmerUs Closed Block fair value reserve related to the corresponding change in fair value of investments and the change in unit linked reserves related to the corresponding trading securities. Investment gains and losses are net of offsets related to DAC, DSI, and VOBA amortization and changes to GLWB and guaranteed minimum death benefits (GMDB) reserves (together, GLWB and GMDB reserves represent rider reserves) as well as the MVAs associated with surrenders or terminations of contracts.

- **Change in Fair Values of Derivatives and Embedded Derivatives - FIAs, Net of Offsets-**Impacts related to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuate from period-to-period. The index reserve is measured at fair value for the current period and all periods beyond the current policyholder index term. However, the FIA hedging derivatives are purchased to hedge only the current index period. Upon policyholder renewal at the end of the period, new FIA hedging derivatives are purchased to align with the new term. The difference in duration between the FIA hedging derivatives and the index credit reserves creates a timing difference in earnings. This timing difference of the FIA hedging derivatives and index credit reserves is included as a non-operating adjustment, net of offsets related to DAC, DSI, and VOBA amortization and changes to rider reserves.

We primarily hedge with options that align with the index terms of our FIA products (typically 1-2 years). From an economic basis, we believe this is suitable because policyholder accounts are credited with index performance at the end of each index term. However, because the “value of an embedded derivative” in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.

- **Integration, Restructuring, and Other Non-operating Expenses-**Integration, restructuring, and other non-operating expenses consist of restructuring and integration expenses related to mergers and acquisitions as well as certain other expenses which are not part of our core operations or likely to re-occur in the foreseeable future.

- **Stock Compensation Expense-**To date, stock compensation expenses associated with our share incentive plans, excluding our long term incentive plan, are not part of our core operating expenses and fluctuate from time to time due to the structure of our plans.

- **Bargain Purchase Gain-**Bargain purchase gains associated with acquisitions are adjustments to net income as they are not consistent with our core operations.

- **Income Taxes (Expense) Benefit - Non-operating-**The non-operating income tax expense is comprised of the appropriate jurisdiction's tax rate applied to the non-operating adjustments that are subject to income tax.

We consider these non-operating adjustments to be meaningful adjustments to net income available to AHL's shareholders for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is effective in analyzing the trends in our results of operations. Together with net income available to AHL's shareholders, we believe operating income, net of tax, provides a meaningful financial metric that helps investors understand our underlying results and profitability. Operating income, net of tax, should not be used as a substitute for net income available to AHL's shareholders.

ROE Excluding AOCI and Operating ROE Excluding AOCI

ROE excluding AOCI and operating ROE excluding AOCI are non-GAAP measures used to evaluate our financial performance excluding the impacts of AOCI. AOCI fluctuates period-to-period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Once we have reinvested acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Accordingly, we believe using measures which exclude AOCI is more effective in analyzing the trends of our operations. To enhance the ability to analyze these measures across periods, interim periods are annualized. ROE excluding AOCI and operating ROE excluding AOCI should not be used as a substitute for ROE. However, we believe the adjustments to equity are significant to gaining an understanding of our overall results of operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Operating Earnings Per Share - Operating Diluted Class A, Weighted Average Shares Outstanding - Operating Diluted Class A Common Shares and Book Value Per Share Excluding AOCI

Operating earnings per share - operating diluted Class A, weighted average shares outstanding - operating diluted Class A common shares and book value per share excluding AOCI are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe using these measures represent an economic view of our share counts and provide a simplified and consistent view of our outstanding shares. Operating earnings per share - operating diluted Class A is calculated as the operating income, net of tax over the weighted average shares outstanding - operating diluted Class A common shares. Book value per share excluding AOCI is calculated as the ending AHL shareholders' equity excluding AOCI divided by the operating diluted Class A common shares outstanding. Our Class B common shares are economically equivalent to Class A common shares and can be converted to Class A common shares on a one-for-one basis at any time. Our Class M common shares are in the legal form of shares but economically function as options as they are convertible into Class A shares after vesting and settlement of the conversion price. In calculating Class A diluted earnings per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards are not dilutive they are excluded. Weighted average shares outstanding - operating diluted Class A common shares and operating diluted Class A common shares outstanding assume conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards. For December 31, 2015 and prior, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Operating earnings per share - operating diluted Class A, weighted average shares outstanding - operating diluted Class A common shares and book value per share excluding AOCI should not be used as a substitute for basic earnings per share - Class A common shares, basic weighted average shares outstanding - Class A or book value per share. However, we believe the adjustments to the shares and equity are significant to gaining an understanding of our overall results of operations and financial condition.

Retirement Services Net Investment Earned Rate, Cost of Crediting and Investment Margin on Deferred Annuities

Investment margin is a key measurement of the financial health of our Retirement Services core deferred annuities. Investment margin on our deferred annuities is generated from the excess of our net investment earned rate over the cost of crediting to our policyholders. Net investment earned rate is a key measure of investment returns and cost of crediting is a key measure of the policyholder benefits on our deferred annuities.

Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our invested assets divided by the average invested assets for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to arrive at our net investment earned rate add alternative investment gains and losses, gains and losses related to trading securities for CLOs, net VIE impacts (revenues, expenses and noncontrolling interest) and the change in reinsurance embedded derivatives. We include the income and assets supporting our assumed reinsurance by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of reinsurance embedded derivatives. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.

Cost of crediting is the interest credited to the policyholders on our fixed strategies as well as the option costs on the index annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. The interest credited on fixed strategies and option costs on index annuity strategies are divided by the average account value of our deferred annuities. Under GAAP, deposits and withdrawals for fixed indexed and fixed rate annuities are reported as deposit liabilities (or policyholder funds). Our average account values are averaged over the number of quarters in the relevant period to obtain our cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

Net investment earned rate, cost of crediting and investment margin on deferred annuities are non-GAAP measures we use to evaluate the profitability of our core deferred annuities business. Deferred annuities include our fixed rate annuities and FIAs, which account for approximately 80% of our Retirement Services reserve liabilities as of December 31, 2016. We believe measures like net investment earned rate, cost of crediting and investment margin on deferred annuities are effective in analyzing the trends of our core business operations, profitability and pricing discipline. While we believe net investment earned rate, cost of crediting and investment margin on deferred annuities are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income and interest sensitive contract benefits presented under GAAP.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Invested Assets

In managing our business we analyze invested assets, which do not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Invested assets represent the investments that directly back our policyholder liabilities as well as surplus assets. Invested assets is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) the consolidated VIE assets, liabilities and noncontrolling interest and (f) policy loans ceded (which offset the direct policy loans in total investments). Invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Our invested assets are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period.

Reserve Liabilities

In managing our business we also analyze reserve liabilities, which does not correspond to total liabilities as disclosed in our consolidated financial statements and notes thereto. Reserve liabilities represents our policyholder liability obligations net of reinsurance. Reserve liabilities is used to analyze the costs of our liabilities. Reserve liabilities includes (a) the interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverables, excluding policy loans ceded. Reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and therefore we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. The majority of our ceded reinsurance is a result of reinsuring large blocks of life business following acquisitions. For such transactions, GAAP requires the ceded liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction.

Sales

Sales statistics do not correspond to revenues under GAAP, but are used as relevant measures of understanding our business performance. Our sales statistics include fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Results of Operations

The following summarizes the consolidated results of operations:

(In millions, except percentages)	Years ended December 31, 2016	2015	2014
Revenues	$ 4,107	$ 2,616	$ 4,100
Benefits and expenses	3,354	2,024	3,568
Income before income taxes	753	592	532
Income tax expense (benefit)	(52)	14	54
Net income	805	578	478
Less: Net income attributable to noncontrolling interests	-	16	15
Net income available to AHL shareholders	$ 805	$ 562	$ 463
Operating income, net of tax by segment			
Retirement Services	$ 809	$ 769	$ 764
Corporate and Other	(49)	(29)	29
Operating income, net of tax	760	740	793
Non-operating adjustments			
Realized gains (losses) on sale of AFS securities	77	83	199
Unrealized, impairments, and other investment gains (losses)	(56)	(30)	1
Assumed modco and funds withheld reinsurance embedded derivatives	68	(75)	(1)
Offsets to investment gains (losses)	(42)	(34)	(48)
Investment gains (losses), net of offsets	47	(56)	151
Change in fair values of derivatives and embedded derivatives - FIAs, net of offsets	97	(27)	(30)
Integration, restructuring and other non-operating expenses	(22)	(58)	(279)
Stock compensation expense	(79)	(67)	(148)
Income tax (expense) benefit - non-operating	2	30	(24)
Total non-operating adjustments	45	(178)	(330)
Net income available to AHL shareholders	$ 805	$ 562	$ 463
ROE	13.1%	11.3%	12.7%
ROE excluding AOCI	13.3%	11.8%	14.0%
Operating ROE excluding AOCI	12.5%	15.6%	24.0%

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other. See *Results of Operations by Segment* for further detail on the results of the segments.

Year Ended December 31, 2016 Compared to the Year Ended December 31, 2015

In this section, references to 2016 refer to the year ended December 31, 2016 and references to 2015 refer to the year ended December 31, 2015.

Net Income Available to AHL Shareholders

Net income available to AHL shareholders increased by $243 million, or 43%, to $805 million in 2016 from $562 million in 2015. ROE and ROE excluding AOCI increased to 13.1% and 13.3%, respectively, from 11.3% and 11.8% in 2015, respectively, benefiting from the increase in net income available to AHL shareholders. ROE and ROE excluding AOCI were each adversely impacted by our drawing of the remaining $1.1 billion of capital raise proceeds in April 2015, catalyzing a ratings upgrade and providing us with significant excess capital to reinvest into market opportunities. The increase in net income available to AHL shareholders was driven by a strong increase in net investment income, a favorable net change in FIA derivatives, a favorable change in assumed reinsurance embedded derivatives and a release of a deferred tax valuation allowance. The increase in net investment income was primarily driven by higher bond call and mortgage prepayment income, earnings from growth in our investment portfolio reflecting strong growth in deposits, the reinvestment of the Aviva USA acquired investments into higher yielding investments during 2015 and an increase in alternative investment income. The net change in FIA derivatives was primarily driven by the performance of the equity indices to which our FIA policies are linked. The change in assumed reinsurance embedded derivatives was driven by credit spreads tightening in 2016 compared to credit spreads widening in 2015.

These increases were partially offset by an unfavorable change in the rider reserves, an increase in DAC, DSI and VOBA amortization, the change in VIE investment related gains and losses and higher expenses. The unfavorable change in the rider reserves and an increase in DAC, DSI and VOBA amortization were driven by the unfavorable change in unlocking of assumptions of our rider reserves and our DAC, DSI and VOBA assets as well as growth in the FIA block. The VIE investment related gains and losses decrease was attributed to the decline in market value of public equity positions in one of our funds. Expenses were higher primarily attributed to growing our business and expanding our distribution channels.

Operating Income, Net of Tax

Operating income, net of tax increased by $20 million, or 3%, to $760 million in 2016 from $740 million in 2015. Operating ROE excluding AOCI was 12.5%, down from 15.6% in the prior period, as we drew the remaining $1.1 billion of capital raise proceeds in April 2015, catalyzing a ratings upgrade and providing us with significant excess capital to reinvest into market opportunities. The increase in operating income, net of tax was primarily driven by an increase in fixed income and other investment income, an increase in alternative investment income and a tax benefit of $102 million related to the release of a deferred tax valuation allowance. The increase in fixed income and other investment income was due to higher bond call and mortgage prepayment income, earnings from growth in our Retirement Services invested assets of $4.9 billion over the prior period reflecting strong growth in deposits, and the reinvestment of the Aviva USA acquired investments. The increase in alternative investment income was driven by higher credit fund income due to credit spread tightening in 2016 compared to credit spreads widening in 2015 and a $60 million favorable increase in the fair value of certain underlying investments in three of our funds, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments, resulting in $82 million of gains in 2016 compared to $22 million of gains in 2015, which were partially offset by the decline in market value of public equity positions in one of our funds.

These increases were partially offset by an unfavorable change of $182 million attributed to our annual unlocking of assumptions in our rider reserves and our DAC, DSI and VOBA assets, combining for an expense of $158 million in 2016 compared to a benefit of $24 million in 2015. A higher cost of crediting due to higher option costs and a change in the mix of business related to MYGA growth, an increase in DAC and VOBA amortization related to growth in our FIA block of business, an unfavorable change in rider reserves primarily due to higher than expected persistency as well as higher operating expenses attributed to growing our business and expanding our distribution channels, also partially offset the increase in operating income, net of tax.

Our consolidated net investment earned rate was 4.35% in 2016, an increase from 4.24% in 2015, primarily attributed to a strong increase in our fixed income and other investment portfolios driven by higher bond call and mortgage prepayment income and the reinvestment of the Aviva USA acquired investments into higher yielding investments. These increases were partially offset by a decrease of approximately 18 basis points related to the acquisition of DLD which contributed lower net investment earned rates reflecting the different economic environment and the yield adjustments related to purchase accounting. Our alternative investment net investment earned rate was 7.70% in 2016, an increase from 6.16% in 2015, primarily attributed to higher credit fund income and a favorable increase in the fair value of three of our investment funds, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments, partially offset by the decline in market value of public equity positions in one of our funds.

Revenues

Total revenue increased by $1.5 billion to $4.1 billion in 2016 from $2.6 billion in 2015. The increase was driven by favorable changes in investment related gains and losses, an increase in net investment income and an increase in premiums. These increases were partially offset by the unfavorable change in VIE investment related gains and losses.

The change in investment related gains and losses increased by $1.1 billion to $652 million in 2016 from $(430) million in 2015, primarily due to the change in fair value of FIA hedging derivatives, the change in assumed reinsurance embedded derivatives and the change in unrealized gains and losses on trading securities. The change in fair value of FIA hedging derivatives increased by $691 million driven by the performance of the indices upon which our call options are based. The majority of our call options are based on the S&P 500 index which experienced a 9.5% increase in 2016, compared to an 0.7% decrease in 2015. The assumed reinsurance embedded derivatives are based on the change in the fair value of the underlying investments held in modco and funds withheld portfolios (see *Note 3 - Derivative Instruments* to the consolidated financial statements) which increased by $251 million as a result of $141 million of net unrealized gains during the year ended December 31, 2016, primarily due to credit spreads tightening in 2016 compared to credit spreads widening in 2015 as well as significant growth in the flow reinsurance channel. The favorable change in unrealized gains and losses on trading securities was primarily attributed to an increase in AmerUs Closed Block assets of $166 million primarily driven by credit spreads tightening in 2016 compared to credit spreads widening in 2015.

Net investment income increased by $408 million to $2.9 billion in 2016 from $2.5 billion in 2015, primarily driven by a strong increase in fixed income and other investment income, an increase in alternative investment income and the acquisition of DLD in October 2015 contributing $72 million of higher net investment income in 2016 compared to one quarter in 2015. The increase in fixed income and other investment income was driven by higher bond call and mortgage prepayment income of $74 million in 2016 compared to 2015, earnings from growth in our investment portfolio attributed to strong growth in deposits and the reinvestment of the Aviva USA acquired investments into higher yielding strategies. The increase in alternative investment income was primarily driven by higher credit fund income due to credit spread tightening in 2016 compared to compared to credit spreads widening in 2015.

Premiums increased by $45 million to $240 million in 2016 from $195 million in 2015, primarily due to the acquisition of DLD contributing an increase of $113 million of premiums in 2016, compared to one quarter in 2015. The increase was partially offset by a decrease in AmerUs Closed Block premiums as well as a decrease in other life premiums.

The change in VIE investment related gains and losses decreased by $86 million to $(53) million in 2016 from $33 million in 2015, primarily driven by a decline in market value of public equity positions in one of our funds, as the share prices of these public equity positions decreased in 2016 compared to 2015. The decrease was partially offset by a $60 million favorable increase in the fair value of certain underlying investments in three of our consolidated VIEs, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments, resulting in $82 million of gains in 2016 compared to $22 million of gains in 2015.

Benefits and Expenses

Total benefits and expenses increased by $1.4 billion to $3.4 billion in 2016 from $2.0 billion in 2015. The increase was driven by an unfavorable change in interest sensitive contract benefits, an unfavorable increase in future policy and other policy benefits, an increase in DAC, DSI and VOBA amortization and higher policy and other operating expenses.

Interest sensitive contract benefits increased by $603 million to $1.3 billion in 2016 from $690 million in 2015, primarily due to the change in FIA fair value embedded derivatives and higher interest credited to policyholders related to strong growth in deposits and a change in the mix of business related to MYGA growth. The change in FIA fair value embedded derivatives increased by $556 million primarily driven by the performance of the equity indices to which our FIA policies are linked, primarily the S&P 500 index, which experienced a 9.5% increase in 2016, compared to a 0.7% decrease in 2015. Also contributing to the increase was a decrease in the discount rates used in our embedded derivative calculations which increased the FIA embedded derivatives in 2016 compared to an increase in discount rates in 2015 partially offset by a decrease in the credit spread, included in the discount rate determination, following our rating upgrades to A- in the second quarter of 2015.

Future policy and other policy benefits increased by $526 million to $1.0 billion in 2016 from $517 million in 2015, primarily attributable to an unfavorable change in the rider reserves, an increase in the change in AmerUs Closed Block fair value liability, 2015 benefiting from favorable mortality experience and the acquisition of DLD, which increased our benefits by $163 million in 2016 compared to one quarter in 2015. The unfavorable change in rider reserves of $242 million was driven by the unfavorable change of $181 million attributed to our annual unlocking of assumptions. The unlocking impacts in 2016 of $133 million related to a decrease in projected net investment earned rates and lower projected lapse rate assumptions while the 2015 unlocking impacts were favorable by $48 million. The remaining unfavorable change in rider reserves was attributed to an increase in gross profits in 2016 and higher than expected persistency increasing the projected excess benefits, partially offset by favorable equity market performance in 2016 compared to 2015. The increase in the change in AmerUs Closed Block fair value liability of $159 million was primarily driven by the increase in unrealized gains on the underlying investments driven by credit spreads tightening in 2016 compared to credit spreads widening in 2015. We have elected the fair value option to value the AmerUs Closed Block whereby the fair value of liabilities is the sum of the fair value of the assets plus our cost of capital in the AmerUs Closed Block.

DAC, DSI and VOBA amortization increased by $121 million to $344 million in 2016 from $223 million in 2015, primarily attributable to growth in the FIA block increasing our DAC asset, an increase in gross profits in 2016 and the $3 million unfavorable change in unlocking of assumptions of our DAC, DSI and VOBA assets. The unlocking impacts in 2016 of $38 million primarily related to a decrease in projected net investment earned rates partially offset by lower projected lapse rate assumptions while the 2015 unlocking impacts were unfavorable by $35 million.

Policy and other operating expenses increased by $83 million to $615 million in 2016 from $532 million in 2015, primarily attributed to growing our business, expanding our distribution channels, an increase in stock compensation expense, project spend and expenses attributable to our Germany operations. These increases were partially offset by lower integration expenses related to the acquisition of DLD in the prior period.

Taxes

Income tax expense (benefit) decreased by $66 million to $(52) million in 2016 from $14 million in 2015. The decrease was primarily driven by the change in deferred tax valuation allowance of $110 million in 2016 compared to 2015. The decrease in income tax expense was partially offset by an increase in U.S. income subject to U.S. income tax of $67 million, or approximately $23 million of tax based on a 35% U.S. statutory rate, primarily driven by an increase in net investment income and the favorable net change in FIA derivatives. During 2016, we identified a tax plan that, when implemented, will allow us to use a significant portion of the U.S. non-life insurance companies' net operating losses, which are scheduled to expire beginning in 2022, and other deductible temporary differences. As a result, we released $102 million of deferred tax valuation allowance, as it is more likely than not that these attributes will be realized. During 2016, we also released $11 million of deferred tax valuation allowance related to our Germany operations as a result of an increase in future projected income for such operations.

Our effective tax rates were (7)% in 2016 and 2% in 2015. Our effective tax rates may vary year-to-year depending upon the relationship of income and loss subject to tax compared to consolidated income and loss before income taxes.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Year Ended December 31, 2015 Compared to the Year Ended December 31, 2014

In this section, references to 2015 refer to the year ended December 31, 2015, and references to 2014 refer to the year ended December 31, 2014.

Net Income Available to AHL Shareholders

Net income available to AHL shareholders increased by $99 million, or 21%, to $562 million in 2015 from $463 million in 2014. ROE and ROE excluding AOCI declined to 11.3% and 11.8%, respectively, from 12.7% and 14.0% in 2014, respectively, as we drew the remaining $1.1 billion of capital raise proceeds in April 2015, catalyzing a ratings upgrade and providing us with significant excess capital to reinvest into market opportunities. The increase in net income available to AHL shareholders was driven by the reduction of expenses as a result of the termination of the Transaction Advisory Services Agreement (TASA) with Apollo at the end of 2014, strong fixed investment income performance, lower stock compensation expense and lower income tax expense. Net investment income increased by $175 million driven primarily by the reinvestment of Aviva USA acquired investments into higher yielding investments, which continued to increase our net investment earned rates on our fixed income and other investment portfolio (as further discussed in the comparative year section within *Retirement Services*) as well as the income from capital raise proceeds. Stock compensation expense decreased by $81 million primarily due to a $131 million expense in 2014 triggered by amendments to the stock plan and assumption changes which was partially offset by an increase in the valuation of our common share price in 2015.

These increases were partially offset by lower investment gains and losses as well as an increase in the amortization of DAC, DSI and VOBA. Investment gains and losses decreased from elevated levels in 2014, which were primarily due to recognizing gains on investments acquired in the Aviva USA transaction as we reinvested such acquired investments to align with our investment strategy which benefited from a favorable market in 2014. Also contributing to the decline in investment gains and losses was an unfavorable change in assumed reinsurance embedded derivatives driven by market movements in 2015. Amortization of DAC, DSI and VOBA increased primarily due to the unfavorable change in unlocking of assumptions and the growth in the FIA block.

Operating Income, Net of Tax

Operating income, net of tax decreased by $53 million, or 7%, to $740 million in 2015 from $793 million in 2014. Operating ROE excluding AOCI declined to 15.6% from 24.0% in 2014, as we drew the remaining $1.1 billion of capital raise proceeds in April 2015, catalyzing a ratings upgrade and providing us with significant excess capital to reinvest into market opportunities. The decrease in operating income, net of tax was primarily driven by the increase in amortization of DAC, DSI, and VOBA due to the unfavorable unlocking of assumptions and growth in the FIA block. The decreases were partially offset by the favorable increase in net investment income resulting from the reinvestment of Aviva USA acquired investments and income from capital raise proceeds.

Our consolidated net investment earned rate was 4.24% in 2015, down slightly from 4.29% in 2014, attributed to lower alternative investment performance partially offset by an increase in the fixed income and other investment portfolios due to reinvestment of Aviva USA's acquired investments and income from capital raise proceeds. Our alternative investment net investment earned rate was 6.16% in 2015, down from 8.78% in 2014, attributed to market value volatility in public equity positions in one of our funds as well as the widening of credit spreads in 2015. We underwrite alternative investments over the long term, and as such, believe it is appropriate to evaluate their performance over the long term rather than on an annual basis. The average of our alternative investment net investment earned rate over the three year period ending December 31, 2015, was 14.32%, which benefited from strong alternative investment income in 2013 related to the initial public offerings of two underlying investments.

Revenues

Total revenue decreased by $1.5 billion to $2.6 billion in 2015 from $4.1 billion in 2014. The decrease was driven by lower investment related gains and losses as well as a decrease in VIE net investment income. These decreases were partially offset by the favorable increase in net investment income as well as an increase in premiums.

The change in investment related gains and losses decreased by $1.6 billion from elevated levels in 2014, to $(430) million in 2015 from $1.2 billion in 2014, which were primarily due to recognizing gains on investments acquired in the Aviva USA transaction as we reinvested such acquired investments to align with our investment strategy. The change in fair value of FIA hedging derivatives decreased by $1.1 billion driven by the performance of the indices upon which our call options are based. The majority of our call options are based on the S&P 500 index which experienced a 0.7% decrease in 2015, compared to an 11.4% increase in 2014. Unrealized gains and losses on trading securities related to our AmerUs Closed Block investments decreased by $234 million primarily driven by the widening of credit spreads and an increase in U.S. treasury rates during 2015. The assumed reinsurance embedded derivatives are based on the change in the fair value of the underlying investments held in modco and funds withheld portfolios which decreased by $124 million as a result of net unrealized losses during 2015 primarily due to credit spreads widening and the increase in U.S. treasury rates during 2015. FIA option cost amortization increased by $72 million driven by the higher cost of options acquired to hedge our FIA index credits as well as growth in our FIA block of business. The remaining decrease in investment related gains and losses was primarily due to the reinvestment of the investments acquired in the Aviva USA acquisition producing gains in 2014 when the market was favorable.

VIE net investment income decreased by $107 million to $67 million in 2015 from $174 million in 2014, which is primarily attributable to the deconsolidation of MidCap Financial at the beginning of 2015. At that time, we contributed our ownership interest in MidCap Financial to MidCap, and with significant ownership by other investors in MidCap, the activities of MidCap are not considered to be conducted substantially on our behalf.

Net investment income increased by $175 million to $2.5 billion in 2015 from $2.3 billion in 2014, which was primarily driven by the reinvestment of Aviva USA acquired investments into higher yielding strategies and the income contribution from the capital raise proceeds of $1.1 billion in April 2015. Also contributing to the increase in net investment income was the acquisition of DLD in October 2015 contributing $23 million of investment income in the fourth quarter.

Premiums increased by $95 million to $195 million in 2015 from $100 million in 2014, primarily due to the acquisition of DLD contributing $74 million of premiums. The remaining increase was driven by the increase in annuitizations with life contingencies in our Retirement Services segment.

Benefits and Expenses

Total benefits and expenses decreased by $1.6 billion to $2.0 billion in 2015 from $3.6 billion in 2014. The decrease was driven by the change in FIA embedded derivatives, $226 million related to the reduction of expenses as a result of the termination of the TASA with Apollo at the end of 2014, a favorable decrease in future policy benefits and the decrease in consolidated VIE expenses due to the deconsolidation of MidCap Financial. These decreases were partially offset by an increase in DAC, DSI and VOBA amortization.

The change in FIA fair value embedded derivatives, included in our interest sensitive contract benefits, decreased by $1.1 billion compared to 2014 primarily due to the performance of the equity indices to which our FIA policies are linked, primarily the S&P 500 index, which experienced a 0.7% decrease in 2015, compared to a 11.4% increase in 2014. Also contributing to the change was an increase in discount rates used in our embedded derivative calculations compared to 2014, resulting in an overall favorable impact. This was partially offset by unfavorable impacts to our embedded derivatives due to a decrease in the credit spread, included in the discount rate determination, following our rating agency upgrades to an A- rating.

Future policy benefits decreased by $179 million to $517 million in 2015 from $696 million in 2014, primarily attributable to the $236 million decrease in the change in AmerUs Closed Block fair value liability, which was related to unrealized losses on the underlying investments attributable to the decrease in U.S. treasury rates. Additionally, gains recognized from favorable mortality experience contributed to the decrease in future policy benefits which were partially offset by an increase in benefits from the DLD acquisition. The rider reserves change was consistent with 2014 as the increase from equity market performance and higher than expected persistency was offset by favorable unlocking of lapse rate assumptions and the decrease related to changes in FIA embedded derivatives and investment related gains and losses.

Amortization of DAC, DSI and VOBA increased by $100 million to $223 million in 2015 from $123 million in 2014, due to the unfavorable change in unlocking of assumptions of $71 million, the growth in DAC and DSI asset balance from growth in the FIA block, and a slight increase in gross profits during 2015. The unlocking impacts in 2015 increased amortization by $35 million primarily related to a decrease in net investment earned rate projections, while the 2014 impacts decreased amortization by $36 million.

Taxes

Income tax expense decreased by $40 million to $14 million in 2015 from $54 million in 2014. The decrease was mainly attributed to lower investment and derivative income, which decreased U.S. income subject to U.S. income tax by $187 million, or approximately $65 million of tax based on a 35% U.S. statutory rate. This was partially offset by an increase of $3 million of expense related to our German operations as a result of the DLD acquisition. The decrease in income subject to tax was also partially offset by unfavorable provision adjustments of $23 million in 2015 when compared to 2014 related to the change in valuation allowance of $16 million, prior year true-ups of $14 million and other adjustments of $(7) million. The change in valuation allowance was primarily driven by favorable life capital loss carryforwards of $15 million in 2014 as well as the reduction in the allowance against non-life deferred tax assets of $1 million in 2014.

Our effective tax rates were 2% in 2015 and 10% in 2014. Our effective tax rates may vary year-to-year depending upon the relationship of income and loss subject to tax compared to consolidated income and loss before income taxes. The decrease in the effective tax rate was mainly attributed to the decrease in income subject to U.S. income tax, partially offset by the unfavorable provision adjustments noted above.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations by Segment

The following summarizes our operating income, net of tax by segment:

(In millions, except percentages)	Years ended December 31, 2016	2015	2014
Operating income, net of tax by segment			
Retirement Services	$ 809	$ 769	$ 764
Corporate and Other	(49)	(29)	29
Operating income, net of tax	$ 760	$ 740	$ 793
Retirement Services operating ROE excluding AOCI	19.1%	22.7%	32.2%

Retirement Services

Retirement Services is comprised of our United States and Bermuda operations which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure MYGAs, FIAs, traditional one year guarantee fixed deferred annuities, immediate annuities and institutional products from our reinsurance partners. In addition, our FABN program is included in our Retirement Services segment.

Year Ended December 31, 2016 Compared to the Year Ended December 31, 2015

Operating Income, Net of Tax

Operating income, net of tax increased by $40 million, or 5%, to $809 million in 2016, from $769 million in 2015. Operating ROE excluding AOCI was 19.1%, down from 22.7% in the prior period, reflecting the increase in equity allocated to Retirement Services as we increased our capital within Retirement Services which management considered necessary to support the segment's growth and ratings aspirations, partially offset by an increase in operating income. The increase in operating income, net of tax was primarily driven by the increase in net investment income related to higher bond call and mortgage prepayment income, earnings from growth in the segment's invested assets, reinvestment of the Aviva USA acquired investments throughout 2015 and an increase in alternative investment income. Additionally, we recognized a tax benefit of $102 million related to the release of a deferred tax valuation allowance. The increases in operating income, net of tax were partially offset by an unfavorable change of $182 million attributed to our annual unlocking of assumptions in our rider reserves and our DAC, DSI and VOBA assets, an increase in cost of crediting due to a change in the mix of business related to MYGA growth and an increase in option costs, an increase in DAC, DSI and VOBA amortization, the unfavorable change in rider reserves and higher operating expenses of $40 million primarily attributed to growing our business, expanding our distribution channels and project spend.

Net investment income increased $383 million primarily driven by a $286 million increase in fixed income and other investment income attributed to higher bond call and mortgage prepayment income of $74 million in 2016 compared to 2015, earnings from growth in the segment's invested assets of $4.9 billion over prior period reflecting strong growth in deposits and the favorable reinvestment of the Aviva USA acquired investments into higher yielding strategies. Alternative investment income increased $97 million related to higher credit fund income due to credit spread tightening in 2016 compared to credit spreads widening in 2015 and a $41 million favorable increase in the fair value of two of the segment's investment funds, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments, resulting in $52 million of gains in 2016 compared to $11 million of gains in 2015. Additionally, an increase in the value of our equity investment in A-A Mortgage contributed to the higher alternative income.

The change in rider reserves increased by $211 million driven by the unfavorable change of $178 million attributed to our annual unlocking of assumptions. The unlocking impact in 2016 of $126 million related to a decrease in projected net investment earned rates and lower projected lapse rate assumptions while the 2015 unlocking impacts were favorable by $52 million. Additionally, the change in rider reserves increased due to an increase in gross profits in 2016 and higher than expected persistency increasing the projected excess benefits, partially offset by favorable equity market performance in 2016 compared to 2015.

Amortization of DAC, DSI and VOBA increased by $51 million driven by the growth in DAC and DSI asset balance from growth in the FIA block, an increase in gross profits in 2016 and the unfavorable change of $4 million attributed to our annual unlocking of assumptions. The unlocking impact in 2016 of $32 million related to a decrease in projected net investment earned rates partially offset by lower projected lapse rate assumptions while the 2015 unlocking impacts were unfavorable by $28 million.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Investment Margin on Deferred Annuities

	Years ended December 31,	
	2016	2015
Net investment earned rate	4.73%	4.37%
Cost of crediting	1.96%	1.92%
Investment margin on deferred annuities	2.77%	2.45%

Investment margin on deferred annuities increased by 32 basis points to 2.77% in 2016, from 2.45% in 2015. The increase in the investment margin on deferred annuities was driven by the increase in net investment earned rate of 36 basis points, showing strength in our investment portfolio, partially offset by an unfavorable increase in cost of crediting of 4 basis points.

Net investment earned rate increased due to the increase in our fixed income and other investment income as well as an increase in alternative investment income. The fixed income and other net investment earned rate increased throughout 2016, to 4.41% from 4.17% in 2015 primarily driven by higher bond call and mortgage prepayment income and the reinvestment of the Aviva USA acquired investments into higher yielding strategies with a focus on liquidity and complexity risk rather than assuming solely credit risk. Although we were substantially complete with our reinvestment of the Aviva USA acquired investments as of December 31, 2015, our net investment earned rates for 2016 were impacted as we reinvested sizable portions of the portfolio throughout the year. The net investment earned rates continue to reflect impacts of holding approximately 29% of total invested assets in floating rate investments and 2% of invested assets in cash holdings to opportunistically capitalize on market dislocations. The alternative investments net investments earned rate increased to 12.34% in 2016, from 9.40% in 2015 driven by higher credit fund income due to credit spread tightening in 2016 compared to credit spreads widening in 2015 and a favorable increase in the fair value of two of the segment's investment funds related to the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments.

Cost of crediting on deferred annuities increased by 4 basis points to 1.96% in 2016, from 1.92% in 2015. The increase in cost of crediting was driven by a change in the mix of business related to MYGA growth and an increase in option costs on our index annuity strategies. We continue to focus on pricing discipline, managing interest rates credited to policyholders and managing the cost of options to fund the annual index credits on our FIA products.

Year Ended December 31, 2015 Compared to the Year Ended December 31, 2014

Operating Income, Net of Tax

Operating income, net of tax increased by $5 million, or 1%, to $769 million in 2015 from $764 million in 2014. Operating ROE excluding AOCI declined to 22.7% in 2015 from 32.2% in 2014, reflecting the increase in equity allocated to Retirement Services as we increased our capital within Retirement Services which management considered necessary to support the segment's growth and our ratings aspirations. The increase in operating income, net of tax was primarily driven by the increase in net investment income as we continued to reinvest the Aviva USA acquired investments during 2015 as well as an increase in rider charges over the change in rider reserves. The increases in operating income, net of tax were offset by an increase in amortization of DAC, DSI, and VOBA.

Net investment income increased by $89 million primarily driven by a $152 million increase in fixed income and other investment income attributed to the favorable reinvestment of the Aviva USA acquired investments into higher yielding strategies as well as income from investing the capital raise proceeds as a portion was allocated to the Retirement Services segment when increasing our capital to support the segment's growth and our ratings aspirations. Additionally, the volatility in our alternative investment portfolio resulted in a decrease of $56 million primarily due to our credit funds' performance as credit spreads widened in 2015.

The increase in rider charges of $46 million was partially offset by the increase in the change in rider reserves of $22 million. The increase in charges was driven by new product offerings with rider charges. The change in rider reserves was primarily due to the unfavorable equity market performance in 2015 as well as higher than expected persistency increasing projected benefits partially offset by favorable change in unlocking of assumptions of $79 million. The change in unlocking in 2015 decreased rider reserves by $52 million primarily related to favorable updates to lapse assumptions partially offset by a decrease in net investment earned rate projections, while the 2014 impacts increased reserves by $27 million.

Amortization of DAC, DSI and VOBA increased by $107 million primarily due to the unfavorable change in unlocking of assumptions of $64 million, the growth in DAC and DSI asset balance from growth in the FIA block and a slight increase in gross profits during 2015. The unlocking impacts in 2015 increased amortization by $28 million primarily related to a decrease in net investment earned rate projections, while the 2014 impacts decreased amortization by $36 million.

Investment Margin on Deferred Annuities

	Years ended December 31,	
	2015	2014
Net investment earned rate	4.37%	4.26%
Cost of crediting	1.92%	1.94%
Investment margin on deferred annuities	2.45%	2.32%

Investment margin on deferred annuities increased by 13 basis points to 2.45% in 2015 from 2.32% in 2014. The increase in investment margin was driven by the increase in net investment earned rate of 11 basis points, showing strength in our investment portfolio, combined with a favorable decrease in cost of crediting of 2 basis points due to our disciplined pricing platform.

Net investment earned rate increased primarily due to the increase in our fixed income and other investment income partially offset by the decrease in alternative investment income. The fixed income and other net investment earned rate increased throughout 2015 to 4.17% from 4.00% in 2014 as we continued to reinvest the Aviva USA acquired investments under our preferred investment strategies. We reinvested a substantial portion of the investment portfolio acquired in the Aviva USA acquisition to align the acquired investments with our investment strategy of investing in higher yielding assets with an emphasis on liquidity and complexity risk rather than assuming solely credit risk. The reinvestment of the acquired investments contributed to the increase in fixed income and other net investment earned rates of 62 basis points to 4.12% in 2015 from 3.50% (on an annualized basis) for the fourth quarter of 2013 for this block of Aviva USA acquired investments. The net investment earned rates reflect continuing impacts of holding approximately 27% of total invested assets in floating rate investments, 3% of invested assets in cash holdings to opportunistically capitalize on market dislocations, and the yield adjustments from recognition of the higher overall amortized cost basis of the Aviva USA acquired investments as part of purchase accounting lowering yields. The alternative investments net investments earned rate decreased to 9.40% in 2015 from 9.77% in 2014 primarily due to market conditions unfavorably impacting our credit and CMBS funds as credit spreads widened, as well as fund liquidations. These unfavorable impacts were partially offset by the increase in alternative investment income from MidCap during 2015.

Cost of crediting on deferred annuities decreased by 2 basis points to 1.92% in 2015 reflecting continued discipline in pricing, managing interest rates credited to policyholders and managing the cost of options to fund the annual index credits on our FIA products.

Corporate and Other

Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based compensation and intersegment eliminations. In Corporate and Other we also hold capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

Operating Income (Loss), Net of Tax

Operating (loss), net of tax increased by $20 million, or 69%, to $(49) million in 2016, from $(29) million in 2015. The increase in operating (loss), net of tax was driven by lower alternative investment income partially offset by a $9 million increase in Germany's operating income, net of tax. Alternative investment income decreased by $40 million primarily due to decline in market value of public equity positions in one of our funds, as the share prices of these public equity positions decreased in 2016 compared to 2015. Partially offsetting the decrease in alternative investment income was the higher credit fund income, mainly CLOs, as a result of credit spreads tightening in 2016 compared to credit spreads widening in 2015 and a $19 million favorable increase in the fair value of one of our investment funds, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments.

Operating income (loss), net of tax decreased by $58 million, or 200%, to $(29) million in 2015 from $29 million in 2014. The decrease in operating income (loss), net of tax was driven by a decrease in alternative investment income and an increase in expenses. Alternative investment income decreased by $51 million primarily driven by market value volatility in public equity positions in one of our funds reflecting unfavorable market conditions in 2015 as well as unfavorable earnings in CMBS funds impacted by the widening of credit spreads in 2015. The increase in operating expenses was primarily driven by an increase in corporate employee expenses as well as acquisition expenses. Our German operations’ operating income, net of tax, related to the acquisition of DLD partially offset the unfavorable decreases.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Investment Portfolio

We had consolidated investments, including related parties, of $72.4 billion and $64.5 billion as of December 31, 2016 and 2015, respectively. Our investment strategy seeks to achieve sustainable risk-adjusted returns through disciplined managing of investment characteristics with our long-duration liabilities and the diversification of risk. The investment strategies utilized by our investment managers focus primarily on a buy and hold asset allocation strategy that may be adjusted periodically in response to changing market conditions and the nature of our liability profile. The majority of our investment portfolio, excluding investments of our German subsidiary, are managed by AAM, an indirect subsidiary of Apollo founded for the express purpose of managing Athene's portfolio. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence, and certain operational support services, including investment compliance, tax, legal and risk management support. Our relationship with AAM and Apollo allows us to take advantage of our generally illiquid liability profile by identifying investment opportunities with an emphasis on earning incremental yield by taking liquidity and complexity risk rather than assuming solely credit risk. The deep experience of the AAM investment team and Apollo's credit portfolio managers assist us in sourcing and underwriting complex asset classes. AAM has selected a diverse array of corporate bonds and more structured, but highly rated asset classes. We also maintain holdings in floating rate and less rate-sensitive instruments, including CLOs, non-agency RMBS and various types of structured products. In addition to our fixed income portfolio, we opportunistically allocate 5-10% of our portfolio to alternative investments where we primarily focus on fixed income-like, cash flow-based investments.

Our invested assets, which are those which directly back our policyholder liabilities as well as surplus assets (as previously discussed in *Key Operating and Non-GAAP Measures*), were $71.8 billion and $67.0 billion as of December 31, 2016 and 2015, respectively. AAM manages, directly and indirectly, approximately $65.8 billion and AAME sub-advises approximately $4.6 billion, which in the aggregate constitute the vast majority of our investment portfolio as of December 31, 2016, comprising a diversified portfolio of fixed maturity and other securities. Through our relationship with Apollo, AAM has identified unique investment opportunities for us. AAM's knowledge of our funding structure and regulatory requirements allows it to design customized strategies and investments for our portfolio.

Our asset portfolio is managed within the limits and constraints set forth in our Investment and Credit Risk Policy. Under this policy, we set limits on investments in our portfolio by asset class, such as corporate bonds, emerging markets securities, municipal bonds, non-agency RMBS, CMBS, CLOs, commercial mortgage whole loans and mezzanine loans and investment funds. We also set credit risk limits for exposure to a single issuer that vary based on ratings. In addition, our investment portfolio is constrained by its scenario-based capital ratio limit and its stressed liquidity limit.

The following table presents the carrying values of our total investments and investments in related parties:

	December 31,			
	2016		2015	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
AFS securities, at fair value				
Fixed maturity securities	$ 52,033	71.8%	$ 47,816	74.1%
Equity securities	353	0.5%	407	0.6%
Trading securities, at fair value	2,581	3.6%	2,468	3.8%
Mortgage loans, net of allowances	5,470	7.5%	5,500	8.5%
Investment funds	689	1.0%	733	1.1%
Policy loans	602	0.8%	642	1.0%
Funds withheld at interest	6,538	9.0%	3,482	5.4%
Derivative assets	1,370	1.9%	871	1.3%
Real estate	542	0.7%	566	0.9%
Short-term investments	189	0.3%	135	0.2%
Other investments	81	0.1%	83	0.3%
Total investments	70,448	97.2%	62,703	97.2%
Investment in related parties				
AFS securities at fair value				
Fixed maturity securities	335	0.5%	308	0.5%
Equity securities	20	-%	-	-%
Trading securities, at fair value	195	0.3%	217	0.3%
Investment funds	1,198	1.7%	997	1.5%
Other investments	237	0.3%	245	0.4%
Short-term investments	-	-%	55	0.1%
Total related party investments	1,985	2.8%	1,822	2.8%
Total investments, including related party	$ 72,433	100.0%	$ 64,525	100.0%

The increase in our total investments, including related parties, as of December 31, 2016 of $7.9 billion compared to December 31, 2015 was driven by the strong growth in deposits and $1.1 billion of primarily non-agency RMBS purchased from Apollo Commercial Real Estate Finance, Inc. (ARI) in the third quarter of 2016. The strong growth in deposits was attributed to significant flow reinsurance business of $3.5 billion and retail sales of $5.3 billion in 2016, partially offset by withdrawals on our deferred annuities of $4.2 billion. Additionally, unrealized gains on investments during 2016 contributed to the increase in total investments, including related parties, by $1.4 billion, primarily attributed to credit spreads tightening during 2016.

Our investment portfolio consists largely of high quality fixed maturity securities, loans and short-term investments, as well as additional opportunistic holdings in investment funds and other instruments, including a small amount of equity holdings. Fixed maturity securities and loans include publicly issued corporate bonds, government and other sovereign bonds, privately placed corporate bonds and loans, mortgage loans, CMBS, RMBS, CLOs, and other asset-backed securities (ABS).

While the substantial majority of our investment portfolio has been allocated to corporate bonds and structured credit products, a key component of our investment strategy is the opportunistic acquisition of investment funds with attractive risk and return profiles. Our investment fund portfolio consists of funds that employ various strategies including mortgage and real estate funds, credit funds, private equity funds and hedge funds. We currently target investments that are fixed-income-like or income producing and that have embedded downside protection. We also prefer investment funds that have a high degree of co-investment, have a stated maturity value or have reduced volatility versus pure equity. A majority of our investments in traditional private equity investments and hedge funds are a result of the acquisition of Aviva USA, which had existing private equity and hedge fund investment portfolios at the time of acquisition. We also acquired certain investment funds from the AAA Investor (which are classified as private equity investments and consolidated VIEs) as a one-time capital contribution by our largest shareholder in advance of the Aviva USA acquisition. With respect to investment fund portfolios that we receive in these transactions, we actively reinvest these investments in our preferred credit-oriented strategies over time as we liquidate these holdings.

We hold derivatives for economic hedging purposes to reduce our exposure to the cash flow variability of assets and liabilities, equity market risk, interest rate risk, credit risk, and to a lesser extent, foreign exchange risk. Our primary use of derivative instruments relates to providing the income needed to fund the annual indexed credits on our FIA products. We use fixed indexed options primarily to economically hedge FIA products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specific market index.

With respect to derivative positions, we transact with highly rated counterparties, and do not expect the counterparties to fail to meet their obligations under the contracts. We generally use industry standard agreements and annexes with bilateral collateral provisions to further reduce counterparty credit exposure.

AFS Securities

We invest with the intent to hold investments to maturity. In selecting investments we attempt to source investments that match our future cash flow needs. However, we may sell any of our investments in advance of maturity in order to timely satisfy our liabilities as they become due or in order to respond to a change in the credit profile or other characteristics of the particular investment.

AFS fixed maturity securities are carried at fair value on our consolidated balance sheets. Changes in fair value for our AFS portfolio, net of related DAC, DSI and VOBA amortization and the change in rider reserves, are charged or credited to other comprehensive income, net of tax. Declines in fair value that are other than temporary are recorded as realized losses in the consolidated statements of income, net of any applicable non-credit component of the loss, which is recorded as an adjustment to other comprehensive income.

The distribution of our AFS securities, including related parties, by type is as follows:

	December 31, 2016				
(In millions, except percentages)	Cost or Amortized Cost	Unrealized Gain	Unrealized Loss	Fair Value	Percent of Total

[1] *Includes securities within various industry segments including capital goods, basic industry, consumer cyclical, consumer non-cyclical, industrial, and technology.*

The fair value of our total fixed maturity securities, including related parties, was $52.4 billion and $48.1 billion as of December 31, 2016 and 2015, respectively. The increase was driven by the strong growth in deposits attributed to growth in our retail sales in 2016, $1.1 billion of primarily non-agency RMBS purchased in the third quarter of 2016 and unrealized gains on fixed maturity securities during 2016 primarily attributed to credit spreads tightening.

The Securities Valuation Office (SVO) of the NAIC is responsible for the credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for filing on the relevant schedule of the NAIC Financial Statement Blank. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation and/or unit price. Typically, if a security has been rated by an NRSRO, the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC designation	NRSRO equivalent rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC
6	CC and lower

The SVO's loan-backed and structured securities (LBaSS) methodology is focused on determining the risk associated with the recovery of the amortized cost of each security. In contrast, the NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price. The NRSRO rating assumes that the holder is the original purchaser at par whereas the modeled and non-modeled LBaSS ratings are focused on the recovery of current amortized cost. As the NAIC ratings methodology considers our investment and amortized cost, and the likelihood of recovery of that book value as opposed to the likelihood of default of the security, we view the NAIC ratings methodology as the most appropriate way to view our fixed maturity portfolio from a ratings perspective since a large portion of our holdings were purchased at a significant discount to par.

Specific to LBaSS, the SVO has developed a ratings process and provides instruction on both modeled and non-modeled LBaSS. The modeled LBaSS process is specific to the RMBS and CMBS asset classes. In order to establish ratings at the individual security level, the SVO obtains loan-level analysis of each RMBS and CMBS using a selected vendor's proprietary financial model. The SVO ensures that the vendor has extensive internal quality-control processes in place and the SVO conducts its own quality-control checks of the selected vendor's valuation process. The SVO has retained the services of Blackrock to model non-agency RMBS and CMBS owned by U.S. insurers for all years presented. Blackrock provides five prices (breakpoints), based on each U.S. insurer's statutory book value price, to utilize in determining the NAIC designation for each modeled LBaSS. For non-modeled LBaSS (ABS and CLOs) with the initial rating of NAIC 1 or NAIC 6, the rating remains the same through the life of the security. For non-modeled LBaSS with the initial rating of NAIC 2 through NAIC 5, the selected vendors are not utilized and the NAIC designations are set using a standardized table of breakpoints provided by the SVO for application to the insurer's statutory book value price. The NAIC designation determines the associated level of RBC that an insurer is required to hold for modeled LBaSS owned by the insurer. In general, under both the modeled and non-modeled LBaSS processes, the larger the discount to par value, the stronger the NAIC rating the LBaSS will have.

A summary of our AFS fixed maturity securities, including related parties, by NAIC designation (with our German operations applying NRSRO ratings to map to NAIC ratings as noted above) is as follows:

	December 31,					
	2016			2015		
(In millions, except percentages)	Amortized Cost	Fair Value	Percent of Total	Amortized Cost	Fair Value	Percent of Total
NAIC designation						
1	$ 29,477	$ 30,211	57.7%	$ 28,961	$ 29,022	60.3%
2	18,348	18,617	35.5%	16,983	16,696	34.7%
Total investment grade	47,825	48,828	93.2%	45,944	45,718	95.0%
3	2,871	2,812	5.4%	2,358	2,182	4.6%
4	647	622	1.2%	216	194	0.4%
5	87	82	0.2%	23	14	-%

Total below investment grade		9,925	18.9%		8,412	17.5%
Total fixed maturity securities, including related parties	$	52,368	100.0%	$	48,124	100.0%

[1] *Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC rating.*

Consistent with the NAIC Process and Procedures Manual, an NRSRO rating was assigned based on the following criteria: (a) the equivalent S&P rating where the security is rated by one NRSRO; (b) the equivalent S&P rating of the lowest NRSRO when the security is rated by two NRSROs; and (c) the equivalent S&P rating of the second lowest NRSRO if the security is rated by three or more NRSROs. If the lowest two NRSRO ratings are equal, then such rating will be the assigned rating. NRSRO ratings available for the periods presented were S&P, Fitch, Moody's Investor Service (Moody's), DBRS, and Kroll Bond Rating Agency, Inc. (KBRA).

The portion of our AFS fixed maturity portfolio that was considered below investment grade based on NRSRO ratings was 18.9% and 17.5% as of December 31, 2016 and 2015, respectively. The primary driver of the difference in the percentage of securities considered below investment grade by NRSROs as compared to the securities considered below investment grade by the NAIC relates to the difference in ratings methodologies between the NRSRO and NAIC for RMBS due to investments acquired at a discount to par value, as discussed above. The primary driver of the increase in the percentage of NRSRO below investment grade securities and the corresponding increase in NAIC below investment grade securities as of December 31, 2016 from December 31, 2015 was the purchase of $1.1 billion of primarily non-agency RMBS in the third quarter of 2016, many of which were purchased at a discount to par.

As of December 31, 2016 and 2015, the non-rated securities shown above were comprised of 43% and 52%, respectively, of corporate private placement securities for which we have not sought individual ratings from the NRSROs and 44% and 43%, respectively, of RMBS, many of which were acquired at a significant discount to par. We rely on internal analysis of credit risk and ratings assigned by the NAIC. As of December 31, 2016 and 2015, 92% and 93%, respectively, of the non-rated securities were designated NAIC 1 or 2.

Asset-backed Securities - We invest in ABS which are securitized by pools of assets such as consumer loans, student loans, insurance-linked securities, and corporate debt. These holdings were $3.0 billion as of December 31, 2016 and 2015. As of December 31, 2016 and 2015, our ABS portfolio included approximately $2.7 billion (91% of the total) and $2.8 billion (95% of the total), respectively, of securities that are considered investment grade based on NAIC ratings, while approximately $2.5 billion (85% of the total) and $2.6 billion (86% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Collateralized Loan Obligations - We also invest in CLOs which pay principal and interest from cash flows received from underlying corporate loans. These holdings were $5.1 billion and $4.8 billion as of December 31, 2016 and 2015, respectively. As of December 31, 2016 and 2015, our CLO portfolio included approximately $4.2 billion (83% of the total) and $4.1 billion (86% of the total), respectively, of securities that are considered investment grade based on NAIC ratings while approximately $4.2 billion (82% of the total) and $3.9 billion (81% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Commercial Mortgage-backed Securities - A portion of our fixed maturity AFS portfolio is invested in CMBS. CMBS are constructed from pools of commercial mortgages. These holdings were $1.8 billion and $1.7 billion as of December 31, 2016 and 2015, respectively. As of December 31, 2016 and 2015, our CMBS portfolio included approximately $1.8 billion (97% of the total) and $1.7 billion (100% of the total), respectively, of securities that are considered investment grade based on NAIC ratings while approximately $1.1 billion (60% of the total) and $1.0 billion (60% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Residential Mortgage-backed Securities - As part of our core investment strategy, a portion of our fixed maturity AFS portfolio is invested in RMBS. RMBS are securities constructed from pools of residential mortgages and backed by payments from those pools. Excluding limitations on access to lending and other extraordinary economic conditions, prepayments of principal on the underlying loans can be expected to accelerate with decreases in market interest rates and diminish with increases in interest rates. Our investments in RMBS are primarily non-agency RMBS having a significant focus on assets with attractive entry prices, which in general results in investment grade ratings by the NAIC given the likelihood that we ultimately receive principal and interest distributions in an amount at least equal to our cost. These holdings were $9.0 billion and $8.0 billion as of December 31, 2016 and 2015, respectively. The increase as of December 31, 2016 from 2015 was primarily related to $1.1 billion of primarily non-agency RMBS purchased in the third quarter of 2016.

A summary of our AFS RMBS portfolio by NAIC and NRSRO quality ratings is as follows:

	December 31,			
	2016		2015	
(In millions, except percentages)	Fair Value	Percent of Total	Fair Value	Percent of Total
NAIC designation				
1	$ 8,652	96.4%	$ 7,351	91.9%
2	140	1.6%	463	5.8%
Total investment grade	8,792	98.0%	7,814	97.7%
3	96	1.1%	157	2.0%
4	29	0.3%	20	0.3%
5	54	0.6%	1	-%
6	2	-%	3	-%
Total below investment grade	181	2.0%	181	2.3%
Total RMBS	$ 8,973	100.0%	$ 7,995	100.0%
NRSRO rating agency designation				
AAA/AA/A	$ 345	3.8%	$ 315	3.9%
BBB	245	2.7%	227	2.8%
Non-rated[1]	2,638	29.5%	2,366	29.6%
Total investment grade	3,228	36.0%	2,908	36.3%

Total RMBS	$ 8,973	100.0%	$ 7,995	100.0%

[1] *Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC rating.*

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

A significant majority of our RMBS portfolio, 98.0% and 97.7% as of December 31, 2016 and 2015, respectively, was invested in assets considered investment grade by the NAIC, with a NAIC rating of 1 or 2. As NRSRO ratings are focused on the likelihood of recovery of all contractual payments including principal at par, instead of the recovery of the amortized cost, the portion considered investment grade by NRSRO rating agencies of 36.0% and 36.3% as of December 31, 2016 and 2015, respectively, were lower than the NAIC ratings. As we focus on acquiring RMBS assets with attractive entry prices, some of these assets have experienced deterioration in credit quality since their issuance, the vast majority of which we purchased after the deterioration. Many of these securities were acquired at a discount to par value that resulted in a statutory book price that yields an investment grade NAIC rating. As a result of deterioration in credit quality since issuance, these securities are generally considered below investment grade based on NRSRO ratings methodologies. As a result, we have a significant difference in the number of securities considered below investment grade when evaluated under the NRSRO ratings methodologies when compared with the ratings evaluated under the NAIC ratings methodology.

Unrealized Losses

Our investments in fixed maturity securities, including related parties, are reported at fair value with changes in fair value recorded in other comprehensive income. Certain of our fixed maturity securities, including related parties, have experienced declines in fair value that we consider temporary in nature. As of December 31, 2016, our fixed maturity securities, including related parties, had a fair value of approximately $52.4 billion, which was approximately 1.8% above amortized cost of approximately $51.5 billion. As of December 31, 2015, our fixed maturity securities, including related parties, had a fair value of approximately $48.1 billion, which was approximately 0.9% below amortized cost of approximately $48.6 billion. These investments are held to support our product liabilities and we currently have the intent and ability to hold these securities until sale or maturity, and believe the securities will recover the amortized cost basis prior to sale or maturity.

The following tables reflect the unrealized losses on the AFS fixed maturity portfolio, including related parties, by NAIC quality ratings:

	December 31, 2016					
(In millions, except percentages)	Amortized Cost of Securities with Unrealized Loss	Gross Unrealized Loss	Fair Value of Securities with Unrealized Loss	Fair Value to Amortized Cost Ratio	Fair Value of Total AFS Fixed Maturity Securities	Percent of Loss to Total AFS Fair Value NAIC Rating

5	23	(9)	14	60.9%	14	(64.3)%
6	6	(2)	4	66.7%	16	(12.5)%
Total below investment grade	1,986	(236)	1,750	88.1%	2,406	(9.8)%
Total	$ 23,404	$ (1,274)	$ 22,130	94.6%	$ 48,124	(2.6)%

The gross unrealized losses on AFS fixed maturity securities, including related parties, were $636 million and $1.3 billion as of December 31, 2016 and 2015, respectively. The decrease in unrealized losses was driven by credit spreads tightening during 2016 resulting in an increase in unrealized gains, while credit spreads widened during 2015 resulting in higher unrealized losses.

As of December 31, 2016 and 2015, we held $3.6 billion and $3.1 billion, respectively, in energy sector fixed maturity securities, or 7% and 6% of the total fixed maturity securities, respectively, including related parties for each period. The gross unrealized capital losses on these securities were $73 million and $300 million, or 11% and 24% of the total unrealized losses, respectively.

Other-Than-Temporary Impairments

For our OTTI policy and the identification of securities that could potentially have impairments, see *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* and *Note 2 - Investments* to the consolidated financial statements, as well as *Critical Accounting Estimates and Judgments*.

During the year ended December 31, 2016, we recorded $30 million of OTTI losses comprised of $13 million related to state, municipal and political subdivisions, $6 million related to corporate fixed maturities, $6 million related to ABS, $2 million related to RMBS, $2 million related to CLOs and $1 million related to other assets. Of the OTTI losses recognized, $4 million related to the energy sector. During the year ended December 31, 2015, we recorded $30 million of OTTI losses comprised of $20 million related to corporate fixed maturities, $8 million related to state, municipal, and other political subdivisions, $1 million related to RMBS and $1 million related to mortgage loans. Of the OTTI losses recognized, $17 million related to the energy sector. During the year ended December 31, 2014, we recorded $6 million of OTTI losses comprised of $4 million related to corporate fixed maturities and $2 million related to mortgage loans. There were no OTTI losses related to the energy sector for the year ended December 31, 2014. The OTTI losses we have experienced for the years ended December 31, 2016, 2015 and 2014, translate into 4 basis points, 5 basis points and 1 basis point, respectively, of average invested assets.

International Exposure

A portion of our fixed maturity securities are invested in securities with international exposure. As of December 31, 2016 and 2015, 32% and 31%, respectively, of the carrying value of our fixed maturity securities, including related parties was comprised of securities of issuers based outside of the United States and debt securities of foreign governments. These securities are either denominated in U.S. dollars or do not expose us to significant foreign currency risk as a result of foreign currency swap arrangements.

The following table presents our international exposure in our fixed maturity securities portfolio, including related parties, by country or region:

	December 31,					
	2016			2015		
(In millions, except percentages)	Amortized Cost	Fair Value	Percent of Total	Amortized Cost	Fair Value	Percent of Total
Country of risk						
Ireland	$ 510	$ 516	3.1%	$ 553	$ 547	3.7%
Italy	90	92	0.6%	244	250	1.7%
Spain	175	190	1.1%	197	201	1.3%
Total Portugal, Ireland, Italy, Greece and Spain[1]	775	798	4.8%	994	998	6.7%
Other Europe	6,336	6,512	39.2%	6,417	6,442	43.1%
Total Europe	7,111	7,310	44.0%	7,411	7,440	49.8%
Non-U.S. North America	7,185	7,105	42.8%	5,752	5,399	36.1%
Australia & New Zealand	1,283	1,304	7.9%	1,211	1,215	8.1%
Central & South America	456	467	2.8%	385	365	2.4%
Africa & Middle East	164	167	1.0%	133	134	0.9%
Asia/Pacific	216	218	1.3%	388	381	2.5%
Supranational	26	27	0.2%	28	27	0.2%
Total	$ 16,441	$ 16,598	100.0%	$ 15,308	$ 14,961	100.0%

[1] *As of each of December 31, 2016 and 2015, we had no holdings in Portugal or Greece.*

Approximately 89.7% and 92.0% of these securities are investment grade by NAIC designation as of December 31, 2016 and 2015, respectively. As of December 31, 2016, 9% of our fixed maturity securities, including related parties, were invested in CLOs of Cayman Islands issuers (for which underlying investments are largely loans to U.S. issuers), 6% were invested in securities of non-U.S. issuers by our German Group Companies and 17% were invested in other non-U.S. issuers.

Portugal, Ireland, Italy, Greece and Spain continue to represent credit risk as economic conditions in these countries continue to be volatile, especially within the financial and banking sectors. We had $798 million and $998 million as of December 31, 2016 and 2015, respectively, of exposure in these countries. As of December 31, 2016 and 2015, we had $237 million and $547 million, respectively, of exposure to sovereign issuers in Spain, Ireland and Italy as a result of investments acquired in the DLD acquisition.

The effects on our investments in non-U.S. securities as a result of Brexit is unknown at this time, but the effects of Brexit are likely to lead to greater volatility in global financial markets in the near term. As of December 31, 2016, we held United Kingdom and Channel Islands fixed maturity securities of $1.5 billion, or 2.9% of the total fixed maturities including related parties. As of December 31, 2016, these securities were in an unrealized gain position of $21 million. Our investment managers analyze each holding for credit risk by economic and other factors of each country and industry.

Trading Securities

Trading securities, including related parties, were $2.8 billion and $2.7 billion as of December 31, 2016 and 2015, respectively. Trading securities are primarily comprised of AmerUs Closed Block securities for which we have elected the fair value option valuation, CLO equity tranche securities, structured securities with embedded derivatives, and investments which support various reinsurance arrangements.

Mortgage Loans

The following is a summary of our mortgage loan portfolio by collateral type:

	December 31,			
	2016		2015	
(In millions, except percentages)	Net Carrying Value	Percent of Total	Net Carrying Value	Percent of Total
Property type				
Hotels	$ 1,025	18.7%	$ 877	15.9%
Retail	1,135	20.7%	1,230	22.4%
Office building	1,217	22.2%	1,274	23.2%
Industrial	742	13.6%	821	14.9%
Apartment	616	11.3%	907	16.5%
Other commercial [1]	397	7.3%	291	5.3%
Total net mortgage loans	5,132	93.8%	5,400	98.2%
Residential loans	338	6.2%	100	1.8%
Total mortgage loans, net of allowances	$ 5,470	100.0%	$ 5,500	100.0%

[1] *Other commercial loans include investments in nursing homes, parking garages, restaurants, mobile home parks and other commercial properties.*

We invest a portion of our investment portfolio in mortgage loans, which are generally comprised of high quality commercial first lien and mezzanine real estate loans. Our mortgage loan holdings were $5.5 billion as of December 31, 2016 and 2015. This included $1.5 billion and $1.1 billion of mezzanine mortgage loans for the respective periods. We have acquired mortgage loans through acquisitions and reinsurance arrangements, as well as through an active program to invest in new mortgage loans. We invest in mortgage loans on income producing properties including hotels, apartments, retail and office buildings, and other commercial and industrial properties. Loan-to-value ratios at the time of loan approval are generally 75% or less.

Our mortgage loans are primarily stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Amortization of premiums and discounts is recorded using the effective interest method. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income.

It is our policy to cease to accrue interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. As of December 31, 2016, we had $21 million of mortgage loans that were 90 days past due and $20 million in the process of foreclosure. As of December 31, 2015, we had $39 million of mortgage loans that were 90 days past due and $18 million in the process of foreclosure.

See *Note 2 - Investments* to the consolidated financial statements for information regarding valuation allowance for collection loss, impairments, loan-to-value, and debt service coverage.

As of December 31, 2016 and 2015, we recorded OTTI through net income of $0 million and $1 million. Additionally, we have established a general and specific loan valuation allowance of $2 million as of December 31, 2016 and 2015, attributable to loans acquired in connection with the acquisition of Aviva USA.

Investment Funds and Variable Interest Entities

Our investment funds investment strategy primarily focuses on funds with core holdings of credit assets, real assets, real estate, preferred equity and income producing assets. Our investment strategy focuses on sourcing assets with the following characteristics: (1) investments that constitute a direct investment or an investment in a fund with a high degree of co-investment; (2) investments with debt-like characteristics, or alternatively, investments with reduced volatility when compared to pure equity; and (3) investments including some element of downside protection as compared to a pure directional investment. Our current investment funds and VIE holdings are significantly influenced by the contribution of certain investment funds from the AAA Investor (AAA Contribution) as further described in *Note 4 - Variable Interest Entities* to the consolidated financial statements, and investment funds we acquired in the Aviva USA acquisition.

At the time of the AAA Contribution, the contributed assets largely consisted of co-investments with Apollo private equity funds. However, the attributes of the contributed assets have changed significantly since the initial transaction primarily due to the initial public offering of two underlying fund investment holdings. As of December 31, 2016, the assets consisted of $234 million of publicly-traded equity securities, a substantial portion of which is in the process of being liquidated. These public equity securities have resulted in volatility in our statement of income in recent periods. At the end of the third quarter of 2016, Norwegian Cruise Line Holdings Ltd. (NCLH) was distributed from CoInvest VI to NCL Athene, LLC (NCL LLC), whereby the investment is classified as an AFS security with any unrealized gains and losses recognized in AOCI, thereby reducing further volatility in our statement of income from this fund. See *Note 4 - Variable Interest Entities* to the consolidated financial statements for further discussion of NCL LLC.

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary. See *Note 4 - Variable Interest Entities* to the consolidated financial statements for further discussion on our investment funds that meet the criteria for consolidation and the accounting treatment for them.

The following table illustrates our consolidated VIE positions:

	December 31,			
	2016		2015	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
Assets of consolidated VIEs				
Investments				
Available-for-sale securities				
Equity securities	$ 161	17.5%	$ -	-%
Trading securities				
Fixed maturity securities	50	5.4%	722	45.4%
Equity securities	117	12.7%	309	19.4%
Investment funds	573	62.2%	534	33.6%
Cash and cash equivalents	14	1.5%	6	0.4%
Other assets	6	0.7%	20	1.2%
Total assets of consolidated VIEs	$ 921	100.0%	$ 1,591	100.0%
Liabilities of consolidated VIEs				
Borrowings	$ -	-%	$ 500	96.7%
Other liabilities	34	100.0%	17	3.3%
Total liabilities of consolidated VIEs	$ 34	100.0%	$ 517	100.0%

The assets of consolidated VIEs were $921 million and $1.6 billion as of December 31, 2016 and 2015, respectively. The decrease as of December 31, 2016 from 2015 was primarily attributed to the sale of invested assets by CMBS Funds to fully settle the borrowings under their respective repurchase agreements in the fourth quarter of 2016.

The liabilities of consolidated VIEs were $34 million and $517 million as of December 31, 2016 and 2015, respectively. The decrease as of December 31, 2016 from 2015 was primarily attributed to the CMBS Funds fully settling the borrowings under their respective repurchase agreements in the fourth quarter of 2016.

The following table illustrates our investment funds, including related party positions of our non-consolidated VIEs and investment funds owned by consolidated VIEs:

	December 31,			
	2016		2015	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total

Total investment funds - related parties	1,198	48.7%	997	43.9%
Investment funds owned by consolidated VIEs				
Private equity - MidCap[1]	524	21.3%	482	21.3%
Credit funds	38	1.6%	34	1.5%
Mortgage and real assets	11	0.4%	18	0.8%
Total investment funds owned by consolidated VIEs	573	23.3%	534	23.6%
Total investment funds, including related parties and VIEs	$ 2,460	100.0%	$ 2,264	100.0%

[1] *MidCap is an underlying investment of one of our consolidated VIE investment funds.*

Overall, the total investment funds, including related parties and consolidated VIEs, were $2.5 billion and $2.3 billion as of December 31, 2016 and 2015, respectively. See *Note 4 - Variable Interest Entities* to the consolidated financial statements for further discussion regarding how we account for our investment funds. Our investment fund portfolio is subject to a number of market related risks including interest rates and equity market risk. Interest rate risk represents the potential for changes in the investment fund's net asset values resulting from changes in the general level of interest rates. Equity market risk represents potential for changes in the investment fund's net asset values resulting from changes in equity markets or from other external factors which influence equity markets. We actively monitor our exposure to the risks inherent in these investments which could materially and adversely affect our results of operations and financial condition. The interest and equity market risks expose us to potential volatility in our earnings year-over-year related to these investment funds.

Funds Withheld at Interest

Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with modco and funds withheld reinsurance agreements in which we act as the reinsurer. Generally, assets equal to statutory reserves are withheld and legally owned by the ceding company. As of December 31, 2016, the ceding companies holding the assets pursuant to such reinsurance agreements had a financial strength rating of A- or better.

The funds withheld at interest is comprised of the host contract and an embedded derivative. We are subject to the investment performance on the withheld assets with the total return directly impacting the host contract and the embedded derivative. Interest accrues at a risk free rate on the host receivable and is recorded as net investment income in the consolidated statements of income. The change in the embedded derivative in our reinsurance agreements are similar to a total return swap on the income generated by the underlying assets held by the ceding companies and is recorded in investment related gains (losses). Although we do not directly control the underlying investments in the funds withheld at interest, in each instance the ceding company has hired AAM to manage the withheld assets in accordance with our investment guidelines.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following summarizes the underlying investment composition of the funds withheld at interest:

	December 31,			
	2016		2015	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
Fixed maturity securities				
U.S. state, municipal, and political subdivisions	$ 118	1.8%	$ 118	3.4%
Corporate	1,800	27.6%	734	21.1%
CLO	591	9.0%	432	12.4%
ABS	736	11.3%	402	11.5%
CMBS	292	4.5%	132	3.8%
RMBS	1,551	23.7%	672	19.3%
Equity securities	29	0.4%	28	0.8%
Mortgage loans	773	11.8%	469	13.5%
Investment funds	329	5.0%	273	7.8%
Derivative assets	53	0.8%	15	0.4%
Short-term investments	80	1.2%	51	1.5%
Cash and cash equivalents	105	1.6%	162	4.7%
Other assets and liabilities	81	1.3%	(6)	(0.2)%
Total funds withheld at interest	$ 6,538	100.0%	$ 3,482	100.0%

As of December 31, 2016 and 2015, we held $6.5 billion and $3.5 billion of funds withheld at interest receivables, respectively. The increase as of December 31, 2016 from 2015 was primarily due to the strong growth in deposits attributed to a significant increase in flow reinsurance business during 2016.

Approximately 93.6% and 90.3% of the fixed maturity securities within the funds withheld at interest are investment grade by NAIC designation as of December 31, 2016 and 2015, respectively.

Derivative Instruments

We hold derivative instruments for economic hedging purposes to reduce our exposure to cash flow variability of assets and liabilities, equity market risk, interest rate risk, credit risk and foreign exchange risk. The types of derivatives we may use include interest rate swaps, foreign currency swaps and forward contracts, total return swaps, credit default swaps, variance swaps, futures and fixed indexed options.

A presentation of our derivative instruments along with a discussion of the business strategy involved with our derivatives is included in *Note 3 - Derivative Instruments* to the consolidated financial statements. This includes:

- a comprehensive description of the derivatives instruments as well as the strategies to manage risk;
- the notional amounts and estimated fair value by derivative instruments; and
- impacts on the consolidated statement of net income.

As part of our risk management strategies, management continually evaluates our derivative instrument holdings and the effectiveness of such holdings in addressing risks identified in our operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Invested Assets

The following summarizes our invested assets:

	December 31,							
	2016				2015			
(In millions, except percentages)	U.S. and Bermuda Invested Asset Value	Germany Invested Asset Value	Total Invested Asset Value[1]	Percent of Total	U.S. and Bermuda Invested Asset Value	Germany Invested Asset Value	Total Invested Asset Value[1]	Percent of Total

Policy loans and other	631	221	852	1.2%	577	207	784	1.3%
Total invested assets	$ 66,544	$ 5,290	$ 71,834	100.0%	$ 61,313	$ 5,646	$ 66,959	100.0%

[1] Refer to *Key Operating and Non-GAAP Measures* for the definition of invested assets.

Our total invested assets were $71.8 billion and $67.0 billion as of December 31, 2016 and 2015, respectively. As of December 31, 2016, our total invested assets were mainly comprised of 45.4% of corporate securities, 31.4% of structured securities, 8.7% of mortgage loans and 4.8% of alternative investments. Corporate securities within our U.S. and Bermuda portfolio included $8.2 billion of private placements, which represented approximately 12% of our total U.S. and Bermuda invested assets. The increase as of December 31, 2016 from 2015 was primarily due to the strong growth in deposits attributed to a significant increase in flow reinsurance business during 2016 as well as growth in our retail sales during 2016.

In managing our business we utilize invested assets as presented in the above table. Invested assets do not correspond to the total investments, including related parties, on our consolidated balance sheets, as discussed previously in *Key Operating and Non-GAAP Measures*. Invested assets represent the investments that directly back our policyholder liabilities and surplus assets. We believe this view of our portfolio provides a view of the assets for which we have economic exposure. We adjust the presentation for funds withheld and modco transactions to include or exclude the underlying investments based upon the contractual transfer of economic exposure to such underlying investments. We also deconsolidate any VIEs in order to show the net investment in the funds, which therefore are included in the alternative investments line above.

The Germany investment portfolio composition differs from the U.S. and Bermuda portfolio primarily due to the geographic location, regulatory environment and participating nature of the German products and therefore the portfolio is managed separately from our U.S. and Bermuda portfolios. The German invested assets are predominantly invested in foreign government securities, corporate fixed income securities, real estate held for investment and assets backing our unit linked policies. The German invested assets are predominantly invested in Euro-denominated securities and investments.

Invested assets are utilized by management to evaluate our investment portfolio. Invested asset figures are used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Invested assets are also used in our risk management processes for asset purchases, product design and underwriting, stress scenarios, liquidity, and ALM.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following summarizes our alternative investments:

	December 31,			
	2016		2015	
(In millions, except percentages)	Invested Asset Value	Percent of Total	Invested Asset Value	Percent of Total
Credit funds	$ 834	24.3%	$ 1,135	32.5%
Private equity - MidCap	524	15.3%	482	13.8%
Private equity - A-A Mortgage	417	12.2%	252	7.2%
Private equity - other	519	15.2%	430	12.3%
Mortgage and real assets	470	13.7%	408	11.7%
Hedge funds	311	9.1%	383	10.9%
Public equities	215	6.3%	270	7.7%
Natural resources and other real assets	135	3.9%	135	3.9%
Total alternative investments	$ 3,425	100.0%	$ 3,495	100.0%

Alternative investments were $3.4 billion and $3.5 billion as of December 31, 2016 and 2015, respectively, representing 4.8% and 5.2% of our total invested assets portfolio as of December 31, 2016 and 2015, respectively.

Alternative investments do not correspond to the total investment funds, including related parties and VIEs, on our consolidated balance sheets. As discussed above in the invested assets section, we adjust the GAAP presentation for funds withheld and modco and de-consolidate VIEs. We also include CLO equity tranche securities in alternative investments due to their underlying characteristics and equity-like features.

Two of our largest alternative investments are in asset originators, MidCap and A-A Mortgage, both of which, from time to time, provide us with access to assets for our investment portfolio. As of December 31, 2016, we held equity positions in MidCap of $524 million. MidCap is a leading originator of senior debt capital in the middle-market with expertise in asset-backed loans, leveraged loans, real estate loans, discount loans and venture loans. MidCap represents a unique investment in an origination platform made available to us through our relationship with Apollo. As of December 31, 2016, we held an equity position in A-A Mortgage of $417 million. A-A Mortgage has an indirect investment in AmeriHome, which originates RMLs and mortgage servicing rights.

Non-GAAP Measure Reconciliations

The reconciliations to the nearest GAAP measure for operating income, net of tax is included in the *Consolidated Results of Operations* section.

The reconciliation of AHL shareholders’ equity to AHL shareholders’ equity excluding AOCI included in the ROE excluding AOCI and operating income ROE excluding AOCI is as follows:

	December 31,		
(In millions)	2016	2015	2014
Total AHL shareholders' equity	$ 6,905	$ 5,362	$ 4,555
Less: AOCI	367	(237)	644
Total AHL shareholders' equity excluding AOCI	$ 6,538	$ 5,599	$ 3,911
Retirement Services	$ 4,495	$ 3,974	$ 2,807
Corporate and Other	2,043	1,625	1,104
Total AHL shareholders' equity excluding AOCI	$ 6,538	$ 5,599	$ 3,911

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The reconciliation of net investment income to net investment earnings and earned rate is as follows:

	Years ended December 31,					
	2016		2015		2014	
(In millions, except percentages)	Dollar	Rate	Dollar	Rate	Dollar	Rate
GAAP net investment income	$ 2,916	4.19%	$ 2,508	4.06%	$ 2,333	3.95%
Reinsurance embedded derivative impacts	189	0.27%	84	0.15%	67	0.10%
Net VIE earnings	1	-%	67	0.11%	146	0.25%
Alternative income gain (loss)	(39)	(0.06)%	(42)	(0.07)%	4	0.01%
Other	(35)	(0.05)%	(9)	(0.01)%	(12)	(0.02)%

Reinsurance ceded receivables	(6,001)	(7,257)
Policy loans ceded	(344)	(399)
Other	4	1
Total adjustments to arrive at reserve liabilities	(8,863)	(10,220)
Total reserve liabilities	$ 70,951	$ 65,271

Liquidity and Capital Resources

Liquidity is the ability to generate sufficient cash flows to meet the cash requirements of business operations or to rebalance our investment portfolio without incurring significant costs. Funding liquidity relates to the ability to fund operations. Balance sheet liquidity reflects the ability to liquidate or rebalance the company’s balance sheet without incurring significant costs from fees, bid-offer spreads, or market impact. We manage our liquidity position by matching projected cash demands with adequate sources of cash and other liquid assets. Our principal sources of liquidity are operating cash flows and holdings of cash, cash equivalents and other readily marketable assets.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our investment portfolio is structured to ensure a strong liquidity position over time in order to permit timely payment of policy and contract benefits without requiring asset sales at inopportune times or at depressed prices. In general, liquid assets include cash and cash equivalents, highly rated corporate bonds, unaffiliated preferred stock and unaffiliated public common stock, all of which generally have liquid markets with a large number of buyers. The carrying value of these assets as of December 31, 2016 was approximately $44.0 billion. Although our investment portfolio does contain assets that are generally considered illiquid for liquidity monitoring purposes (primarily mortgage loans, policy loans, real estate, investment funds, and affiliated common stock), there is some ability to raise cash from these assets if needed. Along with these liquid assets, in periods of economic downturn we may maintain higher cash balances than required to manage our liquidity risk and to take advantage of market dislocations as they arise. We have an additional liquidity cushion through a $1.0 billion revolving credit facility, which is undrawn as of the date hereof. In addition, through our membership in the FHLBDM and the FHLBI we are eligible to borrow under variable rate short-term federal funds arrangements to provide additional liquidity.

We proactively manage our liquidity position to meet cash needs while minimizing adverse impacts on investment returns. We analyze our cash-flow liquidity over the upcoming 12 months under a variety of scenarios modeling potential demands on liquidity, taking into account the provisions of our policies and contracts in force, our cash flow position, and the volume of cash and readily marketable securities in our portfolio. By policy, we maintain sufficient liquidity not only to meet our cash-flow requirements over the succeeding 12-month period in a moderately severe scenario (for example, a recessionary environment), but also to have excess liquidity available to invest into potential investment opportunities created from market dislocations. We also monitor our liquidity profile under more severe scenarios.

We perform a number of stress tests and analyses to assess our ability to meet our cash flow requirements as well as the ability of our reinsurance and insurance subsidiaries to meet their collateral obligations. Among these analyses, we manage to the following ALM limits:

- our projected net cumulative cash flows including both new business and target levels of new investments under a “plan scenario” and a “moderately severe scenario” event are non-negative over a rolling 12-month horizon;
- we hold at least $250 million in cash and cash equivalents across the group; and at least $150 million in the aggregate in securities with the following characteristics:
    - public corporate bonds rated A- or above;
    - liquid ABS (defined as prime auto, auto floorplan, Tier 1 subprime auto, auto lease, prime credit cards, equipment lease or utility stranded assets) and RMBS with weighted average lives less than three years rated A- or above; or
    - CMBS with weighted average lives less than three years rated AAA- or above;
- we maintain assets that can be liquidated in one quarter under normal market conditions equal to 25% of the policyholder obligations that are deemed to be most liquid, which is defined as policies with a cash surrender value, no income rider, no MVA, with lower than 5% surrender charge protection and lower than 3% minimum floor guarantee, if any; and
- we maintain sufficient capital and surplus at ALRe to meet collateral calls from modco and third-party reinsurance contracts under a substantial stress event, such as the failure of a major financial institution (Lehman event).

Insurance Subsidiaries' Liquidity

The primary cash flow sources for our insurance subsidiaries include retirement services product inflows (premiums), investment income, principal repayments on our investments, and net transfers from separate accounts and financial product deposits. Uses of cash include investment purchases, payments to policyholders for surrenders and withdrawals, policy acquisition costs, and general operating costs.

Our policyholder obligations are generally long-term in nature. However, one liquidity risk is an extraordinary level of early policyholder withdrawals. We include provisions within our annuity policies, such as surrender charges and MVAs, which are intended to protect us from early withdrawals. As of December 31, 2016 and 2015, approximately 86% and 85%, respectively, of our deferred annuity liabilities were subject to penalty upon surrender. In addition, as of December 31, 2016 and 2015, approximately 73% and 71% of policies contained MVAs that also have the effect of limiting early withdrawals if interest rates increase.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cash Flows

Our cash flows were as follows:

	Years ended December 31,		
(In millions)	2016	2015	2014
Net income	$ 805	$ 578	$ 478
Non-cash revenues and expenses	394	471	121
Net cash provided by operating activities	1,199	1,049	599
Sales, maturities, and repayment of investments	13,783	14,512	15,855
Purchases and acquisitions of investments	(16,293)	(14,991)	(14,376)
Other investing activities	(92)	427	(147)
Net cash (used in) provided by investing activities	(2,602)	(52)	1,332
Capital contributions	1	1,116	305
Deposits on investment-type policies and contracts	5,791	3,460	3,393
Withdrawals on investment-type policies and contracts	(4,617)	(4,783)	(5,551)
Net changes of cash collateral posted for derivative transactions	516	(535)	661
Net proceeds and repayment of debt	-	(4)	(300)
Consolidated VIE net borrowings	(500)	-	(404)
Other financing activities	(36)	(165)	(432)
Net cash provided by (used in) financing activities	1,155	(911)	(2,328)
Effect of exchange rate changes on cash and cash equivalents[1]	(13)	(4)	-
Net (decrease) increase in cash and cash equivalent[1]	$ (261)	$ 82	$ (397)

[1] *Includes cash and cash equivalents of consolidated VIEs*

Cash flows from operating activities

The primary cash inflows from operating activities include net investment income, annuity considerations and insurance premiums. The primary cash outflows from operating activities are comprised of benefit payments, interest credited to policyholders, operating expenses and tax expenses. Our operating activities generated cash flows totaling $1.2 billion, $1.0 billion and $599 million for the years ended December 31, 2016, 2015 and 2014, respectively. The increase in cash provided by operating activities for both the years ended December 31, 2016 compared to 2015 and for 2015 compared to 2014 was primarily driven by the increase in net investment income reflecting an increase in our investment portfolio attributed to the growth in deposits as well as bond call income in 2016.

Cash flows from investing activities

The primary cash inflows from investing activities are the sales, maturities and repayments of investments. The primary cash outflows from investing activities are the purchases and acquisitions of new investments. The cash flows from investing activities reflect the reinvestment of our Aviva USA acquired investments for the years ended December 31, 2015 and 2014. Our investing activities used cash flows totaling $2.6 billion, $52 million, and provided cash flows of $1.3 billion for the years ended December 31, 2016, 2015 and 2014, respectively. The increase in cash used from investing activities for the year ended December 31, 2016, was primarily attributed to $1.1 billion of primarily non-agency RMBS purchased in the third quarter of 2016, as well as an increase in our investment portfolio attributed to the growth in retail sales surpassing withdrawals. The change in cash flows from investing activities in 2015 as compared to 2014 reflects the continued reinvestment of our Aviva USA and Presidential Life Corporation acquired investments and the investment of $1.1 billion of capital raise proceeds during 2015.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cash flows from financing activities

The primary cash inflows from financing activities are deposits on our investment-type policies, changes of cash collateral posted for derivative transactions, capital contributions and proceeds from borrowing activities. The primary cash outflows from financing activities are withdrawals on our investment-type policies, changes of cash collateral posted for derivative transactions and repayments from borrowing activities. Our financing activities provided cash flows totaling $1.2 billion for the year ended December 31, 2016, and used cash flows totaling $911 million and $2.3 billion for the years ended December 31, 2015 and 2014, respectively. The increase in cash provided from financing activities in 2016 was primarily attributed to the growth in retail sales surpassing withdrawals and the favorable change in cash collateral posted for derivative transactions, partially offset by capital raise proceeds drawn and funded in April 2015 and the settling of borrowing of our CMBS VIE funds. The decrease in cash used in 2015 compared to 2014 was driven by the capital raise proceeds of $1.1 billion, a decrease in withdrawals for the year and the deconsolidation of MidCap Financial at the beginning of 2015, partially offset by the unfavorable change in cash collateral posted for derivative transactions.

Holding Company Liquidity

AHL is a holding company whose primary liquidity needs include the cash-flow requirements of its insurance subsidiaries to support retail annuity sales, reinsurance transactions, acquisition opportunities and new investments, and interest payments. The primary source of AHL’s cash flow is dividends from its subsidiaries, which are expected to be adequate to fund cash flow requirements based on current estimates of future obligations. As of December 31, 2016, AHL had no financial leverage.

The ability of AHL’s insurance subsidiaries to pay dividends is limited by applicable laws and regulations of the jurisdictions where the subsidiaries are domiciled, as well as agreements entered into with regulators. These laws and regulations require, among other things, the insurance subsidiaries to maintain minimum solvency requirements and limit the amount of dividends these subsidiaries can pay.

Subject to these limitations, the U.S. insurance subsidiaries are permitted to pay ordinary dividends based on calculations specified under insurance laws of the relevant state of domicile, subject to prior notification to the appropriate regulatory agency. Any distributions above the amount permitted by statute in any twelve month period are considered to be extraordinary dividends, and the approval of the appropriate regulator is required prior to payment. In addition, dividends from U.S. insurance subsidiaries to AHL would result in a 30% withholding tax. AHL does not currently plan on having the U.S. subsidiaries pay any dividends to AHL. ALV and APK (the life insurance entities of our German Group Companies) are regulated by BaFin. ALV and APK are restricted as to the payment of dividends pursuant to calculations, which are based upon the analysis of current euro swap rates against existing policyholder guarantees. As of December 31, 2016, ALV and APK did not exceed this threshold and, therefore, no amounts are available for distribution to AHL. As a result, dividends from ALRe are projected to be the primary source of AHL’s liquidity.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year’s statutory capital and surplus, unless at least two members of ALRe’s board of directors and its principal representative in Bermuda sign and submit to the BMA an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its relevant margins, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of its total statutory capital. Distributions in excess of this amount require the approval of the BMA.

The following table summarizes the dividends and other distributions our insurance subsidiaries were permitted to pay to AHL without the need for insurance regulatory approval and without regard to any withholding tax, subject to meeting solvency requirements when applicable:

	December 31,	
(In millions)	2016	2015
Subsidiary name (jurisdiction of domicile)		
Athene Life Re Ltd. (Bermuda)	$ 2,479	$ 3,529
Athene Annuity & Life Assurance Company (Delaware)	127	125
Athene Lebensversicherung (Germany)	-	-
Athene Pensionskasse AG (Germany)	-	-

As of December 31, 2016, the maximum dividend that AADE could pay absent regulatory approval from the Delaware Department of Insurance was $127 million. However, another regulation requiring AADE to hold surplus outside of surplus in subsidiaries effectively limits the amount that AADE can dividend while staying in compliance with such state regulations. Pursuant to such regulations and requirements, AADE could dividend up to $80 million as of December 31, 2016. Any dividends from AHL's other U.S. statutory entities in excess of the amounts allowed for AADE would not be able to be remitted to AHL without regulatory approval from the Delaware Department of Insurance. Additionally, we have agreed with the IID not to cause AAIA to pay dividends until August 15, 2018; therefore, we currently consider AAIA's dividend capacity as zero.

The maximum distribution permitted by law or contract is not necessarily indicative of an insurer's actual ability to pay such distributions, which may be constrained by business and other considerations, such as imposition of withholding tax, the impact of such distributions on surplus, which could affect the insurer's ratings or competitive position, the amount of premiums that can be written and the ability to pay future dividends or make other distributions. Further, state insurance laws and regulations require that the statutory surplus of our insurance subsidiaries following any dividend or distribution must be reasonable in relation to their outstanding liabilities and adequate for the insurance subsidiaries' financial needs. Along with solvency regulations, another primary consideration in determining the amount of capital used for dividends is the level of capital needed to maintain desired financial strength ratings from rating agencies, including S&P, A.M. Best and Fitch. Given recent economic events that have affected the insurance industry, both regulators and rating agencies could become more conservative in their methodology and criteria, including increasing capital requirements for insurance subsidiaries. AHL believes its insurance subsidiaries have sufficient statutory capital and surplus, combined with additional capital available to be provided by AHL, to meet this financial strength rating objective.

Other Sources of Funding

If needed, we may seek to secure additional funding at the holding company level by means other than dividends from subsidiaries such as by drawing on our undrawn $1.0 billion Credit Facility and by pursuing future issuances of debt or equity securities to third-party investors. However, such additional funding may not be available on terms favorable to us or at all, depending on our financial condition or results of operations or prevailing market conditions. In addition, certain covenants in our Credit Facility prohibit us from incurring any debt not expressly permitted thereby, which may limit our ability to pursue future issuances of debt.

Membership in Federal Home Loan Bank

We are a member of the FHLBDM and the FHLBI. Membership in a FHLB requires the member to purchase FHLB common stock based on a percentage of the dollar amount of advances outstanding, subject to the investment being greater than or equal to a minimum level. We owned a total of $40 million and $56 million of FHLB common stock as of December 31, 2016 and 2015, respectively.

Through our membership in the FHLBDM and FHLBI, we are eligible to borrow under variable rate short-term federal funds arrangements to provide additional liquidity. The borrowings must be secured by eligible collateral such as mortgage loans, eligible CMBS or RMBS, government or agency securities and guaranteed loans. There were no outstanding borrowings under these arrangements as of December 31, 2016 or 2015.

On August 11, 2016, we provided notice to the FHLBI that ALIC is withdrawing its membership thereto. The FHLBI confirmed receipt of our request on the following day. Pursuant to the FHLBI's capital plan, ALIC's membership will be withdrawn as of the fifth anniversary of the FHLBI's receipt of our notice. Until such time that ALIC's membership is withdrawn, ALIC continues to have all of the rights and obligations of being a member of the FHLBI, except that with respect to some or all of the FHLBI stock that ALIC owns, we will be entitled to a lower dividend amount, to the extent that the FHLBI declares a dividend. ALIC may continue to borrow from the FHLBI, provided that without the consent of the FHLBI, the transaction must mature or otherwise terminate prior to ALIC's withdrawal of membership.

In addition, we have issued funding agreements to the FHLB in exchange for cash advances. These funding agreements were issued in an investment spread strategy, consistent with other investment spread operations. As of December 31, 2016 and 2015, we had an aggregate of $691 million and $1.1 billion, respectively, of outstanding FHLB funding agreements. Refer to *Note 18 - Commitments and Contingencies* to the consolidated financial statements for details of issued funding agreements and related collateral.

The maximum FHLB indebtedness by a member is determined by the amount of collateral pledged, and cannot exceed a specified percentage of the member's total statutory assets dependent on the internal credit rating assigned to the member by the FHLB. As of December 31, 2016 and 2015, the total maximum borrowings under the FHLBDM facility were limited to $14.0 billion and $13.1 billion, respectively. However, our ability to borrow under the facility is constrained by the availability of assets that qualify as eligible collateral under the facility and by the Iowa Code requirement that we maintain funds equivalent to our legal reserve in certain permitted investments, from which we exclude pledged assets. Considering these limitations, we estimate that as of December 31, 2016 and 2015, we had the ability to draw up to a total of approximately $4.5 billion, inclusive of borrowings then outstanding. Drawing such amounts would have an adverse impact on AAIA's RBC ratio, which may further restrict our ability or willingness to draw up to our estimated capacity.

Use of Captives

While our business strategy does not involve the use of captives, as a result of the Aviva USA acquisition, we acquired a captive reinsurer that was formed in 2011 and domiciled in the state of Vermont and we ceded certain liabilities to this captive reinsurer, as further discussed in *Note 9 - Closed Block* to the consolidated financial statements. The statutory reserves of the affiliated captive reinsurer are supported by a combination of funds withheld receivable assets and letters of credit issued by an unaffiliated financial institution. The reinsurance activities within the captive reinsurer are eliminated in consolidation. As discussed in *Note 16 - Statutory Requirements* to the consolidated financial statements, a prescribed practice of the state of Vermont allows the captive to include the face amount of issued and outstanding letters of credit in the amount of $153 million as of December 31, 2016 and 2015, as admitted assets in its statutory financial statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Recently, the NAIC and certain state insurance departments have scrutinized insurance companies' use of affiliated captive reinsurers. It is uncertain what, if any, regulatory changes will result from this heightened scrutiny. A potential outcome, although not considered likely, is the prohibition on the continued use of captive reinsurance subsidiaries. If the use of existing captive reinsurance subsidiaries were discontinued, we would likely incur early termination fees with respect to the financing structure and diminished statutory capital position. The effect of potential regulatory changes regarding the use of captives on our consolidated financial condition and results of operations, although believed unlikely to be material, is uncertain at this time.

Capital Resources

As of December 31, 2016 and 2015, our U.S. insurance companies' TAC, as defined by the NAIC, was $1.8 billion and $1.7 billion, respectively, and our ALRe statutory capital as defined by the BMA, was $6.1 billion and $5.7 billion, respectively. As of December 31, 2016 and 2015, our U.S. RBC ratio was 478% and 552%, respectively, and our BSCR ratio was 228% and 323%, respectively, all above our internal targets. The change in our U.S. RBC as of December 31, 2016 compared to December 31, 2015 was primarily driven by our investment of capital to organically grow our retail channel, which increased significantly during 2016. Each U.S. domestic insurance subsidiary’s state of domicile imposes minimum RBC requirements that were developed by the NAIC. The formulas for determining the amount of RBC specify various weighting factors that are applied to financial balances or various levels of activity based on the perceived degree of risk. Regulatory compliance is determined by a ratio of TAC to ACL. Our TAC was significantly in excess of all regulatory standards and above our internal targets as of December 31, 2016 and 2015, respectively. ALRe adheres to BMA regulatory capital requirements to maintain statutory capital and surplus to meet the MMS and maintain minimum EBS capital and surplus to meet the ECR. Effective January 1, 2016, in connection with the implementation of its broader regulatory regime, the BMA integrated the EBS framework into the determination of BSCR. The European Commission has granted the BMA's regulatory regime for reinsurance, group solvency calculation and group supervision full equivalence to Solvency II. Under the EBS framework, ALRe's assets are recorded at market value and its insurance reserves are determined by reference to nine prescribed scenarios, with the scenario resulting in the highest reserve balance being ultimately required to be selected. The ALRe EBS capital and surplus was $4.4 billion resulting in a BSCR ratio of 228%, as of December 31, 2016. Although the calculation of the ECR was unchanged from prior year, the BSCR ratios for December 31, 2016 and 2015 are not comparable as the 2015 calculation applied to ALRe's statutory capital and the 2016 calculation now applies to the EBS capital and surplus. Consistent with the previous regime the MRC ratio to be considered solvent by the BMA is 100%. As of December 31, 2016 and 2015, ALRe held the appropriate capital to adhere to these regulatory standards. In evaluating our capital position and the amount of capital needed to support our Retirement Services segment, we review our ALRe capital by applying the NAIC RBC factors. As of December 31, 2016 and 2015, our ALRe RBC ratio was 529% and 468%, respectively, both above our internal targets. Our German Group Companies adhere to the regulatory capital requirements set forth by BaFin. Our German Group Companies held the appropriate capital to adhere to these regulatory standards as of December 31, 2016. Effective January 1, 2016, our German Group Companies became subject to Solvency II MCR requirements interpreted by the relevant regulatory authorities. We believe that we enjoy a strong capital position in light of our risks and that we are well positioned to meet policyholder and other obligations. We also believe that our strong capital position, as well as operating with excess capital, provides us the opportunity to take advantage of market dislocations as they arise.

Balance Sheet and Other Arrangements

Balance Sheet Arrangements

Contractual Obligations

The following table displays our contractual obligations as of December 31, 2016:

	Payments Due by Period				
(In millions)	Total	Less Than 1 Year	1-3 Years	3-5 Years	After 5 Years
Interest sensitive contract liabilities	$ 61,532	$ 4,967	$ 11,021	$ 11,207	$ 34,337
Future policy benefits	14,569	326	779	781	12,683
Other policy claims and benefits	217	217	-	-	-
Dividends payable to policyholders	974	152	94	44	684
Total	$ 77,292	$ 5,662	$ 11,894	$ 12,032	$ 47,704

We also have other obligations related to collateral on derivatives and investment fund commitments which have not been included in the above table as the timing and amount of both the return on the collateral and the fulfillment of the commitments are uncertain. See *Note 18 - Commitments and Contingencies* to the consolidated financial statements for further discussion on the investment fund commitments.

Other

In the normal course of business, we invest in various investment funds which are considered VIEs, and we consolidate a VIE when we are considered the primary beneficiary of the entity. For further discussion of our involvement with VIEs, see *Note 4 - Variable Interest Entities* to the consolidated financial statements.

Off Balance Sheet Arrangements

Collateral for Derivatives

We enter into derivatives for risk management purposes. We hold non-cash collateral from counterparties for our derivatives, which has not been recorded on our consolidated balance sheets. These amounts were $26 million and $57 million as of December 31, 2016 and 2015, respectively.

Collateral for Reinsurance

We hold collateral for and provide collateral to counterparties for our reinsurance agreements. We held $49 million and $62 million as of December 31, 2016 and 2015, respectively, of collateral on behalf of our reinsurers. As of December 31, 2016 and 2015, our reinsurers held collateral of $4 million and $6 million, respectively, on our behalf.

Critical Accounting Estimates and Judgments

The preparation of consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Amounts based on such estimates involve numerous assumptions subject to varying and potentially significant degrees of judgment and uncertainty, particularly related to the future performance of the underlying business, and will likely change in the future as additional information becomes available. Critical estimates and assumptions are evaluated on an ongoing basis based on historical developments, market conditions, industry trends and other information that is reasonable under the circumstances. There can be no assurance that actual results will conform to estimates and assumptions and that reported results of operations will not be materially affected by the need to make future accounting adjustments to reflect periodic changes in these estimates and assumptions. Critical accounting estimates are impacted significantly by our methods, judgments and assumptions used in the preparation of the consolidated financial statements and should be read in conjunction with our significant accounting policies described in *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* to the consolidated financial statements. The following summary of our critical accounting estimates is intended to enhance the ability to assess our financial condition and results of operations and the potential volatility due to changes in estimates.

Investments

We are responsible for the fair value measurement of certain investments presented in our consolidated financial statements. We perform regular analysis and review of our valuation techniques, assumptions and inputs utilized in determining fair value to evaluate if the valuation approaches are appropriate and consistently applied, and the various assumptions are reasonable. We also perform quantitative and qualitative analysis and review of the information and prices received from commercial pricing services and broker-dealers, to verify it represents a reasonable estimate of the fair value of each investment. In addition, we utilize both internally-developed and commercially-available cash flow models to analyze the reasonableness of fair values utilizing credit spread and other market assumptions, where appropriate.

Valuation of Fixed Maturity and Equity Investments

The following table presents the fair value of fixed maturity and equity securities, including those with related parties, by pricing source and fair value hierarchy:

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

	December 31, 2016			
(In millions)	Total	Level 1	Level 2	Level 3
AFS securities				
Priced via commercial pricing services	$ 34,410	$ 108	$ 34,302	$ -
Priced via independent broker-dealer quotations	18,087	20	16,334	1,733
Priced via other methods	244	-	40	204
Total AFS securities, including related parties	52,741	128	50,676	1,937
Trading securities				
Priced via commercial pricing services	2,106	3	2,103	-
Priced via independent broker-dealer quotations	670	-	319	351
Total trading securities, including related parties	2,776	3	2,422	351
Total AFS and trading securities, including related parties	$ 55,517	$ 131	$ 53,098	$ 2,288
Percent of total, including related parties	100.0%	0.2%	95.7%	4.1%

In addition to the table above, our consolidated VIEs have fixed maturity and equity securities. As of December 31, 2016, our consolidated VIEs had fixed maturity and equity securities classified in the fair value hierarchy as Level 1 of $235 million, Level 2 of $0 million, and Level 3 of $93 million.

We measure the fair value of our investments based on assumptions used by market participants in pricing the assets, which may include inherent risk, restrictions on the sale or use of an asset, or nonperformance risk. The estimate of fair value is the price that would be received to sell an investment in an orderly transaction between market participants in the principal market, or the most advantageous market in the absence of a principal market, for that investment. Market participants are assumed to be independent, knowledgeable, able and willing to transact an exchange while not under duress. The valuation of investments involves considerable judgment, is subject to considerable variability and is revised as additional information becomes available. As such, changes in, or deviations from, the assumptions used in such valuations can significantly affect our consolidated financial statements. Financial markets are susceptible to severe events evidenced by rapid depreciation in investment values accompanied by a reduction in asset liquidity. Our ability to sell investments, or the price ultimately realized for investments, depends upon the demand and liquidity in the market and increases the use of judgment in determining the estimated fair value of certain investments. Accordingly, estimates of fair value are not necessarily indicative of the amounts that could be realized in a current or future market exchange.

As of December 31, 2016, fixed maturity securities, including those with related parties, totaled $54.7 billion. For fixed maturity securities, we obtain the fair values, when available, based on quoted prices in active markets that are regularly and readily obtainable. Generally, these are liquid investments and the valuation does not require significant management judgment. When quoted prices in active markets are not available, fair value is based on market standard valuation techniques, giving priority to observable inputs. We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. For certain fixed maturity securities without an active market, an internally-developed discounted cash flow or other approach is utilized to calculate the fair value. A discount rate is used, which adjusts a market comparable base rate for securities with similar characteristics for credit spread, market illiquidity or other adjustments. The fair value of privately placed fixed maturity securities are based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model, which considers the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. We also consider additional factors, such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees, and our evaluation of the borrower's ability to compete in its relevant market.

As of December 31, 2016, equity securities, including those with related parties, totaled $798 million. For equity securities, we obtain the fair value, when available, based on quoted market prices. Other equity securities, typically private equities or equity securities not traded on an exchange, are valued based on other sources, such as analytics or broker-dealer quotes.

Valuation of Investment Funds

Investment funds, including those with related parties and of our consolidated VIEs, for which we elect the fair value option, are valued based on net asset value information provided by the general partner or related asset manager. As of December 31, 2016, we had investment funds, including those with related parties and of our consolidated VIEs, of $661 million carried at fair value on the consolidated balance sheet. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. Investment funds include several private equity and debt funds that typically invest in a diverse pool of investments, using investment strategies including leveraged buyouts, energy, real estate, hedge funds, mezzanine debt, and senior debt.

The underlying investments may have significant unobservable inputs for comparable multiples and weighted average cost of capital rates applied in valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable

multiples are multiplied by the underlying investment's earnings before interest, tax, depreciation, and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers. Similarly, for certain underlying investments we may use a discounted cash flow model. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. We determine the discount rate by considering the weighted average cost of capital of companies in similar industries with comparable debt to equity ratios.

Other-Than-Temporary Impairments

The evaluation of investments for OTTIs is a quantitative and qualitative process done on a case-by-case basis, which is subject to risks and uncertainties and involves significant estimates and judgments by management. Changes in the estimates and judgments used in such analysis can have a significant impact on our consolidated results of operations.

We review and analyze all investments on an ongoing basis for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions, and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings and outlook, the frequency of late payments, pricing levels, key financial ratios, financial statements, revenue forecasts and cash flow projections. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more-likely-than-not we will be required to sell the security before the recovery of its cost or amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. An extended and severe unrealized loss position on a fixed maturity security may not have any impact on the ability of the issuer to service all scheduled principal and interest payments. Accordingly, such an unrealized loss position may not impact our evaluation of recoverability of all contractual cash flows or the ability to recover an amount at least equal to the investment's cost or amortized cost based on the present value of the expected future cash flows to be collected. To the extent we determine a security is deemed to be other-than-temporarily impaired, an impairment loss is recognized.

Impairment losses on equity securities are recognized in investment related gains (losses) on the consolidated statements of income. The recognition of impairment losses on fixed maturity securities on the consolidated financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more-likely-than-not that we would be required to sell a security before the recovery of its cost or amortized cost, less any recorded credit loss, we recognize an OTTI in investment related gains (losses) on the consolidated statements of income for the difference between cost or amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit portion in investment related gains (losses) on the consolidated statements of income and the non-credit loss portion in AOCI on the consolidated balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using estimated cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating-rate security. The techniques and assumptions for establishing the estimated cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security specific facts and circumstances including timing, security interests and loss severity.

For equity method investments, we consider financial and other information provided by the investee, other known information and inherent risks in the underlying investments, as well as future capital commitments, in determining whether an impairment has occurred. Declines in value of equity method investments not expected to be recovered are reflected through impairment in other investment related gains (losses) on the consolidated statements of income.

Future Policy Benefits

The future policy benefit liabilities associated with long duration contracts include endowment contracts, term and whole-life products, accident and health, disability, and deferred and immediate annuities with life contingencies. Liabilities for non-participating long duration contracts are established using accepted actuarial valuation methods which require us to make certain assumptions regarding expenses, investment yields, mortality, morbidity, and persistency, with a provision for adverse deviation, at the date of issue or acquisition. As of December 31, 2016, the reserve investment yield assumptions for non-participating contracts range from 3.31% to 5.44% and are specific to our expected earned rate on the asset portfolio supporting the reserves. Liabilities for participating long duration contracts are established using acceptable actuarial valuation methods, which require the use of guaranteed interest and mortality assumptions. As of December 31, 2016, the reserve guaranteed interest assumptions range from 1.25% to 4.00% and are based on interest rates guaranteed to policyholders. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary. Premium deficiency tests are performed periodically using current assumptions, without provisions for adverse deviation, in order to test the appropriateness of the established reserves. If the reserves using current assumptions are greater than the existing reserves, the excess is recorded and the initial assumptions are revised.

Liabilities for Guaranteed Living Withdrawal Benefits and Guaranteed Minimum Death Benefits

We issue and reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance and recognizing the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, which includes lapses, withdrawals and utilization of the benefit riders; mortality; and market conditions affecting the account balance growth.

Policyholder lapses and withdrawal assumptions are set at the product level by grouping individual policies sharing similar features and guarantees and reviewed periodically against experience. Base lapse rates consider the level of surrender charges and are dynamically adjusted based on the level of current interest rates relative to the guaranteed rates and the amount by which any rider guarantees are in a net positive position. Rider utilization assumptions consider the number and timing of policyholders electing the riders. We track this assumption as experience emerges and update our assumption as experience deviates. Mortality assumptions are set at the product level and generally based on standard industry tables, adjusted for historical experience and a provision for mortality improvement. Projected guaranteed benefit amounts in excess of the underlying account balances are considered over a range of scenarios in order to capture our exposure to the guaranteed withdrawal and death benefits.

The assessments used to accrue liabilities are based on interest margins, rider charges, surrender charges and realized gains (losses). As such, future reserve changes are sensitive to changes in investment results and the impacts of shadow adjustments, which represent the impact of assuming unrealized gains (losses) are realized in future periods. As of December 31, 2016, the GLWB and GMDB liability balance, including the impacts of shadow adjustments, totaled $1.9 billion. The increase (decrease) to the GLWB and GMDB liability balance, including the impacts of shadow adjustments from hypothetical changes in projected assessments, changes in the discount rate and annual equity growth is summarized as follows:

(In millions)		December 31, 2016
+10% assessments	$	(72)
-10% assessments		82
+100 bps discount rate		74
-100 bps discount rate		(83)
1% lower annual equity growth		35

Derivatives

Valuation of Embedded Derivatives on FIAs

We issue and reinsure products, primarily FIA products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the consolidated balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with FIAs are reflected in interest sensitive contract benefits on the consolidated statements of income. Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains (losses) on the host contract and derivative will be reflected within investment related gains (losses) on the consolidated statements of income.

FIA and indexed universal life insurance contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of embedded derivatives is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates, and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For contracts we issue to policyholders, the embedded derivative cash flows are discounted using a rate that reflects our own credit rating. For funds withheld reinsurance contracts, we do not use a credit spread as the funds are backed by the cedant's collateral. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

In general, the change in the fair value of the embedded derivatives will not directly correspond to the change in fair value of the hedging derivative assets. The derivatives are intended to hedge the index credits expected to be granted at the end of the current term, typically one year. The options valued in the embedded derivatives represent the rights of the policyholder to receive index credits over the entire period the FIAs are expected to be in force, which are typically much longer than the current term of the options. From an economic basis we believe it is

suitable to hedge with options that align with index terms of our FIA products because policyholder accounts are credited with index performance at the end of each index term. However, because the value of an embedded derivative in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.

The most sensitive assumption in determining policy liabilities for FIAs is the vector of rates used to discount the excess projected contract values. The change in risk free rates is expected to drive most of the movement in the discount rates between periods. Changes to credit spreads for a given credit rating as well as any change to our credit rating requiring a revised level of non-performance risk would also be factors in the changes to the discount rate. If the discount rates used to discount the excess projected contract values were to fluctuate, there would be a resulting change in reserves for FIAs recorded through the consolidated statements of income.

As of December 31, 2016, we had embedded derivative liabilities classified as Level 3 in the fair value hierarchy of $5.3 billion. The increase (decrease) to the embedded derivatives on FIA products from hypothetical changes in discount rates is summarized as follows:

(In millions)	December 31, 2016	
+100 bps discount rate	$	(393)
-100 bps discount rate		444

However, these estimated effects do not take into account potential changes in other variables, such as equity price levels and market volatility, which can also contribute significantly to changes in carrying values. Therefore, the table does not necessarily reflect the ultimate impact on the consolidated financial statements under the discount rate variance scenarios presented above. In determining the ranges, we have considered current market conditions, as well as the market level of discount rates that can reasonably be anticipated over the near-term. For additional information regarding sensitivities to the embedded derivative balance, see *Item 7A. Quantitative and Qualitative Disclosures About Market Risks*.

Valuation of Embedded Derivatives in Modco or Funds Withheld

Reinsurance agreements written on a modco or funds withheld basis contain embedded derivatives. The right to receive or obligation to pay the total return on the assets supporting the funds withheld at interest or funds withheld liability, respectively, represents a total return swap with a floating rate leg. The fair value of the embedded derivatives on modco and funds withheld agreements is computed as the unrealized gain (loss) on the underlying assets and is included in funds withheld at interest and funds withheld liability on the consolidated balance sheets for assumed and ceded agreements, respectively. The change in the fair value of the embedded derivatives is recorded in investment related gains (losses) on the consolidated statements of income.

Valuation of Derivative Contracts

Derivative contracts can be exchange-traded or OTC. Exchange-traded derivative contracts (for example, futures) typically fall within Level 1 of the fair value hierarchy depending on trading activity. OTC derivative contracts (for example, swaps) are valued using valuation models or an income approach using third-party broker-dealer valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. We consider and incorporate counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivative liabilities. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant judgment. As of December 31, 2016, we had derivative contract assets classified in the fair value hierarchy as Level 1 of $9 million, Level 2 of $1,361 million and Level 3 of $0 million. As of December 31, 2016, we had derivative contract liabilities classified in the fair value hierarchy as Level 1 of $0 million, Level 2 of $33 million and Level 3 of $7 million.

Deferred Acquisition Costs, Deferred Sales Inducements, and Value of Business Acquired

Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances. We adjust the DAC, DSI and VOBA balances due to the other comprehensive income effects of net unrealized investment gains (losses) on AFS securities. We perform periodic tests to determine if the deferred costs remain recoverable, including at issue. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC and DSI, which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive life and investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the GLWB and GMDB reserves, and realized gains (losses) on investments. Current period gross profits for FIAs also include the impact of amounts for the change in fair value of the derivatives and the

change in fair value of the embedded derivatives. Estimates of the future gross profits are based on assumptions using accepted actuarial methods.

Current period amortization includes retrospective adjustments when actual gross profits and margins differ from prior estimates and may include further adjustments due to revisions of estimates of future gross profits and margins. Our estimates of future gross profits and margins are based on assumptions using accepted actuarial methods related to policyholder behavior and mortality, yields on investments supporting the liabilities, future interest credited amounts (including indexed related credited amounts on FIA products), surrender and other policy charges as applicable, and the level of expenses necessary to maintain the policies over their entire lives. Revisions to the gross profits are made each period based on historical results and also periodically through changing our assumptions to reflect our estimate of future experience.

We establish VOBA for insurance contract blocks assumed with the acquisition of insurance entities. The fair value of the liabilities purchased is determined using market participant assumptions at the time of acquisition and represents the amount an acquirer would expect to be compensated to assume the contracts. We record the fair value of the liabilities assumed in two components: reserves and VOBA. Reserves are established using our best estimate assumptions, as previously discussed in future policy benefits. VOBA is the difference between the fair value and the reserves. VOBA can be either positive or negative. For interest sensitive life and investment-type contracts, any negative VOBA is recorded in interest sensitive contract liabilities on the consolidated balance sheets. For long duration and insurance contracts, any negative VOBA is recorded as part of future policy benefits on the consolidated balance sheets. Positive VOBA is recorded in DAC, DSI and VOBA on the consolidated balance sheets. VOBA associated with funding agreements and immediate annuity contracts classified as investment contracts is amortized using the interest method. VOBA associated with immediate annuity contracts classified as long-duration contracts is amortized at a constant rate in relation to net policyholder liabilities. For accumulation products, which include interest sensitive life and investment-type contracts with significant non-investment sources of revenue, VOBA is amortized in relation to the present value of estimated gross profits using methods consistent with those used to amortize DAC. Negative VOBA is amortized at a constant rate in relation to applicable net policyholder liabilities.

Estimated future gross profits vary based on a number of factors, but are typically most sensitive to changes in investment spread margins, which are the most significant component of gross profits. If estimated gross profits for all future years on business in force were to change, including the impacts of shadow adjustments, there would be a resulting increase or decrease to the balances of DAC, DSI and VOBA recorded as an increase or decrease to amortization of DAC, DSI, and VOBA on the consolidated statements of income or AOCI.

Actual gross profits will depend on actual margins, including the changes in the value of embedded derivatives. The most sensitive assumption in determining the value of the embedded derivative is the vector of rates used to discount the excess projected contract values. If the discount rates used to discount the excess projected contract values were to change, there would be a resulting increase or decrease to the balances of DAC, DSI and VOBA recorded as an increase or decrease in amortization of DAC, DSI, and VOBA on the consolidated statements of income.

As of December 31, 2016, DAC, DSI and VOBA totaled $3.0 billion. The increases (decreases) to DAC, DSI and VOBA from hypothetical changes in estimated future gross profits and the embedded derivative discount rate are summarized as follows:

	December 31, 2016			
(In millions)	DAC	DSI	VOBA	Total
+10% estimated future gross profits	$ 21	9	$ 46	$ 76
-10% estimated future gross profits	(26)	(11)	(51)	(88)
+100 bps discount rate	(35)	(18)	(38)	(91)
-100 bps discount rate	40	21	43	104

Stock-based Compensation

We have adopted various stock-based compensation plans in order to align incentive compensation to our employees, our directors and employees of AAM with the long term performance of our company. For more information regarding our stock-based compensation plans, refer to *Note 11 - Common Stock* and *Note 12 - Stock-based Compensation* of the consolidated financial statements, and, regarding our relationship with AAM, *Note 17 - Related Parties* of the consolidated financial statements. Under these stock-based compensation plans, we may issue non-qualified stock options, incentive stock options, rights to purchase shares, restricted shares, restricted stock units (RSUs), and other awards which may be settled in, or based upon, our Class A common shares.

We have issued Class M common shares and RSUs, which will be settled in Class A common shares assuming that such awards are exchanged for Class A common shares upon payment of a conversion price. Under the terms of the plans, a portion of the Class M common shares and RSUs is subject to time-based vesting conditions (Tranche 1), and the remainder (Tranche 2) is subject to vesting conditions based on the proceeds realized or deemed to be realized by certain holders of our Class A common shares, as defined in each incentive plan (Relevant Investors), except for the Tranche 2 Class M-1, M-2 and M-3 common shares, which became fully vested upon modification. Additionally, certain Class M-4 common shares were issued with time-based vesting conditions and market hurdles based on the price of our Class A common shares attaining certain targets following our initial public offering. We have also issued long-term incentive plan (LTIP) awards that consist of time and performance-based RSUs and time-based stock options for Class A common shares. The performance-based LTIP awards vest upon the Company meeting certain operating income and ROE targets.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We recognize the fair value of stock-based compensation over a participant's requisite service period through a charge to compensation expense and a corresponding entry to equity or a liability based on the vesting criteria and other pertinent terms of the awards. The compensation expense for Tranche 1 Class M common shares, Tranche 1 Class M RSUs and LTIP awards is generally recognized ratably over the vesting period. The compensation expense for Tranche 2 Class M common shares, other than those vested upon modification, and Tranche 2 Class M RSUs is recognized based on a combination of the probability of the Relevant Investors achieving certain performance hurdles and the assumed period to attain those performance hurdles. The Class M-4 common shares with share price market hurdles were entirely contingent on the completion of our initial public offering, therefore, expense recognition commenced upon completion of our initial public offering over the derived service period. Changes in our estimates and assumptions, including the number of stock awards that ultimately vest, may cause us to realize material changes in stock-based compensation expense in the future.

Our stock-based compensation plans also allow for the purchase by certain of our employees and directors and our affiliates of Class A common shares at either fair market value or a discounted price as approved by our compensation committee. Additionally, we may issue restricted Class A common shares to management and our affiliates. Class A common shares are accounted for as equity awards and the related compensation expense is recognized ratably over the vesting period, if any. The compensation expense for Class A common shares is calculated based on the grant date fair value of the Class A common shares less the purchase price, multiplied by the number of shares awarded.

Valuation Methodology and Assumptions

We determine the fair value of the Class M common shares, RSUs and LTIP stock options using the Black-Scholes option pricing model, with application of a Monte Carlo simulation to determine the value of the Tranche 2 Class M-4 common shares and Tranche 2 Class M RSUs. The Monte Carlo simulation uses a statistical formula underlying the Black-Scholes model and binomial formulas, and is further described under *Tranche 2 Vesting Estimate* below.

To estimate an award's fair value using the Black-Scholes option pricing model, it is necessary to develop assumptions of the expected term, expected volatility, expected dividend yield and the risk-free interest rate. The expected term and expected volatility assumptions are generally the most sensitive of the assumptions in the Black-Scholes model with variability in these assumptions having a more significant impact on the award's fair value than the assumptions on the expected dividend yield or risk-free interest rate, if all other assumptions are held equal. We have assumed no dividends as we have not declared any common stock dividends to date and do not expect to declare common stock dividends in the near future. The risk-free interest rate is derived from the U.S. Constant Maturity Treasury yield at the valuation date, with maturity corresponding to the weighted-average expected term. In addition, we have made assumptions concerning forfeitures and the probability that certain vesting conditions will be met.

Expected Term

The Black-Scholes model uses a single input for the award's expected term (the weighted average expected term), the anticipated time period between the valuation date and the exercise date or post-vesting cancellation date, to estimate an employee award's fair value. Developing the expected term assumption is highly subjective as employees may exercise options at widely varying times. A change in the expected term may have a significant effect on the fair value of the award. For more information regarding our expected term assumptions, refer to *Note 12 - Stock-based Compensation* to the consolidated financial statements.

Expected Volatility

Volatility is a statistical measurement of the magnitude of stock's price variance over a given historical period and is used to determine the expected variability of the returns on a company's stock. Volatility may have a significant impact on the fair value of a share-based event. Given that a more volatile stock has greater upside potential than a less volatile stock, an award tied to a high volatility stock has greater value than an award tied to a low-volatility stock, assuming all other assumptions are equal.

Absent an established history in a public market for our shares, we have estimated volatility of our share price based on the published historical volatilities of publicly-traded insurance company peers. For more information regarding our expected volatility assumptions, refer to *Note 12 - Stock-based Compensation* to the consolidated financial statements.

Pre-Vesting Forfeitures

In determining our pre-vesting forfeiture assumption we considered employee classification, economic environment, and historical experience. Based on these considerations, we estimate that 5% of the granted awards will have been forfeited at the end of the vesting period. We expect the number of vesting shares, as a percent of total shares granted, to decrease each year, with the lowest vesting percentage to occur in the last year during the vesting period. As such, an annual forfeiture rate of 1.7% was determined to result in the overall 5% forfeiture rate for the entire vesting life. Changes in assumptions used to estimate the forfeiture rate could have a significant impact of the amount and timing of the compensation expense recognized in each period.

Tranche 2 Vesting Estimate

The Tranche 2 Class M-4 common shares and Tranche 2 Class M RSUs include vesting assumptions developed using a Monte-Carlo simulation. The Monte-Carlo simulation uses large samples of possible outcomes through a randomly generated process that reflects the proportional distribution of each outcome's probability and formula-based rules regarding the expected exercise patterns to generate the possible future value of the shares at a liquidity event. The fair value is then estimated by averaging the value for all simulated paths and discounting the results at the risk-free interest rate to the valuation date. In developing this estimate using a Monte-Carlo simulation it is critical that an appropriately large sample of possible outcomes is used. We are currently running 100,000 scenarios of our equity value.

Consolidation

We consolidate all entities in which we hold a controlling financial interest as of the financial statement date whether through a majority voting interest or otherwise, including those investment funds that meet the definition of a VIE in which we are determined to be the primary beneficiary. If we are not the primary beneficiary, generally the general partner or another limited partner consolidates the investment fund, and we record the investment as an equity-method investment. Refer to *Note 4 - Variable Interest Entities* to the consolidated financial statements.

The determination as to whether an entity qualifies as a VIE depends on the underlying facts and circumstances surrounding each entity. Our assessment of whether an entity is a VIE and the determination of whether we should consolidate such VIE may require significant judgment. Those judgments include, but are not limited to: (1) determining whether the total equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support; (2) evaluating whether the holders of the equity investment at risk, as a group, can make decisions that have a significant effect on the success of the entity; (3) determining whether two or more parties' equity interests should be aggregated; (4) determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive the expected residual returns from an entity; and (5) evaluating the nature of the relationship and activities of the parties involved in determining which party within a related-party group is most closely associated with the VIE in situations where related parties share power or are under common control. Judgments are also made in determining whether we, as a member in the equity group have a controlling financial interest, including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. This analysis includes any interests we may have through related parties.

In addition, whether fees paid to the decision maker in the VIE are customary and commensurate with the level of services provided impacts whether the decision maker holds a variable interest, after factoring in all other economic interests including proportionate interests through related parties. Since Apollo is an affiliate and often is the decision maker for VIEs in which we have invested, this determination can be significant to our consolidation conclusion.

Determining which party is more closely associated with an entity is only performed when the related party group that has a controlling financial interest, shares power or is under common control. When the related party group holding a controlling financial interest is not under common control, then we would only be deemed to be the primary beneficiary if substantially all the activities of the entity are performed on our behalf. There is also judgment involved in the determination of whether substantially all of the activities of a VIE investment are conducted on our behalf. This assessment is primarily qualitative and focused on relationships between us and the investment fund being evaluated, but also includes an analysis of the quantitative impacts of the investment fund on the economics we receive.

Additionally, determining whether a VIE meets the criteria of an investment company is qualitative in nature and may involve significant judgment. The significance of this distinction relates to whether the investment fund retains the specialized accounting afforded investment companies.

To be deemed an investment company an entity must, at a minimum, meet the following fundamental criteria: (1) obtain funds from one or more investors and provides the investor(s) with defined investment management services, (2) commit to its investor(s) that its business purpose and only substantive activities are investing funds solely for returns from capital appreciation, investment income, or both, and (3) it or its affiliates do not obtain or have the objective of obtaining returns or benefits from an investee or its affiliates that are not normally attributable to ownership interests or that are other than capital appreciation or investment income.

If the three fundamental characteristics are met, we evaluate whether the entity possesses some or all of the following typical characteristics that are generally associated with an investment company: (1) has more than one investment, (2) has more than one investor, (3) has investors that are not related parties of the parent entity (if there is a parent) and the investment manager, (4) has ownership interests in the form of equity or partnership interests, and (5) manages substantially all of its investments on a fair value basis. Lacking one or more of these characteristics does not preclude an entity from being considered an investment company. All relevant facts and circumstances are taken into consideration in making a final determination.

Income Taxes

In determining our income taxes, management is required to interpret complex income tax laws and regulations. We are subject to examinations by federal, state, local and foreign income tax authorities that may give rise to different interpretations of these complex laws and regulations. Due to the nature of the examination process, it generally takes years before these examinations are completed and these matters are resolved. We recognize the tax benefit from an uncertain tax position only if it is more-likely-than-not that the tax position will be sustained on examination by the relevant taxing authorities based on the technical merits of our position. The aggregate amount of any additional income tax liabilities that may result from these examinations, if any, is not expected to have a material impact on our consolidated financial results. For more information regarding income taxes, refer to *Note 15 - Income Taxes* to the consolidated financial statements.

Accounting for income taxes represents our estimate of various events and transactions based on management's judgment and interpretation of the laws and regulations enacted as of the reporting date. Deferred tax assets and liabilities resulting from temporary differences between the financial reporting and tax basis of assets and liabilities are measured at the balance sheet date using enacted tax rates expected to apply to taxable income in the years the temporary differences are expected to reverse. We routinely evaluate the likelihood of realizing the benefit of our deferred tax assets and may record a valuation allowance if, based on all available evidence, we determine that it is more-likely-than-not some portion of the tax benefit will not be realized. We have deferred tax assets primarily related to reserve valuation differences, net operating losses, DAC and employee benefit plans.

On a quarterly basis, we test the value of deferred tax assets for impairment at the taxpaying-component level within each tax jurisdiction. Significant judgment and estimates are required in determining whether valuation allowances should be established as well as the amount of such allowances. When making such determination, consideration is given to, among other things, the following:

- sufficient taxable income within the allowed carryback or carryforward periods;
- future reversals of existing taxable temporary differences, including any tax planning strategies that could be utilized;
- nature or character (e.g., ordinary vs. capital) of the deferred tax assets and liabilities; and
- future taxable income exclusive of reversing temporary differences and carryforwards.

We may be required to change the provision for income taxes in certain circumstances. Examples of such circumstances include when the ultimate deductibility of certain items is challenged by taxing authorities, when it becomes clear that certain items will not be challenged, when forecasted results used in determining valuation allowances on deferred tax assets significantly change, or when receipt of new information indicates the need for adjustment in valuation allowances. Additionally, future events such as changes in tax legislation could have an impact on the provision for income tax and the effective tax rate. Any such changes could significantly affect the amounts reported in our consolidated financial statements in the period to which these changes apply.

We have not provided for withholding taxes on undistributed earnings of our U.S. and German subsidiaries on our consolidated financial statements as of December 31, 2016. Although withholding taxes may apply in the event a dividend is paid by our U.S. or German subsidiaries, we have not accrued withholding taxes as we do not intend to remit these earnings. The cumulative amount subject to withholding tax, if distributed, as well as the determination of the associated tax liability, is not practicable to compute; however, it may be material to our consolidated financial condition and results of operations. Any dividends remitted to AHL from ALRe are not subject to withholding tax.

Impact of Recent Accounting Pronouncements

For a discussion of new accounting pronouncements affecting us, refer to *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* to the consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risks

Risk Management Framework

The function of our risk management framework is to identify, assess and prioritize risks to ensure that both senior management and the board of directors understand and can manage our risk profile. The processes supporting risk management are designed to ensure that our risk profile is consistent with our stated risk appetite and that we maintain sufficient capital to support our corporate plan while meeting the requirements imposed by our policyholders, shareholders, and regulators. Risk management strives to enable us to maximize the value of our existing business platform to shareholders, preserve our ability to realize business and market opportunities under moderately stressful market conditions, and to withstand the impact of severely adverse events.

The risk management framework includes a governance committee structure that supports accountability in current risk-based decision making, and effective risk management. Governance committees are established at three levels: the board of directors, AHL management, and subsidiary management. We utilize a host of assessment tools to monitor and assess our risk profile, results of which are shared with senior management periodically at management level committees such as the management risk committee (MRC) and the management investment committee (MIC) and with the board of directors quarterly. Business management retains the primary responsibility for day-to-day management of risk. See *Item 1A. Risk Factors* for further detail.

Risk Management

The risk management team structure consists of an ERM team, a derivatives trading team and an asset risk team. The risk management team is led by our Chief Risk Officer, who reports functionally to the board of directors, and administratively (day-to-day operations), to our President. Our risk management team is comprised of approximately 30 dedicated, full-time employees.

Asset and Liability Management

Asset and liability risk management is a joint effort that spans business management and the entire risk management team. Processes established to analyze and manage the risks of our assets and liabilities include but are not limited to:

- analyzing our liabilities to ascertain their sensitivity to behavioral variations and changes in market conditions and actuarial assumptions;
- analyzing interest rate risk, cash flow mismatch, and liquidity risk management;
- performing scenario and stress analyses to examine their impacts on capital and earnings;
- performing cash flow testing and capital modeling;
- modeling the values of the derivatives embedded in our policy liabilities so that they can be effectively hedged;
- hedging unwanted risks, including from embedded derivatives, interest rate exposures and currency risks;
- reviewing our corporate plan and strategic objectives, and identifying prospective risks to those objectives under normal and stressed economic, behavioral and actuarial conditions; and
- providing appropriate risk reports that show consolidated risk exposures from assets and liabilities as well as the economic consequences of stress events and scenarios.

Product Development

Risk management is involved in all stages of the product development process and each newly proposed product undergoes review by our risk management team before a product may be launched. In the idea generation stage, our product, sales, legal and risk management teams discuss and screen new product ideas. Our risk management team is involved early on in the process in order to understand the risk inherent in each new product. If a product advances to the initial design stage, it undergoes preliminary pricing and model development. At this stage, our risk management team ensures the product design incorporates management levers to the extent practicable and that any potential risks are those that we believe we can properly manage. In the detailed design stage, pricing and risk analysis must be completed. Our risk management team then reviews the product's pricing assumptions and must approve the product before it can advance to the implementation phase. At the implementation stage, our risk management team evaluates the pricing analysis and underlying assumptions (particularly assumptions with respect to economic and policyholder behavior), performs stress testing to evaluate tail risk exposure and performs further analysis to identify additional information necessary to gain a detailed understanding of the product's capital implications. Our risk management team must provide approval again before the product can advance to the final stage. Before a new product may be launched, a detailed pricing memorandum is developed and the risk management team must provide final approval.

Market Risk and Management of Market Risk Exposures

Market risk is the risk of incurring losses due to adverse changes in market rates and prices. Included in market risk are potential losses in value due to credit and counterparty risk, interest rate risk, currency risk, commodity price risk and equity price risk. We are primarily exposed to credit risk, interest rate risk and, to a lesser extent, equity price risk.

Item 7A. Quantitative and Qualitative Disclosures About Market Risks

Credit Risk and Counterparty Risk

In order to operate our business model, which is based on earning spread income, we must bear credit risk. However, as we assume credit risk through our investment, reinsurance and hedging activities, we endeavor to ensure that risk exposures remain diversified, that we are adequately compensated for the risks we assume and that the level of risk is consistent with our risk appetite and objectives.

Credit risk is a key risk taken in the asset portfolio, as the credit spread on our investments is what drives our spread income. We manage credit risk by avoiding idiosyncratic risk concentrations, understanding and managing our systematic exposure to economic and market conditions through stress testing, monitoring investment activity daily and distinguishing between price and default risk from credit exposures. Concentration and portfolio limits are designed to ensure that exposure to default and impairment risk is sufficiently modest so as to not represent a solvency risk to us, even in severe economic conditions.

The investment teams within AAM, which manage substantially all of our fixed income assets, except those of our German operations, focus on in-depth, bottom-up portfolio construction, and disciplined risk management. Their approach to taking credit risk is formulated based on:

- a fundamental view on existing and potential opportunities at the security level;
- an assessment of the current risk/reward proposition for each market segment;
- identification of downside risks and assigning a probability for those risks; and
- establishing a plan for best execution of the investment action.

A dedicated set of AHL risk managers, who are on-site with AAM, monitor the asset risks to ensure that such risks are consistent with our risk appetite, standards for committing capital, and overall strategic objectives. Our risk management team is also a key contributor to the OTTI/credit impairment evaluation process.

In addition to credit-risk exposures from our investment portfolio, we are also exposed to credit risk from our counterparty exposures from our derivative hedging and reinsurance activities. Derivative counterparty risk is managed by trading on a collateralized basis with counterparties under International Swaps and Derivatives Association (“ISDA”) documents with a credit support annex having low or zero-dollar collateral thresholds.

We utilize reinsurance to mitigate risks that are inconsistent with our strategy or objectives. For example, we have reinsured much of the mortality risk we would otherwise have accumulated through our various acquisitions, allowing us to focus on our core annuity business. These reinsurance agreements expose us to the credit risk of our counterparties. We manage this risk to avoid counterparty risk concentrations through various mechanisms: utilization of reinsurance structures such as funds withheld or modco so as to retain ownership of the assets and limit counterparty risk to the cost of replacing the counterparty; diversification across counterparties; and when possible, novating policies to eliminate counterparty risk altogether.

Interest Rate Risk

Significant interest rate risk may arise from mismatches in the timing of cash flows from our assets and liabilities. Management of interest rate risk at the company-wide level, and at the various operating company levels, is one of the main risk management activities in which senior management engages.

Depending upon the materiality of the risk and our assessment of how we would perform across a spectrum of interest rate environments, we may seek to mitigate interest rate risk using on-balance-sheet strategies (portfolio management) and off-balance-sheet strategies (derivative hedges such as interest rate swaps and futures). We monitor ALM metrics (such as key-rate durations and convexity) and employ quarterly cash flow testing requirements across all of our insurance companies to assure the asset and liability portfolios are managed to maintain net interest rate exposures at levels that are consistent with our risk appetite. We have established a set of exposure and stress limits to communicate our risk tolerance and to ensure adherence to those risk tolerance levels. Risk management personnel and the MRC and MIC (together, management committees) are notified in the event that risk tolerance levels are exceeded. Depending on the specific risk threshold that is exceeded, the appropriate management committee then makes a decision as to what actions, if any, should be undertaken.

Active portfolio management is performed by our investment managers at AAM, with direction from the management committees. ALM risk is also managed by the management committees. The performance of our investment portfolio managed by AAM is reviewed periodically by the management committees and the board of directors. The management committees strive to improve returns to shareholders and protect policyholders, while dynamically managing the risk within our expectations.

Equity Risk

Our FIAs require us to make payments to policyholders that are dependent on the performance of equity market indices. In addition, our investment portfolio can be invested in strategies involving public and private equity positions. In general, we have limited appetite for passive, public equity investments. We seek to minimize the equity risk from our liabilities by economically defeasing this equity exposure with granular, policy-level-based hedging.

Item 7A. Quantitative and Qualitative Disclosures About Market Risks

The equity index hedging framework implemented is one of static core hedges with dynamic overlays. Unique policy-level liability options are matched with static OTC options. Residual risk arising from policyholder behavior and other trading constraints (for example minimum trade size) are managed dynamically by decomposing the risk of the portfolio (asset and liability positions) into market risk measures which are managed to pre-established risk limits. The portfolio risks are measured overnight and rebalanced daily to ensure that the risk profile remains within risk appetite. Valuation is done at the position level, and risks are aggregated and shown at the level of each underlying index. Risk measures that have term structure sensitivity, such as index volatility risk, and interest rate risk, are monitored and risk managed along the term structure.

We are also exposed to equity risk in our alternative investment portfolio. The form of those investments is typically a limited partnership interest in a fund. We currently target fund investments that have characteristics resembling fixed income investments versus those resembling pure equity investments, but as holders of partnership positions, our investments are generally held as equity positions. The alternative investments are decomposed into several sub-types, including at the most liquid end of the spectrum “liquid strategies,” (which is mostly exposure to publicly traded equities), followed by “hedge funds,” “credit funds,” “private equity,” and “real assets.” Direct public equity market exposure is concentrated mostly in the liquid strategies segment.

Our investment mandate in our alternative investment portfolio is inherently opportunistic. Each investment is examined and analyzed on its own merits to gain a full understanding of the risks present, and with a view toward determining likely return scenarios, including the ability to withstand stress in a downturn. We have a strong preference for alternative investments that have the following characteristics, among others: (1) investments that constitute a direct investment or an investment in a fund with a high degree of co-investment; (2) investments with debt-like characteristics (for example, a stipulated maturity and par value), or alternatively, investments with reduced volatility when compared to pure equity; and (3) investments that have less downside risk.

Alternative investments are monitored in real-time across the variety of markets that they span. The alternative investment portfolio is monitored to ensure diversification across asset classes and strategy, and the portfolio’s performance under stress scenarios is evaluated routinely as part of management and board of director reviews. Since alternative investments are marked-to-market on our balance sheet, risk analyses focus on potential changes in market value across a variety of market stresses. In cases where investment performance has not met expectations, or where the balance of risk and reward has shifted against it, we will seek to exit the investment as quickly as possible, and minimize its downside exposure in doing so.

Currency Risk

We manage our currency risk so as to maintain minimal exposure to currency fluctuations. We attempt to hedge completely the currency risk arising in our investment portfolio or FIA products. In general, we match currency exposure of assets and liabilities. When the currency denominations of the assets and liabilities do not match, we generally undertake hedging activities to eliminate or mitigate currency mismatch risk.

Scenario Analysis

We evaluate our exposure to market risk through internally defined modeling of our portfolio performance during times of economic stress. We manage our business, capital and liquidity needs to withstand stress scenarios and target capital we believe will maintain our current ratings in a moderate recession scenario and will remain investment grade under a substantially severe financial crisis akin to the Lehman scenario in 2008. In the recession scenario, we calibrate recessionary shocks to several key risk factors (including but not limited to, S&P 500, BBB corporate spreads, high yield corporate spreads, 2 year and 10 year U.S. Treasury yields) using data from the 1991, 2001, and 2008 recessions, and estimate mark to market impacts to the various sectors in our portfolio using regression analysis of their credit spreads to the key risk factors. To estimate OTTI impacts, we use historical default, stressed recovery, and ratings migration rates from the aforementioned recessionary periods. In the Lehman scenario, we use credit spread and interest rate movements between September 12, 2008 and December 15, 2008 to estimate mark to market changes, and we use one-year default probabilities from 2008, along with stressed recovery and ratings migration rates, to estimate OTTI impacts. We review the impacts of our stress test analyses quarterly with management.

Sensitivities

Interest Rate Risk

We assess interest rate exposures for financial assets, liabilities and derivatives using hypothetical stress tests and exposure analyses. Assuming all other factors are constant, if there was an immediate, parallel increase in interest rates of 25 basis points from levels as of December 31, 2016, the estimated point-in-time impact to our pre-tax consolidated statements of income would be an increase of $5 million as of December 31, 2016 compared to an increase of $23 million as of December 31, 2015. The decrease compared to prior year was driven primarily by growth of the assumed reinsurance embedded derivative. An immediate, parallel decline in interest rates of 25 basis points is estimated to decrease our pre-tax consolidated statements of income as of December 31, 2016 and 2015 by similar amounts to the increases shown above.

Assuming the 25 basis points increase in interest rates persists for a 12-month period, the estimated impact to operating income, net of tax, would be an increase of $25 million. This is driven by an increase in investment income from floating rate assets, offset by DAC, DSI and VOBA amortization and rider reserve change, all calculated without regard to future changes to assumptions.

Item 7A. Quantitative and Qualitative Disclosures About Market Risks

The models used to estimate the impact of a 25 basis point change in market interest rates incorporate numerous assumptions, require significant estimates and assume an immediate change in interest rates without any discretionary management action to counteract such a change. Consequently, potential changes in our valuations indicated by these simulations will likely be different from the actual changes experienced under any given interest rate scenarios and these differences may be material. Because we actively manage our assets and liabilities, the net exposure to interest rates can vary over time. However, any such decreases in the fair value of fixed maturity securities, unless related to credit concerns of the issuer requiring recognition of an OTTI, would generally be realized only if we were required to sell such securities at losses to meet liquidity needs.

Public Equity Risk

Assuming all other factors are constant, we estimate that a decline in public equity market prices of 10% would cause a decrease to our pre-tax consolidated statements of income of $118 million as of December 31, 2016 compared to $112 million as of December 31, 2015.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
of Athene Holding Ltd.:

In our opinion, the accompanying consolidated balance sheets as of December 31, 2016 and 2015 and the related consolidated statements of income, comprehensive income (loss), equity, and cash flows for the years then ended present fairly, in all material respects, the financial position of Athene Holding Ltd. and its subsidiaries and the results of their operations and their cash flows in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules as of December 31, 2016 and 2015, and for the years then ended, listed in the index appearing under Item 15.2 present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedules based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

1. Business, Basis of Presentation and Significant Accounting Policies

Athene Holding Ltd. (AHL), a Bermuda exempted company, together with its subsidiaries (collectively, Athene, we, our, us, or the Company), is a leading retirement services company that issues, reinsures and acquires retirement savings products in all U.S. states, the District of Columbia and Germany.

We conduct business primarily through the following consolidated subsidiaries:

- Athene Life Re Ltd., a Bermuda exempted company to which AHL's other insurance subsidiaries and third party ceding companies directly and indirectly reinsure a portion of their liabilities (ALRe);
- Athene USA Corporation, an Iowa corporation and its subsidiaries (Athene USA); and
- Athene Deutschland GmbH & Co. KG, a German partnership and its subsidiaries (ADKG).

In addition, we consolidate certain variable interest entities (VIEs), for which we determined we are the primary beneficiary, as discussed in *Note 4 - Variable Interest Entities*.

Consolidation and Basis of Presentation-Our consolidated financial statements include our wholly-owned subsidiaries, investees we control and any VIEs where we are the primary beneficiary. Investments in entities that we do not control, but have the ability to exercise significant influence over operating and financing decisions, other than investments for which we have elected the fair value option, are accounted for under the equity method. Intercompany balances and transactions have been eliminated.

For entities that are consolidated, but not 100% owned, we allocate a portion of the income or loss and corresponding equity to the owners other than the Company. We include the aggregate of the income or loss and corresponding equity that is not owned by the Company in noncontrolling interests in the consolidated financial statements.

We report investments in related parties and assets and liabilities of consolidated VIEs separately, as further described in the accounting policies that follow.

We have prepared the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual experience could materially differ from these estimates and assumptions. Our principal estimates impact:

- fair value of investments;
- impairment of investments and valuation allowances;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs (DAC), deferred sales inducements (DSI) and value of business acquired (VOBA);
- future policy benefit reserves;
- valuation allowances on deferred tax assets; and
- stock-based compensation.

Additional details around these principal estimates and assumptions are discussed in the significant accounting policies that follow and the related footnote disclosures.

Summary of Significant Accounting Policies

Investments

Fixed Maturity and Equity Securities - Fixed maturity securities includes bonds, collateralized loan obligations (CLO), asset-backed securities (ABS), residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and redeemable preferred stock. Equity securities includes common stock, mutual funds and non-redeemable preferred stock. We classify fixed maturity and equity securities as available-for-sale (AFS) or trading at the time of purchase and subsequently carry them at fair value. Fair value hierarchy and valuation methodologies are discussed in *Note 5 - Fair Value*. Classification is dependent on a variety of factors including our expected holding period, election of the fair value option and asset and liability matching.

AFS Securities - Unrealized gains and losses on AFS securities, net of tax and adjustments to DAC, DSI, VOBA and future policy benefits, if applicable, are generally reflected in accumulated other comprehensive income (loss) (AOCI) on the consolidated balance sheets. Unrealized gains or losses relating to identified risks within AFS securities in fair value hedging relationships are reflected in investment related gains (losses) on the consolidated statements of income.

Trading Securities - We elected the fair value option for certain fixed maturity securities. These fixed maturity securities are classified as trading, with changes to fair value included in investment related gains (losses) on the consolidated statements of income. Although the securities are classified as trading, the trading activity related to these investments is primarily focused on asset and liability matching activities and is not intended to be an income strategy based on active trading. As such, the activity related to these investments on the consolidated statements of cash flows is classified as investing activities. Trading securities include mutual funds supporting unit-linked investment contracts.

We generally record security transactions on a trade date basis, with any unsettled trades recorded in other assets or other liabilities on the consolidated balance sheets. For those security transactions not recorded on a trade date basis, such as private placement and investment fund purchases, we record on a settlement date basis.

Purchased Credit Impaired (PCI) Investments - We purchase certain structured securities, primarily RMBS and re-performing mortgage loans, having deterioration in credit quality since their issuance which meet the definition of PCI investments. We determined, based on our expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that we would not collect all contractually required payments, including both principal and interest, while also considering the effects of any prepayments for these PCI investments. Based on these assumptions, the difference between the undiscounted expected future cash flows of the PCI investments and the recorded investment represents the initial accretable yield, which is accreted into investment income, net of related expenses, over their remaining lives on a level-yield basis. The difference between the contractually required payments on the PCI investment and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change.

Quarterly, we evaluate the undiscounted expected future cash flows associated with PCI investments based on updates to key assumptions. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI investments will change the accretable yield prospectively. Declines in undiscounted expected future cash flows due to further credit deterioration, as well as changes in the expected timing of the cash flows, can result in the recognition of an other-than-temporary impairment (OTTI) charge for PCI securities or a valuation allowance for PCI loans. Significant increases in undiscounted expected future cash flows are recognized prospectively as an adjustment to the accretable yield.

Mortgage Loans - Mortgage loans are primarily stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on its contractual interest rate. We record amortization of premiums and discounts using the effective yield method and contractual cash flows on the underlying loan. We accrue interest on loans until it is probable we will not receive interest or the loan is 90 days past due. Interest income, amortization of premiums and discounts and prepayment fees are reported in net investment income on the consolidated statements of income. We have also elected the fair value option on a portion of our mortgage loans.

Investment Funds - We invest in certain non-fixed income, alternative investments in the form of limited partnerships or similar legal structures (investment funds). For investment funds in which we have determined we are not the primary beneficiary, and therefore not required to consolidate, we typically record these investments using the equity method of accounting, where the cost is recorded as an investment in the fund. Adjustments to the carrying amount reflect our pro rata ownership percentage of the operating results as indicated by net asset value (NAV) in the investment fund financial statements, which can be on a lag of up to three months when investee information is not received in a timely manner.

We record our proportionate share of investment fund income within net investment income on the consolidated statements of income. Contributions paid or distributions received by us are recorded directly to the investment fund balance as an increase to carrying value or as a return of capital, thus reducing our carrying value.

Policy Loans - Policy loans are funds provided to policyholders in return for a claim on the policy's account value. The funds provided are limited to a specified percentage of the account balance. The majority of policy loans do not have a stated maturity and the balances and accrued interest are repaid with proceeds from the policy account balance. Policy loans are reported at the unpaid principal balance. Interest income is recorded as earned using the contract interest rate and is reported in net investment income on the consolidated statements of income.

Funds Withheld at Interest - Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which we act as reinsurer. Assets equal to statutory reserves are withheld and legally owned by the ceding company. We periodically settle interest accruing to those assets at rates defined by the terms of the agreement. The underlying agreements contain embedded derivatives as discussed below.

Real Estate - Real estate investments are stated at cost less accumulated depreciation. Depreciation is recorded on a straight-line basis over the estimated useful life of the asset, which is typically 40 years, and is included in net investment income on the consolidated statements of income. We periodically review our real estate investments for impairment and test for recoverability when events or changes in circumstances indicate the carrying value may not be recoverable and exceeds its estimated fair value. We recognize an impairment to fair value if the carrying amount of a property exceeds the expected undiscounted cash flows.

Real estate investments we commit to a plan to sell within one year and actively market are classified as held for sale. Real estate held for sale is stated at the lower of depreciated cost or estimated fair value less expected disposition costs and is not depreciated.

Short-term Investments - Short-term investments consists of financial instruments with maturities of greater than three months but less than twelve months when purchased. Short-term debt securities are accounted for as trading or AFS consistent with our policies for those investments. Short-term loans are carried at amortized cost. Fair values are determined consistent with policies described in *Note 5 - Fair Value* for the respective investment type.

Investment Income - We recognize investment income as it accrues or is legally due, net of investment management and custody fees. Investment income on fixed maturity securities includes coupon interest, as well as the amortization of any premiums and the accretion of any discount. Investment income on equity securities represents dividend income and preferred coupons. Realized gains and losses on sales of investments are included on the consolidated statements of income in investment related gains (losses). Realized gains and losses on investments sold are determined based on a first-in first-out method.

Other-Than-Temporary Impairment - We identify fixed maturity and equity securities that could potentially have impairments that are other-than-temporary by monitoring market events for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings and outlook, frequency of late payments, pricing levels, key financial ratios, financial statements, revenue forecasts and cash flow projections.

We review all securities on a case-by-case basis to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more likely than not that we will be required to sell the security before the recovery of its cost or amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine that a security is other-than-temporarily impaired, an impairment loss is recognized.

The recognition of impairment losses on fixed maturity securities is dependent upon the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its cost or amortized cost less any recorded credit loss, we recognize an OTTI in other-than-temporary impairment losses on the consolidated statements of income for the difference between amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit loss portion in income and the non-credit loss portion in AOCI on the consolidated balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the estimated cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The techniques and assumptions for establishing the estimated cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security-specific facts and circumstances including timing, security interests and loss severity.

In periods after an OTTI is recognized on a fixed maturity security, we report the impaired security as if it had been purchased on the date it was impaired and continue to estimate the present value of the estimated cash flows of the security. Accordingly, the discount (or reduced premium) based on the new cost basis is accreted into net investment income over the remaining term of the fixed maturity security in a prospective manner based on the amount and timing of estimated future cash flows.

For equity method investments, we consider financial and other information provided by the investee, other known information and inherent risks in the underlying investments, as well as future capital commitments, in determining whether an impairment has occurred. Declines in value of equity method investments not expected to be recovered are reflected through impairment in other-than-temporary impairment losses on the consolidated statements of income.

We impair a mortgage loan when it is probable we will not collect all amounts due under the agreement. We establish a general valuation allowance on mortgage loans based on loss history. Additionally, we establish a valuation allowance on individual loans based on expected losses from future dispositions or settlement, including foreclosures. We calculate the allowance based on how much the carrying value exceeds one of these values:

- the present value of expected future cash flows discounted at the loan's original effective interest rate;
- the value of the loan's collateral if it is in the process of foreclosure or otherwise collateral dependent; or
- the loan's fair value if the loan is being sold.

We first apply any interest accrued or received on the net carrying amount of the impaired loan to the principal of the loan, and once the principal is repaid, we include amounts received in net investment income. We limit accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, we recognize interest income on a cash basis. Loans deemed uncollectible or in foreclosure are charged off against the valuation allowances, and subsequent recoveries, if any, are credited to the valuation allowances. Changes in valuation allowances are reported in investment related gains (losses) on the consolidated statements of income.

The cost of other invested assets is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within other-than-temporary impairment losses, and the cost basis of the investment securities is reduced accordingly. We do not change the revised cost basis for subsequent recoveries in value.

Derivative Instruments-We invest in derivatives to hedge the risks experienced in our ongoing operations, such as equity risk, interest rate risk, cash flow risks or for other risk management purposes, which primarily involve managing liability risks associated with our indexed annuity products and reinsurance agreements. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or other underlying notional amounts. Derivative assets and liabilities are carried at fair value on the consolidated balance sheets. We elect to present any derivatives subject to master netting provisions as a gross asset or liability and gross of collateral. Disclosures regarding balance sheet presentation of derivatives subject to master netting agreements are discussed in *Note 3 - Derivative Instruments*. We may designate derivatives as cash flow or fair value hedges.

Hedge Documentation and Hedge Effectiveness - To qualify for hedge accounting, at the inception of the hedging relationship, we formally document our risk management objective and strategy for undertaking the hedging transaction, as well as our designation of the hedge as a cash flow or fair value hedge. In this documentation, we identify how the hedging instrument is expected to hedge the designated risks related to the hedged item, the method that will be used to retrospectively and prospectively assess the hedging instrument's effectiveness and the method which will be used to measure ineffectiveness. A derivative designated as a hedging instrument must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is formally assessed at inception and periodically throughout the life of the designated hedging relationship.

For a cash flow hedge, changes in the fair value of the hedging derivative measured as effective are reported within AOCI, and the related gains or losses on the derivative are reclassified into the consolidated statements of income when the cash flows of the hedged item affect earnings. Any ineffectiveness is reported in investment related gains (losses) on the consolidated statements of income each reporting period as effectiveness is assessed.

For a fair value hedge, changes in the fair value of the hedging derivative, including any amounts measured as ineffective, and changes in the fair value of the hedged item related to the designated risk being hedged, are reported on the consolidated statements of income according to the nature of the risk being hedged.

We discontinue hedge accounting prospectively when: (1) we determine the derivative is no longer highly effective in offsetting changes in the estimated cash flows or fair value of a hedged item; (2) the derivative expires, is sold, terminated, or exercised; or (3) the derivative is de-designated as a hedging instrument. When hedge accounting is discontinued, the derivative continues to be carried on the consolidated balance sheets at fair value, with changes in fair value recognized in investment related gains (losses) on the consolidated statements of income.

For a derivative not designated as a hedge, changes in the derivative's fair value and any income received or paid on derivatives at the settlement date are included in investment related gains (losses) on the consolidated statements of income.

Embedded Derivatives - We issue and reinsure products, primarily fixed indexed annuity products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the consolidated balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with fixed indexed annuities are reflected in interest sensitive contract benefits on the consolidated statements of income. Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains and losses on the host contract and derivative will be reflected within investment related gains (losses) on the consolidated statements of income.

Fixed indexed annuity and indexed universal life insurance contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of embedded derivatives is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For contracts we issue to policyholders, the embedded derivative cash flows are discounted using a rate that reflects our credit rating. For funds withheld reinsurance contracts, we do not use a credit spread as the funds are backed by the cedant's collateral. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

Additionally, reinsurance agreements written on a modified coinsurance (modco) or funds withheld coinsurance (funds withheld) basis contain embedded derivatives. The right to receive or obligation to pay the total return on the assets supporting the funds withheld at interest or funds withheld liability, respectively, represent a total return swap with a floating rate leg. The fair value of embedded derivatives on modco and funds withheld agreements is computed as the unrealized gain (loss) on the underlying assets and is included in the funds withheld at interest and funds withheld liability lines on the consolidated balance sheets for assumed and ceded agreements, respectively. The change in the fair value of the embedded derivatives is recorded in investment related gains (losses) on the consolidated statements of income. Assumed and ceded earnings from funds withheld at interest, funds withheld liability and changes in the fair value of embedded derivatives are reported in operating activities on the consolidated statements of cash flows. Contributions to and withdrawals from funds withheld at interest and funds withheld liability are reported in operating activities on the consolidated statements of cash flows.

Variable Interest Entities-An entity that does not have sufficient equity to finance its activities without additional financial support, or in which the equity investors, as a group, do not have the characteristics of a controlling financial interest is a VIE. The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and may require significant judgment. Our investment funds generally qualify as VIEs and are evaluated for consolidation under the VIE model.

We are required to consolidate a VIE if we are the primary beneficiary, defined as the variable interest holder with both the power to direct the activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. We determine whether we are the primary beneficiary of an entity based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose and our relative exposure to the related risks of the VIE. Since affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo), a related party, are the decision makers in certain of the investment funds, we and a member of our related party group may together have the characteristics of the primary beneficiary of an investment fund. In this situation, we have concluded we are not under common control, as defined by GAAP, with the related party, and therefore consolidate in the circumstances when substantially all of the activities of the VIE are conducted on our behalf. We reassess the VIE and primary beneficiary determinations on an ongoing basis.

If we are not the primary beneficiary, but are able to exert significant influence over the VIE’s operations, we record the VIE as an equity method investment. If we are not able to exercise significant influence, generally on investment funds in which we own a less than a 3% interest, we elect the fair value option.

See *Note 4 - Variable Interest Entities* for discussion of our interest in entities that meet the definition of a VIE.

Business Combinations and Goodwill-Business combination transactions are accounted for under the acquisition method. Accordingly, the purchase consideration is allocated to assets and liabilities based on their estimated fair value at the acquisition date. The consideration for the net assets acquired is determined prior to the assessment of the fair value of the net assets at the acquisition date. We have identified several intangible assets acquired in business combinations including VOBA, acquired distribution channels and state licenses. We value VOBA as described below under *Deferred Acquisition Costs, Deferred Sales Inducements and Value of Business Acquired*. We value distribution channels using the multi-period excess earnings method under the income approach and the state licenses using the market approach. Distribution channels and state licenses are included in other assets on the consolidated balance sheets.

Goodwill represents the excess of purchase consideration over the acquisition date fair value of net assets acquired and is included in the other assets on the consolidated balance sheets. Goodwill is not amortized but reviewed for impairment annually or more frequently if events occur or circumstances change indicating potential impairment has occurred. If the acquisition date fair value of the net assets acquired exceeds the purchase consideration in a business combination, a bargain purchase gain is recorded on the consolidated statements of income. See *Note 6 - Business Combinations* for details of business combination transactions.

Reinsurance-We assume and cede insurance and investment contracts under coinsurance, funds withheld and modco. We follow reinsurance accounting for transactions that provide indemnification against loss or liability relating to insurance risk (risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk consisting of underwriting, investment, timing risk and any other significant risks. Cessions under reinsurance do not discharge our obligations as the primary insurer, unless the requirements of assumption reinsurance have been met. We generally have the right of offset on reinsurance contracts, but have elected to present reinsurance settlement amounts due to and from the Company on a gross basis.

For investment contracts, assets and liabilities assumed or ceded under coinsurance, funds withheld, or modco are presented gross on the consolidated balance sheets. The change in assumed and ceded reserves, deposits and withdrawals are presented net in the interest sensitive contract benefits line on the consolidated statements of income. For insurance contracts, assets and liabilities assumed or ceded are presented gross on the consolidated balance sheets. The change in assumed and ceded reserves and benefits are presented net in the future policy and other policy benefits line on the consolidated statements of income. Assumed or ceded premiums are included in the premiums line of the consolidated statements of income.

Accounting for reinsurance requires the use of assumptions upon agreement inception, particularly related to the future performance of the underlying business and the potential impact of counterparty credit risks. We attempt to minimize our counterparty credit risk through the structuring of the terms of our reinsurance agreements, including the use of trusts, and we monitor credit ratings of counterparties for signs of declining credit quality. When a ceding company does not report information on a timely basis, we record accruals based on the best available information at the time, which includes the reinsurance agreement terms and historical experience. We periodically compare actual and anticipated experience to the assumptions used to establish reinsurance assets and liabilities. Refer to *Note 7 - Reinsurance* for more information.

Funds Withheld - For business assumed or ceded on a funds withheld basis, a funds withheld segregated portfolio comprised of invested assets and other assets is maintained by the ceding entity, which are sufficient to support the current balance of policy benefit liabilities of the ceded business on a statutory basis. The fair value of the funds withheld account is recorded as a funds withheld asset or liability and accrues interest payable at rates defined by the agreement terms and is settled periodically.

Modco - Modco is similar to funds withheld, except that the policy benefit liabilities are also not transferred to the assuming entity. For business assumed or ceded on a modco basis, the fair value of the funds withheld is accounted for under the same method described for funds withheld reinsurance above. Assumed policy benefit liabilities are included in interest sensitive contract benefits and ceded policy benefit liabilities are included in reinsurance recoverable on the consolidated balance sheets.

Cash and Cash Equivalents-Cash and cash equivalents include deposits and short-term highly liquid investments with a maturity of less than 90 days from the date of acquisition. Amounts included are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

Restricted Cash-Restricted cash primarily consists of cash and cash equivalents held in funds in trust as part of certain coinsurance agreements to secure statutory reserves and liabilities of the coinsured parties. Restricted cash is reported separately on the consolidated balance sheets. Changes in the restricted cash balance are reported in investing activities on the consolidated statements of cash flows.

Investments in Related Parties-Investments in related parties and associated earnings, other comprehensive income and cash flows are separately identified on the consolidated financial statements and accounted for consistently with the policies described above for each category of investment.

Deferred Acquisition Costs, Deferred Sales Inducements and Value of Business Acquired

Deferred Acquisition Costs and Deferred Sales Inducements - Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances, and are included in deferred acquisition costs, deferred sales inducements and value of business acquired on the consolidated balance sheets. We adjust the DAC and DSI balances due to the effects of net unrealized investment gains and losses on AFS securities. We perform periodic tests to determine if the deferred costs remain recoverable, including at issue. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC and DSI which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive life and investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impact of amounts for the change in fair value of the derivatives and the change in fair value of the embedded derivatives. Estimates of the future gross profits are based on assumptions using accepted actuarial methods.

Deferred costs related to contracts with only investment related sources of revenues are amortized using the effective interest method. The effective interest method amortizes the deferred costs by discounting the future liability cash flows at a break-even rate. The break-even rate is solved such that the present value of future liability cash flows is equal to the net liability at the inception of the contract.

Value of Business Acquired - We establish VOBA for insurance contract blocks assumed with the acquisition of insurance entities. We record the fair value of the liabilities assumed in two components: reserves and VOBA. Reserves are established using our best estimate assumptions, and are further described in future policy benefits and interest sensitive contract liabilities. VOBA is the difference between the fair value and the reserves. VOBA can be either positive or negative. For interest sensitive life and investment-type contracts, any negative VOBA is recorded in interest sensitive contract liabilities on the consolidated balance sheets. For long duration and insurance contracts, any negative VOBA is recorded as part of future policy benefits on the consolidated balance sheets. Positive VOBA is recorded in deferred acquisition costs, deferred sales inducements and value of business acquired on the consolidated balance sheets.

VOBA associated with funding agreements and immediate annuity contracts classified as investment contracts is amortized using the interest method. VOBA associated with immediate annuity contracts classified as long duration contracts is amortized at a constant rate in relation to net policyholder liabilities. For accumulation products, which include interest sensitive life and investment-type contracts with significant non-investment sources of revenue, VOBA is amortized in relation to the present value of estimated gross profits using methods consistent with those used to amortize DAC. Negative VOBA is amortized at a constant rate in relation to applicable net policyholder liabilities.

We adjust the VOBA balance due to the OCI effects of unrealized investment gains or losses on AFS securities. We perform periodic tests to determine if the VOBA remains recoverable. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of the VOBA which results in updates to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

See *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Value of Business Acquired* for further discussion.

Interest Sensitive Contract Liabilities-Interest sensitive life and investment-type contracts include fixed indexed and traditional fixed annuities in the accumulation phase, funding agreements, universal life insurance, fixed indexed universal life insurance, unit-linked contracts and immediate annuities without significant mortality risk. We carry liabilities for fixed annuities, universal life insurance, unit-linked contracts and funding agreements at the account balances without reduction for potential surrender or withdrawal charges, except for a block of universal life business ceded to Global Atlantic Financial Group Limited (together with its subsidiaries, Global Atlantic) which we carry at fair value. Liabilities for immediate annuities without significant mortality risk are calculated as a present value of future liability cash flows at contractual interest rates.

Changes in the interest sensitive contract liabilities, excluding deposits and withdrawals, are recorded in interest sensitive contract benefits or product charges on the consolidated statements of income. Interest sensitive contract liabilities are not reduced for amounts ceded under reinsurance agreements which are reported as reinsurance recoverable on the consolidated balance sheets. See *Note 7 - Reinsurance* for more information on reinsurance.

Future Policy Benefits-We issue contracts classified as long-duration, which includes endowments, term and whole life, accident and health, disability, and deferred and immediate annuit ies with life contingencies. Liabilities for non-participating long-duration contracts are established using accepted actuarial valuation methods which require the use of assumptions related to expenses, investment yields, mortality, morbidity and persistency, with a provision for adverse deviation, at the date of issue or acquisition. As of December 31, 2016, the reserve investment yield assumptions for non-participating contracts range from 3.31% to 5.44% and are specific to our expected earned rate on the asset portfolio supporting the reserves. Liabilities for participating long-duration contracts are established using accepted actuarial valuation methods, which require the use of guaranteed interest and mortality assumptions. As of December 31, 2016, the reserve guaranteed interest assumptions for participating contracts range from 1.25% to 4.00% and are based on interest rates guaranteed to our policyholders. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary.

For long-duration contracts, the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC, DSI and VOBA) is less than the gross premium liability, impairment is deemed to have occurred, and the DAC, DSI and VOBA asset balances are reduced until the net GAAP liability is equal to the gross premium liability. If the DAC, DSI and VOBA asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is posted to arrive at the gross premium liability.

We issue and reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance. We recognize the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality and market conditions affecting the account balance growth.

Future policy benefits includes liabilities for no-lapse guarantees on universal life insurance and fixed indexed universal life insurance. We establish future policy benefits for no-lapse guarantees by estimating the expected value of death benefits paid after policyholder account balances have been exhausted. We recognize these benefits proportionally over the life of the contracts based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality and market conditions affecting the account balance growth.

Changes in future policy benefits are recorded in future policy and other policy benefits on the consolidated statements of income. Future policy benefits are not reduced for amounts ceded under reinsurance agreements which are reported as reinsurance recoverable on the consolidated balance sheets. See *Note 7 - Reinsurance* for more information on reinsurance.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

Closed Block Business-Two closed blocks of policies were established in connection with the reorganization of two predecessor subsidiaries from mutual companies to stock companies, collectively referred to as the Closed Blocks, and individually referred to as the AmerUs Life Insurance Company (AmerUs) closed block (AmerUs Closed Block) and the Indianapolis Life Insurance Company (ILICO) closed block (ILICO Closed Block). Insurance policies which had a dividend scale in effect as of each closed block establishment date were included in the respective closed block. The Closed Blocks were designed to give reasonable assurance to owners of insurance policies included therein that, after the reorganization, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization, if the experience underlying such scales and crediting continued. The assets, including related revenue, allocated to the Closed Blocks will accrue solely to the benefit of the policyholders included in the Closed Blocks until they no longer exist. A policyholder dividend obligation is required to be established for earnings in the Closed Blocks that are not available to the shareholders. See *Note 9 - Closed Block* for more information on the Closed Blocks.

Other Policy Claims and Benefits-Other policy claims and benefits include amounts payable relating to in course of settlements (ICOS) and incurred but not reported (IBNR) liabilities associated with interest sensitive contract liabilities and future policy benefits. For traditional life and universal life policies, ICOS claim liabilities are established when we are notified of the death of the policyholder but the claim has not been paid as of the reporting date. For immediate annuities and supplemental contracts, ICOS claim liabilities are established to accrue suspended benefit payments between the date of notification of death and the date of verification of death.

We determine IBNR claim liabilities using studies of past experience. The time that elapses from the death or claim date to when the claim is reported to us can vary significantly by product type, but generally ranges between one to six months for life business. We estimate IBNR claims on an undiscounted basis, using actuarial estimates of historical claims expense, adjusted for current trends and conditions. These estimates are continually reviewed and the ultimate liability may vary significantly from the amount recognized.

Dividends Payable to Policyholders-Participating policies entitle the policyholders to receive dividends based on actual interest, mortality, morbidity and expense experience for the year. Dividends are distributed to the policyholders through annual or terminal dividends which the Board of Directors of the applicable insurance subsidiary approves. As of December 31, 2016 and 2015, 88% and 78%, respectively, of traditional life policies inclusive of ceded policies were paying dividends, and the related liability is recorded in dividends payable to policyholders on the consolidated balance sheets. Premiums related to policies paying dividends represented 45%, 22% and 11% of total life insurance direct premiums and deposits for the years ended December 31, 2016, 2015 and 2014, respectively. Traditional life policies inclusive of ceded policies represented 81% and 78% of the Company's individual life policies in force as of December 31, 2016 and 2015, respectively.

As of December 31, 2016 and 2015, all of the non-separate account unit-linked policies were paying dividends, and the related liability is recorded in dividends payable to policyholders on the consolidated balance sheets. There were no material deposits related to non-separate account unit-linked policies paying dividends for the years ended December 31, 2016 and 2015. Non-separate account unit-linked policies represented an insignificant percentage of our interest sensitive contracts in force as of December 31, 2016 and 2015.

Policyholder dividend liabilities are recorded in dividends payable to policyholders on the consolidated balance sheets and policyholder dividends are recorded in dividends to policyholders on the consolidated statements of income. For participating policies issued by our German subsidiaries, dividends payable to policyholders includes an adjustment to recognize timing differences between GAAP and local statutory earnings that reverse and enter into future calculations of dividends to policyholders. Except for changes due to unrealized gains or losses on AFS securities, the change in this adjustment is recorded in dividends to policyholders on the consolidated statements of income. Changes in this adjustment due to unrealized gains or losses on AFS securities are recorded in OCI.

Stock-Based Compensation-We have stock-based compensation plans under which restricted, incentive compensation share awards may be granted to our employees and directors and employees of Athene Asset Management, L.P. (AAM) as described in *Note 12 - Stock-based Compensation*. We recognize the fair value of stock-based compensation over a participant's requisite service period through a charge to compensation expense and a corresponding entry to equity or a liability based on vesting criteria and other pertinent terms of the awards. Stock-based awards are accounted for as equity awards in instances where the awards' vesting are linked to a market, performance or service condition. Equity awards to employees are generally expensed based on the grant date fair value. For equity awards issued to non-employees, the fair value is remeasured through completion of counterparty performance. Employee and non-employee stock-based awards are accounted for as liabilities in instances where the awards' vesting criteria are linked to a factor other than a market, performance or service condition. Liability awards are remeasured each reporting period until settlement. In the event that awards are reclassified from liability to equity due to modification or other changes in circumstances, they are remeasured at fair value through the date of reclassification.

Earnings Per Share-We compute basic earnings per share (EPS) by dividing unrounded net income available to Athene Holding Ltd. shareholders by the weighted average number of common shares eligible for earnings and outstanding for the period. As a result, it may not be possible to recalculate EPS as presented in our consolidated financial statements. Diluted earnings per share includes the effect of all potentially dilutive common shares, options and restricted stock units (RSUs) outstanding during the period. See *Note 13 - Earnings Per Share* for further information.

Foreign Currency-The accounts of foreign-based subsidiaries are measured using the functional currency of the subsidiary. Revenue and expenses of these businesses are translated into United States dollars at the average exchange rate for the period. Assets and liabilities are translated at the exchange rate as of the end of the reporting period. The resulting translation adjustments are included in equity as a component of AOCI. Gains or losses arising from transactions denominated in a currency other than the functional currency of the entity that is party to the transaction are included in net income.

Recognition of Revenues and Related Expenses-Revenues for annuity and universal life-type products, including surrender and market value adjustments, costs of insurance, policy administration, GMDB, GLWB and no-lapse guarantee charges, are earned when assessed against policyholder account balances during the period. Interest sensitive contract benefits related to annuity products include interest credited to policyholder account balances. In addition, the change in fair value of embedded derivatives within fixed indexed annuity contracts is included in interest sensitive contract benefits on the consolidated statements of income.

For certain assumed reinsurance transactions involving in force blocks of business, the ceding company may pay a premium equal to the initial required reserve (future policy benefit). In such transactions, we net the expense associated with the establishment of the reserve against the premiums from the transaction in interest sensitive contract benefits on the consolidated statements of income.

Premiums for traditional life insurance products, including products with fixed and guaranteed premiums and benefits, are recognized as revenues when due from policyholders.

All insurance related revenue is reported net of reinsurance ceded.

Income Taxes-We compute income taxes using the asset and liability method, under which deferred income taxes are provided for the temporary differences between the financial statement carrying amounts and the tax basis of our assets and liabilities using estimated tax rates expected to be in effect for the year in which the differences are expected to reverse. Changes in deferred tax assets and liabilities attributable to changes in enacted income tax rates are recorded in the period of enactment. Such temporary differences are primarily due to the tax basis of reserves, DAC, unrealized investment gains/losses, reinsurance related differences, embedded derivatives and net operating loss carryforwards. Changes in deferred income tax assets and liabilities associated with components of OCI are recorded directly to OCI. We evaluate the likelihood of realizing the benefit of our deferred tax assets and may record a valuation allowance if, based on all available evidence, we determine that it is more likely than not that some portion of the tax benefit will not be realized. We adjust the valuation allowance if, based on our evaluation, there is a change in the amount of deferred income tax assets that are deemed more likely than not to be realized. We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the relevant taxing authorities, based on the technical merits of our position. We recognize any income tax interest and penalties in income tax expense.

See *Note 15 - Income Taxes* for discussion on withholding taxes for undistributed earnings of subsidiaries.

Adopted Accounting Pronouncements

Fair Value Measurement - Net Asset Value (ASU 2015-07)
This update has a disclosure-only impact for entities that measure investments using NAV per share under the practical expedient in the fair value measurement guidance. We adopted this standard effective January 1, 2016, and have removed investments that are measured at NAV as a practical expedient from the fair value hierarchy in all periods presented in the notes to the consolidated financial statements.

Cloud Computing Arrangements (ASU 2015-05)
This update clarifies whether a cloud computing arrangement is an intangible asset or a service contract. We adopted this standard effective January 1, 2016, and the adoption of this update did not have a material effect on our consolidated financial statements.

Stock-Based Compensation (ASU 2014-12)
This update requires a performance target in a share-based payment arrangement that affects vesting and that could be achieved after the requisite service period to be treated as a performance condition. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. We adopted this standard effective January 1, 2016, and the adoption of this update did not have a material effect on our consolidated financial statements.

Recently Issued Accounting Pronouncements

Gains and Losses from the Derecognition of Nonfinancial Assets (ASU 2017-05)
The amendments in this update clarify the scope of asset derecognition guidance and accounting for partial sales of nonfinancial assets. We will be required to adopt this standard on a retrospective or modified retrospective basis effective January 1, 2018. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Intangibles - Simplifying the Test for Goodwill Impairment (ASU 2017-04)
The amendments in this update simplify the subsequent measurement of goodwill by eliminating the comparison of the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill to determine the goodwill impairment loss. With the adoption of this guidance, a goodwill impairment will be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of the goodwill allocated to that reporting unit. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. We will be required to adopt this standard prospectively effective January 1, 2020. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Business Combinations - Clarifying the Definition of a Business (ASU 2017-01)
The amendments in this update clarify the definition of a business with the objective of assisting entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill and consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Statement of Cash Flows - Restricted Cash (ASU 2016-18)
This update requires amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the consolidated statements of cash flows. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2018. Early adoption is permitted. The adoption of this update will require us to change the presentation on the consolidated statements of cash flows for restricted cash or restricted cash equivalents; however, we do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Consolidation - Interest Held through Related Parties under Common Control (ASU 2016-17)
This update amends the consolidation guidance to change how indirect interests in VIEs are evaluated by a reporting entity when determining whether or not it is the primary beneficiary of that VIE. The primary beneficiary of a VIE is the reporting entity that has a controlling financial interest in a VIE and, therefore, consolidates the VIE. A reporting entity has an indirect interest in a VIE if it has a direct interest in a related party that, in turn, has a direct interest in the VIE. Currently, if a single decision maker and its related parties are under common control, the single decision maker is required to consider indirect interests held through related parties to be the equivalent of direct interests in their entirety. The amendments change the evaluation of indirect interests to be considered on a proportionate basis. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Income Taxes - Intra-Entity Transfers (ASU 2016-16)
This update requires the immediate recognition of current and deferred income tax effects of intra-entity transfers of assets, other than inventory. Currently, recognition of the income tax consequence was not recognized until the asset was sold to an outside party. We will be required to adopt this standard on a modified retrospective basis effective January 1, 2018. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Statement of Cash Flows (ASU 2016-15)
This update provides specific guidance to clarify how entities should classify certain cash receipts and cash payments on the statement of cash flows. The update also clarifies the application of the predominance principle when cash receipts and cash payments have aspects of more than one class of cash flows. We will be required to adopt this standard effective January 1, 2018. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Financial Instruments - Credit Losses (ASU 2016-13)
This update is designed to reduce complexity by limiting the number of credit impairment models used for different assets. The model will result in accelerated credit loss recognition on assets held at amortized cost, which includes our commercial and residential mortgage investments. The identification of credit-deteriorated securities will include all assets that have experienced a more-than-insignificant deterioration in credit since origination. Additionally, any changes in the expected cash flows of credit-deteriorated securities will be recognized immediately in the income statement. Available-for-sale fixed maturity securities are not in scope of the new credit loss model, but will undergo targeted improvements to the current reporting model including the establishment of a valuation allowance for credit losses versus the current direct write down approach. We will be required to adopt this standard effective January 1, 2020. Early adoption is permitted effective January 1, 2019. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Revenue Recognition (ASU 2016-20, ASU 2016-12, ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14 and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guidance. ASU 2016-11 brings existing Securities and Exchange Commission (SEC) guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. ASU 2016-12 provides clarification on assessing collectability, presentation of sales tax, non-cash consideration and transition. ASU 2016-20 addresses necessary technical corrections and improvements to clarify codification amended by ASU 2014-09 within Topic 606. The revenue recognition updates replace all general and most industry-specific revenue recognition guidance, excluding insurance contracts, leases, financial instruments and guarantees, which have been scoped out of the update. Since the guidance does not apply to revenue on contracts accounted for under the financial instruments or insurance contracts standards, only a portion of our revenues are impacted by this guidance. Our evaluation process includes, but is not limited to, identifying contracts within the scope of the guidance, reviewing and documenting our accounting for these contracts, and identifying and determining the accounting for any related contract costs.

Improvements to Employee Share-Based Payment Accounting (ASU 2016-09)
This update simplifies several aspects of the accounting for share-based payment award transactions, including income tax consequences, forfeitures and classification on the statement of cash flows. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Derivatives and Hedging - Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Derivatives and Hedging - Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard on a modified retrospective basis effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Financial Instruments - Recognition and Measurement (ASU 2016-01)
This update retains the current accounting for classifying and measuring investments in debt securities and loans, but requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We currently recognize changes in fair value related to AFS equity securities in AOCI on the consolidated balance sheets. We will be required to adopt this standard with a cumulative-effect adjustment to beginning retained earnings effective January 1, 2018. Refer to *Note 2 - Investments* for further information on the unrealized gains and losses of our AFS equity securities.

2. Investments

Available-for-sale Securities-The following table represents the cost or amortized cost, gross unrealized gains and losses, fair value and OTTI in AOCI of our AFS investments by asset type. Our AFS investment portfolio includes direct investments in affiliates of Apollo where Apollo can exercise significant influence over the affiliates. These investments are presented as investments in related parties on the consolidated balance sheets, and are separately disclosed below.

	December 31, 2016				
(In millions)	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	OTTI in AOCI
Fixed maturity securities

CLO	139	(14)	72	(9)	211	(23)
ABS	60	(1)	-	-	60	(1)
Total AFS securities - related party	199	(15)	72	(9)	271	(24)
Total AFS securities including related party	$ 18,454	$ (839)	$ 3,676	$ (435)	$ 22,130	$ (1,274)

As of December 31, 2016, we held 2,117 AFS securities that were in an unrealized loss position. Of this total, 899 were in an unrealized loss position longer than 12 months. As of December 31, 2016, we held 14 related party AFS securities that were in an unrealized loss position. Of this total, 10 were in an unrealized loss position longer than 12 months. The unrealized losses on AFS securities can primarily be attributed to changes in market interest rates since acquisition. We did not recognize the unrealized losses in income as we intend to hold these securities and it is not more likely than not we will be required to sell a security before the recovery of its amortized cost.

Other-Than-Temporary Impairments-For the year ended December 31, 2016, we incurred $30 million of net OTTI, of which $5 million related to intent-to-sell impairments. These securities were impaired to fair value as of the impairment date. The remainder of net OTTI of $25 million related to credit impairments, of which $14 million related to credit loss impairments that we impaired to fair value and did not bifurcate a portion of the impairment in AOCI. The credit loss impairments not bifurcated in AOCI are excluded from the rollforward below.

The following table represents a rollforward of the cumulative amounts recognized on the consolidated statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	Years ended December 31,		
(In millions)	2016	2015	2014
Beginning balance	$ 22	$ 8	$ 3
Initial impairments - credit loss OTTI recognized on securities not previously impaired	8	19	3
Additional impairments - credit loss OTTI recognized on securities previously impaired	3	1	2
Reduction in impairments from securities sold	(9)	(2)	-
Reduction for credit loss that no longer has a portion of the OTTI loss recognized in AOCI	(8)	(4)	-
Ending balance	$ 16	$ 22	$ 8

Net Investment Income-Net investment income by asset type consists of the following:

	Years ended December 31,		
(In millions)	2016	2015	2014
AFS securities			
Fixed maturity securities	$ 2,293	$ 2,051	$ 1,868
Equity securities	9	7	6
Trading securities	238	196	136
Mortgage loans, net of allowances	355	320	347
Investment funds	180	109	177
Funds withheld at interest	82	54	46
Other	62	44	24
Investment revenue	3,219	2,781	2,604
Investment expenses	(303)	(273)	(271)
Net investment income	$ 2,916	$ 2,508	$ 2,333

Investment Related Gains (Losses)-Investment related gains (losses) by asset type consist of the following:

	Years ended December 31,		
(In millions)	2016	2015	2014
AFS fixed maturity securities			
Gross realized gain on investment activity	$ 138	$ 150	$ 203
Gross realized loss on investment activity	(54)	(86)	(22)
Net realized investment gains on fixed maturity securities	84	64	181
Net realized investment gains (losses) on trading securities	(33)	(228)	242
Derivative gains (losses)	596	(277)	792
Other gains (losses)	5	11	(5)
Investment related gains (losses)	$ 652	$ (430)	$ 1,210

Proceeds from sales of AFS securities were $4,662 million, $6,899 million and $6,391 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Included in net realized investment gains (losses) on trading securities are gains of $38 million, losses of $133 million and gains of $258 million resulting from the change in unrealized gains or losses for the underlying securities we still held as of December 31, 2016, 2015 and 2014, respectively. Also included in net realized investment gains (losses) on trading securities are related party losses of $10 million, losses of $10 million and gains of $13 million resulting from the change in unrealized gains or losses for the underlying securities we still held as of December 31, 2016, 2015 and 2014, respectively.

PCI Investments-The following table summarizes our PCI investments:

	December 31,		
	2016	2015	2016
(In millions)	Fixed maturity securities		Mortgage loans[3]
Contractually required payments[1]	$ 7,761	$ 7,291	$ 424
Less: Cash flows expected to be collected[2]	(5,285)	(4,986)	(286)
Non-accretable difference	$ 2,476	$ 2,305	$ 138
Cash flows expected to be collected	$ 5,285	$ 4,986	$ 286
Less: Amortized cost	(3,898)	(3,673)	(220)
Accretable difference	$ 1,387	$ 1,313	$ 66
Fair value	$ 4,029	$ 3,647	$ 221

[1] *Includes principal and accrued interest.*

[2] *Represents the acquisition date undiscounted principal and interest cash flows expected.*

[3] *As of December 31, 2015, we did not hold any investments in PCI mortgage loans.*

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

During the respective year, we acquired PCI investments with the following amounts at the time of purchase:

	December 31,		
	2016	2015	2016
(In millions)	Fixed maturity securities		Mortgage loans[1]
Contractually required principal and interest	$ 1,631	$ 1,999	$ 425
Expected cash flows	1,027	1,277	287
Estimated fair value	761	937	221

[1] *As of December 31, 2015, we did not hold any investments in PCI mortgage loans.*

The following tables summarize the activity for the accretable yield on PCI investments:

	2016	2015	2016
(In millions)	Fixed maturity securities		Mortgage loans[1]
Beginning balance at January 1	$ 1,313	$ 1,330	$ -
Purchases of PCI investments, net of sales	231	243	66
Accretion	(112)	(113)	(1)
Changes in expected cash flows	(45)	(147)	1
Ending balance at December 31	$ 1,387	$ 1,313	$ 66

[1] *During the year ended December 31, 2015, we did not hold any investments in PCI mortgage loans.*

Mortgage Loans-Mortgage loans, net of allowances, consist of the following:

	December 31,	
(In millions)	2016	2015
Commercial mortgage loans	$ 5,058	$ 5,178
Commercial mortgage loans under development	74	222
Total commercial mortgage loans	5,132	5,400
Residential mortgage loans	338	100
Mortgage loans, net of allowances	$ 5,470	$ 5,500

We primarily make commercial mortgage loans on income producing properties including hotels, industrial properties and retail and office buildings. We diversify the commercial mortgage loan portfolio by geographic region and property type to reduce concentration risk. We evaluate mortgage loans based on relevant current information to confirm if properties are performing at a consistent and acceptable level to secure the related debt.

The distribution of commercial mortgage loans, including those under development, net of valuation allowances, by property type and geographic region, is as follows:

	December 31,						
	2016			2015			
(In millions, except for percentages)	Net Carrying Value		Percentage of Total	Net Carrying Value		Percentage of Total
Property type						
Hotels	$	1,025	20.0%	$	877	16.2%
Retail		1,135	22.1%		1,230	22.8%
Office building		1,217	23.7%		1,274	23.6%
Industrial		742	14.5%		821	15.2%
Apartment		616	12.0%		907	16.8%
Other commercial		397	7.7%		291	5.4%
Total commercial mortgage loans	$	5,132	100.0%	$	5,400	100.0%
U.S. Region						
East North Central	$	450	8.8%	$	443	8.2%
East South Central		158	3.1%		129	2.4%
Middle Atlantic		628	12.2%		804	14.9%
Mountain		543	10.6%		583	10.8%
New England		194	3.8%		181	3.3%
Pacific		833	16.2%		838	15.5%
South Atlantic		1,284	25.0%		1,231	22.8%
West North Central		306	6.0%		291	5.4%
West South Central		662	12.9%		792	14.7%
Total U.S. Region		5,058	98.6%		5,292	98.0%
International Region		74	1.4%		108	2.0%
Total commercial mortgage loans	$	5,132	100.0%	$	5,400	100.0%

Our residential mortgage loan portfolio includes first lien residential mortgage loans, collateralized by properties located in the U.S. As of December 31, 2016, California, Florida and New York represented 38.9%, 9.1% and 5.1%, respectively, of the portfolio. The remaining 46.9% represented all other states, with each individual state comprising less than 5% of the portfolio. As of December 31, 2015, California, Texas and Washington represented 64.8%, 10.1% and 5.6%, respectively, of the portfolio, and the remaining 19.5% represented all other states, with each individual state comprising less than 5% of the portfolio.

Mortgage Loan Valuation Allowance-The assessment of mortgage loan impairments and valuation allowances is substantially the same for residential and commercial mortgage loans. The valuation allowance was $2 million as of December 31, 2016 and 2015. We did not record any material impairments or significant activity in the valuation allowance during the years ended December 31, 2016, 2015 or 2014.

Residential mortgage loans - The primary credit quality indicator of residential mortgage loans is loan performance. Nonperforming residential mortgage loans are 90 days or more past due and/or are in non-accrual status. All of our residential mortgage loans were performing as of December 31, 2016 and 2015.

Commercial mortgage loans - The following provides the aging of our commercial mortgage loan portfolio, including those under development, net of valuation allowances:

	December 31,			
(In millions)	2016		2015	
Current (less than 30 days past due)	$	5,111	$	5,360
30 to 60 days past due		-		1
Over 90 days past due		21		39
Total commercial mortgage loans	$	5,132	$	5,400

Loan-to-value and debt service coverage ratios are measures we use to assess the risk and quality of commercial mortgage loans other than those under development. Loans under development are not evaluated using these ratios as they are generally not yet income-producing and the value of the underlying property significantly fluctuates based on the progress of construction. Therefore, the risk and quality of loans under development are evaluated based on the aging and geographical distribution of such loans as shown above.

The loan-to-value ratio is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A loan-to-value ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The following represents the loan-to-value ratio of the commercial mortgage loan portfolio, excluding those under development, net of valuation allowances:

	December 31,	
(In millions)	2016	2015
Less than 50%	$ 1,787	$ 2,087
50% to 60%	1,337	1,024
61% to 70%	1,401	1,299
71% to 100%	492	697
Greater than 100%	41	71
Commercial mortgage loans	$ 5,058	$ 5,178

The debt service coverage ratio, based upon the most recent financial statements, is expressed as a percentage of a property's net income to its debt service payments. A debt service ratio of less than 1.0 indicates a property's operations do not generate enough income to cover debt payments. The following represents the debt service coverage ratio of the commercial mortgage loan portfolio, excluding those under development, net of valuation allowances:

	December 31,	
(In millions)	2016	2015
Greater than 1.20x	$ 4,378	$ 4,455
1.00x - 1.20x	353	471
Less than 1.00x	327	252
Commercial mortgage loans	$ 5,058	$ 5,178

Real Estate-Depreciation expense on invested real estate was $9 million and $2 million during the years ended December 31, 2016 and 2015, respectively. Accumulated depreciation was $11 million and $2 million as of December 31, 2016 and 2015, respectively.

Investment Funds-Our investment fund portfolio consists of funds that employ various strategies and include investments in mortgage and real estate, credit, private equity, natural resources and hedge funds. Investment funds meet the definition of variable interest entities and are discussed further in *Note 4 - Variable Interest Entities*.

3. Derivative Instruments

We use a variety of derivative instruments to manage risks, primarily equity, interest rate, credit, foreign currency and market volatility. See *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* for a description of our accounting policies for derivatives and *Note 5 - Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	December 31,					
	2016			2015		
	Notional	Fair Value		Notional	Fair Value	
(In millions)	Amount	Assets	Liabilities	Amount	Assets	Liabilities
Derivatives designated as hedges						
Foreign currency swaps	289	$ 11	$ 4	177	$ 14	$ -
Interest rate swaps	302	-	14	-	-	-
Total derivatives designated as hedges		11	18		14	-
Derivatives not designated as hedges						
Equity options	26,822	1,336	-	25,176	831	-
Futures	-	9	-	-	9	1
Total return swaps	41	2	-	54	-	-
Foreign currency swaps	43	5	-	47	5	-
Interest rate swaps	568	1	5	859	2	8
Credit default swaps	10	-	7	10	-	7
Variance swaps	-	-	-	-	5	-
Foreign currency forwards	805	6	10	367	5	1
Embedded derivatives						
Funds withheld	-	140	6	-	36	35
Interest sensitive contract liabilities	-	-	5,283	-	-	4,477
Total derivatives not designated as hedges		1,499	5,311		893	4,529
Total derivatives		$ 1,510	$ 5,329		$ 907	$ 4,529

Derivatives Designated as Hedges

Foreign currency swaps - We use foreign currency swaps to convert foreign currency denominated cash flows of an investment to U.S. dollars to reduce cash flow fluctuations due to changes in currency exchange rates. Certain of these swaps are designated and accounted for as cash flow hedges, which will expire by June 2043. During the years ended December 31, 2016, 2015 and 2014, we had foreign currency swap losses of $5 million, gains of $9 million and losses of $7 million, respectively, recorded in AOCI. There were no amounts reclassified to income and no amounts deemed ineffective for the years ended December 31, 2016, 2015 and 2014.

Interest rate swaps - We use interest rate swaps to reduce market risks from interest rate changes and to alter interest rate exposure arising from duration mismatches between assets and liabilities. Certain of these swaps entered into during the year ended December 31, 2016 are designated as fair value hedges. With an interest rate swap, we agree with another party to exchange the difference between fixed-rate and floating-rate interest amounts tied to an agreed-upon notional principal amount at specified intervals.

The following table represents the gains and losses on derivatives and the related hedged items in fair value hedge relationships, recorded in interest sensitive contract benefits on the consolidated statements of income:

(In millions)	Year ended December 31, 2016
Loss recognized on derivative	$ (14)
Gain recognized on hedged item	14
Ineffectiveness recognized on fair value hedges	$ -

Derivatives Not Designated as Hedges

Equity options - We use equity indexed options to economically hedge fixed indexed annuity products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specified market index, primarily the S&P 500. To hedge against adverse changes in equity indices, we enter into contracts to buy the equity indexed options within a limited time at a contracted price. The contracts are net settled in cash based on differentials in the indices at the time of exercise and the strike price.

Futures - Futures contracts are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. We enter into exchange-traded futures with regulated futures commission clearing brokers who are members of a trading exchange. Under exchange-traded futures contracts, we agree to purchase a specified number of contracts with other parties and to post variation margin on a daily basis in an amount equal to the difference in the daily fair values of those contracts.

Total return swaps - We purchase total rate of return swaps to gain exposure and benefit from a reference asset without ownership. Total rate of return swaps are contracts in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset, which includes both the income it generates and any capital gains.

Credit default swaps - Credit default swaps provide a measure of protection against the default of an issuer or allow us to gain credit exposure to an issuer or traded index. We use credit default swaps coupled with a bond to synthetically create the characteristics of a reference bond. These transactions have a lower cost and are more liquid relative to the cash market. We receive a periodic premium for these transactions as compensation for accepting credit risk.

Hedging credit risk involves buying protection for existing credit risk. The exposure resulting from the agreements, which is usually the notional amount, is equal to the maximum proceeds that must be paid by a counterparty for a defaulted security. If a credit event occurs on a reference entity, then a counterparty who sold protection is required to pay the buyer the trade notional amount less any recovery value of the security.

Variance swaps - We have variance swaps to hedge the growth in interest credited to the customer as a direct result of changes in the volatility of the specified market index, primarily the S&P 500. In a variance swap transaction, we agree to exchange future realized volatility for current implied volatility. This type of contract pays the difference between the realized variance and a predefined strike multiplied by a notional value.

Foreign currency forwards - We use foreign currency forward contracts to hedge certain exposures to foreign currency risk. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives - We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products.

The following is a summary of the gains (losses) related to derivatives not designated as hedges:

	Years ended December 31,		
(In millions)	2016	2015	2014
Equity options	$ 325	$ (372)	$ 955
Futures	(19)	(3)	52
Total return swaps	5	-	11
Foreign currency swaps	14	12	3
Interest rate swaps	(1)	(4)	(4)
Foreign currency forwards	(2)	21	21
Embedded derivatives on funds withheld	274	69	(246)
Amounts recognized in investment related gains (losses)	596	(277)	792
Embedded derivatives in indexed annuity products[1]	(311)	158	(976)
Total gains (losses) for derivatives not designated as hedges	$ 285	$ (119)	$ (184)

[1] *Included in interest sensitive contract benefits.*

Credit Risk-We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

We manage credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties. Where possible, we maintain collateral arrangements and use master netting agreements that provide for a single net payment from one counterparty to another at each due date and upon termination. We have also established counterparty exposure limits, where possible, in order to evaluate if there is sufficient collateral to support the net exposure.

Collateral arrangements typically require the posting of collateral in connection with its derivative instruments. Collateral agreements often contain posting thresholds, some of which may vary depending on the posting party's financial strength ratings. Additionally, a decrease in our financial strength rating to a specified level can result in settlement of the derivative position. As of December 31, 2016 and 2015, we had $25 million and $9 million, respectively, of collateral pledged to counterparties.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The estimated fair value of our net derivative and other financial assets and liabilities after the application of master netting agreements and collateral were as follows:

		Gross amounts not offset on the consolidated balance sheets				
(In millions)	Gross amount recognized[1]	Financial instruments[2]	Collateral received/pledged	Net amount	Off-balance sheet securities collateral[3]	Net amount after securities collateral
December 31, 2016						
Derivative assets	$ 1,370	$ (8)	$ (1,383)	$ (21)	$ (26)	$ (47)
Derivative liabilities	(40)	8	25	(7)	-	(7)
December 31, 2015						
Derivative assets	$ 871	$ (7)	$ (867)	$ (3)	$ (57)	$ (60)
Derivative liabilities	(17)	7	9	(1)	-	(1)

[1] *The gross amounts of recognized derivative assets and derivative liabilities are reported on the consolidated balance sheets. As of December 31, 2016 and 2015, amounts that are not subject to master netting agreements or similar agreements were immaterial.*

[2] *Represents amounts offsetting derivative assets and derivative liabilities that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative assets or gross derivative liabilities for presentation on the consolidated balance sheets.*

[3] *For securities collateral received, we do not have the right to sell or re-pledge the collateral. As such, we do not record the securities on the consolidated balance sheets.*

Certain derivative instruments contain provisions for credit-related events, such as downgrades in our credit ratings or for a negative credit event of a credit default swap's reference entity. If a credit event were to occur, we may be required to settle an outstanding liability. The following is a summary of our exposure to credit-related events:

	December 31,	
(In millions)	2016	2015
Fair value of derivative liabilities with credit related provisions	$ 7	$ 7
Maximum exposure for credit default swaps	10	10

As of December 31, 2016 or 2015, no additional collateral would be required if a default or termination event were to occur.

4. Variable Interest Entities

Our investment funds meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs-We consolidate AAA Investments (Co-Invest VI), L.P. (CoInvest VI), AAA Investments (Co-Invest VII), L.P. (CoInvest VII), AAA Investments (Other). L.P. (CoInvest Other), London Prime Apartments Guernsey Holdings Limited (London Prime) and NCL Athene, LLC (NCL LLC), which are investment funds. We are the only limited partner in these investment funds and receive all of the economic benefits and losses, other than management fees and carried interest, as applicable, paid to the general partner in each entity, which are related parties. We do not have any voting rights as limited partner and do not solely satisfy the power criteria to direct the activities that significantly impact the economics of the VIE. However, the criteria for the primary beneficiary are satisfied by our related party group and because substantially all of the activities are conducted on our behalf, we consolidate the investment funds.

No arrangement exists requiring us to provide additional funding in excess of our committed capital investment, liquidity, or the funding of losses or an increase to our loss exposure in excess of our investment in the VIEs. We elected the fair value option for certain fixed maturity and equity securities and investment funds, which are reported in the consolidated variable interest entity sections on the consolidated balance sheets.

CoInvest VI, CoInvest VII and CoInvest Other were formed to make investments, including co-investments alongside private equity funds sponsored by Apollo. We received our interests in CoInvest VI, CoInvest VII and CoInvest Other as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., in order to provide a capital base to support future acquisitions. London Prime was formed for the purpose of investing in Prime London Ventures Limited, a Guernsey limited company, which purchases rental residential assets across prime central London.

During the year ended December 31, 2014, we consolidated MidCap Financial Holdings LLC (MidCap Financial) through our investment in CoInvest VII. MidCap Financial was determined to be a VIE and CoInvest VII was the primary beneficiary. In January 2015, CoInvest VII contributed MidCap Financial to a newly formed entity, MidCap FinCo Limited (MidCap) in exchange for subordinated notes issued by MidCap and shares in MidCap's parent company. As a result of this restructuring, CoInvest VII owns the MidCap Financial investment indirectly through MidCap. The significant investment by new, unrelated investors and a qualitative assessment of the impact of the restructuring resulted in a

determination that CoInvest VII is not the primary beneficiary of MidCap. Therefore, since the completion of the restructuring, CoInvest VII has accounted for MidCap as an equity method investment, and thereafter, MidCap Financial has not been consolidated in our financial statements.

During 2016, we purchased a pool of loans sourced by MidCap and contemporaneously sold subordinated participation interests in the loans to a subsidiary of MidCap. As of December 31, 2016, the $14 million due to MidCap under the subordinated participation agreement is reflected as a secured borrowing in other liabilities on the consolidated balance sheets.

During the third quarter of 2016, CoInvest VI contributed its largest investment, Norwegian Cruise Line Holdings Ltd. (NCLH) shares, to a newly formed entity, NCL LLC, in exchange for 100% of the membership interests in this entity. Subsequent to this contribution, CoInvest VI distributed its Class A membership interests in NCL LLC to us and the Class B membership interests in NCL LLC to the general partner of CoInvest VI. NCL LLC is subject to the same management fees, selling restrictions and carried interest calculation as CoInvest VI. NCL LLC classifies its NCLH shares as AFS equity securities. We are the primary beneficiary and consolidate NCL LLC, as substantially all of its activities are conducted on our behalf.

We previously consolidated the 2012 CMBS-I Fund L.P., a Delaware limited partnership, and 2012 CMBS-II Fund L.P., a Delaware limited partnership (collectively, CMBS Funds). The CMBS Funds were originally formed with the objective of generating high risk-adjusted investment returns by investing primarily in a portfolio of eligible CMBS and using leverage through repurchase agreements treated as collateralized financing. During the third quarter of 2016, the CMBS Funds each sold investments to fully settle the borrowings under their respective repurchase agreements of $500 million. The remaining investments of $167 million were distributed directly to us. During the fourth quarter of 2016, the CMBS Funds were fully dissolved.

Borrowings - As of December 31, 2015, the CMBS Funds had borrowings outstanding under repurchase agreements with UBS totaling $500 million at a weighted average interest rate of 3.2%.

Trading securities - including related party - Trading securities represents investments in fixed maturity and equity securities with changes in fair value recognized in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income. For the years ended December 31, 2016, 2015 and 2014, investment related gains (losses) included losses of $78 million, $23 million and $74 million, respectively, resulting from the change in unrealized gains and losses underlying trading securities we still held as of the respective period end date. Trading securities held by CoInvest VI, CoInvest VII and CoInvest Other are considered related party investments because Apollo affiliates exercise significant influence over the operations of these investees.

Investment funds - including related party - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs; however, our consolidated VIEs are not considered the primary beneficiary of these investment funds. Changes in fair value of these investment funds are included in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income. Investment funds held by CoInvest VII and CoInvest Other are considered related party investments as they are sponsored or managed by Apollo affiliates.

Fair Value - See *Note 5 - Fair Value* for a description of the levels of our fair value hierarchy and our process for determining the level we assign our assets and liabilities carried at fair value.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The following represents the hierarchy for assets and liabilities of our consolidated VIEs measured at fair value on a recurring basis:

	December 31, 2016			
(In millions)	Total	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities				
Investments				
AFS securities				
Equity securities	$ 161	$ 161	$ -	$ -
Trading securities				
Fixed maturity securities	50	-	-	50
Equity securities	117	74	-	43
Investment funds	562	-	-	562
Cash and cash equivalents	14	14	-	-
Total assets of consolidated VIEs measured at fair value	$ 904	$ 249	$ -	$ 655

	December 31, 2015			
(In millions)	Total	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities				
Investments				
Trading securities				
Fixed maturity securities	$ 722	$ -	$ 669	$ 53
Equity securities	309	271	-	38
Investment funds	516	-	-	516
Cash and cash equivalents	6	6	-	-
Total assets of consolidated VIEs measured at fair value	$ 1,553	$ 277	$ 669	$ 607

Fair Value Valuation Methods-Refer to *Note 5 - Fair Value* for the valuation methods used to determine the fair value of trading securities, investment funds, and cash and cash equivalents.

Level 3 Financial Instruments - The following is a reconciliation for all VIE Level 3 assets and liabilities measured at fair value on a recurring basis:

	Year ended December 31, 2016							
(In millions)	Beginning Balance	Total realized and unrealized gains (losses) included in income	Purchases/Borrowings	Sales/Repayments	Transfers in (out)[2]	Other	Ending Balance	Total gains (losses) included in earnings[1]
Assets of consolidated variable interest entities								
Trading securities								
Fixed maturity securities	$ 53	$ (1)	$ -	$ (2)	$ -	$ -	$ 50	$ (1)
Equity securities	38	3	2	-	-	-	43	3
Investment funds	516	49	17	(20)	-	-	562	49
Total Level 3 assets of consolidated VIEs	$ 607	$ 51	$ 19	$ (22)	$ -	$ -	$ 655	$ 51

[1] *Related to instruments held at end of period.*

[2] *See discussion of transfer out of Level 3 in the description of significant unobservable inputs below.*

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

	Year ended December 31, 2015							
(In millions)	Beginning Balance	Total realized and unrealized gains (losses) included in income	Purchases/Borrowings	Sales/Repayments	Transfers in (out)	Other[2]	Ending Balance	Total gains (losses) included in earnings[1]
Assets of consolidated variable interest entities								
Trading securities								
Fixed maturity securities	$ 57	$ (6)	$ 2	$ -	$ -	$ -	$ 53	$ (6)
Equity securities	62	(15)	-	-	-	(9)	38	(15)
Investment funds	40	3	15	(15)	-	473	516	(7)
Loans held for investment	2,071	-	-	-	-	(2,071)	-	-
Total Level 3 assets of consolidated VIEs	$ 2,230	$ (18)	$ 17	$ (15)	$ -	$ (1,607)	$ 607	$ (28)
Liabilities of consolidated variable interest entities								
Borrowings	$ (1,517)	$ -	$ -	$ -	$ -	$ 1,517	$ -	$ -
Total Level 3 liabilities of consolidated VIEs	$ (1,517)	$ -	$ -	$ -	$ -	$ 1,517	$ -	$ -

[1] *Related to instruments held at end of period.*

[2] *Other activity primarily relates to the deconsolidation of MidCap Financial and its restructuring into MidCap.*

There were no transfers between Level 1 or Level 2 during the years ended December 31, 2016 and 2015.

Significant Unobservable Inputs - For certain Level 3 trading securities and investment funds, the valuations have significant unobservable inputs for comparable multiples and weighed average cost of capital rates applied in the valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are multiplied by the underlying investment's earnings before interest, tax, depreciation and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers.

For other Level 3 trading securities, loans held for investment and borrowings, valuations are performed using a discounted cash flow model. For a discounted cash flow model, the significant input is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. The discount rate is determined by considering the weighted average cost of capital calculation of companies in similar industries with comparable debt to equity ratios.

We applied a discount to the values reported by the investment funds for certain Level 3 trading securities and investment funds held within consolidated VIEs related to the lack of marketability of the underlying investment as of December 31, 2015. The weighted average of the discount rates applied to each individual investment was 34% as of December 31, 2015. Due to changing market conditions and the timing of liquidity events, we determined the liquidity discounts related to marketability assumptions used in the valuation of certain investments reported by the consolidated VIEs were no longer required.

Fair Value Option - The following represents the gains (losses) recorded for instruments within the consolidated VIEs for which we have elected the fair value option:

	Years ended December 31,		
(In millions)	2016	2015	2014
Trading securities			
Fixed maturity securities	$ (1)	$ (5)	$ (2)
Equity securities	(78)	(4)	27
Investment funds	49	12	20
Loans held for investment	-	-	4
Total gains (losses)	$ (30)	$ 3	$ 49

For fair value option loans held for investment, we record interest income in net investment income within revenues of consolidated variable interest entities on the consolidated statements of income. Gains or losses from initial measurement and subsequent changes in fair value are recorded in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

Fair Value of Financial Instruments Not Held at Fair Value - Assets of consolidated variable interest entities includes $11 million and $18 million of investment funds accounted for under the equity method and, therefore, not carried at fair value as of December 31, 2016 and 2015, respectively; however, the carrying amount approximates fair value. Liabilities of consolidated variable interest entities included $500 million of borrowings held at cost as of December 31, 2015 and the unpaid principal balance of borrowings approximated fair value.

Commitments and Contingencies - Included in assets of CoInvest VI are equity investments in publicly traded shares of Caesars Entertainment Corporation (CEC) and Caesars Acquisition Company (CAC). We received the CEC and CAC shares as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., in order to provide a capital base to support future acquisitions. There are pending claims against CEC, CAC and/or others, related to certain guaranties issued for debt of Caesars Entertainment Operating Company, Inc. (CEOC) and/or certain transactions involving CEOC and certain of its subsidiaries (collectively, Debtors), CEC, CAC and others. CEC and the Debtors announced on or about September 26, 2016, that CEC and CEOC had received confirmations from representatives of CEOC's major creditor groups of those groups' support for a term sheet that describes the key economic terms of a proposed consensual chapter 11 plan for the Debtors. The plan, containing such terms and further including such other terms respecting, among other things, the merger of CAC into CEC, that CoInvest VI and others will not retain their pre-merger CEC shares, that CoInvest VI and others will retain the value of their CAC shares when receiving shares in the merged CEC, and that CoInvest VI and others will receive releases to the fullest extent permitted by law, was confirmed by the Bankruptcy Court by order dated January 17, 2017. Conditions precedent to the effective date of the plan include regulatory approvals from the various gaming regulators, CEC and CAC shareholders approval of the proposed merger, and securing required financings. As a result, CoInvest VI has recorded a liability of $27 million for the entire carrying value of the CEC shares. As of December 31, 2016, CoInvest VI's investment in CAC is carried at its fair value of $45 million.

Non-Consolidated VIEs-We invest in other entities meeting the definition of a VIE. We do not consolidate these investments because we do not meet the criteria of primary beneficiary as described below.

Fixed Maturity Securities - We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the consolidated balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by GAAP, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments and are held at fair value on the balance sheet and classified as AFS or trading.

Investment funds - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined we are not under common control, as defined by GAAP, with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option. For non-consolidated investment funds where we are not able to exercise significant influence, we elect the fair value option. NAV is used as a practical expedient for fair value when the fair value option is elected. Our investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management.

Our risk of loss associated with our non-consolidated VIEs is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to our initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) AFS securities and other investments are limited to cost or amortized cost; and (4) trading securities are limited to carrying value.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs:

	December 31,			
	2016		2015	
(In millions)	Carrying Value	Maximum Loss Exposure	Carrying Value	Maximum Loss Exposure
Investment funds	$ 689	$ 1,026	$ 733	$ 878
Investment in related parties - investment funds	1,198	1,485	997	1,454
Assets of consolidated variable interest entities - investment funds	573	593	534	558
Investment in fixed maturity securities	19,171	19,090	17,673	18,146
Investment in related parties - fixed maturity securities	530	536	525	554
Total non-consolidated VIEs	$ 22,161	$ 22,730	$ 20,462	$ 21,590

The following summarizes our investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

[1] *A-A Mortgage Opportunities, LP (A-A Mortgage) is a platform to originate residential mortgage loans and mortgage servicing rights.*

[2] *Our total investment in MidCap, including amounts advanced under credit facilities, totaled $761 million and $782 million as of December 31, 2016 and 2015, respectively, which is greater than 10% of total AHL shareholders' equity at the respective period end dates.*

Summarized Ownership of Investment Funds-The following is the aggregated summarized financial information of equity method investees, including those where we elected the fair value option, and may be presented on a lag due to the availability of financial information from the investee:

	December 31,	
(In millions)	2016	2015
Assets	$ 40,120	$ 51,649
Liabilities	5,886	6,990
Equity	34,234	44,659

	Years ended December 31,		
(In millions)	2016	2015	2014
Net income	$ 1,686	$ 5,945	$ 8,418

The following table presents the carrying value by ownership percentage of equity method investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

	December 31,	
(In millions)	2016	2015
Ownership Percentage		
100%	$ 27	$ 49
50% - 99%	478	322
Greater than 3% - 49%	1,294	1,225
Equity method investment funds	$ 1,799	$ 1,596

The following table presents the carrying value by ownership percentage of investment funds where we elected the fair value option, including related party investment funds and investment funds owned by consolidated VIEs:

	December 31,	
(In millions)	2016	2015
Ownership Percentage		
Greater than 3% - 49%	$ 562	$ 516
3% or less	99	152
Fair value option investment funds	$ 661	$ 668

5. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

Fair Value Valuation Methods-We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity - We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities - Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as commercial pricing services or brokers and are classified as Level 2 or 3.

Mortgage loans - Mortgage loans for which we have elected the fair value option or those held for sale are carried at fair value. We estimate fair value on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Funds withheld (embedded derivative) - We estimate the fair value of the embedded derivative based on the change in the fair value of the assets supporting the funds withheld payable under the combined coinsurance, modco and coinsurance funds withheld reinsurance agreements. As a result, the fair value of the embedded derivative is classified as Level 2 or 3 based on the valuation methods used for the assets held in trust supporting the reinsurance agreements.

Derivatives - Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlation of the inputs. We consider and incorporate counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents - The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) - Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with economic assumptions and actuarial assumptions for policyholder behavior.

Unit-linked contracts - Unit-linked contracts are valued based on the fair value of the investments supporting the contract. The underlying investments are trading securities comprised primarily of mutual funds. The valuations of these are based on quoted market prices for similar assets and are classified in Level 2, resulting in a corresponding classification for the unit-linked contracts.

AmerUs Closed Block - We elected the fair value option for the future policy benefits liability in the AmerUs Closed Block. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's cost to hold capital in excess of existing liabilities on the closed block. This component uses a present value of future cash flows, which includes investment earnings and policyholder liability movements. Unobservable inputs include estimates for these items. The target surplus as a percentage of statutory reserves is 3.85% based on the statutory risk-based capital ratio applicable to this block of business. The AmerUs Closed Block policyholder liabilities and any corresponding reinsurance recoverable are classified as Level 3.

ILICO Closed Block - We elected the fair value option for the ILICO Closed Block. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's obligations to the closed block business. This component uses the present value of future cash flows. The cash flows include commissions, administrative expenses, reinsurance premiums and benefits, and an explicit cost of capital. Unobservable inputs include estimates for these items. The explicit cost of capital assumption is 9% of required capital, post tax. A margin of 9.42% is included in the discount rates to reflect the business risk. An additional 0.26% is included to reflect non-performance risk. The ILICO Closed Block policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Universal life liabilities and other life benefits - We elected the fair value option for certain blocks of universal and other life business ceded to Global Atlantic. We use a present value of liability cash flows. Unobservable inputs include estimates of mortality, persistency, expenses, premium payments and a risk margin used in the discount rates that reflects the riskiness of the business. The risk margin was 0.09%. These universal life policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Fair Value Option-The following represents the gains (losses) recorded for instruments for which we have elected the fair value option:

	Years ended December 31,		
(In millions)	2016	2015	2014
Trading securities	$ (33)	$ (313)	$ 254
Mortgage loans	-	-	5
Investment funds	5	(8)	31
Future policy benefits	(25)	134	(102)
Total gains (losses)	$ (53)	$ (187)	$ 188

For fair value option mortgage loans, we record interest income in net investment income and subsequent changes in fair value in investment related gains (losses) on the consolidated statements of income. Gains and losses related to investment funds, including related party investment funds, are recorded in net investment income on the consolidated statements of income. We record the change in fair value of future policy benefits to future policy and other policy benefits on the consolidated statements of income.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The following summarizes information for fair value option mortgage loans:

	December 31,	
(In millions)	2016	2015
Unpaid principal balance	$ 42	$ 46
Mark to fair value	2	2
Fair value	$ 44	$ 48

There were no fair value option mortgage loans 90 days or more past due as of December 31, 2016 and 2015.

Transfers Between Levels-Transfers into Level 3 generally represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the increased volatility, which was reflected in vendor prices obtained for individual securities. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 generally represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by decreased volatility, which was reflected in vendor prices obtained for individual securities. Additionally, changes in pricing sources also led to securities transferring into Level 2.

Transfers into or out of any level are assumed to occur at the end of the period. For the years ended December 31, 2016 and 2015, there were no transfers between Level 1 and Level 2.

Significant Unobservable Inputs-Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS securities, trading securities, mortgage loans and credit default swaps. Additional significant unobservable inputs are described below.

Fixed maturity securities - For certain fixed maturity securities, internal models are used to calculate the fair value. We use a discounted cash flow approach. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or as a result of other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. Discounts ranged from 4% to 8%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Interest sensitive contract liabilities - embedded derivative - Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk - For contracts we issue, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For contracts reinsured through funds withheld reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget - We assume future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior - We regularly review the lapse and withdrawal assumptions (surrender rate). These are based on our initial pricing assumptions updated for actual experience. Actual experience may be limited for recently issued products.

The following summarizes the unobservable inputs for the embedded derivatives of fixed indexed annuities:

(In millions, except for percentages)	December 31, 2016				
	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Interest sensitive contract liabilities - fixed indexed annuities embedded derivatives	$ 5,283	Option budget method	Non-performance risk	0.7% - 1.5%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0.0% - 16.3%	Decrease

	December 31, 2015				
(In millions, except for percentages)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Interest sensitive contract liabilities - fixed indexed annuities embedded derivatives	$ 4,477	Option budget method	Non-performance risk	0.6% - 1.8%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0.0% - 10.7%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value-The following represents our financial instruments not carried at fair value on the consolidated balance sheets:

		December 31,			
		2016		2015	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets					
Mortgage loans	3	$ 5,426	$ 5,560	$ 5,452	$ 5,567
Investment funds	NAV[1]	590	590	581	581
Policy loans	2	602	602	642	642
Funds withheld at interest	3	6,398	6,398	3,446	3,446
Other investments	3	81	81	83	83
Investments in related parties					
Investment funds	NAV[1]	1,198	1,198	997	997
Short-term investments	2	-	-	55	55
Other investments	3	237	262	245	256
Total assets not carried at fair value		$ 14,532	$ 14,691	$ 11,501	$ 11,627
Liabilities					
Interest sensitive contract liabilities[2]	3	$ 27,628	$ 26,600	$ 23,645	$ 22,963
Funds withheld liability	2	374	374	353	353
Total liabilities not carried at fair value		$ 28,002	$ 26,974	$ 23,998	$ 23,316

[1] *Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.*

[2] *During 2016, we changed the disclosure of interest sensitive contract liabilities to exclude insurance contracts, which are not required to be included. We determined contract types that meet the definition of insurance contracts include universal life and traditional fixed and fixed indexed annuities with significant mortality or morbidity risks. In previous periods, all contracts within interest sensitive contract liabilities not held at fair value were included. As such, the carrying and fair values reported for December 31, 2015, were adjusted to be comparable.*

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we do carry at fair value. The financial instruments presented above are reported at carrying value on the consolidated balance sheets; however, in the case of policy loans, funds withheld at interest and liability, other investments and related party short-term investments, the carrying amount approximates fair value.

Investment in related parties - Other investments - The fair value of related party other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities - The carrying and fair value of interest sensitive contract liabilities above includes fixed indexed and traditional fixed annuities without mortality or morbidity risks, funding agreements and payout annuities without life contingencies. The embedded derivatives within fixed indexed annuities without mortality or morbidity risks are excluded, as they are carried at fair value. The valuation of these investment contracts is based on discounted cash flow methodologies using significant unobservable inputs. The estimated fair value is determined using current market risk-free interest rates, adding a spread to reflect our nonperformance risk and subtracting a risk margin to reflect uncertainty inherent in the projected cash flows.

6. Business Combinations

Delta Lloyd Deutschland AG (DLD)-Effective October 1, 2015, we acquired 100% of the voting equity interests of DLD and $50 million of intercompany loans from Delta Lloyd N.V. for a cash purchase price of $74 million. DLD was a Germany-domiciled insurance group with an in force book of business primarily made up of participating long-duration savings products. We acquired DLD to strategically expand our core business into Germany. Following the acquisition, DLD was renamed Athene Deutschland GmbH.

The following summarizes the fair values of the assets acquired and liabilities assumed in the DLD acquisition:

(In millions)	October 1, 2015
Investments	$ 5,539
Cash and cash equivalents	236
Accrued investment income	67
Reinsurance recoverable	4
Other assets	83
Total identifiable assets acquired	5,929
Interest sensitive contract liabilities	403
Future policy benefits	4,519
Other policy claims and benefits	55
Dividends payable to policyholders	771
Other liabilities	107
Total identifiable liabilities assumed	5,855
Net assets acquired	$ 74

DLD contributed $129 million of revenue and $6 million of net income during the year ended December 31, 2015. Transaction costs incurred during the years ended December 31, 2015 and 2014 for this acquisition was $15 million and $7 million, respectively, and are included in policy and other operating expenses on the consolidated statements of income.

The following unaudited pro forma revenue and net income assumes a January 1, 2014 acquisition date for DLD:

	Years ended December 31,	
(In millions)	2015	2014
Revenue	$ 3,002	$ 4,622
Net income	579	473

7. Reinsurance

The following summarizes the effect of reinsurance on premiums and future policy and other policy benefits on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2016	2015	2014
Premiums			
Direct	$ 448	$ 445	$ 387
Reinsurance assumed	20	24	28
Reinsurance ceded	(228)	(274)	(315)
Total premiums	$ 240	$ 195	$ 100
Future policy and other policy benefits			
Direct	$ 1,418	$ 1,041	$ 1,320
Reinsurance assumed	82	30	(134)
Reinsurance ceded	(457)	(554)	(490)
Total future policy and other policy benefits	$ 1,043	$ 517	$ 696

Reinsurance typically provides for recapture rights on the part of the ceding company for certain events of default. Additionally, some agreements require us to place assets in trust accounts for the benefit of the ceding entity. As of December 31, 2016 and 2015, we held assets in trusts of $1,148 million and $1,314 million, respectively. Although we own the assets placed in trust, their use is restricted based on the trust agreement terms. If the statutory book value of the assets, or in certain cases fair value, in a trust declines because of impairments or other reasons, we may be required to contribute additional assets to the trust. In addition, the assets within a trust may be subject to a pledge in favor of the applicable reinsurance company.

Global Atlantic ceded reinsurance transactions-We have a 100% coinsurance and assumption agreement with Global Atlantic. The agreement ceded all existing open block life insurance business issued by Athene Annuity and Life Company (AAIA), with the exception of enhanced guarantee universal life insurance products. We also entered into a 100% coinsurance agreement with Global Atlantic to cede all policy liabilities of the ILICO Closed Block. The ILICO Closed Block consists primarily of participating whole life insurance policies. We also have an excess of loss arrangement with Global Atlantic to reimburse us for any payments required from our general assets to meet the contractual obligations of the AmerUs Closed Block not covered by existing reinsurance through Athene Re USA IV. The AmerUs Closed Block consists primarily of participating whole life insurance policies. Since all liabilities were covered by the existing reinsurance at close, no reinsurance premiums were ceded. The assets backing the AmerUs Closed Block are managed, on AAIA's behalf, by Goldman Sachs Asset Management, an affiliate of Global Atlantic.

During the years ended December 31, 2016 and 2015, we novated certain open blocks of business ceded to Global Atlantic, in accordance with the terms of the coinsurance and assumption agreement. The following summarizes the decreases in amounts on the consolidated balance sheets as a result of the novations:

	Years ended December 31,	
(In millions)	2016	2015
Interest sensitive contract liabilities	$ 1,006	$ 4,179
Future policy benefits	188	67
Policy loans	33	129
Reinsurance recoverable	1,161	4,117

During the third quarter of 2015, portions of the reinsurance agreements between us and Global Atlantic were amended to change the reinsurance agreements from funds withheld to coinsurance, which resulted in a $930 million decrease to funds withheld liability and a corresponding decrease to assets, primarily consisting of investments.

As of December 31, 2016 and 2015, Global Atlantic maintained a series of trust and custody accounts under the terms of these agreements with with assets equal to or greater than a required aggregate statutory balance of $4,122 million and $4,614 million, respectively.

Protective Life Insurance Company (Protective) ceded reinsurance transactions-We reinsured substantially all of the existing life and health business of Athene Annuity & Life Assurance Company (AADE) to Protective under a coinsurance agreement in 2011. As of December 31, 2016 and 2015, Protective maintained a trust for our benefit with assets having a fair value of $1,664 million and $1,616 million, respectively.

Ceded Reinsurance Transactions-The following summarizes our reinsurance recoverable from the following:

	December 31,	
(In millions)	2016	2015
Global Atlantic	$ 3,914	$ 5,090
Protective	1,723	1,760
Other[1]	364	407
Reinsurance recoverable	$ 6,001	$ 7,257

[1]*Represents all other reinsurers, with no single reinsurer having a carrying value in excess of 5% of total recoverable.*

8. Deferred Acquisition Costs, Deferred Sales Inducements and Value of Business Acquired

The following represents a rollforward of DAC, DSI and VOBA:

(In millions)	DAC	DSI	VOBA	Total
Balance at December 31, 2013	$ 210	$ 91	$ 1,834	$ 2,135
Additions	250	113	-	363
Unlocking	2	6	28	36
Amortization	(20)	(10)	(129)	(159)
Impact of unrealized investment (gains) losses	(17)	(12)	(117)	(146)
Balance at December 31, 2014	425	188	1,616	2,229
Additions	288	136	-	424
Unlocking	(6)	(2)	(27)	(35)
Amortization	(34)	(18)	(136)	(188)
Impact of unrealized investment (gains) losses	34	17	182	233
Balance at December 31, 2015	707	321	1,635	2,663
Additions	601	200	-	801
Unlocking	(12)	(3)	(23)	(38)
Amortization	(110)	(37)	(159)	(306)
Impact of unrealized investment (gains) losses	(38)	(19)	(99)	(156)
Balance at December 31, 2016	$ 1,148	$ 462	$ 1,354	$ 2,964

The expected amortization of VOBA for the next five years is as follows:

(In millions)	Expected Amortization
2017	$ 139
2018	128
2019	114
2020	105
2021	97

9. Closed Block

We pay guaranteed benefits under all policies included in the Closed Blocks. In the event the Closed Blocks' assets are insufficient to meet the benefits of the Closed Blocks' guaranteed benefits, we would use general assets to meet the contractual benefits of the Closed Blocks' policyholders. We ceded the ILICO Closed Block of policies to Global Atlantic. In addition, Global Atlantic is responsible for managing the dividend scale of the AmerUs Closed Block.

We elected the fair value option for the AmerUs Closed Block. The fair value of liabilities of the AmerUs Closed Block was derived at election as the sum of the fair value of the AmerUs Closed Block assets plus our cost of capital in the AmerUs Closed Block. The cost of capital was then determined to be the present value of the projected future after tax earnings on the required capital of the AmerUs Closed Block, discounted at a rate which represents a market participant's required rate of return. At each reporting period, we record the fair value of the AmerUs Closed Block by adjusting the change in liabilities, exclusive of the cost of capital, to equal the change in assets. We do not record additional policyholder dividend obligations, as there are no future GAAP earnings available to the policyholders.

The excess of the fair value of the liabilities over the fair value of the assets represents our cost of capital in the AmerUs Closed Block. The maximum amount of future earnings from the assets and liabilities of the AmerUs Closed Block is represented by the reduction in the cost of capital in future years based on the operations of the AmerUs Closed Block and recalculation of the cost of capital each reporting period.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

Summarized financial information of the AmerUs Closed Block is presented below.

(In millions)	December 31, 2016	December 31, 2015
Liabilities		
Future policy benefits	$ 1,607	$ 1,581
Other policy claims and benefits	25	12
Dividends payable to policyholders	96	94
Other liabilities	23	10
Total liabilities	1,751	1,697
Assets		
Trading securities	1,380	1,316
Mortgage loans, net of allowances	44	48
Policy loans	183	181

Federal income taxes funded by the Closed Block	3	1	6
Contribution to AmerUs Closed Block, net of income taxes	$ -	$ (2)	$ (3)

10. Debt

Credit Facility-In 2016, AHL, ALRe and Athene USA entered into a five-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. The borrowing capacity under the Credit Facility is $1 billion. In connection with the Credit Facility, AHL and Athene USA guaranteed all of the obligations of AHL, ALRe and Athene USA under this facility, and ALRe guaranteed certain of the obligations of AHL and Athene USA under this facility. The Credit Facility contains various standard covenants with which we must comply, including the following:

1. Consolidated debt to capitalization ratio of not greater than 35%;
2. Minimum consolidated net worth of no less than the sum of (a) $3.7 billion and (b) an amount equal to 50% of the net cash proceeds received in any equity issuances occurring after January 22, 2016; and
3. Restrictions on our ability to incur debt and liens and to declare or pay dividends, in each case with certain exceptions.

As of December 31, 2016, we had no amounts outstanding under the Credit Facility and were in compliance with all covenants under this facility.

Interest accrues on outstanding borrowings at the London Interbank Offered Rate (LIBOR) plus a margin or a base rate plus a margin, with the applicable margin varying based on AHL's issuer credit rating. The Credit Facility has a commitment fee that is determined by reference to AHL's issuer credit rating, and ranges from 0.15% to 0.50% of the unused commitment. As of December 31, 2016, the commitment fee was equal to 0.225% of the unused commitment.

11. Common Stock

We have six classes of common stock: Class A, Class B, Class M-1, Class M-2, Class M-3 and Class M-4. The Class M-1, Class M-2, Class M-3 and Class M-4 shares are collectively referred to as Class M shares.

Class A shares collectively represent 55% of the total voting power of the Company. Class B shares collectively represent the remaining 45% of the total voting power of the Company, and are beneficially owned by shareholders who are members of the Apollo Group, as defined in our bye-laws. Class B shares can be converted to Class A shares on a one-to-one basis at any time upon notice to us. Class M shares are restricted, non-voting shares issued under equity incentive plans. Our bye-laws place certain restrictions on Class A shares such that (1) a holder of Class A shares, including its affiliates, cannot control greater than 9.9% of the total outstanding vote and if a holder of Class A shares were to control greater than 9.9%, then a holder's voting power is automatically reduced to 9.9% and the other holders of Class A shares would vote the remainder on a prorated basis, (2) the total voting power held by members of our management and employees of the Apollo Group is limited to 3% and (3) Class A shares may be deemed non-voting when owned by a shareholder who owns Class B shares, has an equity interest in certain Apollo entities, or is a member of the Apollo Group.

Share Activities

2016

- We issued 3,098,946 Class A shares during the fourth quarter of 2016 from conversion of Class M-1, M-2, M-3 and M-4 shares and settlement of Class M-4 RSUs. All conversions were settled in shares net of the conversion price and, as a result, no proceeds were received from the conversions.
- On December 14, 2016, we completed the initial public offering (IPO) of our Class A common shares. Shareholders sold 31,050,000 existing Class A shares through the offering. We did not sell any shares in the IPO. A total of 24,158,146 Class B shares were converted into Class A shares on a one-for-one basis in order to participate in the IPO.

2015

- We received $1,038 million to settle remaining capital commitments executed on April 4, 2014 in connection with a private placement offered to accredited investors. As a result, we issued 31,564,339 Class A shares and 8,369,230 Class B shares at $26.00 per share.
- We received commitments and issued an additional 2,315,113 Class A shares at $26.02 per share, resulting in proceeds received of $60 million.
- In satisfaction of our final obligations under the Transaction Advisory Services Agreement (TASA) earned by Apollo in 2014, we issued 2,311,853 Class B shares. See *Note 17 - Related Parties* for further information on the TASA.

2014

- We received commitments for 41,201,578 Class A shares and 8,730,769 Class B shares as a result of a private placement offered to accredited investors launched in late 2013. Of that commitment, 8,240,316 Class A shares and 1,746,154 Class B shares were issued at $26.00 per share in April 2014, which represented a drawdown of 20% of the committed capital in the private placement at the time. The commitment for the remaining 39,945,877 shares was settled in 2015 as described above.
- To encourage significant investment by key employees, we issued 3,693,730 Class A shares at a discounted price of $13.46 pursuant to our equity incentive plan.
- We issued a total of 11,426,883 Class B shares in satisfaction of certain of our obligations under the TASA. This agreement is further described in *Note 17 - Related Parties.*

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

- We converted a note issued as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., into 3,808,626 Class B shares.
- We authorized the following additional shares at a par value of $0.001 per share: (1) 87,110,662 Class A shares, (2) 175,000,000 Class B shares, (3) two new classes of incentive compensation shares consisting of 7,500,000 Class M-3 shares and 7,500,000 Class M-4 shares and (4) 149,998,898 shares of capital stock, which remain undesignated.

The table below shows the changes in each class of shares issued and outstanding:

	Years ended December 31,		
	2016	2015	2014
Class A			
Beginning balance	50,151,265	15,752,736	494,200
Issued shares	3,360,471	34,498,220	11,950,844
Forfeited shares	(37,188)	-	-
Repurchased shares	(313,313)	(99,691)	-
Converted from Class B shares	24,158,146	-	3,307,692
Ending balance	77,319,381	50,151,265	15,752,736

Issued shares	990,650	5,316,751	-
Converted to Class A shares	(79,031)	-	-
Forfeited shares	(452,528)	(242,050)	-
Repurchased shares	(99,732)	(36,258)	-
Ending balance	5,397,802	5,038,443	-

12. Stock-based Compensation

We adopted share incentive plans in 2009, 2012 and 2014. The 2009 and 2012 share incentive plans were amended and restated in 2014 (2014 Modification), along with the adoption of the 2014 share incentive plan (2014 Plan). In 2016, we modified certain share agreements (2016 Modification) and adopted the 2016 share incentive plan (2016 Plan). With the adoption of the 2016 Plan, the 2009, 2012 and 2014 share incentive plans were frozen and no additional awards may be granted under those plans.

The purpose of our share incentive plans is to provide an incentive to achieve long-term company goals and align the interests of our employees, our directors and AAM employees with those of our shareholders. See *Note 17 - Related Parties* regarding our relationship with AAM. Under the share incentive plans, we may issue nonqualified stock options, incentive stock options, rights to purchase shares, restricted shares, RSUs and other awards which may be settled in, or based upon, our common shares. The aggregate number of shares authorized for issuance under the 2016 Plan is 3,500,000 Class A shares. Shares issued upon settlement of an award are newly issued shares.

Through the share incentive plans, we have issued the following three categories of stock-based compensation: long-term incentive plan (LTIP) awards, Class M awards and Class A awards.

LTIP awards-During the second quarter of 2016, we issued awards consisting of time and performance-based RSUs and time-based stock options for Class A shares. RSUs represent a contractual right to receive Class A shares and may be settled in shares or cash at our election. Stock options represent a right to purchase Class A shares at a specified exercise price.

Vesting - Time-based RSUs and stock options vest in one-third increments on the first through third anniversaries of the vesting inception date. The performance-based RSUs have three-year cliff vesting based on meeting company-specific performance thresholds.

Contractual terms - Stock options expire on the tenth anniversary of the date of grant.

Stock Options - A rollforward of activity for the year ended December 31, 2016 for stock options is as follows:

(In millions, except share and per share data)	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding at January 1, 2016	-	$ -	
Granted	470,644	33.95	
Outstanding at December 31, 2016	470,644	$ 33.95	
Vested and expected to vest at December 31, 2016	462,643	$ 33.95	$ 6

The weighted average grant date fair value of stock options granted during the year ended December 31, 2016 was $5.83. As of December 31, 2016, no stock options were exercisable.

Valuation Assumptions - We determine the fair value at grant date for stock options using the Black-Scholes option pricing model. The following represents the assumptions used for the fair value at grant date:

Assumptions used	Year ended December 31, 2016
Risk-free interest rate	1.0%
Dividend yield	-%
Expected volatility	25.0%
Expected term	2.63 years

The risk-free interest rate is derived from U.S. Constant Maturity Treasury yield at the valuation date, with maturity corresponding to weighted-average expected term. The dividend yield is based on our historical and expected dividend payments, which have been zero to date. Absent an established history in a public market for our shares, we have estimated volatility of our share price based on the published historical volatilities of comparable publicly-traded companies over a period consistent with the expected life of the award being valued. The expected term represents the weighted average period of time that awards granted are expected to be outstanding as determined at the grant date of the award.

RSUs - The following represents the activity of nonvested LTIP RSUs for the year ended December 31, 2016:

	RSU	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2016	-	$ -
Granted	329,159	33.95
Forfeited	(1,032)	33.95
Nonvested at December 31, 2016	328,127	$ 33.95

The fair value of the award is determined based on the fair value of our Class A shares on the grant date. As of December 31, 2016, no LTIP RSUs were vested.

Class M awards-We have issued Class M shares and RSUs concurrently with the timing of capital raises, in order to align management incentives with shareholder investments.

Class M shares function similar to options in that they are exchangeable into Class A shares upon payment of a conversion price and other conditions being met. The settlement value of the RSUs is based upon the value of the Class A shares at the time of settlement after deducting the conversion price of the RSUs. RSUs may be settled either in cash or Class A shares at our election. A portion of the Class M shares and RSUs is subject to time vesting conditions (Tranche 1), and the remainder is subject to certain performance-based vesting conditions (Tranche 2). Both Tranche 1 and Tranche 2 RSUs required an IPO as an additional vesting condition. Vesting conditions are further described below.

The nature and terms of the Class M shares are generally consistent across each class. In October 2015, we issued Class M-4 shares with a different Tranche 2 performance condition than the original Class M-4 award. These shares are referred to as Class M-4 Prime. This vesting condition and any other significant differences between classes are separately identified in the following discussion.

Class M share vesting - Tranche 1 shares generally vest in 20% increments on the first through fifth anniversaries of the earlier of the date of grant or vesting inception date. Tranche 1 shares also automatically vest upon the sale of the Company or change in control, prior to the participant's termination or within six months following a qualifying termination. Unvested Tranche 1 shares are forfeited upon a participant's termination.

Tranche 2 awards vest if certain performance hurdles are met, described as follows:

- *Class M-4 (excluding M-4 Prime)* - The vesting performance hurdle for Class M-4 shares is based on the rate of return and realized cash received by certain holders of our shares (Relevant Investors), as defined in the incentive plan, upon sale of their shares prior to or during an IPO or within a 15 month period thereafter. Vesting may also occur if the performance hurdles are met based on deemed sales by Relevant Investors on the dates 7.5, 12 and 15 months after an IPO, and monthly thereafter, through the contractual term, at a price equal to the volume weighted average closing trading price during the 90 day period prior to such date. Based on the results of the performance hurdle calculations, the vesting percentages of the Tranche 2 awards can range from 0% to 100%. Upon a participant's qualifying termination, unvested Tranche 2 awards remain outstanding and eligible to vest for a period of 18 months following the later of the IPO date or date of a qualifying termination. Any unvested Tranche 2 shares remaining at the end of this 18 month period are forfeited. See *2016 Modification* below for further information on Tranche 2 awards vesting for M-1, M-2 and M-3 award agreements.
- *Class M-4 Prime* - The vesting performance hurdle is based on the attainment of specified Class A share prices following an IPO. Vesting will also occur upon a sale of the Company or change in control in which Class A Shares are valued at the respective hurdle share price. Any unvested Tranche 2 shares remaining as of the tenth anniversary of the grant date are forfeited.

Contractual Terms - Unvested Class M-4 shares are forfeited as of 5.25 years following an IPO.

Although the Class M shares function similar to options, they are equity shares, and have dividend rights upon satisfaction of certain conditions and no expiration date once vested. Prior to vesting, if Class M shares are eligible for dividends, any dividends paid would accrue on the unvested M shares; however, if the M share is forfeited, the accrued dividend would also be forfeited.

Conversion to Class A shares - Vested Class M shares became eligible for conversion to Class A shares at IPO or as a result of the 2016 Modification, subject to the conversion rate for each Class M share. A holder of vested Class M shares may elect to exchange vested shares for an equivalent number of Class A shares upon payment, in cash or shares, of the conversion price less the amount of any dividends paid by the Company on Class A shares subsequent to the granting of Class M shares. Following a conversion to Class A shares, shares can be sold subject to contractual transfer or legal restrictions, such as lockups, blackout periods or affiliate sale volume caps.

2014 Modification - During 2014, we adopted amendments to the terms of the existing Class M-1 and M-2 shares to conform the vesting and repurchase terms of the Class M-1 and M-2 shares to those of the Class M-3 and M-4 shares, described above. The modification impacted 29 individuals.

Under the terms of the original plans for the Class M-1 and M-2 shares, we had the right to repurchase vested shares at the lower of purchase cost or fair value if an employee resigned without good reason, either before an IPO or under other conditions as defined in the original plans. As a result of this repurchase option, the expense associated with vested incentive shares would not be recognized on the consolidated statements of income until the date on which such shares would have been converted to Class A shares. Therefore, no expense had been recorded related to the Class M-1 or M-2 shares prior to the 2014 Modification, which revised the terms to generally call for a repurchase price equal to the fair market value of a Class A share less the conversion price of the respective Class M share.

Upon modification of a share award, the share awards are revalued and remeasured as if a new share award was issued. The 2014 Modification of the Class M-1 and M-2 shares resulted in non-recurring additional stock based compensation expense of $81 million.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

2016 Modification - On September 30, 2016, we modified Class M-1, M-2 and M-3 share agreements to vest all Tranche 2 performance-based shares. The compensation committee approved the modification given that vesting of the shares in the near future was probable. We also amended the conversion option, which previously allowed conversion of vested shares only subsequent to an IPO. Under the modified conversion terms, individuals with certain limited exceptions were able elect up to three conversion options including conversion at a specified date prior to an IPO, on the date of an IPO, or ratably each month for six months after an IPO. The modifications impacted 27 individuals.

As a result of the modifications, we recorded an $83 million increase to additional paid-in capital, due to the reclassification of the Tranche 2 shares from liability awards to equity awards. We also recorded a $42 million charge to stock-based compensation expense and additional paid-in capital for the vesting of Tranche 2 shares, primarily related to the acceleration of previously unrecognized compensation expense.

Valuation Assumptions for Class M Shares-The fair value of the Class M shares is determined using the Black-Scholes option pricing model, with application of a Monte-Carlo simulation to determine the value of the Tranche 2 Class M shares. Grant date assumptions used for valuation of Class M share awards are as follows:

	Years ended December 31,		
Assumptions used	2016	2015	2014
Athene Class A share value	$32.90	$34.23	$26.02
Risk-free interest rate	0.5% - 1.8%	0.9% - 1.1%	0.6%
Expected dividend yield	-%	-%	-%
Expected volatility	30.0%	25.9%	17.5%
Expected term	3.00 years	2.42 years	2.39 years

The fair value of the Class A shares subsequent to our IPO is determined based on the publicly traded closing price on the New York Stock Exchange. During 2016 and 2015, prior to our IPO, the fair value was determined based on a GAAP book value multiple approach. Under this approach we used a comparable peer set of public companies and their share price to book value ratio, less applicable discounts for lack of marketability of AHL in order to determine the AHL Class A share price. The fair value of Class A shares during 2014 was determined using the embedded value method, which is based on the present value of the future expected regulatory distributable income generated by the net assets plus the excess capital.

The expected term represents the weighted average period of time that awards granted are expected to be outstanding. The expected term is determined from the modification date, the grant date or the period end date, depending on the accounting treatment for each award.

In addition, the Tranche 2 Class M share assumptions include an estimate of the probability of the vesting conditions being met. This assumption is developed by using a Monte-Carlo simulation to generate the possible future value of the Company's equity at a liquidity event to determine the percentage of Tranche 2 Class M shares that vest for each simulated path. The fair value of the Tranche 2 Class M shares is then estimated by averaging the value for all simulated paths and discounting the results at the risk-free interest rate to the valuation date.

The basis for determining the remaining assumptions is consistent with those discussed for LTIP awards above.

Award activity for Class M Shares-A rollforward of award activity for the year ended December 31, 2016 of the Class M shares is as follows:

	Tranche 1			Tranche 2			Total	
(In millions, except share and per share data)	Class M Shares	Weighted Average Conversion Price	Aggregate Intrinsic Value	Class M Shares	Weighted Average Conversion Price	Aggregate Intrinsic Value	Class M Shares	Weighted Average Conversion Price
Outstanding at January 1, 2016	6,815,504	$ 15.44		9,144,220	$ 15.91		15,959,724	$ 15.71
Granted	323,297	33.90		646,603	33.90		969,900	33.90
Converted	(1,993,576)	12.03		(2,473,456)	11.46		(4,467,032)	11.71
Forfeited	(230,655)	19.58		(833,873)	16.40		(1,064,528)	17.09
Repurchased	(445,985)	13.56		(135,662)	10.95		(581,647)	12.95
Outstanding at December 31, 2016	4,468,585	$ 18.27		6,347,832	$ 19.52		10,816,417	$ 19.00
Vested and expected to vest at December 31, 2016	4,437,356	$ 18.22	$ 132	6,297,187	$ 19.45	$ 180		
Convertible at December 31, 2016[1]	2,631,542	$ 12.97	$ 92	3,307,697	$ 10.93	$ 123		

[1] *Includes shares scheduled to convert in the first six months of 2017 as a result of the 2016 Modification.*

The following represents the activity of nonvested Class M shares for the year ended December 31, 2016:

	Tranche 1		Tranche 2		Total	
	Class M Shares	Weighted Average Grant Date Fair Value	Class M Shares	Weighted Average Grant Date Fair Value	Class M Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2016	2,661,291	$ 7.74	8,036,554	$ 4.88	10,697,845	$ 5.59
Granted	323,297	8.45	646,603	11.42	969,900	10.43
Vested	(916,890)	6.67	(4,809,149)	2.14	(5,726,039)	2.87
Forfeited	(230,655)	5.62	(833,873)	2.14	(1,064,528)	2.89
Nonvested at December 31, 2016	1,837,043	$ 8.67	3,040,135	$ 11.36	4,877,178	$ 10.34

The weighted average grant date fair value of Class M share awards granted during the years ended December 31, 2015 and 2014, was $8.66 and $9.31, respectively.

The total fair value of vested Tranche 1 Class M shares was $92 million, $98 million and $49 million during the years ended December 31, 2016, 2015 and 2014, respectively. The total fair value of vested Tranche 2 Class M shares was $122 million, $28 million and $17 million during the years ended December 31, 2016, 2015 and 2014, respectively.

No shares were converted or convertible during the years ended December 31, 2015 and 2014. The total intrinsic value of M shares converted during the year ended December 31, 2016 was $117 million. We paid $14 million to repurchase vested Class M shares during the year ended December 31, 2016.

Class A awards-The 2014 Plan allowed for the purchase of Class A shares by certain employees and directors of the Company and its affiliates. In 2015, we issued an aggregate of 442,590 fully-paid Class A shares for total proceeds of $12 million. In April 2014, we issued an aggregate of 3,693,730 fully-paid Class A shares for total proceeds of $50 million. For the years ended December 31, 2015 and 2014, we recognized $2 million and $46 million, respectively, of stock-based compensation expense associated with the Class A shares to the extent shares were purchased at a discounted price from fair value on the issuance date.

Additionally, we may issue restricted Class A shares under our share incentive plans. In 2016, we issued 238,972 restricted Class A shares at a weighted average grant date fair value of $33.41 per share. In 2015, we issued 160,754 restricted Class A shares at a weighted average grant date fair value of $26.02 per share. The restricted Class A shares issued in 2016 and 2015 had a service commencement date of January 1, 2015. All restricted Class A awards issued vest on a ratable basis over three years from the service commencement date. The restricted Class A shares are classified as equity awards measured using fair value of Class A shares on grant date.

Compensation expense-Compensation expense is recognized based on the number of awards expected to vest, which represents the awards granted less expected forfeitures over the life of the award, as estimated at the date of grant.

Class M shares with Tranche 1 vesting requirements are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period. The expense for Tranche 1 shares issued to employees is calculated based on grant date fair value multiplied by the number of shares awarded. The expense for Tranche 1 shares issued to non-employees (i.e. AAM participants) is recognized initially at the grant date fair value multiplied by the number of shares. However, the fair value of the awards are revalued each reporting period through completion of counterparty performance to coincide with the fair value of the services provided by the non-employees. The result of the revaluation is recognized in the period in which the revaluation occurs.

Employee and non-employee Tranche 2 shares, excluding M-4 Prime, are accounted for as liability awards. Compensation expense for all participants is remeasured each reporting period through settlement at the fair value of the awards, factoring in the probability of achieving the vesting targets described above. Upon vesting of Tranche 2 shares, the liability is reclassified to equity because the vesting condition which resulted in liability classification is no longer present, and is measured at fair value on the date of reclassification.

Tranche 2 M-4 Prime shares are accounted for as equity awards with expense recognition having commenced upon completion of our IPO. Compensation expense is calculated based on the grant date fair value of such awards multiplied by the number of shares awarded.

Class A shares are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period, if any. The compensation expense for Class A shares is calculated based on the grant date fair value of the Class A common shares, less the purchase price, multiplied by the number of shares awarded.

LTIP awards are accounted for as equity awards. Expense for time-based RSUs and options is recognized ratably over the vesting period based on the number of shares expected to vest. Expense for performance-based RSUs is further adjusted by the performance factor most likely to be achieved, as estimated by management at the end of the performance period.

Components of stock compensation expense recorded on the consolidated statements of income are as follows:

	Years ended December 31,		
(In millions)	2016	2015	2014
Class M - Tranche 1	$ 11	$ 12	$ 54
Class M - Tranche 2	66	50	47
Class A	2	5	47
LTIP	2	-	-
Stock-based compensation expense	$ 81	$ 67	$ 148

As of December 31, 2016, the Class M shares had unrecognized compensation cost of $16 million for Tranche 1 and $24 million for Tranche 2. The cost is expected to be recognized over a weighted-average period of 1.6 years and 1.1 years, respectively. Unrecognized compensation cost of $4 million for LTIP awards is expected to be recognized over a weighted-average period of 1.1 years.

In 2014, we issued 6,184,948 of our Class B shares to Apollo in satisfaction of settlement amounts earned in 2014 by Apollo under the TASA discussed in *Note 17 - Related Parties*. In 2014, we also settled the equity swap transaction related to the TASA through the issuance of 5,241,935 Class B shares to Apollo.

13. Earnings Per Share

The following represents our basic and diluted EPS calculations:

	Year ended December 31, 2016		
(In millions, except share and per share data)	Class A	Class B	Class M-1
Net income available to AHL shareholders - basic	$ 224	$ 580	$ 1
Effect of stock compensation plans on allocated net income	1	-	-
Net income available to AHL shareholders - diluted	$ 225	$ 580	$ 1
Basic weighted average shares outstanding	52,086,945	134,445,840	218,324
Dilutive effect of stock compensation plans	1,443,531	-	4,246,074
Diluted weighted average shares outstanding	53,530,476	134,445,840	4,464,398
Earnings per share[1]			
Basic	$ 4.31	$ 4.31	$ 4.31
Diluted	$ 4.21	$ 4.31	$ 0.21

[1] *Calculated using whole figures.*

	Years ended December 31,	
(In millions, except share and per share data)	2015	2014
Net income available to AHL shareholders	$ 562	$ 463
Basic weighted average shares outstanding	175,091,802	129,519,108
Dilutive effect of stock compensation plans	86,846	11
Dilutive effect of equity swap[1]	-	2,089,345
Diluted weighted average shares outstanding	175,178,648	131,608,464
Earnings per share on Class A and B shares[2]		
Basic	$ 3.21	$ 3.58
Diluted	$ 3.21	$ 3.52

[1] *Equity swap relates to TASA. See Note 17 - Related Parties for additional information.*

[2] *Calculated using whole figures.*

We use the two-class method for allocating net income available to AHL shareholders to each class of our common stock. Our Class M shares do not become eligible to participate in dividends until a return of investment (ROI) condition has been met for each class. Once eligible, each class of our common stock has equal dividend rights. Prior to the fourth quarter of 2016, the ROI condition had not been met for any of our Class M shares and as a result, no earnings were attributable to those classes. In conjunction with our IPO, the ROI condition for Class M-1 was met, while Class M-2, Class M-3 and Class M-4 shares remain ineligible for dividends as of December 31, 2016. Therefore, the basic EPS calculations above reflect only those classes of stock eligible to participate in earnings during each respective period. For the years ended December 31, 2015 and 2014, Class A and B had the same basic and dilutive EPS, and as such are presented together for those years.

Dilutive shares are calculated using the treasury stock method. For Class A common shares, this method takes into account shares that can be settled into Class A common shares, net of a conversion price.

The diluted EPS calculation for Class A shares excluded 116,031,381 shares, RSUs and options outstanding as of December 31, 2016. The excluded shares were comprised of 113,497,613 shares considered antidilutive and 2,533,768 shares for which a performance condition had not been met. The diluted EPS calculation excluded 16,653,624 and 11,674,141 outstanding shares as of December 31, 2015 and 2014, respectively, as the issuance restrictions had not been satisfied as of each year end.

14. Accumulated Other Comprehensive Income

The following is a detail of AOCI:

	December 31,	
(In millions)	2016	2015
AFS securities	$ 972	$ (405)
DAC, DSI, VOBA, future policy benefits and dividends payable to policyholders adjustments on AFS securities	(408)	91
Noncredit component of OTTI losses on AFS securities	(17)	(15)
Hedging instruments	10	15
Pension adjustments	(4)	(4)
Foreign currency translation adjustments	(12)	(4)
Accumulated other comprehensive income (loss), before taxes	541	(322)
Deferred income tax asset (liability)	(174)	85
Accumulated other comprehensive income (loss)	$ 367	$ (237)

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

Changes in AOCI are presented below:

	Years ended December 31,		
(In millions)	2016	2015	2014
Unrealized gains (losses) on AFS securities			
Unrealized holding gains (losses) arising during the year	$ 1,397	$ (1,661)	$ 1,225
Change in DAC, DSI, VOBA, future policy benefits and dividends payable to policyholders adjustment	(499)	419	(317)
Less: Reclassification adjustment for gains (losses) realized in net income[1]	20	72	9
Less: Income tax expense (benefit)	261	(428)	318
Change in unrealized gains (losses) on AFS securities	617	(886)	581
Noncredit component of OTTI losses on AFS securities			
Noncredit component of OTTI losses on AFS securities recognized during the year	(9)	(13)	(1)
Less: Reclassification adjustment for losses realized in net income[1]	(7)	(3)	-
Less: Income tax expense (benefit)	-	(4)	1
Change in noncredit component of OTTI losses on AFS securities	(2)	(6)	(2)
Unrealized gains (losses) on hedging instruments			
Change in hedging instruments during the year	(5)	11	10
Less: Income tax expense (benefit)	(2)	4	4
Change in hedging instruments	(3)	7	6
Pension adjustments			
Pension adjustments during the year	-	12	(17)
Less: Income tax expense (benefit)	-	4	(6)
Change in pension adjustments	-	8	(11)
Foreign currency translation adjustments			
Foreign currency translation adjustments during the year	(8)	(4)	-
Change in AOCI	$ 604	$ (881)	$ 574

[1] *Recognized in investment related gains (losses) on the consolidated statements of income.*

15. Income Taxes

Income tax expense consists of the following:

	Years ended December 31,		
(In millions)	2016	2015	2014
Current	$ (33)	$ (19)	$ (84)
Deferred	(19)	33	138
Income tax expense (benefit)	$ (52)	$ 14	$ 54

Income tax expense was calculated based on the following components of income before income taxes:

	Years ended December 31,		
(In millions)	2016	2015	2014
Pre-tax income - Bermuda	$ 596	$ 510	$ 271
Pre-tax income - Germany	16	8	-
Pre-tax income - U.S.	141	74	261
Income before income taxes	$ 753	$ 592	$ 532

The expected tax provision computed on pre-tax income at the weighted average tax rate has been calculated as the sum of the pre-tax income in each jurisdiction multiplied by that jurisdiction's applicable statutory tax rate. Statutory tax rates of 0%, 31% and 35% have been used for Bermuda, Germany and the United States, respectively. A reconciliation of the difference between the provision for income taxes and the expected tax provision at the weighted average tax rate is as follows:

	Years ended December 31,		
(In millions)	2016	2015	2014
Expected tax provision computed on pre-tax income at weighted average income tax rate	$ 54	$ 28	$ 91
(Decrease) increase in income taxes resulting from:			
Deferred tax valuation allowance	(116)	(6)	(22)
Prior year true-up	8	2	(12)
Corporate owned life insurance	(7)	(7)	(6)
Stock compensation expense	5	-	-
State taxes and other	4	(3)	3
Total income tax expense (benefit)	$ (52)	$ 14	$ 54
Effective tax rate	(7)%	2%	10%

Total income taxes were as follows:

	Years ended December 31,		
(In millions)	2016	2015	2014
Income tax expense (benefit)	$ (52)	$ 14	$ 54
Income tax expense (benefit) from OCI	259	(424)	317
Total income taxes	$ 207	$ (410)	$ 371

Deferred income tax assets and liabilities consisted of the following:

	December 31,	
(In millions)	2016	2015
Deferred tax assets		
Insurance liabilities	$ 1,478	$ 1,351
Net unrealized losses on AFS	-	84
Net operating and capital loss carryforwards	221	160
Tax credits	18	-
VOBA	69	72
Employee benefits	52	57
Other	27	20
Total deferred tax assets	1,865	1,744
Valuation allowance[1]	(72)	(193)
Deferred tax asset, after valuation allowance	1,793	1,551
Deferred tax liabilities		
Investments, including derivatives	668	429
Net unrealized gains on AFS	178	-
VOBA	346	372
DAC	230	98
Other	6	46
Total deferred tax liability	1,428	945
Net deferred tax asset[2]	$ 365	$ 606

[1] *A portion of the valuation allowance reduction was recorded in other comprehensive income.*

[2] *Net deferred tax asset includes deferred tax liability relating to ADKG, which is included in other liabilities on the consolidated balance sheets.*

As of December 31, 2016, we have gross deferred tax assets associated with U.S. federal and state net operating losses of $632 million, which will begin to expire in 2022.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The valuation allowance consists of the following:

	December 31,	
(In millions)	2016	2015
U.S. federal and state net operating losses	$ 22	$ 100
U.S. other deferred tax assets	-	27
German other deferred tax assets	50	66
Total valuation allowance	$ 72	$ 193

During the third quarter of 2016, we identified a tax plan that, when implemented, will allow us to use a significant portion of the U.S. non-life insurance companies' net operating losses, which are scheduled to expire beginning in 2022, and other deductible temporary differences. As a result, we released the corresponding deferred tax valuation allowance of $102 million, as it is more likely than not that these attributes will be realized.

AHL and its Bermuda subsidiaries file protective U.S. income tax returns and its U.S. subsidiaries file income tax returns with the U.S. federal government and various U.S. state governments. AADE is not subject to U.S. federal and state examinations by tax authorities for years prior to 2007, while Athene Annuity & Life Assurance Company of New York (AANY) and Athene Life Insurance Company (ALIC) are not subject to examinations for years prior to 2011 and 2013, respectively. See discussion of ongoing tax examinations relating to Aviva USA and subsidiaries at *Note 18 - Commitments and Contingencies.*

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Bermuda Minister of Finance that, in the event of any such taxes being imposed, the Company will be exempted from taxation until the year 2035.

Withholding taxes have not been provided on undistributed earnings of AHL's U.S. and German subsidiaries as of December 31, 2016 or 2015. Although withholding taxes may apply in the event a dividend is paid by AHL's U.S. or German subsidiaries, we have not accrued withholding taxes as we do not intend to remit these earnings. The cumulative amount subject to withholding tax, if distributed, as well as the determination of the associated tax liability, is not practicable to compute; however, it may be material to the Company's financial position and results of operations. Any dividends remitted to AHL from ALRe are not subject to withholding tax.

16. Statutory Requirements

AHL's insurance and reinsurance subsidiaries are subject to insurance laws and regulations in the jurisdictions in which they operate including Bermuda, all U.S. states, the District of Columbia and Germany. Certain regulations include restrictions that limit the dividends or other distributions, such as loans or cash advances, available to shareholders without prior approval of the insurance regulatory authorities. The differences between financial statements prepared for insurance regulatory authorities and GAAP financial statements vary by jurisdiction.

Bermuda statutory requirements-ALRe is licensed by the Bermuda Monetary Authority (BMA) as a long term insurer and is subject to the Insurance Act 1978, as amended (Bermuda Insurance Act) and regulations promulgated thereunder. Effective January 1, 2016 the BMA implemented the Economic Balance Sheet (EBS) framework into the Bermuda Solvency and Capital Requirement (BSCR) which was granted equivalency to the European Union's Directive (2009/138/EC) (Solvency II).

Under the Bermuda Insurance Act, ALRe is required to maintain minimum statutory capital and surplus to meet the minimum margin of solvency (MMS) and the Enhanced Capital Requirement (ECR). The MMS is equal to the greater of $8 million or 2% of the first $500 million of statutory assets plus 1.5% of statutory assets above $500 million. The ECR is calculated based on a risk-based capital model where risk factor charges are applied to the EBS. As of December 31, 2016, the MMS and ECR were $798 million and $1,932 million, respectively, and ALRe was in excess of these required minimums.

Under the EBS framework, statutory financial statements are generally equivalent to GAAP financial statements, with the exception of permitted practices granted by the BMA. ALRe has permission in the statutory financial statements to use amortized cost instead of fair value as the basis for certain investments. Additionally, ALRe uses U.S. statutory reserving principles for the calculation of insurance reserves instead of GAAP, subject to the reserves being proved adequate based on cash flow testing. The impact to the statutory financial statements of these permitted practices is an increase of $1,254 million to capital and surplus as of December 31, 2016 and a decrease of $1,005 million to statutory net income for the year ended December 31, 2016.

Under the regime in effect prior to January 1, 2016, the BMA had granted ALRe permission to use amortized cost instead of fair value as the basis for non-equity securities, including investments underlying funds withheld and modco reinsurance agreements. As a result of this permitted practice $162 million of unrealized losses were excluded from ALRe's statutory return as of December 31, 2015.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's statutory capital and surplus, unless at least two members of ALRe's board of directors and its principal representative in Bermuda sign and submit to the BMA, an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances,

ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MMS and ECR, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of statutory capital. Distributions in excess of this amount require the approval of the BMA. As of December 31, 2016 and 2015, the maximum distribution ALRe was permitted to pay AHL without the need for prior approval was $2,479 million and $3,529 million, respectively.

Germany statutory requirements-Our primary German insurance entity, Athene Lebensversicherung AG (ALV), is regulated by the Federal Financial Supervisory Authority of Germany as a private insurance undertaking and is subject to the Insurance Supervision Act and regulations promulgated thereunder. Effective January 1, 2016, ALV became subject to Solvency II minimum capital requirements (MCR) and solvency capital requirements (SCR) interpreted by the relevant regulatory authorities. ALV is obliged to meet these requirements in order to be able to fulfill, subject to a certain confidence level of 99.5% for SCR, or 85% for MCR, over a one-year period, all obligations arising from existing business, as well as the new business expected to be written over the following 12 months. Failure to maintain adequate capital levels may result in regulatory action. As of December 31, 2016, statutory capital and surplus as calculated under Solvency II was $570 million, while MCR and SCR were $121 million and $268 million, respectively.

Prior to 2016, ALV was subject to regulations under Solvency I, which required ALV to maintain minimum statutory capital as calculated against reserves. As of December 31, 2015, statutory capital and surplus as calculated under SI was $325 million, while required capital under SI was $195 million. Under both the SI and SII regimes, ALV is permitted to use dividend payable balances held for policyholder participation in determining the total capital of the entity.

ALV is restricted as to the payment of dividends pursuant to calculations, which are based upon the analysis of current euro swap rates against existing policyholder guarantees. As of December 31, 2016, ALV did not exceed this threshold and no amounts were available for distribution.

U.S. statutory requirements-AHL's regulated U.S. subsidiaries and the corresponding insurance regulatory authorities are as follows:

Subsidiary	Regulatory Authority
AADE	Delaware Department of Insurance
ALIC	Delaware Department of Insurance
AANY	New York Department of Financial Services
ALICNY	New York Department of Financial Services
AAIA	Iowa Insurance Division
Structured Annuity Reinsurance Company (STAR)	Iowa Insurance Division
Athene Re USA IV	State of Vermont Department of Financial Regulation

Each entity's statutory statements are presented on the basis of accounting practices determined by the respective regulatory authority. The regulatory authority recognizes only statutory accounting practices prescribed or permitted by the corresponding state for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under insurance law.

The maximum dividend these subsidiaries can pay to shareholders, without prior approval of the respective state insurance department, is subject to restrictions relating to statutory surplus or net gain from operations. The maximum dividend payment over a twelve-month period may not, without prior approval, be paid from a source other than earned surplus and may not exceed the greater of (1) the prior year's net gain from operations or (2) 10% of policyholders' surplus. Based on these restrictions, the maximum dividend AADE could pay to Athene USA, and ultimately to AHL's shareholders, absent regulatory approval was $127 million and $125 million as of December 31, 2016 and 2015, respectively. Other requirements limit the amount that could be withdrawn from AADE and the maximum AADE could dividend while staying in compliance with these state regulations, which was $80 million and $65 million as of December 31, 2016 and 2015, respectively. Any dividends from AHL's other U.S. statutory entities in excess of the amounts allowed for AADE would not be able to be remitted to AHL without regulatory approval from the Delaware Department of Insurance. Additionally, we have agreed with the Iowa Insurance Division not to cause AAIA to pay dividends until August 15, 2018; therefore, we currently consider AAIA's dividend capacity as zero.

As of December 31, 2016, AHL's U.S. subsidiaries' solvency, liquidity and risk-based capital amounts were significantly in excess of the minimum levels required.

In some instances, the states of domicile of our U.S. subsidiaries have adopted prescribed accounting practices that differ from the required accounting outlined in National Association of Insurance Commissioners (NAIC) Statutory Accounting Principles (SAP). These subsidiaries also have certain accounting practices permitted by the states of domicile that differ from those found in NAIC SAP. These prescribed and permitted practices are described as follows:

AAIA - Among the products issued by AAIA are indexed universal life insurance and fixed indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, primarily the S&P 500. We purchase call options, futures and variance swaps to hedge the growth in interest credited to the customer as a direct result of increases in the related index. The Iowa Insurance Division allows an insurer to elect (1) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (2) to use an indexed annuity reserve calculation methodology under which

call options associated with the current index interest crediting term are valued at zero. AAIA has elected to apply this option to its over-the-counter call options and reserve liabilities. As a result, AAIA's statutory surplus decreased by $17 million and increased by $14 million as of December 31, 2016 and 2015, respectively.

Athene Re USA IV - AAIA has ceded the AmerUs Closed Block to Athene Re USA IV on a 100% funds withheld basis. A permitted practice in the State of Vermont allows Athene Re USA IV to include as admitted assets the face amount of all issued and outstanding letters of credit used to fund its reinsurance obligations to AAIA in its statutory financial statements. If Athene Re USA IV had not followed this permitted practice, then it would not have exceeded authorized control level risk based capital requirements. As of December 31, 2016 and 2015, the face amount of the letters of credit was $153 million.

Statutory reinsurance agreement - We have an agreement with Hannover Life Reassurance Company of America, which is treated as reinsurance under statutory accounting practices and as a financing arrangement under GAAP. The statutory surplus benefit under this agreement is eliminated under GAAP and the associated charges are recorded as risk charges and included in policy and other operating expenses on the consolidated statements of income. The transaction became effective October 1, 2016 and is a coinsurance agreement for statutory purposes covering 80% of the GLWB rider on 2016 and 2017 sales of certain fixed indexed annuity products, with an option to extend reinsurance to 2018 sales. The reserve credit recorded on a statutory basis was $91 million as of December 31, 2016.

Statutory capital and surplus and net income (loss)-The following table presents, for each of our insurance subsidiaries, the statutory capital and surplus and the statutory net income (loss), based on the most recently filed statutory financial statements filed with insurance regulators:

	Statutory Capital & Surplus		Statutory Net Income (Loss)		
	December 31,		Years ended December 31,		
(In millions)	2016	2015	2016	2015	2014
ALRe	$ 6,124	$ 5,650	$ 460	$ 461	$ 632
AADE	1,272	1,251	71	68	116
ALIC	79	77	1	1	1
AANY	231	208	1	8	7
ALICNY	78	73	10	14	88
AAIA	1,113	1,109	100	597	263
STAR	80	76	17	4	35
Athene Re USA IV	50	38	7	1	6

17. Related Parties

Athene Asset Management

Investment related expenses - Substantially all of our investments, with the exception of the investments of ADKG, are managed by AAM, a subsidiary of AGM. AAM provides direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services for our investment portfolio, including investment compliance, tax, legal and risk management support. As of December 31, 2016, AAM directly managed $53,368 million of our investment portfolio assets, of which 84% are rated one or two by the NAIC. For certain assets which require specialized sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. For the services related to these investments, AAM earns a fee of 0.40% per year, subject to certain discounts, on all assets managed in accounts owned by or related to us, including sub-advised assets, but excluding assets of ADKG and certain other limited exceptions. Additionally, AAM recharges the sub-advisory fees it incurs with respect to our sub-advised assets to us.

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

AAM has entered into a Master Sub-Advisory Agreement (MSAA) with certain Apollo affiliates to sub-advise AAM with respect to a portion of our assets, with the fees recharged to us, in addition to the gross fee of 0.40% per year paid to AAM as described above. The MSAA covers services rendered by Apollo-affiliated sub-advisors relating to the following investments:

	December 31,	
(In millions, except for percentages)	2016	2015
Fixed maturity securities		
U.S. state, municipal and political subdivisions	$ 5	$ 10
Foreign governments	149	107
Corporate	2,032	1,435
CLO	4,727	4,339
ABS	911	1,746
CMBS	975	1,010
RMBS	-	21
Mortgage loans	1,767	1,594
Investment funds	23	21
Trading securities	126	207
Funds withheld at interest	1,682	1,182
Other investments	81	83
Total assets sub-advised by Apollo affiliates	$ 12,478	$ 11,755
Percent of assets sub-advised by Apollo affiliates to total AAM-managed assets	19%	20%

Apollo Asset Management Europe

ADKG has an investment advisory agreement with Apollo Asset Management Europe (together with certain of its affiliates, AAME), also a subsidiary of AGM. AAME provides advisory services for all of ADKG's investment portfolio other than operating cash, mortgage loans secured by residential and commercial properties that are not identified and advised by AAME, and assets related to unit-linked policies. Also excluded are assets held in German special investment funds managed or advised by Apollo, AAM and any of the respective affiliates of Apollo, AAM or AAME, to the extent the entity receives a management or advisory fee in connection with the fund. In providing these services, AAME has access to Apollo's European expertise and capabilities. The ADKG investments sub-advised by AAME consist primarily of corporate and sovereign bonds, as compared to the more diverse range of assets managed by AAM or those held in the German special investment funds. As compensation for the investment advisory services rendered, AAME receives a fee of 0.10% per year on the assets it sub-advises. Affiliates of AAME receive an advisory fee of 0.35% per year on certain German special investment funds and our investment in a sub-fund of Apollo Capital Efficient Fund I (ACE fund), as well as a pro rata share of operating expenses up to 0.30% on the ACE fund. As of December 31, 2016, these investment funds totaled $258 million and $84 million, respectively. These fees are included in sub-advisory fees in the table below.

The following represents the assets sub-advised by AAME:

	December 31,	
(In millions)	2016	2015
Fixed maturity securities		
Foreign governments	$ 2,062	$ 2,349
Corporate	1,567	1,607
Equity securities	187	220

Investment funds	34	41
Policy loans	6	9
Real estate	541	566
Other investments	153	125
Cash and cash equivalents	25	-
Total assets sub-advised by AAME	$ 4,575	$ 5,056

ATHENE HOLDING LTD.
Notes to Consolidated Financial Statements

The following summarizes the asset management fees and sub-advisory fees we have incurred related to AAM, AAME and other Apollo affiliates:

	Years ended December 31,		
(In millions)	2016	2015	2014
Asset management fees	$ 229	$ 226	$ 222
Sub-advisory fees	66	42	36

The management and sub-advisory fees are included within net investment income on the consolidated statements of income. The management fees payable as of December 31, 2016 and 2015, were $28 million and $35 million, respectively. The sub-advisory fees payable as of December 31, 2016 and 2015, were $11 million and $24 million, respectively. Both the management and sub-advisory fees payables are included in other liabilities on the consolidated balance sheets.

The investment management or advisory agreements with AAM or AAME have no stated term and any party can terminate upon notice. However, our bye-laws provide that we will not exercise our termination rights under the agreements, except that any agreement may only be terminated on October 31, 2018, or any third anniversary thereafter. Any termination on that date without cause requires (1) approval of our board of directors and the holders of our common shares that hold a majority of total voting power (giving effect to the voting allocation provisions set forth in our bye-laws) and (2) six months' prior written notice to AAM or AAME of termination. We may terminate the investment management or advisory agreements for cause, with the approval of our board of directors.

We have a management investment committee, which includes members of our senior management and reports to the risk committee of our board of directors. The committee focuses on strategic decisions involving our investment portfolio, such as approving investment limits, new asset classes and our allocation strategy, reviewing large asset transactions, as well as monitoring our credit risk, and the management of our assets and liabilities.

Also, because the Apollo Group has a significant voting interest in us, in order to protect against potential conflicts of interest resulting from transactions into which we have entered and will continue to enter into with the Apollo Group, our board of directors has formed a conflicts committee consisting of three of our directors who are not officers or employees of any member of the Apollo Group. The conflicts committee reviews and a majority of the committee members must approve material transactions between us and the Apollo Group, subject to certain exceptions.

Service fees - We have entered into shared services agreements with AAM. Under these agreements, we and AAM make available to each other certain personnel and services. Expenses for the services are based on the amount of time spent on the affairs of the other party, in addition to actual expenses incurred and certain cost reimbursements. For the years ended December 31, 2016, 2015 and 2014, net expenses allocated from (to) AAM under these agreements were $6 million, $2 million and $(13) million, respectively.

Other AGM Affiliates

TASA - Since our founding, Apollo has provided a diverse array of services in order to grow our balance sheet, source, underwrite, and integrate transactions and has provided us access to their infrastructure. Through October 30, 2012, we had a standard 10-year monitoring contract with Apollo Alternative Assets, L.P., Apollo Management Holdings, L.P. and Apollo Global Securities, LLC (collectively, the Apollo TASA Parties) for these services that required cash payment of a quarterly monitoring fee of 0.50% of our capital and surplus, as defined, plus out of pocket expenses, with a termination date of July 15, 2019.

As we began to implement public company readiness initiatives in late 2012, both parties voluntarily agreed to an early termination of the monitoring contract. In exchange for early termination of the monitoring contract, Apollo received settlement fees on a quarterly basis from January 1, 2013, to December 31, 2014. Also, to promote alignment between Apollo and Athene's shareholders and to preserve cash to support Athene's growth plan, Apollo elected to receive its settlement fees under the agreement in shares of Athene rather than cash.

On January 1, 2013, we entered into an equity swap transaction with Apollo in connection with the termination of the quarterly monitoring fee discussed above. Pursuant to this swap, a quarterly settlement amount continued to accrue to Apollo, but the payment of those amounts (whether in stock or cash) would not be made to Apollo until the earlier of the time when Apollo was no longer deemed to control the Company, within the meaning of the derivative instrument delivered pursuant to the TASA and October 31, 2017.

In April 2014, as a result of the external capital raise, Apollo was no longer deemed to control the Company (as defined under the swap) and, as a result, the swap was settled in stock for settlement amounts owed through that date.

Additionally, in April 2014, we further amended the TASA to exclude from capital and surplus, on which the quarterly monitoring fee was calculated, the capital received in the April 2014 capital raise, and any capital raised in connection with certain potential future acquisitions as defined in the amended TASA.

The total costs incurred pursuant to the TASA, including direct expenses, were $228 million for the year ended December 31, 2014 and are recorded in policy and other operating expenses on the consolidated statement of income. The outstanding liability was settled during 2014, and no additional fees accrue under the TASA.

Other related party transactions-In 2015, we entered into a loan purchase agreement with AmeriHome Mortgage Company, LLC (AmeriHome), an investee of A-A Mortgage, an equity method investee. The agreement allows us to purchase residential mortgage loans which they have purchased from correspondent sellers and pooled for sale in the secondary market. AmeriHome retains the servicing rights to the sold loans. We have purchased $22 million and $83 million of residential mortgage loans under this agreement during the years ended December 31, 2016 and 2015, respectively.

During the third quarter of 2016, we completed a series of transactions with Apollo Commercial Real Estate Finance, Inc. (ARI), a related party managed by an affiliate of Apollo. Pursuant to an agreement between ARI and Apollo Residential Mortgage, Inc. (AMTG), another related party managed by an Apollo affiliate, AMTG merged with and into ARI. In accordance with an Asset Purchase and Sale Agreement between us and ARI, we purchased $1,090 million of primarily non-agency RMBS from ARI subsequent to its merger with AMTG. We also provided ARI with a secured short-term $175 million loan to consummate the merger, which was subsequently repaid with the proceeds of the sale of such RMBS. Finally, subsequent to the merger, we purchased $20 million of ARI shares of common stock pursuant to a stock purchase agreement that required such purchase if ARI's common stock price fell below a specified price, which was the per share value used in determining the purchase price under the merger agreement between ARI and AMTG, during the 30 trading days following the closing of the merger.

18. Commitments and Contingencies

Contingent Commitments-We had commitments to make investments, primarily capital contributions to investment funds, of $962 million and $825 million as of December 31, 2016 and 2015, respectively. We expect most of our current commitments will be invested over the next five years; however, these commitments could become due any time upon counterparty request.

Funding Agreements-We are a member of the Federal Home Loan Bank (FHLB) of Indianapolis and Des Moines. Through membership, we have issued funding agreements with a carrying value of $691 million and $1,112 million as of December 31, 2016 and 2015, respectively, to the FHLB in exchange for cash advances. We are required to provide collateral in excess of the funding agreements, considering any discounts to the securities posted and prepayment penalties.

We have a funding agreement backed notes (FABN) program, which allows Athene Global Funding, a special purpose, non-affiliated statutory-trust to offer up to $5 billion of its senior secured medium-term notes. Athene Global Funding uses the net proceeds from each sale to purchase one or more funding agreements from us. Funding agreements issued under this program have a carrying value of $246 million and $250 million as of December 31, 2016 and 2015, respectively. In the first quarter of 2017, we issued an additional $650 million in funding agreements under this program.

Pledged Assets and Funds in Trust (Restricted Assets)-The total restricted assets included on the consolidated balance sheets are as follows:

	December 31,	
(In millions)	2016	2015
AFS securities		
Fixed maturity	$ 1,382	$ 1,865
Equity	40	56
Investment funds	25	27
Mortgage loans	1,003	1,134
Restricted cash	57	116
Total restricted assets	$ 2,507	$ 3,198

The restricted assets are primarily a result of the FHLB funding agreements described above. Additionally, we have established reinsurance trusts of assets equal to statutory reserves, plus an additional amount of assets, as a result of coinsurance agreements with Transamerica Life Insurance Corporation.

Litigation, Claims and Assessments-On June 12, 2015, a putative class action complaint was filed in the United States District Court, Northern District of California against us. The complaint, which is similar to complaints recently filed against other large insurance companies, primarily alleges that captive reinsurance and other transactions had the effect of misrepresenting the financial condition of AAIA. The complaint purports to be brought on behalf of a class of purchasers of annuity products issued by AAIA between 2007 and the present. There are also various allegations related to the purchase of Aviva USA and concerning entry into a modco transaction with ALRe in October 2013. The suit asserts claims of violation of the Racketeer Influenced and Corrupt Organizations Act and seeks compensatory damages, trebled, in an amount to be determined, costs and attorneys' fees. On March 25, 2016, the matter was transferred to the United States District Court, Southern District of Iowa. On May 25, 2016, the court granted plaintiff's motion to file an amended complaint dropping plaintiff Silva and defendant Aviva plc. We moved to dismiss that complaint on June 30, 2016, and the motion was fully briefed as of September 8, 2016. On November 4,

2016 and November 14, 2016, the court stayed consideration of the motion to dismiss pending a ruling from the United States Court of Appeals for the Eighth Circuit in a similar case which will likely affect the disposition of our motion. *See Ludwick v. Harbinger Grp., Inc.*, 161 F. Supp. 3d 769 (W.D. Mo. 2016), *appeal docketed*, No. 16-1561 (8th Cir.). We believe we have meritorious defenses to the claims set forth in the amended complaint and intend to vigorously defend the litigation and seek dismissal of the amended complaint. In light of the inherent uncertainties involved in this matter, reasonably possible losses, if any, cannot be estimated at this time.

On July 27, 2015, a putative class action complaint was filed in the United States District Court, District of Massachusetts, against us. An amended complaint was filed on December 18, 2015. The complaint alleges a putative class action on behalf of all persons who are the beneficial owners of assets which were used to purchase structured settlement annuities that Aviva London Assignment Corporation, Aviva Life Insurance Company and CGU International Insurance, plc (Aviva Entities) or their predecessors, as applicable, delivered to purchasers on or after April 1, 2003. The complaint alleges that the Aviva Entities sold structured settlement annuities to the public on the basis that such products were backed by a capital maintenance agreement by CGU International Insurance, plc, which was alleged as a source of great financial strength. The complaint further alleges that the Aviva Entities used this capital maintenance agreement to enhance the sales volume and raise the price of the annuities. The complaint claims that, as a result of Aviva USA’s sale to AHL, the capital maintenance agreement terminated. According to the complaint, no notice was provided to the owners of the structured settlement annuities and the termination of the capital maintenance agreement constituted a breach of contract and the plaintiff further asserts other causes of action. AHL is a named defendant due to its purchase of Aviva USA, and AAIA and Athene London Assignment are named as successors to Aviva Life Insurance Company and Aviva London Assignment Corporation, respectively. The defendants have answered and are engaged in the discovery process. We believe that we have meritorious defenses to the claims set forth in the complaint and intend to vigorously defend the litigation. In light of the inherent uncertainties involved in this matter, reasonably possible losses, if any, cannot be estimated at this time.

The Internal Revenue Service (IRS) has completed its examinations of the 2006 through 2010 Aviva USA tax years. Aviva USA agreed to all adjustments that were proposed with respect to those tax years with two exceptions: (1) AAIA’s treatment of call options used to hedge fixed indexed annuity (FIA) liabilities for the tax years 2008-2010 and (2) the disallowance of offsetting tax deductions taken by AAIA and taxable income reported by the non-life subgroup with respect to unpaid independent marketing organization commissions. The first adjustment to which Aviva USA did not agree would disallow deductions of $191 million, $154 million and $76 million for 2008, 2009 and 2010, respectively. The second adjustment to which Aviva USA did not agree would increase non-life net operating losses and decrease AAIA net operating losses by $16 million in each of 2009 and 2010. Taxes, penalties and interest with respect to these two issues for the years under audit are potentially subject to indemnification by Aviva plc. Athene USA has been unable to negotiate a favorable settlement of this issue with the IRS, and has reserved its right to contest the adjustment in federal court. If the IRS position is upheld in federal court, Athene USA expects that it would owe tax of $120 million, plus interest, for tax years ending on or before October 2, 2013, which are subject to indemnification by Aviva plc as described above. The treatment of FIA hedges is a recurring issue as to the timing of the related deductions and could affect the current income tax incurred in periods after October 2, 2013, which are not subject to indemnification by Aviva plc. Given that the disallowance of a deduction in one period results in an increased deduction in a future period, AHL does not expect that there will be any material impact to its financial condition resulting from this issue.

In 2000 and 2001, two insurance companies which were subsequently merged into AAIA purchased from American General Life Insurance Company (American General) broad based variable corporate-owned life insurance (COLI) policies that, as of December 31, 2016, had an asset value of $327 million, and is included in other assets on the consolidated balance sheets. In January 2012, the COLI policy administrator delivered to AAIA a supplement to the existing COLI policies and advised that American General and ZC Resource Investment Trust (ZC Trust) had unilaterally implemented changes set forth in the supplement that if effective, would: (1) potentially negatively impact the crediting rate for the policies and (2) change the exit and surrender protocols set forth in the policies. In March 2013, AAIA filed suit against American General, ZC Trust, and ZC Resource LLC in Chancery Court in Delaware, seeking, among other relief, a declaration that the changes set forth in the supplement were ineffectual and in breach of the parties’ agreement. The parties filed cross motions for judgment as a matter of law, and the court granted defendants’ motion and dismissed without prejudice on ripeness grounds. The issue that negatively impacts the crediting rate for one of the COLI policies has been triggered and we will pursue further adjudication. If the supplement is ultimately deemed to be effective, the purported changes to the policies could impair AAIA’s ability to access the value of guarantees associated with the policies. The value of the guarantees included within the asset value reflected above are $159 million as of December 31, 2016.

19. Segment Information

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other.

Retirement Services-Retirement Services is comprised of our United States and Bermuda operations which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure multi-year guaranteed annuities, fixed indexed annuities, traditional one-year guarantee fixed deferred annuities, immediate annuities and institutional products from our reinsurance partners. In addition, our FABN program is included in our Retirement Services segment.

Corporate and Other-Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based

compensation and intersegment eliminations. In Corporate and Other we also hold capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

Financial Measures-Segment operating income, net of tax, and net investment income are internal measures used by the chief operating decision maker to evaluate and assess the results of our segments.

Operating revenue is a component of operating income, net of tax, and excludes market volatility and adjustments for other non-operating activity. Our operating revenue equals our total revenue, adjusted to eliminate the impact of the following non-operating adjustments:

- Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets;
- Investment gains (losses), net of offsets;
- VIE expenses and noncontrolling interest; and
- Other adjustments to revenues.

The table below reconciles segment operating revenues to total revenues presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2016	2015	2014
Operating revenue by segment			
Retirement Services	$ 3,332	$ 2,977	$ 2,834
Corporate and Other	268	112	55
Total segment operating revenues	3,600	3,089	2,889
Non-operating adjustments			
Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets	324	(390)	814
Investment gains (losses), net of offsets	164	(132)	298
VIE expenses and noncontrolling interest	13	33	79
Other adjustments to revenues	6	16	20
Total non-operating adjustments	507	(473)	1,211
Total revenues	$ 4,107	$ 2,616	$ 4,100

Operating income, net of tax, is an internal measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our operating income, net of tax, equals net income available to AHL's shareholders adjusted to eliminate the impact of the following non-operating adjustments:

- Investment gains (losses), net of offsets;
- Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets;
- Integration, restructuring and other non-operating expenses;
- Stock-based compensation, excluding LTIP; and
- Provision for income taxes - non-operating.

The table below reconciles segment operating income, net of tax, to net income available to Athene Holding Ltd. shareholders presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2016	2015	2014
Operating income, net of tax by segment			
Retirement Services	$ 809	$ 769	$ 764
Corporate and other	(49)	(29)	29
Total segment operating income, net of tax	760	740	793
Non-operating adjustments			
Investment gains (losses), net of offsets	47	(56)	151
Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets	97	(27)	(30)
Integration, restructuring and other non-operating expenses	(22)	(58)	(279)
Stock-based compensation, excluding LTIP	(79)	(67)	(148)
Income tax (expense) benefit - non-operating	2	30	(24)
Total non-operating adjustments	45	(178)	(330)
Net income available to Athene Holding Ltd. shareholders	$ 805	$ 562	$ 463

Net investment income used to evaluate the performance of our segments is an internal measure that does not correspond to GAAP net investment income. Adjustments are made to GAAP net investment income to arrive at a net investment income measure that reflects the profitability of our core deferred annuities business. Accordingly, we adjust net investment income to include earnings from our consolidated VIEs and earnings on certain alternative investments (primarily CLOs) classified in investment related gains (losses) on the consolidated statements of income. Additionally, impacts of reinsurance embedded derivatives on net investment income are removed. The table below reconciles segment net investment income to net investment income presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2016	2015	2014
Net investment earnings by segment			
Retirement Services	$ 2,955	$ 2,572	$ 2,483
Corporate and Other	77	36	55
Total net investment earnings	3,032	2,608	2,538
Adjustments to net investment income			
Reinsurance embedded derivative impacts	(189)	(84)	(67)
Net VIE earnings	(1)	(67)	(146)
Alternative income (gains) losses	39	42	(4)
Other	35	9	12
Total adjustments to arrive at net investment income	(116)	(100)	(205)
Net investment income	$ 2,916	$ 2,508	$ 2,333

Operating income, net of tax, excludes the tax impact of the taxable non-operating adjustments presented above. The tax impact of non-operating income adjustments is 35% of the non-operating adjustments subject to income tax. The table below reconciles segment provision for income taxes - operating to income tax expense presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2016	2015	2014
Provision for income taxes - operating by segment			
Retirement Services	$ (46)	$ 41	$ 30
Corporate and Other	(4)	3	-
Total segment income tax expense (benefit) - operating	(50)	44	30
Income tax (expense) benefit - non-operating	(2)	(30)	24
Income tax expense (benefit)	$ (52)	$ 14	$ 54

The following represents total assets by segment:

	December 31,		
(In millions)	2016	2015	2014
Total assets by segment			
Retirement Services	$ 79,319	$ 73,710	$ 81,606
Corporate and Other	7,401	7,144	1,104
Total assets	$ 86,720	$ 80,854	$ 82,710

Table of Contents

Diluted - Class A	0.47	1.03	0.85	1.80
Diluted - Class B	0.47	1.03	0.85	1.94
Diluted - Class M-1	*N/A*	*N/A*	*N/A*	0.46
2015				
Total revenues	$ 803	$ 544	$ 224	$ 1,045
Total benefits and expenses	637	413	149	825
Net income	160	104	72	242
Net income available to Athene Holding Ltd. shareholders	144	104	72	242
Earnings per share				
Basic - Classes A and B	$ 1.01	$ 0.56	$ 0.39	$ 1.30
Diluted - Class A	1.01	0.56	0.39	1.30
Diluted - Class B	1.01	0.56	0.39	1.30
Diluted - Class M-1	*N/A*	*N/A*	*N/A*	*N/A*

N/A - Not applicable. Refer to Note 13 - Earnings Per Share for further discussion.

[1] *Basic earnings per Class M-1 share was applicable only for the three months ended December 31, 2016. Refer to Note 13 - Earnings Per Share for further discussion.*

During the three months ended December 31, 2016, we recorded out-of-period adjustments that affected the consolidated statements of income for the three months ended September 30, 2016. These adjustments primarily related to DAC and VOBA amortization. In addition, during the three months ended September 30, 2016, we recorded out-of-period adjustments that primarily affected the consolidated statements of income for the year ended December 31, 2015. These out-of-period adjustments were primarily related to actuarial reserves, net of DAC and VOBA amortization.

As a result of these out-of-period adjustments, the consolidated net income for the three months ended December 31, 2016 was understated by $5 million and the consolidated net income for the three months ended September 30, 2016 was overstated by $23 million.

We evaluated these out-of-period adjustments and determined they were not material to the consolidated financial statements for either the three months ended September 30, 2016 or December 31, 2016, or any other previously reported period.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

As a result of a change in the financial reporting responsibilities of our West Des Moines, Iowa, personnel during 2015, PricewaterhouseCoopers Ltd. (PwC Bermuda) and PricewaterhouseCoopers LLP (PwC U.S.) agreed that it would be appropriate for PwC U.S. to assume principal auditor responsibilities for the year ending December 31, 2015. We, with the approval of our audit committee, engaged PwC U.S. as our new independent registered public accounting firm with effect from December 8, 2015. Prior to the engagement, PwC Bermuda resigned as our independent registered public accounting firm on December 8, 2015.

PwC Bermuda's report on our financial statements for the fiscal year ended December 31, 2014 did not contain an adverse opinion or disclaimer of opinion and was not qualified or modified as to uncertainty, audit scope or accounting principle. During the fiscal year ended December 31, 2014 and the interim period through December 8, 2015, there were no disagreements with PwC Bermuda on any matters of accounting principles or practices, financial statement disclosure, or auditing scope and procedures which, if not resolved to the satisfaction of PwC Bermuda, would have caused PwC Bermuda to make reference thereto in their report on the financial statements for such periods. During the

fiscal year ended December 31, 2014 and the subsequent interim period through December 8, 2015, there have been no reportable events (as defined by Regulation S-K 304(a)(1)(v)).

During the fiscal year ended December 31, 2014 and the subsequent interim period through December 8, 2015, PwC U.S. performed work on components of us, either in support of PwC Bermuda's audit report or for statutory audit requirements. All consultations with PwC U.S. by us were made in the ordinary course of business.

Item 9A. Controls and Procedures

We maintain disclosure controls and procedures as such term is defined under Exchange Act Rule 13a-15(e), that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and our management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We have carried out an evaluation, as of the end of the period covered by this report, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective at attaining the level of reasonable assurance noted above.

There were no changes to the Company's internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) during the quarter ended December 31, 2016, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

This annual report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of our independent registered public accounting firm due to a transition period established by rules of the SEC for newly public companies.

Item 9B. Other Information

None.

Table of Contents

Imran Siddiqui	42	Director
Hope Schefler Taitz	52	Director*
Arthur Wrubel†	51	Director*

*Independent director for purposes of the NYSE corporate governance listing requirements.
†These directors have been appointed subject to being nominated and elected by shareholders at the 2017 annual general meeting.

Executive Officers

James R. Belardi has served as our Chairman and Chief Executive Officer and Chief Investment Officer since May 2009. In addition, Mr. Belardi is the Chairman, Chief Executive Officer and Chief Investment Officer of AAM, our investment manager. He is a member of our executive committee. Mr. Belardi is responsible for our overall strategic direction and management in his capacity as Chief Executive Officer and is responsible for the day-to-day management of our investment portfolio in his capacity as Chief Investment Officer. Prior to founding our Company and AAM, Mr. Belardi was President of SunAmerica Life Insurance Company and was also Executive Vice President and Chief Investment Officer of AIG Retirement Services, Inc., where he had responsibility for an invested-asset portfolio of $250 billion. Mr. Belardi has a Bachelor of Arts degree in economics from Stanford University and a Master of Business Administration from the University of California, Los Angeles. He currently serves on the board of directors of Paulist Productions, where he chairs the investment committee, Aris Mortgage Holding Company LLC (Aris Holdco) and Southern California Aquatics. Mr. Belardi was selected to serve on our board of directors as a result of his demonstrated track record in and deep knowledge of the financial services business, including having founded both our Company and AAM, and his extensive experience in the insurance industry.

William J. Wheeler has served as our President since September 2015. Together with Mr. Belardi, Mr. Wheeler is responsible for our overall strategic direction. In particular, Mr. Wheeler oversees all of our business units, which includes our retail, reinsurance and German operations, and also our corporate development and risk activities. Prior to joining our Company, Mr. Wheeler was President of the Americas group for MetLife Inc. (MetLife) where he oversaw the insurance and retirement business in the United States and Latin America. During his seventeen-year tenure at MetLife, Mr. Wheeler assumed various executive positions, including Executive Vice President and Chief Financial Officer. In addition, Mr. Wheeler served as Treasurer for MetLife, playing a key role in preparing MetLife to become a public company. Prior to joining MetLife, Mr. Wheeler was an investment banker at Donaldson, Lufkin & Jenrette. Mr. Wheeler has a Bachelor of Arts degree in English from Wabash College and a Master of Business Administration from Harvard Business School. He currently serves on the board of Evercore Partners Inc.

Grant Kvalheim has served as the Chief Executive Officer of Athene USA since June 2015 and served as our President from January 2011 until September 2015, served as the Chief Financial Officer from January 2011 until April 2013 and served as a director from January 2012 until February 2014. Mr. Kvalheim is responsible for the oversight of our U.S. operating companies with a focus on our retail annuity channel, including growth initiatives and new product development. Prior to joining our Company, Mr. Kvalheim was a senior executive of Barclays Capital (Barclays) from early 2001 to the end of 2007, becoming Co-President in September 2005. During his time at Barclays he converted a European cash investment grade business into a leading global cash and derivatives business across both securitized and non-securitized credit products, and significantly expanded Barclays' investment banking platform. Prior to joining Barclays, Mr. Kvalheim held senior executive positions in the investment banks of Deutsche Bank and Merrill Lynch. Mr. Kvalheim has a Bachelor of Arts degree in economics from

Item 10. Directors, Executive Officers and Corporate Governance

Claremont McKenna College and a Master of Business Administration in finance from the University of Chicago. He served on the board of directors of the Permal Silk Road Fund from June 2008 to November 2012. He currently serves on the board of directors of Mottahedeh & Co. and Sol Health.

Martin P. Klein has served as our Executive Vice President and Chief Financial Officer since November 2015. Mr. Klein also serves as a director of several of our insurance subsidiaries. Mr. Klein is responsible for overseeing our financial management, including our enterprise finance, tax, actuarial and internal audit functions. He also helps to develop and execute strategic operating decisions across our Company. Prior to joining our Company, Mr. Klein served as Executive Vice President and Chief Financial Officer of Genworth Financial, Inc. (Genworth) from February 2013 to October 2015. Prior to that, he was Senior Vice President-Chief Financial Officer of Genworth from May 2011 to February 2013, and from May 2012 through December 2012, he also served as Genworth's Acting President and Acting Chief Executive Officer. Prior to joining Genworth, Mr. Klein served as a Managing Director and Senior Relationship Manager of Barclays, after its acquisition of the U.S. operations of Lehman Brothers Holdings, Inc. (Lehman Brothers) in 2008. At Lehman Brothers, Mr. Klein served as a Managing Director and from 1998 to 2008 was the head of the Insurance Solutions Groups, and also founded and ran the Pension Solutions Group. Prior to Lehman Brothers, Mr. Klein had been with Zurich Insurance Group from 1994 to 1998 and was a Managing Director of Zurich Investment Management. Prior to Zurich, Mr. Klein served in finance and actuarial roles in other insurance organizations. Mr. Klein is a Fellow of the Society of Actuaries and a Chartered Financial Analyst. He received his Bachelor of Arts in mathematics and business administration from Hope College and a Master of Science in statistical and actuarial sciences from University of Iowa.

Frank L. Gillis is a founder of our Company and served on our board of directors from May 2009 to February 2014. Mr. Gillis has served as Chief Executive Officer of ALRe since June 2009 and serves as a director of ALRe. Mr. Gillis is responsible for our growth through our reinsurance channel and is responsible for the oversight of ALRe. Prior to founding our Company, Mr. Gillis was a Senior Managing Director at Bear Stearns & Co. Inc. (Bear Stearns) and was the head of the Bear Stearns Insurance Solutions Group. In this position, he led Bear Stearns' entry into the funding agreement-backed note business and created the turn-key Premium Asset Trust Series. Prior to Bear Stearns, Mr. Gillis spent over three years at GenRe Financial Products providing ALM hedging solutions to U.S. life insurance companies. Mr. Gillis serves on the boards of Bermuda International Long Term Insurers and Reinsurers and the Association of Bermuda International Companies. Mr. Gillis has a Bachelor of Arts in English from the University of Richmond.

John Rhodes has served as our Executive Vice President and Chief Risk Officer since August 2016. Mr. Rhodes is responsible for overseeing our enterprise risk management functions, as well as providing key support in connection with strategic operating decisions across our Company. Prior to joining our Company, Mr. Rhodes was the Chief Risk Officer of Allstate from November 2015 to June 2016. Prior to joining Allstate, Mr. Rhodes was the Chief Risk Officer of Lincoln Financial Group from July 2012 to October 2015. Prior to that he served as the Head of Equity Risk Management at Lincoln Financial Group from 2009 to 2012. Prior to joining Lincoln Financial Group, Mr. Rhodes was the Head of Hedging Operations and Performance Management at ING US Financial Services from 2006 to 2009. From 1999 to 2006, Mr. Rhodes served in a variety of roles at JPMorgan Chase and GE Capital focusing primarily on market risk and valuation. Mr. Rhodes also served in the U.S. Navy as a commissioned officer. Mr. Rhodes received a Bachelor of Science degree in oceanography from the United States Naval Academy and a Master of Business Administration from New York University, Leonard Stern School of Business.

Directors

We believe our board of directors should be composed of a diverse group of individuals with sophistication and experience in many substantive areas that impact our business. We believe experience, qualifications and skills in the following areas are most important: insurance industry; accounting, finance, and capital structure; strategic planning and leadership of complex organizations; legal/regulatory and government affairs; personnel management; and board practices of other major corporations. We believe that all of our current board members possess the professional and personal qualifications necessary for service on our board, and have highlighted particularly noteworthy attributes for each board member in the individual biographies below, or above in the case of our Chairman and Chief Executive Officer.

Marc Beilinson has served as a director of our Company since 2013, and is the chair of our compensation committee and a member of our conflicts committee. Since August 2011, Mr. Beilinson has been the Managing Director of Beilinson Advisory Group, a financial restructuring and hospitality advisory group that specializes in assisting distressed companies. Since December 2016, Mr. Beilinson has served as Chief Restructuring Officer of Newbury Common Associates LLC (and certain affiliates). Mr. Beilinson previously served as Chief Restructuring Officer of Fisker Automotive and as Chief Restructuring Officer and Chief Executive Officer of Eagle Hospitality Properties Trust, Inc. and Innkeepers USA Trust. Mr. Beilinson currently serves on the boards of directors and audit committees of MFG Assurance Company Limited and Caesars Acquisition Company. Mr. Beilinson has previously served on the boards of directors and audit committees of a number of public and privately held companies, including Wyndham International, Inc., Apollo Commercial Real Estate Finance, Inc. (ARI), Innkeepers USA Trust and JER/Jameson Properties LLC. Mr. Beilinson has a Bachelor of Arts in political science from the University of California, Los Angeles and a Juris Doctor from the University of California Davis Law School. Mr. Beilinson was selected to serve on our board of directors as a result of having over thirty years of service to the boards of both public and private companies, and his extensive knowledge of legal and compliance issues, including the Sarbanes-Oxley Act of 2002.

Robert Borden has served as a director of our Company and our Company's subsidiary, ALRe, since 2010, and is a member of our risk and conflicts committees. Mr. Borden is Managing Partner and Chief Investment Officer of Delegate Advisors, LLC. From April 2006 to January 2012, Mr. Borden served as the Chief Executive Officer and Chief Investment Officer of the South Carolina Retirement System Investment Commission (SCRSIC), which is responsible for investing and managing all assets of the South Carolina Retirement Systems. Prior to his role at SCRSIC, Mr. Borden served as the Executive Director and Chief Investment Officer of the Louisiana State Employees Retirement

Item 10. Directors, Executive Officers and Corporate Governance

System, where he was responsible for investment management, benefits administration, finance and operations. Mr. Borden has also served as Vice Chairman and Chairman of the Fund Evaluation Committee for the Louisiana Deferred Compensation Commission and as a member of the South Carolina Deferred Compensation Committee. Prior to that, Mr. Borden served as Treasurer and Senior Manager for Financial Services at the Texas Workers' Compensation Insurance Fund after serving as VP of Treasury and Interest Rate Risk Manager at Franklin Federal Bancorp. Mr. Borden serves on the board of directors of Delegate Advisors, LLC, Apollo Senior Floating Rate Fund, Inc. and Apollo Tactical Income Fund Inc. Mr. Borden has a Bachelor of Business Administration with a major in finance from the University of Texas at Austin and received a Master of Science degree in finance from Louisiana State University. Mr. Borden holds both the Chartered Financial Analyst and Chartered Alternative Investment Analyst professional designations. Mr. Borden was selected to serve on our board of directors as a result of his extensive experience in leadership positions, and in particular, his experiences as Chief Executive Officer and Chief Investment Officer at several companies.

Brian Leach was appointed as a director of our Company in August 2016, and is a member of our risk and audit committees. From 2013 to 2015, Mr. Leach served as Head of Franchise Risk & Strategy at Citigroup with responsibility for managing all of Citibank's global risk, audit, compliance and strategy. From 2008 to 2012, Mr. Leach served as the Chief Risk Officer of Citibank. In 2005, Mr. Leach, together with several former colleagues from Morgan Stanley, formed Old Lane and from 2005 to 2008, Mr. Leach served as Old Lane's co-Chief Operating Officer and Chief Risk Officer. Prior to that, Mr. Leach worked his entire post-graduate career at Morgan Stanley encompassing running a successful proprietary trading business and culminating as the Risk Manager of the Institutional Securities Business reporting directly to its President. During his time with Morgan Stanley, Mr. Leach was seconded to Long-Term Capital Management (LTCM) for approximately one year. During that time, he was one of six managers selected by a consortium of 14 global financial institutions to manage the liquidation of LTCM. Mr. Leach serves on the Advisor Investment Committee of Mountain Capital. Mr. Leach has a Bachelor of Arts degree in economics from Brown University and a Master of Business Administration from Harvard Business School. Mr. Leach has been awarded Risk Manager of the Year on two separate occasions: the first by Risk Magazine for his work in restructuring the hedge fund LTCM and the second by the Global Association of Risk Professionals for his work in restructuring Citigroup after the global financial crisis. Mr. Leach was selected to serve on our board of directors as a result of his extensive experience in risk management.

Gernot Lohr has served as a director of our Company and our subsidiary, ALRe, since 2009. Mr. Lohr has served as a director of AAM, our investment manager, since 2009. Mr. Lohr is a Senior Partner at Apollo, which he joined in May 2007. Prior to joining Apollo, Mr. Lohr was a founding partner at Infinity Point LLC, Apollo's joint venture partner for the financial services industry since 2005. Before that time, Mr. Lohr spent eight years in financial services investment banking at Goldman, Sachs & Co. in New York and also worked at McKinsey & Company and B. Metzler Corporate Finance in Frankfurt. Currently, Mr. Lohr serves on the board of directors of the general partner of AAA, AAA MIP Limited, Amissima Assicurazioni (formerly Carige Assicurazioni), Bremer Kreditbank Aktiengesellschaft, Catalina Holdings, Nova Kreditna Banka Maribor and Tranquilidade. Mr. Lohr has a joint Master's Degree in economics and engineering from the University of Karlsruhe, Germany, and received a Master of Business Administration from the MIT Sloan School of Management. Mr. Lohr was selected to serve on our board of directors as a result of his extensive experience in the financial services sector.

H. Carl McCall was appointed as a director of our Company in August 2016, and is a member of our nominating and corporate governance and compensation committees. Since October 2011, Mr. McCall has served as the Chairman of the Board of Trustees of the State University of New York. From 2002 to 2015, Mr. McCall served as a board member or trustee of several organizations, including Ariel Investment, Tyco International, New Plan Realty Corporation and the New York Stock Exchange. Since 2004, Mr. McCall has served as a principal of Covenant Capital, LLC. From 1993 to 2002, Mr. McCall served as the Comptroller of the State of New York. From 1991 to 1993, Mr. McCall served as the President of the New York City Board of Education. From 1986 to 1991, Mr. McCall served as Commissioner of the Port Authority of New York and New Jersey. From 1985 to 1993, Mr. McCall served as a Vice President of Citicorp, Inc. From 1975 to 1980, Mr. McCall served as a state senator of New York. From 1973 to 1975, Mr. McCall served as executive director of the Florence and John Schuman Foundation. Mr. McCall received a Bachelor of Arts degree in government from Dartmouth College and a Masters of Arts from Andover Newton Theological Seminary. Mr. McCall was selected to serve on our board of directors as a result of his extensive leadership experience in various sectors, and his experience serving on the boards of a number public and private companies.

Matthew R. Michelini has served as a director of our Company and certain of our subsidiaries since 2010, and is a member of our executive, nominating and corporate governance and risk committees. Mr. Michelini serves as a director of AAM, our investment manager. Mr. Michelini is a Partner at Apollo. He joined Apollo in July 2006. Mr. Michelini serves on the board of directors of Aleris Corporation and Warrior Met Coal and previously served on the boards of Metals USA Holdings (formerly NYSE listed under MUSA) and Noranda Aluminum Holding Corporation (formerly NYSE listed under "NOR"). At Apollo, Mr. Michelini has executed deals across the world including in North America, Europe, and Asia. Prior to joining Apollo, Mr. Michelini was a member of the Mergers & Acquisitions group at Lazard Frères & Co., from 2004 to 2006. Mr. Michelini is actively involved in various charities dedicated to helping underprivileged children in New York City. Mr. Michelini graduated from Princeton University with a Bachelor of Science degree in mathematics and a Certificate in Finance and received his Master of Business Administration from Columbia University. Mr. Michelini was selected to serve on our board of directors as a result of his extensive experience in the financial services sector.

Dr. Manfred Puffer has served as a director of our Company since 2012, and is the chair of our risk committee. Dr. Puffer has served as a Senior Advisor to Apollo since October 2008. From 2006 to 2008, Dr. Puffer was a senior managing director in the Financial Institutions Group of Bear Stearns International, Head of Germany, Austria and Eastern Europe and a Member of the European Executive Committee. From 2002 to 2005, Dr. Puffer was a member of the managing board of WestLB AG and Head of the Investment Bank, Fixed Income, Equities and Structured Finance. Currently, Dr. Puffer is a member of the supervisory board of Infineon Technologies AG. Dr. Puffer holds a Ph.D. and a Master of

Item 10. Directors, Executive Officers and Corporate Governance

Business Administration from the University of Vienna. Dr. Puffer was selected to serve on our board of directors as a result of his extensive experience in the financial services sector.

Marc Rowan has served as a director of our Company since 2009, and is a member of our executive and compensation committees. Mr. Rowan has served as a director of AAM, our investment manager, since 2009. Mr. Rowan is a co-founder and Senior Managing Director of Apollo, a leading alternative asset manager focused on contrarian and value oriented investments across private equity, credit-oriented capital markets and real estate. Mr. Rowan currently serves on the boards of directors of, among others, Apollo, CEC and Caesars Acquisition Company. He has previously served on the boards of directors of, among others, the general partner of AAA, AMC Entertainment, Inc., Beats Music, CableCom Gmbh., Caesars Entertainment Operating Co., Countrywide PLC, Culligan Water Technologies, Inc., Furniture Brands International, Mobile Satellite Ventures, National Cinemedia, Inc., National Financial Partners, Inc., New World Communications, Inc., Norwegian Cruise Lines, Quality Distribution, Inc., Samsonite Corporation, SkyTerra Communications, Inc., Unity Media SCA, Vail Resorts, Inc., Wyndham International, Inc. and RCS Capital Corporation. Mr. Rowan is a founding member and Chairman of YRF-Darca, Vice Chair of the Board of Overseers of The Wharton School at the University of Pennsylvania and a member of the University of Pennsylvania’s Board of Trustees. He serves on the boards of directors of Jerusalem Online and the New York City Police Foundation. Mr. Rowan graduated summa cum laude from the University of Pennsylvania’s Wharton School of Business with a Bachelor of Science and a Master of Business Administration in finance. Mr. Rowan was selected to serve on our board of directors as a result of his service on the boards of numerous public and private companies and his demonstrated track record of success and extensive experience in the financial services sector.

Lawrence J. Ruisi has served as a director of our Company since 2013, and is the chair of our audit committee and is a member of our risk committee. As an operating executive, Mr. Ruisi has held various senior level positions in the entertainment business, including President & Chief Executive Officer of Loews Cineplex Entertainment Corporation, a movie theatre operator with 400 locations worldwide, and as Executive Vice President and Chief Financial Officer of Columbia Pictures Entertainment. As a non-executive, Mr. Ruisi has served on numerous boards including Hughes Communications Inc., UST Inc., InnKeepers USA Trust, Wyndham International, Inc. and Adaptec, Inc. During his tenure on these boards, Mr. Ruisi has been Chairman of various audit committees, named designated financial expert and served on both compensation and nominating and corporate governance committees. Mr. Ruisi was Chairman of the Independent Committee of the board of InnKeepers, which oversaw its restructuring, and was Chairman of Special Committees at both Wyndham and Adaptec. Mr. Ruisi began his career at Price Waterhouse & Co., where he was a Senior Manager. He is a Certified Public Accountant and received a Bachelor of Science degree in accounting and a Master of Business Administration in finance from St. John’s University. Mr. Ruisi is currently an adjunct professor of accounting at St. John’s University. Mr. Ruisi was selected to serve on our board of directors as a result of his extensive leadership experience in various sectors, his expertise in accounting and financial reporting matters and his experience serving on the boards of numerous public and private companies.

Imran Siddiqui has served as a director of our Company and certain of our subsidiaries since 2009, and is a member of our executive, compensation, audit and risk committees. Mr. Siddiqui serves as a director of AAM, our investment manager. Mr. Siddiqui is a Senior Partner at Apollo, which he joined in 2008. Prior to that time, Mr. Siddiqui was a principal in Oak Hill Capital’s Business and Financial Services Group. Prior to Oak Hill, Mr. Siddiqui spent six years in the Financial Institutions Group of Goldman, Sachs & Co., and worked as a consultant at McKinsey & Company from 1997 to 1999. Mr. Siddiqui currently serves on the boards of the general partner of AAA, Aris Holdco and MidCap FinCo Holdings Limited (MidCap Holdings). In addition, Mr. Siddiqui is on the College Visiting Committee at the University of Chicago. Mr. Siddiqui has a Bachelor of Arts degree in political science and a Master of Arts in international relations from the University of Chicago and a Juris Doctor from Harvard Law School. Mr. Siddiqui was selected to serve on our board of directors as a result of his extensive experience in the financial services sector.

Hope Schefler Taitz has served as a director of our Company and our subsidiary, ALRe, since 2011, and is the lead independent director, chair of our nominating and corporate governance committee and a member of our audit and conflicts committees. Ms. Taitz also serves as an independent director of AADE. Ms. Taitz is also a director of Athene USA, AAIA, ALICNY and AANY, and also serves on the audit committee for AANY. Since 2004, Ms. Taitz has acted as a consultant focused on analyzing and investing in the consumer industry in both early and late stage. Ms. Taitz currently serves on the board of MidCap Holdings. From 1995 to 2003, Ms. Taitz was Managing Partner of Catalyst Partners, L.P., a money management firm. From 1990 to 1992, Ms. Taitz was a Vice President at The Argosy Group (now part of the Canadian Imperial Bank of Commerce (NYSE: CM)) specializing in financial restructuring before becoming a Managing Director at Crystal Asset Management, from 1992 to 1995. From 1986 to 1990, Ms. Taitz was at Drexel Burnham Lambert, first as a mergers and acquisitions analyst and then as an associate in the leveraged buyout group. She is a founding executive member of Youth Renewal Fund, a current executive board member of Pencils of Promise and a member of the undergraduate executive board of The Wharton School at the University of Pennsylvania. Ms. Taitz is a former board member of Girls Who Code and is now a board member of the New York City Foundation for Computer Science. Ms. Taitz graduated with honors from the University of Pennsylvania with a Bachelor of Arts degree in economics. Ms. Taitz was selected to serve on our board of directors as a result of her extensive experience in the financial services sector as well as her experience serving on the governance committees of other public companies.

Arthur Wrubel was appointed as a director of our Company in August 2016, and is a member of our nominating and corporate governance and compensation committees. In 2001, Mr. Wrubel formed Wesley Capital Management, a long/short investment fund focused on real estate securities. Since its inception, Wesley Capital has been among the largest investment funds in the real estate securities sector. In 1993, Mr. Wrubel joined Dickstein & Co., a bankruptcy and event-driven investment fund as a partner. His focus was on real estate and asset backed securities. At Dickstein, Mr. Wrubel was involved in many high profile real estate corporate restructurings including Olympia & York, Cadillac Fairview, Rockefeller Center Properties, Bramalea, and Trizec. Mr. Wrubel began his career in 1987 at JMB Realty Corporation, where he was an associate in the acquisitions group. Mr. Wrubel currently serves as a member of the Wharton Undergraduate Board at the University of

Item 10. Directors, Executive Officers and Corporate Governance

Pennsylvania. Mr. Wrubel received a Bachelor of Science in economics from The Wharton School at the University of Pennsylvania. Mr. Wrubel was selected to serve on our board of directors as a result of his extensive experience in the financial services sector.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our directors, executive officers and holders of more than 10% of our common shares to file reports with the SEC regarding their ownership and changes in ownership of our securities. Based upon our examination of the copies of Forms 3, 4, and 5, and amendments thereto furnished to us and the written representations of our directors, executive officers and 10% stockholders, we believe that, during fiscal 2016, our directors, executive officers and 10% stockholders complied with all Section 16(a) filing requirements, except that one of our officers, William Eckert, did not timely file a Form 3 due to be filed on December 9, 2016; such form was filed on December 27, 2016.

Corporate Governance

Our business and affairs are managed under the direction of our board of directors. Our board of directors currently consists of 13 members. Six of our directors are employees of or consultants to Apollo or its affiliates (including Mr. Belardi, our Chairman, Chief Executive Officer and Chief Investment Officer, who is also Chairman, Chief Executive Officer and Chief Investment Officer of AAM).

Under our bye-laws, our board of directors will consist of not less than two and not more than 17 directors. If there is a vacancy on our board of directors due to death, disability, disqualification, removal or resignation, or there is an increase in the number of our directors or a failure to elect a director at a shareholder meeting, the board of directors may appoint any person as a member of the board of directors on an interim basis until the next annual general meeting provided that such person has been approved by a majority of the nominating and corporate governance committee. At the next annual general meeting, the vacancy will be put to a shareholder vote. Persons appointed by the board of directors to fill vacancies must be approved by a majority of the board of directors.

Classified Board of Directors

Our bye-laws provide for our board of directors to be divided into three classes with members of each class serving staggered three-year terms. Only one class of directors will be elected at each annual general meeting of shareholders, with directors in other classes continuing for the remainder of their respective three-year terms. Our current directors are divided among the three classes as follows:

- our Class I directors are Messrs. Belardi, Michelini, Leach, Lohr and Rowan and, except as provided below with respect to Mr. Leach, their terms will expire at our annual general meeting to be held in 2019;

- our Class II directors are Messrs. Siddiqui, Wrubel, Ruisi and Ms. Taitz and, except as provided below with respect to Mr. Wrubel, their terms will expire at our annual general meeting to be held in 2017; and

- our Class III directors are Messrs. Borden, McCall and Beilinson and Dr. Puffer and, except as provided below with respect to Mr. McCall, their terms will expire at our annual general meeting to be held in 2018.

Messrs. Wrubel, Leach and McCall have been appointed to the board of directors subject to being nominated and elected by shareholders at the next annual general meeting to take place in 2017. If elected at that meeting, Mr. Wrubel will be a Class II director whose term will expire at our annual general meeting to be held in 2020, Mr. Leach will be a Class I director whose term will expire at our annual general meeting to be held in 2019 and Mr. McCall will be a Class III director whose term will expire at our annual general meeting to be held in 2018.

Our 2017 annual general meeting of shareholders will be held on June 7, 2017. A proposal by a shareholder intended for inclusion in our proxy materials for the 2017 annual general meeting of shareholders pursuant to Rule 14a-8 of the Exchange Act must be received by our Corporate Secretary on or before March 27, 2017 in order to be considered for such inclusion.

Our directors hold office until their successors have been elected and qualified or until the earlier of their death, resignation or removal. Any additional directorships resulting from an increase in the number of directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors.

The classification of our board of directors may have the effect of delaying or preventing changes of control of our company.

Lead Independent Director

On October 26, 2016, the board of directors elected Ms. Taitz to the newly-created position of Lead Independent Director, effective immediately. In this new role, Ms. Taitz will, among other things, preside at executive sessions of the independent directors, serve as liaison between the chairman and the independent directors, review board meeting schedules and agendas, review information sent to the board and be authorized to call meetings of the independent directors.

Item 10. Directors, Executive Officers and Corporate Governance

Committees of the Board of Directors

Our board of directors has the authority to appoint committees to perform certain management and administration functions. Our board of directors has six standing committees: audit, compensation, nominating and corporate governance, conflicts, executive and risk. The table below shows the membership for each of the board of directors' standing committees.

Audit Committee	Compensation Committee	Conflicts Committee
Lawrence J. Ruisi (Chair)*	Marc Beilinson (Chair)*	Marc Beilinson*
Hope Taitz*	Imran Siddiqui	Robert Borden*
Imran Siddiqui	Marc Rowan	Hope Taitz*
Brian Leach*	H. Carl McCall*	
	Arthur Wrubel*	

Executive Committee	Nominating and Corporate Governance Committee	Risk Committee
James R. Belardi	Hope Taitz (Chair)*	Manfred Puffer (Chair)
Marc Rowan	Matthew Michelini	Imran Siddiqui
Imran Siddiqui	Arthur Wrubel*	Robert Borden*
Matthew Michelini	H. Carl McCall*	Matthew Michelini
		Lawrence J. Ruisi*
		Brian Leach*

ıdependent director for purposes of the NYSE corporate governance listing requirements.

Audit Committee

The audit committee's duties include, but are not limited to, assisting the board of directors with its oversight and monitoring responsibilities regarding:

- the integrity of the Company's consolidated financial statements and financial and accounting processes;
- compliance with the audit, internal accounting and internal controls requirements by AHL and its subsidiaries;
- the independent auditor's qualifications, independence and performance;
- related party transactions other than transactions between AHL and its subsidiaries and Apollo and its affiliates (other than AHL and its subsidiaries) and other related party transactions ancillary thereto that are required to be reviewed by the conflicts committee or by the disinterested directors on our board of directors as described under *Conflicts Committee* below, or are expressly exempt from such review under our internal policies;
- the performance of the internal accounting and financial controls of the Company and its subsidiaries (including monitoring and reporting by subsidiaries) and the function of the internal audit departments of the Company and its subsidiaries;
- the Company's legal and regulatory compliance and ethical standards; and
- procedures to receive, retain and treat complaints regarding accounts, internal accounting controls or auditing matters and to receive confidential and anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

Members of our audit committee also review the Company's financial disclosure and public filings.

Our audit committee is currently comprised of Messrs. Leach, Ruisi and Siddiqui and Ms. Taitz. Mr. Ruisi is the chair of the audit committee. Messrs. Ruisi, Leach and Ms. Taitz each meet the independence requirements of the NYSE rules. We will rely on the phase-in rules of the SEC with respect to the independence of our audit committee under Rule 10A-3(b)(1) of the Exchange Act and the rules of the NYSE. These rules require that at least a majority of the members of our audit committee be independent within 90 days of the effective date and all members be independent within one year of the effective date. Each member of our audit committee meets the requirements for financial literacy under the applicable rules and regulations of the SEC and the NYSE. The chair of our audit committee, Mr. Ruisi, is an independent director and an "audit committee financial expert" as that term is defined in the rules and regulations of the SEC. Our board of directors has approved a written charter under which the audit committee will operate. A copy of the charter of our audit committee is available on our principal corporate website at *www.athene.com*. Information contained on our website or connected thereto does not constitute a part of, and is not incorporated by reference into, this report.

Item 10. Directors, Executive Officers and Corporate Governance

Nominating and Corporate Governance Committee

The purposes of the nominating and corporate governance committee are to:

- identify, evaluate and recommend individuals qualified to become members of our board of directors or the boards of directors of material operating subsidiaries of the Company (each, a Subsidiary Board), consistent with criteria approved by our board of directors or Subsidiary Boards, as applicable;
- select, or recommend that our board of directors or any Subsidiary Board select, the director nominees to stand for election at each annual general meeting of shareholders of the Company or any subsidiary or to fill vacancies on our board of directors or any Subsidiary Board, as applicable;
- develop and recommend to our board of directors a set of corporate governance guidelines applicable to the Company and its subsidiaries; and
- oversee the annual performance evaluation of our board of directors and the Subsidiary Boards and each of their respective committees and management.

The nominating and corporate governance committee also recommends directors eligible to serve on all committees of our board of directors and committees of the Subsidiary Boards, as applicable. The nominating and corporate governance committee also reviews and evaluates, in accordance with our bye-laws, all shareholder director nominees.

Our nominating and corporate governance committee is comprised of Messrs. McCall, Michelini and Wrubel and Ms. Taitz. Ms. Taitz is the chair of the nominating and governance committee. Currently, Messrs. McCall and Wrubel and Ms. Taitz meet the independence requirements of the NYSE rules. Not later than the first anniversary of the effective date, all members of our nominating and corporate governance committee will be independent directors. A copy of the charter of our nominating and corporate governance committee is available on our principal corporate website at *www.athene.com.* Information contained on our website or connected thereto does not constitute a part of, and is not incorporated by reference into, this report.

Compensation Committee

The purposes of the compensation committee are generally to:

- review and approve annually corporate goals and objectives, including financial and other performance targets, relevant to Chief Executive Officer and executive officer compensation;
- review and approve annually corporate goals and objectives, including financial and other performance targets, relevant to compensation paid to the other executive officers and key employees of the Company and its subsidiaries;
- review, approve and, when necessary, make recommendations to the board of directors regarding the Company's compensation plans, including with respect to incentive compensation plans and share-based plans, policies and programs;
- review and administer the Company's share incentive plans and any other share-based plan and any incentive-based plan of the Company and its subsidiaries, including approving grants and/or awards of restricted stock, stock options and other forms of equity-based compensation under any such plans to executive officers;
- review and approve, for the Chief Executive Officer and other executive officers of the Company, when and if appropriate, employment agreements, severance agreements, consulting agreements and change in control or termination agreements;
- prepare the compensation committee report to be included in an annual report or proxy statement, as required by applicable SEC and NYSE rules;
- review periodically the Company's compensation plans, policies and programs to assess whether such policies encourage excessive or inappropriate risk-taking or earnings manipulation;
- review the results of any advisory stockholder votes on executive compensation and consider whether to recommend adjustments to the Company's executive compensation policies and practices as a result of such vote; and
- monitor compliance with stock ownership guidelines for the Chief Executive Officer and other executive officers of the Company.

Our compensation committee is comprised of Messrs. Beilinson, McCall, Rowan, Siddiqui and Wrubel. Mr. Siddiqui was the chair of the compensation committee through 2016, and Mr. Beilinson is the current chair of the compensation committee. Currently, Messrs. Beilinson, McCall and Wrubel meet the independence requirements of the NYSE rules. Not later than the first anniversary of the effective date, all members of the compensation committee will be independent. Our board of directors has approved a written charter under which the

compensation committee will operate. A copy of the charter of our compensation committee is available on our principal corporate website at www.athene.com. Information contained on our website or connected thereto does not constitute a part of, and is not incorporated by reference into, this report.

Conflicts Committee

Because the Apollo Group has a significant voting interest in AHL, and because AHL and its subsidiaries have entered into, and will continue in the future to enter into, transactions with Apollo and its affiliates, our bye-laws require us to maintain a conflicts committee, currently consisting of three directors of the Company that are not officers or employees of any member of the Apollo Group and are designated by our board of directors. The conflicts committee meets quarterly and consists of Messrs. Beilinson and Borden and Ms. Taitz. The conflicts committee reviews and must approve of material transactions by and between AHL and its subsidiaries, on the one hand, and members of the Apollo Group, on the other hand, including any modification or waiver of the IMAs with AAM, subject to certain exceptions. The conflicts committee is also responsible for the review and approval of related party transactions that are incidental or ancillary to the foregoing transactions. For a description of the functions of the conflicts committee and such exceptions, see *Item 13. Certain Relationships and Related Transactions, and Director Independence-Related Party Transaction Policy.*

Executive Committee

The executive committee is responsible for facilitating the approval of certain actions that do not require consideration by the full board of directors or that are specifically delegated by the board of directors to the executive committee. The executive committee possesses and may exercise all powers of the board of directors in the management and direction of the Company's business consistent with our bye-laws, applicable law (including any applicable rule of any stock exchange or quotation system on which our common shares are then listed) and our operating guidelines, except that the executive committee shall not perform such functions that are expressly delegated to other committees of the board of directors. The executive committee does not have the power to:

- declare dividends on or distributions of or in respect of shares of the Company;
- issue shares or authorize or approve the issuance or sale, or contract for sale, of shares or determine the designation and relative rights, preferences and limitations of a series or class of shares unless specifically delegated by action of the board of directors to the executive committee or a subcommittee of the executive committee;
- recommend to shareholders any action that requires shareholder approval;
- recommend to shareholders a dissolution or winding up of the Company or a revocation of a dissolution or winding up of the Company;
- amend or repeal any provision of the memorandum of association or bye-laws;
- agree to the settlement of any litigation, dispute, investigation or other similar matter with respect to the Company that is not within the scope of authority previously delegated to the executive committee by the board of directors;
- approve the sale or lease of real or personal property assets with a fair value greater than a threshold amount specifically delegated to the executive committee by the board of directors;
- authorize mergers (other than a merger of any wholly-owned subsidiary with the Company), acquisitions, joint ventures, consolidations or dispositions of assets or any business of the Company or any investment in any business or company by the Company with a fair value in excess of a threshold amount specifically delegated to the committee by the board of directors; or approve the sale, lease, exchange or encumbrance of any material asset of the Company that, in each case, is not within the scope of authority previously delegated to the executive committee by action of the board of directors; or
- amend, alter or repeal, or take any action inconsistent with any resolution or action of the board of directors.

Our executive committee is comprised of Messrs. Belardi, Michelini, Rowan and Siddiqui.

Item 10. Directors, Executive Officers and Corporate Governance

Risk Committee

The risk committee's duties are to oversee the development and implementation of systems and processes designed to identify, manage and mitigate reasonably foreseeable material risks to the Company; assist our board of directors and our board committees in fulfilling their oversight responsibilities for the risk management function of the Company; approve the stress test assumption and limits utilized in our stress test scenario analyses and engage in such activities as it deems necessary or appropriate in connection with the foregoing. In assessing risk, the risk committee must assess the risk of the Company and its subsidiaries as a whole. The risk committee's role is one of oversight. Management of the Company is responsible for developing and implementing the systems and processes designed to identify, manage and mitigate risk. Members of the risk committee are selected for their experience in managing risks in financial and/or insurance enterprises. Our risk committee meets quarterly and is comprised of Messrs. Borden, Leach, Michelini, Ruisi and Siddiqui and Dr. Puffer. Dr. Puffer is the chair of the risk committee.

Director Compensation

Neither Mr. Belardi nor our Apollo directors, other than Dr. Puffer, who is not an employee of Apollo but acts as a consultant to Apollo and its affiliates, receive any additional compensation for serving as directors.

A summary of compensation for our non-employee directors for 2016 is set forth under *Item 11. Executive Compensation-Non-Employee Director Compensation.*

Management Committees

An integral component of our corporate governance structure is our management committees. Management committees report to our senior officers, including our Chief Executive Officer, President, Chief Financial Officer, and Chief Risk Officer and to committees of our board of directors. Management committees are comprised of members of senior management and are designed to oversee business initiatives and to manage business risk and processes, with each committee focused on a discrete area of our business. The following is a description of certain of our management committees:

- Management Executive Committee: oversees all of our strategic initiatives and our overall financial condition.
- Management Risk Committee: oversees overall corporate risk, including credit risk, interest rate risk, equity risk, business risk, operational risk and other risks we confront. The committee reports to the risk committee.
- Operational Risk Committee: a subcommittee of the Management Risk Committee which oversees operational risk, including information security, disaster recovery, trading activities and operational management of our annuity portfolio.
- Management Investment Committee: focuses on strategic decisions involving our investment portfolio, such as approving investment limits, new asset classes and our allocation strategy, reviewing large asset transactions as well as monitoring our credit risk and the management of our assets and liabilities. The committee reports to the risk committee.

Compensation Committee Interlocks and Insider Participation

For the fiscal year ended December 31, 2016, our compensation committee consisted of Messrs. Siddiqui and Rowan as well as three independent members, Messrs. Wrubel, McCall and Beilinson. Mr. Ghubash, a former director, also served on the compensation committee during 2016.

None of our executive officers currently serves, or has served during the last completed fiscal year, as a member of the board of directors or compensation committee of any entity that has an executive officer serving as a member of our compensation committee or as a director on our board of directors.

Corporate Governance Guidelines and Code of Business Conduct and Ethics

We have adopted corporate governance guidelines and a code of business conduct and ethics that applies to all of our directors, officers and employees. These documents are available at *www.athene.com*. Information contained on our website or connected thereto does not constitute a part of, and is not incorporated by reference into, this report.

Risk Management Oversight

The Company has implemented an enterprise-wide approach to risk management and has specifically established a risk committee of the board of directors charged with the oversight of the development and implementation of systems and processes designed to identify, manage and mitigate reasonably foreseeable material risks and with the duty to assist the board of directors and other board committees with fulfilling their oversight responsibilities for the Company's risk management function.

Item 10. Directors, Executive Officers and Corporate Governance

The audit committee assists the risk committee in its responsibility for oversight of risk management. In particular, the audit committee focuses on major financial risk exposures and the steps management has taken to monitor and control such risks, and discusses with our independent auditor the policies governing the process by which senior management and the various units of the Company assess and manage our financial risk exposure and operational/strategic risk.

The compensation committee also assists the risk committee in overseeing risk management by reviewing the Company's compensation plans, policies and programs to ensure that such plans, policies and programs do not encourage excessive or inappropriate risk-taking.

Item 11. Executive Compensation

Compensation Discussion and Analysis

Introduction

Our named executive officers (NEOs), comprised of our principal executive and financial officers and the next three highest paid executive officers, are James R. Belardi, Chairman, Chief Executive Officer and Chief Investment Officer; Martin P. Klein, Executive Vice President and Chief Financial Officer; William J. Wheeler, President; Grant Kvalheim, Executive Vice President, Athene and Chief Executive Officer and President, Athene USA; and Frank (“Chip”) L. Gillis, Executive Vice President, Athene and Chief Executive Officer, ALRe.

Compensation Framework

Goals, Principles and Process

Our compensation committee believes that our executive compensation program should reward actions and behaviors that ensure policyholder protection, drive long-term, profitable revenue growth, and create sustainable shareholder value. The compensation committee has sought to foster these objectives through a compensation system that focuses on increasing our executives’ personal interest in our growth and success through performance-based annual incentive awards and ownership of our Class A common shares. We believe that these awards create a balanced focus on our short-term and long-term strategic and financial goals. The following principles provide a framework for the Company’s executive compensation program:

- attract, retain and motivate high-performing talent;
- reward outstanding performance;
- directly align executive compensation elements with both short-term and long-term Company performance; and
- align the interests of our executives with those of our stakeholders.

Our compensation committee has the responsibility for overseeing and approving the compensation of all of our executive officers. Our compensation committee uses industry data to assess the competitiveness of our compensation elements for our NEOs and other executive officers, and they also receive recommendations from Mr. Belardi regarding the compensation arrangements for executive officers other than himself. None of our NEOs participated in the determination of their own compensation.

2016 Compensation Elements

Base Salary

Base salaries for our NEOs are determined annually, based on a number of factors, including the size, scope and impact of their role, the market value associated with their role, leadership skills and values, length of service, and individual performance and contributions.

Annual Incentive Awards

As further discussed below in *2016 Compensation Decisions,* we grant annual cash incentive awards to our NEOs based on the achievement of financial, operational and personal objectives. In general, these objectives are communicated to our NEOs at the beginning of the year, and the compensation committee determines the amount of the awards after the completion of the performance period. In view of the new long-term incentive awards we granted in 2016, which include time-based restricted share units (RSUs), time-based stock options and performance-based RSUs, we decreased the amount of the target annual cash incentive awards that our NEOs will receive, including those NEOs who are otherwise entitled to receive specified target incentive awards pursuant to their employment agreements.

Athene Equity and Long-Term Incentive Awards

In general, Athene’s equity and long-term incentive compensation program is designed to recognize scope of responsibilities, reward demonstrated performance and leadership, align the interests of award recipients with those of Athene’s shareholders and retain award recipients. Important factors in determining the amount of grants awarded to each NEO include the size of past grant amounts, individual performance and expected future contributions to Athene.

Prior to 2016, Athene granted restricted Class M common shares to our executive officers and certain other employees in association with and following each of the four rounds of capital raise transactions undertaken since our inception. Class M shares are non-voting incentive compensation shares, convertible into Class A common shares upon vesting and the payment of the conversion price. Grants of such shares were
comprised of two tranches, one involving time-based vesting criteria and the other involving performance-based vesting criteria.

In anticipation of our becoming a public company, in 2016, we mostly discontinued our practice of granting restricted Class M shares to our executive officers, the exception being for new hires and special compensation actions, and issued time-based stock options and time-based RSUs to our NEOs and certain other employees. We use grants of stock options to focus our executives on delivering long-term value to shareholders because options have value only to the extent that the price of our stock on the date of exercise exceeds the stock price on the grant date, as well

as to retain executives, since the stock options vest ratably over a three-year period provided the recipient is continuously employed during the period. The time-based RSUs align the interests of our executives with shareholders' interests and also serve to retain executives, as these RSUs also vest ratably over a three-year period provided the recipient is continuously employed during the period.

In addition, in 2016, we initiated the granting of a new long-term incentive award in the form of performance-based RSUs, which will cliff-vest after the 2016-2018 performance period and are payable only if we achieve specified goals based on two equally weighted performance metrics: average annual return on equity and operating income for the three-year period. The threshold, target and maximum levels of these goals are designed to be a stretch goal in comparison to the financial plan. These performance-based RSUs also serve to retain executives, as they require the recipient to be continuously employed during the performance period.

To balance the overall amount of compensation paid to our NEOs, in view of our new long-term incentive program in the form of options, time-based RSUs and performance-based RSUs, we correspondingly reduced the annual incentive awards that our NEOs will receive during the performance period. With the addition of the long-term incentive program, there is an overall shift to deferred compensation.

In September 2016, the compensation committee modified the outstanding Class M-1, M-2, and M-3 share agreements to vest all performance-based Class M-1, M-2 and M-3 shares, given that the vesting of the shares in the near future was probable in view of our IPO. The committee also amended the conversion option for these classes, which previously allowed conversion of vested shares only subsequent to an IPO. Under the modified conversion terms, with certain exceptions, individuals were able to elect up to three options for all or any portion of their vested Class M shares, including conversion at a specified date prior to an IPO, on the date of an IPO, or ratably each month for six months after an IPO. The modifications affected 27 individuals, including some of our NEOs. The incremental fair value of the modified awards is reported in the option awards column for each affected NEO in the *2016 Summary Compensation Table*. In addition, as a result of the modifications, we recorded an $83 million increase to additional paid-in capital, due to the reclassification from liability awards to equity awards. We also recorded a $42 million charge to stock-based compensation expense and additional paid-in capital for the vesting of these performance-based shares, primarily related to the acceleration of previously unrecognized compensation expense.

Other Compensation Practices

Employment Agreements

We have entered into employment agreements with some of our NEOs, as follows:

Belardi Agreement

As Mr. Belardi also serves as AAM's Chairman, Chief Executive Officer and Chief Investment Officer, he has separate employment agreements with both the Company and with AAM. Under these agreements, Mr. Belardi is entitled to receive a base salary and is eligible to receive an incentive award each fiscal year during the term of employment. For 2016, AAM and the compensation committee of AHL have consulted with each other to determine Mr. Belardi's total base salary, incentive award targets and actual incentive awards. Pursuant to an understanding between AHL and AAM, AHL has agreed that AHL is responsible for paying half of his total base salary and half of his total incentive award, and AAM agreed to be responsible for paying the remaining amount. Either party, at its sole discretion, may pay its portion of the incentive award in the form of cash or equity. The target incentive award is 100% of Mr. Belardi's base salary, but the actual incentive award will be determined by our compensation committee and AAM's compensation committee, based on three performance objectives: non-alternative investment performance relative to the Barclays US Aggregate Bond Index; aggregate alternative investment net performance relative to the Company's underwriting target; and corporate performance targets. We report our portion of Mr. Belardi's total annual salary and incentive award in our *2016 Summary Compensation Table*.

Mr. Belardi's employment agreement with us has a three-year initial term expiring on November 3, 2016 and automatically extends for subsequent one year terms unless one party gives notice of non-renewal prior to expiration of the then current term. Pursuant to his employment agreement, severance is payable to Mr. Belardi in the event of a termination of employment by the Company without cause, by the Company by reason of non-renewal, by Mr. Belardi for good reason, or due to Mr. Belardi's death or disability. Mr. Belardi is entitled to receive severance payments in an amount equal to the sum of his then-annual base salary and a pro rata incentive award for the year of termination based on the incentive award paid to him in the year preceding his termination. In the event of involuntary termination other than due to death or disability, Mr. Belardi is entitled to receive an additional severance payment equal to the incentive award paid to him in the year preceding the year in which his termination occurs. In the event of involuntary termination other than due to non-renewal by the Company, any outstanding and unvested time-based restricted shares that were scheduled to vest during the one-year period following the termination date will immediately vest, and a portion of each tranche of outstanding and unvested Class M performance-based restricted shares shall remain outstanding and eligible to vest pursuant to their terms for a period of 18 months following the termination date. As a condition to his receipt of the severance payments and benefits described above, Mr. Belardi must timely execute (and not revoke) a general release of claims against the Company and its affiliates. Mr. Belardi's employment agreement with the Company also contains customary restrictive covenants, including confidentiality and nondisclosure covenants, a covenant not to compete with, or solicit customers of, the Company or AAM for 12 months following termination, and a covenant not to solicit employees of the Company or AAM for 24 months following termination.

Item 11. Executive Compensation

Wheeler Agreement

Pursuant to his employment agreement, Mr. Wheeler is entitled to receive a minimum base salary of $1,250,000 and is eligible to receive an annual incentive award each fiscal year he is employed. His employment is at will and may be terminated by him or by the Company at any time by giving two months' notice. The target incentive award is 200% of Mr. Wheeler's base salary, but the actual incentive award will be determined by the compensation committee in its sole discretion, based on performance objectives (which may include corporate, financial, strategic, individual or other objectives) established with respect to that particular fiscal year by the compensation committee.

In addition to termination by Mr. Wheeler or the Company at any time by giving two months' notice, the Company has the right, in its discretion, to terminate the agreement with a payment in lieu of notice. The Company may also terminate the agreement without notice or payment in lieu of notice if Mr. Wheeler is guilty of any gross default or misconduct, or any repeated misconduct after due warning, in connection with the Company or in the event of any serious or repeated breach or non-observance with any of the provisions in the agreement. The employment agreement contains customary restrictive covenants, including confidentiality and nondisclosure covenants and covenants not to solicit customers or employees of the Company or any affiliate of the Company for 12 months following termination.

Klein Agreement

Pursuant to his employment agreement, Mr. Klein is entitled to receive a minimum base salary of $550,000 and is eligible to receive an annual incentive award each fiscal year he is employed. His employment is at will and may be terminated by him or by the Company at any time by giving two months' notice. The target incentive award is 150% of Mr. Klein's base salary, but the actual incentive award will be determined by the compensation committee in its sole discretion, based on performance objectives (which may include corporate, financial, strategic, individual or other objectives) established with respect to that particular fiscal year by the compensation committee.

In addition to termination by Mr. Klein or the Company at any time by giving two months' notice, the Company has the right, in its discretion, to terminate the agreement with a payment in lieu of notice. The Company may also terminate the agreement without notice or payment in lieu of notice if Mr. Klein is guilty of any gross default or misconduct, or any repeated misconduct after due warning, in connection with the Company or in the event of any serious or repeated breach or non-observance with any of the provisions in the agreement. The employment agreement contains customary restrictive covenants, including confidentiality and nondisclosure covenants and covenants not to solicit customers or employees of the Company or any affiliate of the Company for 12 months following termination.

Kvalheim Agreement

Pursuant to his employment agreement, for 2016, Mr. Kvalheim is entitled to receive a minimum base salary of $750,000 and is eligible to receive an incentive award each fiscal year he is employed. The target incentive award is 250% of Mr. Kvalheim's base salary, but the actual incentive award will be determined by the compensation committee in its sole discretion, based on performance objectives (which may include corporate, financial, strategic, individual or other objectives) established with respect to that particular fiscal year by the compensation committee. The agreement terminates 15 months from the date of the IPO.

Mr. Kvalheim may terminate the agreement at any time by giving 90 days' notice; provided, however, that if he elects to terminate the agreement for "good reason," as defined in the 2014 Share Incentive Plan, but including if there are material adverse changes to his incentive award agreements that do not generally and similarly apply to other senior employees, then he must so notify the Company within 45 days of the occurrence of the events constituting good reason, and the Company has 60 days to cure such events after receipt of such written notice. The Company may terminate the agreement at any time for "cause" or in the event of "disability," as such terms are defined in the 2014 Share Incentive Plan. If the Company terminates Mr. Kvalheim's employment without cause, then the Company will pay him a pro rata portion of his target annual incentive award in effect for the year in which the termination occurs.

Stock Ownership Guidelines

We require management at the Senior Vice President level and above, including our Chief Executive Officer, to own significant amounts of our Class A common shares. The amount of Class A common shares that must be held will be set at a multiple of the individual's base salary. Covered executives will have five years to satisfy our share ownership requirement.

Position	Multiple
Chief Executive Officer/President	6X
Executive Vice President	3X
Senior Vice President	2X

Purchased and restricted Class A common shares, vested Class A restricted stock units, vested Class M common shares and vested stock options will count toward this requirement. Covered executives must retain at least 75% of all Athene equity holdings until they meet their respective stock ownership requirements.

Item 11. Executive Compensation

Anti-Hedging and Anti-Pledging Policies

Covered executives, including all of our executive officers, are not permitted to engage in any transactions that are designed to offset a decrease in the market value of our Class A common shares. In addition, covered executives may not pledge their equity holdings in AHL as collateral if they are counting those holdings towards their respective stock ownership requirements.

Review of Compensation Policies and Practices Related to Risk Management

Effective risk management is central to our success, and compensation is carefully designed to be consistent with our risk management framework and controls. If the Company's performance is obtained in a manner inconsistent with this framework or these controls, then the compensation committee has the discretion, with input from the risk committee, if necessary, to decrease or not award any bonuses to our NEOs and other executive officers. In addition, the performance objectives for our Chief Risk Officer and the other employees in our risk management function are based on the effectiveness of our risk management policies and procedures. We do not believe that our compensation policies and practices are reasonably likely to have a material adverse effect on the Company.

2016 Compensation Decisions

Our NEOs' annual incentive awards in 2016 were based on a combination of five overall corporate financial and operational goals, which comprise 75% of the award, as well as individual performance goals, which comprise 25% of the award (other than for the CEO). The targets were designed to be reasonably achievable, and did not reflect unrealistic stretch targets that may encourage excessive risk-taking, but required the coordinated, cross-functional focus and effort of the executive officers. The payout opportunity for incentive awards ranged from 0% to 200% of each participant's target award opportunity. The corporate performance measurements, their respective weightings, 2016 performance and achievement with respect to these measurements, and payout level were as follows:

Objectives	Weight	Measurement	Target	2016 Performance/ Achievement	Payout Level
Overall profitability	40%	Operating income, net of tax[1]	$565M	$561M	98%
Expense management	15%	Expense targets	$-	Exceeded	103%
Organic growth	15%	Combined sales[2]	$5.1B	$8.8B	150%
New business profitability	15%	Underwritten net spread	$-	Exceeded	112%
Public company readiness	15%	Meet 45-day close process	$-	Yes	100%

[1] *Operating income, net of tax, as adjusted to include net realized losses on investment asset sales and impairments and excludes alternative asset performance and corresponding expense amortization.*

[2] *Combined sales includes retail IMO, retail Financial Institution, funding agreements and flow reinsurance.*

Based on the Company's 2016 performance with respect to these five objectives, the payout level was 109% of the corporate target opportunity. Total amounts of awards were also based on the assessment of individual performance factors, as discussed below.

Mr. Belardi

In addition to the five objectives above, which collectively comprised 50% of his award, Mr. Belardi's annual incentive plan award in 2016 was based on two additional performance objectives: the first objective, weighted at 25%, compared the Company's non-alternative investment performance to the Barclays US Aggregate Bond Index over a three-year period. The second objective, also weighted at 25%, compared the Company's alternative investment net performance relative to the Company's underwriting target of 10-15% over a three-year period.

For the objective based on the Company's non-alternative investment performance, the committee compared the Company's results of 4.42% for the three-year period ended December 31, 2016 (as calculated by AAM, based on information provided by the Company, and reviewed by the compensation committee) to 3.25% for the Barclays US Aggregate Bond Index for the same period and determined to pay out 100% of the award for this objective. For the objective based on the Company's alternative investment performance, the committee compared the Company's results of 8.08% for the three-year period ended December 31, 2016 (as calculated by AAM, based on information provided by the Company, and reviewed by the compensation committee) to its 10-15% underwriting target and determined to pay out 0% of the award for this objective.

Mr. Wheeler

The compensation committee recognized Mr. Wheeler for reorganizing and strengthening the Company's reinsurance capabilities; supporting the Company's M&A efforts, including enhancing the rigor of deal analytics, facilitating the Company's entry into the U.S. pension closeout and structured settlement markets; improving the effectiveness and cohesion of senior management; and enhancing risk management.

Item 11. Executive Compensation

Mr. Kvalheim

The compensation committee recognized Mr. Kvalheim for leading and supporting a high-performing management team in Iowa; exceeding an ambitious organic growth target while also exceeding target return targets; maintaining cost controls; driving a strong control environment and risk-aware culture with clear accountability; providing appropriate “tone at the top” on work ethic and personal integrity; and fostering employee engagement and being visible to the employees.

Mr. Klein

The compensation committee recognized Mr. Klein for his leadership in executing and completing the IPO; supporting growth initiatives, including exploring new markets; enhancing the Company’s financial close process and driving a strong control environment and risk-aware culture with clear governance and accountability.

Mr. Gillis

The compensation committee recognized Mr. Gillis for significantly strengthening the Athene Life Re team; maintaining a strong relationship with the Bermuda Monetary Authority; matching market opportunities; significantly enhancing reinsurance flows; and managing third-party reinsurance relationships to assure timely financial closes.

2016 Summary Compensation

The following table contains 2016 compensation information for our NEOs.

Item 11. Executive Compensation

2016 Summary Compensation Table

Name and Position	Year	Salary	Stock Awards[1]	Option Awards[2]	Non-Equity Incentive Plan Compensation	All Other Compensation[3]	Total	Total As Adjusted to Exclude IPO-Related Awards[4]
James R. Belardi[5,6] Chairman, Chief Executive Officer and Chief Investment Officer	2016	$ 900,000	$ 2,216,047	$ 5,355,807	$ -	$ -	$ 8,471,854	$ 3,866,047
	2015	$ 875,000	$ 612,500	$ -	$ -	$ 13,250	$ 1,500,750	$ -
William J. Wheeler President	2016	$ 1,250,000	$ 750,023	$ 375,003	$ 1,575,000	$ 102,240	$ 4,052,266	$ 4,052,266
	2015	$ 326,708	$ 135,445	$12,741,667	$ 466,439	$ 479,873	$14,150,132	$ -
Grant Kvalheim Executive Vice President, Athene and Chief Executive Officer and President, Athene USA	2016	$ 750,000	$ 425,054	$ 5,916,839	$ 1,420,250	$ 135,472	$ 8,647,615	$ 2,943,279
	2015	$ 650,000	$ 363,125	$ -	$ 839,375	$ 129,930	$ 1,982,430	$ -
Martin P. Klein Executive Vice President and Chief Financial Officer	2016	$ 550,000	$ 375,012	$ 187,504	$ 1,000,000	$ 111,286	$ 2,223,802	$ 2,223,802
	2015	$ 80,208	$ -	$ 1,325,133	$ -	$ 97,548	$ 1,502,889	$ -
Frank ("Chip") L. Gillis Executive Vice President, Athene and Chief Executive Officer, ALRe	2016	$ 550,000	$ 300,050	$ 3,316,661	$ 704,462	$ 190,000	$ 5,061,173	$ 1,894,513

[1] *This column includes the grant date fair value of the performance-based and time-based RSUs granted to our NEOs in 2016, which has been calculated by multiplying the number of RSUs by the closing share price on the date of grant. For the performance-based RSUs, we have reported the grant date fair value assuming the probable outcome of satisfying the performance conditions, which is 50%. Assuming the highest level of performance conditions will be achieved, the grant date fair value of these awards would be as follows: $2,250,036; $1,125,035; $637,547; $562,518; and $450,041, for Messrs. Belardi, Wheeler, Kvalheim, Klein and Gillis, respectively.*

[2] *This column represents the aggregate grant date fair value of stock options granted in 2016, as well as the incremental grant date fair value of the modification in 2016 of outstanding Class M-1, M-2 and M-3 share agreements to vest all performance-based Class M-1, M-2 and M-3 shares before the IPO, and to amend the conversion option for these classes. With respect to the incremental grant date fair value of these modifications, such amounts were $4,605,807, $941,474 and $1,120,659, respectively, for Messrs. Belardi, Kvalheim and Gillis, respectively. For more information about the terms of these modifications, see Athene Equity and Long-Term Incentive Awards. With respect to the stock options, Athene measures the fair value of each stock option grant at the date of grant using a Black-Scholes option pricing model. The grant-date fair value of options granted in 2016 was $5.83, based on the following assumptions: risk-free interest rate of 1.0%; dividend yield of 0%; expected volatility of 25.0%; and expected lives of 2.63 years.*

[3] *For 2016, these amounts include the Company's 401(k) matching payment of $13,250 for Messrs. Wheeler, Kvalheim and Klein, and $10,000 for Mr. Gillis; housing allowances of $30,250 (which includes a tax gross-up) and $46,595 for Messrs. Kvalheim and Klein for their residences in Iowa and $180,000 (which includes a tax gross-up) for Mr. Gillis for his residence in Bermuda; and taxable amounts of $88,990, $91,972 and $51,441 (which amounts include tax gross-ups) for Messrs. Wheeler, Kvalheim and Klein, respectively, for travel expenses from their principal residences to the Company's office in Iowa.*

[4] *The IPO-related awards are (1) the incremental grant date fair value of the modifications to the performance-based Class M-1, M-2 and M-3 shares for Messrs. Belardi, Kvalheim and Gillis; and (2) the one-time Class M-4 Prime common share grants to Messrs. Kvalheim and Gillis.*

[5] *Pursuant to an understanding between the Company and AAM, the Company and AAM have each agreed to pay 50% of Mr. Belardi's total annual salary and incentive plan award. The amounts reported for each period reflect only those amounts for which the Company is responsible. The Company's portion of Mr. Belardi's incentive plan award was paid in the form of restricted Class A common shares.*

[6] *Mr. Belardi received his annual incentive award of $716,000 for 2016 in the form of restricted Class A common shares that vest ratably over a two-year period, which is included in Stock Awards.*

2016 Grants of Athene Plan-Based Awards

The following table provides information about awards granted to the NEOs in 2016: (1) the grant date; (2) the threshold, target and maximum estimated future payouts under annual incentive plan awards; (3) the number of stock options, RSUs and Class M-4 common shares granted to the NEOs under the Athene 2014 Share Incentive Plan; (4) the exercise price of the stock options and the conversion price of the Class M-4 common shares; and (5) the grant date fair value of the share and option awards, computed in accordance with applicable SEC rules.

Item 11. Executive Compensation

2016 Grants of Athene Plan-Based Awards Table

Name of Executive	Grant Date	Estimated Future Payouts Under Annual Incentive Plan Awards[1] Threshold	Target	Maximum	Estimated Future Payouts Under Incentive Plan Awards: Number of LTI Performance RSUs[2] (number of units) Threshold	Target	Maximum	Number of Class A Common Shares and Number of LTI Time RSUs[3]	All Other Option Awards: LTI Options and Class M-4 Common Shares[4]	Exercise Price of LTI Options	Grant Date Fair Value of Share and Option Awards[5]
James R. Belardi	2/19/2016							21,674[6]			$ 612,507
	4/19/2016	$ 450,000	$ 900,000	$ 1,350,000							
	6/6/2016				22,092	44,183	66,275	22,092	128,645	$ 33.95	$ 2,250,047
	9/30/2016								1,037,782[7]		$ 3,361,982
	9/30/2016								420,505[8]		$ 258,750
	9/30/2016								500,000[9]		$ 985,074
William J. Wheeler	2/19/2016							4,793[6]			$ 135,450
	4/19/2016	$ 787,500	$ 1,575,000	$ 2,362,500							
	6/6/2016				11,046	22,092	33,138	11,046	64,323	$ 33.95	$ 1,125,026
Grant Kvalheim	2/19/2016							12,850[6]			$ 363,141
	4/19/2016	$ 650,000	$ 1,300,000	$ 1,950,000							
	5/23/2016								440,000[10]	$ 34.23	$ 5,126,003
	6/6/2016				6,260	12,519	18,779	6,260	36,450	$ 33.95	$ 637,558
	9/30/2016								235,483[8]		$ 144,900
	9/30/2016								220,000[9]		$ 433,433
Martin P. Klein	4/19/2016	$ 412,500	$ 825,000	$ 1,237,500							
	6/6/2016				5,523	11,046	16,569	5,523	32,162	$ 33.95	$ 562,516
Frank ("Chip") L. Gillis	2/19/2016							4,422[6]			$ 124,966
	4/19/2016	$ 349,250	$ 698,500	$ 1,047,750							
	6/6/2016				4,419	8,837	13,256	4,419	25,729	$ 33.95	$ 450,050
	6/7/2016								200,000[10]	$ 33.95	$ 2,046,002
	9/30/2016								345,927[7]		$ 1,120,659

[1] *Our NEOs' annual incentive awards in 2016 were based on a combination of five overall corporate financial and operational goals, which comprise 75% of the award, as well as individual performance goals, which comprise 25% of the award (other than for the CEO). The corporate performance component of the awards has a payout range between 50% and 150% of the target amount. The overall payout, including the personal performance component of the award, may not exceed 200% of the target amount.*

[2] *The performance-based RSUs cliff-vest after a three-year period provided the recipient is continuously employed during the period and are payable only if Athene achieves specified goals based on two equally weighted performance metrics: average annual return on equity and operating income for the three-year period.*

[3] *The time-based RSUs vest ratably over three years provided the recipient is continuously employed during the period.*

[4] *The stock options vest ratably over a three-year period provided the recipient is continuously employed during the period.*

[5] *For valuation methodology, see notes 1 and 2 to the 2016 Summary Compensation Table above.*

[6] *Represents part or all of the 2015 Annual Incentive Award, which the Compensation Committee determined to pay out in the form of restricted Class A common shares and were actually granted in 2016.*

[7] *Represents the accelerated vesting of outstanding restricted performance-based Class M-1 common shares.*

[8] *Represents the accelerated vesting of outstanding restricted performance-based Class M-2 common shares.*

[9] *Represents the accelerated vesting of outstanding restricted performance-based Class M-3 common shares.*

[10] *Represents a special grant of Class M-4 Prime common shares, which have terms similar to those granted to Messrs. Wheeler and Klein when they joined the Company in 2015. Specifically, two-thirds of these Class M-4 Prime common shares are performance based, with the remaining one-third Class M-4 Prime common shares being time-based. The Class M-4 Prime time-based shares will vest ratably in equal installments on the first, second, third, fourth and fifth anniversaries of the grant date. One-half of the Class M-4 Prime performance-based shares will vest when Class A common shares have attained a per share volume weighted average closing trading price of $50 or more during any 120-day period, or upon a sale or change in control in which Class A common shares are valued at $50 or more; and the other half will vest when Class A common shares have attained a per share volume weighted average closing trading price of $70 or more during any 120-day period, or upon a sale or change in control in which Class A common shares are valued at $70 or more. Any unvested Class M-4 Prime performance-based shares that have not vested within ten years from the date of grant will be forfeited to the Company.*

2016 Outstanding Athene Equity Awards at Fiscal Year-End

The following table provides information on the holdings of Athene equity awards by the NEOs as of December 31, 2016. This table includes vested Class M common shares, which are the economic equivalent of vested, unexercised options; unvested Class A common shares; and unvested Class M time-based and performance-based common shares with vesting conditions that were not satisfied as of December 31, 2016. Each equity grant is shown separately for each NEO. The vesting schedule for each outstanding award is shown following this table.

						RSU[5]			8,837	$ 424,088

[1] *This column reports the expiration date for Class M common shares and stock options. Once vested, Class M common shares may remain outstanding indefinitely, provided that Class M-1 common shares held by Mr. Gillis will automatically convert into Class A common shares on July 15, 2019 if such shares are not previously converted prior to such date. Class M-4 common shares that have not vested by March 3, 2022 will be forfeited to the Company. Class M-4 prime common shares that have not vested by the tenth anniversary of the grant date will be forfeited to the Company.*

[2] *As of December 31, 2016, the fair market value of a Class A common share was $47.99.*

[3] *All unvested shares of Class A common shares for Mr. Belardi have been transferred to a trust, other than for value, for estate planning purposes.*

[4] *This row shows the number of time-based RSUs, which vest ratably over a three-year period.*

[5] *This row shows the number of performance-based RSUs, which cliff-vest after a three-year period, assuming performance conditions have been met.*

Item 11. Executive Compensation

Outstanding Equity Awards Vesting Schedule

The following schedule is for the restricted Class A common shares and the Class M time-based common shares. The Class M performance-based common shares will vest only when the performance hurdles have been satisfied.

Name of Executive	Class of Security	Share Award Grant Date	Vesting Schedule for Time-Based Shares
James R. Belardi	M-3	4/28/2014	Pro rata over 5 years[1]
	A	4/29/2015	Pro rata over 3 years[2]
	A	2/19/2016	Pro rata over 3 years[2]
	Time-Based RSUs	6/6/2016	Pro rata over 3 years[3]
	Options	6/6/2016	Pro rata over 3 years[3]
William J. Wheeler	M-4 Prime	10/1/15	Pro rata over 5 years [4]
	A	2/19/2016	Pro rata over 3 years[2]
	Time-Based RSUs	6/6/2016	Pro rata over 3 years[3]
	Options	6/6/2016	Pro rata over 3 years[3]
Grant Kvalheim	M-3	4/28/2014	Pro rata over 5 years[1]
	M-4 Prime	5/23/2016	Pro rata over 5 years[5]
	A	4/29/2015	Pro rata over 3 years[2]
	A	2/19/2016	Pro rata over 3 years[2]
	Time-Based RSUs	6/6/2016	Pro rata over 3 years[3]
	Options	6/6/2016	Pro rata over 3 years[3]
Martin P. Klein	M-4 Prime	11/9/2015	Pro rata over 5 years[6]
	Time-Based RSUs	6/6/2016	Pro rata over 3 years[3]
	Options	6/6/2016	Pro rata over 3 years[3]
Frank ("Chip") L. Gillis	M-4	2/23/2015	Pro rata over 5 years[7]
	M-4 Prime	6/7/2016	Pro rata over 5 years[8]
	A	4/28/2015	Pro rata over 3 years[2]
	A	2/19/2016	Pro rata over 3 years[2]
	Time-Based RSUs	6/6/2016	Pro rata over 3 years[3]
	Options	6/6/2016	Pro rata over 3 years[3]

[1] *Vesting schedule start date is October 30, 2012.*

[2] *Vesting schedule start date is January 1, 2015.*

[3] *Vesting schedule start date is January 1, 2016.*

[4] *Vesting schedule start date is October 1, 2015.*

[5] *Vesting schedule start date is February 15, 2016.*

[6] *Vesting schedule start date is November 15, 2015.*

[7] *Vesting schedule start date is April 4, 2014.*

[8] *Vesting schedule start date is May 15, 2016.*

Item 11. Executive Compensation

2016 Athene Stock Vested Table

The following table provides information for the NEOs on the number of Class A common shares acquired upon vesting in 2016 and the value realized at such time.

2016 Athene Stock Vested Table

	Option Awards		Stock Awards	
Name	Number of Shares Acquired on Conversion (#)	Value Realized on Conversion ($)	Number of Class A Common Shares Acquired on Vesting (#)	Value Realized on Vesting ($)
James R. Belardi	-	-	15,256[2]	$ 496,661
William J. Wheeler	-	-	1,598[3]	$ 45,159
Grant Kvalheim	589,442[1]	$ 22,104,075	23,499[2]	$ 778,801
Martin P. Klein	-	-	-	-
Frank ("Chip") L. Gillis	-	-	3,050[2]	$ 95,602

[1] *Class M common shares were converted into Class A common shares on October 10, 2016, and the fair market value of a Class A common share on such date was $37.50.*

[2] *Comprised of two tranches of restricted Class A common shares granted as part of annual incentive awards: shares from the 2014 award vested on January 1, 2016, which had a market value of $34.23 per share; and shares from the 2015 award vested on February 19, 2016, which had a market value of $28.26 per share.*

[3] *Comprised of shares from the 2015 award only.*

2016 Potential Payments Upon Termination or Change-in-Control at Fiscal Year-End

The information below describes and quantifies certain compensation that would have become payable under existing plans and arrangements if the NEO's employment had terminated on December 31, 2016. These benefits are in addition to benefits available generally to salaried employees, such as distributions under our 401(k) Plan, disability benefits and accrued vacation pay. Due to the number of factors that affect the nature and amount of any benefits provided upon the events discussed below, any amounts actually paid or distributed may be different. Factors that could affect these amounts include the time during the year of any such event and the executive's age.

Athene Equity Awards

Time-based restricted shares issued under the 2009, 2012, 2014 and 2016 Share Incentive Plans will vest in full upon a sale of the Company or a change-in-control that occurs either prior to a participant's termination of service and, in the case of time-based restricted Class M common shares, within six months following a participant's termination of service without cause, by the participant for good reason or due to death or disability. Separate and apart from a sale or change-in-control, following a participant's termination of service without cause, by the participant for good reason or due to death or disability, the Class M performance-based restricted shares that are outstanding and unvested shall remain outstanding and eligible to vest pursuant to their terms for a period of 18 months. If such performance-based restricted shares fail to vest during this 18-month period, they will be forfeited.

Pursuant to Mr. Belardi's employment agreement, in the event of involuntary termination of service other than due to non-renewal by the Company, all outstanding restricted shares that are held by Mr. Belardi that are subject to time-vesting and scheduled to vest during the one-year period following his termination shall immediately vest, and a portion of each tranche of outstanding and unvested performance-vested restricted shares, depending on when they were granted, shall remain outstanding and eligible to vest pursuant to their terms for a period of 18 months following the termination date.

The following table provides the intrinsic value (that is, the value based upon the fair market value of our share price as of December 31, 2016 which was $47.99, less the conversion price of the award) of equity awards that would vest if there was a sale of the Company or change-of-control as of December 31, 2016 (which includes if the NEO was terminated without cause as of December 31, 2016 and there was a sale of the Company or a change-of-control within six months thereafter) or if there was a termination without cause as of December 31, 2016.

Table of Contents

Item 11. Executive Compensation

2016 Potential Equity Benefits upon Change in Control and Termination Table[1]

	Upon Change in Control				Upon Termination without Cause
Name	Time-Based Restricted Shares	Time-Based RSUs	Performance-Based RSUs	Stock Options	Performance-Based Restricted Shares
James R. Belardi	$ 4,196,224	$ 1,060,195	$ 2,120,342	$ 1,806,176	$ -
William J. Wheeler	$ 13,641,894	$ 530,098	$ 1,060,195	$ 903,095	$ 11,200,000
Grant Kvalheim	$ 4,879,244	$ 300,417	$ 600,787	$ 511,758	$ 1,345,425
Martin P. Klein	$ 1,397,760	$ 265,049	$ 530,098	$ 451,554	$ 1,164,800
Frank ("Chip") L. Gillis	$ 1,289,763	$ 212,068	$ 424,088	$ 361,235	$ 340,570

[1] *As noted above, Class M performance-based restricted shares that are outstanding and unvested shall remain outstanding and eligible to vest pursuant to their terms for a period of 18 months. For purposes of this table only, the amounts reported in this column assume that one-third of each class of NEO's Class M performance-based restricted shares that are eligible to vest do, in fact, vest over the 18 months following December 31, 2016.*

Severance Benefits

Our NEOs would be eligible for benefits under the Athene USA Corporation Severance Pay Plan, which covers our U.S. full-time employees, if they are involuntarily terminated without cause, and provided they release Athene from any and all claims and, in some instances, agree to non-compete/non-solicit covenants. In general, eligible employees receive two weeks of their annual base salary for each completed year of service. The minimum benefits payable under this plan are four weeks of annual base salary; and the maximum benefits payable under this plan are 26 weeks of annual base salary. In the event that an NEO is notified by us that he or she is required to comply with a post-separation non-compete covenant for a period longer than the number of weeks of annual base salary to which the NEO is entitled based on his or her years of service, then the amount of the NEO's severance benefit will be increased to an amount equal to annual base salary for the same number of weeks as the duration of the non-compete covenant. However, except for Mr. Belardi, in accordance with his employment agreement, in no event will an NEO receive more than two times his or her annual base salary received during the year immediately preceding the year of termination. In its sole discretion, the Company may determine to pay a pro-rated bonus to the involuntarily terminated employee, as approved by the compensation committee.

Our employees based in Bermuda are eligible for benefits under the Athene Bermuda Severance Pay Plan, which are substantially similar to the benefits provided by the Athene USA Corporation Severance Pay Plan.

Item 11. Executive Compensation

2016 Potential Pay Upon Termination Table

Name of Executive	Termination Scenario[1]	Athene Severance Pay
James R. Belardi[2]	Voluntary Separation	-
	Involuntary Separation	$2,571,249[3]
	Termination For Cause	-
William J. Wheeler	Voluntary Separation	-
	Involuntary Separation	$1,250,000
	Termination For Cause	-
Grant Kvalheim	Voluntary Separation	-
	Involuntary Separation	$750,000
	Termination For Cause	-
Martin P. Klein	Voluntary Separation	-
	Involuntary Separation	$550,000
	Termination For Cause	-
Frank ("Chip") L. Gillis	Voluntary Separation	-
	Involuntary Separation	$550,000
	Termination For Cause	-

[1] *For NEOs other than Mr. Belardi, voluntary separation triggers a severance payment only if the Company decides to enforce any non-compete provision, in which case severance would be paid for the time period concurrent with the period of the effectiveness of the non-compete provision. Involuntary separation provides for severance to coincide with a 12-month non-compete clause. Severance is not payable where an employee is terminated for cause.*

[2] *Pursuant to his employment agreement, severance is payable to Mr. Belardi in the event of a termination of employment by the Company without cause, by the Company by reason of non-renewal, by Mr. Belardi for good reason, or due to Mr. Belardi's death or disability. Mr. Belardi is entitled to receive severance payments in an amount equal to the sum of his then-annual base salary and a pro rata bonus for the year of termination based on the bonus paid to him in the year preceding his termination. In the event of an involuntary termination other than due to death or disability, Mr. Belardi is entitled to receive an additional bonus equal to the bonus paid to him in the year preceding the year in which his termination occurs.*

[3] *This amount represents the Company's portion of the severance payable to Mr. Belardi in the event of a termination of employment by the Company without cause, by the Company by reason of non-renewal, by Mr. Belardi for good reason, or due to Mr. Belardi's death or disability. Mr. Belardi is eligible to receive a separate involuntary severance payment from AAM.*

Director Compensation

Neither Mr. Belardi nor our Apollo directors, other than Dr. Puffer who is not an employee of Apollo but acts as a consultant to Apollo and its affiliates, receive any additional compensation for serving as directors. In 2016, each of our other directors received annual compensation of $140,000, of which 50% was paid in cash and 50% was paid in restricted Class A common shares that vest ratably over a three-year period. In light of the workload and broad responsibilities of their positions, the independent chairs of board committees received an additional $25,000 in annual compensation, payable 50% in cash and 50% in restricted Class A common shares. Independent members of the board committees, other than the chairs, received an additional $10,000 in annual compensation, also payable 50% in cash and 50% in restricted Class A common shares. Directors eligible to receive compensation also received $2,500 for each board meeting attended. In addition, Ms. Taitz served as a director on the boards of several of our subsidiaries, for which she received separate compensation. Dr. Puffer served on the supervisory board of one of our German subsidiaries, for which he received separate compensation.

In December 2016, we made a one-time grant of 15,000 restricted Class A common shares to each of our independent directors and to Dr. Puffer to align their interests with our shareholders. These grants vest ratably over a three-year period and will vest immediately upon a change in control.

In 2017, we conducted a review of the Company's director compensation program, with the assistance of our independent compensation consultant, Willis Towers Watson. Based on this review, which included a comparison of our program with that of our peers', we have made the following changes for 2017: annual compensation of $240,000, of which $105,000 will be paid in cash, and $135,000 will be paid in restricted Class A common shares that vest after a one-year period. There will be no fees paid for attending board or committee meetings. In addition, in recognition of the workload and responsibilities of their positions, the lead director will receive an additional $35,000 in annual compensation, payable 50% in cash and 50% in restricted Class A common shares that vest after a one-year period; the audit committee chair will receive an additional $30,000 in annual cash compensation; the compensation committee chair and risk committee chair will each receive an additional $20,000 in annual cash compensation; and the nominating and corporate governance chair will receive an additional $15,000 in annual cash compensation. Audit committee members will receive an additional $15,000 in annual cash compensation, and other committee members will continue to receive an additional $10,000 in annual compensation for service on a board committee, but payable in cash.

Item 11. Executive Compensation

The table below indicates the elements and total value of cash compensation and of equity awards granted to each eligible director for services performed in 2016.

2016 Director Summary Compensation Table

Name	Fees Earned or Paid in Cash	Share Awards	All Other Compensation	Total
Marc Beilinson	$ 88,750	$ 646,288	$ -	$ 735,038
Robert Borden	$ 87,500	$ 642,585	$ -	$ 730,085
Brian Leach[1]	$ 29,891	$ 592,422	$ -	$ 622,313
H. Carl McCall[2]	$ 33,804	$ 593,829	$ -	$ 627,633
Manfred Puffer[3]	$ 90,000	$ 645,046	$ 26,290	$ 761,336
Lawrence J. Ruisi	$ 95,000	$ 650,050	$ -	$ 745,050
Hope Taitz[3]	$ 103,750	$ 658,793	$ 25,000	$ 787,543
Arthur Wrubel	$ 33,804	$ 593,829	$ -	$ 627,633

[1] *Brian Leach has been appointed to our Board of Directors, subject to being elected by our shareholders at the 2017 Annual General Meeting.*

[2] *H. Carl McCall has been appointed to our Board of Directors, subject to being elected by our shareholders at the 2017 Annual General Meeting.*

[3] *All Other Compensation for this director relates to amounts received for serving as a director of a subsidiary/subsidiaries of Athene.*

Share Incentive Plans

This summary of the Share Incentive Plans is qualified in its entirety by the actual Share Incentive Plans, which are filed as exhibits to the registration statement on Form S-1/A filed by the Company on October 25, 2016.

Introduction

We adopted Share Incentive Plans in 2009, 2012, 2014 and 2016. The 2009 and 2012 Share Incentive Plans were amended and restated in 2014.

Purpose

The purpose of each Share Incentive Plan is to further the growth and success of the Company and its subsidiaries by enabling directors and employees of, or consultants to, the Company, its subsidiaries and AAM to acquire our common shares, thereby increasing their personal interest in such growth and success, and to provide a means of rewarding outstanding performance by such persons to the growth and success of the Company and its subsidiaries.

Administration

Each Share Incentive Plan is currently administered by the compensation committee. Under the terms of each Share Incentive Plan, the plan may be administered by our board of directors or, if the board so chooses, by the compensation committee or such other committee of our board of directors as the board of directors may from time to time designate (the “Committee”). Among other things, the Committee will have the authority to determine eligibility and the particular persons or classes of persons who will receive awards; grant awards to eligible persons or eligible classes of persons, determine the price and number of securities to be offered or awarded to any of such persons, determine the other specific terms and conditions of awards consistent with the express limits of each plan, establish the installments (if any) in which such awards will become exercisable or will vest and the respective consequences thereof; construe and interpret the provisions of each plan and any award agreement; accelerate or extend the exercisability or extend the term of any or all outstanding awards; and make all other determinations and take such other action as contemplated by each plan or as may be necessary or advisable for the administration of each plan and the effectuation of its purposes.

Eligibility

Directors and employees of, and consultants to, the Company, its subsidiaries and AAM are eligible to participate in the Share Incentive Plans.

Table of Contents

Item 11. Executive Compensation

Shares Subject to Each Share Incentive Plan

7,109,560 Class M-1 common shares of the Company were reserved for issuance under the 2009 Share Incentive Plan. 3,356,126 Class M-2 common shares of the Company were reserved for issuance under the 2012 Share Incentive Plan. In addition, an aggregate of (1) 7,500,000 Class M-3 common shares of the Company, (2) 7,500,000 Class M-4 common shares of the Company, (3) any Class M-1 common shares previously authorized for awards but not issued under the 2009 Share Incentive Plan, (4) any Class M-2 common shares previously authorized for awards but not issued under the 2012 Share Incentive Plan, and (5) 8,000,000 Class A common shares are reserved for awards under the 2014 Share Incentive Plan. 3,500,000 Class A common shares are reserved for issuance under the 2016 Share Incentive Plan. In the event of certain extraordinary corporate transactions or events affecting us, the compensation committee or our board of directors shall make such substitutions or adjustments as it deems appropriate and equitable to (1) the aggregate number and kind of shares or other securities reserved for issuance and delivery under the applicable plan, (2) the number and kind of shares or other securities subject to outstanding awards and (3) the exercise price and or purchase price of awards. In the case of corporate transactions such as a merger or consolidation, such adjustments may include the cancellation of outstanding awards in exchange for cash or other property or the substitution of other property for the shares subject to outstanding awards.

Types of Awards

Awards granted under the Share Incentive Plans may be nonqualified share options, rights to purchase shares, restricted shares, restricted share units and other awards settleable in, or based upon, common shares. In addition, awards granted under the 2016 Share Incentive Plan may include incentive stock options and performance awards settleable in cash.

Share Options

Share options granted under the Share Incentive Plans other than the 2016 Share Incentive Plan will be nonqualified options. Share options granted under the 2016 Share Incentive Plan may be either nonqualified options or incentive share options. Each grant of share options will be evidenced by an award agreement that specifies the exercise price, the duration of the award, the number of shares to which the award pertains and such additional limitations, terms and conditions as the Committee may determine. The exercise price of share options will be determined by the Committee, but may not be less than 100% of the fair market value of the share underlying the share options on the date of grant. Award holders generally may pay the exercise price in cash or, if approved by the Committee, in common shares (valued at fair market value on the date of exercise) or a combination thereof, or by "cashless exercise" through a broker or by withholding shares otherwise receivable on exercise. The term of share options will be determined by the Committee. The Committee will determine the vesting and exercise schedule of share options and the extent to which the share options will be exercisable after the award holder's services with us terminate.

Restricted Shares

Restricted common shares may be granted under the Share Incentive Plans with such restrictions as the Committee may designate. The Committee may provide at the time of grant that the vesting of restricted shares will be contingent upon the achievement of applicable performance goals and/or continued service. The terms and conditions of restricted share awards (including any applicable performance goals) do not need to be the same with respect to each participant. During the restriction period, the Committee may require that the share certificates evidencing restricted shares be held by us. Except for these restrictions and any others imposed by the Committee, the recipient will have rights of a shareholder with respect to the relevant class of restricted shares granted under the Share Incentive Plans, including the right, if any, to vote the restricted shares upon the vesting of such restricted shares; however, whether and to what extent the recipient will be entitled to receive cash or share dividends paid or made with respect to the shares or to convert such shares into Class A common shares will be set forth in the particular participant's award agreement. The restricted shares currently outstanding under the Share Incentive Plans were granted in both time-based vesting and performance-based vesting tranches. For a description of our classes of common shares, see *Note 11 - Common Stock* and *Note 12 - Stock-based Compensation* to the consolidated financial statements.

Under certain of our award agreements, following the IPO, with respect to those shares whose Lock-Up End Dates have not occurred, within 270 days following the termination of service of a participant (or, with respect to any restricted shares that vest following a participant's termination of service, 270 days following the vesting date of such restricted shares), the Company has the right (but not the obligation) to repurchase all or any portion of the vested shares held by such participant on the date of such termination. Under certain of our award agreements, the Company also has the right (but not the obligation) to repurchase all or any portion of the fully paid award shares (as defined in the plans) held by such participant on the date of such termination. Assuming the termination is not for cause, the repurchase price for Class A common shares will be equal to the volume weighted average closing trading price of a Class A common share during the 60-day trading period preceding the date of notice of repurchase, and the purchase price of vested shares that have not yet been converted to Class A common shares will be the same, minus their conversion price.

Restricted Share Units

The Committee may grant restricted share units payable in cash or our common shares, conditioned upon continued service and/or the attainment of performance goals determined by the Committee. The terms and conditions of restricted share unit awards granted under the Share Incentive Plans (including any applicable performance goals) do not need to be the same with respect to each participant.

Item 11. Executive Compensation

Rights to Purchase Shares and Other Share-Based Awards

The Committee may grant rights to purchase shares and other awards settleable in, or based upon, common shares under each of the Share Incentive Plans. Each such award will be evidenced by an award agreement that specifies any applicable purchase or exercise price, the duration of the award, the number of shares to which the award pertains, any applicable vesting requirements and such additional limitations, terms and conditions as the Committee may determine.

Performance Awards Settleable in Cash

Under the 2016 Share Incentive Plan, the Committee may grant performance awards settleable in cash. Each such award will be evidenced by an award agreement that specifies any applicable performance measure and performance period, any applicable vesting requirements and such additional limitations, terms and conditions as the Committee may determine.

Award Limits

The awards that may be granted under the 2016 Share Incentive Plan are generally subject to the following limits. The maximum number of Class A common shares with respect to which share options may be granted during any fiscal year to any person is 3,500,000 shares. The maximum number of Class A common shares with respect to which awards denominated in shares and subject to performance measures may be granted during any fiscal year to any person is 3,500,000 shares. The maximum amount that may be earned by any person with respect to performance awards settleable in cash during any fiscal year is $15,000,000. These provisions are designed so that compensation resulting from such awards can qualify as tax deductible performance-based compensation under Section 162(m) of the Code, assuming other applicable regulatory requirements are satisfied.

Termination of Service

The impact of a termination of employment or service on an outstanding award granted under the Share Incentive Plans, if any, is set forth in the applicable award agreement.

Treatment of Outstanding Equity Awards following a Sale of the Company or a Change in Control

The outstanding award agreements under the 2009, 2012 and 2014 Share Incentive Plans provide that, in the event of a sale of the Company or a change in control (A) prior to a participant's termination of service or (B) within six months following the participant's termination of service by the Company or AAM without cause, by the participant for good reason (as defined therein) or as a result of the participant's death or disability (each, a "qualifying termination"), the participant's time-based vesting restricted shares will vest in full. For this purpose, a change in control means any event or series of events by which (1) the Apollo Group ceases to own, directly or indirectly, equity interests in the Company (equity interests) representing 40% or more on a fully-diluted basis of the aggregate ordinary voting power represented by the issued and outstanding equity interests of the Company, and (2) any "person" or "group" (as such terms are used in Sections 13(d) and 14(d) of the Exchange Act) becomes the "beneficial owner" (as defined in Rules 13d-3 and 13d-5 under the Exchange Act), directly or indirectly, of a greater percentage on a fully-diluted basis of the aggregate ordinary voting power represented by the issued and outstanding equity interests of the Company than such percentage owned by the Apollo Group.

Transferability

Unvested awards under the Share Incentive Plans generally are not transferable except by will or the laws of descent and distribution or as otherwise expressly permitted by the Committee including, if so permitted, pursuant to a transfer to the participant's family members or to a charitable organization, whether directly or indirectly or by means of a trust or partnership or otherwise. Certain vested awards may be pledged by the participant holding such award as security for loans or transferred to the Company to pay conversion prices or to satisfy tax withholding liabilities of such participants.

Amendment and Discontinuance

The Share Incentive Plans generally may be amended, altered, suspended, discontinued or terminated by our board of directors, but no amendment, alteration, suspension, discontinuation or termination may be made (1) if it would materially impair the rights of a participant (or his or her beneficiary) without the participant's (or beneficiary's) consent, except for any such amendment made to comply with applicable law, or (2) without the approval of our shareholders to the extent such approval is required by applicable law.

Federal Income Tax Consequences

The following discussion is intended only as a brief summary of the federal income tax rules that are generally relevant to nonqualified share options and restricted shares that may be granted under the Share Incentive Plans, based upon the U.S. federal tax laws currently in effect. The laws governing the tax aspects of awards are highly technical and such laws are subject to change. The discussion is general in nature and does not take into account a number of considerations which may apply in light of the circumstances of a particular participant under the Share Incentive Plans. The income tax consequences under applicable foreign, state or local tax laws may not be the same as under U.S. federal income tax laws.

Item 11. Executive Compensation

Share Options

Upon the grant of a share option, the award holder will not recognize any taxable income and we will not be entitled to a deduction. An award holder will recognize compensation taxable as ordinary income (and subject to income tax withholding with respect to an employee) upon exercise of a nonqualified share option equal to the excess of the fair market value of the shares purchased over their purchase price, and we will be entitled to a corresponding deduction. With respect to the exercise of an incentive share option, if an award holder holds the shares for one year from the date of exercise and two years from the date of grant, then the holder's profit, if any, made on the sale of the shares will be taxed as long-term capital gain, and we will not be entitled to a corresponding deduction, unless the holder does not meet the holding period requirements.

Share Awards

An award holder will recognize compensation taxable as ordinary income (and subject to income tax withholding with respect to an employee) at the time of grant of unrestricted shares in an amount equal to the excess of the fair market value of the shares at such time over the amount, if any, paid for such shares, and we will be entitled to a corresponding deduction, except to the extent the deduction limits of Section 162(m) of the Code apply.

Restricted Shares

A participant who receives any restricted shares may be permitted (but not required) to file an election under Section 83(b) of the Code (a "Section 83(b) Election") with respect to such shares. If the participant timely files the Section 83(b) Election, (a) the participant will recognize ordinary income on any such restricted shares as of the grant date equal to the excess of the fair market value of the shares (determined without regard to vesting conditions) over the amount paid for the shares, and (b) upon sale or disposition of any such restricted shares any additional gain will be treated as capital gains. (Note that if a participant files a Section 83(b) Election and the restricted shares ultimately are forfeited, the participant generally will not be entitled to a deduction for the income recognized in connection with the election.) If a participant does not file a Section 83(b) Election, at the time the substantial risk of forfeiture with respect to such restricted shares lapses, the participant will recognize ordinary income equal to the excess of the fair market value of the shares at such time over the amount paid for the shares. The amount of ordinary income recognized by making a Section 83(b) Election or upon the lapse of such restrictions is deductible by us as compensation expense, except to the extent the deduction limits of Section 162(m) of the Code apply. In addition, a participant receiving dividends with respect to restricted shares for which a Section 83(b) Election has not been made and prior to the time such restrictions lapse will recognize compensation taxable as ordinary income (and subject to income tax withholding with respect to an employee), rather than dividend income, in an amount equal to the dividends paid and we will be entitled to a corresponding deduction, except to the extent the deduction limits of Section 162(m) of the Code apply.

Restricted Share Units

A participant will not recognize compensation taxable as ordinary income at the time an RSU is granted and we will not be entitled to a tax deduction at that time. Upon settlement of RSUs, the participant will recognize compensation taxable as ordinary income (and subject to income tax withholding with respect to an employee) in an amount equal to the excess of the fair market value of any shares delivered over the amount, if any, paid for the shares plus any cash paid by us. We generally will be entitled to a business expense deduction in the same amount and at the same time as the participant recognizes ordinary income, except to the extent the deduction limits of Section 162(m) of the Code apply.

Performance Awards and Other Share-Based Awards

The taxation of performance awards and other share-based awards will depend on the specific terms of the award. Generally, the grant of performance awards and share-settled awards will have no federal income tax consequences for us or for the participant at the time of grant and the participant recognizes compensation taxable as ordinary income (and subject to income tax withholding with respect to an employee) at the time such awards are settled equal to excess of the fair market value of any unrestricted shares received over the amount, if any, paid for such shares plus any cash paid by us. Subject to the restrictions of Section 162(m) of the Code, we generally will be entitled to a business expense deduction in the same amount and at the same time as the participant recognizes ordinary income.

Section 162(m) of the Code

Section 162(m) of the Code generally limits to $1 million the amount that a publicly held corporation is allowed each year to deduct for the compensation paid to the corporation's NEOs. However, "qualified performance-based compensation" is not subject to the $1 million deduction limit. Additionally, provided certain conditions are satisfied, newly public companies may be exempt from Section 162(m) of the Code for a transition period of up to three years following the date of the IPO.

Item 11. Executive Compensation

To constitute qualified performance-based compensation, the following requirements must be satisfied: (1) the performance goals are determined by a committee consisting solely of two or more “outside directors,” (2) the material terms under which the compensation is to be paid, including the performance goals, are approved by the corporation’s stockholders, and (3) the committee certifies that the applicable performance goals are satisfied before payment of any qualified performance-based compensation is made. Certain compensation under the Share Incentive Plans, such as that payable with respect to options and stock appreciation rights, is not expected to be subject to the $1 million deduction limit, but other non-performance-based compensation payable under the Share Incentive Plan, such as share awards and other share-based awards may be subject to such limit in the future.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Principal Shareholders

The following table sets forth information as of March 1, 2017 regarding the beneficial ownership of our Class A common shares and our Class B common shares by (1) each person or group who is known by us to own beneficially more than 5% of our outstanding Class A common shares or our Class B common shares (including any securities convertible or exchangeable within 60 days into Class A common shares or Class B common shares, as applicable), (2) each of our NEOs, (3) each of our directors and (4) all of our current executive officers and directors as a group.

Beneficial ownership for the purposes of the following table is determined in accordance with the rules and regulations of the SEC. These rules generally provide that a person is the beneficial owner of securities if such person has or shares the power to vote or direct the voting thereof, or to dispose or direct the disposition thereof or has the right to acquire such powers within 60 days. Our Class B common shares are convertible into Class A common shares at any time at the option of the holder, with prior notice to the Company, on a one-for-one basis. Accordingly, for the purposes of this table each holder of Class B common shares is deemed to be the beneficial owner of an equal number of Class A common shares (in addition to any other Class A common shares beneficially owned by such holder), which is reflected in the table entitled “Amount and Nature of Beneficial Ownership” under the columns “Number of Shares” and “Percent” for the Class A common shares. In addition, the voting power of our shareholders may be restricted or adjusted as described in *Description of Share Capital-Common Shares-Voting Rights* in the prospectus filed on December 8, 2016 in connection with the IPO of the Company's Class A common shares (Prospectus). Additionally, in some cases, certain Class A common shares may be deemed non-voting. See *Voting Power* below for an illustration of the voting power of certain shareholders who beneficially own more than 5% of our Class A common shares and Class B common shares. Such illustration includes shareholders who may own non-voting Class A common shares who, to our knowledge, beneficially own more than 5% of our outstanding Class A common shares and Class B common shares.

To our knowledge, each person named in the table below has sole voting and investment power with respect to all of the Class A common shares, Class B common shares and Class M common shares convertible into Class A common shares within 60 days shown as beneficially owned by such person, except as otherwise set forth in the notes to the table and pursuant to applicable community property laws. Additionally, to our knowledge, certain of these shareholders also own equity interests in AAA, which holds a significant number of our Class B common shares. As of March 1, 2017, such equity interests of AAA do not entitle the holders thereof to exchange such interests for common shares of Athene, but AAA may at any time elect to distribute the common shares of Athene that it holds to such holders, whether by its liquidation or otherwise in accordance with its limited partnership agreement. Unless otherwise indicated in the table or footnotes below, the address for each officer and director listed in the table is c/o Athene Holding Ltd., Chesney House, First Floor, 96 Pitts Bay Road, Pembroke, HM08, Bermuda.

* Represents less than 1%.

(1) Class M common shares are subject to time- or performance-based vesting and once vested are convertible into Class A common shares. The number of Class M common shares included in the table represents the number of Class M common shares that vest as of April 30, 2017, the date that is 60 days after March 1, 2017. We assume for purposes of the table that Class M common shares convert into Class A common shares on a one-for-one basis.

(2) The percentage of beneficial ownership of our Class A common shares is based on 77,410,448 Class A common shares outstanding as of March 1, 2017.

(3) Consists of shares held of record by the following members of the Apollo Group (the "Apollo Holders"): 74,586,353 Class B common shares held of record by AAA Investor, 5,552,068 Class B common shares held of record by Stanhope Life, L.P., 2,487,485 Class B common shares held of record by Stanhope Life II, L.P., 5,546,327 Class B common shares held of record by Palmetto Athene Holdings (Cayman), L.P., 80,096 Class B common shares held of record by Apollo Palmetto Advisors, L.P., 4,542,924 Class B common shares held of record by AHL 2014 Investor, L.P., 1,437,944 Class B common shares held of record by AHL 2014 Investor II, L.P., 14,683,515 Class B common shares held of record by Apollo Principal Holdings III, L.P., 6,073 Class B common shares held of record by AAA Associates, L.P., 212,840 Class B common shares held of record by AAA Holdings, L.P., one Class B common share held of record by Athene Asset Management, L.P. and 157,894 Class B common shares that have been granted to employees and are held of record by Apollo Management Holdings, L.P. as custodian.

AAA Investments, L.P. is the general partner of AAA Investor. AAA Associates, L.P. is the general partner of AAA Investments, L.P. AAA MIP Limited is the general partner of AAA Associates, L.P. Apollo Alternative Assets, L.P. provides investment services to AAA Investor, AAA Investments, L.P., AAA Associates, L.P. and AAA MIP Limited. Apollo International Management, L.P. is the managing general partner of Apollo Alternative Assets, L.P. Apollo International Management GP, LLC is the general partner of Apollo International Management, L.P. AAA Holdings GP, Ltd. is the general partner of AAA Holdings, L.P.

Apollo Palmetto Athene Partnership, L.P. is the limited partner of Palmetto Athene Holdings (Cayman), L.P. Apollo Palmetto Management, LLC is the general partner of Palmetto Athene Holdings (Cayman), L.P. and Apollo Palmetto Athene Partnership, L.P. and as such has the right to control the disposition of the Athene common shares held by Palmetto Athene Holdings (Cayman), L.P. Apollo Management Holdings GP, LLC is the general partner of Apollo Management Holdings, L.P.

Stanhope Life Advisors, L.P. is the general partner of each of Stanhope Life, L.P. and Stanhope Life II, L.P. Apollo Administration GP Ltd. is the general partner of Stanhope Life Advisors, L.P. AHL 2014 Investor GP, Ltd. is the general partner of each of AHL 2014 Investor, L.P. and AHL 2014 Investor II, L.P. Apollo Principal Holdings III, L.P. is the sole shareholder of each of Apollo Administration GP Ltd. and AHL 2014 Investor GP, Ltd. Apollo Principal Holdings III GP, Ltd. is the general partner of Apollo Principal Holdings III L.P.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Leon Black, Joshua Harris and Marc Rowan are executive officers and the managers or directors of Apollo Management Holdings GP, LLC, Apollo Principal Holdings III GP, Ltd. and Apollo Principal Holdings IV GP, Ltd. and as such may be deemed to have voting and dispositive control of the shares of Athene common stock that are held by the Apollo Holders.

Certain affiliates of the Apollo Group (Plan Participants) intend to enter into a trading plan pursuant to Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (Rule 10b5-1 Plan) to enable them to sell our Class A common shares (Plan Shares) during periods to be determined in the future (Plan Period). The Plan Shares that may be sold will consist of our Class A common shares earned as carried interest during the Plan Period by the Plan Participants upon any waiver by us and Goldman, Sachs & Co., in our and their sole discretion, of certain lock-up restrictions with respect to our Class A common shares held by the Plan Participants.

(4) The address of each of Stanhope Life, L.P., Stanhope Life II, L.P., Stanhope Life Advisors, L.P., Apollo Administration GP Ltd., AHL 2014 Investor, L.P., AHL 2014 Investor II, L.P., AHL 2014 Investor GP, Ltd., Apollo Principal Holdings III, L.P., Apollo Principal Holdings III GP, Ltd., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings IV GP, Ltd., AAM GP Ltd., Apollo Life Asset Ltd. and Palmetto Athene Holdings (Cayman), L.P. is c/o Intertrust Corporate Services (Cayman) Limited, 190 Elgin Street, George Town, KY1-9005 Grand Cayman, Cayman Islands. The address of AAA Investments, L.P., Apollo Alternative Assets, L.P., Apollo Palmetto Athene Partnership, L.P., and Apollo Palmetto Management, LLC is One Manhattanville Road, Suite 201, Purchase, New York 10577. The address of AAA Associates, L.P., AAA MIP Limited, AAA Holdings, L.P. and AAA Holdings GP Limited is Trafalgar Court, Les Banques, GY1 3QL, St. Peter Port, Guernsey, Channel Islands. The address of each of Athene Asset Management, L.P., Apollo Palmetto Advisors, L.P., Apollo Palmetto Athene Management, LLC, AAA Guarantor - Athene, L.P., Apollo International Management, L.P., Apollo International Management GP, LLC, Apollo Capital Management, L.P., Apollo Capital Management GP, LLC, Apollo Management Holdings, L.P. and Apollo Management Holdings, GP, LLC the Apollo Holders, Apollo and Apollo's investment manager and advisors, and Messrs. Black, Harris and Rowan is 9 West 57th Street, 43rd Floor, New York, New York 10019.

(5) The number of shares listed for Cambridge Global Asset Management is based on Amendment No. 1 to Schedule 13G filed by Cambridge Global Asset Management on January 31, 2017.

(6) Consists of (1) 904,168 Class A common shares held of record by the James and Leslie Belardi Family Trust, (2) 1,750 Class A common shares held of record by the Belardi Family Irrevocable Trust, (3) options to acquire 42,881 Class A common shares vested as of April 30, 2017 and (4) 4,087,166 Class M common shares vested as of April 30, 2017 which are convertible into Class A common shares. Excludes 15,487 restricted Class A common shares, 58,911 Class A restricted stock units, options to acquire 85,764 Class A common shares and 100,000 Class M common shares which are unvested as of April 30, 2017. Mr. Belardi disclaims beneficial ownership of all common shares of Athene held by the Belardi Family Irrevocable Trust and the members of the Apollo Group.

(7) Consists of (1) 364,123 Class A common shares, (2) options to acquire 21,441 Class A common shares vested as of April 30, 2017 and (3) 166,667 Class M common shares vested as of April 30, 2017 which are convertible into Class A common shares. Excludes 1,598 restricted Class A common shares, 29,456 Class A restricted stock units, options to acquire 42,882 Class A common shares and 2,333,333 Class M common shares which are unvested as of April 30, 2017.

(8) Consists of (1) 577,162 Class A common shares held of record by Grant Kvalheim April 2014 GRAT, (2) 37,150 Class A common shares held of record by Grant Kvalheim 2009 Children's GST Exempt Trust-DK, (3) 37,150 Class A common shares held of record by Grant Kvalheim 2009 Children's GST Exempt Trust-LK, (4) 37,150 Class A common shares held of record by Grant Kvalheim 2009 Children's GST Exempt Trust-MK, (5) 1,431,932 Class A common shares held of record by Grant Kvalheim individually, (6) options to acquire 12,150 Class A common shares vested as of April 30, 2017 and (7) 15,268 Class M common shares vested as of April 30, 2017 which are convertible into Class A common shares. Excludes 23,501 restricted Class A common shares, 16,693 Class A restricted stock units, options to acquire 24,300 Class A common shares and 454,667 Class M common shares which are unvested as of April 30, 2017.

(9) Consists of (1) 66,123 Class A common shares, (2) options to acquire 10,721 Class A common shares vested as of April 30, 2017 and (3) 11,596 Class M common shares vested as of April 30, 2017 which are convertible into Class A common shares. Excludes 14,728 Class A restricted stock units, options to acquire 21,441 Class A common shares and 242,667 Class M common shares which are unvested as of April 30, 2017.

(10) Consists of (1) 280,056 Class A common shares held of record by Mr. Gillis individually, (2) 20,000 Class A common shares held of record by an individual retirement account in the name of Mr. Gillis, (3) options to acquire 8,577 Class A common shares vested as of April 30, 2017 and (4) 1,046,119 Class M common shares vested as of April 30, 2017 which are convertible into Class A common shares. Excludes 2,681 restricted Class A common shares, 11,783 Class A restricted stock units, options to acquire 17,152 Class A common shares and 192,565 Class M common shares which are unvested as of April 30, 2017.

(11) Consists of Class B common shares held by entities directly or indirectly controlled by Mr. Rowan. Mr. Rowan disclaims beneficial ownership of all Class A common shares and Class B common shares owned by the Apollo Holders or any entities that he directly or indirectly controls, or that may be beneficially owned by any entities directly or indirectly controlled by Mr. Rowan, the Apollo Holders or any other members of the Apollo Group, AAA or any entities directly or indirectly controlled by Mr. Rowan. Mr. Rowan owns interests in AAA, which is a limited partner of AAA Investments, L.P. Mr. Rowan does not have the power to vote or dispose of any Athene common shares that may from time to time be held by AAA and therefore is not deemed to beneficially own such shares. Assuming all of such interests were exchanged on an equivalent basis for Class B common shares of Athene as of March 1, 2017, Mr. Rowan would own 1,579,208 Class B common shares.

(12) Excludes 19,369 restricted Class A common shares which are unvested as of April 30, 2017.

(13) Consists of (1) 1,961,539 Class A common shares held of record by the Siddiqui Family 2014 GST Trust, which have been pledged as security to a financial institution, and (2) 1,001 Class A common shares held of record by Mr. Siddiqui individually. Mr. Siddiqui disclaims beneficial ownership of all Class A common shares held of record by the Siddiqui Family 2014 GST Trust and all common shares of Athene held of record or beneficially owned by the Apollo Holders or any other member of the Apollo Group. In addition to his ownership of our Class A common shares, Mr. Siddiqui also owns interests in AAA, which is a limited partner of AAA Investments, L.P. Mr. Siddiqui does not have the power to vote or dispose of any Athene common shares that may be held from time to time by AAA and therefore is not deemed to beneficially own such shares. Assuming all of such interests were exchanged on an equivalent basis for Class B common shares of Athene, and such shares were in turn exchanged for Class A common shares on a one-for-one basis, in each case, as of March 1, 2017, Mr. Siddiqui would own an additional 6,938 Class A common shares and, together with the Class A common shares that he is deemed to beneficially own shown in the table above, he would own a total of 1,969,478 of our Class A common shares.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

(14) Mr. Lohr disclaims beneficial ownership of all common shares of Athene held of record or beneficially owned by the Apollo Holders or any other member of the Apollo Group. In addition to his ownership of our Class A common shares, Mr. Lohr also owns interests in AAA, which is a limited partner of AAA Investments, L.P. Mr. Lohr does not have the power to vote or dispose of any Athene common shares that may be held from time to time by AAA and therefore is not deemed to beneficially own such shares. Assuming all of such interests were exchanged on an equivalent basis for Class B common shares of Athene, and such shares were in turn exchanged for Class A common shares on a one-for-one basis, in each case, as of March 1, 2017, Mr. Lohr would own an additional 526,415 Class A common shares and, together with the Class A common shares that he is deemed to beneficially own shown in the table above, he would own a total of 1,705,990 of our Class A common shares. 1,103,589 Class A common shares owned by Mr. Lohr have been pledged as security to a financial institution.

(15) Mr. Michelini disclaims beneficial ownership of all common shares of Athene held of record or beneficially owned by the Apollo Holders or any other member of the Apollo Group. Mr. Michelini owns interests in AAA, which is a limited partner of AAA Investments, L.P. Mr. Michelini does not have the power to vote or dispose of any Athene common shares that may be held from time to time by AAA and therefore is not deemed to beneficially own such shares. Assuming all of such interests were exchanged on an equivalent basis for Class B common shares of Athene and such shares were in turn exchanged for Class A common shares on a one-for-one basis, in each case, as of March 1, 2017, Mr. Michelini would own an additional 3,071 Class A common shares and, together with the Class A common shares that he is deemed to beneficially own shown in the table above, he would own a total of 128,504 of our Class A common shares.

(16) Consists of (1) 37,147 Class A common shares held of record by PENSCO Trust Co. Custodian FBO Robert L. Borden IRA and (2) 4,491 Class A common shares held of record by Mr. Borden individually. Excludes 19,162 restricted Class A common shares which are unvested as of April 30, 2017.

(17) Excludes 20,021 restricted Class A common shares which are unvested as of April 30, 2017.

(18) Excludes 19,551 restricted Class A common shares which are unvested as of April 30, 2017.

(19) Excludes 19,290 restricted Class A common shares which are unvested as of April 30, 2017.

(20) Excludes 16,087 restricted Class A common shares which are unvested as of April 30, 2017.

(21) Excludes 16,057 restricted Class A common shares which are unvested as of April 30, 2017.

(22) Excludes 16,087 restricted Class A common shares which are unvested as of April 30, 2017.

(23) Totals include restricted common shares and options which have vested or will vest as of April 30, 2017.

Voting Power

The following table sets forth the voting power as of March 1, 2017 of each person or group who is known by us to own beneficially more than 5% in voting power of our outstanding Class A common shares or Class B common shares (including any securities convertible or exchangeable within 60 days into Class A common shares or Class B common shares, as applicable). Apollo beneficially owns or exercises voting control over the Class B common shares.

The aggregate and respective voting power of our Class A common shares and Class B common shares is determined in accordance with our bye-laws. The Class A common shares collectively represent 55% of the total voting power of our common shares and the Class B common shares represent, in aggregate, 45% of the total voting power of our common shares, each subject to certain adjustments, as described above.

The voting rights exercisable by Class A shareholders other than Apollo are limited so that Control Groups are deemed not to hold more than 9.9% of the total voting power conferred by our shares. The percentage reduction of votes that occurs by operation of the foregoing limitation will generally be reallocated proportionately among other Class A common shareholders who are not members of these groups so long as such reallocation does not cause a Control Group to hold more than 9.9% of the total voting power of our shares. In addition, certain Class A common shares may be deemed non-voting when owned by a shareholder if such shareholder (or certain of its affiliates) (1) owns, directly or indirectly, Class B common shares, (2) holds an equity interest in Apollo or AAA or (3) is a member of the Apollo Group at which time any member of the Apollo Group holds Class B common shares, subject to certain exceptions. As such, certain of our Class A common shareholders hold voting shares, but such shares are non-voting when being held by such holder due to these restrictions. If such holder sold any such shares to another holder that would not be subject to these restrictions, such Class A common shares would be voting shares.

Pursuant to our bye-laws, the total voting power of Class A common shares held by members of our management and employees of the Apollo Group that are shareholders is limited to 3% of the total voting power of our common shares.

The table below shows the voting power of certain shareholders who, to our knowledge, beneficially own more than 5% in voting power of our outstanding Class A common shares and Class B common shares as of March 1, 2017.

	Number of Class A Common Shares Owned	Number of Class B Common Shares Owned	Total Number of Shares Owned	Percent of Total Outstanding Class A Common Shares and Class B Common Shares Owned	Total Voting Power of Class A Common Shares and Class B Common Shares Taken Together[1]
Apollo Holders	-	109,293,521	109,293,521	57.8%	45.0%

[1] The Class B common shares represent, in aggregate, 45% of the total voting power of our common shares, subject to certain adjustments.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Share Incentive Plan Information

The table below shows information regarding awards outstanding and shares of common stock available for issuance as of December 31, 2016 under the Share Incentive Plans:

Plan Category	Number of Securities to Be Issued Upon Exercise of Outstanding Options, Warrants and Rights[1]	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights[2]	Number of Securities Remaining Available for Future Issuance Under Share Incentive Plans
Share Incentive Plans Approved by Security Holders	-	$ -	3,495,771
Share Incentive Plans Not Approved by Security Holders	12,225,286	$ 19.97	-
Total	12,225,286	$ 19.97	3,495,771

[1] *Includes options, time-based RSUs, performance-based RSUs and Class M common shares. Class M common shares, once vested, are convertible into Class A shares subject to payment of the conversion price. Performance-based RSUs are included at their target value. Class M common shares are included based on the assumption that 100% of such shares vest.*

[2] *Includes options, Class M common shares and the RSUs issued in conjunction with the Class M-4 common shares. Does not include other time-based RSUs or performance-based RSUs, as they do not have exercise prices.*

Item 13. Certain Relationships and Related Transactions, and Director Independence

The following is a description of certain relationships and transactions that have existed or that we have entered into with our directors, executive officers, or shareholders who are known to us to beneficially own more than five percent of our voting Class A common shares or Class B common shares and their immediate family members as well as certain other transactions.

Relationships and Related Party Transactions with Apollo or its Affiliates

We have a strategic relationship with Apollo. Apollo's indirect subsidiary, AAM, serves as our investment manager. In addition to being our co-founder, Apollo assists us in identifying and capitalizing on acquisition opportunities that have been critical to our ability to significantly grow our business. Members of the Apollo Group are significant owners of our common shares and control 45% of the aggregate voting power of our equity securities. Our Chief Executive Officer is also an employee of, and receives substantial remuneration from acting as Chief Executive Officer of, AAM and owns a 5% profits interest in AAM. Additionally, employees of Apollo and its affiliates serve on our board of directors. We expect our strategic relationship with Apollo to continue for the foreseeable future. A number of our directors are also employees of Apollo or its affiliates.

A description of certain relationships we have with Apollo and its affiliates and transactions that have existed or that we have entered into with Apollo and its affiliates are described below.

The following table summarizes the fees we have incurred, directly and indirectly, from Apollo and its affiliates for the periods presented below:

[1] *Exclusive of amounts we received pursuant to the AAM long-term incentive plan. See Equity Transactions below.*

[2] *Includes total management, carried interest (including unrealized but accrued carried interest fees) and other fees, including those we hold as equity method investments.*

[3] *Advisory Services Agreement entered into on August 23, 2016. Prior to the agreement, we reimbursed Apollo or its affiliates for certain out-of-pocket expenses they incurred in connection with rending services to us.*

Investment Management Relationships

Under our IMAs with AAM, except with respect to our German operations, substantially all of our invested assets are managed by AAM. AAM provides a full array of asset and portfolio management services to us. AAM was founded as a partnership between James R. Belardi and Apollo to provide Athene with a dedicated investment asset manager capable of creating and executing a bespoke investment strategy that is optimal for Athene's dynamic investment needs. AAM has built a dedicated team of more than 100 investment and operations professionals, senior members of which have deep sector experience in the asset management industry and have overseen our investment portfolio since our founding. As a subsidiary of Apollo, AAM is fully integrated into the Apollo investment platform and provides Athene with access to Apollo's investment expertise and fully-built infrastructure without the burden of incurring the development and maintenance costs of building an in-house investment asset manager with the capabilities of Apollo/AAM.

As of December 31, 2016, AAM's investment professionals directly invested approximately 81% of the North America Accounts in a number of asset classes, including investment grade corporate credit and RMBS. For the remainder of the invested assets in the North America Accounts, which is comprised of assets which often require additional sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. In this regard, AAM is able to leverage its relationship with Apollo in a sub-advisory capacity, pursuant to which AAM has mandated Apollo to invest in asset classes in which Apollo has investment expertise and sourcing capabilities, such as high yield credit, CMLs, CLOs, CMBS and certain ABS. All sub-advised assets are ultimately overseen by AAM to ensure they are appropriate for our business and consistent with our investment strategy. Through our relationship with Apollo, and having extensive knowledge

of our corporate structure and business targets, AAM often creates or sources unique investment opportunities, such as our investments in MidCap and AmeriHome, described under *MidCap* and *AmeriHome* below.

We have historically relied on AAM to efficiently reinvest large blocks of invested assets we have acquired. AAM's investment professionals have developed an intimate knowledge of our liability profile, which is long-dated and predominantly surrender charge protected. This knowledge serves as the foundation of our asset management strategy by enabling us to take advantage of our generally illiquid liability profile and identify asset opportunities with an emphasis on earning incremental yield by taking liquidity risk and complexity risk, rather than assuming solely credit risk. Through AAM and Apollo, we are able to source, value and invest in these high quality assets to drive and target greater investment returns. Additionally, AAM has grown as we have grown. In response to our rapid asset growth and other significant changes in our requirements, such as our strategy of pursuing ongoing retail product sales, AAM has added resources to directly manage our assets and has significantly increased the number and capabilities of its staff to service our growing investment portfolio.

In connection with the acquisition of DLD, our internal German asset management company, ADKG, entered into an investment advisory agreement with AAME pursuant to which AAME provides advisory services for a significant portion of our German investment portfolio.

As discussed in greater detail below, for services related to the investment assets of our U.S. and Bermuda companies, AAM earns an investment management fee of 0.40% per annum on all assets in the North America Accounts (subject to certain exceptions), and other affiliates of Apollo earn additional fees for sub-advisory services rendered with respect to certain invested assets within the North America Accounts. Affiliates of Apollo also earn additional fees paid by funds or other collective investment vehicles in which we are invested for management and other services provided by such affiliates of Apollo to such funds and investment vehicles. For the services related to our investment assets in Germany, AAME earns advisory fees of 0.10% on assets advised by AAME and affiliates of AAME receive an advisory fee of 0.35% per year on certain German special investment funds (the difference in rates earned by AAME and AAM is due to differences in the investment characteristics, as described in greater detail below). We believe that our relationships with AAM, Apollo and other Apollo affiliates have contributed to and will continue to contribute to our strong financial performance. For the years ended December 31, 2016, 2015 and 2014, we generated net investment income of $2.9 billion, $2.5 billion and $2.3 billion, respectively. Net of the aforementioned fees, we achieved consolidated net investment earned rates of 4.35%, 4.24% and 4.29% for the years ended December 31, 2016, 2015 and 2014, respectively.

Although the investment management fee that AAM charges us is generally 0.40% per annum on all assets in the North America Accounts, in order to support continued profitable growth for Athene, AAM discounts certain fees due by Athene. For the total dollar amount of all liabilities sourced through our organic distribution channels during 2016 in excess of $5.1 billion (subject to certain exceptions, Excess Liabilities), AAM agreed to discount fees as follows:

- During 2016, a discount of 0.40% per annum multiplied by such Excess Liabilities. The 2016 discount relating to such Excess Liabilities was intended to reasonably approximate a full discount of the AAM fee on the assets relating to such Excess Liabilities during the remainder of the 2016 calendar year.
- For 2017, a discount of 0.20% per annum multiplied by such Excess Liabilities, resulting in a reasonable approximation of a 0.20% fee on the assets relating to such Excess Liabilities during the 2017 calendar year.
- For 2018 and thereafter, a discount of 0.075% per annum, resulting in a reasonable approximation of a 0.325% fee on the assets relating to such Excess Liabilities during the 2018 calendar year and thereafter.

Excess Liabilities are determined based on our actuarial projections at the time that such Excess Liabilities are written and will amortize on a quarterly basis according to our projections for purposes of determining the discount. As of December 31, 2016, our organic channels have provided deposits of $8.8 billion.

We currently hold in excess of $1.5 billion of excess capital, which we view as strategic capital available to reinvest into organic and inorganic growth opportunities. We are keenly aware, however, of the need to grow prudently while maintaining our underwriting discipline. In the context of supporting prudent growth in today's low-rate environment, we and Apollo have agreed on a new fee framework that results in a lower level of fees for us as we continue to grow our business, while at the same time we believe that this fee structure incentivizes both AAM and Apollo to make long-term investments in their capabilities and infrastructure to support our growth.

More specifically, AAM and AHL have agreed to enter into a revised fee agreement, which will amend and restate in its entirety the Fourth Amended and Restated Fee Agreement, dated August 31, 2016, to be effective and executed upon the approval by shareholders at the 2017 Annual General Meeting of the bye-law amendment relating to termination of the IMAs referred to below in *Termination of Investment Management or Advisory Agreements with AAM and AAME*. This revised fee agreement governs the payment by AHL to AAM of investment management fees incurred by AHL and its subsidiaries. In order to facilitate our continued profitable growth the fee agreement was revised to provide for, among other things, a reduced fee of 0.30% per year on all assets in the North America Accounts in excess of $65,846 million. AAM's fee on the first $65,846 million of assets in the North America Accounts remains 0.40% per year, subject to certain discounts and exceptions. These fee changes were approved by our conflicts committee and the proposed bye-laws amendment was approved by all of our disinterested directors, with the changes to the bye-laws being conditional on approval by our shareholders. Upon shareholder approval, this new investment management fee structure will be retroactive to January 1, 2017 and will continue until otherwise amended.

Messrs. Rowan, Lohr, Michelini and Siddiqui, members of our board of directors, also serve as directors of AAM. Messrs. Rowan and Lohr are also directors of AAME. James R. Belardi, our Chief Executive Officer and a member of our board of directors, is the Chief Executive Officer,

Chief Investment Officer and a director of AAM. Mr. Belardi has owned equity units in AAM since its founding and currently owns a profits interest equivalent to approximately 5% of the equity of AAM.

IMAs-U.S. and Bermuda

As of December 31, 2016, AAM managed approximately $65.8 billion of assets in the North America Accounts. These assets are invested primarily in a diversified portfolio of fixed maturity and other securities. Approximately $53.4 billion of these assets, the majority of which are investment grade fixed income assets, are in accounts directly invested by AAM, while the remainder of our investment assets in the United States and Bermuda are primarily managed by AAM and Apollo through a sub-advisory arrangement between AAM and Apollo. As compensation for the enhanced and bespoke investment management services that AAM provides to us, under IMAs between AAM and us, AAM receives a gross fee of 0.40% per annum on all assets in the North America Accounts, with certain limited exceptions. The gross fee of 0.40% per annum is paid in part by the North America Accounts and in part by AHL to the extent that any North America Account's direct rate is less than 0.40% per annum.

Investment Advisory Agreement-Germany

As of December 31, 2016, AAME advised with respect to approximately $4.6 billion of assets owned by our German Group Companies. As compensation for the investment advisory services rendered to ADKG under the investment advisory agreement between AAME and ADKG in relation to the assets ADKG manages for our German Group Companies, AAME receives a gross fee of 0.10% per annum on the assets with respect to which it advises, which includes all assets of our German Group Companies except operating cash and certain other excluded asset classes. As discussed in *Item 1. Business-Investment Management*, the investment characteristics of our assets held by ADKG and our other Germany Group Companies differ substantially from the characteristics of our U.S. and Bermuda subsidiaries. Given these differences in the overall business model and lower yielding, more homogeneous investment portfolio and resulting less diverse requisite expertise, our asset management fees in Germany are significantly lower than those paid by us with respect to the North America Accounts.

Termination of Investment Management or Advisory Agreements with AAM and AAME

The investment management or advisory agreements between us and AAM or AAME have no stated term and may be terminated by either AAM or AAME, or AHL or the relevant subsidiary, as applicable, upon notice at any time. However, our bye-laws provide that neither AHL nor its subsidiaries will exercise their termination rights under such agreements, except that any such agreement between AHL or any of its subsidiaries and AAM or AAME may only be terminated on an IMA Termination Date, and any termination on an IMA Termination Date without cause requires (1) the approval of AHL's board of directors and at least 50% of the total issued shares of AHL that are entitled to vote (giving effect to the voting allocation provisions set forth in AHL's bye-laws) and (2) six months' prior written notice to AAM or AAME of such termination. Notwithstanding the foregoing, any such IMA may be terminated by AHL's board of directors for cause (as defined in AHL's bye-laws) which includes (a) material violations of law relating to AAM's or AAME's advisory business, (b) AAM's or AAME's gross negligence, willful misconduct or reckless disregard of its obligations under the relevant agreement, (c) a determination by the board of directors, in its sole discretion and acting in good faith, of unsatisfactory long-term performance of AAM or AAME, or (d) a determination by the board of directors, in its sole discretion and acting in good faith, that the fees being charged by AAM or AAME are unfair and excessive compared to a comparable asset manager (provided, that in the case of the immediately preceding clauses (c) and (d), the board of directors must deliver notice of such determination to AAM or AAME, as applicable, and AAM or AAME, as applicable, will have 30 days after receipt of such notice to address the board of directors' concerns and, provided further that in the case of the immediately preceding clause (d), AAM or AAME has the right to lower its fees to match the fees of such comparable asset manager). In addition, the boards of directors of AHL's subsidiaries may terminate an investment management or advisory agreement with AAM or AAME with regards to the applicable subsidiary if such subsidiary's board of directors determines that such termination is required in the exercise of its fiduciary duties. AAM or AAME may terminate such agreements at any time, which may adversely affect our investment results. See *Item 1A. Risk Factors-Risks Relating to Our Investment Manager*.

A proposed amendment to our bye-laws that has been approved by our board of directors and is subject to approval by our shareholders at our 2017 Annual General Meeting provides that we may not, and will cause our subsidiaries not to, terminate any IMA or advisory agreement among us or any of our subsidiaries, on the one hand, and AAM or AAME, on the other hand, before an IMA Termination Election Date and any termination on an IMA Termination Election Date requires (i) the approval of two-thirds of our Independent Directors (as defined below) and (ii) written notice to AAM or AAME of such termination at least 30 days' prior to an IMA Termination Election Date. If our Independent Directors make any such election to terminate and notice of such termination is delivered, the termination will be effective on the IMA Termination Effective Date. Notwithstanding the foregoing, under such proposed amendment, (A) our Independent Directors may only elect to terminate an IMA or advisory agreement on an IMA Termination Election Date if two-thirds of our Independent Directors determine, in their sole discretion and acting in good faith, that either (i) there has been unsatisfactory long-term performance materially detrimental to us by AAM or AAME, or (ii) the fees being charged by AAM or AAME are unfair and excessive compared to a comparable asset manager (provided, that in either case such Independent Directors must deliver notice of any such determination to AAM or AAME, as applicable, and AAM or AAME, as applicable, will have until the applicable IMA Termination Effective Date to address such concerns, and provided, further, that in the case of such a determination that the fees being charged by AAM or AAME are unfair and excessive, AAM or AAME, as applicable, has the right to lower its fees to match the fees of such comparable asset manager) and (B) upon the determination by two-thirds of our Independent Directors, we or our subsidiaries may also terminate an IMA or advisory agreement with AAM or AAME as a result of either (i) a material violation of law relating to AAM's or AAME's advisory business, or (ii) AAM's or AAME's gross negligence, willful misconduct or reckless disregard of AAM's or AAME's obligations under the relevant agreement, and in either case the delivery of at least 30 days' prior written notice to AAM or AAME of such termination and such termination will be effective at the end of such 30-day period (the events described in the foregoing clauses

(A) and (B) are referred to in more detail in our bye-laws as “AHL Cause”). For purposes of these provisions of the bye-laws (as amended pursuant to such proposed amendment), an “Independent Director” cannot be (x) an officer or employee of ours or any of our subsidiaries or (y) an officer or employee of (1) any member of the Apollo Group described in clauses (i) through (iv) of the definition of “Apollo Group” as set forth in our bye-laws or (2) AGM or any of its subsidiaries (excluding any subsidiary that constitutes any portfolio company (or investment) of (A) an investment fund or other investment vehicle whose general partner, managing member or similar governing person is owned, directly or indirectly, by AGM or by one or more of its subsidiaries or (B) a managed account agreement (or similar arrangement) whereby AGM or one or more of its subsidiaries serves as general partner, managing member or in a similar governing position).

Apollo Master Sub-Advisory Agreement (MSAA) and Apollo Fund Investments

AAM and certain affiliates of Apollo entered into MSAAs for the benefit of our insurance subsidiaries whereby such Apollo affiliates would sub-advise AAM with respect to a portion of the invested assets held in the North America Accounts. Sub-advisory mandates with Apollo generally relate to certain asset classes where Apollo managers have investment expertise and for which AAM has determined that it is more appropriate to sub-advise rather than build out in-house capabilities to invest in these assets. Sub-advisory fees relating to the MSAA and any other sub-advisory arrangement are recharged by AAM to the North America Accounts and are in addition to the gross fee of 0.40% per annum paid to AAM under the IMAs. Currently, the MSAA, as amended, covers services rendered by Apollo-affiliated sub-advisors relating to the following asset classes, among others: bank loans, high yield debt, CMLs, emerging market debt, convertible securities, mortgage- and asset-backed securities (including CLOs), oil and gas royalties and insurance-linked securities. Under the MSAA, with certain limited exceptions, Apollo earns 0.40% per annum on all assets sub-advised by Apollo up to $10 billion and 0.35% per annum on all assets sub-advised by Apollo in excess of $10 billion. In certain instances, Apollo earns an incentive fee. As of December 31, 2016, 2015 and 2014, Apollo affiliates directly sub-advised AAM with respect to approximately $12.5 billion, $11.8 billion and $9.8 billion, respectively, constituting approximately 19%, 20% and 16%, respectively, of the North America Accounts.

In addition to invested assets sub-advised by Apollo, from time to time, AAM also invests our assets in investment funds or other collective investment vehicles whose general partner, managing member, investment manager or collateral manager is owned, directly or indirectly, by Apollo or by one or more of Apollo’s subsidiaries (Apollo fund investments), and which comprised 70% of our alternative investment portfolio as of December 31, 2016. AAM’s alternative investment strategy is inherently opportunistic and subject to concentration limits on specific risks. We opportunistically target allocating 5-10% of the assets in the North America Accounts to alternative investments. Individual alternative investments are selected based on the investment’s risk-reward profile, incremental effect on diversification and potential for attractive returns due to sector and/or market dislocations. There is a preference for alternative investments that have the following characteristics, among others: (1) investments that constitute a direct investment or an investment in a fund with a high degree of co-investment; (2) investments with debt-like characteristics (for example, a stipulated maturity and par value), or alternatively, investments with reduced volatility when compared to pure equity; and (3) investments that have less downside risk. As of December 31, 2016, 2015 and 2014, 3.5%, 3.4% and 3.7%, respectively, of our assets in the North America Accounts were invested in Apollo fund investments. Fees related to such invested assets varied from 0% per annum to 1.75% per annum with respect to management fees and 0% to 20% of profits for carried interest, subject in many cases to preferred return hurdles. See *Item 1. Business-Investment Management*.

AAM and Apollo have agreed to amend the MSAAs to be effective upon approval of the bye-law amendment relating to the termination of the IMAs by shareholders at the 2017 Annual General Meeting, whereby, with certain limited exceptions, Apollo will earn 0.40% per annum on all assets sub-advised by Apollo up to $10 billion, 0.35% per annum on all assets sub-advised by Apollo in excess of $10 billion but less than $12.70 billion, 0.40% per annum on all assets sub-advised by Apollo in excess of $12.70 billion but less than $16 billion, and 0.35% per annum on all assets sub-advised by Apollo in excess of $16 billion. Upon shareholder approval of the bye-law amendment, this new fee arrangement will be retroactive to January 1, 2017 and will continue until otherwise amended.

As of December 31, 2016, our Apollo sub-advised investments and Apollo fund investments consisted of the following:

	December 31, 2016	
(In millions, except for percentages)	Amount	% of Total
Apollo sub-advised investments		
Fixed maturity securities, available for sale		
State, municipal, and political subdivisions	$ 5	-%

Private equity - Other	118	0.8%
A-A Mortgage	417	2.8%
Other private equity	41	0.3%
Subtotal	2,276	15.4%
Total	$ 14,754	100.0%

As of December 31, 2016, 2015 and 2014, 3.9%, 4.1% and 2.8%, respectively, of our total investments, including related parties and consolidated VIEs, are comprised of securities, including investment funds, in which Apollo, or an Apollo affiliate, has significant influence or control over the issuer of a security or the sponsor of the investment fund. The following table summarizes our cash flow activity related to these investments for the periods presented below:

	Years ended December 31,		
(In millions)	2016	2015	2014
Sales, maturities, and repayments	$ 482	$ 610	$ 2,159
Purchases	$ (601)	$ (728)	$ (1,846)

For additional information regarding these investments, refer to our consolidated financial statements.

Certain members of our board of directors may directly receive carried interest or may receive a portion of the carried interest that Apollo receives from fund investments in which Athene is invested. Certain directors may invest in fund investments in which we have invested. Additionally, Mr. Belardi and Mr. Kvalheim also have co-investment interests in certain of these fund investments.

Dr. Puffer serves on the board of directors of Athene Lebensversicherung AG, a subsidiary of our German entity. Dr. Puffer received compensation in 2016 and 2015 for serving as a director of such subsidiary in the amounts of EUR 25,000 and EUR 6,250, respectively.

Third Party Sub-Advisory Agreements

In the limited instances in which AAM desires to invest in asset classes for which neither AAM nor Apollo possesses the investment expertise or sourcing abilities required to manage the assets, or in instances in which AAM makes the determination that it is more effective or efficient to do so, AAM mandates third-party sub-advisors to invest in such asset classes, and we reimburse AAM for fees paid to such sub-advisors.

MidCap

We hold a significant investment in MidCap through CoInvest VII, a consolidated investment fund managed by an affiliate of Apollo. Additionally, we have made loans directly to MidCap Financial to which subsidiaries of MidCap succeeded as borrower. When we originally invested in MidCap Financial in November 2013, MidCap Financial was a specialty finance company which primarily originated lending opportunities in the healthcare sector. With the assistance of Apollo, MidCap Financial entered new lending markets, raised substantial equity capital and restructured as MidCap in January 2015. MidCap represents a unique investment in an origination platform made available to us through our relationship with Apollo and, from time to time, provides us with access to assets for our investment portfolio.

In January 2015, CoInvest VII contributed its primary investment, MidCap Financial, to a newly formed entity, MidCap, in exchange for subordinated notes issued by MidCap and shares in MidCap's parent company, MidCap Holdings. Concurrent with this restructuring, CoInvest VII distributed to its general partner, an affiliate of Apollo, $30 million of the MidCap notes in satisfaction of the carried interest that had been earned by the general partner under the previous MidCap Financial structure through the date of the restructuring. Additionally, unrelated investors made cash contributions to MidCap of $1.0 billion through December 31, 2015. As of December 31, 2016, CoInvest VII owned 28% of the outstanding economic interests of MidCap.

In connection with the acquisition of MidCap Financial by CoInvest VII in 2013, we entered into a subordinated debt facility with MidCap Financial with a principal amount of $245 million and a maturity date of July 2018. In addition, in December 2014, we entered into two bridge loan transactions whereby we loaned $100 million to MidCap Financial and one of its subsidiaries with the loans having maturity dates in May and June 2015. In connection with the restructuring of MidCap Financial into MidCap in January 2015, subsidiaries of MidCap Holdings succeeded as borrower under the subordinated debt facility and bridge loan facilities, and the maturity date of the subordinated debt facility was extended to January 2022. For the years ended December 31, 2016 and 2015, we earned income of $23 million and $33 million, respectively, in connection with these debt financings. MidCap repaid $45 million of the bridge loans during the first quarter of 2015 and repaid the remaining $55 million in January 2016. In January 2016, the subordinated debt facility was amended and restated in connection with new loans made by third-party lenders. The loans under the amended and restated facility mature in January 2026. In consideration of accepting a decrease in the interest rate, from 10% to 9%, extending maturity and other changes to the terms of the loan, a subsidiary of MidCap paid us an amendment fee of $8 million.

The restructuring transactions described above were approved by a special committee of our board of directors consisting of five independent directors. The special committee was formed for the purpose of reviewing the transactions and, in considering whether to approve the transactions, the special committee hired independent legal counsel and received a fairness opinion from a third-party investment bank.

From time to time, we have entered into participation arrangements with MidCap Holdings with respect to loans we purchase that were originated or otherwise sourced by MidCap Holdings. In January 2016, we purchased a pool of loans that were sourced by MidCap and contemporaneously sold participation interests in the loans to a subsidiary of MidCap receiving aggregate consideration of $24 million. As of December 31, 2016, $14 million was due to MidCap under the subordinated participation agreement.

AmeriHome

We hold a significant investment in AmeriHome, a mortgage lender and mortgage servicer, through our investment in A-A Mortgage, an investment fund managed by AAM. AmeriHome originates assets that we may acquire that are consistent with our investment strategy.

Through December 31, 2016, we made equity investments of $328 million in A-A Mortgage. We have approximately 73% of the economic interests in A-A Mortgage, A-A Mortgage owns 100% of the equity interests in Aris Holdco (not including profits interests in Aris Holdco held by AmeriHome management), and Aris Holdco owns 100% of the equity interests in AmeriHome. In 2015, we provided debt financing whereby Athene USA loaned $85 million to A-A Mortgage, which amounts were ultimately invested in AmeriHome. This debt financing was repaid in full in 2015, using the proceeds of additional equity contributions to A-A Mortgage that were made contemporaneous with the repayment of debt. For the year ended December 31, 2015, we earned interest income of $2 million in connection with the debt financing. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Consolidated Investment Portfolio*.

In connection with our equity investment in A-A Mortgage, we agreed that Aris Holdco will pay AAM a management fee equal to 1.5% of Aris Holdco's consolidated equity, in addition to the 10% carried interest that AAM receives subject to an 8% hurdle. This management fee is paid in respect of certain management and oversight services provided by AAM to A-A Mortgage and its subsidiaries. In connection with transaction advice that may be rendered by Apollo Global Securities, LLC (AGS) relating to certain strategic transactions that may be entered into by Aris Holdco and/or its subsidiaries, Aris Holdco has agreed to pay AGS transaction fees equal to 1% of the aggregate consideration in such transactions for which AGS provides advice. In addition, certain other investors in A-A Mortgage, including an Apollo-affiliated fund, as a

condition to their commitments to invest in A-A Mortgage, required that the amounts paid by Aris Holdco to AAM in respect of the management fee and amounts paid to AGS in respect of transaction fees would be rebated to such investors.

Gross management fees incurred by Aris Holdco for services rendered by AAM for the years ended December 31, 2016, 2015 and 2014 totaling $1.8 million, $0.7 million and $0.1 million, respectively, were rebated to other investors in A-A Mortgage. AAM also recognized approximately $4.6 million, $2.5 million and $0 million in unrealized incentive income for the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016, no transaction fees have been paid by Aris Holdco to AGS.

In 2015, we entered into loan purchase and servicing agreements with AmeriHome. The agreements allow us to purchase certain RMLs which AmeriHome has purchased from correspondent sellers and pooled for sale in the secondary market. AmeriHome retains the servicing rights to the sold loans and generally charges a fee of 25 basis points on the loans serviced. For the years ended December 31, 2016 and 2015, we had purchased $22 million and $83 million, respectively, of RMLs under this agreement.

Apollo Commercial Real Estate Finance, Inc.

On August 31, 2016, AMTG merged with and into ARI, with ARI continuing as the surviving corporation (the Merger). In connection with the Merger, certain of our subsidiaries entered into several agreements with ARI: (1) an Asset Purchase and Sale Agreement (Asset Purchase Agreement) among ARI, AADE and AAIA, (2) a Loan Agreement (ARI Loan Agreement) between ARI and Athene USA, and (3) a Stock Purchase Agreement (ARI Stock Purchase Agreement) between ARI and Athene USA.

Pursuant to the Asset Purchase Agreement, immediately following the consummation of the Merger, AADE and AAIA purchased from ARI $1.1 billion of primarily non-agency RMBS (ARI Asset Sale).

Pursuant to the ARI Loan Agreement, Athene USA provided ARI with a secured term loan of $175 million at an interest rate of one-month LIBOR plus 7.00% to consummate the Merger. The term loan was subsequently repaid by ARI with the net cash proceeds that ARI received from the ARI Asset Sale.

Pursuant to the ARI Stock Purchase Agreement, during the first thirty trading days following the closing of the Merger, Athene USA purchased $20 million in shares of ARI common stock in the open market at the then-current market price, which purchase was required pursuant to the ARI Stock Purchase Agreement if the quoted price of a share of ARI common stock on the NYSE at any time during such specified period was less than the price per share at which the ARI common stock was issued to holders of AMTG common stock upon effectiveness of the Merger ($16.75 per share). In order to fulfill its purchase obligations under the ARI Stock Purchase Agreement, Athene USA entered into a purchase plan with a broker-dealer that was established for purposes of complying with Rules 10b5-1 and 10b-18 under the Exchange Act.

As of March 14, 2017, we had sold $17 million of the ARI stock purchased pursuant to the stock purchase agreement after holding such stock in accordance with the terms thereof.

German Office Lease

In May 2011, Delta Lloyd Lebensversicherung AG (now known as ALV, formerly a subsidiary of DLD), entered into a sublease with CSC Deutschland Solutions GmbH for certain office space in Wiesbaden, Germany. In July 2012 and March 2016, the sublease was amended to increase the amount of space subject to sublease and to correspondingly increase the rent payable thereunder. Prior to and unrelated to our acquisition of DLD in October 2015, Wiesbaden (Bridge) S.á.r.l., an affiliate of Apollo, purchased the property subject to sublease.

The sublease expired in January 2017 and we entered into a lease with Wiesbaden (Bridge) S.á.r.l. that commenced upon the expiration of the sublease. We incurred rent under the sublease of approximately $0.8 million and $0.2 million for the years ended December 31, 2016 and 2015, respectively.

Shared Service Agreements

We have entered into shared services agreements with AAM. Under these agreements, we and AAM make available to each other certain personnel and services. Expenses for such services are based on the amount of time spent on the affairs of the other party in addition to actual expenses incurred and cost reimbursements. These shared services agreements can be terminated for any reason upon thirty days notice. The shared services agreements can also be terminated immediately with respect to a specific party in the event of the insolvency by another party to the agreements, among other things.

Equity Transactions

In December 2015 and 2014, we entered into purchase agreements with AAM pursuant to which AAM purchased 23,250 and 583,268, respectively, of our class M-4 common shares (or RSUs) under our 2014 Share Incentive Plan for aggregate purchase prices of approximately $0.2 million and $1.3 million, respectively. Subsequent to AAM’s purchase of our M-4 common shares, AAM distributed such shares to certain of its employees in connection with the recipient’s entry into a restricted share award agreement. AAM allocated such shares to its employees to further align incentives between AAM officers and employees and our performance.

In July 2014, AAM established a long term incentive plan (AAM LTIP), pursuant to which AAM provides incentive compensation to its eligible directors, officers and senior professionals. Under the terms of the AAM LTIP, we are permitted to receive LTIP units, with the determinations as to our use of the LTIP units to be in our discretion. The AAM LTIP further provides that LTIP units that remain ungranted to participants under the AAM LTIP for any given fiscal year be granted to us. AAM may unilaterally change the plan at any time without our consent and, therefore, we may not receive future distributions under the plan. For the years ended December 31, 2016, 2015 and 2014, pursuant to the AAM LTIP, we were permitted to receive $7.4 million, $8.5 million and $7.5 million, respectively.

In order to promote an alignment of interests, certain AAM employees have received grants of Class M common shares. In addition, certain AAM employees were permitted to purchase our Class A common shares at a discount from market value. As a result of these efforts, as of December 31, 2016, AAM employees (excluding our Chief Executive Officer) own approximately 1,186,000 Class A common shares, approximately 986,000 Class M common shares and approximately 10,000 RSUs. The expense associated with stock-based compensation to AAM employees was $11 million, $11 million and $27 million for the years ended December 31, 2016, 2015 and 2014, respectively.

In 2015, we offered Messrs. Wheeler and Klein the opportunity to purchase Class A common shares at their fair market value, which was $27.83 per share, pursuant to the 2014 Share Incentive Plan. In April 2014, we offered certain of our employees, directors and affiliates the opportunity to purchase our Class A common shares at a discounted price of $13.46 per share. In the case of the 2015 issuance, the difference between the purchase price and the grant date fair value of the shares is attributable to the change in fair market value from the time Messrs. Wheeler and Klein agreed to purchase the Class A common shares at the then fair market value to the time of the actual closing of the purchase transaction. In the case of the 2014 issuance, the difference between the purchase price and the grant date fair value of the shares was to allow our employees, directors and affiliates to purchase shares, although at a later date, at the same price at which our shares were issued in our third round capital raise. Pursuant to these offers, we sold approximately 442,000 and 3,694,000 shares, respectively, for aggregated consideration approximating $12 million and $50 million, respectively. Compensation expense recorded on these sales totaled $2 million and $46 million, respectively.

Registration Rights Agreement

On April 4, 2014, we entered into the Registration Rights Agreement (as amended by amendments No. 1 and No. 2 thereto, dated October 6, 2015 and November 22, 2016, respectively) with our shareholders, including each shareholder that beneficially owns more than five percent of a voting class of our common shares. The Registration Rights Agreement, subject to the restrictions and limitations contained therein, sets forth the conditions under which our shareholders may demand or otherwise require us to register shares held by them and the conditions under which we may require certain shareholders to register shares held by them, in each case such registration to be effected pursuant to the Securities Act. Pursuant to the Registration Rights Agreement: (1) following our IPO and subject to certain holding restrictions, certain holders of five percent or greater of our common shares may request and thereby require us to use our reasonable best efforts to effect registration under the Securities Act; (2) upon registration by us of any of our authorized but unissued Class A common shares or upon registration by us of any Other Shares (as defined in the Registration Rights Agreement), in each case, other than registration on Form S-4 or Form S-8, holders of Registrable Shares (as defined in the Registration Rights Agreement) may require us to include in such registration some or all of their Registrable Shares on the same terms and conditions as the securities otherwise being sold in such registration, subject to certain limitations and holding restrictions; and (3) in connection with any registered offering of our common shares within 15 months of our initial public offering.

Investment Portfolio Trades with Affiliates

From time to time, AAM and/or Apollo execute cross trades which involve the purchase or sale of assets in a transaction between us, on the one hand, and a third party or an Apollo affiliated entity, in either case, to which Apollo or its affiliate acts in an investment advisor, general partner, managing member, collateral manager or other advisory or management capacity, on the other hand. In addition, from time to time, we may purchase or sell securities from or to related parties, other than through a cross trade transaction. We believe that these transactions are undertaken at market rates, and are executed based on third-party valuations where possible. For the years ended December 31, 2016, 2015 and 2014, the aggregate value of such transactions where we acquired investments from related parties amounted to $1.1 billion, $0 million and $207 million, respectively. For the years ended December 31, 2016, 2015 and 2014, we did not sell any investments to related parties.

Commercial Mortgage Loan Servicing Agreements

We have entered into commercial mortgage loan servicing agreements (CML Servicing Agreements) with AAM. Pursuant to these agreements, we have engaged AAM to (1) assist with the origination of and provide servicing of, commercial loans owned by us or in which we participate, secured by mortgages, deeds of trust or documents of similar effect encumbering certain real property and commercial improvements thereon and (2) provide for management and sale of real estate owned properties.

Transaction Advisory Services Agreement

Apollo and certain of its affiliates have provided to us a diverse array of services which have enabled us to grow our balance sheet to $86.7 billion in total assets as of December 31, 2016. Since our founding, Apollo has identified acquisition opportunities for us to scale our business, and principals, partners and other senior members of Apollo have been instrumental to helping us source, underwrite, and integrate these transactions. In return for these services, prior to October 31, 2012, Apollo had a 10-year monitoring contract in place with us. Under this contract, Apollo Alternative Assets, L.P. and Apollo Management Holdings, L.P., each affiliates of Apollo, collectively charged us a quarterly monitoring fee of 0.50% of our capital and surplus plus out of pocket expenses, payable in cash. On January 1, 2013, we entered into an equity swap transaction with Apollo in connection with the termination of the quarterly monitoring fee. Pursuant to this swap, the quarterly settlement

amount continued to accrue to Apollo, but the payment of those amounts (whether in stock or cash) would not be made to Apollo until the earlier of the time when Apollo was no longer deemed to control us within the meaning of the derivative instrument delivered pursuant to the TASA and October 31, 2017. In April 2014, as a result of the external capital raise, Apollo was no longer deemed to control the Company (as defined under the swap) and, as a result, the swap was settled in stock for settlement amounts owed through that date. Additionally, in April 2014, we further amended the TASA to exclude from capital and surplus, on which the quarterly monitoring fee was calculated, the capital received in the April 2014 capital raise, and any capital raised in connection with certain potential future acquisitions as defined in the amended TASA. As we grew our business and platform and began to prepare to become a public company, Apollo voluntarily unwound the monitoring contract at a discount relative to the expected amounts payable over the remaining term thereof. As a result, pursuant to the terms of the TASA, Apollo Alternative Assets, L.P., Apollo Management Holdings, L.P., and AGS (collectively, the Apollo TASA Parties), agreed to accelerate the termination date of the monitoring contract from July 14, 2019 to December 31, 2014 in exchange for 2.5 times the quarterly monitoring fee for eight consecutive quarters beginning with the quarter ending March 31, 2013. All amounts accrued under the TASA and outstanding as of December 31, 2014 were subsequently paid in the form of Class B common shares (or equivalent derivatives) to the Apollo TASA Parties. The total costs, including management fees, incurred for these services and for terminating the TASA were $0 million, $0 million and $228 million for the years ended December 31, 2016, 2015 and 2014, respectively.

AAA Transaction

On October 30, 2012, in order to provide pre-funding for and increase certainty to close future acquisitions, the AAA Investor and certain other parties entered into a contribution agreement (Contribution Agreement). Pursuant to the Contribution Agreement, the AAA Investor contributed investment assets to us in exchange for (1) 44,444,457 of our Class B common shares for a purchase price of $13.46 per share, (2) $83 million in cash and (3) a promissory note payable to the AAA Investor with a principal amount of approximately $113 million. The transfer of 1,509,091 of the Class B common shares was deferred pending regulatory approvals of certain of the assets being transferred by the AAA Investor pursuant to the Contribution Agreement. Such approvals were received in 2013 and the shares were thereafter issued in exchange for these assets, which were comprised of investment partnerships. The AAA Investor contributed three partnerships (AAA Partnerships) to us pursuant to the Contribution Agreement. At the time of contribution, the AAA Partnerships largely consisted of non-publicly traded equity investments that were co-investments, including CoInvest VI and CoInvest VII, alongside private equity funds sponsored by Apollo. We satisfied our obligations under the note in full, together with accrued interest, in September 2014 by issuing 3,808,626 Class B common shares. The weighted average annual net investment earned rate of the contributed portfolio from inception was more than 15% as of December 31, 2016.

The Contribution Agreement described above was approved by a special committee of the conflicts committee consisting of three independent directors. The special committee was formed for the purpose of reviewing the transaction and, in considering whether to approve the transaction, the special committee hired independent legal counsel and received a fairness opinion from a third-party investment bank.

Advisory Services Agreement

On August 23, 2016, we entered into an advisory services agreement (Advisory Services Agreement) with Apollo Management Holdings, L.P. (AMHLP). Pursuant to the Advisory Services Agreement, AMHLP or certain other affiliates of Apollo may provide certain non-exclusive management, consulting, financial and other advisory services to us and our subsidiaries. Such services, which differ from those covered by AAM and its affiliates under our IMAs and sub-advisory agreements, involve advice and recommendations related to future acquisitions, capital market activities and strategic priorities (including growth). Apollo and its affiliates do not charge us or our subsidiaries for their services and may determine not to provide any services. Apollo and its affiliates have the right to request a fee for any service they provide; however, such a request is subject to prior approval by us or the applicable subsidiary. We are responsible for all reasonable third party out-of-pocket expenses incurred by Apollo or its affiliates related to the services they offer and provide such entities indemnification against any loss or liability arising out of the Advisory Services Agreement. The Advisory Services Agreement is effective until December 31, 2025. Prior to entering into the Advisory Services Agreement, we reimbursed Apollo or its affiliates for certain out-of-pocket expenses they incurred in connection with rendering services to us.

Other Related Party Transactions and Relationships

We have entered into side letters with certain of our shareholders and have granted them certain rights pursuant to the respective side letters.

We have entered into side letters with Procific (Procific Side Letters), which has a significant indirect interest in us through its holdings in AAA and AHL 2014 Investor, L.P. The Procific Side Letters afford Procific the opportunity, in the event that Procific is, directly or indirectly (through its interests in AAA or AHL 2014 Investor, L.P.), required by the Company to sell shares in a public offering pursuant to the Registration Rights Agreement, to purchase shares from us in connection with the public offering with such purchase to be effected at the then market price less an amount equal to the underwriting commission per share, up to the number of shares that Procific is required to sell in such public offering. Subject to certain exceptions, the Procific Side Letters also provide Procific with an option to elect more favorable lock-up terms to the extent that certain of our investors are afforded lock-up terms that are more favorable than those to which Procific is subject. Finally, we agree to reimburse AHL 2014 Investor, L.P. for organizational and operational expenses it incurs during any calendar year. The total of such fees paid by us for the years ended December 31, 2016, 2015 and 2014 was insignificant.

We entered into a side letter with AAA (AAA Side Letter) in connection with our private placement. Pursuant to the AAA Side Letter, for so long as AAA holds any of our equity securities directly or indirectly, it shall have the right to have one representative present at all meetings of our board of directors (and committees thereof), provided that such representative shall not be entitled to vote at such meetings.

Other than as stated or summarized above, since the beginning of our fiscal year ended December 31, 2014, no director, executive officer or shareholder who is known to us to beneficially own more than five percent of our Class A common shares or Class B common shares, or any member of the immediate family of such director, executive officer or shareholder, had or will have a direct or indirect material interest in a transaction or series of transactions in which we are, or one of our subsidiaries is, a party and the amount involved exceeds $120,000.

Related Party Transaction Policy

We have established a related party transaction policy which provides procedures for the review of transactions in excess of $120,000 in any year between us and any covered person having a direct or indirect material interest with certain exceptions. Covered persons include any director, executive officer, director nominee, shareholders known to us to beneficially own 5% or more of our Class A common shares or Class B common shares or any immediate family members of the foregoing. Any such related party transactions shall require advance approval by a majority of our independent directors or by our conflicts committee to the extent that such transactions constitute Apollo Conflicts (as described below) or related party transactions incidental or ancillary thereto. To the extent that the related party transaction is other than either an Apollo Conflict or a related party transaction that is incidental or ancillary thereto, our audit committee charter provides that the audit committee has the authority to review and approve all such transactions.

Because the Apollo Group has a significant voting interest in AHL, and because AHL and its subsidiaries have entered into, and will continue in the future to enter into, transactions with Apollo and its affiliates, our bye-laws created a conflicts committee, consisting of directors who are not officers or employees of any member of the Apollo Group and are designated by our board of directors. The conflicts committee consists of Messrs. Beilinson and Borden and Ms. Taitz. Our nominating and corporate governance committee and our board of directors have determined that each member of the conflicts committee meets the independence requirements of the NYSE rules. The conflicts committee reviews and must approve of certain material transactions by and between AHL and its subsidiaries, on the one hand, and the Apollo Group, on the other hand, including any modification or waiver of the IMAs with AAM, subject to certain exceptions.

An “Apollo Conflict” is:

- the entering into or material amendment of any material agreement by and between us and any member of the Apollo Group; or
- the imposition of any new fee on or increase in the rate of fees charged to us or any of our subsidiaries by a member of the Apollo Group, or the provision for any additional expense reimbursement to or offset by a member of the Apollo Group to be borne by us or any of our subsidiaries, directly or indirectly, pursuant to any material agreement by and between us and any member of the Apollo Group (except to the extent that any such material agreement sets forth the actual amount or formula for calculating the amount of any new fee or increase in the rate at which such fee is charged and such material agreement has not been approved or is exempt from approval under the conflicts committee charter).

We require that any new (or amendments to any existing) transactions by and between us and any member of the Apollo Group be, prior to the time such transaction is entered into:

- fair and reasonable, taking into account the totality of the relationships between the parties involved (including other transactions that may be or have been particularly favorable to us or any of our subsidiaries);
- entered into on an arms-length basis;
- approved by a majority of our disinterested directors;
- approved by the holders of a majority of our issued and outstanding Class A common shares; or
- approved by the conflicts committee.

In connection with any matter submitted to the conflicts committee, materials are prepared by management summarizing the applicable conflict and recommending the proposed transaction. The conflicts committee reviews market comparison data (to the extent available) relating to the reasonableness of any proposed fees to be paid.

For operational and administrative ease, certain transactions that fall within the definition of an Apollo Conflict but do not pose a material risk to us need not be approved by the conflicts committee. As described below, these exceptions include specific thresholds under which we may engage Apollo or its affiliates in an investment management or advisory (or sub-management or sub-advisory) capacity without prior conflicts committee review or approval. The following transactions, among others, are expressly excluded from the definition of Apollo Conflict and do not require the consent or review of the conflicts committee:

- (1) transactions, rights or agreements specifically contemplated by existing agreements between AHL and AGER Bermuda Holding Ltd., (2) entering into new IMAs or MSAAs with members of the Apollo Group on terms similar to and not more economically favorable in the aggregate to the Apollo Group than those currently in effect (provided that payment of additional total fees and/or expenses at the same or no greater fee and/or expense reimbursement rate shall not be deemed to be more economically favorable to the Apollo Group), (3) amendments to the agreements described in (1) and (2) above for the purpose of adding a subsidiary of AHL thereto, or (4) any reinsurance transaction between AGER or any of its subsidiaries and AHL or any of its subsidiaries;
- any (1) transfer of equity securities of AHL to or by any member of the Apollo Group, (2) acquisition by any member of the Apollo Group of any newly issued equity securities that are offered to the public in a public offering, to substantially all of the holders of AHL’s common stock on a substantially pro-rata basis or at a price which is equal to or greater than the then-prevailing market price,

(3) issuance of securities to any employee or director of AHL or AAM (including allocating blocks of incentive securities to AAM for allocation by AAM to its employees and directors) pursuant to any stock incentive plan or similar equity based compensation plan approved by our board of directors;

- the provision of any insurance related products by or to AHL or any of its subsidiaries to or by the Apollo Group, provided that the provision of such products is an ordinary course transaction entered into on an arms-length basis on terms no less favorable to AHL or its subsidiaries than could be contemporaneously obtained from or provided to an unaffiliated party;
- any transactions, rights or agreements between AHL or any of its subsidiaries and any portfolio company of the Apollo Group that pertain to the ordinary course business of such portfolio company. provided that any such transactions, rights or agreements (taken as a whole) are no less favorable to AHL or the applicable subsidiary than could be obtained from provided to an unaffiliated party;
- an investment by AHL or any subsidiary thereof in an Apollo-sponsored vehicle; provided that an officer of a member of the Apollo Group provides a written certification to our board of directors that such investment provides AHL or its subsidiary, as applicable, with the same or better terms or a most favored nations clause (in all cases, taken as a whole with respect to such Apollo-sponsored vehicle and without consideration of any Designated Terms (as defined below)) as those applicable to other investors (excluding Designated Investors (as defined below)) in the same Apollo-sponsored vehicle who invested an amount in such vehicle equal to or less than that invested by AHL and its subsidiaries; and provided, further, that such investment represents no more than 25% of the outstanding or expected equity interests of such Apollo-sponsored vehicle (based on prior record related to the strategy). Designated Investor and Designated Terms shall have the meanings set forth for such terms or other similar terms in any customary side letter entered into by the applicable Apollo Group advisor or manager, Apollo-sponsored vehicle or other Apollo Group entity, on the one hand, and investors, other than AHL or a subsidiary thereof, who have invested in the same Apollo-sponsored vehicle, or entered into an investment management, sub-advisory or similar agreement with the Apollo Group for the same asset class, on the other hand;
- a transaction that has been approved by a majority of our disinterested directors, provided that the disinterested directors are notified that such transaction would otherwise constitute an Apollo Conflict prior to such approval;
- any modification, supplement, amendment or restatement of our bye-laws that has been approved in accordance with our bye-laws and applicable Bermuda law;
- material amendments to contracts or transactions previously approved by the conflicts committee or a majority of our disinterested directors, or which are not required to be approved by either, so long as, in each case, such amendments either (1) are not materially adverse to AHL or any of its subsidiaries, or (2) would not cause the relevant contract or transaction to require approval by the conflicts committee or a majority of our disinterested directors under our bye-laws after giving effect to the relevant amendment;
- the entry into any IMA with the Apollo Group or amending an MSAA currently in effect (or entering into a new MSAA), so long as (i) such agreement is on terms in the aggregate (including expense reimbursement and indemnities) no less favorable to AHL than customary market terms (excluding the fees charged under the IMA); and (ii) either (a) the rates on AUM under such agreement (including any carried interest or similar profit allocation, but, for the avoidance of doubt, excluding the fees charged under the IMA) do not exceed 50 basis points per annum for non-alternative assets; (b) the rates on AUM under such agreement (including any carried interest or similar profit allocation, but, for the avoidance of doubt, excluding the fees charged under the IMA) do not exceed 100 basis points per annum for alternative assets; or (c) an officer of a member of the Apollo Group provides a written certification to our board of directors that such agreement provides AHL or its subsidiary, as applicable, with the same or better terms or a most favored nations clause (in all cases, taken as a whole with respect to such agreement and without consideration of any Designated Terms) with respect to other investors (excluding Designated Investors) who have entered into an investment management agreement or sub-advisory or similar agreement with the Apollo Group for the same asset class and whose AUM with respect to such agreement and asset class are all equal or less than those subject to the agreement between AHL and the Apollo Group with respect to such asset class. In addition, investments in an Apollo-sponsored vehicle are not deemed Apollo Conflicts so long as such Apollo-sponsored vehicle charges fees in line with those discussed in (a) and (b) above;
- allocations of costs or expenses between AHL or any of its subsidiaries and the Apollo Group not in excess of five basis points per annum, calculated on the total investible assets of AHL and its subsidiaries including accounts supporting reinsurance agreements for which AHL or a subsidiary thereof acts as reinsurer as of the effective date of such allocation (provided that any such allocation of costs or expenses may not be used to pay investment management fees); and
- any other class of transactions, rights, fees or agreements determined by approval of the conflicts committee to not be an Apollo Conflict nor require approval of the conflicts committee.

Each strategy that is managed, advised or sub-advised for AHL or any of its subsidiaries by AAM or another member of the Apollo Group through a managed account and was previously subject to conflicts committee approval (other than the existing IMA or new IMAs previously approved) may be re-examined by the conflicts committee if such strategy underwent a material change in the amount of AUM in the immediately preceding 12 months.

Our conflicts committee or applicable disinterested directors have previously approved the existing transactions described above under *Relationships and Related Party Transactions with Apollo or its Affiliates* that are required to be approved by the terms of our conflicts committee charter.

Director Independence

Our board of directors has undertaken a review of the independence of each director. Based on information provided by each director concerning his or her background, employment and affiliations, our board of directors has determined that Messrs. Beilinson, Borden, McCall, Ruisi, Wrubel, Leach and Ms. Taitz do not have a relationship that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director and that each of these directors meet the independence requirements of the NYSE listing rules. Consequently, a majority of our directors are independent directors. In making these determinations, our board of directors considered the current and prior relationships that each non-employee director and non-Apollo director has with our company and all other facts and circumstances our board of directors deemed relevant in determining their independence, including the beneficial ownership of our common shares by such director and any transactions involving them described under this *Item 13. Certain Relationships and Related Transactions, and Director Independence*.

During 2016, (1) Mr. Siddiqui was a member of our audit and compensation committees; (2) Mr. Rowan was a member of our compensation committee; and (3) Mr. Michelini was a member of our nominating and corporate governance committee. None of Mr. Siddiqui, Mr. Rowan, or Mr. Michelini meets the independence requirements of the NYSE rules. The NYSE rules require that our audit, compensation, and nominating and corporate governance committees be comprised exclusively of independent directors within one year of the effective date. Not later than the first anniversary of the effective date, all members of the respective committees will be independent.

Item 14. Principal Accountant Fees and Services

The audit committee of the board of directors has adopted procedures for pre-approving all audit and permissible non-audit services provided by the independent auditor. The audit committee will, on an annual basis, review and pre-approve the audit, review, attestation and permitted non-audit services to be provided during the next audit cycle by the independent auditor. To the extent practicable, the audit committee or the chairman thereof will also review and approve a budget for such services. Services proposed to be provided by the independent auditor that have not been pre-approved during the annual review and the fees for such proposed services must be pre-approved by the audit committee or the chairman thereof. All requests or applications for the independent auditor to provide services to the Company over certain thresholds shall be submitted to the audit committee or the chairman thereof. The audit committee considered whether the provision of non-audit services performed by the independent auditor is compatible with maintaining the independent auditor’s independence during 2016 and 2015. The audit committee concluded in 2016 and 2015 that the provision of these services was compatible with the maintenance of the independent auditor’s independence in the performance of its auditing functions during 2016 and 2015. All services were approved by the audit committee or were pre-approved under the audit committee's non-audit pre-approval policy.

The following summarizes the fees for services provided by PricewaterhouseCoopers LLP in 2016 and 2015:

(In millions)	2016	2015
Audit fees[1,2]	$ 15	$ 19
Audit-related fees[3]	1	3
Tax fees	-	-
All other fees	-	-
Total	$ 16	$ 22

[1] *Audit fees include fees billed and expected to be billed associated with the audit of the annual consolidated financial statements included on Form 10-K, the reviews of quarterly reports on Form 10-Q, annual audits of certain subsidiaries and audits required by regulatory authorities, statutory audits, issuance of comfort letters, issuance of consents related to common stock offerings and registration statements, attest services required by regulation, and the assistance with and review of documents filed with the SEC and other regulatory authorities.*

[2] *Includes fees of $2 million and $3 million for 2016 and 2015, respectively, related to our S-1 filings.*

[3] *Audit-related fees include fees paid associated with employee benefit plan audits, due diligence related to mergers and acquisitions, accounting consultations and audits in connection with acquisitions, internal control reviews not required by statute and regulation, consultations on financial accounting and reporting standards, and other attest services related to financial reporting that are not required by statute or regulation.*

PART IV

Item 15. Exhibits, Financial Statement Schedules

The following documents are filed as part of this report:

1. Financial Statements-Item 8. Financial Statements and Supplementary Data 141

2. Financial Statement Schedules

Schedule I-Summary of Investments Other Than Investments in Related Parties 262
Schedule II-Condensed Financial Information of Registrant 263
Schedule III-Supplementary Insurance Information 268
Schedule IV-Reinsurance 269
Schedule V-Valuation and Qualifying Accounts 270

Any remaining schedules are omitted because they are inapplicable.

3. Exhibits

ATHENE HOLDING LTD.
Schedule II - Condensed Financial Information of Registrant
Notes to Condensed Financial Information of Registrant - Parent Company Only

1. Basis of Presentation

The accompanying condensed financial statements of Athene Holding Ltd. (AHL) should be read in conjunction with the consolidated financial statements and the notes thereto (Consolidated Financial Statements) of AHL and its subsidiaries.

For purposes of these condensed financial statements, AHL's wholly owned and majority owned subsidiaries are presented under the equity method of accounting. Under this method, the assets and liabilities of subsidiaries are not consolidated. The investments in subsidiaries are recorded on the condensed balance sheets. The income from subsidiaries is reported on a net basis as equity earnings of subsidiaries on the condensed statements of income.

2. Intercompany Transactions

On December 15, 2014, Athene USA Corporation (Athene USA) entered into an unsecured revolving note with AHL. In 2014, Athene USA borrowed $100 million under the unsecured revolving note, with the balance due in June 2015, or earlier at AHL's request. The proceeds were used by Athene USA to fund the restructuring of a wholly owned investment fund and carries an interest rate of 0.35% per annum. Interest was payable on a quarterly basis. In June 2015, the unsecured revolving note was amended to extend the due date to June 1, 2020, or earlier at AHL's request. During 2015, $80 million was repaid by Athene USA. The unsecured revolving note was fully repaid by Athene USA in 2016.

On January 14, 2015, AHL entered into a facility agreement with DLD whereby AHL agreed to make available to DLD a loan facility without a fixed term in the maximum principal amount of EUR 5 million. Interest accrues under the facility at a rate of 6-month Euribor. DLD withdrew EUR 5 million prior to the October 1, 2015 acquisition of DLD by AHL, and full payment was made on October 9, 2015. DLD's withdrawal of the facility was not eliminated upon consolidation since it was prior to the acquisition, but the repayment of the loan was an intercompany transaction that eliminated upon consolidation.

On September 22, 2015, AHL entered into a loan agreement with ADKG, whereby AHL agreed to lend ADKG EUR 51 million to be used for the DLD acquisition. Interest accrued at a fixed rate of 1.5%, which was due and payable on the maturity date of the loan. The loan and interest accrued were due and fully repaid on October 9, 2015.

3. Debt and Guarantees

In the first quarter of 2016, AHL (along with subsidiaries ALRe and Athene USA) entered into a five-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. The amount available under the Credit Facility is $1 billion. In connection with the Credit Facility, AHL and Athene USA guaranteed all of the obligations of AHL, ALRe, and Athene USA under this facility, and ALRe guaranteed certain of the obligations of AHL and Athene USA under this facility. See *Note 10 - Debt* to our Consolidated Financial Statements for further information about the Credit Facility.

4. Related Parties

AHL pays investment management fees to Athene Asset Management (AAM), a related party, in relation to its portfolio of assets managed by AAM and assets held in certain subsidiary portfolios. In addition, AHL also pays service fees pursuant to a shared service agreement between AAM and AHL for various internal expenses AAM allocates to AHL. See *Note 17 - Related Parties* of the Consolidated Financial Statements for further information.

5. Dividends, Return of Capital and Capital Contributions

AHL received cash dividends and returns of capital from the following subsidiaries:

SECOND AMENDMENT, dated as of November 22, 2016 (this "*Amendment*"), to the Third Amended and Restated Registration Rights Agreement, dated as of April 4, 2014, by and among Athene Holding Ltd., a Bermuda exempted company limited by shares (the "*Company*"), and the shareholders party thereto (the "*Shareholders*"), as amended by amendment No. 1 thereto, dated as of October 6, 2015 (together, the "*Registration Rights Agreement*").

W I T N E S S E T H:

WHEREAS, the Company and the Shareholders desire to amend the Registration Rights Agreement to reflect certain modified terms as set forth below.

NOW THEREFORE, in consideration of the premises and the mutual covenants contained herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and with the intent to be legally bound, the parties hereby agree as follows:

1. All capitalized terms used and not otherwise defined in this Amendment are used herein as defined in the Registration Rights Agreement.

2. Section 4(a) of the Registration Rights Agreement is hereby amended as follows:

(a) The 6th line of Section 4(a), shall now include ", Investor Shares, Management Shares and/or Other Shares" immediately after "Primary Shares"; and

(b) Section 4(a)(i) shall now include", if any" immediately after "Primary Shares".

3. Clause (ii) of Section 6(g) of the Registration Rights Agreement is hereby amended and restated in its entirety as follows:

"(ii) each Apollo Person shall be entitled to pledge, hypothecate or otherwise assign any or all of its Apollo Person Lock-up Shares in connection with the securing of any loan, credit facility or other financing (including any refinancing, modification, amendment or restatement thereof) from an established, bona fide commercial bank or other lending institution."

4. Clause (ii) of Section 6(h) of the Registration Rights Agreement is hereby amended and restated in its entirety as follows:

"(ii) each Athene Management Person shall be entitled to pledge, hypothecate or otherwise assign any or all of its Athene Management Person Lock-up Shares in connection with the securing of any loan, credit facility or other financing (including any refinancing, modification, amendment or restatement thereof) from an established, bona fide commercial bank or other lending institution and"

5. Clause (i) of Section 6(i) of the Registration Rights Agreement is hereby amended and restated in its entirety as follows:

"(i) shall be entitled to pledge, hypothecate or otherwise assign any or all of its Effective Shares (such Effective Shares, "Athene Employee Shares") in connection with the securing of any loan, credit facility or other financing (including any refinancing, modification, amendment or restatement thereof) from an established, bona fide commercial bank or other lending institution and"

6. New Clause 6(j) of the Registration Rights Agreement is hereby added as follows: "(j) Notwithstanding anything to the contrary contained herein, including

Sections 6(f), 6(g) and 6(h) of this Agreement and the applicable two year and four hundred and fifty (450) day periods contained therein, the Lock-up Period applicable to any (i) Apollo Person Lock-up Shares, (ii) Athene Management Person Lock-up Shares and (iii) Apollo Lock-up Shares held by any director, officer or employee of AGM and its Affiliates, either directly or through a corporation, limited liability company, limited partnership or trust created for the benefit of such individual or one or more of such individual's parents, spouse, siblings or descendants, in each case, shall expire on the sooner of (x) the date that is four hundred and fifty (450) days following the Registration Date and (y) the latest Lock-up Expiration Date applicable to Investor Shares as set forth in Section 6(a) as such Lock-up Expiration Date may be amended, modified or waived from time to time by the Company in accordance with such Section 6(a). Notwithstanding anything to the contrary herein or otherwise, the Company hereby waives any applicable Lock-Up Period and related restrictions on transfer with respect to Effective Shares held by AGM, its Affiliates or any investment funds or accounts for which AGM or its Affiliates act as the general partner and/or manager, including, for the avoidance of doubt, but not limited to, AP Alternative Assets, L.P., AAA Guarantor-Athene, L.P., AAA Investments, L.P., AAA Associates, L.P., Stanhope Life, L.P., Stanhope Life II, L.P. and Stanhope Life Advisors, L.P. (collectively, "AGM Carry-Related Entities") solely to the extent such Effective Shares are being sold, distributed or transferred by any AGM Carry-Related Entity in connection with the payment of carried interest, incentive allocations, expenses and/or management fees to AGM, its Affiliates or one or more AGM Carry-Related Entities."

7. Section 18 of the Registration Rights Agreement is hereby amended and restated in its entirety as follows:

"The Company may not assign any rights hereunder without the consent of the holders of a majority of the Registrable Shares."

8. This Amendment shall be governed by and construed in accordance with the laws of the State of New York, without giving effect to any law or rule that would cause the laws of any jurisdiction other than the State of New York to be applied.

9. This Amendment shall become effective as of the date hereof. From and after the date hereof, all references in the Registration Rights Agreement to the Registration Rights Agreement shall be deemed to be references to the Registration Rights Agreement as modified hereby.

10. This Amendment may be executed in any number of counterparts, each of which when executed and delivered is an original, but all the counterparts together constitute the same document.

IN WITNESS **WHEREOF,** the undersigned , having obtained the required consents under the Registration Rights Agreement, have duly executed this Agreement as of the above written date.

Exhibit 10.40

December 19, 2016

Guy Smith III
301 Asheton Springs Way
Simpsonville, SC 29681

Re: Separation Agreement and General Release

Dear Guy:

This letter confirms the terms in connection with your separation of employment from Athene Annuity and Life Company and its affiliates (including without limitation Athene Holding Ltd.) (collectively, the "Company"). The Company and you agree that this letter agreement (this "Agreement") represents the full and complete agreement concerning your termination of employment with the Company.

In consideration of the mutual promises and agreements contained in this Agreement, the adequacy and receipt of which each party expressly acknowledges, you and the Company agree as follows:

1. You acknowledge and agree that your employment with the Company will terminate on January 1, 2017 (the "Separation Date"). You acknowledge and agree that you will cease to hold any and all officer and director positions that you held with the Company as of such date. You acknowledge and agree that you have no present or future right to employment with the Company or any of the other Released Parties (as defined below), and will not apply or seek consideration for any employment, engagement, or contract with any of them. Notwithstanding the foregoing, in the future the Company may seek to engage you. In that event, it is understood that you and the Company may engage in discussions toward a mutually agreed arrangement.

2. Subject to the terms of this Agreement and provided that you sign and return this Agreement to the Company within twenty-one (21) days after your receipt thereof, you sign and return to the Company the Supplemental Release attached to this Agreement (the "Supplemental Release") within 21 days after (but not before) the Separation Date, and do not revoke this Agreement in accordance with Paragraph 16 below or Paragraph 5 of the Supplemental Release, and you comply with this Agreement (including without limitation the provisions of your Share Award Agreements (defined in Paragraph 3 below), the Company will provide you the following:

a. A payment in a gross amount equal to $322,121, which represents your 2016 bonus that you could have received had you remained employed with the Company through the date on which 2016 bonuses are paid. This amount (less any required withholdings) shall be paid to you in lump sum in cash pursuant to the Company's standard payroll schedule within 75 days following year end.

b. Severance in the form of salary continuation payable pursuant to the Company's regular payroll practices through June 30, 2017. Any severance that would become payable prior to the effectiveness of the Supplemental Release will accrue and become payable in the first regular payroll following its effectiveness. You agree that, in addition to any other remedies of the Company, the Company's obligation to make these severance payments shall terminate in the event you violate any of the Restrictive Covenants.

c. Your coverage under the Company's group health plan(s) will end as of January 31, 2017. You may continue your group health insurance coverage thereafter as required by the Consolidated Omnibus Budget Reconciliation Act of 1985 ("COBRA"). You will receive information about continuing your health coverage under COBRA separately following your Separation Date.

d. You will receive a payment equal to the value of your earned and unused 2016 PTO hours accrued through December 31, 2016. This payment will be made following your Separation Date and within the time period provided by applicable law.

e. The Company will not exercise the repurchase provisions in the applicable Share Award Agreement and the Shareholders Agreement with respect to the vested portion of the Share Awards, which vested position is specified in the Exhibit to this Agreement.

f. The noncompetition provisions found in your Share Award Agreements (at Section 7(b) of the Class M-2 Shares Award, the Class M-3 Shares Award, the Class M-4 Shares Award and the Class A (2014) Award), and at the Section 6(b) of the Class A (2014 Bonus Award) and Class A (2015 Bonus Award)) shall remain in effect only until June 30, 2017, subject to extension as provided in the Share Award Agreements in the event of a breach. All other Restrictive Covenants remain in effect pursuant to their existing terms.

3. You acknowledge and agree to the following with respect to shares of the Company:

a. During your period of employment with the Company, you were provided the following equity related awards (collectively referred to as the "Share Awards"):

i. 168,202.16 Class M-2 common shares of the Company pursuant to the Amended and Restated Restricted Share Award Agreement between you and the Company, dated as of September 30, 2016 (the "Class M-2 Shares Award");

ii. 140,000 Class M-3 common shares of the Company pursuant to the Amended and Restated Restricted Share Award Agreement between you and the Company, dated as of September 30, 2016 (the "Class M-3 Shares Award");

iii. 160,000 Class M-4 common shares of the Company pursuant to the Amended and Restated Restricted Share Award Agreement between you and the Company, dated as of November 8, 2016 (the "Class M-4 Shares Award");

iv. 6,000 Class A common shares of the Company pursuant to the Subscription Agreement between you and the Company, dated as of April, 2012 ("Class A (2012 Subscription Agreement)");

v. 26,100 Class A common shares of the Company pursuant to the Amended and Restated Class A Share Award Agreement between you and the Company, dated as of December 13, 2014 (the "Class A (2014 Award)");

vi. 9,607.99 Class A common shares of the Company pursuant to the Restricted Share Award Agreement between you and the Company, dated as of April 28, 2015 (the "Class A (2014 Bonus Award)");

vii. 3,229 Class A common shares of the Company pursuant to the Restricted Share Award Agreement between you and the Company, dated as of February 19, 2016 (the "Class A (2015 Bonus Award)");

viii. 8,577 Class A common shares of the Company pursuant to Nonqualified Stock Option Award Notice, with an option date of June 6, 2016 (the "Class A (2016 Option Award)");

ix. 1,473 Class A common shares of the Company pursuant to Restricted Share Unit Award Notice (Time-Based Vesting), with grant date of June 6, 2016 (the "Class A (2016 Restricted Share Unit Time Award)"); and

x. 2,946 Class A common shares of the Company pursuant to Restricted Share Unit Award Notice (Performance-Based Vesting), with grant date of June 6, 2016 (the "Class A (2016 Restricted Share Unit Performance Award)").

b. The Exhibit to this Agreement lists the vested and unvested portion, calculated as of the Separation Date, subject to each Share Award and Share Award Agreement.

c. In accordance with the term of the applicable documents governing the Share Awards (*e.g.*, the Plan document (if applicable), the Restricted Share Award Agreements and Award Notices) (referred to herein as a "Share Award Agreement" and collectively as the "Share Award Agreements"), except as provided in Paragraph 3.d., any shares that are unvested as of the Separation Date (as listed in the Exhibit to this Agreement) shall be forfeited to the Company without further action on the Separation Date.

d. As provided in Section 4(a)(iv) of the applicable Share Award Agreement, the time vested shares subject to the Class M-3 Shares Award and Class M-4 Shares Award that are unvested as of the Separation Date (14,000 shares and 48,000 shares, respectively) shall be forfeited to the Company without further action on July 1, 2017, unless they have then vested pursuant to Section 4(a)(ii) of the applicable Share Award Agreement.

e. As provided in Section 4(b)(v) of the Share Award Agreement governing the Class M-4 Shares Award, the unvested performance based Class M-4 Shares may vest during an 18 month period commencing on the IPO date and shall then be forfeited to the Company without further action if they have not vested.

f. You acknowledge that, except as otherwise specifically provided in this Paragraph 3, you hold no shares or other equity of the Company, and you agree that you have no right to purchase or acquire any shares or other equity of the Company now or in the future.

g. You acknowledge and agree that you remain bound by the Third Amended and Restated Registration Rights Agreement of Athene Holding Ltd., dated as of April 4, 2014, including specifically the lock-up provisions thereunder.

4. The Company acknowledges and agrees that you are vested in your accrued benefits under the Athene Supplemental Executive Retirement Plan ("SERP") and that you will be paid your SERP benefits and any other vested accrued benefits to which you are entitled under the Company's benefits and compensation plans in accordance with the respective terms thereof.

5. The Company acknowledges that you will continue to be covered under its directors and officers insurance, subject to the terms and conditions of such insurance. Further, the terms and conditions of the Indemnification Agreement entered into between the parties on May 29, 2015, are incorporated herein.

6. All payments made and benefits provided to you shall be subject to customary withholding and other taxes as required by applicable federal, state and local law. Notwithstanding anything contained herein to the contrary, you agree that you, and not the Company, are responsible for any and all taxes payable by you. The Company is hereby authorized to satisfy any tax withholding obligations under any of the Share Awards, whether arising in connection with vesting, exercise or otherwise, by the withholding of shares subject to the award.

7. You agree to return to the Company no later than 15 days following your Separation Date all of its property in your possession, custody or control including, but not limited to, all memoranda, notes, plans, records, reports, software and data, files (written and electronic), tapes, manuals, personnel information, employee lists, brochures, catalogs, price lists, cost information, financial records, customer lists and all copies thereof, cell phones, computers, information storage devices (including without limitation external hard drives and thumb drives), keys, credit cards and other equipment.

8. You represent that you (i) are familiar with and have carefully considered the covenants of your Share Award Agreements, as modified by Paragraph 2.f. of this Agreement (together, the "Restrictive Covenants"), (ii) are fully aware of your obligations under the Restrictive Covenants, (iii) agree to the reasonableness (including without limitation as to length of time and scope, as applicable) of the Restrictive Covenants and (iv) agree that the Restrictive Covenants are necessary to protect the Company's confidential and proprietary information, good will, stable workforce and customer relations. You further agree and acknowledge that your breach of any of the Restrictive Covenants would cause immediate and irreparable harm to the Company that would be difficult or impossible to measure, and that damages to the Company for any such injury would therefore be an inadequate remedy for any such breach. You agree that in the event of any breach or threatened breach of any of the Restrictive Covenants, the Company shall be entitled, in addition to and without limitation upon all other remedies the Company may have under this Agreement, the Supplemental Release or the Share Award Agreements at law or otherwise, to obtain specific performance, injunctive relief and/or other appropriate relief (without posting any bond or deposit) in order to enforce or prevent any violations of the Restrictive Covenants and/or require you to account for and pay over to the Company all compensation, profits, moneys, accruals, increments or other benefits derived from or received as a result of any transactions constituting a breach of the Restrictive Covenants, with such payment required if and when final judgment of a court of competent jurisdiction is so entered against you. The Company acknowledges and agrees that, for purposes of enforcing the Restrictive Covenants, your "Termination of Relationship" (as defined in the Share Award Agreements) shall be deemed to have occurred on January 1, 2017 (the "Effective Date"). You further agree that the applicable period of time any Restrictive Covenant is in effect following the Effective Date, as determined pursuant to Section 7 of the Share Award Agreements, as applicable, shall be extended by the same amount of time that you are in breach of any Restrictive Covenant.

9. In consideration for the compensation and benefits provided hereunder and conditioned upon the Company satisfying its obligations hereunder, you, and anyone claiming through you, agree to fully, finally and forever waive, release and discharge the Company and any and all parents, divisions, subsidiaries, partnerships, affiliates and/or other related entities of the Company (whether or not such entities are wholly owned) and each of those entities' past, present, and future owners, trustees, fiduciaries, shareholders, directors, officers, administrators, agents, representatives, members, associates, partners, employees, attorneys, and the predecessors, successors, and assigns of each of them (collectively, the "Released Parties"), from any and all claims, whether known or unknown, which you have or have ever had against any of the Released Parties arising from or related to any act, omission, or thing occurring or existing at any time prior to or on the date of your signing this Agreement including, but not limited to, any and all claims that in any way result from, or relate to, your employment, compensation, other terms and conditions of employment, or termination from employment with the Company or any of the other Released Parties, except benefits to which you are entitled, such as COBRA, other insurance and pension and 401(k) plan benefits. These released and waived claims include (except as provided in this Agreement), but are not limited to: (a) all claims for any compensation payments, bonus, severance pay, equity or any other compensation or benefit, except benefits to which you are entitled, such as COBRA, other income and pension and 401(k) plan benefits, (b) all claims arising under the Share Award Agreements, or the Sixth Amended and Restated Shareholders Agreement of Athene Holding Ltd. dated as of April 4, 2014 (the "Shareholders Agreement"), (c) all claims that were or could have been asserted by you or on your behalf: (i) in any federal, state, or local court, commission, or agency; or (ii) under any common law theory (including without limitation all claims for breach of contract (oral, written or implied), wrongful termination, defamation, invasion of privacy, infliction of emotional distress, tortious interference, fraud, estoppel, unjust enrichment, and any other contract, tort or other common law claim of any kind); and (d) all claims that were or could have been asserted by you or on your behalf under the Age Discrimination in Employment Act (as amended, including by the Older Workers' Benefit Protection Act) and any other federal, state, or local, employment, services or other law, regulation, ordinance, constitutional provision, executive order or other source of law, including without limitation under any of the following laws, as amended from time to time: the Rehabilitation Act of 1973 (including Section 504 thereof), the Civil Rights Act of 1866, Title VII of the Civil Rights Act of 1964, the Civil Rights Act of 1991, the Equal Pay Act, the National Labor Relations Act, the Worker Adjustment and Retraining Notification Act, the Americans With Disabilities Act, the Employee Retirement Income Security Act, the Lilly Ledbetter Fair Pay Act of 2009,

the Family and Medical Leave Act, the Fair Credit Reporting Act, and the Genetic Information Non-Discrimination Act. Notwithstanding the foregoing, the releases and waivers in this Paragraph 9 shall not apply to any claim that by law is non-waivable, such as claims for unemployment or workers' compensation benefits. In consideration of your release of the Company and the other Released Parties, the Company hereby releases you from any and all claims which it has or ever had against you, to the extent known by the Company or of which the Company should reasonably be aware, arising from or related to any act, omission or thing occurring or existing at any time prior to the date that the Company signs this Agreement including, but not limited to, any and all claims that in any way result from, or relate to, your employment, compensation other terms and conditions of employment, or termination from employment with the Company or any of the Released Parties, provided, however, that the Company is not releasing you from or with respect to, and the foregoing release by the Company does not include, any claims arising out of any criminal, fraudulent, intentionally wrongful or reckless conduct or other gross misconduct by you.

10. You represent and warrant that you have not filed or initiated any legal or other proceedings against any of the Released Parties, that no such proceedings have been initiated against any of the Released Parties on your behalf, that you are the sole owner of the claims that are released in Paragraph 9 above, that none of those claims has been transferred or assigned or caused to be transferred or assigned to any other person, firm or other legal entity, and that you have the full right and power to grant, execute, and deliver the releases, undertakings and agreements contained in this Agreement.

11. Except as otherwise expressly provided in this Agreement, you acknowledge and agree that you are not entitled to and will not receive any other compensation, payments, benefits or recovery of any kind from the Company or the other Released Parties. In the event of any further proceedings whatsoever based upon any claim released in this Agreement, you hereby waive, and agree that you will not have and the Released Parties will not be liable to you for, any further monetary or other recovery of any kind arising out of or related to any such matter, including without limitation any costs, expenses and attorneys' fees incurred by you or on your behalf.

12. You agree to refrain from all conduct that disparages or damages the reputation, goodwill, or standing in the community of the Company or any of the other Released Parties, provided that nothing herein shall prohibit you from giving truthful testimony or evidence to a governmental entity, or if properly subpoenaed or otherwise required to do so under applicable law. The Company agrees to direct its executive officers and/or senior management to refrain from all conduct, verbal or otherwise, that disparages or damages your reputation, goodwill, or standing in the community, provided that nothing herein shall prohibit any such executive officer and/or senior management from giving truthful testimony or evidence to a governmental entity, or if properly subpoenaed or otherwise required to do so under applicable law. You shall direct all third parties inquiring or reasonably likely to seek a reference verification about your employment with the Company to Kristi Kaye Burma, SVP, Human Resources or John Golden, EVP, Legal (or their respective successors), Athene USA Corporation, 7700 Mills Civic Parkway, West Des Moines, IA 50266. You agree that, should you seek personal references from any then current Company employee, you shall notify the Company of your intent to do so along with the names of such individuals. You acknowledge and agree that any personal reference provided by a current employee of the Company (i) shall be entirely voluntarily on behalf of such individual and shall not be considered to have been given in the individual's capacity as a Company employee, (ii) shall be considered as having been given outside the scope of such individual's duties and responsibilities as an employee of the Company and (iii) shall not be deemed as having been given or endorsed by the Company.

13. For a period of three years following the Separation Date, you agree to cooperate fully with the Company and the other Released Parties in any administrative, investigative, litigation or other legal or financial statement matter(s) that may arise or have arisen involving the Company or any of the other Released Parties and which in any way relate to or involve your employment with the Company, provided that any such cooperation shall not unreasonably interfere with your then current employment or business activities. Your obligation to cooperate hereunder shall include, without limitation, meeting and conferring with such persons at such times and in such places as the Company and the other Released Parties may reasonably require, and giving truthful evidence and truthful testimony and executing and delivering to the Company and any of the other Released Parties any truthful papers reasonably requested by any of them. You shall be

reimbursed for reasonable out-of-pocket expenses (including reasonable travel and hotel accommodations) that you incur in rendering cooperation requested by the Company after the Separation Date pursuant to this Paragraph 13 subject in each case to your provision to the Company of reasonable documentation of all such activities, time and amounts within fourteen (14) days after incurring such expenses or rendering such cooperation, as applicable. To the extent that the cooperation under this Paragraph 13 requires more than a de minimis amount of time, you and the Company agree to negotiate mutually acceptable remuneration for such additional cooperation. You shall be solely responsible for any and all federal, state, local and other taxes payable with respect to any and all such cooperation payments.

14. YOU ACKNOWLEDGE, UNDERSTAND, AND AGREE THAT: (i) YOU HAVE READ AND UNDERSTAND THE TERMS AND EFFECT OF THIS AGREEMENT; (ii) YOU RELEASE AND WAIVE CLAIMS UNDER THIS AGREEMENT KNOWINGLY AND VOLUNTARILY, IN EXCHANGE FOR CONSIDERATION IN ADDITION TO ANYTHING OF VALUE TO WHICH YOU ALREADY ARE ENTITLED; (iii) YOU HEREBY ARE AND HAVE BEEN ADVISED TO HAVE YOUR ATTORNEY REVIEW THIS AGREEMENT (AT YOUR COST) BEFORE SIGNING IT; (iv) YOU HAVE TWENTY-ONE (21) DAYS IN WHICH TO CONSIDER WHETHER TO EXECUTE THIS AGREEMENT; AND (v) WITHIN SEVEN (7) DAYS AFTER THE DATE ON WHICH YOU SIGN THIS AGREEMENT, YOU MAY, AT YOUR SOLE OPTION, REVOKE THE AGREEMENT UPON WRITTEN NOTICE TO KRISTI KAYE BURMA, SENIOR VICE PRESIDENT, HUMAN RESOURCES, ATHENE USA CORPORATION, 7700 MILLS CIVIC PARKWAY, WEST DES MOINES, IA 50266, AND THE AGREEMENT WILL NOT BECOME EFFECTIVE OR ENFORCEABLE UNTIL THIS SEVEN-DAY REVOCATION PERIOD HAS EXPIRED WITHOUT ANY REVOCATION BY YOU. IF YOU REVOKE THIS AGREEMENT, IT SHALL BE NULL AND VOID.

15. You expressly acknowledge and agree that the payments and benefits set forth in Paragraph 2 of this Agreement are expressly contingent upon (i) your signing this Agreement within 21 days after your original receipt thereof, (ii) your signing the Supplemental Release attached to this Agreement no earlier than the Separation Date, (iii) your returning the signed Agreement and the signed Supplemental Release to Kristi Kaye Burma, Senior Vice President, Human Resources, Athene Holding, 7700 Mills Civic Parkway, West Des Moines, IA 50266, (iii) the revocation period set forth in Paragraph 14 above and the Supplemental Release expiring without you having revoked this Agreement or the Supplemental Release, and (iv) your compliance with this Agreement (including without limitation the provisions of the Share Award Agreements referenced in Paragraph 8 above).

16. Nothing in this Agreement is intended to or shall be construed as an admission by the Company or any of the other Released Parties that any of them violated any law, interfered with any right, breached any obligation or otherwise engaged in any improper or illegal conduct with respect to you or otherwise. The Company and the other Released Parties expressly deny any such illegal or wrongful conduct.

17. All notices and other communications required or permitted under this Agreement shall be deemed to have been duly given and made if in writing and if served personally on the party for whom intended or deposited, postage prepaid, certified or registered mail, return receipt requested, in the United States mail to your address above, if the notice is to you, or if the notice is to the Company, to John Golden (or his successor), Athene USA Corporation, 7700 Mills Civic Parkway, West Des Moines, IA 50266, or to such other address as either party may designate in writing thereafter.

18. This Agreement shall be construed and interpreted in accordance with the internal laws of the State of New York, without regard to its choice of law rules.

19. The parties agree that in the event any of the provisions in this Agreement (including without limitation the Share Award Agreements) are found by a court of competent jurisdiction to be unreasonable or otherwise unenforceable (including without limitation as to scope, duration, area or otherwise), it is the purpose and intent of the parties that any such provisions be deemed modified or limited to the maximum extent permitted under applicable law so that, as modified or limited, such provisions may be enforced to the fullest extent possible. Whenever possible, each provision of this Agreement will be interpreted in such manner as to be effective and

valid under applicable law, but if any provision of this Agreement is held to be prohibited by or invalid under applicable law (after any appropriate modification or limitation pursuant to the preceding sentence), such provision will be ineffective only to the extent of such prohibition or invalidity, without invalidating the remainder of such provision or the remaining provisions of this Agreement.

20. This Agreement is intended to comply with the requirements of Section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), and shall be interpreted and construed consistently with such intent. Payments provided herein are intended to be exempt from Section 409A of the Code to the maximum extent possible, under either the separation pay exemption pursuant to Treasury regulation §1.409A-1(b)(9)(iii) or as short-term deferrals pursuant to Treasury regulation §1.409A-1(b)(4). Each payment and benefit hereunder shall constitute a "separately identified" amount within the meaning of Treasury regulation §1.409A-2(b)(2). In the event the terms of this Agreement would subject you to taxes or penalties under Section 409A of the Code ("409A Penalties"), the Company and you shall cooperate diligently to amend the terms of this Agreement to avoid such 409A Penalties, to the extent possible; provided that in no event shall the Company be responsible for any 409A Penalties that arise in connection with any amounts payable under this Agreement. Any amount of expenses eligible for reimbursement, or in-kind benefit provided, during a calendar year shall not affect the amount of expenses eligible for reimbursement, or in-kind benefit to be provided, during any other calendar year. Any reimbursement shall be made no later than the last day of the calendar year following the calendar year in which the expenses to be reimbursed were incurred. The right to any reimbursement or in-kind benefit pursuant to this Agreement shall not be subject to liquidation or exchange for any other benefit.

If you understand and agree with the foregoing terms and conditions, please sign one original of this Agreement and return it to me.

Very truly yours,

ti Kaye Burma

Kristi Kaye Burma
SVP Human Resources
Athene Holding Ltd.

I have read, understand, and voluntarily agree to be bound by each of the terms contained in this Agreement.

SUPPLEMENTAL RELEASE

Athene Holding Ltd. and its affiliates (the "Company") and Chip Smith (the "Employee") hereby enter into this Supplemental Release ("Release") in accordance with the Separation Agreement and General Release between the Company and the Employee dated as of _______________, ____ (the "Agreement"). Capitalized terms not expressly defined in this Release shall have the meanings set forth in the Agreement:

1. The Employee understands and agrees that the Employee's execution of this Release within 21 days after (but not before) the Separation Date, without revocation thereof as provided therein, is among the conditions precedent to the Company's obligation to provide any of the payments or benefits set forth in Paragraph 2 of the Agreement. The Company will provide such payments or benefits in accordance with the terms of the Agreement once the conditions set forth therein and in this Release have been met.

2. The term "Released Parties" as used in this Release includes the Company and any and all parents, divisions, subsidiaries, partnerships, affiliates and/or other related entities of the Company (whether or not such entities are wholly owned) and each of those entities' past, present, and future owners, trustees, fiduciaries, shareholders, directors, officers, administrators, agents, representatives, members, associates, partners, employees, attorneys, and the predecessors, successors, and assigns of each of them.

3. The Employee, and anyone claiming through the Employee or on the Employee's behalf, hereby agrees to fully, finally and forever waive, release and discharge the Released Parties from any and all claims, whether known or unknown, which the Employee has, has ever had, or may ever have against any of the Released Parties arising from or related to any act, omission, or thing occurring at any time prior to or on the date of this Release including, but not limited to, any and all claims that in any way result from, or relate to, the Employee's employment, compensation, other terms and conditions of employment, or termination from employment with the Company or any of the Released Parties, except benefits to which you are entitled, such as COBRA, other income and pension and 401(k) plan benefits. These released claims include, but are not limited to, (a) all claims for any compensation payments, bonus, severance pay, equity or any other compensation or benefit, except benefits to which you are entitled, such as COBRA, other income and pension and 401(k) plan benefits, (b) all claims arising under the Share Award Agreements (as defined in the Agreement), or the Sixth Amended and Restated Shareholders Agreement of Athene Holding Ltd. dated as of April 4, 2014 (the "Shareholders Agreement"), (c) all claims that were or could have been asserted by the Employee or on the Employee's behalf: (i) in any federal, state, or local court, commission, or agency; or (ii) under any common law theory (including without limitation all claims for breach of contract (oral, written or implied), wrongful termination, defamation, invasion of privacy, infliction of emotional distress, tortious interference, fraud, estoppel, unjust enrichment, and any other contract, tort or other common law claim of any kind); and (d) all claims that were or could have been asserted by the Employee or on the Employee's behalf under the Age Discrimination in Employment Act (as amended, including by the Older Workers' Benefit Protection Act) and any other federal, state, or local, employment, services or other law, regulation, ordinance, constitutional provision, executive order or other source of law, including without limitation under any of the following laws, as amended from time to time: the Rehabilitation Act of 1973 (including Section 504 thereof), the Civil Rights Act of 1866, Title VII of the Civil Rights Act of 1964, the Civil Rights Act of 1991, the Equal Pay Act, the National Labor Relations Act, the Worker Adjustment and Retraining Notification Act, the Americans With Disabilities Act, the Employee Retirement Income Security Act, the Lilly Ledbetter Fair Pay Act of 2009, the Family and Medical Leave Act, the Fair Credit Reporting Act, and the Genetic Information Non-Discrimination Act. Notwithstanding the foregoing, the releases and waivers in this Paragraph 3 shall not apply to any claim that by law is non-waivable, such as claims for unemployment or workers' compensation benefits.

4. The Employee confirms that the Employee has not filed any legal or other proceeding(s) against any of the Released Parties, is the sole owner of and has not transferred the claims released herein, and has the full right to grant the releases and agreements in this Release. In the event of any further proceedings based upon any released matter, none of the Released Parties shall have any further monetary or other obligation of any kind to the Employee.

5. THE EMPLOYEE ACKNOWLEDGES, UNDERSTANDS, AND AGREES THAT: (a) THE EMPLOYEE HAS READ AND UNDERSTANDS THE TERMS AND EFFECT OF THIS RELEASE; (b)

THE EMPLOYEE RELEASES AND WAIVES CLAIMS UNDER THIS RELEASE KNOWINGLY AND VOLUNTARILY, IN EXCHANGE FOR CONSIDERATION IN ADDITION TO ANYTHING OF VALUE TO WHICH THE EMPLOYEE ALREADY IS ENTITLED; (c) THE EMPLOYEE HEREBY IS AND HAS BEEN ADVISED OF THE EMPLOYEE'S RIGHT TO HAVE THE EMPLOYEE'S ATTORNEY REVIEW THIS RELEASE (AT THE EMPLOYEE'S COST) BEFORE SIGNING IT; (d) THE EMPLOYEE HAS TWENTY-ONE (21) DAYS IN WHICH TO CONSIDER WHETHER TO EXECUTE THIS RELEASE; AND (e) WITHIN SEVEN (7) DAYS AFTER THE DATE ON WHICH THE EMPLOYEE SIGNS THIS RELEASE, THE EMPLOYEE MAY, AT THE EMPLOYEE'S SOLE OPTION, REVOKE THE RELEASE UPON WRITTEN NOTICE TO KRISTI KAYE BURMA, SENIOR VICE PRESIDENT, HUMAN RESOURCES, ATHENE HOLDING, 7700 MILLS CIVIC PARKWAY, WEST DES MOINES, IA 50266, AND THE RELEASE WILL NOT BECOME EFFECTIVE UNTIL THIS SEVEN-DAY REVOCATION PERIOD HAS EXPIRED WITHOUT ANY REVOCATION BY THE EMPLOYEE. IF THE EMPLOYEE REVOKES THIS RELEASE, IT SHALL BE NULL AND VOID, AND THE EMPLOYEE WILL NOT RECEIVE THE PAYMENTS OR BENEFITS UNDER THE AGREEMENT.

6. Nothing in this Release is intended to or shall be construed as an admission by any of the Released Parties that any of them violated any law, breached any obligation or otherwise engaged in any improper or illegal conduct with respect to the Employee or otherwise. The Released Parties expressly deny any such illegal or wrongful conduct. This Release, the Agreement and any other agreements specified in Paragraph 10 of the Agreement are the entire agreement of the parties regarding the matters described in such agreements and supersede any and all prior and/or contemporaneous agreements, oral or written, between the parties regarding such matters. This Release is governed by New York law, may be signed in counterparts, and may be modified only by a writing signed by all parties.

THE PARTIES STATE THAT THEY HAVE READ AND UNDERSTAND THE FOREGOING AND KNOWINGLY AND VOLUNTARILY INTEND TO BE BOUND THERETO:

ATHENE HOLDING LTD.

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY OF 2002

I, James R. Belardi, certify that:

1. I have reviewed this Annual Report on Form 10-K of Athene Holding Ltd.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) [Paragraph omitted in accordance with Exchange Act Rule 13a-14(a)];

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Consolidated Financial Statements

Years ended December 31, 2015, 2014, and 2013

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
of Athene Holding Ltd.:

In our opinion, the consolidated balance sheet and the related consolidated statements of income, comprehensive income (loss), equity and cash flows present fairly, in all material respects, the financial position of Athene Holding Ltd. and its subsidiaries at December 31, 2015, and the results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules as of and for the year ended December 31, 2015 listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedules based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

See accompanying notes to consolidated financial statements

1. Organization and Corporate Structure

Athene Holding Ltd. (AHL), a Bermuda exempted company, together with its subsidiaries (collectively, Athene, we, our, us, or the Company), is a leading retirement services company that issues, reinsures, and acquires retirement savings products in all 50 U.S. states, the District of Columbia, and Germany.

We conduct business primarily through the following consolidated subsidiaries:

- Athene Life Re Ltd., a Bermuda exempted company to which AHL's other insurance subsidiaries and third party ceding companies directly and indirectly reinsure a portion of their liabilities (ALRe);
- Athene USA Corporation, an Iowa corporation and its subsidiaries (Athene USA); and
- Athene Deutschland GmbH & Co. KG, a German partnership and its subsidiaries (ADKG).

In addition, we consolidate the following variable interest entities (VIE), for which we have determined that we are the primary beneficiary:

- AAA Investments (Co-Invest VI), L.P., a Delaware limited partnership (CoInvest VI);
- AAA Investments (Co-Invest VII), L.P., a Delaware limited partnership (CoInvest VII);
- AAA Investments (Other), L.P., a Marshall Islands limited partnership (CoInvest Other);
- London Prime Apartments Guernsey Holdings Limited, a Guernsey limited company (London Prime); and
- 2012 CMBS-I Fund L.P., a Delaware limited partnership, and 2012 CMBS-II Fund L.P., a Delaware limited partnership (collectively, CMBS Funds).

2. Change in Accounting Policy and Revisions

Subsequent to the original issuance of the consolidated financial statements, we adopted a change in accounting principle regarding the balance sheet presentation of assets and liabilities associated with reinsurance agreements written on a modified coinsurance (modco) basis. The funds withheld assets and liabilities arising from modco contracts are now presented gross of the corresponding policy benefit liabilities on the consolidated balance sheets, whereas these assets and liabilities were previously presented net on a contract-by-contract basis. We determined gross presentation is preferable to net presentation on the basis that gross presentation increases transparency and aligns the presentation of modco reinsurance with that of funds withheld coinsurance, which is an economically equivalent form of reinsurance. Additionally, we expect increased use of modco reinsurance in our ongoing business operations, and believe gross presentation is necessary to best reflect the economic impact of modco transactions.

We applied this change retrospectively on the consolidated balance sheets, as well as the corresponding classification changes within operating activities on the consolidated statements of cash flows. There was no impact to the consolidated statements of income, consolidated statements of comprehensive income, or consolidated statements of equity resulting from this change.

We have also revised our consolidated financial statements as a result of correcting immaterial misstatements. We assessed the materiality of these revisions and concluded these revisions are not material to the consolidated financial statements as a whole. However, we elected to revise the consolidated financial statements to increase accuracy of the consolidated financial statements, as well as consistency and comparability with balances and activities to be reported in future periods.

The following is a summary of the impacts of the change in accounting policy and revisions on the consolidated balance sheets:

	December 31, 2015

The following is a summary of the impacts of the revisions on the consolidated statement of comprehensive loss:

	Year ended December 31, 2015		
(In millions)	As Previously Reported	Revisions	As Adjusted
Net income	$ 579	$ (1)	$ 578
Other comprehensive loss, before tax			
Comprehensive loss on foreign currency translation adjustments	(2)	(2)	(4)
Other comprehensive loss, before tax	(1,303)	(2)	(1,305)
Income tax benefit related to other comprehensive loss	(424)	—	(424)
Other comprehensive loss, after tax	(879)	(2)	(881)
Comprehensive loss	(300)	(3)	(303)
Less: comprehensive income attributable to noncontrolling interests	16	—	16
Comprehensive loss available to Athene Holding Ltd. shareholders	$ (316)	$ (3)	$ (319)

For the years ended December 31, 2014, and 2013, the only impact to the consolidated statements of comprehensive income were the revisions to net income for the corresponding year.

We revised the consolidated statements of equity for the years ended December 31, 2015, 2014, and 2013, for the changes to net income and other comprehensive income (loss) as presented above. In addition, the balance of retained earnings was revised from $433 million to $427 million as of December 31, 2012, as a result of revisions to periods prior to 2013.

The following is a summary of the impacts of change in accounting policy and revisions on the impacted lines of the consolidated statements of cash flows:

	Year ended December 31, 2015			
(In millions)	As Previously Reported	Change in Accounting Policy	Revisions	As Adjusted

3. Summary of Significant Accounting Policies

Consolidation and Basis of Presentation—The consolidated financial statements of the Company include our wholly owned subsidiaries, investees we control, and any variable interest entities where we are the primary beneficiary. Investments in entities that we do not control, but have the ability to exercise significant influence over operating and financing decisions, other than investments for which we have elected the fair value option, are accounted for under the equity method. Intercompany balances and transactions have been eliminated.

For entities that are consolidated, but not 100% owned, we allocate a portion of the income or loss and corresponding equity to the owners other than the Company. We include the aggregate of the income or loss and corresponding equity that is not owned by the Company in noncontrolling interests in the consolidated financial statements.

We report investments in related parties and assets and liabilities of consolidated VIEs separately, as further described in the accounting policies that follow.

We have prepared the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual experience could materially differ from these estimates and assumptions. The Company's principal estimates impact:

- fair value of investments;
- impairment of investments and valuation allowances;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs (DAC), deferred sales inducements (DSI), and value of business acquired (VOBA);
- future policy benefit reserves;
- valuation allowances on deferred tax assets; and
- stock-based compensation.

Additional details around these principal estimates and assumptions are discussed in the significant accounting policies that follow and the related footnote disclosures.

Investments

Fixed Maturity and Equity Securities – Fixed maturity securities includes bonds, collateralized loan obligations (CLO), asset-backed securities (ABS), residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), and redeemable preferred stock. Equity securities includes common stock, mutual funds, and non-redeemable preferred stock. We classify fixed maturity and equity securities as available-for-sale (AFS) or trading at the time of purchase and subsequently carry them at fair value. Fair value hierarchy and valuation methodologies are discussed in *Note 7 – Fair Value*. Classification is dependent on a variety of factors including our expected holding period, election of the fair value option, and asset and liability matching.

AFS Securities – Unrealized gains and losses on AFS securities, net of tax and adjustments to DAC, DSI, VOBA, and future policy benefits, if applicable, are generally reflected in accumulated other comprehensive income (AOCI) on the consolidated balance sheets. Unrealized gains or losses relating to identified risks within AFS securities in fair value hedging relationships are reflected in investment related gains (losses) on the consolidated statements of income.

Trading Securities – We elected the fair value option for certain fixed maturity securities. These fixed maturity securities are classified as trading, with changes to fair value included in investment related gains (losses) on the consolidated statements of income. Although the securities are classified as trading, the trading activity related to these investments is primarily focused on asset and liability matching activities and is not intended to be an income strategy based on active trading. As such, the activity related to these investments on the consolidated statements of cash flows is classified as investing activities. Trading securities include mutual funds supporting unit-linked investment contracts.

We generally record security transactions on a trade date basis, with any unsettled trades recorded in other assets or other liabilities on the consolidated balance sheets. Private placement and investment fund purchases are recorded on a settlement date basis.

Purchased Credit Impaired (PCI) Securities – We purchase certain structured securities, primarily RMBS, having deterioration in credit quality since their issuance, which meet the definition of PCI securities. We determined, based on our expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that we would not collect all contractually required payments, including both principal and interest and considering the effects of prepayments for these PCI securities. Based on these assumptions, the difference between the undiscounted expected future cash flows of the PCI securities and the recorded investment in the securities represents the initial accretable yield, which is accreted into investment income, net of related expenses, over their remaining lives on a level-yield basis. The difference between the contractually required payments on the PCI securities and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change.

Quarterly, we evaluate the undiscounted expected future cash flows associated with PCI securities based on updates to key assumptions. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI securities will change the accretable yield prospectively. Declines in undiscounted expected future cash flows due to further credit deterioration, as well as changes in the expected timing of the cash flows, can result in the recognition of an other-than-temporary impairment (OTTI) charge, as PCI securities are subject to our policy for evaluating investments for OTTI. Significant increases in undiscounted expected future cash flows are recognized prospectively as an adjustment to the accretable yield.

Mortgage Loans – Mortgage loans are primarily stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on its contractual interest rate. We record amortization of premiums and discounts using the effective yield method, and contractual cash flows on the underlying loan. We accrue interest on loans until it is probable we will not receive interest or the loan is 90 days past due. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income on the consolidated statements of income. We have also elected the fair value option on a portion of our mortgage loans.

Investment Funds – We invest in certain non-fixed income, alternative investments in the form of limited partnerships or similar legal structures (investment funds). For investment funds in which we have determined we are not the primary beneficiary, and therefore not required to consolidate, we typically record these investments using the equity method of accounting, where the cost is recorded as an investment in the fund. Adjustments to the carrying amount reflect our pro rata ownership percentage of the operating results as indicated by net asset value (NAV) in the investment fund financial statements, which can be on a lag of up to three months when investee information is not received in a timely manner.

We record our proportionate share of investment fund income within net investment income on the consolidated statements of income. Contributions paid or distributions received by the Company are recorded directly to the investment fund balance as an increase to carrying value or as a return of capital, thus reducing our carrying value.

Policy Loans – Policy loans are funds provided to policyholders in return for a claim on the policy's account value. The funds provided are limited to a specified percentage of the account balance. The majority of policy loans do not have a stated maturity and the balances and accrued interest are repaid with proceeds from the policy account balance. Policy loans are reported at the unpaid principal balance. Interest income is recorded as earned using the contract interest rate and is reported in net investment income on the consolidated statements of income.

Funds Withheld at Interest – Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which we act as reinsurer. Assets equal to statutory reserves are withheld and legally owned by the ceding company. We periodically settle interest accruing to those assets at rates defined by the terms of the agreement. The underlying agreements contain embedded derivatives as discussed below.

Real Estate – Real estate investments are stated at cost less accumulated depreciation. Depreciation is recorded on a straight-line basis over the estimated useful life of the asset, which is typically 40 years, and is included in net investment income on the consolidated statements of income. We periodically review our real estate investments for impairment and test for recoverability when events or changes in circumstances indicate the carrying value may not be recoverable and exceeds its estimated fair value. We recognize an impairment to fair value if the carrying amount of a property exceeds the expected undiscounted cash flows.

Real estate investments we commit to a plan to sell within one year and actively market are classified as held for sale. Real estate held for sale is stated at the lower of depreciated cost or estimated fair value less expected disposition costs and is not depreciated.

Short-term Investments – Short-term investments consists of financial instruments with maturities of greater than three months but less than twelve months when purchased. Short-term debt securities are accounted for as trading or available for sale consistent with our policies for those investments. Short-term loans are carried at amortized cost. Fair values are determined consistent with policies described in *Note 7 – Fair Value*, for the respective investment type.

Investment Income – We recognize investment income as it accrues or is legally due, net of investment management and custody fees. Investment income on fixed maturity securities includes coupon interest, as well as the amortization of any premiums and the accretion of any discount. Investment income on equity securities represents dividend income and preferred coupons. Realized gains and losses on sales of investments and other-than-temporary impairments are included on the consolidated statements of income in investment related gains (losses) and other comprehensive income (OCI). Realized gains and losses on investments sold are determined based on a first-in first-out method.

Other-Than-Temporary Impairment – We identify fixed maturity and equity securities that could potentially have impairments that are other-than-temporary by monitoring market events for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions, and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings, late payments, pricing levels, rating agency actions, key financial ratios, financial statements, revenue forecasts, and cash flow projections.

We review all securities on a case-by-case basis to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine that a security is other-than-temporarily impaired, an impairment loss is recognized.

We report impairment losses on equity securities in investment related gains (losses) on the consolidated statements of income. The recognition of impairment losses on fixed maturity securities on the consolidated financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost less any recorded credit loss, we recognize an OTTI in investment related gains (losses) on the consolidated statements of income for the difference between amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit loss portion in investment related gains (losses) on the consolidated statements of income and the non-credit loss portion in AOCI on the consolidated balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The techniques and assumptions for establishing the best estimate cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments, and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security-specific facts and circumstances including timing, security interests, and loss severity.

In periods after an OTTI loss is recognized on a fixed maturity security, we report the impaired security as if it had been purchased on the date it was impaired and continue to estimate the present value of the estimated cash flows of the security. Accordingly, the discount (or reduced premium) based on the new cost basis is accreted into net investment income over the remaining term of the fixed maturity security in a prospective manner based on the amount and timing of estimated future cash flows.

For equity method investments, we consider financial and other information provided by the investee, other known information and inherent risks in the underlying investments, as well as future capital commitments, in determining whether an impairment has occurred. Declines in value of equity method investments not expected to be recovered are reflected through impairment in other investment related gains (losses) on the consolidated statements of income.

We impair a mortgage loan when it is probable we will not collect all amounts due under the agreement. We establish a general valuation allowance on mortgage loans based on loss history. Additionally, we establish a valuation allowance on individual loans based on expected losses from future dispositions or settlement, including foreclosures. We calculate the allowance based on how much the carrying value exceeds one of these values:

- the present value of expected future cash flows discounted at the loan's original effective interest rate;
- the value of the loan's collateral if it is in the process of foreclosure or otherwise collateral dependent; or
- the loan's fair value if the loan is being sold.

We first apply any interest accrued or received on the net carrying amount of the impaired loan to the principal of the loan, and once the principal is repaid, we include amounts received in net investment income. We limit accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, we recognize interest income on a cash basis. Loans deemed uncollectible or in foreclosure are charged off against the valuation allowances, and subsequent recoveries, if any, are credited to the valuation allowances. Changes in valuation allowances are reported in investment related gains (losses) on the consolidated statements of income.

The cost of other invested assets is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within investment related gains (losses), and the cost basis of the investment securities is reduced accordingly. We do not change the revised cost basis for subsequent recoveries in value.

Derivative Instruments—We invest in derivatives to hedge the risks experienced in our ongoing operations, such as equity risk, interest rate risk, cash flow risks, or for other risk management purposes, which primarily involve managing liability risks associated with our indexed annuity products and reinsurance agreements. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or other underlying notional amount. Derivatives are carried at fair value on the consolidated balance sheets in derivative assets and derivative liabilities. We elect to present any derivatives subject to master netting provisions as a gross asset or liability and gross of collateral. Disclosures regarding balance sheet presentation of derivatives subject to master netting agreements are discussed in *Note 5 – Derivative Instruments*. We may designate derivatives as cash flow hedges. Derivatives in cash flow hedge relationships are designated as hedges of interest rate, market, foreign currency, or credit risk. Derivatives designated as cash flow hedges receive specialized accounting treatment and are thus subject to additional documentation and support requirements.

Hedge Documentation and Hedge Effectiveness – To qualify for hedge accounting, at the inception of the hedging relationship, we formally document our risk management objective and strategy for undertaking the hedging transaction, as well as our designation of the hedge as a cash flow hedge. In this documentation, we set forth how the hedging instrument is expected to hedge the designated risks related to the hedged item, the method that will be used to retrospectively and prospectively assess the hedging instrument's effectiveness, and the method which will be used to measure ineffectiveness. A derivative designated as a hedging instrument must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is formally assessed at inception and periodically throughout the life of the designated hedging relationship.

Changes in the fair value of the hedging instrument measured as ineffective are reported within investment related gains (losses) on the consolidated statements of income.

For a cash flow hedge, changes in the fair value of the hedging derivative measured as effective are reported within AOCI, and the related gains or losses on the derivative are reclassified into the consolidated statements of income when the cash flows of the hedged item affect earnings. Any ineffectiveness is reported in investment related gains (losses) on the consolidated statements of income each reporting period as effectiveness is assessed.

For a derivative not designated as a hedge, changes in the derivative's fair value are included in investment related gains (losses) on the consolidated statements of income. Any income received or paid on derivatives at the settlement dates is included in net investment income on the consolidated statements of income.

We discontinue hedge accounting prospectively when: (1) we determine the derivative is no longer highly effective in offsetting changes in the estimated cash flows of a hedged item; (2) the derivative expires, is sold, terminated, or exercised; or (3) the derivative is de-designated as a hedging instrument.

When hedge accounting is discontinued, the derivative continues to be carried on the consolidated balance sheets at fair value, with changes in fair value recognized in investment related gains (losses) on the consolidated statements of income.

Embedded Derivatives – We issue and reinsure products, primarily fixed indexed annuity products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the consolidated balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with fixed indexed annuities are reflected in interest sensitive contract benefits on the consolidated statements of income. Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains and losses on the host contract and derivative will be reflected within investment related gains (losses) on the consolidated statements of income.

Fixed indexed annuity and universal life insurance contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of the embedded derivative is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates, and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For contracts we issue to policyholders, the embedded derivative cash flows are discounted using the Company's own credit rating. For funds withheld reinsurance contracts, we do not use a credit spread as the funds are backed by the cedant's collateral. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

Additionally, reinsurance agreements written on a modco or funds withheld basis contain embedded derivatives. The fair value of the embedded derivatives on modco and funds withheld agreements is included in the funds withheld at interest and funds withheld liability lines on the consolidated balance sheets for assumed and ceded agreements, respectively. The change in the fair value of the embedded derivatives is recorded in investment related gains (losses) on the consolidated statements of income. Assumed and ceded earnings from funds withheld at interest, funds withheld liability, and changes in the fair value of embedded derivatives are reported in operating activities on the consolidated statements of cash flows. Contributions to and withdrawals from funds withheld at interest and funds withheld liability are reported in operating activities on the consolidated statements of cash flows.

Variable Interest Entities—An entity that does not have sufficient equity to finance its activities without additional financial support, or in which the equity investors, as a group, do not have the characteristics of a controlling financial interest is a VIE. The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and may require significant judgment. Our investment funds generally qualify as VIEs and are evaluated for consolidation under the VIE model.

We are required to consolidate a VIE if we are the primary beneficiary, defined as the variable interest holder with both the power to direct the activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. We determine whether we are the primary beneficiary of an entity based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and our relative exposure to the related risks of the VIE. Since affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo), a related party, are the decision makers in certain of the investment funds, we and a member of our related party group may together have the characteristics of the primary beneficiary of an investment fund. In this situation, we have generally concluded we are not under common control, as defined by ASU 2015-02, with the related party, and therefore consolidate in the circumstances when substantially all of the activities of the VIE are conducted on our behalf. We reassess the VIE and primary beneficiary determinations on an ongoing basis.

If we are not the primary beneficiary, but are able to exert significant influence over the VIE’s operations, we record the VIE as an equity method investment. If we are not able to exercise significant influence, generally on investment funds in which we own a less than a 3% interest, we elect the fair value option.

See *Note 6 – Variable Interest Entities* for discussion of our interest in entities that meet the definition of a VIE.

Business Combinations and Goodwill—Business combination transactions are accounted for under the acquisition method. Accordingly, the purchase consideration is allocated to assets and liabilities based on their estimated fair value at the acquisition date. The consideration for the net assets acquired is determined prior to the assessment of the fair value of the net assets at the acquisition date. We have identified several intangible assets acquired in business combinations including VOBA, acquired distribution channels, and state licenses. We value VOBA as described below under Deferred Acquisition Costs, Deferred Sales Inducements, and Value of Business Acquired. We value distribution channels using the multi-period excess earnings method under the income approach and the state licenses using the market approach. Distribution channels and state licenses are included in other assets on the consolidated balance sheets.

Goodwill represents the excess of purchase consideration over the acquisition date fair value of net assets acquired and is included in the other assets on the consolidated balance sheets for direct acquisitions by the Company. Goodwill representing the excess purchase price paid by CoInvest VII for MidCap Financial Holdings, LLC (MidCap Holdings) over the fair value of the net assets acquired is included in assets of consolidated VIEs on the consolidated balance sheets. As of January 2015, our consolidated VIEs no longer report goodwill as our consolidated VIE, CoInvest VII, no longer consolidates MidCap Holdings as discussed in *Note 6 – Variable Interest Entities.* Goodwill is not amortized but reviewed for impairment annually or more frequently if events occur or circumstances change indicating potential impairment has occurred. Goodwill impairment is first assessed using qualitative factors. Where the qualitative assessment indicates a potential impairment of goodwill, we complete a quantitative goodwill impairment test.

The quantitative goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed to measure the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit's goodwill exceeds the implied goodwill value, an impairment loss is recognized in an amount equal to the excess.

An excess of the acquisition date fair value of the net assets acquired over the purchase consideration in a business combination is recorded as a bargain purchase gain in the consolidated statements of income. See *Note 8 – Business Combinations* for details of business combination transactions.

Reinsurance—We assume and cede insurance and investment contracts under coinsurance, funds withheld coinsurance (funds withheld), and modified coinsurance (modco). We follow reinsurance accounting for transactions that provide indemnification against loss or liability relating to insurance risk (risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk consisting of underwriting, investment, timing risk, and any other significant risks. Cessions under reinsurance do not discharge our obligations as the primary insurer, unless the requirements of assumption reinsurance have been met. We generally have the right of offset on reinsurance contracts, but have elected to present reinsurance settlement amounts due to and from the Company on a gross basis.

For investment contracts, assets and liabilities assumed or ceded under coinsurance, funds withheld, or modco are presented gross on the consolidated balance sheets. The change in assumed and ceded reserves, deposits, and withdrawals are presented net in the interest sensitive contract benefits line on the consolidated statements of income. For insurance contracts, assets and liabilities assumed or ceded are presented gross on the consolidated balance sheets. The change in assumed and ceded reserves and benefits are presented net in the future policy and other policy benefits line on the consolidated statements of income. Assumed or ceded premiums are included in the premiums line of the consolidated statements of income.

Accounting for reinsurance requires the use of assumptions upon agreement inception, particularly related to the future performance of the underlying business and the potential impact of counterparty credit risks. We attempt to minimize our counterparty credit risk through the structuring of the terms of our reinsurance agreements, including the use of trusts, and we monitor credit ratings of counterparties for signs of declining credit quality. When a ceding company does not report information on a timely basis, we record accruals based on the best available information at the time, which includes the reinsurance agreement terms and historical experience. We periodically compare actual and anticipated experience to the assumptions used to establish reinsurance assets and liabilities. Refer to *Note 9 – Reinsurance* for more information.

Funds Withheld – For business assumed or ceded on a funds withheld basis, a funds withheld segregated portfolio comprised of invested assets and other assets is maintained by the ceding entity, which are sufficient to support the current balance of policy benefit liabilities of the ceded business on a statutory basis. The fair value of the funds withheld account is recorded as a funds withheld asset or liability and accrues interest payable at rates as defined by the agreement terms and is settled periodically. The underlying agreements include embedded derivatives, as further discussed above in the accounting policy for Derivative Instruments and *Note 7 – Fair Value*.

Modified Coinsurance – Modco is similar to funds withheld, except that the policy benefit liabilities are also not transferred to the assuming entity. For business assumed or ceded on a modco basis, the fair value of the funds withheld is accounted for under the same method described for funds withheld reinsurance above. Assumed policy benefit liabilities are included in interest sensitive contract benefits and ceded policy benefit liabilities are included in reinsurance recoverable on the consolidated balance sheets. The underlying agreements include embedded derivatives, as further discussed above in the accounting policy for Derivative Instruments and *Note 7 – Fair Value.*

Cash and Cash Equivalents—Cash and cash equivalents include deposits and short-term highly liquid investments with a maturity of less than 90 days from the date of acquisition. Amounts included are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

Restricted Cash—Restricted cash consists of cash and cash equivalents held in funds in trust as part of certain coinsurance agreements to secure all statutory reserves and liabilities of the coinsured parties, as well as assets pledged to secure the obligations under the funding agreements. Restricted cash within consolidated variable interest entities consisted of borrowers' escrows and reserves required to be held in separate accounts with MidCap Holdings' lenders and MidCap Holdings' principal and interest collections pledged to certain credit facilities. As of January 2015, our consolidated VIEs no longer report restricted cash as our consolidated VIE, CoInvest VII, no longer consolidates MidCap Holdings as discussed in *Note 6 – Variable Interest Entities.* Restricted cash is reported as a separate line item on the consolidated balance sheets. Changes in the restricted cash balance are reported in investing activities on the consolidated statements of cash flows.

Investments in Related Parties—Investments in related parties and associated earnings, other comprehensive income, and cash flows are separately identified on the consolidated financial statements and accounted for consistently with the policies described above for each category of investment.

Deferred Acquisition Costs, Deferred Sales Inducements, and Value of Business Acquired

Deferred Acquisition Costs and Deferred Sales Inducements – Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances. We adjust the DAC and DSI balances due to the OCI effects of net unrealized investment gains and losses on AFS securities. We perform periodic tests to determine if the deferred costs remain recoverable, including at issue. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive life and investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impact of amounts for the change in fair value of the derivatives and the change in fair value of the embedded derivatives. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. The balances associated with the preceding amortization methodology are recorded in deferred acquisition costs, deferred sales inducements, and value of business acquired on the consolidated balance sheets.

Deferred costs related to contracts with only investment related sources of revenues are amortized using the interest method. The interest method amortizes the deferred costs by discounting the future liability cash flows at a break-even rate. The break-even rate is solved such that the present value of future liability cash flows is equal to the net liability at the inception of the contract. The balances associated with this amortization methodology are recorded in deferred acquisition costs, deferred sales inducements, and value of business acquired on the consolidated balance sheets.

Value of Business Acquired – We establish VOBA for insurance contract blocks assumed with the acquisition of insurance entities. We record the fair value of the liabilities assumed in two components: reserves and VOBA. Reserves are established using our best estimate assumptions, and are further described in future policy benefits and interest sensitive contract liabilities. VOBA is the difference between the fair value and the reserves. VOBA can be either positive or negative. For interest sensitive life and investment-type contracts, any negative VOBA is recorded in interest sensitive contract liabilities on the consolidated balance sheets. For long duration and insurance contracts, any negative VOBA is recorded as part of future policy benefits on the consolidated balance sheets. Positive VOBA is recorded in deferred acquisition costs, deferred sales inducements, and value of business acquired on the consolidated balance sheets.

VOBA associated with funding agreements and immediate annuity contracts classified as investment contracts is amortized using the interest method. VOBA associated with immediate annuity contracts classified as long duration contracts is amortized at a constant rate in relation to net policyholder liabilities. For accumulation products, which include interest sensitive life and investment-type contracts with significant non-investment sources of revenue, VOBA is amortized in relation to the present value of estimated gross profits using methods consistent with those used to amortize DAC. Negative VOBA is amortized at a constant rate in relation to applicable net policyholder liabilities.

We adjust the VOBA balance due to the OCI effects of unrealized investment gains or losses on AFS securities. We perform periodic tests to determine if the VOBA remains recoverable. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of the VOBA which results in updates to the estimated future gross profits. The effects of changes in estimated future gross profits are recorded in the period in which the changes are made.

See *Note 10 – Deferred Acquisition Costs, Deferred Sales Inducements, and Value of Business Acquired* for further discussion.

Loans Held for Investment—Loans presented within assets of consolidated variable interest entities on the consolidated balance sheets consisted of commercial, industrial, and commercial real estate loans originated by MidCap Holdings. These loans were held for investment and MidCap Holdings had the ability and intent to hold them for the foreseeable future. We elected the fair value option to account for the loans held for investment and thus were carried at fair value. As of January 2015, our consolidated VIEs no longer report loans held for investment as our consolidated VIE, CoInvest VII, no longer consolidates MidCap Holdings as discussed in *Note 6 – Variable Interest Entities.*

Interest Sensitive Contract Liabilities—Interest sensitive life and investment-type contracts include fixed indexed and traditional fixed annuities in the accumulation phase, funding agreements, universal life insurance, fixed indexed universal life insurance, unit-linked contracts, and immediate annuities without significant mortality risk. We carry liabilities for fixed annuities, universal life insurance, unit-linked contracts, and funding agreements at the account balances without reduction for potential surrender or withdrawal charges, except for a block of universal life business ceded to Global Atlantic Financial Group Limited (Global Atlantic) which we carry at fair value. Liabilities for immediate annuities without significant mortality risk are calculated as a present value of future liability cash flows at contractual interest rates.

Changes in the interest sensitive contract liabilities are recorded in interest sensitive contract benefits or product charges on the consolidated statements of income. Interest sensitive contract liabilities are not reduced for amounts ceded under coinsurance agreements which are reported as reinsurance recoverable on the consolidated balance sheets. See *Note 9 – Reinsurance* for more information on reinsurance.

Future Policy Benefits—We issue contracts classified as long-duration, which includes endowments, term and whole life, accident and health, disability, and deferred and immediate annuities with life contingencies. Liabilities for non-participating long-duration contracts are established using accepted actuarial valuation methods which require the use of assumptions related to expenses, investment yields, mortality, morbidity, and persistency, with a provision for adverse deviation, at the date of issue or acquisition. Liabilities for participating long-duration contracts are established using accepted actuarial valuation methods, which require the use of guaranteed interest and mortality assumptions. As of December 31, 2015, and 2014, the reserve investment yield assumptions range from 1.25% to 5.44% and are specific to our expected earned rate on the asset portfolio supporting the reserves. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary.

For long-duration contracts, the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC, DSI, and VOBA) is less than the gross premium liability, impairment is deemed to have occurred, and the DAC, DSI, and VOBA asset balances are reduced until the net GAAP liability is equal to the gross premium liability. For deferred annuity policies classified as insurance contracts, if the DAC, DSI, and VOBA asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is posted to arrive at the gross premium liability.

We issue and reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance. We recognize the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality, and market conditions affecting the account balance growth.

Future policy benefits includes liabilities for no-lapse guarantees on universal life insurance and fixed indexed universal life insurance. We establish future policy benefits for no-lapse guarantees by estimating the expected value of death benefits paid after policyholder account balances have been exhausted. We recognize these benefits proportionally over the life of the contracts based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality, and market conditions affecting the account balance growth.

Changes in future policy benefits are recorded in future policy and other policy benefits on the consolidated statements of income. Future policy benefits are not reduced for amounts ceded under coinsurance agreements which are reported as reinsurance recoverable on the consolidated balance sheets. See *Note 9 – Reinsurance* for more information on reinsurance.

Closed Block Business—Two closed blocks of policies were established in connection with the reorganization of two predecessor subsidiaries from mutual companies to stock companies (collectively referred to as the Closed Blocks and individually referred to as the AmerUs Closed Block and the ILICO Closed Block). Insurance policies which had a dividend scale in effect as of each closed block establishment date were included in the respective closed block. The Closed Blocks were designed to give reasonable assurance to owners of insurance policies included therein that, after the reorganization, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization, if the experience underlying such scales and crediting continued. The assets, including related revenue, allocated to the Closed Blocks will accrue solely to the benefit of the policyholders included in the Closed Blocks until they no longer exist. A policyholder dividend obligation is required to be established for earnings in the Closed Blocks that are not available to the shareholders. See *Note 11 – Closed Block* for more information on the Closed Blocks.

Other Policy Claims and Benefits—Other policy claims and benefits include amounts payable relating to in course of settlements (ICOS) and incurred but not reported (IBNR) liabilities associated with interest sensitive contract liabilities and future policy benefits. For traditional life and universal life policies, ICOS claim liabilities are established when we are notified of the death of the policyholder but the claim has not been paid as of the reporting date. For immediate annuities and supplemental contracts, ICOS claim liabilities are established to accrue suspended benefit payments between the date of notification of death and the date of verification of death.

We determine IBNR claim liabilities using studies of past experience. The time that elapses from the death or claim date to when the claim is reported to us can vary significantly by product type, but generally ranges between one to six months for life business. We estimate IBNR claims on an undiscounted basis, using actuarial estimates of historical claims expense, adjusted for current trends and conditions. These estimates are continually reviewed and the ultimate liability may vary significantly from the amount recognized.

Dividends Payable to Policyholders—Participating policies entitle the policyholders to receive dividends based on actual interest, mortality, morbidity, and expense experience for the year. Dividends are distributed to the policyholders through annual or terminal dividends, which the Board of Directors of the applicable insurance subsidiary approves. As of December 31, 2015, and 2014, 78% and 49%, respectively, of traditional life policies inclusive of ceded policies were paying dividends, and the related liability is recorded in dividends payable to policyholders on the consolidated balance sheets. Premiums related to policies paying dividends represented 22%, 11%, and 10% of total life insurance direct premiums and deposits for the years ended December 31, 2015, 2014, and 2013, respectively. Traditional life policies inclusive of ceded policies represented 78% and 49% of the Company's individual life policies in force as of December 31, 2015, and 2014, respectively.

As of December 31, 2015, all of the non-separate account unit-linked policies were paying dividends, and the related liability is recorded in dividends payable to policyholders on the consolidated balance sheets. There were no material deposits related to non-separate account unit-linked policies paying dividends for the year ended December 31, 2015. Non-separate account unit-linked policies represented 2% of the Company’s interest sensitive contracts in force as of December 31, 2015. We did not have non-separate account unit-linked policies as of December 31, 2014, or 2013, since we acquired them in connection with the acquisition of Delta Lloyd Deutschland AG (DLD) on October 1, 2015, as discussed in *Note 8 – Business Combinations*.

Policyholder dividend liabilities are recorded in dividends payable to policyholders on the consolidated balance sheets and policyholder dividends are recorded in dividends to policyholders on the consolidated statements of income. For participating policies issued by our German subsidiaries, dividends payable to policyholders includes an adjustment to recognize timing differences between GAAP and local statutory earnings that reverse and enter into future calculations of dividends to policyholders. Except for changes due to unrealized gains or losses on AFS securities, the change in this adjustment is recorded in dividends to policyholders on the consolidated statements of income. Changes in this adjustment due to unrealized gains or losses on AFS securities are recorded in OCI.

Stock-Based Compensation—We have stock-based compensation plans under which restricted, incentive compensation share awards may be granted to the Company's employees and directors, and employees of Athene Asset Management, L.P. (AAM), an affiliated entity, as described in *Note 14 – Stock-based Compensation*. We recognize the fair value of stock-based compensation over a participant's requisite service period through a charge to compensation expense and a corresponding entry to equity or a liability based on vesting criteria and other pertinent terms of the awards. Stock-based awards are accounted for as equity awards in instances where the awards' vesting are linked to a market, performance, or service condition. Equity awards to employees are generally expensed based on the grant date fair value. For equity awards issued to non-employees, the fair value is remeasured through completion of counterparty performance. Employee and non-employee stock-based awards are accounted for as liabilities in instances where the awards' vesting criteria are linked to a factor other than a market, performance, or service condition. Liability awards are remeasured until settlement. In the event that awards are reclassified from liability to equity due to modification or other changes in circumstances, they are remeasured at fair value through the date of reclassification.

Earnings Per Share—We compute basic earnings per share (EPS) by dividing unrounded net income available to Athene Holding Ltd. shareholders by the weighted average number of Class A and Class B common shares outstanding for the period. As a result, it may not be possible to recalculate EPS as presented in our consolidated financial statements. Diluted earnings per share includes the effect of all potentially dilutive common shares outstanding during the period. See *Note 15 – Earnings Per Share* for further information.

Foreign Currency—The accounts of foreign-based subsidiaries are measured using the functional currency of the subsidiary. Revenue and expenses of these businesses are translated into United States dollars at the average exchange rate for the period. Assets and liabilities are translated at the exchange rate as of the end of the reporting period. The resulting translation adjustments are included in equity as a component of AOCI. Gains or losses arising from transactions denominated in a currency other than the functional currency of the entity that is party to the transaction are included in net income.

Recognition of Revenues and Related Expenses—Revenues for annuity and universal life-type products, including surrender and market value adjustments, costs of insurance, policy administration, GMDB, GLWB, and no-lapse guarantee charges, are earned when assessed against policyholder account balances during the period. Interest sensitive contract benefits related to annuity products include interest credited to policyholder account balances. In addition, the change in fair value of embedded derivatives within fixed indexed annuity contracts is included in interest sensitive contract benefits on the consolidated statements of income.

For certain assumed reinsurance transactions involving in force blocks of business, the ceding company may pay a premium equal to the initial required reserve (future policy benefit). In such transactions, we net the expense associated with the establishment of the reserve against the premiums from the transaction in interest sensitive contract benefits on the consolidated statements of income.

Premiums for traditional life insurance products, including products with fixed and guaranteed premiums and benefits, are recognized as revenues when due from policyholders.

All insurance related revenue is reported net of reinsurance ceded.

Income Taxes—We compute income taxes using the asset and liability method, under which deferred income taxes are provided for the temporary differences between the financial statement carrying amounts and the tax basis of our assets and liabilities using estimated tax rates expected to be in effect for the year in which the differences are expected to reverse. Changes in deferred tax assets and liabilities attributable to changes in enacted income tax rates are recorded in the period of enactment. Such temporary differences are primarily due to the tax basis of reserves, DAC, unrealized investment gains/losses, reinsurance related differences, embedded derivatives, and net operating loss carryforwards. Changes in deferred income tax assets and liabilities associated with components of OCI are recorded directly to OCI. We routinely evaluate the likelihood of realizing the benefit of our deferred tax assets and may record a valuation allowance if, based on all available evidence, we determine that it is more likely than not that some portion of the tax benefit will not be realized. We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the relevant taxing authorities, based on the technical merits of our position. We recognize any income tax interest and penalties in income tax expense.

See *Note 17 – Income Taxes* for discussion on withholding taxes for undistributed earnings of subsidiaries.

Adopted Accounting Pronouncements

Business Combinations – Measurement-Period Adjustments (ASU 2015-16)
This update eliminates the requirement that an acquirer in a business combination account for measurement-period adjustments retrospectively. Alternatively, an acquirer should recognize a measurement-period adjustment during the period in which it determines the amount of the adjustment. We elected to early adopt this standard effective October 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Debt Issuance Costs (ASU 2015-15 and 2015-03)
These updates require debt issuance costs related to a recognized debt liability or line of credit arrangement to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability and bring existing SEC guidance into conformity with this debt issuance cost guidance. We elected to early adopt this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Consolidation Analysis (ASU 2015-02)
This update changes the analysis a reporting entity performs to determine whether it should consolidate certain types of legal entities. The Company elected to adopt this guidance effective July 1, 2015, using the full retrospective method. The Company's consolidated financial statements for the year ended December 31, 2014, were reissued to reflect the results of the retrospective adoption.

The adoption of ASU 2015-02 resulted in the following changes to our consolidation assessment of certain variable interest entities (VIEs):

- Two real estate investment funds and one mortgage investment fund, which we previously consolidated, are deemed to be investment companies. Under the previous guidance, we were determined to be the primary beneficiary as we receive the majority of the rights to receive benefits or absorb losses. Upon adoption of ASU 2015-02, we concluded that substantially all of the activities of the VIE were not conducted on our behalf. Therefore, these VIEs are accounted for under the equity method of accounting upon adoption of ASU 2015-02.
- AAA Investments (Co-Invest VI), L.P. (CoInvest VI), AAA Investments (Co-Invest VII), L.P. (CoInvest VII), AAA Investments (Other), L.P. (CoInvest Other), and London Prime Apartments Guernsey Holdings Limited (London Prime) were previously not consolidated as they did not meet the definition of an investment company and the general partners in each of these funds had been determined to be the primary beneficiary as they had met both the power and economics criteria, or had been determined to be the most closely associated with these investment funds upon application of the related party tiebreaker criteria. Upon adoption of ASU 2015-02, the Company concluded that fees paid to the decision maker were not deemed variable interests. Substantially all of the activities of these VIEs were being conducted on our behalf and, therefore, are consolidated upon adoption of ASU 2015-02.
- The consolidation of CoInvest Fund VII also includes the consolidated financial results of its investee, MidCap Holdings, as of December 31, 2014. As of January 2015, MidCap Holdings is no longer consolidated by CoInvest VII as described in *Note 6 – Variable Interest Entities*.

Transfers and Servicing (ASU 2014-11)
This update requires repurchase-to-maturity transactions and repurchase financing arrangements be accounted for as secured borrowings and provides for enhanced disclosures, including the nature of collateral pledged and the time to maturity. We fully adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Discontinued Operations (ASU 2014-08)
This update changes the criteria related to reporting discontinued operations and introduces new disclosures. We adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Troubled Debt Restructuring (ASU 2014-04)
This update clarifies when an in substance repossession or foreclosure occurs, and when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. We adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Recently Issued Accounting Pronouncements

Revenue Recognition (ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14, and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guidance. ASU 2016-11 brings existing SEC guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Improvements to Employee Share-Based Payment Accounting (ASU 2016-09)
This update simplifies several aspects of the accounting for share-based payment award transactions, including income tax consequences, forfeitures, and classification on the statement of cash flows. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Derivatives and Hedging – Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Derivatives and Hedging – Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Financial Instruments – Recognition and Measurement (ASU 2016-01)
This update retains the current accounting for classifying and measuring investments in debt securities and loans, but requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Fair Value Measurement – Net Asset Value (ASU 2015-07)
This update has a disclosure-only impact for entities that measure investments using net asset value per share under the practical expedient in the fair value measurement guidance. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Cloud Computing Arrangements (ASU 2015-05)
This update clarifies whether a cloud computing arrangement is an intangible asset or a service contract. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Stock-Based Compensation (ASU 2014-12)
This update requires a performance target in a share-based payment arrangement that affects vesting and that could be achieved after the requisite service period to be treated as a performance condition. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

4. Investments

AFS Securities—The following table represents our AFS investments by asset type. Our AFS investment portfolio includes direct investments in affiliates of Apollo where Apollo can exercise significant influence over the affiliates. These investments are presented as investments in related parties on the consolidated balance sheets, and are separately disclosed below.

	December 31, 2015				
(In millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	OTTI in AOCI
Fixed maturity securities					
U.S. government and agencies	$ 44	$ 1	$ —	$ 45	$ —

Total AFS securities including related party	$ 10,721	$ (250)	$ 799	$ (36)	$ 11,520	$ (286)

At December 31, 2015, we held 2,855 AFS securities that were in an unrealized loss position. Of this total, 614 were in an unrealized loss position longer than 12 months. At December 31, 2015, we held 21 related party AFS securities that were in an unrealized loss position. Of this total, eight were in an unrealized loss position longer than 12 months. We did not recognize the unrealized losses in income because we have the intent and ability to hold these securities until sale or maturity, and believe the securities will recover the amortized cost basis prior to sale or maturity.

Other-Than-Temporary Impairments on AFS Securities—For the year ended December 31, 2015, on total AFS securities including related party of $48,531 million, we incurred $30 million of net OTTI losses, of which $9 million related to intent-to-sell impairments. These securities were impaired to fair value as of the impairment date. The remainder of net OTTI losses of $21 million related to credit impairments, of which $1 million related to credit loss impairments that we impaired to fair value and did not bifurcate a portion of the impairment in AOCI, and is also excluded from the rollforward below.

The following table represents a rollforward of the cumulative amounts recognized on the consolidated statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	Years ended December 31,		
(In millions)	2015	2014	2013
Beginning balance	$ 8	$ 3	$ 10
Initial impairments – credit loss OTTI recognized on securities not previously impaired	19	3	—
Additional impairments – credit loss OTTI recognized on securities previously impaired	1	2	—
Reduction in impairments from securities sold	(2)	—	(7)
Reduction for credit loss that no longer has a portion of the OTTI loss recognized in AOCI	(4)	—	—
Ending balance	$ 22	$ 8	$ 3

Net Investment Income—Net investment income by asset type consists of the following:

	Years ended December 31,		
(In millions)	2015	2014	2013
AFS securities			
Fixed maturity securities	$ 2,051	$ 1,868	$ 811
Equity securities	7	6	4
Trading securities	196	136	82
Mortgage loans, net of allowances	320	347	128
Investment funds	109	177	112
Cash and cash equivalents	2	5	1
Funds withheld at interest and modco	54	46	47

Other investments	21	3	7
Investment revenue	2,781	2,604	1,198
Investment expenses	(273)	(271)	(124)
Net investment income	$ 2,508	$ 2,333	$ 1,074

Investment Related Gains (Losses)—Investment related gains (losses) by asset type consist of the following:

	Years ended December 31,		
(In millions)	2015	2014	2013
AFS fixed maturity securities			
Gross realized gain on investment activity	$ 150	$ 203	$ 130
Gross realized loss on investment activity	(86)	(22)	(44)
Net realized investment gains on fixed maturity securities	64	181	86
AFS equity securities			
Gross realized gain on investment activity	1	1	8
Gross realized loss on investment activity	—	—	(1)
Net realized investment gains on equity securities	1	1	7
Net realized investment gains (losses) on trading securities	(228)	242	130
Derivative gains (losses)	(277)	792	707
Other gains (losses)	10	(6)	(3)
Investment related gains (losses)	$ (430)	$ 1,210	$ 927

Proceeds from sales of AFS securities were $6,899 million, $6,391 million, and $6,788 million, for the years ended December 31, 2015, 2014, and 2013, respectively.

Included in net realized investment gains (losses) on trading securities are losses of $133 million, gains of $258 million, and losses of $73 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2015, 2014, and 2013, respectively. Also included in net realized investment gains (losses) on trading securities are related party losses of $10 million, gains of $13 million, and gains of $22 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2015, 2014, and 2013, respectively.

Purchased Credit Impaired (PCI) Securities—The following table summarizes our PCI securities, which are included in AFS fixed maturity securities:

	December 31,	
(In millions)	2015	2014
Contractually required payments[1]	$ 7,291	$ 6,624
Less: Cash flows expected to be collected[2]	(4,986)	(4,632)
Non-accretable difference	$ 2,305	$ 1,992
Cash flows expected to be collected	$ 4,986	$ 4,632
Less: Amortized cost	(3,673)	(3,302)
Accretable difference	$ 1,313	$ 1,330
Fair value	$ 3,647	$ 3,432

[1] *Includes principal and accrued interest.*

[2] *Represents the acquisition date undiscounted principal and interest cash flows expected.*

We acquired PCI investments with the following amounts at the time of purchase:

	December 31,	
(In millions)	2015	2014
Contractually required principal and interest	$ 1,999	$ 4,167
Expected cash flows	1,277	2,400
Estimated fair value	937	2,375

The following tables summarize the activity for the accretable yield on PCI securities:

	Years ended December 31,		
(In millions)	2015	2014	2013
Beginning balance	$ 1,330	$ 1,254	$ 636
Purchases of PCI securities, net	243	513	683
Accretion	(113)	(117)	(72)
Changes in expected cash flows	(147)	(320)	7
Ending balance	$ 1,313	$ 1,330	$ 1,254

Mortgage Loans—Mortgage loans, net of allowances, consist of the following:

	December 31,	
(In millions)	2015	2014
Commercial mortgage loans	$ 5,400	$ 5,465
Residential mortgage loans	100	—
Mortgage loans, net of allowances	$ 5,500	$ 5,465

We primarily make commercial mortgage loans on income producing properties including hotels, industrial properties, retail buildings, and office buildings. We diversify the commercial mortgage loan portfolio by geographic region and property type to reduce concentration risk. Typically, we only lend up to 75% of the estimated fair value of the underlying real estate to manage risk in origination of a commercial mortgage loan. Subsequent to origination, we evaluate mortgage loans based on relevant current information to confirm if properties are performing at a consistent and acceptable level to secure the related debt.

The distribution of commercial mortgage loans, net of valuation allowances, by property type and geographic region is as follows:

	December 31,			
	2015		2014	
(In millions)	Net Carrying Value	Percentage of Total	Net Carrying Value	Percentage of Total
Property type				
Hotels	$ 877	16.2%	$ 705	12.9%
Retail	1,230	22.8%	1,338	24.5%
Office building	1,274	23.6%	1,301	23.8%
Industrial	821	15.2%	936	17.1%
Apartment	907	16.8%	809	14.8%
Other commercial	291	5.4%	376	6.9%
Total commercial mortgage loans	$ 5,400	100.0%	$ 5,465	100.0%
U.S. Region				
East North Central	$ 443	8.2%	$ 494	9.0%
East South Central	129	2.4%	151	2.8%
Middle Atlantic	804	14.9%	786	14.4%
Mountain	583	10.8%	692	12.7%
New England	181	3.3%	142	2.6%
Pacific	838	15.5%	836	15.3%
South Atlantic	1,231	22.8%	1,228	22.5%
West North Central	291	5.4%	320	5.8%
West South Central	792	14.7%	816	14.9%
Total U.S. Region	5,292	98.0%	5,465	100.0%
International Region	108	2.0%	—	—%
Total commercial mortgage loans	$ 5,400	100.0%	$ 5,465	100.0%

Mortgage Loan Valuation Allowance—We have a high quality, well performing commercial mortgage loan portfolio with the majority of mortgage loans classified as performing at December 31, 2015, and 2014. We have established a valuation allowance for collection loss on the mortgage loan portfolio. The valuation allowance was $2 million and $1 million at December 31, 2015, and 2014, respectively. There were no material impairments recorded or significant activity in the valuation allowance during the years ended December 31, 2015, 2014, and 2013.

The following provides the aging of our commercial mortgage loan portfolio, net of valuation allowances:

	December 31,	
(In millions)	2015	2014
Current (less than 30 days past due)	$ 5,360	$ 5,461
30 to 60 days past due	1	4
Over 90 days past due	39	—
Total commercial mortgage loans	$ 5,400	$ 5,465

Loan-to-value and debt service coverage ratios are measures we use to assess the risk and quality of mortgage loans.

The loan-to-value ratio is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A loan-to-value ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The following represents the loan-to-value ratio of the commercial mortgage loan portfolio, net of valuation allowances:

	December 31,	
(In millions)	2015	2014
Less than 50%	$ 2,159	$ 2,156
50% to 60%	1,173	1,579
61% to 70%	1,299	910
71% to 100%	698	820
Greater than 100%	71	—
Total commercial mortgage loans	$ 5,400	$ 5,465

The debt service coverage ratio, based upon the most recent financial statements, is expressed as a percentage of a property's net income to its debt service payments. A debt service ratio of less than 1.0 indicates a property's operations do not generate enough income to cover debt payments. The following represents the debt service coverage ratio of the commercial mortgage loan portfolio, net of valuation allowances:

	December 31,	
(In millions)	2015	2014
Greater than 1.20x	$ 4,455	$ 4,446
1.00x – 1.20x	471	474
Less than 1.00x	474	545
Total commercial mortgage loans	$ 5,400	$ 5,465

Real Estate—We did not record any material depreciation expense or accumulated depreciation on real estate during the year ended December 31, 2015. We acquired real estate investments in connection with the acquisition of DLD on October 1, 2015, as discussed in *Note 8 – Business Combinations*.

Funds Withheld at Interest—For reinsurance agreements written on a coinsurance funds withheld basis, assets equal to the net statutory reserves are withheld and legally owned by the ceding company. These are reflected as funds withheld at interest on the consolidated balance sheets. In the event of a ceding company's insolvency, we would need to assert a claim on the assets supporting our reserve liabilities. However, we have the ability to offset amounts we owe to the ceding company, which reduces our risk of loss. The embedded derivative of the funds withheld is separated from the host contract. See *Note 5 – Derivative Instruments* for further discussion.

Interest accrues at a risk free rate and the weighted average yield across all cedants was 1.8% and 2.1% as of December 31, 2015, and 2014, respectively. The return on the underlying assets directly impacts the host contract and the embedded derivative. The Company is subject to the investment performance on the withheld assets, although it does not directly control them. However, in each case, the ceding company has hired AAM, a related party investment management company, to manage the withheld assets in accordance with investment guidelines agreed to among the Company, the ceding company, and AAM. AAM manages these portfolios in accordance with such guidelines, taking into account the investment objectives of the Company given the applicable reinsurance relationship, and these portfolios remain subject to oversight of the applicable ceding company.

Investment Funds—Our investment fund portfolio consists of funds that employ various strategies and include investments in mortgage and real estate, credit, private equity, natural resources, and hedge funds. Investment funds meet the definition of variable interest entities and are discussed further in *Note 6 – Variable Interest Entities*.

5. Derivative Instruments

We use a variety of derivative instruments to manage equity risk, interest rate risk, credit risk, foreign currency risk, and market volatility. See *Note 3 – Summary of Significant Accounting Policies* for a description of our accounting policies for derivatives and *Note 7 – Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	December 31,					
	2015			2014		
	Notional	Fair Value		Notional	Fair Value	
(In millions)	Amount	Assets	Liabilities	Amount	Assets	Liabilities
Derivatives designated as hedges						
Foreign currency swaps	177	$ 14	$ —	223	$ 9	$ —
Derivatives not designated as hedges						
Equity options	25,176	831	—	27,402	1,792	108
Futures	—	9	1	—	15	—
Total return swaps	54	—	—	84	3	1
Foreign currency swaps	47	5	—	58	10	—
Interest rate swaps	859	2	8	1,184	2	14
Credit default swaps	10	—	7	10	—	7
Variance swaps	—	5	—	2	5	13
Foreign currency forwards	367	5	1	223	6	—
Embedded derivatives						
Funds withheld and modco	—	36	35	—	127	394
Interest sensitive contract liabilities	—	—	4,477	—	—	4,437
Total non-hedging derivatives		893	4,529		1,960	4,974
Total derivatives		$ 907	$ 4,529		$ 1,969	$ 4,974

Derivatives are included in derivative assets or liabilities on the consolidated balance sheets, with the exception of embedded derivatives. Funds withheld or modco embedded derivatives are included in funds withheld at interest or funds withheld liability on the consolidated balance sheets. Indexed annuity products embedded derivatives are included in interest sensitive contract liabilities on the consolidated balance sheets.

Derivative gains (losses) included in investment related gains (losses) on the consolidated statements of income are as follows:

	Years ended December 31,		
(In millions)	2015	2014	2013
Cash flow hedges	$ —	$ —	$ 1
Derivatives not designated as hedges	(277)	792	706
Total derivative gains (losses)	$ (277)	$ 792	$ 707

Derivatives Designated as Hedges

Cash flow hedges – We use foreign currency swaps to convert foreign currency denominated cash flows of an investment to U.S. dollars to reduce cash flow fluctuations due to changes in currency exchange rates. As of December 31, 2015, and 2014, we had five foreign currency swaps designated and accounted for as cash flow hedges. The foreign currency swaps will expire by June 25, 2027. There were no amounts deemed ineffective for the years ended December 31, 2015, 2014, and 2013. The following represents foreign currency swap gains (losses):

	Years ended December 31,		
(In millions)	2015	2014	2013
Gains (losses) recorded in AOCI	$ 9	$ (7)	$ (9)
Amounts reclassified to income in investment related gains (losses)	—	—	1
Total foreign currency swap gains (losses)	$ 9	$ (7)	$ (8)

Derivatives Not Designated as Hedges

Equity options – We use equity indexed options to economically hedge fixed indexed annuity products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specified market index, primarily the S&P 500. To hedge against adverse changes in equity indices, we enter into contracts to buy the equity indexed options within a limited time at a contracted price. The contracts are net settled in cash based on differentials in the indices at the time of exercise and the strike price.

Equity swaps – We entered into an equity swap transaction with Apollo in connection with the termination of the quarterly monitoring fee under the Transaction Advisory Services Agreement (TASA). See *Note 19 – Related Parties* for additional information.

Futures – Futures contracts are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indicies. We enter into exchange-traded futures with regulated futures commission clearing brokers who are members of a trading exchange. Under exchange-traded futures contracts, we agree to purchase a specified number of contracts with other parties and to post variation margin on a daily basis in an amount equal to the difference in the daily fair values of those contracts.

Total return swaps – We purchase total rate of return swaps to gain exposure and benefit from a reference asset without ownership. Total rate of return swaps are contracts in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset, which includes both the income it generates and any capital gains.

Interest rate swaps – We use interest rate swaps to reduce market risks from interest rate changes and to alter interest rate exposure arising from mismatches between assets and liabilities. With an interest rate swap, we agree with another party to exchange the difference between fixed-rate and floating-rate interest amounts tied to an agreed-upon notional principal amount at specified intervals.

Certain of our consolidated VIE investment funds use interest rate swaps to manage exposure to variable cash flows on portions of their borrowings under repurchase agreements (see *Note 6 – Variable Interest Entities*).

Credit default swaps – Credit default swaps provide a measure of protection against the default of an issuer or allow us to gain credit exposure to an issuer or traded index. We use credit default swaps coupled with a bond to synthetically create the characteristics of a bond and to hedge credit risk. These transactions have a lower cost and are more liquid relative to the cash market. We receive a periodic premium for these transactions as compensation for accepting credit risk.

Hedging credit risk involves buying protection for existing credit risk. The exposure resulting from the agreements, which is usually the notional amount, is equal to the maximum proceeds that must be paid by a counterparty for a defaulted security. If a credit event occurs on a reference entity, then a counterparty who sold protection is required to pay the buyer the trade notional amount less any recovery value of the security.

Variance swaps – We have variance swaps to hedge the growth in interest credited to the customer as a direct result of changes in the volatility. In a variance swap transaction, we agree to exchange future realized volatility for current implied volatility. This type of forward contract pays the difference between the realized variance and a predefined strike multiplied by a notional value.

Swaptions – To achieve protection against a rapid and sustained rise in interest rates, we have entered into payor swaptions. Swaptions are options to enter into an interest rate swap arrangement with a counterparty at a specified future date. At expiration, the counterparty is required to pay us the present value of the difference between the fixed interest rate and a specified strike rate multiplied by the notional amount of the swap agreement. These transactions would lessen the negative impact to us of a significant and prolonged increase in interest rates.

Foreign currency forwards – We use foreign currency forward contracts to hedge certain invested assets against movement in foreign currency. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives – We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products.

The following is a summary of the gains (losses) related to derivatives not designated as hedges:

	Years ended December 31,		
(In millions)	2015	2014	2013
Equity options	$ (372)	$ 955	$ 807
Total return swaps	—	11	(136)
Futures	(3)	52	51
Interest rate swaps	(4)	(4)	35
Interest rate caps	—	—	(10)

Variance swaps	—	(1)	(1)
Foreign currency swaps	12	3	1
Foreign currency forwards	21	21	(6)
Swaptions	—	—	(69)
Embedded derivatives in modco or funds withheld	69	(246)	34
Amounts recognized in investment related gains (losses)	(277)	792	706
Embedded derivatives in indexed annuity products[1]	158	(976)	(544)
Equity swaps[2]	—	—	(131)
Total gains (losses) for derivatives not designated as hedges	$ (119)	$ (184)	$ 31

[1] *Included in interest sensitive contract benefits*

[2] *Included in policy and other operating expenses*

Credit Risk—We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

We manage credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties. Where possible, we maintain collateral arrangements and use master agreements that provide for a single net payment from one counterparty to another at each due date and upon termination. We have also established counterparty exposure limits, where possible, in order to evaluate if there is sufficient collateral to support the net exposure.

Collateral arrangements typically require the posting of collateral in connection with its derivative instruments. Collateral agreements often contain posting thresholds, some of which may vary depending on the posting party's financial strength ratings. Additionally, a decrease in our financial strength rating to a specified level can result in settlement of the derivative position. As of December 31, 2015, and 2014, we had $9 million and $8 million, respectively, of collateral pledged to counterparties. The securities pledged as collateral are included in AFS fixed maturity securities on the consolidated balance sheets.

The estimated fair value of our net derivative and other financial assets and liabilities after the application of master netting agreements and collateral were as follows:

		Gross amounts not offset on the consolidated balance sheets				
(In millions)	Gross amount recognized[1]	Financial instruments[2]	Collateral received/pledged	Net amount	Off-balance sheet securities collateral[3]	Net amount after securities collateral
December 31, 2015						
Derivative assets	$ 871	$ (7)	$ (867)	$ (3)	$ (57)	$ (60)
Derivative liabilities	(17)	7	9	(1)	—	(1)
December 31, 2014						
Derivative assets	$ 1,794	$ (132)	$ (1,402)	$ 260	$ (351)	$ (91)
Derivative liabilities	(143)	132	8	(3)	—	(3)

[1] *The gross amounts of recognized derivative assets and derivative liabilities are reported on the consolidated balance sheets. The above excludes $0 million and $48 million of derivative assets as of December 31, 2015, and December 31, 2014, respectively, that are not subject to master netting agreements or similar agreements. The gross amounts of the derivative assets and derivative liabilities are not netted against each other for presentation on the consolidated balance sheets.*

[2] *Represents amounts offsetting derivative assets and derivative liabilities that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative assets or gross derivative liabilities for presentation on the consolidated balance sheets.*

[3] *For securities collateral received, we do not have the right to sell or re-pledge the collateral. As such, we do not record the securities on the balance sheet.*

Certain derivative instruments contain provisions for credit related events, such as downgrades in our credit ratings or for a negative credit event of a credit default swap's reference entity. If a credit event were to occur, we may be required to post additional collateral or settle an outstanding liability. The following is a summary of our exposure to credit related events:

	December 31,	
(In millions)	2015	2014
Fair value of derivative liabilities with credit related provisions	$ 7	$ 7
Maximum exposure for credit default swaps	10	10

There was no additional collateral required for default or termination event as of December 31, 2015, or 2014.

We also have invested in a fixed maturity security classified as trading that contains credit default swaps. This security is subject to the credit risk of the issuer, which consists of the underlying credit default swaps and high quality fixed maturities that serve as collateral. A default event occurs if the cumulative losses exceed a specified attachment point, which is typically not the first loss of the portfolio. If a default event occurs that exceeds the specified attachment point, our investment may not be fully returned. We would have no future potential payments under this investment. As of December 31, 2015, the amortized cost of the investment is $42 million, the carrying value is $43 million, and the weighted average expected life is six years.

6. Variable Interest Entities

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs—We consolidate CoInvest VI, CoInvest VII, CoInvest Other, London Prime, and CMBS Funds, which are investment funds. We are the only limited partner in these investment funds and receive all of the economic benefits and losses, other than management fees and carried interest, as applicable, paid to the general partner in each entity, which are related parties. We do not have any voting rights as limited partner and do not solely satisfy the power criteria to direct the activities that significantly impact the economics of the VIE. However, the criteria for the primary beneficiary are satisfied by our related party group and because substantially all of the activities are conducted on our behalf, we consolidate the investment funds.

No arrangement exists requiring us to provide additional funding in excess of our committed capital investment, liquidity, or the funding of losses or an increase to our loss exposure in excess of our investment in the VIEs. We elected the fair value option for loans held for investment, investment funds, and borrowings, which are reported in the consolidated variable interest entity sections on the consolidate balance sheets. We elected the fair value option to maintain consistency with our previous fair value option election for these VIEs prior to consolidating them under ASU 2015-02.

CoInvest VI, CoInvest VII, and CoInvest Other were formed to make investments, including co-investments alongside private equity funds sponsored by Apollo. We received our interests in CoInvest VI, CoInvest VII, and CoInvest Other in connection with the Contribution Agreement discussed in *Note 19 – Related Parties*, in order to provide a capital base to support future acquisitions. London Prime was formed for the purpose of investing in Prime London Ventures Limited, a Guernsey limited company, which purchases rental residential assets across prime central London. The CMBS Funds were formed with the objective of generating high risk-adjusted investment returns by investing primarily in a portfolio of eligible CMBS and using leverage through repurchase agreements treated as collateralized financing.

ALRe formed Highland Re Ltd. (HRL), a Bermuda special purpose insurer, as its direct subsidiary. ALRe entered into two non-proportional reinsurance agreements with HRL to cede claims risk associated with an affiliate reinsurance deal. HRL issued voting common shares, all owned by ALRe, and one non-voting preferred share, owned by a third party, in order to capitalize HRL. The initial investment of HRL, using the cash received from the sale of the preferred share, was the purchase of a note from the buyer of the preferred share. HRL was restricted from selling or transferring the note absent the occurrence of defined trigger events. The preferred share supported the reinsurance transaction of HRL only, and that capital was not available to the Company for any other purpose. The preferred share was issued in connection with over collateralization provided by the preferred share buyer in a transaction with an affiliate of HRL. The preferred share buyer was entitled to request redemption of all or fractional portions of the preferred share under certain conditions during the term of the note. The note was repaid during 2014 and HRL was dissolved in the fourth quarter of 2014.

In January 2015, CoInvest VII contributed its primary investment, MidCap Holdings, valued at $551 million, to a newly formed entity, MidCap FinCo Limited (MidCap FinCo) in exchange for subordinated notes issued by MidCap FinCo and shares in MidCap FinCo's parent company. Concurrent with this restructuring, CoInvest VII distributed to its general partner, an affiliate of Apollo, $30 million of the MidCap FinCo notes, in satisfaction of the carried interest that had been earned by the general partner under the previous MidCap Holdings structure through the date of the restructuring. Additionally, unrelated investors made cash contributions to MidCap FinCo of $1,017 million through December 31, 2015. Following the restructuring and the funding by unrelated investors, CoInvest VII owned 32% of the outstanding economic interests of MidCap FinCo. Also, CoInvest VII agreed to certain transfer restrictions and has foregone certain rights associated with its investment in MidCap FinCo for a period of two years, resulting in a discount applied to the value of the notes held by CoInvest VII as described above, equal to 7% as of December 31, 2015.

In addition, MidCap FinCo and one of its subsidiaries succeeded as borrower under the credit facilities we had previously advanced to MidCap Holdings in the amount of $300 million at December 31, 2015.

As a result of this restructuring, CoInvest VII owns the MidCap Holdings investment indirectly through MidCap FinCo. The significant investment by the new, unrelated investors, and a qualitative assessment of the impact of the restructuring resulted in a determination that substantially all of the activities of MidCap Finco are not being conducted on behalf of CoInvest VII, but are being conducted for the benefit of all investors. Therefore, CoInvest VII is not the primary beneficiary of MidCap FinCo and accounts for it as an equity method investment at fair value as of December 31, 2015, resulting in MidCap Holdings no longer being consolidated in our financial statements after the restructuring.

Prior to the restructuring, in conjunction with certain of MidCap Holdings' borrowing facilities, MidCap Holdings established and contributed loans to separate single-purpose entities, structured to be legally isolated, and bankruptcy-remote. We determined these entities were VIEs. As a result of MidCap Holdings' power to direct the activities that most significantly impact the economic performance and its economic interest in these VIEs, we concluded MidCap Holdings is the primary beneficiary, and therefore the assets and liabilities of the entities are reported in our consolidated financial statements through December 31, 2014. As of December 31, 2014, $1,224 million of the assets of MidCap Holdings, consisting of loans, accrued interest and fees, and restricted cash, can only be used to settle the obligations of its consolidated VIEs. In addition, $855 million of MidCap Holdings' liabilities as of December 31, 2014, represent obligations of its consolidated VIEs, for which there is no recourse to general credit of MidCap Holdings. Upon the MidCap Holdings restructuring described above, these VIEs are no longer consolidated by CoInvest VII, or, therefore, by the Company.

Trading securities – including related party – Trading securities represents investments in fixed maturity and equity securities with changes in fair value recognized in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income. For the years ending December 31, 2015, 2014, and 2013, investment related gains (losses) included losses of $23 million, losses of $74 million, and gains of $380 million, respectively, resulting from the change in unrealized gains and losses underlying trading securities we still held as of the respective year end date. Trading securities held by CoInvest VI and CoInvest VII are considered related party investments because Apollo affiliates exercise significant influence over the operations of these investees.

Loans held for investment – MidCap Holdings' primary operations are to originate loans to middle market healthcare companies. We elected the fair value option to account for MidCap Holdings' loans. The loan portfolio, by type, recorded at fair value is as follows:

(In millions)	December 31, 2014
Commercial and industrial loans	$ 1,486
Commercial real estate loans	585
Total loans held for investment	$ 2,071

Investment funds – including related party – Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs; however, our consolidated VIEs are not considered the primary beneficiary of these investment funds. Changes in fair value of these investment funds are included in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income. Investment funds held by CoInvest VII and CoInvest Other are considered related party investments as they are sponsored or managed by Apollo affiliates.

Borrowings – CMBS-I and II Funds each entered into individual repurchase agreements with UBS to borrow up to $250 million each, on a non-recourse basis, to finance the acquisition of AAA rated CMBS. Both UBS facilities have four-year terms and one one-year extension available with the mutual agreement of the parties. Upon extension, each security purchased with funds from UBS facilities will be assigned a spread in line with the current market rates, to be determined by UBS. Advances under the facilities accrue interest at an annual rate of three-month LIBOR plus a pricing margin of 2.5% – 2.9%. The CMBS purchase price is determined on a per asset basis by applying an advance rate schedule, as agreed upon by the funds and UBS.

All of the repurchase facility agreements contain customary affirmative and negative covenants and provisions regarding events of default at the investment fund level. At December 31, 2015, and 2014, the CMBS Funds were in compliance with all debt covenants under these facilities.

The CMBS Funds' repurchase agreements included borrowings with the following maturities and weighted average interest rates:

	December 31, 2015			December 31, 2014		
(In millions)	Balance	Remaining Maturity[1]	Weighted Average Interest Rate[2]	Balance	Remaining Maturity[1]	Weighted Average Interest Rate[2]
2012 CMBS-I Fund L.P.	$ 250	1.7 years	3.2%	$ 250	2.7 years	3.0%
2012 CMBS-II Fund L.P.	250	1.7 years	3.2%	250	2.7 years	3.0%
Total	$ 500			$ 500		

[1] *Assumes extension options on borrowing repurchase agreement are exercised.*

[2] *The borrowings are on a floating rate basis; however, the CMBS Funds have entered into an interest rate swap to convert these borrowings to fixed rate.*

MidCap Holdings had the following borrowing capacity and outstanding borrowings:

	December 31, 2014					
(In millions)	Total Commitment	Borrowing Capacity[1]	Outstanding Balance	Outstanding Principal of Loans Pledged	Interest Rate(s)[2]	Maturity Date(s)
Capital One Facility[3]	$ 75	$ 66	$ 66	$ 103	3.75%	September 5, 2017
Capital Source Facility	75	46	46	58	3.92%	October 30, 2019
City National	85	83	74	127	3.17%	November 1, 2017
Fortress Facilities	270	253	253	302	5.21%	July 9, 2017 – July 1, 2019
Real Estate Participants	302	302	302	370	4.01%	January 31, 2015 – April 22, 2019
Private Bank Facility	35	13	13	16	5.00% – 5.50%	June 13, 2016 – February 20, 2019
Silicon Valley Bank Facility	45	27	27	45	3.53%	October 3, 2016
Wells Fargo Health Care Asset-Backed Facility	795	624	584	791	2.85%	January 1, 2017
Wells Fargo Leveraged Loan Facility	250	140	140	210	2.76%	November 8, 2018
Wells Fargo General Asset-Backed Facility	110	20	12	54	2.41%	September 26, 2019
Total	$ 2,042	$ 1,574	$ 1,517	$ 2,076		

[1] *Represents the amount MidCap Holdings is able to draw based on collateral pledged according to each agreement.*

[2] *Interest rates are variable rates. The interest rate disclosed represents the interest rate as of December 31, 2014.*

[3] *No loan may collateralize in the credit facility for a period in excess of 120 days.*

Fair Value – See *Note 7 – Fair Value* for a description of the levels of our fair value hierarchy and our process for determining the level to which we assign our assets and liabilities carried at fair value.

The following represents the hierarchy for assets and liabilities of our consolidated VIEs measured at fair value on a recurring basis:

	December 31, 2015			
(In millions)	Total	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities				
Investments				
Trading securities				
Fixed maturity securities	$ 722	$ —	$ 669	$ 53
Equity securities	309	271	—	38
Investment funds	516	—	—	516
Cash and cash equivalents	6	6	—	—
Total assets of consolidated variable interest entities measured at fair value	$ 1,553	$ 277	$ 669	$ 607

	December 31, 2014			
(In millions)	Total	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities				
Investments				
Trading securities				
Fixed maturity securities	$ 763	$ —	$ 706	$ 57
Equity securities	510	448	—	62
Loans held for investment	2,071	—	—	2,071
Investment funds	40	—	—	40
Cash and cash equivalents	10	10	—	—
Restricted cash	43	43	—	—
Total assets of consolidated variable interest entities measured at fair value	$ 3,437	$ 501	$ 706	$ 2,230
Liabilities of consolidated variable interest entities				
Borrowings	$ 1,517	$ —	$ —	$ 1,517
Total liabilities of consolidated variable interest entities measured at fair value	$ 1,517	$ —	$ —	$ 1,517

Fair Value Valuation Methods—Refer to *Note 7 – Fair Value* for the valuation methods used to determine the fair value of trading securities, investment funds, and cash and cash equivalents.

Loans held for investment – The fair value of loans held for investment is determined by reference to current market pricing and credit factors compared to market pricing and credit factors during the original underwriting, as well as any changes to the underlying collateral, if applicable. The loans' fair values are estimated using discounted cash flow techniques.

Borrowings – The fair value of borrowings is estimated based on consideration of the current market interest rates for similar debt instruments. The fair value is estimated using discounted cash flow techniques.

Level 3 Financial Instruments – The following is a reconciliation for all VIE Level 3 assets and liabilities measured at fair value on a recurring basis:

	December 31, 2015							
(In millions)	Beginning Balance	Total realized and unrealized gains (losses) included in income	Purchases/ Borrowings	Sales/ Repayments	Transfers in (out)	Other[2]	Ending Balance	Total gains (losses) included in earnings[1]
Assets of consolidated variable interest entities								
Trading securities								
Fixed maturity securities	$ 57	$ (6)	$ 2	$ —	$ —	$ —	$ 53	$ (6)
Equity securities	62	(15)	—	—	—	(9)	38	(15)
Loans held for investment	2,071	—	—	—	—	(2,071)	—	—
Investment funds	40	3	15	(15)	—	473	516	(7)
Total Level 3 assets of consolidated variable interest entities	$ 2,230	$ (18)	$ 17	$ (15)	$ —	$ (1,607)	$ 607	$ (28)
Liabilities of consolidated variable interest entities								
Borrowings	$ (1,517)	$ —	$ —	$ —	$ —	$ 1,517	$ —	$ —
Total Level 3 liabilities of consolidated variable interest entities	$ (1,517)	$ —	$ —	$ —	$ —	$ 1,517	$ —	$ —

[1] *Related to instruments held at end of year.*

[2] *Other activity primarily relates to the deconsolidation of MidCap Holdings due to the restructuring described above.*

	December 31, 2014							
(In millions)	Beginning Balance	Total realized and unrealized gains (losses) included in income	Purchases/ Borrowings	Sales/ Repayments	Transfers in (out)	Other	Ending Balance	Total gains (losses) included in earnings[1]
Assets of consolidated variable interest entities								
Trading securities								
Fixed maturity securities	$ 74	$ —	$ —	$ (17)	$ —	$ —	$ 57	$ (1)
Equity securities	145	32	—	(115)	—	—	62	(26)
Loans held for investment	1,563	26	482	—	—	—	2,071	11
Investment funds	78	22	8	(68)	—	—	40	14
Total Level 3 assets of consolidated variable interest entities	$ 1,860	$ 80	$ 490	$ (200)	$ —	$ —	$ 2,230	$ (2)
Liabilities of consolidated variable interest entities								
Borrowings	$ (1,194)	$ (8)	$ (319)	$ 4	$ —	$ —	$ (1,517)	$ —
Total Level 3 liabilities of consolidated variable interest entities	$ (1,194)	$ (8)	$ (319)	$ 4	$ —	$ —	$ (1,517)	$ —

[1] *Related to instruments held at end of year.*

There were no transfers between Level 1, Level 2, or Level 3 during the years ended December 31, 2015, and 2014.

Significant Unobservable Inputs – For certain Level 3 trading securities and investment funds, the valuations have significant unobservable inputs for comparable multiples and weighed average cost of capital rates applied in the valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are multiplied by the underlying investment's earnings

before interest, tax, depreciation, and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers.

For other Level 3 trading securities, investment funds, loans held for investment, and borrowings, valuations are performed using a discounted cash flow model. For a discounted cash flow model, the significant input is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. The discount rate is determined by considering the weighted average cost of capital calculation of companies in similar industries with comparable debt to equity ratios.

We apply a discount to the values reported by the investment funds for certain Level 3 trading securities and investment funds held within consolidated VIEs related to the lack of marketability of the underlying investment. As the degree of marketability increases, the related discount applied to the underlying investment is decreased. The weighted average of the discount rates applied to each individual investment was 34% and 35% as of December 31, 2015, and 2014, respectively.

Fair Value Option – The following represents the gains (losses) recorded for instruments within the consolidated VIEs for which we have elected the fair value option:

	Years ended December 31,		
(In millions)	2015	2014	2013
Trading securities			
Fixed maturity securities	$ (5)	$ (2)	$ 7
Equity securities	(4)	27	540
Loans held for investment	—	4	—
Investment funds	12	20	53
Total gains	$ 3	$ 49	$ 600

For fair value option loans held for investment, we record interest income in net investment income within revenues of consolidated variable interest entities on the consolidated statements of income. Gains or losses from initial measurement, and subsequent changes in fair value, are recorded in investment related gains (losses) within revenues of consolidated variable interest entities on the consolidated statements of income. Gains and losses on borrowings are recorded in interest expense within operating expenses of consolidated variable interest entities on the consolidated statements of income.

Fair Value of Financial Instruments Not Held at Fair Value – Assets includes $18 million and $25 million of investment funds accounted for under the equity method and, therefore, not carried at fair value as of December 31, 2015, and 2014, respectively; however, the carrying amount approximates fair value. Liabilities includes $500 million of borrowings held at cost as of December 31, 2015, and 2014. The unpaid principal balance of borrowings approximates fair value.

Commitments and Contingencies – MidCap Holdings had unfunded commitments to extend credit to its borrowers of $525 million as of December 31, 2014. As of December 31, 2014, for $270 million of the unfunded commitments, there were no prerequisites for future funding by MidCap Holdings, and its borrowers were able to draw on these unfunded commitments at any time. For the remaining $255 million of the unfunded commitments as of December 31, 2014, MidCap Holdings' obligations to fund these unfunded commitments were subject to its borrowers' ability to meet certain requirements (i.e. provide collateral to secure the requested additional funding), as well as to comply with all provisions of the loan agreements.

Included in assets of CoInvest VI, one of our consolidated VIEs on the consolidated balance sheets as of December 31, 2015, are equity investments in publicly traded shares of Caesars Entertainment Corporation (CEC) and Caesars Acquisition Company (CAC), which are carried at their fair value of $25 million and $23 million, respectively. We received the CEC and CAC positions as part of the Contribution Agreement discussed in *Note 19 – Related Parties*, in order to provide a capital base to support the Aviva USA transaction. There are several pending actions against CEC and CAC and other defendants, related to certain restructuring activities and transactions involving Caesars Entertainment Operating Company, a subsidiary of CEC. The general partner of the VIE which holds the equity investments in CEC and CAC has reported that the outcome of the disputes cannot be ascertained but that it believes the resolution will not have a material effect on the VIE. It also reports that the disputes may have a material effect on the operating results of the VIE in future periods. Given the uncertainty associated with the litigation, we are uncertain as to whether our VIE's equity investments in CEC or CAC could be negatively impacted in the event of an adverse outcome in the disputes.

Non-Consolidated VIEs—We invest in other entities meeting the definition of a VIE. We do not consolidate these investments because we do not meet the criteria of primary beneficiary as described below.

Fixed Maturity Securities – We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the consolidated balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to

control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by ASU 2015-02, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments under US GAAP and are held at fair value on the balance sheet and classified as AFS or trading.

Investment funds – Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined we are not under common control, as defined by ASU 2015-02, with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option, in which NAV is used as a practical expedient for fair value.

The Company's investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management. Our risk of loss is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to the Company’s initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) available-for-sale securities and other investments are limited to amortized cost; and (4) trading securities are limited to carrying value.

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs:

	December 31,			
	2015		2014	
(In millions)	Carrying Value	Maximum Loss Exposure	Carrying Value	Maximum Loss Exposure
Investment funds	$ 733	$ 878	$ 832	$ 928
Investment in related parties – investment funds	997	1,454	585	1,067
Assets of consolidated variable interest entities, investment funds	534	558	65	101
Investment in fixed maturity securities	17,673	18,146	15,724	15,554
Investment in related parties – fixed maturity securities	525	554	585	597
Total assets	$ 20,462	$ 21,590	$ 17,791	$ 18,247

The following summarizes the Company's investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

	December 31,					
	2015			2014

[1] *A-A Mortgage Opportunities, LP (A-A Mortgage) is a platform to originate residential mortgage loans and mortgage servicing rights.*

[2] *Our total investment in MidCap FinCo, including amounts advanced under the credit facilities, totaled $782 million at December 31, 2015, which is greater than 10% of total AHL shareholders' equity.*

Summarized Financial Information of Investment Funds—The following is the aggregated summarized financial information of equity method investees, including those where we elected the fair value option, and may be presented on a lag due to the availability of financial information from the investee:

	December 31,	
(In millions)	2015	2014
Assets	$ 51,649	$ 97,961
Liabilities	6,990	22,298
Equity	44,659	75,663

	Years ended December 31,		
(In millions)	2015	2014	2013
Net income	$ 5,945	$ 8,418	$ 11,962

The following table presents the carrying value by ownership percentage of equity method investment funds, including related party investment funds and consolidated VIE investment funds:

(In millions)	December 31, 2015	December 31, 2014
Ownership Percentage		
100%	$ 49	$ 50
50% – 99%	322	108
Greater than 3% – 49%	1,225	1,070
Equity method investment funds	$ 1,596	$ 1,228

The following table presents the carrying value by ownership percentage of investment funds where we elected the fair value option, including related party investment funds and investment funds owned by consolidated VIEs:

(In millions)	December 31, 2015	December 31, 2014
Ownership Percentage		
Greater than 3% – 49%	$ 516	$ 40
3% or less	152	214
Fair value option investment funds	$ 668	$ 254

7. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 – Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 – Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 – Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

The following represents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis:

	December 31, 2015

Refer to *Note 6 – Variable Interest Entities* for fair value disclosures associated with consolidated VIEs.

Fair Value Valuation Methods—We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity – We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS, and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees, and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities – Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as analytics or brokers and are classified as Level 2 or 3.

Mortgage loans – Mortgage loans for which we have elected the fair value option or those held for sale are carried at fair value. We estimate fair value on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Investment funds – Investment funds are valued based on NAV information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are

used to determine the fair value. These investments are classified as Level 3 due to the limited market activity and price transparency inherent in the market for such investments.

Funds withheld (embedded derivative) – We estimate the fair value of the embedded derivative based on the change in the fair value of the assets supporting the funds withheld payable under the combined coinsurance, modco and coinsurance funds withheld reinsurance agreements. As a result, the fair value of the embedded derivative is classified as Level 2 or 3 based on the valuation methods used for the assets held in trust supporting the reinsurance agreements.

Derivatives – Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. We consider and incorporate counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents – The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) – Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with actuarial assumptions for policyholder behavior.

Unit-linked contracts – Unit-linked contracts are valued based on the fair value of the investments supporting the contract. The underlying investments are trading securities comprised primarily of mutual funds. The valuations of these are based on quoted market prices for similar assets and are classified in Level 2, resulting in a corresponding classification for the unit-linked contracts.

AmerUs Closed Block – We elected the fair value option for the future policy benefits liability in the AmerUs Closed Block, as discussed in *Note 11 – Closed Block*. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's cost to hold capital in excess of existing liabilities on the closed block. This component uses a present value of future cash flows, which includes investment earnings and policyholder liability movements. Unobservable inputs include estimates for these items. The target surplus as a percentage of statutory reserves is 3.89% based on the statutory risk-based capital ratio applicable to this block of business. The AmerUs Closed Block policyholder liabilities and any corresponding reinsurance recoverable are classified as Level 3.

ILICO Closed Block – We elected the fair value option for the ILICO Closed Block, as discussed in *Note 9 – Reinsurance*. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's obligations to the closed block business. This component uses the present value of future cash flows. The cash flows include commissions, administrative expenses, reinsurance premiums and benefits, and an explicit cost of capital. Unobservable inputs include estimates for these items. The explicit cost of capital assumption is 9% of required capital, post tax. A margin of 6.11% is included in the discount rates to reflect the business risk. An additional 0.31% is included to reflect non-performance risk. The ILICO Closed Block policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Universal life liabilities and other life benefits – We elected the fair value option for certain blocks of universal and other life business ceded to Global Atlantic, as discussed in *Note 9 – Reinsurance*. We use a present value of liability cash flows. Unobservable inputs include estimates of mortality, persistency, expenses, premium payments, and a risk margin used in the discount rates that reflects the riskiness of the business. The risk margin was 0.09%. These universal life policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Fair Value Option—The following represents the gains or losses recorded for instruments we have elected the fair value option:

	Years ended December 31,		
(In millions)	2015	2014	2013
Trading securities	$ (313)	$ 254	$ 25
Mortgage loans	—	5	(3)
Investment funds	(8)	31	41
Future policy benefits	134	(102)	8
Total gains (losses)	$ (187)	$ 188	$ 71

For fair value option mortgage loans, we record interest income, gains or losses from initial measurement, and subsequent changes in fair value in net investment income on the consolidated statements of income. Investment funds and related parties investment funds gains and losses are recorded in net investment income on the consolidated statements of income. We record the change in fair value of future policy benefits to future policy and other policy benefits on the consolidated statements of income.

The following summarizes information for fair value option mortgage loans:

	December 31,	
(In millions)	2015	2014
Unpaid principal balance	$ 46	$ 68
Mark to fair value	2	5
Fair value	$ 48	$ 73

There were no fair value option mortgage loans 90 days or more past due as of December 31, 2015, and 2014.

Transfers Between Levels—Transfers into Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the lack of commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 2.

Transfers into or out of any level are assumed to occur at the end of the period. For the years ended December 31, 2015, and 2014, there were no transfers between Level 1 and Level 2.

Level 3 Financial Instruments—The following is a reconciliation for all Level 3 assets and liabilities measured at fair value on a recurring basis:

Significant Unobservable Inputs—Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS fixed maturity securities, mortgage loans, total return swaps, and credit default swaps. Additional significant unobservable inputs are described below.

Fixed maturity securities – For certain fixed maturity securities, internal models are used to calculate the fair value. A discounted cash flow approach is utilized. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. Discounts ranged from 4% to 10%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Investment funds – The underlying investments may have significant unobservable inputs for comparable multiples and weighted average cost of capital rates applied in the valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are multiplied by the underlying investment's earnings before interest, tax, depreciation, and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers.

Similarly, for certain underlying investments we may use a discounted cash flow model. When we use a discounted cash flow model, the significant input is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. We determine the discount rate considering the weighted average cost of capital calculation of companies in similar industries with comparable debt to equity ratios.

Interest sensitive contract liabilities – embedded derivative – Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk – For contracts we issue, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For contracts reinsured through funds withheld reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget – The Company assumes future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior – We regularly review the lapse and withdrawal assumptions. These are based on the Company's initial pricing assumptions updated for actual experience. Actual Company experience may be limited for recently issued products.

The following summarizes the unobservable inputs for the embedded derivative of interest sensitive contract liabilities:

	December 31, 2015				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 4,477	Option budget method	Non-performance risk	0.6% – 1.8%	Decrease
			Option budget	0.8% – 3.8%	Increase
			Surrender rate	0.0% – 10.7%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value—The following represents the Company's financial instruments not carried at fair value on the consolidated balance sheets:

		December 31, 2015		December 31, 2014	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets					
Mortgage loans	3	$ 5,452	$ 5,567	$ 5,392	$ 5,638
Investment funds	3	581	581	618	618
Policy loans	2	642	642	778	778
Funds withheld at interest	3	3,446	3,446	2,647	2,647
Other investments	3	83	83	56	56
Investments in related parties					
Investment funds	3	997	997	585	585
Short-term investments	2	55	55	—	—
Other investments	3	245	256	—	—
Total assets not carried at fair value		$ 11,501	$ 11,627	$ 10,076	$ 10,322
Liabilities					
Interest sensitive contract liabilities	3	50,937	50,755	54,787	55,471
Funds withheld liability	2	353	353	1,201	1,201
Total liabilities not carried at fair value		$ 51,290	$ 51,108	$ 55,988	$ 56,672

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we do carry at fair value. The financial instruments presented above are reported at carrying value on the consolidated balance sheets; however, in the case of policy loans, funds withheld at interest and liability, other investments, and investments in related parties – short-term investments, the carrying amount approximates or equals fair value.

Investment in related parties – Other investments – The fair value of investment in related party – other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities – The carrying and fair value of interest sensitive contract liabilities above excludes embedded derivatives and certain universal life liabilities, which are held at fair value. We consider the embedded value, which is an appraisal valuation of the in force business using internal assumptions and discount the distributable earnings using market participant rate of return. We then reduce the fair value of the assets by the total embedded value of the Company to determine the fair value of the total liabilities. This amount represents what the

Company would need to pay to transfer all the liabilities to another party. All non-interest sensitive liabilities are then subtracted from the fair value of the total liabilities to arrive at the fair value of the interest sensitive liabilities.

8. Business Combinations

Delta Lloyd Deutschland—Effective October 1, 2015, we acquired 100% of the voting equity interests of DLD and $50 million of intercompany loans from Delta Lloyd N.V. for a cash purchase price of $74 million. DLD was a Germany-domiciled insurance group with an in force book of business primarily made up of participating long-duration savings products. We acquired DLD to strategically expand our core business into Germany. Following the acquisition, DLD was renamed Athene Deutschland GmbH.

Aviva USA—Effective October 2, 2013, we acquired 100% of the common shares of Aviva USA Corporation (Aviva USA) from Aviva plc. Upon close, we ceded the majority of Aviva USA's life insurance business to affiliates of Global Atlantic. The Company paid $529 million, of which $368 million was cash, $170 million was a surplus note, and $9 million settled existing debt between Aviva plc and Aviva USA. Following the acquisition, Aviva USA was renamed Athene USA.

During 2014, we finalized our purchase accounting for the Aviva USA acquisition. We recorded measurement period adjustments for the final valuation of interest sensitive contract benefits, deferred tax assets, and final purchase price adjustment.

The acquisition resulted in VOBA of $1,696 million. It also created $638 million of negative VOBA, of which $411 million is related to investment-type contracts and $227 million is related to insurance contracts. We recorded a bargain purchase gain of $152 million during the year ended December 31, 2013. We believe three main factors created this bargain purchase gain:

- The Company was able to acquire the entire business since we had a partner to reinsure the life business,
- Anticipated future regulatory capital requirements motivated the seller to divest the business, and
- The value of business acquired as determined by a market participant calculation was greater than the consideration paid. This was mostly due to better assumed investment earned rates going forward, partially offset by a higher required rate of return and a higher ratio of required capital to reserves than Aviva plc held against the business.

To preserve the economics of the transaction, prior to closing the Company entered into a series of interest rate swaptions to hedge the value of the embedded gains in the investment portfolio until the acquisition was complete. The loss on these derivatives including embedded cost was $69 million in 2013.

The following summarizes the fair values of the assets acquired and liabilities assumed in the DLD and Aviva USA acquisitions.

	October 1, 2015	October 2, 2013
(In millions)	DLD	Aviva USA
Investments	$ 5,539	$ 51,627
Cash and cash equivalents	236	1,948
Accrued investment income	67	550
Reinsurance recoverable	4	1,079
Deferred tax assets	—	536
Value of business acquired	—	1,696
Other assets	83	764
Total identifiable assets acquired	5,929	58,200
Interest sensitive contract liabilities	403	47,629
Future policy benefits	4,519	7,795
Other policy claims and benefits	55	116
Dividends payable to policyholders	771	202
Income taxes payable	—	46
Derivative liabilities	—	194
Other liabilities	107	1,537
Total identifiable liabilities assumed	5,855	57,519
Net identifiable assets acquired	74	681
Goodwill (Bargain purchase gain)	—	(152)
Net assets acquired	$ 74	$ 529

DLD contributed $129 million of revenue and $6 million of net income during the year ended December 31, 2015. Aviva USA contributed $(7) million of revenue and $180 million of net income during the year ended December 31, 2013. Transaction costs incurred during the years ended December 31, 2015, 2014, and 2013, for these acquisitions were $15 million, $7 million, and $13 million, respectively, and are included in policy and other operating expenses on the consolidated statements of income.

The following unaudited pro forma revenue and net income assumes a January 1, 2014, acquisition date for DLD and January 1, 2012, acquisition date for Aviva USA:

	Years ended December 31,		
(In millions)	2015	2014	2013
Revenue	$ 3,002	$ 4,622	$ 6,001
Net income	579	473	1,896

9. Reinsurance

The following summarizes the effect of reinsurance on premiums and future policy and other policy benefits on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2015	2014	2013
Premiums			
Direct	$ 445	$ 387	$ 282
Reinsurance assumed	24	28	12
Reinsurance ceded	(274)	(315)	(1,431)
Total premiums	$ 195	$ 100	$ (1,137)
Future policy and other policy benefits			
Direct	$ 1,041	$ 1,320	$ 577
Reinsurance assumed	30	(134)	21
Reinsurance ceded	(554)	(490)	(1,548)
Total future policy and other policy benefits	$ 517	$ 696	$ (950)

Reinsurance typically provides for recapture rights on the part of the ceding company for certain events of default. Additionally, some agreements require us to place assets in trust accounts for the benefit of the ceding entity. As of December 31, 2015, and 2014, we held assets in trusts of $1,314 million and $1,545 million, respectively. While we own assets placed in trust, their use is restricted based on the trust agreement terms. If the statutory book value of the assets, or in certain cases fair value, in a trust declines because of impairments or other reasons, we may be required to contribute additional assets to the trust. In addition, the assets within a trust may be subject to a pledge in favor of the applicable reinsurance company.

Global Atlantic ceded reinsurance transactions—We entered into a series of reinsurance agreements with affiliates of Global Atlantic to cede the majority of the Aviva USA acquired life business for a combined ceding commission of $112 million during the year ended December 31, 2013.

In conjunction with the Company's business combination with Aviva USA, we elected the fair value option for the ILICO Closed Block and certain blocks of universal and other life business ceded to Global Atlantic whereby the Aviva USA acquired life business was adjusted to fair value at the acquisition date of October 2, 2013, and is measured at fair value each reporting period.

We have a 100% coinsurance and assumption agreement with Accordia Life and Annuity Company (Accordia), an affiliate of Global Atlantic. The agreement ceded all existing open block life insurance business issued by Athene Annuity and Life Company (AAIA), with the exception of enhanced guarantee universal life insurance products. We also entered into a 100% coinsurance agreement with Accordia to cede all policy liabilities of the ILICO Closed Block. The ILICO Closed Block consists primarily of participating whole life insurance policies. We also have an excess of loss arrangement with Accordia to reimburse the Company for any payments required from the Company's general assets to meet the contractual obligations of the AmerUs Closed Block not covered by existing reinsurance through Athene Re USA IV. The AmerUs Closed Block consists primarily of participating whole life insurance policies. Since all liabilities were covered by the existing reinsurance at close, no reinsurance premiums were ceded. The assets backing the AmerUs Closed Block are managed, on AAIA's behalf, by Goldman Sachs Asset Management, an affiliate of Global Atlantic.

During the third quarter of 2015, AAIA agreed to novate certain open blocks of business ceded to Accordia, that were in force as of August 1, 2015, in accordance with the terms of the coinsurance and assumption agreement. As a result of the novation, interest sensitive contract

liabilities decreased $4,179 million, future policy benefits decreased $67 million, policy loans decreased $129 million, and reinsurance recoverable decreased $4,117 million.

We also have reinsurance agreements with First Allmerica Financial Life Insurance Company (FAFLIC), an affiliate of Global Atlantic. These agreements, comprising funds withheld coinsurance and coinsurance and assumption reinsurance, ceded existing life business. The assets backing the funds withheld liabilities are managed, on our behalf, by Goldman Sachs Asset Management.

During the third quarter of 2015, portions of the reinsurance agreements between us and FAFLIC were amended to change the reinsurance agreements from funds withheld coinsurance to coinsurance, which resulted in a $930 million decrease to funds withheld liability, and a corresponding decrease to assets, primarily consisting of investments.

At December 31, 2015, and 2014, Global Atlantic maintained a series of trust and custody accounts under the terms of these agreements with assets having a fair value of $4,614 million and $6,743 million, respectively.

Protective Life ceded reinsurance transactions—We reinsured substantially all of the existing life and health business of Athene Annuity & Life Assurance Company (AADE) to Protective Life under a coinsurance agreement in 2011. At December 31, 2015, and 2014, Protective Life maintained a trust for our benefit with assets having a fair value of $1,616 million and $1,753 million, respectively.

Ceded Reinsurance Transactions—The following summarizes our reinsurance recoverable from the following:

	December 31,	
(In millions)	2015	2014
Global Atlantic	$ 5,090	$ 9,306
Protective Life	1,760	1,798
Other[1]	407	480
Reinsurance recoverable	$ 7,257	$ 11,584

[1]*Represents all other reinsurers, with no single reinsurer having a carrying value in excess of 5% of total recoverable.*

Assumed Coinsurance Transactions—We have coinsurance agreements with Transamerica Life Insurance Corporation (Transamerica) and Liberty Bankers Life Insurance Company, under which we assumed fixed annuities. The following summarizes our assumed coinsurance reserves:

	December 31,	
(In millions)	2015	2014
Transamerica Life Insurance Corporation	$ 1,122	$ 1,343
Liberty Bankers Life Insurance Company	371	445

10. Deferred Acquisition Costs, Deferred Sales Inducements, and Value of Business Acquired

The following represents a rollforward of DAC, DSI, and VOBA:

(In millions)	DAC	DSI	VOBA	Total
Balance at December 31, 2012	$ 117	$ 70	$ 177	$ 364
Additions	125	37	1,727	1,889
Unlocking	9	3	2	14
Amortization	(32)	(19)	(123)	(174)
Impact of unrealized investment (gains) losses	(9)	—	51	42
Balance at December 31, 2013	210	91	1,834	2,135
Additions	250	113	—	363
Unlocking	2	6	28	36
Amortization	(20)	(10)	(129)	(159)
Impact of unrealized investment (gains) losses	(17)	(12)	(117)	(146)
Balance at December 31, 2014	425	188	1,616	2,229
Additions	288	136	—	424
Unlocking	(6)	(2)	(27)	(35)
Amortization	(34)	(18)	(136)	(188)
Impact of unrealized investment (gains) losses	34	17	182	233
Balance at December 31, 2015	$ 707	$ 321	$ 1,635	$ 2,663

The unlocking impact in 2015 was primarily driven by a decrease in expected long term net investment earned rates. In 2014, the unlocking impact was primarily driven by an increase in expected long term net investment earned rates. The unlocking impact in 2013 was primarily the result of lowering lapse rates on one of the fixed indexed annuity products to better reflect actual experience, offset by lowering the future hedge budget on the same product.

We did not make any adjustments to DAC recoverability during the years ended December 31, 2015, 2014, or 2013.

The expected amortization of VOBA for the next five years is as follows:

(In millions)	Expected Amortization
2016	$ 161
2017	152
2018	144
2019	131
2020	121

11. Closed Block

The Company pays guaranteed benefits under all policies included in the Closed Blocks. In the event the Closed Blocks' assets are insufficient to meet the benefits of the Closed Blocks' guaranteed benefits, we would use general assets to meet the contractual benefits of the Closed Blocks' policyholders. We ceded the ILICO Closed Block of policies to Global Atlantic. In addition, Global Atlantic is responsible for managing the dividend scale of the AmerUs Closed Block.

In conjunction with the Company's business combination with Aviva USA, the fair value option was elected for the AmerUs Closed Block, whereby all assets and liabilities of the AmerUs Closed Block were adjusted to fair value at the acquisition date of October 2, 2013. The fair value of liabilities of the AmerUs Closed Block was derived as the sum of the fair value of the AmerUs Closed Block assets plus our cost of capital in the AmerUs Closed Block. The cost of capital was determined to be the present value of the projected future after tax earnings on the required capital of the AmerUs Closed Block, discounted at a rate which represents a market participant's required rate of return.

The election of the fair value option on the AmerUs Closed Block results in the change in liabilities, exclusive of the cost of capital, to be equal to the change in the assets in periods subsequent to the acquisition date. We do not record additional policyholder dividend obligations, as there are no future GAAP earnings available to the policyholders.

The excess of the fair value of the liabilities over the fair value of the assets represents our cost of capital in the AmerUs Closed Block. The maximum amount of future earnings from the assets and liabilities of the AmerUs Closed Block is represented by the reduction in the cost of capital in future years based on the operations of the AmerUs Closed Block and recalculation of the cost of capital each reporting period.

Summarized financial information of the AmerUs Closed Block is presented below.

	December 31,	
(In millions)	2015	2014
Liabilities		
Future policy benefits	$ 1,581	$ 1,715
Other policy claims and benefits	12	15
Dividends payable to policyholders	94	96
Other liabilities	10	11
Total liabilities	1,697	1,837
Assets		
Trading securities	1,316	1,470
Mortgage loans, net of allowances	48	55
Policy loans	181	186
Total investments	1,545	1,711
Cash and cash equivalents	45	12
Accrued investment income	18	18
Reinsurance recoverable	22	31
Other assets	3	3
Total assets	1,633	1,775
Maximum future earnings to be recognized from AmerUs Closed Block	$ 64	$ 62

The following represents the contribution from AmerUs Closed Block.

	Years ended December 31,		
(In millions)	2015	2014	2013
Revenues			
Premiums	$ 58	$ 64	$ 17
Net investment income	86	86	21
Investment related gains (losses)	(124)	110	(6)
Total revenues	20	260	32
Benefits and expenses			
Future policy and other policy benefits	(24)	212	20
Dividends to policyholders	45	45	11
Total benefits and expenses	21	257	31

Federal income taxes funded by the Closed Block	1	6	—
Contribution (to) from AmerUs Closed Block, net of income taxes	$ (2)	$ (3)	$ 1

12. Debt

Refer to *Note 6 – Variable Interest Entities* for disclosures regarding borrowings of the Company's consolidated VIEs.

Revolving Credit Facility—In 2013, AHL and ALRe entered into a three-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. Beginning in 2014, Athene USA was added as a borrower. The amount available under the Credit Facility was $500 million. In connection with the Credit Facility, AHL guaranteed all of the obligations of ALRe and Athene USA, ALRe guaranteed certain of the obligations of AHL and Athene USA, and Athene USA guaranteed the obligations of AHL and ALRe. The agreement contained various standard covenants with which we had to comply. The following are significant covenants we were required to meet:

1. Consolidated debt to capitalization ratio of less than 35%, or in certain circumstances 25%,
2. Minimum consolidated net worth of no less than 70% of the Company's consolidated net worth on the date of the Company's acquisition of Aviva USA plus 50% of the cash received in any subsequent equity issuances and 50% of the Company's positive consolidated net income for each subsequent fiscal year,
3. The Company's material U.S. insurance subsidiaries to maintain a ratio of total adjusted capital to authorized control level risk-based capital (each as defined by the National Association of Insurance Commissioners (NAIC)) of no less than 400%,
4. ALRe to maintain capital and surplus of no less than 70% of ALRe's capital and surplus on the date of the Company's acquisition of Aviva USA plus 50% of ALRe's positive net income for each fiscal year, and
5. Restrictions on our ability to incur debt and liens and to declare or pay dividends, in each case with certain exceptions.

As of December 31, 2015, we had no amounts outstanding under the Credit Facility and were in compliance with all covenants.

Interest accrued on outstanding borrowings at LIBOR plus a margin based on the debt to capitalization ratio of the Company. Total interest expense was not material during the years ended December 31, 2015, 2014, or 2013. The Credit Facility had a commitment fee of 0.50% of the unused commitment. We incurred $8 million of loan origination fees which were amortized to interest expense over the term of the facility using the straight line method.

On January 22, 2016, we terminated the Credit Facility and entered into a five-year revolving credit agreement (Revolving Credit Facility) with Citibank, N.A., as administrative agent. The amount available under the Revolving Credit Facility is $1 billion, with AHL, ALRe, and Athene USA as borrowers on the agreement. Interest will accrue on outstanding borrowings at LIBOR plus a margin or a base rate plus a margin, based on the credit rating of AHL. The Revolving Credit Facility has a commitment fee on the unused commitment, based on the credit rating of AHL.

13. Common Stock

We have six classes of common stock: Class A, Class B, Class M-1, Class M-2, Class M-3, and Class M-4. The Class M-1, Class M-2, Class M-3, and Class M-4 shares are collectively referred to as Class M shares.

Class A shares collectively represent 55% of the total voting power of the Company. Class B shares represent the remaining 45% of the total voting power of the Company, and are beneficially owned by shareholders who are members of the Apollo Group, as defined in our bye-laws. Class M shares are restricted, non-voting shares issued under equity incentive plans. See additional discussion of incentive compensation in *Note 14 – Stock-based Compensation*. Our bye-laws place certain restrictions on Class A shares such that (1) a holder of Class A shares, including its affiliates, cannot control greater than 9.9% of the total outstanding vote and if a holder of Class A shares were to control greater than 9.9%, then a holder's voting power is automatically reduced to 9.9% and the other holders of Class A shares would vote the remainder on a prorated basis, (2) the total voting power held by members of our management and employees of the Apollo Shareholder Group is limited to 3%, and (3) Class A shares may be deemed non-voting when owned by a shareholder who owns Class B shares, has an equity interest in certain Apollo entities, or is a member of the Apollo Shareholder Group.

Share Activities
2015

- We received $1,038 million to settle remaining capital commitments executed on April 4, 2014 in connection with a private placement offered to accredited investors. As a result, we issued 31,564,339 Class A Shares and 8,369,230 Class B Shares at $26.00 per share.
- We received commitments and issued an additional 2,315,113 Class A Shares at $26.02 per share, resulting in proceeds received of $60 million.
- In satisfaction of our final obligations under the TASA earned by Apollo in 2014, we issued 2,311,853 Class B shares. See *Note 19 – Related Parties* for further information on the TASA.

2014

- We received commitments for 41,201,578 Class A shares and 8,730,769 Class B shares as a result of a private placement offered to accredited investors launched in late 2013. Of that commitment, 8,240,316 Class A shares and 1,746,154 Class B shares were issued at $26.00 per share in April 2014, which represented a drawdown of 20% of the committed capital in the private placement at the time. The commitment for the remaining 39,945,877 shares was recorded as common shares subscribed but unissued, with an offsetting subscription receivable as described under *Subscriptions Receivable* below.
- To encourage significant investment by key employees, we issued 3,693,730 Class A shares at a discounted price of $13.46 pursuant to our equity incentive plan.
- We issued a total of 11,426,883 Class B shares in satisfaction of certain of our obligations under the TASA. This agreement is further described in *Note 19 – Related Parties.*
- The convertible note issued in 2012 as part of the Contribution Agreement was converted to shares, resulting in the issuance of 3,808,626 Class B shares. This agreement is further described in *Note 19 – Related Parties.*
- We authorized the following additional shares at a par value of $0.001 per share: (1) 87,110,662 Class A shares, (2) 175,000,000 Class B shares, (3) two new classes of incentive compensation shares consisting of 7,500,000 Class M-3 shares and 7,500,000 Class M-4 shares, and (4) 149,998,898 shares of capital stock, which remain undesignated.

2013

- We issued shares totaling 8,869,562 upon the satisfaction of previous share purchase commitments.

Subscriptions Receivable – As of December 31, 2015, we had no subscriptions receivable. At December 31, 2014, we had 39,933,569 common shares subscribed but unissued and an offsetting subscription receivable of $1,038 million as a result of the 2014 private placement discussed above. There were no subscriptions receivable at December 31, 2013.

The table below shows the changes in each class of shares issued and outstanding:

	2015	2014	2013
Class A			
Beginning balance	15,752,736	494,200	494,200
Issued shares	34,498,220	11,950,844	—
Repurchased shares	(99,691)	—	—
Transferred from Class B shares, net	—	3,307,692	—
Ending balance	50,151,265	15,752,736	494,200
Class B			
Beginning balance	125,282,892	114,605,747	111,594,479
Issued shares	10,681,083	16,981,664	8,869,562

Ending balance	5,038,443	—	—

14. Stock-based Compensation

We adopted share incentive plans in 2009, 2012, and 2014 (Share Incentive Plans). The 2009 and 2012 Share Incentive Plans were amended and restated in 2014 (2014 Modification), along with the adoption of the 2014 Share Incentive Plan (2014 Plan). The purpose of the Share Incentive Plans is to provide an incentive to achieve long-term company goals and align the interests of our employees and directors, and AAM employees, with those of shareholders. See *Note 19 – Related Parties* regarding our relationship with AAM. Under the Share Incentive Plans, we may issue nonqualified share options, rights to purchase shares, restricted shares, restricted stock units (RSUs), and other awards which may be settled in, or based upon, our common shares.

The aggregate number of shares authorized for issuance under the Share Incentive Plans includes:

- 7,109,560 Class M-1 shares
- 5,000,000 Class M-2 shares
- 7,500,000 Class M-3 shares
- 7,500,000 Class M-4 shares
- 8,000,000 Class A common shares

Through the Share Incentive Plans, we have issued the following two categories of stock-based compensation: Class M awards and Class A awards.

Class M awards—We have issued Class M shares and RSUs concurrently with the timing of capital raises, in order to align management incentives with shareholder investments.

Class M shares function similarly to options in that they are exchangeable into Class A shares upon payment of a conversion price and other conditions being met. The settlement value of the RSUs is based upon the value of the Class A shares at the time of settlement after deducting the conversion price of the RSUs. RSUs may be settled either in cash or Class A shares at the Company's election. One portion of the Class M shares and RSUs is subject to time vesting conditions (Tranche 1), and the other portion is subject to certain performance-based vesting conditions (Tranche 2). Both Tranche 1 and Tranche 2 RSUs require an initial public offering (IPO) as an additional vesting condition. Vesting conditions are further described below.

The nature and terms of the Class M shares are generally consistent across each class. In October 2015, we issued Class M-4 shares with a different Tranche 2 performance condition than the original Class M-4 award. These shares are referred to as Class M-4 Prime. This vesting condition and any other significant differences between classes will be separately discussed throughout the following discussion.

Class M share vesting – Tranche 1 shares generally vest in 20% increments on the first through fifth anniversaries of the earlier of the date of grant or vesting inception date. Tranche 1 shares also automatically vest upon the sale of the Company or change in control, prior to the participant's termination or within six months following a qualifying termination. Unvested Tranche 1 shares are forfeited upon a participant's termination.

Tranche 2 awards vest if certain performance hurdles are met, described as follows:

- *Class M (excluding M-4 Prime)* – The vesting performance hurdle is based on the rate of return and realized cash received by certain holders of our shares (Relevant Investors), as defined in each incentive plan, upon sale of their shares prior to or during an IPO or within a 15 month period thereafter (Lock-Up End Date). Vesting may also occur if the performance hurdles are met based on a deemed sale by a Relevant Investor on the dates 7.5, 12, and 15 months after an IPO, and on each trading day thereafter, through the Contractual Term of each M share class, at a price equal to the volume weighted average closing trading price during the 90 day period prior to such date. Based on the results of the performance hurdle calculations, the vesting percentages of the Tranche 2 awards can range from 0% to 100%. Upon a participant's qualifying termination, unvested Tranche 2 awards remain outstanding and eligible to vest for a period of 18 months following the later of the IPO date or date of a qualifying termination. Any unvested Tranche 2 shares remaining at the end of this 18 month period are forfeited.
- *Class M-4 Prime* – The vesting performance hurdle is based on the attainment of a specified Class A share price following an IPO. Vesting will also occur upon a sale of the Company or change in control in which Class A Shares are valued at the respective hurdle share price. Any unvested Tranche 2 shares remaining as of the tenth anniversary of the grant date are forfeited.

Upon a participant's termination, vested Class M shares and converted Class A shares are eligible to be repurchased, at the Company's option, for a price determined based on the reason for termination.

Contractual Terms – Unvested Class M share are forfeited as of the following dates:

- *Class M-1* – 10 years from the grant date
- *Class M-2* – 10 years from the grant date
- *Class M-3* – 4.25 years following an IPO (three years after Lock-Up End Date)
- *Class M-4* – 5.25 years following an IPO (four years after Lock-Up End Date)

Although the Class M shares function similarly to options, they are equity shares, and have dividend rights and no expiration date once vested. Prior to vesting, Class M shares generally do not participate in the Company's dividends, if any.

Conversion to Class A shares – Vested Class M shares become eligible for conversion to Class A shares upon the occurrence of the following events:

- *Class M (excluding M-4 Prime)* – The earlier of (1) the realization by Relevant Investors of cash proceeds equal to their investment in the Company or (2) the effective date of an IPO.
- *Class M-4 Prime* – The earlier of (1) a sale of the Company or change in control or (2) the effective date of an IPO.

Following this date, a holder of vested Class M shares may elect to exchange vested shares for an equivalent number of Class A shares upon payment to the Company, in cash or in shares, of the conversion price less the amount of certain dividends paid by the Company on Class A shares subsequent to the granting of Class M shares. Following a conversion to Class A shares, shares can be sold subject to contractual transfer or legal restrictions, such as lockups, blackout periods, or affiliate sale volume caps.

As of December 31, 2015, no Class M shares were exchangeable into Class A shares.

2014 Modification – During 2014, we adopted amendments to the terms of the existing Class M-1 and M-2 shares to conform the vesting and repurchase terms of the Class M-1 and M-2 shares to those of the Class M-3 and M-4 shares, described above. Twenty-nine individuals were impacted by the modification.

Under the terms of the original plans for the Class M-1 and M-2 shares, we had the right to repurchase vested shares at the lower of purchase cost or fair value if an employee resigned without good reason, either before an IPO or under other conditions as defined in the original plans. As a result of this repurchase option, the expense associated with vested incentive shares would not be recognized on the consolidated statements of income until the date on which such shares would have been converted to Class A shares. Therefore, no expense had been recorded related to the Class M-1 or M-2 shares prior to the 2014 Modification, which revised the terms to generally call for a repurchase price equal to the fair market value of a Class A share less the conversion price of the respective Class M share.

Upon modification of a share award, the share awards are revalued and remeasured as if a new share award was issued. The 2014 Modification of the Class M-1 and M-2 shares resulted in non-recurring additional stock based compensation expense of $81 million.

Class A awards—The 2014 Plan also allows for the purchase of Class A shares by certain employees and directors of the Company and its affiliates. In 2015, we issued an aggregate of 442,590 fully-paid Class A shares for total proceeds of $12 million under the 2014 Plan. In April 2014, we issued an aggregate of 3,693,730 fully-paid Class A shares for total proceeds of $50 million under the 2014 Plan. For the years ended December 31, 2015, and 2014, we recognized $2 million and $46 million, respectively, of stock-based compensation expense associated with the Class A shares to the extent shares were purchased at a discounted price from fair value on the issuance date.

Additionally, we may issue restricted Class A shares to management of the Company and its affiliates. In 2015, we issued 160,754 restricted Class A shares to management of the Company and its affiliates. These awards had a grant date fair value of $26.02 per share. The restricted Class A shares had a service commencement date of January 1, 2015, and vest ratably over three years. No shares were legally vested at grant date. The restricted Class A shares are classified as equity awards measured using fair value of Class A shares on grant date.

A new annual bonus plan began in 2015 under which certain employees are eligible to receive a percentage of their bonus in restricted Class A shares which generally vest over three years. Employees receiving equity under this plan for the 2015 bonus period only will have one third of their awards vested at time of grant in February 2016. As the service inception date for these awards occurred in 2015 and precedes the grant date, compensation expense for the portion to be vested at grant date was recognized in 2015 at the current period fair value.

Compensation expense—Class M shares with Tranche 1 vesting requirements are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period. The expense for Tranche 1 shares issued to employees is calculated based on grant date fair value multiplied by the number of shares awarded. The expense for Tranche 1 shares issued to non-employees (i.e. AAM participants) is recognized initially at the grant date fair value multiplied by the number of shares. However, the fair value of the awards are revalued each reporting period through completion of counterparty performance to coincide with the fair value of the services provided by the non-employees. The result of the revaluation is recognized in the period in which the revaluation occurs.

Employee and non-employee Tranche 2 shares, excluding M-4 Prime, are accounted for as liability awards. Compensation expense for all participants is remeasured each reporting period through settlement at the fair value of the awards, factoring in the probability of achieving the vesting targets described above. Upon vesting of Tranche 2 shares, the liability is reclassified to equity, because the vesting condition which resulted in liability classification is no longer present, and measured at fair value on the date of reclassification.

Tranche 2 M-4 Prime shares are accounted for as equity awards with expense recognition commencing upon completion of an IPO by the Company and calculated based on the grant date fair value of such awards multiplied by the number of shares awarded.

We also issued a net of 181,050 Class M-4 RSUs during the year ended December 31, 2015. Since there is no vesting of the RSUs prior to an IPO, there is no current period expense associated with these awards.

Class A shares are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period, if any. The compensation expense for Class A shares is calculated based on the grant date fair value of the Class A common shares, less the purchase price, multiplied by the number of shares awarded.

Components of stock compensation expense recorded on the consolidated statements of income are as follows:

	Years ended December 31,	
(In millions)	2015	2014
Class M – Tranche 1	$ 12	$ 54
Class M – Tranche 2	50	47
Class A	5	47
Stock-based compensation expense	$ 67	$ 148

Of the total compensation expense amount in 2014, $131 million represents a non-recurring expense that was primarily the result of the 2014 Modification and the purchase of discounted Class A shares under the 2014 Plan as previously discussed. There was no compensation expense recognized in connection with the stock-based compensation plans in 2013. No compensation costs were capitalized as part of the cost of an asset during any of the reported years.

As of December 31, 2015, the Class M shares had unrecognized compensation expense of $23 million associated with the Tranche 1 vesting awards and $62 million associated with the Tranche 2 vesting awards. The cost is expected to be recognized over a weighted-average period of 1.7 years and 1.2 years, associated with the Tranche 1 vesting awards and Tranche 2 vesting awards, respectively. There was no unrecognized compensation expense associated with discounted Class A shares.

Valuation Assumptions—The fair value of the Class M shares issued prior to 2014 was estimated on the date of grant using a lattice-based valuation model. Beginning in 2014, we determined the fair value of the Class M shares using the Black-Scholes option pricing model, with application of a Monte-Carlo simulation to determine the value of the Tranche 2 Class M shares. Assumptions used for valuation of all Class M shares are as follows:

Assumptions used	December 31, 2015	December 31, 2014	2014 Modification Date
Athene Class A and B share value	$34.23	$26.02	$26.00
Risk-free interest rate	0.9% – 1.1%	0.6%	0.3%
Expected dividend yield	—%	—%	—%
Volatility	25.9%	17.5%	20.0%
Expected term	2.42 years	2.39 years	2.27 years

The fair value of the Class A and B shares at December 31, 2015 is determined based on GAAP book value multiple approach. Under this approach we utilized a comparable peer set of public companies and their share price to book value ratio, less applicable discounts for lack of marketability of AHL in order to determine the AHL Class A and B share price. The fair value of Class A shares on December 31, 2014 was determined using the embedded value method which is based on the present value of the future expected regulatory distributable income generated by the net assets plus the excess capital. The fair value of Class A shares on the modification date of the Class M-1 shares and M-2 shares was determined to be $26.00 per share as the modification date coincided with a private placement of our Class A shares at a price of $26.00 per share.

The risk-free interest rates are derived from U.S. Constant Maturity Treasury yield at the valuation date, with maturity corresponding to weighted-average expected term. The expected dividend yields are based on our historical and expected dividend payments, which have been zero to date. Absent a public market for our shares, we have historically estimated volatility of our share price based on the published historical volatilities of comparable publicly-traded companies over a period consistent with the expected life of the award being valued.

We estimate the weighted-average expected term of the Class M shares based on the weighted-average time to an expected liquidity event, such as an IPO or other Relevant Investor sale, according to the terms of the Class M shares and including an assumption as to expected employee exercise behavior after such liquidity event. The weighted-average expected term is determined from the 2014 modification date, the grant date, or the period end date depending on the accounting treatment for each award.

In addition, the Tranche 2 Class M share assumptions include an estimate of the probability of the vesting conditions being met. This assumption is developed by using a Monte-Carlo simulation to generate the possible future value of the Company's equity at a liquidity event to determine the percentage of Tranche 2 Class M shares that vest for each simulated path. The fair value of the Tranche 2 Class M shares is then estimated by averaging the value for all simulated paths and discounting the results at the risk-free interest rate to the valuation date.

Award activity—A rollforward of award activity for the year ended December 31, 2015, of the Class M shares is as follows:

	Tranche 1			Tranche 2			Total	
(In millions, except share and per share data)	Class M Shares	Weighted Average Conversion Price	Aggregate Intrinsic Value	Class M Shares	Weighted Average Conversion Price	Aggregate Intrinsic Value	Class M Shares	Weighted Average Conversion Price
Outstanding at the beginning of the year	5,144,481	$ 11.36		6,529,661	$ 11.07		11,674,142	$ 11.20
Granted during the year	1,925,600	26.96		2,868,934	27.29		4,794,534	27.16
Forfeited during the year	(203,675)	20.09		(254,375)	20.08		(458,050)	20.09
Repurchased during the year	(50,902)	20.09		—	—		(50,902)	20.09
Outstanding at the end of the year	6,815,504	$ 15.44		9,144,220	$ 15.91		15,959,724	$ 15.71
Vested and expected to vest at December 31, 2015	6,712,794	$ 13.79	$ 127	8,882,321	$ 14.66	$ 163		

There were no convertible, converted, or expired shares during the years ended December 31, 2015, 2014, and 2013.

The following represents the activity of nonvested Class M shares for the year ended December 31, 2015:

	Tranche 1		Tranche 2		Total	
	Class M Shares	Weighted Average Grant Date Fair Value	Class M Shares	Weighted Average Grant Date Fair Value	Class M Shares	Weighted Average Grant Date Fair Value
Nonvested at the beginning of the year	1,743,777	$ 7.36	5,421,995	$ 2.25	7,165,772	$ 3.50
Granted during the year	1,925,600	7.06	2,868,934	9.74	4,794,534	8.66
Vested during the year	(804,411)	5.35	—	—	(804,411)	5.35
Forfeited during the year	(203,675)	7.60	(254,375)	3.49	(458,050)	5.32
Nonvested at the end of the year	2,661,291	$ 7.74	8,036,554	$ 4.88	10,697,845	$ 5.59

The weighted average grant date fair value of Class M share awards granted during the years ended December 31, 2014, and 2013, was $9.31 and $0.16, respectively.

The total fair value of vested Tranche 1 Class M shares was $98 million, $49 million, and zero as of December 31, 2015, 2014, and 2013, respectively. The total fair value of vested Tranche 2 Class M shares was $28 million, $17 million, and zero as of December 31, 2015, 2014, and 2013, respectively.

In 2014, we issued 6,184,948 of our Class B shares to Apollo in satisfaction of settlement amounts earned in 2014 by Apollo under the TASA discussed in *Note 19 – Related Parties*. In 2014, we also settled the equity swap transaction related to the TASA through the issuance of 5,241,935 Class B shares to Apollo.

15. Earnings Per Share

The following table represents basic and diluted earnings per share calculation:

(In millions, except share and per share data)	Years ended December 31, 2015	2014	2013
Net income available to AHL shareholders	$ 562	$ 463	$ 916
Basic weighted average shares outstanding	175,091,802	129,519,108	113,506,457
Dilutive effect of stock compensation plans	86,846	11	9
Dilutive effect of equity swap[1]	—	2,089,345	1,603,564
Diluted weighted average shares outstanding	175,178,648	131,608,464	115,110,030
Earnings per share[2]			
Basic	$ 3.21	$ 3.58	$ 8.07
Diluted	$ 3.21	$ 3.52	$ 7.96

[1] *Equity swap relates to TASA. See Note 18 – Related Parties for additional information.*

[2] *Calculated using whole figures.*

Dilutive shares are calculated using the treasury stock method. Earnings per share for all Class M shares is zero, as no earnings are attributable to these classes of shares.

The number of shares and RSUs excluded from diluted shares outstanding were 16,653,624 shares, 11,674,141 shares, and 8,425,063 shares for the years ended December 31, 2015, 2014, and 2013, respectively. These are related to Class M shares and RSUs, as the issuance restrictions had not been satisfied as of each year end.

16. Accumulated Other Comprehensive Income

The following is a detail of AOCI, net of offsets:

(In millions)	December 31, 2015	2014
AFS securities	$ (405)	$ 1,328
DAC, DSI, VOBA, and future policy benefit adjustment on AFS securities	91	(328)
Noncredit component of other-than-temporary impairment losses on AFS securities	(15)	(5)
Hedging instruments	15	4
Pension adjustments	(4)	(16)
Foreign currency translation adjustments	(4)	—
Accumulated other comprehensive income (loss), before taxes	(322)	983
Deferred income tax asset (liability)	85	(339)
Accumulated other comprehensive income (loss)	$ (237)	$ 644

Changes in AOCI are presented below.

(In millions)	Years ended December 31, 2015	2014	2013
Unrealized gains (losses) on AFS securities			
Unrealized holding gains (losses) arising during the year	$ (1,661)	$ 1,225	$ (221)
Change in DAC, DSI, VOBA, and future policy benefits	419	(317)	66
Less: Reclassification adjustment for gains (losses) realized in net income[1]	72	9	69
Less: Income tax expense (benefit)	(428)	318	(73)
Change in unrealized gains (losses) on AFS securities	(886)	581	(151)
Noncredit component of other-than-temporary impairment losses on AFS securities			
Noncredit component of other-than-temporary impairment losses on AFS securities recognized during the year	(13)	(1)	1
Less: Reclassification adjustment for losses realized in net income[1]	(3)	—	(4)
Less: Income tax expense (benefit)	(4)	1	2
Change in noncredit component of other-than-temporary impairment losses on AFS securities	(6)	(2)	3
Unrealized gain (loss) on hedging instruments			
Change in hedging instruments during the year	11	10	(2)
Less: Income tax expense	4	4	—
Change in hedging instruments	7	6	(2)
Pension adjustments			
Pension adjustments during the year	12	(17)	1
Less: Income tax expense (benefit)	4	(6)	—
Change in pension adjustments	8	(11)	1
Foreign currency translation adjustments			
Foreign currency translation adjustments during the year	(4)	—	—
Change in AOCI	$ (881)	$ 574	$ (149)

[1] *Recognized in investment related gains (losses) on the consolidated statements of income*

17. Income Taxes

Income tax expense consists of the following:

(In millions)	Years ended December 31, 2015	2014	2013
Current	$ (19)	$ (84)	$ 81
Deferred	33	138	(89)
Income tax expense (benefit)	$ 14	$ 54	$ (8)

Income tax expense was calculated based on the following components of income before income taxes:

(In millions)	Years ended December 31, 2015	2014	2013
Pre-tax income – Bermuda	$ 510	$ 271	$ 1,040
Pre-tax income – Germany	8	—	—
Pre-tax income (loss) – U.S.	74	261	(51)
Income before income taxes	$ 592	$ 532	$ 989

The expected tax provision computed on pre-tax income at the weighted average tax rate has been calculated as the sum of the pre-tax income in each jurisdiction multiplied by that jurisdiction's applicable statutory tax rate. Statutory tax rates of 0%, 31%, and 35% have been used for Bermuda, Germany, and the United States, respectively. A reconciliation of the difference between the provision for income taxes and the expected tax provision at the weighted average tax rate is as follows:

	Years ended December 31,		
(In millions)	2015	2014	2013
Expected tax provision computed on pre-tax income at weighted average income tax rate	$ 28	$ 91	$ (18)
(Decrease) increase in income taxes resulting from:			
Deferred tax valuation allowance	(6)	(22)	8
Prior year true-up	2	(12)	5
Interest expense on surplus notes	—	—	(1)
Corporate owned life insurance	(7)	(6)	(2)
State taxes and other	(3)	3	—
Total income tax expense (benefit)	$ 14	$ 54	$ (8)
Effective tax rate	2%	10%	(1)%

Total income taxes were as follows:

	Years ended December 31,		
(In millions)	2015	2014	2013
Income tax expense (benefit)	$ 14	$ 54	$ (8)
Income tax from OCI	(424)	317	(71)
Total income taxes	$ (410)	$ 371	$ (79)

Deferred income tax assets and liabilities consisted of the following:

	December 31,	
(In millions)	2015	2014
Deferred tax assets		
Insurance liabilities	$ 1,351	$ 2,075
Investments, including derivatives	144	8
Net unrealized losses on AFS	84	—
Net operating and capital loss carryforwards	160	162
VOBA	72	—
Employee benefits	57	50
Other	20	27
Total deferred tax assets	1,888	2,322
Valuation allowance	(193)	(133)
Deferred tax asset, after valuation allowance	1,695	2,189
Deferred tax liabilities		
Investments, including derivatives	573	1,166
Net unrealized gains on AFS	—	339
VOBA	372	354
Deferred acquisition costs	98	81
Other	46	29
Total deferred tax liability	1,089	1,969
Net deferred tax asset	$ 606	$ 220

At December 31, 2015, we have gross deferred tax assets associated with U.S. federal and state net operating losses of $448 million, which will begin to expire in 2022.

The valuation allowance consists of the following:

	December 31,	
(In millions)	2015	2014
U.S. federal and state net operating losses	$ 100	$ 92
U.S. other deferred tax assets	27	41
German other deferred tax assets	66	—
Total valuation allowance	$ 193	$ 133

AHL and its Bermuda subsidiaries file protective U.S. income tax returns and its U.S. subsidiaries file income tax returns with the U.S. federal government and various U.S. state governments. AADE is not subject to U.S. federal and state examinations by tax authorities for years prior to 2007, while Athene Annuity & Life Assurance Company of New York (AANY) and Athene Life Insurance Company (ALIC) are not subject to examinations for years prior to 2012. IRS examinations for Aviva USA and subsidiaries have been completed for all tax years prior to 2011. We have protested certain unfavorable adjustments related to tax years 2008 through 2010 for Aviva USA. We do not believe any tax payments resulting from these examinations will materially impact the Company's effective tax rate or net income. Additionally, Aviva plc, the former parent company of Aviva USA, would be obligated to pay any additional tax. The IRS is currently auditing the 2011 through 2013 consolidated tax returns filed by Aviva USA. The burden of any proposed adjustments for tax periods, or portions thereof, ending on or prior to the acquisition would be borne by Aviva plc. No material proposed adjustments have been issued with respect to this exam.

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, the Company will be exempted from taxation until the year 2035.

Withholding taxes have not been provided on undistributed earnings of AHL's U.S. and German subsidiaries as of December 31, 2015, or 2014. Although withholding taxes may apply in the event a dividend is paid by AHL's U.S. or German subsidiaries, we have not accrued withholding taxes as we do not intend to remit these earnings. The cumulative amount subject to withholding tax, if distributed, as well as the determination of the associated tax liability, is not practicable to compute; however, it may be material to the Company's financial position and results of operations. Any dividends remitted to AHL from ALRe are not subject to withholding tax.

18. Statutory Requirements

AHL's insurance and reinsurance subsidiaries are subject to insurance laws and regulations in the jurisdictions in which they operate including Bermuda, all 50 states in the United States, and the District of Columbia. Certain regulations include restrictions that limit the dividends or other distributions, such as loans or cash advances, available to shareholders without prior approval of the insurance regulatory authorities. The differences between financial statements prepared for insurance regulatory authorities and GAAP financial statements vary by jurisdiction.

Bermuda statutory requirements—ALRe is licensed by the Bermuda Monetary Authority (BMA) as a long term insurer and is subject to the Insurance Act 1978, as amended (Bermuda Insurance Act) and regulations promulgated thereunder. The statutory financial statements of ALRe are prepared in accordance with the Bermuda Insurance Act, as well as directions issued by the BMA. Under the Bermuda Insurance Act, ALRe is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin (MSM) and the Enhanced Capital Requirement (ECR). The MSM is equal to the greater of $8 million or 2% of the first $500 million of assets plus 1.5% of assets above $500 million and the ECR is calculated based on either an internally developed risk-based capital model or a standard risk-based capital model developed by the BMA. At December 31, 2015, the MSM and ECR were $723 million and $1,751 million, respectively.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's statutory capital and surplus, unless at least two members of ALRe's board of directors sign and submit to the BMA, an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MSM and ECR, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of statutory capital. Distributions in excess of this amount require the approval of the BMA. As of December 31, 2015, and 2014, the maximum distribution ALRe was permitted to pay AHL without the need for prior approval was $3,529 million and $3,068 million, respectively.

The BMA has granted ALRe permission to use amortized cost instead of fair value as the basis for non-equity securities, including investments underlying funds withheld and modco reinsurance agreements. Excluded from ALRe's statutory returns were $162 million of unrealized losses and $1,255 million of unrealized gains as of December 31, 2015, and 2014, respectively.

Germany statutory requirements—Athene Lebensversicherung AG (ALV) and Athene Pensionskasse AG (APK) (collectively, the life entities of ADKG) are regulated by the Federal Financial Supervisory Authority of Germany (BaFin) as private insurance undertakings and are subject to the Insurance Supervision Act and regulations promulgated thereunder. The life entities of ADKG are required to maintain minimum statutory capital as calculated against reserves; however, we are permitted to use dividend payable balances held for policyholder participation in determining the total capital of the respective life entity. The following table demonstrates the capital requirements of each life entity:

	December 31, 2015	
(In millions)	Required Capital (Solvency I)	Solvency I Ratio
ALV	$ 195	166.8%
APK	3	138.6%

The life entities of ADKG are restricted as to the payment of dividends pursuant to calculations, which are based upon the analysis of current euro swap rates against existing policyholder guarantees. As of December 31, 2015, the life entities of ADKG individually and collectively did not exceed this threshold and no amounts were available for distribution.

U.S. statutory requirements—AHL's regulated U.S. subsidiaries and the corresponding insurance regulatory authorities are as follows:

Subsidiary	Regulatory Authority
AADE	Delaware Department of Insurance
ALIC	Delaware Department of Insurance
AANY	New York Department of Financial Services
Athene Life Insurance Company of New York (ALICNY)	New York Department of Financial Services
AAIA	Iowa Insurance Division
Structured Annuity Reinsurance Company (STAR)	Iowa Insurance Division
Athene Re USA IV	State of Vermont Department of Financial Regulation

Each entity's statutory statements are presented on the basis of accounting practices determined by the respective regulatory authority. The regulatory authority recognizes only statutory accounting practices prescribed or permitted by the corresponding state for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under insurance law.

The maximum dividend these subsidiaries can pay to shareholders, without prior approval of the respective state insurance department, is subject to restrictions relating to statutory surplus or net gain from operations. The maximum dividend payment over a twelve-month period may not, without prior approval, be paid from a source other than earned surplus and may not exceed the greater of (1) the prior year's net gain from operations or (2) 10% of policyholders' surplus. Based on these restrictions, the maximum dividend AADE could pay to Athene USA, and ultimately to AHL's shareholders, absent regulatory approval was $125 million as of December 31, 2015. Other requirements limit the amount that could be withdrawn from AADE and the maximum AADE could dividend while staying in compliance with these state regulations was $65 million as of December 31, 2015. No other subsidiaries could pay a dividend to AHL as of December 31, 2015, without prior regulatory approval.

As of December 31, 2015, AHL's U.S. subsidiaries' solvency, liquidity, and risk-based capital amounts were significantly in excess of the minimum levels required.

In some instances, the states of domicile of our U.S. subsidiaries have adopted prescribed accounting practices that differ from the required accounting outlined in NAIC Statutory Accounting Principles (SAP). These subsidiaries also have certain accounting practices permitted by the states of domicile that differ from those found in NAIC SAP. These prescribed and permitted practices are described as follows:

AAIA – Among the products issued by AAIA are indexed universal life insurance and fixed indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, primarily the S&P 500. We purchase call options, futures, and variance swaps to hedge the growth in interest credited to the customer as a direct result of increases in the related index. The Iowa Insurance Division allows an insurer to elect to recognize changes in the fair value of derivative instruments purchased to hedge indexed products in the statutory statement of operations. AAIA has elected this option for its futures and variance swaps. Application of this option does not impact AAIA's statutory surplus.

Additionally, the Iowa Insurance Division allows an insurer to elect (1) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (2) to use an indexed annuity reserve calculation methodology under which call options associated with the current index interest crediting term are valued at zero. AAIA has elected to apply this option to its over-the-counter call options and reserve liabilities. As a result, AAIA's statutory surplus increased by $14 million and $85 million as of December 31, 2015, and 2014, respectively.

The NAIC requires annuities issued by life insurance companies on or after January 1, 2015, to use the 2012 Individual Annuity reserving (IAR) Mortality Table. During 2015, the Iowa Insurance Division set an alternative effective date of January 1, 2016 for adoption of the 2012 IAR

Mortality Table. AAIA has chosen to use the Annuity 2000 Mortality Table for annuities issued between January 1, 2015, and December, 31, 2015. As a result, AAIA's statutory surplus increased by $3 million as of December 31, 2015. This prescribed practice had no impact to any period prior to 2015.

Athene Re USA IV – AAIA has ceded the AmerUs Closed Block to Athene Re USA IV on a 100% funds withheld basis. A permitted practice in the State of Vermont allows Athene Re USA IV to include as admitted assets the face amount of all issued and outstanding letters of credit used to fund its reinsurance obligations to AAIA in its statutory financial statements. If Athene Re USA IV had not followed this permitted practice, then it would not have exceeded authorized control level risk based capital requirements. At December 31, 2015, the face amount of the letters of credit is $153 million.

Statutory capital and surplus and net income (loss)—The following table presents, for each of the our insurance subsidiaries, the statutory capital and surplus and the statutory net income (loss), based on the most recently filed statutory financial statements filed with insurance regulators:

	Statutory Capital & Surplus		Statutory Net Income (Loss)		
	December 31,		Years ended December 31,		
(In millions)	2015	2014	2015	2014	2013
ALRe	$ 5,650	$ 4,048	$ 461	$ 632	$ 2,704
AADE	1,251	1,154	68	116	50
ALIC	77	76	1	1	1
AANY	208	168	8	7	12
ALICNY	73	55	14	88	(108)
AAIA	1,109	1,040	597	263	43
STAR	76	74	4	35	(56)
Athene Re USA IV	38	39	1	6	18
ALV[1]	325	N/A	8	N/A	N/A
APK[1]	4	N/A	1	N/A	N/A

N/A – Not applicable due to acquisition in 2015.

[1]*Note that capital includes dividend balances accrued for policyholder participation.*

19. Related Parties

Athene Asset Management

Investment related expenses – Substantially all of our investments, with the exception of ADKG, are managed by AAM, a subsidiary of AGM. AAM provides direct investment management, asset allocation, mergers and acquisition asset diligence, and certain operational support services for our investment portfolio, including investment compliance, tax, legal, and risk management support. As of December 31, 2015, AAM directly manages $47,441 million of our investment portfolio assets, of which 82.7% are rated one or two by the NAIC. For certain assets which require specialized sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. For the services related to these investments, AAM earns a fee of 0.40% per annum on all assets managed in accounts owned by or related to the Company, including sub-advised assets but excluding assets of ADKG and certain other limited exceptions. Additionally, AAM recharges the sub-advisory fees to the Company.

AAM has entered into a Master Sub-Advisory Agreement (MSAA) with certain Apollo affiliates to sub-advise AAM with respect to a portion of our assets, with the fees recharged to us, in addition to the gross fee of 0.40% per annum paid to AAM as described above. The MSAA covers services rendered by Apollo-affiliated sub-advisors relating to investments in certain asset classes, primarily CLO, CMBS, and ABS.

The following represents the assets sub-advised by Apollo affiliates:

(In millions, except for percentages)	December 31, 2015	December 31, 2014
Fixed maturity securities		
U.S. state, municipals, and political subdivisions	$ 10	$ 147
Foreign governments	107	—
Corporate	1,435	1,146
CLO	4,339	3,431
ABS	1,746	1,478
CMBS	1,010	845
RMBS	21	21
Mortgage loans	1,594	1,329
Investment funds	21	19
Trading securities	207	146
Funds withheld at interest	1,182	1,136
Other investments	83	56
Total assets	$ 11,755	$ 9,754
Percent of total AAM managed Company assets	20%	16%

Apollo Asset Management Europe

Investments of ADKG are managed internally. In addition, ADKG has entered into an investment advisory agreement with Apollo Asset Management Europe (AAME), also a subsidiary of AGM, pursuant to which AAME provides advisory services for a significant portion of our ADKG investment portfolio. In providing these services, AAME has access to Apollo's European expertise and capabilities. The ADKG investments sub-advised by AAME consist primarily of corporate and sovereign bonds, as opposed to the more diverse range of securities managed by AAM. As compensation for the investment advisory services rendered, AAME receives a fee of 0.10% per year on the assets it sub-advises.

Pursuant to a new advisory agreement dated March 1, 2016, certain ADKG asset categories are no longer sub-advised by AAME. The new agreement has the same fee rate but excludes certain assets. These excluded assets are operating cash, mortgage loans secured by residential and commercial properties that are not identified and advised by AAME, assets related to unit-linked policies, and assets held in German special investment funds managed or advised by Apollo, AAME, AAM, or any of their respective affiliates, to the extent that such entity receives a management or advisory fee in connection with the fund. The previous advisory agreement excluded only assets related to unit-linked policies.

The following represents the assets sub-advised by AAME:

(In millions)	December 31, 2015
Fixed maturity securities	
Foreign governments	$ 2,349
Corporate	1,607
Mortgage loans	139
Other investments	961
Total assets	$ 5,056

The following summarizes the asset management fees and sub-advisory fees we have incurred related to AAM, AAME, and other Apollo affiliates:

(In millions)	Years ended December 31, 2015	2014	2013
Asset management fees	$ 226	$ 222	$ 103
Sub-advisory fees	42	36	20

The management and sub-advisory fees are included within the net investment income line on the consolidated statements of income. The management fees payable as of December 31, 2015, and 2014, were $35 million and $30 million, respectively. The sub-advisory fees payable as of December 31, 2015, and 2014, were $24 million and $35 million, respectively.

In addition, we have invested in various investment funds managed by related parties, as discussed in *Note 6 – Variable Interest Entities*, that pay management fees and carried interest, as applicable, to Apollo entities. To the extent these investment funds have been consolidated, fees are included in net investment income on the consolidated statements of income. Allocations of carried interest to the general partner were made based on unrealized gains and losses within the fund and are reflected in net income attributable to noncontrolling interests on the consolidated statements of income. The following summarizes the management fees and carried interest reported:

	Years ended December 31,		
(In millions)	2015	2014	2013
Management fees of consolidated investment funds	$ 6	$ 10	$ 15
Carried interest allocation	16	8	81

The investment management or advisory agreements with AAM or AAME have no stated term and any party can terminate upon notice. However, our bye-laws provide that we will not exercise our termination rights under the agreements, except that any agreement may only be terminated on October 31, 2018, or any third anniversary thereafter. Any termination on that date without cause requires (1) approval of our board of directors and the holders of our common shares that hold a majority of total voting power (giving effect to the voting allocation provisions set forth in our bye-laws) and (2) six months' prior written notice to AAM or AAME of termination. We may terminate the investment management agreement for cause, with the approval of our board of directors.

Because the Apollo Group has a significant voting interest in us, in order to protect against potential conflicts of interest resulting from transactions that we have entered, and will continue to enter into with the Apollo Group, our board of directors has formed a conflicts committee, consisting of five of our directors who are not officers or employees of any member of the Apollo Group, other than us. The conflicts committee reviews and a majority of the committee members must approve certain material transactions between us and the Apollo Group, subject to certain exceptions.

Service fees – We have entered into shared services agreements with AAM. Under these agreements, we and AAM make available to each other certain personnel and services. Expenses for the services are based on the amount of time spent on the affairs of the other party, in addition to actual expenses incurred and certain cost reimbursements. For the years ended December 31, 2015, 2014, and 2013, net expenses allocated from (to) AAM under these agreements were $2 million, $(13) million, and $16 million, respectively. The Company had $2 million of net expenses payable to AAM as of December 31, 2015, and $4 million of net expenses receivable from AAM as of December 31, 2014.

Other AGM Affiliates

Contribution agreement – In 2012, in order to provide pre-funding for and increase certainty to close future acquisitions, AAA Guarantor – Athene, L.P. and its subsidiary, Apollo Life Re Ltd. (collectively, the AAA Investor), together the largest single investor in the Company at the time, and certain other parties entered into a Contribution Agreement. The AAA Investor contributed investment assets to the Company in exchange for our Class B shares, a promissory note, and cash. A portion of the purchase price for 1,509,091 Class B shares was initially held back pending the transfer of certain assets requiring regulatory approval; and, these shares were subsequently issued in 2013 after the required approvals were received. The Company partially repaid $62 million of the promissory note in cash. The Company paid the note in full during the third quarter of 2014 through the issuance of Class B shares.

Transaction Advisory Services Agreement (TASA) – Since our founding, Apollo has provided a diverse array of services in order to grow our balance sheet, source, underwrite, and integrate transactions and has provided us access to their infrastructure. Through October 30, 2012, we had a standard 10-year monitoring contract with Apollo Alternative Assets, L.P., Apollo Management Holdings, L.P. and Apollo Global Securities, LLC (collectively, the Apollo TASA Parties) for these services that required cash payment of a quarterly monitoring fee of 0.50% of our capital and surplus, as defined, plus out of pocket expenses, with a termination date of July 15, 2019.

As we began to implement public company readiness initiatives in late 2012, both parties voluntarily agreed to an early termination of the monitoring contract. In exchange for early termination of the monitoring contract, Apollo received settlement fees on a quarterly basis from January 1, 2013, to December 31, 2014. Also, to promote alignment between Apollo and Athene's shareholders and to preserve cash to support Athene's growth plan, Apollo elected to receive its settlement fees under the agreement in shares of Athene rather than cash.

On January 1, 2013, we entered into an equity swap transaction with Apollo in connection with the termination of the quarterly monitoring fee discussed above. Pursuant to this swap, the quarterly settlement amount continued to accrue to Apollo, but the payment of those amounts (whether in stock or cash) would not be made to Apollo until the earlier of the time when Apollo was no longer deemed to control the Company within the meaning of the derivative instrument delivered pursuant to the TASA and October 31, 2017.

In April 2014, as a result of the external capital raise, Apollo was no longer deemed to control the Company (as defined under the swap) and, as a result, the swap was settled in stock for settlement amounts owed through that date.

Additionally, in April 2014, we further amended the TASA to exclude from capital and surplus, on which the quarterly monitoring fee was calculated, the capital received in the April 2014 capital raise, and any capital raised in connection with certain potential future acquisitions as defined in the amended TASA.

The total costs incurred pursuant to the TASA, including direct expenses, were $228 million and $134 million for the years ended December 31, 2014, and 2013, respectively, and are recorded in policy and other operating expenses on the consolidated statements of income. The total liability outstanding was fully settled as of December 31, 2014, and no additional fees will accrue under TASA.

Other related party transactions—In 2015, we entered into a loan purchase agreement with AmeriHome Mortgage Company, LLC (AmeriHome), an investee of A-A Mortgage, an equity method investee. The agreement allows us to purchase certain residential mortgage loans which they have purchased from correspondent sellers and pooled for sale in the secondary market. AmeriHome retains the servicing rights to the sold loans. We have purchased $83 million of residential mortgage loans under this agreement during the year ended December 31, 2015.

20. Commitments and Contingencies

Contingent Commitments—The Company had commitments to make additional capital contributions to certain investment funds of $825 million and $833 million as of December 31, 2015, and 2014, respectively. The Company expects most of its current commitments will be invested over the next five years; however, these commitments could become due any time upon counterparty request.

Funding Agreements—ALIC and AAIA are members of the Federal Home Loan Bank (FHLB) of Indianapolis and Des Moines, respectively. Through membership, we have issued funding agreements with a carrying value of $1,112 million and $1,271 million as of December 31, 2015, and 2014, respectively, to the FHLB in exchange for cash advances. We are required to provide collateral equal to the funding agreements, considering any discounts to the securities posted and prepayment penalties. See below detail of assets restricted under these agreements.

In the second quarter of 2015, AAIA and AADE entered into a purchase agreement, pursuant to which Athene Global Funding, a special purpose, non-affiliated statutory-trust may offer up to $5 billion of its senior secured medium-term notes, under a funding agreement backed notes (FABN) program. Athene Global Funding uses the net proceeds from each sale to purchase one or more funding agreements from either AAIA or AADE. Funding agreements issued under this program have a carrying value of $250 million as of December 31, 2015.

Pledged Assets and Funds in Trust (Restricted Assets)—The total restricted assets included on the consolidated balance sheets are as follows:

	December 31,	
(In millions)	2015	2014
AFS securities		
Fixed maturity	$ 1,865	$ 2,136
Equity	56	62
Investment funds	27	25
Mortgage loans	1,134	1,261
Restricted cash	116	77
Total restricted assets	$ 3,198	$ 3,561

The restricted assets are primarily a result of the FHLB funding agreements described above. Additionally, AADE has established reinsurance trusts of assets equal to statutory reserves, plus an additional amount of assets, as a result of coinsurance agreements with Transamerica described in *Note 9 – Reinsurance*.

Litigation, Claims, and Assessments—On June 12, 2015, a putative class action complaint was filed in the United States District Court, Northern District of California against the Company, AAM, and AGM. The complaint, which is similar to complaints recently filed against other large insurance companies, primarily alleges that captive reinsurance and other transactions had the effect of misrepresenting the financial condition of AAIA. The complaint purports to be brought on behalf of a class of purchasers of annuity products issued by AAIA between 2007 and the present. There are also various allegations related to the purchase of Aviva USA and concerning entry into a modified coinsurance transaction with ALRe in October 2013. The suit asserts claims of violation of the Racketeer Influenced and Corrupt Organizations Act and seeks compensatory damages, trebled, in an amount to be determined, costs, and attorneys' fees. On March 25, 2016, our motion to transfer to the United States District Court, Southern District of Iowa was granted. We believe that we have meritorious defenses to the claims set forth in the complaint, intend to vigorously defend the litigation, and are seeking dismissal of the complaint. In light of the inherent uncertainties involved in this matter, reasonably possible losses, if any, cannot be estimated at this time.

On July 27, 2015, a putative class action complaint was filed in the United States District Court, District of Massachusetts, against us. An amended complaint was filed on December 18, 2015. The complaint alleges a putative class action on behalf of all persons who are the beneficial owners of assets which were used to purchase structured settlement annuities that Aviva London Assignment Corporation, Aviva Life Insurance Company, and CGU International Insurance, plc (Aviva Entities) or their predecessors, as applicable, delivered to purchasers on or after April 1, 2003. The complaint alleges that the Aviva Entities sold structured settlement annuities to the public on the basis that such products were backed by a capital maintenance agreement by CGU International Insurance, plc, which was alleged as a source of great financial strength. The complaint further alleges that the Aviva Entities used this capital maintenance agreement to enhance the sales volume and raise the price of

the annuities. The complaint claims that, as a result of Aviva USA's sale to AHL, the capital maintenance agreement terminated. According to the complaint, no notice was provided to the owners of the structured settlement annuities and the termination of the capital maintenance agreement constituted a breach of contract and the plaintiffs further assert other causes of action. AHL is a named defendant due to its purchase of Aviva USA, and AAIA and Athene London Assignment are named as successors to Aviva Life Insurance Company and Aviva London Assignment Corporation, respectively. We believe that we have meritorious defenses to the claims set forth in the complaint and intend to vigorously defend the litigation. In light of the inherent uncertainties involved in this matter, reasonably possible losses, if any, cannot be estimated at this time.

21. Segment Information

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other.

Retirement Services—Retirement Services is comprised of our United States and Bermuda operations which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure multi-year guaranteed annuities, fixed indexed annuities, traditional one-year guarantee fixed deferred annuities, immediate annuities, and institutional products from our reinsurance partners. In addition, our FABN program is included in our Retirement Services segment.

Corporate and Other—Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based compensation, and intersegment eliminations. In Corporate and Other, we also hold the capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

Financial Measures—Segment operating income, net of tax, and net investment income are internal measures used by the chief operating decision maker to evaluate and assess the results of our segments.

Operating revenue is a component of operating income, net of tax, and excludes market volatility and adjustments for other non-operating activity. Our operating revenue equals the total revenue of the Company, adjusted to eliminate the impact of the following non-operating adjustments:

- Investment gains (losses), net of offsets;
- Change in fair values of derivatives and embedded derivatives – index annuities, net of offsets;
- VIE expenses and noncontrolling interest
- Bargain purchase gain; and
- Other adjustments to revenues.

The table below reconciles segment operating revenues to total revenues presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2015	2014	2013
Operating revenue by segment			
Retirement Services	$ 2,977	$ 2,834	$ 315
Corporate and Other	112	55	367
Total segment operating revenues	3,089	2,889	682
Non-operating adjustments			
Investment gains (losses), net of offsets	(132)	298	20
Change in fair values of derivatives and embedded derivatives – index annuities, net of offsets	(390)	814	772
VIE expenses and noncontrolling interest	33	79	117
Bargain purchase gain	—	—	152
Other adjustments to revenues	16	20	6
Total non-operating adjustments	(473)	1,211	1,067
Total revenues	$ 2,616	$ 4,100	$ 1,749

Operating income, net of tax, is an internal measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation, and other expenses. Our operating income, net of tax, equals net income available to AHL's shareholders adjusted to eliminate the impact of the following non-operating adjustments:

- Investment gains (losses), net of offsets;
- Change in fair values of derivatives and embedded derivatives – index annuities, net of offsets;
- Integration, restructuring and other non-operating expenses;
- Stock compensation expense;
- Bargain purchase gain; and
- Provision for income taxes – non-operating.

The table below reconciles segment operating income, net of tax, to net income available to Athene Holding Ltd. shareholders presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2015	2014	2013
Operating income, net of tax by segment			
Retirement Services	$ 769	$ 764	$ 416
Corporate and other	(29)	29	361
Total segment operating income, net of tax	740	793	777
Non-operating adjustments			
Investment gains (losses), net of offsets	(56)	151	(4)
Change in fair values of derivatives and embedded derivatives – index annuities, net of offsets	(27)	(30)	154
Integration, restructuring and other non-operating expenses	(58)	(279)	(184)
Stock compensation expense	(67)	(148)	—
Bargain purchase gain	—	—	152
Provision for income taxes – non-operating	30	(24)	21
Total non-operating adjustments	(178)	(330)	139
Net income available to AHL shareholders	$ 562	$ 463	$ 916

Net investment income used to evaluate the performance of our segments is an internal measure that does not correspond to GAAP net investment income. Adjustments are made to GAAP net investment income to arrive at a net investment income measure that reflects the profitability of our core deferred annuities business. Accordingly, we adjust net investment income to include earnings from our consolidated VIEs and earnings on certain alternative investments (primarily CLOs) classified in investment related gains (losses) on the consolidated statements of income. Additionally, impacts of reinsurance embedded derivatives on net investment income are removed. The table below reconciles segment net investment income to net investment income presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2015	2014	2013
Net investment income by segment			
Retirement Services	$ 2,572	$ 2,483	$ 1,363
Corporate and Other	36	55	367
Total segment net investment income	2,608	2,538	1,730
Adjustments to net investment income			
Reinsurance embedded derivative impacts	(84)	(67)	(156)
Net VIE earnings	(67)	(146)	(535)
Alternative income gain (loss)	42	(4)	22
Other	9	12	13
Total adjustments to arrive at net investment income	(100)	(205)	(656)
Net investment income	$ 2,508	$ 2,333	$ 1,074

Operating income, net of tax, excludes the tax impact of the taxable non-operating adjustments presented above. The tax impact of non-operating income adjustments is 35% of the non-operating adjustments subject to income tax. The table below reconciles segment provision for income taxes – operating to income tax expense presented on the consolidated statements of income:

	Years ended December 31,		
(In millions)	2015	2014	2013
Provision for income taxes – operating by segment			
Retirement Services	$ 41	$ 30	$ 13
Corporate and Other	3	—	—
Total segment income tax expense – operating	44	30	13
Provision for income taxes – non-operating	(30)	24	(21)
Income tax expense (benefit)	$ 14	$ 54	$ (8)

The following represents total assets by segment:

	December 31,		
(In millions)	2015	2014	2013
Total assets by segment			
Retirement Services	$ 73,710	$ 81,606	$ 80,058
Corporate and Other	7,144	1,104	749
Total assets	$ 80,854	$ 82,710	$ 80,807

We market annuity products, primarily fixed rate and fixed indexed annuities. Deposits, which are generally not included in revenues on the consolidated statements of income, and premiums collected are as follows:

	Years ended December 31,		
(In millions)	2015	2014	2013
Fixed indexed annuities	$ 2,808	$ 2,560	$ 1,148
Fixed rate annuities	883	323	362
Payouts without life contingencies	166	163	68
Funding agreements	250	—	—
Life and other deposits	11	15	3
Total deposits	4,118	3,061	1,581
Payouts with life contingencies	53	32	25
Life and other premiums	142	68	(1,162)
Total premiums	195	100	(1,137)
Total premiums and deposits, net of ceded	$ 4,313	$ 3,161	$ 444

Deposits and premiums collected by the geographical location are as follows:

	Years ended December 31,		
(In millions)	2015	2014	2013
United States	$ 3,097	$ 2,810	$ 275
Bermuda	1,135	351	169

22. Subsequent Events

In connection with the reissuance of the consolidated financial statements, we have evaluated subsequent events through October 25, 2016, the date the consolidated financial statements were available to be reissued.

In January 2016, AAIA agreed to novate certain open blocks of business ceded to Accordia, that were in force as of January 1, 2016, in accordance with the terms of the coinsurance and assumption agreement. As a result of the novation, interest sensitive contract liabilities decreased $716 million, future policy benefits decreased $93 million, and reinsurance recoverable decreased $809 million.

In January 2016, we purchased a pool of loans sourced by MidCap FinCo and contemporaneously sold participation interests in the loans to a subsidiary of MidCap FinCo, receiving aggregate consideration of $24 million. The participation does not meet transfer requirements and, therefore, the full amount of the purchased loans are reflected in mortgage loans, and no gain or loss was recognized upon transfer. Amounts due to MidCap FinCo under the subordinated participation agreement are reflected as a secured borrowing in other liabilities on the consolidated balance sheets.

Events Subsequent to the Original Issuance of the Consolidated Financial Statements (Unaudited)—During 2016, we novated additional open blocks of business ceded to affiliates of Global Atlantic, that were in force as of January 1, 2016, in accordance with the terms of the coinsurance and assumption agreement. As a result of the additional novation, interest sensitive contract liabilities decreased $290 million, future policy benefits decreased $95 million, policy loans decreased $8 million, and reinsurance recoverable decreased $377 million.

On August 31, 2016, we completed a series of transactions with Apollo Commercial Real Estate Finance, Inc. (ARI), a related party managed by an affiliate of Apollo. Pursuant to an agreement between ARI and Apollo Residential Mortgage, Inc. (AMTG), another related party managed by an Apollo affiliate, AMTG merged with and into ARI, effective as of August 31, 2016. In accordance with an Asset Purchase and Sale Agreement between us and ARI, we purchased $1,090 million of primarily non-agency RMBS from ARI subsequent to its merger with AMTG. We also provided ARI with a secured short-term $175 million loan to consummate the merger, which was subsequently repaid with the proceeds of the sale of such RMBS. Finally, subsequent to the merger, we purchased $20 million of ARI shares of common stock pursuant to a stock purchase agreement that required such purchase if ARI's common stock price fell below the per share price at which such shares were issued to AMTG stockholders during the 30 trading days following the closing of the merger, which provided for additional liquidity to ARI stockholders.

During the third quarter of 2016, we modified Class M-1, M-2, and M-3 share agreements to vest all Tranche 2 awards as of September 30, 2016; whereas, under the original agreement, Tranche 2 awards vested only when certain performance hurdles were met. We also amended the conversion option, which previously only allowed conversion subsequent to an Initial Public Offering (IPO). Under the modified conversion terms, individuals can elect one of three options including conversion at a specified date prior to an IPO, on the date of an IPO, or ratably each month for six months after an IPO. The modifications impacted 28 individuals. As a result of the modifications, as of September 30, 2016, we recorded an $83 million increase to additional paid-in capital, due to the reclassification from liability awards to equity awards. We also recorded an additional $42 million charge to stock-based compensation expense and additional paid-in capital for the vesting of Tranche 2 shares, primarily related to the acceleration of previously unrecognized compensation expense.

During the third quarter of 2016, the CMBS Funds each sold invested assets to fully settle the borrowings under their respective repurchase agreements. The remaining invested assets were distributed directly to the Company.

Schedule II
Notes to Condensed Financial Information of Registrant

1. Basis of Presentation

The accompanying condensed financial statements of Athene Holding Ltd. (AHL) should be read in conjunction with the consolidated financial statements and the notes thereto (Consolidated Financial Statements) of AHL and its subsidiaries.

For purposes of these condensed financial statements, AHL's wholly owned and majority owned subsidiaries are presented under the equity method of accounting. Under this method, the assets and liabilities of subsidiaries are not consolidated. The investments in subsidiaries are recorded on the condensed balance sheets. The income from subsidiaries is reported on a net basis as equity earnings of subsidiaries on the condensed statements of income.

2. Revisions

As discussed in *Note 2 – Change in Accounting Policy and Revisions* to the Consolidated Financial Statements, revisions were made to the Consolidated Financial Statements as a result of correcting immaterial misstatements. AHL revised its bargain purchase gain recorded during the year ended December 31, 2013 from $146 million to $152 million. The remaining revisions related to AHL's subsidiaries. As the assets and liabilities of subsidiaries are not consolidated for purposes of these condensed financial statements, the adjustments to equity are consistent with those disclosed in *Note 2 – Change in Accounting Policy and Revisions* to the Consolidated Financial Statements, with the offset of these adjustments recorded to investments in subsidiaries. The total net income impact of these revisions was adjusted to equity earnings of subsidiaries on the condensed statements of income, and the adjustments to other comprehensive income are consistent with those disclosed in *Note 2 – Change in Accounting Policy and Revisions* to the Consolidated Financial Statements.

3. Intercompany Transactions

On December 15, 2014, Athene USA Corporation (Athene USA) issued an unsecured promissory note to AHL totaling $100 million due in June 2015, or earlier at AHL's request. The loan was used by Athene USA to fund the restructuring of a wholly owned investment fund and carries an interest rate of 0.35% per annum. Interest was payable on a quarterly basis. In June 2015, the promissory note was amended to extend the due date to June 1, 2020, or earlier at AHL's request. During 2015, a total of $80 million was repaid by Athene USA. As of December 31, 2015, $20 million remained outstanding on the loan. This loan was fully repaid by Athene USA on January 20, 2016. This intercompany transaction was eliminated upon consolidation.

On January 14, 2015, AHL entered into a facility agreement with Delta Lloyd Deutschland AG (DLD) whereby AHL agreed to make available to DLD a loan facility without a fixed term in the maximum principal amount of EUR 5 million. Interest accrues under the facility at a rate of 6-month Euribor. DLD withdrew EUR 5 million prior to the October 1, 2015 acquisition of DLD by AHL, and full payment was made on October 9, 2015. DLD's withdrawal of the facility was not eliminated upon consolidation since it was prior to the acquisition, but the repayment of the loan was an intercompany transaction that eliminated upon consolidation.

On September 22, 2015, AHL entered into a loan agreement with Athene Deutschland Gmbh & Co. KG (ADKG), whereby AHL agreed to lend ADKG EUR 51 million to be used for the DLD acquisition. Interest accrued at a fixed rate of 1.5%, which was due and payable on the maturity date of the loan. The loan and interest accrued were due and fully repaid on October 9, 2015. This intercompany transaction was eliminated upon consolidation.

Certain costs were allocated between AHL and its subsidiaries. Total intercompany receivables arising from these allocations were $0 million and $19 million as of December 31, 2015 and 2014, respectively. This intercompany transaction was eliminated upon consolidation.

4. Debt and Guarantees

In 2013, AHL entered into a three-year revolving credit agreement (Credit Facility) with Citibank, N.A. as administrative agent. The amount available under the Credit Facility was $500 million. In connection with the Credit Facility, AHL guaranteed all of the obligations of ALRe and Athene USA. On January 22, 2016, we terminated the Credit Facility and entered into a five-year revolving credit agreement (Revolving Credit Facility) with Citibank, N.A., as administrative agent. The amount available under the Revolving Credit Facility is $1 billion. See *Note 12 – Debt* to our consolidated financial statements for further information.

5. Related parties

AHL pays investment management fees to Athene Asset Management (AAM), a related party, in relation to its portfolio of assets managed by AAM and assets held in certain subsidiary portfolios. In addition, AHL also pays service fees pursuant to a shared service agreement between AAM and AHL for various internal expenses AAM allocates to AHL. See *Note 19 – Related Parties* of the Consolidated Financial Statements for further information.

AHL entered into a Transaction Advisory Services Agreement (TASA) with Apollo, a related party until December 31, 2014. TASA required AHL to pay Apollo a quarterly monitoring fee. See *Note 5 – Derivative Instruments* and *Note 19 – Related Parties* of the Consolidated Financial Statements for further information.

Report of Independent Auditors

To the Board of Directors and Shareholder of Athene Life Re Ltd.

We have audited the accompanying financial statements of Athene Life Re Ltd., which comprise the balance sheets as of December 31, 2016, 2015, and 2014, and the related statements of income (loss), comprehensive income (loss), equity and cash flows for the years then ended.

Management's responsibility for the financial statements
Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility
Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Athene Life Re Ltd. as of December 31, 2016, 2015, and 2014, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

1. Business, Basis of Presentation, and Significant Accounting Policies

Athene Life Re Ltd. (ALRe, the Company, we, us, or our) a Bermuda exempted company, is a leading retirement services company that reinsures retirement savings products that originate in all 50 U.S. states and the District of Columbia. ALRe is wholly owned by Athene Holding Ltd. (AHL, or the Parent), a Bermuda exempted company. ALRe reinsures business from both third party cedants and affiliates. See *Note 7 - Reinsurance* for more information.

The Company was registered as a Long-Term Insurer on June 26, 2009 under the Insurance Act, 1978 of Bermuda and is classified as a Class E insurer. The Company is engaged in the business of annuity reinsurance, focusing on contracts reinsuring a quota share of future sales (flow transactions) of various fixed annuity product lines. The Company also reinsures closed blocks of existing business (block transactions). Liabilities for reinsurance include immediate annuities, fixed deferred annuities (including fixed indexed products) and funding agreements.

As of December 31, 2016, Fitch, S&P and A.M. Best had issued credit ratings, financial strength ratings and/or outlook statements regarding us, as listed below. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurer or reinsurer to meet its obligations under an insurance policy or reinsurance arrangement and generally involve quantitative and qualitative evaluations by rating agencies of a company's financial condition and operating performance. Generally, rating agencies base their financial strength ratings upon information furnished to them by the company and upon their own investigations, studies and assumptions. Financial strength ratings are based upon factors of concern to policyholders, agents, intermediaries and ceding companies and are not directed toward the protection of investors. Credit and financial strength ratings are not recommendations to buy, sell or hold securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

Financial Strength Rating	A-	A-	A-
Outlook	Positive	Stable	Stable

Consolidation and Basis of Presentation - The financial statements of the Company include any variable interest entities for which we are the primary beneficiary. Investments in entities that we do not control, but have the ability to exercise significant influence over operating and financing decisions, other than investments for which we have elected the fair value option, are accounted for under the equity method.

For entities that are consolidated, but not 100% owned, we allocate a portion of the income or loss and corresponding equity to the owners other than the Company. We include the aggregate of the income or loss and corresponding equity that is not owned by the Company in noncontrolling interests in the financial statements.

The financial statements reflect consolidated variable interest entities that were fully liquidated in 2014. As a result, there was income statement activity related to consolidated variable interest entities for the year ended December 31, 2014. We did not consolidate any entities for the years ended December 31, 2015 and 2016. See *Note 4 - Variable Interest Entities* for more information.

We have prepared the financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual experience could materially differ from these estimates and assumptions. The Company's principal estimates impact:

- fair value of investments;
- impairment of investments and valuation allowances;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs (DAC), deferred sales inducements (DSI), and reinsurance intangibles; and
- future policy benefit reserves.

Additional details regarding these principal estimates and assumptions are discussed in the significant accounting policies that follow and the related footnote disclosures.

Investments

Fixed Maturity and Equity Securities – Fixed maturity securities includes corporate bonds, collateralized loan obligations (CLO's), asset-backed securities (ABS), residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), and redeemable preferred stock. Equity securities in the funds withheld at interest portfolio include common stock, mutual funds, and non-redeemable preferred stock. We classify fixed maturity securities as available-for-sale (AFS) or trading at the time of purchase and subsequently carry them at fair value. Fair value hierarchy and valuation methodologies are discussed in *Note 5 - Fair Value*. Classification is dependent on a variety of factors including our expected holding period, election of the fair value option, and asset and liability matching.

AFS Securities – Unrealized gains and losses on AFS securities are reflected in accumulated other comprehensive income (AOCI) on the balance sheets.

Trading Securities – We elected the fair value option for certain fixed maturity securities. These fixed maturity securities are classified as trading, with changes to fair value included in net investment income on the statements of income and (loss). Although the securities are classified as trading, the trading activity related to these investments is primarily focused on asset and liability matching activities and is not intended to be an income strategy based on active trading. As such, the activity related to these investments on the statements of cash flows is classified as investing activities.

We generally record security transactions on a trade date basis, with any unsettled trades recorded in other assets or other liabilities on the balance sheets. Private placement and investment fund purchases are recorded on a settlement date basis.

Purchased Credit Impaired (PCI) Securities – We purchase certain structured securities, primarily RMBS, having deterioration in credit quality since their issuance, which meet the definition of PCI securities. We determined, based on our expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that we would not collect all contractually required payments, including both principal and interest and considering the effects of prepayments for these PCI securities. Based on these assumptions, the difference between the undiscounted expected future cash flows of the PCI securities and the recorded investment in the securities represents the initial accretable yield, which is accreted into investment income, net of related expenses, over their remaining lives on a level-yield basis. The difference between the contractually required payments on the PCI securities and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change.

Quarterly, we evaluate the undiscounted expected future cash flows associated with PCI securities based on updates to key assumptions. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI securities will change the accretable yield prospectively. Declines in undiscounted expected future cash flows due to further credit deterioration, as well as changes in the expected timing of the cash flows, can result in the recognition of an other-than-temporary impairment (OTTI) charge, as PCI securities are subject to our policy for evaluating investments for OTTI. Significant increases in undiscounted expected future cash flows are recognized prospectively as an adjustment to the accretable yield.

Mortgage Loans – We hold mortgage loans through our funds withheld and modified coinsurance (modco) arrangements. Accordingly, these mortgages are valued at fair value, which is comprised of the amortized cost plus mark-to-market unrealized gains or losses. We calculate amortized cost to be unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on its contractual interest rate. We record amortization of premiums and discounts using the effective yield method, and contractual cash flows on the underlying loan. We accrue interest on loans until it is probable we will not receive interest or the loan is 90 days past due. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income on the statements of income and (loss).

Investment Funds – We invest in certain non-fixed income, alternative investments in the form of limited partnerships or similar legal structures (investment funds). For investment funds in which we have determined we are not the primary beneficiary, and therefore not required to consolidate, we typically record these investments using the equity method of accounting, where the cost is recorded as an investment in the fund. Adjustments to the carrying amount reflect our pro rata ownership percentage of the operating results as indicated by net asset value (NAV) in the investment fund financial statements, which can be on a lag of up to three months when investee information is not received in a timely manner.

We record our proportionate share of investment fund income within net investment income on the statements of income and (loss). Contributions paid or distributions received by the Company are recorded directly to the investment fund balance as an increase to carrying value or as a return of capital, thus reducing our carrying value.

Policy Loans – We hold policy loans through our funds withheld and modco arrangements accordingly, these policy loans are held at fair value which approximates the unpaid principal balance. Policy loans are funds provided to policyholders in return for a claim on the policy's account value. The funds provided are limited to a specified percentage of the account balance. The majority of policy loans do not have a stated maturity and the balances and accrued interest are repaid with proceeds from the policy account balance.

Funds Withheld at Interest – Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which we act as reinsurer or a modified coinsurer. While the assets in funds withheld and modco trusts are legally owned by the ceding company, the assets are legally segregated from the general accounts of our cedants and all economic rights and obligations on the assets accrue to us. We periodically settle interest accruing to those assets at rates defined by the terms of the agreement. The underlying agreements contain embedded derivatives as discussed below, and as a result the carrying value of Funds Withheld at Interest is equal to the fair value of the underlying assets. The resulting impact on the statement of cash flows from funds withheld and modco agreements after non-cash activity is backed out is that the net cash interest settlements are included in operating activities. Any securities transfers as part of interest settlements, as well as deposits and withdrawals on the underlying agreements, are disclosed as non-cash items. See additional information in *Note 6 - Funds Withheld at Interest*.

Short-term Investments – Short-term investments consists of financial instruments with maturities of greater than three months but less than twelve months when purchased. Short-term securities are held at fair value which approximates amortized cost.

Net Investment Income – We recognize investment income as it accrues or is legally due, net of investment management and custody fees. Investment income on fixed maturity securities includes coupon interest, as well as the amortization of any premiums and the accretion of any discount. Investment income on equity securities represents dividend income and preferred coupons. Realized gains and losses on sales of investments are included on the statements of income and (loss) in net investment income. Other-than-temporary impairments are included on the statements of income and (loss) in net investment income. Realized gains and losses on investments sold are determined based on a first-in first-out method. Included in net investment income is the investment income from funds withheld and modco reinsurance, which is the total return from the assets supporting funds withheld and modco reinsurance.

Other-Than-Temporary Impairment – We identify fixed maturity and equity securities that could potentially have impairments that are other-than-temporary by monitoring market events for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions, and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings, late payments, pricing levels, rating agency actions, key financial ratios, financial statements, revenue forecasts, and cash flow projections.

We review all securities on a case-by-case basis to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine that a security is other-than-temporarily impaired, an impairment loss is recognized.

The recognition of impairment losses on fixed maturity securities on the financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost less any recorded credit loss, we recognize an OTTI in net investment income on the statements of income and (loss) for the difference between amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit loss portion in net investment income on the statements of income and (loss) and the non-credit loss portion in AOCI on the balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The techniques and assumptions for establishing the best estimate cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments, and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security-specific facts and circumstances including timing, security interests, and loss severity.

In periods after an OTTI loss is recognized on a fixed maturity security, we report the impaired security as if it had been purchased on the date it was impaired and continue to estimate the present value of the estimated cash flows of the security. Accordingly, the discount (or reduced premium) based on the new cost basis is accreted into net investment income over the remaining term of the fixed maturity security in a prospective manner based on the amount and timing of estimated future cash flows.

We impair a mortgage loan when it is probable we will not collect all amounts due under the agreement. We establish a valuation allowance on individual loans based on expected losses from future dispositions or settlement, including foreclosures. We calculate the allowance based on how much the carrying value exceeds one of these values:

- the present value of expected future cash flows discounted at the loan's original effective interest rate;
- the value of the loan's collateral if it is in the process of foreclosure or otherwise collateral dependent; or
- the loan's fair value if the loan is being sold.

We first apply any interest accrued or received on the net carrying amount of the impaired loan to the principal of the loan, and once the principal is repaid, we include amounts received in net investment income. We limit accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, we recognize interest income on a cash basis. Loans deemed uncollectible or in foreclosure are charged off against the valuation allowances, and subsequent recoveries, if any, are credited to the valuation allowances. Changes in valuation allowances are reported in net investment income on the statements of income and (loss).

The cost of other invested assets is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within net investment income, and the cost basis of the investment securities is reduced accordingly. We do not change the revised cost basis for subsequent recoveries in value.

Derivative Instruments—We invest in derivatives in both our general account and funds withheld at interest for managing risks experienced in our ongoing operations, such as equity risk, interest rate risk, cash flow risks, which primarily involve managing liability risks associated with our indexed annuity products and reinsurance agreements. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or other underlying notional amount. Derivatives are carried at fair value on the balance sheets in derivative assets and derivative liabilities. We elect to present any derivatives subject to master netting provisions as a gross asset or liability and gross of collateral. Disclosures regarding balance sheet presentation of derivatives subject to master netting agreements are discussed in *Note 3 - Derivative Instruments*.

Embedded Derivatives – We reinsure products, primarily fixed indexed annuity products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with fixed indexed annuities are reflected in interest sensitive contract benefits on the statements of income and (loss). Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains and losses on the host contract and derivative will be reflected within net investment income on the statements of income and (loss).

Fixed indexed annuity contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of the embedded derivative is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates, and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For certain funds withheld and modco reinsurance contracts the embedded derivative cash flows are discounted using the Company's own credit rating. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

Additionally, reinsurance agreements written on a funds withheld coinsurance or modco basis contain embedded derivatives. The fair value of the embedded derivatives on funds withheld and modco agreements is included in the funds withheld at interest line item on the balance sheets. The fair value of the embedded derivative is equal to the unrealized gain or loss on the underlying assets in the funds withheld or modco trust and the fair value of stand-alone derivatives in the portfolios. The change in the fair value of the embedded derivatives related to the change in unrealized gain or loss is recorded in net investment income on the statements of income and (loss).

Variable Interest Entities—An entity that does not have sufficient equity to finance its activities without additional financial support, or in which the equity investors, as a group, do not have the characteristics of a controlling financial interest is a variable interest entity (VIE). The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and may require significant judgment. Our investment funds generally qualify as VIEs and are evaluated for consolidation under the VIE model.

We are required to consolidate a VIE if we are the primary beneficiary, defined as the variable interest holder with both the power to direct the activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. We determine whether we are the primary beneficiary of an entity based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and our relative exposure to the related risks of the VIE. Since affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo), a related party, are the decision makers in certain of the investment funds, we and a member of our related party group may together have the characteristics of the primary beneficiary of an investment fund. In this situation, we have generally concluded we are not under common control, as defined by ASU 2015-02, with the related party, and therefore consolidate in the circumstances when substantially all of the activities of the VIE are conducted on our behalf. We reassess the VIE and primary beneficiary determinations on an ongoing basis.

If we are not the primary beneficiary, but are able to exert significant influence over the VIE's operations, we record the VIE as an equity method investment. If we are not able to exercise significant influence, generally on investment funds in which we own a less than a 3% interest, we elect the fair value option.

See *Note 4 - Variable Interest Entities* for discussion of our interest in entities that meet the definition of a VIE.

Reinsurance—We assume insurance and investment contracts under coinsurance, funds withheld, and modco. We follow reinsurance accounting for transactions that provide indemnification against loss or liability relating to insurance risk (risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk consisting of underwriting, investment, timing risk, and any other significant risks. Assumed premiums are included in the premiums line of the statements of income and (loss).

For investment contracts, assets and liabilities assumed under coinsurance, funds withheld, or modco are presented gross on the balance sheets. The change in assumed reserves, deposits and withdrawals are presented net in the interest sensitive contract benefits line on the statements of income. For insurance contracts, assets and liabilities assumed or ceded are presented gross on the balance sheets. The change in assumed reserves and benefits are presented net in the future policy and other policy benefits line on the statements of income. Assumed premiums are included in the premiums line of the statements of income.

Assets and liabilities assumed under modco or funds withheld are presented gross on the balance sheets. The total return on funds withheld at interest is presented in net investment income on the statements of income and (loss).

Accounting for reinsurance requires the use of assumptions upon agreement inception, particularly related to the future performance of the underlying business and the potential impact of counterparty credit risks. We attempt to minimize our counterparty credit risk through the structuring of the terms of our reinsurance agreements, including the use of trusts and segregated accounts, and we monitor credit ratings of counterparties for signs of declining credit quality. When a ceding company does not report information on a timely basis, we record accruals based on the best available information at the time, which includes the reinsurance agreement terms and historical experience. We periodically compare actual and anticipated experience to the assumptions used to establish reinsurance assets and liabilities. Refer to *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for more information.

Cash and Cash Equivalents—Cash and cash equivalents include deposits and short-term highly liquid investments with a maturity of less than 90 days from the date of acquisition. Amounts included are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

Restricted Cash—Restricted cash consists of cash and cash equivalents held in funds in trust as part of certain coinsurance agreements to secure all statutory reserves and liabilities of the coinsured parties. Changes in the restricted cash balance are reported in investing activities on the statements of cash flows.

Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Deferred Acquisition Costs (DAC) and Deferred Sales Inducements (DSI) - Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances. We include the effects of net unrealized investment gains and losses in the calculation of DAC, DSI and reinsurance intangible balances due to the funds withheld at interest assets being marked-to-market through income. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC and DSI which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. The balances associated with the preceding amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the balance sheets.

Deferred costs related to contracts with only investment related sources of revenues are amortized using the interest method. The interest method amortizes the deferred costs by discounting the future liability cash flows at a break-even rate. The break-even rate is solved such that the present value of future liability cash flows is equal to the net liability at the inception of the contract. The balances associated with this amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the balance sheets.

Reinsurance Intangibles - For block reinsurance transactions, the difference between the fair value of assets and the sum of the reserves reinsured, other liabilities reinsured, and ceding commission payable or receivable is deferred and recognized on a product-by-product basis

either as an unearned revenue reserve (URR) or DAC. In this context, the URR may also be referred to as the day one gain on reinsurance and DAC as the day one loss on reinsurance. Day one losses are included in deferred acquisition costs and deferred sales inducements and day one gains are included in interest sensitive contract liabilities on the balance sheets. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of reinsurance intangibles which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Day one gains and losses related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. If we project a negative future gross profit, the day one gain or loss is amortized proportional to the change in the present value of account value over the lives of the policies.

See *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for further discussion.

Interest Sensitive Contract Liabilities—Interest sensitive investment-type contracts include fixed indexed and traditional fixed annuities in the accumulation phase, funding agreements, and immediate annuities without significant mortality risk. We carry liabilities for fixed annuities, and funding agreements at the account balances without reduction for potential surrender or withdrawal charges. Liabilities for immediate annuities without significant mortality risk are calculated as a present value of future liability cash flows at contractual interest rates.

Changes in the interest sensitive contract liabilities are recorded in interest sensitive contract benefits or product charges on the statements of income and (loss).

Future Policy Benefits—We reinsure contracts classified as long-duration, and deferred and immediate annuities with life contingencies. Liabilities for long-duration contracts are established using accepted actuarial valuation methods which require the use of assumptions related to expenses, investment yields, mortality, morbidity, and persistency, with a provision for adverse deviation, at the date of issue or acquisition. The reserve investment yield assumptions are specific to our expected earned rate on the asset portfolio supporting the reserves. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary.

For long-duration contracts, the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC and DSI) is less than the gross premium liability, then the impairment is deemed to have occurred. Accordingly, the DAC and DSI asset balances are reduced until the net GAAP liability is equal to the gross premium liability. For deferred annuity policies classified as insurance contracts, if the DAC and DSI asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is posted to arrive at the gross premium liability.

We reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance. We recognize the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality, and market conditions affecting the account balance growth.

Changes in future policy benefits are recorded in future policy and other policy benefits on the statements of income and (loss).

Other Policy Claims and Benefits—Other policy claims and benefits include amounts payable relating to in course of settlements (ICOS) liabilities associated with interest sensitive contract liabilities and future policy benefits. For immediate annuities and supplemental contracts, ICOS claim liabilities are established to accrue suspended benefit payments between the date of notification of death and the date of verification of death.

Recognition of Revenues and Related Expenses—Revenues for annuities, including surrender and market value adjustments, costs of insurance, policy administration, GMDB, and GLWB, are earned when assessed against policyholder account balances during the period. Interest sensitive contract benefits related to annuity products include interest credited to policyholder account balances. In addition, the change in fair value of embedded derivatives within fixed indexed annuity contracts is included in interest sensitive contract benefits on the statements of income and (loss).

For certain assumed reinsurance transactions involving in force blocks of business, the ceding company may pay a premium equal to the initial required reserve (future policy benefit). In such transactions, we net the expense associated with the establishment of the reserve against the premiums from the transaction in interest sensitive contract benefits on the statements of income and (loss).

Premiums for traditional life insurance products, including products with fixed and guaranteed premiums and benefits, are recognized as revenues when due from policyholders.

Recently Adopted Accounting Pronouncements

Fair Value Measurement – Net Asset Value (ASU 2015-07)
This update has a disclosure-only impact for entities that measure investments using net asset value per share (NAV) under the practical expedient in the fair value measurement guidance. We adopted this standard effective January 1, 2016, and have removed investments that are measured at NAV as a practical expedient from the fair value hierarchy in all periods presented in the notes to the financial statements.

Cloud Computing Arrangements (ASU 2015-05)
This update clarifies whether a cloud computing arrangement is an intangible asset or a service contract. We adopted this standard effective January 1, 2016, and the adoption of this update did not have a material effect on our financial statements.

Recently Issued Accounting Pronouncements

Gains and Losses from the Derecognition of Nonfinancial Assets (ASU 2017-05)
The amendments in this update clarify the scope of asset derecognition guidance and accounting for partial sales of nonfinancial assets. We will be required to adopt this standard on a retrospective or modified retrospective basis effective January 1, 2018. Early adoption is permitted. We are currently evaluating the impact of this guidance on our financial statements.

Business Combinations - Clarifying the Definition of a Business (ASU 2017-01)
The amendments in this update clarify the definition of a business with the objective of assisting entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our financial statements.

Statement of Cash Flows - Restricted Cash (ASU 2016-18)
This update requires amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2018. Early adoption is permitted. The adoption of this update will require us to change the presentation on the statements of cash flows for restricted cash or restricted cash equivalents; however, we do not expect the adoption of this update to have a material effect on our financial statements.

Consolidation – Interest Held through Related Parties under Common Control (ASU 2016-17)
This update amends the consolidation guidance to change how indirect interests in VIEs are evaluated by a reporting entity when determining whether or not it is the primary beneficiary of that VIE. The primary beneficiary of a VIE is the reporting entity that has a controlling financial interest in a VIE and, therefore, consolidates the VIE. A reporting entity has an indirect interest in a VIE if it has a direct interest in a related party that, in turn, has a direct interest in the VIE. Currently, if a single decision maker and its related parties are under common control, the single decision maker is required to consider indirect interests held through related parties to be the equivalent of direct interests in their entirety. The amendments change the evaluation of indirect interests to be considered on a proportionate basis. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Statement of Cash Flows (ASU 2016-15)
This update provides specific guidance to clarify how entities should classify certain cash receipts and cash payments on the statement of cash flows. The update also clarifies the application of the predominance principle when cash receipts and cash payments have aspects of more than one class of cash flows. We will be required to adopt this standard effective January 1, 2018. We do not expect the adoption of this update to have a material effect on our financial statements.

Financial Instruments – Credit Losses (ASU 2016-13)
This update is designed to reduce complexity by limiting the number of credit impairment models used for different assets. The model will result in accelerated credit loss recognition on assets held at amortized cost, which includes our commercial and residential mortgage investments held through our funds withheld and modco reinsurance agreements. The identification of credit-deteriorated securities will include all assets that have experienced a more-than-insignificant deterioration in credit since origination. Additionally, any changes in the expected cash flows of credit-deteriorated securities will be recognized immediately in the income statement. Available-for-sale fixed maturity securities are not in scope of the new credit loss model, but will undergo targeted improvements to the current reporting model including the establishment of a valuation allowance for credit losses versus the current direct write down approach. We will be required to adopt this standard effective January 1, 2020. Early adoption is permitted effective January 1, 2019. We are currently evaluating the impact of this guidance on our financial statements.

Revenue Recognition (ASU 2016-12, ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14, and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-

versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guida nce. ASU 2016-11 brings existing SEC guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. ASU 2016-12 provides clarification on assessing collectability, presentation of sales tax, non-cash consideration, and transition. ASU 2016-20 addresses necessary technical corrections and improvements to clarify codification amended by ASU 2014-09 within Topic 606. The revenue recognition updates replace all general and most industry-specific revenue recognition guidance, excluding insurance contracts, leases, financial instruments and guarantees, which have been scoped out of the update. Since the guidance does not apply to revenue on contracts accounted for under the financial instruments or insurance contracts standards, only a portion of our revenues are impacted by this guidance. Our evaluation process includes, but is not limited to, identifying contracts within the scope of the guidance, reviewing and documenting our accounting for these contracts, and identifying and determining the accounting for any related contract costs.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Derivatives and Hedging – Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We do not expect the adoption of this update to have a material effect on our financial statements.

Derivatives and Hedging – Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our financial statements.

Financial Instruments – Recognition and Measurement (ASU 2016-01)
This update retains the current accounting for classifying and measuring investments in debt securities and loans, but requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our financial statements.

2. Investments

Available-for-sale securities - The following table represents our AFS investments by asset type. Our AFS investment portfolio includes direct investments in affiliates of Apollo where Apollo can exercise significant influence over the affiliates.

	December 31, 2014					
	Less than 12 months		12 months or greater		Total	
(In millions)	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Fixed maturity securities						
U.S. State, municipals, and political subdivisions	$ 10	$ —	$ 1	$ —	$ 11	$ —
Corporate	33	—	21	(1)	54	(1)
CLO	292	(12)	17	(1)	309	(13)
ABS	32	—	—	—	32	—
RMBS	100	(1)	18	(2)	118	(3)
Total AFS securities	$ 467	$ (13)	$ 57	$ (4)	$ 524	$ (17)

At December 31, 2016, we held 331 AFS securities that were in an unrealized loss position. Of this total, 124 were in an unrealized loss position longer than 12 months. We did not recognize the unrealized losses in income as we intend to hold these securities and it not more likely than not we will be required to sell a security before the recovery of its amortized cost.

Other-Than-Temporary Impairments on AFS Securities-For the year ended December 31, 2016, on total AFS securities, including related party investments, of $3,800 million, we incurred less than $1 million of net OTTI losses. These securities were impaired to fair value as of the impairment date.

The following table represents a rollforward of the cumulative amounts recognized on the statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	December 31,		
(In millions)	2016	2015	2014
Beginning balance	$ 1	$ —	$ —
Initial impairments – credit loss OTTI recognized on securities not previously impaired	—	1	—
Ending balance	$ 1	$ 1	$ —

Net Investment Income - Net investment income by asset type consists of the following:

	December 31,		
(In millions)	2016	2015	2014
Fixed maturity securities	$ 192	$ 107	$ 40
Trading securities	27	7	—
Investment funds	(3)	21	46
Cash and cash equivalents	—	—	4
Funds withheld at interest[1]			
Investment income	2,201	2,043	2,014
Investment related gains (losses)	1,184	(1,620)	1,763
Investment expenses	(112)	(98)	(85)
Gross realized gain on AFS securities	13	7	6
Gross realized loss on AFS securities	(11)	(17)	(3)
Derivative gains (losses)	—	2	—
Other losses	1	—	4
Net investment income	$ 3,492	$ 452	$ 3,789

[1] *The total income related to funds withheld at interest is comprised of the total return, including (1) investment income which is comprised of book income on the underlying securities, and (2) investment related gains (losses) which is comprised of realized gains (losses), mark-to-market impacts (change in unrealized gains or losses), and total return on derivatives. The portion related to mark-to-market was a gain (loss) of $882 million, $(1,415) million and $1,013 million for years ended December 31, 2016, 2015 and 2014, respectively.*

Included in net investment income on trading securities are losses of $5 million, losses of $1 million, and losses of $3 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2016, 2015, and 2014, respectively. Also included in net investment income on trading securities are related party losses of $0 million, losses of $8 million, and losses of $2 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2016, 2015, and 2014, respectively.

Credit Quality

The Securities Valuation Office (SVO) of the National Association of Insurance Commissioners (NAIC) is responsible for the credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for filing on the relevant schedule of the NAIC Financial Statement Blank. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation and/or unit price. Typically, if a security has been rated by a Nationally Recognized Statistical Rating Organization (NRSRO), the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC designation	NRSRO equivalent rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC
6	CC and lower

The SVO's loan-backed and structured securities ("LBaSS") methodology is focused on determining the risk associated with the recovery of the amortized cost of each security. In contrast, the NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price. The NRSRO rating assumes that the holder is the original purchaser at par whereas the modeled and non-modeled LBaSS ratings are focused on the recovery of current amortized cost. As the NAIC ratings methodology considers our investment and amortized cost, and the likelihood of recovery of that book value as opposed to the likelihood of default of the security, we view the NAIC ratings methodology as the most appropriate way to view our fixed maturity portfolio from a ratings perspective since a large portion of our holdings were purchased at a significant discount to par.

Specific to LBaSS, the SVO has developed a ratings process and provides instruction on both modeled and non-modeled LBaSS. The modeled LBaSS process is specific to the RMBS and CMBS asset classes. In order to establish ratings at the individual security level, the SVO obtains loan-level analysis of each RMBS and CMBS using a selected vendor's proprietary financial model. The SVO ensures that the vendor has extensive internal quality-control processes in place and the SVO conducts its own quality-control checks of the selected vendor's valuation process. The NAIC retained the services of Pacific Investment Management Co.'s advisory services ("PIMCO Advisory") to model non-agency RMBS owned by U.S. insurers in 2014. The SVO switched from PIMCO Advisory to Blackrock, Inc. ("Blackrock") for non-agency RMBS in 2015. For CMBS, the SVO has retained the services of Blackrock for all years presented. PIMCO Advisory and Blackrock, specific to the periods referred to above (the "selected vendors"), provide five prices ("breakpoints" based on each U.S. insurer's statutory book value price) to utilize in determining the NAIC designation for each modeled LBaSS. For non-modeled LBaSS (ABS and CLOs) with the initial rating of NAIC 1 or NAIC 6, the rating remains the same through the life of the security. For non-modeled LBaSS with the initial rating of NAIC 2 through NAIC 5, the selected vendors are not utilized and the NAIC designations are set using a standardized table of breakpoints provided by the SVO for application to the insurer's statutory book value price. The NAIC designation determines the associated level of RBC that an insurer is required to hold for modeled LBaSS owned

A summary of our AFS fixed maturity securities by NAIC designation is as follows (dollars in millions):

(In millions)	December 31, 2016		
	Amortized Cost	Fair Value	Percent of Total
NAIC Designation

Total fixed maturity securities	$ 3,800	100%	$ 2,943	100%	$ 1,080	100%

[1]Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC rating. The percentage of investment grade securities under NRSRO ratings is lower than under NAIC ratings due to NRSRO ratings not factoring in the Company specific price point of carrying value on structured securities, whereas NAIC ratings factor this in as previously described.

Consistent with the NAIC Process and Procedures Manual, an NRSRO rating was assigned based on the following criteria: (a) the equivalent S&P rating where the security is rated by one NRSRO; (b) the equivalent S&P rating of the lowest NRSRO when the security is rated by two NRSROs; and (c) the equivalent S&P rating of the second lowest NRSRO if the security is rated by three or more NRSROs. If the lowest two NRSRO ratings are equal, then such rating will be the assigned rating. NRSRO ratings available for the periods presented were S&P, Fitch, Moody's Investor Service ("Moody's"), DBRS, and Kroll Bond Rating Agency, Inc. ("KBRA").

The portion of our AFS fixed maturity portfolio that was considered below investment grade based on NRSRO ratings decreased to 30% from 32% and 39% as of December 31, 2016, 2015 and 2014, respectively. The primary driver of the difference in the ratio of securities considered below investment grade by NRSROs as compared to the securities considered below investment grade by the NAIC relates to the difference in ratings methodologies between the NRSRO and NAIC for RMBS due to investments acquired at a discount to par value, as discussed above. The primary driver of the change in the percentage of NRSRO below investment grade securities and the change in NAIC below investment grade securities is driven by the reinvestment activity and volatile economic environment in 2016.

Purchased Credit Impaired (PCI) Securities - The following table summarizes our PCI securities, which are included in AFS fixed maturity securities:

	December 31,		
(In millions)	2016	2015	2014
Contractually required principal and interest[1]	$ 1,312	$ 1,092	$ 325
Less: Cash flows expected to be collected[2]	(866)	(704)	(237)
Non-accretable difference	$ 446	$ 388	$ 88
Cash flows expected to be collected	$ 866	$ 704	$ 237
Less: Amortized cost	(664)	(533)	(180)
Accretable difference	$ 202	$ 171	$ 57
Fair value	$ 677	$ 523	183

[1] *Includes principal and accrued interest.*
[2] *Represents the acquisition date undiscounted principal and interest cash flows expected.*

We acquired PCI investments with the following amounts at the time of purchase:

	Years ended December 31,		
(In millions)	2016	2015	2014
Contractually required principal and interest	$ 419	$ 622	$ 219
Expected cash flows	266	385	154
Estimated fair value	193	279	120

The following table summarize the activity for the accretable yield on PCI securities:

	Years ended December 31,		
(In millions)	2016	2015	2014
Balance at beginning of year	$ 171	$ 57	$ 42
Purchases of PCI securities, net	56	99	38
Accretion	(11)	(7)	5
Changes in expected cash flows	(14)	22	(28)
Balance at end of year	$ 202	$ 171	$ 57

3. Derivative Instruments

We use a variety of derivative instruments to manage equity risk, interest rate risk, credit risk, foreign currency risk, and market volatility. See *Note 1 - Business, Basis of Presentation, and Significant Accounting Policies* for a description of our accounting policies for derivatives and *Note 5 - Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	December 31, 2016		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 61	$ 1	$ —
Embedded derivatives			
Funds withheld	—	1,806	—
Interest sensitive contract liabilities	—	—	4,285
Total derivatives	$ 61	$ 1,807	$ 4,285

	December 31, 2015		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 41	$ 1	$ —
Embedded derivatives			
Funds withheld	—	469	—
Interest sensitive contract liabilities	—	—	3,540
Total derivatives	$ 41	$ 470	$ 3,540

	December 31, 2014		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 37	$ 1	$ —
Embedded derivatives			
Funds withheld	—	2,478	—
Interest sensitive contract liabilities	—	—	3,532
Total derivatives	$ 37	$ 2,479	$ 3,532

Derivatives are included in derivative assets or liabilities on the balance sheets, with the exception of embedded derivatives. Funds withheld and modco embedded derivatives are included in funds withheld at interest on the balance sheets. Indexed annuity products embedded derivatives are included in interest sensitive contract liabilities on the balance sheets. None of our derivatives are designated as hedges.

Foreign currency forwards - We use foreign currency forward contracts to hedge certain invested assets against movement in foreign currency. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives - We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products. Included in net investment income is the total return of the funds withheld embedded derivatives.

Credit Risk - We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

As of December 31, 2016, 2015, and 2014 we had no collateral pledged to counterparties in connection with derivative instruments.

4. Variable Interest Entities

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs - Our consolidated VIEs were fully liquidated as at December 31, 2014 and we did not consolidate any VIEs for the years ended December 31, 2015 and 2016.

On September 29, 2011, ALRe formed Highland Re Ltd (HRL). HRL was a Bermuda special purpose insurer and a direct subsidiary of ALRe. HRL issued voting Common Shares, 100% owned by ALRe, and one non-voting preferred share, 100% owned by a third party, in order to capitalize HRL. On December 16, 2011 ALRe entered into two non-proportional reinsurance agreements with HRL to cede claims risk associated with an affiliate reinsurance deal. ALRe's interest in HRL represents an interest in a VIE under current authoritative guidance. The Company has determined that it is the primary beneficiary as it satisfies both the power and benefits criteria in that guidance. Accordingly, HRL is consolidated in the financial statements of the Company at December 31, 2013. The preferred share buyer was entitled to request redemption of all or fractional portions of the preferred share under certain conditions during the term of the note. The note was repaid during 2014 and HRL was dissolved in the fourth quarter of 2014.

On November 10, 2010, 2011 A4 Fund, L.P. was formed to purchase commercial mortgage-backed securities in a leveraged structure for the benefit of the limited partners and met the definition of a VIE. The 2011 A4 Fund, L.P. ("A4 Fund") entered into a repurchase agreement with Wells Fargo Bank, N.A. Under this agreement, the A4 Fund could borrow up to $800 million to finance the acquisition of CMBS originally AAA rated. The facility had a three-year term, with two one-year extensions available at the A4 Fund's option with the payment of a 25 basis point extension fee on the outstanding balance of the facility. The A4 Fund was fully liquidated during 2014. As a result, there was income statement activity related to consolidated variable interest entities for the year ended December 31, 2014.

Non-consolidated VIEs - We invest in other entities meeting the definition of a VIE. We do not consolidate these investments because we do not meet the criteria of primary beneficiary as described below.

Fixed Maturity Securities - We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by GAAP, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed to be the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments and are held at fair value on the balance sheet and classified as AFS or trading.

Investment funds - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined in accordance with GAAP we are not under common control with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option, in which NAV is used as a practical expedient for fair value.

Income from investment funds is recorded in net investment income on the statements of income and (loss) and represents the change in fair value of investment fund, net of expenses.

The Company's investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management. Our risk of loss is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to the Company's initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) available-for-sale securities and other investments are limited to amortized cost; and (4) trading securities are limited to carrying value.

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs:

	December 31, 2016	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 531	$ 578
Investment in fixed maturity securities	2,573	2,582
Total assets	$ 3,104	$ 3,160

	December 31, 2015	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 624	$ 647
Investment in fixed maturity securities	2,127	2,222
Total assets	$ 2,751	$ 2,869

	December 31, 2014	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 607	$ 628
Investment in fixed maturity securities	877	880
Total assets	$ 1,484	$ 1,508

The following summarizes the Company's investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

	December 31, 2016		
(in millions)	Carrying Value	Percent of Total	Weighted Avg Life (WAL)
Investment funds			
Public equities	$ 133	25%	N/A

Total investment funds	$ 607	100%	

Summarized Financial Information of Investment Funds-The following is the aggregated summarized financial information of equity method investees and may be presented on a lag due to the availability of financial information from the investee:

	December 31,		
(in millions)	2016	2015	2014
Balance Sheets			
Assets	$ 2,130	$ 1,969	$ 4,214
Liabilities	4	3	940
Equity	2,126	1,966	3,274

(in millions)	December 31,		
Statements of Income	2016	2015	2014
Net income	$ 26	$ 27	$ 239

The following table presents the carrying value by ownership percentage of equity method investment funds, including related party investment funds and consolidated VIE investment funds:

	December 31,		
(in millions)	2016	2015	2014
Ownership Percentage			
100%	$ 26	$ 49	$ 48
50% – 99%	268	315	471
3% – 49%	237	260	88
Equity method investment funds	$ 531	$ 624	$ 607

5. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

The following represents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis:

	December 31, 2016			
(in millions)	Total	Level 1	Level 2	Level 3
Assets

Fair Value Valuation Methods-We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity - We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS, and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees, and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities - Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as analytics or brokers and are classified as Level 2 or 3.

Funds withheld (embedded derivative) - The fair value of funds withheld at interest is classified as Level 3 as a more than insignificant amount of the underlying assets are Level 3. See *Note 6 - Funds Withheld at Interest* for more information.

Derivatives - Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. We consider and incorporate counterparty credit risk in the

valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents - The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) - Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with actuarial assumptions for policyholder behavior.

Fair Value Option-The following represents the gains or losses recorded for instruments we have elected the fair value option:

	Twelve months ended December 31,		
(In millions)	2016	2015	2014
Trading securities	$ 19	$ (88)	$ (1)
Total (loss) on fair value option	$ 19	$ (88)	$ (1)

Transfers Between Levels-Transfers into Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the lack of commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 2.

For the years ended December 31, 2016, 2015, and 2014, there were no transfers between Level 1 and Level 2.

Level 3 Financial Instruments-The following is a reconciliation for all Level 3 assets and liabilities measured at fair value on a recurring basis:

	Year ended December 31, 2016									
		Total realized and unrealized gains (losses)

Significant Unobservable Inputs-Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS fixed maturity securities. Additional significant unobservable inputs are described below.

Funds withheld at interest – For certain fixed maturity securities that support the funds withheld at interest, internal models are used to calculate the fair value. A discounted cash flow approach is utilized. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. Discounts ranged from 4% to 8%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Interest sensitive contract liabilities - embedded derivative - Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk - For funds withheld and modco contracts we reinsure with affiliated parties, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For non-affiliated contracts reinsured through funds withheld and modco reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget - The Company assumes future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior - We regularly review the lapse and withdrawal assumptions. These are based on the Company's initial pricing assumptions updated for actual experience. Actual Company experience may be limited for recently issued products.

	December 31, 2016				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 4,285	Option budget method	Non-performance risk	0% - 1.5%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0% - 16.3%	Decrease

	December 31, 2015				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,540	Option budget method	Non-performance risk	0% - 1.8%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0% - 10.7%	Decrease

	December 31, 2014				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,532	Option budget method	Non-performance risk	0% - 2.1%	Decrease
			Option budget	0.9% - 3.9%	Increase
			Surrender rate	0% - 10.2%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value-The following represents the Company's financial instruments not carried at fair value on the balance sheets:

		December 31, 2016		December 31, 2015		December 31, 2014	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets							
Investment funds	NAV[1]	$ 153	$ 153	$ 220	$ 220	$ 106	$ 106
Investment funds in related parties	NAV[1]	378	378	404	404	501	501
Total assets not carried at fair value		$ 531	$ 531	$ 624	$ 624	$ 607	$ 607
Liabilities							
Interest sensitive contract liabilities[2]	3	$ 23,134	$ 22,332	$ 19,737	$ 19,225	$ 19,662	$ 19,464
Total liabilities not carried at fair value		$ 23,134	$ 22,332	$ 19,737	$ 19,225	$ 19,662	$ 19,464

[1] *Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.*
[2] *During 2016, we changed the disclosure of interest sensitive contract liabilities to exclude insurance contracts, which are not required to be included. We determined contract types that meet the definition of insurance contracts include universal life and traditional fixed and fixed indexed annuities with significant mortality or morbidity risks. In previous periods, all contracts within interest sensitive contract liabilities not held at fair value were included. As such, the carrying and fair values reported for December 31, 2015, and 2014, were adjusted to be comparable.*

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we do carry at fair value. The financial instruments presented above are reported at carrying value on the balance sheets; however, in the case of investment funds, investment funds in related parties and interest sensitive contract liabilities, the carrying amount approximates or equals fair value.

Investment funds in related parties - Other investments - The fair value of investment funds in related party - other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities - The carrying and fair value of interest sensitive contract liabilities above includes fixed indexed and traditional fixed annuities without mortality or morbidity risks, funding agreements, and payout annuities without life contingencies. The embedded derivatives within fixed indexed annuities without mortality or morbidity risks are excluded, as they are carried at fair value. The valuation of these investment contracts is based on discounted cash flow methodologies using significant unobservable inputs. The estimated fair value is determined using current market risk-free interest rates, adding a spread to reflect our nonperformance risk and subtracting a risk margin to reflect uncertainty inherent in the projected cash flows.

6. Funds Withheld at Interest

Funds withheld at interest represents the receivable for assets supporting funds withheld and modco reinsurance. These assets are held in trusts or custodial accounts that are legally segregated from our third party ceding companies' general accounts and are managed by Athene Asset Management (AAM), a related party to ALRe. In the event of a ceding company's insolvency, we would need to assert a claim on the assets supporting our reserve liabilities. However, we have the ability to offset amounts we owe to the ceding company, which reduces our risk of loss. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The Company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets in a fashion similar to invested assets held directly by the Company.

Information on the underlying assets within the funds withheld at interest is presented below.

	Assets Supporting Funds withheld at Interest		
(In millions)	December 31, 2016	December 31, 2015	December 31, 2014
Fixed maturity securities			
U.S. government and agencies	$ 8	$ 8	$ 15
U.S. state, municipal, and political subdivisions	1,067	894	1,219
Foreign governments	140	101	—
Corporate	19,909	17,178	19,848
CLOs	5,039	4,803	4,265
ABS	2,498	2,389	2,042
CMBS	1,861	1,674	2,867
RMBS	8,244	6,923	5,833
Equity securities	168	179	192
Mortgage loans	5,472	5,007	5,003
Investment funds	2,443	2,551	2,503
Policy loans	43	39	36
Derivatives	1,146	688	1,284
Short-term investments	196	114	—
Other investments	344	255	254
Cash and cash equivalents	587	1,068	525
Other assets and liabilities[1]	290	8	(557)
Funds Withheld at Interest	$ 49,455	$ 43,879	$ 45,329

[1] Other assets and liabilities includes the net of accrued investment income, open payable and receivable for security trades, excise tax payable, deposits and premiums receivable, claims and surrenders payable, and other assets and liabilities associated with the funds withheld and modco reinsurance treaties.

Approximately 92.3%, 94.2% and 93.5% of the fixed maturity securities within the funds withheld at interest are investment grade by NAIC designation as of December 31, 2016, 2015 and 2014, respectively.

7. Reinsurance

Third-party reinsurance

In January 2014, the Company reinsured a flow of multi-year guaranteed annuities of Midland National Life Insurance Company (Midland) and American Equity Investment Life Insurance ("AEL"), on a modified coinsurance basis.

Affiliated reinsurance

The Company continues to reinsure new business related to annuities and funding agreements from Athene Annuity and Life Company (IA) (AAIA) and Athene Annuity & Life Assurance Company (AADE).

8. Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Included within *Deferred Acquisition Costs and Deferred Sales Inducements* on the balance sheets of $2,392 million sheets are deferred acquisition costs (DAC) of $990 million, deferred sales inducements (DSI) of $382 million, and day one losses of $1,020 million. The day one losses are summarized separately within the reinsurance intangibles section below.

Deferred Acquisitions Costs and Deferred Sales Inducements

The following summarizes a rollforward of DAC and DSI:

(In millions)	DAC	DSI	Total
Balance at December 31, 2013	$ 201	$ 82	$ 283
Additions	232	91	323
Amortization	(46)	(15)	(61)
Balance at December 31, 2014	387	158	545
Additions	264	111	375
Amortization	15	8	23
Balance at December 31, 2015	666	277	943
Additions	472	158	630
Amortization	(148)	(53)	(201)
Balance at December 31, 2016	$ 990	$ 382	$ 1,372

We did not make any adjustments to DAC or DSI recoverability during the years ended December 31, 2016, 2015, or 2014.

Reinsurance Intangibles

For each block reinsurance transaction, the Company defers the net of the fair value of assets acquired and the sum of reserves acquired, other liabilities acquired, and ceding commission payable or receivable as DAC or unearned revenue reserve (URR) and referred as day one loss and day one gain, respectively.

The following summarizes the day one losses and day one gains included within *Deferred acquisition costs and deferred sales inducements* and *Interest sensitive contract liabilities* respectively on the balance sheets.

(In millions)	Day one gain	Day one loss	Total
Balance at December 31, 2013	$ 963	$ (1,425)	$ (462)
Amortization	(102)	423	321
Balance at December 31, 2014	861	(1,002)	(141)
Amortization	(96)	(83)	(179)
Balance at December 31, 2015	765	(1,085)	(320)
Additions	—	(51)	(51)
Amortization[1]	(102)	116	14
Balance at December 31, 2016	$ 663	$ (1,020)	$ (357)

[1] *2016 day one loss amortization includes $(103) million credit for an out of period adjustment that relates to 2015.*

9. Reserves

Included in *Interest sensitive contract liabilities* are day one gains as of December 31, 2016, December 31, 2015 and December 31, 2014. See *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for a summary of day one gains and losses.

The following table summarizes the interest sensitive contract liability reserves by product:

	December 31,		
(in millions)	2016	2015	2014
Deferred annuities	$ 11,328	$ 8,857	$ 8,989
Fixed indexed annuities	33,672	30,891	30,685
Funding agreements	1,091	1,539	1,318
Single premium immediate annuities and supplemental contracts - non-life contingent	953	923	964
Total	$ 47,044	$ 42,210	$ 41,956

The following table summarizes the future policy benefit reserves by product:

	December 31,		
(in millions)	2016	2015	2014
Deferred annuities	$ 43	$ 23	$ 27
Fixed indexed annuities	1,134	603	624
Single premium immediate annuities and supplemental contracts - life contingent	2,957	3,056	3,162
Total	$ 4,134	$ 3,682	$ 3,813

10. Debt

Refer to *Note 4 - Variable Interest Entities* for disclosures regarding borrowings of the Company's consolidated VIEs.

Revolving Credit Facility—On September 20, 2013, AHL and ALRe entered into a three-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. Beginning in 2014, Athene USA was added as a borrower. The amount available under the Credit Facility was $500 million. In connection with the Credit Facility, AHL guaranteed all of the obligations of ALRe and Athene USA, ALRe guaranteed certain of the obligations of AHL and Athene USA, and Athene USA guaranteed the obligations of AHL and ALRe. The agreement contained various standard covenants with which we had to comply.

On January 22, 2016, AHL, Athene USA and ALRe terminated the Credit Facility and entered into a five-year revolving credit agreement with Citibank, N.A., as administrative agent. The amount available under the new Credit Facility is $1 billion, with AHL, ALRe, and Athene USA as joint and several borrowers and guarantors. Interest will accrue on outstanding borrowings at LIBOR plus a margin or a base rate plus a margin, based on the credit rating of AHL. The new Credit Facility has a commitment fee on the unused commitment, based on the credit rating of AHL. As of December 31, 2016, we had no amounts outstanding under the Credit Facility and were in compliance with all covenants.

11. Common Shares

The Company has one class of common stock, which represents 100% of the total voting power of the Company, and is beneficially owned by Athene Holding Ltd. (“AHL”). The Company is authorized to and has issued 1,500,000 shares at a par value of $1.00 each to AHL.

12. Stock-Based Compensation

AHL has adopted share incentive plans to issue non-qualified share options, rights to purchase shares, restricted shares, restricted stock units, and other awards which may be settled in, or based upon, AHL’s common shares. Through its incentive plans, AHL has issued the following three categories of stock-based compensation to the Company’s employees: long-term incentive plan (LTIP) awards, Class M awards and Class A awards. These awards have certain service and performance conditions. As a result, a portion of stock-based compensation expense incurred during the year is allocated to the Company by AHL.

During 2014, AHL adopted amendments to the terms of existing stock-based compensation agreements to conform certain vesting and repurchase terms. Prior to 2014, AHL had the right to repurchase vested shares at the lower of purchase cost or fair value if an employee resigned without good reason, either before an IPO or under other conditions as defined in the original plans. As a result of this repurchase option, the expense associated with vested incentive shares would not be recognized on the income statement until the date on which such shares would have been converted to Class A shares.

Total stock-based compensation expense incurred by the Company was $4 million, $3 million and $14 million for the years ended December 31, 2016, 2015 and 2014 respectively. These amounts are reflected within the policy and other operating expenses on the statements of income and (loss).

13. Accumulated Other Comprehensive Income

The following is a detail of AOCI:

	December 31,		
(In millions)	2016	2015	2014
AFS securities	$ (1)	$ (77)	$ 17
Investment funds	14	—	—
Accumulated other comprehensive income (loss)	$ 13	$ (77)	$ 17

Changes in AOCI are presented below.

	Years ended December 31,		
(In millions)	2016	2015	2014
Unrealized gains (losses) on AFS securities			
Unrealized holding gain (losses) arising during the year	$ 74	$ (84)	$ (12)
Less: Reclassification adjustment for gains (losses) realized in net income[1]	2	(10)	6
Change in unrealized gains (losses) on AFS securities	76	(94)	(6)
Unrealized gains (losses) on investment funds			
Other comprehensive income on equity method investment funds	14	—	—
Change in AOCI	$ 90	$ (94)	$ (6)

[1] *Recognized in net investment income on the statements of income and (loss).*

14. Income Taxes

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, the Company will be exempted from taxation until the year 2035.

15. Statutory Requirements

ALRe is licensed by the Bermuda Monetary Authority (BMA) as a Class E long term insurer and is subject to the Insurance Act 1978, as amended (Bermuda Insurance Act) and regulations promulgated thereunder. Effective January 1, 2016, in connection with the implementation of its broader regulatory regime, the BMA integrated the Economic Balance Sheet (EBS) framework into the determination of Bermuda Solvency and Capital Requirement (BSCR). The European Commission has granted the BMA's regulatory regime for reinsurance, group solvency calculation and group supervision full equivalence to the European Union's Directive (2009/138/EC, or "Solvency II"). Under this framework a Class E insurer must produce three sets of financial statements:

1. ***GAAP Financial Statements* -** Financial statements prepared in accordance with an internationally recognized comprehensive base of accounting, and for which ALRe has elected to prepare US GAAP financial statements. These financial statements form the basis for the preparation of both the Statutory Financial Statements and the Economic Balance Sheet.

2. ***Statutory Financial Statements (SFS)*** - Equal to the GAAP financial statements adjusted for:
    a. Prudential filters that include a) adjustments to eliminate non-admitted assets including goodwill and other similar intangible assets, not considered admissible for solvency purposes, and b) adjustments to include certain assets and liabilities that are generally off-balance sheet under general purpose reporting. These include items such as guarantees and other instruments that do not relate to the insurer's own insurance contracts.
    b. Directions (aka permitted practices) issued by the BMA.

3. ***Economic Balance Sheet (EBS)*** - A balance sheet where assets are recorded based on GAAP fair values and insurance reserves are based on technical provisions comprised of the sum of a best estimate liability plus a risk margin. The best estimate liability may be calculated by applying the standard approach or the scenario approach. Under the standard approach the discount rate for insurance reserves is a rate prescribed by the BMA. Under the scenario approach the discount rate for insurance reserves is based on the yield on eligible assets owned by the insurer as determined under the worst result of nine prescribed stressed scenarios.

Under the Bermuda Insurance Act, ALRe is required to maintain SFS capital and surplus to meet the Minimum Margin of Solvency (MMS) which is equal to the greater of $8 million or 2% of the first $500 million of SFS assets plus 1.5% of SFS assets above $500 million. As of January 1, 2017 the MMS will also be subject to a floor of 25% of the Enhanced Capital Ratio (ECR).

Under the Bermuda Insurance Act, ALRe is also required to maintain minimum EBS capital and surplus to meet the ECR which is equal to a risk based capital model where risk factor charges are applied to the EBS balance sheet in order to determine the ECR.

The following table presents the ALRE actual and required GAAP, SFS, and EBS capital and surplus and net income amounts as of and for the year ended December 31, 2016.

	Year ended December 31, 2016		
(In millions)	GAAP	SFS	EBS
Actual Capital and Surplus	$ 4,870	$ 6,124	$ 4,411
Required Capital and Surplus [(1)]	N/A	798	1,932
BSCR Ratio [(2)]	N/A	N/A	228%
Net Income (Loss) [(3)]	1,465	460	N/A

(1) Represents the MMS for the SFS and the ECR for EBS. There is not a required capital and surplus amount for the GAAP financial statements.
(2) BSCR ratio for the current binding regulatory solvency constraint of EBS is shown. The BSCR ratio under EBS for December 31, 2016 is not comparable to the BSCR ratio applied to the SFS for years ended December 31, 2015 and prior due to the change in the calculations and addition of the EBS basis to the BMA regime in 2016.
(3) EBS comprises of only a balance sheet.

The BMA has granted ALRe direction in the SFS to utilize amortized cost for the valuation of certain investments instead of fair value as well direction to use U.S. statutory reserving principles for the calculation of insurance reserves instead of US GAAP, subject to the reserves being proven to be adequate based on cash flow testing. The impact on the SFS of these directions is approximately equal to the difference between GAAP and SFS capital and surplus and net income.

To enable the BMA to better assess the quality of the insurer's capital resources, a Class E insurer is required to disclose the makeup of its capital in accordance with the '3-tiered capital system.' Highest quality capital is classified as Tier 1 Capital, lesser quality capital is classified as either Tier 2 Capital or Tier 3 Capital. The Bermuda Insurance Act requires that Class E insurers have Tier 1 Capital equal to or greater than 50% of the value of its ECR and Tier 3 Capital of not more than 17.65% of the aggregate of its Tier 1 Capital and Tier 2 Capital. As of December 31, 2016 all of the eligible capital used by ALRe to meet the MSM and ECR was Tier 1 Capital. ALRe monitors its capital tiers and any

encumbrances on capital when determining capital tiers, including assessing any capital restricted in trusts and funds withheld or modco arrangements.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's SFS capital and surplus, unless at least two members of ALRe's board of directors sign and submit to the BMA, an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MMS and ECR, ALRe is permitted to distribute up to the sum of 100% of SFS surplus and an amount less than 15% of SFS capital. Distributions in excess of this amount require the approval of the BMA. As of December 31, 2016 the binding constraint on the maximum distribution ALRe was permitted to pay AHL without the need for prior approval was the EBS capital and surplus in excess of the ECR and was $2,479.

16. Related Party Transactions

The following summarizes related party balances included on the balance sheets and the statements of income and (loss). The tables below include related party balances not previously disclosed.

	December 31,		
(in millions)	2016	2015	2014
Assets			
Investments			
Available for sale securities, CLOs, at fair value	$ 158	$ 136	$ 60
Trading securities, CLOs, at fair value	83	72	77
Investment funds	378	404	501
Funds withheld at interest[1]	42,920	40,396	42,556
Total investments	43,539	41,008	43,194

Trading securities	(33)	(52)	(79)
Investment funds	(73)	(121)	(5)

Investment related expenses - Substantially all of our investments are managed by AAM, a subsidiary of AGM. AAM provides direct investment management, asset allocation, mergers and acquisition asset diligence, and certain operational support services for our investment portfolio, including investment compliance, tax, legal, and risk management support. As of December 31, 2016, AAM directly manages $4,042 million of our investment portfolio assets, of which 75% are rated one or two by the NAIC. For certain assets which require specialized sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. For the services related to these investments, AAM earns a fee of 0.40% per annum on all assets managed in accounts owned by or related to the Company, including sub-advised assets but excluding certain other limited exceptions. Additionally, A AM recharges the sub-advisory fees to the Company.

Assets supporting funds withheld at interest: The majority of the assets supporting the funds withheld at interest are managed by AAM. See *Note 6 - Funds Withheld at Interest* for more information.

AAM has entered into a Master Sub-Advisory Agreement (MSAA) with certain Apollo affiliates to sub-advise AAM with respect to a portion of our assets, with the fees recharged to us, in addition to the gross fee of 0.40% per annum paid to AAM as described above. The MSAA covers services rendered by Apollo-affiliated sub-advisors relating to investments in certain asset classes, primarily CLO, CMBS, and ABS.

The following represents the assets sub-advised by Apollo affiliates:

	December 31,		
(In millions, except for percentages)	2016	2015	2014
Fixed maturity securities			
U.S. state, municipals, and political subdivisions	$ —	$ —	$ 6
Corporate	131	57	29
CLO	574	475	273
ABS	8	48	28
CMBS	37	38	—
Trading securities	—	—	35
Total assets	$ 750	$ 618	$ 371
Percent of total AAM managed Company assets	16%	15%	17%

The management and sub-advisory fees are included within the net investment income line on the statements of income and (loss). The management fees payable as of December 31, 2016, 2015, and 2014 were $2 million, $14 million and $10 million respectively. The sub-advisory fees payable as of December 31, 2016, 2015, and 2014 were $19 million, $19 million, and $12 million respectively.

Because the Apollo Group has a significant voting interest in AHL, in order to protect against potential conflicts of interest resulting from transactions that we and AHL have entered, and will continue to enter into with the Apollo Group, the AHL board of directors has formed a conflicts committee, consisting of three of its directors (two of whom are also ALRe directors) who are not officers or employees of any member of the Apollo Group. The conflicts committee reviews and a majority of the committee members must approve certain material transactions between AHL and/or its subsidiaries and the Apollo Group, subject to certain exceptions.

Service fees - AHL has entered into shared services agreements with AAM. Under these agreements, we and AAM make available to each other certain personnel and services. Expenses for the services are based on the amount of time spent on the affairs of the other party, in addition to actual expenses incurred and certain cost reimbursements. For the years ended December 31, 2016, 2015, and 2014, net expenses allocated from (to) AAM under these agreements were $0 million, $(1) million, and $0 million, respectively. The Company had no net expenses payable to AAM as of December 31, 2016, 2015, and 2014.

17. Commitments and Contingencies

Contingent Commitments-The Company had commitments to make additional capital contributions to certain investment funds of $116 million, $57 million and $48 million as of December 31, 2016, 2015, and 2014 respectively. The Company expects most of its current commitments will be invested over the next five years; however, these commitments could become due any time upon counterparty request.

Restricted Assets - The total restricted assets included on the balance sheets are as follows:

	December 31,		
(In millions)	2016	2015	2014
Fixed maturity securities - AFS	$ 260	$ 124	$ 143
Short term - AFS	16	—	—
Restricted cash	11	9	24
Total restricted assets	$ 287	$ 133	$ 167

ALRe has established reinsurance trusts of assets equal to statutory reserves, plus an additional amount of assets, as a result of a coinsurance agreement with United American Corporation.

ALRe has established escrow account of assets equal to a portion of statutory reserves, as a result of the modified coinsurance agreement with Midland described in *Note 7 - Reinsurance*.

Litigation, Claims, and Assessments - On June 12, 2015, a putative class action complaint was filed in the United States District Court, Northern District of California against ALRe, AHL, AUSA, AAIA, AAM, and AGM. The complaint, which is similar to complaints previously filed against other large insurance companies, primarily alleges that captive reinsurance and other transactions had the effect of misrepresenting the financial condition of AAIA. The complaint purports to be brought on behalf of a class of purchasers of annuity products issued by AAIA between 2007 and the present. There are also various allegations related to the purchase of Aviva USA and concerning entry into a modco transaction with ALRe in October 2013. The suit asserts claims of violation of the Racketeer Influenced and Corrupt Organizations Act and seeks compensatory damages, trebled, in an amount to be determined, costs, and attorneys' fees. On March 25, 2016, our motion to transfer to the United States District Court, Southern District of Iowa was granted. On May 24, 2016, plaintiff filed an Amended Complaint that removed plaintiff Silva and defendant Aviva plc from the action. Defendants re-filed their motion to dismiss, which is fully briefed. The court, however, stayed consideration of the motion and all discovery pending a ruling from the Eighth Circuit in *Ludwick*. (For background, *Ludwick* is a putative class action against Fidelity & Guaranty Life that involves similar issues and arguments. F&G obtained a dismissal in federal district court, and plaintiffs in the case appealed to the Eighth Circuit. The Eighth Circuit heard oral arguments on the appeal on November 16, 2016, but no decision has been issued). We believe that we have meritorious defenses to the claims set forth in the complaint and intend to vigorously defend the litigation. In light of the inherent uncertainties involved in this matter, reasonably possible losses, if any, cannot be estimated at this time.

18. Subsequent Events

On April 13, 2017, A.M. Best upgraded the Financial Strength Rating of the Company to "A" (Excellent) from "A-" (Excellent) and the Long-Term Issuer Credit Rating (Long-Term ICR) to "a" from "a-". The outlook of these credit ratings has been revised to stable from positive.

The Company has evaluated the impact of subsequent events through April 14, 2017, the date at which the financial statements were available to be issued.

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8-K

CURRENT REPORT

PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Date of report (Date of earliest event reported): June 13, 2017

ATHENE HOLDING LTD.

(Exact name of registrant as specified in its charter)

Bermuda	**001-37963**	**98-0630022**
(State or other jurisdiction of incorporation or organization)	(Commission file number)	(I.R.S. Employer Identification Number)

96 Pitts Bay Road
Pembroke, HM08, Bermuda
(Address of principal executive offices and zip code)

(441) 279-8400
(Registrant's telephone number, including area code)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Item 8.01 Other Events.

As previously disclosed in amendment no. 1 to the registration statement on Form S-1 (File Nos. 333-218163), filed by Athene Holding Ltd. (the "Company") with the U.S. Securities and Exchange Commission on June 5, 2017, the Company has undertaken an initiative to improve controls in its business processes and confirm the accuracy of its data relating to blocks of business acquired from Aviva USA as well as deposits earned since such acquisition. In connection with these efforts, in May 2017, the Company identified an error relating to the impact of certain inputs used to calculate certain actuarial balances, which had the result of misstating the Company's net investment earned rate used in the amortization calculation of deferred acquisition costs and the change in future policy benefits. The impact of this adjustment and other adjustments relating to each individual annual period in 2016, 2015, 2014 and 2013, as well as interim periods in 2017, 2016 and 2015 is immaterial. While the Company's management believes that this issue has been sufficiently mitigated, there is no assurance that the Company's initiative to improve its business processes and controls will not result in the discovery of further errors associated with the blocks of business acquired from Aviva USA and may have an adverse effect on the Company's financial results in the future.

The Company elected to revise its annual financial statements and schedules included in its Annual Report on Form 10-K for the year ended December 31, 2016 to correct immaterial errors identified relating to the periods disclosed therein. Such revised annual financial statements are being filed as Exhibit 99.1 hereto. The Company also elected to revise its quarterly financial statements included in the Quarterly Report on Form 10-Q for the three months ended March 31, 2017 to correct immaterial errors identified relating to the periods disclosed therein. Such revised quarterly financial statements are being filed as Exhibit 99.2 hereto.

Item 9.01 Financial Statements and Exhibits

(d)	**Exhibits**
23.1.1	Consent of PricewaterhouseCoopers LLP regarding Athene Holding Ltd. financial statements.
23.1.2	Consent of PricewaterhouseCoopers Ltd. regarding Athene Holding Ltd. financial statements.

As used in this Form 10-Q, unless the context otherwise indicates, any reference to "Athene," "our Company," "the Company," "us," "we" and "our" refer to Athene Holding Ltd. together with its consolidated subsidiaries and any reference to "AHL" refers to Athene Holding Ltd. only.

Forward-Looking Statements

Certain statements in this Quarterly Report on Form 10-Q (report), other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results and the assumptions upon which those statements are based, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "seek," "assume," "believe," "may," "will," "should," "could," "would," "likely" and other words and terms of similar meaning, including the negative of these or similar words and terms, in connection with any discussion of the timing or nature of future operating or financial performance or other events. However, not all forward-looking statements contain these identifying words. Forward-looking statements appear in a number of places throughout and give our current expectations and projections relating to our financial condition, results of operations, plans, strategies, objectives, future performance, business and other matters.

We caution you that forward-looking statements are not guarantees of future performance and that our actual consolidated results of operations, financial condition and liquidity may differ materially from those made in or suggested by the forward-looking statements contained in this report. There can be no assurance that actual developments will be those anticipated by us. In addition, even if our consolidated results of operations, financial condition and liquidity are consistent with the forward-looking statements contained in this report, those results or developments may not be indicative of results or developments in subsequent periods. A number of important factors could cause actual results or conditions to differ materially from those contained or implied by the forward-looking statements, including the risks discussed in *Part II-Item 1A. Risk Factors* included in this report and *Part I-Item 1A. Risk Factors* included in our Annual Report on Form 10-K for the year ended December 31, 2016 (2016 Annual Report). Factors that could cause actual results or conditions to differ from those reflected in the forward-looking statements contained in this report include:

- the accuracy of management's assumptions and estimates;
- variability in the amount of statutory capital that our insurance and reinsurance subsidiaries have or are required to hold;
- interest rate fluctuations;
- our potential need for additional capital in the future and the potential unavailability of such capital to us on favorable terms or at all;
- changes in relationships with important parties in our product distribution network;
- the activities of our competitors and our ability to grow our retail business in a highly competitive environment;
- the impact of general economic conditions on our ability to sell our products and the fair value of our investments;
- our ability to successfully acquire new companies or businesses and/or integrate such acquisitions into our existing framework;
- downgrades, potential downgrades or other negative actions by rating agencies;
- our dependence on key executives and inability to attract qualified personnel, or the potential loss of Bermudian personnel as a result of Bermuda employment restrictions;
- market and credit risks that could diminish the value of our investments;
- foreign currency fluctuations;
- the impact of changes to the creditworthiness of our reinsurance and derivative counterparties;
- changes in consumer perception regarding the desirability of annuities as retirement savings products;
- introduction of the proposed European Union financial transaction tax;
- potential litigation (including class action litigation), enforcement investigations or regulatory scrutiny against us and our subsidiaries, which we may be required to defend against or respond to;
- the impact of new accounting rules or changes to existing accounting rules on our business;
- interruption or other operational failures in telecommunication and information technology and other operating systems, as well as our ability to maintain the security of those systems;
- the termination by Athene Asset Management, L.P. (AAM) or Apollo Asset Management Europe, LLP (AAME) of its investment management or advisory agreements with us and limitations on our ability to terminate such arrangements;
- AAM's or AAME's dependence on key executives and inability to attract qualified personnel;
- increased regulation or scrutiny of alternative investment advisers and certain trading methods;
- potential changes to regulations affecting, among other things, transactions with our affiliates, the ability of our subsidiaries to make dividend payments or distributions to us, acquisitions by or of us, minimum capitalization and statutory reserve requirements for insurance companies and fiduciary obligations on parties who distribute our products;
- suspension or revocation of our subsidiaries' insurance and reinsurance licenses;
- Athene Holding Ltd. (AHL) or Athene Life Re Ltd. (ALRe) becoming subject to U.S. federal income taxation;
- adverse changes in U.S. tax law;
- our being subject to U.S. withholding tax under Foreign Account Tax Compliance Act;
- our potential inability to pay dividends or distributions; and
- other risks and factors listed under *Part II-Item 1A. Risk Factors* included in this report, *Part I-Item 1A. Risk Factors* included in our 2016 Annual Report and elsewhere in this report and in our 2016 Annual Report.

Table of Contents

We caution you that the important factors referenced above may not be exhaustive. In addition, we cannot assure you that we will realize the results or developments we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our operations in the way we expect or anticipate. In light of these risks, you should not place undue reliance upon any forward-looking statements contained in this report. The forward-looking statements included in this report are made only as of the date hereof. We undertake no obligation, except as may be required by law, to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise. Comparisons of results for current and any prior periods are not intended to express any future trends, or indications of future performance, unless expressed as such, and should only be viewed as historical data.

GLOSSARY OF SELECTED TERMS

Unless otherwise indicated in this report, the following terms have the meanings set forth below:

Athene Holding Ltd. and Related Entities

Term or Acronym	Definition
A-A Mortgage	A-A Mortgage Opportunities, LP
AAA	AP Alternative Assets, L.P.
AAA Investor	AAA Guarantor - Athene, L.P.
AADE	Athene Annuity & Life Assurance Company, formerly known as Liberty Life Insurance Company, the parent insurance company of our U.S. insurance subsidiaries
AAIA	Athene Annuity and Life Company, formerly known as Aviva Life and Annuity Company
AAM	Athene Asset Management, L.P.
AAME	Apollo Asset Management Europe, LLP (together with certain of its affiliates)
ADKG	Athene Deutschland Holding GmbH & Co. KG
AGER	AGER Bermuda Holding Ltd.
AHL	Athene Holding Ltd.
ALIC	Athene Life Insurance Company
ALRe	Athene Life Re Ltd.
ALV	Athene Lebensversicherung AG, formerly known as Delta Lloyd Lebensversicherung AG
AmeriHome	AmeriHome Mortgage Company, LLC
APK	Athene Pensionskasse AG, formerly known as Delta Lloyd Pensionskasse AG
Apollo	Apollo Global Management, LLC
Apollo Group	(1) Apollo, (2) the AAA Investor, (3) any investment fund or other collective investment vehicle whose general partner or managing member is owned, directly or indirectly, by Apollo or one or more of Apollo's subsidiaries, (4) BRH Holdings GP, Ltd. and its shareholders and (5) any affiliate of any of the foregoing (except that AHL and its subsidiaries and employees of AHL, its subsidiaries or AAM are not members of the Apollo Group)
Athene USA	Athene USA Corporation, formerly known as Aviva USA Corporation
CoInvest VI	AAA Investments (Co-Invest VI), L.P.
CoInvest VII	AAA Investments (Co-Invest VII), L.P.
CoInvest Other	AAA Investments (Other), L.P.
DLD	Delta Lloyd Deutschland AG, now known as Athene Deutschland GmbH
German Group Companies	Athene Deutschland GmbH, Athene Deutschland Holding GmbH & Co. KG, Athene Deutschland Verwaltungs GmbH, Athene Lebensversicherung AG and Athene Pensionskasse AG
London Prime	London Prime Apartments Guernsey Holdings Limited
MidCap	MidCap FinCo Limited
NCL LLC	NCL Athene, LLC
Sprint	Apollo Asia Sprint Co-Investment Fund, L.P.

Table of Contents

Certain Terms & Acronyms

Term or Acronym	Definition
ABS	Asset-backed securities
ACL	Authorized control level RBC as defined by the model created by the National Association of Insurance Commissioners
ALM	Asset liability management
AUM	Assets under management
Alternative investments	Alternative investments, including investment funds, CLO equity positions and certain other debt instruments considered to be equity-like
Base of earnings	Earnings generated from our results of operations and the underlying profitability drivers of our business
Bermuda capital	The capital of ALRe calculated under U.S. statutory accounting principles, including that for policyholder reserve liabilities which are subjected to U.S. cash flow testing requirements, but excluding certain items that do not exist under our applicable Bermuda requirements, such as interest maintenance reserves
Block reinsurance	A transaction in which the ceding company cedes all or a portion of a block of previously issued annuity contracts through a reinsurance agreement
BMA	Bermuda Monetary Authority
BSCR	Bermuda Solvency Capital Requirement
CAL	Company action level RBC as defined by the model created by the National Association of Insurance Commissioners
CLO	Collateralized loan obligation
CMBS	Commercial mortgage-backed securities
Capital ratio	Ratios calculated (1) with respect to our U.S. insurance subsidiaries, by reference to RBC, (2) with respect to ALRe, by reference to BSCR, and (3) with respect to our German Group Companies, by reference to SCR
Cost of crediting	The interest credited to the policyholders on our fixed annuities, including, with respect to our FIAs, option costs, presented on an annualized basis for interim periods
DAC	Deferred acquisition costs
Deferred annuities	FIAs, annual reset annuities and MYGAs
DSI	Deferred sales inducement
Excess capital	Capital in excess of the level management believes is needed to support our current operating strategy
FIA	Fixed indexed annuity, which is an insurance contract that earns interest at a crediting rate based on a specified index on a tax-deferred basis
Fixed annuities	FIAs together with fixed rate annuities
Fixed rate annuity	Fixed rate annuity is an insurance contract that offers tax-deferred growth and the opportunity to produce a guaranteed stream of retirement income for the lifetime of its policyholder
Flow reinsurance	A transaction in which the ceding company cedes a portion of newly issued policies to the reinsurer
GLWB	Guaranteed living withdrawal benefits
GMDB	Guaranteed minimum death benefits
IMO	Independent marketing organization
Invested assets	The sum of (a) total investments on the consolidated balance sheet with AFS securities at amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) consolidated variable interest entities' assets, liabilities and noncontrolling interest and (f) policy loans ceded (which offset the direct policy loans in total investments). Invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions)
Investment margin	Investment margin applies to deferred annuities and is the excess of our net investment earned rate over the cost of crediting to our policyholders, presented on an annualized basis for interim periods
Liability outflows	The aggregate of withdrawals on our deferred annuities, maturities of our funding agreements and payments on payout annuities
LIMRA	Life Insurance and Market Research Association
MCR	Minimum capital requirements
MMS	Minimum margin of solvency
Modco	Modified coinsurance
MVA	Market value adjustment
MYGA	Multi-year guaranteed annuity

Term or Acronym	Definition
NAIC	National Association of Insurance Commissioners
Net investment earned rate	Income from our invested assets divided by the average invested assets for the relevant period, presented on an annualized basis for interim periods
Other liability costs	Other liability costs include DAC, DSI and VOBA amortization and change in GLWB and GMDB reserves for all products, the cost of liabilities on products other than deferred annuities including offsets for premiums, product charges and other revenues
OTTI	Other-than-temporary impairment
Payout annuities	Annuities with a current cash payment component, which consist primarily of SPIAs, supplemental contracts and structured settlements
PRT	Pension risk transfer
Policy loan	A loan to a policyholder under the terms of, and which is secured by, a policyholder's policy
RBC	Risk-based capital
Reserve liabilities	The sum of (a) interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverables, excluding policy loans ceded. Reserve liabilities also includes the reserves related to assumed modco agreements in order to appropriately match the costs incurred in the consolidated statements of income with the liabilities. Reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and therefore we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements
Rider reserves	Guaranteed living withdrawal benefits and guaranteed minimum death benefits reserves
RMBS	Residential mortgage-backed securities
RML	Residential mortgage loan
Sales	All money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers)
SPIA	Single premium immediate annuity
Surplus assets	Assets in excess of policyholder obligations, determined in accordance with the applicable domiciliary jurisdiction's statutory accounting principles
TAC	Total adjusted capital as defined by the model created by the NAIC
U.S. RBC Ratio	The CAL RBC ratio for AADE, our parent U.S. insurance company
VIE	Variable interest entity
VOBA	Value of business acquired

1. Business, Basis of Presentation and Significant Accounting Policies

Athene Holding Ltd. (AHL), a Bermuda exempted company, together with its subsidiaries (collectively, Athene, we, our, us, or the Company), is a leading retirement services company that issues, reinsures and acquires retirement savings products in all U.S. states, the District of Columbia and Germany.

We conduct business primarily through the following consolidated subsidiaries:

- Athene Life Re Ltd. (ALRe), a Bermuda exempted company to which AHL's other insurance subsidiaries and third party ceding companies directly and indirectly reinsure a portion of their liabilities;
- Athene USA Corporation, an Iowa corporation and its subsidiaries (Athene USA); and
- AGER Bermuda Holding Ltd. and its subsidiaries (AGER), which includes Athene Deutschland GmbH & Co. KG, a German partnership and its subsidiaries (ADKG).

In addition, we consolidate certain variable interest entities (VIEs), for which we determined we are the primary beneficiary, as discussed in *Note 4 - Variable Interest Entities*.

Basis of Presentation-We have prepared the accompanying condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and the United States Securities and Exchange Commission's rules and regulations for Form 10-Q and Article 10 of Regulation S-X. The accompanying condensed consolidated financial statements are unaudited and reflect all adjustments, consisting only of normal recurring items except as noted below, considered necessary for fair statement of the periods presented. All significant intercompany accounts and transactions have been eliminated. Interim operating results are not necessarily indicative of the results expected for the entire year.

The condensed consolidated balance sheet as of December 31, 2016 has been derived from the audited financial statements, but does not include all of the information and footnotes required by GAAP for complete financial statements. Therefore, these condensed consolidated financial statements should be read in conjunction with our revised audited consolidated financial statements included as Exhibit 99.1 to our Current Report on Form 8-K, filed on June 13, 2017. The preparation of financial statements requires the use of management estimates. Actual results may differ from estimates used in preparing the condensed consolidated financial statements.

During the quarter ended September 30, 2017, we recorded out-of-period adjustments that affected the condensed consolidated statements of income. These adjustments, related to DAC and VOBA amortization and actuarial reserves, increased consolidated income before taxes for the three and nine months ended September 30, 2017 by $13 million and $28 million, respectively. We evaluated these out-of-period adjustments and determined they were not material to the condensed consolidated financial statements for either the three or nine months ended September 30, 2017, or any other previously reported period.

Revisions-As part of our continuing initiative to improve controls in our business processes and confirm the accuracy of our data relating to blocks of businesses acquired from Aviva USA as well as deposits since the acquisition, we identified an error in May 2017 relating to the impact of certain inputs used to calculate certain actuarial balances, which had the result of misstating our net investment earned rate used in the amortization calculation of deferred acquisition costs and the change in future policy benefits. We have revised our condensed consolidated financial statements and notes for the three and nine months ended September 30, 2016 as a result of correcting this error and other immaterial errors. We assessed the materiality of these errors and concluded these errors are not material to the condensed consolidated financial statements as a whole. However, we elected to revise the condensed consolidated financial statements to increase their accuracy, as well as provide consistency and comparability with balances and activities to be reported in future periods.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

The following is a summary of the revisions on the condensed consolidated statements of income:

	Three months ended September 30, 2016		
(In millions, except per share data)	As Previously Reported	Revisions	As Adjusted

Adopted Accounting Pronouncements

Stock Compensation - Scope of Modification Accounting (ASU 2017-09)
The amendments in this update clarify and simplify when to apply modification accounting for a change to the terms or conditions of a share-based payment award. These amendments are required to be adopted prospectively to awards modified after the date of adoption. The amendments are effective January 1, 2018. Early adoption is permitted and we have elected to early adopt effective April 1, 2017. The adoption did not have an impact on our consolidated financial statements.

Receivables - Nonrefundable Fees and Other Costs (ASU 2017-08)
The amendments in this update shorten the amortization period for certain callable debt securities held at a premium to the earliest call date. These amendments are required to be adopted on a modified retrospective basis effective January 1, 2019. Early adoption is permitted and we have elected to early adopt effective January 1, 2017. The adoption did not have a material impact on our consolidated financial statements.

Business Combinations - Clarifying the Definition of a Business (ASU 2017-01)
The amendments in this update clarify the definition of a business with the objective of assisting entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill and consolidation. These amendments are required to be adopted prospectively to any transactions after the date of adoption. The amendments are effective January 1, 2018. Early adoption is permitted and we have elected to early adopt effective April 1, 2017. The adoption did not have an impact on our consolidated financial statements.

Consolidation - Interest Held through Related Parties under Common Control (ASU 2016-17)
This update amends the consolidation guidance to change how indirect interests in VIEs are evaluated by a reporting entity when determining whether or not it is the primary beneficiary of that VIE. The primary beneficiary of a VIE is the reporting entity that has a controlling financial interest in a VIE and, therefore, consolidates the VIE. A reporting entity has an indirect interest in a VIE if it has a direct interest in a related party that, in turn, has a direct interest in the VIE. Previously, if a single decision maker and its related parties were under common control, the single decision maker was required to consider indirect interests held through related parties to be the equivalent of direct interests in their entirety. The amendments change the evaluation of indirect interests to be considered on a proportionate basis. We adopted this standard effective January 1, 2017, and the adoption did not have a material effect on our consolidated financial statements.

Improvements to Employee Share-Based Payment Accounting (ASU 2016-09)
This update simplifies several aspects of the accounting for share-based payment award transactions, including income tax consequences, forfeitures and classification on the statement of cash flows. The standard requires entities to make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. We have elected to account for forfeitures when they occur. We adopted this standard effective January 1, 2017, and the adoption did not have a material effect on our consolidated financial statements.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We adopted this standard effective January 1, 2017, and the adoption did not have a material effect on our consolidated financial statements.

Derivatives and Hedging - Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We adopted this standard effective January 1, 2017, and the adoption did not have a material effect on our consolidated financial statements.

Derivatives and Hedging - Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We adopted this standard effective January 1, 2017, and the adoption did not have a material effect on our consolidated financial statements.

Recently Issued Accounting Pronouncements

Derivatives and Hedging - Targeted Improvements (ASU 2017-12)
The amendments in this update contain improvements to the financial reporting of hedging relationships that more closely reflect the economic results of an entity's risk management activities in its financial statements. Additionally, the amendments in this update make certain targeted improvements to simplify the application of hedge accounting. We will be required to adopt this standard effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Gains and Losses from the Derecognition of Nonfinancial Assets (ASU 2017-05)
The amendments in this update clarify the scope of asset derecognition guidance and accounting for partial sales of nonfinancial assets. We will be required to adopt this standard on a retrospective or modified retrospective basis effective January 1, 2018. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Intangibles - Simplifying the Test for Goodwill Impairment (ASU 2017-04)
The amendments in this update simplify the subsequent measurement of goodwill by eliminating the comparison of the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill to determine the goodwill impairment loss. With the adoption of this guidance, a goodwill impairment will be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of the goodwill allocated to that reporting unit. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. We will be required to adopt this standard prospectively effective January 1, 2020. Early adoption is permitted. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Revenue Recognition (ASU 2016-20, ASU 2016-12, ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14 and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guidance. ASU 2016-11 brings existing Securities and Exchange Commission (SEC) guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. ASU 2016-12 provides clarification on assessing collectability, presentation of sales tax, non-cash consideration and transition. ASU 2016-20 addresses necessary technical corrections and improvements to clarify codification amended by ASU 2014-09 within Topic 606. The revenue recognition updates replace all general and most industry-specific revenue recognition guidance, excluding insurance contracts, leases, financial instruments and guarantees, which have been scoped out of the update. Since the guidance does not apply to revenue on contracts accounted for under the financial instruments or insurance contracts standards, only a portion of our revenues are impacted by this guidance. Our remaining implementation efforts are focused on less than 0.3% of our revenues and our transition approach. We do not currently expect the adoption of this update to have a material impact on our consolidated financial statements.

Statement of Cash Flows - Restricted Cash (ASU 2016-18)
This update requires amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the consolidated statements of cash flows. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2018. Early adoption is permitted. The adoption of this update will require us to change the presentation on the consolidated statements of cash flows for restricted cash or restricted cash equivalents; however, we do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Income Taxes - Intra-Entity Transfers (ASU 2016-16)
This update requires the immediate recognition of current and deferred income tax effects of intra-entity transfers of assets, other than inventory. Currently, recognition of the income tax consequence is not recognized until the asset is sold to an outside party. We will be required to adopt this standard on a modified retrospective basis effective January 1, 2018. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Statement of Cash Flows (ASU 2016-15)
This update provides specific guidance to clarify how entities should classify certain cash receipts and cash payments on the statement of cash flows. The update also clarifies the application of the predominance principle when cash receipts and cash payments have aspects of more than one class of cash flows. We will be required to adopt this standard effective January 1, 2018. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Financial Instruments - Credit Losses (ASU 2016-13)
This update is designed to reduce complexity by limiting the number of credit impairment models used for different assets. The model will result in accelerated credit loss recognition on assets held at amortized cost, which includes our commercial and residential mortgage investments. The identification of credit-deteriorated securities will include all assets that have experienced a more-than-insignificant deterioration in credit since origination. Additionally, any changes in the expected cash flows of credit-deteriorated securities will be recognized immediately in the income statement. Available-for-sale (AFS) fixed maturity securities are not in scope of the new credit loss model, but will undergo targeted improvements to the current reporting model including the establishment of a valuation allowance for credit losses versus the current direct write down approach. We will be required to adopt this standard effective January 1, 2020. Early adoption is permitted effective January 1, 2019. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard on a modified retrospective basis effective January 1, 2019. Early adoption is permitted. Our implementation efforts are primarily focused on the review of existing lease contracts and assessing the impact of this guidance on our consolidated financial statements.

Financial Instruments - Recognition and Measurement (ASU 2016-01)
This update changes the current accounting for certain equity investments, the presentation of changes in the fair value of liabilities measured under the fair value option due to instrument-specific credit risk, and certain disclosures. For liabilities measured under the fair value option, changes in fair value attributable to instrument-specific credit risk will no longer affect net income, but will be recognized separately in OCI. Additionally, this update requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We currently recognize changes in fair value related to AFS equity securities in accumulated other comprehensive income (AOCI) on the consolidated balance sheets. We will be required to adopt this standard with a cumulative-effect adjustment to beginning retained earnings effective January 1, 2018. Refer to *Note 2 - Investments* for further information on the unrealized gains and losses of our AFS equity securities. We are currently evaluating the impact of this guidance on our consolidated financial statements.

ATHENE HOLDING LTD.

2. Investments

Available-for-sale Securities-Our AFS investment portfolio includes bonds, collateralized loan obligations (CLO), asset-backed securities (ABS), commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS), redeemable preferred stock, and equity securities. Additionally, it includes direct investments in affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo) where Apollo can exercise significant influence over the affiliates. These investments are presented as investments in related parties on the condensed consolidated balance sheets and separately disclosed below.

The following table represents the cost or amortized cost, gross unrealized gains and losses, fair value and other-than-temporary impairments (OTTI) in AOCI of our AFS investments by asset type:

	September 30, 2017				
(In millions)	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	OTTI in AOCI

Total AFS securities	9,510	(291)	6,903	(339)	16,413	(630)
Fixed maturity securities - related party						
CLO	68	-	100	(6)	168	(6)
ABS	-	-	56	(1)	56	(1)
Total fixed maturity securities - related party	68	-	156	(7)	224	(7)
Equity securities - related party	14	-	-	-	14	-
Total AFS securities - related party	82	-	156	(7)	238	(7)
Total AFS securities including related party	$ 9,592	$ (291)	$ 7,059	$ (346)	$ 16,651	$ (637)

As of September 30, 2017, we held 1,413 AFS securities that were in an unrealized loss position. Of this total, 432 were in an unrealized loss position longer than 12 months. As of September 30, 2017, we held one related party AFS security that was in an unrealized loss position less than 12 months. The unrealized losses on AFS securities can primarily be attributed to changes in market interest rates since acquisition. We did not recognize the unrealized losses in income as we intend to hold these securities and it is not more likely than not we will be required to sell a security before the recovery of its amortized cost.

Other-Than-Temporary Impairments-For the nine months ended September 30, 2017, we incurred $25 million of net OTTI, of which $6 million related to intent-to-sell impairments. These securities were impaired to fair value as of the impairment date. The remaining net OTTI of $19 million related to credit impairments, of which $9 million related to credit loss impairments that we impaired to fair value and did not bifurcate a portion of the impairment in AOCI. Any credit loss impairments not bifurcated in AOCI are excluded from the rollforward below.

The following table represents a rollforward of the cumulative amounts recognized on the condensed consolidated statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Beginning balance	$ 16	$ 32	$ 16	$ 22
Initial impairments - credit loss OTTI recognized on securities not previously impaired	4	-	10	8
Additional impairments - credit loss OTTI recognized on securities previously impaired	-	1	-	3
Reduction in impairments from securities sold, matured or repaid	(2)	(9)	(8)	(9)
Reduction for credit loss that no longer has a portion of the OTTI loss recognized in AOCI	(6)	-	(6)	-
Ending balance	$ 12	$ 24	$ 12	$ 24

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

Net Investment Income-Net investment income by asset class consists of the following:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
AFS securities				
Fixed maturity securities	$ 646	$ 563	$ 1,901	$ 1,703
Equity securities	3	2	7	6
Trading securities	50	59	154	184
Mortgage loans, net of allowances	98	93	273	264
Investment funds	55	65	175	122
Funds withheld at interest	35	22	105	47
Other	18	14	56	43
Investment revenue	905	818	2,671	2,369
Investment expenses	(85)	(75)	(244)	(232)
Net investment income	$ 820	$ 743	$ 2,427	$ 2,137

Investment Related Gains (Losses)-Investment related gains (losses) by asset class consists of the following:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
AFS fixed maturity securities				
Gross realized gains on investment activity	$ 31	$ 31	$ 94	$ 102
Gross realized losses on investment activity	(10)	(9)	(31)	(51)
Net realized investment gains on fixed maturity securities	21	22	63	51
Net realized investment gains (losses) on trading securities	(1)	28	45	93
Derivative gains	456	336	1,516	387
Other losses	(3)	(6)	(9)	(8)
Investment related gains (losses)	$ 473	$ 380	$ 1,615	$ 523

Proceeds from sales of AFS securities were $1,863 million and $972 million for the three months ended September 30, 2017 and 2016, respectively, and $4,629 million and $3,202 million for the nine months ended September 30, 2017 and 2016, respectively.

The change in unrealized gains and losses on trading securities we still held as of the respective period end resulted in unrealized gains of $18 million and $37 million during the three months ended September 30, 2017 and 2016, respectively, and unrealized gains of $90 million and $143 million during the nine months ended September 30, 2017 and 2016, respectively, which are included in net realized investment gains (losses) on trading securities in the table above. The change in unrealized gains and losses on related party trading securities we still held as of the respective period end resulted in related party unrealized gains of $2 million and $0 million during the three months ended September 30, 2017 and 2016, respectively, and related party unrealized gains of $2 million and losses of $23 million during the nine months ended September 30, 2017 and 2016, respectively, which are included in net realized investment gains (losses) on trading securities in the table above.

Purchased Credit Impaired (PCI) Investments-The following table summarizes our PCI investments:

	Fixed maturity securities		Mortgage loans	
(In millions)	September 30, 2017	December 31, 2016[3]	September 30, 2017	December 31, 2016
Contractually required payments[1]	$ 11,477	$ 11,202	$ 1,544	$ 424
Less: Cash flows expected to be collected[2]	(8,247)	(7,948)	(1,066)	(286)
Non-accretable difference	$ 3,230	$ 3,254	$ 478	$ 138
Cash flows expected to be collected[2]	$ 8,247	$ 7,948	$ 1,066	$ 286
Less: Amortized cost	(6,175)	(5,868)	(802)	(220)
Accretable difference	$ 2,072	$ 2,080	$ 264	$ 66
Fair value	$ 6,699	$ 6,049	$ 831	$ 221

[1] *Includes principal and accrued interest.*

[2] *Represents the undiscounted principal and interest cash flows expected.*

[3] *Prior period balances have been revised for immaterial misstatements to be comparable to current year balances.*

During the period, we acquired PCI investments with the following amounts at the time of purchase:

	Nine months ended September 30, 2017	
(In millions)	Fixed maturity securities	Mortgage loans
Contractually required principal and interest	$ 2,230	$ 1,194
Expected cash flows	1,502	835
Estimated fair value	1,131	609

The following table summarizes the activity for the accretable yield on PCI investments:

	Three months ended September 30, 2017		Nine months ended September 30, 2017	
(In millions)	Fixed maturity securities[1]	Mortgage loans	Fixed maturity securities[1]	Mortgage loans
Beginning balance	$ 2,098	$ 259	$ 2,080	$ 66
Purchases of PCI investments, net of sales	53	25	289	223
Accretion	(41)	(1)	(138)	(1)
Changes in expected cash flows	(38)	(19)	(159)	(24)
Ending balance	$ 2,072	$ 264	$ 2,072	$ 264

[1] *Prior period beginning balances have been revised for immaterial misstatements to be comparable to current year balances.*

Mortgage Loans-Mortgage loans, net of allowances, consists of the following:

(In millions)	September 30, 2017	December 31, 2016
Commercial mortgage loans	$ 5,503	$ 5,058
Commercial mortgage loans under development	-	74
Total commercial mortgage loans	5,503	5,132
Residential mortgage loans	942	338
Mortgage loans, net of allowances	$ 6,445	$ 5,470

We primarily invest in commercial mortgage loans on income producing properties including hotels, industrial properties and retail and office buildings. We diversify the commercial mortgage loan portfolio by geographic region and property type to reduce concentration risk. We evaluate mortgage loans based on relevant current information to confirm if properties are performing at a consistent and acceptable level to secure the related debt.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

The distribution of commercial mortgage loans, including those under development, net of valuation allowances, by property type and geographic region, is as follows:

	September 30, 2017		December 31, 2016	
(In millions, except for percentages)	Net Carrying Value	Percentage of Total	Net Carrying Value	Percentage of Total
Property type

Total commercial mortgage loans	$ 5,503	100.0%	$ 5,132	100.0%

Our residential mortgage loan portfolio includes first lien residential mortgage loans collateralized by properties located in the U.S. As of September 30, 2017, California, Florida and New York represented 33.3%, 15.6% and 6.2%, respectively, of the portfolio, and the remaining 44.9% represented all other states, with each individual state comprising less than 5% of the portfolio. As of December 31, 2016, California, Florida and New York represented 38.9%, 9.1% and 5.1%, respectively, of the portfolio, and the remaining 46.9% represented all other states, with each individual state comprising less than 5% of the portfolio.

Mortgage Loan Valuation Allowance-The assessment of mortgage loan impairments and valuation allowances is substantially the same for residential and commercial mortgage loans. The valuation allowance was $2 million as of September 30, 2017 and December 31, 2016. We did not record any material activity in the valuation allowance during the three or nine months ended September 30, 2017 or 2016.

Residential mortgage loans - The primary credit quality indicator of residential mortgage loans is loan performance. Nonperforming residential mortgage loans are 90 days or more past due and/or are in non-accrual status. As of September 30, 2017, $16 million of our residential mortgage loans were non-performing. As of December 31, 2016, all of our residential mortgage loans were performing.

Commercial mortgage loans - The following provides the aging of our commercial mortgage loan portfolio, including those under development, net of valuation allowances:

(In millions)	September 30, 2017	December 31, 2016
Current (less than 30 days past due)	$ 5,497	$ 5,111
Over 90 days past due	6	21
Total commercial mortgage loans	$ 5,503	$ 5,132

Loan-to-value and debt service coverage ratios are measures we use to assess the risk and quality of commercial mortgage loans other than those under development. Loans under development are not evaluated using these ratios as the properties underlying these loans are generally not yet income-producing and the value of the underlying property significantly fluctuates based on the progress of construction. Therefore, the risk and quality of loans under development are evaluated based on the aging and geographical distribution of such loans as shown above.

The loan-to-value ratio is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A loan-to-value ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The following represents the loan-to-value ratio of the commercial mortgage loan portfolio, excluding those under development, net of valuation allowances:

(In millions)	September 30, 2017	December 31, 2016
Less than 50%	$ 1,836	$ 1,787
50% to 60%	1,353	1,337
61% to 70%	1,902	1,401
71% to 100%	402	492
Greater than 100%	10	41
Commercial mortgage loans	$ 5,503	$ 5,058

The debt service coverage ratio, based upon the most recent financial statements, is expressed as a percentage of a property's net operating income to its debt service payments. A debt service ratio of less than 1.0 indicates a property's operations do not generate enough income to cover debt payments. The following represents the debt service coverage ratio of the commercial mortgage loan portfolio, excluding those under development, net of valuation allowances:

(In millions)	September 30, 2017	December 31, 2016
Greater than 1.20x	$ 4,992	$ 4,378
1.00x - 1.20x	233	353
Less than 1.00x	278	327
Commercial mortgage loans	$ 5,503	$ 5,058

Investment Funds-Our investment fund portfolio consists of funds that employ various strategies and include investments in real estate and other real assets, credit, private equity, natural resources and hedge funds. Investment funds typically meet the definition of variable interest entities and are discussed further in *Note 4 - Variable Interest Entities*.

3. Derivative Instruments

We use a variety of derivative instruments to manage risks, primarily equity, interest rate, credit, foreign currency and market volatility. See *Note 5 - Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	September 30, 2017			December 31, 2016		
	Notional	Fair Value		Notional	Fair Value	
(In millions)	Amount	Assets	Liabilities	Amount	Assets	Liabilities
Derivatives designated as hedges						
Foreign currency swaps	648	$ 1	$ 63	289	$ 11	$ 4
Interest rate swaps	302	-	-	302	-	14
Total derivatives designated as hedges		1	63		11	18
Derivatives not designated as hedges						
Equity options	30,323	1,957	10	26,822	1,336	-
Futures	19	8	1	-	9	-
Total return swaps	114	2	-	41	2	-

Interest sensitive contract liabilities	-	-	6,652	-	-	5,283
Total derivatives not designated as hedges		2,284	6,699		1,499	5,311
Total derivatives		$ 2,285	$ 6,762		$ 1,510	$ 5,329

Derivatives Designated as Hedges

Foreign currency swaps - We use foreign currency swaps to convert foreign currency denominated cash flows of an investment to U.S. dollars to reduce cash flow fluctuations due to changes in currency exchange rates. Certain of these swaps are designated and accounted for as cash flow hedges, which will expire by June 2044. During the three months ended September 30, 2017 and 2016, we had foreign currency swap losses of $31 million and $6 million, respectively, recorded in AOCI. During the nine months ended September 30, 2017 and 2016, we had foreign currency swap losses of $69 million and $13 million, respectively, recorded in AOCI. There were no amounts reclassified to income and no amounts deemed ineffective for the three and nine months ended September 30, 2017 and 2016. As of September 30, 2017, no amounts are expected to be reclassified to income within the next 12 months.

Interest rate swaps - We use interest rate swaps to reduce market risks from interest rate changes and to alter interest rate exposure arising from duration mismatches between assets and liabilities. Certain of these swaps entered into during the fourth quarter of 2016 are designated as fair value hedges. With an interest rate swap, we agree with another party to exchange the difference between fixed-rate and floating-rate interest amounts tied to an agreed-upon notional principal amount at specified intervals.

The following table represents the gains and losses on derivatives and the related hedged items in fair value hedge relationships, recorded in interest sensitive contract benefits on the condensed consolidated statements of income:

(In millions)	Three months ended September 30, 2017	Nine months ended September 30, 2017
Gains recognized on derivative	$ 2	$ 4
Losses recognized on hedged item	(3)	(4)
Ineffectiveness recognized on fair value hedges	$ (1)	$ -

Derivatives Not Designated as Hedges

Equity options - We use equity indexed options to economically hedge fixed indexed annuity products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specified market index, primarily the S&P 500. To hedge against adverse changes in equity indices, we enter into contracts to buy the equity indexed options within a limited time at a contracted price. The contracts are net settled in cash based on differentials in the indices at the time of exercise and the strike price.

Futures - Futures contracts are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. We enter into exchange-traded futures with regulated futures commission clearing brokers who are members of a trading exchange. Under exchange-traded futures contracts, we agree to purchase a specified number of contracts with other parties and to post variation margin on a daily basis in an amount equal to the difference in the daily fair values of those contracts.

Total return swaps - We purchase total rate of return swaps to gain exposure and benefit from a reference asset or index without ownership. Total rate of return swaps are contracts in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset or index, which includes both the income it generates and any capital gains.

Credit default swaps - Credit default swaps provide a measure of protection against the default of an issuer or allow us to gain credit exposure to an issuer or traded index. We use credit default swaps coupled with a bond to synthetically create the characteristics of a reference bond. These transactions have a lower cost and are generally more liquid relative to the cash market. We receive a periodic premium for these transactions as compensation for accepting credit risk.

Hedging credit risk involves buying protection for existing credit risk. The exposure resulting from the agreements, which is usually the notional amount, is equal to the maximum proceeds that must be paid by a counterparty for a defaulted security. If a credit event occurs on a reference entity, then a counterparty who sold protection is required to pay the buyer the trade notional amount less any recovery value of the security.

Variance swaps - We use variance swaps to hedge the growth in interest credited to the customer as a direct result of changes in the volatility of the specified market index, primarily the S&P 500. In a variance swap transaction, we agree to exchange future realized volatility for current implied volatility. This type of contract pays the difference between the realized variance and a predefined strike multiplied by a notional value.

Foreign currency forwards - We use foreign currency forward contracts to hedge certain exposures to foreign currency risk. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives - We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products.

The following is a summary of the gains (losses) related to derivatives not designated as hedges:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Equity options	$ 367	$ 197	$ 1,154	$ 105
Futures	(5)	(7)	(19)	(14)
Total return swaps	5	2	12	4
Foreign currency swaps	1	(1)	7	10
Interest rate swaps	2	(2)	1	(5)
Credit default swaps	-	1	1	-
Variance swaps	-	4	1	-
Foreign currency forwards	4	8	24	16
Embedded derivatives on funds withheld	82	134	335	271
Amounts recognized in investment related gains (losses)	456	336	1,516	387
Embedded derivatives in indexed annuity products[1]	(344)	(243)	(1,077)	(390)
Total gains (losses) for derivatives not designated as hedges	$ 112	$ 93	$ 439	$ (3)

[1] *Included in interest sensitive contract benefits.*

Credit Risk-We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

We manage credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties. Where possible, we maintain collateral arrangements and use master netting agreements that provide for a single net payment from one counterparty to another at each due date and upon termination. We have also established counterparty exposure limits, where possible, in order to evaluate if there is sufficient collateral to support the net exposure.

Collateral arrangements typically require the posting of collateral in connection with its derivative instruments. Collateral agreements often contain posting thresholds, some of which may vary depending on the posting party's financial strength ratings. Additionally, a decrease in our financial strength rating to a specified level can result in settlement of the derivative position. As of September 30, 2017 and December 31, 2016, we had $50 million and $25 million, respectively, of collateral pledged to counterparties.

The estimated fair value of our net derivative and other financial assets and liabilities after the application of master netting agreements and collateral were as follows:

		Gross amounts not offset on the condensed consolidated balance sheets				
(In millions)	Gross amount recognized[1]	Financial instruments[2]	Collateral received/pledged	Net amount	Off-balance sheet securities collateral[3]	Net amount after securities collateral
September 30, 2017						
Derivative assets	$ 1,982	$ (34)	$ (1,896)	$ 52	$ (19)	$ 33
Derivative liabilities	(92)	34	50	(8)	-	(8)
December 31, 2016						
Derivative assets	$ 1,370	$ (8)	$ (1,383)	$ (21)	$ (26)	$ (47)
Derivative liabilities	(40)	8	25	(7)	-	(7)

[1] *The gross amounts of recognized derivative assets and derivative liabilities are reported on the condensed consolidated balance sheets. As of September 30, 2017 and December 31, 2016, amounts not subject to master netting or similar agreements were immaterial.*

[2] *Represents amounts offsetting derivative assets and derivative liabilities that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative assets or gross derivative liabilities for presentation on the condensed consolidated balance sheets.*

[3] *For securities collateral received, we do not have the right to sell or re-pledge the collateral. As such, we do not record the securities on the condensed consolidated balance sheets.*

4. Variable Interest Entities

Our investment funds typically meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs-We consolidate AAA Investments (Co-Invest VI), L.P. (CoInvest VI), AAA Investments (Co-Invest VII), L.P. (CoInvest VII), AAA Investments (Other), L.P. (CoInvest Other), London Prime Apartments Guernsey Holdings Limited (London Prime), NCL Athene, LLC (NCL LLC) and Apollo Asia Sprint Co-Investment Fund, L.P. (Sprint), which are investment funds. We are the only limited partner or Class A member in these investment funds and receive all of the economic benefits and losses, other than management fees and carried interest, as applicable, paid to the general partner in each entity, or a related entity, which are related parties. We do not have any voting rights as limited partner and, as the limited partner or Class A member, do not solely satisfy the power criteria to direct the activities that significantly impact the economics of the VIE. However, the criteria for the primary beneficiary are satisfied by our related party group and because substantially all of the activities are conducted on our behalf, we consolidate the investment funds.

No arrangement exists requiring us to provide additional funding in excess of our committed capital investment, liquidity, or the funding of losses or an increase to our loss exposure in excess of our investment in the VIEs. We elected the fair value option for certain fixed maturity and equity securities, and investment funds, which are reported in the consolidated variable interest entity sections on the condensed consolidated balance sheets.

CoInvest VI, CoInvest VII and CoInvest Other were formed to make investments, including co-investments alongside private equity funds sponsored by Apollo. We received our interests in CoInvest VI, CoInvest VII and CoInvest Other as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., in order to provide a capital base to support future acquisitions. London Prime was formed for the purpose of investing in Prime London Ventures Limited, a Guernsey limited company, which purchases rental residential assets across prime central London.

CoInvest VII holds a significant investment in MidCap FinCo Limited (MidCap), which is included in investment funds of consolidated VIEs on the condensed consolidated balance sheets. We have purchased pools of loans sourced by MidCap and contemporaneously sold subordinated participation interests in the loans to a subsidiary of MidCap. As of September 30, 2017 and December 31, 2016, we had $14 million due to MidCap under the subordinated participation agreement which is reflected as a secured borrowing in other liabilities on the condensed consolidated balance sheets.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

During the third quarter of 2016, CoInvest VI contributed its largest investment, Norwegian Cruise Line Holdings Ltd. (NCLH) shares, to a newly formed entity, NCL LLC, in exchange for 100% of the membership interests in this entity. Subsequent to this contribution, CoInvest VI distributed its Class A membership interests in NCL LLC to us and the Class B membership interests in NCL LLC to the general partner of CoInvest VI. NCL LLC is subject to the same management fees, selling restrictions with respect to shares of NCLH, and carried interest calculation as CoInvest VI. NCL LLC classifies its NCLH shares as AFS equity securities. We are the primary beneficiary and consolidate NCL LLC, as substantially all of its activities are conducted on our behalf.

During the first quarter of 2017, we acquired a 100% limited partnership interest in Sprint, an entity formed to make a co-investment alongside private equity funds sponsored by Apollo. The underlying investment is a structured credit facility on a nearly completed skyscraper in Southeast Asia. We are the primary beneficiary and consolidate Sprint, as substantially all of its activities are conducted on our behalf.

We previously consolidated 2012 CMBS-I Fund L.P., a Delaware limited partnership, and 2012 CMBS-II Fund L.P., a Delaware limited partnership (collectively, CMBS Funds). The CMBS Funds were originally formed with the objective of generating high risk-adjusted investment returns by investing primarily in a portfolio of eligible CMBS and using leverage through repurchase agreements treated as collateralized financing. During the third quarter of 2016, the CMBS Funds each sold investments to fully settle the borrowings under their respective repurchase agreements of $500 million. The remaining investments of $167 million were distributed directly to us. During the fourth quarter of 2016, the CMBS Funds were fully dissolved.

Trading securities - *related party* - Trading securities represents investments in fixed maturity and equity securities with changes in fair value recognized in investment related gains (losses) within revenues of consolidated variable interest entities on the condensed consolidated statements of income. The change in unrealized gains and losses on trading securities we still held as of the respective period end resulted in unrealized gains of $8 million and $2 million for the three months ended September 30, 2017 and 2016, respectively, and unrealized gains of $14 million and losses of $51 million for the nine months ended September 30, 2017 and 2016, respectively. Trading securities held by CoInvest VI, CoInvest VII and CoInvest Other are related party investments because Apollo affiliates exercise significant influence over the operations of these investees.

Investment funds - *including related party* - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs; however, our consolidated VIEs are not considered the primary beneficiary of these investment funds. Changes in fair value for certain of these investment funds are included in investment related gains (losses) within revenues of consolidated variable interest entities on the condensed consolidated statements of income. Investment funds held by CoInvest VII, CoInvest Other and Sprint are related party investments as they are sponsored or managed by Apollo affiliates.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

Fair Value-See *Note 5 - Fair Value* for a description of the levels of our fair value hierarchy and our process for determining the level we assign our assets and liabilities carried at fair value.

The following represents the hierarchy for assets and liabilities of our consolidated VIEs measured at fair value on a recurring basis:

	September 30, 2017				
(In millions)	Total	NAV[1]	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities					
Investments					
AFS securities					
Equity securities	$ 173	$ -	$ 173	$ -	$ -
Trading securities					
Fixed maturity securities	50	-	-	-	50
Equity securities	145	-	116	-	29
Investment funds	562	529	-	-	33
Cash and cash equivalents	1	-	1	-	-
Total assets of consolidated VIEs measured at fair value	$ 931	$ 529	$ 290	$ -	$ 112

[1] *Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.*

	December 31, 2016				
(In millions)	Total	NAV[1]	Level 1	Level 2	Level 3
Assets of consolidated variable interest entities					
Investments					
AFS securities					
Equity securities	$ 161	$ -	$ 161	$ -	$ -
Trading securities					
Fixed maturity securities	50	-	-	-	50
Equity securities	117	-	74	-	43
Investment funds[2]	562	524	-	-	38
Cash and cash equivalents	14	-	14	-	-
Total assets of consolidated VIEs measured at fair value	$ 904	$ 524	$ 249	$ -	$ 131

[1] *Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.*

[2] *Prior period balances have been revised for immaterial misstatements to be comparable to current year balances.*

Fair Value Valuation Methods - Refer to *Note 5 - Fair Value* for the valuation methods used to determine the fair value of AFS securities, trading securities, investment funds and cash and cash equivalents.

[2] *Prior period balances have been revised for immaterial misstatements to be comparable to current year balances.*

There were no transfers between Level 1 or Level 2 during the three and nine months ended September 30, 2017 and 2016.

Significant Unobservable Inputs - For certain Level 3 trading securities and investment funds, the valuations have significant unobservable inputs for comparable multiples and weighted average cost of capital rates applied in the valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are multiplied by the underlying investment's earnings before interest, tax, depreciation and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers.

For other Level 3 trading securities, valuations are performed using a discounted cash flow model. For a discounted cash flow model, the significant input is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. The discount rate is determined by considering the weighted average cost of capital calculation of companies in similar industries with comparable debt to equity ratios.

Fair Value Option - The following represents the gains (losses) recorded for instruments within the consolidated VIEs for which we have elected the fair value option:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Trading securities				
Fixed maturity securities	$ -	$ (1)	$ 1	$ (1)
Equity securities	7	(33)	12	(77)
Investment funds	-	23	5	31
Total gains (losses)	$ 7	$ (11)	$ 18	$ (47)

Fair Value of Financial Instruments Not Held at Fair Value - Assets of consolidated variable interest entities includes $31 million and $11 million of investment funds accounted for under the equity method and not carried at fair value as of September 30, 2017 and December 31, 2016, respectively; however, the carrying amount approximates fair value.

Commitments and Contingencies - Assets of CoInvest VI included equity investments in publicly traded shares of Caesars Entertainment Corporation (CEC) and Caesars Acquisition Company (CAC). We received the CEC and CAC shares as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., in order to provide a capital base to support future acquisitions. Claims had been pending (which now have been dismissed with prejudice) against CEC, CAC and/or others, related to certain guaranties issued for debt of Caesars Entertainment Operating Company, Inc. (CEOC) and/or certain transactions involving CEOC and certain of its subsidiaries (collectively, Debtors), CEC, CAC and others. CEC and the Debtors announced on or about September 26, 2016 that CEC and CEOC had received confirmations from representatives of CEOC's major creditor groups of those groups' support for a term sheet that describes the key economic terms of a proposed consensual chapter 11 plan for the Debtors. The plan, containing such terms and further including such other terms respecting, among other things, the merger of CAC into CEC, that CoInvest VI and others will not retain their pre-merger CEC shares, that CoInvest VI and others will retain the value of their CAC shares when receiving shares in the merged CEC, and that CoInvest VI and others will receive releases to the fullest extent permitted by law, was confirmed by the Bankruptcy Court by order dated January 17, 2017. Conditions precedent to the effective date of the plan included regulatory approvals from the various gaming regulators, CEC and CAC shareholders' approval of the proposed merger between CEC and CAC with CEC being the surviving entity, and securing required financings. All of the conditions precedent to the effective date of the plan were fulfilled, and the plan became effective on October 6, 2017. As of September 30, 2017, CoInvest VI recorded a liability of $42 million for the entire carrying value of its pre-merger CEC shares. Also as of September 30, 2017, CoInvest VI's investment in CAC was carried at its fair value of $72 million. On or about October 6, 2017, CoInvest VI received 5,465,733 shares in the merged CEC derived from the value of CoInvest VI's investment in CAC.

Non-Consolidated Securities and Investment Funds-We invest in certain other entities meeting the definition of a VIE or voting interest entity (VOE). We do not consolidate VIEs for which we do not meet the criteria of primary beneficiary as described below. We also do not consolidate VOEs for which we do not have control.

Fixed Maturity Securities - We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the condensed consolidated balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by GAAP, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments and are held at fair value on the balance sheet and classified as AFS or trading.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

Investment funds - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs or VOEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements. Investment funds managed by unrelated parties and classified as VOEs are not consolidated as we do not own a majority voting interest and have no other substantive rights that would provide control.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined we are not under common control, as defined by GAAP, with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option. For non-consolidated investment funds where we are not able to exercise significant influence, we elect the fair value option. Our investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management.

Our risk of loss associated with our non-consolidated VIEs and VOEs is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to our initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) AFS securities and other investments are limited to cost or amortized cost; and (4) trading securities are limited to carrying value.

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs and VOEs:

	September 30, 2017		December 31, 2016	
(In millions)	Carrying Value	Maximum Loss Exposure	Carrying Value	Maximum Loss Exposure

Ownership Percentage		
Greater than 3% - 49%	$ 562	$ 562
3% or less	154	99
Fair value option investment funds	$ 716	$ 661

5. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

Refer to *Note 4 - Variable Interest Entities* for fair value disclosures associated with consolidated VIEs.

Fair Value Valuation Methods-We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity - We obtain the fair value for most marketable securities without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, trading activity, credit quality, issuer spreads, bids, offers and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities - Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as commercial pricing services or brokers and are classified as Level 2 or 3.

Mortgage loans - Mortgage loans for which we have elected the fair value option or those held for sale are carried at fair value. We estimate fair value on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Funds withheld (embedded derivative) - We estimate the fair value of the embedded derivative based on the change in the fair value of the assets supporting the funds withheld payable under the combined coinsurance, modco and coinsurance funds withheld reinsurance agreements. As a result, the fair value of the embedded derivative is classified as Level 2 or 3 based on the valuation methods used for the assets held in trust supporting the reinsurance agreements.

Derivatives - Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlation of the inputs. We consider and incorporate counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents - The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) - Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with economic assumptions and actuarial assumptions for policyholder behavior.

Unit-linked contracts - Unit-linked contracts are valued based on the fair value of the investments supporting the contract. The underlying investments are trading securities comprised primarily of mutual funds. The valuations of these are based on quoted market prices for similar assets and are classified as Level 2, resulting in a corresponding classification for the unit-linked contracts.

AmerUs Closed Block - We elected the fair value option for the future policy benefits liability in the AmerUs Closed Block. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's cost to hold capital in excess of existing liabilities on the closed block. This component uses a present value of future cash flows, which includes investment earnings and policyholder liability movements. Unobservable inputs include estimates for these items. The target surplus as a percentage of statutory reserves is 3.85% based on the statutory risk-based capital ratio applicable to this block of business. The AmerUs Closed Block policyholder liabilities and any corresponding reinsurance recoverable are classified as Level 3.

ILICO Closed Block - We elected the fair value option for the ILICO Closed Block. Our valuation technique is to set the fair value of policyholder liabilities equal to the fair value of assets. There is an additional component which captures the fair value of the open block's obligations to the closed block business. This component uses the present value of future cash flows. The cash flows include commissions, administrative expenses, reinsurance premiums and benefits, and an explicit cost of capital. Unobservable inputs include estimates for these items. The explicit cost of capital assumption is 9% of required capital, post tax. A margin of 8.94% is included in the discount rates to reflect the business risk. An additional 0.25% is included to reflect non-performance risk. The ILICO Closed Block policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Universal life liabilities and other life benefits - We elected the fair value option for certain blocks of universal and other life business ceded to Global Atlantic Financial Group Limited (together with its subsidiaries, Global Atlantic). We use a present value of liability cash flows. Unobservable inputs include estimates of mortality, persistency, expenses, premium payments and a risk margin used in the discount rates that reflects the riskiness of the business. The risk margin was 0.09%. These universal life policyholder liabilities and corresponding reinsurance recoverable are classified as Level 3.

Fair Value Option-The following represents the gains (losses) recorded for instruments for which we have elected the fair value option:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Trading securities	$ (1)	$ 28	$ 45	$ 93
Mortgage loans	(1)	(1)	(1)	(1)
Investment funds	5	4	19	4
Future policy benefits	5	(28)	(10)	(129)
Total gains (losses)	$ 8	$ 3	$ 53	$ (33)

Gains and losses on trading securities are recorded in investment related gains (losses) on the condensed consolidated statements of income. For fair value option mortgage loans, we record interest income in net investment income and subsequent changes in fair value in investment related gains (losses) on the condensed consolidated statements of income. Gains and losses related to investment funds, including related party investment funds, are recorded in net investment income on the condensed consolidated statements of income. We record the change in fair value of future policy benefits to future policy and other policy benefits on the condensed consolidated statements of income.

The following summarizes information for fair value option mortgage loans:

(In millions)	September 30, 2017	December 31, 2016
Unpaid principal balance	$ 40	$ 42
Mark to fair value	2	2
Fair value	$ 42	$ 44

There were no fair value option mortgage loans 90 days or more past due as of September 30, 2017 and December 31, 2016.

Transfers Between Levels-Transfers into Level 3 generally represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the increased volatility, which was reflected in vendor prices obtained for individual securities. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 generally represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by decreased volatility, which was reflected in vendor prices obtained for individual securities. Additionally, changes in pricing sources also led to securities transferring into Level 2.

Transfers into or out of any level are assumed to occur at the end of the period. For the three and nine months ended September 30, 2017 and 2016, there were no transfers between Level 1 and Level 2.

Significant Unobservable Inputs-Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS securities, trading securities, mortgage loans and certain derivatives, as well as embedded derivatives in liabilities. Additional significant unobservable inputs are described below.

Fixed maturity securities - For certain fixed maturity securities, internal models are used to calculate the fair value. We use a discounted cash flow approach. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or as a result of other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. As of September 30, 2017, discounts ranged from 2% to 6%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Interest sensitive contract liabilities - embedded derivative - Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk - For contracts we issue, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For contracts reinsured through funds withheld reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget - We assume future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior - We regularly review the lapse and withdrawal assumptions (surrender rate). These are based on our initial pricing assumptions updated for actual experience. Actual experience may be limited for recently issued products.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

The following summarizes the unobservable inputs for the embedded derivatives of fixed indexed annuities:

	September 30, 2017				
(In millions, except for percentages)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Interest sensitive contract liabilities - fixed indexed annuities embedded derivatives	$ 6,652	Option budget method	Non-performance risk	0.3% - 1.3%	Decrease
			Option budget	0.7% - 3.7%	Increase
			Surrender rate	0.0% - 19.6%	Decrease

	December 31, 2016				
(In millions, except for percentages)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Interest sensitive contract liabilities - fixed indexed annuities embedded derivatives	$ 5,283	Option budget method	Non-performance risk	0.7% - 1.5%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0.0% - 16.3%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value-The following represents our financial instruments not carried at fair value on the condensed consolidated balance sheets:

		September 30, 2017		December 31, 2016	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets					
Mortgage loans	3	$ 6,403	$ 6,568	$ 5,426	$ 5,560
Investment funds	NAV[1]	620	620	590	590
Policy loans	2	571	571	602	602
Funds withheld at interest	3	6,661	6,661	6,398	6,398
Other investments	3	77	77	81	81
Investments in related parties					
Investment funds	NAV[1]	1,303	1,303	1,198	1,198
Other investments	3	238	260	237	262
Total assets not carried at fair value		$ 15,873	$ 16,060	$ 14,532	$ 14,691
Liabilities					
Interest sensitive contract liabilities	3	$ 31,328	$ 30,932	$ 27,628	$ 26,930
Funds withheld liability	2	376	376	374	374
Total liabilities not carried at fair value		$ 31,704	$ 31,308	$ 28,002	$ 27,304

[1] *Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.*

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we carry at fair value. The financial instruments presented above are reported at carrying value on the condensed consolidated balance sheets; however, in the case of policy loans, funds withheld at interest and liability, and other investments, the carrying amount approximates fair value.

Investment in related parties - Other investments - The fair value of related party other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities - The carrying and fair value of interest sensitive contract liabilities above includes fixed indexed and traditional fixed annuities without mortality or morbidity risks, funding agreements and payout annuities without life contingencies. The embedded derivatives within fixed indexed annuities without mortality or morbidity risks are excluded, as they are carried at fair value. The valuation of these investment contracts is based on discounted cash flow methodologies using significant unobservable inputs. The estimated fair value is determined using current market risk-free interest rates, adding a spread to reflect our nonperformance risk and subtracting a risk margin to reflect uncertainty inherent in the projected cash flows.

6. Reinsurance

During the nine months ended September 30, 2017, we novated certain open blocks of business ceded to Global Atlantic, in accordance with the terms of the coinsurance and assumption agreement. As a result of the novation, interest sensitive contract liabilities decreased $278 million, future policy benefits decreased $26 million, policy loans decreased $7 million, and reinsurance recoverable decreased $297 million.

7. Deferred Acquisition Costs, Deferred Sales Inducements and Value of Business Acquired

The following represents a rollforward of deferred acquisition costs (DAC), deferred sales inducements (DSI) and value of business acquired (VOBA):

(In millions)	DAC	DSI	VOBA	Total
Balance at December 31, 2016	$ 1,142	$ 462	$ 1,336	$ 2,940
Additions	371	121	-	492
Unlocking	13	4	(1)	16
Amortization	(142)	(46)	(121)	(309)
Impact of unrealized investment (gains) losses	(90)	(36)	(110)	(236)
Balance at September 30, 2017	$ 1,294	$ 505	$ 1,104	$ 2,903

(In millions)	DAC	DSI	VOBA	Total
Balance at December 31, 2015	$ 705	$ 320	$ 1,627	$ 2,652
Additions	449	145	-	594
Unlocking	(12)	(3)	(23)	(38)
Amortization	(76)	(16)	(99)	(191)
Impact of unrealized investment (gains) losses	(81)	(39)	(207)	(327)
Balance at September 30, 2016	$ 985	$ 407	$ 1,298	$ 2,690

8. Common Stock

During the nine months ended September 30, 2017, a total of 42,260,915 Class B shares were converted to Class A shares, primarily in connection with two public follow-on offerings that included sales by holders of Class B shares, at which time the shares automatically converted to Class A common shares. In connection with each follow-on offering, AP Alternative Assets, L.P. distributed Class B shares to its unitholders and certain of such unitholders participated in the applicable follow-on offering. To the extent that such shares were distributed to unitholders other than a member of the Apollo Group (as defined by our bye-laws), such shares automatically converted to Class A shares. We did not sell any shares in the offerings.

Stock-based Compensation-Stock-based compensation expense was $11 million and $47 million for the three months ended September 30, 2017 and 2016, respectively, and $40 million and $61 million for the nine months ended September 30, 2017 and 2016, respectively. As of September 30, 2017, the stock-based compensation plans had unrecognized compensation expense of $39 million. The cost is expected to be recognized over a weighted-average period of 1.2 years.

Employee Stock Purchase Plan - Eligible employees may participate in our 2017 Employee Stock Purchase Plan (ESPP), which provides the opportunity to purchase our Class A shares at a discount from the market price through payroll deductions. Pursuant to the ESPP, employees are permitted to purchase shares at a price equal to 85% of the fair value of such shares as determined by reference to the closing price of our Class A shares on the New York Stock Exchange on the last day of the relevant purchase period. Under the ESPP we may make available for sale up to 3,800,000 Class A shares over the term of the ESPP, which may extend for up to 10 years. As of September 30, 2017, we had not sold any shares under the ESPP.

Table of Contents

Basic	$ 5.05	$ 5.05	$ 5.05	$ 5.05	$ 5.05	$ 5.05
Diluted	$ 5.00	$ 5.05	$ 5.05	$ 3.26	$ 2.27	$ 1.91

[1] *Calculated using whole figures.*

(In millions, except share and per share data)	Nine months ended September 30, 2016	
	Class A	Class B
Net income available to AHL shareholders - basic and diluted	$ 108	$ 296
Basic weighted average shares outstanding	49,960,549	135,963,975
Dilutive effect of stock compensation plans	92,338	-
Diluted weighted average shares outstanding	50,052,887	135,963,975
Earnings per share[1]		
Basic	$ 2.18	$ 2.18
Diluted	$ 2.17	$ 2.18

[1] *Calculated using whole figures.*

We use the two-class method for allocating net income available to AHL shareholders to each class of our common stock. Our Class M shares do not become eligible to participate in dividends until a return of investment (ROI) condition has been met for each class. Once eligible, each class of our common stock has equal dividend rights. Prior to the fourth quarter of 2016, the ROI condition had not been met for any of our Class M shares and, as a result, no earnings were attributable to those classes. In conjunction with our IPO in the fourth quarter of 2016, the ROI condition for Class M-1 was met. The ROI conditions were subsequently met for Class M-2 on March 28, 2017, and for Class M-3 and Class M-4 on April 20, 2017. For purposes of calculating basic weighted average shares outstanding and the allocation of basic income, shares are deemed to be participating in earnings for only the portion of the period after the condition is met. However, as shares are considered dilutive as of the beginning of the period, the resulting diluted EPS is comparatively lower if the ROI condition is met after the beginning of the period than it would have been had the ROI condition been met at the beginning of the period.

Dilutive shares are calculated using the treasury stock method. For Class A common shares, this method takes into account shares that can be settled into Class A common shares, net of a conversion price. The diluted EPS calculations for Class A shares excluded the following shares, restricted stock units (RSUs) and options:

	Three months ended September 30,		Nine months ended September 30,	
	2017	2016	2017	2016
Antidilutive shares, RSUs and options excluded from diluted EPS calculation	79,931,099	135,963,975	73,016,963	135,963,975
Shares, RSUs and options excluded from diluted EPS calculation as a performance condition had not been met	187,046	-	1,425,926	-
Shares, RSUs and options excluded from diluted EPS calculation as issuance restrictions had not been satisfied as of the end of the period	-	12,720,694	-	12,720,694
Total Shares, RSUs and options excluded from diluted EPS calculation	80,118,145	148,684,669	74,442,889	148,684,669

Note: Shares, RSUs and options are as of period end.

10. Accumulated Other Comprehensive Income

11. Income Taxes

Our effective tax rates were 7% and (232)% for the three months ended September 30, 2017 and 2016, respectively, and 5% and (22)% for the nine months ended September 30, 2017, and 2016, respectively. Our effective tax rates may vary period-to-period depending upon the relationship of income and loss subject to tax compared to consolidated income and loss before income taxes. Our prior period effective tax rates reflect the significant effect of releasing $102 million of deferred tax valuation allowance. During the third quarter of 2016, we identified a tax plan that, when implemented, will allow us to use a significant portion of the U.S. non-life insurance companies' net operating losses, which are scheduled to expire beginning in 2022, and other deductible temporary differences. As a result, we released the corresponding deferred tax valuation allowance in the third quarter of 2016, as it is more likely than not that these attributes will be realized.

The Internal Revenue Service is currently auditing the 2013 consolidated tax return filed by Athene USA Corporation, and recently initiated a limited scope audit of the 2015 consolidated tax return filed by Athene Annuity & Life Assurance Company. No material proposed adjustments have been issued with respect to either exam.

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, we will be exempted from taxation until the year 2035.

12. Related Parties

Athene Asset Management

Investment related expenses - Substantially all of our investments, with the exception of the investments of ADKG, are managed by Athene Asset Management, L.P. (AAM), a subsidiary of AGM. AAM provides direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services for our investment portfolio, including investment compliance, tax, legal and risk management support. As of September 30, 2017, AAM directly managed $59,315 million of our investment portfolio assets, of which 89% are designated one or two (the two highest designations) by the National Association of Insurance Commissioners (NAIC).

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

For the services it renders, AAM earns a fee on all assets managed in accounts owned by or related to us, including sub-advised assets, but excluding assets of ADKG and certain other limited exceptions. Additionally, AAM recharges the sub-advisory fees it incurs with respect to our sub-advised assets to us. Historically, AAM generally earned an annual fee of 0.40% of assets under management. In the second quarter of 2017, following shareholder approval of an amendment to our bye-laws, we entered into the Fifth Amended and Restated Fee Agreement (Revised Fee Agreement), retroactive to January 1, 2017. The Revised Fee Agreement amended certain fee arrangements we previously had in place with AAM to provide for, among other things, an annual fee of 0.30% (reduced from 0.40%) on all assets that Apollo manages in accounts owned by us in the U.S. and Bermuda or in accounts supporting reinsurance ceded to our U.S. and Bermuda subsidiaries by third-party insurers (North American Accounts) in excess of $65,846 million (the level of assets in the North American Accounts as of December 31, 2016). The fee to be paid by us to AAM on the first $65,846 million of assets in the North American Accounts remains 0.40% per year, subject to certain discounts and exceptions.

For certain assets which require specialized sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. AAM has entered into Master Sub-Advisory Agreements (MSAAs) with certain Apollo affiliates to sub-advise AAM with respect to a portion of our assets, with the fees recharged to us, in addition to the gross fee paid to AAM as described above. The MSAAs cover services rendered by Apollo-affiliated sub-advisors relating to the following investments:

(In millions, except for percentages)	September 30, 2017	December 31, 2016
Fixed maturity securities		
U.S. state, municipal and political subdivisions	$ -	$ 5
Foreign governments	153	149
Corporate	2,648	2,032
CLO	5,021	4,727
ABS	803	911
CMBS	869	975
Mortgage loans	2,284	1,767
Investment funds	25	23
Trading securities	119	126
Funds withheld at interest	1,762	1,682
Other investments	77	81
Total assets sub-advised by Apollo affiliates	$ 13,761	$ 12,478
Percent of assets sub-advised by Apollo affiliates to total AAM-managed assets	19%	19%

During the second quarter of 2017, AAM and certain other Apollo affiliates entered into addendums to the MSAAs currently in effect, pursuant to which, with limited exceptions, Apollo will earn 0.40% per year on all assets in the North American Accounts explicitly sub-advised by Apollo up to $10,000 million, 0.35% per year on all assets in such accounts explicitly sub-advised by Apollo in excess of $10,000 million up to $12,441 million (the level of fee-paying sub-advised assets in the North American Accounts at December 31, 2016), 0.40% per year on all assets in such accounts explicitly sub-advised by Apollo in excess of $12,441 million up to $16,000 million, and 0.35% per year on all assets in such accounts explicitly sub-advised by Apollo in excess of $16,000 million. The addendums were retroactive to January 1, 2017.

Apollo Asset Management Europe

ADKG has an investment advisory agreement with Apollo Asset Management Europe (together with certain of its affiliates, AAME), also a subsidiary of AGM. AAME provides advisory services for all of ADKG's investment portfolio other than operating cash, mortgage loans secured by residential and commercial properties that are not identified and advised by AAME, and assets related to unit-linked policies. Also excluded are assets held in German special investment funds managed or advised by Apollo, AAM and any of the respective affiliates of Apollo, AAM or AAME, to the extent the entity receives a management or advisory fee in connection with the fund. In providing these services, AAME has access to Apollo's European expertise and capabilities. The ADKG investments sub-advised by AAME consist primarily of corporate and sovereign bonds, as compared to the more diverse range of assets managed by AAM or those held in the German special investment funds. As compensation for the investment advisory services rendered, AAME receives a fee of 0.10% per year on the assets it sub-advises. Affiliates of AAME receive an advisory fee of 0.35% per year on certain German special investment funds and our investment in a sub-fund of Apollo Capital Efficient Fund I (ACE fund), as well as a pro rata share of operating expenses up to 0.30% on the ACE fund. As of September 30, 2017 and December 31, 2016, the German special investment funds totaled $1,050 million and $258 million, respectively, and the ACE fund totaled $96 million and $84 million, respectively. The fees incurred for management of these funds are included in sub-advisory fees in the table below.

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

The following represents the assets sub-advised by AAME:

(In millions)	September 30, 2017	December 31, 2016
Fixed maturity securities		
Foreign governments	$ 2,095	$ 2,062
Corporate	1,216	1,567
Equity securities	53	187
Investment funds	38	34
Policy loans	6	6
Real estate	621	541
Other investments	169	153
Cash and cash equivalents	31	25
Total assets sub-advised by AAME	$ 4,229	$ 4,575

The following summarizes the asset management fees and sub-advisory fees we have incurred related to AAM, AAME and other Apollo affiliates:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Asset management fees	$ 67	$ 61	$ 193	$ 176
Sub-advisory fees	14	12	42	50

The management and sub-advisory fees are included within net investment income on the condensed consolidated statements of income. As of September 30, 2017 and December 31, 2016, the management fees payable was $34 million and $28 million, respectively, and the sub-advisory fees payable was $17 million and $11 million, respectively. Both the management and sub-advisory fees payables are included in other liabilities on the condensed consolidated balance sheets.

The investment management or advisory agreements with AAM or AAME have no stated term and any party can terminate upon notice. However, our bye-laws provide that we will not exercise our termination rights under the agreements until October 31, 2018 or any annual anniversary thereafter (each such date, an IMA Termination Election Date) and any termination thereon requires the approval of two-thirds of our Independent Directors (as defined in the bye-laws) and prior written notice thereof to Apollo of at least 30 days. If the Independent Directors make such election and such notice is timely delivered, the termination will be effective on the second anniversary of the applicable IMA Termination Election Date (an IMA Termination Effective Date). Notwithstanding the foregoing, (1) the Independent Directors may only elect to terminate an investment management agreement or advisory agreement on an IMA Termination Election Date if two-thirds of the Independent Directors determine in their sole discretion acting in good faith that either (i) there has been unsatisfactory long-term performance materially detrimental to us by Apollo or (ii) the fees being charged by Apollo are unfair and excessive compared to a comparable asset manager (provided, that in either case such Independent Directors must deliver notice of any such determination to Apollo and Apollo shall have until the applicable IMA Termination Effective Date to address such concerns, and provided, further, that in the case of such a determination that the fees being charged by Apollo are unfair and excessive, Apollo has the right to lower its fees to match the fees of such comparable asset manager) and (2) upon the determination by two-thirds of the Independent Directors, we may also terminate an investment management agreement or advisory agreement with Apollo as a result of either (i) a material violation of law relating to Apollo's advisory business, or (ii) Apollo's gross negligence, willful misconduct or reckless disregard of its obligations under the relevant agreement, and in either case the delivery at least 30 days' prior written notice to Apollo of such termination and such termination will be effective at the end of such 30-day period.

We have a management investment committee, which includes members of our senior management and reports to the risk committee of our board of directors. The committee focuses on strategic decisions involving our investment portfolio, such as approving investment limits, new asset classes and our allocation strategy, reviewing large asset transactions, as well as monitoring our credit risk, and the management of our assets and liabilities.

A significant voting interest in the Company is held by shareholders who are members of the Apollo Group, as defined in our bye-laws. Also, James Belardi, our Chief Executive Officer, is also an employee of, and receives substantial remuneration from acting as Chief Executive Officer of, AAM, and owns a 5% profits interest in AAM. Additionally, five of the twelve members of our board of directors are employees of or consultants to Apollo (including Mr. Belardi). In order to protect against potential conflicts of interest resulting from transactions into which we have entered and will continue to enter into with the Apollo Group, our bye-laws created a conflicts committee consisting of three of our directors who are not officers or employees of any member of the Apollo Group. The conflicts committee reviews and a majority of the committee members must approve material transactions between us and the Apollo Group, subject to certain exceptions.

Other related party transactions-We have a loan purchase agreement with AmeriHome Mortgage Company, LLC (AmeriHome), an investee of A-A Mortgage, an equity method investee. The agreement allows us to purchase residential mortgage loans which they have purchased from correspondent sellers and pooled for sale in the secondary market. AmeriHome retains the servicing rights to the sold loans. We purchased $21 million and $19 million of residential mortgage loans under this agreement during the nine months ended September 30, 2017 and 2016, respectively.

13. Commitments and Contingencies

Contingent Commitments-We had commitments to make investments, primarily capital contributions to investment funds, exclusive of AGER commitments as discussed below, of $1,761 million and $962 million as of September 30, 2017 and December 31, 2016, respectively. We expect most of our current commitments will be invested over the next five years; however, these commitments could become due any time upon counterparty request.

On April 14, 2017 (Subscription Date), in connection with a private offering, AGER entered into subscription agreements with AHL, certain affiliates of AGM and a number of other third-party investors pursuant to which AGER secured commitments from such parties to purchase new common shares in AGER (AGER Offering). AHL's capital commitment includes the valuation of the AGER Group (comprised of our European operations which includes ADKG) at approximately €90 million, which approximated our invested capital in the AGER Group on the Subscription Date. Additionally, AHL has committed to purchase an additional €285 million of common shares (which may be reduced to €260 million if certain conditions are met), as well as an additional profits interest in securities which, upon meeting certain vesting triggers, will be convertible into additional common shares.

On August 9, 2017, our Bermuda subsidiaries, AGER and NewRe Life Re Ltd. (NewRe) entered into a stock purchase agreement with Aegon Ireland Holding B.V. and Aegon Europe Holding B.V., pursuant to which NewRe agreed to purchase all of the outstanding stock of Aegon Ireland plc. Prior to the closing of the transaction, which is expected in the first quarter of 2018, subject to regulatory approvals and other customary closing conditions, AGER expects to call capital from its investors, which is expected to result in the issuance by AGER of new common shares to affiliates of Apollo and other third-party investors, such that our interest in the AGER Group will be reduced, causing the AGER Group to thereafter be held by us as an investment rather than as a consolidated subsidiary.

The valuation of the AGER Group was fixed at approximately €90 million as of the Subscription Date, and is unaffected by any profit or loss or other increase or decrease in value of the AGER Group during the period between the Subscription Date and the date on which the AGER Group is deconsolidated. As a result, to the extent that our invested capital and/or the fair value of the AGER Group increases or decreases during such time period, we may incur a gain or loss upon deconsolidation.

Funding Agreements-We are a member of the Federal Home Loan Bank (FHLB) of Indianapolis and Des Moines and, through membership, we have issued funding agreements to the FHLB in exchange for cash advances. As of September 30, 2017 and December 31, 2016, we had $623 million and $691 million, respectively, of funding agreements outstanding with the FHLB. We are required to provide collateral in excess of the funding agreements, considering any discounts to the securities posted and prepayment penalties.

We have a funding agreement backed notes (FABN) program, which allows Athene Global Funding, a special purpose, non-affiliated statutory-trust to offer up to $5 billion of its senior secured medium-term notes. Athene Global Funding uses the net proceeds from each sale to purchase one or more funding agreements from us. Funding agreements outstanding under this program had a carrying value of $2,996 million and $246 million as of September 30, 2017 and December 31, 2016, respectively.

Pledged Assets and Funds in Trust (Restricted Assets)-The total restricted assets included on the condensed consolidated balance sheets are as follows:

(In millions)	September 30, 2017	December 31, 2016
AFS securities		
Fixed maturity	$ 1,479	$ 1,535
Equity	38	40
Investment funds	22	25
Mortgage loans	798	1,003
Short-term investments	13	15
Restricted cash	100	57
Total restricted assets	$ 2,450	$ 2,675

The restricted assets are primarily a result of the FHLB funding agreements described above. Additionally, we have established reinsurance trusts of assets in accordance with coinsurance agreements, which are typically based on corresponding statutory reserves.

Litigation, Claims and Assessments-On June 12, 2015, Don Hudson, on behalf of himself and others similarly situated, filed a putative class action complaint in the United States District Court for the Northern District of California against us. The complaint, which was similar to complaints recently filed against other large insurance companies, primarily alleged that captive reinsurance and other transactions had the effect of misrepresenting the financial condition of Athene Annuity and Life Company (AAIA). The complaint purported to be brought on behalf of a class of purchasers of annuity products issued by AAIA between 2007 and the present and asserts claims against AHL, ALRe, AUSA and AAIA in addition to Apollo and AAM. There were also various allegations related to the purchase of Aviva USA and concerning entry into a modco transaction with ALRe in October 2013. The suit asserted claims of violation of the Racketeer Influenced and Corrupt Organizations Act and sought compensatory damages, trebled, in an amount to be determined, costs and attorneys' fees. On March 25, 2016, the matter was transferred to the United States District Court for the Southern District of Iowa (S.D. IA Court). On May 25, 2016, the court granted plaintiff's motion to file an amended complaint dropping plaintiff Silva and defendant Aviva plc. We moved to dismiss the amended complaint on June 30, 2016. On May 11, 2017, the putative class action complaint filed by Don Hudson, on behalf of himself and others similarly situated, against us was dismissed in a written decision by the S.D. IA Court. Plaintiff did not appeal the district court's decision and this matter is concluded.

On July 27, 2015, John Griffiths, on behalf of himself and others similarly situated, filed a putative class action complaint in the United States District Court for the District of Massachusetts, against us. An amended complaint was filed on December 18, 2015. The complaint asserts claims against AHL, AAIA and Athene London Assignment Corporation (Athene London), in addition to an Aviva defendant. AHL is a named defendant due to its purchase of Aviva USA, and AAIA and Athene London are named as successors to Aviva Life Insurance Company and Aviva London Assignment Corporation, respectively. The complaint alleges a putative class of all persons who are the beneficial owners of assets which were used to purchase structured settlement annuities that Aviva Life Insurance Company, Aviva London Assignment Corporation, and Aviva International Insurance Limited (collectively, the Aviva Entities) or their predecessors, as applicable, delivered to purchasers on or after April 1, 2003 that were backed by a capital maintenance agreement issued by Aviva International Insurance Limited or its predecessor (the CMA). The complaint alleges that the Aviva Entities sold structured settlement annuities to the public on the basis that such products were backed by the CMA, which was alleged to be a source of great financial strength. The complaint further alleges that the Aviva Entities used the CMA to enhance the sales volume and raise the price of the annuities. The complaint claims that, as a result of Aviva USA's sale to AHL, the CMA terminated. According to the complaint, no notice of this termination was provided to the owners of the structured settlement annuities. The complaint alleges that the termination of the CMA gave rise to claims for breach of contract, breach of fiduciary duty, promissory estoppel, and unjust enrichment. AHL and plaintiff recently agreed to a term sheet settlement on a class wide basis. Terms of the settlement, which is subject to court approval, include: (1) AHL entering into a capital maintenance agreement with Athene London requiring AHL to provide capital to Athene London upon a missed structured settlement payment that is not timely cured and (2) AHL paying a monetary amount that is immaterial to us. The case against AHL has been stayed in totality and the case has been stayed against co-defendant Aviva until November 27, 2017 while the parties engage in a magistrate settlement conference.

The Internal Revenue Service (IRS) has completed its examinations of the 2006 through 2010 Aviva USA tax years. Aviva USA agreed to all adjustments that were proposed with respect to those tax years with two exceptions: (1) AAIA's treatment of call options used to hedge fixed indexed annuity (FIA) liabilities for the tax years 2008-2010 and (2) the disallowance of offsetting tax deductions taken by AAIA and taxable income reported by the non-life subgroup with respect to unpaid independent marketing organization commissions. The first adjustment to which Aviva USA did not agree would disallow deductions of $191 million, $154 million and $76 million for 2008, 2009 and 2010, respectively. The second adjustment to which Aviva USA did not agree would increase non-life net operating losses and decrease AAIA net operating losses by $16 million in each of 2009 and 2010. Taxes, penalties and interest with respect to these two issues for the years under audit are subject to indemnification by Aviva plc under the Stock Purchase Agreement (SPA) between Aviva plc and AHL, dated December 21, 2012 assuming the SPA requirements are satisfied. Athene USA has been unable to negotiate a favorable settlement of this issue with the IRS, and is contesting the adjustment in federal court. If the IRS position is upheld in federal court, Athene USA expects that it would owe tax of $120 million, plus interest, for tax years ending on or before October 2, 2013, which are subject to indemnification by Aviva plc as described above.

The IRS also recently completed its examination of the 2011 through 2012 Aviva USA tax years, proposing adjustments that would increase taxable income by approximately $16 million in the aggregate for these two tax years. Athene USA agreed to all adjustments that were proposed with respect to those tax years except for adjustments relating to the same two issues that were not agreed to during the prior examination as discussed above. The first adjustment to which Athene USA did not agree would disallow deductions of $16 million in 2011 and increase deductions by $12 million in 2012. The second adjustment to which Athene USA did not agree would increase non-life net operating losses and decrease AAIA net operating losses by $15 million in 2011 and $12 million in 2012. Taxes, penalties and interest with respect to these two tax years are subject to indemnification by Aviva plc under the SPA, assuming the SPA requirements are satisfied. The treatment of FIA hedges is a recurring issue as to the timing of the related deductions and could affect the current income tax incurred in periods after October 2, 2013, which are not subject to indemnification by Aviva plc. Given that the disallowance of a deduction in one period results in an increased deduction in a future period, we do not expect that there will be any material impact to our financial condition resulting from this issue.

In 2000 and 2001, two insurance companies which were subsequently merged into AAIA purchased from American General Life Insurance Company (American General) broad based variable corporate-owned life insurance (COLI) policies that, as of September 30, 2017, had an asset value of $344 million, and is included in other assets on the condensed consolidated balance sheets. In January 2012, the COLI policy administrator delivered to AAIA a supplement to the existing COLI policies and advised that American General and ZC Resource Investment Trust (ZC Trust) had unilaterally implemented changes set forth in the supplement that if effective, would: (1) potentially negatively impact the crediting rate for the policies and (2) change the exit and surrender protocols set forth in the policies. In March 2013, AAIA filed suit against American General, ZC Trust, and ZC Resource LLC in Chancery Court in Delaware, seeking, among other relief, a declaration that the changes set forth in the supplement were ineffectual and in breach of the parties' agreement. The parties filed cross motions for judgment as a matter of law, and the court granted defendants' motion and dismissed without prejudice on ripeness grounds. The issue that negatively impacts the crediting rate for one of the COLI policies has been triggered and we will pursue further adjudication. If the supplement is ultimately deemed to be effective, the purported changes to the policies could impair AAIA's ability to access the value of guarantees associated with the policies. The value of the guarantees included within the asset value reflected above is $164 million as of September 30, 2017.

14. Segment Information

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other.

Retirement Services-Retirement Services is comprised of our United States and Bermuda operations, which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure multi-year guaranteed annuities, fixed indexed annuities, traditional one-year guarantee fixed deferred annuities, immediate annuities and institutional products from our reinsurance partners. In addition, our institutional operations, including funding agreements and pension risk transfer (PRT) obligations, are included in our Retirement Services segment.

Corporate and Other-Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based compensation and intersegment eliminations. In Corporate and Other, we also hold capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

Financial Measures-Segment operating income, net of tax, is an internal measure used by the chief operating decision maker to evaluate and assess the results of our segments.

Operating revenue is a component of operating income, net of tax, and excludes market volatility and adjustments for other non-operating activity. Our operating revenue equals our total revenue, adjusted to eliminate the impact of the following non-operating adjustments:

- Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets;
- Investment gains (losses), net of offsets;
- VIE expenses and noncontrolling interest; and
- Other adjustments to revenues.

The table below reconciles segment operating revenues to total revenues presented on the condensed consolidated statements of income:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Operating revenue by segment				
Retirement Services	$ 936	$ 876	$ 3,078	$ 2,464
Corporate and Other	94	69	265	166
Total segment operating revenues	1,030	945	3,343	2,630
Non-operating adjustments				
Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets	379	200	1,181	100
Investment gains (losses), net of offsets	63	121	326	293
VIE expenses and noncontrolling interest	-	4	-	13
Other adjustments to revenues	1	2	5	3
Total non-operating adjustments	443	327	1,512	409
Total revenues	$ 1,473	$ 1,272	$ 4,855	$ 3,039

ATHENE HOLDING LTD.
Notes to Condensed Consolidated Financial Statements *(Unaudited)*

Operating income, net of tax, is an internal measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation and certain other expenses. Our operating income, net of tax, equals net income available to AHL's shareholders adjusted to eliminate the impact of the following non-operating adjustments:

- Investment gains (losses), net of offsets;
- Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets;
- Integration, restructuring and other non-operating expenses;
- Stock-based compensation, excluding the long-term incentive plan (LTIP); and
- Income tax (expense) benefit - non-operating.

The table below reconciles segment operating income, net of tax, to net income available to Athene Holding Ltd. shareholders presented on the condensed consolidated statements of income:

	Three months ended September 30,		Nine months ended September 30,	
(In millions)	2017	2016	2017	2016
Operating income, net of tax by segment				
Retirement Services	$ 244	$ 142	$ 786	$ 535
Corporate and other	(13)	(25)	(9)	(87)
Total segment operating income, net of tax	231	117	777	448
Non-operating adjustments				
Investment gains (losses), net of offsets	25	58	140	98
Change in fair values of derivatives and embedded derivatives - index annuities, net of offsets	46	(1)	155	(88)
Integration, restructuring and other non-operating expenses	(14)	(2)	(34)	(8)
Stock-based compensation, excluding LTIP	(7)	(46)	(30)	(59)
Income tax (expense) benefit - non-operating	(7)	-	(24)	13
Total non-operating adjustments	43	9	207	(44)
Net income available to Athene Holding Ltd. shareholders	$ 274	$ 126	$ 984	$ 404

The following represents total assets by segment:

(In millions)	September 30, 2017	December 31, 2016
Total assets by segment		
Retirement Services	$ 88,034	$ 79,298
Corporate and Other	8,027	7,401
Total assets	$ 96,061	$ 86,699

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. We generate attractive financial results for our policyholders and shareholders by combining our two core competencies of (1) sourcing long-term, generally illiquid liabilities and (2) investing in a high quality investment portfolio, which takes advantage of the illiquid nature of our liabilities. Our steady and significant base of earnings generates capital that we opportunistically invest across our business to source attractively-priced liabilities and capitalize on opportunities. Our differentiated investment strategy benefits from our strategic relationship with Apollo and its indirect subsidiary, AAM. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services, including investment compliance, tax, legal and risk management support. Our relationship with Apollo and AAM also provides us with access to Apollo’s investment professionals across the world as well as Apollo’s global asset management infrastructure that, as of September 30, 2017, supported more than $241 billion of AUM across a broad array of asset classes. We are led by a highly skilled management team with extensive industry experience. We are based in Bermuda with our U.S. subsidiaries' headquarters located in Iowa.

We began operating in 2009 when the burdens of the financial crisis and resulting capital demands caused many companies to exit the retirement market, creating the need for a well-capitalized company with an experienced management team to fill the void. Taking advantage of this market dislocation, we have been able to acquire substantial blocks of long-duration liabilities and reinvest the related investments to produce profitable returns. We have established a significant base of earnings and as of September 30, 2017, have an expected annual investment margin of 2-3% over the 8.2 year weighted-average life of our deferred annuities, which make up a substantial portion of our reserve liabilities. Even as we have grown to $81.2 billion in investments, including related parties, $78.8 billion in invested assets and total assets as of $96.1 billion as of September 30, 2017, we have continued to approach both sides of the balance sheet with an opportunistic mindset because we believe quickly identifying and capitalizing on market dislocations allows us to generate attractive, risk-adjusted returns for our shareholders. Further, our multiple distribution channels support growing origination across market environments and better enable us to achieve continued balance sheet growth while maintaining attractive profitability. We believe that in a typical market environment, we will be able to profitably grow through our organic channels, including retail, flow reinsurance and institutional products. In more challenging market environments, we believe that we will see additional opportunities to grow through our inorganic channels, including acquisitions and block reinsurance, due to market stress during those periods.

We are diligent in setting our return targets based on market conditions and risks inherent to our products offered and acquisitions or block reinsurance transactions. Generally, we target mid-teen returns for sources of organic growth and mid-teen or higher returns for sources of inorganic growth. However, specific return targets are established with due consideration to the facts and circumstances surrounding each growth opportunity and may be higher or lower than those that we target more generally. Factors that we consider in establishing return targets for a given growth opportunity include, but are not limited to, the certainty of the return profile, the strategic nature of the opportunity, the size and scale of the opportunity, the alignment and fit of the opportunity with our existing business, the opportunity for risk diversification and the existence of increased opportunities for higher returns or growth. If market conditions or risks inherent to a product or transaction create return profiles that are not acceptable to us, we generally will not sacrifice our profitability merely to facilitate growth.

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other. Retirement Services is comprised of our U.S. and Bermuda operations which issue and reinsure retirement savings products and institutional products. Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products.

Our consolidated annualized ROE for the nine months ended September 30, 2017 and the year ended December 31, 2016 was 16.9% and 12.6%, respectively, and our consolidated annualized operating ROE excluding AOCI was 14.8% and 12.1%, respectively. As a result of our focus on issuing, reinsuring and acquiring attractively-priced liabilities, our differentiated investment strategy and our significant scale, for the nine months ended September 30, 2017 and the year ended the year ended December 31, 2016, in our Retirement Services segment, we generated an annualized investment margin on deferred annuities of 2.86% and 2.76%, respectively and annualized operating ROE excluding AOCI of 21.3% and 18.5%, respectively. We currently maintain what we believe to be high capital ratios for our rating and hold more than $1.5 billion of excess capital, and view this excess as strategic capital available to reinvest into organic and inorganic growth opportunities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We have developed organic and inorganic channels to address the retirement services market and grow our assets and liabilities. By focusing on the retirement services market, we believe that we will benefit from several demographic and economic trends, including the increasing number of retirees in the United States, the lack of tax advantaged alternatives for people trying to save for retirement and expectations of a rising interest rate environment. To date, most of our products sold and acquired have been fixed annuities, which offer people saving for retirement a product that is tax advantaged, has a minimum guaranteed rate of return or minimum cash value and provides protection against investment loss. Our policies often include surrender charges (86% of our deferred annuity products, as of September 30, 2017) or MVAs (72% of our deferred annuity products, as of September 30, 2017), both of which increase persistency and protect our ability to meet our obligations to policyholders. Our organic channels, including retail, flow reinsurance and institutional products, provided deposits of $8.0 billion and $6.9 billion for the nine months ended September 30, 2017 and 2016, respectively. Withdrawals on our deferred annuities, maturities of our funding agreements and payments on payout annuities (collectively, liability outflows), in the aggregate, were $4.4 billion and $4.0 billion for the nine months ended September 30, 2017 and 2016, respectively. We believe that our improving credit profile, our product line and product design capabilities and our growing reputation as both a seasoned funding agreement issuer and a reliable PRT counterparty will continue to enable us to further penetrate our existing organic channels and allow us to source additional volumes of profitably underwritten liabilities in various market environments. Our inorganic channels, including acquisitions and block reinsurance, have contributed significantly to our growth. We believe our internal acquisitions team, with support from Apollo, has an industry-leading ability to source, underwrite, and expeditiously close transactions, which makes us a competitive counterparty for acquisition or block reinsurance transactions.

We plan to grow organically by expanding our retail, reinsurance and institutional product distribution channels. We believe that we have the right people, infrastructure and scale to position us for continued growth. Within our retail channel we had fixed annuity sales of $4.1 billion and $3.8 billion for the nine months ended September 30, 2017 and 2016, respectively. We aim to grow our retail channel in the United States by deepening our relationships with our approximately 67 IMOs and approximately 34,000 independent agents. Our strong financial position and capital efficient products allow us to be a dependable partner with IMOs and consistently write new business. We work with our IMOs to develop customized, and at times exclusive, products that help drive sales. We expect our retail channel to continue to benefit from our improving credit profile and recent product launches. We believe this should support growth in sales at our desired cost of crediting through increased volumes via current IMOs and access to new distribution channels, including small to mid-sized banks and regional broker-dealers. We are implementing the necessary technology platform, hiring and training a specialized sales force, and have created products to capture new potential distribution opportunities. In our reinsurance channel, we target reinsurance business consistent with our preferred liability characteristics, and as such, reinsurance provides another opportunistic channel for us to source long-term liabilities with attractive crediting rates. We generated deposits through our flow reinsurance channel of $570 million and $3.1 billion for the nine months ended September 30, 2017 and 2016, respectively. We believe the decrease in flow reinsurance has been impacted by the recent decline in overall MYGA volumes over the last several months, reflective of tighter investment spreads, the recent stock market rally and expectations of higher interest rates. As we continue to source additional reinsurance partners, we expect to further diversify our flow reinsurance channel and expect that our improving credit profile will help us attract additional reinsurance partners. In our institutional channel, we generated deposits of $3.3 billion and $0 million for the nine months ended September 30, 2017 and 2016, respectively. Our ability to issue funding agreements, namely those issued through our FABN program, has benefited from our public company status and improving credit profile, allowing us to generate deposits in the aggregate principal amount of $3.0 billion and $0 million for the nine months ended September 30, 2017 and 2016, respectively. In addition, growth in our institutional channel was attributed to our entry into the PRT market in 2017, during which we closed our inaugural transaction pursuant to which we issued a group annuity contract in the aggregate principal amount of approximately $320 million. Additionally, subsequent to quarter-end, we entered into two PRT agreements totaling approximately $1.0 billion of pension obligations. We expect to grow our institutional channel by continuing to engage in opportunistic issuances of funding agreements and by continuing to engage in PRT transactions.

Industry Trends and Competition

Market Conditions

Our business and results of operations are materially affected by conditions in the global capital markets and the economy generally. A general economic slowdown could adversely affect us in the form of changes in consumer behavior and decreases in the returns on and value of our investment portfolio. Concerns over the slow economic recovery, the level of U.S. national debt, currency fluctuations and volatility, the stability of the EU, Brexit and the potential exit of certain other EU members, the rate of growth of China and other Asian economies, unemployment, the availability and cost of credit, the U.S. housing market, inflation levels, low or negative interest rates, energy costs and geopolitical issues have contributed to increased volatility and diminished expectations for the economy and the markets. Market conditions have generally improved since the U.S. elections in November of 2016 on hopes of improved economic growth, however the long term outlook remains uncertain. Declining economic growth rates globally and resultant diverging paths of monetary policy could increase volatility in the credit markets, potentially impacting the availability and cost of credit. Factors such as equity prices, equity market volatility, interest rates, counterparty risks, availability of credit, inflation rates, economic uncertainty, changes in laws or regulations (including laws relating to the financial markets generally or the taxation or regulation of the insurance industry), trade barriers, commodity prices, currency exchange rates and controls and national and international political circumstances (including governmental instability, wars, terrorist acts or security operations) can have a material impact on the value of our investment portfolio and our ability to sell our products. We adjust the structure of our products depending on the economic environment, the behavior of customers and other factors, including mortality rates, morbidity rates, cap rates, rollup rates, annuitization rates and lapse rates, which can vary in response to changes in market conditions. We believe continued economic growth, stable financial markets and a potentially rising interest rate environment may ultimately enhance the attractiveness of our product portfolio. However, we remain exposed to potential slowdowns in economic activity, which could be characterized by rising unemployment, falling interest rates, widening credit spreads and an increase in corporate credit and real estate-related defaults.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Interest Rate Environment

As a retirement services company focused on issuing and reinsuring fixed annuities, we are affected by the monetary policy of the Federal Reserve in the United States as well as other central banks around the world. In spite of the Federal Reserve increasing federal funds rates in December 2015, December 2016 and March and June of 2017, interest rates in the United States remain lower than historical levels. The lower interest rates in part are due to a number of actions taken in recent years by the Federal Reserve in an effort to stimulate economic activity. Any future increases in federal funds rates are uncertain and will depend on the economic outlook.

Our investment portfolio consists predominantly of fixed maturity investments. See *Consolidated Investment Portfolio*. If prevailing interest rates were to rise, we believe the yield on our new investment purchases may also rise and our investment income from floating rate investments would increase while the value of our existing investments may decline. If prevailing interest rates were to decline, it is likely that the yield on our new investment purchases may decline and our investment income from floating rate investments would decrease while the value of our existing investments may increase. We address interest rate risk through managing the duration of the liabilities we source with assets we acquire and through asset liability management (ALM) modeling. We endeavor to limit reinvestment risk related to cash flows by managing our asset portfolio to ensure it provides adequate cash flows to meet our expected policyholder benefit cash flows to within tolerable risk management limits. Our strategy is to achieve sustainable yields that allow us to maintain an attractive investment margin. As part of our investment strategy, we purchase floating rate investments, which we expect will perform well in a rising interest rate environment. Our investment portfolio includes $22.0 billion of floating rate investments, or approximately 28% of our total invested assets as of September 30, 2017. As part of our reinvestment strategy for the investment portfolios of our acquired companies, we generally seek to reinvest assets at yields higher than the related assets being liquidated for reinvestment. We continuously seek to optimize our investment portfolio to achieve favorable returns over the long term.

If prevailing interest rates were to rise, we believe our products would be more attractive to consumers and our sales would likely increase. In periods of prolonged low interest rates, the investment margin earned on deferred annuities may be negatively impacted by reduced investment income to the extent that we are unable to adequately reduce policyholder crediting rates due to policyholder guarantees in the form of minimum crediting rates or otherwise due to market conditions. As of September 30, 2017, most of our products were fixed annuities with approximately 36% of our FIAs at the minimum guarantees and approximately 49% of our fixed rate annuities at the minimum crediting rates. As of September 30, 2017, minimum guarantees on all of our deferred annuities, including those with crediting rates already at their minimum guarantees, were, on average, 80 to 90 basis points below the crediting rates on such deferred annuities, allowing us room to reduce rates before reaching the minimum guarantees. Our remaining liabilities are associated with immediate annuities, funding agreements or life contracts for which we have little to no discretionary ability to change the rates of interest payable to the respective policyholder. A significant majority of our products have crediting rates that we may reset annually upon renewal following the expiration of the current guaranteed period. While we have the contractual ability to lower these crediting rates to the guaranteed minimum levels, our willingness to do so may be limited by competitive pressures.

See *Item 7A. Quantitative and Qualitative Disclosures About Market Risks* in our 2016 Annual Report, which includes a discussion regarding interest rate and other significant risks and our strategies for managing these risks.

Demographics

Over the next four decades, the retirement-age population is expected to experience unprecedented growth. Technological advances and improvements in healthcare are projected to continue to contribute to increasing average life expectancy, and aging individuals must be prepared to fund retirement periods that will last longer than ever before. Further, many working households in the United States do not have adequate retirement savings. As a tool for addressing the unmet need for retirement planning, we believe that many Americans have begun to look to tax-efficient savings products with low-risk or guaranteed return features and potential equity market upside, particularly as federal, state and local marginal tax rates have increased. Our tax-efficient savings products are well positioned to meet this increasing customer demand.

We believe that our strong presence in the FIA market and strength of our relationships with IMOs position us to effectively serve consumers' demand in the rapidly growing retirement savings market. We expect that our retail channel will continue to benefit from our improving credit profile and recent product launches. We believe this should help us to grow sales at our desired cost of crediting through increased volumes via current IMOs and access to new distribution channels, including small to mid-sized banks and regional broker-dealers. We also believe that our improving credit profile has enabled and will continue to enable us to increase penetration in our existing organic channels, such as flow reinsurance and funding agreements, while also helping us to increase our presence in the PRT market.

Competition

We operate in highly competitive markets. We face a variety of large and small industry participants, including diversified financial institutions and insurance and reinsurance companies. These companies compete in one form or another for the growing pool of retirement assets driven by a number of external factors such as the continued aging of the population and the reduction in safety nets provided by governments and private employers. In the markets in which we operate, scale and the ability to provide value-added services and build long-term relationships are important factors to compete effectively. We believe that our leading presence in the retirement market, diverse range of capabilities and broad distribution network uniquely position us to effectively serve consumers’ increasing demand for retirement solutions, particularly in the FIA market.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

According to LIMRA, total fixed annuity market sales in the United States were $56.7 billion for the six months ended June 30, 2017, a 11.1% decrease from the same time period in 2016. This decrease was driven by a decrease in traditional fixed rate deferred annuities of $3.1 billion, or 13.8% over prior year fixed rate deferred annuities, and a decrease in FIA products of $2.7 billion, or 8.5% over prior year FIAs. In the total fixed annuity market, for the six months ended June 30, 2017 (the most recent period for which specific market share data is available), we were the 5th largest company based on sales with a 4.8% market share and $2.7 billion in sales. For the six months ended June 30, 2016, our market share was 2.8% with sales of $1.8 billion.

FIAs are one of the fastest growing annuity products having grown from $27.3 billion in 2005 to $60.9 billion in sales for the year ended December 31, 2016. According to LIMRA, for the six months ended June 30, 2017 (the most recent period for which specific market share data is available), we were the 2nd largest provider of FIAs in terms of sales, and our market share for the same period was 8.4% with sales of $2.5 billion. For the six months ended June 30, 2016, our market share was 5.0% with sales of $1.6 billion.

Regulatory Developments

Department of Labor

On April 6, 2016, the U.S. Department of Labor (DOL) issued a new regulation (fiduciary rule) more broadly defining the circumstances under which a person is considered to be a fiduciary by reason of giving investment advice or recommendations to an employee benefit plan or a plan's participants or to IRA holders. In addition to releasing the investment advice regulation, the DOL: (1) issued a new prohibited transaction class exemption titled the "Best Interest Contract Exemption," to be used in connection with the sale of FIAs or variable annuities, and (2) updated the previously prohibited transaction class exemption 84-24, to be used in connection with the sale of traditional fixed rate annuities. The April 10, 2017 applicability date for the fiduciary rule was delayed to June 9, 2017 in response to a memorandum issued to the DOL by President Trump. In addition to delaying the applicability date of the fiduciary rule, the DOL revised both exemptions, most notably allowing all annuity products, fixed, FIAs and variable annuities, to rely on an updated version of the prohibited transaction class exemption 84-24 from June 9, 2017 through January 1, 2018, at which time full implementation of the fiduciary rule is required. On August 9, 2017, the DOL submitted to the Office of Management and Budget a proposal to extend the January 1, 2018 full implementation date to July 1, 2019. In order for the extension to become effective, the proposal must be finalized and issued in the Federal Register before January 1, 2018. We cannot predict with any certainty the impact of the new fiduciary rule and exemptions, but the fiduciary rule and exemptions could alter the way our products and services are marketed and sold, particularly to purchasers of IRAs and individual retirement annuities. If implemented in its current form, the fiduciary rule could have an adverse effect on our ability to write new business. In addition, the NAIC has implemented a working group to update the current Suitability in Annuity Transactions Model Regulation to address the fiduciary standard and the SEC has indicated that it may propose rules creating a uniform standard of conduct applicable to broker-dealers and investment advisers. If either or both of these entities create rules or standards applicable to our business, it may affect the distribution of our products. Should the SEC or NAIC rules or standards, if adopted, not align with each other or the finalized fiduciary rule, the distribution of our products could be further complicated.

Tax Reform

We continue to face material uncertainty regarding the substance and timing of tax reform. See *Part II-Other Information-Item1A. Risk Factors-Risks Relating to Taxation-Changes in the U.S. tax law might adversely affect us or our shareholders* for further discussion regarding tax reform.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Key Operating and Non-GAAP Measures

In addition to our results presented in accordance with GAAP, our results of operations include certain non-GAAP measures commonly used in our industry. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers or likely to re-occur in the foreseeable future, as such items fluctuate from period-to-period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. See *Non-GAAP Measure Reconciliations* for the appropriate reconciliations to the GAAP measures.

Operating Income, Net of Tax

Operating income, net of tax, a commonly used term in the life insurance industry, is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation, and other expenses. Our operating income, net of tax, equals net income available to AHL's shareholders adjusted to eliminate the impact of the following (collectively, the "non-operating adjustments"):

- **Investment Gains (Losses), Net of Offsets-**Investment gains (losses), net of offsets, consist of the realized gains and losses on the sale of AFS securities, the change in assumed modco and funds withheld reinsurance embedded derivatives, unrealized gains and losses, impairments, and other investment gains and losses. Unrealized, impairments and other investment gains and losses are comprised of the fair value adjustments of trading securities (other than CLOs) and investments held under the fair value option, derivative gains and losses not hedging FIA index credits, and the net OTTI impacts recognized in operations net of the change in AmerUs Closed Block fair value reserve related to the corresponding change in fair value of investments and the change in unit linked reserves related to the corresponding trading securities. Investment gains and losses are net of offsets related to DAC, DSI, and VOBA amortization and changes to guaranteed living withdrawal benefits (GLWB) and guaranteed minimum death benefits (GMDB) reserves (together, GLWB and GMDB reserves represent rider reserves) as well as the MVAs associated with surrenders or terminations of contracts.

- **Change in Fair Values of Derivatives and Embedded Derivatives - FIAs, Net of Offsets-**Impacts related to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuate from period-to-period. The index reserve is measured at fair value for the current period and all periods beyond the current policyholder index term. However, the FIA hedging derivatives are purchased to hedge only the current index period. Upon policyholder renewal at the end of the period, new FIA hedging derivatives are purchased to align with the new term. The difference in duration between the FIA hedging derivatives and the index credit reserves creates a timing difference in earnings. This timing difference of the FIA hedging derivatives and index credit reserves is included as a non-operating adjustment, net of offsets related to DAC, DSI, and VOBA amortization and changes to rider reserves.

We primarily hedge with options that align with the index terms of our FIA products (typically 1-2 years). From an economic basis, we believe this is suitable because policyholder accounts are credited with index performance at the end of each index term. However, because the "value of an embedded derivative" in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.

- **Integration, Restructuring, and Other Non-operating Expenses-**Integration, restructuring, and other non-operating expenses consist of restructuring and integration expenses related to mergers and acquisitions as well as certain other expenses which are not part of our core operations or likely to re-occur in the foreseeable future.

- **Stock Compensation Expense-**Stock compensation expenses associated with our share incentive plans, excluding our long term incentive plan, are not part of our core operating expenses and fluctuate from time to time due to the structure of our plans.

- **Bargain Purchase Gain-**Bargain purchase gains associated with acquisitions are adjustments to net income as they are not consistent with our core operations.

- **Income Taxes (Expense) Benefit - Non-operating-**The non-operating income tax expense is comprised of the appropriate jurisdiction's tax rate applied to the non-operating adjustments that are subject to income tax.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We consider these non-operating adjustments to be meaningful adjustments to net income available to AHL's shareholders for the reasons discussed in greater detail above. Operating income, net of tax excluding notable items equals net income available to AHL's shareholders adjusted for non-operating adjustments and certain notable items in the period that facilitate the evaluation of our underlying profitability. Accordingly, we believe using these measures which excludes the impact of these items is effective in analyzing the trends in our results of operations. Together with net income available to AHL's shareholders, we believe operating income, net of tax, and operating income, net of tax excluding notable items provide meaningful financial metrics that help investors understand our underlying results and profitability. Operating income, net of tax, and operating income, net of tax excluding notable items should not be used as a substitute for net income available to AHL's shareholders.

ROE Excluding AOCI and Operating ROE Excluding AOCI

ROE excluding AOCI and operating ROE excluding AOCI are non-GAAP measures used to evaluate our financial performance excluding the impacts of AOCI. AOCI fluctuates period-to-period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Once we have reinvested acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Accordingly, we believe using measures which exclude AOCI is useful in analyzing the trends of our operations. To enhance the ability to analyze these measures across periods, interim periods are annualized. ROE excluding AOCI and operating ROE excluding AOCI should not be used as a substitute for ROE. However, we believe the adjustments to equity are significant to gaining an understanding of our overall results of operations.

Operating Earnings Per Share - Operating Diluted Class A, Weighted Average Shares Outstanding - Operating Diluted Class A Common Shares and Book Value Per Share Excluding AOCI

Operating earnings per share - operating diluted Class A, weighted average shares outstanding - operating diluted Class A common shares and book value per share excluding AOCI are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe using these measures represent an economic view of our share counts and provide a simplified and consistent view of our outstanding shares. Operating earnings per share - operating diluted Class A is calculated as the operating income, net of tax over the weighted average shares outstanding - operating diluted Class A common shares. Book value per share excluding AOCI is calculated as the ending AHL shareholders' equity excluding AOCI divided by the operating diluted Class A common shares outstanding. Our Class B common shares are economically equivalent to Class A common shares and can be converted to Class A common shares on a one-for-one basis at any time. Our Class M common shares are in the legal form of shares but economically function as options as they are convertible into Class A shares after vesting and settlement of the conversion price. In calculating Class A diluted earnings per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards are not dilutive they are excluded. Weighted average shares outstanding - operating diluted Class A common shares and operating diluted Class A common shares outstanding assume conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. For certain historical periods, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Operating earnings per share - operating diluted Class A, weighted average shares outstanding - operating diluted Class A common shares and book value per share excluding AOCI should not be used as a substitute for basic earnings per share - Class A common shares, basic weighted average shares outstanding - Class A or book value per share. However, we believe the adjustments to the shares and equity are significant to gaining an understanding of our overall results of operations and financial condition.

Retirement Services Net Investment Earned Rate, Cost of Crediting and Investment Margin on Deferred Annuities

Investment margin is a key measurement of the financial health of our Retirement Services core deferred annuities. Investment margin on our deferred annuities is generated from the excess of our net investment earned rate over the cost of crediting to our policyholders. Net investment earned rate is a key measure of investment returns and cost of crediting is a key measure of the policyholder benefits on our deferred annuities.

Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our invested assets divided by the average invested assets for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to arrive at our net investment earned rate add alternative investment gains and losses, gains and losses related to trading securities for CLOs, net VIE impacts (revenues, expenses and noncontrolling interest) and the change in reinsurance embedded derivatives. We include the income and assets supporting our assumed reinsurance by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of reinsurance embedded derivatives. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.

Cost of crediting is the interest credited to the policyholders on our fixed strategies as well as the option costs on the index annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. The interest credited on fixed strategies and option costs on index annuity strategies are divided by the average account value of our deferred annuities. Our average account values are averaged over the number of quarters in the relevant period to obtain our cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

Net investment earned rate, cost of crediting and investment margin on deferred annuities are non-GAAP measures we use to evaluate the profitability of our core deferred annuities business. Deferred annuities include our fixed rate annuities and FIAs, which account for approximately 78% of our Retirement Services reserve liabilities as of September 30, 2017. We believe measures like net investment earned rate, cost of crediting and investment margin on deferred annuities are effective in analyzing the trends of our core business operations, profitability and pricing discipline. While we believe net investment earned rate, cost of crediting and investment margin on deferred annuities are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income and interest sensitive contract benefits presented under GAAP.

Invested Assets

In managing our business we analyze invested assets, which do not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Invested assets represent the investments that directly back our policyholder liabilities as well as surplus assets. Invested assets is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) the consolidated VIE assets, liabilities and noncontrolling interest, (f) net investment payables and receivables and (g) policy loans ceded (which offset the direct policy loans in total investments). Invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Our invested assets are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period.

Reserve Liabilities

In managing our business we also analyze reserve liabilities, which does not correspond to total liabilities as disclosed in our consolidated financial statements and notes thereto. Reserve liabilities represents our policyholder liability obligations net of reinsurance and is used to analyze the costs of our liabilities. Reserve liabilities includes (a) the interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverables, excluding policy loans ceded. Reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and therefore we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. The majority of our ceded reinsurance is a result of reinsuring large blocks of life business following acquisitions. For such transactions, GAAP requires the ceded liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction.

Sales

Sales statistics do not correspond to revenues under GAAP, but are used as relevant measures to understand our business performance as it relates to deposits generated during a specific period of time. Our sales statistics include deposits for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers).

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Results of Operations

The following summarizes the consolidated results of operations:

	Three months ended September 30,		Nine months ended September 30,	
(In millions, except percentages)	2017	2016	2017	2016
Revenues	$ 1,473	$ 1,272	$ 4,855	$ 3,039
Benefits and expenses	1,179	1,234	3,818	2,708
Income before income taxes	294	38	1,037	331
Income tax expense (benefit)	20	(88)	53	(73)
Net income	274	126	984	404
Less: Net income attributable to noncontrolling interests	-	-	-	-
Net income available to AHL shareholders	$ 274	$ 126	$ 984	$ 404

Operating ROE excluding AOCI	12.5%	7.9%	14.8%	10.2%

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other. See *Results of Operations by Segment* for further detail on the results of the segments.

Three Months Ended September 30, 2017 Compared to the Three Months Ended September 30, 2016

In this section, references to 2017 refer to the three months ended September 30, 2017 and references to 2016 refer to the three months ended September 30, 2016.

Net Income Available to AHL Shareholders

Net income available to AHL shareholders increased by $148 million, or 117%, to $274 million for the three months ended September 30, 2017 from $126 million in the prior period. ROE and ROE excluding AOCI increased to 13.0% and 14.9%, respectively, from 7.5% and 8.4% in 2016, respectively. The increase in net income available to AHL shareholders was driven by a $114 million increase in operating income, net of tax, a favorable net change in FIA derivatives and a favorable decrease in stock compensation expense, partially offset by an unfavorable change in investment gains related to the assumed reinsurance embedded derivative. The net change in FIA derivatives was primarily driven by the performance of the equity indices to which our FIA policies are linked and a favorable change in model and assumption impacts compared to the prior year. The decrease in stock compensation expense was primarily due to the expense resulting from the accelerated vesting of shares in 2016. The change in the assumed reinsurance embedded derivative impacts were related to more favorable credit spread tightening in 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our annual process of unlocking assumptions resulted in a decrease in pre-tax income of $33 million compared to a decrease of $171 million in 2016.

Operating Income, Net of Tax

Operating income, net of tax increased by $114 million, or 97%, to $231 million for the three months ended September 30, 2017 from $117 million in the prior period. Operating income, net of tax, excluding notable items was $254 million, an increase of $85 million, or 50%, over the prior year. Operating ROE excluding AOCI was 12.5%, up from 7.9% in the prior period. The increase in operating income, net of tax, excluding notable items was driven by higher investment income. Investment income increased due to growth in our Retirement Services invested assets of $6.4 billion and higher short-term interest rates resulting in increased floating rate investment income.

Notable items for the quarter included unlocking, out of period actuarial adjustments of $13 million and a $17 million loss from our German operation compared to a loss of $7 million in the prior year. Our annual unlocking of assumptions resulted in an increase to other liability costs of $20 million compared to an increase of $158 million in prior year. The tax effect of these notable items for the quarter was $1 million compared to $11 million in the prior year. Additionally, in 2016 we recognized a $102 million deferred tax valuation allowance release.

Our consolidated net investment earned rate was 4.45% in three months ended September 30, 2017, an increase from 4.40% in the prior period, primarily attributed to the strong performance from our fixed income and other investment portfolios. Our alternative investment net investment earned rate was 9.07% in three months ended September 30, 2017, a decrease from 9.56% in the prior period as the prior year benefited from higher credit fund income due to more favorable credit spread tightening which was partially offset by decline in the market value of public equity positions in one of our funds in the prior year.

Revenues

Total revenue increased by $201 million to $1.5 billion in the three months ended September 30, 2017 from $1.3 billion in the prior period. The increase was driven by favorable changes in investment related gains and losses, an increase in net investment income and a favorable change in VIE investment related gains and losses.

Investment related gains and losses increased by $93 million to $473 million in the three months ended September 30, 2017 from $380 million in the prior period, primarily due to the change in fair value of FIA hedging derivatives, partially offset by the change in assumed reinsurance embedded derivatives. The change in fair value of FIA hedging derivatives increased by $167 million driven by the performance of the indices upon which our call options are based. The majority of our call options are based on the S&P 500 index which experienced a 4.0% increase in 2017, compared to an 3.3% increase in 2016. The assumed reinsurance embedded derivatives are based on the change in the fair value of the underlying investments held in modco and funds withheld portfolios (see *Note 3 - Derivative Instruments* to the condensed consolidated financial statements) which decreased by $61 million driven by the change in reinsurance embedded derivatives in the three months ended September 30, 2017, primarily due to the prior year benefiting from both credit spreads tightening and a decrease in U.S. treasury rates.

Net investment income increased by $77 million to $820 million in the three months ended September 30, 2017 from $743 million in the prior period, primarily driven by an increase in fixed income and other investment income. The increase in fixed income and other investment income was driven by earnings from growth in our investment portfolio attributed to a strong increase in deposits over the prior twelve months and higher short-term interest rates resulting in higher floating rate investment income.

VIE investment related gains and losses increased by $33 million to $17 million in the three months ended September 30, 2017 from $(16) million in the prior period, primarily driven by losses in the prior year resulting from a decline in market value of public equity positions in one of our funds, partially offset by the prior year benefiting from higher credit fund income due to more favorable credit spread tightening.

Benefits and Expenses

Total benefits and expenses decreased by $55 million to $1.2 billion in the three months ended September 30, 2017 from $1.2 billion in the prior period. The decrease was driven by a decrease in future policy benefits, a decrease in DAC, DSI and VOBA amortization and lower policy and other operating expenses, offset by an increase in interest sensitive contract benefits.

Future policy and other policy benefits decreased by $132 million to $259 million in the three months ended September 30, 2017 from $391 million in the prior period, primarily attributable to a favorable change in the rider reserves and a favorable change in AmerUs Closed Block fair value liability. The favorable change in rider reserves of $126 million was primarily driven by a decrease of $84 million related to our annual unlocking of assumptions and an unfavorable impact from higher than expected persistency in the prior year, partially offset by the growth in the block of business. Unlocking in the third quarter of 2017 was unfavorable $49 million related to impacts of the net investment earned rate and mortality assumptions, while 2016 unlocking impact was unfavorable by $133 million. The favorable change in the AmerUs Closed Block fair value liability of $33 million was primarily driven by higher earnings on the block of business compared to prior year. We have elected the fair value option to value the AmerUs Closed Block whereby the fair value of liabilities is the sum of the fair value of the assets plus our cost of capital in the AmerUs Closed Block.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

DAC, DSI and VOBA amortization decreased by $40 million to $93 million for the three months ended September 30, 2017 from $133 million in the prior period, primarily attributable to the $54 million favorable change in unlocking of assumptions of our DAC, DSI and VOBA assets, partially offset by growth in the FIA block increasing our DAC asset. Unlocking in the third quarter of 2017 was favorable $16 million primarily related to impacts of the net investment earned rate and mortality assumptions, while the 2016 unlocking impact was unfavorable by $38 million.

Policy and other operating expenses decreased by $22 million to $158 million in the three months ended September 30, 2017 from $180 million in the prior period, primarily due to a decrease in stock compensation expense of $39 million driven by the expense resulting from the accelerated vesting of shares in the prior year, partially offset by higher integration, restructuring and other non-operating expenses mainly due to Germany restructuring costs.

Interest sensitive contract benefits increased by $130 million to $621 million in the three months ended September 30, 2017 from $491 million in the prior period, primarily due to the change in FIA fair value embedded derivatives. The change in FIA fair value embedded derivatives increased by $138 million, primarily driven by the performance of the equity indices to which our FIA policies are linked, primarily the S&P 500 index, which experienced a 4.0% increase in 2017, compared to a 3.3% increase in the prior period. Additionally, a favorable change in model and assumption impacts compared to the prior year and growth in the FIA block attributed to the increase.

Taxes

Income tax expense increased by $108 million to $20 million in the three months ended September 30, 2017 from a benefit of $88 million in the prior period. The increase was primarily driven by a release of a deferred tax valuation allowance of $102 million in third quarter of 2016 and the increase in income subject to U.S. income taxes of $20 million, or approximately $7 million of tax based on a 35% U.S. statutory rate. During 2016, we identified a tax plan that, when implemented, will allow us to use a significant portion of the U.S. non-life insurance companies' net operating losses, which are scheduled to expire beginning in 2022.

Our effective tax rates were 7% in three months ended September 30, 2017 and (232)% in the prior period. Our effective tax rates may vary year-to-year depending upon the relationship of income and loss subject to tax compared to consolidated income and loss before income taxes.

Nine Months Ended September 30, 2017 Compared to the Nine Months Ended September 30, 2016

In this section, references to 2017 refer to the nine months ended September 30, 2017 and references to 2016 refer to the nine months ended September 30, 2016.

Net Income Available to AHL Shareholders

Net income available to AHL shareholders increased by $580 million, or 144%, to $984 million for the nine months ended September 30, 2017 from $404 million in the prior period. ROE and ROE excluding AOCI increased to 16.9% and 18.7%, respectively, from 8.7% and 9.2% in 2016, respectively. The increase in net income available to AHL shareholders was driven by a $329 million increase in operating income, net of tax, a favorable net change in FIA derivatives and favorable investment gain and losses. The net change in FIA derivatives was primarily driven by the performance of the equity indices to which our FIA policies are linked, year-over-year change in discount rates and a favorable change in model and assumption impacts compared to the prior year. Investment gains and losses was favorable primarily driven by the higher realized gains on the sale of securities and favorable change in derivative and foreign currency gains and losses.

Operating Income, Net of Tax

Operating income, net of tax increased by $329 million, or 73%, to $777 million for the nine months ended September 30, 2017 from $448 million in the prior period. Operating ROE excluding AOCI was 14.8%, up from 10.2% in the prior period. The increase in operating income, net of tax, was primarily driven by a strong increase in investment income and lower other liability costs. Additionally, in 2016 we recognized a $102 million deferred tax valuation allowance release. The increase in investment income was primarily due to growth in our Retirement Services invested assets of $6.4 billion, higher short-term interest rates resulting in higher floating rate investment income, proceeds from a bond previously written down and higher alternative investment income, partially offset by lower bond call income. The increase in alternative investment income was primarily driven by higher income from our investment in AmeriHome, higher real estate income and a decline in the market value of public equity positions in one of our funds in the prior year, partially offset by lower credit fund income. Cost of crediting was higher by $40 million due to growth in our deferred annuity block of business which was partially offset by recent rate actions and lower option costs. The lower other liability costs were primarily due to lower DAC, DSI, VOBA and rider reserves attributed to unlocking and favorable impacts related to improved equity market performance, partially offset by growth in the block of business and higher gross profits. Our annual unlocking of assumptions resulted in an increase to other liability costs of $20 million compared to an increase of $158 million in prior year.

Our consolidated net investment earned rate was 4.55% in the nine months ended September 30, 2017, an increase from 4.21% in the prior period, primarily attributed to strong performance from our fixed income and other investment portfolios and our alternative investment portfolio. Our alternative investment net investment earned rate was 9.92% in the nine months ended September 30, 2017, an increase from 5.51% in the prior period, primarily attributed to the strong performance of AmeriHome, higher real estate income and lower returns in the prior year due to a decline in the market value of public equity positions in one of our funds, partially offset by lower credit fund income.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Revenues

Total revenue increased by $1.9 billion to $4.9 billion in the nine months ended September 30, 2017 from $3.0 billion in the prior period. The increase was driven by favorable changes in investment related gains and losses, an increase in premiums, an increase in net investment income and an increase in VIE investment related gains and losses.

Investment related gains and losses increased by $1.1 billion to $1.6 billion in the nine months ended September 30, 2017 from $523 million in the prior period, primarily due to the change in fair value of FIA hedging derivatives, the change in assumed reinsurance embedded derivatives, higher realized gains on AFS securities and other derivative and foreign currency gains and losses. The change in fair value of FIA hedging derivatives increased by $1.0 billion driven by the performance of the indices upon which our call options are based. The majority of our call options are based on the S&P 500 index which experienced a 12.5% increase in 2017, compared to an 6.1% increase in 2016. The assumed reinsurance embedded derivatives increased by $31 million driven by growth in the reinsurance block, partially offset by the prior year benefiting from both credit spreads tightening and a decrease in U.S. treasury rates. The increase in investment gains and losses was partially offset by the change in unrealized gains and losses on trading securities which was comprised of an unfavorable decrease in AmerUs Closed Block assets of $77 million related to higher unrealized gains in the prior year due to the decrease in U.S. treasury rates partially offset by $18 million of gains related to unit-linked investments.

Premiums increased by $298 million to $503 million in the nine months ended September 30, 2017 from $205 million in the prior period, driven by approximately $320 million of premiums from our inaugural PRT transaction.

Net investment income increased by $290 million to $2.4 billion in the nine months ended September 30, 2017 from $2.1 billion in the prior period, primarily driven by a strong increase in fixed income and other investment income and an increase in alternative investment income. The increase in fixed income and other investment income was driven by earnings from growth in our investment portfolio attributed to a strong increase in deposits over the prior twelve months, higher short-term interest rates resulting in higher floating rate investment income and proceeds on the recovery of a bond previously written down, partially offset by lower bond call income. The increase in alternative investment income was primarily due to the strong performance in AmeriHome, driven by increases in its overall balance sheet size, origination volumes and retained mortgage servicing rights, as well as an increase in real estate income.

VIE investment related gains and losses increased by $99 million to $29 million in the nine months ended September 30, 2017 from $(70) million in the prior period, primarily driven by losses in the prior year resulting from a decline in market value of public equity positions in one of our funds, partially offset by the prior year benefiting from a favorable increase in the fair value of certain underlying investments in three of our consolidated VIEs, reflecting the removal of liquidity discounts related to marketability assumptions used in the determination of the fair value of certain of the investments.

Benefits and Expenses

Total benefits and expenses increased by $1.1 billion to $3.8 billion in the nine months ended September 30, 2017 from $2.7 billion in the prior period. The increase was driven by an unfavorable change in interest sensitive contract benefits, an increase in future policy and other policy benefits, an increase in DAC, DSI and VOBA amortization, an increase in dividends payable to policyholders and higher policy and other operating expenses.

Interest sensitive contract benefits increased by $785 million to $1.9 billion in the nine months ended September 30, 2017 from $1.1 billion in the prior period, primarily due to the change in FIA fair value embedded derivatives and higher interest credited to policyholders related to strong growth in deposits. The change in FIA fair value embedded derivatives increased by $728 million primarily driven by the performance of the equity indices to which our FIA policies are linked, primarily the S&P 500 index, which experienced a 12.5% increase in 2017, compared to a 6.1% increase in the prior period. Additionally, the FIA fair value embedded derivatives were impacted by a favorable change in discount rates used in our embedded derivative calculations as the decrease in the prior year were more favorable than the decrease in 2017, as well as a favorable change in model and assumption impacts compared to the prior year.

Future policy and other policy benefits increased by $178 million to $1.1 billion in the nine months ended September 30, 2017 from $873 million in the prior period, primarily attributable to approximately $320 million of policyholder obligations from our inaugural PRT transaction, partially offset by a favorable change in AmerUs Closed Block fair value liability and a favorable change in the rider reserves. The favorable change in the AmerUs Closed Block fair value liability of $120 million was primarily driven by higher unrealized gains in the prior year primarily due to the decrease in U.S. treasury rates and earnings on the block of business. We have elected the fair value option to value the AmerUs Closed Block whereby the fair value of liabilities is the sum of the fair value of the assets plus our cost of capital in the AmerUs Closed Block. The favorable change in rider reserves of $65 million was primarily driven by a decrease related to our annual unlocking of assumptions of $84 million and favorable impacts related to improved equity market performance compared to the prior period resulting in increased index credits to policyholder accounts, which lowered the amount needed to fund the rider reserve. The favorable change in rider reserves was partially offset by growth in the block of business, higher gross profits and an increase related to the net change in FIA derivatives. Unlocking in 2017 was unfavorable $49 million related to impacts of the net investment earned rate and mortality assumptions, while 2016 unlocking impacts were unfavorable by $133 million.

DAC, DSI and VOBA amortization increased by $64 million to $293 million in the nine months ended September 30, 2017 from $229 million in the prior period, primarily due to the favorable net change in FIA derivatives and growth in the DAC asset balance related to block growth, partially offset by $54 million favorable change in unlocking of assumptions as well as favorable impacts related to improved equity market performance. Unlocking in 2017 was favorable $16 million primarily related to impacts of the net investment earned rate and mortality assumptions, while the 2016 unlocking impacts were unfavorable by $38 million.

Dividends to policyholders increased by $64 million to $129 million in the nine months ended September 30, 2017 from $65 million in the prior period, primarily attributed to higher Germany dividends to policyholders due to a timing difference in the recognition of participating income under US GAAP compared to German GAAP.

Policy and other operating expenses increased by $32 million to $479 million in 2017 from $447 million in 2016, primarily attributed to higher integration, restructuring and other non-operating expenses mainly due to Germany restructuring costs, partially offset by lower stock compensation due to the expense resulting from the accelerated vesting of shares in the prior year. The remaining increase was primarily attributed to growing our business and expanding our distribution channels.

Taxes

Income tax expense increased by $126 million to $53 million in nine months ended September 30, 2017 from a benefit of $73 million in the prior period. The increase was primarily driven by a release of a deferred tax valuation allowance of $102 million in third quarter of 2016 and the increase in income subject to U.S. income taxes of $87 million, or approximately $31 million of tax based on a 35% U.S. statutory rate, partially offset by a Germany income tax benefit in 2017.

Our effective tax rates were 5% in nine months ended September 30, 2017 and (22)% in the prior period. Our effective tax rates may vary year-to-year depending upon the relationship of income and loss subject to tax compared to consolidated income and loss before income taxes.

Results of Operations by Segment

The following summarizes our operating income, net of tax by segment:

	Three months ended September 30,		Nine months ended September 30,	
(In millions, except percentages)	2017	2016	2017	2016
Operating income, net of tax by segment				
Retirement Services	$ 244	$ 142	$ 786	$ 535
Corporate and Other	(13)	(25)	(9)	(87)
Operating income, net of tax	$ 231	$ 117	$ 777	$ 448
Retirement Services operating ROE excluding AOCI	18.5%	13.0%	21.3%	16.8%

Retirement Services

Retirement Services is comprised of our United States and Bermuda operations which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure MYGAs, FIAs, traditional one year guarantee fixed deferred annuities, immediate annuities and institutional products from our reinsurance partners. In addition, our institutional operations, including funding agreements and PRT obligations, are included in our Retirement Services segment.

Three Months Ended September 30, 2017 Compared to the Three Months Ended September 30, 2016

Operating Income, Net of Tax

Operating income, net of tax increased by $102 million, or 72%, to $244 million in the three months ended September 30, 2017, from $142 million in the prior period. Operating income, net of tax, excluding notable items was $250 million, an increase of $63 million, or 34%, over the prior year. Operating ROE excluding AOCI was 18.5%, up from 13.0% in the prior period. The increase in operating income, net of tax excluding notable items was primarily driven by higher fixed and other investment income, partially offset by lower alternative investment income.

Net investment income increased $57 million driven by higher fixed income and other investment income, partially offset by lower alternative investment income. Fixed income and other investment income increased primarily attributed to earnings from growth in invested assets of $6.4 billion and higher short-term interest rates resulting in higher floating rate investment income. Alternative investment income decreased primarily due to the prior year benefiting from higher credit fund income due to more favorable credit spread tightening.

Notable items for the quarter included unlocking and out of period actuarial adjustments of $13 million. Our annual unlocking of assumptions resulted in an increase to other liability costs of $20 million compared to an increase of $158 million in prior year. Unlocking in the third quarter of 2017 related to impacts of the net investment earned rate and mortality assumptions, while 2016 related to a decrease in the projected net investment earned rates and lower projected lapse rate assumptions. The tax effect of these notable items for the quarter was $1 million compared to $11 million in the prior year. Additionally, in 2016 we recognized a $102 million deferred tax valuation allowance release.

Investment Margin on Deferred Annuities

	Three months ended September 30,	
	2017	2016
Net investment earned rate	4.64%	4.75%
Cost of crediting	1.88%	1.96%
Investment margin on deferred annuities	2.76%	2.79%

Investment margin on deferred annuities decreased by 3 basis points to 2.76% in the three months ended September 30, 2017, from 2.79% in the prior period. The decrease in the investment margin on deferred annuities was driven by the decrease in net investment earned rate of 11 basis points, partially offset by a favorable decrease in cost of crediting of 8 basis points.

Net investment earned rate decreased due to the decrease in alternative investment net investment earned rate, partially offset by the increase in fixed income and other investment income earned rate. The fixed income and other net investment earned rate increased in the three months ended September 30, 2017, to 4.44% from 4.36% in the prior period primarily attributed to higher short-term interest rates resulting in higher floating rate investment income and higher cash balances during the three months ended September 30, 2016. The alternative investments net investments earned rate decreased to 9.79% in the three months ended September 30, 2017, from 14.26% in the prior period primarily attributed to the prior year benefiting from higher credit fund income due to more favorable credit spread tightening. The net investment earned rates continue to reflect impacts of holding approximately 28% of total invested assets in floating rate investments and 2% of invested assets in cash holdings to opportunistically capitalize on market dislocations.

Cost of crediting on deferred annuities decreased by 8 basis points to 1.88% in the three months ended September 30, 2017, from 1.96% in the prior period. The decrease in cost of crediting was driven by recent rate actions and lower option costs. We continue to focus on pricing discipline, managing interest rates credited to policyholders and managing the cost of options to fund the annual index credits on our FIA products.

Nine Months Ended September 30, 2017 Compared to the Nine Months Ended September 30, 2016

Operating Income, Net of Tax

Operating income, net of tax increased by $251 million, or 47%, to $786 million in the nine months ended September 30, 2017, from $535 million in the prior period. Operating ROE excluding AOCI was 21.3%, up from 16.8% in the prior period. The increase in operating income, net of tax, was primarily driven by an increase in net investment income and lower other liability costs, partially offset by higher cost of crediting.

Net investment income increased $257 million driven primarily by earnings from growth in invested assets of $6.4 billion attributed to a strong increase in deposits over the prior twelve months, higher short-term interest rates resulting in higher floating rate investment income and proceeds on the recovery of a bond previously written down, partially offset by lower bond call income.

Other liability costs decreased $139 million driven by unlocking and favorable impacts related to improved equity market performance, partially offset by growth in the block of business and higher gross profits. Our annual unlocking of assumptions resulted in an increase to other liability costs of $20 million compared to an increase of $158 million in prior year. Unlocking in 2017 related to impacts of the net investment earned rate and mortality assumptions, while 2016 related to a decrease in the projected net investment earned rates and lower projected lapse rate assumptions. Additionally, in 2016 we recognized a $102 million deferred tax valuation allowance release.

Cost of crediting increased $40 million driven by growth in our deferred annuity block of business which was partially offset by recent rate actions and lower option costs.

Investment Margin on Deferred Annuities

	Nine months ended September 30,	
	2017	2016
Net investment earned rate	4.75%	4.64%
Cost of crediting	1.89%	1.97%
Investment margin on deferred annuities	2.86%	2.67%

Investment margin on deferred annuities increased by 19 basis points to 2.86% in nine months ended September 30, 2017, from 2.67% in the prior period. The increase in the investment margin on deferred annuities was driven by the increase in net investment earned rate of 11 basis points, showing strength in our investment portfolio, and a favorable decrease in cost of crediting of 8 basis points.

Net investment earned rate increased due to the increase in fixed income and other investment income earned rate. The fixed income and other net investment earned rate increased in the nine months ended September 30, 2017, to 4.50% from 4.38% in the prior period primarily attributed to higher short-term interest rates resulting in higher floating rate investment income, higher cash balances during the prior year and the proceeds from a bond previously written down, partially offset by lower bond call income. The alternative investments net investments earned rate remained consistent with prior year, 10.86% compared to 10.85% in the prior period, as higher income from our investment in AmeriHome was offset by lower credit fund income. The net investment earned rates continue to reflect impacts of holding approximately 28% of total invested assets in floating rate investments and 2% of invested assets in cash holdings to opportunistically capitalize on market dislocations.

Cost of crediting on deferred annuities decreased by 8 basis points to 1.89% in nine months ended September 30, 2017, from 1.97% in the prior period. The decrease in cost of crediting was driven by recent rate actions and lower option costs. We continue to focus on pricing discipline, managing interest rates credited to policyholders and managing the cost of options to fund the annual index credits on our FIA products.

Corporate and Other

Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based compensation and intersegment eliminations. In Corporate and Other, we also hold capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

Operating Income (Loss), Net of Tax

Operating loss, net of tax decreased by $12 million to $13 million in the three months ended September 30, 2017, from $25 million in the prior period. In the third quarter 2017, our German operation had an operating loss of $17 million, primarily driven by policyholder dividends related to a timing difference in recognition of participating income under U.S. GAAP compared to German GAAP. Operating income, net of tax excluding this notable item was $4 million, compared to a loss of $18 million in the prior year, excluding $7 million operating loss from our German operation. The increase in operating income, net of tax excluding this item was driven by alternative investment losses in the prior year resulting from a decline in the market value of public equity positions in one of our funds, partially offset by the prior year benefiting from higher credit fund income due to more favorable credit spread tightening.

Operating loss, net of tax decreased by $78 million to $9 million in the nine months ended September 30, 2017, from $87 million in the prior period. The decrease in operating loss, net of tax, was mainly driven by alternative investment losses in the prior year resulting from a decline in the market value of public equity positions in one of our funds, a decline in energy markets in the prior year, and higher CMBS fund income in the prior year. The higher alternative investment income was partially offset by a $28 million operating loss from our German operations, a decline of $27 million from the prior year, primarily driven by unfavorable policyholder dividends due to timing difference in the recognition of participating income under US GAAP compared to German GAAP.

Consolidated Investment Portfolio

We had consolidated investments, including related parties, of $81.2 billion and $72.4 billion as of September 30, 2017 and December 31, 2016, respectively. Our investment strategy seeks to achieve sustainable risk-adjusted returns through disciplined managing of investment characteristics with our long-duration liabilities and the diversification of risk. The investment strategies utilized by our investment managers focus primarily on a buy and hold asset allocation strategy that may be adjusted periodically in response to changing market conditions and the nature of our liability profile. The majority of our investment portfolio, excluding investments of our German subsidiary, are managed by AAM, an indirect subsidiary of Apollo founded for the express purpose of managing Athene’s portfolio. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence, and certain operational support services, including investment compliance, tax, legal and risk management support. Our relationship with AAM and Apollo allows us to take advantage of our generally illiquid liability profile by identifying investment opportunities with an emphasis on earning incremental yield by taking liquidity and complexity risk rather than assuming solely credit risk. The deep experience of the AAM investment team and Apollo’s credit portfolio managers assist us in sourcing and underwriting complex asset classes. AAM has selected a diverse array of corporate bonds and more structured, but highly rated asset classes. We also maintain holdings in floating rate and less rate-sensitive instruments, including CLOs, non-agency RMBS and various types of structured products. In addition to our fixed income portfolio, we opportunistically allocate 5-10% of our portfolio to alternative investments where we primarily focus on fixed income-like, cash flow-based investments.

Our invested assets, which are those which directly back our policyholder liabilities as well as surplus assets (as previously discussed in *Key Operating and Non-GAAP Measures*), were $78.8 billion and $71.8 billion as of September 30, 2017 and December 31, 2016, respectively. AAM manages, directly and indirectly, approximately $73.1 billion and AAME and affiliates sub-advises approximately $5.4 billion, which in the aggregate constitute the vast majority of our investment portfolio as of September 30, 2017, comprising a diversified portfolio of fixed maturity and other securities. Through our relationship with Apollo, AAM has identified unique investment opportunities for us. AAM’s knowledge of our funding structure and regulatory requirements allows it to design customized strategies and investments for our portfolio.

Our asset portfolio is managed within the limits and constraints set forth in our Investment and Credit Risk Policy. Under this policy, we set limits on investments in our portfolio by asset class, such as corporate bonds, emerging markets securities, municipal bonds, non-agency RMBS, CMBS, CLOs, commercial mortgage whole loans and mezzanine loans and investment funds. We also set credit risk limits for exposure to a single issuer that vary based on the issuer's ratings. In addition, our investment portfolio is constrained by its scenario-based capital ratio limit and its stressed liquidity limit.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following table presents the carrying values of our total investments and investments in related parties:

	September 30, 2017			December 31, 2016		
(In millions, except percentages)	Carrying Value		Percent of Total	Carrying Value		Percent of Total
AFS securities, at fair value						
Fixed maturity securities	$	58,516	72.2%	$	52,033	71.8%
Equity securities		318	0.4%		353	0.5%

Total investments, including related party	$	81,183	100.0%	$	72,433	100.0%

The increase in our total investments, including related parties, as of September 30, 2017 of $8.8 billion compared to December 31, 2016 was driven by strong growth in deposits, unrealized gains on AFS securities including related parties, an increase in derivative assets and reinvestment of earnings. The strong growth in deposits was attributed to $8.0 billion of organic growth for the nine months ended September 30, 2017, partially offset by liability outflows. Unrealized gains on AFS securities including related parties were $1.5 billion attributed to credit spreads tightening and U.S. treasury rates declining in the nine months ended September 30, 2017. Derivative assets increased by $612 million primarily attributed to an increase in equity markets during 2017 as the S&P 500 index increased by 12.5%.

Our investment portfolio consists largely of high quality fixed maturity securities, loans and short-term investments, as well as additional opportunistic holdings in investment funds and other instruments, including a small amount of equity holdings. Fixed maturity securities and loans include publicly issued corporate bonds, government and other sovereign bonds, privately placed corporate bonds and loans, mortgage loans, CMBS, RMBS, CLOs, and other asset-backed securities (ABS).

While the substantial majority of our investment portfolio has been allocated to corporate bonds and structured credit products, a key component of our investment strategy is the opportunistic acquisition of investment funds with attractive risk and return profiles. Our investment fund portfolio consists of funds that employ various strategies including real estate and other real assets funds, credit funds, private equity funds and hedge funds. We currently target investments that are fixed-income-like or income producing and that have embedded downside protection. We also prefer investment funds that have a high degree of co-investment, have a stated maturity value or have reduced volatility versus pure equity. A majority of our investments in traditional private equity investments and hedge funds are a result of the acquisition of Aviva USA, which had existing private equity and hedge fund investment portfolios at the time of acquisition. We also acquired certain investment funds from AAA Investor (which are classified as private equity investments and consolidated VIEs) as a one-time capital contribution by our largest shareholder in advance of the Aviva USA acquisition. With respect to investment fund portfolios that we receive in these transactions, we actively reinvest these investments in our preferred credit-oriented strategies over time as we liquidate these holdings.

We hold derivatives for economic hedging purposes to reduce our exposure to the cash flow variability of assets and liabilities, equity market risk, interest rate risk, credit risk, and to a lesser extent, foreign exchange risk. Our primary use of derivative instruments relates to providing the income needed to fund the annual indexed credits on our FIA products. We primarily use fixed indexed options to economically hedge FIA products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specific market index.

With respect to derivative positions, we transact with highly rated counterparties, and do not expect the counterparties to fail to meet their obligations under the contracts. We generally use industry standard agreements and annexes with bilateral collateral provisions to further reduce counterparty credit exposure.

AFS Securities

We invest with the intent to hold investments to maturity. In selecting investments we attempt to source investments that match our future cash flow needs. However, we may sell any of our investments in advance of maturity in order to timely satisfy our liabilities as they become due or in order to respond to a change in the credit profile or other characteristics of the particular investment.

AFS fixed maturity securities are carried at fair value on our condensed consolidated balance sheets. Changes in fair value for our AFS portfolio, net of related DAC, DSI and VOBA amortization and the change in rider reserves, are charged or credited to other comprehensive income, net of tax. Declines in fair value that are other than temporary are recorded as realized losses in the condensed consolidated statements of income, net of any applicable non-credit component of the loss, which is recorded as an adjustment to other comprehensive income.

The distribution of our AFS securities, including related parties, by type is as follows:

	September 30, 2017				
(In millions, except percentages)	Cost or Amortized Cost	Unrealized Gain	Unrealized Loss	Fair Value	Percent of Total

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Fixed Maturity Securities

We maintain a diversified AFS portfolio of corporate fixed maturity securities across industries and issuers, and a diversified portfolio of structured securities. The composition of our AFS fixed maturity securities, including related parties, is as follows:

(In millions, except percentages)	September 30, 2017		December 31, 2016	
	Fair Value	Percent of Total	Fair Value	Percent of Total
Corporate				
Industrial other[1]	$ 11,469	19.5%	$ 10,645	20.3%
Financial	10,955	18.6%	9,156	17.5%
Utilities	7,705	13.1%	6,588	12.6%
Communication	2,556	4.3%	2,235	4.3%
Transportation	1,773	3.0%	1,396	2.7%

Total structured securities	20,675	35.1%	18,913	36.0%
Total fixed maturity securities, including related parties	$ 58,925	100.0%	$ 52,368	100.0%

[1] *Includes securities within various industry segments including capital goods, basic industry, consumer cyclical, consumer non-cyclical, industrial, and technology.*

The fair value of our total fixed maturity securities, including related parties, was $58.9 billion and $52.4 billion as of September 30, 2017 and December 31, 2016, respectively. The increase was driven by strong growth in deposits over liability outflows, unrealized gains on AFS securities including related parties due to credit spreads tightening and U.S. treasury rates declining in the nine months ended September 30, 2017 and reinvestment of earnings.

The Securities Valuation Office (SVO) of the NAIC is responsible for the credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for filing on the relevant schedule of the NAIC Financial Statement Blank. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation and/or unit price. With important exceptions discussed below, if a security has been rated by an NRSRO, the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC designation	NRSRO equivalent rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC
6	CC and lower

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par, regardless of an investor's carrying value. In effect, the NRSRO rating assumes that the holder is the original purchaser at par. In contrast, the SVO's loan-backed and structured securities (LBaSS) methodology is focused on determining the risk associated with the recovery of the amortized cost of each security. Because the NAIC's methodology explicitly considers amortized cost and the likelihood of recovery of our investment, we view the NAIC's methodology as the most appropriate way to view our fixed maturity portfolio for purposes of evaluating credit quality since a large portion of our holdings were purchased and are carried at significant discounts to par.

Specific to LBaSS, the SVO has developed a ratings process and provides instruction on both modeled and non-modeled LBaSS. The modeled LBaSS process is specific to the RMBS and CMBS asset classes. In order to establish ratings at the individual security level, the SVO obtains loan-level analysis of each RMBS and CMBS using a selected vendor's proprietary financial model. The SVO ensures that the vendor has extensive internal quality-control processes in place and the SVO conducts its own quality-control checks of the selected vendor's valuation process. The SVO has retained the services of Blackrock to model RMBS and CMBS owned by U.S. insurers for all years presented herein. Blackrock provides five prices (breakpoints), based on each U.S. insurer's statutory book value price, to utilize in determining the NAIC designation for each modeled LBaSS. For non-modeled LBaSS (including ABS and CLOs) with the initial designation of NAIC 1 or NAIC 6, the designation remains the same through the life of the security. For non-modeled LBaSS with the initial designation of NAIC 2 through NAIC 5, the selected vendors are not utilized and the NAIC designations are set using a standardized table of breakpoints provided by the SVO for application to the insurer's statutory book value price. The NAIC designation determines the associated level of RBC that an insurer is required to hold for modeled LBaSS owned by the insurer. In general, under both the modeled and non-modeled LBaSS processes, the larger the discount to par value, the stronger the NAIC designation the LBaSS will have.

A summary of our AFS fixed maturity securities, including related parties, by NAIC designation (with our German operations applying NRSRO ratings to map to NAIC designations as noted above) is as follows:

	September 30, 2017			December 31, 2016		
(In millions, except percentages)	Amortized Cost	Fair Value	Percent of Total	Amortized Cost	Fair Value	Percent of Total
NAIC designation						
1	$ 30,520	$ 31,930	54.2%	$ 29,477	$ 30,211	57.7%
2	22,212	23,063	39.1%	18,348	18,617	35.5%
Total investment grade	52,732	54,993	93.3%	47,825	48,828	93.2%
3	3,014	3,077	5.2%	2,871	2,812	5.4%
4	750	731	1.3%	647	622	1.2%
5	78	75	0.1%	87	82	0.2%
6	47	49	0.1%	21	24	-%
Total below investment grade	3,889	3,932	6.7%	3,626	3,540	6.8%
Total fixed maturity securities, including related parties	$ 56,621	$ 58,925	100.0%	$ 51,451	$ 52,368	100.0%

Substantially all of our AFS fixed maturity portfolio, 93.3% and 93.2% as of September 30, 2017 and December 31, 2016, respectively, was invested in assets considered investment grade with a NAIC designation of 1 or 2.

A summary of our AFS fixed maturity securities, including related parties, by NRSRO ratings is set forth below:

(In millions, except percentages)	September 30, 2017		December 31, 2016	
	Fair Value	Percent of Total	Fair Value	Percent of Total
NRSRO rating agency designation				
AAA/AA/A	$ 20,451	34.7%	$ 18,791	35.9%
BBB	21,897	37.2%	18,002	34.4%
Non-rated[1]	6,671	11.3%	5,650	10.8%
Total investment grade	49,019	83.2%	42,443	81.1%
BB	3,094	5.2%	3,286	6.3%
B	1,278	2.2%	1,372	2.6%
CCC	2,624	4.4%	2,374	4.5%
CC and lower	2,274	3.9%	2,404	4.6%
Non-rated[1]	636	1.1%	489	0.9%
Total below investment grade	9,906	16.8%	9,925	18.9%
Total fixed maturity securities, including related parties	$ 58,925	100.0%	$ 52,368	100.0%

[1] *Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC designation.*

Consistent with the NAIC Process and Procedures Manual, an NRSRO rating was assigned based on the following criteria: (a) the equivalent S&P rating where the security is rated by one NRSRO; (b) the equivalent S&P rating of the lowest NRSRO when the security is rated by two NRSROs; and (c) the equivalent S&P rating of the second lowest NRSRO if the security is rated by three or more NRSROs. If the lowest two NRSRO ratings are equal, then such rating will be the assigned rating. NRSRO ratings available for the periods presented were S&P, Fitch, Moody's Investor Service (Moody's), DBRS, and Kroll Bond Rating Agency, Inc. (KBRA).

The portion of our AFS fixed maturity portfolio that was considered below investment grade based on NRSRO ratings was 16.8% and 18.9% as of September 30, 2017 and December 31, 2016, respectively. The primary driver of the difference in the percentage of securities considered below investment grade by NRSROs as compared to the securities considered below investment grade by the NAIC relates to the difference in methodologies between the NRSRO and NAIC for RMBS due to investments acquired at a discount to par value, as discussed above.

As of September 30, 2017 and December 31, 2016, the non-rated securities shown above were comprised of 41% and 43%, respectively, of corporate private placement securities for which we have not sought individual ratings from the NRSROs and 43% and 44%, respectively, of RMBS, many of which were acquired at a significant discount to par. We rely on internal analysis of credit risk and designations assigned by the NAIC. As of September 30, 2017 and December 31, 2016, 91% and 92%, respectively, of the non-rated securities were designated NAIC 1 or 2.

Asset-backed Securities - We invest in ABS which are securitized by pools of assets such as consumer loans, student loans, insurance-linked securities, and corporate debt. These holdings were $4.0 billion and $3.0 billion as of September 30, 2017 and December 31, 2016, respectively. As of September 30, 2017 and December 31, 2016, our ABS portfolio included approximately $3.6 billion (92% of the total) and $2.7 billion (91% of the total), respectively, of securities that are considered investment grade based on NAIC designations, while approximately $3.5 billion (87% of the total) and $2.5 billion (85% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Collateralized Loan Obligations - We also invest in CLOs which pay principal and interest from cash flows received from underlying corporate loans. These holdings were $5.4 billion and $5.1 billion as of September 30, 2017 and December 31, 2016, respectively. As of September 30, 2017 and December 31, 2016, our CLO portfolio included approximately $4.5 billion (84% of the total) and $4.2 billion (83% of the total), respectively, of securities that are considered investment grade based on NAIC designations while approximately $4.6 billion (86% of the total) and $4.2 billion (82% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Commercial Mortgage-backed Securities - A portion of our fixed maturity AFS portfolio is invested in CMBS. CMBS are constructed from pools of commercial mortgages. These holdings were $1.9 billion and $1.8 billion as of September 30, 2017 and December 31, 2016, respectively. As of September 30, 2017 and December 31, 2016, our CMBS portfolio included approximately $1.8 billion (97% of the total) and $1.8 billion (97% of the total), respectively, of securities that are considered investment grade based on NAIC designations while approximately $1.3 billion (68% of the total) and $1.1 billion (60% of the total), respectively, of securities were considered investment grade based on NRSRO ratings.

Residential Mortgage-backed Securities - As part of our core investment strategy, a portion of our fixed maturity AFS portfolio is invested in RMBS. RMBS are securities constructed from pools of residential mortgages and backed by payments from those pools. Excluding limitations on access to lending and other extraordinary economic conditions, prepayments of principal on the underlying loans can be expected to accelerate with decreases in market interest rates and diminish with increases in interest rates. Our investments in RMBS are primarily non-agency RMBS having a significant focus on assets with attractive entry prices, which in general results in investment grade ratings by the NAIC given the likelihood that we ultimately receive principal and interest distributions in an amount at least equal to our cost. These holdings were $9.5 billion and $9.0 billion as of September 30, 2017 and December 31, 2016, respectively.

A summary of our AFS RMBS portfolio by NAIC designations and NRSRO quality ratings is as follows:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Fair Value	Percent of Total	Fair Value	Percent of Total
NAIC designation				
1	$ 8,928	94.2%	$ 8,652	96.4%
2	238	2.5%	140	1.6%
Total investment grade	9,166	96.7%	8,792	98.0%
3	187	2.0%	96	1.1%
4	76	0.8%	29	0.3%
5	40	0.4%	54	0.6%
6	11	0.1%	2	-%
Total below investment grade	314	3.3%	181	2.0%
Total RMBS	$ 9,480	100.0%	$ 8,973	100.0%
NRSRO rating agency designation				
AAA/AA/A	$ 273	2.9%	$ 345	3.8%
BBB	347	3.7%	245	2.7%
Non-rated[1]	2,974	31.3%	2,638	29.5%
Total investment grade	3,594	37.9%	3,228	36.0%
BB	450	4.7%	419	4.7%
B	500	5.3%	567	6.3%
CCC	2,520	26.6%	2,280	25.4%
CC and lower	2,268	23.9%	2,395	26.7%
Non-rated[1]	148	1.6%	84	0.9%
Total below investment grade	5,886	62.1%	5,745	64.0%
Total RMBS	$ 9,480	100.0%	$ 8,973	100.0%

[1] *Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC designations.*

A significant majority of our RMBS portfolio, 96.7% and 98.0% as of September 30, 2017 and December 31, 2016, respectively, was invested in assets considered investment grade by the NAIC, with a NAIC designation of 1 or 2. As NRSRO ratings are focused on the likelihood of recovery of all contractual payments including principal at par, instead of the recovery of the amortized cost, the portion considered investment grade by NRSRO rating agencies of 37.9% and 36.0% as of September 30, 2017 and December 31, 2016, respectively, were lower than the NAIC designations. As we focus on acquiring RMBS assets with attractive entry prices, some of these assets have experienced deterioration in credit quality since their issuance and the vast majority of our purchases of such assets occurred after such deterioration at a discount to par value resulting in a statutory book price that yields an investment grade NAIC designation. As a result of deterioration in credit quality since issuance, these securities are generally considered below investment grade based on NRSRO methodologies. As a result, we have a significant difference in the number of securities considered below investment grade when evaluated under the NRSRO methodologies when compared with the designations evaluated under the NAIC methodology.

Unrealized Losses

Our investments in fixed maturity securities, including related parties, are reported at fair value with changes in fair value recorded in other comprehensive income. Certain of our fixed maturity securities, including related parties, have experienced declines in fair value that we consider temporary in nature. As of September 30, 2017, our fixed maturity securities, including related parties, had a fair value of $58.9 billion, which was approximately 4.1% above amortized cost of $56.6 billion. As of December 31, 2016, our fixed maturity securities, including related parties, had a fair value of $52.4 billion, which was approximately 1.8% above amortized cost of $51.5 billion. These investments are held to support our product liabilities and we currently have the intent and ability to hold these securities until sale or maturity, and believe the securities will recover the amortized cost basis prior to sale or maturity.

The following tables reflect the unrealized losses on the AFS fixed maturity portfolio, including related parties, by NAIC designations:

	September 30, 2017					
(In millions, except percentages)	Amortized Cost of Securities with Unrealized Loss	Gross Unrealized Loss	Fair Value of Securities with Unrealized Loss	Fair Value to Amortized Cost Ratio	Fair Value of Total AFS Fixed Maturity Securities	Percent of Loss to Total AFS Fair Value NAIC Designation
NAIC designation						
1	$ 5,026	$ (127)	$ 4,899	97.5%	$ 31,930	(0.4)%
2	3,660	(85)	3,575	97.7%	23,063	(0.4)%
Total investment grade	8,686	(212)	8,474	97.6%	54,993	(0.4)%
3	921	(21)	900	97.7%	3,077	(0.7)%
4	389	(35)	354	91.0%	731	(4.8)%
5	33	(4)	29	87.9%	75	(5.3)%
6	12	(1)	11	91.7%	49	(2.0)%
Total below investment grade	1,355	(61)	1,294	95.5%	3,932	(1.6)%
Total	$ 10,041	$ (273)	$ 9,768	97.3%	$ 58,925	(0.5)%

	December 31, 2016					
(In millions, except percentages)	Amortized Cost of Securities with Unrealized Loss	Gross Unrealized Loss	Fair Value of Securities with Unrealized Loss	Fair Value to Amortized Cost Ratio	Fair Value of Total AFS Fixed Maturity Securities	Percent of Loss to Total AFS Fair Value NAIC Designation
NAIC designation						
1	$ 8,805	$ (272)	$ 8,533	96.9%	$ 30,211	(0.9)%
2	6,156	(220)	5,936	96.4%	18,617	(1.2)%
Total investment grade	14,961	(492)	14,469	96.7%	48,828	(1.0)%
3	1,769	(103)	1,666	94.2%	2,812	(3.7)%
4	329	(35)	294	89.4%	622	(5.6)%
5	34	(6)	28	82.4%	82	(7.3)%
6	1	-	1	100.0%	24	-%
Total below investment grade	2,133	(144)	1,989	93.2%	3,540	(4.1)%
Total	$ 17,094	$ (636)	$ 16,458	96.3%	$ 52,368	(1.2)%

The gross unrealized losses on AFS fixed maturity securities, including related parties, were $273 million and $636 million as of September 30, 2017 and December 31, 2016, respectively. The decrease in unrealized losses was driven by credit spreads tightening and U.S. treasury rates declining during nine months ended September 30, 2017, resulting in an increase in unrealized gains.

As of September 30, 2017 and December 31, 2016, we held $4.1 billion and $3.6 billion, respectively, in energy sector fixed maturity securities, or 7% of the total fixed maturity securities in both periods, including related parties for each period. The gross unrealized capital losses on these securities were $35 million and $73 million, or 13% and 11% of the total unrealized losses, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Other-Than-Temporary Impairments

For our OTTI policy and the identification of securities that could potentially have impairments, see *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* and *Note 2 - Investments* to the condensed consolidated financial statements, as well as *Critical Accounting Estimates and Judgments.*

During the nine months ended September 30, 2017, we recorded $25 million of OTTI losses comprised of $13 million related to corporate fixed maturities, $5 million related to mortgage loans, $3 million related to real estate, $1 million related to ABS, $1 million related to CMBS, $1 million related to equity securities and $1 million related to RMBS. Of the OTTI losses recognized during nine months ended September 30, 2017, $1 million related to the energy sector. During the nine months ended September 30, 2016, we recorded $27 million of OTTI losses comprised of $13 million related to state, municipal and political subdivisions, $6 million related to corporate fixed maturities, $5 million related to ABS, $2 million related to RMBS and $1 million related to other assets. Of the OTTI losses recognized during 2016, $4 million related to the energy sector. The annualized OTTI losses we have experienced for the nine months ended September 30, 2017 and 2016, translate into 4 basis points and 5 basis points, respectively, of average invested assets.

International Exposure

A portion of our fixed maturity securities are invested in securities with international exposure. As of each of September 30, 2017 and December 31, 2016, 32% of the carrying value of our fixed maturity securities, including related parties was comprised of securities of issuers based outside of the United States and debt securities of foreign governments. These securities are either denominated in U.S. dollars or do not expose us to significant foreign currency risk as a result of foreign currency swap arrangements.

The following table presents our international exposure in our fixed maturity securities portfolio, including related parties, by country or region:

	September 30, 2017			December 31, 2016		
(In millions, except percentages)	Amortized Cost	Fair Value	Percent of Total	Amortized Cost	Fair Value	Percent of Total
Country of risk						
Ireland	$ 534	$ 546	2.9%	$ 510	$ 516	3.1%
Italy	49	53	0.3%	90	92	0.6%
Spain	224	237	1.2%	175	190	1.1%
Total Portugal, Ireland, Italy, Greece and Spain[1]	807	836	4.4%	775	798	4.8%
Other Europe	7,597	7,847	41.8%	6,336	6,512	39.2%
Total Europe	8,404	8,683	46.2%	7,111	7,310	44.0%
Non-U.S. North America	7,582	7,726	41.1%	7,185	7,105	42.8%
Australia & New Zealand	1,300	1,342	7.1%	1,283	1,304	7.9%
Central & South America	491	521	2.8%	456	467	2.8%
Africa & Middle East	157	163	0.9%	164	167	1.0%
Asia/Pacific	292	300	1.6%	216	218	1.3%
Supranational	53	53	0.3%	26	27	0.2%
Total	$ 18,279	$ 18,788	100.0%	$ 16,441	$ 16,598	100.0%

[1] *As of each of March 31, 2017 and December 31, 2016, we had no holdings in Portugal or Greece.*

Approximately 90.4% and 89.7% of these securities are investment grade by NAIC designation as of September 30, 2017 and December 31, 2016, respectively. As of September 30, 2017, 8% of our fixed maturity securities, including related parties, were invested in CLOs of Cayman Islands issuers (for which underlying investments are largely loans to U.S. issuers), 6% were invested in securities of non-U.S. issuers by our German Group Companies and 18% were invested in other non-U.S. issuers.

Portugal, Ireland, Italy, Greece and Spain continue to represent credit risk as economic conditions in these countries continue to be volatile, especially within the financial and banking sectors. We had $836 million and $798 million as of September 30, 2017 and December 31, 2016, respectively, of exposure in these countries, of which $185 million and $237 million, respectively, were a result of investments acquired from the DLD acquisition in 2015.

The effects on our investments in non-U.S. securities as a result of Brexit is unknown at this time, but the effects of Brexit are likely to lead to greater volatility in global financial markets in the near term. As of September 30, 2017, we held United Kingdom and Channel Islands fixed maturity securities of $1.6 billion, or 2.8% of the total fixed maturities including related parties. As of September 30, 2017, these securities were in an unrealized gain position of $47 million. Our investment managers analyze each holding for credit risk by economic and other factors of each country and industry.

Trading Securities

Trading securities, including related parties, were $2.8 billion as of each of September 30, 2017 and December 31, 2016. Trading securities are primarily comprised of AmerUs Closed Block securities for which we have elected the fair value option valuation, CLO equity tranche securities, structured securities with embedded derivatives, and investments which support various reinsurance arrangements.

Mortgage Loans

The following is a summary of our mortgage loan portfolio by collateral type:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Net Carrying Value	Percent of Total	Net Carrying Value	Percent of Total
Property type				
Office building	$ 1,340	20.8%	$ 1,217	22.2%
Retail	1,130	17.5%	1,135	20.7%
Hotels	1,108	17.2%	1,025	18.7%
Industrial	940	14.6%	742	13.6%
Apartment	580	9.0%	616	11.3%
Other commercial [1]	405	6.3%	397	7.3%
Total net mortgage loans	5,503	85.4%	5,132	93.8%
Residential loans	942	14.6%	338	6.2%
Total mortgage loans, net of allowances	$ 6,445	100.0%	$ 5,470	100.0%

[1] *Other commercial loans include investments in nursing homes, other healthcare institutions, parking garages, storage facilities and other commercial properties.*

We invest a portion of our investment portfolio in mortgage loans, which are generally comprised of high quality commercial first lien and mezzanine real estate loans. Our mortgage loan holdings were $6.4 billion and $5.5 billion as of September 30, 2017 and December 31, 2016, respectively. This included $1.8 billion and $1.5 billion of mezzanine mortgage loans for the respective periods. We have acquired mortgage loans through acquisitions and reinsurance arrangements, as well as through an active program to invest in new mortgage loans. We invest in mortgage loans on income producing properties including hotels, apartments, retail and office buildings, and other commercial and industrial properties. Loan-to-value ratios at the time of loan approval are generally 75% or less.

Our mortgage loans are primarily stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Amortization of premiums and discounts is recorded using the effective interest method. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income.

It is our policy to cease to accrue interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. As of September 30, 2017, we had $6 million of mortgage loans that were 90 days past due and $1 million in the process of foreclosure. As of December 31, 2016, we had $21 million of mortgage loans that were 90 days past due and $20 million in the process of foreclosure.

See *Note 2 - Investments* to the condensed consolidated financial statements for information regarding valuation allowance for collection loss, impairments, loan-to-value, and debt service coverage.

As of September 30, 2017 and December 31, 2016, we had not recorded any new specific loan valuation allowances and we recorded $5 million and $0 million, respectively, of OTTI through net income. We have established a general and specific loan valuation allowance in the aggregate amount of $2 million as of September 30, 2017 and December 31, 2016, attributable to loans acquired in connection with the acquisition of Aviva USA.

Investment Funds and Variable Interest Entities

Our investment funds investment strategy primarily focuses on funds with core holdings of credit assets, real assets, real estate, preferred equity and income producing assets. Our investment strategy focuses on sourcing assets with the following characteristics: (1) investments that constitute a direct investment or an investment in a fund with a high degree of co-investment; (2) investments with debt-like characteristics, or alternatively, investments with reduced volatility when compared to pure equity; and (3) investments including some element of downside protection as compared to a pure directional investment. A significant amount of our current investment funds and VIE holdings are comprised of certain investment funds contributed by the AAA Investor (AAA Contribution) as further described in *Note 4 - Variable Interest Entities* to the condensed consolidated financial statements, and investment funds we acquired in the Aviva USA acquisition.

At the time of the AAA Contribution, the contributed assets largely consisted of co-investments with Apollo private equity funds. However, the attributes of the contributed assets have changed significantly since the initial transaction primarily due to the initial public offering of two underlying fund investment holdings. As of September 30, 2017, the assets consisted of $288 million of publicly-traded equity securities, a substantial portion of which is in the process of being liquidated. These public equity securities have resulted in volatility in our statement of income in recent periods. At the end of the third quarter of 2016, Norwegian Cruise Line Holdings Ltd. (NCLH) was distributed from CoInvest VI to NCL Athene, LLC (NCL LLC), resulting in the investment being classified as an AFS security with any unrealized gains and losses recognized in AOCI, thereby reducing further volatility in our statement of income from this fund. See *Note 4 - Variable Interest Entities* to the condensed consolidated financial statements for further discussion of NCL LLC.

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary. See *Note 4 - Variable Interest Entities* to the condensed consolidated financial statements for further discussion on our investment funds that meet the criteria for consolidation and the accounting treatment for them.

The following table illustrates our consolidated VIE positions:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
Assets of consolidated VIEs				
Investments				
Available-for-sale securities				
Equity securities	$ 173	17.9%	$ 161	17.5%
Trading securities	195	20.2%	167	18.1%
Investment funds	593	61.5%	573	62.2%
Cash and cash equivalents	1	0.1%	14	1.5%
Other assets	3	0.3%	6	0.7%
Total assets of consolidated VIEs	$ 965	100.0%	$ 921	100.0%
Liabilities of consolidated VIEs				
Other liabilities	$ 47	100.0%	$ 34	100.0%
Total liabilities of consolidated VIEs	$ 47	100.0%	$ 34	100.0%

The assets of consolidated VIEs were $965 million and $921 million as of September 30, 2017 and December 31, 2016, respectively. The liabilities of consolidated VIEs were $47 million and $34 million as of September 30, 2017 and December 31, 2016, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following table illustrates our investment funds, including related party positions of our non-consolidated VIEs and investment funds owned by consolidated VIEs:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
Investment funds				
Private equity	$ 279	10.5%	$ 268	10.9%
Real estate and other real assets	166	6.2%	118	4.8%
Natural resources	5	0.2%	5	0.2%
Hedge funds	62	2.3%	72	2.9%
Credit funds	235	8.8%	226	9.2%
Total investment funds	747	28.0%	689	28.0%
Investment funds - related parties				
Private equity - A-A Mortgage	396	14.8%	343	13.9%
Private equity	176	6.6%	131	5.3%
Real estate and other real assets	245	9.2%	247	10.1%
Natural resources	78	2.9%	49	2.0%
Hedge funds	163	6.1%	192	7.8%
Credit funds	272	10.2%	236	9.6%
Total investment funds - related parties	1,330	49.8%	1,198	48.7%
Investment funds owned by consolidated VIEs				
Private equity - MidCap[1]	529	19.8%	524	21.3%
Credit funds	32	1.2%	38	1.6%
Real estate and other real assets	32	1.2%	11	0.4%
Total investment funds owned by consolidated VIEs	593	22.2%	573	23.3%
Total investment funds, including related parties and VIEs	$ 2,670	100.0%	$ 2,460	100.0%

[1] *MidCap is an underlying investment of one of our consolidated VIE investment funds.*

Overall, the total investment funds, including related parties and consolidated VIEs, were $2.7 billion and $2.5 billion as of September 30, 2017 and December 31, 2016, respectively. See *Note 4 - Variable Interest Entities* to the condensed consolidated financial statements for further discussion regarding how we account for our investment funds. Our investment fund portfolio is subject to a number of market related risks including interest rates and equity market risk. Interest rate risk represents the potential for changes in the investment fund's net asset values resulting from changes in the general level of interest rates. Equity market risk represents potential for changes in the investment fund's net asset values resulting from changes in equity markets or from other external factors which influence equity markets. We actively monitor our exposure to the risks inherent in these investments which could materially and adversely affect our results of operations and financial condition. The interest and equity market risks expose us to potential volatility in our earnings year-over-year related to these investment funds.

Funds Withheld at Interest

Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with modco and funds withheld reinsurance agreements in which we act as the reinsurer. Generally, assets equal to statutory reserves are withheld and legally owned by the ceding company. As of September 30, 2017, the ceding companies holding the assets pursuant to such reinsurance agreements had a financial strength rating of A- or better.

The funds withheld at interest is comprised of the host contract and an embedded derivative. We are subject to the investment performance on the withheld assets with the total return directly impacting the host contract and the embedded derivative. Interest accrues at a risk free rate on the host receivable and is recorded as net investment income in the condensed consolidated statements of income. The change in the embedded derivative in our reinsurance agreements are similar to a total return swap on the income generated by the underlying assets held by the ceding companies and is recorded in investment related gains (losses). Although we do not directly control the underlying investments in the funds withheld at interest, in each instance the ceding company has hired AAM to manage the withheld assets in accordance with our investment guidelines.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following summarizes the underlying investment composition of the funds withheld at interest:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Carrying Value	Percent of Total	Carrying Value	Percent of Total
Fixed maturity securities				
U.S. state, municipal and political subdivisions	$ 118	1.7%	$ 118	1.8%
Corporate	2,100	30.2%	1,800	27.6%
CLO	665	9.6%	591	9.0%
ABS	797	11.4%	736	11.3%
CMBS	286	4.1%	292	4.5%
RMBS	1,590	22.8%	1,551	23.7%
Equity securities	28	0.4%	29	0.4%
Mortgage loans	818	11.8%	773	11.8%
Investment funds	372	5.3%	329	5.0%
Derivative assets	63	0.9%	53	0.8%
Short-term investments	7	0.1%	80	1.2%
Cash and cash equivalents	100	1.4%	105	1.6%
Other assets and liabilities	20	0.3%	81	1.3%
Total funds withheld at interest	$ 6,964	100.0%	$ 6,538	100.0%

As of September 30, 2017 and December 31, 2016, we held $7.0 billion and $6.5 billion of funds withheld at interest receivables, respectively. Approximately 94.1% and 93.6% of the fixed maturity securities within the funds withheld at interest are investment grade by NAIC designation as of September 30, 2017 and December 31, 2016, respectively.

Derivative Instruments

We hold derivative instruments for economic hedging purposes to reduce our exposure to cash flow variability of assets and liabilities, equity market risk, interest rate risk, credit risk and foreign exchange risk. The types of derivatives we may use include interest rate swaps, foreign currency swaps and forward contracts, total return swaps, credit default swaps, variance swaps, futures and fixed indexed options.

A presentation of our derivative instruments along with a discussion of the business strategy involved with our derivatives is included in *Note 3 - Derivative Instruments* to the condensed consolidated financial statements. This includes:

- a comprehensive description of the derivatives instruments as well as the strategies to manage risk;
- the notional amounts and estimated fair value by derivative instruments; and
- impacts on the condensed consolidated statement of net income.

As part of our risk management strategies, management continually evaluates our derivative instrument holdings and the effectiveness of such holdings in addressing risks identified in our operations.

Invested Assets

The following summarizes our invested assets:

	September 30, 2017				December 31, 2016			
(In millions, except percentages)	U.S. and Bermuda Invested Asset Value	Germany Invested Asset Value	Total Invested Asset Value[1]	Percent of Total	U.S. and Bermuda Invested Asset Value	Germany Invested Asset Value	Total Invested Asset Value[1]	Percent of Total
Corporate	$ 34,759	$ 1,713	$ 36,472	46.3%	$ 31,000	$ 1,682	$ 32,682	45.4%

Total invested assets	$ 72,891	$ 5,913	$ 78,804	100.0%	$ 66,544	$ 5,290	$ 71,834	100.0%

[1] Refer to *Key Operating and Non-GAAP Measures* for the definition of invested assets.

Our total invested assets were $78.8 billion and $71.8 billion as of September 30, 2017 and December 31, 2016, respectively. As of September 30, 2017, our total invested assets were mainly comprised of 46.3% of corporate securities, 29.8% of structured securities, 9.2% of mortgage loans and 4.5% of alternative investments. Corporate securities within our U.S. and Bermuda portfolio included $9.1 billion of private placements, which represented approximately 12% of our total U.S. and Bermuda invested assets. The increase in total invested assets as of September 30, 2017 from December 31, 2016 was primarily driven by strong growth in deposits over liability outflows and reinvestment of earnings.

In managing our business we utilize invested assets as presented in the above table. Invested assets do not correspond to the total investments, including related parties, on our condensed consolidated balance sheets, as discussed previously in *Key Operating and Non-GAAP Measures*. Invested assets represent the investments that directly back our policyholder liabilities and surplus assets. We believe this view of our portfolio provides a view of the assets for which we have economic exposure. We adjust the presentation for funds withheld and modco transactions to include or exclude the underlying investments based upon the contractual transfer of economic exposure to such underlying investments. We also deconsolidate any VIEs in order to show the net investment in the funds, which therefore are included in the alternative investments line above.

The Germany investment portfolio composition differs from the U.S. and Bermuda portfolio primarily due to the geographic location, regulatory environment and participating nature of the German products and therefore the portfolio is managed separately from our U.S. and Bermuda portfolios. The German invested assets are predominantly invested in foreign government securities, corporate fixed income securities, real estate held for investment and assets backing our unit linked policies. The German invested assets are predominantly invested in Euro-denominated securities and investments.

Invested assets is utilized by management to evaluate our investment portfolio. Invested asset figures are used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Invested assets is also used in our risk management processes for asset purchases, product design and underwriting, stress scenarios, liquidity, and ALM.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following summarizes our alternative investments:

	September 30, 2017		December 31, 2016	
(In millions, except percentages)	Invested Asset Value	Percent of Total	Invested Asset Value	Percent of Total
Credit funds	$ 797	22.2%	$ 834	24.3%
Private equity - MidCap	529	14.7%	524	15.3%
Private equity - A-A Mortgage	486	13.6%	417	12.2%
Private equity - other	530	14.8%	519	15.2%
Mortgage and real assets	546	15.2%	470	13.7%
Hedge funds	274	7.6%	311	9.1%
Public equities	236	6.6%	215	6.3%
Natural resources and other real assets	189	5.3%	135	3.9%
Total alternative investments	$ 3,587	100.0%	$ 3,425	100.0%

Alternative investments were $3.6 billion and $3.4 billion as of September 30, 2017 and December 31, 2016, respectively, representing 4.5% and 4.8% of our total invested assets portfolio as of September 30, 2017 and December 31, 2016, respectively.

Alternative investments do not correspond to the total investment funds, including related parties and VIEs, on our condensed consolidated balance sheets. As discussed above in the invested assets section, we adjust the GAAP presentation for funds withheld and modco and de-consolidate VIEs. We also include CLO equity tranche securities in alternative investments due to their underlying characteristics and equity-like features.

Two of our largest alternative investments are in asset originators, MidCap and A-A Mortgage, both of which, from time to time, provide us with access to assets for our investment portfolio. As of September 30, 2017, we held equity positions in MidCap of $529 million. MidCap is a leading originator of senior debt capital in the middle-market with expertise in asset-backed loans, leveraged loans, real estate loans, discount loans and venture loans. MidCap represents a unique investment in an origination platform made available to us through our relationship with Apollo. As of September 30, 2017, we held an equity position in A-A Mortgage of $486 million. A-A Mortgage has an indirect investment in AmeriHome, which originates RMLs and mortgage servicing rights.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Non-GAAP Measure Reconciliations

The reconciliations to the nearest GAAP measure for operating income, net of tax is included in the *Consolidated Results of Operations* section.

The reconciliation of operating earnings, net of tax excluding notable items to net income available to AHL shareholders is as follows:

	Three months ended September 30,	
(In millions)	2017	2016
Operating income, net of tax excluding notable items by segment		
Retirement Services operating income, net of tax excluding notable items	$ 250	$ 187
Unlocking	(20)	(158)
Actuarial out of period adjustments	13	-
Deferred tax valuation allowance release	-	102
Tax effects of notable items	1	11
Retirement Services notable items	(6)	(45)
Retirement Services operating income, net of tax	244	142
Corporate and Other operating income, net of tax excluding notable items	4	(18)
Germany operating loss, net of tax	(17)	(7)
Corporate and Other operating income, net of tax	(13)	(25)
Operating income, net of tax	231	117
Total non-operating adjustments	43	9
Net income available to AHL shareholders	$ 274	$ 126

The reconciliation of AHL shareholders' equity to AHL shareholders' equity excluding AOCI included in the ROE excluding AOCI and operating income ROE excluding AOCI is as follows:

(In millions)	September 30, 2017	September 30, 2016
Total AHL shareholders' equity	$ 8,669	$ 7,031
Less: AOCI	1,162	920
Total AHL shareholders' equity excluding AOCI	$ 7,507	$ 6,111
Retirement Services	$ 5,371	$ 4,542
Corporate and Other	2,136	1,569
Total AHL shareholders' equity excluding AOCI	$ 7,507	$ 6,111

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The reconciliation of net investment income to net investment earnings and earned rate is as follows:

	Three months ended September 30,				Nine months ended September 30,			
	2017		2016		2017		2016	
(In millions, except percentages)					Dollar	Rate	Dollar	Rate
GAAP net investment income	$ 820	4.23%	$ 743	4.20%	$ 2,427	4.31%	$ 2,137	4.12%

Unit linked change in reserves	-	-%	(20)	(0.15)%	(17)	(0.04)%	(1)	-%
Other changes in interest sensitive contract liabilities	-	-%	1	0.01%	-	-%	-	-%
Total adjustments to arrive at cost of crediting on deferred annuities	(353)	(2.47)%	(232)	(1.76)%	(1,071)	(2.54)%	(326)	(0.86)%
Retirement Services cost of crediting on deferred annuities	$ 268	1.88%	$ 259	1.96%	$ 795	1.89%	$ 755	1.97%
Average account value	$ 57,050		$ 52,739		$ 56,102		$ 51,183	

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The reconciliation of total investments, including related parties, to invested assets is as follows:

(In millions)	September 30, 2017	December 31, 2016
Total investments, including related parties	$ 81,183	$ 72,433
Derivative assets	(1,982)	(1,370)
Cash and cash equivalents (including restricted cash)	3,707	2,502
Accrued investment income	626	554
Payables for collateral on derivatives	(1,896)	(1,383)
Reinsurance funds withheld and modified coinsurance	(537)	(414)
VIE assets, liabilities and noncontrolling interest	918	886
AFS unrealized (gain) loss	(2,594)	(1,030)
Ceded policy loans	(325)	(344)
Net investment receivables (payables)	(296)	-
Total adjustments to arrive at invested assets	(2,379)	(599)
Total invested assets	$ 78,804	$ 71,834

The reconciliation of total investment funds, including related parties and VIEs, to alternative investments within invested assets is as follows:

(In millions)	September 30, 2017	December 31, 2016
Investment funds, including related parties and VIEs	$ 2,670	$ 2,460
CLO equities included in trading securities	194	260
Investment funds within funds withheld at interest	372	329
Royalties, other assets included in other investments and other assets	77	81
Net assets of the VIE, excluding investment funds	274	295
Total adjustments to arrive at alternative investments	917	965
Alternative investments	$ 3,587	$ 3,425

The reconciliation of total liabilities to reserve liabilities is as follows:

(In millions)	September 30, 2017	December 31, 2016
Total liabilities	$ 87,392	$ 79,840
Derivative liabilities	(92)	(40)
Payables for collateral on derivatives	(1,896)	(1,383)
Funds withheld liability	(394)	(380)
Other liabilities	(1,024)	(688)
Liabilities of consolidated VIEs	(47)	(34)
Reinsurance ceded receivables	(5,768)	(6,001)
Policy loans ceded	(325)	(344)
Other	4	4
Total adjustments to arrive at reserve liabilities	(9,542)	(8,866)
Total reserve liabilities	$ 77,850	$ 70,974

Liquidity and Capital Resources

There are two forms of liquidity relevant to our business, funding liquidity and balance sheet liquidity. Funding liquidity relates to the ability to fund operations. Balance sheet liquidity relates to our ability to liquidate or rebalance our balance sheet without incurring significant costs from fees, bid-offer spreads, or market impact. We manage our liquidity position by matching projected cash demands with adequate sources of cash and other liquid assets. Our principal sources of liquidity are operating cash flows and holdings of cash, cash equivalents and other readily marketable assets.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our investment portfolio is structured to ensure a strong liquidity position over time in order to permit timely payment of policy and contract benefits without requiring asset sales at inopportune times or at depressed prices. In general, liquid assets include cash and cash equivalents, highly rated corporate bonds, unaffiliated preferred stock and unaffiliated public common stock, all of which generally have liquid markets with a large number of buyers. The carrying value of these assets as of September 30, 2017 was approximately $48.7 billion. Although our investment portfolio does contain assets that are generally considered illiquid for liquidity monitoring purposes (primarily mortgage loans, policy loans, real estate, investment funds, and affiliated common stock), there is some ability to raise cash from these assets if needed. In periods of economic downturn we may maintain higher cash balances than required to manage our liquidity risk and to take advantage of market dislocations as they arise. We have access to additional liquidity through our $1.0 billion revolving credit facility, which is undrawn as of the date hereof and has a remaining term of approximately three years. In addition, through our membership in the FHLB of Des Moines (FHLBDM) and Indianapolis (FHLBI), we are eligible to borrow under variable rate short-term federal funds arrangements to provide additional liquidity.

We proactively manage our liquidity position to meet cash needs while minimizing adverse impacts on investment returns. We analyze our cash-flow liquidity over the upcoming 12 months by modeling potential demands on liquidity under a variety of scenarios, taking into account the provisions of our policies and contracts in force, our cash flow position, and the volume of cash and readily marketable securities in our portfolio. By policy, we maintain sufficient liquidity not only to meet our cash-flow requirements over the succeeding 12-month period in a moderately severe scenario (for example, a recessionary environment), but also to have excess liquidity available to invest into potential investment opportunities created from market dislocations. We also monitor our liquidity profile under more severe scenarios.

We perform a number of stress tests and analyses to assess our ability to meet our cash flow requirements, as well as the ability of our reinsurance and insurance subsidiaries to meet their collateral obligations. Among these analyses, we manage to the following ALM limits:

- our projected net cumulative cash flows, including both new business and target levels of new investments under a “plan scenario” and a “moderately severe scenario” event, are non-negative over a rolling 12-month horizon;
- we hold at least $250 million in cash and cash equivalents across the group; and at least $150 million in the aggregate in securities with the following characteristics:
    - public corporate bonds rated A- or above;
    - liquid ABS (defined as prime auto, auto floorplan, Tier 1 subprime auto, auto lease, prime credit cards, equipment lease or utility stranded assets) and RMBS with weighted average lives less than three years rated A- or above; or
    - CMBS with weighted average lives less than three years rated AAA- or above;
- we maintain assets that can be liquidated in one quarter under normal market conditions equal to 25% of the policyholder obligations that are deemed to be most liquid, which is defined as policies with a cash surrender value, no income rider, no MVA, with lower than 5% surrender charge protection and lower than 3% minimum floor guarantee, if any; and
- we maintain sufficient capital and surplus at ALRe to meet collateral calls from modco and third-party reinsurance contracts under a substantial stress event, such as the failure of a major financial institution (Lehman event).

Insurance Subsidiaries' Liquidity

The primary cash flow sources for our insurance subsidiaries include retirement services product inflows (premiums), investment income, principal repayments on our investments, and net transfers from separate accounts and financial product deposits. Uses of cash include investment purchases, payments to policyholders for surrenders and withdrawals, policy acquisition costs, and general operating costs.

Our policyholder obligations are generally long-term in nature. However, one liquidity risk is an extraordinary level of early policyholder withdrawals. We include provisions within our annuity policies, such as surrender charges and MVAs, which are intended to protect us from early withdrawals. As of each of September 30, 2017 and December 31, 2016, approximately 86% of our deferred annuity liabilities were subject to penalty upon surrender. In addition, as of September 30, 2017 and December 31, 2016, approximately 72% and 73%, respectively, of policies contained MVAs that also have the effect of limiting early withdrawals if interest rates increase.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cash Flows

Our cash flows were as follows:

	Nine months ended September 30,	
(In millions)	2017	2016
Net income	$ 984	$ 404
Non-cash revenues and expenses	358	560
Net cash provided by operating activities	1,342	964
Sales, maturities, and repayment of investments	12,724	9,595
Purchases and acquisitions of investments	(17,518)	(11,391)
Other investing activities	292	114
Net cash used in investing activities	(4,502)	(1,682)
Capital contributions	-	1
Deposits on investment-type policies and contracts	7,521	4,189
Withdrawals on investment-type policies and contracts	(3,701)	(3,516)
Net changes of cash collateral posted for derivative transactions	513	254
Consolidated VIE repayment on borrowings	-	(500)
Other financing activities	(54)	139
Net cash provided by financing activities	4,279	567
Effect of exchange rate changes on cash and cash equivalents	30	(2)
Net increase (decrease) in cash and cash equivalents[1]	$ 1,149	$ (153)

[1] *Includes cash and cash equivalents of consolidated VIEs*

Cash flows from operating activities

The primary cash inflows from operating activities include net investment income, annuity considerations and insurance premiums. The primary cash outflows from operating activities are comprised of benefit payments, interest credited to policyholders, and operating expenses. Our operating activities generated cash flows totaling $1.3 billion and $964 million for the nine months ended September 30, 2017 and 2016, respectively. The increase in cash provided by operating activities for the nine months ended September 30, 2017 compared to 2016 was primarily driven by the increase in net investment income reflecting an increase in our investment portfolio attributed to the strong growth in deposits over the prior twelve months.

Cash flows from investing activities

The primary cash inflows from investing activities are the sales, maturities and repayments of investments. The primary cash outflows from investing activities are the purchases and acquisitions of new investments. Our investing activities used cash flows totaling $4.5 billion and $1.7 billion for the nine months ended September 30, 2017 and 2016, respectively. The change in cash used in investing activities for the nine months ended September 30, 2017 compared to 2016 was primarily attributed to the purchase of investments related to the increase in deposits over liability outflows as well as the reinvestment of earnings.

Cash flows from financing activities

The primary cash inflows from financing activities are deposits on our investment-type policies, changes of cash collateral posted for derivative transactions, capital contributions and proceeds from borrowing activities. The primary cash outflows from financing activities are withdrawals on our investment-type policies, changes of cash collateral posted for derivative transactions and repayments from borrowing activities. Our financing activities provided cash flows totaling $4.3 billion and $567 million for the nine months ended September 30, 2017 and 2016, respectively. The change in cash provided from financing activities for the nine months ended September 30, 2017 was primarily attributed to the increase in deposits over liability outflows, the favorable change in cash collateral posted for derivative transactions and the settling of borrowings of our CMBS VIE funds in the prior year.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Holding Company Liquidity

AHL is a holding company whose primary liquidity needs include the cash-flow requirements relating to its corporate activities, including its day-to-day operations and strategic transactions, such as acquisitions. The primary source of AHL's cash flow is dividends from its subsidiaries, which are expected to be adequate to fund cash flow requirements based on current estimates of future obligations. As of September 30, 2017, AHL had no financial leverage.

The ability of AHL's insurance subsidiaries to pay dividends is limited by applicable laws and regulations of the jurisdictions where the subsidiaries are domiciled, as well as agreements entered into with regulators. These laws and regulations require, among other things, the insurance subsidiaries to maintain minimum solvency requirements and limit the amount of dividends these subsidiaries can pay.

Subject to these limitations and prior notification to the appropriate regulatory agency, the U.S. insurance subsidiaries are permitted to pay ordinary dividends based on calculations specified under insurance laws of the relevant state of domicile. Any distributions above the amount permitted by statute in any twelve month period are considered to be extraordinary dividends, and the approval of the appropriate regulator is required prior to payment. In addition, dividends from U.S. insurance subsidiaries to AHL would result in a 30% withholding tax. AHL does not currently plan on having the U.S. subsidiaries pay any dividends to AHL. Athene Lebensversicherung AG (ALV) and Athene Pensionskasse AG (APK) (the life insurance entities of our German Group Companies) are regulated by BaFin. ALV and APK are restricted as to the payment of dividends pursuant to calculations, which are based upon the analysis of current euro swap rates against existing policyholder guarantees. As of September 30, 2017, ALV and APK did not exceed this threshold and, therefore, no amounts are available for distribution to AHL. As a result, dividends from ALRe are projected to be the primary source of AHL's liquidity.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's statutory capital and surplus, unless at least two members of ALRe's board of directors and its principal representative in Bermuda sign and submit to the BMA an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its relevant margins, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of its total statutory capital. Distributions in excess of this amount require the approval of the BMA.

The maximum distribution permitted by law or contract is not necessarily indicative of our actual ability to pay such distributions, which may be further restricted by business and other considerations, such as the potential imposition of withholding tax and the impact of such distributions on surplus, which could affect our ratings or competitive position and the amount of premiums that can be written. Specifically, the level of capital needed to maintain desired financial strength ratings from rating agencies, including S&P, A.M. Best and Fitch, is of particular concern when determining the amount of capital available for distributions. AHL believes its insurance subsidiaries have sufficient statutory capital and surplus, combined with additional capital available to be provided by AHL, to meet their financial strength ratings objectives. Finally
state insurance laws and regulations require that the statutory surplus of our insurance subsidiaries following any dividend or distribution must be reasonable in relation to their outstanding liabilities and adequate for the insurance subsidiaries' financial needs.

Other Sources of Funding

If needed, we may seek to secure additional funding at the holding company level by means other than dividends from subsidiaries, such as by drawing on our undrawn $1.0 billion credit facility or by pursuing future issuances of debt or equity securities to third-party investors. However, such additional funding may not be available on terms favorable to us or at all, depending on our financial condition or results of operations or prevailing market conditions. In addition, certain covenants in our credit facility prohibit us from incurring any debt not expressly permitted thereby, which may limit our ability to pursue future issuances of debt.

Membership in Federal Home Loan Bank

We are a member of the FHLBDM and the FHLBI. Membership in a FHLB requires the member to purchase FHLB common stock based on a percentage of the dollar amount of advances outstanding, subject to the investment being greater than or equal to a minimum level. We owned a total of $38 million and $40 million of FHLB common stock as of September 30, 2017 and December 31, 2016, respectively.

Through our membership in the FHLBDM and FHLBI, we are eligible to borrow under variable rate short-term federal funds arrangements to provide additional liquidity. The borrowings must be secured by eligible collateral such as mortgage loans, eligible CMBS or RMBS, government or agency securities and guaranteed loans. There were no outstanding borrowings under these arrangements as of September 30, 2017 or December 31, 2016.

On August 11, 2016, we provided notice to the FHLBI that ALIC is withdrawing its membership thereto. The FHLBI confirmed receipt of our request on the following day. Pursuant to the FHLBI's capital plan, ALIC's membership will be withdrawn as of the fifth anniversary of the FHLBI's receipt of our notice. Until such time that ALIC's membership is withdrawn, ALIC continues to have all of the rights and obligations of being a member of the FHLBI, except that with respect to some or all of the FHLBI stock that ALIC owns, we will be entitled to a lower dividend amount, to the extent that the FHLBI declares a dividend. ALIC may continue to borrow from the FHLBI, provided that without the consent of the FHLBI, the transaction must mature or otherwise terminate prior to ALIC's withdrawal of membership.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We have issued funding agreements to the FHLB in exchange for cash advances. These funding agreements were issued in an investment spread strategy, consistent with other investment spread operations. As of September 30, 2017 and December 31, 2016, we had an aggregate of $623 million and $691 million, respectively, of outstanding FHLB funding agreements. Refer to *Note 13 - Commitments and Contingencies* to the condensed consolidated financial statements for details of issued funding agreements and related collateral.

The maximum FHLB indebtedness by a member is determined by the amount of collateral pledged, and cannot exceed a specified percentage of the member's total statutory assets dependent on the internal credit rating assigned to the member by the FHLB. As of September 30, 2017, the total maximum borrowings under the FHLBDM facility was limited to $15.4 billion. However, our ability to borrow under the facility is constrained by the availability of assets that qualify as eligible collateral under the facility and by the Iowa Code requirement that we maintain funds equivalent to our legal reserve in certain permitted investments, from which we exclude pledged assets. Considering these limitations, we estimate that as of September 30, 2017 we had the ability to draw up to a total of approximately $2 billion, inclusive of borrowings then outstanding. This estimate is based on our internal analysis and assumptions, and may not accurately measure collateral which is ultimately acceptable to the FHLB. Drawing such amounts would have an adverse impact on AAIA's RBC ratio, which may further restrict our ability or willingness to draw up to our estimated capacity.

Capital Resources

As of December 31, 2016 and 2015, our U.S. insurance companies' TAC, as defined by the NAIC, was $1.8 billion and $1.7 billion, respectively, and our ALRe statutory capital as defined by the BMA, was $6.1 billion and $5.7 billion, respectively. As of December 31, 2016 and 2015, our U.S. RBC ratio was 478% and 552%, respectively, and our BSCR ratio was 228% and 323%, respectively, all above our internal targets. The change in our U.S. RBC as of December 31, 2016 compared to December 31, 2015 was primarily driven by our investment of capital to organically grow our retail channel, which increased significantly during 2016. Each U.S. domestic insurance subsidiary's state of domicile imposes minimum RBC requirements that were developed by the NAIC. The formulas for determining the amount of RBC specify various weighting factors that are applied to financial balances or various levels of activity based on the perceived degree of risk. Regulatory compliance is determined by a ratio of TAC to ACL. Our TAC was significantly in excess of all regulatory standards and above our internal targets as of September 30, 2017, December 31, 2016 and 2015, respectively. ALRe adheres to BMA regulatory capital requirements to maintain statutory capital and surplus to meet the MMS and maintain minimum economic balance sheet (EBS) capital and surplus to meet the Enhanced Capital Requirement (ECR). Effective January 1, 2016, in connection with the implementation of its broader regulatory regime, the BMA integrated the EBS framework into the determination of BSCR. The European Commission has granted the BMA's regulatory regime for reinsurance, group solvency calculation and group supervision full equivalence to Solvency II. Under the EBS framework, ALRe's assets are recorded at market value and its insurance reserves are determined by reference to nine prescribed scenarios, with the scenario resulting in the highest reserve balance being ultimately required to be selected. The ALRe EBS capital and surplus was $4.4 billion resulting in a BSCR ratio of 228%, as of December 31, 2016. Although the calculation of the ECR was unchanged from prior year, the BSCR ratios for December 31, 2016 and 2015 are not comparable as the 2015 calculation applied to ALRe's statutory capital and the 2016 calculation now applies to the EBS capital and surplus. Consistent with the previous regime the MRC ratio to be considered solvent by the BMA is 100%. As of September 30, 2017, December 31, 2016 and 2015, ALRe held the appropriate capital to adhere to these regulatory standards. In evaluating our capital position and the amount of capital needed to support our Retirement Services segment, we review our ALRe capital by applying the NAIC RBC factors. As of December 31, 2016 and 2015, our ALRe RBC ratio was 529% and 468%, respectively, both above our internal targets. Our German Group Companies adhere to the regulatory capital requirements set forth by BaFin. Our German Group Companies held the appropriate capital to adhere to these regulatory standards as of December 31, 2016. We believe that we enjoy a strong capital position in light of our risks and that we are well positioned to meet policyholder and other obligations. We also believe that our strong capital position, as well as our excess capital position, provides us the opportunity to take advantage of market dislocations as they arise.

Balance Sheet and Other Arrangements

Balance Sheet Arrangements

Contractual Obligations

As of September 30, 2017, there have been no significant changes to contractual obligations since December 31, 2016. See *Part II-Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2016 Annual Report.*

Other

In the normal course of business, we invest in various investment funds which are considered VIEs, and we consolidate a VIE when we are considered the primary beneficiary of the entity. For further discussion of our involvement with VIEs, see *Note 4 - Variable Interest Entities* to the condensed consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Estimates and Judgments

The preparation of consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Amounts based on such estimates involve numerous assumptions subject to varying and potentially significant degrees of judgment and uncertainty, particularly related to the future performance of the underlying business, and will likely change in the future as additional information becomes available. Critical estimates and assumptions are evaluated on an ongoing basis based on historical developments, market conditions, industry trends and other information that is reasonable under the circumstances. There can be no assurance that actual results will conform to estimates and assumptions and that reported results of operations will not be materially affected by the need to make future accounting adjustments to reflect periodic changes in these estimates and assumptions. Critical accounting estimates are impacted significantly by our methods, judgments and assumptions used in the preparation of the consolidated financial statements and should be read in conjunction with our significant accounting policies described in *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* to the consolidated financial statements of our 2016 Annual Report. The most critical accounting estimates and judgments include those used in determining:

- fair value of investments;
- impairment of investments and valuation allowances;
- future policy benefit reserves;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs, deferred sales inducements and value of business acquired;
- stock-based compensation;
- consolidation of VIEs; and
- valuation allowances on deferred tax assets.

The above critical accounting estimates and judgments are discussed in detail in *Part II-Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* of our 2016 Annual Report.

See *Note 1 - Business, Basis of Presentation and Significant Accounting Policies* to the condensed consolidated financial statements included in *Part I-Item 1. Financial Statements* for adoption of new and future accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risks

We regularly analyze our exposure to market risks, which reflect potential losses in value due to credit and counterparty risk, interest rate risk, currency risk, commodity price risk and equity price risk. As a result of that analysis, we have determined that we are primarily exposed to credit risk, interest rate risk and to a lesser extent, equity price risk. A description of our market risk exposures, including strategies used to manage our exposure to market risk, may be found under *Part II-Item 7A. Quantitative and Qualitative Disclosures About Market Risk* of the 2016 Annual Report.

Assuming a 25 basis points increase in interest rates persists for a 12-month period, the estimated impact to operating income, net of tax, would be an increase of approximately $25 - $30 million. This is driven by an increase in investment income from floating rate assets, offset by DAC, DSI and VOBA amortization and rider reserve change, all calculated without regard to future changes to assumptions.

There have been no other material changes to our market risk exposures from the market risk exposures previously disclosed in the 2016 Annual Report.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures as such term is defined under Exchange Act Rule 13a-15(e), that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and our management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We have carried out an evaluation, as of the end of the period covered by this report, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective at attaining the level of reasonable assurance noted above.

There were no changes to the Company’s internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) during the quarter ended September 30, 2017, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II-OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to litigation arising in the ordinary course of our business, including litigation principally relating to our FIA business. We cannot assure you that our insurance coverage will be adequate to cover all liabilities arising out of such claims. We are not engaged in any legal proceeding that we believe will be material to our business, financial condition, results of operations or cash flows. From time to time, in the ordinary course of business and like others in the insurance and financial services industries, we receive requests for information from government agencies in connection with such agencies' regulatory or investigatory authority. Such requests can include financial or market conduct examinations, subpoenas or demand letters for documents to assist the government in audits or investigations. We and each of our U.S. insurance subsidiaries review such requests and notices and take appropriate action. We have been subject to certain requests for information and investigations in the past and could be subject to them in the future.

For a description of certain legal proceedings affecting us, refer to *Note 13 - Commitments and Contingencies* to the condensed consolidated financial statements.

Item 1A. Risk Factors

The following should be read in conjunction with, and supplements and amends, the factors that may affect our business or operations described in *Part I-Item 1A. Risk Factors* of our 2016 Annual Report. Other than as described in this Item 1A, there have been no material changes to our risk factors from the risk factors previously disclosed in our 2016 Annual Report.

Risks Relating to Our Business

Certain of our investments in RMBS securities may experience a decline in value if trustees are permitted to withhold funds to meet expenses and/or claims incurred in connection with litigation against such trustees

In June 2017, Wells Fargo, National Association (Wells Fargo), as trustee of certain pre-crisis residential mortgage-backed securities (Legacy RMBS) transactions, notified certificateholders that it withheld a portion of the funds received during related clean-up calls to meet litigation expenses (both incurred and anticipated) and/or claims in connection with *Blackrock, et al. v. Wells Fargo* (Blackrock Litigation). The Blackrock Litigation is one of a series of cases various parties have brought against trustees of Legacy RMBS transactions for the alleged failure of such trustees to perform their respective duties and obligations under the related transaction documents.

In July 2017, various funds managed by Pacific Investment Management Company, LLC (collectively, PIMCO) brought a declaratory judgment action in the Supreme Court of New York against Wells Fargo seeking to prevent Wells Fargo from paying any portion of the defense costs of the Blackrock Litigation from the trusts at issue in the litigation, and claiming that Wells Fargo, as trustee, breached certain duties to investors. In September 2017, Wells Fargo filed a motion to dismiss the claims brought by PIMCO.

It is not known at this time whether Wells Fargo will seek to withhold funds from other Legacy RMBS transactions or whether other RMBS trustees will attempt to take similar action. We hold a substantial Legacy RMBS portfolio, the ratings, yield and value of which could be adversely affected if Wells Fargo or other RMBS trustees have established, or attempt to establish, similar reserves in other Legacy RMBS transactions.

Uncertainty relating to the LIBOR calculation process and potential phasing out of LIBOR after 2021 may adversely affect the value of our investment portfolio and may further affect our ability to issue funding agreements bearing a floating rate of interest

Regulators and law enforcement agencies in the UK and elsewhere are conducting civil and criminal investigations into whether the banks that contribute to the British Bankers' Association (BBA) in connection with the calculation of daily LIBOR may have been under-reporting or otherwise manipulating or attempting to manipulate LIBOR. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to this alleged manipulation of LIBOR.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined or the establishment of alternative reference rates. For example, on July 27, 2017, the U.K. Financial Conduct Authority announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. At this time, it is not possible to predict the effect of any such changes, any establishment of alternative reference rates or any other reforms to LIBOR that may be enacted in the UK or elsewhere. Uncertainty as to the nature of such potential changes, alternative reference rates or other reforms may adversely affect the trading market for LIBOR-based securities, including those held in our investment portfolio and may further adversely affect our ability to issue funding agreements bearing a floating rate of interest. As of September 30, 2017, 28% of our invested assets were floating rate investments, some of which were referenced to LIBOR.

The following updates and replaces the second, fourth and fifth paragraphs of the similarly named risk factor included in our 2016 Annual Report:

We rely significantly on third parties for investment services and certain other services related to our policies, and we may be held responsible for obligations that arise from the acts or omission of third parties under their respective agreements with us if they are deemed to have acted on our behalf.

Many of our subsidiaries' products and services are sold through third-party intermediaries. In particular, our insurance businesses are reliant on such intermediaries to describe and explain these products and services to potential customers, and although we take precautions to avoid this result, such intermediaries may be deemed to have acted on our behalf. If that occurs, the intentional or unintentional misrepresentation of our subsidiaries' products and services in advertising materials or other external communications, or inappropriate activities by our personnel or an intermediary could result in liability for us and have an adverse effect on our reputation and business prospects, as well as lead to potential regulatory actions or litigation involving or against us. In addition, as a result of our acquisitions, we rely on third-party administrators (TPAs) to administer a portion of our annuity contracts, as well as a small amount of legacy life insurance business. We currently rely on these TPAs to administer a number of our policies. Some of our reinsurers also use TPAs to administer business reinsured to them by us. To the extent any of these TPAs do not administer such business appropriately, we may experience customer complaints, regulatory intervention and other adverse impacts, which could affect our future growth and profitability. If any of these TPAs or their employees are found to have made material misrepresentations to our policyholders, violated applicable insurance, privacy or other laws and regulations or otherwise engaged in misconduct, we could be held liable for their actions, which could adversely affect our reputation and business prospects, as well as lead to potential regulatory actions or litigation against us. Our U.S. insurance subsidiaries have experienced increased service and administration complaints related to the conversion and administration of the Aviva USA life insurance policies reinsured to affiliates of Global Atlantic by the TPA retained by such Global Atlantic affiliates to provide services on such policies, as well as on certain annuity policies that were on Aviva USA's life systems that were also converted to and are being administered by the same TPA. As a result of these increased complaints and service-related issues, our U.S. insurance subsidiaries may be subject to increased regulatory scrutiny, including fines and penalties, and policyholder litigation. To date, the New York State Department of Financial Services is in the process of conducting a market conduct examination and the Texas Department of Insurance has notified us that it intends to undertake an enforcement proceeding, in each case, relating to the treatment of policyholders subject to our reinsurance agreements with affiliates of Global Atlantic and the conversion of such annuity policies, including the administration of such blocks by such TPA. Additionally, if any of our TPAs fails to perform in accordance with our standards, we may incur additional costs in connection with finding and retaining new TPAs, which may divert the time and attention of our senior management from our business.

Further, on April 6, 2016, the DOL issued the fiduciary rule which imposes upon third parties who sell annuities within Employee Retirement Income Security Act of 1974 (as amended, ERISA) plans or to individual retirement account (IRA) holders a fiduciary duty to retirement investors. For the year ended December 31, 2016, of our total deposits of $8.8 billion from our organic channels, 42% was associated with sales of FIAs to employee benefit plans and IRAs and 14% was associated with traditional fixed annuities sold to employee benefit plans and IRAs. The requirements of the fiduciary rule were originally scheduled to begin to be implemented on April 10, 2017, with full implementation on January 1, 2018. The DOL delayed the applicability date of the fiduciary rule for 60-days to June 9, 2017 and, in addition to delaying the applicability date, the DOL adjusted the exemption requirements that apply to sales in the interim period starting June 9, 2017 until the full compliance date of January 1, 2018. On July 6, 2017, the DOL issued a request for information (RFI) regarding the fiduciary rule. The DOL indicated that the information gathered from the responses to the RFI "could form the basis of new exemptions or changes/revisions". Along with the request for comments about the fiduciary rule and its impact, the DOL asked for commentary regarding the potential impact of extending the January 1, 2018 full compliance date. On August 9, 2017, the DOL submitted to the Office of Management and Budget a proposal to extend the January 1, 2018 full implementation date to July 1, 2019. In order for the extension to become effective, the proposal must be finalized and issued in the Federal Register before January 1, 2018. We are assisting our distribution partners with the interim requirements.

The fiduciary rule's obligations for distributors of products to retirement accounts may result in additional compliance costs to us, regulatory scrutiny and litigation, as well as reduced product sales. Since the fiduciary rule is in the process of being implemented, we are not able to assess the actual impact that such regulations may have on us and our associates. If the fiduciary rule is fully implemented in its current form, our results of operations and financial condition may be negatively impacted as we implement the fiduciary rule's numerous requirements.

Risks Relating to Insurance and Other Regulatory Matters

The following updates and replaces the specified paragraphs of the similarly named sections of the risk factor entitled “Changes in the laws and regulations governing the insurance industry or otherwise applicable to our business, including the DOL fiduciary regulation, may have a material adverse effect on our business, financial condition, liquidity, results of operations and prospects” included in our 2016 Annual Report. There have been no material changes to other sections of such risk factor, which include: “Non-Bank SIFIs,” “FIAs,” “U.S. Consumer Protection Laws and Privacy and Data Security Regulation,” and “NAIC.”

U.S. Federal Oversight

The following updates and replaces the third paragraph of the “U.S. Federal Oversight” subsection included within the 2016 Annual Report:

On April 6, 2016, the DOL issued a new regulation more broadly defining the circumstances under which a person is considered to be a fiduciary by reason of giving investment advice or recommendations to an employee benefit plan or a plan’s participants or to IRA holders. In addition to releasing the investment advice regulation, the DOL: (1) issued a new prohibited transaction class exemption, referred to as BICE, to be used in connection with the sale of FIAs or variable annuities, and (2) updated the previously prohibited transaction class exemption 84-24, to be used in connection with the sale of traditional fixed rate annuities. The April 10, 2017 applicability date for the DOL regulation was delayed to June 9, 2017, in response to a memorandum issued to the DOL by President Trump. In addition to delaying the applicability date of the DOL regulation, the DOL revised both exemptions, most notably allowing all annuity products, fixed, FIAs and variable annuities, to rely on an updated version of the prohibited transaction class exemption 84-24 from June 9, 2017 through January 1, 2018, at which time full implementation of the DOL regulation is required. On August 9, 2017, the DOL submitted to the Office of Management and Budget a proposal to extend the January 1, 2018 full implementation date to July 1, 2019. In order for the extension to become effective, the proposal must be finalized and issued in the Federal Register before January 1, 2018. For the year ended December 31, 2016, of our total deposits of approximately $8.8 billion from organic channels, 42% was associated with sales of FIAs to employee benefit plans and IRAs and 14% was associated with traditional fixed annuities sold to employee benefit plans and IRAs. We cannot predict with any certainty the impact of the new regulation and exemptions, but the regulation and exemptions could alter the way our products and services are marketed and sold, particularly to purchasers of IRAs and individual retirement annuities. If implemented in its current form, the DOL regulation could have an adverse effect on our ability to write new business. In addition, the NAIC has implemented a working group to update the current Suitability in Annuity Transactions Model Regulation to address the fiduciary standard and the SEC has indicated that it may propose rules creating a uniform standard of conduct applicable to broker-dealers and investment advisers. The NAIC or SEC rules, if adopted, may affect the distribution of our products. In addition, should the SEC and NAIC rules, if adopted, not align with each other or the finalized DOL regulations, the distribution of our products could be further complicated.

Regulation of Over-The-Counter (OTC) Derivatives

The following updates and replaces the third paragraph of the "Regulation of Over-The-Counter (OTC) Derivatives" subsection included within the 2016 Annual Report:

The Dodd-Frank Act and the CFTC rules thereunder require us, in connection with certain swap transactions, to comply with mandatory clearing and on-facility trade execution requirements, and it is anticipated that the types of swaps subject to these requirements will be expanded over time. In addition, new regulations require us to comply with mandatory minimum margin requirements for uncleared swaps and, in some instances, uncleared security-based swaps. Uncleared swap variation margin regulations issued by U.S. bank prudential regulators, the CFTC and regulators in certain other jurisdictions, such as the European Union and Canada, generally took effect on March 1, 2017. These regulations require market participants to enter into agreements consistent with the requirements thereunder and a failure to do so could result in trading disruptions. Derivative clearing requirements and mandatory margin requirements could increase the cost of our risk mitigation and could have other implications. For example, increased margin requirements, combined with netting restrictions and restrictions on securities that qualify as eligible collateral, could reduce our liquidity and require increased holdings of cash and highly liquid securities with lower yields causing a reduction in income. In addition, the requirement that certain trades be centrally cleared through clearinghouses subjects us to documentation that is significantly more counterparty-favorable and may entitle counterparties to unilaterally change such terms as trading limits and the amount of margin required. The ability of any such counterparty to take such actions could create trading disruptions and liquidity concerns. Finally, the requirement that certain trades be centrally cleared through clearinghouses concentrates counterparty risk in both clearinghouses and clearing members. The failure of a clearinghouse could have a significant impact on the financial system. Even if a clearinghouse does not fail, large losses could force significant capital calls on clearinghouse members during a financial crisis, which could lead clearinghouse members to default. Because clearinghouses are still developing and the related bankruptcy process is untested, it is difficult to anticipate or identify all actual risks related to the default of a clearinghouse.

Risks Relating to Taxation

The following updates and replaces the similarly named risk factor included in our 2016 Annual Report:

Changes in U.S. tax law might adversely affect us or our shareholders.

The tax treatment of non-U.S. companies and their U.S. and non-U.S. insurance subsidiaries has been the subject of Congressional discussion and legislative proposals. Legislative proposals relating to the tax treatment of non-U.S. companies have been introduced in the past that could, if enacted, materially affect us. Both the U.S. Congress and President Trump's administration have indicated a desire to reform the U.S. Internal Revenue Code of 1986, as amended. In November, Chairman Brady (R-TX) of the House Committee on Ways and Means released proposed legislation entitled the Tax Cuts and Jobs Act of 2017 (the Proposed Bill). The Proposed Bill would, if enacted, reduce corporate tax rates to 20%, impose a 20% excise tax on payments made by domestic insurers to related foreign insurers under certain circumstances, and significantly accelerate taxable income and therefore cash tax expense by the imposition of other changes which would impact life insurance companies, among others. Although a reduction in the corporate tax rate would generally have a positive impact on the earnings and cash flow of our U.S. companies, the imposition of the proposed 20% excise tax and other components of the Proposed Bill could, if enacted, add significant expense and have a material adverse effect on our results of operations.

The Proposed Bill also includes proposals that could, if enacted, affect whether AHL or any of its non-U.S. subsidiaries are treated as a "passive foreign investment company" (PFIC) or a "controlled foreign corporation" (CFC). Whether or not the Proposed Bill is enacted, interpretations of U.S. federal income tax law, including those regarding whether a company is engaged in a trade or business (or has a permanent establishment) within the United States or is a PFIC, or whether U.S. persons are required to include in their gross income "subpart F income" or related person insurance income (RPII) of a CFC, are subject to change, possibly on a retroactive basis. Regulations regarding the application of the PFIC rules to insurance companies and regarding RPII are only in proposed form. Whether or not the Proposed Bill is enacted, new regulations or pronouncements interpreting or clarifying the existing proposed regulations may be forthcoming.

It is possible that the Proposed Bill will be amended significantly before passage, that other legislative proposals could emerge in the future or that no tax legislation is enacted in the near future. Such amendments or future proposals could also have an adverse impact on us. No prediction can be made as to whether any particular proposed legislation will be enacted or, if enacted, what the specific provisions or the effective date of any such legislation would be, or whether it would have any effect on us. As such, we cannot assure you that future legislative, administrative or judicial developments will not result in an increase in the amount of U.S. tax payable by us or by an investor in our Class A common shares or reduce the attractiveness of our products. If any such developments occur, our business, financial condition and results of operation could be materially and adversely affected and could have a material and adverse effect on your investment in our common shares.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Securities

Purchases of common stock made by or on behalf of us or our affiliates during the three months ended September 30, 2017 are set forth below:

Period	(a) Total number of shares purchased[1]	(b) Average price paid per share[1]	(c) Total number of shares purchased as part of publicly announced programs[2]	(d) Maximum number (or approximate dollar value) of shares that may yet be purchased under the plans or programs[2]
July 1 - July 31, 2017	232	$ 49.61	-	$ -
August 1 - August 31, 2017	-	$ -	-	$ -
September 1 - September 30, 2017	290	$ 52.31	-	$ -

[1] *Purchases relate to shares withheld (under the terms of employee stock compensation plans) to offset tax withholding obligations that occur upon the delivery of outstanding shares underlying restricted stock units or upon the exercise of stock options.*

[2] *As of September 30, 2017, our Board of Directors had not authorized any purchases of common stock in connection with a publicly announced plan or program.*

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

ATHENE HOLDING LTD.

Independent Auditor's Report

To the Board of Directors and Shareholder of Athene Life Re Ltd.

We have audited the accompanying consolidated financial statements of Athene Life Re Ltd. (the "Company") and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2015, 2014 and 2013, and the related consolidated statements of income (loss), comprehensive income (loss), equity and cash flows for the years then ended.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Athene Life Re Ltd. and its subsidiaries as of December 31, 2015, 2014 and 2013, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

1. Organization and Corporate Structure

Athene Life Re Ltd. (ALRe, the Company, we, us, or our) a Bermuda exempted company, is a leading retirement services company that reinsures retirement savings products that originate in all 50 U.S. states and the District of Columbia. ALRe is wholly owned by Athene Holding Ltd. (AHL, or the Parent), a Bermuda exempted company. ALRe reinsures business from both third party cedants and affiliates. See *Note 8 - Reinsurance* for more information.

The Company was registered as a Long-Term Insurer on June 26, 2009 under the Insurance Act, 1978 of Bermuda and is classified as a Class E insurer. The Company is engaged in the business of annuity reinsurance, focusing on contracts reinsuring a quota share of future sales (flow transactions) of various fixed annuity product lines. The Company also reinsures closed blocks of existing business (block transactions). Liabilities for reinsurance include immediate annuities, fixed deferred annuities (including fixed indexed products) and funding agreements.

As of December 31, 2015, Fitch, S&P and A.M. Best had issued credit ratings, financial strength ratings and/or outlook statements regarding us, as listed below. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurer or reinsurer to meet its obligations under an insurance policy or reinsurance arrangement and generally involve quantitative and qualitative evaluations by rating agencies of a company's financial condition and operating performance. Generally, rating agencies base their financial strength ratings upon information furnished to them by the company and upon their own investigations, studies and assumptions. Financial strength ratings are based upon factors of concern to policyholders, agents, intermediaries and ceding companies and are not directed toward the protection of investors. Credit and financial strength ratings are not recommendations to buy, sell or hold securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

	December 31, 2015		
	A.M. Best	**S&P**	**Fitch**
Financial Strength Rating	A-	A-	A-
Outlook	Stable	Stable	Stable

On May 18, 2016, A. M. Best revised the outlook of the Company from "Stable" to "Positive".

2. Summary of Significant Accounting Policies

Consolidation and Basis of Presentation - The consolidated financial statements of the Company include any variable interest entities for which we are the primary beneficiary. Investments in entities that we do not control, but have the ability to exercise significant influence over operating and financing decisions, other than investments for which we have elected the fair value option, are accounted for under the equity method.

For entities that are consolidated, but not 100% owned, we allocate a portion of the income or loss and corresponding equity to the owners other than the Company. We include the aggregate of the income or loss and corresponding equity that is not owned by the Company in noncontrolling interests in the consolidated financial statements.

We have prepared the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual experience could materially differ from these estimates and assumptions. The Company's principal estimates impact:

- fair value of investments;
- impairment of investments and valuation allowances;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs (DAC), deferred sales inducements (DSI), and reinsurance intangibles; and
- future policy benefit reserves.

Additional details regarding these principal estimates and assumptions are discussed in the significant accounting policies that follow and the related footnote disclosures.

Investments

Fixed Maturity and Equity Securities – Fixed maturity securities includes corporate bonds, collateralized loan obligations (CLO's), asset-backed securities (ABS), residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), and redeemable preferred stock. Equity securities in the funds withheld at interest portfolio include common stock, mutual funds, and non-redeemable preferred stock. We classify fixed maturity securities as available-for-sale (AFS) or trading at the time of purchase and subsequently carry them at fair value. Fair value hierarchy and valuation methodologies are discussed in *Note 6 - Fair Value*. Classification is dependent on a variety of factors including our expected holding period, election of the fair value option, and asset and liability matching.

AFS Securities – Unrealized gains and losses on AFS securities are reflected in accumulated other comprehensive income (AOCI) on the consolidated balance sheets.

Trading Securities – We elected the fair value option for certain fixed maturity securities. These fixed maturity securities are classified as trading, with changes to fair value included in net investment income on the consolidated statements of income and (loss). Although the securities are classified as trading, the trading activity related to these investments is primarily focused on asset and liability matching activities and is not intended to be an income strategy based on active trading. As such, the activity related to these investments on the consolidated statements of cash flows is classified as investing activities.

We generally record security transactions on a trade date basis, with any unsettled trades recorded in other assets or other liabilities on the consolidated balance sheets. Private placement and investment fund purchases are recorded on a settlement date basis.

Purchased Credit Impaired (PCI) Securities – We purchase certain structured securities, primarily RMBS, having deterioration in credit quality since their issuance, which meet the definition of PCI securities. We determined, based on our expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that we would not collect all contractually required payments, including both principal and interest and considering the effects of prepayments for these PCI securities. Based on these assumptions, the difference between the undiscounted expected future cash flows of the PCI securities and the recorded investment in the securities represents the initial accretable yield, which is accreted into investment income, net of related expenses, over their remaining lives on a level-yield basis. The difference between the contractually required payments on the PCI securities and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change.

Quarterly, we evaluate the undiscounted expected future cash flows associated with PCI securities based on updates to key assumptions. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI securities will change the accretable yield prospectively. Declines in undiscounted expected future cash flows due to further credit deterioration, as well as changes in the expected timing of the cash flows, can result in the recognition of an other-than-temporary impairment (OTTI) charge, as PCI securities are subject to our policy for evaluating investments for OTTI. Significant increases in undiscounted expected future cash flows are recognized prospectively as an adjustment to the accretable yield.

Mortgage Loans – We hold mortgage loans through our funds withheld and modified coinsurance arrangements, accordingly these mortgages are valued at fair value, which is comprised of the amortized cost plus mark-to-market unrealized gains or losses. We calculate amortized cost to be unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on its contractual interest rate. We record amortization of premiums and discounts using the effective yield method, and contractual cash flows on the underlying loan. We accrue interest on loans until it is probable we will not receive interest or the loan is 90 days past due. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income on the consolidated statements of income and (loss).

Investment Funds – We invest in certain non-fixed income, alternative investments in the form of limited partnerships or similar legal structures (investment funds). For investment funds in which we have determined we are not the primary beneficiary, and therefore not required to consolidate, we typically record these investments using the equity method of accounting, where the cost is recorded as an investment in the fund. Adjustments to the carrying amount reflect our pro rata ownership percentage of the operating results as indicated by net asset value (NAV) in the investment fund financial statements, which can be on a lag of up to three months when investee information is not received in a timely manner.

We record our proportionate share of investment fund income within net investment income on the consolidated statements of income and (loss). Contributions paid or distributions received by the Company are recorded directly to the investment fund balance as an increase to carrying value or as a return of capital, thus reducing our carrying value.

Policy Loans – We hold policy loans through our funds withheld and modified coinsurance arrangements accordingly, these policy loans are held at fair value which approximates the unpaid principal balance. Policy loans are funds provided to policyholders in return for a claim on the policy's account value. The funds provided are limited to a specified percentage of the account balance. The majority of policy loans do not have a stated maturity and the balances and accrued interest are repaid with proceeds from the policy account balance.

Funds Withheld at Interest – Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which we act as reinsurer or a modified coinsurer. While the assets in funds withheld and modified coinsurance trusts are legally owned by the ceding company, the assets are legally segregated from the general accounts of our cedants and all economic rights and obligations on the assets accrue to us. We periodically settle interest accruing to those assets at rates defined by the terms of the agreement. The underlying agreements contain embedded derivatives as discussed below, and as a result the carrying value of Funds Withheld at Interest is equal to the fair value of the underlying assets. The resulting impact on the consolidated statement of cash flows from funds withheld and modco agreements after non-cash activity is backed out is that the net cash interest settlements are included in operating activities. Any securities transfers as part of interest settlements, as well as deposits and withdrawals on the underlying agreements, are disclosed as non-cash items. See additional information in Note 7 - Funds Withheld at Interest.

Short-term Investments – Short-term investments consists of financial instruments with maturities of greater than three months but less than twelve months when purchased. Short-term securities are held at fair value which approximates amortized cost. Short-term loans are carried at amortized cost.

Net Investment Income – We recognize investment income as it accrues or is legally due, net of investment management and custody fees. Investment income on fixed maturity securities includes coupon interest, as well as the amortization of any premiums and the accretion of any discount. Investment income on equity securities represents dividend income and preferred coupons. Realized gains and losses on sales of investments are included on the consolidated statements of income and (loss) in net investment income. Other-than-temporary impairments are included on the consolidated statements of income and (loss) in Net investment income (NII). Realized gains and losses on investments sold are determined based on a first-in first-out method.

Other-Than-Temporary Impairment – We identify fixed maturity and equity securities that could potentially have impairments that are other-than-temporary by monitoring market events for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions, and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings, late payments, pricing levels, rating agency actions, key financial ratios, financial statements, revenue forecasts, and cash flow projections.

We review all securities on a case-by-case basis to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine that a security is other-than-temporarily impaired, an impairment loss is recognized.

The recognition of impairment losses on fixed maturity securities on the consolidated financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost less any recorded credit loss, we recognize an OTTI in net investment income on the consolidated statements of income and (loss) for the difference between amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit loss portion in net investment income on the consolidated statements of income and (loss) and the non-credit loss portion in AOCI on the consolidated balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The techniques and assumptions for establishing the best estimate cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments, and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security-specific facts and circumstances including timing, security interests, and loss severity.

In periods after an OTTI loss is recognized on a fixed maturity security, we report the impaired security as if it had been purchased on the date it was impaired and continue to estimate the present value of the estimated cash flows of the security. Accordingly, the discount (or reduced premium) based on the new cost basis is accreted into net investment income over the remaining term of the fixed maturity security in a prospective manner based on the amount and timing of estimated future cash flows.

We impair a mortgage loan when it is probable we will not collect all amounts due under the agreement. We establish a valuation allowance on individual loans based on expected losses from future dispositions or settlement, including foreclosures. We calculate the allowance based on how much the carrying value exceeds one of these values:

- the present value of expected future cash flows discounted at the loan's original effective interest rate;
- the value of the loan's collateral if it is in the process of foreclosure or otherwise collateral dependent; or
- the loan's fair value if the loan is being sold.

We first apply any interest accrued or received on the net carrying amount of the impaired loan to the principal of the loan, and once the principal is repaid, we include amounts received in net investment income. We limit accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, we recognize interest income on a cash basis. Loans deemed uncollectible or in foreclosure are charged off against the valuation allowances, and subsequent recoveries, if any, are credited to the valuation allowances. Changes in valuation allowances are reported in net investment income on the consolidated statements of income and (loss).

The cost of other invested assets is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within net investment income, and the cost basis of the investment securities is reduced accordingly. We do not change the revised cost basis for subsequent recoveries in value.

Derivative Instruments—We invest in derivatives in both our general account and funds withheld at interest for managing risks experienced in our ongoing operations, such as equity risk, interest rate risk, cash flow risks, which primarily involve managing liability risks associated with our indexed annuity products and reinsurance agreements. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or other underlying notional amount. Derivatives are carried at fair value on the consolidated balance sheets in derivative assets and derivative liabilities. We elect to present any derivatives subject to master netting provisions as a gross asset or liability and gross of collateral. Disclosures regarding balance sheet presentation of derivatives subject to master netting agreements are discussed in *Note 4 - Derivative Instruments*.

Embedded Derivatives – We reinsure products, primarily fixed indexed annuity products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the consolidated balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with fixed indexed annuities are reflected in interest sensitive contract benefits on the consolidated statements of income and (loss). Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains and losses on the host contract and derivative will be reflected within net investment income on the consolidated statements of income and (loss).

Fixed indexed annuity contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of the embedded derivative is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates, and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For certain funds withheld and modified coinsurance reinsurance contracts the embedded derivative cash flows are discounted using the Company's own credit rating. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

Additionally, reinsurance agreements written on a funds withheld or modified coinsurance (modco) basis contain embedded derivatives. The fair value of the embedded derivatives on funds withheld and modco agreements is included in the funds withheld at interest line item on the consolidated balance sheets and is equal to the unrealized gain or loss on the underlying assets in the funds withheld or modco trust. The change in the fair value of the embedded derivatives is recorded in net investment income on the consolidated statements of income and (loss).

Variable Interest Entities—An entity that does not have sufficient equity to finance its activities without additional financial support, or in which the equity investors, as a group, do not have the characteristics of a controlling financial interest is a variable interest entity (VIE). The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and may require significant judgment. Our investment funds generally qualify as VIEs and are evaluated for consolidation under the VIE model.

We are required to consolidate a VIE if we are the primary beneficiary, defined as the variable interest holder with both the power to direct the activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. We determine whether we are the primary beneficiary of an entity based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and our relative exposure to the related risks of the VIE. Since affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo), a related party, are the decision makers in certain of the investment funds, we and a member of our related party group may together have the characteristics of the primary beneficiary of an investment fund. In this situation, we have generally concluded we are not under common control, as defined by ASU 2015-02, with the related party, and therefore consolidate in the circumstances when substantially all of the activities of the VIE are conducted on our behalf. We reassess the VIE and primary beneficiary determinations on an ongoing basis.

If we are not the primary beneficiary, but are able to exert significant influence over the VIE's operations, we record the VIE as an equity method investment. If we are not able to exercise significant influence, generally on investment funds in which we own a less than a 3% interest, we elect the fair value option.

See *Note 5 - Variable Interest Entities* for discussion of our interest in entities that meet the definition of a VIE.

Reinsurance—We assume insurance and investment contracts under coinsurance, funds withheld coinsurance (funds withheld), and modified coinsurance (modco). We follow reinsurance accounting for transactions that provide indemnification against loss or liability relating to insurance risk (risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk consisting of underwriting, investment, timing risk, and any other significant risks. Assumed premiums are included in the premiums line of the consolidated statements of income and (loss).

Assets and liabilities assumed under modco or funds withheld are presented gross on the consolidated balance sheets. The total return on funds withheld at interest is presented in net investment income on the consolidated statements of income and (loss).

Accounting for reinsurance requires the use of assumptions upon agreement inception, particularly related to the future performance of the underlying business and the potential impact of counterparty credit risks. We attempt to minimize our counterparty credit risk through the structuring of the terms of our reinsurance agreements, including the use of trusts and segregated accounts, and we monitor credit ratings of counterparties for signs of declining credit quality. When a ceding company does not report information on a timely basis, we record accruals based on the best available information at the time, which includes the reinsurance agreement terms and historical experience. We periodically compare actual and anticipated experience to the assumptions used to establish reinsurance assets and liabilities. Refer to *Note 9 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for more information.

Cash and Cash Equivalents—Cash and cash equivalents include deposits and short-term highly liquid investments with a maturity of less than 90 days from the date of acquisition. Amounts included are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

Restricted Cash—Restricted cash consists of cash and cash equivalents held in funds in trust as part of certain coinsurance agreements to secure all statutory reserves and liabilities of the coinsured parties. Changes in the restricted cash balance are reported in investing activities on the consolidated statements of cash flows.

Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Deferred Acquisition Costs and Deferred Sales Inducements - Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances. We include the effects of net unrealized investment gains and losses in the calculation of DAC, DSI and reinsurance intangible balances due to the funds withheld at interest assets being marked-to-market through income. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. The balances associated with the preceding amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the consolidated balance sheets.

Deferred costs related to contracts with only investment related sources of revenues are amortized using the interest method. The interest method amortizes the deferred costs by discounting the future liability cash flows at a break-even rate. The break-even rate is solved such that the present value of future liability cash flows is equal to the net liability at the inception of the contract. The balances associated with this amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the consolidated balance sheets.

Reinsurance Intangibles - For block reinsurance transactions, the difference between the fair value of assets and the sum of the reserves reinsured, other liabilities reinsured, and ceding commission payable or receivable is deferred and recognized on a product-by-product basis either as an unearned revenue reserve ("URR") or deferred acquisition cost ("DAC"). In this context, the URR may also be referred to as the day one gain on reinsurance and DAC as the day one loss on reinsurance. Day one losses are included in deferred acquisition costs and deferred sales inducements and day one gains are included in interest sensitive contract liabilities on the consolidated balance sheets. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive

policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Day one gains and losses related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. If we project a negative future gross profit, the day one gain or loss is amortized proportional to the change in the present value of account value over the lives of the policies.

See *Note 9 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for further discussion.

Interest Sensitive Contract Liabilities—Interest sensitive investment-type contracts include fixed indexed and traditional fixed annuities in the accumulation phase, funding agreements, and immediate annuities without significant mortality risk. We carry liabilities for fixed annuities, and funding agreements at the account balances without reduction for potential surrender or withdrawal charges. Liabilities for immediate annuities without significant mortality risk are calculated as a present value of future liability cash flows at contractual interest rates.

Changes in the interest sensitive contract liabilities are recorded in interest sensitive contract benefits or product charges on the consolidated statements of income and (loss).

Future Policy Benefits—We reinsure contracts classified as long-duration, which includes endowments, and deferred and immediate annuities with life contingencies. Liabilities for long-duration contracts are established using accepted actuarial valuation methods which require the use of assumptions related to expenses, investment yields, mortality, morbidity, and persistency, with a provision for adverse deviation, at the date of issue or acquisition. The reserve investment yield assumptions are specific to our expected earned rate on the asset portfolio supporting the reserves. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary.

For long-duration contracts, the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC and DSI) is less than the gross premium liability, then the impairment is deemed to have occurred. Accordingly, the DAC and DSI asset balances are reduced until the net GAAP liability is equal to the gross premium liability. For deferred annuity policies classified as insurance contracts, if the DAC and DSI asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is posted to arrive at the gross premium liability.

We reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance. We recognize the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality, and market conditions affecting the account balance growth.

Changes in future policy benefits are recorded in future policy and other policy benefits on the consolidated statements of income and (loss).

Other Policy Claims and Benefits—Other policy claims and benefits include amounts payable relating to in course of settlements (ICOS) liabilities associated with interest sensitive contract liabilities and future policy benefits. For immediate annuities and supplemental contracts, ICOS claim liabilities are established to accrue suspended benefit payments between the date of notification of death and the date of verification of death.

Recognition of Revenues and Related Expenses—Revenues for annuities, including surrender and market value adjustments, costs of insurance, policy administration, GMDB, and GLWB, are earned when assessed against policyholder account balances during the period. Interest sensitive contract benefits related to annuity products include interest credited to policyholder account balances. In addition, the change in fair value of embedded derivatives within fixed indexed annuity contracts is included in interest sensitive contract benefits on the consolidated statements of income and (loss).

For certain assumed reinsurance transactions involving in force blocks of business, the ceding company may pay a premium equal to the initial required reserve (future policy benefit). In such transactions, we net the expense associated with the establishment of the reserve against the premiums from the transaction in interest sensitive contract benefits on the consolidated statements of income and (loss).

Premiums for traditional life insurance products, including products with fixed and guaranteed premiums and benefits, are recognized as revenues when due from policyholders.

Recently Adopted Accounting Pronouncements

Debt Issuance Costs (ASU 2015-15 and 2015-03)
These updates require debt issuance costs related to a recognized debt liability or line of credit arrangement to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability and bring existing SEC guidance into conformity with this debt issuance cost guidance. We elected to early adopt this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Consolidation Analysis (ASU 2015-02)
This update changes the analysis a reporting entity performs to determine whether it should consolidate certain types of legal entities and is adopted in these financial statements. We adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Transfers and Servicing (ASU 2014-11)
This update requires repurchase-to-maturity transactions and repurchase financing arrangements be accounted for as secured borrowings and provides for enhanced disclosures, including the nature of collateral pledged and the time to maturity. We fully adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Discontinued Operations (ASU 2014-08)
This update changes the criteria related to reporting discontinued operations and introduces new disclosures. We adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Troubled Debt Restructuring (ASU 2014-04)
This update clarifies when an in substance repossession or foreclosure occurs, and when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. We adopted this standard effective January 1, 2015, and the adoption did not have a material impact to our consolidated financial statements.

Recently Issued Accounting Pronouncements

Improvements to Employee Share-Based Payment Accounting (ASU 2016-09)
This update simplifies several aspects of the accounting for share-based payment award transactions, including income tax consequences and classification on the statement of cash flows. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Revenue Recognition (ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14, and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guidance. ASU 2016-11 brings existing SEC guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Derivatives and Hedging – Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Derivatives and Hedging – Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Financial Instruments – Recognition and Measurement (ASU 2016-01)
This update retains the current accounting for classifying and measuring investments in debt securities and loans, but requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our consolidated financial statements.

Fair Value Measurement – Net Asset Value (ASU 2015-07)
This update has a disclosure-only impact for entities that measure investments using net asset value per share under the practical expedient in the fair value measurement guidance. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Cloud Computing Arrangements (ASU 2015-05)
This update clarifies whether a cloud computing arrangement is an intangible asset or a service contract. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

Stock-Based Compensation (ASU 2014-12)
This update requires a performance target in a share based payment arrangement that affects vesting and that could be achieved after the requisite service period to be treated as a performance condition. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. We will be required to adopt this standard effective January 1, 2016. We do not expect the adoption of this update to have a material effect on our consolidated financial statements.

3. Investments

Available-for-sale securities - The following table represents our AFS investments by asset type. Our AFS investment portfolio includes direct investments in affiliates of Apollo where Apollo can exercise significant influence over the affiliates.

Total available for sale securities	$ 83	$ (5)	$ 12	$ (1)	$ 95	$ (6)

At December 31, 2015, we held 323 AFS securities that were in an unrealized loss position. Of this total, 42 were in an unrealized loss position longer than 12 months.

Other-Than-Temporary Impairments on AFS Securities-For the year ended December 31, 2015, on total AFS securities including related party of $2,943 million, we incurred $1 million of net OTTI losses, of which none related to intent-to-sell impairments. These securities were impaired to fair value as of the impairment date. The remainder of net OTTI losses of $1 million related to credit impairments, of which none related to credit loss impairments that we impaired to fair value and did not bifurcate a portion of the impairment in AOCI, and is also excluded from the rollforward below.

The following table represents a rollforward of the cumulative amounts recognized on the consolidated statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	December 31,		
(In millions)	2015	2014	2013
Beginning balance	$ —	$ —	$ —
Initial impairments – credit loss OTTI recognized on securities not previously impaired	1	—	—
Ending balance	$ 1	$ —	$ —

Net Investment Income - Net investment income by asset type consist of the following:

	December 31,		
(In millions)	2015	2014	2013
Fixed maturity securities	$ 107	$ 40	$ 25
Trading securities	7	—	(1)
Investment funds	21	46	387
Cash and cash equivalents	—	4	—
Funds withheld at interest[1]			
Investment income	2,043	2,014	1,127
Investment related gains (losses)	(1,620)	1,763	471
Investment expenses	(98)	(85)	(45)
Gross realized gain on AFS securities	7	6	13
Gross realized loss on AFS securities	(17)	(3)	(10)
Derivative gains (losses)	2	—	(70)
Other losses	—	4	1
Net investment income	$ 452	$ 3,789	$ 1,898

[1] The total income related to funds withheld at interest is comprised of the total return, including (1) investment income which is comprised of book income on the underlying securities, and (2) investment related gains (losses) which is comprised of realized gains (losses), mark-to-market impacts (change in unrealized gains or losses), and total return on derivatives. The portion related to mark-to-market was a gain (loss) of $(1,415) million, $1,013 million and $(204) million for years ended December 31, 2015, 2014 and 2013, respectively.

Included in net investment income on trading securities are losses of $1 million, losses of $3 million, and losses of $0 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2015, 2014, and 2013, respectively. Also included in net investment income on trading securities are related party losses of $8 million, losses of $2 million, and losses of $0 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2015, 2014, and 2013, respectively.

Credit Quality

The Securities Valuation Office (SVO) of the National Association of Insurance Commissioners (NAIC) is responsible for the credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for filing on the relevant schedule of the NAIC Financial Statement Blank. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation and/or unit price. Typically, if a security has been rated by a Nationally Recognized Statistical Rating Organization (NRSRO), the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC designation	NRSRO equivalent rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC
6	CC and lower

The SVO's loan-backed and structured securities ("LBaSS") methodology is focused on determining the risk associated with the recovery of the amortized cost of each security. In contrast, the NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price. The NRSRO rating assumes that the holder is the original purchaser at par whereas the modeled and non-modeled LBaSS ratings are focused on the recovery of current amortized cost. As the NAIC ratings methodology considers our investment and amortized cost, and the likelihood of recovery of that book value as opposed to the likelihood of default of the security, we view the NAIC ratings methodology as the most appropriate way to view our fixed maturity portfolio from a ratings perspective since a large portion of our holdings were purchased at a significant discount to par.

Specific to LBaSS, the SVO has developed a ratings process and provides instruction on both modeled and non-modeled LBaSS. The modeled LBaSS process is specific to the RMBS and CMBS asset classes. In order to establish ratings at the individual security level, the SVO obtains loan-level analysis of each RMBS and CMBS using a selected vendor's proprietary financial model. The SVO ensures that the vendor has extensive internal quality-control processes in place and the SVO conducts its own quality-control checks of the selected vendor's valuation process. The NAIC retained the services of Pacific Investment Management Co.'s advisory services ("PIMCO Advisory") to model non-agency RMBS owned by U.S. insurers in 2014. The SVO switched from PIMCO Advisory to Blackrock, Inc. ("Blackrock") for non-agency RMBS in 2015. For CMBS, the SVO has retained the services of Blackrock for all years presented. PIMCO Advisory and Blackrock, specific to the periods referred to above (the "selected vendors"), provide five prices ("breakpoints" based on each U.S. insurer's statutory book value price) to utilize in determining the NAIC designation for each modeled LBaSS. For non-modeled LBaSS (ABS and CLOs) with the initial rating of NAIC 1 or NAIC 6, the rating remains the same through the life of the security. For non-modeled LBaSS with the initial rating of NAIC 2 through NAIC 5, the selected vendors are not utilized and the NAIC designations are set using a standardized table of breakpoints provided by the SVO for application to the insurer's statutory book value price. The NAIC designation determines the associated level of RBC that an insurer is required to hold for modeled LBaSS owned

A summary of our AFS fixed maturity securities by NAIC designation is as follows (dollars in millions):

(In millions)	Dec 31, 2015		
	Amortized Cost	Fair Value	Percent of Total
NAIC Designation			
1	$ 1,937	$ 1,912	65%

CC and lower	417	14%	128	12%	25	6%
Non-Rated[1]	68	2%	—	—%	—	—%
Total below investment grade	958	32%	417	39%	128	33%
Total fixed maturity securities	$ 2,943	100%	$ 1,080	100%	$ 389	100%

[1]*Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC rating. The percentage of investment grade securities under NRSRO ratings is lower than under NAIC ratings due to NRSRO ratings not factoring in the Company specific price point of carrying value on structured securities, whereas NAIC ratings factor this in as previously described.*

Consistent with the NAIC Process and Procedures Manual, an NRSRO rating was assigned based on the following criteria: (a) the equivalent S&P rating where the security is rated by one NRSRO; (b) the equivalent S&P rating of the lowest NRSRO when the security is rated by two NRSROs; and (c) the equivalent S&P rating of the second lowest NRSRO if the security is rated by three or more NRSROs. If the lowest two NRSRO ratings are equal, then such rating will be the assigned rating. NRSRO ratings available for the periods presented were S&P, Fitch, Moody's Investor Service ("Moody's"), DBRS, and Kroll Bond Rating Agency, Inc. ("KBRA").

The portion of our AFS fixed maturity portfolio that was considered below investment grade based on NRSRO ratings decreased to 32% from 39% and 33% as of December 31, 2015, 2014 and 2013, respectively. The primary driver of the difference in the ratio of securities considered below investment grade by NRSROs as compared to the securities considered below investment grade by the NAIC relates to the difference in ratings methodologies between the NRSRO and NAIC for RMBS due to investments acquired at a discount to par value, as discussed above. The primary driver of the increase in the percentage of NRSRO below investment grade securities and the corresponding increase in NAIC below investment grade securities is driven by the reinvestment activity and volatile economic environment in 2015.

Purchased Credit Impaired (PCI) Securities - The following table summarizes our PCI securities, which are included in AFS fixed maturity securities:

	December 31,	
(In millions)	2015	2014
Contractually required principal and interest[1]	$ 1,092	$ 325
Less: Cash flows expected to be collected[2]	(704)	(237)
Non-accretable difference	$ 388	$ 88
Cash flows expected to be collected	$ 704	$ 237
Less: Amortized cost	(533)	(180)
Accretable difference	$ 171	$ 57
Fair value	$ 523	$ 183

[1] *Includes principal and accrued interest.*
[2] *Represents the acquisition date undiscounted principal and interest cash flows expected.*

We acquired PCI investments with the following amounts at the time of purchase:

	Years ended December 31,	
(In millions)	2015	2014
Contractually required principal and interest	$ 622	$ 219
Expected cash flows	385	154
Estimated fair value	279	120

The following table summarize the activity for the accretable yield on PCI securities:

	Years ended December 31,	
(In millions)	2015	2014
Balance at beginning of year	$ 57	$ 42
Purchases of PCI securities, net	99	38
Accretion	(7)	5
Changes in expected cash flows	22	(28)
Balance at end of year	$ 171	$ 57

4. Derivative Instruments

We use a variety of derivative instruments to manage equity risk, interest rate risk, credit risk, foreign currency risk, and market volatility. See *Note 2 - Summary of Significant Accounting Policies* for a description of our accounting policies for derivatives and *Note 6 - Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	December 31, 2015		
	Notional Amount	Fair Value	
(In millions)		Assets	Liabilities
Foreign currency forwards	$ 41	$ 1	$ —
Embedded derivatives			
Funds withheld	—	469	—
Interest sensitive contract liabilities	—	—	3,540
Total derivatives	$ 41	$ 470	$ 3,540

	December 31, 2014		
	Notional Amount	Fair Value	
(In millions)		Assets	Liabilities
Foreign currency forwards	$ 37	$ 1	$ —
Embedded derivatives			
Funds withheld	—	2,478	—
Interest sensitive contract liabilities	—	—	3,532
Total derivatives	$ 37	$ 2,479	$ 3,532

	December 31, 2013		
	Notional Amount	Fair Value	
(In millions)		Assets	Liabilities
Foreign currency forwards	$ 61	$ —	$ 1
Embedded derivatives			
Funds withheld	—	1,612	—
Interest sensitive contract liabilities	—	—	2,587
Total derivatives	$ 61	$ 1,612	$ 2,588

Derivatives are included in derivative assets or liabilities on the consolidated balance sheets, with the exception of embedded derivatives. Funds withheld and modco embedded derivatives are included in funds withheld at interest on the consolidated balance sheets. Indexed annuity products embedded derivatives are included in interest sensitive contract liabilities on the consolidated balance sheets. None of our derivatives are designated as hedges.

Foreign currency forwards - We use foreign currency forward contracts to hedge certain invested assets against movement in foreign currency. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives - We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products. Included in net investment income is the total return of the funds withheld embedded derivatives.

Credit Risk-We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

As of December 31, 2015, 2014, and 2013 we had no collateral pledged to counterparties in connection with derivative instruments.

5. Variable Interest Entities

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs

On September 29, 2011, ALRe formed Highland Re Ltd (HRL). HRL was a Bermuda special purpose insurer and a direct subsidiary of ALRe. HRL issued voting Common Shares, 100% owned by ALRe, and one non-voting preferred share, 100% owned by a third party, in order to capitalize HRL. On December 16, 2011 ALRe entered into two non-proportional reinsurance agreements with HRL to cede claims risk associated with an affiliate reinsurance deal. ALRe's interest in HRL represents an interest in a VIE under current authoritative guidance. The Company has determined that it is the primary beneficiary as it satisfies both the power and benefits criteria in that guidance. Accordingly, HRL is consolidated in the financial statements of the Company at December 31, 2013. The preferred share buyer was entitled to request redemption of all or fractional portions of the preferred share under certain conditions during the term of the note. The note was repaid during 2014 and HRL was dissolved in the fourth quarter of 2014.

On November 10, 2010, 2011 A4 Fund, L.P. was formed to purchase commercial mortgage-backed securities in a leveraged structure for the benefit of the limited partners and met the definition of a VIE. The 2011 A4 Fund, L.P. ("A4 Fund") entered into a repurchase agreement with Wells Fargo Bank, N.A. Under this agreement, the A4 Fund could borrow up to $800 million to finance the acquisition of CMBS originally AAA rated. The facility had a three-year term, with two one-year extensions available at the A4 Fund's option with the payment of a 25 basis point extension fee on the outstanding balance of the facility. The A4 Fund was fully liquidated during 2014.

The following table summarizes the assets of consolidated variable interest entities presented:

(in millions)	December 31, 2013
Investments, at fair value	$ 944
Cash and cash equivalents	4
Other assets	5
Assets of consolidated variable interest entities	$ 953

The following table summarizes the liabilities of consolidated variable interest entities presented:

(in millions)	December 31, 2013
Borrowings	$ 719
Other liabilities	23
Liabilities of consolidated variable interest entities	$ 742

Net investment income (loss) of consolidated variable interest entities was $16 million and $(8) million for the years ended December 31, 2014 and 2013 respectively. The operating expenses of consolidated variable interest entities was $3 million and $13 million for the years ended December 31, 2014, and 2013 respectively.

Non-consolidated VIEs - We invest in other entities meeting the definition of a VIE. We do not consolidate these investments because we do not meet the criteria of primary beneficiary as described below.

Fixed Maturity Securities - We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the consolidated balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by ASU 2015-02, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments under US GAAP and are held at fair value on the balance sheet and classified as AFS or trading.

Investment funds - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined we are not under common control, as defined by ASU 2015-02, with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option, in which NAV is used as a practical expedient for fair value.

Income from investment funds is recorded in net investment income on the consolidated statements of income and (loss) and represents the change in fair value of investment fund, net of expenses.

The Company's investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management. Our risk of loss is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to the Company’s initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) available-for-sale securities and other investments are limited to amortized cost; and (4) trading securities are limited to carrying value.

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs:

(in millions)	December 31, 2015	
	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 220	$ 211
Investment in related parties – investment funds	404	436
Investment in fixed maturity securities	1,919	1,991
Investment in related parties – fixed maturity securities	208	231
Total assets	$ 2,751	$ 2,869

(in millions)	December 31, 2014	
	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 106	$ 105
Investment in related parties – investment funds	501	523
Investment in fixed maturity securities	740	742
Investment in related parties – fixed maturity securities	137	138
Total assets	$ 1,484	$ 1,508

(in millions)	December 31, 2013	
	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 50	$ 52
Investment in related parties – investment funds	838	883
Investment in fixed maturity securities	215	197
Total assets	$ 1,103	$ 1,132

The following summarizes the Company's investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

(in millions)	December 31, 2015		
	Carrying Value	Percent of Total	Weighted Avg Life (WAL)
Investment funds			
Private equity	$ 49	22%	4-5

(in millions)	December 31,		
Consolidated Statements of Income	2015	2014	2013
Net income	$ 27	$ 239	$ 464

The following table presents the carrying value by ownership percentage of equity method investment funds, including related party investment funds and consolidated VIE investment funds:

(in millions)	December 31,		
	2015	2014	2013
Ownership Percentage			
100%	$ 49	$ 48	$ 50
50% – 99%	315	471	815
3% – 49%	260	88	23
Equity method investment funds	$ 624	$ 607	$ 888

6. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

The following represents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis:

	December 31, 2015			
	Level 1	Level 2	Level 3	Total

Interest sensitive contract liabilities - embedded derivatives	$ —	$ —	$ 2,587	$ 2,587
Derivative liabilities		1	—	1
Total liabilities measured at fair value	$ —	$ 1	$ 2,587	$ 2,588

[1] *Comprised of host contract and embedded derivative of $1,612 million. The carrying value is equal to the fair value for both the host and embedded derivative. See Note 7 - Funds Withheld at Interest for more detail.*

Fair Value Valuation Methods-We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity - We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS, and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees, and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities - Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as analytics or brokers and are classified as Level 2 or 3.

Funds withheld (embedded derivative) - The fair value of funds withheld at interest is classified as Level 3 as a more than insignificant amount of the underlying assets are Level 3. See *Note 7 - Funds Withheld at Interest* for more information.

Derivatives - Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. We consider and incorporate counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents - The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) - Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with actuarial assumptions for policyholder behavior.

Fair Value Option-The following represents the gains or losses recorded for instruments we have elected the fair value option:

	Twelve months ended December 31,		
(In millions)	2015	2014	2013
Losses recorded for instruments we have elected the fair value option			
Trading securities	$ (88)	$ (1)	$ —
Total (loss) on fair value option	$ (88)	$ (1)	$ —

Transfers Between Levels-Transfers into Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the lack of commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 2.

For the years ended December 31, 2015, 2014, and 2013, there were no transfers between Level 1 and Level 2.

Level 3 Financial Instruments-The following is a reconciliation for all Level 3 assets and liabilities measured at fair value on a recurring basis:

	Twelve months ended December 31, 2015

Significant Unobservable Inputs-Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS fixed maturity securities. Additional significant unobservable inputs are described below.

Fixed maturity securities – For certain fixed maturity securities that support the funds withheld at interest, internal models are used to calculate the fair value. A discounted cash flow approach is utilized. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. Discounts ranged from 4% to 10%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Investment funds – The underlying investment funds that support the funds withheld at interest may have significant unobservable inputs for comparable multiples and weighted average cost of capital rates applied in the valuation models. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are multiplied by the underlying investment's earnings before interest, tax, depreciation, and amortization to establish the total enterprise value of the underlying investments. We use a comparable multiple consistent with the implied trading multiple of public industry peers.

Similarly, for certain underlying investments that support the funds withheld at interest we may use a discounted cash flow model. When we use a discounted cash flow model, the significant input is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value; a decrease in the discount rate can significantly increase the fair value. We determine the discount rate considering the weighted average cost of capital calculation of companies in similar industries with comparable debt to equity ratios.

Interest sensitive contract liabilities - embedded derivative - Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk - For funds withheld and modco contracts we reinsure with affiliated parties, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For non-affiliated contracts reinsured through funds withheld and modco reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget - The Company assumes future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior - We regularly review the lapse and withdrawal assumptions. These are based on the Company's initial pricing assumptions updated for actual experience. Actual Company experience may be limited for recently issued products.

	December 31, 2015				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,540	Option budget method	Non-performance risk	0.00% - 1.81%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0% - 10.7%	Decrease

	December 31, 2014				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,532	Option budget method	Non-performance risk	0.00% - 2.09%	Decrease
			Option budget	0.91% - 3.93%	Increase
			Surrender rate	0% - 10.2%	Decrease

	December 31, 2013				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 2,587	Option budget method	Non-performance risk	0.00% - 2.12%	Decrease
			Option budget	1.56% - 2.5%	Increase
			Surrender rate	0% - 22%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value-The following represents the Company's financial instruments not carried at fair value on the consolidated balance sheets:

		December 31, 2015		December 31, 2014		December 31, 2013	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets							
Investment funds	3	$ 220	$ 220	$ 106	$ 106	$ 50	$ 50
Investment funds in related parties	3	404	404	501	501	838	838
Total assets not carried at fair value		$ 624	$ 624	$ 607	$ 607	$ 888	$ 888
Liabilities							
Interest sensitive contract liabilities	3	$ 39,435	$ 39,281	$ 39,285	$ 39,768	$ 40,367	$ 40,084
Total liabilities not carried at fair value		$ 39,435	$ 39,281	$ 39,285	$ 39,768	$ 40,367	$ 40,084

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we do carry at fair value. The financial instruments presented above are reported at carrying value on the consolidated balance sheets; however, in the case of investment funds, investment funds in related parties and interest sensitive contract liabilities, the carrying amount approximates or equals fair value.

Investment in related parties - Other investments - The fair value of investment in related party - other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities - The carrying and fair value of interest sensitive contract liabilities above includes fixed indexed and traditional fixed annuities without mortality or morbidity risks, funding agreements, and payout annuities without life contingencies. The embedded derivatives within fixed indexed annuities without mortality or morbidity risks are excluded, as they are carried at fair value. The valuation of these investment contracts is based on discounted cash flow methodologies using significant unobservable inputs. The estimated fair value is determined using current market risk-free interest rates, adding a spread to reflect our nonperformance risk and subtracting a risk margin to reflect uncertainty inherent in the projected cash flows.

7. Funds Withheld at Interest

Funds withheld at interest represents the receivable for assets supporting funds withheld and modified coinsurance reinsurance. These assets are held in trusts or custodial accounts that are legally segregated from our third party ceding companies' general accounts and are managed by Athene Asset Management, a related party to ALRe. In the event of a ceding company's insolvency, we would need to assert a claim on the assets supporting our reserve liabilities. However, we have the ability to offset amounts we owe to the ceding company, which reduces our risk of loss. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The Company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets in a fashion similar to invested assets held directly by the Company.

Information on the underlying assets within the funds withheld at interest is presented below.

	Assets Supporting Funds withheld at Interest	
(In millions)	December 31, 2015	December 31, 2014
Fixed maturity securities		
U.S. government and agencies	$ 8	$ 15
U.S. state, municipal, and political subdivisions	894	1,219
Foreign governments	101	—
Corporate	17,178	19,848
CLOs	4,803	4,265
ABS	2,389	2,042
CMBS	1,674	2,867
RMBS	6,923	5,833
Equity securities	179	192
Mortgage loans	5,007	5,003
Investment funds	2,551	2,503
Policy loans	39	36
Derivatives	688	1,284
Short-term investments	114	—
Other investments	255	254
Cash and cash equivalents	1,068	525
Other assets and liabilities[1]	8	(557)
Funds Withheld at Interest	$ 43,879	$ 45,329

[1] Other assets and liabilities includes the net of accrued investment income, open payable and receivable for security trades, excise tax payable, deposits and premiums receivable, claims and surrenders payable, and other assets and liabilities associated with the funds withheld and modco reinsurance treaties.

Approximately 94.2%, and 93.5% of the fixed maturity securities within the funds withheld at interest are investment grade by NAIC designation as of December 31, 2015 and 2014, respectively.

8. Reinsurance

Third-party reinsurance

In July 2009, the Company reinsured a block and flow of fixed annuities of American Equity Investment Life Insurance Company ("AEL") on a funds withheld basis. Effective January 1, 2014, the Company reinsures flow business from AEL on a modified coinsurance basis.

In October 2009, the Company entered into a funds withheld arrangement for a block of deferred annuities with Western United Life Assurance Company.

In the fourth quarter of 2010, the Company entered into a coinsurance reinsurance arrangements for a block of deferred annuities with certain subsidiaries of Universal American Corporation.

In December 2010, the Company entered into a funds withheld reinsurance arrangement for a block of deferred annuities with Jefferson National Life Insurance Company.

In October 2011, the Company entered into a funds withheld reinsurance arrangement for a flow of deferred annuities with Sentinel Security Life Insurance Company.

In January 2014, the Company reinsured a flow of multi-year guaranteed annuities of Midland National Life Insurance Company (Midland), on a modified coinsurance basis.

Affiliated reinsurance

In March 2010, concurrent with AHL's incorporation of Athene Life Insurance Company (ALIC), ALIC ceded all of its funding agreement business to ALRe on a modified coinsurance basis.

In April 2011, concurrent with AHL's acquisition of Liberty Life Insurance Company (LLIC), LLIC ceded a portion of its annuity business to ALRe. LLIC was later renamed Athene Annuity & Life Assurance Company (AADE).

In July 2011, concurrent with AHL's acquisition of Investors Insurance Corp. ("IIC"), IIC ceded a portion of its annuity business to ALRe on a modified coinsurance basis. Effective September 2011, AHL restructured the acquired business such that IIC ceded a portion of the annuity business to Athene Annuity on a coinsurance basis and Athene Annuity ceded a portion of the business to ALRe on a modified coinsurance basis.

Effective July 2012, concurrent with AHL's purchase of Presidential Life Insurance Company (PLIC), PLIC ceded a portion of its annuity business to Athene Annuity and Athene Annuity ceded a portion of such annuity business to ALRe. PLIC was later named Athene Annuity & Life Assurance Company of New York (AANY). Subsequently the reinsurance arrangement was modified and AANY ceded this business to AADE, which is then retroceded to ALRe.

Effective November 2012, AADE entered into a coinsurance agreement with Liberty Bankers Life Insurance Company for a block of deferred annuities, a portion of which was ceded to ALRe on a modified coinsurance basis.

In December 2011, Athene Annuity & Life Assurance Company (AADE) entered into two coinsurance agreements with Transamerica Life Insurance Company for a block of fixed deferred annuities and funding agreement business. AADE ceded a portion of the fixed annuities and all of its funding agreement business to ALRe on a modified coinsurance basis.

Effective October 2013, concurrent with AHL's acquisition of annuity and life operations of Aviva plc's US (later renamed Athene Annuity and Life Company (IA) or AAIA), AAIA ceded a portion of the annuity business to ALRe on a modified coinsurance basis.

The Company continues to reinsure new business related to annuities and funding agreements from AAIA and AADE.

9. Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Included within *Deferred Acquisition Costs and Deferred Sales Inducements* on the consolidated balance sheets are day one losses. The day one losses are summarized separately within the reinsurance intangibles section below.

The following summarizes a rollforward of deferred acquisition costs ("DAC") and deferred sales inducements ("DSI"):

(In millions)	DAC	DSI	Total
Balance at December 31, 2012	$ 127	$ 67	$ 194
Additions	105	28	133
Amortization	(31)	(13)	(44)
Balance at December 31, 2013	201	82	283
Additions	232	91	323
Amortization	(46)	(15)	(61)
Balance at December 31, 2014	387	158	545
Additions	264	111	375
Amortization	15	8	23
Balance at December 31, 2015	$ 666	$ 277	$ 943

We did not make any adjustments to DAC recoverability during the years ended December 31, 2015, 2014, or 2013.

Reinsurance Intangibles

For each block reinsurance transaction, the Company defers the net of the fair value of assets acquired and the sum of reserves acquired, other liabilities acquired, and ceding commission payable or receivable as deferred acquisition cost ("DAC") or unearned revenue reserve ("URR") and referred as day one loss and day one gains, respectively.

The following summarizes the day one losses and day one gains included within *Deferred acquisition costs and deferred sales inducements and Interest sensitive contract liabilities* respectively on the consolidated balance sheets.

(In millions)	Day one gain	Day one loss	Total
Balance at December 31, 2012	$ 243	$ (52)	$ 191
Additions	796	(1,415)	(619)
Amortization	(76)	42	(34)
Balance at December 31, 2013	963	(1,425)	(462)
Additions	—	—	—
Amortization	(102)	423	321
Balance at December 31, 2014	861	(1,002)	(141)
Additions	—	—	—
Amortization	(96)	(83)	(179)
Balance at December 31, 2015	$ 765	$ (1,085)	$ (320)

10. Reserves

Included in *Interest sensitive contract liabilities* are day one gains as of December 31, 2015, December 31, 2014 and December 31, 2013. See *Note 9 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for a summary of day one gains and losses.

The following table summarizes the interest sensitive contract liability reserves by product:

	December 31,		
(in millions)	2015	2014	2013
Deferred annuities	$ 8,857	$ 8,989	$ 9,599
Fixed indexed annuities	30,891	30,685	29,574
Funding agreements	1,539	1,318	1,821
Single premium immediate annuities and supplemental contracts - non-life contingent	923	964	997
Total	$ 42,210	$ 41,956	$ 41,991

The following table summarizes the future policy benefit reserves by product:

	December 31,		
(in millions)	2015	2014	2013
Deferred annuities	$ 23	$ 27	$ 1
Fixed indexed annuities	603	624	126
Single premium immediate annuities and supplemental contracts - life contingent	3,056	3,162	3,263
Total	$ 3,682	$ 3,813	$ 3,390

11. Debt

Refer to *Note 5 - Variable Interest Entities* for disclosures regarding borrowings of the Company's consolidated VIEs.

Revolving Credit Facility—On September 20, 2013, AHL and ALRe entered into a three-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. Beginning in 2014, Athene USA was added as a borrower. The amount available under the Credit Facility was $500 million. In connection with the Credit Facility, AHL guaranteed all of the obligations of ALRe and Athene USA, ALRe guaranteed certain of the obligations of AHL and Athene USA, and Athene USA guaranteed the obligations of AHL and ALRe. The agreement contained various standard covenants with which we had to comply. As of December 31, 2015, we had no amounts outstanding under the Credit Facility and were in compliance with all covenants.

On January 22, 2016, AHL, Athene USA and ALRe terminated the Credit Facility and entered into a five-year revolving credit agreement with Citibank, N.A., as administrative agent. The amount available under the new Credit Facility is $1 billion, with AHL, ALRe, and Athene USA as joint and several borrowers and guarantors. Interest will accrue on outstanding borrowings at LIBOR plus a margin or a base rate plus a margin, based on the credit rating of AHL. The new Credit Facility has a commitment fee on the unused commitment, based on the credit rating of AHL.

12. Common Shares

The Company has one class of common shares, which represents 100% of the total voting power of the Company, and is beneficially owned by AHL. The Company is authorized to and has issued 1,500,000 shares at a par value of $1.00 each to AHL.

13. Stock-Based Compensation

AHL has adopted share incentive plans to issue non-qualified share options, rights to purchase shares, restricted shares, restricted stock units, and other awards which may be settled in, or based upon, AHL's common shares. AHL currently issues restricted Class M common shares and restricted share units to the Company's employees with certain service and performance conditions. As a result, a portion of stock-based compensation expense incurred during the year is allocated to the Company by AHL.

During 2014, AHL adopted amendments to the terms of existing stock-based compensation agreements to conform certain vesting and repurchase terms. Prior to 2014, AHL had the right to repurchase vested shares at the lower of purchase cost or fair value if an employee resigned without good reason, either before an IPO or under other conditions as defined in the original plans. As a result of this repurchase option, the expense associated with vested incentive shares would not be recognized on the income statement until the date on which such shares would have been converted to Class A shares. Therefore, no expense was recorded prior to 2014.

Total stock-based compensation expense incurred by the Company was $3 million and $14 million for the years ended December 31, 2015 and December 31, 2014 respectively. As described above, there was no stock-based compensation expense recognized in connection with the stock-based compensation plans in 2013. These amounts are reflected within the policy and other operating expenses on the consolidated statements of income and (loss).

14. Accumulated Other Comprehensive Income

The following is a detail of AOCI:

	December 31,		
(In millions)	2015	2014	2013
AFS securities	$ (77)	$ 17	$ 23
Accumulated other comprehensive income (loss)	$ (77)	$ 17	$ 23

Changes in AOCI are presented below.

	Years ended December 31,		
(In millions)	2015	2014	2013
Unrealized gains (losses) on AFS securities			
Unrealized holding gain (losses) arising during the year	$ (84)	$ (12)	$ (16)
Less: Reclassification adjustment for gains (losses) realized in net income[1]	(10)	6	3
Change in AOCI	$ (94)	$ (6)	$ (13)

[1] *Recognized in net investment income on the consolidated statements of income and (loss).*

15. Income Taxes

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, the Company will be exempted from taxation until the year 2035.

16. Statutory Requirements

ALRe is licensed by the Bermuda Monetary Authority (BMA) as a Class E long term insurer and is subject to the Insurance Act 1978, as amended and regulations promulgated thereunder (Bermuda Insurance Act). The statutory financial statements of ALRe are prepared in accordance with the Bermuda Insurance Act, as well as directions issued by the BMA. Under the Bermuda Insurance Act, ALRe is required to maintain minimum statutory capital and surplus equal to the greater of a minimum solvency margin (MSM) and the Enhanced Capital Requirement (ECR). The MSM is equal to the greater of $8 million or 2% of the first $500 million of assets plus 1.5% of assets above $500 million and the ECR is calculated based on either an internally developed risk-based capital model or a standard risk-based capital model developed by the BMA. At December 31, 2015, the MSM and ECR were $723 million and $1,751 million, respectively.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's statutory capital and surplus, unless at least two members of ALRe's board of directors sign and submit to the BMA, an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MSM and ECR, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of statutory capital. Distributions in excess of this amount require the approval of the BMA. As of December 31, 2015, 2014, and 2013 the maximum distribution ALRe was permitted to pay AHL without the need for prior approval was $3,529 million, $3,068 million and $2,776 million respectively.

The BMA has granted ALRe permission to use amortized cost instead of fair value as the basis for non-equity securities, including investments underlying funds withheld and modco reinsurance agreements. Excluded from ALRe's statutory returns were $162 million of unrealized losses, $1,255 million of unrealized gains and $163 million as of December 31, 2015, 2014, and 2013 respectively.

Bermuda Regulatory Solvency II Equivalence - As of January 1, 2016, the BMA has embedded an Economic Balance Sheet ("EBS") framework as part of the Capital and Solvency Return. The framework, of which the EBS is a part of, was granted equivalency to Solvency II in March 2016. The first EBS filing is due in 2017, for the year ended December 31, 2016.

Statutory capital and surplus and net income (loss) - The following table presents the statutory capital and surplus and the statutory net income (loss), based on the most recently filed statutory financial statements filed with insurance regulators:

	Statutory Capital & Surplus			Statutory Net Income (Loss)		
	December 31,			Years ended December 31,		
(In millions)	2015	2014	2013	2015	2014	2013
ALRe	$ 5,650	$ 4,048	$ 3,767	$ 461	$ 632	$ 2,704

17. Related Party Transactions

The following summarizes related party balances included on the consolidated balance sheets and the consolidated statements of income and (loss). The table below includes related party balances not previously disclosed.

	December 31,		
(in millions)	2015	2014	2013
Assets			
Funds withheld at interest[1]	$ 40,396	$ 42,556	$ 42,127
Deferred acquisition costs and deferred sales inducements[1]	1,841	1,388	1,562
Other assets[2]	3	—	—
Liabilities			
Interest sensitive contract liabilities[1]	$ 39,178	$ 39,891	$ 40,235
Future policy benefits[1]	3,623	3,736	3,343
Other policy claims and benefits[1]	30	32	40
Other liabilities[3]	34	40	26

	Years ended December 31,		
(in millions)	2015	2014	2013
Revenue			
Premiums[1]	$ 37	$ 15	$ 2,802
Product charges[1]	186	163	52
Net investment income[4]	264	3,535	1,738
Benefits and Expenses			
Interest sensitive contract benefits[1]	$ 436	$ 1,312	$ 717
Amortization of deferred sales inducements[1]	(9)	18	3
Future policy and other policy benefits[1]	107	644	2,940
Amortization of deferred acquisition costs[1]	(106)	464	51
Policy and other operating expenses[5]	271	259	107

[1] We have intercompany modco reinsurance agreements with our affiliates. See Note 8 - Reinsurance for more information. Accordingly, these balances result from our intercompany reinsurance transactions with our affiliates.
[2] Included in Other assets are amounts due from affiliate(s).
[3] Included in Other liabilities are amounts due to affiliate(s).
[4] Included in Net investment income is the net income earned from the assets supporting the funds withheld at interest of our intercompany modco reinsurance agreements of $345 million, $3,586 million and $1,388 million for the years ended December 31, 2015, 2014 and 2013 respectively. Also included in Net investment income is the income earned on the assets directly managed by Apollo, net of Apollo's management fee and sub-advise fee, of $(81) million, $(51) million and $350 million for the years ended December 31, 2015, 2014 and 2013 respectively.
[5] Included in Policy and other operating expenses are policy benefit expenses to our affiliates in relation to the intercompany modco reinsurance agreements for $273 million, $259 million and $97 million for the years ended December 31, 2015, 2014 and 2013, respectively. Also included in Policy and other operating expenses are cost sharing expenses (recovery) with Apollo for $(1) million, $0 million and $10 million for the years ended December 31, 2015, 2014 and 2013 respectively.

Significant cash flows from related party modco reinsurance are included in cash from operations and are disclosed below, along with non-cash profit settlements in the form of security transfers.

	Years ended December 31,		
	2015	2014	2013
Cash profit settlements on modified coinsurance agreements - related party	102	586	338
Non-cash profit settlements on modified coinsurance agreements in the form of securities - related party	653	249	434
Total	755	835	772

A summary of significant related party investing cash flows is as follows:

	Years ended December 31,		
	2015	2014	2013
Cash flow from investing activities			
Sales, maturities, and repayments of:			
Trading securities	53	—	—
Investment funds	154	291	261
Purchases of:			
Available for sale securities, fixed maturity securities	(47)	(61)	—
Trading securities	(52)	(79)	—
Investment funds	(121)	(5)	—

Investment related expenses - Substantially all of our investments are managed by AAM, a subsidiary of AGM. AAM provides direct investment management, asset allocation, mergers and acquisition asset diligence, and certain operational support services for our investment portfolio, including investment compliance, tax, legal, and risk management support. As of December 31, 2015, AAM directly manages $3,507 million of our investment portfolio assets, of which 76% are rated one or two by the NAIC. For certain assets which require specialized sourcing and underwriting capabilities, AAM has chosen to mandate sub-advisors rather than building out in-house capabilities. For the services related to these investments, AAM earns a fee of 0.40% per annum on all assets managed in accounts owned by or related to the Company, including sub-advised assets but excluding certain other limited exceptions. Additionally, AAM recharges the sub-advisory fees to the Company.

Assets supporting funds withheld at interest: The majority of the assets supporting the funds withheld at interest are managed by AAM. See *Note 7 - Funds Withheld at Interest* for more information.

AAM has entered into a Master Sub-Advisory Agreement (MSAA) with certain Apollo affiliates to sub-advise AAM with respect to a portion of our assets, with the fees recharged to us, in addition to the gross fee of 0.40% per annum paid to AAM as described above. The MSAA covers services rendered by Apollo-affiliated sub-advisors relating to investments in certain asset classes, primarily CLO, CMBS, and ABS.

The following represents the assets sub-advised by Apollo affiliates:

	December 31,		
(In millions, except for percentages)	2015	2014	2013
Fixed maturity securities			
U.S. state, municipals, and political subdivisions	$ —	$ 6	$ —
Corporate	57	29	—
CLO	475	273	22
ABS	48	28	10
CMBS	38	—	—
Trading securities	—	35	—
Total assets	$ 618	$ 371	$ 32
Percent of total AAM managed Company assets	15%	17%	2%

The management and sub-advisory fees are included within the net investment income line on the consolidated statements of income and (loss). The management fees payable as of December 31, 2015, 2014, and 2013 were $14 million, $10 million and $12 million respectively. The sub-advisory fees payable as of December 31, 2015, 2014, and 2013 were $19 million, $12 million, and $0 million respectively.

Because the Apollo Group has a significant voting interest in us, in order to protect against potential conflicts of interest resulting from transactions that we and AHL have entered, and will continue to enter into with the Apollo Group, the AHL board of directors has formed a conflicts committee, consisting of five of its directors who are not officers or employees of any member of the Apollo Group, other than AHL and ALRe. The conflicts committee reviews and a majority of the committee members must approve certain material transactions between AHL and/or its subsidiaries and the Apollo Group, subject to certain exceptions.

Service fees - AHL has entered into shared services agreements with AAM. Under these agreements, we and AAM make available to each other certain personnel and services. Expenses for the services are based on the amount of time spent on the affairs of the other party, in addition to actual expenses incurred and certain cost reimbursements. For the years ended December 31, 2015, 2014, and 2013, net expenses allocated from (to) AAM under these agreements were $(1) million, $0 million, and $10 million, respectively. The Company had no net expenses payable to AAM as of December 31, 2015 and 2014 and $7 million of net expense payable to AAM as of December 31, 2013.

18. Commitments and Contingencies

Contingent Commitments-The Company had commitments to make additional capital contributions to certain investment funds of $57 million, $48 million and $41 million as of December 31, 2015, 2014 and 2013 respectively. The Company expects most of its current commitments will be invested over the next five years; however, these commitments could become due any time upon counterparty request.

Funds in Trust (Restricted Assets) - The total restricted assets included on the balance sheets are as follows:

	December 31,		
(In millions)	2015	2014	2013
Fixed maturity securities - AFS	$ 124	$ 143	$ 144
Restricted cash	9	24	8
Total restricted assets	$ 133	$ 167	$ 152

ALRe has established reinsurance trusts of assets equal to statutory reserves, plus an additional amount of assets, as a result of coinsurance agreements with UA described in *Note 8 - Reinsurance.*

Litigation, Claims, and Assessments - On June 12, 2015, a putative class action complaint was filed in the United States District Court, Northern District of California against ALRe, AHL and certain other affiliates. The complaint, which is similar to complaints previously filed against other large insurance companies, primarily alleges that captive reinsurance and other transactions had the effect of misrepresenting the financial condition of AAIA. The complaint purports to be brought on behalf of a class of purchasers of annuity products issued by AAIA between 2007 and the present. There are also various allegations related to the purchase of Aviva USA Corporation concerning entry into a modified coinsurance transaction with ALRe in October 2013. The suit asserts claims of violation of the Racketeer Influenced and Corrupt Organizations Act and seeks compensatory damages, trebled, in an amount to be determined, costs, and attorneys' fees. On March 25, 2016, our motion to transfer to the United States District Court, Southern District of Iowa was granted. We believe that we have meritorious defenses to the claims set forth in the complaint, intend to vigorously defend the litigation, and are seeking dismissal of the complaint through a motion to dismiss that is currently being briefed. In light of the inherent uncertainties involved in this matter, reasonable possible losses, if any, cannot be estimated at this time.

19. Subsequent Events

On May 18, 2016, A. M. Best revised the outlook of the Company from "Stable" to "Positive".

The Company has evaluated the impact of subsequent events through October 6, 2016, the date at which the financial statements were available to be issued.

Report of Independent Auditors

To the Board of Directors and Shareholder of Athene Life Re Ltd.

We have audited the accompanying financial statements of Athene Life Re Ltd., which comprise the balance sheets as of December 31, 2016, 2015, and 2014, and the related statements of income (loss), comprehensive income (loss), equity and cash flows for the years then ended.

Management's responsibility for the financial statements
Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility
Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Athene Life Re Ltd. as of December 31, 2016, 2015, and 2014, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

1. Business, Basis of Presentation, and Significant Accounting Policies

Athene Life Re Ltd. (ALRe, the Company, we, us, or our) a Bermuda exempted company, is a leading retirement services company that reinsures retirement savings products that originate in all 50 U.S. states and the District of Columbia. ALRe is wholly owned by Athene Holding Ltd. (AHL, or the Parent), a Bermuda exempted company. ALRe reinsures business from both third party cedants and affiliates. See *Note 7 - Reinsurance* for more information.

The Company was registered as a Long-Term Insurer on June 26, 2009 under the Insurance Act, 1978 of Bermuda and is classified as a Class E insurer. The Company is engaged in the business of annuity reinsurance, focusing on contracts reinsuring a quota share of future sales (flow transactions) of various fixed annuity product lines. The Company also reinsures closed blocks of existing business (block transactions). Liabilities for reinsurance include immediate annuities, fixed deferred annuities (including fixed indexed products) and funding agreements.

As of December 31, 2016, Fitch, S&P and A.M. Best had issued credit ratings, financial strength ratings and/or outlook statements regarding us, as listed below. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurer or reinsurer to meet its obligations under an insurance policy or reinsurance arrangement and generally involve quantitative and qualitative evaluations by rating agencies of a company's financial condition and operating performance. Generally, rating agencies base their financial strength ratings upon information furnished to them by the company and upon their own investigations, studies and assumptions. Financial strength ratings are based upon factors of concern to policyholders, agents, intermediaries and ceding companies and are not directed toward the protection of investors. Credit and financial strength ratings are not recommendations to buy, sell or hold securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

Outlook	Positive	Stable	Stable

Consolidation and Basis of Presentation - The financial statements of the Company include any variable interest entities for which we are the primary beneficiary. Investments in entities that we do not control, but have the ability to exercise significant influence over operating and financing decisions, other than investments for which we have elected the fair value option, are accounted for under the equity method.

For entities that are consolidated, but not 100% owned, we allocate a portion of the income or loss and corresponding equity to the owners other than the Company. We include the aggregate of the income or loss and corresponding equity that is not owned by the Company in noncontrolling interests in the financial statements.

The financial statements reflect consolidated variable interest entities that were fully liquidated in 2014. As a result, there was income statement activity related to consolidated variable interest entities for the year ended December 31, 2014. We did not consolidate any entities for the years ended December 31, 2015 and 2016. See *Note 4 - Variable Interest Entities* for more information.

We have prepared the financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual experience could materially differ from these estimates and assumptions. The Company's principal estimates impact:

- fair value of investments;
- impairment of investments and valuation allowances;
- derivatives valuation, including embedded derivatives;
- deferred acquisition costs (DAC), deferred sales inducements (DSI), and reinsurance intangibles; and
- future policy benefit reserves.

Additional details regarding these principal estimates and assumptions are discussed in the significant accounting policies that follow and the related footnote disclosures.

Investments

Fixed Maturity and Equity Securities – Fixed maturity securities includes corporate bonds, collateralized loan obligations (CLO's), asset-backed securities (ABS), residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), and redeemable preferred stock. Equity securities in the funds withheld at interest portfolio include common stock, mutual funds, and non-redeemable preferred stock. We classify fixed maturity securities as available-for-sale (AFS) or trading at the time of purchase and subsequently carry them at fair value. Fair value hierarchy and valuation methodologies are discussed in *Note 5 - Fair Value*. Classification is dependent on a variety of factors including our expected holding period, election of the fair value option, and asset and liability matching.

AFS Securities – Unrealized gains and losses on AFS securities are reflected in accumulated other comprehensive income (AOCI) on the balance sheets.

Trading Securities – We elected the fair value option for certain fixed maturity securities. These fixed maturity securities are classified as trading, with changes to fair value included in net investment income on the statements of income and (loss). Although the securities are classified as trading, the trading activity related to these investments is primarily focused on asset and liability matching activities and is not intended to be an income strategy based on active trading. As such, the activity related to these investments on the statements of cash flows is classified as investing activities.

We generally record security transactions on a trade date basis, with any unsettled trades recorded in other assets or other liabilities on the balance sheets. Private placement and investment fund purchases are recorded on a settlement date basis.

Purchased Credit Impaired (PCI) Securities – We purchase certain structured securities, primarily RMBS, having deterioration in credit quality since their issuance, which meet the definition of PCI securities. We determined, based on our expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that we would not collect all contractually required payments, including both principal and interest and considering the effects of prepayments for these PCI securities. Based on these assumptions, the difference between the undiscounted expected future cash flows of the PCI securities and the recorded investment in the securities represents the initial accretable yield, which is accreted into investment income, net of related expenses, over their remaining lives on a level-yield basis. The difference between the contractually required payments on the PCI securities and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change.

Quarterly, we evaluate the undiscounted expected future cash flows associated with PCI securities based on updates to key assumptions. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI securities will change the accretable yield prospectively. Declines in undiscounted expected future cash flows due to further credit deterioration, as well as changes in the expected timing of the cash flows, can result in the recognition of an other-than-temporary impairment (OTTI) charge, as PCI securities are subject to our policy for evaluating investments for OTTI. Significant increases in undiscounted expected future cash flows are recognized prospectively as an adjustment to the accretable yield.

Mortgage Loans – We hold mortgage loans through our funds withheld and modified coinsurance (modco) arrangements. Accordingly, these mortgages are valued at fair value, which is comprised of the amortized cost plus mark-to-market unrealized gains or losses. We calculate amortized cost to be unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on its contractual interest rate. We record amortization of premiums and discounts using the effective yield method, and contractual cash flows on the underlying loan. We accrue interest on loans until it is probable we will not receive interest or the loan is 90 days past due. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income on the statements of income and (loss).

Investment Funds – We invest in certain non-fixed income, alternative investments in the form of limited partnerships or similar legal structures (investment funds). For investment funds in which we have determined we are not the primary beneficiary, and therefore not required to consolidate, we typically record these investments using the equity method of accounting, where the cost is recorded as an investment in the fund. Adjustments to the carrying amount reflect our pro rata ownership percentage of the operating results as indicated by net asset value (NAV) in the investment fund financial statements, which can be on a lag of up to three months when investee information is not received in a timely manner.

We record our proportionate share of investment fund income within net investment income on the statements of income and (loss). Contributions paid or distributions received by the Company are recorded directly to the investment fund balance as an increase to carrying value or as a return of capital, thus reducing our carrying value.

Policy Loans – We hold policy loans through our funds withheld and modco arrangements accordingly, these policy loans are held at fair value which approximates the unpaid principal balance. Policy loans are funds provided to policyholders in return for a claim on the policy's account value. The funds provided are limited to a specified percentage of the account balance. The majority of policy loans do not have a stated maturity and the balances and accrued interest are repaid with proceeds from the policy account balance.

Funds Withheld at Interest – Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with reinsurance agreements in which we act as reinsurer or a modified coinsurer. While the assets in funds withheld and modco trusts are legally owned by the ceding company, the assets are legally segregated from the general accounts of our cedants and all economic rights and obligations on the assets accrue to us. We periodically settle interest accruing to those assets at rates defined by the terms of the agreement. The underlying agreements contain embedded derivatives as discussed below, and as a result the carrying value of Funds Withheld at Interest is equal to the fair value of the underlying assets. The resulting impact on the statement of cash flows from funds withheld and modco agreements after non-cash activity is backed out is that the net cash interest settlements are included in operating activities. Any securities transfers as part of interest settlements, as well as deposits and withdrawals on the underlying agreements, are disclosed as non-cash items. See additional information in *Note 6 - Funds Withheld at Interest*.

Short-term Investments – Short-term investments consists of financial instruments with maturities of greater than three months but less than twelve months when purchased. Short-term securities are held at fair value which approximates amortized cost.

Net Investment Income – We recognize investment income as it accrues or is legally due, net of investment management and custody fees. Investment income on fixed maturity securities includes coupon interest, as well as the amortization of any premiums and the accretion of any discount. Investment income on equity securities represents dividend income and preferred coupons. Realized gains and losses on sales of investments are included on the statements of income and (loss) in net investment income. Other-than-temporary impairments are included on the statements of income and (loss) in net investment income. Realized gains and losses on investments sold are determined based on a first-in first-out method. Included in net investment income is the investment income from funds withheld and modco reinsurance, which is the total return from the assets supporting funds withheld and modco reinsurance.

Other-Than-Temporary Impairment – We identify fixed maturity and equity securities that could potentially have impairments that are other-than-temporary by monitoring market events for changes in market interest rates, credit issues, changes in business climate, management changes, litigation, government actions, and other similar factors. Indicators of impairment may include changes in the issuers' credit ratings, late payments, pricing levels, rating agency actions, key financial ratios, financial statements, revenue forecasts, and cash flow projections.

We review all securities on a case-by-case basis to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in fair value; (3) the issuer's financial position and access to capital; and (4) for fixed maturity securities, our ability and intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine that a security is other-than-temporarily impaired, an impairment loss is recognized.

The recognition of impairment losses on fixed maturity securities on the financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost less any recorded credit loss, we recognize an OTTI in net investment income on the statements of income and (loss) for the difference between amortized cost and fair value. If neither of these two conditions exists, then the recognition of the OTTI is bifurcated and we recognize the credit loss portion in net investment income on the statements of income and (loss) and the non-credit loss portion in AOCI on the balance sheets.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The techniques and assumptions for establishing the best estimate cash flows vary depending on the type of security. The structured security's cash flow estimates are based on security-specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity, prepayments, and structural support, including subordination and guarantees. The non-structured security's cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using security-specific facts and circumstances including timing, security interests, and loss severity.

In periods after an OTTI loss is recognized on a fixed maturity security, we report the impaired security as if it had been purchased on the date it was impaired and continue to estimate the present value of the estimated cash flows of the security. Accordingly, the discount (or reduced premium) based on the new cost basis is accreted into net investment income over the remaining term of the fixed maturity security in a prospective manner based on the amount and timing of estimated future cash flows.

We impair a mortgage loan when it is probable we will not collect all amounts due under the agreement. We establish a valuation allowance on individual loans based on expected losses from future dispositions or settlement, including foreclosures. We calculate the allowance based on how much the carrying value exceeds one of these values:

- the present value of expected future cash flows discounted at the loan's original effective interest rate;
- the value of the loan's collateral if it is in the process of foreclosure or otherwise collateral dependent; or
- the loan's fair value if the loan is being sold.

We first apply any interest accrued or received on the net carrying amount of the impaired loan to the principal of the loan, and once the principal is repaid, we include amounts received in net investment income. We limit accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, we recognize interest income on a cash basis. Loans deemed uncollectible or in foreclosure are charged off against the valuation allowances, and subsequent recoveries, if any, are credited to the valuation allowances. Changes in valuation allowances are reported in net investment income on the statements of income and (loss).

The cost of other invested assets is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within net investment income, and the cost basis of the investment securities is reduced accordingly. We do not change the revised cost basis for subsequent recoveries in value.

Derivative Instruments—We invest in derivatives in both our general account and funds withheld at interest for managing risks experienced in our ongoing operations, such as equity risk, interest rate risk, cash flow risks, which primarily involve managing liability risks associated with our indexed annuity products and reinsurance agreements. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or other underlying notional amount. Derivatives are carried at fair value on the balance sheets in derivative assets and derivative liabilities. We elect to present any derivatives subject to master netting provisions as a gross asset or liability and gross of collateral. Disclosures regarding balance sheet presentation of derivatives subject to master netting agreements are discussed in *Note 3 - Derivative Instruments*.

Embedded Derivatives – We reinsure products, primarily fixed indexed annuity products, or purchase investments that contain embedded derivatives. If we determine the embedded derivative has economic characteristics not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Embedded derivatives are carried on the balance sheets at fair value in the same line item as the host contract. Changes in the fair value of embedded derivatives associated with fixed indexed annuities are reflected in interest sensitive contract benefits on the statements of income and (loss). Embedded derivatives that are not clearly and closely related to the host contract within a financial asset are required to be bifurcated and recorded at fair value unless the fair value option is elected on the host contract. Under the fair value option, bifurcation of the embedded derivative is not necessary as all related gains and losses on the host contract and derivative will be reflected within net investment income on the statements of income and (loss).

Fixed indexed annuity contracts allow the policyholder to elect a fixed interest rate return or an equity market component where interest credited is based on the performance of common stock market indices. The equity market option is an embedded derivative, similar to a call option. The benefit reserve is equal to the sum of the fair value of the embedded derivative and the host (or guaranteed) component of the contracts. The fair value of the embedded derivative is computed as the present value of benefits attributable to the excess of the projected policy contract values over the projected minimum guaranteed contract values. The projections of policy contract values are based on assumptions for future policy growth, which include assumptions for expected index credits on the next policy anniversary date, future equity option costs, volatility, interest rates, and policyholder behavior. The projections of minimum guaranteed contract values include the same assumptions for policyholder behavior as were used to project policy contract values. For certain funds withheld and modco reinsurance contracts the embedded derivative cash flows are discounted using the Company's own credit rating. The host contract is established at contract inception as the initial account value less the initial fair value of the embedded derivative and accreted over the policy's life. The host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value.

Additionally, reinsurance agreements written on a funds withheld coinsurance or modco basis contain embedded derivatives. The fair value of the embedded derivatives on funds withheld and modco agreements is included in the funds withheld at interest line item on the balance sheets. The fair value of the embedded derivative is equal to the unrealized gain or loss on the underlying assets in the funds withheld or modco trust and the fair value of stand-alone derivatives in the portfolios. The change in the fair value of the embedded derivatives related to the change in unrealized gain or loss is recorded in net investment income on the statements of income and (loss).

Variable Interest Entities—An entity that does not have sufficient equity to finance its activities without additional financial support, or in which the equity investors, as a group, do not have the characteristics of a controlling financial interest is a variable interest entity (VIE). The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and may require significant judgment. Our investment funds generally qualify as VIEs and are evaluated for consolidation under the VIE model.

We are required to consolidate a VIE if we are the primary beneficiary, defined as the variable interest holder with both the power to direct the activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. We determine whether we are the primary beneficiary of an entity based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and our relative exposure to the related risks of the VIE. Since affiliates of Apollo Global Management, LLC (AGM and, together with its subsidiaries, Apollo), a related party, are the decision makers in certain of the investment funds, we and a member of our related party group may together have the characteristics of the primary beneficiary of an investment fund. In this situation, we have generally concluded we are not under common control, as defined by ASU 2015-02, with the related party, and therefore consolidate in the circumstances when substantially all of the activities of the VIE are conducted on our behalf. We reassess the VIE and primary beneficiary determinations on an ongoing basis.

If we are not the primary beneficiary, but are able to exert significant influence over the VIE's operations, we record the VIE as an equity method investment. If we are not able to exercise significant influence, generally on investment funds in which we own a less than a 3% interest, we elect the fair value option.

See *Note 4 - Variable Interest Entities* for discussion of our interest in entities that meet the definition of a VIE.

Reinsurance—We assume insurance and investment contracts under coinsurance, funds withheld, and modco. We follow reinsurance accounting for transactions that provide indemnification against loss or liability relating to insurance risk (risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk consisting of underwriting, investment, timing risk, and any other significant risks. Assumed premiums are included in the premiums line of the statements of income and (loss).

For investment contracts, assets and liabilities assumed under coinsurance, funds withheld, or modco are presented gross on the balance sheets. The change in assumed reserves, deposits and withdrawals are presented net in the interest sensitive contract benefits line on the statements of income. For insurance contracts, assets and liabilities assumed or ceded are presented gross on the balance sheets. The change in assumed reserves and benefits are presented net in the future policy and other policy benefits line on the statements of income. Assumed premiums are included in the premiums line of the statements of income.

Assets and liabilities assumed under modco or funds withheld are presented gross on the balance sheets. The total return on funds withheld at interest is presented in net investment income on the statements of income and (loss).

Accounting for reinsurance requires the use of assumptions upon agreement inception, particularly related to the future performance of the underlying business and the potential impact of counterparty credit risks. We attempt to minimize our counterparty credit risk through the structuring of the terms of our reinsurance agreements, including the use of trusts and segregated accounts, and we monitor credit ratings of counterparties for signs of declining credit quality. When a ceding company does not report information on a timely basis, we record accruals based on the best available information at the time, which includes the reinsurance agreement terms and historical experience. We periodically compare actual and anticipated experience to the assumptions used to establish reinsurance assets and liabilities. Refer to *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for more information.

Cash and Cash Equivalents—Cash and cash equivalents include deposits and short-term highly liquid investments with a maturity of less than 90 days from the date of acquisition. Amounts included are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

Restricted Cash—Restricted cash consists of cash and cash equivalents held in funds in trust as part of certain coinsurance agreements to secure all statutory reserves and liabilities of the coinsured parties. Changes in the restricted cash balance are reported in investing activities on the statements of cash flows.

Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Deferred Acquisition Costs (DAC) and Deferred Sales Inducements (DSI) - Costs related to direct and successful efforts of acquiring new business are deferred to the extent they are recoverable from future premiums or gross profits. These costs consist of commissions and policy issuance costs, as well as sales inducements credited to policyholder account balances. We include the effects of net unrealized investment gains and losses in the calculation of DAC, DSI and reinsurance intangible balances due to the funds withheld at interest assets being marked-to-market through income. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of DAC and DSI which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Deferred costs related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. The balances associated with the preceding amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the balance sheets.

Deferred costs related to contracts with only investment related sources of revenues are amortized using the interest method. The interest method amortizes the deferred costs by discounting the future liability cash flows at a break-even rate. The break-even rate is solved such that the present value of future liability cash flows is equal to the net liability at the inception of the contract. The balances associated with this amortization methodology are recorded in deferred acquisition costs and deferred sales inducements on the balance sheets.

Reinsurance Intangibles - For block reinsurance transactions, the difference between the fair value of assets and the sum of the reserves reinsured, other liabilities reinsured, and ceding commission payable or receivable is deferred and recognized on a product-by-product basis

either as an unearned revenue reserve (URR) or DAC. In this context, the URR may also be referred to as the day one gain on reinsurance and DAC as the day one loss on reinsurance. Day one losses are included in deferred acquisition costs and deferred sales inducements and day one gains are included in interest sensitive contract liabilities on the balance sheets. If financial performance significantly deteriorates to the point where a premium deficiency exists, then we record a cumulative charge to the current period. Each reporting period, we update estimated gross profits with actual gross profits as part of the amortization process for the interest sensitive policies. We also periodically revise the key assumptions used in the calculation of the amortization of reinsurance intangibles which results in revisions to the estimated future gross profits. The effects of changes in assumptions are recorded as unlocking in the period in which the changes are made.

Day one gains and losses related to interest sensitive investment-type policies, with significant revenue streams from sources other than investment of the policyholder funds, are amortized over the lives of the policies, in relation to the present value of gross profits including investment spread margins, surrender charge income, policy administration, changes in the guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves, and realized gains and losses on investments. Current period gross profits for fixed indexed annuities also include the impacts of the change in fair value of the embedded derivatives and the change in fair value of the derivative instruments purchased to economically hedge the indexed liabilities. Estimates of the future gross profits are based on assumptions using accepted actuarial methods. If we project a negative future gross profit, the day one gain or loss is amortized proportional to the change in the present value of account value over the lives of the policies.

See *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for further discussion.

Interest Sensitive Contract Liabilities—Interest sensitive investment-type contracts include fixed indexed and traditional fixed annuities in the accumulation phase, funding agreements, and immediate annuities without significant mortality risk. We carry liabilities for fixed annuities, and funding agreements at the account balances without reduction for potential surrender or withdrawal charges. Liabilities for immediate annuities without significant mortality risk are calculated as a present value of future liability cash flows at contractual interest rates.

Changes in the interest sensitive contract liabilities are recorded in interest sensitive contract benefits or product charges on the statements of income and (loss).

Future Policy Benefits—We reinsure contracts classified as long-duration, and deferred and immediate annuities with life contingencies. Liabilities for long-duration contracts are established using accepted actuarial valuation methods which require the use of assumptions related to expenses, investment yields, mortality, morbidity, and persistency, with a provision for adverse deviation, at the date of issue or acquisition. The reserve investment yield assumptions are specific to our expected earned rate on the asset portfolio supporting the reserves. We base other key assumptions, such as mortality and morbidity, on industry standard data adjusted to align with actual company experience, if necessary.

For long-duration contracts, the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC and DSI) is less than the gross premium liability, then the impairment is deemed to have occurred. Accordingly, the DAC and DSI asset balances are reduced until the net GAAP liability is equal to the gross premium liability. For deferred annuity policies classified as insurance contracts, if the DAC and DSI asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is posted to arrive at the gross premium liability.

We reinsure deferred annuity contracts which contain GLWB and GMDB riders. We establish future policy benefits for GLWB and GMDB by estimating the expected value of withdrawal and death benefits in excess of the projected account balance. We recognize the excess proportionally over the accumulation period based on total expected assessments. The methods we use to estimate the liabilities have assumptions about policyholder behavior, mortality, and market conditions affecting the account balance growth.

Changes in future policy benefits are recorded in future policy and other policy benefits on the statements of income and (loss).

Other Policy Claims and Benefits—Other policy claims and benefits include amounts payable relating to in course of settlements (ICOS) liabilities associated with interest sensitive contract liabilities and future policy benefits. For immediate annuities and supplemental contracts, ICOS claim liabilities are established to accrue suspended benefit payments between the date of notification of death and the date of verification of death.

Recognition of Revenues and Related Expenses—Revenues for annuities, including surrender and market value adjustments, costs of insurance, policy administration, GMDB, and GLWB, are earned when assessed against policyholder account balances during the period. Interest sensitive contract benefits related to annuity products include interest credited to policyholder account balances. In addition, the change in fair value of embedded derivatives within fixed indexed annuity contracts is included in interest sensitive contract benefits on the statements of income and (loss).

For certain assumed reinsurance transactions involving in force blocks of business, the ceding company may pay a premium equal to the initial required reserve (future policy benefit). In such transactions, we net the expense associated with the establishment of the reserve against the premiums from the transaction in interest sensitive contract benefits on the statements of income and (loss).

Premiums for traditional life insurance products, including products with fixed and guaranteed premiums and benefits, are recognized as revenues when due from policyholders.

Recently Adopted Accounting Pronouncements

Fair Value Measurement – Net Asset Value (ASU 2015-07)
This update has a disclosure-only impact for entities that measure investments using net asset value per share (NAV) under the practical expedient in the fair value measurement guidance. We adopted this standard effective January 1, 2016, and have removed investments that are measured at NAV as a practical expedient from the fair value hierarchy in all periods presented in the notes to the financial statements.

Cloud Computing Arrangements (ASU 2015-05)
This update clarifies whether a cloud computing arrangement is an intangible asset or a service contract. We adopted this standard effective January 1, 2016, and the adoption of this update did not have a material effect on our financial statements.

Recently Issued Accounting Pronouncements

Gains and Losses from the Derecognition of Nonfinancial Assets (ASU 2017-05)
The amendments in this update clarify the scope of asset derecognition guidance and accounting for partial sales of nonfinancial assets. We will be required to adopt this standard on a retrospective or modified retrospective basis effective January 1, 2018. Early adoption is permitted. We are currently evaluating the impact of this guidance on our financial statements.

Business Combinations - Clarifying the Definition of a Business (ASU 2017-01)
The amendments in this update clarify the definition of a business with the objective of assisting entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our financial statements.

Statement of Cash Flows - Restricted Cash (ASU 2016-18)
This update requires amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2018. Early adoption is permitted. The adoption of this update will require us to change the presentation on the statements of cash flows for restricted cash or restricted cash equivalents; however, we do not expect the adoption of this update to have a material effect on our financial statements.

Consolidation – Interest Held through Related Parties under Common Control (ASU 2016-17)
This update amends the consolidation guidance to change how indirect interests in VIEs are evaluated by a reporting entity when determining whether or not it is the primary beneficiary of that VIE. The primary beneficiary of a VIE is the reporting entity that has a controlling financial interest in a VIE and, therefore, consolidates the VIE. A reporting entity has an indirect interest in a VIE if it has a direct interest in a related party that, in turn, has a direct interest in the VIE. Currently, if a single decision maker and its related parties are under common control, the single decision maker is required to consider indirect interests held through related parties to be the equivalent of direct interests in their entirety. The amendments change the evaluation of indirect interests to be considered on a proportionate basis. We will be required to adopt this standard retrospectively for each period presented effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Statement of Cash Flows (ASU 2016-15)
This update provides specific guidance to clarify how entities should classify certain cash receipts and cash payments on the statement of cash flows. The update also clarifies the application of the predominance principle when cash receipts and cash payments have aspects of more than one class of cash flows. We will be required to adopt this standard effective January 1, 2018. We do not expect the adoption of this update to have a material effect on our financial statements.

Financial Instruments – Credit Losses (ASU 2016-13)
This update is designed to reduce complexity by limiting the number of credit impairment models used for different assets. The model will result in accelerated credit loss recognition on assets held at amortized cost, which includes our commercial and residential mortgage investments held through our funds withheld and modco reinsurance agreements. The identification of credit-deteriorated securities will include all assets that have experienced a more-than-insignificant deterioration in credit since origination. Additionally, any changes in the expected cash flows of credit-deteriorated securities will be recognized immediately in the income statement. Available-for-sale fixed maturity securities are not in scope of the new credit loss model, but will undergo targeted improvements to the current reporting model including the establishment of a valuation allowance for credit losses versus the current direct write down approach. We will be required to adopt this standard effective January 1, 2020. Early adoption is permitted effective January 1, 2019. We are currently evaluating the impact of this guidance on our financial statements.

Revenue Recognition (ASU 2016-12, ASU 2016-11, ASU 2016-10, ASU 2016-08, ASU 2015-14, and ASU 2014-09)
ASU 2014-09 indicates an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2015-14 provided for a one-year deferral of the effective date, which will require us to adopt this standard effective January 1, 2018. ASU 2016-08 amends the principal-

versus-agent implementation guidance and illustrations in ASU 2014-09. ASU 2016-10 clarifies the identification of performance obligations as well as licensing implementation guida nce. ASU 2016-11 brings existing SEC guidance into conformity with revenue recognition accounting guidance of ASU 2014-09 discussed above. ASU 2016-12 provides clarification on assessing collectability, presentation of sales tax, non-cash consideration, and transition. ASU 2016-20 addresses necessary technical corrections and improvements to clarify codification amended by ASU 2014-09 within Topic 606. The revenue recognition updates replace all general and most industry-specific revenue recognition guidance, excluding insurance contracts, leases, financial instruments and guarantees, which have been scoped out of the update. Since the guidance does not apply to revenue on contracts accounted for under the financial instruments or insurance contracts standards, only a portion of our revenues are impacted by this guidance. Our evaluation process includes, but is not limited to, identifying contracts within the scope of the guidance, reviewing and documenting our accounting for these contracts, and identifying and determining the accounting for any related contract costs.

Equity Method and Joint Ventures (ASU 2016-07)
This update eliminates the retroactive adjustments to an investment upon it qualifying for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence by the investor. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Derivatives and Hedging – Contingent Put and Call Options (ASU 2016-06)
This update is intended to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to debt hosts. We will be required to adopt this standard effective January 1, 2017. Early adoption is permitted. We do not expect the adoption of this update to have a material effect on our financial statements.

Derivatives and Hedging – Effects of Derivative Contract Novation (ASU 2016-05)
This update is intended to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require a de-designation of that hedging relationship provided all other hedge accounting criteria continue to be met. We will be required to adopt this standard effective January 1, 2017. We do not expect the adoption of this update to have a material effect on our financial statements.

Leases (ASU 2016-02)
This update is intended to increase transparency and comparability for lease transactions. A lessee is required to recognize an asset and a liability for all lease arrangements longer than 12 months. Lessor accounting is largely unchanged. We will be required to adopt this standard effective January 1, 2019. Early adoption is permitted. We are currently evaluating the impact of this guidance on our financial statements.

Financial Instruments – Recognition and Measurement (ASU 2016-01)
This update retains the current accounting for classifying and measuring investments in debt securities and loans, but requires equity investments to be measured at fair value with subsequent changes recognized in net income, except for those accounted for under the equity method or requiring consolidation. We will be required to adopt this standard effective January 1, 2018. We are currently evaluating the impact of this guidance on our financial statements.

2. Investments

Available-for-sale securities - The following table represents our AFS investments by asset type. Our AFS investment portfolio includes direct investments in affiliates of Apollo where Apollo can exercise significant influence over the affiliates.

	December 31, 2014					
	Less than 12 months		12 months or greater		Total	
(In millions)	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Fixed maturity securities						
U.S. State, municipals, and political subdivisions	$ 10	$ —	$ 1	$ —	$ 11	$ —
Corporate	33	—	21	(1)	54	(1)
CLO	292	(12)	17	(1)	309	(13)
ABS	32	—	—	—	32	—
RMBS	100	(1)	18	(2)	118	(3)
Total AFS securities	$ 467	$ (13)	$ 57	$ (4)	$ 524	$ (17)

At December 31, 2016, we held 331 AFS securities that were in an unrealized loss position. Of this total, 124 were in an unrealized loss position longer than 12 months. We did not recognize the unrealized losses in income as we intend to hold these securities and it not more likely than not we will be required to sell a security before the recovery of its amortized cost.

Other-Than-Temporary Impairments on AFS Securities-For the year ended December 31, 2016, on total AFS securities, including related party investments, of $3,800 million, we incurred less than $1 million of net OTTI losses. These securities were impaired to fair value as of the impairment date.

The following table represents a rollforward of the cumulative amounts recognized on the statements of income for OTTI related to pre-tax credit loss impairments on AFS fixed maturity securities, for which a portion of the securities' total OTTI was recognized in AOCI:

	December 31,		
(In millions)	2016	2015	2014
Beginning balance	$ 1	$ —	$ —
Initial impairments – credit loss OTTI recognized on securities not previously impaired	—	1	—
Ending balance	$ 1	$ 1	$ —

Net Investment Income - Net investment income by asset type consists of the following:

	December 31,		
(In millions)	2016	2015	2014
Fixed maturity securities	$ 192	$ 107	$ 40
Trading securities	27	7	—
Investment funds	(3)	21	46
Cash and cash equivalents	—	—	4
Funds withheld at interest[1]			
Investment income	2,201	2,043	2,014
Investment related gains (losses)	1,184	(1,620)	1,763
Investment expenses	(112)	(98)	(85)
Gross realized gain on AFS securities	13	7	6
Gross realized loss on AFS securities	(11)	(17)	(3)
Derivative gains (losses)	—	2	—
Other losses	1	—	4
Net investment income	$ 3,492	$ 452	$ 3,789

[1] *The total income related to funds withheld at interest is comprised of the total return, including (1) investment income which is comprised of book income on the underlying securities, and (2) investment related gains (losses) which is comprised of realized gains (losses), mark-to-market impacts (change in unrealized gains or losses), and total return on derivatives. The portion related to mark-to-market was a gain (loss) of $882 million, $(1,415) million and $1,013 million for years ended December 31, 2016, 2015 and 2014, respectively.*

Included in net investment income on trading securities are losses of $5 million, losses of $1 million, and losses of $3 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2016, 2015, and 2014, respectively. Also included in net investment income on trading securities are related party losses of $0 million, losses of $8 million, and losses of $2 million resulting from the change in unrealized gains or losses for the underlying bonds we still held as of December 31, 2016, 2015, and 2014, respectively.

Credit Quality

The Securities Valuation Office (SVO) of the National Association of Insurance Commissioners (NAIC) is responsible for the credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for filing on the relevant schedule of the NAIC Financial Statement Blank. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation and/or unit price. Typically, if a security has been rated by a Nationally Recognized Statistical Rating Organization (NRSRO), the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC designation	NRSRO equivalent rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC
6	CC and lower

The SVO's loan-backed and structured securities ("LBaSS") methodology is focused on determining the risk associated with the recovery of the amortized cost of each security. In contrast, the NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price. The NRSRO rating assumes that the holder is the original purchaser at par whereas the modeled and non-modeled LBaSS ratings are focused on the recovery of current amortized cost. As the NAIC ratings methodology considers our investment and amortized cost, and the likelihood of recovery of that book value as opposed to the likelihood of default of the security, we view the NAIC ratings methodology as the most appropriate way to view our fixed maturity portfolio from a ratings perspective since a large portion of our holdings were purchased at a significant discount to par.

Specific to LBaSS, the SVO has developed a ratings process and provides instruction on both modeled and non-modeled LBaSS. The modeled LBaSS process is specific to the RMBS and CMBS asset classes. In order to establish ratings at the individual security level, the SVO obtains loan-level analysis of each RMBS and CMBS using a selected vendor's proprietary financial model. The SVO ensures that the vendor has extensive internal quality-control processes in place and the SVO conducts its own quality-control checks of the selected vendor's valuation process. The NAIC retained the services of Pacific Investment Management Co.'s advisory services ("PIMCO Advisory") to model non-agency RMBS owned by U.S. insurers in 2014. The SVO switched from PIMCO Advisory to Blackrock, Inc. ("Blackrock") for non-agency RMBS in 2015. For CMBS, the SVO has retained the services of Blackrock for all years presented. PIMCO Advisory and Blackrock, specific to the periods referred to above (the "selected vendors"), provide five prices ("breakpoints" based on each U.S. insurer's statutory book value price) to utilize in determining the NAIC designation for each modeled LBaSS. For non-modeled LBaSS (ABS and CLOs) with the initial rating of NAIC 1 or NAIC 6, the rating remains the same through the life of the security. For non-modeled LBaSS with the initial rating of NAIC 2 through NAIC 5, the selected vendors are not utilized and the NAIC designations are set using a standardized table of breakpoints provided by the SVO for application to the insurer's statutory book value price. The NAIC designation determines the associated level of RBC that an insurer is required to hold for modeled LBaSS owned

A summary of our AFS fixed maturity securities by NAIC designation is as follows (dollars in millions):

(In millions)	December 31, 2016		
	Amortized Cost	Fair Value	Percent of Total
NAIC Designation			
1	$ 2,196	$ 2,209	58%

Substantially all of the fixed maturity portfolio, 89%, 91% and 96% as of December 31, 2016, 2015 and 2014 respectively was invested in investment grade assets with a NAIC rating of 1 or 2.

A summary of our AFS fixed maturity securities by NRSRO ratings is set forth below (dollars in millions):

	December 31, 2016		December 31, 2015		December 31, 2014	
(In millions)	Fair Value	Percent of Total	Fair Value	Percent of Total	Fair Value	Percent of Total
AAA/AA/A	$ 950	25%	$ 758	26%	$ 359	33%
BBB	1,203	32%	940	32%	299	28%
Non-Rated[1]	510	13%	287	10%	5	—%
Total Investment grade	2,663	70%	1,985	68%	663	61%
BB	331	9%	225	8%	153	14%
B	82	2%	38	1%	33	3%
CCC	221	6%	210	7%	103	10%
CC and lower	486	13%	417	14%	128	12%
Non-Rated[1]	17	—%	68	2%	—	—%
Total below investment grade	1,137	30%	958	32%	417	39%
Total fixed maturity securities	$ 3,800	100%	$ 2,943	100%	$ 1,080	100%

[1]Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC rating. The percentage of investment grade securities under NRSRO ratings is lower than under NAIC ratings due to NRSRO ratings not factoring in the Company specific price point of carrying value on structured securities, whereas NAIC ratings factor this in as previously described.

Consistent with the NAIC Process and Procedures Manual, an NRSRO rating was assigned based on the following criteria: (a) the equivalent S&P rating where the security is rated by one NRSRO; (b) the equivalent S&P rating of the lowest NRSRO when the security is rated by two NRSROs; and (c) the equivalent S&P rating of the second lowest NRSRO if the security is rated by three or more NRSROs. If the lowest two NRSRO ratings are equal, then such rating will be the assigned rating. NRSRO ratings available for the periods presented were S&P, Fitch, Moody's Investor Service ("Moody's"), DBRS, and Kroll Bond Rating Agency, Inc. ("KBRA").

The portion of our AFS fixed maturity portfolio that was considered below investment grade based on NRSRO ratings decreased to 30% from 32% and 39% as of December 31, 2016, 2015 and 2014, respectively. The primary driver of the difference in the ratio of securities considered below investment grade by NRSROs as compared to the securities considered below investment grade by the NAIC relates to the difference in ratings methodologies between the NRSRO and NAIC for RMBS due to investments acquired at a discount to par value, as discussed above. The primary driver of the change in the percentage of NRSRO below investment grade securities and the change in NAIC below investment grade securities is driven by the reinvestment activity and volatile economic environment in 2016.

Purchased Credit Impaired (PCI) Securities - The following table summarizes our PCI securities, which are included in AFS fixed maturity securities:

	December 31,		
(In millions)	2016	2015	2014
Contractually required principal and interest[1]	$ 1,312	$ 1,092	$ 325
Less: Cash flows expected to be collected[2]	(866)	(704)	(237)
Non-accretable difference	$ 446	$ 388	$ 88
Cash flows expected to be collected	$ 866	$ 704	$ 237
Less: Amortized cost	(664)	(533)	(180)
Accretable difference	$ 202	$ 171	$ 57
Fair value	$ 677	$ 523	183

[1] *Includes principal and accrued interest.*
[2] *Represents the acquisition date undiscounted principal and interest cash flows expected.*

We acquired PCI investments with the following amounts at the time of purchase:

	Years ended December 31,		
(In millions)	2016	2015	2014
Contractually required principal and interest	$ 419	$ 622	$ 219
Expected cash flows	266	385	154
Estimated fair value	193	279	120

The following table summarize the activity for the accretable yield on PCI securities:

	Years ended December 31,		
(In millions)	2016	2015	2014
Balance at beginning of year	$ 171	$ 57	$ 42
Purchases of PCI securities, net	56	99	38
Accretion	(11)	(7)	5
Changes in expected cash flows	(14)	22	(28)
Balance at end of year	$ 202	$ 171	$ 57

3. Derivative Instruments

We use a variety of derivative instruments to manage equity risk, interest rate risk, credit risk, foreign currency risk, and market volatility. See *Note 1 - Business, Basis of Presentation, and Significant Accounting Policies* for a description of our accounting policies for derivatives and *Note 5 - Fair Value* for information about the fair value hierarchy for derivatives.

The following table presents the notional amount and fair value of derivative instruments:

	December 31, 2016		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 61	$ 1	$ —
Embedded derivatives			
Funds withheld	—	1,806	—
Interest sensitive contract liabilities	—	—	4,285
Total derivatives	$ 61	$ 1,807	$ 4,285

	December 31, 2015		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 41	$ 1	$ —
Embedded derivatives			
Funds withheld	—	469	—
Interest sensitive contract liabilities	—	—	3,540
Total derivatives	$ 41	$ 470	$ 3,540

	December 31, 2014		
		Fair Value	
(In millions)	Notional Amount	Assets	Liabilities
Foreign currency forwards	$ 37	$ 1	$ —
Embedded derivatives			
Funds withheld	—	2,478	—
Interest sensitive contract liabilities	—	—	3,532
Total derivatives	$ 37	$ 2,479	$ 3,532

Derivatives are included in derivative assets or liabilities on the balance sheets, with the exception of embedded derivatives. Funds withheld and modco embedded derivatives are included in funds withheld at interest on the balance sheets. Indexed annuity products embedded derivatives are included in interest sensitive contract liabilities on the balance sheets. None of our derivatives are designated as hedges.

Foreign currency forwards - We use foreign currency forward contracts to hedge certain invested assets against movement in foreign currency. The price is agreed upon at the time of the contract and payment is made at a specified future date.

Embedded derivatives - We have embedded derivatives which are required to be separated from their host contracts and reported as derivatives. Host contracts include reinsurance agreements structured on a modco or funds withheld basis and indexed annuity products. Included in net investment income is the total return of the funds withheld embedded derivatives.

Credit Risk - We may be exposed to credit-related losses in the event of counterparty nonperformance on derivative financial instruments. Generally, the current credit exposure of our derivative contracts is the fair value at the reporting date less any collateral received from the counterparty.

As of December 31, 2016, 2015, and 2014 we had no collateral pledged to counterparties in connection with derivative instruments.

4. Variable Interest Entities

Our investment funds generally meet the definition of a VIE, and in certain cases these investment funds are consolidated in our financial statements because we meet the criteria of the primary beneficiary.

Consolidated VIEs - Our consolidated VIEs were fully liquidated as at December 31, 2014 and we did not consolidate any VIEs for the years ended December 31, 2015 and 2016.

On September 29, 2011, ALRe formed Highland Re Ltd (HRL). HRL was a Bermuda special purpose insurer and a direct subsidiary of ALRe. HRL issued voting Common Shares, 100% owned by ALRe, and one non-voting preferred share, 100% owned by a third party, in order to capitalize HRL. On December 16, 2011 ALRe entered into two non-proportional reinsurance agreements with HRL to cede claims risk associated with an affiliate reinsurance deal. ALRe’s interest in HRL represents an interest in a VIE under current authoritative guidance. The Company has determined that it is the primary beneficiary as it satisfies both the power and benefits criteria in that guidance. Accordingly, HRL is consolidated in the financial statements of the Company at December 31, 2013. The preferred share buyer was entitled to request redemption of all or fractional portions of the preferred share under certain conditions during the term of the note. The note was repaid during 2014 and HRL was dissolved in the fourth quarter of 2014.

On November 10, 2010, 2011 A4 Fund, L.P. was formed to purchase commercial mortgage-backed securities in a leveraged structure for the benefit of the limited partners and met the definition of a VIE. The 2011 A4 Fund, L.P. ("A4 Fund") entered into a repurchase agreement with Wells Fargo Bank, N.A. Under this agreement, the A4 Fund could borrow up to $800 million to finance the acquisition of CMBS originally AAA rated. The facility had a three-year term, with two one-year extensions available at the A4 Fund's option with the payment of a 25 basis point extension fee on the outstanding balance of the facility. The A4 Fund was fully liquidated during 2014. As a result, there was income statement activity related to consolidated variable interest entities for the year ended December 31, 2014.

Non-consolidated VIEs - We invest in other entities meeting the definition of a VIE. We do not consolidate these investments because we do not meet the criteria of primary beneficiary as described below.

Fixed Maturity Securities - We invest in securitization entities as a debt holder or an investor in the residual interest of the securitization vehicle, which are included in fixed maturity securities on the balance sheets. These entities are deemed VIEs due to insufficient equity within the structure and lack of control by the equity investors over the activities that significantly impact the economics of the entity. In general, we are a debt investor within these entities and, as such, hold a variable interest; however, due to the debt holders' lack of ability to control the decisions within the trust that significantly impact the entity, and the fact the debt holders are protected from losses due to the subordination by the equity tranche, the debt holders are not deemed the primary beneficiary. Securitization vehicles in which we hold the residual tranche are not consolidated because we do not unilaterally have substantive rights to remove the general partner, or when assessing related party interests, we are not under common control, as defined by GAAP, with the related party, nor are substantially all of the activities conducted on our behalf; therefore, we are not deemed to be the primary beneficiary. Debt investments and investments in the residual tranche of securitization entities are considered debt instruments and are held at fair value on the balance sheet and classified as AFS or trading.

Investment funds - Investment funds include non-fixed income, alternative investments in the form of limited partnerships or similar legal structures that meet the definition of VIEs.

A portion of these investment funds are sponsored and managed by unrelated parties in which we, as limited partner, do not have the power to direct the activities that most significantly impact the economic performance of the fund, nor do we unilaterally have substantive rights to remove the general partner or dissolve the entity without cause. As a result, we do not meet the power criterion to be considered the primary beneficiary and do not consolidate these VIEs in our financial statements.

We also have equity interests in investment funds where the general partner or investment manager is a related party. We have determined in accordance with GAAP we are not under common control with the related party, nor are we deemed to be the primary beneficiary. As a result, investments in these VIEs are not consolidated.

We account for non-consolidated investment funds where we are able to exercise significant influence over the entity under the equity method or by electing the fair value option, in which NAV is used as a practical expedient for fair value.

Income from investment funds is recorded in net investment income on the statements of income and (loss) and represents the change in fair value of investment fund, net of expenses.

The Company's investments in investment funds are generally passive in nature as we do not take an active role in the investment fund's management. Our risk of loss is limited and depends on the investment as follows: (1) investment funds accounted for under the equity method are limited to the Company’s initial investment plus unfunded commitments; (2) investment funds under the fair value option are limited to the fair value plus unfunded commitments; (3) available-for-sale securities and other investments are limited to amortized cost; and (4) trading securities are limited to carrying value.

The following summarizes the carrying value and maximum loss exposure of these non-consolidated VIEs:

	December 31, 2016	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 531	$ 578
Investment in fixed maturity securities	2,573	2,582
Total assets	$ 3,104	$ 3,160

	December 31, 2015	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 624	$ 647
Investment in fixed maturity securities	2,127	2,222
Total assets	$ 2,751	$ 2,869

	December 31, 2014	
(in millions)	Carrying Amount	Maximum Loss Exposure
Investment funds	$ 607	$ 628
Investment in fixed maturity securities	877	880
Total assets	$ 1,484	$ 1,508

The following summarizes the Company's investment funds, including related party investment funds and investment funds owned by consolidated VIEs:

	December 31, 2016		
(in millions)	Carrying Value	Percent of Total	Weighted Avg Life (WAL)
Investment funds			
Public equities	$ 133	25%	N/A
Private equity	73	14%	1-8
Private equity Apollo Alternative Assets (AAA)	136	26%	2-3
Hedge funds	20	4%	3-3
Credit funds	169	31%	1-2
Total investment funds	$ 531	100%	

	December 31, 2015		
(in millions)	Carrying Value	Percent of Total	Weighted Avg Life (WAL)
Investment funds			
Private equity	$ 84	13%	4-7

Summarized Financial Information of Investment Funds-The following is the aggregated summarized financial information of equity method investees and may be presented on a lag due to the availability of financial information from the investee:

	December 31,		
(in millions)	2016	2015	2014
Balance Sheets			
Assets	$ 2,130	$ 1,969	$ 4,214
Liabilities	4	3	940
Equity	2,126	1,966	3,274

(in millions)	December 31,		
Statements of Income	2016	2015	2014
Net income	$ 26	$ 27	$ 239

The following table presents the carrying value by ownership percentage of equity method investment funds, including related party investment funds and consolidated VIE investment funds:

	December 31,		
(in millions)	2016	2015	2014
Ownership Percentage			
100%	$ 26	$ 49	$ 48
50% – 99%	268	315	471
3% – 49%	237	260	88
Equity method investment funds	$ 531	$ 624	$ 607

5. Fair Value

Fair value is the price we would receive to sell an asset or pay to transfer a liability (exit price) in an orderly transaction between market participants. We determine fair value based on the following fair value hierarchy:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Observable inputs other than quoted market prices, and
- Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the instrument's fair value measurement.

We use a number of valuation sources to determine fair values. Valuation sources can include quoted market prices; third-party commercial pricing services; third-party brokers; industry-standard, vendor modeling software that uses market observable inputs; and other internal modeling techniques based on projected cash flows. We periodically review the assumptions and inputs of third-party commercial pricing services through internal valuation price variance reviews, comparisons to internal pricing models, back testing to recent trades, or monitoring trading volumes.

The following represents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis:

	December 31, 2016			
(in millions)	Total	Level 1	Level 2	Level 3

Fair Value Valuation Methods-We used the following valuation methods and assumptions to estimate fair value:

AFS and trading securities
Fixed maturity - We obtain the fair value for most marketable bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. This category typically includes U.S. and non-U.S. corporate bonds, U.S. agency and government guaranteed securities, ABS, CMBS, and RMBS.

We value privately placed fixed maturity securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer with similar characteristics. In some instances, we use a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. We also consider additional factors such as net worth of the borrower, value of collateral, capital structure of the borrower, presence of guarantees, and our evaluation of the borrower's ability to compete in its relevant market. Privately placed fixed maturity securities are classified as Level 2 or 3.

Equity securities - Fair values of publicly traded equity securities are based on quoted market prices and classified as Level 1. Other equity securities, typically private equities or equity securities not traded on an exchange, we value based on other sources, such as analytics or brokers and are classified as Level 2 or 3.

Funds withheld (embedded derivative) - The fair value of funds withheld at interest is classified as Level 3 as a more than insignificant amount of the underlying assets are Level 3. See *Note 6 - Funds Withheld at Interest* for more information.

Derivatives - Derivative contracts can be exchange traded or over-the-counter. Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy depending on trading activity. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. We consider and incorporate counterparty credit risk in the

valuation process through counterparty credit rating requirements and monitoring of overall exposure. We also evaluate and include our own nonperformance risk in valuing derivatives. The majority of our derivatives trade in liquid markets; therefore, we can verify model inputs and model selection does not involve significant management judgment. These are typically classified within Level 2 of the fair value hierarchy.

Cash and cash equivalents - The carrying amount for cash equals fair value. We estimate the fair value for cash equivalents based on quoted market prices. These assets are classified as Level 1.

Interest sensitive contract liabilities (embedded derivative) - Embedded derivatives related to interest sensitive contract liabilities with fixed indexed annuity products are classified as Level 3. The valuations include significant unobservable inputs associated with actuarial assumptions for policyholder behavior.

Fair Value Option-The following represents the gains or losses recorded for instruments we have elected the fair value option:

	Twelve months ended December 31,		
(In millions)	2016	2015	2014
Trading securities	$ 19	$ (88)	$ (1)
Total (loss) on fair value option	$ 19	$ (88)	$ (1)

Transfers Between Levels-Transfers into Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were less observable than in prior periods as indicated by the lack of commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 3.

Transfers out of Level 3 represent securities that were valued using pricing sources which, due to changing market conditions, were more observable than in prior periods as indicated by commercially available vendor prices with observable inputs. Additionally, changes in pricing sources also led to securities transferring into Level 2.

For the years ended December 31, 2016, 2015, and 2014, there were no transfers between Level 1 and Level 2.

Level 3 Financial Instruments-The following is a reconciliation for all Level 3 assets and liabilities measured at fair value on a recurring basis:

Significant Unobservable Inputs-Significant unobservable inputs occur when we could not obtain or corroborate the quantitative detail of the inputs. This applies to AFS fixed maturity securities. Additional significant unobservable inputs are described below.

Funds withheld at interest – For certain fixed maturity securities that support the funds withheld at interest, internal models are used to calculate the fair value. A discounted cash flow approach is utilized. The discount rate is the significant unobservable input due to the determined credit spread being internally developed, illiquid, or other adjustments made to the base rate. The base rate represents a market comparable rate for securities with similar characteristics. Discounts ranged from 4% to 8%. This excludes assets for which significant unobservable inputs are not developed internally, primarily consisting of broker quotes.

Interest sensitive contract liabilities - embedded derivative - Significant unobservable inputs we use in the fixed indexed annuities embedded derivative of the interest sensitive contract liabilities valuation include:

1. Non-performance risk - For funds withheld and modco contracts we reinsure with affiliated parties, we use the credit spread from the U.S. treasury curve based on our public credit rating as of the valuation date. This represents our credit risk for use in the estimate of the fair value of embedded derivatives. For non-affiliated contracts reinsured through funds withheld and modco reinsurance, the cedant company holds collateral against its exposure; therefore, immaterial non-performance risk is ascribed to these contracts.
2. Option budget - The Company assumes future hedge costs in the derivative's fair value estimate. The level of option budgets determines the future costs of the options and impacts future policyholder account value growth.
3. Policyholder behavior - We regularly review the lapse and withdrawal assumptions. These are based on the Company's initial pricing assumptions updated for actual experience. Actual Company experience may be limited for recently issued products.

	December 31, 2016				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 4,285	Option budget method	Non-performance risk	0% - 1.5%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0% - 16.3%	Decrease

	December 31, 2015				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,540	Option budget method	Non-performance risk	0% - 1.8%	Decrease
			Option budget	0.8% - 3.8%	Increase
			Surrender rate	0% - 10.7%	Decrease

	December 31, 2014				
(In millions)	Fair value	Valuation technique	Unobservable inputs	Input/range of inputs	Impact of an increase in the input on fair value
Fixed indexed annuities embedded derivatives	$ 3,532	Option budget method	Non-performance risk	0% - 2.1%	Decrease
			Option budget	0.9% - 3.9%	Increase
			Surrender rate	0% - 10.2%	Decrease

Fair Value of Financial Instruments Not Carried at Fair Value-The following represents the Company's financial instruments not carried at fair value on the balance sheets:

		December 31, 2016		December 31, 2015		December 31, 2014	
(In millions)	Fair Value Level	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets							
Investment funds	NAV[1]	$ 153	$ 153	$ 220	$ 220	$ 106	$ 106
Investment funds in related parties	NAV[1]	378	378	404	404	501	501
Total assets not carried at fair value		$ 531	$ 531	$ 624	$ 624	$ 607	$ 607
Liabilities							
Interest sensitive contract liabilities[2]	3	$ 23,134	$ 22,332	$ 19,737	$ 19,225	$ 19,662	$ 19,464
Total liabilities not carried at fair value		$ 23,134	$ 22,332	$ 19,737	$ 19,225	$ 19,662	$ 19,464

[1] Investments measured at NAV as a practical expedient in determining fair value have not been classified in the fair value hierarchy.
[2] During 2016, we changed the disclosure of interest sensitive contract liabilities to exclude insurance contracts, which are not required to be included. We determined contract types that meet the definition of insurance contracts include universal life and traditional fixed and fixed indexed annuities with significant mortality or morbidity risks. In previous periods, all contracts within interest sensitive contract liabilities not held at fair value were included. As such, the carrying and fair values reported for December 31, 2015, and 2014, were adjusted to be comparable.

We estimate the fair value for financial instruments not carried at fair value using the same methods and assumptions as those we do carry at fair value. The financial instruments presented above are reported at carrying value on the balance sheets; however, in the case of investment funds, investment funds in related parties and interest sensitive contract liabilities, the carrying amount approximates or equals fair value.

Investment funds in related parties - Other investments - The fair value of investment funds in related party - other investments is determined using a discounted cash flow model using discount rates for similar investments.

Interest sensitive contract liabilities - The carrying and fair value of interest sensitive contract liabilities above includes fixed indexed and traditional fixed annuities without mortality or morbidity risks, funding agreements, and payout annuities without life contingencies. The embedded derivatives within fixed indexed annuities without mortality or morbidity risks are excluded, as they are carried at fair value. The valuation of these investment contracts is based on discounted cash flow methodologies using significant unobservable inputs. The estimated fair value is determined using current market risk-free interest rates, adding a spread to reflect our nonperformance risk and subtracting a risk margin to reflect uncertainty inherent in the projected cash flows.

6. Funds Withheld at Interest

Funds withheld at interest represents the receivable for assets supporting funds withheld and modco reinsurance. These assets are held in trusts or custodial accounts that are legally segregated from our third party ceding companies' general accounts and are managed by Athene Asset Management (AAM), a related party to ALRe. In the event of a ceding company's insolvency, we would need to assert a claim on the assets supporting our reserve liabilities. However, we have the ability to offset amounts we owe to the ceding company, which reduces our risk of loss. Interest generally accrues on these assets based upon the investment earnings on the underlying investments. The Company is subject to the investment performance and has all economic rights and obligations on the funds withheld assets in a fashion similar to invested assets held directly by the Company.

Information on the underlying assets within the funds withheld at interest is presented below.

	Assets Supporting Funds withheld at Interest		
(In millions)	December 31, 2016	December 31, 2015	December 31, 2014
Fixed maturity securities			
U.S. government and agencies	$ 8	$ 8	$ 15
U.S. state, municipal, and political subdivisions	1,067	894	1,219
Foreign governments	140	101	—
Corporate	19,909	17,178	19,848
CLOs	5,039	4,803	4,265
ABS	2,498	2,389	2,042
CMBS	1,861	1,674	2,867
RMBS	8,244	6,923	5,833
Equity securities	168	179	192
Mortgage loans	5,472	5,007	5,003
Investment funds	2,443	2,551	2,503
Policy loans	43	39	36
Derivatives	1,146	688	1,284
Short-term investments	196	114	—
Other investments	344	255	254
Cash and cash equivalents	587	1,068	525
Other assets and liabilities[1]	290	8	(557)
Funds Withheld at Interest	$ 49,455	$ 43,879	$ 45,329

[1] Other assets and liabilities includes the net of accrued investment income, open payable and receivable for security trades, excise tax payable, deposits and premiums receivable, claims and surrenders payable, and other assets and liabilities associated with the funds withheld and modco reinsurance treaties.

Approximately 92.3%, 94.2% and 93.5% of the fixed maturity securities within the funds withheld at interest are investment grade by NAIC designation as of December 31, 2016, 2015 and 2014, respectively.

7. Reinsurance

Third-party reinsurance

In January 2014, the Company reinsured a flow of multi-year guaranteed annuities of Midland National Life Insurance Company (Midland) and American Equity Investment Life Insurance ("AEL"), on a modified coinsurance basis.

Affiliated reinsurance

The Company continues to reinsure new business related to annuities and funding agreements from Athene Annuity and Life Company (IA) (AAIA) and Athene Annuity & Life Assurance Company (AADE).

8. Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles

Included within *Deferred Acquisition Costs and Deferred Sales Inducements* on the balance sheets of $2,392 million sheets are deferred acquisition costs (DAC) of $990 million, deferred sales inducements (DSI) of $382 million, and day one losses of $1,020 million. The day one losses are summarized separately within the reinsurance intangibles section below.

Deferred Acquisitions Costs and Deferred Sales Inducements

The following summarizes a rollforward of DAC and DSI:

(In millions)	DAC	DSI	Total
Balance at December 31, 2013	$ 201	$ 82	$ 283
Additions	232	91	323
Amortization	(46)	(15)	(61)
Balance at December 31, 2014	387	158	545
Additions	264	111	375
Amortization	15	8	23
Balance at December 31, 2015	666	277	943
Additions	472	158	630
Amortization	(148)	(53)	(201)
Balance at December 31, 2016	$ 990	$ 382	$ 1,372

We did not make any adjustments to DAC or DSI recoverability during the years ended December 31, 2016, 2015, or 2014.

Reinsurance Intangibles

For each block reinsurance transaction, the Company defers the net of the fair value of assets acquired and the sum of reserves acquired, other liabilities acquired, and ceding commission payable or receivable as DAC or unearned revenue reserve (URR) and referred as day one loss and day one gain, respectively.

The following summarizes the day one losses and day one gains included within *Deferred acquisition costs and deferred sales inducements* and *Interest sensitive contract liabilities* respectively on the balance sheets.

(In millions)	Day one gain	Day one loss	Total
Balance at December 31, 2013	$ 963	$ (1,425)	$ (462)
Amortization	(102)	423	321
Balance at December 31, 2014	861	(1,002)	(141)
Amortization	(96)	(83)	(179)
Balance at December 31, 2015	765	(1,085)	(320)
Additions	—	(51)	(51)
Amortization[1]	(102)	116	14
Balance at December 31, 2016	$ 663	$ (1,020)	$ (357)

[1] *2016 day one loss amortization includes $(103) million credit for an out of period adjustment that relates to 2015.*

9. Reserves

Included in *Interest sensitive contract liabilities* are day one gains as of December 31, 2016, December 31, 2015 and December 31, 2014. See *Note 8 - Deferred Acquisition Costs, Deferred Sales Inducements and Reinsurance Intangibles* for a summary of day one gains and losses.

The following table summarizes the interest sensitive contract liability reserves by product:

	December 31,		
(in millions)	2016	2015	2014
Deferred annuities	$ 11,328	$ 8,857	$ 8,989
Fixed indexed annuities	33,672	30,891	30,685
Funding agreements	1,091	1,539	1,318
Single premium immediate annuities and supplemental contracts - non-life contingent	953	923	964
Total	$ 47,044	$ 42,210	$ 41,956

The following table summarizes the future policy benefit reserves by product:

	December 31,		
(in millions)	2016	2015	2014
Deferred annuities	$ 43	$ 23	$ 27
Fixed indexed annuities	1,134	603	624
Single premium immediate annuities and supplemental contracts - life contingent	2,957	3,056	3,162
Total	$ 4,134	$ 3,682	$ 3,813

10. Debt

Refer to *Note 4 - Variable Interest Entities* for disclosures regarding borrowings of the Company's consolidated VIEs.

Revolving Credit Facility—On September 20, 2013, AHL and ALRe entered into a three-year revolving credit agreement (Credit Facility) with Citibank, N.A., as administrative agent. Beginning in 2014, Athene USA was added as a borrower. The amount available under the Credit Facility was $500 million. In connection with the Credit Facility, AHL guaranteed all of the obligations of ALRe and Athene USA, ALRe guaranteed certain of the obligations of AHL and Athene USA, and Athene USA guaranteed the obligations of AHL and ALRe. The agreement contained various standard covenants with which we had to comply.

On January 22, 2016, AHL, Athene USA and ALRe terminated the Credit Facility and entered into a five-year revolving credit agreement with Citibank, N.A., as administrative agent. The amount available under the new Credit Facility is $1 billion, with AHL, ALRe, and Athene USA as joint and several borrowers and guarantors. Interest will accrue on outstanding borrowings at LIBOR plus a margin or a base rate plus a margin, based on the credit rating of AHL. The new Credit Facility has a commitment fee on the unused commitment, based on the credit rating of AHL. As of December 31, 2016, we had no amounts outstanding under the Credit Facility and were in compliance with all covenants.

11. Common Shares

The Company has one class of common stock, which represents 100% of the total voting power of the Company, and is beneficially owned by Athene Holding Ltd. (“AHL”). The Company is authorized to and has issued 1,500,000 shares at a par value of $1.00 each to AHL.

12. Stock-Based Compensation

AHL has adopted share incentive plans to issue non-qualified share options, rights to purchase shares, restricted shares, restricted stock units, and other awards which may be settled in, or based upon, AHL’s common shares. Through its incentive plans, AHL has issued the following three categories of stock-based compensation to the Company’s employees: long-term incentive plan (LTIP) awards, Class M awards and Class A awards. These awards have certain service and performance conditions. As a result, a portion of stock-based compensation expense incurred during the year is allocated to the Company by AHL.

During 2014, AHL adopted amendments to the terms of existing stock-based compensation agreements to conform certain vesting and repurchase terms. Prior to 2014, AHL had the right to repurchase vested shares at the lower of purchase cost or fair value if an employee resigned without good reason, either before an IPO or under other conditions as defined in the original plans. As a result of this repurchase option, the expense associated with vested incentive shares would not be recognized on the income statement until the date on which such shares would have been converted to Class A shares.

Total stock-based compensation expense incurred by the Company was $4 million, $3 million and $14 million for the years ended December 31, 2016, 2015 and 2014 respectively. These amounts are reflected within the policy and other operating expenses on the statements of income and (loss).

13. Accumulated Other Comprehensive Income

The following is a detail of AOCI:

	December 31,		
(In millions)	2016	2015	2014
AFS securities	$ (1)	$ (77)	$ 17
Investment funds	14	—	—
Accumulated other comprehensive income (loss)	$ 13	$ (77)	$ 17

Changes in AOCI are presented below.

	Years ended December 31,		
(In millions)	2016	2015	2014
Unrealized gains (losses) on AFS securities			
Unrealized holding gain (losses) arising during the year	$ 74	$ (84)	$ (12)
Less: Reclassification adjustment for gains (losses) realized in net income[1]	2	(10)	6
Change in unrealized gains (losses) on AFS securities	76	(94)	(6)
Unrealized gains (losses) on investment funds			
Other comprehensive income on equity method investment funds	14	—	—
Change in AOCI	$ 90	$ (94)	$ (6)

[1] *Recognized in net investment income on the statements of income and (loss).*

14. Income Taxes

Under current Bermuda law, we are not required to pay any taxes in Bermuda on either income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, the Company will be exempted from taxation until the year 2035.

15. Statutory Requirements

ALRe is licensed by the Bermuda Monetary Authority (BMA) as a Class E long term insurer and is subject to the Insurance Act 1978, as amended (Bermuda Insurance Act) and regulations promulgated thereunder. Effective January 1, 2016, in connection with the implementation of its broader regulatory regime, the BMA integrated the Economic Balance Sheet (EBS) framework into the determination of Bermuda Solvency and Capital Requirement (BSCR). The European Commission has granted the BMA's regulatory regime for reinsurance, group solvency calculation and group supervision full equivalence to the European Union's Directive (2009/138/EC, or "Solvency II"). Under this framework a Class E insurer must produce three sets of financial statements:

1. ***GAAP Financial Statements -*** Financial statements prepared in accordance with an internationally recognized comprehensive base of accounting, and for which ALRe has elected to prepare US GAAP financial statements. These financial statements form the basis for the preparation of both the Statutory Financial Statements and the Economic Balance Sheet.

2. ***Statutory Financial Statements (SFS)*** - Equal to the GAAP financial statements adjusted for:
    a. Prudential filters that include a) adjustments to eliminate non-admitted assets including goodwill and other similar intangible assets, not considered admissible for solvency purposes, and b) adjustments to include certain assets and liabilities that are generally off-balance sheet under general purpose reporting. These include items such as guarantees and other instruments that do not relate to the insurer's own insurance contracts.
    b. Directions (aka permitted practices) issued by the BMA.

3. ***Economic Balance Sheet (EBS)*** - A balance sheet where assets are recorded based on GAAP fair values and insurance reserves are based on technical provisions comprised of the sum of a best estimate liability plus a risk margin. The best estimate liability may be calculated by applying the standard approach or the scenario approach. Under the standard approach the discount rate for insurance reserves is a rate prescribed by the BMA. Under the scenario approach the discount rate for insurance reserves is based on the yield on eligible assets owned by the insurer as determined under the worst result of nine prescribed stressed scenarios.

Under the Bermuda Insurance Act, ALRe is required to maintain SFS capital and surplus to meet the Minimum Margin of Solvency (MMS) which is equal to the greater of $8 million or 2% of the first $500 million of SFS assets plus 1.5% of SFS assets above $500 million. As of January 1, 2017 the MMS will also be subject to a floor of 25% of the Enhanced Capital Ratio (ECR).

Under the Bermuda Insurance Act, ALRe is also required to maintain minimum EBS capital and surplus to meet the ECR which is equal to a risk based capital model where risk factor charges are applied to the EBS balance sheet in order to determine the ECR.

The following table presents the ALRE actual and required GAAP, SFS, and EBS capital and surplus and net income amounts as of and for the year ended December 31, 2016.

	Year ended December 31, 2016		
(In millions)	GAAP	SFS	EBS
Actual Capital and Surplus	$ 4,870	$ 6,124	$ 4,411
Required Capital and Surplus [1]	N/A	798	1,932
BSCR Ratio [2]	N/A	N/A	228%
Net Income (Loss) [3]	1,465	460	N/A

(1) Represents the MMS for the SFS and the ECR for EBS. There is not a required capital and surplus amount for the GAAP financial statements.
(2) BSCR ratio for the current binding regulatory solvency constraint of EBS is shown. The BSCR ratio under EBS for December 31, 2016 is not comparable to the BSCR ratio applied to the SFS for years ended December 31, 2015 and prior due to the change in the calculations and addition of the EBS basis to the BMA regime in 2016.
(3) EBS comprises of only a balance sheet.

The BMA has granted ALRe direction in the SFS to utilize amortized cost for the valuation of certain investments instead of fair value as well direction to use U.S. statutory reserving principles for the calculation of insurance reserves instead of US GAAP, subject to the reserves being proven to be adequate based on cash flow testing. The impact on the SFS of these directions is approximately equal to the difference between GAAP and SFS capital and surplus and net income.

To enable the BMA to better assess the quality of the insurer's capital resources, a Class E insurer is required to disclose the makeup of its capital in accordance with the '3-tiered capital system.' Highest quality capital is classified as Tier 1 Capital, lesser quality capital is classified as either Tier 2 Capital or Tier 3 Capital. The Bermuda Insurance Act requires that Class E insurers have Tier 1 Capital equal to or greater than 50% of the value of its ECR and Tier 3 Capital of not more than 17.65% of the aggregate of its Tier 1 Capital and Tier 2 Capital. As of December 31, 2016 all of the eligible capital used by ALRe to meet the MSM and ECR was Tier 1 Capital. ALRe monitors its capital tiers and any

encumbrances on capital when determining capital tiers, including assessing any capital restricted in trusts and funds withheld or modco arrangements.

Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's SFS capital and surplus, unless at least two members of ALRe's board of directors sign and submit to the BMA, an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MMS and ECR, ALRe is permitted to distribute up to the sum of 100% of SFS surplus and an amount less than 15% of SFS capital. Distributions in excess of this amount require the approval of the BMA. As of December 31, 2016 the binding constraint on the maximum distribution ALRe was permitted to pay AHL without the need for prior approval was the EBS capital and surplus in excess of the ECR and was $2,479.

16. Related Party Transactions

The following summarizes related party balances included on the balance sheets and the statements of income and (loss). The tables below include related party balances not previously disclosed.

	December 31,		
(in millions)	2016	2015	2014
Assets			
Investments			
Available for sale securities, CLOs, at fair value	$ 158	$ 136	$ 60
Trading securities, CLOs, at fair value	83	72	77
Investment funds	378	404	501
Funds withheld at interest[1]	42,920	40,396	42,556
Total investments	43,539	41,008	43,194
Deferred acquisition costs and deferred sales inducements[1]	2,104	1,841	1,388
Other assets[2]	1	3	—
Total related party assets	$ 45,644	$ 42,852	$ 44,582
Liabilities			
Interest sensitive contract liabilities[1]	$ 40,785	$ 39,178	$ 39,891
Future policy benefits[1]	4,022	3,623	3,736
Other policy claims and benefits[1]	14	30	32
Other liabilities[3]	20	34	40
Due to affiliates	3	—	—
Total related party liabilities	$ 44,844	$ 42,865	$ 43,699

(in millions)	Years ended December 31, 2016	2015	2014
Revenue			
Premiums[1]	$ 15	$ 37	$ 15
Product charges[1]	214	186	163

Benefits and Expenses			
Interest sensitive contract benefits[1]	$ 799	$ 436	$ 1,312
Amortization of deferred sales inducements[1]	47	(9)	18
Future policy and other policy benefits[1]	617	107	644
Amortization of deferred acquisition costs[1]	214	(106)	464
Policy and other operating expenses[5]	283	271	259

[1] *We have intercompany modco reinsurance agreements with our affiliates. See Note 7 - Reinsurance for more information. Accordingly, these balances result from our intercompany reinsurance transactions with our affiliates.*
[2] *Included in other assets are amounts due from affiliate(s).*
[3] *Included in other liabilities are amounts due to affiliate(s).*
[4] *Included in net investment income is the net income earned from the assets supporting the funds withheld at interest of our intercompany modco reinsurance agreements of $3,019 million, $345 million and $3,586 million for the years ended* December 31, 2016, 2015, and 2014 *respectively. Also included in net investment income is the income earned on the assets directly managed by Apollo, net of Apollo's management fee and sub-advise fee, of $(112) million, $(81) million and $(51) million for the years ended* December 31, 2016, 2015, and 2014 *respectively.*
[5] *Included in policy and other operating expenses are policy benefit expenses to our affiliates in relation to the intercompany modco reinsurance agreements for $283 million, $273 million and $259 million for the years ended* December 31, 2016, 2015, and 2014*, respectively. Also included in policy and other operating expenses are cost sharing expenses (recovery) with Apollo for $0 million, $(1) million and $0 million for the years ended* December 31, 2016, 2015, and 2014 *respectively.*

Significant cash flows from related party modco reinsurance are included in cash from operations and are disclosed below, along with non-cash profit settlements in the form of security transfers.

	Years ended December 31, 2016	2015	2014
Cash profit settlements on modified coinsurance agreements - related party	$ 89	$ 102	$ 586
Non-cash profit settlements on modified coinsurance agreements in the form of securities - related party	361	653	249
Total	$ 450	$ 755	$ 835

A summary of significant related party investing cash flows is as follows:

	Years ended December 31, 2016	2015	2014
Cash flow from investing activities
