Many of our funds, especially our credit funds may choose to use leverage as part of their respective investment programs and regularly borrow a substantial amount of their capital. The use of leverage poses a significant degree of risk and enhances the possibility of a significant loss in the value of the investment portfolio. Our credit funds may borrow money from time to time to purchase or carry securities. The interest expense and other costs incurred in connection with such borrowing may not be recovered by appreciation in the securities purchased or carried, and will be lost-and the timing and magnitude of such losses may be accelerated or exacerbated-in the event of a decline in the market value of such securities. Gains realized with borrowed funds may cause the fund's net asset value to increase at a faster rate than would be the case without borrowings. However, if investment results fail to cover the cost of borrowings, the fund's net asset value could also decrease faster than if there had been no borrowings.

In addition, as a business development company under the Investment Company Act, AINV is permitted to issue senior securities in amounts such that its asset coverage ratio equals at least 200% after each issuance of senior securities. Further, AFT and AIF, as registered investment companies, are restricted in the (i) issuance of preferred shares to amounts such that their respective asset coverage (as defined in Section 18 of the Investment Company Act) equals at least 200% after issuance and (ii) incurrence of indebtedness, including through the issuance of debt securities, such that, immediately after issuance the fund will have an asset coverage (as defined in Section 18 of the Investment Company Act) of at least 300%. The ability of AFT and AIF to pay dividends on their common stock may be restricted if the asset coverage of their indebtedness falls below 300% and if the asset coverage on their preferred stock falls below 200%. AINV will be restricted if its asset coverage ratio falls below 200% and any amounts that it uses to service its indebtedness are not available for dividends to its common shareholders. An increase in interest rates could also decrease the value of fixed-rate debt investments that our funds make. Any of the foregoing circumstances could have a material adverse effect on our financial condition, results of operations and cash flow.

Certain of our investment funds may invest in high-yield, below investment grade or unrated debt, or securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Such investments are subject to a greater risk of poor performance or loss.

Certain of our investment funds, especially our credit funds, may invest in below investment grade or unrated debt, including corporate loans and bonds, each of which generally involves a higher degree of risk than investment grade rated debt, and may be less liquid. Issuers of high yield or unrated debt may be highly leveraged, and their relatively high debt-to-equity ratios create increased risks that their operations might not generate sufficient cash flow to service their debt obligations. As a result, high yield or unrated debt is often less liquid than investment grade rated debt. Also, investments may be made in loans and other forms of debt that are not marketable securities and therefore are not liquid. In the absence of hedging measures, changes in interest rates generally will also cause the value of debt investments to vary inversely to such changes. The obligor of a debt security or instrument may not be able or willing to pay interest or to repay principal when due in accordance with the terms of the associated agreement and collateral may not be available or sufficient to cover such liabilities. Commercial bank lenders and other creditors may be able to contest payments to the holders of other debt obligations of the same obligor in the event of default under their commercial bank loan agreements. Sub-participation interests in syndicated debt may be subject to certain risks as a result of having no direct contractual relationship with underlying borrowers. Debt securities and instruments may be rated below investment grade by recognized rating agencies or unrated and face ongoing uncertainties and exposure to adverse business, financial or economic conditions and the issuer's failure to make timely interest and principal payments.

Certain of our investment funds, especially our credit funds, may invest in business enterprises that are or may become involved in work-outs, liquidations, spin-offs, reorganizations, bankruptcies and similar transactions, and may purchase non-performing loans or other high-risk receivables. An investment in such a business enterprise entails the risk that the transaction in

which such business enterprise is involved either will be unsuccessful, will take considerable time or will result in a distribution of cash or a new security the value of which will be less than the purchase price to the fund of the security or other financial instrument in respect of which such distribution is received. In addition, if an anticipated transaction does not in fact occur, the fund may be required to sell its investment at a loss. Investments in troubled companies may also be adversely affected by U.S. federal and state laws relating to, among other things, fraudulent conveyances, voidable preferences, lender liability and a bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims. Investments in securities and private claims of troubled companies made in connection with an attempt to influence a restructuring proposal or plan of reorganization in a bankruptcy case may also involve substantial litigation. Because there is substantial uncertainty concerning the outcome of transactions involving financially troubled companies, there is a potential risk of loss by a fund of its entire investment in such company. Moreover, a major economic recession could have a materially adverse impact on the value of such securities.

Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the value and liquidity of securities rated below investment grade or otherwise adversely affect our reputation. For example, certain of our investment funds, especially our credit funds, may receive equity in exchange for debt securities of troubled companies in which they have invested, and thus become equity owners of business enterprises that have not been subject to the same level or kind of due diligence investigation that our funds would typically conduct in connection with an equity investment. This could result in adverse publicity, reputational harm, and possibly control person liability in certain circumstances depending on the size of the funds' equity stake and other factors.

We rely on technology and information systems to conduct our businesses, and any failures and interruptions of these systems could adversely affect our businesses and results of operations. Additionally, we face operational risks in the execution, confirmation or settlement of transactions and our dependence on our headquarters and third-party providers.

We rely on a host of computer software and hardware systems, all of which are vulnerable to an increasing number of cyber and security threats. We further rely on financial, accounting and other data processing systems to mitigate the risk of errors in the execution, confirmation or settlement of transactions. As we depend on our New York-based headquarters and third-party service providers for hosting solutions and technologies, a disaster or disruption in the related infrastructure could impair our operations and could impact our reputation, adversely affect our businesses and limit our ability to grow. The materialization of one or more of these risks is likely to have a material adverse effect on us.

Reliance on computer hardware and software systems. The efficient operation of our businesses is dependent on computer hardware and software systems. Information systems are vulnerable to security breaches by computer hackers and cyber terrorists. There has been an increase in the frequency and sophistication of the cyber and security threats we face, with attacks ranging from those common to businesses generally to those that are more advanced and persistent, which may target us because, as an alternative investment management firm, we hold confidential and other price sensitive information about, among other things, the portfolio companies of our funds and potential fund investments. As a result, we may face a heightened risk of a security breach or disruption with respect to sensitive information resulting from an attack by computer hackers, foreign governments, or cyber terrorists. We rely on industry accepted security measures and technology to securely maintain confidential and proprietary information maintained on our information systems. However, these measures and technology may not adequately prevent security breaches. In addition, the unavailability of the information systems or the failure of these systems to perform as anticipated for any reason could disrupt our businesses and could result in decreased performance and increased operating costs, causing our businesses and results of operations to suffer. Any significant interruption or failure of our information systems or any significant breach of security could adversely affect our businesses and results of operations. The costs related to cyber or other security threats or disruptions may not be fully insured or indemnified by other means. In addition, cyber security has become a top priority for regulators around the world. For example, the SEC announced that one of the 2016 examination priorities for the Office of Compliance Inspections and Examinations' (OCIE) was on investment firms' cyber security procedures and controls. Our funds' portfolio companies also rely on data processing systems and the secure processing, storage and transmission of information, including payment and health information. A disruption or compromise of these systems could have a material adverse effect on the value of these businesses.

Errors made in the execution, confirmation or settlement of transactions. We face operational risk from errors made in the execution, confirmation or settlement of transactions. We also face operational risk from transactions not being properly recorded, evaluated or accounted for in our funds. In particular, our credit business is highly dependent on our ability to process and evaluate, on a daily basis, transactions across markets and geographies in a time-sensitive, efficient and accurate manner. New investment products we may introduce could create a significant risk that our existing systems may not be adequate to identify or control the relevant risks in the investment strategies employed by such new investment products. In addition, our information systems and technology might not be able to accommodate our growth, and the cost of maintaining such systems might increase from its current level. These risks could cause us to suffer financial loss, a disruption of our businesses, liability to our funds, regulatory intervention and reputational damage.

Dependence on our New York based headquarters and third-party vendors. We depend on our headquarters, which is located in New York City, for the operation of many of our businesses. We are also dependent on an increasingly concentrated group of third party vendors that we do not control for hosting solutions and technologies. We also rely on third-party service providers for certain aspects of our businesses, including for certain information systems, technology and administration of our funds and compliance matters. A disaster or a disruption in the infrastructure that supports our businesses, including a disruption involving electronic communications or other services used by us, our vendors or third parties with whom we conduct business, or directly affecting our headquarters, may have an adverse impact on our ability to continue to operate our businesses without interruption which could have a material adverse effect on us. Our disaster recovery programs may not be sufficient to mitigate the harm that may result from such a disaster or disruption. In addition, insurance and other safeguards might only partially reimburse us for our losses, if at all.

Failure to maintain the security of our information and technology networks, including personally identifiable and investor information, intellectual property and proprietary business information could have a material adverse effect on us.

We are subject to various risks and costs associated with the collection, handling, storage and transmission of sensitive information, including those related to compliance with U.S. and foreign data collection and privacy laws and other contractual obligations, as well as those associated with the compromise of our systems collecting such information. In the ordinary course of our business, we collect and store sensitive data, including our proprietary business information and intellectual property, and personally identifiable information of our employees and our investors, in our data centers and on our networks. The secure processing, maintenance and transmission of this information are critical to our operations. Although we take various measures and have made, and will continue to make, significant investments to ensure the integrity of our systems and to safeguard against such failures or security breaches, there can be no assurance that these measures and investments will provide protection. A significant actual or potential theft, loss, corruption, exposure, fraudulent use or misuse of investor, employee or other personally identifiable or proprietary business data, whether by third parties or as a result of employee malfeasance or otherwise, non-compliance with our contractual or other legal obligations regarding such data or intellectual property or a violation of our privacy and security policies with respect to such data could result in significant remediation and other costs, fines, litigation or regulatory actions against us by the U.S. federal and state governments, the EU or other jurisdictions or by various regulatory organizations or exchanges. Such an event could additionally disrupt our operations and the services we provide to investors, damage our reputation, result in a loss of a competitive advantage, impact our ability to provide timely and accurate financial data, and cause a loss of confidence in our services and financial reporting, which could adversely affect our businesses, revenues, competitive position and investor confidence.

We derive a substantial portion of our revenues from funds managed pursuant to management agreements that may be terminated or fund partnership agreements that permit fund investors to request liquidation of investments in our funds on short notice.

The terms of our funds generally give either the general partner of the fund, the fund's board of directors or the third-party advisor the right to terminate our investment management agreement with the fund. However, insofar as we control the general partner of our funds that are limited partnerships, the risk of termination of investment management agreement for such funds is limited, subject to our fiduciary or contractual duties as general partner. This risk is more significant for certain of our funds which have independent boards of directors.

With respect to our funds that are subject to the Investment Company Act, following the initial two years of operation each fund's investment management agreement must be approved annually by (i) such fund's board of directors or by the vote of a majority of the funds' shareholders and (ii) in each case, also by the majority of the independent members of such fund's board of directors. Each investment management agreement for such funds can also be terminated on not more than 60 days' notice by the funds' board of directors or by a vote of a majority of the outstanding shares. Currently, AFT and AIF, management investment companies under the Investment Company Act, and AINV, a management investment company that has elected to be treated as a business development company under the Investment Company Act, are subject to these provisions of the Investment Company Act. We have also been engaged as a sub-advisor for funds that are subject to the Investment Company Act, and those sub-advisory agreements contain, among other things, renewal and termination provisions that are substantially similar to the investment management agreements for each of AFT, AIF and AINV. Termination of these agreements would reduce the fees we earn from the relevant funds, which could have a material adverse effect on our results of operations.

The governing documents of certain of our funds provide that a simple majority of a fund's unaffiliated investors have the right to liquidate that fund, which would cause management fees and incentive income to terminate. Our ability to realize incentive income from such funds also would be adversely affected if we are required to liquidate fund investments at a time when market conditions result in our obtaining less for investments than could be obtained at later times. We do not know whether, and under what circumstances, the investors in our funds are likely to exercise such right.

In addition, the management agreements of our funds would terminate if we were to experience a change of control without obtaining fund investor consent. Such a change of control could be deemed to occur in the event our Managing Partners exchange enough of their interests in the Apollo Operating Group into our Class A shares such that our Managing Partners no longer own a controlling interest in us. We cannot be certain that consents required for the assignment of our management agreements will be obtained if such a deemed change of control occurs. Termination of these agreements would affect the fees we earn from the relevant funds and the transaction and advisory fees we earn from the underlying portfolio companies, which could have a material adverse effect on our results of operations.

Our use of leverage to finance our businesses will expose us to substantial risks, which are exacerbated by our funds' use of leverage to finance investments.

We have senior notes outstanding and loans outstanding and an undrawn revolving credit facility described in note 11 to our consolidated financial statements. We may choose to finance our business operations through further borrowings. Our existing and future indebtedness exposes us to the typical risks associated with the use of leverage, including those discussed above under "—Dependence on significant leverage in investments by our funds could adversely affect our ability to achieve attractive rates of return on those investments." These risks are exacerbated by certain of our funds' use of leverage to finance investments and, if they were to occur, could cause us to suffer a decline in the credit ratings assigned to our debt by rating agencies, if any, which might result in an increase in our borrowing costs or result in other material adverse effects on our businesses.

As these borrowings, notes and other indebtedness mature (or are otherwise repaid prior to their scheduled maturities), we may be required to either refinance them by entering into new facilities or issuing new notes, which could result in higher borrowing costs, or issuing equity, which would dilute existing shareholders. We could also repay them by using cash on hand or cash from the sale of our assets. We could have difficulty entering into new facilities, issuing new notes or issuing equity in the future on attractive terms, or at all.

We are subject to third-party litigation from time to time that could result in significant liabilities and reputational harm, which could have a material adverse effect on our results of operations, financial condition and liquidity.

In general, we will be exposed to risk of litigation by our investors if our management of any fund is alleged to constitute bad faith, gross negligence, willful misconduct, fraud, willful or reckless disregard for our duties to the fund or other forms of misconduct. Fund investors could sue us to recover amounts lost by our funds due to our alleged misconduct, up to the entire amount of loss. Further, we may be subject to litigation arising from investor dissatisfaction with the performance of our funds or from third-party allegations that we (i) improperly exercised control or influence over companies in which our funds have large investments or (ii) are liable for actions or inactions taken by portfolio companies that such third parties argue we control. By way of example, we, our funds and certain of our employees are each exposed to the risks of litigation relating to investment activities in our funds and actions taken by the officers and directors (some of whom may be Apollo employees) of portfolio companies, such as the risk of shareholder litigation by other shareholders of public companies in which our funds have large investments. As an additional example, we are sometimes listed as a co-defendant in actions against portfolio companies on the theory that we control such portfolio companies. We are also exposed to risks of litigation or investigation relating to transactions that presented conflicts of interest that were not properly addressed. See "—Our failure to deal appropriately with conflicts of interest could damage our reputation and adversely affect our businesses." In addition, our rights to indemnification by the funds we manage may not be upheld if challenged, and our indemnification rights generally do not cover bad faith, gross negligence, willful misconduct, fraud, willful or reckless disregard for our duties to the fund or other forms of misconduct. If we are required to incur all or a portion of the costs arising out of litigation or investigations as a result of inadequate insurance proceeds or failure to obtain indemnification from our funds, our results of operations, financial condition and liquidity could be materially adversely affected.

In addition, with a workforce that includes many very highly paid investment professionals, we face the risk of lawsuits relating to claims for compensation, which may individually or in the aggregate be significant in amount. Such claims are more likely to occur in situations where individual employees may experience significant volatility in their year-to-year compensation due to trading performance or other issues and in situations where previously highly compensated employees were terminated for performance or efficiency reasons. The cost of settling such claims could adversely affect our results of operations.

If any civil or criminal litigation brought against us were to result in a finding of substantial legal liability or culpability, the litigation could, in addition to any financial damage, cause significant reputational harm to us, which could seriously harm our business. We depend to a large extent on our business relationships and our reputation for integrity and high-caliber professional services to attract and retain investors and qualified professionals and to pursue investment opportunities for our funds. As a result, allegations of improper conduct by private litigants or regulators, whether the ultimate outcome is favorable or unfavorable to us, as well as negative publicity and press speculation about us, our investment activities or the private equity industry in general, whether or not valid, may harm our reputation, which may be more damaging to our businesses than to other types of businesses. See "Item 3. Legal Proceedings."

Our failure to deal appropriately with conflicts of interest could damage our reputation and adversely affect our businesses.

As we have expanded and as we continue to expand the number and scope of our businesses, we increasingly confront potential conflicts of interest relating to our funds' investment activities. Certain of our funds have overlapping investment objectives, including funds that have different fee structures, and potential conflicts may arise with respect to our decisions regarding how to allocate investment opportunities among those funds. For example, a decision to acquire material non-public information about a company while pursuing an investment opportunity for a particular fund gives rise to a potential conflict of interest when it results in our having to restrict the ability of other funds to take any action. Conflicts of interest may also exist in the valuation of our investments and regarding decisions about the allocation of specific investment opportunities among us and our funds and the allocation of fees and costs among us, our funds and portfolio companies of our funds. In addition, fund investors (or holders of Class A shares) may perceive conflicts of interest regarding investment decisions for funds in which our Managing Partners, who have and may continue to make significant personal investments in a variety of Apollo funds, are personally invested. Similarly, conflicts of interest may exist with our manager, which is allowed under our organizational documents to manage our actions as it desires, without considering the interests of our shareholders.

Allocation of investment opportunities. Certain inherent conflicts of interest arise from the fact that (i) we provide investment management services to more than one fund, and (ii) our funds often have one or more overlapping investment strategies. Also, the investment strategies employed by us for current and future clients could conflict with each other, and may adversely affect the prices and availability of other securities or instruments held by, or potentially considered for, one or more clients. If participation in specific investment opportunities is appropriate for more than one of our funds, participation in such opportunities will be allocated pursuant to our allocation policies and procedures, which include the relevant partnership or investment management agreement as well as the decisions of our allocations committee. While we have established policies and procedures to guide the determination of such allocations, there can be no assurance that we will be successful in avoiding all conflicts of interest in allocating investment opportunities.

Restrictions on transactions due to other Apollo businesses. Our funds engage in a broad range of business activities and invest in portfolio companies whose operations may be substantially similar to and/or competitive with the portfolio companies in which our other funds have invested. The performance and operation of such competing businesses could conflict with and adversely affect the performance and operation of our funds' portfolio companies, and may adversely affect the prices and availability of business opportunities or transactions available to such portfolio companies. In addition, we may give advice, or take action with respect to, the investments of one or more of our funds that may not be given or taken with respect to other of our funds with similar investment programs, objectives or strategies. Accordingly, some of our funds with similar strategies may not hold the same securities or instruments or achieve the same performance. We may also advise funds and clients with conflicting investment objectives or strategies. These activities also may adversely affect the prices and availability of other securities or instruments held by, or potentially considered for, one or more funds. We, our funds or our funds' portfolio companies may also have ongoing relationships with issuers whose securities have been acquired by, or are being considered for investment by us.

Investing throughout the corporate capital structure. Our funds invest in a broad range of asset classes throughout the corporate capital structure. These investments include investments in corporate loans and debt securities, preferred equity securities and common equity securities. In certain cases, we may manage separate funds that invest in different parts of the same company's capital structure. For example, our credit funds may invest in different classes of the same company's debt. In those cases, the interests of our funds may not always be aligned, which could create actual or potential conflicts of interest or the appearance of such conflicts. For example, one of our private equity funds could have an interest in pursuing an acquisition, divestiture or other transaction that, in its judgment, could enhance the value of the private equity investment, even though the proposed transaction would subject one of our credit fund's debt investments to additional or increased risks.

Information barriers. We currently operate without information barriers that some other investment management firms implement to separate business units and/or to separate persons who make investment decisions from others who might possess material non-public information that could influence such decisions. Our Managing Partners, investment professionals or other employees may acquire confidential or material non-public information and, as a result, be restricted from initiating transactions in certain securities. In an effort to manage possible risks arising from our decision not to implement such screens, we maintain a code of ethics and provide training to relevant personnel. In addition, our compliance department maintains a list of restricted securities with respect to which we may have access to material non-public information and in which our funds are not permitted to trade. In the event that any of our employees obtains such material non-public information, we may be restricted in acquiring or disposing of investments on behalf of our funds, which could impact the returns generated for such funds. Notwithstanding the maintenance of restricted securities lists and other internal controls, it is possible that the internal controls relating to the management of material non-public information could fail and result in us, or one of our investment professionals, buying or selling a security while, at least constructively, in possession of material non-public information. Inadvertent trading on material non-public information could have adverse effects on our reputation, result in the imposition of regulatory or financial sanctions and, as a consequence, negatively impact our ability to provide our investment management services to our funds and clients. While we

currently operate without information barriers on an integrated basis, we could be required by certain regulations, or decide that it is advisable, to establish information barriers. In such event, our ability to operate as an integrated platform could also be impaired, which would limit management's access to our personnel and impair its ability to manage our investments. The establishment of such information barriers may also lead to operational disruptions and result in restructuring costs, including costs related to hiring additional personnel as existing investment professionals are allocated to either side of such barriers, which may adversely affect our business.

Broker-dealer. AGS, an affiliate of ours, which is a broker-dealer registered with the SEC and a member of FINRA, is authorized to perform services relating to the placement of debt and securities. AGS also provides advisory services to portfolio companies and our funds in connection with corporate transactions. Additionally, certain of our affiliates and/or their portfolio companies are engaged in the loan origination and/or servicing businesses, and may originate, structure, arrange and/or place loans to our funds and portfolio companies. In connection with their services to our funds and portfolio companies, such affiliates may receive transaction and other fees from our funds and/or portfolio companies. Consequently, our relationship with these affiliates may give rise to conflicts of interest between us and portfolio companies of our funds.

Potential conflicts of interest with our Managing Partners or our directors. Pursuant to the terms of our operating agreement, whenever a potential conflict of interest exists or arises between any of the Managing Partners, one or more directors or their respective affiliates, on the one hand, and us, any of our subsidiaries or any shareholder other than a Managing Partner, on the other, any resolution or course of action by our board of directors shall be permitted and deemed approved by all shareholders if the resolution or course of action (i) has been specifically approved by a majority of the voting power of our outstanding voting shares (excluding voting shares owned by our manager or its affiliates) or by a conflicts committee of the board of directors composed entirely of one or more independent directors, (ii) is on terms no less favorable to us or our shareholders (other than a Managing Partner) than those generally being provided to or available from unrelated third parties or (iii) it is fair and reasonable to us and our shareholders taking into account the totality of the relationships between the parties involved. All conflicts of interest described in this report will be deemed to have been specifically approved by all shareholders. Notwithstanding the foregoing, it is possible that potential or perceived conflicts could give rise to investor dissatisfaction or litigation or regulatory enforcement actions.

Our Managing Partners have established family offices to provide investment advisory, accounting, administrative and other services to their respective family accounts (including certain charitable accounts) in connection with their personal investment activities. The investment activities of the family offices, and the involvement of the Managing Partners in these activities, could give rise to potential conflicts between the personal financial interests of the Managing Partners and the interests of us, any of our subsidiaries or any shareholder other than a Managing Partner.

Appropriately dealing with conflicts of interest is complex and difficult and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential or actual conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation which would materially adversely affect our businesses in a number of ways, including as a result of redemptions by our investors from our funds, an inability to raise additional funds and a reluctance of counterparties to do business with us. See "—Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus could result in additional burdens on our businesses."

Potential conflicts of interest with our manager. Our operating agreement contains provisions that waive or consent to conduct by our manager and its affiliates that might otherwise raise issues about compliance with fiduciary duties or applicable law. For example, our operating agreement provides that when our manager is acting in its individual capacity, as opposed to in its capacity as our manager, it may act without any fiduciary obligations to us or our shareholders whatsoever. When our manager, in its capacity as our manager, is permitted to or required to make a decision in its "sole discretion" or "discretion" or that it deems "necessary or appropriate" or "necessary or advisable," then our manager will be entitled to consider only such interests and factors as it desires, including its own interests, and will have no duty or obligation (fiduciary or otherwise) to give any consideration to any interest of or factors affecting us or any of our shareholders and will not be subject to any different standards imposed by our operating agreement, the Delaware Limited Liability Company Act or under any other law, rule or regulation or in equity.

Whenever a potential conflict of interest exists between us and our manager, our manager shall resolve such conflict of interest. If our manager determines that its resolution of the conflict of interest is on terms no less favorable to us than those generally being provided to or available from unrelated third parties or is fair and reasonable to us, taking into account the totality of the relationships between us and our manager, then it will be presumed that in making this determination, our manager acted in good faith. A shareholder seeking to challenge this resolution of the conflict of interest would bear the burden of overcoming such presumption. This is different from the situation with Delaware corporations, where a conflict resolution by an interested party would be presumed to be unfair and the interested party would have the burden of demonstrating that the resolution was fair. Such modifications of fiduciary duties are expressly permitted by Delaware law. Hence, we and our shareholders would have

recourse and be able to seek remedies against our manager only if our manager breaches its obligations pursuant to our operating agreement. Unless our manager breaches its obligations pursuant to our operating agreement, we and our unitholders would not have any recourse against our manager even if our manager were to act in a manner that was inconsistent with traditional fiduciary duties. Furthermore, even if there has been a breach of the obligations set forth in our operating agreement, our operating agreement provides that our manager and its officers and directors would not be liable to us or our shareholders for errors of judgment or for any acts or omissions unless there has been a final and non-appealable judgment by a court of competent jurisdiction determining that the manager or its officers and directors acted in bad faith or engaged in fraud or willful misconduct. These provisions are detrimental to the shareholders because they restrict the remedies available to them for actions that without those limitations might constitute breaches of duty, including fiduciary duties.

Also, if our manager obtains the approval of the conflicts committee of the Company's board of directors, the resolution will be conclusively deemed to be fair and reasonable to us and not a breach by our manager of any duties it may owe to us or our shareholders. This is different from the situation with Delaware corporations, where a conflict resolution by a committee consisting solely of independent directors may, in certain circumstances, merely shift the burden of demonstrating unfairness to the plaintiff. If you purchase a Class A share, you will be treated as having consented to the provisions set forth in the operating agreement, including provisions regarding conflicts of interest situations that, in the absence of such provisions, might be considered a breach of fiduciary or other duties under applicable state law. As a result, shareholders will, as a practical matter, not be able to successfully challenge an informed decision by the conflicts committee.

Our organizational documents do not limit our ability to enter into new lines of businesses, and we may expand into new investment strategies, geographic markets and businesses, each of which may result in additional risks and uncertainties in our businesses.

We intend, to the extent that market conditions warrant, to grow our businesses by increasing AUM in existing businesses and expanding into new investment strategies, geographic markets, businesses and distribution channels, including the retail channel. Our organizational documents, however, do not limit us to the investment management business. Accordingly, we may pursue growth through acquisitions of other investment management companies, acquisitions of critical business partners or other strategic initiatives, which may include entering into new lines of business, such as the insurance, broker-dealer or financial advisory industries. In addition, we expect opportunities will arise to acquire other alternative or traditional asset managers. To the extent we make strategic investments or acquisitions, undertake other strategic initiatives or enter into a new line of business, we will face numerous risks and uncertainties, including risks associated with (i) the required investment of capital and other resources, (ii) the possibility that we have insufficient expertise to engage in such activities profitably or without incurring inappropriate amounts of risk, (iii) the diversion of management's attention from our core businesses, (iv) assumption of liabilities of any acquired business, (v) the disruption of our ongoing businesses, (vi) combining or integrating operational and management systems and controls and (vii) the broadening of our geographic footprint, including the risks associated with conducting operations in foreign jurisdictions. Entry into certain lines of business may subject us to new laws and regulations with which we are not familiar, or from which we are currently exempt, and may lead to increased litigation and regulatory risk. For example, our planned business initiatives include offering additional registered investment products and creating investment products open to retail investors. These products may have different economic structures than our traditional investment funds and may require a different marketing approach. In addition, to the extent we distribute products through new channels, including through unaffiliated firms, we may not be able to effectively monitor or control the manner of their distribution. These activities also will impose additional compliance burdens on us, subject us to enhanced regulatory scrutiny and expose us to greater reputation and litigation risk. Further, these activities may give rise to conflicts of interest, related party transaction risks and may lead to litigation or regulatory scrutiny. If a new business generates insufficient revenues or if we are unable to efficiently manage our expanded operations, our results of operations will be adversely affected. Our strategic initiatives may include joint ventures, in which case we will be subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability, losses or reputational damage relating to, systems, controls and personnel that are not under our control.

Employee misconduct could harm us by impairing our ability to attract and retain investors and by subjecting us to significant legal liability, regulatory scrutiny and reputational harm. Fraud and other deceptive practices or other misconduct at our funds' portfolio companies could similarly subject us to liability and reputational damage and also harm our performance.

Our reputation is critical to maintaining and developing relationships with the investors in our funds, potential fund investors and third parties with whom we do business. In recent years, there have been a number of highly publicized cases involving fraud, conflicts of interest or other misconduct by individuals in the financial services industry. There is a risk that our employees could engage in misconduct that adversely affects our businesses. For example, if an employee were to engage in illegal or suspicious activities, we could be subject to regulatory sanctions and suffer serious harm to our reputation, financial position, investor relationships and ability to attract future investors. It is not always possible to deter employee misconduct, and the precautions we take to detect and prevent this activity may not be effective in all cases. Misconduct by our employees, or the employees of our

funds' portfolio companies, or even unsubstantiated allegations, could result in a material adverse effect on our reputation and our businesses.

In addition, we could also be adversely affected if there is misconduct by individuals associated with portfolio companies in which our funds invest. For example, failures by personnel, or individuals acting on behalf, of our funds' portfolio companies to comply with anti-bribery, trade sanctions or other legal and regulatory requirements could adversely affect our businesses and reputation. There are a number of grounds upon which such misconduct at a portfolio company could subject us to criminal and/or civil liability, including on the basis of actual knowledge, willful blindness, or control person liability. Such misconduct might also undermine our funds' due diligence efforts with respect to such companies and could negatively affect the valuation of a fund's investments.

Underwriting activities expose us to risks.

AGS may act as an underwriter in securities offerings. We may incur losses and be subject to reputational harm to the extent that, for any reason, we are unable to sell securities or indebtedness we purchased as an underwriter at the anticipated price levels. As an underwriter, we also are subject to potential liability for material misstatements or omissions in prospectuses and other offering documents relating to offerings we underwrite.

The due diligence process that we undertake in connection with investments by our funds may not reveal all facts that may be relevant in connection with an investment.

Before making fund investments, we conduct due diligence that we deem reasonable and appropriate based on the facts and circumstances applicable to each investment. When conducting due diligence, we may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. Outside consultants, legal advisors, accountants and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence and making an assessment regarding an investment, we rely on the resources available to us, including information provided by the target of the investment and, in some circumstances, third-party investigations. The due diligence investigation that we will carry out with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Moreover, such an investigation will not necessarily result in the investment being successful.

Certain of our funds utilize special situation and distressed debt investment strategies that involve significant risks.

Our funds often invest in companies with weak financial conditions, poor operating results, substantial financial needs, negative net worth and/or special competitive or regulatory problems. These funds also invest in companies that are or are anticipated to be involved in bankruptcy or reorganization proceedings. In such situations, it may be difficult to obtain full information as to the exact financial and operating conditions of these companies. Additionally, the fair values of such investments are subject to abrupt and erratic market movements and significant price volatility if they are publicly traded securities, and are subject to significant uncertainty in general if they are not publicly traded securities. Furthermore, some of our funds' distressed investments may not be widely traded or may have no recognized market. A fund's exposure to such investments may be substantial in relation to the market for those investments, and the assets are likely to be illiquid and difficult to sell or transfer. As a result, it may take a number of years for the market value of such investments to ultimately reflect their intrinsic value as perceived by us, if at all.

Our distressed investment strategy depends in part on our ability to successfully predict the occurrence of certain corporate events, such as debt and/or equity offerings, restructurings, reorganizations, mergers, takeover offers and other transactions, that we believe will improve the condition of the business. If the corporate event we predict is delayed, changed or never completed, the market price and value of the applicable fund's investment could decline sharply.

In addition, these investments could subject us to certain potential additional liabilities that may exceed the value of our original investment. Under certain circumstances, payments or distributions on certain investments may be reclaimed if any such payment or distribution is later determined to have been a fraudulent conveyance, a preferential payment or similar transaction under applicable bankruptcy and insolvency laws. In addition, under certain circumstances, a lender that has inappropriately exercised control of the management and policies of a debtor may have its claims subordinated or disallowed, or may be found liable for damages suffered by parties as a result of such actions. In the case where the investment in securities of troubled companies is made in connection with an attempt to influence a restructuring proposal or plan of reorganization in bankruptcy, our funds may become involved in substantial litigation.

Risk management activities may adversely affect the return on our funds' investments.

When managing our exposure to market risks, we may (on our own behalf or on behalf of our funds) from time to time use forward contracts, options, swaps, caps, collars and floors or pursue other strategies or use other forms of derivative instruments

(OTC and otherwise) to limit our exposure to changes in the relative values of investments that may result from market developments, including changes in prevailing interest rates, currency exchange rates and commodity prices. The scope of risk management activities undertaken by us varies based on the level and volatility of interest rates, prevailing foreign currency exchange rates, the types of investments that are made and other changing market conditions. The use of hedging transactions and other derivative instruments to reduce the effects of a decline in the value of a position does not eliminate the possibility of fluctuations in the value of the position or prevent losses if the value of the position declines. Such transactions may also limit the opportunity for gain if the value of a position increases. Moreover, it may not be possible to limit the exposure to a market development that is so generally anticipated that a hedging or other derivative transaction cannot be entered into at an acceptable price. The success of any hedging or other derivative transaction generally will depend on our ability to correctly predict market changes, the degree of correlation between price movements of a derivative instrument and the position being hedged, the creditworthiness of the counterparty and other factors. As a result, while we may enter into such a transaction in order to reduce our exposure to market risks, the transaction may result in poorer overall investment performance than if it had not been executed. Such transactions may also limit the opportunity for gain if the value of a hedged position increases.

While such hedging arrangements may reduce certain risks, such arrangements themselves may entail certain other risks. These arrangements may require the posting of cash collateral at a time when a fund has insufficient cash or illiquid assets such that the posting of the cash is either impossible or requires the sale of assets at prices that do not reflect their underlying value. Moreover, these hedging arrangements may generate significant transaction costs, including potential tax costs, that reduce the returns generated by a fund. Finally, the CFTC has made several public statements that it may soon issue a proposal for certain foreign exchange products to be subject to mandatory clearing, which could increase the cost of entering into currency hedges. Similar developments abroad may indirectly affect our funds as a result of their direct impact on our trading counterparties.

We often pursue investment opportunities that involve business, regulatory, legal or other complexities.

As an element of our investment style, we often pursue unusually complex investment opportunities. This can often take the form of substantial business, regulatory or legal complexity that we believe may deter other investment managers. Our tolerance for complexity presents risks, as such transactions can be more difficult, expensive and time-consuming to finance and execute; it can be more difficult to manage or realize value from the assets acquired in such transactions; and such transactions sometimes entail a higher level of regulatory scrutiny or a greater risk of contingent liabilities. Any of these risks could harm the performance of our funds.

Funds we manage may invest in assets denominated in currencies that differ from the currency in which the fund is denominated.

When our investment funds invest in assets denominated in currencies that differ from the currency that the relevant fund is denominated in, fluctuations in currency rates could impact fund performance. We also have a number of investment funds which are denominated in U.S. Dollars but invest primarily or exclusively in assets denominated in foreign currencies and therefore whose performance can be negatively impacted by strengthening of the U.S. Dollar even if the underlying investments perform well in local currency.

Our funds may employ hedging techniques to minimize these risks, but we can offer no assurance that such strategies will be effective or tax-efficient. If our funds engage in hedging transactions, we may be exposed to additional risks associated with such transactions.

Certain of our funds make investments in companies that we do not control.

Investments by certain of our funds include debt instruments, equity securities, and other financial instruments of companies that our funds do not control. Such investments may be acquired by our funds through trading activities or through purchases of securities or other financial instruments from the issuer. In addition, in the future, our funds may seek to acquire minority equity interests more frequently and may also dispose of a portion of their majority equity investments in portfolio companies over time in a manner that results in the funds retaining a minority investment. Those investments will be subject to the risk that the company in which the investment is made may make business, financial or management decisions with which we do not agree or that the majority stakeholders or the management of the company may take risks or otherwise act in a manner that does not serve our funds' interests. If any of the foregoing were to occur, the values of investments by our funds could decrease and our financial condition, results of operations and cash flow could suffer as a result.

Our funds may face risks relating to undiversified investments.

While diversification is generally an objective of many of our funds, we cannot give assurance as to the degree of diversification that will actually be achieved in any fund investments. For example, we manage AAA, and Athene Holding is AAA's only investment. Because a significant portion or all of a fund's capital may be invested in a single investment or portfolio company, a loss with respect to such an investment or portfolio company could have a significant adverse impact on such fund's

capital. Accordingly, a lack of diversification on the part of a fund could adversely affect its performance, which could have a material adverse effect on our business, financial condition and results of operations.

We have a strategic relationship with Athene from which we derive a significant contribution to our revenue and that could give rise to real or apparent conflicts of interest.

We currently derive a significant contribution to our revenue across our business segments from our investment in and strategic relationship with Athene. AAM, an indirect subsidiary of Apollo Global Management, LLC, receives investment management fees from Athene in exchange for a suite of services for Athene's investment portfolio. Through its subsidiaries, Apollo managed or advised $70.8 billion of AUM in accounts owned by or related to Athene as of December 31, 2016. Our investment management agreements with Athene are terminable under certain circumstances. If such investment management agreements were terminated or fees lowered it could have a material adverse effect on our business, results of operations and financial condition. In addition, Apollo had an approximate 8.9% economic ownership interest in Athene Holding as of December 31, 2016, which comprises Apollo's direct 8.0% economic ownership interest in Athene Holding plus its proportionate 0.9% economic ownership interest through certain of its related parties which invest in Athene. Fluctuations in the value of Athene could have an adverse effect on our results and financial condition.

A number of Apollo entities receive incentive fees from Athene, have investments in Athene, and manage funds or accounts with investments in Athene from which incentive income may be earned. Pursuant to the management of Athene's investment portfolio by AAM, Athene also invests in various Apollo-managed funds and entities. The Chairman, Chief Executive Officer and Chief Investment Officer of Athene is also an employee of AAM and five of Athene's 16 directors are employees of, or consultants to, Apollo. These persons have fiduciary duties to Athene in addition to the duties that they have to Apollo. As a result, there may be real or apparent conflicts of interest with respect to matters affecting Apollo, Apollo-managed funds and their portfolio companies and Athene. In addition, conflicts of interest could arise with respect to transactions involving business dealings between Apollo and Athene and their respective affiliates.

While we expect our strategic relationship with Athene to continue for the foreseeable future, there can be no assurance that the benefit we receive from Athene will not decline due to a disruption or decline in Athene's business or a change in our relationship with Athene, including our investment management agreements with Athene. Moreover, Athene is subject to significant regulatory oversight, changes to which may adversely affect its performance. We may be unable to replace a decline in the revenue that we derive from our investment in, and strategic relationship with, Athene on a timely basis or at all if our relationship with Athene were to change or if Athene were to experience a material adverse impact to its business.

Some of our funds invest in foreign countries and securities of issuers located outside of the United States, which may involve foreign exchange, political, social, economic and tax uncertainties and risks.

Some of our funds invest all or a portion of their assets in the equity, debt, loans or other securities of issuers located outside the United States, including the U.K., Germany, China, India, Australia, Russia, Singapore, Spain, Portugal, Italy and France, as well as a number of jurisdictions commonly referred to as emerging markets. In addition to business uncertainties, such investments may be affected by changes in exchange rates as well as political, social and economic uncertainty affecting a country or region. Many financial markets are not as developed or as efficient as those in the United States, and as a result, liquidity may be reduced and price volatility may be higher. The legal and regulatory environment may also be different, particularly with respect to bankruptcy and reorganization. Financial accounting standards and practices may differ, and there may be less publicly available information in respect of such companies.

Restrictions imposed or actions taken by foreign governments may adversely impact the value of our funds' investments. Such restrictions or actions could include exchange controls, seizure or nationalization of foreign deposits or other assets and adoption of other governmental restrictions that adversely affect the prices of securities or the ability to repatriate profits on investments or the capital invested itself. Income received by our funds from sources in some countries may be reduced by withholding and other taxes. Any such taxes paid by a fund will reduce the net income or return from such investments. Our fund investments could also expose us to risks associated with trade and economic sanctions prohibitions or other restrictions imposed by the United States or other governments or organizations, including the United Nations, the EU and its member countries, such as the sanctions against certain Russian entities and individuals. While our funds will take these factors into consideration in making investment decisions, including when hedging positions, our funds may not be able to fully avoid these risks or generate targeted risk-adjusted returns.

In addition, as a result of the complexity of, and lack of clear precedent or authority with respect to, the application of various income tax laws to our structures, the application of rules governing how transactions and structures should be reported is also subject to differing interpretations. For example, certain jurisdictions such as Australia, Canada, China, India, Spain, Portugal, Italy, France, Nicaragua and Hong Kong, where our funds have made investments, have sought to tax investment gains (including

those from real estate) derived by nonresident investors, including private equity funds, from the disposition of the equity in companies operating in those jurisdictions. In some cases this development is the result of new legislation or changes in the interpretation of existing legislation and local authority assertions that investors have a local taxable presence or are holding companies for trading purposes rather than for capital purposes, or are not otherwise entitled to treaty benefits. In addition, the tax authorities in certain jurisdictions have sought to deny the benefits of income tax treaties for withholding taxes on interest and dividends of nonresident entities, if the entity is not the beneficial owner of the income but rather a mere conduit company inserted primarily to access treaty benefits.

For example, under the laws of Hong Kong, profits arising in or derived from Hong Kong from a trade, profession or business carried on by a person or an agent acting on the person's behalf in Hong Kong (excluding profits arising from the sale of capital assets) are subject to Hong Kong profits tax in general. The current profits tax rate is generally 16.5% for corporations and 15% for unincorporated businesses. Although Hong Kong provides a profits tax exemption for offshore funds on profits derived from certain transactions, under the current tax law, transactions in securities of a private company do not benefit from this exemption unless they satisfy certain conditions. Therefore, offshore funds that make use of services of a fund manager, investment advisor or any other person acting on their behalf in Hong Kong to derive profits from transactions in securities of private companies may be subject to Hong Kong profits tax, if the prescribed conditions are not satisfied. There is no assurance that any investments under our structures will be exempt from profits tax under Hong Kong's tax law. It should be noted that offshore fund structures have been subject to scrutiny in recent tax audits by Hong Kong's Inland Revenue Department.

With respect to India, in 2012 the Supreme Court of India held in favor of a taxpayer finding that the sale of shares of a foreign company that indirectly held Indian assets was not subject to Indian tax. However, the tax laws were amended in 2012 with retroactive effect to subject such gains to Indian tax if the shares in the foreign company derived their value, substantially, from assets located in India. The amendments are known as indirect transfer provisions. In 2015, the government made amendments to the indirect transfer provisions to clarify that shares or interest in an entity outside India would be deemed to derive its value substantially from assets located in India if, on the specified date, the value of Indian assets exceeds INR 100 million and the Indian assets represent at least 50% of the value of the assets owned by the entity. There is also a carve-out introduced for small shareholders whereby indirect transfer provisions do not apply to an investor (along with its associated enterprises) who neither holds the right of management or control of the foreign entity, nor holds more than 5% voting power or share capital or interest of such entity in the 12 month period preceding the date of transfer of shares or interest. Additionally, the government also issued rules around the valuation methodology and the specified date for the purpose of these thresholds.

Further, India had introduced General Anti-Avoidance Rule (GAAR) provisions in its tax law in 2012 though these have been deferred since then and are now slated to be implemented from April 1, 2017 onwards. The objective of GAAR is to deny tax benefit in an arrangement which has been entered into with the main purpose to obtain tax benefit and which lacks commercial substance or creates rights and obligations which are not at arm's length principle or results in misuse of tax law provisions or is carried out by means or in a manner which are not ordinarily employed for bona fide purposes. Such an arrangement is termed in the GAAR provisions as "impermissible avoidance agreement". As regards foreign investors, GAAR provisions would mainly impact those investors who claim treaty benefits to eliminate or minimize tax outlay in India. Acceding to the representations made by the foreign investors and other stakeholders, the Indian government has clarified that GAAR provisions would not apply in the following cases:

- an arrangement where tax benefit in a fiscal year in aggregate to all the concerned parties does not exceed INR 30 million;
- investments made by Foreign Portfolio Investors (FPIs) in India on which no treaty benefits have been claimed;
- investments made by non-resident investors in the FPIs by way of offshore derivative instruments or any other way; or
- investments made by any investor prior to April 2017.

Accordingly, Indian taxation of the capital gains of a foreign investor, upon a direct or indirect sale of an Indian company, remains uncertain.

The U.K. has also enacted legislation that may affect our funds' investments. The U.K. Diverted Profits Tax ("DPT") regime was introduced with effect from April 1, 2015 as a new tax separate from the U.K.'s existing Corporate Income Tax regime. DPT charges a rate of 25% on profits that, under the terms of the legislation, are considered to have been eroded from the U.K. tax base. The DPT legislation is intended to counteract and deter contrived arrangements used by multinational corporate groups which, it is argued, have resulted in the erosion of the U.K. tax base. DPT operates through two main rules: (i) the first rule aims to prevent U.K. tax resident companies ("U.K. PEs") from creating tax advantages through transacting with entities that lack economic substance; and (ii) the second rule aims to counteract arrangements by which foreign companies sell into the U.K. whilst avoiding the creation of a U.K. PE. The legislation is worded so that where it is "reasonable to assume" a U.K. company is party to an arrangement that lacks economic substance and which results in a tax advantage in the U.K., or where it is "reasonable to

assume" the activity of the involved parties is designed in such a way as to avoid a U.K. PE, DPT could apply. Further, the U.K. enacted hybrid and other mismatch legislation on September 15, 2016. The rules replace the existing U.K. arbitrage rules as from January 1, 2017. The U.K. tax authorities published draft guidance on the application of the rules in December 2016. The U.K. clauses broadly follow the recommendations of the OECD's BEPS Action 2 - Neutralizing the Effects of Hybrid Mismatch Arrangements. However, uncertainty remains around what, if anything, other countries outside the U.K. will do, and it may be necessary to consider various scenarios when applying the imported mismatch rules.

The U.K. has implemented Tax Transparency legislation that requires many large businesses to publish their U.K. tax strategies on their websites before the end of each financial year for accounting periods beginning on or after the date of Royal Assent to the Finance Act 2016. Apollo's U.K. entities must comply prior to December 31, 2017. As part of the requirement, organizations must publish information on risk management and governance, planning, risk appetite and their approach to HMRC. HMRC guidance recommends specific content under the four headings that expand beyond the base legislative requirements. During the course of 2017, the U.K. is expected to implement a new corporate criminal offense for the facilitation of tax evasion. Current draft law and guidance is extremely wide and covers offenses committed both in the U.K. and abroad and so is likely to have a global impact for Apollo's businesses. Criminal liability can be mitigated where a relevant business has appropriate policies and procedures in place to manage the risk.

Third-party investors in our funds have the right under certain circumstances to terminate commitment periods or to dissolve the funds, and investors in some of our credit funds may redeem their investments in such funds at any time after an initial holding period. These events would lead to a decrease in our revenues, which could be substantial.

The governing agreements of certain of our funds allow the investors of those funds to, among other things, (i) terminate the commitment period of the fund in the event that certain "key persons" (for example, one or more of our Managing Partners and/or certain other investment professionals) fail to devote the requisite time to managing the fund, (ii) (depending on the fund) terminate the commitment period, dissolve the fund or remove the general partner if we, as general partner or manager, or certain "key persons" engage in certain forms of misconduct, or (iii) dissolve the fund or terminate the commitment period upon the affirmative vote of a specified percentage of limited partner interests entitled to vote. Each of Fund VI, Fund VII and Fund VIII, on which our near- to medium-term performance will heavily depend, include a number of such provisions. COF III, EPF II, EPF III and certain other credit funds have similar provisions. Also, after undergoing the 2007 Reorganization, subsequent to which we deconsolidated certain funds that had historically been consolidated in our financial statements, we amended the governing documents of our funds at that time to provide that a simple majority of a fund's unaffiliated investors have the right to liquidate that fund. In addition to having a significant negative impact on our revenue, net income and cash flow, the occurrence of such an event with respect to any of our funds would likely result in significant reputational damage to us.

Investors in some of our credit funds may also generally redeem their investments on an annual, semiannual or quarterly basis following the expiration of a specified period of time when capital may not be redeemed (typically between one and five years). Fund investors may decide to move their capital away from us to other investments for any number of reasons in addition to poor investment performance. Factors which could result in investors leaving our funds include changes in interest rates that make other investments more attractive, poor investment performance, changes in investor perception regarding our focus or alignment of interest, unhappiness with changes in or broadening of a fund's investment strategy, changes in our reputation and departures or changes in responsibilities of key investment professionals. In a declining market, the pace of redemptions and consequent reduction in our AUM could accelerate. The decrease in revenues that would result from significant redemptions in these funds could have a material adverse effect on our businesses, revenues, net income and cash flows.

In addition, the management agreements of all of our funds would be terminated upon an "assignment," without the requisite consent, of these agreements, which may be deemed to occur in the event the investment advisors of our funds were to experience a change of control. We cannot be certain that consents required to assign our investment management agreements will be obtained if a change of control occurs. In addition, with respect to our publicly traded closed-end funds, each fund's investment management agreement must be approved annually by the independent members of such fund's board of directors and, in certain cases, by its shareholders, as required by law. Termination of these agreements would cause us to lose the fees we earn from such funds.

Our financial projections for portfolio companies and other fund investments could prove inaccurate.

Our funds generally establish the capital structure of portfolio companies and certain other fund investments, including real estate investments, on the basis of financial projections for such investments. These projected operating results will normally be based primarily on management judgments. In all cases, projections are only estimates of future results that are based upon assumptions made at the time that the projections are developed. General economic conditions, which are not predictable, along with other factors may cause actual performance to fall short of the financial projections we used to establish a given investment's capital structure. Because of the leverage we typically employ in our fund investments, this could cause a substantial decrease in

the value of the equity holdings of our funds in such investments. The inaccuracy of financial projections could thus cause our funds' performance to fall short of our expectations.

Our funds' performance, and our performance, may be adversely affected by the financial performance of our funds' portfolio companies and the industries in which our funds invest.

Our performance and the performance of our private equity funds, as well as many of our credit and real estate funds, are significantly affected by the value of the companies in which our funds have invested. Our funds invest in companies in many different industries, each of which is subject to volatility based upon a variety of factors, including economic and market factors. The credit crisis caused significant fluctuations in the value of securities held by our funds, and the global economic recession had a significant impact on the performance of the portfolio companies owned by the funds we manage. Although the U.S. economy has improved, conditions in economies outside the U.S. have generally improved at a less rapid pace (and in some cases have deteriorated), and there remain many obstacles to continued growth in the economy such as global geopolitical events, risks of inflation and high deficit levels for governments in the U.S. and abroad. These factors and other general economic trends may impact the performance of portfolio companies in many industries and in particular, industries that are more impacted by changes in consumer demand, such as the packaging, manufacturing, energy, chemical and refining industries, as well as travel and leisure, gaming, financial services and real estate industries. The performance of our funds, and our performance, may be adversely affected to the extent our fund portfolio companies in these industries experience adverse performance or additional pressure due to downward trends. For example, the performance of certain of the portfolio companies of our funds in the packaging, manufacturing, energy, chemical and refining industries is subject to the cyclical and volatile nature of the supply-demand balance in these industries. These industries historically have experienced alternating periods of capacity shortages leading to tight supply conditions, causing prices and profit margins to increase, followed by periods when substantial capacity is added, resulting in oversupply, declining capacity utilization rates and declining prices and profit margins. In addition to changes in the supply and demand for products, the volatility these industries experience occurs as a result of changes in energy prices, costs of raw materials and changes in various other economic conditions around the world.

The performance of our funds' investments in the commodities markets is also subject to a high degree of business and market risk, as it is substantially dependent upon prevailing prices of oil and natural gas. Certain of our funds have investments in businesses involved in oil and gas exploration and development, which can be a speculative business involving a high degree of risk, including: the volatility of oil and natural gas prices; the use of new technologies; reliance on estimates of oil and gas reserves in the evaluation of available geological, geophysical, engineering and economic data; and encountering unexpected formations or pressures, premature declines of reservoirs, blow-outs, equipment failures and other accidents in completing wells and otherwise, cratering, sour gas releases, uncontrollable flows of oil, natural gas or well fluids, adverse weather conditions, pollution, fires, spills and other environmental risks. Prices for oil and natural gas have not recovered since their significant decrease in the latter part of 2014 and throughout 2015, and there can be no assurance that prices will recover. If prices remain at their current level for an extended period of time, there could be an adverse impact on the performance of certain of our funds, and this impact may be material. These prices are also subject to wide fluctuation in response to relatively minor changes in the supply and demand for oil and natural gas, market uncertainty and a variety of additional factors that are beyond our control, such as level of consumer product demand, the refining capacity of oil purchasers, weather conditions, government regulations, the price and availability of alternative fuels, political conditions, foreign supply of such commodities and overall economic conditions. It is common in making investments in the commodities markets to deploy hedging strategies to protect against pricing fluctuations but such strategies may or may not be employed by us or our funds' portfolio companies, and even when they are employed they may not protect our funds' investments.

Our funds' investments in companies in the financial services sector are subject to a variety of factors, such as market uncertainty, additional government regulations, disclosure requirements, limits on fees, increasing borrowing costs or limits on the terms or availability of credit to such portfolio companies, and other regulatory requirements each of which may impact the conduct of such portfolio companies. Compliance with changing regulatory requirements will likely impose staffing, legal, compliance and other costs and administrative burdens upon our funds' investments in financial services. Various sectors of the global financial markets have been experiencing an extended period of adverse conditions.

In respect of real estate, even though the U.S. residential real estate market remains stable after recovering from a lengthy and deep downturn, various factors could halt or limit a recovery in the housing market and have an adverse effect on the performance of certain of our funds' investments, including, but not limited to, rising mortgage interest rates and a low level of consumer confidence in the economy and/or the residential real estate market.

In addition, our funds' investments in commercial mortgage loans and other commercial real-estate related loans are subject to risks of delinquency and foreclosure, and risks of loss that are greater than similar risks associated with mortgage loans made on the security of residential properties. If the net operating income of the commercial property is reduced, the borrower's ability to repay the loan may be impaired. Net operating income of a commercial property can be affected by various factors, such

as success of tenant businesses, property management decisions, competition from comparable types of properties and declines in regional or local real estate values and rental or occupancy rates.

Our credit funds are subject to numerous additional risks.

Our credit funds are subject to numerous additional risks, including the risks set forth below.

- Generally, there may be few limitations on the execution of these funds' investment strategies, which are in many cases subject to the sole discretion of the management company or the general partner of such funds, or there may be numerous investment limitations or restrictions that require monitoring, compliance and maintenance.
- While we monitor the concentration of the portfolios of our credit funds, concentration in any one borrower or other issuer, product category, industry, region or country may arise from time to time.
- Given the flexibility and overlapping nature of the mandates and investment strategies of our credit funds, situations arise where certain of these funds hold (including outright positions in issuers and exposure to such issuers derived through any synthetic and/or derivative instrument) in multiple tranches of securities of an issuer (or other interests of an issuer) or multiple funds having interests in the same tranche of an issuer.
- Certain of these funds may engage in short-selling, which is subject to a theoretically unlimited risk of loss.
- These funds are exposed to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the fund to suffer a loss.
- Credit risk may arise through a default by one of several large institutions that are dependent on one another to meet their respective liquidity or operational needs, so that a default by one institution causes a series of defaults by the other institutions.
- The efficacy of the investment and trading strategies of certain credit funds may depend largely on the ability to establish and maintain an overall market position in a combination of different financial instruments, which can be difficult to execute.
- These funds may make investments or hold trading positions in markets that are volatile and which are or may become illiquid.
- Certain of these funds may seek to originate loans, including, but not limited to, secured and unsecured notes, senior and second lien loans, mezzanine loans, and other similar investments.
- These funds' investments are subject to risks relating to investments in commodities, futures, options and other derivatives, the prices of which are highly volatile and may be subject to a theoretically unlimited risk of loss in certain circumstances.

Fraud and other deceptive practices could harm fund performance and our performance.

Instances of bribery, fraud and other deceptive practices committed by senior management of portfolio companies in which an Apollo fund invests may undermine our due diligence efforts with respect to such companies, and if such fraud is discovered, negatively affect the valuation of a fund's investments. Fraud or other deceptive practices by our own employees or advisors could have a similar effect on fund performance and our performance. In addition, when discovered, financial fraud may contribute to reputational harm and overall market volatility that can negatively impact an Apollo fund's investment program. As a result, instances of bribery, fraud and other deceptive practices could result in performance that is poorer than expected.

Contingent liabilities could harm fund performance.

We may cause our funds to acquire an investment that is subject to contingent liabilities. Such contingent liabilities could be unknown to us at the time of acquisition or, if they are known to us, we may not accurately assess or protect against the risks that they present. Acquired contingent liabilities could thus result in unforeseen losses for our funds. In addition, in connection with the disposition of an investment in a portfolio company, a fund may be required to make representations about the business and financial affairs of such portfolio company typical of those made in connection with the sale of a business. A fund may also be required to indemnify the purchasers of such investment to the extent that any such representations are inaccurate. These arrangements may result in the incurrence of contingent liabilities by a fund, even after the disposition of an investment. Accordingly, the inaccuracy of representations and warranties made by a fund could harm such fund's performance.

Our funds may be forced to dispose of investments at a disadvantageous time.

Our funds may make investments that they do not advantageously dispose of prior to the date the applicable fund is dissolved, either by expiration of such fund's term or otherwise. Although we generally expect that investments will be disposed of prior to dissolution or be suitable for in-kind distribution at dissolution, and the general partners of the funds generally have a limited ability to extend the term of the fund with the consent of fund investors or the advisory board of the fund, as applicable,

our funds may have to sell, distribute or otherwise dispose of investments at a disadvantageous time as a result of dissolution. This would result in a lower than expected return on the investments and, perhaps, on the fund itself.

Regulations governing AINV's operation as a business development company affect its ability to raise, and the way in which it raises, additional capital.

As a business development company under the Investment Company Act, AINV may issue debt securities or preferred stock and borrow money from banks or other financial institutions, which we refer to collectively as "senior securities," up to the maximum amount permitted by the Investment Company Act. Under the provisions of the Investment Company Act, AINV is permitted to issue senior securities only in amounts such that its asset coverage, as defined in the Investment Company Act, equals at least 200% after each issuance of senior securities. Further, if the value of its assets declines, it may be unable to satisfy this test and it may be limited in its ability to make distributions. If that happens, it may be required to sell a portion of its investments and, depending on the nature of its leverage, repay a portion of its indebtedness at a time when such sales may be disadvantageous.

Business development companies may issue and sell common stock at a price below net asset value per share only in limited circumstances, one of which is during the one-year period after shareholder approval. AINV's shareholders have, in the past, approved a plan so that during the subsequent 12-month period, AINV may, in one or more public or private offerings of its common stock, sell or otherwise issue shares of its common stock at a price below the then current net asset value per share, subject to certain conditions including parameters on the number of shares sold on any given date, approval of the sale by a majority of its independent directors and a requirement that the sale price be not less than approximately the market price of the shares of its common stock at specified times, less underwriting commissions and discounts. AINV may ask its shareholders for additional approvals from year to year. There is no assurance such approvals will be obtained.

Regulations governing AFT's and AIF's operation affect their ability to raise, and the way in which they raise, additional capital.

As investment companies registered under the Investment Company Act, AFT and AIF may issue debt securities or preferred stock and borrow money from banks or other lenders, up to the maximum amount permitted by the Investment Company Act. Under the provisions of the Investment Company Act, AFT and AIF is restricted in the (i) issuance of preferred shares to amounts such that their respective asset coverage (as defined in Section 18 of the Investment Company Act) equals at least 200% after issuance and (ii) incurrence of indebtedness, including through the issuance of debt securities, such that immediately after issuance the fund will have an asset coverage (as defined in Section 18 of the Investment Company Act) of at least 300%. Lenders to the funds may demand higher asset coverage ratios. Further, if the value of a funds' assets declines, such fund may be unable to satisfy its asset coverage requirements. If that happens, such fund, in order to pay dividends or repurchase its stock or to satisfy the requirements of its lenders, may be required to sell a portion of its investments and, depending on the nature of its leverage, repay a portion of its indebtedness at a time when such sales may be disadvantageous. Further, AFT and AIF may raise capital by issuing common shares, however, the offering price per common share generally must equal or exceed the net asset value per share, exclusive of any underwriting commissions or discounts, of the funds' shares.

Risks Related to Our Class A Shares

The market price and trading volume of our Class A shares may be volatile, which could result in rapid and substantial losses for our shareholders.

The market price of our Class A shares may be highly volatile and could be subject to wide fluctuations. In addition, the trading volume in our Class A shares may fluctuate and cause significant price variations to occur. You may be unable to resell your Class A shares at or above your purchase price, if at all. The market price of our Class A shares may fluctuate or decline significantly in the future. Some of the factors that could negatively affect the price of our Class A shares or result in fluctuations in the price or trading volume of our Class A shares include:

- variations in our quarterly operating results or distributions, which variations we expect will be substantial;
- our policy of taking a long-term perspective on making investment, operational and strategic decisions, which is expected to result in significant and unpredictable variations in our quarterly returns;
- failure to meet analysts' earnings estimates;
- publication of research reports about us or the investment management industry or the failure of securities analysts to cover our Class A shares;
- additions or departures of our Managing Partners and other key management personnel;
- adverse market reaction to any indebtedness we may incur or securities we may issue in the future;
- actions by shareholders;
- changes in market valuations of similar companies;
- speculation in the press or investment community;

- changes or proposed changes in laws or regulations or differing interpretations thereof affecting our businesses or enforcement of these laws and regulations, or announcements relating to these matters;
- a lack of liquidity in the trading of our Class A shares;
- adverse publicity about the investment management industry generally or individual scandals, specifically;
- the fact that we do not provide comprehensive guidance regarding our expected quarterly and annual revenues, earnings and cash flow; and
- general market and economic conditions.

In addition, from time to time, management may also declare special quarterly distributions based on investment realizations. Volatility in the market price of our Class A shares may be heightened at or around times of investment realizations as well as following such realizations, as a result of speculation as to whether such a distribution may be declared.

An investment in Class A shares is not an investment in any of our funds, and the assets and revenues of our funds are not directly available to us.

Class A shares are securities of Apollo Global Management, LLC only. While our historical consolidated and combined financial information includes financial information, including assets and revenues of certain Apollo funds on a consolidated basis, and our future financial information will continue to consolidate certain of these funds, such assets and revenues are available to the fund and not to us except through management fees, incentive income, distributions and other proceeds arising from agreements with funds, as discussed in more detail in this report.

Our Class A share price may decline due to the large number of shares eligible for future sale and for exchange into Class A shares.

The market price of our Class A shares could decline as a result of sales of a large number of our Class A shares or the perception that such sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and price that we deem appropriate. As of December 31, 2016, we had 185,460,294 Class A shares outstanding. The Class A shares reserved under our equity incentive plan are increased on the first day of each fiscal year by (i) the amount (if any) by which (a) 15% of the number of outstanding Class A shares and Apollo Operating Group units ("AOG Units") exchangeable for Class A shares on a fully converted and diluted basis on the last day of the immediately preceding fiscal year exceeds (b) the number of shares then reserved and available for issuance under the Equity Plan, or (ii) such lesser amount by which the administrator may decide to increase the number of Class A shares. Taking into account grants of restricted share units ("RSUs") and options made through December 31, 2016, 45,230,529 Class A shares remained available for future grant under our equity incentive plan. In addition, as of December 31, 2016, Holdings could at any time exchange its AOG Units for up to 215,457,239 Class A shares on behalf of our Managing Partners and Contributing Partners subject to the Amended and Restated Exchange Agreement. See "Item 13. Certain Relationships and Related Party Transactions—Amended and Restated Exchange Agreement." We may also elect to sell additional Class A shares in one or more future primary offerings.

Our Managing Partners and Contributing Partners, through their partnership interests in Holdings, owned an aggregate of 53.7% of the AOG Units as of December 31, 2016. Subject to certain procedures and restrictions (including any transfer restrictions and lock-up agreements applicable to our Managing Partners and Contributing Partners), each Managing Partner and Contributing Partner has the right, upon 60 days' notice prior to a designated quarterly date, to exchange the AOG Units for Class A shares. These Class A shares are eligible for resale from time to time, subject to certain contractual restrictions and applicable securities laws.

Our Managing Partners and Contributing Partners (through Holdings) have the ability to cause us to register the Class A shares they acquire upon exchange of their AOG Units, as was done in connection with the Company's Secondary Offering in May 2013. See "Item 13. Certain Relationships and Related Party Transactions—Managing Partner Shareholders Agreement- Registration Rights."

The Strategic Investors have the ability to cause us to register any of their non-voting Class A shares, as was done in connection with the Company's Secondary Offering in May 2013. See "Item 13. Certain Relationships and Related Party Transactions—Lenders Rights Agreement."

We have on file with the SEC a registration statement on Form S-8 covering the shares issuable under our equity incentive plan. Subject to vesting and contractual lock-up arrangements, such shares will be freely tradable.

We cannot assure you that our intended quarterly distributions will be paid each quarter or at all.

Our intention is to distribute to our Class A shareholders on a quarterly basis substantially all of our net after-tax cash flow from operations in excess of amounts determined by our manager to be necessary or appropriate to provide for the conduct

of our businesses, to make appropriate investments in our businesses and our funds, to comply with applicable laws and regulations, to service our indebtedness or to provide for future distributions to our Class A shareholders for any ensuing quarter. The declaration, payment and determination of the amount of our quarterly distribution, if any, will be at the sole discretion of our manager, who may change our distribution policy at any time. We cannot assure you that any distributions, whether quarterly or otherwise, will or can be paid. In making decisions regarding our quarterly distribution, our manager considers general economic and business conditions, our strategic plans and prospects, our businesses and investment opportunities, our financial condition and operating results, working capital requirements and anticipated cash needs, contractual restrictions and obligations, legal, tax, regulatory and other restrictions that may have implications on the payment of distributions by us to our Class A shareholders or by our subsidiaries to us, and such other factors as our manager may deem relevant.

Our Managing Partners' beneficial ownership of interests in the Class B share that we have issued to BRH Holdings GP, Ltd. ("BRH"), the control exercised by our manager and anti-takeover provisions in our charter documents and Delaware law could delay or prevent a change in control.

Our Managing Partners, through their ownership of BRH, beneficially own the Class B share that we have issued to BRH. The Managing Partners interests in such Class B share represented 60.5% of the total combined voting power of our shares entitled to vote as of December 31, 2016. As a result, they are able to exercise control over all matters requiring the approval of shareholders and are able to prevent a change in control of our company. In addition, our operating agreement provides that so long as the Apollo control condition (as described in "Item 10. Directors, Executive Officers and Corporate Governance—Our Manager") is satisfied, our manager, which is owned and controlled by our Managing Partners, manages all of our operations and activities. The control of our manager will make it more difficult for a potential acquirer to assume control of our Company. Other provisions in our operating agreement may also make it more difficult and expensive for a third party to acquire control of us even if a change of control would be beneficial to the interests of our shareholders. For example, our operating agreement requires advance notice for proposals by shareholders and nominations, places limitations on convening shareholder meetings, and authorizes the issuance of preferred shares that could be issued by our board of directors to thwart a takeover attempt. In addition, certain provisions of Delaware law give us the ability to delay or prevent a transaction that could cause a change in our control. The market price of our Class A shares could be adversely affected to the extent that our Managing Partners' control over our Company, the control exercised by our manager as well as provisions of our operating agreement discourage potential takeover attempts that our shareholders may favor.

We are a Delaware limited liability company, and there are certain provisions in our operating agreement regarding exculpation and indemnification of our officers and directors that differ from the Delaware General Corporation Law (DGCL) in a manner that may be less protective of the interests of our Class A shareholders.

Our operating agreement provides that to the fullest extent permitted by applicable law our directors or officers will not be liable to us. However, under the DGCL, a director or officer would be liable to us for (i) breach of duty of loyalty to us or our shareholders, (ii) intentional misconduct or knowing violations of the law that are not done in good faith, (iii) improper redemption of shares or declaration of dividend, or (iv) a transaction from which the director derived an improper personal benefit. In addition, our operating agreement provides that we indemnify our directors and officers for acts or omissions to the fullest extent provided by law. However, under the DGCL, a corporation can indemnify directors and officers for acts or omissions only if the director or officer acted in good faith, in a manner he reasonably believed to be in the best interests of the corporation, and, in criminal action, if the officer or director had no reasonable cause to believe his conduct was unlawful. Accordingly, our operating agreement may be less protective of the interests of our Class A shareholders, when compared to the DGCL, insofar as it relates to the exculpation and indemnification of our officers and directors.

Awards of our Class A shares may increase shareholder dilution and reduce profitability.

We grant Class A restricted share units to certain of our investment professionals and other personnel, both when hired and as a portion of the discretionary annual compensation they may receive. We require that a portion of the incentive income distributions payable by the general partners of certain of the funds we manage be used by the recipients of those distributions to purchase restricted Class A shares issued under our equity incentive plan. While this practice promotes alignment with shareholders and encourages investment professionals to maximize the success of the Company as a whole, these equity awards, if fulfilled by issuances of new shares by us rather than by open market purchases (which do not cause any dilution), may increase personnel-related shareholder dilution. In addition, volatility in the price of our Class A shares could adversely affect our ability to attract and retain our investment professionals and other personnel. To recruit and retain existing and future investment professionals, we may need to increase the level of compensation that we pay to them, which may cause a higher percentage of our revenue to be paid out in the form of compensation, which would have an adverse impact on our profit margins.

Purchases of our Class A shares pursuant to our share repurchase program may affect the value of our Class A shares, and there can be no assurance that our share repurchase program will enhance shareholder value.

Pursuant to our publicly announced share repurchase program, we are authorized to repurchase up to $250 million in the aggregate of our Class A shares, including up to $150 million in the aggregate of our outstanding Class A shares through a share repurchase program and up to $100 million through a reduction of Class A shares to be issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the our equity incentive plan. The timing and amount of any share repurchases will be determined based on market conditions, share price and other factors. This activity could increase (or reduce the size of any decrease in) the market price of our Class A shares at that time. Additionally, repurchases under our share repurchase program have and will continue to diminish our cash reserves, which could impact our ability to pursue possible strategic opportunities and acquisitions and could result in lower overall returns on our cash balances. There can be no assurance that any share repurchases will enhance shareholder value because the market price of our Class A shares could decline. Although our share repurchase program is intended to enhance long-term shareholder value, short-term share price fluctuations could reduce the program's effectiveness.

Risks Related to Our Organization and Structure

Although not enacted, the U.S. Congress has considered legislation that would have: (i) in some cases after a ten-year transition period, precluded us from qualifying as a partnership or required us to hold incentive income through taxable corporations; and (ii) taxed certain income and gains at increased rates. If similar legislation were to be enacted and apply to us, the value of our Class A shares could be adversely affected.

The U.S. Congress, the IRS and the U.S. Treasury Department have over the past several years examined the U.S. Federal income tax treatment of private equity funds, hedge funds and other kinds of investment partnerships. The present U.S. Federal income tax treatment of a holder of Class A shares and/or our own taxation may be adversely affected by any new legislation, new regulations or revised interpretations of existing tax law that arise as a result of such examinations. In May 2010, the U.S. House of Representatives passed legislation (the "May 2010 House Bill") that would have, in general, treated income and gains, including gain on sale, attributable to an interest in an investment services partnership interest ("ISPI") as income subject to a new blended tax rate that is higher than under current law, except to the extent such ISPI would have been considered under the legislation to be a qualified capital interest. The interests of Class A shareholders and our interests in the Apollo Operating Group that are entitled to receive incentive income may be classified as ISPIs for purposes of this legislation. The United States Senate considered, but did not pass, similar legislation. On February 14, 2012, Representative Levin (D-MI) introduced similar legislation that would have taxed incentive income at ordinary income rates (which would be higher than the proposed blended rate in the May 2010 House Bill). On June 25, 2015. Representative Levin introduced a slightly modified version of his 2012 bill (together with the 2012 bill, the "Levin Bills"). It is unclear whether or when the U.S. Congress will pass similar legislation or what provisions would be included in any legislation, if enacted.

The May 2010 House Bill and both Levin Bills provide that, for taxable years beginning ten years after the date of enactment, income derived with respect to an ISPI that is not a qualified capital interest and that is treated as ordinary income under the rules discussed above would not meet the qualifying income requirements under the publicly traded partnership rules. Therefore, if similar legislation were to be enacted, following such ten-year period, we would be precluded from qualifying as a partnership for U.S. Federal income tax purposes or be required to hold all such ISPIs through corporations, possibly U.S. corporations. If we were taxed as a U.S. corporation or required to hold all ISPIs through corporations, our effective tax rate would increase significantly. The federal statutory rate for corporations is currently 35%, but it is possible that the 35% statutory rate may be reduced as part of broader tax reform. In addition, we could be subject to increased state and local taxes. Furthermore, holders of Class A shares could be subject to tax on our conversion into a corporation or any restructuring required in order for us to hold our ISPIs through a corporation.

On September 12, 2011, the Obama administration submitted similar legislation to Congress in the American Jobs Act that would have taxed income and gain that was treated as capital gains, including gain on disposition of interests attributable to an ISPI, at rates higher than the capital gains rate applicable to such income under then-current law, with an exception for certain qualified capital interests. The proposed legislation also would have characterized certain income and gain in respect of ISPIs as non-qualifying income under the publicly traded partnership rules after a ten-year transition period from the effective date, with an exception for certain qualified capital interests. This proposed legislation followed several prior statements by the Obama administration in support of changing the taxation of incentive income. In its published revenue proposal for 2016, the Obama administration proposed that the current law regarding treatment of incentive income be changed to subject such income to ordinary income tax. The Obama administration's published revenue proposals for 2010, 2011, 2012, 2013, 2014 and 2015 contained similar proposals. According to publicly released statements, a top legislative priority of the Trump administration and the next Congress may be significant reform of the Internal Revenue Code, including significant changes to taxation of business entities. There is a substantial lack of clarity around the likelihood, timing and details of any such tax reform and the impact of any potential tax reform on us and our funds.

States and other jurisdictions have also considered legislation to increase taxes with respect to incentive income. For example, New York has periodically considered legislation under which non-residents of New York could be subject to New York state income tax on income in respect of our Class A shares as a result of certain activities of our affiliates in New York, although it is unclear when or whether such legislation would be enacted.

On February 26, 2014, Representative Dave Camp, who at the time was chairman of the House Ways and Means Committee, unveiled a detailed comprehensive tax reform proposal that would, among other things significantly limit the ability of publicly traded partnerships (PTPs) to avoid taxation as corporations. Under Representative Camp's proposal, only mining and natural resource PTPs would continue to be taxed on a flow-through basis. Representative Camp's proposal also called for a formulary approach to the taxation of incentive income. Under the formula, a portion of the gain recognized by partners providing services to certain investment partnerships would have been recharacterized as ordinary income. Representative Camp's incentive income proposal was limited in scope. For instance, it would not have applied to partners engaged in a real property trade or business. Although relatively clear in concept, the proposed legislative text contained ambiguities that could have significantly impacted the reach of the chairman's proposal. Representative Camp has since retired from Congress and his proposal was never taken up on the House floor; however, it is nonetheless significant in that it could serve as a model for a future Congress and presidential administration as they attempt to move forward on comprehensive tax reform legislation. For additional discussion about the potential impact of tax reform on our businesses, see "—Federal tax reform efforts will continue, which may involve uncertainties and risks," below.

Our shareholders do not elect our manager or vote and have limited ability to influence decisions regarding our businesses.

So long as the Apollo control condition is satisfied, our manager, AGM Management, LLC, which is owned and controlled by our Managing Partners, will manage all of our operations and activities. AGM Management, LLC is managed by BRH, a Cayman entity owned by our Managing Partners and managed by an executive committee composed of our Managing Partners. Our shareholders do not elect our manager, its manager or its manager's executive committee and, unlike the holders of common stock in a corporation, have only limited voting rights on matters affecting our businesses and therefore limited ability to influence decisions regarding our businesses. Furthermore, if our shareholders are dissatisfied with the performance of our manager, they will have little ability to remove our manager. As discussed below, the Managing Partners collectively had 60.5% of the voting power of Apollo Global Management, LLC as of December 31, 2016. Therefore, they have the ability to control any shareholder vote that occurs, including any vote regarding the removal of our manager.

Our board of directors has no authority over our operations other than that which our manager has chosen to delegate to it.

For so long as the Apollo control condition is satisfied, our manager, which is owned and controlled by our Managing Partners, manages all of our operations and activities, and our board of directors has no authority other than that which our manager chooses to delegate to it. In the event that the Apollo control condition is not satisfied, our board of directors will manage all of our operations and activities.

For so long as the Apollo control condition is satisfied, our manager (i) nominates and elects all directors to our board of directors, (ii) sets the number of directors of our board of directors and (iii) fills any vacancies on our board of directors. After the Apollo control condition is no longer satisfied, each of our directors will be elected by the vote of a plurality of our shares entitled to vote, voting as a single class, to serve until his or her successor is duly elected or appointed and qualified or until his or her earlier death, retirement, disqualification, resignation or removal.

Control by our Managing Partners of the combined voting power of our shares and holding their economic interests through the Apollo Operating Group may give rise to conflicts of interests.

Our Managing Partners controlled 60.5% of the combined voting power of our shares entitled to vote as of December 31, 2016. Accordingly, our Managing Partners have the ability to control our management and affairs to the extent not controlled by our manager. In addition, they are able to determine the outcome of all matters requiring shareholder approval (such as a proposed sale of all or substantially of our assets, the approval of a merger or consolidation involving the company, and an election by our manager to dissolve the company) and are able to cause or prevent a change of control of our company and could preclude any unsolicited acquisition of our company. The control of voting power by our Managing Partners could deprive Class A shareholders of an opportunity to receive a premium for their Class A shares as part of a sale of our company, and might ultimately affect the market price of the Class A shares.

In addition, our Managing Partners and Contributing Partners, through their beneficial ownership of partnership interests in Holdings, were entitled to 53.7% of Apollo Operating Group's economic returns through the AOG Units owned by Holdings as of December 31, 2016. Because they hold their economic interest in our businesses directly through the Apollo Operating Group, rather than through the issuer of the Class A shares, our Managing Partners and Contributing Partners may have conflicting interests with holders of Class A shares. For example, our Managing Partners and Contributing Partners may have different tax positions

from us, which could influence their decisions regarding whether and when to dispose of assets, and whether and when to incur new or refinance existing indebtedness, especially in light of the existence of the tax receivable agreement. For a description of the tax receivable agreement, see “Item 13. Certain Relationships and Related Party Transactions—Amended and Restated Tax Receivable Agreement.” In addition, the structuring of future transactions may take into consideration the Managing Partners’ and Contributing Partners’ tax considerations even where no similar benefit would accrue to us.

We qualify for, and rely on, exceptions from certain corporate governance and other requirements under the rules of the NYSE.

We qualify for exceptions from certain corporate governance and other requirements under the rules of the NYSE. Pursuant to these exceptions, we may elect not to comply with certain corporate governance requirements of the NYSE, including the requirements (i) that a majority of our board of directors consist of independent directors, (ii) that we have a nominating/corporate governance committee that is composed entirely of independent directors and (iii) that we have a compensation committee that is composed entirely of independent directors. In addition, we are not required to hold annual meetings of our shareholders. Pursuant to the exceptions available to a controlled company under the rules of the NYSE, we have elected not to have a nominating and corporate governance committee comprised entirely of independent directors, nor a compensation committee comprised entirely of independent directors. Although we currently have a board of directors comprised of a majority of independent directors, we plan to continue to avail ourselves of these exceptions. Accordingly, you will not have the same protections afforded to equity holders of entities that are subject to all of the corporate governance requirements of the NYSE.

Potential conflicts of interest may arise among our manager, on the one hand, and us and our shareholders on the other hand. Our manager and its affiliates have limited fiduciary duties to us and our shareholders, which may permit them to favor their own interests to the detriment of us and our shareholders.

Conflicts of interest may arise among our manager, on the one hand, and us and our shareholders, on the other hand. As a result of these conflicts, our manager may favor its own interests and the interests of its affiliates over the interests of us and our shareholders. These conflicts include, among others, the conflicts described below.

- Our manager determines the amount and timing of our investments and dispositions, indebtedness, issuances of additional stock and amounts of reserves, each of which can affect the amount of cash that is available for distribution to you.
- Our manager is allowed to take into account the interests of parties other than us in resolving conflicts of interest, which has the effect of limiting its duties (including fiduciary duties) to our shareholders; for example, our affiliates that serve as general partners of our funds have fiduciary and contractual obligations to our fund investors, and such obligations may cause such affiliates to regularly take actions that might adversely affect our near-term results of operations or cash flow; our manager has no obligation to intervene in, or to notify our shareholders of, such actions by such affiliates.
- Because our Managing Partners and Contributing Partners hold their AOG Units through entities that are not subject to corporate income taxation and Apollo Global Management, LLC holds the AOG Units in part through a wholly-owned subsidiary that is subject to corporate income taxation, conflicts may arise between our Managing Partners and Contributing Partners, on the one hand, and Apollo Global Management, LLC, on the other hand, relating to the selection, structuring, and disposition of investments. For example, the earlier taxable disposition of assets following an exchange transaction by a Managing Partner or Contributing Partner may accelerate payments under the tax receivable agreement and increase the present value of such payments, and the taxable disposition of assets before an exchange or transaction by a Managing Partner or Contributing Partner may increase the tax liability of a Managing Partner or Contributing Partner without giving rise to any rights to such Managing Partner or Contributing Partner to receive payments under the tax receivable agreement.
- Other than as provided in the non-competition, non-solicitation and confidentiality obligations to which our Managing Partners and other professionals are subject, which may not be enforceable, affiliates of our manager and existing and former personnel employed by our manager are not prohibited from engaging in other businesses or activities, including those that might be in direct competition with us.
- Our manager has limited its liability and reduced or eliminated its duties (including fiduciary duties) under our operating agreement, while also restricting the remedies available to our shareholders for actions that, without these limitations, might constitute breaches of duty (including fiduciary duty). In addition, we have agreed to indemnify our manager and its affiliates to the fullest extent permitted by law, except with respect to conduct involving bad faith, fraud or willful misconduct. By purchasing our Class A shares, you have agreed and consented to the provisions set forth in our operating agreement, including the provisions regarding conflicts of interest situations that, in the absence of such provisions, might constitute a breach of fiduciary or other duties under applicable state law.
- Our operating agreement does not restrict our manager from causing us to pay it or its affiliates for any services rendered, or from entering into additional contractual arrangements with any of these entities on our behalf, so

long as the terms of any such additional contractual arrangements are fair and reasonable to us as determined under the operating agreement.

- Our manager determines how much debt we incur and that decision may adversely affect our credit ratings.
- Our manager determines which costs incurred by it and its affiliates are reimbursable by us.
- Our manager controls the enforcement of obligations owed to us by it and its affiliates.
- Our manager decides whether to retain separate counsel, accountants or others to perform services for us.

See “Item 13. Certain Relationships and Related Party Transactions” for a more detailed discussion of these conflicts.

The control of our manager may be transferred to a third party without shareholder consent.

Our manager may transfer its manager interest to a third party in a merger or consolidation or in a transfer of all or substantially all of its assets without the consent of our shareholders. Furthermore, at any time, the members of our manager may sell or transfer all or part of their membership interests in our manager without the approval of the shareholders, subject to certain restrictions as described elsewhere in this report. A new manager may not be willing or able to form new funds and could form funds that have investment objectives and governing terms that differ materially from those of our current funds. A new owner could also have a different investment philosophy, employ investment professionals who are less experienced, be unsuccessful in identifying investment opportunities or have a track record that is not as successful as Apollo’s track record. If any of the foregoing were to occur, our funds could experience difficulty in making new investments, and the value of our funds’ existing investments, our businesses, our results of operations and our financial condition could materially suffer.

Our ability to pay regular distributions may be limited by our holding company structure. We are dependent on distributions from the Apollo Operating Group to pay distributions, taxes and other expenses.

As a holding company, our ability to pay distributions will be subject to the ability of our subsidiaries to provide cash to us. We intend to make quarterly distributions to our Class A shareholders. Accordingly, we expect to cause the Apollo Operating Group to make distributions to its unitholders (Holdings, which is 100% beneficially owned, directly and indirectly, by our Managing Partners and our Contributing Partners, and the three intermediate holding companies, which are 100% owned by us), pro rata in an amount sufficient to enable us to pay such distributions to our Class A shareholders; however, such distributions may not be made. In addition, our manager can reduce or eliminate our distributions at any time, in its discretion.

There may be circumstances under which we are restricted from paying distributions under applicable law or regulation (for example, due to Delaware limited partnership or limited liability company act limitations on making distributions if liabilities of the entity after the distribution would exceed the value of the entity’s assets).

Tax consequences to our Managing Partners and Contributing Partners may give rise to conflicts of interests.

As a result of unrealized built-in gain attributable to the value of our assets held by the Apollo Operating Group entities at the time of the Private Offering Transactions, upon the sale, refinancing or disposition of such assets, our Managing Partners and Contributing Partners may incur different and greater tax liabilities as a result of the disproportionately greater allocations of items of taxable income and gain to the Managing Partners and Contributing Partners upon a realization event. As the Managing Partners and Contributing Partners will not receive a correspondingly greater distribution of cash proceeds, they may, subject to applicable fiduciary or contractual duties, have different objectives regarding the appropriate pricing, timing and other material terms of any sale, refinancing, or disposition, or whether to sell such assets at all. Decisions made with respect to an acceleration or deferral of income or the sale or disposition of assets with unrealized built-in gains may also influence the timing and amount of payments that are received by an exchanging or selling Managing Partner or Contributing Partner under the tax receivable agreement. All other factors being equal, earlier disposition of assets with unrealized built-in gains following such exchange will tend to accelerate such payments and increase the present value of the tax receivable agreement, and disposition of assets with unrealized built-in gains before an exchange will increase a Managing Partner’s or Contributing Partner’s tax liability without giving rise to any rights to receive payments under the tax receivable agreement (although other offsetting benefits would arise). Decisions made regarding a change of control also could have a material influence on the timing and amount of payments received by our Managing Partners and Contributing Partners pursuant to the tax receivable agreement.

We are required to pay our Managing Partners and Contributing Partners for most of the actual tax benefits we realize as a result of the tax basis step-up we receive in connection with our acquisitions of units from our Managing Partners and Contributing Partners.

Subject to certain restrictions, each Managing Partner and Contributing Partner has the right to exchange the AOG Units that he holds through his partnership interest in Holdings for our Class A shares in a taxable transaction. These exchanges, as well as our acquisitions of units from our Managing Partners or Contributing Partners, may result in increases in the tax basis of the intangible assets of the Apollo Operating Group that otherwise would not have been available. Any such increases may reduce the

amount of tax that APO Corp., a wholly owned subsidiary of Apollo Global Management, LLC, would otherwise be required to pay in the future.

We have entered into a tax receivable agreement with our Managing Partners and Contributing Partners that provides for the payment by APO Corp., to our Managing Partners and Contributing Partners of 85% of the amount of actual tax savings, if any, that APO Corp. realizes (or is deemed to realize in the case of an early termination payment by APO Corp. or a change of control, as discussed below) as a result of these increases in tax deductions and tax basis and certain other tax benefits, including imputed interest expense, related to entering into the tax receivable agreement. Future payments that APO Corp. may make to our Managing Partners and Contributing Partners could be material in amount. In the event that any other of our current or future U.S. subsidiaries become taxable as corporations and acquire AOG Units in the future, or if we become taxable as a corporation for U.S. Federal income tax purposes, we expect, and have agreed that, each U.S corporation will become subject to a tax receivable agreement with substantially similar terms.

The IRS could challenge our claim to any increase in the tax basis of the assets owned by the Apollo Operating Group that results from the exchanges entered into by the Managing Partners or Contributing Partners. The IRS could also challenge any additional tax depreciation and amortization deductions or other tax benefits (including deductions for imputed interest expense associated with payments made under the tax receivable agreement) we claim as a result of, or in connection with, such increases in the tax basis of such assets. If the IRS were to successfully challenge a tax basis increase or tax benefits we previously claimed from a tax basis increase, Holdings would not be obligated under the tax receivable agreement to reimburse APO Corp. for any payments previously made to them (although any future payments would be adjusted to reflect the result of such challenge). As a result, in certain circumstances, payments could be made to our Managing Partners and Contributing Partners under the tax receivable agreement in excess of 85% of the actual aggregate cash tax savings of APO Corp. APO Corp.'s ability to achieve benefits from any tax basis increase and the payments to be made under this agreement will depend upon a number of factors, including the timing and amount of its future income.

In addition, the tax receivable agreement provides that, upon a merger, asset sale or other form of business combination or certain other changes of control, APO Corp.'s (or its successor's) obligations with respect to exchanged or acquired units (whether exchanged or acquired before or after such change of control) would be based on certain assumptions, including that APO Corp. would have sufficient taxable income to fully utilize the deductions arising from the increased tax deductions and tax basis and other benefits related to entering into the tax receivable agreement. See "Item 13. Certain Relationships and Related Party Transactions—Amended and Restated Tax Receivable Agreement."

If we were deemed an investment company under the Investment Company Act, applicable restrictions could make it impractical for us to continue our businesses as contemplated and could have a material adverse effect on our businesses and the price of our Class A shares.

We do not believe that we are an "investment company" under the Investment Company Act because the nature of our assets and the income derived from those assets allow us to rely on the exception provided by Rule 3a-1 issued under the Investment Company Act. In addition, we believe we are not an investment company under Section 3(b)(1) of the Investment Company Act because we are primarily engaged in non-investment company businesses. We intend to conduct our operations so that we will not be deemed an investment company. However, if we were to be deemed an investment company, we would be taxed as a corporation and other restrictions imposed by the Investment Company Act, including limitations on our capital structure and our ability to transact with affiliates, could make it impractical for us to continue our businesses as contemplated and would have a material adverse effect on our businesses and the price of our Class A shares.

Risks Related to Taxation

You may be subject to U.S. Federal income tax on your share of our taxable income, regardless of whether you receive any cash distributions from us.

Under current law, so long as we are not required to register as an investment company under the Investment Company Act and 90% of our gross income for each taxable year constitutes "qualifying income" within the meaning of the Internal Revenue Code on a continuing basis, we will be treated, for U.S. Federal income tax purposes, as a partnership and not as an association or a publicly traded partnership taxable as a corporation. You may be subject to U.S. Federal, state, local and possibly, in some cases, foreign income taxation on your allocable share of our items of income, gain, loss, deduction and credit for each of our taxable years ending with or within your taxable year, regardless of whether or not you receive cash distributions from us. Accordingly, you may be required to make tax payments in connection with your ownership of Class A shares that significantly exceed your cash distributions in any specific year.

If we are treated as a corporation for U.S. Federal income tax purposes, the value of the Class A shares would be adversely affected.

The value of your investment will depend in part on our company being treated as a partnership for U.S. Federal income tax purposes, which requires that 90% or more of our gross income for every taxable year consist of qualifying income, as defined in Section 7704 of the Internal Revenue Code, and that we are not required to register as an investment company under the Investment Company Act and related rules. Although we intend to manage our affairs so that our partnership will meet the 90% test described above in each taxable year, we may not meet these requirements or, as discussed below, current law may change so as to cause, in either event, our partnership to be treated as a corporation for U.S. Federal income tax purposes. If we were treated as a corporation for U.S. Federal income tax purposes, (i) we would become subject to corporate income tax and (ii) distributions to shareholders would be taxable as dividends for U.S. Federal income tax purposes to the extent of our earnings and profits.

Current law may change, causing us to be treated as a corporation for U.S. Federal or state income tax purposes or otherwise subjecting us to entity level taxation. See "—Risks Related to Our Organization and Structure-Although not enacted, the U.S. Congress has considered legislation that would have: (i) in some cases after a ten-year transition period, precluded us from qualifying as a partnership or required us to hold incentive income through taxable corporations and (ii) taxed certain income and gains at increased rates. If similar legislation were to be enacted and apply to us, the value of our Class A shares could be adversely affected." Because of widespread state budget deficits, several states are evaluating ways to subject partnerships to entity level taxation through the imposition of state income, franchise or other forms of taxation. If any state were to impose a tax upon us as an entity, our distributions to you would be reduced.

Our structure involves complex provisions of U.S. Federal income tax law for which no clear precedent or authority may be available. Our structure is also subject to potential legislative, judicial or administrative change and differing interpretations, possibly on a retroactive basis.

The U.S. Federal income tax treatment of holders of Class A shares depends in some instances on determinations of fact and interpretations of complex provisions of U.S. Federal income tax law for which no clear precedent or authority may be available. You should be aware that the U.S. Federal income tax rules are constantly under review by persons involved in the legislative process, the IRS and the U.S. Treasury Department, frequently resulting in revised interpretations of established concepts, statutory changes, revisions to regulations and other modifications and interpretations. The IRS pays close attention to the proper application of tax laws to partnerships and entities taxed as partnerships. The present U.S. Federal income tax treatment of an investment in our Class A shares may be modified by administrative, legislative or judicial interpretation at any time, and any such action may affect investments and commitments previously made. Changes to the U.S. Federal income tax laws and interpretations thereof could make it more difficult or impossible to meet the exception for us to be treated as a partnership for U.S. Federal income tax purposes that is not taxable as a corporation, affect or cause us to change our investments and commitments, affect the tax considerations of an investment in us, change the character or treatment of portions of our income (including, for instance, the treatment of incentive income as ordinary income rather than capital gain) and adversely affect an investment in our Class A shares. For example, as discussed above under "—Risks Related to Our Organization and Structure—Although not enacted, the U.S. Congress has considered legislation that would have: (i) in some cases after a ten-year transition period, precluded us from qualifying as a partnership or required us to hold incentive income through taxable corporations; and (ii) taxed certain income and gains at increased rates. If similar legislation were to be enacted and apply to us, the value of our Class A shares could be adversely affected," the U.S. Congress has considered various legislative proposals to treat all or part of the capital gain and dividend income that is recognized by an investment partnership and allocable to a partner affiliated with the sponsor of the partnership (i.e., a portion of the incentive income) as ordinary income to such partner for U.S. Federal income tax purposes.

Our operating agreement permits our manager to modify our operating agreement from time to time, without the consent of the holders of Class A shares, to address certain changes in U.S. Federal income tax regulations, legislation or interpretation. In some circumstances, such revisions could have a material adverse impact on some or all holders of Class A shares. For instance, our manager could elect at some point to treat us as an association taxable as a corporation for U.S. Federal (and applicable state) income tax purposes. If our manager were to do this, the U.S. Federal income tax consequences of owning our Class A shares would be materially different. Moreover, we will apply certain assumptions and conventions in an attempt to comply with applicable rules and to report income, gain, deduction, loss and credit to holders of Class A shares in a manner that reflects such beneficial ownership of items by holders of Class A shares, taking into account variation in ownership interests during each taxable year because of trading activity. However, those assumptions and conventions may not be in compliance with all aspects of applicable tax requirements. It is possible that the IRS will assert successfully that the conventions and assumptions used by us do not satisfy the technical requirements of the Internal Revenue Code and/or Treasury regulations and could require that items of income, gain, deductions, loss or credit, including interest deductions, be adjusted, reallocated or disallowed in a manner that adversely affects holders of Class A shares.

Our interests in certain of our businesses are held through entities that are treated as corporations for U.S. Federal income tax purposes; such corporations may be liable for significant taxes and may create other adverse tax consequences, which could potentially adversely affect the value of your investment.

In light of the publicly traded partnership rules under U.S. Federal income tax law and other requirements, we hold our interests in certain of our businesses through entities that are treated as corporations for U.S. Federal income tax purposes. Each such corporation could be liable for significant U.S. Federal income taxes and applicable state, local and other taxes that would not otherwise be incurred, which could adversely affect the value of your investment. Furthermore, it is possible that the IRS could challenge the manner in which such corporation's taxable income is computed by us.

Changes in U.S. tax law could adversely affect our ability to raise funds from certain foreign investors.

Under the Foreign Account Tax Compliance Act, or FATCA, certain U.S. withholding agents, or USWAs, foreign financial institutions, or FFIs, and non-financial foreign entities, or NFFEs, are required to report information about offshore accounts and investments to the U.S. or their local taxing authorities annually. In response to this legislation, various foreign governments have entered into Intergovernmental Agreements, or IGAs, with the U.S. Government and some have enacted similar legislation.

In order to meet these regulatory obligations, Apollo is required to register FFIs with the IRS, evaluate internal FATCA procedures, expand the review of investor Anti-Money Laundering/Know Your Customer and tax forms, evaluate the FATCA offerings by third party administrators and ensure that Apollo is prepared for the new global tax and information reporting requirements created under the U.S. and Non U.S. FATCA regimes.

Further, FATCA as well as Chapters 3 and 61 of the Internal Revenue Code, require Apollo to collect new IRS Tax Forms (W-9 and W-8 series), UK/Cayman Self-Certifications and other supporting documentation from their investors. Apollo has undertaken efforts to re-paper their existing investors.

Failure to meet these regulatory requirements could expose Apollo and/or its investors to a punitive withholding tax of 30% on certain U.S. payments (and beginning in 2019, a 30% withholding tax on gross proceeds from the sale of U.S. stocks and securities), and possibly limit their ability to open bank accounts and secure funding the global capital markets. The reporting obligations imposed under FATCA require FFIs to comply with agreements with the IRS to obtain and disclose information about certain investors to the IRS. The administrative and economic costs of compliance with FATCA may discourage some foreign investors from investing in U.S. funds, which could adversely affect our ability to raise funds from these investors. Other countries such as the U.K. and the Cayman Islands have implemented regimes similar to that of FATCA. Compliance with such regimes could result in increased administration and compliance costs and could subject our investment entities to increased non-U.S. withholding taxes.

Federal tax reform efforts will continue which may involve tax uncertainties and risks.

It is anticipated that the Trump administration and the U.S. Congress will continue examining proposals that would provide for a comprehensive overhaul of U.S. Federal income tax laws, which could result in sweeping changes to many longstanding tax rules. Reform efforts could result in lower statutory tax rates, but those rate reductions could be offset by tax changes intended to broaden the tax base, including eliminating or reducing the ability to deduct interest expense. As noted above in the discussion of "Risks Related to Our Organization and Structure," tax reform legislation could require many entities currently operating as partnerships to be taxed as corporations and could cause income from incentive income to be taxed as ordinary income.

In addition, tax reform could include other base-broadening provisions spanning a variety of industry sectors, which also could adversely affect our business. For example, proposals affecting financial institutions and products may include changing the tax treatment of executive compensation, including bonuses, as well as the tax treatment of derivatives and other financial instruments. Other changes could include limiting or eliminating certain tax benefits currently available to cash value life insurance and deferred annuity products. Enactment of these or similar changes could adversely affect new sales, and possibly funding, of existing cash value life insurance and deferred annuity products.

Other proposals likely to emerge in the context of fundamental tax reform include: changes to the accelerated cost recovery system, mandatory amortization of certain advertising expenditures, repeal of the domestic production deduction, reforms to the subpart F rules, repeal of the last-in/first-out accounting rules, repeal of incentives currently available to oil and natural gas exploration and production companies, and limitations on the net operating loss deduction. The tax reform debate also may encompass proposals to move the United States toward a territorial system for taxing foreign-source income of United States multinationals and the possibility of a one-time transition tax on previously untaxed foreign earnings. Many of these proposals were included in the tax reform discussion draft that then-House Ways and Means Committee Chairman Dave Camp released in 2014; others were included in various budget proposals President Obama has released during his presidency.

On June 24, 2016, Representative Kevin Brady, who is chairman of the House Ways and Means Committee, unveiled a "A Better Way for Tax Reform," which Representative Brady described as a bold blueprint for pro-growth, comprehensive tax reform. This blueprint contemplates, among other things, reducing statutory tax rates imposed on corporations and business income of pass-through entities such as partnerships, replacing deductions that favor special industries or sectors with full and immediate deductions for new investments in equipment and technology, eliminating or reducing the ability to deduct net interest expense, moving to a territorial tax system and introducing a destination-basis tax system through border adjustment taxes.

It is not possible to predict when tax reform will be enacted and what impact tax reform, if enacted, would have on our funds and our businesses, but there is the potential for significant changes in U.S. federal laws related to the tax treatment of products and services provided by Apollo and investments made by our funds.

We may hold or acquire certain investments through an entity classified as a PFIC or CFC for U.S. Federal income tax purposes.

Certain of our investments may be in foreign corporations or may be acquired through foreign subsidiaries that would be classified as corporations for U.S. Federal income tax purposes. Such entities may be passive foreign investment companies, or "PFICs," or controlled foreign corporations, or "CFCs," for U.S. Federal income tax purposes. For example, APO (FC), LLC and APO (FC II), LLC are considered to be CFCs for U.S. Federal income tax purposes. Class A shareholders indirectly owning an interest in a PFIC or a CFC may experience adverse U.S. tax consequences, including the recognition of taxable income prior to the receipt of cash relating to such income. In addition, gain on the sale of a PFIC or CFC may be taxable at ordinary income tax rates.

Complying with certain tax-related requirements may cause us to forego otherwise attractive business or investment opportunities or enter into acquisitions, borrowings, financings or arrangements we may not have otherwise entered into.

In order for us to be treated as a partnership for U.S. Federal income tax purposes, and not as an association or publicly traded partnership taxable as a corporation, we must meet the qualifying income exception discussed above on a continuing basis and we must not be required to register as an investment company under the Investment Company Act. In order to effect such treatment we (or our subsidiaries) may be required to invest through foreign or domestic corporations, forego attractive business or investment opportunities or enter into borrowings or financings we may not have otherwise entered into. This may cause us to incur additional tax liability and/or adversely affect our ability to operate solely to maximize our cash flow. Our structure also may impede our ability to engage in certain corporate acquisitive transactions because we generally intend to hold all of our assets through the Apollo Operating Group. In addition, we may be unable to participate in certain corporate reorganization transactions that would be tax free to our holders if we were a corporation. To the extent we hold assets other than through the Apollo Operating Group, we will make appropriate adjustments to the Apollo Operating Group agreements so that distributions to Holdings and us would be the same as if such assets were held at that level. Moreover, we are precluded by a contract with one of the Strategic Investors from acquiring assets in a manner that would cause that Strategic Investor to be engaged in a commercial activity within the meaning of Section 892 of the Internal Revenue Code.

Tax gain or loss on disposition of our Class A shares could be more or less than expected.

If you sell your Class A shares, you will recognize a gain or loss equal to the difference between the amount realized and your adjusted tax basis allocated to those Class A shares. Prior distributions to you in excess of the total net taxable income allocated to you will have decreased the tax basis in your Class A shares. Therefore, such excess distributions will increase your taxable gain, or decrease your taxable loss, when the Class A shares are sold and may result in a taxable gain even if the sale price is less than the original cost. A portion of the amount realized, whether or not representing gain, may be ordinary income to you.

We cannot match transferors and transferees of Class A shares, and we have therefore adopted certain income tax accounting conventions that may not conform with all aspects of applicable tax requirements. The IRS may challenge this treatment, which could adversely affect the value of our Class A shares.

Because we cannot match transferors and transferees of Class A shares, we have adopted depreciation, amortization and other tax accounting positions that may not conform with all aspects of existing Treasury regulations. A successful IRS challenge to those positions could adversely affect the amount of tax benefits available to holders of Class A shares. It also could affect the timing of these tax benefits or the amount of gain on the sale of Class A shares and could have a negative impact on the value of Class A shares or result in audits of and adjustments to the tax returns of holders of Class A shares.

In addition, our taxable income and losses will be determined and apportioned among investors using conventions we regard as consistent with applicable law. As a result, if you transfer your Class A shares, you may be allocated income, gain, loss and deduction realized by us after the date of transfer. Similarly, a transferee may be allocated income, gain, loss and deduction realized by us prior to the date of the transferee's acquisition of our Class A shares. A transferee may also bear the cost of withholding tax imposed with respect to income allocated to a transferor through a reduction in the cash distributed to the transferee.

The sale or exchange of 50% or more of our capital and profit interests will result in the termination of our partnership for U.S. Federal income tax purposes. We will be considered to have been terminated for U.S. Federal income tax purposes if there is a sale or exchange of 50% or more of the total interests in our capital and profits within a twelve-month period. Our termination would, among other things, result in the closing of our taxable year for all holders of Class A shares and could result in a deferral of depreciation deductions allowable in computing our taxable income.

Non-U.S. persons face unique U.S. tax issues from owning Class A shares that may result in adverse tax consequences to them.

In light of our investment activities, we may be, or may become, engaged in a U.S. trade or business for U.S. Federal income tax purposes, in which case some portion of our income would be treated as effectively connected income with respect to non-U.S. holders of our Class A shares, or "ECI." Moreover, dividends paid by an investment that we make in a real estate investment trust, or "REIT," that are attributable to gains from the sale of U.S. real property interests and sales of certain investments in interests in U.S. real property, including stock of certain U.S. corporations owning significant U.S. real property, may be treated as ECI with respect to non-U.S. holders of our Class A shares. In addition, certain income of non-U.S. holders from U.S. sources not connected to any U.S. trade or business conducted by us could be treated as ECI. To the extent our income is treated as ECI, each non-U.S. holder generally would be subject to withholding tax on its allocable share of such income, would be required to file a U.S. Federal income tax return for such year reporting its allocable share of income effectively connected with such trade or business and any other income treated as ECI, and would be subject to U.S. Federal income tax at regular U.S. tax rates on any such income (state and local income taxes and filings may also apply in that event). Non-U.S. holders that are corporations may also be subject to a 30% branch profits tax on their allocable share of such income. In addition, certain income from U.S. sources that is not ECI allocable to non-U.S. holders may be reduced by withholding taxes imposed at the highest effective applicable tax rate.

An investment in Class A shares will give rise to UBTI to certain tax-exempt holders.

We will not make investments through taxable U.S. corporations solely for the purpose of limiting unrelated business taxable income ("UBTI") from "debt-financed" property and, thus, an investment in Class A shares will give rise to UBTI to tax-exempt holders of Class A shares. For example, APO Asset Co., LLC will hold interests in entities treated as partnerships, or otherwise subject to tax on a flow-through basis, that will incur indebtedness. Moreover, if the IRS successfully asserts that we are engaged in a trade or business, then additional amounts of income could be treated as UBTI.

We do not intend to make, or cause to be made, an election under Section 754 of the Internal Revenue Code to adjust our asset basis or the asset basis of certain of the Apollo Operating Group Partnerships. Thus, a holder of Class A shares could be allocated more taxable income in respect of those Class A shares prior to disposition than if such an election were made.

We did not make and currently do not intend to make, or cause to be made, an election to adjust asset basis under Section 754 of the Internal Revenue Code with respect to Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings VI, L.P., Apollo Principal Holdings VII, L.P., Apollo Principal Holdings VIII, L.P., Apollo Principal Holdings IX, L.P., Apollo Principal Holdings X, L.P. and Apollo Principal Holding XI, L.P. If no such election is made, there will generally be no adjustment for a transferee of Class A shares even if the purchase price of those Class A shares is higher than the Class A shares' share of the aggregate tax basis of our assets immediately prior to the transfer. In that case, on a sale of an asset, gain allocable to a transferee could include built-in gain allocable to the transferor at the time of the transfer, which built-in gain would otherwise generally be eliminated if a Section 754 election had been made.

Class A shareholders may be subject to state and local taxes and return filing requirements as a result of investing in our Class A shares.

In addition to U.S. Federal income taxes, our Class A shareholders may be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property now or in the future, even if our Class A shareholders do not reside in any of those jurisdictions. Our Class A shareholders may also be required to file state and local income tax returns and pay state and local income taxes in some or all of these jurisdictions. Further, Class A shareholders may be subject to penalties for failure to comply with those requirements. It is the responsibility of each Class A shareholder to file all U.S. Federal, state and local tax returns that may be required of such Class A shareholder.

We may not be able to furnish to each Class A shareholder specific tax information within 90 days after the close of each calendar year, which means that holders of Class A shares who are U.S. taxpayers should anticipate the need to file annually a request for an extension of the due date of their income tax return. In addition, it is possible that Class A shareholders may be required to file amended income tax returns.

As a publicly traded partnership, our operating results, including distributions of income, dividends, gains, losses or deductions and adjustments to carrying basis, will be reported on Schedule K-1 and distributed to each Class A shareholder annually. It may require longer than 90 days after the end of our fiscal year to obtain the requisite information from all lower-tier entities so that K-1s may be prepared for us. For this reason, Class A shareholders who are U.S. taxpayers should anticipate the need to file annually with the IRS (and certain states) a request for an extension past April 15 or the otherwise applicable due date of their income tax return for the taxable year.

In addition, it is possible that a Class A shareholder will be required to file amended income tax returns as a result of adjustments to items on the corresponding income tax returns of the partnership. Any obligation for a Class A shareholder to file amended income tax returns for that or any other reason, including any costs incurred in the preparation or filing of such returns, are the responsibility of each Class A shareholder.

You may be subject to an additional U.S. Federal income tax on net investment income allocated to you by us and on gain on the sale of the Class A shares.

Individuals, estates and trusts are currently subject to an additional 3.8% tax on "net investment income" (or undistributed "net investment income," in the case of estates and trusts) for each taxable year, with such tax applying to the lesser of such income or the excess of such person's adjusted gross income (with certain adjustments) over a specified amount. Net investment income includes net income from interest, dividends, annuities, royalties and rents and net gain attributable to the disposition of investment property. It is anticipated that net income and gain attributable to an investment in us will be included in a holder of the Class A share's "net investment income" subject to this additional tax.

We may be liable for adjustments to our tax returns as a result of recently enacted legislation.

Legislation was recently enacted that significantly changes the rules for U.S. Federal income tax audits of partnerships. Such audits will continue to be conducted at the partnership level, but with respect to tax returns for taxable years beginning after December 31, 2017, any adjustments to the amount of tax due (including interest and penalties) will be payable by the partnership rather than the partners of such partnership unless the partnership qualifies for and affirmatively elects an alternative procedure. In general, under the default procedures, taxes imposed on us would be assessed at the highest rate of tax applicable for the reviewed year and determined without regard to the character of the income or gain, the tax status of our shareholders or the benefit of any shareholder-level tax attributes (that could otherwise reduce any tax due).

Under the elective alternative procedure, we would issue information returns to persons who were shareholders in the audited year, who would then be required to take the adjustments into account in calculating their own tax liability, and we would not be liable for the adjustments to the amount of tax due (including interest and penalties). The mechanics of the elective alternative procedure are not clear in a number of respects and are intended to be clarified by future guidance. On January 18, 2017, the IRS and the U.S. Department of the Treasury publicly released the text of proposed regulations (the "Proposed Regulations") regarding the centralized partnership audit legislation, which were scheduled to be formally published in the Federal Register on January 20, 2017. On January 20, 2017, however, the Trump administration released a memorandum that generally delayed all pending regulations from publication in the Federal Register pending review and approval, and the Proposed Regulations have not yet been published, so the impact of the Proposed Regulation on us and our funds remains unclear. Our manager has discretion whether or not to make use of this elective alternative procedure and has not determined whether or to what extent the election will be available or appropriate.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal executive offices are located in leased office space at 9 West 57th Street, New York, New York 10019. We also lease the space for our offices in New York, Los Angeles, Houston, Chicago, Ballwin, Bethesda, Toronto, London, Frankfurt, Madrid, Luxembourg, Mumbai, Delhi, Singapore, Hong Kong and Shanghai. We do not own any real property. We consider these facilities to be suitable and adequate for the management and operation of our businesses.

ITEM 3. LEGAL PROCEEDINGS

See note 15 to our consolidated financial statements for a summary of the Company's legal proceedings.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our Class A shares are traded on the NYSE under the symbol "APO." Our Class A shares began trading on the NYSE on March 30, 2011.

The number of holders of record of our Class A shares as of February 10, 2017 was 19. This does not include the number of shareholders that hold shares in "street name" through banks or broker-dealers. As of February 10, 2017, there was 1 holder of our Class B share.

The following table sets forth the high and low intra-day sales prices per unit of our Class A shares, for the periods indicated, as reported by the NYSE:

	Sales Price	
2016	**High**	**Low**
First Quarter	$ 17.48	$ 12.35
Second Quarter	17.77	14.26
Third Quarter	19.01	14.25
Fourth Quarter	21.17	17.38

	Sales Price	
2015	**High**	**Low**
First Quarter	$ 25.80	$ 20.96
Second Quarter	23.33	20.78
Third Quarter	22.61	15.35
Fourth Quarter	19.18	14.15

Cash Distribution Policy

The following table sets forth the cash distributions paid to our Class A shareholders for the fiscal years ended December 31, 2016 and 2015.

Distribution Payment Date	Distribution Per Class A Share Amount
February 27, 2015	$ 0.86
May 29, 2015	0.33
August 31, 2015	0.42
November 30, 2015	0.35
Total 2015 distribution	$ 1.96
February 29, 2016	$ 0.28
May 31, 2016	0.25
August 31, 2016	0.37
November 30, 2016	0.35
Total 2016 distribution	$ 1.25

We have declared an additional cash distribution of $0.45 per Class A share in respect of the fourth quarter of 2016 which will be paid on February 28, 2017 to holders of record of Class A shares at the close of business on February 21, 2017.

Distributable Earnings ("DE"), as well as DE After Taxes and Related Payables are derived from our segment reported results, and are supplemental non-U.S. GAAP measures to assess performance and amounts available for distribution to Class A shareholders, holders of RSUs that participate in distributions and holders of AOG Units. DE represents the amount of net realized earnings without the effects of the consolidation of any of the affiliated funds. DE, which is a component of EI, is the sum across

all segments of (i) total management fees and advisory and transaction fees, excluding monitoring fees received from Athene based on its capital and surplus (as defined in Apollo's transaction advisory services agreement with Athene), (ii) other income (loss), excluding the gains (losses) arising from the reversal of a portion of the tax receivable agreement liability (iii) realized carried interest income, and (iv) realized investment income, less (x) compensation expense, excluding the expense related to equity-based awards, (y) realized profit sharing expense, and (z) non-compensation expenses, excluding depreciation and amortization expense. DE After Taxes and Related Payables represents DE less estimated current corporate, local and non-U.S. taxes as well as the payable under Apollo's tax receivable agreement.

Our current intention is to distribute to our Class A shareholders on a quarterly basis substantially all of our Distributable Earnings attributable to Class A shareholders, in excess of amounts determined by our manager to be necessary or appropriate to provide for the conduct of our businesses, to make appropriate investments in our businesses and our funds, to comply with applicable law, any of our debt instruments or other agreements, or to provide for future distributions to our Class A shareholders for any ensuing quarter. Because we will not know what our actual available cash flow from operations will be for any year until sometime after the end of such year, our fourth quarter distribution may be adjusted to take into account actual net after-tax cash flow from operations for that year.

The declaration, payment and determination of the amount of our quarterly distribution will be at the sole discretion of our manager, which may change our cash distribution policy at any time. We cannot assure you that any distributions, whether quarterly or otherwise, will or can be paid. In making decisions regarding our quarterly distribution, our manager will take into account general economic and business conditions, our strategic plans and prospects, our businesses and investment opportunities, our financial condition and operating results, working capital requirements and anticipated cash needs, contractual restrictions and obligations, legal, tax and regulatory restrictions, restrictions and other implications on the payment of distributions by us to our common shareholders or by our subsidiaries to us and such other factors as our manager may deem relevant.

Because we are a holding company that owns intermediate holding companies, the funding of each distribution, if declared, will occur in three steps, as follows.

- ***First***, we will cause one or more entities in the Apollo Operating Group to make a distribution to all of its partners, including our wholly-owned subsidiaries APO Corp., APO Asset Co., LLC, APO (FC), LLC, APO (FC II), LLC and APO UK (FC), Limited (as applicable), and Holdings, on a pro rata basis;
- ***Second***, we will cause our intermediate holding companies, APO Corp., APO Asset Co., LLC, APO (FC), LLC, APO (FC II), LLC and APO UK (FC), Limited (as applicable), to distribute to us, from their net after-tax proceeds, amounts equal to the aggregate distribution we have declared; and
- ***Third***, we will distribute the proceeds received by us to our Class A shareholders on a pro rata basis.

Payments that any of our intermediate holding companies make under the tax receivable agreement will reduce amounts that would otherwise be available for distribution by us on our Class A shares. See note 14 to our consolidated financial statements for information regarding the tax receivable agreement.

Under Delaware law we are prohibited from making a distribution to the extent that our liabilities, after such distribution, exceed the fair value of our assets. Our operating agreement does not contain any restrictions on our ability to make distributions, except that we may only distribute Class A shares to holders of Class A shares. The debt arrangements, as described in note 11 to our consolidated financial statements, do not contain restrictions on our or our subsidiaries' ability to pay distributions; however, instruments governing indebtedness that we or our subsidiaries incur in the future may contain restrictions on our or our subsidiaries' ability to pay distributions or make other cash distributions to equity holders.

In addition, the Apollo Operating Group's cash flow from operations may be insufficient to enable it to make tax distributions to its partners, in which case the Apollo Operating Group may have to borrow funds or sell assets, and thus our liquidity and financial condition could be materially adversely affected. Furthermore, by paying cash distributions rather than investing that cash in our businesses, we might risk slowing the pace of our growth, or not having a sufficient amount of cash to fund our operations, new investments or unanticipated capital expenditures, should the need arise.

Our cash distribution policy has certain risks and limitations, particularly with respect to liquidity. Although we expect to pay distributions according to our cash distribution policy, we may not pay distributions according to our policy, or at all, if, among other things, we do not have the cash necessary to pay the intended distributions.

As of December 31, 2016, approximately 9.1 million RSUs granted to Apollo employees (net of forfeited awards) were entitled to distribution equivalents, which are paid in cash.

Securities Authorized for Issuance Under Equity Compensation Plans

See the table under "Securities Authorized for Issuance Under Equity Compensation Plans" set forth in "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters."

Unregistered Sale of Equity Securities

On November 1, 2016 and November 8, 2016, we issued 376,692 and 1,852 Class A shares, respectively, net of taxes to Apollo Management Holdings, L.P., a subsidiary of Apollo Global Management, LLC, in connection with deliveries of shares to participants in the Company's 2007 Omnibus Equity Incentive Plan (the "2007 Equity Plan") for an aggregate purchase price of $6.9 million and $0.03 million, respectively. The issuance was exempt from registration under the Securities Act in accordance with Section 4(a)(2) and Rule 506(b) thereof, as transactions by the issuer not involving a public offering. We determined that the purchaser of Class A shares in the transactions, Apollo Management Holdings, L.P., was an accredited investor.

Issuer Purchases of Equity Securities

The following table sets forth purchases of our Class A shares made by us or on our behalf during the fiscal quarter ended December 31, 2016.

Period	Total Number of Class A Shares Purchased[(1)]	Average Price Paid per Share
October 1, 2016 through October 31, 2016	—	$ —
November 1, 2016 through November 30, 2016	20,778	17.99
December 1, 2016 through December 31, 2016	—	—
Total	20,778	

(1) During the fiscal quarter ended December 31, 2016, we repurchased a number of our Class A shares equal to the number of Class A restricted shares issued under our equity incentive plan during the quarter. All such repurchases were made in open-market transactions not pursuant to a publicly-announced repurchase plan or program.

In February 2016, the Company announced its adoption of a program to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through a reduction of Class A shares to be issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the 2007 Equity Plan, which we refer to as net share settlement. Under the share repurchase program, shares may be repurchased from time to time in open market transactions, in privately negotiated transactions or otherwise, with the size and timing of these repurchases depending on legal requirements, price, market and economic conditions and other factors. The Company expects that the share repurchase program, which has no expiration date, will be in effect until the maximum approved dollar amount has been used to repurchase Class A shares. The share repurchase program does not require the Company to repurchase any specific number of Class A shares, and the share repurchase program may be suspended, extended, modified or discontinued at any time. Reductions of Class A shares issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the 2007 Equity Plan are not included in the table. There were no share repurchases made as part of the share repurchase program during the three months ended December 31, 2016, and as of December 31, 2016, the approximate dollar value of Class A shares that may be purchased under the program is $137.1 million.

ITEM 6. SELECTED FINANCIAL DATA

The following selected historical consolidated and other data of Apollo Global Management, LLC should be read together with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the historical financial statements and related notes included in "Item 8. Financial Statements and Supplementary Data."

The selected historical consolidated statements of operations data of Apollo Global Management, LLC for each of the years ended December 31, 2016, 2015 and 2014 and the selected historical consolidated statements of financial condition data as of December 31, 2016 and 2015 have been derived from our audited consolidated financial statements which are included in "Item 8. Financial Statements and Supplementary Data."

We derived the selected historical consolidated statements of operations data of Apollo Global Management, LLC for the years ended December 31, 2013 and 2012 and the selected consolidated statements of financial condition data as of December 31, 2014, 2013 and 2012 from our audited consolidated financial statements which are not included in this report.

Total shareholders' equity	1,867,528	1,388,981	5,943,461	6,688,722	5,703,383
Total Non-Controlling Interests	1,032,412	739,476	4,156,979	4,051,453	3,036,565

(1) Prior period amounts have been recast to conform to the current presentation. See note 2 to our consolidated financial statements for more detail on the change in presentation relating to general, administrative and other.

(2) Reflects Non-Controlling Interests attributable to AAA (for all periods prior to January 1, 2015), consolidated variable interest entities and the remaining interests held by certain individuals who receive an allocation of income from certain of our credit management companies.

(3) Reflects the Non-Controlling Interests in the net (income) loss of the Apollo Operating Group relating to the AOG Units held by our Managing Partners and Contributing Partners which is calculated by applying the ownership percentage of Holdings in the Apollo Operating Group. Holdings' ownership interest in the Apollo Operating Group was impacted by the Company's initial public offering in April 2011,

issuances of Class A shares in settlement of vested RSUs in each of the periods presented, and exchanges of certain AOG Units. See “Item 8. Financial Statements and Supplementary Data” for details of the ownership percentage in Holdings.

(4) Apollo adopted new U.S. GAAP consolidation and collateralized financing entity (“CFE”) guidance during the year ended December 31, 2015 which resulted in the deconsolidation of certain funds and VIEs as of January 1, 2015 and a measurement alternative of the financial assets and liabilities of the remaining consolidated CLOs. The adoption did not impact net income attributable to Apollo Global Management, LLC, but did impact various line items within the statements of operations and financial condition. See note 2 to the consolidated financial statements for details regarding the Company’s adoption of the new consolidation and CFE guidance.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with Apollo Global Management, LLC’s consolidated financial statements and the related notes as of December 31, 2016 and 2015 and for the years ended December 31, 2016, 2015 and 2014. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those included in the section of this report entitled “Item 1A. Risk Factors.” The highlights listed below have had significant effects on many items within our consolidated financial statements and affect the comparison of the current period’s activity with those of prior periods.

General

Our Businesses

Founded in 1990, Apollo is a leading global alternative investment manager. We are a contrarian, value-oriented investment manager in private equity, credit and real estate with significant distressed expertise and a flexible mandate in the majority of our funds which enables our funds to invest opportunistically across a company’s capital structure. We raise, invest and manage funds on behalf of some of the world’s most prominent pension, endowment and sovereign wealth funds as well as other institutional and individual investors. Apollo is led by our Managing Partners, Leon Black, Joshua Harris and Marc Rowan, who have worked together for 30 years and lead a team of 986 employees, including 376 investment professionals, as of December 31, 2016.

Apollo conducts its business primarily in the United States and substantially all of its revenues are generated domestically. These businesses are conducted through the following three reportable segments:

(i) ***Private equity***—primarily invests in control equity and related debt instruments, convertible securities and distressed debt instruments;

(ii) ***Credit***—primarily invests in non-control corporate and structured debt instruments including performing, stressed and distressed instruments across the capital structure; and

(iii) ***Real estate***—primarily invests in real estate equity for the acquisition and recapitalization of real estate assets, portfolios, platforms and operating companies, and real estate debt including first mortgage and mezzanine loans, preferred equity and commercial mortgage backed securities.

These business segments are differentiated based on the varying investment strategies. The performance is measured by management on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo’s business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the managed funds.

Our financial results vary since carried interest, which generally constitutes a large portion of the income we receive from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

In addition, the growth in our Fee-Generating AUM during the last year has primarily been in our credit segment. The average management fee rate for these new credit products is at market rates for such products and in certain cases is below our historical rates. Also, due to the complexity of these new product offerings, the Company has incurred and will continue to incur additional costs associated with managing these products. To date, these additional costs have been offset by realized economies of scale and ongoing cost management.

As of December 31, 2016, we had total AUM of $191.7 billion across all of our businesses. More than 90% of our total AUM was in funds with a contractual life at inception of seven years or more, and 45% of such AUM was in permanent

capital vehicles. On December 31, 2013, Fund VIII held a final closing raising a total of $17.5 billion in third-party capital and approximately $880 million of additional capital from Apollo and affiliated investors, and as of December 31, 2016, Fund VIII had $8.3 billion of uncalled commitments remaining. Additionally, Fund VII held a final closing in December 2008, raising a total of $14.7 billion, and as of December 31, 2016, Fund VII had $2.3 billion of uncalled commitments remaining. We have consistently produced attractive long-term investment returns in our traditional private equity funds, generating a 39% gross IRR and a 25% net IRR on a compound annual basis from inception through December 31, 2016. Apollo's private equity fund appreciation was 13.5% for the year ended December 31, 2016.

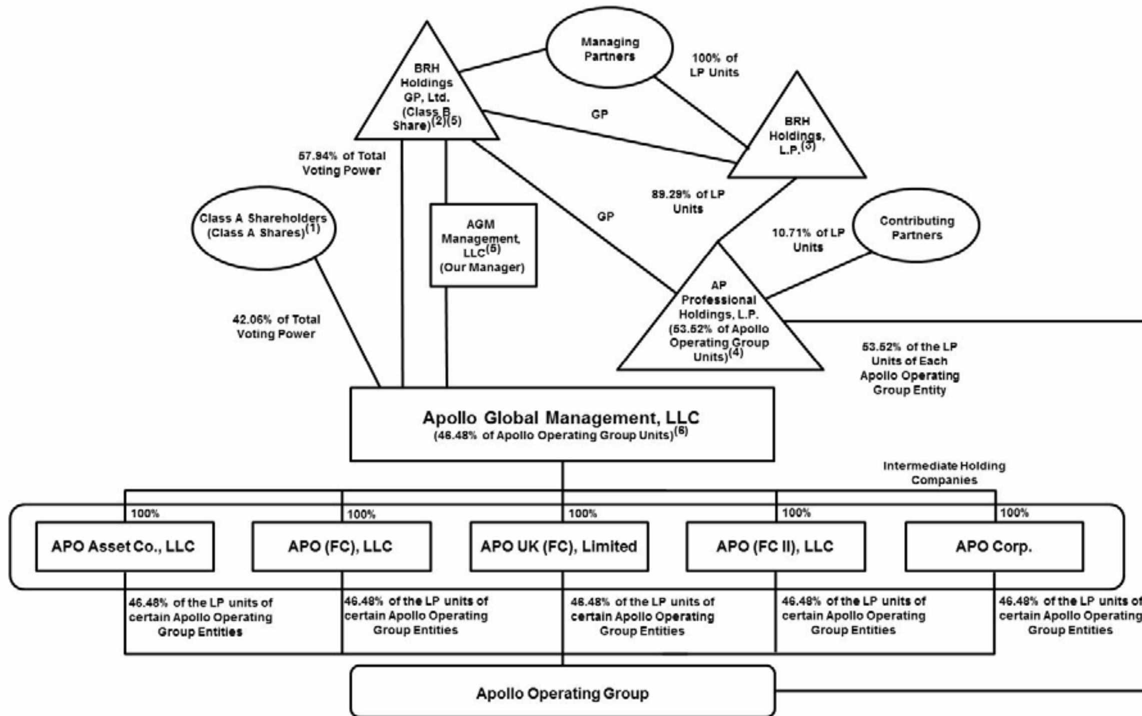
For our credit segment, total gross and net returns, excluding assets managed by Athene Asset Management that are not directly invested in Apollo funds and investment vehicles or sub-advised by Apollo, were 11.2% and 9.9%, respectively, for the year ended December 31, 2016.

For our real estate segment, total combined gross and net returns for U.S. RE Fund I and U.S. RE Fund II including co-investment capital were 16.1% and 12.8%, respectively, for the year ended December 31, 2016.

For further detail related to fund performance metrics across all of our businesses, see "—The Historical Investment Performance of Our Funds."

Holding Company Structure

The diagram below depicts our current organizational structure:



Note: The organizational structure chart above depicts a simplified version of the Apollo structure. It does not include all legal entities in the structure. Ownership percentages are as of February 8, 2017.

(1) The Strategic Investors hold 16.43% of the Class A shares outstanding and 7.63% of the economic interests in the Apollo Operating Group. The Class A shares held by investors other than the Strategic Investors represent 42.06% of the total voting power of our shares entitled to vote and 38.85% of the economic interests in the Apollo Operating Group. Class A shares held by the Strategic Investors do not have voting rights. However, such Class A shares will become entitled to vote upon transfers by a Strategic Investor in accordance with the agreements entered into in connection with the investments made by the Strategic Investors.

(2) Our Managing Partners own BRH Holdings GP, Ltd., which in turn holds our only outstanding Class B share. The Class B share represents 57.94% of the total voting power of our shares entitled to vote but no economic interest in Apollo Global Management,

LLC. Our Managing Partners' economic interests are instead represented by their indirect beneficial ownership, through Holdings, of 47.79% of the limited partner interests in the Apollo Operating Group.

(3) Through BRH Holdings, L.P., our Managing Partners indirectly beneficially own through estate planning vehicles, limited partner interests in Holdings.

(4) Holdings owns 53.52% of the limited partner interests in each Apollo Operating Group entity. The AOG Units held by Holdings are exchangeable for Class A shares. Our Managing Partners, through their interests in BRH and Holdings, beneficially own 47.79% of the AOG Units. Our Contributing Partners, through their ownership interests in Holdings, beneficially own 5.73% of the AOG Units.

(5) BRH Holdings GP, Ltd. is the sole member of AGM Management, LLC, our manager. The management of Apollo Global Management, LLC is vested in our manager as provided in our operating agreement.

(6) Represents 46.48% of the limited partner interests in each Apollo Operating Group entity, held through the intermediate holding companies. Apollo Global Management, LLC, also indirectly owns 100% of the general partner interests in each Apollo Operating Group entity.

Each of the Apollo Operating Group partnerships holds interests in different businesses or entities organized in different jurisdictions.

Our structure is designed to accomplish a number of objectives, the most important of which are as follows:

- We are a holding company that is qualified as a partnership for U.S. federal income tax purposes. Our intermediate holding companies enable us to maintain our partnership status and to meet the qualifying income exception.
- We have historically used multiple management companies to segregate operations for business, financial and other reasons. Going forward, we may increase or decrease the number of our management companies or partnerships within the Apollo Operating Group based on our views regarding the appropriate balance between (a) administrative convenience and (b) continued business, financial, tax and other optimization.

Business Environment

As a global investment manager, we are affected by numerous factors, including the condition of financial markets and the economy. Price fluctuations within equity, credit, commodity, foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the valuation of our funds' portfolio companies and related income we may recognize.

In terms of equity markets, 2016 was a more positive year compared to the mixed backdrop in 2015. In the U.S., the S&P 500 Index increased 9.5% during 2016 following a slight decrease of 0.7% in 2015. Outside the U.S., global equity markets rose for the first time in three years as measured by the MSCI All Country World ex USA Index, which increased 3.6% during 2016 after falling 1.4% in 2015.

Conditions in the credit markets also have a significant impact on our business, and in 2016, many indices posted strong returns. The BofAML HY Master II Index rose 17.5% in 2016 following a decrease of 4.6% in 2015. In addition, the S&P/LSTA Leveraged Loan Index rose 10.2% in 2016 following a slight decrease of 0.7% in 2015. Benchmark interest rates finished the year on a slightly positive note as investors expect The Federal Reserve to raise short-term rates three times in 2017, after raising rates again in December. The U.S. 10-year Treasury yield rallied 85 basis points in the fourth quarter to finish the year up 18 basis points at 2.45%.

Foreign exchange rates can materially impact the valuations of our investments that are denominated in currencies other than the U.S. dollar. Relative to the U.S. dollar, the Euro depreciated 3.2% in 2016 after depreciating 10.2% in 2015, while the British pound depreciated 16.3% in 2016 largely due to the Brexit referendum, after depreciating 5.4% in 2015. Commodities generally saw price increases in both the fourth quarter and full year ended December 31, 2016. The price of crude oil appreciated by 11.4% during the fourth quarter and 45.0% for the full year.

In terms of economic conditions in the U.S., the Bureau of Economic Analysis reported real GDP increased at an annual rate of 1.6% in 2016, lower than the 2.6% growth experienced in 2015, primarily due to a decrease in investments and government spending. As of January 2017, The International Monetary Fund estimated that the U.S. economy will expand by 2.3% in 2017. Additionally, the U.S. unemployment rate continued to decline in 2016, ending the year at 4.7%, a decrease from 5.0% at the end of 2015.

Regardless of the market or economic environment at any given time, Apollo relies on its contrarian, value-oriented approach to consistently invest capital on behalf of its fund investors by focusing on opportunities that management believes are

often overlooked by other investors. As such, Apollo's global integrated investment platform deployed $3.5 billion and $15.9 billion of capital through the funds it manages during the fourth quarter of 2016 and full year ended December 31, 2016, respectively. This represented the highest level of capital deployment activity in a calendar period to date. We believe Apollo's expertise in credit and its focus on nine core industry sectors, combined with 26 years of investment experience, has allowed Apollo to respond quickly to changing environments. Apollo's core industry sectors include chemicals, manufacturing and industrial, natural resources, consumer and retail, consumer services, business services, financial services, leisure, and media and telecom and technology. Apollo believes that these attributes have contributed to the success of its private equity funds investing in buyouts and credit opportunities during both expansionary and recessionary economic periods.

In general, institutional investors continue to allocate capital towards alternative investment managers for more attractive risk-adjusted returns in a low interest rate environment, and we believe the business environment remains generally accommodative to launch new products and pursue attractive strategic growth opportunities. As such, Apollo had $6.6 billion and $34.8 billion of capital inflows during the fourth quarter of 2016 and full year ended December 31, 2016, respectively. While Apollo continues to attract capital inflows, it also continues to generate realizations for fund investors. Apollo returned $1.7 billion and $5.4 billion of capital and realized gains to the investors in the funds it manages during the fourth quarter of 2016 full year ended December 31, 2016, respectively.

Managing Business Performance

We believe that the presentation of Economic Income, or EI, supplements a reader's understanding of the economic operating performance of each of our segments.

Economic Income

EI has certain limitations in that it does not take into account certain items included under U.S. GAAP. EI represents segment income before income tax provision excluding transaction-related charges arising from the 2007 private placement and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions. In addition, segment data excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements from unconsolidated related parties, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements. We believe the exclusion of the non-cash charges related to the 2007 Reorganization for equity-based compensation provides investors with a meaningful indication of our performance because these charges relate to the equity portion of our capital structure and not our core operating performance.

Economic Net Income represents EI adjusted to reflect income tax provision on EI that has been calculated assuming that all income is allocated to Apollo Global Management, LLC, which would occur following an exchange of all AOG Units for Class A shares of Apollo Global Management, LLC. The economic assumptions and methodologies that impact the implied income tax provision are similar to those methodologies and certain assumptions used in calculating the income tax provision for Apollo's consolidated statements of operations under U.S. GAAP.

We believe that EI is helpful for an understanding of our business and that investors should review the same supplemental financial measure that management uses to analyze our segment performance. This measure supplements and should be considered in addition to and not in lieu of the results of operations discussed below in "—Overview of Results of Operations" that have been prepared in accordance with U.S. GAAP. See note 16 to the consolidated financial statements for more details regarding management's consideration of EI.

EI may not be comparable to similarly titled measures used by other companies and is not a measure of performance calculated in accordance with U.S. GAAP. We use EI as a measure of operating performance, not as a measure of liquidity. EI should not be considered in isolation or as a substitute for net income or other income data prepared in accordance with U.S. GAAP. The use of EI without consideration of related U.S. GAAP measures is not adequate due to the adjustments described above. Management compensates for these limitations by using EI as a supplemental measure to U.S. GAAP results, to provide a more complete understanding of our performance as management measures it. A reconciliation of EI to its most directly comparable U.S. GAAP measure of income before income tax provision can be found in the notes to our consolidated financial statements.

Economic Income for the years ended December 31, 2015 and 2014 includes a recast of salary, bonus and benefits due to management's change in allocation methodology among the segments during the year ended December 31, 2016. All prior periods have been recast to conform to the current presentation. The impact to the combined segments total Economic Income for all periods presented was zero. The impact of this change to EI for each segment for the years ended December 31, 2015 and 2014 is reflected in note 16 to the consolidated financial statements.

Fee Related Earnings

Fee Related Earnings ("FRE") is derived from our segment reported results and refers to a component of EI that is used as a supplemental measure to assess whether revenues that we believe are generally more stable and predictable in nature, primarily consisting of management fees, are sufficient to cover associated operating expenses and generate profits. FRE is the sum across all segments of (i) management fees, (ii) advisory and transaction fees, (iii) carried interest income earned from a publicly traded business development company we manage and (iv) other income, net excluding gains (losses) arising from the reversal of a portion of the tax receivable agreement liability, less (y) salary, bonus and benefits, excluding equity-based compensation and (z) other associated operating expenses.

Distributable Earnings

Distributable Earnings ("DE"), as well as DE After Taxes and Related Payables are derived from our segment reported results, and are supplemental non-U.S. GAAP measures to assess performance and the amount of earnings available for distribution to Class A shareholders, holders of RSUs that participate in distributions and holders of AOG Units. DE represents the amount of net realized earnings without the effects of the consolidation of any of the related funds. DE, which is a component of EI, is the sum across all segments of (i) total management fees and advisory and transaction fees, excluding monitoring fees received from Athene based on its capital and surplus (as defined in Apollo's transaction advisory services agreement with Athene), (ii) other income (loss), excluding the gains (losses) arising from the reversal of a portion of the tax receivable agreement liability (iii) realized carried interest income, and (iv) realized investment income, less (x) compensation expense, excluding the expense related to equity-based awards, (y) realized profit sharing expense, and (z) non-compensation expenses, excluding depreciation and amortization expense. DE After Taxes and Related Payables represents DE less estimated current corporate, local and non-U.S. taxes as well as the payable under Apollo's tax receivable agreement. A reconciliation of DE and EI to their most directly comparable U.S. GAAP measure of income before income tax provision can be found in "—Summary of Non-U.S. GAAP Measures".

Fee Related EBITDA

Fee related EBITDA is a non-U.S. GAAP measure derived from our segment reported results and is used to assess the performance of our operations as well as our ability to service current and future borrowings. Fee related EBITDA represents FRE plus amounts for depreciation and amortization. "Fee related EBITDA +100% of net realized carried interest" represents fee-related EBITDA plus realized carried interest less realized profit sharing.

We use FRE, DE and Fee related EBITDA as measures of operating performance, not as measures of liquidity. These measures should not be considered in isolation or as a substitute for net income or other income data prepared in accordance with U.S. GAAP. The use of these measures without consideration of their related U.S. GAAP measures is not adequate due to the adjustments described above.

Operating Metrics

We monitor certain operating metrics that are common to the alternative investment management industry. These operating metrics include Assets Under Management, capital deployed and uncalled commitments.

Assets Under Management

The tables below present Fee-Generating and Non-Fee-Generating AUM by segment as of December 31, 2016 and 2015:

	As of December 31, 2016				As of December 31, 2015			
	Private Equity	**Credit**	**Real Estate**	**Total**	**Private Equity**	**Credit**	**Real Estate**	**Total**
	(in millions)				(in millions)			
Fee-Generating AUM	$ 30,722	$ 111,781	$ 8,295	$ 150,798	$ 29,258	$ 101,522	$ 7,317	$ 138,097
Non-Fee-Generating AUM	12,906	24,826	3,158	40,890	8,244	19,839	3,943	32,026
Total AUM	$ 43,628	$ 136,607	$ 11,453	$ 191,688	$ 37,502	$ 121,361	$ 11,260	$ 170,123

The table below presents AUM with Future Management Fee Potential, which is a component of Non-Fee-Generating AUM, for each of Apollo's three segments as of December 31, 2016 and 2015.

	As of December 31, 2016	As of December 31, 2015
	(in millions)	
Private Equity	$ 1,977	$ 2,093
Credit	6,533	5,763
Real Estate	639	986
Total AUM with Future Management Fee Potential	$ 9,149	$ 8,842

The following tables present the components of Carry-Eligible AUM for each of Apollo's three segments as of December 31, 2016 and 2015:

	As of December 31, 2016				As of December 31, 2015			
	Private Equity	Credit	Real Estate	Total	Private Equity	Credit	Real Estate	Total
	(in millions)				(in millions)			
Carry-Generating AUM	$ 21,521	$ 33,306	$ 776	$ 55,603	$ 9,461	$ 16,923	$ 516	$ 26,900
AUM Not Currently Generating Carry	487	7,219	365	8,071	6,793	21,583	865	29,241
Uninvested Carry-Eligible AUM	13,136	11,119	976	25,231	16,528	8,701	1,059	26,288
Total Carry-Eligible AUM	$ 35,144	$ 51,644	$ 2,117	$ 88,905	$ 32,782	$ 47,207	$ 2,440	$ 82,429

The following table presents AUM Not Currently Generating Carry for funds that have commenced investing capital for more than 24 months as of December 31, 2016 and the corresponding appreciation required to reach the preferred return or high watermark in order to generate carried interest:

Category / Fund	Invested AUM Not Currently Generating Carry	Investment Period Active > 24 Months	Appreciation Required to Achieve Carry[1]
	(in millions)		
Private Equity:			
Total Private Equity	$ 487	$ 342	32%
Credit:			
Drawdown	3,752	3,738	30%
Liquid/Performing	3,467	1,935	< 250bps
		—	250-500bps
		813	> 500bps
Total Credit	7,219	6,486	20%
Real Estate:			
Total Real Estate	365	294	> 500bps
Total	$ 8,071	$ 7,122	

(1) All investors in a given fund are considered in aggregate when calculating the appreciation required to achieve carry presented above. Appreciation required to achieve carry may vary by individual investor.

The components of Fee-Generating AUM by segment as of December 31, 2016 and 2015 are presented below:

	As of December 31, 2016			
	Private Equity	Credit	Real Estate	Total
	(in millions)			
Fee-Generating AUM based on capital commitments	$ 21,782	$ 8,072	$ 724	$ 30,578
Fee-Generating AUM based on invested capital	8,058	4,212	4,374	16,644
Fee-Generating AUM based on gross/adjusted assets	882	88,196	3,131	92,209
Fee-Generating AUM based on NAV	—	11,301	66	11,367
Total Fee-Generating AUM	$ 30,722 (1)	$ 111,781	$ 8,295	$ 150,798

(1) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at December 31, 2016 was 66 months.

	As of December 31, 2015			
	Private Equity	Credit	Real Estate	Total
	(in millions)			
Fee-Generating AUM based on capital commitments	$ 20,315	$ 5,787	$ 376	$ 26,478
Fee-Generating AUM based on invested capital	8,094	3,860	4,180	16,134
Fee-Generating AUM based on gross/adjusted assets	506	83,728	2,671	86,905
Fee-Generating AUM based on NAV	343	8,147	90	8,580
Total Fee-Generating AUM	$ 29,258 (1)	$ 101,522	$ 7,317	$ 138,097

(1) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at December 31, 2015 was 73 months.

The following table presents total AUM and Fee-Generating AUM amounts for our private equity segment:

	Total AUM		Fee-Generating AUM	
	As of December 31,		As of December 31,	
	2016	2015	2016	2015
	(in millions)			
Traditional Private Equity Funds	$ 30,490	$ 30,665	$ 24,457	$ 24,826
Natural Resources	5,223	2,909	4,181	2,436
Other[1]	7,915	3,928	2,084	1,996
Total	$ 43,628	$ 37,502	$ 30,722	$ 29,258

(1) Includes co-investments contributed to Athene by AAA through its investment in AAA Investments as discussed in note 14 of the consolidated financial statements.

The following table presents total AUM and Fee-Generating AUM amounts for our credit segment by category type:

	Total AUM		Fee-Generating AUM	
	As of December 31,		As of December 31,	
	2016	2015	2016	2015
	(in millions)			
Liquid/Performing	$ 35,684	$ 37,242	$ 31,562	$ 30,603
Drawdown	23,852	19,112	13,645	11,130
Permanent capital vehicles ex Athene Non-Sub-Advised[1]	12,330	15,058	11,460	9,840
Athene Non-Sub-Advised[1]	55,114	49,949	55,114	49,949
Advisory[2]	9,627	—	—	—
Total	$ 136,607	$ 121,361	$ 111,781	$ 101,522

(1) Athene Non-Sub-Advised reflects total Athene-related AUM of $70.8 billion less $15.7 billion of assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo. Athene Non-Sub-Advised includes $4.4 billion of Athene AUM for which AAME provides investment advisory services.

(2) Advisory refers to certain assets advised by AAME.

The following table presents the Athene assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo:

	Total AUM	
	As of December 31,	
	2016	2015
	(in millions)	
Private Equity	$ 1,099	$ 956
Credit

End of Period	$ 43,628	$ 136,607	$ 11,453	$ 191,688	$ 37,502	$ 121,361	$ 11,260	$ 170,123

(1) At the individual segment level, inflows include new subscriptions, commitments, capital raised, other increases in available capital, purchases, acquisitions and portfolio company appreciation. Outflows represent redemptions, other decreases in available capital and portfolio company depreciation. Realizations represent fund distributions of realized proceeds. Market activity represents gains (losses), the impact of foreign exchange rate fluctuations and other income.

(2) Outflows for Total AUM include redemptions of $1,832.1 million and $626.8 million during the years ended December 31, 2016 and 2015, respectively.

(3) Includes foreign exchange impacts of $(102.5) million, $(911.0) million and $(160.4) million for private equity, credit and real estate, respectively, during the year ended December 31, 2016.

(4) Includes foreign exchange impacts of $(162.4) million, $(403.7) million and $(136.1) million for private equity, credit and real estate, respectively, during the year ended December 31, 2015.

Assets Under Management

Total AUM was $191.7 billion at December 31, 2016, an increase of $21.6 billion, or 12.7%, compared to $170.1 billion at December 31, 2015. The net increase was primarily due to:

Net flows of $21.7 billion primarily related to:
- a $14.8 billion increase related to funds we manage in the credit segment primarily consisting of advisory mandates related to AAME of $9.3 billion, subscriptions of $8.1 billion, a net increase in AUM relating to Athene of $6.1 billion and originations at MidCap of $1.5 billion, offset by a decrease in leverage of $6.7 billion, redemptions of $1.8 billion and net segment transfers of $1.7 billion;
- a $4.6 billion increase related to funds we manage in the private equity segment consisting of subscriptions attributable to co-investments for Fund VIII transactions of $3.3 billion and ANRP II of $1.5 billion; and
- a $2.4 billion increase related to funds we manage in the real estate segment primarily consisting of subscriptions of $1.0 billion primarily related to AGRE Debt Fund I, L.P. ("AGRE Debt Fund I") and net segment transfers of $1.4 billion.

Market activity of $5.3 billion primarily related to $2.7 billion and $2.3 billion of appreciation in the funds we manage in the private equity and credit segments, respectively.

Offsetting these increases were:

Realizations of $5.4 billion primarily related to:
- $2.5 billion related to funds we manage in the real estate segment primarily consisting of distributions of $1.5 billion from our real estate debt funds and $1.0 billion from our real estate equity funds;
- $1.8 billion related to funds we manage in the credit segment primarily consisting of distributions of $0.9 billion and $0.6 billion in drawdown funds and liquid/performing funds, respectively; and
- $1.1 billion related to funds we manage in the private equity segment primarily consisting of distributions of $1.0 billion and $0.1 billion in our traditional private equity funds and co-investment vehicles, respectively.

Total AUM was $170.1 billion at December 31, 2015, an increase of $10.3 billion, or 6.5%, compared to $159.8 billion at December 31, 2014. The net increase was primarily due to:

Net inflows of $19.0 billion primarily related to:
- a $14.4 billion increase related to funds we manage in the credit segment primarily consisting of subscriptions of $6.0 billion, acquisitions of $7.4 billion primarily attributable to the acquisition of Delta Lloyd Deutschland by Athene Holding of $5.1 billion, and a net change in leverage of $2.0 billion;
- a $1.5 billion increase related to funds we manage in the private equity segment consisting of subscriptions of $1.9 billion, driven by subscriptions attributable to ANRP II of $1.5 billion, offset by net segment transfers of $0.2 billion and a change in leverage of $0.3 billion; and
- a $3.1 billion increase related to funds we manage in the real estate segment primarily consisting of subscriptions of $1.2 billion, net segment transfers of $1.0 billion and a change in leverage of $0.4 billion.

Offsetting these increases were:

Realizations of $8.5 billion primarily related to:
- $4.7 billion related to funds we manage in the private equity segment primarily consisting of distributions of $4.1 billion attributable to certain traditional private equity funds;
- $2.2 billion related to funds we manage in the credit segment primarily consisting of distributions of $1.1 billion and $0.8 billion in liquid/performing and drawdown funds, respectively; and
- $1.7 billion related to funds we manage in the real estate segment primarily consisting of distributions of $0.9 billion from our real estate debt funds and $0.3 billion related to the CPI funds.

Market activity of $0.2 billion related to:
- $0.6 billion of depreciation in the funds we manage in the private equity segment;
- $0.3 billion of appreciation in the funds we manage in the real estate segment; and
- $0.2 billion of appreciation in the funds we manage in the credit segment.

The following tables summarize changes in Fee-Generating AUM for each of Apollo's three segments for the years ended December 31, 2016 and 2015:

	For the Years Ended December 31,							
	2016				2015			
	Private Equity	Credit	Real Estate	Total	Private Equity	Credit	Real Estate	Total
	(in millions)							
Change in Fee-Generating AUM[1]:								
Beginning of Period	$ 29,258	$ 101,522	$ 7,317	$ 138,097	$ 30,285	$ 92,192	$ 6,237	$ 128,714
Inflows	2,298	18,327	2,609	23,234	2,610	14,702	2,639	19,951
Outflows[2]	(416)	(8,013)	(51)	(8,480)	(794)	(4,328)	(249)	(5,371)
Net Flows	1,882	10,314	2,558	14,754	1,816	10,374	2,390	14,580
Realizations	(404)	(1,071)	(1,611)	(3,086)	(2,839)	(1,664)	(1,328)	(5,831)
Market Activity[3]	(14)	1,016	31	1,033	(4)	620	18	634
End of Period	$ 30,722	$ 111,781	$ 8,295	$ 150,798	$ 29,258	$ 101,522	$ 7,317	$ 138,097

(1) At the individual segment level, inflows include new subscriptions, commitments, capital raised, other increases in available capital, purchases, acquisitions and portfolio company appreciation. Outflows represent redemptions, other decreases in available capital and portfolio company depreciation. Realizations represent fund distributions of realized proceeds. Market activity represents gains (losses), the impact of foreign exchange rate fluctuations and other income.

(2) Outflows for Fee-Generating AUM include redemptions of $1,497.6 million and $594.6 million during the years ended December 31, 2016 and 2015, respectively.

(3) Includes foreign exchange impacts of $(407.2) million and $(48.7) million for credit and real estate, respectively, during the year ended December 31, 2016, and foreign exchange impacts of $(324.2) million and $(71.6) million for credit and real estate, respectively, during the year ended December 31, 2015.

Total Fee-Generating AUM was $150.8 billion at December 31, 2016, an increase of $12.7 billion or 9.2%, compared to $138.1 billion at December 31, 2015. The net increase was primarily due to:

Net flows of $14.8 billion primarily related to:

- a $10.3 billion increase related to funds we manage in the credit segment primarily consisting of a net increase in AUM relating to Athene Holding of $6.1 billion, subscriptions of $5.2 billion, an increase in capital deployment of $2.4 billion, and $1.5 billion in originations at MidCap. This was partially offset by a decrease in leverage of $2.1 billion, redemptions of $1.5 billion and net segment transfers of $1.4 billion; and
- a $2.6 billion increase related to funds we manage in the real estate segment primarily consisting of net segment transfers of $1.5 billion and subscriptions of $0.6 billion; and
- a $1.9 billion increase related to funds we manage in the private equity segment primarily consisting of subscriptions attributable to ANRP II of $1.4 billion.

Market activity of $1.0 billion primarily related to appreciation in the funds we manage in the credit segment.

Offsetting these increases were:

Realizations of $3.1 billion primarily related to:

- $1.6 billion related to funds we manage in the real estate segment primarily driven by distributions of $1.2 billion from our real estate debt funds and $0.4 billion from our real estate equity funds; and
- $1.1 billion related to funds we manage in the credit segment primarily driven by certain of our liquid/performing funds, including returns to CLO investors, and distributions of $0.3 billion from permanent capital vehicles.

Total Fee-Generating AUM was $138.1 billion at December 31, 2015, an increase of $9.4 billion or 7.3%, compared to $128.7 billion at December 31, 2014. The net increase was primarily due to:

Net inflows of $14.6 billion primarily related to:

- a $10.4 billion increase related to funds we manage in the credit segment primarily consisting of fee-generating capital deployment of $5.1 billion, an increase of $5.1 billion attributable to the acquisition of Delta Lloyd Deutschland by Athene Holding and subscriptions of $1.7 billion. This was partially offset by $0.6 billion of redemptions and $1.1 billion of net segment transfers;

- a $1.8 billion increase related to funds we manage in the private equity segment consisting of $1.4 billion of subscriptions attributable to ANRP II and $0.5 billion of fee-generating capital deployment. Offsetting these increases was a change in leverage of $0.1 billion; and
- a $2.4 billion increase related to funds we manage in the real estate segment consisting of $1.1 billion of fee-generating capital commitments from the Athene Accounts, $0.6 billion of acquisitions and $0.3 billion of subscriptions.

Market activity of $0.6 billion primarily related to appreciation in the funds we manage in the credit segment.

Offsetting these increases were:

Realizations of $5.8 billion primarily related to:

- $2.8 billion related to funds we manage in the private equity segment primarily driven by distributions of $2.6 billion from certain traditional private equity funds;
- $1.7 billion related to funds we manage in the credit segment primarily driven by certain of our liquid/performing funds, including returns to CLO investors, and distributions of $0.3 billion from permanent capital vehicles; and
- $1.3 billion related to funds we manage in the real estate segment primarily driven by distributions in the CPI funds and Athene Accounts of $0.3 billion and $0.4 billion, respectively.

Capital Deployed and Uncalled Commitments

Capital deployed is the aggregate amount of capital that has been invested during a given period by our drawdown funds, SIAs that have a defined maturity date and funds and SIAs in our real estate debt strategy. Uncalled commitments, by contrast, represents unfunded capital commitments that certain of Apollo's funds and SIAs have received from fund investors to fund future or current fund investments and expenses.

Capital deployed and uncalled commitments are indicative of the pace and magnitude of fund capital that is deployed or will be deployed, and which therefore could result in future revenues that include management fees, transaction fees and incentive income to the extent they are fee-generating. Capital deployed and uncalled commitments can also give rise to future costs that are related to the hiring of additional resources to manage and account for the additional capital that is deployed or will be deployed. Management uses capital deployed and uncalled commitments as key operating metrics since we believe the results measure our fund's investment activities.

Capital Deployed

The following table summarizes by segment the capital deployed for funds and SIAs with a defined maturity date and certain funds and SIAs in Apollo's real estate debt strategy during the specified reporting periods:

	For the Years Ended December 31,		
	2016	2015	2014
	(in millions)		
Private Equity	$ 9,582	$ 5,144	$ 2,163
Credit	3,713	5,531	5,174
Real Estate[1]	2,638	2,458	2,686
Total capital deployed	$ 15,933	$ 13,133	$ 10,023

(1) Included in capital deployed is $2,467 million, $2,140 million, and $2,320 million for the years ended December 31, 2016, 2015 and 2014, respectively, related to funds in Apollo's real estate debt strategy.

Uncalled Commitments

The following table summarizes the uncalled commitments by segment during the specified reporting periods:

	As of December 31,	
	2016	2015
	(in millions)	
Private Equity	$ 16,079	$ 19,487
Credit	11,816	8,557
Real Estate	1,414	984
Total uncalled commitments[1]	$ 29,309	$ 29,028

(1) As of December 31, 2016 and December 31, 2015, $25.9 billion and $26.1 billion, respectively, represented the amount of capital available for investment or reinvestment subject to the provisions of the applicable limited partnership agreements or other governing agreements of our funds.

The Historical Investment Performance of Our Funds

Below we present information relating to the historical performance of our funds, including certain legacy Apollo funds that do not have a meaningful amount of unrealized investments, and in respect of which the general partner interest has not been contributed to us.

When considering the data presented below, you should note that the historical results of our funds are not indicative of the future results that you should expect from such funds, from any future funds we may raise or from your investment in our Class A shares.

An investment in our Class A shares is not an investment in any of the Apollo funds, and the assets and revenues of our funds are not directly available to us. The historical and potential future returns of the funds we manage are not directly linked to returns on our Class A shares. Therefore, you should not conclude that continued positive performance of the funds we manage will necessarily result in positive returns on an investment in our Class A shares. However, poor performance of the funds that we manage would cause a decline in our revenue from such funds, and would therefore have a negative effect on our performance and in all likelihood the value of our Class A shares.

Moreover, the historical returns of our funds should not be considered indicative of the future results you should expect from such funds or from any future funds we may raise. There can be no assurance that any Apollo fund will continue to achieve the same results in the future.

Finally, our private equity IRRs have historically varied greatly from fund to fund. For example, Fund IV generated a 12% gross IRR and a 9% net IRR since its inception through December 31, 2016, while Fund V generated a 61% gross IRR and a 44% net IRR since its inception through December 31, 2016. Accordingly, the IRR going forward for any current or future fund may vary considerably from the historical IRR generated by any particular fund, or for our private equity funds as a whole. Future returns will also be affected by the applicable risks, including risks of the industries and businesses in which a particular fund invests. See “Item 1A. Risk Factors—Risks Related to Our Businesses—The historical returns attributable to our funds should not be considered as indicative of the future results of our funds or of our future results or of any returns expected on an investment in our Class A shares.”

Table of Contents

Investment Record

The following table summarizes the investment record by segment of Apollo’s significant drawdown funds and SIAs that have a defined maturity date in which investors make a commitment to provide capital at the formation of such funds and deliver capital when called as investment opportunities become available. The funds included in the investment record table below have greater than $500 million of AUM and/or form part of a flagship series of funds. The SIAs included in the investment record table below have greater than $200 million of AUM and did not predominantly invest in other Apollo funds or SIAs.

All amounts are as of December 31, 2016, unless otherwise noted:

(1) Refer to the definitions of Vintage Year, Total Invested Capital, Realized Value, Remaining Cost, Unrealized Value, Total Value, Gross IRR and Net IRR described elsewhere in this report.

(2) Returns have not been presented as the fund commenced investing capital less than 24 months prior to the period indicated and therefore such return information was deemed not meaningful.

(3) The general partners and managers of Funds I, II and MIA, as well as the general partner of Fund III, were excluded assets in connection with the 2007 Reorganization. As a result, Apollo did not receive the economics associated with these entities. The investment performance of these funds, combined with Fund IV, is presented to illustrate fund performance associated with Apollo’s Managing Partners and other investment professionals.

(4) Total IRR is calculated based on total cash flows for all funds presented.

(5) Funds are denominated in Euros and historical figures are translated into U.S. dollars at an exchange rate of €1.00 to $1.05 as of December 31, 2016.

(6) Amounts presented have been aggregated for (i) drawdown funds with AUM greater than $500 million that do not form part of a flagship series of funds and (ii) SIAs with AUM greater than $200 million that do not predominantly invest in other Apollo funds or SIAs. Certain SIAs’ historical figures are denominated in Euros and translated into U.S. dollars at an exchange rate of €1.00 to $1.05 as of December 31, 2016. Additionally, certain SIAs totaling $1.8 billion of AUM have been excluded from Total Invested Capital, Realized Value, Remaining Cost, Unrealized Value and Total Value. These SIAs have an open ended life and a significant turnover in their portfolio assets due to the ability to recycle capital. These SIAs had $9.1 billion of Total Invested Capital through December 31, 2016.

(7) U.S. RE Fund I and U.S. RE Fund II had $150 million and $178 million of co-investment commitments as of December 31, 2016, respectively, which are included in the figures in the table. A co-invest entity within U.S. RE Fund I is denominated in GBP and translated into U.S. dollars at an exchange rate of £1.00 to $1.23 as of December 31, 2016.

(8) As part of the acquisition of Citi Property Investors (“CPI”), Apollo acquired general partner interests in fully invested funds. CPI Funds refers to CPI Capital Partners North America, CPI Capital Partners Asia Pacific, CPI Capital Partners Europe and other CPI funds or individual investments of which Apollo is not the general partner or manager and only receives fees pursuant to either a sub-advisory agreement or an investment management and administrative agreement. For CPI Capital Partners North America, CPI Capital Partners Asia Pacific and CPI Capital Partners Europe, the gross and net IRRs are presented in the investment record table since acquisition on November 12, 2010. The aggregate net IRR for these funds from their inception to December 31, 2016 was (1)%. This net IRR was primarily achieved during a period in which Apollo did not make the initial investment decisions and Apollo only became the general partner or manager of these funds upon completing the acquisition on November 12, 2010.

(9) Certain private equity co-investment vehicles and funds with AUM less than $500 million have been excluded. These co-investment vehicles and funds had $7.2 billion of aggregate AUM as of December 31, 2016.

(10) Certain credit funds and SIAs with AUM less than $500 million and $200 million, respectively, have been excluded. These funds and SIAs had $4.8 billion of aggregate AUM as of December 31, 2016.

(11) Certain accounts owned by or related to Athene, certain co-investment vehicles and certain funds with AUM less than $500 million have been excluded. These accounts, co-investment vehicles and funds had $4.8 billion of aggregate AUM as of December 31, 2016.

(12) Remaining cost for certain of our credit funds may include physical cash called, invested or reserved for certain levered investments.

(13) The investor in this U.S. Dollar denominated fund have chosen to make contributions and receive distributions in the local currency of each underlying investment. As a result, Apollo has not entered into foreign currency hedges for this fund and the returns presented include the impact of foreign currency gains or losses. The investor’s gross and net IRR, before the impact of foreign currency gains or losses, from the fund’s inception to December 31, 2016 was 10% and 9%, respectively.

Private Equity

The following table summarizes the investment record for distressed investments made in our traditional private equity fund portfolios, since the Company’s inception. All amounts are as of December 31, 2016:

	Total Invested Capital	Total Value	Gross IRR
	(in millions)		
Distressed for Control	$ 7,795	$ 18,535	29%
Non-Control Distressed	5,490	8,475	71
Total	13,285	27,010	49
Corporate Carve-outs, Opportunistic Buyouts and Other Credit[(1)]	39,167	69,754	22
Total	$ 52,452	$ 96,764	39%

(1) Other Credit is defined as investments in debt securities of issuers other than portfolio companies that are not considered to be distressed.

The following tables provide additional detail on the composition of the Fund VIII, Fund VII, Fund VI and Fund V private equity portfolios based on investment strategy. Amounts for Fund I, II, III and IV are included in the table above but not presented below as their remaining value is less than $100 million or the fund has been liquidated. All amounts are as of December 31, 2016:

Fund VIII[1]

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 2,318	$ 3,410
Opportunistic Buyouts	7,200	8,429
Distressed	499	684
Total	$ 10,017	$ 12,523

Fund VII[1]

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 2,159	$ 4,530
Opportunistic Buyouts	4,291	10,424
Distressed/Other Credit[2]	9,583	18,368
Total	$ 16,033	$ 33,322

Fund VI

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 3,397	$ 5,808
Opportunistic Buyouts	6,374	9,958
Distressed/Other Credit[2]	2,686	4,962
Total	$ 12,457	$ 20,728

Fund V

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 1,605	$ 4,947
Opportunistic Buyouts	2,165	5,333
Distressed	1,422	2,497
Total	$ 5,192	$ 12,777

(1) Committed capital less unfunded capital commitments for Fund VIII and Fund VII was $10.0 billion and $13.9 billion, respectively, which represents capital commitments from limited partners to invest in such funds less capital that is available for investment or reinvestment subject to the provisions of the applicable limited partnership agreement or other governing agreements.

(2) The distressed investment strategy includes distressed for control, non-control distressed and other credit.

During the recovery and expansionary periods of 1994 through 2000 and late 2003 through the first half of 2007, our private equity funds invested or committed to invest approximately $13.7 billion primarily in traditional and corporate partner buyouts. During the recessionary periods of 1990 through 1993, 2001 through late 2003 and the recessionary and post recessionary periods (beginning the second half of 2007 through December 31, 2016), our private equity funds have invested $42.4 billion, of which $18.8 billion was in distressed buyouts and debt investments when the debt securities of quality companies traded at deep discounts to par value. Our average entry multiple for Fund VIII, VII, VI and V was 5.5x, 6.1x, 7.7x and 6.6x, respectively, as of December 31, 2016. Our average entry multiple for a private equity fund is the average of the total enterprise value over an applicable adjusted earnings before interest, taxes, depreciation and amortization which may incorporate certain adjustments based

on the investment team's estimate and we believe captures the true economics of our funds' investments in portfolio companies. The average entry multiple of actively investing funds may include committed investments not yet closed.

Credit

The following table presents the AUM and gross and net returns information for Apollo's credit segment by category type:

	As of December 31, 2016				Gross Returns	Net Returns
Category	**AUM**	**Fee-Generating AUM**	**Carry-Eligible AUM**	**Carry-Generating AUM**	**For the Year Ended December 31, 2016[1]**	**For the Year Ended December 31, 2016[1]**
	(in millions)					
Liquid/Performing	$ 35,684	$ 31,562	$ 19,841	$ 15,524	9.6%	9.0%
Drawdown[2]	23,852	13,645	21,819	8,284	16.5	14.1
Permanent capital vehicles ex Athene Non-Sub-Advised[3]	12,330	11,460	9,984	9,498	9.6	5.9
Athene Non-Sub-Advised[3]	55,114	55,114	—	—	N/A	N/A
Advisory[4]	9,627	—	—	—	N/A	N/A
Total Credit	$ 136,607	$ 111,781	$ 51,644	$ 33,306	11.2%	9.9%

(1) The gross and net returns for the year ended December 31, 2016 for total credit excludes assets managed by AAM that are not directly invested in Apollo funds and investment vehicles or sub-advised by Apollo.
(2) As of December 31, 2016, significant drawdown funds and SIAs had inception-to-date gross and net IRRs of 16.3% and 12.6%, respectively. Significant drawdown funds and SIAs include funds and SIAs with AUM greater than $200 million that do not predominantly invest in other Apollo funds or SIAs.
(3) Athene Non-Sub-Advised reflects total Athene-related AUM of $70.8 billion less $15.7 billion of assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo. Athene Non-Sub-Advised includes $4.4 billion of Athene AUM for which AAME provides investment advisory services.
(4) Advisory refers to certain assets advised by AAME.

Liquid/Performing

The following table summarizes the investment record for funds in the liquid/performing category within Apollo's credit segment. The significant funds included in the investment record table below have greater than $200 million of AUM and do not predominantly invest in other Apollo funds or SIAs.

		Total AUM	Net Returns	
	Vintage Year	**As of December 31, 2016**	**For the Year Ended December 31, 2016**	**For the Year Ended December 31, 2015**
Credit:		(in millions)		
Hedge Funds[1]	Various	$ 6,035	11%	—%
CLOs[2]	Various	12,208	9	2
SIAs / Other	Various	17,441	9	1
Total		$ 35,684		

(1) Hedge Funds primarily includes Apollo Credit Strategies Master Fund Ltd., Apollo Credit Master Fund Ltd. and Apollo Credit Short Opportunities Fund.
(2) CLO returns are calculated based on gross return on invested assets, which excludes cash.

Permanent Capital

The following table summarizes the investment record for our permanent capital vehicles by segment, excluding Athene-related assets managed or advised by Athene Asset Management and AAME:

		Total AUM	Total Returns [1]	
	IPO Year[2]	As of December 31, 2016	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Credit:		(in millions)		
MidCap[3]	N/A	$ 7,181	NM [4]	NM [4]
AIF	2013	386	23 %	(4) %
AFT	2011	431	24	(2)
AINV[5]	2004	4,386	26	(20)
Real Estate:				
ARI[6]	2009	3,434	8 %	17 %
Total		$ 15,818		

(1) Total returns are based on the change in closing trading prices during the respective periods presented taking into account dividends and distributions, if any, as if they were reinvested without regard to commission.

(2) An IPO year represents the year in which the vehicle commenced trading on a national securities exchange.

(3) MidCap is not a publicly traded vehicle and therefore IPO year is not applicable.

(4) Returns have not been presented as the permanent capital vehicle commenced investing capital less than 24 months prior to the period indicated and therefore such return information was deemed not meaningful.

(5) All amounts are as of September 30, 2016, except for total returns. Refer to www.apolloic.com for the most recent financial information on AINV. The information contained on AINV's website is not part of this report. Includes $1.5 billion of AUM related to a non-traded business development company sub-advised by Apollo. Total returns exclude performance of the non-traded business development company.

(6) Amounts are as of September 30, 2016. Refer to www.apolloreit.com for the most recent financial information on ARI. The information contained on ARI's website is not part of this presentation.

Athene and SIAs

As of December 31, 2016, Apollo managed or advised $70.8 billion of total AUM in accounts owned by or related to Athene, of which approximately $15.7 billion was either sub-advised by Apollo or invested in Apollo funds and investment vehicles managed by Apollo. Of the approximately $15.7 billion of AUM, the vast majority were in sub-advisory managed accounts that manage high grade credit asset classes, such as CLO debt, commercial mortgage backed securities, and insurance-linked securities.

As of December 31, 2016, Apollo managed approximately $20 billion of total AUM in SIAs, which include certain SIAs in the investment record tables above and capital deployed from certain SIAs across Apollo's private equity, credit and real estate funds.

Overview of Results of Operations

Revenues

Advisory and Transaction Fees from Related Parties, Net. As a result of providing advisory services with respect to actual and potential private equity, credit, and real estate investments, we are entitled to receive fees for transactions related to the acquisition and, in certain instances, disposition of portfolio companies as well as fees for ongoing monitoring of portfolio company operations and directors' fees. We also receive advisory fees for advisory services provided to certain credit funds. In addition, monitoring fees are generated on certain structured portfolio company investments. Under the terms of the limited partnership agreements for certain funds, the management fee payable by the funds may be subject to a reduction based on a certain percentage of such advisory and transaction fees, net of applicable broken deal costs ("Management Fee Offset"). Such amounts are presented as a reduction to advisory and transaction fees from related parties, net, in the consolidated statements of operations. See note 2 to our consolidated financial statements for more detail on advisory and transaction fees from related parties, net.

The Management Fee Offsets are calculated for each fund as follows:

- 65%-100% for private equity funds, gross advisory, transaction and other special fees;
- 65%-100% for certain credit funds, gross advisory, transaction and other special fees; and

- 100% for certain real estate funds, gross advisory, transaction and other special fees.

Management Fees from Related Parties. The significant growth of the assets we manage has had a positive effect on our revenues. Management fees are typically calculated based upon any of "net asset value," "gross assets," "adjusted par asset value," "adjusted costs of all unrealized portfolio investments," "capital commitments," "invested capital," "adjusted assets," "capital contributions," or "stockholders' equity," each as defined in the applicable limited partnership agreement and/or management agreement of the unconsolidated funds.

Carried Interest Income from Related Parties. The general partners of our funds, in general, are entitled to an incentive return that can normally amount to as much as 20% of the total returns on fund capital, depending upon performance of the underlying funds and subject to preferred returns and high water marks, as applicable. The carried interest income from related parties is recognized in accordance with U.S. GAAP guidance applicable to accounting for arrangement fees based on a formula. In applying the U.S. GAAP guidance, the carried interest from related parties for any period is based upon an assumed liquidation of the funds' assets at the reporting date, and distribution of the net proceeds in accordance with the funds' allocation provisions.

As of December 31, 2016, approximately 55% of the value of our funds' investments on a gross basis was determined using market-based valuation methods (i.e., reliance on broker or listed exchange quotes) and the remaining 45% was determined primarily by comparable company and industry multiples or discounted cash flow models. For our private equity, credit and real estate segments, the percentage determined using market-based valuation methods as of December 31, 2016 was 21%, 73% and 45%, respectively. See "Item 1A. Risk Factors—Risks Related to Our Businesses—Our funds' performance, and our performance, may be adversely affected by the financial performance of our funds' portfolio companies and the industries in which our funds invest" for a discussion regarding certain industry-specific risks that could affect the fair value of our private equity funds' portfolio company investments.

Carried interest income fee rates can be as much as 20% for our private equity funds. In our private equity funds, the Company does not earn carried interest income until the investors in the fund have achieved cumulative investment returns on invested capital (including management fees and expenses) in excess of an 8% hurdle rate. Additionally, certain of our credit and real estate funds have various carried interest rates and hurdle rates. Certain of our credit and real estate funds allocate carried interest to the general partner in a similar manner as the private equity funds. In our private equity, certain credit and real estate funds, so long as the investors achieve their priority returns, there is a catch-up formula whereby the Company earns a priority return for a portion of the return until the Company's carried interest income equates to its incentive fee rate for that fund; thereafter, the Company participates in returns from the fund at the carried interest income rate. Carried interest income is subject to reversal to the extent that the carried interest income distributed exceeds the amount due to the general partner based on a fund's cumulative investment returns. The Company recognizes potential repayment of previously received carried interest income as a general partner obligation representing all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner obligation, however, would not become payable or realized until the end of a fund's life or as otherwise set forth in the respective limited partnership agreement of the fund.

The table below presents an analysis of Apollo's (i) carried interest receivable on an unconsolidated basis and (ii) realized and unrealized carried interest income (loss) for Apollo's combined segments as of December 31, 2016 and 2015, and for the years ended December 31, 2016, 2015 and 2014:

	As of December 31,		For the Year Ended December 31, 2016			For the Year Ended December 31, 2015			For the Year Ended December 31, 2014

(1) As of December 31, 2016, the remaining investments and escrow cash of Fund VII and Fund VI were valued at 103% and 82% of the fund's unreturned capital, respectively, which were below the required escrow ratio of 115%. As a result, these funds are required to place in escrow current and future carried interest income distributions to the general partner until the specified return ratio of 115% is met (at the time of a future distribution) or upon liquidation. As of December 31, 2016, Fund VI had $167.6 million of gross carried interest income, or $110.7 million net of profit sharing, in escrow. As of December 31, 2016, Fund VII had $58.6 million of gross carried interest income, or $32.6 million net of profit sharing, in escrow. With respect to Fund VII and Fund VI, realized carried interest income currently distributed to the general partner is limited to potential tax distributions pursuant to the fund's partnership agreement. As of December 31, 2015, the remaining investments and escrow cash of Fund VII and Fund VI were valued at 106% and 95% of the fund's unreturned capital, respectively, which were below the required escrow ratio of 115%. As a result, these funds are required to place in escrow current and future carried interest income distributions to the general partner until the specified return ratio of 115% is met (at the time of a future distribution) or upon liquidation. As of December 31, 2015, Fund VI had $167.6 million of gross carried interest income, or $110.7 million net of profit sharing, in escrow. With respect to Fund VII and Fund VI, realized carried interest income currently distributed to the general partner is limited to tax distributions pursuant to the fund's partnership agreement.

(2) As of December 31, 2016, AAA includes $229.8 million of carried interest receivable, or $149.2 million net of profit sharing, from AAA Investments, L.P., and as of December 31, 2015, AAA includes $185.5 million of carried interest receivable, or $122.6 million net of profit sharing, from AAA Investments, L.P. which Apollo may elect to receive in cash or in common shares of Athene Holding (valued at the then fair market value); and if Apollo elects to receive payment of such carried interest in cash, then common shares of Athene Holding shall be distributed to Apollo and immediately sold by Apollo to pay for such carried interest in cash.

(3) As of December 31, 2016, certain credit funds and certain private equity funds had $60.6 million and $56.0 million, respectively, in general partner obligations to return previously distributed carried interest income. The fair value gain on investments and income at the fund level needed to reverse the general partner obligations for certain credit funds and certain private equity funds was $332.4 million and $406.6 million, respectively, as of December 31, 2016. As of December 31, 2015, certain credit funds and certain private equity funds had $57.8 million and $14.2 million, respectively, in general partner obligations to return previously distributed carried interest income. The fair value gain on investments and income at the fund level needed to reverse the general partner obligations for certain credit funds and certain private equity funds was $273.4 million and $289.2 million, respectively, as of December 31, 2015.

(4) There was a corresponding profit sharing payable of $550.1 million and $295.7 million as of December 31, 2016 and December 31, 2015, respectively, including profit sharing payable related to amounts in escrow and contingent consideration obligations of $106.3 million and $79.6 million, respectively.

(5) Other includes certain SIAs.

The general partners of the private equity, credit and real estate funds listed in the table above were accruing carried interest income as of December 31, 2016. The investment manager of AINV accrues carried interest in the management company

business as it is earned. The general partners of certain of our credit funds accrue carried interest when the fair value of investments exceeds the cost basis of the individual investors' investments in the fund, including any allocable share of expenses incurred in connection with such investments, which we refer to as "high water marks." These high water marks are applied on an individual investor basis. Certain of our credit funds have investors with various high water marks, the achievement of which is subject to market conditions and investment performance.

Carried interest income from our private equity funds and certain credit and real estate funds is subject to contingent repayment by the general partner in the event of future losses to the extent that the cumulative carried interest distributed from inception to date exceeds the amount computed as due to the general partner at the final distribution. These general partner obligations, if applicable, are included in due to related parties on the consolidated statements of financial condition. As of December 31, 2016 and 2015, there was $116.6 million and $72.0 million, respectively, of such general partner obligations related to our funds. Carried interest receivable is reported on a separate line item within the consolidated statements of financial condition.

The following table summarizes our carried interest income since inception for our combined segments through December 31, 2016:

	Carried Interest Income Since Inception[(1)]				
	Undistributed by Fund and Recognized	Distributed by Fund and Recognized[(2)]	Total Undistributed and Distributed by Fund and Recognized[(3)]	General Partner Obligation as of December 31, 2016[(3)]	Maximum Carried Interest Income Subject to Potential Reversal[(4)]

(1) Certain funds are denominated in Euros and historical figures are translated into U.S. dollars at an exchange rate of €1.00 to $1.05 as of December 31, 2016.

(2) Amounts in "Distributed by Fund and Recognized" for the CPI, Gulf Stream Asset Management, LLC ("Gulf Stream") and Stone Tower funds and SIAs are presented for activity subsequent to the respective acquisition dates.

(3) Amounts were computed based on the fair value of fund investments on December 31, 2016. Carried interest income has been allocated to and recognized by the general partner. Based on the amount of carried interest income allocated, a portion is subject to potential reversal or, to the extent applicable, has been reduced by the general partner obligation to return previously distributed carried interest income or fees at December 31, 2016. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund.

(4) Represents the amount of carried interest income that would be reversed if remaining fund investments became worthless on December 31, 2016. Amounts subject to potential reversal of carried interest income include amounts undistributed by a fund (i.e., the carried interest receivable), as well as a portion of the amounts that have been distributed by a fund, net of taxes not subject to a general partner obligation to return previously distributed carried interest income, except for those funds that are gross of taxes as defined in the respective funds' governing documents.

(5) Amounts exclude AINV, as carried interest income from this entity is not subject to contingent repayment.

(6) Other includes certain SIAs.

Expenses

Compensation and Benefits. Our most significant expense is compensation and benefits expense. This consists of fixed salary, discretionary and non-discretionary bonuses, profit sharing expense associated with the carried interest income earned from private equity, credit and real estate funds and compensation expense associated with the vesting of non-cash equity-based awards.

Our compensation arrangements with certain partners and employees contain a significant performance-based incentive component. Therefore, as our net revenues increase, our compensation costs also rise or can be lower when net revenues decrease. In addition, our compensation costs reflect the increased investment in people as we expand geographically and create new funds.

In addition, certain professionals and selected other individuals have a profit sharing interest in the carried interest income earned in relation to our private equity, certain credit and real estate funds in order to better align their interests with our own and with those of the investors in these funds. Profit sharing expense is part of our compensation and benefits expense and is generally based upon a fixed percentage of private equity, credit and real estate carried interest income on a pre-tax and a pre-consolidated basis. Profit sharing expense can reverse during periods when there is a decline in carried interest income that was previously recognized. Profit sharing amounts are normally distributed to employees after the corresponding investment gains have been realized and generally before preferred returns are achieved for the investors. Therefore, changes in our unrealized gains (losses) for investments have the same effect on our profit sharing expense. Profit sharing expense increases when unrealized gains increase. Realizations only impact profit sharing expense to the extent that the effects on investments have not been recognized previously. If losses on other investments within a fund are subsequently realized, the profit sharing amounts previously distributed are normally subject to a general partner obligation to return carried interest income previously distributed back to the funds. This general partner obligation due to the funds would be realized only when the fund is liquidated, which generally occurs at the end of the fund's term. However, indemnification obligations also exist for pre-reorganization realized gains, which, although our Managing Partners and Contributing Partners would remain personally liable, may indemnify our Managing Partners and Contributing Partners for 17.5% to 100% of the previously distributed profits regardless of the fund's future performance. See note 14 to our consolidated financial statements for further discussion of indemnification.

Each Managing Partner receives $100,000 per year in base salary for services rendered to us. Additionally, our Managing Partners can receive other forms of compensation. In connection with the 2007 Reorganization, the Managing Partners and Contributing Partners received AOG Units, which vested over a period of five to six years and certain employees were granted RSUs, which vested over a period of typically six years. In addition, AHL Awards (as defined in note 13 to our consolidated financial statements) and other equity-based compensation awards have been granted to the Company and certain employees, which amortize over the respective vesting periods. In addition, the Company grants equity awards to certain employees, including RSUs, restricted Class A shares and options, that generally vest and become exercisable in quarterly installments or annual installments depending on the contract terms over a period of three to six years. See note 13 to our consolidated financial statements for further discussion of AOG Units and other equity-based compensation.

Other Expenses. The balance of our other expenses includes interest, placement fees, and general, administrative and other operating expenses. Interest expense consists primarily of interest related to the 2013 AMH Credit Facilities, the 2024 Senior Notes and the 2026 Senior Notes as discussed in note 11 to our consolidated financial statements. Placement fees are incurred in connection with our capital raising activities. General, administrative and other expenses includes occupancy expense, depreciation and amortization, professional fees and costs related to travel, information technology and administration. Occupancy expense represents charges related to office leases and associated expenses, such as utilities and maintenance fees. Depreciation and amortization of fixed assets is normally calculated using the straight-line method over their estimated useful lives, ranging from two to sixteen years, taking into consideration any residual value. Leasehold improvements are amortized over the shorter of the useful life of the asset or the expected term of the lease. Intangible assets are amortized based on the future cash flows over the expected useful lives of the assets.

Other Income (Loss)

Net Gains (Losses) from Investment Activities. The performance of the consolidated Apollo funds has impacted our net gains (losses) from investment activities. Net gains (losses) from investment activities include both realized gains and losses and the change in unrealized gains and losses in our investment portfolio between the opening reporting date and the closing reporting date. Net unrealized gains (losses) are a result of changes in the fair value of unrealized investments and reversal of unrealized gains (losses) due to dispositions of investments during the reporting period. Significant judgment and estimation goes into the assumptions that drive these models and the actual values realized with respect to investments could be materially different

from values obtained based on the use of those models. The valuation methodologies applied impact the reported value of investment company holdings and their underlying portfolios in our consolidated financial statements.

Net Gains (Losses) from Investment Activities of Consolidated Variable Interest Entities. Changes in the fair value of the consolidated VIEs' assets and liabilities and related interest, dividend and other income and expenses subsequent to consolidation are presented within net gains (losses) from investment activities of consolidated variable interest entities and are attributable to Non-Controlling Interests in the consolidated statements of operations.

Other Income (Losses), Net. Other income (losses), net includes gains (losses) arising from the remeasurement of foreign currency denominated assets and liabilities, reversal of a portion of the tax receivable agreement liability (see note 14 to our consolidated financial statements), gains (losses) arising from the remeasurement of derivative instruments associated with fees from certain of the Company's related parties and other miscellaneous non-operating income and expenses.

***Income Taxes*.** The Apollo Operating Group and its subsidiaries generally operate as partnerships for U.S. federal income tax purposes. As a result, except as described below, the Apollo Operating Group has not been subject to U.S. income taxes. However, these entities in some cases are subject to New York City unincorporated business taxes ("NYC UBT"), and non-U.S. entities, in some cases, are subject to non-U.S. corporate income taxes. In addition, certain consolidated entities are, or are treated as, corporations for U.S. and non-U.S. tax purposes and therefore subject to U.S. federal, state and local corporate income tax, and the Company's provision for income taxes is accounted for in accordance with U.S. GAAP.

Significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties. We recognize the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained upon examination, including resolutions of any related appeals or litigation, based on the technical merits of the position. The tax benefit is measured as the largest amount of benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. If a tax position is not considered more likely than not to be sustained, then no benefits of the position are recognized. The Company's tax positions are reviewed and evaluated quarterly to determine whether or not we have uncertain tax positions that require financial statement recognition.

Deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amount of assets and liabilities and their respective tax basis using currently enacted tax rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Non-Controlling Interests

For entities that are consolidated, but not 100% owned, a portion of the income or loss and corresponding equity is allocated to owners other than Apollo. The aggregate of the income or loss and corresponding equity that is not owned by the Company is included in Non-Controlling Interests in the consolidated financial statements. The Non-Controlling Interests relating to Apollo Global Management, LLC primarily include the 53.7% and 54.4% ownership interest in the Apollo Operating Group held by the Managing Partners and Contributing Partners through their limited partner interests in Holdings as of December 31, 2016 and 2015, respectively. Non-Controlling Interests also include limited partner interests in certain consolidated funds and VIEs.

The authoritative guidance for Non-Controlling Interests in the consolidated financial statements requires reporting entities to present Non-Controlling Interest as equity and provides guidance on the accounting for transactions between an entity and Non-Controlling Interests. According to the guidance, (1) Non-Controlling Interests are presented as a separate component of shareholders' equity on the Company's consolidated statements of financial condition, (2) net income (loss) includes the net income (loss) attributable to the Non-Controlling Interest holders on the Company's consolidated statements of operations, (3) the primary components of Non-Controlling Interest are separately presented in the Company's consolidated statements of changes in shareholders' equity to clearly distinguish the interests in the Apollo Operating Group and other ownership interests in the consolidated entities and (4) profits and losses are allocated to Non-Controlling Interests in proportion to their ownership interests regardless of their basis.

Results of Operations

Below is a discussion of our consolidated results of operations for the years ended December 31, 2016, 2015 and 2014. For additional analysis of the factors that affected our results at the segment level, see "—Segment Analysis" below:

	For the Years Ended December 31,		Amount Change	Percentage Change	For the Years Ended December 31,		Amount Change	Percentage Change
	2016	2015			2015	2014

Note: "NM" denotes not meaningful. Changes from negative to positive amounts and positive to negative amounts are not considered meaningful. Increases or decreases from zero and changes greater than 500% are also not considered meaningful.

Revenues

Our revenues and other income include fixed components that result from measures of capital and asset valuations and variable components that result from realized and unrealized investment performance, as well as the value of successfully completed transactions.

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Management fees from related parties increased by $113.3 million for the year ended December 31, 2016 as compared to the year ended December 31, 2015. This change was primarily attributable to increased management fees earned with respect to ANRP II, MidCap, Athene, assets advised by AAME, COF III and ARI of $46.0 million, $12.5 million, $10.8 million, $10.6 million, $8.0 million and $6.6 million, respectively, partially offset by decreases in management fees earned with respect to AINV and Fund VI of $13.6 million and $6.5 million, respectively, during the year ended December 31, 2016 as compared to the same period during 2015. The increase in management fees from related parties was partially driven by an increase in reimbursable expenses during the year ended December 31, 2016 as compared to the same period during 2015.

Advisory and transaction fees from related parties, net, increased by $132.5 million for the year ended December 31, 2016 as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in net advisory and transaction fees earned with respect to Fund VIII's portfolio companies of $113.1 million during the year ended December 31,

2016, as compared to the same period during 2015, as well as a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Carried interest income from related parties increased by $682.9 million for the year ended December 31, 2016 as compared to the year ended December 31, 2015. This change was primarily attributable to increased carried interest income earned from our private equity and credit funds of $425.4 million and $258.7 million, respectively, during the year ended December 31, 2016 as compared to the same period in 2015. For additional details regarding changes in carried interest income in each segment, see "—Segment Analysis" below.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Management fees from related parties increased by $79.8 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to the adoption of new consolidation guidance which led to the deconsolidation of certain funds and CLOs as of January 1, 2015 as described in note 2 to the consolidated financial statements. As a result of the adoption of new consolidation guidance, eliminations of management fees of consolidated CLOs decreased by $59.2 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014. The change in management fees from related parties was also driven by an increase in management fees in relation to the AHL Awards (as defined in note 13 to our consolidated financial statements) of $7.0 million granted to the Company's employees, which are liability awards that are marked-to-market based on the valuation of Athene (see note 13 to the consolidated financial statements).

Advisory and transaction fees from affiliates, net, decreased by $301.4 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to a decrease in monitoring fees from Athene of $224.5 million as a result of the termination of a transaction advisory services agreement with Athene (the "Athene Services Agreement") as of December 31, 2014, a decrease in net advisory and transaction fees earned with respect to Fund VII of $26.6 million and a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Carried interest income from related parties decreased by $296.8 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to decreases in carried interest income from the private equity and credit segments of $206.3 million and $107.0 million, respectively, offset by an increase in carried interest income from the real estate segment of $4.1 million during the year ended December 31, 2015 as compared to the same period in 2014. For additional details regarding changes in carried interest income in each segment, see "—Segment Analysis" below.

Expenses

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Compensation and benefits increased by $311.8 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in profit sharing expense of $271.8 million due to increased carried interest income during the year ended December 31, 2016, as compared to the same period in 2015. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. In addition, this change was attributable to an increase in salary, bonus and benefits of $34.6 million during the year ended December 31, 2016 as compared to the same period in 2015 as a result of an increase in reimbursable expenses during the year ended December 31, 2016 as compared to the same period during 2015 and an increase in headcount during the year ended December 31, 2016.

Included in profit sharing expense is $62.1 million and $62.1 million for the year ended December 31, 2016 and 2015, respectively, related to a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company (referred to herein as the "Incentive Pool"). Allocations to participants in the Incentive Pool contain both a fixed component and a discretionary component, each of which may vary year to year. The fixed component of the Incentive Pool was $0.6 million and $1.6 million for the year ended December 31, 2016 and 2015, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period. See "—Critical Accounting Policies—Profit Sharing Expense" for an overview of the Incentive Pool.

Interest expense increased $13.4 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 11 to our consolidated financial statements.

General, administrative and other expense decreased by $8.1 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015 as a result of a decrease in depreciation and amortization related to certain intangibles in connection with the Company's acquisition of Stone Tower Capital LLC and its related management companies ("Stone Tower") being fully amortized at December 31, 2015. This decrease was offset by an increase related to certain expenses where the Company is considered the principal under the relevant agreements and is required to record the expense and related reimbursement on a gross basis.

Placement fees increased by $17.8 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015 as a result of placement fees related to the launch of Apollo European Principal Finance Fund III, L.P. ("EPF III") of $19.4 million during the year ended December 31, 2016. Placement fees are incurred in connection with raising capital for new and existing funds. The fees are normally payable to placement agents, who are third parties that assist in identifying potential investors, securing commitments to invest from such potential investors, preparing or revising offering marketing materials, developing strategies for attempting to secure investments by potential investors and/or providing feedback and insight regarding issues and concerns of potential investors.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Compensation and benefits decreased by $203.1 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to a decrease in profit sharing expense of $191.0 million due to lower carried interest income during the year ended December 31, 2015 as compared to the same period in 2014. In any year the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. Equity-based compensation decreased $28.6 million during the year ended December 31, 2015 as compared to the same period in 2014 primarily due to non-cash expense of $45.6 million incurred in connection with the departure of an executive officer during the year ended December 31, 2014. This decrease was offset by additional expense incurred in relation to the AHL Awards granted to the Company's employees, which are liability awards that are marked to market based on the valuation of Athene (see note 13 to the consolidated financial statements) during the year ended December 31, 2015. The decreases in profit sharing expense and equity-based compensation were offset by an increase in salary, bonus and benefits of $16.5 million during the year ended December 31, 2015 as a result of an increase in headcount after December 31, 2014.

Included within profit sharing expense was $62.1 million and $62.0 million related to the Incentive Pool for the years ended December 31, 2015 and 2014, respectively. The fixed component of the Incentive Pool was $1.6 million and $6.5 million for the years ended December 31, 2015 and 2014, respectively.

Interest expense increased by $7.7 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014 as a result of the issuance of the 2024 Senior Notes in May, 2014, as described in note 11 to our consolidated financial statements.

General, administrative and other expense decreased by $10.1 million for the year ended December 31, 2015, as compared to the year ended December 31, 2014. This change was primarily attributable to a decrease in professional fees related to lower consulting fees and lower technology expenses incurred during the year ended December 31, 2015 as compared to the same period in 2014. These decreases were offset by an increase in expense incurred primarily due to a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Placement fees decreased by $7.0 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to placement fees with respect to COF III of $6.3 million during the year ended December 31, 2014 that did not recur during the year ended December 31, 2015.

Other Income (Loss)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Net gains from investment activities increased by $18.0 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. The increase was primarily attributable to an increase in unrealized gains on the Company's investment in Athene during the year ended December 31, 2016. See note 6 to the consolidated financial statements for further information regarding the Company's investment in Athene.

Income from equity method investments increased by $88.3 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily driven by increases in the value of investments held by certain Apollo funds and other entities in which the Company has a direct interest, mainly with respect to Fund VIII, Apollo Energy Opportunity Fund, L.P. ("AEOF"), Apollo European Principal Finance Fund II, L.P. ("EPF II"), ANRP II, Credit Opportunity Fund

III, L.P. (“COF III”), ANRP I, an SIA and MidCap of $45.2 million, $7.9 million, $6.0 million, $5.7 million, $4.9 million, $4.5 million, $3.2 million and $2.7 million, respectively, as well as modest increases across most of our other equity method investments during the year ended December 31, 2016, as compared to the same period in 2015.

Other income, net decreased by $3.1 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily driven by foreign exchange losses during the year ended December 31, 2016, compared to foreign exchange gains during the year ended December 31, 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Net gains from investment activities decreased by $91.5 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to net gains from investment activities with respect to AAA of $204.6 million during the year ended December 31, 2014 that did not recur during the year ended December 31, 2015 as a result of the deconsolidation of AAA effective January 1, 2015. (See note 2 to the consolidated financial statements for details regarding the Company’s adoption of the new consolidation guidance.) This was offset by an unrealized gain on the Company’s investment in Athene of $122.4 million during the year ended December 31, 2015.

Income from equity method investments decreased by $39.0 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily driven by decreases in the values of investments held by certain Apollo funds and other entities in which the Company has a direct interest, mainly with respect to Fund VII, AINV, AION, EPF I, ARI and Apollo Credit Liquidity Fund, L.P. (“ACLF”) which resulted in decreases in income from equity method investments of $12.4 million, $9.3 million, $5.9 million, $3.4 million, $2.7 million and $2.0 million, respectively. These decreases were offset by an increase in the value of Apollo’s ownership interest in AAA of $10.0 million.

Interest income decreased by $7.2 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014 primarily due to payment-in-kind interest income earned during the year ended December 31, 2014 that did not recur in 2015 as a result of the sale of the Company’s investment in HFA Holdings Limited ("HFA") during the year ended December 31, 2014.

Other income, net decreased by $52.9 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily due to (i) a gain from the reduction of the tax receivable agreement liability of $32.2 million resulting from changes in projected income estimates and in estimated tax rates (see note 14 to our consolidated financial statements), (ii) a $14.0 million unrealized gain on Athene-related derivative contracts as a result of the settlement of these derivative contracts during 2014 and (iii) a gain on extinguishment of a portion of the contingent consideration obligation related to the acquisition of Stone Tower of $13.4 million, each of which occurred during the year ended December 31, 2014 and did not recur in 2015.

Income Tax Provision

The Apollo Operating Group and its subsidiaries generally operate as partnerships for U.S. federal income tax purposes. As a result, only a portion of the income we earn is subject to corporate-level tax in the United States and foreign jurisdictions. The provision for income taxes includes federal, state and local income taxes in the United States and foreign income taxes.

Years Ended December 31, 2016 Compared to Years Ended December 31, 2015

The income tax provision increased by $64.0 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015 primarily due to a change in the mix of earnings which are subject to corporate-level taxation, as well as an increase in Fee Related Earnings subject to corporate-level taxation. The provision for income taxes includes federal, state and local income taxes in the United States and foreign income taxes at an effective tax rate of 8.5% and 7.1% for the years ended December 31, 2016 and 2015, respectively. The reconciling items between our statutory tax rate and our effective tax rate were due to the following: (i) income passed through to Non-Controlling Interests; (ii) income passed through to Class A shareholders; and (iii) state and local income taxes including NYC UBT (see note 10 to the consolidated financial statements for further details regarding the Company’s income tax provision).

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

The income tax provision decreased by $120.5 million primarily due to a change in the mix of earnings which are subject to corporate-level tax, as well as a decrease in Fee Related Earnings subject to corporate-level taxation. The provision for income taxes includes federal, state and local income taxes in the United States and foreign income taxes at an effective tax rate of 7.1% and 16.8% for the years ended December 31, 2015 and 2014, respectively. The reconciling items between our statutory tax rate and our effective tax rate were due to the following: (i) income passed through to Non-Controlling Interests; (ii) income

passed through to Class A shareholders; and (iii) state and local income taxes including NYC UBT (see note 10 to the consolidated financial statements for further details regarding the Company's income tax provision).

Non-Controlling Interests

Net income attributable to Non-Controlling Interests in the Apollo Operating Group consisted of the following:

	For the Years Ended December 31,		
	2016	2015	2014
	(in thousands)		
Net income	$ 970,307	$ 350,495	$ 729,922
Net income attributable to Non-Controlling Interests in consolidated entities	(5,789)	(21,364)	(157,011)
Net income after Non-Controlling Interests in consolidated entities	964,518	329,131	572,911
Adjustments:			
Income tax provision[1]	90,707	26,733	147,245
NYC UBT and foreign tax benefit[2]	(9,899)	(10,975)	(10,995)
Net (income) loss in non-Apollo Operating Group entities	(3,156)	449	(31,150)
Total adjustments	77,652	16,207	105,100
Net income after adjustments	1,042,170	345,338	678,011
Approximate weighted average ownership percentage of Apollo Operating Group	54.0%	55.9%	57.8%
Net income attributable to Non-Controlling Interests in Apollo Operating Group	$ 561,668	$ 194,634	$ 404,682

(1) Reflects all taxes recorded in our consolidated statements of operations. Of this amount, U.S. federal, state, and local corporate income taxes attributable to APO Corp. are added back to income of the Apollo Operating Group before calculating Non-Controlling Interests as the income allocable to the Apollo Operating Group is not subject to such taxes.

(2) Reflects NYC UBT and foreign taxes that are attributable to the Apollo Operating Group and its subsidiaries related to its operations in the U.S. as partnerships and in non-U.S. jurisdictions as corporations. As such, these amounts are considered in the income attributable to the Apollo Operating Group.

Segment Analysis

Discussed below are our results of operations for each of our reportable segments. They represent the segment information available and utilized by our executive management, which consists of our Managing Partners, who operate collectively as our chief operating decision maker, to assess performance and to allocate resources. Management divides its operations into three reportable segments: private equity, credit and real estate. These segments were established based on the nature of investment activities in each underlying fund, including the specific type of investment made and the level of control over the investment. Segment results represent segment income (loss) before income tax provision excluding transaction-related charges arising from the 2007 private placement, and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets and contingent consideration and certain other charges associated with acquisitions. In addition, segment results exclude non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements.

Our financial results vary, since carried interest, which generally constitutes a large portion of the income from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

Private Equity

The following table sets forth our segment statement of operations information and our supplemental performance measure, EI, within our private equity segment for the years ended December 31, 2016, 2015 and 2014.

	For the Years Ended December 31,				For the Years Ended December 31,

(1) Prior period amounts have been recast to conform to the current presentation. See note 16 to our consolidated financial statements for more detail on the reclassification within our three segments.

(2) Included in unrealized carried interest income from related parties for the years ended December 31, 2016, 2015 and 2014 was a reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. See note 14 to our consolidated financial statements for further detail regarding the general partner obligation.

Revenues

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Management fees from related parties increased by $26.2 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to management fees earned with respect to ANRP II of $46.0 million during the year ended December 31, 2016 in connection with capital raises for the fund during 2016, partially offset by decreases in management fees earned with respect to Fund VI, ANRP I and Fund VII of $6.5 million, $4.9 million and $3.9 million, respectively, during the year ended December 31, 2016 as compared to the year ended December 31, 2015.

Advisory and transaction fees from related parties, net increased by $136.2 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in net advisory and transaction fees earned with respect to Fund VIII's portfolio companies of $113.1 million during the year ended December 31, 2016 as compared to the year ended December 31, 2015, as well as a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Carried interest income from related parties increased by $425.4 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to increases in carried interest income earned from Fund VIII, ANRP I and ANRP II of $334.3 million, $64.8 million and $50.4 million, respectively, during the year ended December 31, 2016. The increase in carried interest income earned from Fund VIII was primarily driven by appreciation in the value of their privately held energy related portfolio companies. The increases in carried interest income from ANRP I and

ANRP II were driven by appreciation in the value of their privately held portfolio companies in the energy sector. This was partially offset by a decrease in carried interest income earned from Fund VI of $42.7 million. The decrease in carried interest income earned from Fund VI was primarily driven by its public portfolio company holdings.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Management fees from related parties decreased by $19.2 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to decreases in management fees earned with respect to Fund VI and Fund VII of $10.6 million and $10.6 million, respectively, as a result of lower invested capital. In addition, this change was attributable to a decrease in management fees earned with respect to ANRP I of $3.3 million resulting from a step down in fee basis from committed capital to invested capital during the year ended December 31, 2015 compared to the same period in 2014. These decreases were partially offset by an increase related to ANRP II of $7.9 million which launched during 2015.

Advisory and transaction fees from related parties, net decreased by $65.7 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to a change in the fee structure with respect to Fund VIII as a greater portion of the advisory and transaction fees were shared with limited partners of the fund in 2015. In addition, there were decreases in net advisory and transaction fees earned with respect to Fund VII and ANRP I of $26.6 million and $4.3 million, respectively, as well as a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Carried interest income from related parties decreased by $206.3 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to decreases in carried interest income earned from Fund VII and ANRP I of $289.6 million and $40.1 million, respectively, partially offset by increased carried interest income earned from AAA/Other and Fund VI of $76.2 million and $60.6 million, respectively. The decreases in carried interest income earned from Fund VII and ANRP I were primarily driven by depreciation in their energy-related portfolio holdings during the year ended December 31, 2015. Additionally, the decrease in carried interest income earned from Fund VII was attributable to the non-recurrence of carried interest income of approximately $299.8 million with respect to certain of the fund’s investments that were sold subsequent to December 31, 2014. The increase in carried interest income earned from AAA/Other as compared to the year ended December 31, 2014 was primarily driven by the appreciation on the investment in Athene. The increase in carried interest income earned from Fund VI for the year ended December 31, 2015 as compared to the same period in 2014 was primarily a result of $112.7 million of carried interest loss relating to one of the fund’s public portfolio companies during the year ended December 31, 2014 that did not recur during the year ended December 31, 2015 and an increase in carried interest income earned with respect to the fund’s public portfolio company holdings during the year ended December 31, 2015.

Expenses

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Compensation and benefits expense increased by $109.0 million for the year ended December 31, 2016 as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in profit sharing expense of $112.0 million as a result of a corresponding increase in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $20.6 million and $46.6 million related to the Incentive Pool for the years ended December 31, 2016 and 2015, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other decreased by $4.2 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. The change was primarily driven by an expense relating to a legal reserve in connection with an SEC regulatory matter being recorded during the year ended December 31, 2015.

Placement fees decreased by $2.3 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily driven by a decrease in placement fees of $2.1 million related to the launch of ANRP II during the year ended December 31, 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Compensation and benefits expense decreased by $155.9 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to a decrease in profit sharing expense of $131.8

million as a result of a corresponding decrease in carried interest income earned from Fund VII, ANRP I and Fund V as discussed above, and a decrease in equity-based compensation of $18.2 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014. In any year the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds that are generating carried interest in the period. Equity-based compensation was higher during the year ended December 31, 2014 as a result of a non-cash expense of $17.9 million in connection with the departure of an executive officer during the year ended December 31, 2014. These decreases were offset by an increase in salary, bonus and benefits of $7.7 million due to an increase in headcount after December 31, 2014.

Included in profit sharing expense is $46.6 million and $55.5 million related to the Incentive Pool for the years ended December 31, 2015 and 2014, respectively.

General, administrative and other increased by $7.5 million during the year ended December 31, 2015, as compared to the year ended December 31, 2014. The change was primarily driven by a legal reserve in connection with an SEC regulatory matter recorded during the year ended December 31, 2015.

Placement fees increased by $2.4 million during the year ended December 31, 2015, as compared to the year ended December 31, 2014. This change was primarily driven by placement fees of $4.2 million related to the launch of ANRP II incurred during the year ended December 31, 2015, offset by a decrease in placement fees of $1.8 million related to the launch of Fund VIII during the year ended December 31, 2015, as compared to the year ended December 31, 2014.

Other Income (Loss)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Income from equity method investments increased by $47.2 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in the income from Apollo's equity ownership interest in Fund VIII, ANRP II and ANRP I of $45.2 million, $5.7 million and $4.5 million, respectively, during the year ended December 31, 2016, as compared to the year ended December 31, 2015.

Net gains from investment activities increased by $4.4 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015, due to higher unrealized gains on the Company's investment in Athene during the year ended December 31, 2016, as compared to the year ended December 31, 2015. See note 6 to the consolidated financial statements for further information regarding the Company's investment in Athene.

Net interest loss increased by $4.3 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015, primarily due to additional interest expense incurred during the year ended December 31, 2016 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 11 to our consolidated financial statements.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Income from equity method investments decreased by $11.3 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was driven by decreases in the income from Apollo's equity ownership interest in Fund VII and AION of $12.4 million and $5.9 million, respectively, offset by an increase in the value of Apollo's equity ownership interest in AAA of $10.0 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014.

Net gains from investment activities increased by $6.9 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014 due to an increase in unrealized gain on our investment in Athene Holding.

Net interest loss increased by $2.0 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014 as a result of the issuance of the 2024 Senior Notes in May, 2014, as described in note 11 to our consolidated financial statements.

Other income, net decreased by $10.9 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily due to a gain of $11.8 million resulting from the reduction of the tax receivable agreement liability during the year ended December 31, 2014 that did not recur in 2015.

Credit

The following table sets forth segment statement of operations information and EI within our credit segment for the years ended December 31, 2016, 2015 and 2014.

(1) Prior period amounts have been recast to conform to the current presentation. See note 16 to our consolidated financial statements for more detail on the reclassification within our three segments.

(2) Included in unrealized carried interest gains (losses) from related parties for the years ended December 31, 2016, 2015 and 2014 was a reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. See note 14 to our consolidated financial statements for further detail regarding the general partner obligation.

Revenues

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Management fees from related parties increased by $31.5 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to increases in management fees earned from MidCap, Athene, assets advised by AAME, COF III and Apollo Total Return Fund L.P. of $12.5 million, $10.8 million, $10.6 million, $8.0 million and $3.4 million, respectively, offset by a decrease in management fees earned from AINV of $13.6 million during the year ended December 31, 2016, as compared to the same period during 2015.

Advisory and transaction fees from related parties, net, decreased by $4.7 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. The decrease was primarily driven by a decrease in net advisory and transaction fees from FCI II, CLOs, Apollo Credit Master Fund Ltd. and SCRF III of $1.7 million, $0.7 million, $0.7 million and $0.6 million, respectively during the year ended December 31, 2016, as compared to the same period during 2015.

Carried interest income from related parties increased by $258.7 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to increases in carried interest income earned from EPF II, an SIA, SCRF III, Apollo Credit Master Fund Ltd., ACLF and CLOs of $64.4 million, $30.1 million, $29.4 million, $29.2 million, $26.2 million and $20.2 million, respectively, during the year ended December 31, 2016, as compared to the same period in 2015.

The increase in carried interest income earned from EPF II was primarily attributable to appreciation of European and UK hotel assets and German commercial real estate investments in the fund's portfolio offset by the depreciation of certain shipping investments in the fund's portfolio for the year ended December 31, 2016, compared to the appreciation of European direct real estate investments in the fund's portfolio offset by depreciation of a Spanish consumer bank investment in the fund's portfolio during the year ended December 31, 2015. The increase in carried interest income from the SIA was attributable to the depreciation of investments in energy and natural resources during the year ended December 31, 2015 that did not recur during the year ended December 31, 2016. The increase in carried interest income from SCRF III was attributable to stronger positive performance of the fund's structured credit portfolio during the year ended December 31, 2016 compared to the year ended December 31, 2015. The increase in carried interest income from Apollo Credit Master Fund Ltd. was primarily attributable to gains from the leveraged loan market, as well as narrowing spreads in fixed-income instruments during the year ended December 31, 2016 as compared to the year ended December 31, 2015. Appreciation in consumer services and energy investments contributed to an increase in carried interest income earned from ACLF during the year ended December 31, 2016, compared to depreciation in energy investments during the year ended December 31, 2015. Gains from the broad leveraged loan market contributed to an increase in carried interest income earned from CLOs as assets appreciated and income remained steady during the year ended December 31, 2016.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Management fees from related parties increased by $26.5 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to increases in management fees earned with respect to COF III and MidCap of $12.3 million and $8.7 million, respectively, during the year ended December 31, 2015 as compared to the same period during 2014.

Advisory and transaction fees from related parties, net, decreased by $237.9 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014. The decrease was primarily driven by a decrease in monitoring fees from Athene of $224.5 million as a result of the termination of the Athene Services Agreement as of December 31, 2014.

Carried interest income from related parties decreased by $107.0 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to a decrease in carried interest income earned from EPF I, EPF II, an SIA and ACLF of $57.0 million, $35.8 million, $30.2 million and $19.2 million, respectively, partially offset by increased carried interest income earned from FCI II and FCI I of $26.3 million and $9.7 million, respectively, during the year ended December 31, 2015 as compared to the same period in 2014.

The decrease in carried interest income from EPF I was attributable to the non-recurrence of appreciation of investments in the consumer finance sector during the year ended December 31, 2015. Carried interest income from EPF II decreased as a result of market value declines in the fund's investments in the financial and shipping sectors during the year ended December 31, 2015. Carried interest income from one of the SIAs the Company manages and ACLF decreased during the year ended December 31, 2015 compared to the same period in 2014 primarily due to market value declines in energy and natural resources. These decreases were offset by an increase in carried interest income from FCI II and FCI I during the year ended December 31, 2015 as compared to the year ended December 31, 2014. The portfolios of FCI II and FCI I had unrealized market value increases in their life settlements investments, as a result of an increase in the value of the fund's investments based on observed market transactions. During the year ended December 31, 2014, FCI II was early in its life, and had sizable purchases during the year ended December 31, 2015, therefore similar appreciation did not occur.

Expenses

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Compensation and benefits expense increased by $130.1 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily due to an increase in profit sharing expense of $113.3 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. Profit sharing expense increased as a result of a corresponding increase in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $38.0 million and $15.2 million related to the Incentive Pool for the years ended December 31, 2016 and 2015, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other increased by $2.3 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. The change was primarily driven by higher technology expenses during the year ended December 31, 2016 compared to the same period in 2015.

Placement fees increased by $17.7 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to placement fees of $19.4 million related to the launch of EPF III during the year ended December 31, 2016.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Compensation and benefits expense decreased by $54.3 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily due to decreases in profit sharing expense and equity-based compensation of $49.4 million and $20.4 million, respectively, during the year ended December 31, 2015 as compared to the year ended December 31, 2014. Profit sharing expense decreased as a result of a corresponding decrease in carried interest income as described above. In any year the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. Equity-based compensation was higher during the year ended December 31, 2014 as compared to the same period in 2015 as a result of a non-cash expense of $23.2 million in connection with the departure of an executive officer during the year ended December 31, 2014.

Included in profit sharing expense is $15.2 million and $6.3 million related to the Incentive Pool for the years ended December 31, 2015 and 2014, respectively.

General, administrative and other expenses decreased by $14.6 million during the year ended December 31, 2015, as compared to the year ended December 31, 2014. The change was primarily driven by a decrease in professional fees of $7.7 million primarily attributable to lower consulting fees, and a decrease in general and administrative expense of $7.5 million driven by lower technology expenses during the year ended December 31, 2015 compared to the same period in 2014.

Placement fees decreased by $8.8 million during the year ended December 31, 2015, as compared to the year ended December 31, 2014 primarily driven by decreased fees related to COF III of $6.3 million during the year ended December 31, 2015, as compared to the year ended December 31, 2014.

Other Income

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Income from equity method investments was $33.3 million for the year ended December 31, 2016, as compared to a loss from equity method investments of $6.0 million for the year ended December 31, 2015. The increase of $39.3 million was driven by increases in income from Apollo's equity ownership interest in AEOF, EPF II, COF III, an SIA and MidCap of $7.9 million, $6.0 million, $4.9 million, $3.2 million and $2.7 million, respectively, as well as modest increases across most of our other equity method investments during the year ended December 31, 2016, as compared to the same period in 2015.

Net gains from investment activities increased by $13.0 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. The increase was primarily attributable to an increase in gains of $13.6 million on the Company's direct investment in Athene during the year ended December 31, 2016 as compared to the same period in 2015. See note 6 to the consolidated financial statements for further information regarding the Company's investment in Athene.

Net interest loss increased by $6.9 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015, primarily due to additional interest expense incurred during the year ended December 31, 2016 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 11 to our consolidated financial statements.

Other loss, net was $4.5 million for the year ended December 31, 2016, as compared to other income, net of $3.6 million for the year ended December 31, 2015. The decrease of $8.1 million was primarily driven by a write-off of certain receivables during the year ended December 31, 2016 and foreign exchange losses during the year ended December 31, 2016 as compared to foreign exchange gains during the year ended December 31, 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Income from equity method investments decreased by $24.8 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was driven by decreases in the values of investments in certain of our credit funds, primarily from Apollo's ownership interests in AINV, certain SIAs, EPF I, and EPF II of $9.3 million, $3.8 million, $3.4 million and $1.5 million, respectively, during the year ended December 31, 2015 as compared to the same period in 2014. The change was also driven by a decrease in the value of our investment in AEOF, a fund which launched during 2015, of $2.0 million.

Net gains from investment activities increased by $105.1 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to an increase in unrealized gains on the Company's investment in Athene of $100.1 million during the year ended December 31, 2015 compared to the same period in 2014.

Other income decreased by $31.7 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily due to a gain of $17.3 million resulting from the reduction of the tax receivable agreement liability during the year ended December 31, 2014 that did not recur in 2015 and a $12.4 million unrealized gain on Athene-related derivative contracts during the year ended December 31, 2014 that did not recur in 2015 as a result of settlement of these derivative contracts during 2014.

Real Estate

Revenues

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Management fees from related parties increased by $8.1 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to increases in management fees earned with respect to ARI and U.S. RE Fund II of $6.6 million and $2.9 million, respectively during the year ended December 31, 2016, as compared to the year ended December 31, 2015.

Advisory and transaction fees from related parties, net, increased by $1.5 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in net advisory and transaction fees earned with respect to AGRE Debt Fund I of $1.4 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015.

Carried interest income from related parties increased by $4.5 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in carried interest income earned from U.S. RE Fund II of $8.7 million during the year ended December 31, 2016, as compared to the same period in 2015. This was offset by decreases in carried interest income earned from London Prime Apartments Guernsey Holdings Limited ("London Prime Apartments") and CPI funds in Europe of $2.9 million and $2.2 million, respectively, during the year ended December 31, 2016, as compared to the same period during 2015. Carried interest income earned from certain funds, including U.S. Real Estate Fund I and II, includes an allocation of carried interest income from a strategic investment account that invests in the funds. The increase in carried interest income earned from U.S. Real Estate Fund II is primarily the result of strong operating performance across many of the funds' underlying properties and appreciation of several real estate investments during the year ended December 31, 2016. The decrease in carried interest income earned from London Prime Apartments is primarily due to depreciation of the British Pound against the U.S. Dollar and lower appreciation or values for some of the underlying properties for the year ended December 31, 2016. The decrease in carried interest income earned from the CPI funds in Europe was primarily attributable to a publicly traded security that was sold in the first quarter of 2015 and generated carried interest during that period.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Management fees from related parties increased by $3.6 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to increases in management fees earned with respect to ARI, a China-based investment fund we manage as a result of the Venator acquisition and U.S. RE Fund II of $4.5 million, $2.6 million and $1.7 million, respectively, which were partially offset by a decrease in management fees earned related to our CPI funds of $6.1 million.

Advisory and transaction fees from related parties, net, increased by $1.8 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to an increase in net advisory and transaction fees earned with respect to AGRE Debt Fund I of $1.5 million.

Carried interest income from related parties increased by $4.1 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to an increase in carried interest income earned from our CPI funds in Europe and U.S. RE Fund I of $5.5 million and $0.9 million, respectively, partially offset by a decrease related to London Prime Apartments of $2.3 million. The increase in carried interest income in U.S. RE Fund I was a result of improved performance across many of the fund's underlying investments and higher global real estate values during the year ended December 31, 2015 as compared to the same period in 2014. The increase in carried interest income from our CPI funds in Europe was attributable to an increase in the value of a publicly traded security sold subsequent to December 31, 2014. The decrease in carried interest income in London Prime Apartments was a result of a decrease in the values of the underlying properties as compared to the same period in 2014.

Expenses

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Compensation and benefits increased by $4.8 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to an increase in profit sharing expense of $5.3 million during the year ended December 31, 2016 as compared to the year ended December 31, 2015 as a result of a corresponding increase in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $3.5 million and $0.3 million related to the Incentive Pool for the year ended December 31, 2016 and 2015, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other decreased by $1.3 million during the year ended December 31, 2016, as compared to the year ended December 31, 2015. This change was primarily attributable to a decrease in professional fees of $1.8 million as a result of a decrease in legal fees during the year ended December 31, 2016, as compared to the year ended December 31, 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Compensation and benefits increased by $4.1 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily attributable to an increase in salary, bonus and benefits of $6.4 million as a result of a higher headcount in 2015, and an increase in profit sharing expense of $2.3 million due to a corresponding increase in carried interest income earned during the year ended December 31, 2015 as discussed above. These increases were offset by a

decrease in equity-based compensation of $4.7 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014.

Included in profit sharing expense is $0.3 million and $0.2 million related to the Incentive Pool for the year ended December 31, 2015 and 2014, respectively.

General, administrative and other increased by $1.2 million during the year ended December 31, 2015 as compared to the year ended December 31, 2014, primarily attributable to an increase in legal fees during the year ended December 31, 2015 as compared to the year ended December 31, 2014.

Other Income (Loss)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Net interest loss increased by $1.2 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015, primarily due to additional interest expense incurred during the year ended December 31, 2016 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 11 to our consolidated financial statements.

Other income, net decreased by $0.8 million for the year ended December 31, 2016, as compared to the year ended December 31, 2015. The change was primarily driven by a bargain purchase gain in connection with the Venator acquisition during the year ended December 31, 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Income from equity method investments decreased by $2.7 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This decrease is primarily attributable to a $2.7 million decrease in the income from Apollo's ownership interest in ARI during the year ended December 31, 2015.

Net interest loss increased by $1.0 million for the year ended December 31, 2015, as compared to the year ended December 31, 2014 as a result of the issuance of the 2024 Senior Notes in May, 2014, as described in note 11 to our consolidated financial statements.

Other income decreased by $2.0 million for the year ended December 31, 2015 as compared to the year ended December 31, 2014. This change was primarily due to a gain of $3.1 million resulting from the reduction of the tax receivable agreement liability during the year ended December 31, 2014 that did not recur in 2015.

Summary of Combined Results

The following table is a summary of our combined segments EI for the years ended December 31, 2016, 2015 and 2014.

	For the Years Ended December 31,		
	2016	2015	2014
		(in thousands)	
Revenues:			
Management fees from related parties	$ 977,649	$ 911,893	$ 901,024
Advisory and transaction fees from related parties, net	147,115	14,186	316,082
Carried interest income (loss) from related parties:			
Unrealized[1]	510,999	(387,541)	(1,347,786)
Realized	274,887	484,831	1,754,307
Total carried interest income from related parties	785,886	97,290	406,521
Total Revenues	**1,910,650**	**1,023,369**	**1,623,627**
Expenses:			
Compensation and benefits:			
Salary, bonus and benefits	366,890	355,922	339,846
Equity-based compensation	64,468	62,184	105,495
Profit sharing expense	316,650	86,031	264,908
Total compensation and benefits	748,008	504,137	710,249
Non-compensation expenses:			
General, administrative and other	218,490	221,806	227,785
Placement fees	24,433	8,939	15,422
Total non-compensation expenses	242,923	230,745	243,207
Total Expenses	**990,931**	**734,882**	**953,456**
Other Income:			
Income from equity method investments	102,581	16,078	54,905
Net gains from investment activities	138,608	121,132	9,062
Net interest loss	(39,019)	(26,533)	(19,098)
Other income (loss), net	(2,158)	8,177	52,699
Total Other Income	**200,012**	**118,854**	**97,568**
Non-Controlling Interests	(7,464)	(11,684)	(12,688)
Economic Income	**$ 1,112,267**	**$ 395,657**	**$ 755,051**
Income Tax Provision	(165,522)	(10,518)	(185,587)
Economic Net Income	**$ 946,745**	**$ 385,139**	**$ 569,464**

(1) Included in unrealized carried interest income (losses) from related parties for the years ended December 31, 2016, and 2015 was a reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. See note 14 to our consolidated financial statements for further detail regarding the general partner obligation.

Summary of Fee Related Earnings

The following table is a summary of Fee Related Earnings for the years ended December 31, 2016, 2015 and 2014.

	For the Years Ended December 31,		
	2016	2015	2014
	(in thousands, except per share data)		
Management Fees	$ 977,649	$ 911,893	$ 901,024
Advisory and Transaction Fees from Related Parties, net	147,115	48,186	316,082
Carried Interest Income from Related Parties[1]	22,941	40,625	41,199
Salary, Bonus and Benefits	(366,890)	(355,922)	(339,846)
Non-compensation Expenses	(242,923)	(218,745)	(243,207)
Other Loss	(8,018)	(3,990)	(3,067)
Fee Related Earnings[2]	$ 529,874	$ 422,047	$ 672,185

(1) Represents carried interest income earned from a publicly traded business development company we manage.
(2) Excludes a reserve of $45 million accrued during the year ended December 31, 2015 in connection with an SEC regulatory matter principally concerning the acceleration of fees from fund portfolio companies.

Summary of Distributable Earnings

The following table is a reconciliation of Distributable Earnings per share of common and equivalents[1] to net distribution per share of common and equivalent for the years ended December 31, 2016, 2015 and 2014.

	For the Years Ended December 31,		
	2016	2015	2014
	(in thousands, except per share data)		
Distributable Earnings	$ 647,932	$ 622,821	$ 1,429,780
Taxes and related payables[2]	(9,635)	(9,715)	(73,565)
Distributable Earnings After Taxes and Related Payables	638,297	613,106	1,356,215
Add back: Tax and related payables attributable to common and equivalents	110	12	66,429
Distributable Earnings before certain payables[3]	638,407	613,118	1,422,644
Percent to common and equivalents	47%	47%	45%
Distributable Earnings before other payables attributable to common and equivalents	302,899	290,420	633,380
Less: Tax and related payables attributable to common and equivalents	(110)	(12)	(66,429)
Distributable Earnings attributable to common and equivalents	$ 302,789	$ 290,408	$ 566,951
Distributable Earnings per share of common and equivalent[4]	$ 1.56	$ 1.50	$ 3.13
Retained capital per share of common and equivalent[4][5]	(0.14)	(0.12)	(0.24)
Net distribution per share of common and equivalent[4]	$ 1.42	$ 1.38	$ 2.89

(1) Common and equivalents refers to Class A shares outstanding and RSUs that participate in distributions.
(2) Represents the estimated current corporate, local and non-U.S. taxes as well as the payable under Apollo's tax receivable agreement.
(3) Distributable earnings before certain payables represents Distributable Earnings before the deduction for the estimated current corporate taxes and the payable under Apollo's tax receivable agreement.
(4) Per share calculations are based on end of period Distributable Earnings Shares Outstanding, which consist of total Class A shares outstanding and RSUs that participate in distributions (collectively referred to as "common & equivalents").
(5) Retained capital is withheld pro-rata from common and equivalent holders and AOG unitholders.

Summary of Non-U.S. GAAP Measures

The table below sets forth a reconciliation of net income attributable Apollo Global Management, LLC to our non-U.S. GAAP performance measures for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
		(in thousands)	
Net Income Attributable to Apollo Global Management, LLC	**$ 402,850**	**$ 134,497**	**$ 168,229**
Net income attributable to Non-Controlling Interests in consolidated entities and Appropriated Partners' Capital	5,789	21,364	157,011
Net income attributable to Non-Controlling Interests in the Apollo Operating Group	561,668	194,634	404,682
Net Income	**$ 970,307**	**$ 350,495**	**$ 729,922**
Income tax provision	90,707	26,733	147,245
Income Before Income Tax Provision	**$ 1,061,014**	**$ 377,228**	**$ 877,167**
Transaction-related charges and equity-based compensation	57,042	39,793	34,895
Net income attributable to Non-Controlling Interests in consolidated entities	(5,789)	(21,364)	(157,011)

Realized investment and other loss	35,365	30,520	96,132
Net interest loss	(39,019)	(26,533)	(19,098)
Non-cash revenues	(3,369)	(35,211)	(260,513)
Gain from reversal of tax receivable agreement liability	(3,208)	—	(32,182)
Other[(3)]	—	45,000	—
Distributable Earnings	**$ 647,932**	**$ 622,821**	**$ 1,429,780**
Taxes and related payables	(9,635)	(9,715)	(73,565)
Distributable Earnings After Taxes and Related Payables	**$ 638,297**	**$ 613,106**	**$ 1,356,215**

(1) Excludes carried interest income from a publicly traded business development company we manage.
(2) Includes equity-based compensation related to RSUs (excluding RSUs granted in connection with the 2007 private placement), share options and restricted share awards.
(3) Includes a reserve of $45 million accrued during the year ended December 31, 2015 in connection with an SEC regulatory matter principally concerning the acceleration of fees from fund portfolio companies.

Liquidity and Capital Resources

Historical

Although we have managed our historical liquidity needs by looking at deconsolidated cash flows, our historical consolidated statements of cash flows reflect the cash flows of Apollo, as well as those of the consolidated Apollo funds.

The primary cash flow activities of Apollo are:

- Generating cash flow from operations;
- Making investments in Apollo funds;
- Meeting financing needs through credit agreements; and
- Distributing cash flow to equity holders and Non-Controlling Interests.

Primary cash flow activities of the consolidated Apollo funds and VIEs are:

- Raising capital from their investors, which have been reflected historically as Non-Controlling Interests of the consolidated subsidiaries in our financial statements;
- Using capital to make investments;
- Generating cash flow from operations through distributions, interest and the realization of investments;
- Distributing cash flow to investors; and
- Issuing debt to finance investments (CLOs).

While primarily met by cash flows generated through fee income and carried interest income received, working capital needs have also been met (to a limited extent) through borrowings as described in note 11 to the consolidated financial statements.

We determine whether to make capital commitments to our funds in excess of our minimum required amounts based on a variety of factors, including estimates regarding our liquidity resources over the estimated time period during which commitments will have to be funded, estimates regarding the amounts of capital that may be appropriate for other funds that we are in the process of raising or are considering raising, and our general working capital requirements.

Cash Flows

Significant amounts from our consolidated statements of cash flows for the years ended December 31, 2016, 2015 and 2014 are summarized and discussed within the table and corresponding commentary below:

	For the Years Ended December 31,		
	2016	2015	2014
		(in thousands)	
Operating Activities	$ 615,260	$ 582,673	$ (372,917)
Investing Activities	(182,761)	(202,936)	13,432
Financing Activities	(236,157)	(968,078)	485,611
Net Increase (Decrease) in Cash and Cash Equivalents	$ 196,342	$ (588,341)	$ 126,126

Operating Activities

Our net cash provided by (used in) operating activities was $615.3 million, $582.7 million and $(372.9) million during the years ended December 31, 2016, 2015 and 2014, respectively. These amounts were primarily driven by:

- net income of $970.3 million, $350.5 million and $729.9 million during the years ended December 31, 2016, 2015 and 2014, respectively, as well as non-cash adjustments, net of $3.6 million, $12.0 million and $214.0 million, respectively;
- a net (increase) decrease in our carried interest receivable of $(613.2) million, $303.3 million and $1.4 billion during the years ended December 31, 2016, 2015 and 2014, respectively, due to a change in the fair value of our funds that generate carried interest of $829.0 million, $181.5 million and $397.4 million during the years ended December 30, 2016, 2015 and 2014, respectively, offset by fund distributions to the Company of $215.8 million, $449.3 million and $1.8 billion during years ended December 31, 2016, 2015 and 2014, respectively;

- purchases of investments held by consolidated VIEs in the amount of $581.2 million, $521.2 million and $10.3 billion, offset by proceeds from sales of investments held by consolidated VIEs in the amount of $592.9 million, $409.2 million and $8.5 billion during the years ended December 31, 2016, 2015 and 2014, respectively;
- a net (decrease) increase in changes to other assets and other liabilities of consolidated VIEs in the amount of $(3.7) million, $(135.8) million and $126.2 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- a net increase (decrease) in due from and due to related parties in the amount of $37.0 million, $14.0 million and $(349.9) million during the years ended December 31, 2016, 2015 and 2014, respectively;
- a net (decrease) increase in accrued compensation and benefits in the amount of $(1.7) million, $(9.9) million and $16.2 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- a net increase (decrease) in our profit sharing payable of $227.8 million, $(122.6) million and $(518.0) million during the years ended December 31, 2016, 2015 and 2014, respectively, due to profit sharing expense of $381.6 million, $100.1 million and $276.2 million during the years ended December 31, 2016, 2015 and 2014, respectively, offset by payments of $127.1 million, $239.2 million and $833.6 million during the years ended December 31, 2016, 2015 and 2014, respectively; and
- an increase (decrease) in cash held at consolidated VIEs of $16.7 million, $256.6 million and $(13.8) million during the years ended December 31, 2016, 2015 and 2014, respectively.

Investing Activities

Our net cash (used in) provided by investing activities was $(182.8) million, $(202.9) million and $13.4 million during the years ended December 31, 2016, 2015 and 2014, respectively. These amounts were primarily driven by:

- net cash contributions to our equity method investments of $122.2 million, $172.8 million and $33.6 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- issuance of related party loans of $8.6 million and $25.0 million during years ended December 31, 2016 and 2015, respectively;
- proceeds from sales of investments in the amount of $25.0 million and $50.0 million during years ended December 31, 2015 and 2014, respectively; and
- purchases of investments in the amount of $46.9 million and $25.0 million during years ended December 31, 2016 and 2015, respectively.

Financing Activities

Our net cash (used in) provided by financing activities was $(236.2) million, $(968.1) million and $485.6 million during the during the years ended December 31, 2016, 2015 and 2014, respectively. These amounts were primarily driven by:

- cash distributions paid to our Class A shareholders of $239.1 million, $354.4 million, and $506.0 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- cash distributions paid to the Non-Controlling Interest holders in the Apollo Operating Group of $269.8 million, $453.3 million and $816.4 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- payments made towards the satisfaction of our tax receivable agreement liability of $48.4 million and $32.0 million during the years ended December 31, 2015 and 2014, respectively;
- purchases of Class A shares of $13.4 million and $3.1 million during the years ended December 31, 2016 and 2015, respectively;
- net distributions related to deliveries of Class A shares in settlement of RSUs of $40.7 million, $78.9 million and $0.4 million during the years ended December 31, 2016, 2015 and 2014, respectively;
- issuance of debt (net of repayments of principal) held by consolidated VIEs in the amount of $1.9 billion during the year ended December 31, 2014; and
- issuance of debt of $532.7 million and $534.0 million during the years ended December 31, 2016 and 2014, respectively, offset by repayments of debt of $200.0 million and $250.0 million during the years ended December 31, 2016 and 2014, respectively.

Distributions

In addition to other distributions such as payments pursuant to the tax receivable agreement, see note 14 to the consolidated financial statements for information regarding the quarterly distributions which were made at the sole discretion of the Company's manager during 2016, 2015 and 2014.

Future Cash Flows

Our ability to execute our business strategy, particularly our ability to increase our AUM, depends on our ability to establish new funds and to raise additional investor capital within such funds. Our liquidity will depend on a number of factors, such as our ability to project our financial performance, which is highly dependent on our funds and our ability to manage our projected costs, fund performance, our access to credit facilities, our being in compliance with existing credit agreements, as well as industry and market trends. Also during economic downturns the funds we manage might experience cash flow issues or liquidate entirely. In these situations we might be asked to reduce or eliminate the management fee and incentive fees we charge, which could adversely impact our cash flow in the future.

An increase in the fair value of our funds' investments, by contrast, could favorably impact our liquidity through higher management fees where the management fees are calculated based on the net asset value, gross assets and adjusted assets. Additionally, higher carried interest income not yet realized would generally result when investments appreciate over their cost basis which would not have an impact on the Company's cash flow.

As of December 31, 2016, Fund VII's and Fund VI's remaining investments and escrow cash were valued at 103% and 82% of the fund's unreturned capital, respectively, which was below the required escrow ratio of 115%. As a result, these funds are required to place in escrow current and future carried interest income distributions to the general partner until the specified return ratio of 115% is met (at the time of a future distribution) or upon liquidation.

On April 20, 2010, the Company announced that it entered into a strategic relationship agreement with CalPERS. The strategic relationship agreement provides that Apollo will reduce fees charged to CalPERS on funds it manages, or in the future will manage, solely for CalPERS by $125 million over a five-year period or as close a period as required to provide CalPERS with that benefit. The agreement further provides that Apollo will not use a placement agent in connection with securing any future capital commitments from CalPERS. As of December 31, 2016, the Company had reduced fees charged to CalPERS on the funds it manages by approximately $103.8 million.

Although we expect to pay distributions according to our distribution policy, we may not pay distributions according to our policy, or at all, if, among other things, we do not have the cash necessary to pay the intended distributions. To the extent we do not have cash on hand sufficient to pay distributions, we may have to borrow funds to pay distributions, or we may determine not to pay distributions. The declaration, payment and determination of the amount of our quarterly distributions are at the sole discretion of our manager.

In February 2016, Apollo adopted a plan to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through a reduction of Class A shares to be issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the Company's 2007 Omnibus Equity Incentive Plan (the "2007 Equity Plan"), which we refer to as net share settlement. Under the share repurchase program, shares may be repurchased from time to time in open market transactions, in privately negotiated transactions or otherwise, with the size and timing of these repurchases depending on legal requirements, price, market and economic conditions and other factors. During the year ended December 31, 2016, the Company repurchased and canceled 1.0 million Class A shares for $12.9 million and, in connection with net share settlements, reduced Class A shares to be issued to employees under the 2007 Equity Plan by 2.7 million Class A shares resulting in a payment by the Company of $40.7 million to satisfy the applicable withholding obligation. See note 12 to the consolidated financial statements for further information regarding the Company's net share settlement during the year ended December 31, 2016.

On March 11, 2016, it was announced that Apollo intended to embark on a program to purchase $50 million of AINV's common stock, subject to certain regulatory approvals. Under the program, shares may be purchased from time to time in open market transactions and in accordance with applicable law. As of December 31, 2016, Apollo had purchased approximately 871 thousand shares, or approximately $4.9 million of AINV's common stock.

Carried interest income from our funds can be distributed to us on a current basis, but is subject to repayment by the subsidiaries of the Apollo Operating Group that act as general partner of such funds in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, to the extent of their ownership interest, subject to certain limitations, the obligations of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. Pursuant to the shareholders agreement dated July 13, 2007, as amended (the "Shareholders Agreement"), we agreed to indemnify each of our Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of Fund IV, Fund V and Fund VI (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that our Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that our Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation to return previously distributed carried interest income with respect to Fund IV, Fund V and Fund VI, we will be obligated to reimburse our Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though we did not receive the distribution to which that general partner obligation related.

On March 11, 2016, the maturity date of both the Term Facility and the Revolver Facility (each as defined in note 11 to our consolidated financial statements) were extended by two years and as a result, the maturity date is now January 18, 2021. The extension was determined to be a modification of the 2013 AMH Credit Facilities in accordance with U.S. GAAP.

On May 27, 2016, AMH issued $500 million in aggregate principal amount of its 4.400% Senior Notes due 2026 (the “2026 Senior Notes”). The 2026 Senior Notes will mature on May 27, 2026. In connection with the issuance of the 2026 Senior Notes, $200 million of the proceeds were used to repay a portion of the Term Facility outstanding with third party lenders at par. See note 11 to the consolidated financial statements for further information regarding the Company’s debt arrangements.

On February 3, 2017, the Company declared a cash distribution of $0.45 per Class A share, which will be paid on February 28, 2017 to holders of record on February 21, 2017.

Athene

Athene Holding was founded in 2009 to capitalize on favorable market conditions in the dislocated life insurance sector. Athene Holding, through its subsidiaries, is a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. The products and services offered by Athene include: fixed and fixed indexed annuity products; reinsurance services offered to third-party annuity providers; and institutional products, such as funding agreements. Athene Holding became an effective registrant on December 9, 2016 under the U.S. Securities Exchange Act of 1934, as amended, and trades on the New York Stock Exchange (NYSE) under the symbol “ATH”. Apollo, through its subsidiaries, managed or advised $70.8 billion of AUM in accounts owned by or related to Athene (the “Athene Accounts”) as of December 31, 2016.

Investment Management Agreements - Athene Asset Management

Apollo, through its consolidated subsidiary, AAM, provides asset management services to Athene, including asset allocation services, direct asset management services, asset and liability matching management, mergers and acquisitions asset diligence hedging and other asset management services and receives management fees for providing these services.

As of December 31, 2016, AAM managed $66.1 billion of AUM in the Athene Accounts on which the Company earns a gross management fee of 0.40% per annum with certain limited exceptions.

AAM discounts certain fees due from Athene. For the total dollar amount of all liabilities sourced through Athene’s organic distribution channels during 2016 in excess of $5.1 billion (subject to certain exceptions, “Excess Liabilities”), AAM agreed to discount fees as follows:

- During 2016, a discount of 0.40% per annum multiplied by such Excess Liabilities. The 2016 discount relating to such Excess Liabilities was intended to reasonably approximate a full discount of the AAM fee on the assets relating to such Excess Liabilities during the remainder of the 2016 calendar year.
- For 2017, a discount of 0.20% per annum multiplied by such Excess Liabilities, resulting in a reasonable approximation of a 0.20% fee on the assets relating to such Excess Liabilities during the 2017 calendar year.
- For 2018 and thereafter, a discount of 0.075% per annum, resulting in a reasonable approximation of a 0.325% fee on the assets relating to such Excess Liabilities during the 2018 calendar year and thereafter.

Investment Advisory Agreement - AAME

Apollo, through AAME, provides investment advisory services to Athene and receives a gross fee of 0.10% per annum on the Athene assets it advises. As of December 31, 2016, AAME provided investment advisory services with respect to $4.7 billion of AUM in the Athene Accounts, of which $0.3 billion is sub-advised by the Company.

Sub-Advisory Agreement and Fund Investments

Apollo provides sub-advisory services with respect to a portion of the assets in the Athene Accounts, pursuant to a master sub-advisory agreement among AAM and certain other Apollo subsidiaries. In addition from time to time, Athene also

invests in funds and investment vehicles that Apollo manages. The Company broadly refers to "Athene Sub-Advised" AUM as those assets in the Athene Accounts which the Company explicitly sub-advises as well as those assets in the Athene Accounts which are invested directly in funds and investment vehicles Apollo manages ("Athene Assets Directly Invested"). As of December 31, 2016, the Athene Sub-Advised AUM totaled $15.7 billion, of which $2.7 billion was Athene Assets Directly Invested.

With respect to assets in the Athene Accounts which the Company explicitly sub-advises, the Company earns up to 0.40% per annum on assets up to $10 billion and 0.35% per annum on all such assets in excess of $10 billion, with certain limited exceptions. These fees are in addition to the gross management fee of 0.40% per annum paid to AAM on the portion of these assets that it manages and the gross fee of 0.10% per annum paid to AAME on the portion of these assets that it advises. A majority of the assets in the Athene Accounts which the Company explicitly sub-advises are in accounts that invest in high-grade credit asset classes, such as CLO debt, commercial mortgage backed securities and insurance-linked securities.

With respect to Athene Assets Directly Invested, Apollo receives management fees and carried interest, if applicable, directly from the relevant funds under the investment management agreements and other governing documents of such funds. Fees paid to the Company related to such fund investments vary from 0% per annum to 1.75% per annum with respect to management fees and 0% to 20% with respect to carried interest. These fees are in addition to the gross management fee of 0.40% per annum paid to AAM on the portion of these assets that it manages and the gross fee of 0.10% per annum paid to AAME on the portion of these assets that it advises.

The Company refers to the portion of the AUM in the Athene Accounts that is not Athene Sub-Advised AUM as "Athene Non-Sub-Advised" AUM. Accordingly, as of December 31, 2016, Athene Non-Sub-Advised AUM totaled $55.1 billion, which includes $4.4 billion of Athene AUM for which AAME provides investment advisory services. Apollo incurs all expenses associated with its provision of services to Athene.

On April 4, 2014, Athene Holding completed an initial closing of a private placement offering of common equity in which it raised $1.048 billion of primary commitments from third-party institutional and certain existing investors in Athene Holding (the "Athene Private Placement"). In connection with the Athene Private Placement, Athene raised an additional $80 million of third party capital at $26 per share, all of which was used to buy back a portion of the shares of one of its existing investors at a price of $26 per share in a transaction that was consummated on April 29, 2014. As announced on June 24, 2014, a second closing of the Athene Private Placement occurred in which Athene Holding raised $170 million of commitments primarily from employees of Athene and its affiliates at a price per common share of Athene Holding of $26. The Athene Private Placement offering was concluded in the first quarter of 2015 with a final closing of $60 million of additional commitments from affiliates of Athene.

In connection with the Athene Private Placement, the AAA limited partnership agreement was amended to provide that AAA will distribute to its shareholders their pro rata portion of the common shares of Athene Holding (or proceeds thereof) as such shares are released from their contractual lock-up over a period beginning 7.5 months after Athene's IPO and ending 15 months following Athene's IPO pursuant to the Athene registration rights agreement. On November 8, 2016, AAA announced a conditional distribution of 10,766,297 shares of Athene to its unitholders. This distribution was conditioned on pricing the initial public offering of shares of Athene Holding. AAA unitholders entitled to receive shares of Athene Holding on the record date were given the opportunity by Athene to sell into the initial public offering subject to certain lock-up restrictions applicable to Apollo and others. On December 8, 2016, Athene announced its IPO of 27,000,000 shares of Athene Holding, which was increased to 31,050,000 shares of Athene Holding after the underwriter's exercise of its over-allotment option, at a price to the public of $40 per share. The shares of Athene Holding began trading on the New York Stock Exchange on December 9, 2016 under the symbol "ATH." In total 10,766,297 Athene shares were distributed to AAA unitholders, or 0.14105129 shares of Athene Holding per AAA unit. In addition to the distribution to AAA unitholders, AAA Investments, L.P. distributed 771,653 shares of Athene Holding to Apollo in satisfaction of the carried interest obligation associated with the distribution to AAA unitholders and 6,073 shares of Athene Holding in respect of Apollo's approximate 0.06% equity ownership interest in AAA Investments, L.P.

In connection with the Athene Private Placement, Athene Holding amended its registration rights agreement to provide (i) investors who are party to such agreement, including AAA Investments, the potential opportunity for liquidity on their shares of Athene Holding through sales in registered public offerings over a 15 month period beginning on the date of Athene Holding's initial public offering (the "Athene IPO") and (ii) Athene Holding the right to cause certain investors who are party to the registration rights agreement to include in such offerings a certain percentage of their common shares of Athene Holding subject to the terms and conditions set forth in the agreement. However, pursuant to the registration rights agreement, any shares of Athene Holding held by Apollo (other than shares distributed to AAA in payment of carried interest to be sold for cash) will not be subject to such arrangements and instead will be subject to a lock-up period of two years following the effective date of the registration statement relating to the Athene IPO, but Athene Holding will not have the right to cause any shares owned by Apollo to be included in the Athene IPO or any follow-on offering. Apollo may elect to receive payment of carried interest in cash or in common shares of Athene Holding (valued at the then fair market value); and if the General Partner elects to receive payment of such carried interest

in cash, then common shares of Athene Holding shall be distributed to the General Partner and immediately sold by the General Partner to pay for such carried interest in cash.

Distributions to Managing Partners and Contributing Partners

The three Managing Partners who became employees of Apollo on July 13, 2007 each receive a $100,000 base salary. Additionally, our Managing Partners can receive other forms of compensation. Any additional consideration will be paid to them in their proportional ownership interest in Holdings. Additionally, as a result of the tax receivable agreement, 85% of any tax savings APO Corp. recognizes will be paid to the Managing Partners.

Subsequent to the 2007 Reorganization, the Contributing Partners retained ownership interests in subsidiaries of the Apollo Operating Group. Therefore, any distributions that flow up to management or general partner entities in which the Contributing Partners retained ownership interests are shared pro rata with the Contributing Partners who have a direct interest in such entities prior to flowing up to the Apollo Operating Group. These distributions are considered compensation expense.

The Contributing Partners are entitled to receive the following:

- Profit sharing related to private equity carried interest income, from direct ownership of advisory entities. Any changes in fair value of the underlying fund investments would result in changes to Apollo Global Management, LLC's profit sharing payable;
- Additional consideration based on their proportional ownership interest in Holdings; and
- As a result of the tax receivable agreement, 85% of any tax savings APO Corp. recognizes will be paid to the Contributing Partners.

Potential Future Costs

We may make grants of RSUs or other equity-based awards to employees and independent directors that we appoint in the future.

Critical Accounting Policies

This Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon the consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from these estimates. A summary of our significant accounting policies is presented in note 2 to our consolidated financial statements. The following is a summary of our accounting policies that are affected most by judgments, estimates and assumptions.

Consolidation

The Company assesses all entities with which it is involved for consolidation on a case by case basis depending on the specific facts and circumstances surrounding each entity. Pursuant to the consolidation guidance, the Company first evaluates whether it holds a variable interest in an entity. Apollo factors in all economic interests including proportionate interests through related parties, to determine if such interests are to be considered a variable interest. As Apollo's interest in many of these entities is solely through market rate performance fees and/or insignificant indirect interests through related parties, Apollo is generally not considered to have a variable interest in many of these entities under the guidance and no further consolidation analysis is performed. For entities where the Company has determined that it does hold a variable interest, the Company performs an assessment to determine whether each of those entities qualify as a VIE.

The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and therefore certain of Apollo's funds may qualify as VIEs under the variable interest model whereas others may qualify as VOEs under the voting interest model. The granting of substantive kick-out rights is a key consideration in determining whether a limited partnership or similar entity is a VIE and whether or not that entity should be consolidated.

Under the voting interest model, Apollo consolidates those entities it controls through a majority voting interest. Apollo does not consolidate those voting interest entities ("VOEs") in which substantive kick-out rights have been granted to the unaffiliated investors to either dissolve the fund or remove the general partner.

Under the variable interest model, Apollo consolidates those entities where it is determined that the Company is the primary beneficiary of the entity. The Company is determined to be the primary beneficiary if it holds a controlling financial interest in the VIE defined as possessing both (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. If Apollo alone is not considered to have a controlling financial interest in the VIE but Apollo and its related parties under common control in the aggregate have a controlling financial interest in the VIE, Apollo will still be deemed to be the primary beneficiary if it is the party within the related party group that is most closely associated with the VIE. If Apollo and its related parties not under common control in the aggregate have a controlling financial interest in a VIE, then Apollo is deemed to be the primary beneficiary if substantially all the activities of the entity are performed on behalf of Apollo. Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes initially involved with the VIE and reconsiders that conclusion continuously. Investments and redemptions (either by Apollo, related parties of Apollo or third parties) or amendments to the governing documents of the respective entity may affect an entity's status as a VIE or the determination of the primary beneficiary.

The assessment of whether an entity is a VIE and the determination of whether Apollo should consolidate such VIE requires judgment by our management. Those judgments include, but are not limited to: (i) determining whether the total equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support, (ii) evaluating whether the holders of equity investment at risk, as a group, can make decisions that have a significant effect on the success of the entity, (iii) determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive the expected residual returns from an entity and (iv) evaluating the nature of the relationship and activities of those related parties with shared power or under common control for purposes of determining which party within the related-party group is most closely associated with the VIE. Judgments are also made in determining whether a member in the equity group has a controlling financial interest including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. This analysis considers all relevant economic interests including proportionate interests held through related parties.

Revenue Recognition

Carried Interest Income (Loss) from Related Parties. We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Such carried interest income generally is earned based upon a fixed percentage of realized and unrealized gains of various funds after meeting any applicable hurdle rate or threshold minimum. Carried interest income from certain of the funds that we manage is subject to contingent repayment and is generally paid to us as particular investments made by the funds are realized. If, however, upon liquidation of a fund, the aggregate amount paid to us as carried interest exceeds the amount actually due to us based upon the aggregate performance of the fund, the excess (in certain cases net of taxes) is required to be returned by us to that fund. For a majority of our credit funds, once the annual carried interest income has been determined, there generally is no look-back to prior periods for a potential contingent repayment, however, carried interest income on certain other credit funds can be subject to contingent repayment at the end of the life of the fund. We have elected to adopt Method 2 from U.S. GAAP guidance applicable to accounting for management fees based on a formula, and under this method, we accrue carried interest income quarterly based on fair value of the underlying investments and separately assess if contingent repayment is necessary. The determination of carried interest income and contingent repayment considers both the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. See "Investments, at Fair Value" below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our private equity, credit and real estate funds.

Management Fees from Related Parties. The management fees related to our private equity funds are generally based on a fixed percentage of the committed capital or invested capital. The corresponding fee calculations that consider committed capital or invested capital are both objective in nature and therefore do not require the use of significant estimates or assumptions. Management fees related to our credit funds, by contrast, can be based on net asset value, gross assets, adjusted cost of all unrealized portfolio investments, capital commitments, adjusted assets, capital contributions, or stockholders' equity all as defined in the respective partnership agreements. The credit management fee calculations that consider net asset value, gross assets, adjusted cost of all unrealized portfolio investments and adjusted assets are normally based on the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. The management fees related to our real estate funds are generally based on a specific percentage of the funds' stockholders' equity or committed or net invested capital or the capital accounts of the limited partners. See "Investments, at Fair Value" below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our private equity, credit and real estate funds.

Investments, at Fair Value

On a quarterly basis, Apollo utilizes valuation committees consisting of members from senior management, to review and approve the valuation results related to the investments of the funds it manages. For certain publicly traded vehicles managed by Apollo, a review is performed by an independent board of directors. The Company also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. The Company performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analyses. However, because of the inherent uncertainty of valuation, the estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Private Equity Investments. The majority of the illiquid investments within our private equity funds are valued using the market approach, which provides an indication of fair value based on a comparison of the subject company to comparable publicly traded companies and transactions in the industry.

Market Approach. The market approach is driven by current market conditions, including actual trading levels of similar companies and, to the extent available, actual transaction data of similar companies. Judgment is required by management when assessing which companies are similar to the subject company being valued. Consideration may also be given to any of the following factors: (1) the subject company's historical and projected financial data; (2) valuations given to comparable companies; (3) the size and scope of the subject company's operations; (4) the subject company's individual strengths and weaknesses; (5) expectations relating to the market's receptivity to an offering of the subject company's securities; (6) applicable restrictions on transfer; (7) industry and market information; (8) general economic and market conditions; and (9) other factors deemed relevant. Market approach valuation models typically employ a multiple that is based on one or more of the factors described above. Enterprise value as a multiple of EBITDA is common and relevant for most companies and industries, however, other industry specific multiples are employed where available and appropriate. Sources for gaining additional knowledge related to comparable companies include public filings, annual reports, analyst research reports, and press releases. Once a comparable company set is determined, we review certain aspects of the subject company's performance and determine how its performance compares to the group and to certain individuals in the group. We compare certain measurements such as EBITDA margins, revenue growth over certain time periods, leverage ratios and growth opportunities. In addition, we compare our entry multiple and its relation to the comparable set at the time of acquisition to understand its relation to the comparable set on each measurement date.

Income Approach. For investments where the market approach does not provide adequate fair value information, we rely on the income approach. The income approach is also used to validate the market approach within our private equity funds. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology for the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are significant assumptions related to the subject company's expected results, the determination of a terminal value and a calculated discount rate, which is normally based on the subject company's weighted average cost of capital, or "WACC." The WACC represents the required rate of return on total capitalization, which is comprised of a required rate of return on equity, plus the current tax-effected rate of return on debt, weighted by the relative percentages of equity and debt that are typical in the industry. The most critical step in determining the appropriate WACC for each subject company is to select companies that are comparable in nature to the subject company and the credit quality of the subject company. Sources for gaining additional knowledge about the comparable companies include public filings, annual reports, analyst research reports, and press releases. The general formula then used for calculating the WACC considers the after-tax rate of return on debt capital and the rate of return on common equity capital, which further considers the risk-free rate of return, market beta, market risk premium and small stock premium, if applicable. The variables used in the WACC formula are inferred from the comparable market data obtained. The Company evaluates the comparable companies selected and concludes on WACC inputs based on the most comparable company or analyzes the range of data for the investment.

The value of liquid investments, where the primary market is an exchange (whether foreign or domestic), is determined using period end market prices. Such prices are generally based on the close price on the date of determination.

Credit Investments. The majority of investments in Apollo's credit funds are valued based on quoted market prices and valuation models.

Quoted market prices are valued based on the average of the "bid" and the "ask" quotes provided by multiple brokers wherever possible without any adjustments. Apollo designates certain brokers to value specific securities. In order to determine the designated brokers, Apollo considers the following: (i) brokers with which Apollo has previously transacted, (ii) the underwriter of the security and (iii) active brokers indicating executable quotes. In addition, when valuing a security based on broker quotes wherever possible Apollo tests the standard deviation amongst the quotes received and the variance between the concluded fair

value and the value provided by a pricing service. When broker quotes are not available, we use pricing service quotes or other sources to mark a position. When relying on a pricing service as a primary source, (i) Apollo analyzes how the price has moved over the measurement period, (ii) reviews the number of brokers included in the pricing service's population and (iii) validates the valuation levels with Apollo's pricing team and traders.

Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing a model based approach to determine fair value. Valuation approaches used to estimate the fair value of illiquid credit investments also may include the market approach and the income approach, as previously described above. The valuation approaches used consider, as applicable, market risks, credit risks, counterparty risks and foreign currency risks.

Real Estate Investments. For the CMBS portfolio of Apollo's funds, the estimated fair value of the CMBS portfolio is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Additionally, the loans held-for-investment are stated at the principal amount outstanding, net of deferred loan fees and costs. The loans in Apollo's real estate funds are evaluated for possible impairment on a quarterly basis. For Apollo's real estate funds, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers, and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

Certain of our funds may also enter into foreign currency exchange contracts, total return swap contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized. Realized gains or losses are recognized when contracts are settled. Derivative contracts such as total return swaps and credit default swaps are recorded at fair value as an asset or liability, with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the total return or credit default swap contract and the original contract price. Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers.

The fair values of the investments in our funds can be impacted by changes to the assumptions used in the underlying valuation models. For further discussion on the impact of changes to valuation assumptions see "Item 7A. Quantitative and Qualitative Disclosures About Market Risk—Sensitivity" in this Annual Report on Form 10-K. There have been no material changes to the valuation approaches utilized during the periods that our financial results are presented in this report.

Fair Value of Financial Instruments

Except for the Company's debt obligations (each as defined in note 11 to our consolidated financial statements), Apollo's financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value. See "—Investments, at Fair Value" above. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Financial instruments' carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings.

Profit Sharing Expense. Profit sharing expense is primarily a result of agreements with our Contributing Partners and employees to compensate them based on the ownership interest they have in the general partners of the Apollo funds. Therefore, changes in the fair value of the underlying investments in the funds we manage and advise affect profit sharing expense. The Contributing Partners and employees are allocated approximately 30% to 50% of the total carried interest income which is driven primarily by changes in fair value of the underlying fund's investments and is treated as compensation expense. Additionally, profit sharing expenses paid may be subject to clawback from employees, former employees and Contributing Partners to the extent not indemnified. When applicable, the accrual for potential clawback of previously distributed profit sharing amounts, which is a component of due from related parties on the consolidated statements of financial condition, represents all amounts previously distributed to employees, former employees and Contributing Partners that would need to be returned to the general partner if the Apollo funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner receivable, however, would not become realized until the end of a fund's life.

Changes in the fair value of the contingent obligations that were recognized in connection with certain Apollo acquisitions are reflected in the Company's consolidated statements of operations as profit sharing expense.

The Incentive Pool enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying consolidated financial statements. The Company adopted the Incentive Pool to attract and retain, and provide incentive to, partners and employees of the Company and to more closely align the overall compensation of partners and employees with the overall realized performance of the Company. Allocations to the Incentive Pool and to its participants contain both a fixed and a discretionary component and may vary year-to-year depending on the overall realized performance of the Company and the contributions and performance of each participant. There is no assurance that the Company will continue to compensate individuals through performance-based incentive arrangements in the future and there may be periods when the executive committee of the Company's manager determines that allocations of realized carried interest income are not sufficient to compensate individuals, which may result in an increase in salary, bonus and benefits.

Fair Value Option. Apollo has elected the fair value option for the Company's investment in Athene Holding, the assets and liabilities of certain consolidated VIEs (including CLOs) and the Company's investments in certain CLOs. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by the consolidated VIEs that otherwise would not have been carried at fair value. See notes 4, 5, and 6 for further disclosure on the investments in Athene Holding and financial instruments of the consolidated VIEs for which the fair value option has been elected.

Equity-Based Compensation. Equity-based compensation is accounted for in accordance with U.S. GAAP, which requires that the cost of employee services received in exchange for an award is generally measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are recognized over the relevant service period. Further, as required under U.S. GAAP, the Company estimates forfeitures using industry comparables or historical trends for equity-based awards that are not expected to vest. Apollo's equity-based awards consist of, or provide rights with respect to, AOG Units, RSUs, share options, restricted shares, AHL Awards and other equity-based compensation awards. For more information regarding Apollo's equity-based compensation awards, see note 13 to our consolidated financial statements. The Company's assumptions made to determine the fair value on grant date and the estimated forfeiture rate are embodied in the calculations of compensation expense.

A significant part of our compensation expense is derived from amortization of RSUs. The fair value of all RSU grants after March 29, 2011 is based on the grant date fair value, which considers the public share price of the Company. RSUs are comprised of Plan Grants, which generally do not pay distributions until vested and, for grants made after 2011, the underlying shares are generally issued by March 15th after the year in which they vest, and Bonus Grants, which pay distributions on both vested and unvested grants and are generally issued after vesting on an approximate two-month lag. For Plan Grants, the grant date fair value is based on the public share price of the Company, and is discounted for transfer restrictions and lack of distributions until vested. For Bonus Grants, the grant date fair value is based on the public share price of the Company, and is discounted for transfer restrictions.

We utilized the present value of a growing annuity formula to calculate a discount for the lack of pre-vesting distributions on Plan Grant RSUs. The weighted average for the inputs utilized for the shares granted during the years ended December 31, 2016, 2015 and 2014 are presented in the table below for Plan Grants:

	For the Years Ended December 31,		
	2016	2015	2014
Distribution Yield(1)	6.6%	11.0%	14.3%
Cost of Equity Capital Rate(2)	11.3%	9.1%	12.3%

(1) Calculated based on the historical distributions paid during the twelve months ended December 31, 2016 and the Company's Class A share price as of the measurement date of the grant on a weighted average basis.

(2) Assumes a discount rate that was equivalent to the opportunity cost of foregoing distributions on unvested Plan Grant RSUs as of the valuation date, based on the Capital Asset Pricing Model ("CAPM"). CAPM is a commonly used mathematical model for developing expected returns.

The following table summarizes the weighted average discounts for Plan Grants for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Plan Grants:			
Discount for the lack of distributions until vested[(1)]	14.0%	26.0%	32.5%

(1) Based on the present value of a growing annuity calculation.

We utilized the Finnerty Model to calculate a marketability discount on the Plan Grant and Bonus Grant RSUs to account for the lag between vesting and issuance. The Finnerty Model provides for a valuation discount reflecting the holding period restriction embedded in a restricted security preventing its sale over a certain period of time.

The Finnerty Model proposes to estimate a discount for lack of marketability such as transfer restrictions by using an option pricing theory. This model has gained recognition through its ability to address the magnitude of the discount by considering the volatility of a company's stock price and the length of restriction. The concept underpinning the Finnerty Model is that a restricted security cannot be sold over a certain period of time. Further simplified, a restricted share of equity in a company can be viewed as having forfeited a put on the average price of the marketable equity over the restriction period (also known as an "Asian Put Option"). If we price an Asian Put Option and compare this value to that of the assumed fully marketable underlying security, we can effectively estimate the marketability discount.

The inputs utilized in the Finnerty Model are (i) length of holding period, (ii) volatility and (iii) distribution yield. The weighted average for the inputs utilized for the shares granted during the years ended December 31, 2016, 2015 and 2014 are presented in the table below for Plan Grants and Bonus Grants:

	For the Years Ended December 31,		
	2016	2015	2014
Plan Grants			
Holding Period Restriction (in years)	0.5	0.6	0.6
Volatility[(1)]	24.7%	25.7%	31.4%
Distribution Yield[(2)]	6.6%	11.0%	14.3%
Bonus Grants			
Holding Period Restriction (in years)	0.2	0.2	0.2
Volatility[(1)]	20.6%	22.2%	32.1%
Distribution Yield[(2)]	6.5%	10.8%	13.7%

(1) The Company determined the expected volatility based on the volatility of the Company's Class A share price as of the grant date with consideration to comparable companies.

(2) Calculated based on the historical distributions paid during the twelve months ended December 31, 2016, 2015 and 2014 and the Company's Class A share price as of the measurement date of the grant on a weighted average basis.

The following table summarizes the weighted average marketability discounts for Plan Grants and Bonus Grants for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Plan Grants:			
Marketability discount for transfer restrictions[(1)]	3.8%	4.2%	5.1%
Bonus Grants:			
Marketability discount for transfer restrictions[(1)]	2.1%	2.2%	3.2%

(1) Based on the Finnerty Model calculation.

After the grant date fair value is determined, an estimated forfeiture rate is applied. The estimated fair value was determined and recognized over the vesting period on a straight-line basis. A 4.0% forfeiture rate is estimated for RSUs, based on the Company's historical attrition rate as well as industry comparable rates. If employees are no longer associated with Apollo or

if there is no turnover, we will revise our estimated compensation expense to the actual amount of expense based on the RSUs vested at the reporting date in accordance with U.S. GAAP.

Bonus Grants constitute a component of the discretionary annual compensation awarded to certain of our professionals. For 2016, the Company has increased the default portion of annual compensation by approximately $11.0 million to be awarded as a discretionary Bonus Grant relative to the portion awarded in previous years. The increase in the proportion of discretionary annual compensation awarded as a Bonus Grant will be offset by a decrease in discretionary annual cash bonuses. These changes are intended to further align the interests of Apollo's employees and stakeholders and strengthen the long-term commitment of our partners and employees.

Fair Value Measurements

See note 6 to our consolidated financial statements for a discussion of the Company's fair value measurements.

Recent Accounting Pronouncements

A list of recent accounting pronouncements that are relevant to Apollo and its industry is included in note 2 to our consolidated financial statements.

Off-Balance Sheet Arrangements

In the normal course of business, we engage in off-balance sheet arrangements, including transactions in derivatives, guarantees, commitments, indemnifications and potential contingent repayment obligations. See note 15 to our consolidated financial statements for a discussion of guarantees and contingent obligations and note 2 for a discussion of derivatives.

Contractual Obligations, Commitments and Contingencies

As of December 31, 2016, the Company's material contractual obligations consisted of lease obligations, contractual commitments as part of the ongoing operations of the funds and debt obligations. Fixed and determinable payments due in connection with these obligations are as follows:

	2017	2018	2019	2020	2021	Thereafter	Total
				(in thousands)			
Operating lease obligations[1]	$ 34,705	$ 30,969	$ 30,198	$ 13,473	$ 4,572	$ 6,853	$ 120,770
Other long-term obligations[2]	19,229	6,398	3,694	1,365	1,365	1,365	33,416
2013 AMH Credit Facilities - Term Facility[3]	6,355	6,355	6,355	6,355	300,318	—	325,738
2013 AMH Credit Facilities - Revolver Facility[4]	625	625	625	625	8	—	2,508
2024 Senior Notes [5]	20,000	20,000	20,000	20,000	20,000	548,333	648,333
2026 Senior Notes [6]	22,000	22,000	22,000	22,000	22,000	596,984	706,984
2014 AMI Term Facility I	289	289	289	289	14,682	—	15,838
2014 AMI Term Facility II	285	285	16,575	—	—	—	17,145
2016 AMI Term Facility I	312	312	312	312	17,865	—	19,113
2016 AMI Term Facility II	278	278	278	278	14,058	—	15,170
Obligations as of December 31, 2016	$ 104,078	$ 87,511	$ 100,326	$ 64,697	$ 394,868	$ 1,153,535	$ 1,905,015

(1) The Company has entered into sublease agreements and is expected to contractually receive approximately $1.1 million over the life of the agreements.
(2) Includes (i) payments on management service agreements related to certain assets and (ii) payments with respect to certain consulting agreements entered into by the Company. Note that a significant portion of these costs are reimbursable by funds.
(3) $300 million of the outstanding Term Facility matures in January 2021. The interest rate on the $300 million Term Facility as of December 31, 2016 was 2.12%. See note 11 of the consolidated financial statements for further discussion of the 2013 AMH Credit Facilities.
(4) The commitment fee as of December 31, 2016 on the $500 million undrawn Revolver Facility was 0.125%. See note 11 of the consolidated financial statements for further discussion of the 2013 AMH Credit Facilities.
(5) $500 million of the 2024 Senior Notes matures in May 2024. The interest rate on the 2024 Senior Notes as of December 31, 2016 was 4.00%. See note 11 of the consolidated financial statements for further discussion of the 2024 Senior Notes.
(6) $500 million of the 2026 Senior Notes matures in May 2026. The interest rate on the 2026 Senior Notes as of December 31, 2016 was 4.40%. See note 11 of the consolidated financial statements for further discussion of the 2026 Senior Notes.

Note: Due to the fact that the timing of certain amounts to be paid cannot be determined or for other reasons discussed below, the following contractual commitments have not been presented in the table above.

(i) As noted previously, we have entered into a tax receivable agreement with our Managing Partners and Contributing Partners which requires us to pay to our Managing Partners and Contributing Partners 85% of any tax savings received by APO Corp. from our step-up in tax basis. The tax savings achieved may not ensure that we have sufficient cash available to pay this liability and we might be required to incur additional debt to satisfy this liability.

(ii) Debt amounts related to the consolidated VIEs are not presented in the table above as the Company is not a guarantor of these non-recourse liabilities.

(iii) In connection with the Stone Tower acquisition, the Company agreed to pay the former owners of Stone Tower a specified percentage of any future carried interest income earned from certain of the Stone Tower funds, CLOs and strategic investment accounts. This contingent consideration liability is remeasured to fair value at each reporting period until the obligations are satisfied. See note 15 to the consolidated financial statements for further information regarding the contingent consideration liability.

(iv) Commitments from certain of our management companies and general partners to contribute to the funds we manage and certain related parties.

Commitments

Certain of our management companies and general partners are committed to contribute to the funds we manage and certain related parties. While a small percentage of these amounts are funded by us, the majority of these amounts have historically been funded by our related parties, including certain of our employees and certain Apollo funds. The table below presents the commitment and remaining commitment amounts of Apollo and its related parties, the percentage of total fund commitments of Apollo and its related parties, the commitment and remaining commitment amounts of Apollo only (excluding related parties), and the percentage of total fund commitments of Apollo only (excluding related parties) for each private equity, credit and real estate fund as of December 31, 2016 as follows ($ in millions):

Fund	Apollo and Related Party Commitments	% of Total Fund Commitments	Apollo Only (Excluding Related Party) Commitments	Apollo Only (Excluding Related Party) % of Total Fund Commitments	Apollo and Related Party Remaining Commitments	Apollo Only (Excluding Related Party) Remaining Commitments
Private Equity:

(1) Figures for U.S. RE Fund I include base, additional, and co-investment commitments. A co-investment vehicle within U.S. RE Fund I is denominated in pound sterling and translated into U.S. dollars at an exchange rate of £1.00 to $1.23 as of December 31, 2016.
(2) Apollo’s commitment in these funds is denominated in Euros and translated into U.S. dollars at an exchange rate of €1.00 to $1.05 as of December 31, 2016.

On April 30, 2015, Apollo entered into a revolving credit agreement with AAA Investments (“the AAA Investments Credit Agreement”). Under the terms of the AAA Investments Credit Agreement, the Company shall make available to AAA Investments one or more advances at the discretion of AAA Investments in the aggregate amount not to exceed a balance of $10.0

million at an applicable rate of LIBOR plus 1.5%. The Company receives an annual commitment fee of 0.125% on the unused portion of the loan. As of December 31, 2016, $4.0 million had been advanced by the Company and remained outstanding on the AAA Investments Credit Agreement.

The 2013 AMH Credit Facilities, 2024 Senior Notes and 2026 Senior Notes will have future impacts on our cash uses. See note 11 of our consolidated financial statements for information regarding the Company's debt arrangements.

Contingent Obligations—Carried interest income in private equity and certain credit and real estate funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. If all of the existing investments became worthless, the amount of cumulative revenues recognized by Apollo through December 31, 2016 that would be reversed approximates $2.9 billion. Management views the possibility of all of the investments becoming worthless as remote. Carried interest income is affected by changes in the fair values of the underlying investments in the funds that Apollo manages. Valuations, on an unrealized basis, can be significantly affected by a variety of external factors including, but not limited to, bond yields and industry trading multiples. Movements in these items can affect valuations quarter to quarter even if the underlying business fundamentals remain stable.

Additionally, at the end of the life of certain funds that the Company manages, there could be a payment due to a fund by the Company if the Company as general partner has received more carried interest income than was ultimately earned. This general partner obligation amount, if any, will depend on final realized values of investments at the end of the life of each fund or as otherwise set forth in the respective limited partnership agreement or other governing document of the fund. As of December 31, 2016, the Company recorded a general partner obligation to return previously distributed carried interest income of $116.6 million. See note 14 to the consolidated financial statements for further information regarding the general partner obligation.

As of December 31, 2016, one of the Company's subsidiaries had unfunded contingent commitments of $22.1 million, to facilitate fundings at closing by lead arrangers for syndicated term loans issued by portfolio companies of a fund managed by Apollo. The commitments expire by March 15, 2017. As of February 13, 2017, the unfunded commitment was approximately $1.0 million.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our predominant exposure to market risk is related to our role as investment manager and general partner for our funds and the sensitivity to movements in the fair value of their investments and resulting impact on carried interest income and management fee revenues. Our direct investments in the funds also expose us to market risk whereby movements in the fair values of the underlying investments will increase or decrease both net gains (losses) from investment activities and income (loss) from equity method investments. For a discussion of the impact of market risk factors on our financial instruments see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Investments, at Fair Value."

The fair value of our financial assets and liabilities of our funds may fluctuate in response to changes in the value of investments, foreign exchange, commodities and interest rates. The net effect of these fair value changes impacts the gains and losses from investments in our consolidated statements of operations. However, the majority of these fair value changes are absorbed by the Non-Controlling Interests.

The Company is subject to a concentration risk related to the investors in its funds. Although there are more than 1,000 investors in Apollo's active private equity, credit and real estate funds, no individual investor accounts for more than 10% of the total committed capital to Apollo's active funds.

Risks are analyzed across funds from the "bottom up" and from the "top down" with a particular focus on asymmetric risk. We gather and analyze data, monitor investments and markets in detail, and constantly strive to better quantify, qualify and circumscribe relevant risks.

Each risk management process is subject to our overall risk tolerance and philosophy and our enterprise-wide risk management framework. This framework includes identifying, measuring and managing market, credit and operational risks at each segment, as well as at the fund and Company level.

Each segment runs its own investment and risk management process subject to our overall risk tolerance and philosophy:

- The investment process of our private equity funds involves a detailed analysis of potential acquisitions, and investment management teams assigned to monitor the strategic development, financing and capital deployment decisions of each portfolio investment.

- Our credit funds continuously monitor a variety of markets for attractive trading opportunities, applying a number of traditional and customized risk management metrics to analyze risk related to specific assets or portfolios, as well as, fund-wide risks.

At the direction of the Company's manager, the Company has established a risk committee comprised of various members of senior management including the Company's Chief Financial Officer, Chief Legal Officer, and the Company's Chief Risk Officer. The risk committee is tasked with assisting the Company's manager in monitoring and managing enterprise-wide risk. The risk committee generally meets on a quarterly basis and reports to senior management of the Company's manager at such times as the committee deems appropriate and at least on an annual basis.

On at least a monthly basis, the Company's risk department provides a summary analysis of fund level market and credit risk to the portfolio managers of the Company's funds and the heads of the various business segments. On a periodic basis, the Company's risk department presents a consolidated summary analysis of fund level market and credit risk to the Company's risk committee. In addition, the Company's Chief Risk Officer reviews specific investments from the perspective of risk mitigation and discusses such analysis with the Company's risk committee and/or the executive committee of the Company's manager at such times as the Company's Chief Risk Officer determines such discussions are warranted. On an annual basis, the Company's Chief Risk Officer provides senior management of the Company's manager with a comprehensive overview of risk management along with an update on current and future risk initiatives.

Impact on Management Fees—Our management fees are based on one of the following:

- capital commitments to an Apollo fund;
- capital invested in an Apollo fund;
- the gross, net or adjusted asset value of an Apollo fund, as defined; or
- as otherwise defined in the respective agreements.

Management fees could be impacted by changes in market risk factors and management could consider an investment permanently impaired as a result of (i) such market risk factors causing changes in invested capital or in market values to below cost, in the case of our private equity funds and certain credit funds or (ii) such market risk factors causing changes in gross or net asset value, for the credit funds. The proportion of our management fees that are based on NAV is dependent on the number and types of our funds in existence and the current stage of each fund's life cycle.

Impact on Advisory and Transaction Fees—We earn transaction fees relating to the negotiation of private equity, credit and real estate transactions and may obtain reimbursement for certain out-of-pocket expenses incurred. Subsequently, on a quarterly or annual basis, ongoing advisory fees, and additional transaction fees in connection with additional purchases, dispositions, or follow-on transactions, may be earned. Management Fee Offsets and any broken deal costs, if applicable, are reflected as a reduction to advisory and transaction fees from related parties. Advisory and transaction fees will be impacted by changes in market risk factors to the extent that they limit our opportunities to engage in private equity, credit and real estate transactions or impair our ability to consummate such transactions. The impact of changes in market risk factors on advisory and transaction fees is not readily predicted or estimated.

Impact on Carried Interest Income—We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Our carried interest income will be impacted by changes in market risk factors. However, several major factors will influence the degree of impact:

- the performance criteria for each individual fund in relation to how that fund's results of operations are impacted by changes in market risk factors;
- whether such performance criteria are annual or over the life of the fund;
- to the extent applicable, the previous performance of each fund in relation to its performance criteria; and
- whether each funds' carried interest distributions are subject to contingent repayment.

As a result, the impact of changes in market risk factors on carried interest income will vary widely from fund to fund. The impact is heavily dependent on the prior and future performance of each fund, and therefore is not readily predicted or estimated.

Market Risk—We are directly and indirectly affected by changes in market conditions. Market risk generally represents the risk that values of assets and liabilities or revenues and expenses will be adversely affected by changes in market conditions. Market risk is inherent in each of our investments and activities, including equity investments, loans, short-term borrowings, long-term debt, hedging instruments, credit default swaps and derivatives. Just a few of the market conditions that may shift from time

to time, thereby exposing us to market risk, include fluctuations in interest and currency exchange rates, equity prices, changes in the implied volatility of interest rates and price deterioration. Volatility in debt and equity markets can impact our pace of capital deployment, the timing of receipt of transaction fee revenues and the timing of realizations. These market conditions could have an impact on the value of fund investments and rates of return. Accordingly, depending on the instruments or activities impacted, market risks can have wide ranging, complex adverse effects on our results from operations and our overall financial condition. We monitor market risk using certain strategies and methodologies which management evaluates periodically for appropriateness. We intend to continue to monitor this risk going forward and continue to monitor our exposure to all market factors.

Interest Rate Risk—Interest rate risk represents exposure we and our funds have to instruments whose values vary with the change in interest rates. These instruments include, but are not limited to, loans, borrowings and derivative instruments. We may seek to mitigate risks associated with the exposures by having our funds take offsetting positions in derivative contracts. Hedging instruments allow us to seek to mitigate risks by reducing the effect of movements in the level of interest rates, changes in the shape of the yield curve, as well as, changes in interest rate volatility. Hedging instruments used to mitigate these risks may include related derivatives such as options, futures and swaps.

Credit Risk—Certain of our funds are subject to certain inherent risks through their investments.

Certain of our entities invest substantially all of their excess cash in open-end money market funds and money market demand accounts, which are included in cash and cash equivalents. The money market funds invest primarily in government securities and other short-term, highly liquid instruments with a low risk of loss. We continually monitor the funds' performance in order to manage any risk associated with these investments.

Certain of our funds hold derivative instruments that contain an element of risk in the event that the counterparties may be unable to meet the terms of such agreements. We seek to minimize our risk exposure by limiting the counterparties with which our funds enter into contracts to banks and investment banks who meet established credit and capital guidelines. As of December 31, 2016, we do not expect any counterparty to default on its obligations and therefore do not expect to incur any loss due to counterparty default.

Foreign Exchange Risk—Foreign exchange risk represents exposures our funds have to changes in the values of current fund holdings and future cash flows denominated in other currencies and investments in non-U.S. companies. The types of investments exposed to this risk include investments in foreign subsidiaries, foreign currency-denominated loans, foreign currency-denominated transactions, and various foreign exchange derivative instruments whose values fluctuate with changes in currency exchange rates or foreign interest rates. Instruments used to mitigate this risk are foreign exchange options, currency swaps, futures and forwards. These instruments may be used to help insulate our funds against losses that may arise due to volatile movements in foreign exchange rates and/or interest rates.

In our capacity as investment manager of the funds we manage, we continuously monitor a variety of markets for attractive opportunities for managing risk. For example, certain of the funds we manage may put in place foreign exchange hedges or borrowings with respect to certain foreign currency denominated investments to provide a hedge against foreign exchange exposure.

Non-U.S. Operations—We conduct business throughout the world and are continuing to expand into foreign markets. We currently have offices outside the U.S. in Toronto, London, Frankfurt, Madrid, Luxembourg, Mumbai, Delhi, Singapore, Hong Kong and Shanghai and have been strategically growing our international presence. Our fund investments and our revenues are primarily derived from our U.S. operations. With respect to our non-U.S. operations, we are subject to risk of loss from currency fluctuations, social instability, changes in governmental policies or policies of central banks, expropriation, nationalization, unfavorable political and diplomatic developments and changes in legislation relating to non-U.S. ownership. Our funds also invest in the securities of companies which are located in non-U.S. jurisdictions. As we continue to expand globally, we will continue to focus on monitoring and managing these risk factors as they relate to specific non-U.S. investments.

Sensitivity

Interest Rate Risk—Apollo has debt obligations that accrue interest at variable rates. Interest rate changes may therefore affect the amount of our interest payments, future earnings and cash flows. Based on our debt obligations payable as of December 31, 2016 and 2015, we estimate that interest expense would increase on an annual basis, in the event interest rates were to increase by one percentage point, by approximately $3.6 million and $5.3 million, respectively.

In addition to our debt obligations, we are also subject to interest rate risk through the investments of our funds. For funds that pay management fees based on NAV or other bases that are sensitive to market value fluctuations, we anticipate our management fees would change consistent with the increase or decrease experienced by the underlying funds' portfolios. In the event that interest rates were to increase by one percentage point, we estimate that management fees earned on a segment basis

that were dependent upon estimated fair value would decrease by approximately $15.4 million and $10.9 million during the years ended December 31, 2016 and 2015, respectively.

Credit Risk—Similar to interest rate risk, we are also subject to credit risk through the investments of our funds. In the event that credit spreads were to increase by one percentage point, we estimate that management fees earned on a segment basis that were dependent upon estimated fair value would decrease by approximately $22.1 million and $18.3 million during the years ended December 31, 2016 and 2015, respectively.

Foreign Exchange Risk—We estimate for the years ended December 31, 2016 and 2015, a 10% decline in the rate of exchange of all foreign currencies against the U.S. dollar would result in the following declines in management fees, carried interest income and income from equity method investments:

	For the Years Ended December 31,	
	2016	2015
Management fees	$ 4,956	$ 2,717
Carried interest income	3,236	1,953
Income from equity method investments	156	22

Net Gains From Investment Activities and Income From Equity Method Investments—Our assets and unrealized gains, and our related equity and net income are sensitive to changes in the valuations of our funds' underlying investments and could vary materially as a result of changes in our valuation assumptions and estimates. See "Item 7. Management's Discussion and Analysis of Financial Conditions and Results of Operations—Critical Accounting Policies—Investments, at Fair Value" for details related to the valuation methods that are used and the key assumptions and estimates employed by such methods. We also quantify the Level III investments that are included on our consolidated statements of financial condition by valuation methodology in note 6 to the consolidated financial statements. We employ a variety of valuation methods. Furthermore, the investments that we manage but are not on our consolidated statements of financial condition, and therefore impact carried interest, also employ a variety of valuation methods of which no single methodology is used more than any other. Changes in fair value will have the following impacts before a reduction of profit sharing expense and Non-Controlling Interests in the Apollo Operating Group and on a pre-tax basis on our results of operations for the years ended December 31, 2016 and 2015:

Management Fees—Management fees from the funds in our credit segment are based on the net asset value of the relevant fund, gross assets, capital commitments or invested capital, each as defined in the respective management agreements. Changes in the fair values of the investments in credit funds that earn management fees based on net asset value or gross assets will have a direct impact on the amount of management fees that are earned. Management fees earned from our credit segment on a segment basis that were dependent upon estimated fair value during the years ended December 31, 2016 and 2015 would decrease by approximately $46.0 million and $50.5 million, respectively, if the fair values of the investments held by such funds were 10% lower during the same respective periods.

Management fees for our private equity, real estate and certain credit funds, excluding AAA, generally are charged on either (a) a fixed percentage of committed capital over a stated investment period or (b) a fixed percentage of invested capital of unrealized portfolio investments. Changes in values of investments could indirectly affect future management fees from private equity funds by, among other things, reducing the funds' access to capital or liquidity and their ability to currently pay the management fees or if such change resulted in a write-down of investments below their associated invested capital.

Carried Interest Income—Carried interest income from most of our credit, private equity and real estate funds generally is earned based on achieving specified performance criteria and is impacted directly by changes in the fair value of the funds' investments. We anticipate that a 10% decline in the fair values of investments held by all of the credit, private equity and real estate funds at December 31, 2016 and 2015 would decrease carried interest income on a segment basis for the years ended December 31, 2016 and 2015 as presented in the table below:

	For the Years Ended December 31,	
	2016	2015
10% Decline in Fair Value of Investments Held		
Credit	$ 174,439	$ 140,461
Private Equity	578,021	202,171
Real Estate	21,684	10,865

Net Gains From Investment Activities—Net gains from investment activities related to the Company's investment in Athene Holding would decrease by approximately $65.8 million and $51.0 million for the years ended December 31, 2016 and

2015, respectively, if the fair value of the Company's investment in Athene Holding decreased by 10% during the same respective periods.

Income From Equity Method Investments—For select Apollo funds, our share of income from equity method investments as a general partner in such funds is derived from unrealized gains or losses on investments in funds included in the consolidated financial statements. For funds in which we have an interest, but are not consolidated, our share of investment income is limited to our direct investments in the funds.

We anticipate that a 10% decline in the fair value of investments at December 31, 2016 and 2015 would result in an approximate $88.2 million and $63.1 million decrease in investment income in our consolidated financial statements, respectively.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Apollo Global Management, LLC
New York, New York

We have audited the accompanying consolidated statements of financial condition of Apollo Global Management, LLC and subsidiaries (the "Company") as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2016. We also have audited the Company's internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Apollo Global Management, LLC and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

1. ORGANIZATION

Apollo Global Management, LLC ("AGM", together with its consolidated subsidiaries, the "Company" or "Apollo") is a global alternative investment manager whose predecessor was founded in 1990. Its primary business is to raise, invest and manage private equity, credit and real estate funds as well as strategic investment accounts, on behalf of pension, endowment and sovereign wealth funds, as well as other institutional and individual investors. For these investment management services, Apollo receives management fees generally related to the amount of assets managed, transaction and advisory fees and carried interest income related to the performance of the respective funds that it manages. Apollo has three primary business segments:

- ***Private equity***—primarily invests in control equity and related debt instruments, convertible securities and distressed debt investments;
- ***Credit***—primarily invests in non-control corporate and structured debt instruments including performing, stressed and distressed investments across the capital structure; and
- ***Real estate***—primarily invests in real estate equity for the acquisition and recapitalization of real estate assets, portfolios, platforms and operating companies, and real estate debt including first mortgage and mezzanine loans, preferred equity and commercial mortgage backed securities.

Organization of the Company

The Company was formed as a Delaware limited liability company on July 3, 2007 and completed a reorganization of its predecessor businesses on July 13, 2007 (the "2007 Reorganization"). The Company is managed and operated by its manager, AGM Management, LLC, which in turn is indirectly wholly-owned and controlled by Leon Black, Joshua Harris and Marc Rowan, our Managing Partners.

As of December 31, 2016, the Company owned, through five intermediate holding companies that include APO Corp., a Delaware corporation that is a domestic corporation for U.S. federal income tax purposes, APO Asset Co., LLC, a Delaware limited liability company that is a disregarded entity for U.S. federal income tax purposes, APO (FC), LLC, an Anguilla limited liability company that is treated as a corporation for U.S. federal income tax purposes, APO (FC II), LLC, an Anguilla limited liability company that is treated as a corporation for U.S. federal income tax purposes and APO UK (FC), Limited, a United Kingdom incorporated company that is treated as a corporation for U.S. federal income tax purposes (collectively, the "Intermediate Holding Companies"), 46.3% of the economic interests of, and operated and controlled all of the businesses and affairs of, the Apollo Operating Group through its wholly-owned subsidiaries.

AP Professional Holdings, L.P., a Cayman Islands exempted limited partnership ("Holdings"), is the entity through which the Managing Partners and certain of the Company's other partners (the "Contributing Partners") indirectly beneficially own interests in each of the partnerships that comprise the Apollo Operating Group ("AOG Units"). As of December 31, 2016, Holdings owned the remaining 53.7% of the economic interests in the Apollo Operating Group. The Company consolidates the financial results of the Apollo Operating Group and its consolidated subsidiaries. Holdings' ownership interest in the Apollo Operating Group is reflected as a Non-Controlling Interest in the accompanying consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"). The consolidated financial statements include the accounts of the Company, its wholly-owned or majority-owned subsidiaries, the consolidated entities which are considered to be variable interest entities ("VIEs") and for which the Company is considered the primary beneficiary, and certain entities which are not considered VIEs but which the Company controls through a majority voting interest. Intercompany accounts and transactions, if any, have been eliminated upon consolidation.

Certain reclassifications, when applicable, have been made to the prior period's consolidated financial statements and notes to conform to the current period's presentation and are disclosed accordingly.

Principles of Consolidation—The types of entities with which Apollo is involved generally include subsidiaries (e.g., general partners and management companies related to the funds the Company manages), entities that have all the attributes of an

investment company (e.g., funds) and securitization vehicles (e.g., collateralized loan obligations). Each of these entities is assessed for consolidation on a case by case basis depending on the specific facts and circumstances surrounding that entity.

In February 2015, the Financial Accounting Standards Board ("FASB") issued new consolidation guidance which changed the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. During the second quarter of 2015, the Company elected to adopt this new guidance using the modified retrospective method, which resulted in an effective date of adoption of January 1, 2015. Restatement of prior period results is not required. Amounts presented for the year ended December 31, 2015 in the consolidated statements of operations reflect the adoption of this accounting guidance as of January 1, 2015.

Pursuant to the consolidation guidance, the Company first evaluates whether it holds a variable interest in an entity. Fees that are customary and commensurate with the level of services provided, and where the Company does not hold other economic interests in the entity that would absorb more than an insignificant amount of the expected losses or returns of the entity, would not be considered a variable interest. Apollo factors in all economic interests including proportionate interests through related parties, to determine if such interests are considered a variable interest. As Apollo's interests in many of these entities are solely through market rate performance fees and/or insignificant indirect interests through related parties, Apollo is not considered to have a variable interest in many of these entities under the new guidance and no further consolidation analysis is performed. For entities where the Company has determined that it does hold a variable interest, the Company performs an assessment to determine whether each of those entities qualify as a variable interest entity ("VIE").

The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and therefore certain of Apollo's funds may qualify as VIEs under the variable interest model whereas others may qualify as voting interest entities ("VOEs") under the voting interest model. The granting of substantive kick-out rights is a key consideration in determining whether a limited partnership or similar entity is a VIE and whether or not that entity should be consolidated.

Under the variable interest model, Apollo consolidates those entities where it is determined that the Company is the primary beneficiary of the entity. The Company is determined to be the primary beneficiary when it has a controlling financial interest in the VIE, which is defined as possessing both (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. When Apollo alone is not considered to have a controlling financial interest in the VIE but Apollo and its related parties under common control in the aggregate have a controlling financial interest in the VIE, Apollo will be deemed the primary beneficiary if it is the party that is most closely associated with the VIE. When Apollo and its related parties not under common control in the aggregate have a controlling financial interest in the VIE, Apollo would be deemed to be the primary beneficiary if substantially all the activities of the entity are performed on behalf of Apollo.

Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes initially involved with the VIE and reconsiders that conclusion continuously. Investments and redemptions (either by Apollo, related parties of Apollo or third parties) or amendments to the governing documents of the respective entity may affect an entity's status as a VIE or the determination of the primary beneficiary.

The assessment of whether an entity is a VIE and the determination of whether Apollo should consolidate such VIE requires judgment by our management. Those judgments include, but are not limited to: (i) determining whether the total equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support, (ii) evaluating whether the holders of equity investment at risk, as a group, can make decisions that have a significant effect on the success of the entity, (iii) determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive the expected residual returns from an entity and (iv) evaluating the nature of the relationship and activities of those related parties with shared power or under common control for purposes of determining which party within the related-party group is most closely associated with the VIE. Judgments are also made in determining whether a member in the equity group has a controlling financial interest including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. This analysis considers all economic interests including proportionate interests through related parties.

Assets and liabilities of the consolidated VIEs are primarily shown in separate sections within the consolidated statements of financial condition. For additional disclosures regarding VIEs, see note 5.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Under the voting interest model, Apollo consolidates those entities it controls through a majority voting interest. Apollo does not consolidate those VOEs in which substantive kick-out rights have been granted to the unrelated investors to either dissolve the fund or remove the general partner.

Cash and Cash Equivalents —Apollo considers all highly liquid short-term investments with original maturities of 90 days or less when purchased to be cash equivalents. Substantially all amounts are on deposit in interest bearing accounts with major financial institutions and exceed insured limits.

Restricted Cash—Restricted Cash represents cash deposited at a bank, which is pledged as collateral in connection with leased premises.

Deferred Revenue—Apollo earns management fees subject to the Management Fee Offset (described below). When advisory and transaction fees are earned by the management company, the Management Fee Offset reduces the management fee obligation of the fund. When the management company receives cash for advisory and transaction fees, a certain percentage of such advisory and/or transaction fees, as applicable, is allocated as a credit to reduce future management fees, otherwise payable by such fund. Such credit is recorded as deferred revenue in the consolidated statements of financial condition. A portion of any excess advisory and transaction fees may be required to be returned to the limited partners of certain funds upon such fund's liquidation. As the management fees earned by the management company are presented on a gross basis, any Management Fee Offsets calculated are presented as a reduction to advisory and transaction fees from related parties in the consolidated statements of operations.

Additionally, Apollo earns advisory fees pursuant to the terms of the advisory agreements with certain of the portfolio companies that are owned by the funds. When Apollo receives a payment from a portfolio company that exceeds the advisory fees earned at that point in time, the excess payment is recorded as deferred revenue in the consolidated statements of financial condition. The advisory agreements with the portfolio companies vary in duration and the associated fees are received monthly, quarterly or annually. Deferred revenue is reversed and recognized as revenue over the period that the agreed upon services are performed.

Under the terms of the funds' partnership agreements, Apollo is normally required to bear organizational expenses over a set dollar amount and placement fees or costs in connection with the offering and sale of interests in the funds to investors. The placement fees are payable to placement agents, who are independent third parties that assist in identifying potential investors, securing commitments to invest from such potential investors, preparing or revising offering and marketing materials, developing strategies for attempting to secure investments by potential investors and/or providing feedback and insight regarding issues and concerns of potential investors, when a limited partner either commits or funds a commitment to a fund. In certain instances the placement fees are paid over a period of time. Based on the management agreements with the funds, Apollo considers placement fees and organizational costs paid in determining if cash has been received in excess of the management fees earned. Placement fees and organizational costs are normally the obligation of Apollo but can be paid for by the funds. When these costs are paid by the fund, the resulting obligations are included within deferred revenue. The deferred revenue balance will also be reduced during future periods when management fees are earned but not paid.

Due from/to Related Parties—Apollo considers its existing partners, employees, certain former employees, portfolio companies of the funds and nonconsolidated private equity, credit and real estate funds to be related parties.

Fair Value of Financial Instruments —GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of market price observability used in measuring financial instruments at fair value. Market price observability is affected by a number of factors, including the type of financial instrument, the characteristics specific to the financial instrument and the state of the marketplace, including the existence and transparency of transactions between market participants. Financial instruments with readily available quoted prices in active markets generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Financial instruments measured and reported at fair value are classified and disclosed based on the observability of inputs used in the determination of fair values, as follows:

- *Level I* - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The type of financial instruments included in Level I include listed equities and listed derivatives. As required by U.S. GAAP, the Company does not adjust the quoted price for these financial instruments, even in situations where the Company holds a large position and the sale of such position would likely deviate from the quoted price.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

- *Level II* - Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Financial instruments that are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives where the fair value is based on observable inputs. These financial instruments exhibit higher levels of liquid market observability as compared to Level III financial instruments. The Company subjects broker quotes to various criteria in making the determination as to whether a particular financial instrument would qualify for treatment as a Level II financial instrument. These criteria include, but are not limited to, the number and quality of broker quotes, the standard deviation of obtained broker quotes, and the percentage deviation from independent pricing services.

- *Level III* - Pricing inputs are unobservable for the financial instrument and includes situations where there is little observable market activity for the financial instrument. The inputs into the determination of fair value may require significant management judgment or estimation. Financial instruments that are included in this category generally include general and limited partner interests in corporate private equity and real estate funds, opportunistic credit funds, distressed debt and non-investment grade residual interests in securitizations and CDOs and CLOs where the fair value is based on observable inputs as well as unobservable inputs. When a security is valued based on broker quotes, the Company subjects those quotes to various criteria in making the determination as to whether a particular financial instrument would qualify for treatment as a Level II or Level III financial instrument. These criteria include, but are not limited to, the number and quality of the broker quotes, the standard deviations of the observed broker quotes, and the percentage deviation from independent pricing services.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument when the fair value is based on unobservable inputs.

In cases where a financial instrument that is measured and reported at fair value is transferred between levels of the fair value hierarchy, the Company accounts for the transfer as of the end of the reporting period.

On a quarterly basis, Apollo utilizes valuation committees consisting of members from senior management, to review and approve the valuation results related to the investments of the funds it manages. For certain publicly traded vehicles, a review is performed by an independent board of directors. The Company also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. The Company performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analyses. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Investments, at Fair Value—The Company follows U.S. GAAP attributable to fair value measurements which, among other things, requires enhanced disclosures about investments that are measured and reported at fair value. Investments, at fair value represent investments of the consolidated funds, investments of the consolidated VIEs and certain financial instruments for which the fair value option has been elected. The unrealized gains and losses resulting from changes in the fair value are reflected as net gains (losses) from investment activities and net gains (losses) from investment activities of the consolidated VIEs in the consolidated statements of operations.

Derivatives—The Company records derivatives as assets or liabilities on its consolidated statements of financial condition at fair value. On the date the Company enters into a derivative contract, it designates and documents the derivative contract as one of the following: (a) a hedge of a recognized asset or liability ("fair value hedge"), (b) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"), (c) a hedge of a net investment in a foreign operation ("net investment hedge") or (d) a derivative instrument not designated as a hedging instrument ("freestanding derivative"). The Company did not have any freestanding derivatives, fair value hedges or cash flow hedges as of December 31, 2016 or December 31, 2015. For net investment hedges, the Company records changes in the fair value of the derivative in the cumulative translation adjustment section of other comprehensive income to the extent it is effective as a hedge. The fair values of the derivative instruments are reflected in other assets and other liabilities on the consolidated statements of financial condition.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The Company formally documents at inception its hedge relationships, including identification of the hedging instruments and the hedged items, the Company's risk management objectives, its strategy for undertaking the hedge transaction and the method for evaluating effectiveness of its hedged transactions. At least quarterly, the Company also formally assesses whether the derivatives it designated in each hedging relationship are expected to be, and have been, highly effective in offsetting changes in estimated fair values of the hedged items. The ineffective portion of a net investment hedge, if any, is recognized in current period earnings.

The Company has elected to not offset derivative assets and liabilities or financial assets in its consolidated statements of financial condition, even when an enforceable master netting agreement is in place that provides the Company the right to offset derivative assets and liabilities in the same currency by specific derivative type or, in the event of default by the counterparty, to offset derivative assets and liabilities with the same counterparty.

Equity Method Investments—For investments in entities over which the Company exercises significant influence but which do not meet the requirements for consolidation and for which the Company has not elected the fair value option, the Company uses the equity method of accounting, whereby the Company records its share of the underlying income or loss of such entities. The carrying amounts of equity method investments are recorded in investments in the consolidated statements of financial condition. As the underlying entities that the Company manages and invests in are, for U.S. GAAP purposes, primarily investment companies which reflect their investments at estimated fair value, the carrying value of the Company's equity method investments in such entities approximates fair value.

Private Equity Investments

The value of liquid investments in Apollo's private equity funds, where the primary market is an exchange (whether foreign or domestic) is determined using period end market prices. Such prices are generally based on the close price on the date of determination.

Valuation approaches used to estimate the fair value of investments in Apollo's private equity funds that are less liquid include the market approach and the income approach. The market approach provides an indication of fair value based on a comparison of the subject company to comparable publicly traded companies and transactions in the industry. The market approach is driven more by current market conditions, including actual trading levels of similar companies and, to the extent available, actual transaction data of similar companies. Judgment is required by management when assessing which companies are similar to the subject company being valued. Consideration may also be given to such factors as the Company's historical and projected financial data, valuations given to comparable companies, the size and scope of the Company's operations, the Company's strengths, weaknesses, expectations relating to the market's receptivity to an offering of the Company's securities, applicable restrictions on transfer, industry and market information and assumptions, general economic and market conditions and other factors deemed relevant. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology in the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are assumptions of expected results, the determination of a terminal value and a calculated discount rate.

Credit Investments

The majority of investments in Apollo's credit funds are valued based on quoted market prices and valuation models. Quoted market prices are valued based on the average of the "bid" and the "ask" quotes provided by multiple brokers wherever possible without any adjustments. Apollo will designate certain brokers to use to value specific securities. In order to determine the designated brokers, Apollo considers the following: (i) brokers with which Apollo has previously transacted, (ii) the underwriter of the security and (iii) active brokers indicating executable quotes. In addition, when valuing a security based on broker quotes wherever possible Apollo tests the standard deviation amongst the quotes received and the variance between the concluded fair value and the value provided by a pricing service. When broker quotes are not available Apollo considers the use of pricing service quotes or other sources to mark a position. When relying on a pricing service as a primary source, Apollo (i) analyzes how the price has moved over the measurement period, (ii) reviews the number of brokers included in the pricing service's population and (iii) validates the valuation levels with Apollo's pricing team and traders.

Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing a model based approach to determine fair value. Valuation approaches used to estimate the fair value of illiquid credit investments also may include the market approach and the income approach, as previously described above. The valuation approaches used consider, as applicable, market risks, credit risks, counterparty risks and foreign currency risks.

Real Estate Investments

The estimated fair value of commercial mortgage-backed securities ("CMBS") in Apollo's real estate funds is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Additionally, the loans held-for-investment are stated at the principal amount outstanding, net of deferred loan fees and costs for certain investments. The loans in Apollo's real estate funds are evaluated for possible impairment on a quarterly basis. For Apollo's real estate funds, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

Certain of the private equity, credit, and real estate funds may also enter into foreign currency exchange contracts, total return swap contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized. Realized gains or losses are recognized when contracts are settled. Total return swap and credit default swap contracts are recorded at fair value as an asset or liability with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the total return or credit default swap contract and the original contract price. Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers.

Fair Value of Financial Instruments

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions.

Except for the Company's debt obligations (as described in note 11), Apollo's financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value. See "Investments, at Fair Value" above. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Financial instruments' carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings.

Fair Value Option—Apollo has elected the fair value option for the Company's investment in Athene Holding, the assets and liabilities of certain consolidated VIEs (including CLOs) and the Company's investments in certain CLOs. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by the consolidated VIEs that otherwise would not have been carried at fair value. See notes 4, 5, and 6 for further disclosure on the investments in Athene Holding and financial instruments of the consolidated VIEs for which the fair value option has been elected.

Financial Instruments held by Consolidated VIEs

During the second quarter of 2015, the Company adopted the measurement alternative included in the collateralized financing entity ("CFE") guidance using a modified retrospective approach by recording a cumulative-effect adjustment to shareholders' equity as of January 1, 2015. Restatement of prior period results was not required. Amounts presented for the year ended December 31, 2015 in the consolidated statements of operations reflect the adoption of this accounting guidance as of January 1, 2015. The Company measures both the financial assets and financial liabilities of the consolidated CLOs in its consolidated financial statements using the fair value of the financial assets of the consolidated CLOs, which are more observable than the fair value of the financial liabilities of the consolidated CLOs. As a result, the financial assets of the consolidated CLOs are measured at fair value and the financial liabilities are measured in consolidation as: (i) the sum of the fair value of the financial assets and the carrying value of any non-financial assets that are incidental to the operations of the CLOs less (ii) the sum of the fair value of any beneficial interests retained by the reporting entity (other than those that represent compensation for services) and the Company's carrying value of any beneficial interests that represent compensation for services. The resulting amount is allocated to the individual financial liabilities (other than the beneficial interest retained by the Company) using a reasonable and

consistent methodology. Under the measurement alternative, the Company's consolidated net income reflects the Company's own economic interests in the consolidated CLOs including (i) changes in the fair value of the beneficial interests retained by the Company and (ii) beneficial interests that represent compensation for collateral management services.

The consolidated VIEs hold investments that could be traded over-the-counter. Investments in securities that are traded on a securities exchange or comparable over-the-counter quotation systems are valued based on the last reported sale price at that date. If no sales of such investments are reported on such date, and in the case of over-the-counter securities or other investments for which the last sale date is not available, valuations are based on independent market quotations obtained from market participants, recognized pricing services or other sources deemed relevant, and the prices are based on the average of the "bid" and "ask" prices, or at ascertainable prices at the close of business on such day. Market quotations are generally based on valuation pricing models or market transactions of similar securities adjusted for security-specific factors such as relative capital structure priority and interest and yield risks, among other factors. When market quotations are not available, a model based approach is used to determine fair value.

As previously noted, the Company measures the debt obligations of the consolidated CLOs on the basis of the fair value of the financial assets of the consolidated CLOs.

Pending Deal Costs

Pending deal costs consist of certain costs incurred (e.g. research costs, due diligence costs, professional fees, legal fees and other related items) related to private equity, credit and real estate fund transactions that the Company is pursuing but which have not yet been consummated. These costs are deferred until such transactions are broken or successfully completed. A transaction is determined to be broken upon management's decision to no longer pursue the transaction. In accordance with the related fund agreements, in the event the deal is broken, all of the costs are generally reimbursed by the funds and considered in the calculation of the Management Fee Offset. These offsets are included in advisory and transaction fees from related parties, net in the Company's consolidated statements of operations. If a deal is successfully completed, Apollo is reimbursed by the fund or a fund's portfolio company for all costs incurred.

Fixed Assets

Fixed Assets consist primarily of leasehold improvements, furniture, fixtures and equipment, computer hardware and software and are recorded at cost, net of accumulated depreciation and amortization. Depreciation and amortization is calculated using the straight-line method over the assets' estimated useful lives and in the case of leasehold improvements the lesser of the useful life or the term of the lease. Expenditures for repairs and maintenance are charged to expense when incurred. The Company evaluates long-lived assets for impairment periodically and whenever events or changes in circumstances indicate the carrying amounts of the assets may be impaired.

Business Combinations

The Company accounts for business combinations using the acquisition method of accounting, under which the purchase price of the acquisition is allocated to the assets acquired and liabilities assumed using the fair values determined by management as of the acquisition date. Contingent consideration obligations that are elements of the consideration transferred are recognized as of the acquisition date as part of the fair value transferred in exchange for the acquired business. Acquisition-related costs incurred in connection with a business combination are expensed as incurred.

G***oodwill and Intangible Assets***

Goodwill represents the excess of cost over the fair value of identifiable net assets of an acquired business. Goodwill and other indefinite lived intangible assets are tested annually for impairment or more frequently if circumstances indicate impairment may have occurred.

The Company has historically performed its annual goodwill impairment test as of June 30 each year. During the year ended December 31, 2016, the Company voluntarily changed its annual impairment assessment date from June 30 to October 1. The change in measurement date represents a change in method of applying an accounting principle. This change is preferable because it better aligns the Company's goodwill impairment testing procedures with the completion of its annual financial statements and provides the Company with additional time to evaluate goodwill for impairment.

**APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)**

In connection with the change in the date of the annual goodwill impairment test, the Company performed a goodwill impairment test as of October 1, 2016 and did not identify any impairment. The change in accounting principle did not delay, accelerate or avoid an impairment charge. The Company determined that it would be impracticable to objectively determine projected cash flows and related valuation estimates that would have been used for each of its prior reporting periods without the use of hindsight. As such, the Company prospectively applied the change in the annual goodwill impairment assessment date beginning October 1, 2016.

Finite-lived intangible assets such as contractual rights to earn future management fees and incentive fees acquired in business combinations are amortized over their estimated useful lives, which are periodically re-evaluated for impairment or when circumstances indicate an impairment may have occurred. Apollo amortizes its identifiable finite-lived intangible assets using a method of amortization reflecting the pattern in which the economic benefits of the finite-lived intangible assets are consumed or otherwise used up. If that pattern cannot be reliably determined, Apollo uses the straight-line method of amortization.

Debt Issuance Costs

Debt issuance costs consist of costs incurred in obtaining financing and are amortized over the term of the financing using the effective interest method. These costs are recorded as a direct deduction from the carrying amount of the related debt liability on the consolidated statements of financial condition.

Foreign Currency

The Company may, from time to time, hold foreign currency denominated assets and liabilities. Such assets and liabilities are translated using the exchange rates prevailing at the end of each reporting period. The functional currency of the Company's international subsidiaries is the U.S. Dollar, as their operations are considered an extension of U.S. parent operations. Non-monetary assets and liabilities of the Company's international subsidiaries are remeasured into the functional currency using historical exchange rates specific to each asset and liability. The results of the Company's foreign operations are normally remeasured using an average exchange rate for the respective reporting period. All currency remeasurement adjustments are included within other income (loss), net in the consolidated statements of operations. Gains and losses on the settlement of foreign currency transactions are also included within other income (loss), net in the consolidated statements of operations.

Revenues

Revenues—Revenues are reported in three separate categories that include (i) advisory and transaction fees from related parties, net, which relate to the investments of the funds and may include individual monitoring agreements the Company has with the portfolio companies and debt investment vehicles of the private equity funds and credit funds; (ii) management fees from related parties, which are based on committed capital, invested capital, net asset value, gross assets or as otherwise defined in the respective agreements; and (iii) carried interest income (loss) from related parties, which is normally based on the performance of the funds subject to preferred return.

Management Fees from Related Parties—Management fees for private equity, credit, and real estate funds are recognized in the period during which the related services are performed in accordance with the contractual terms of the related agreement, and are generally based upon (1) a percentage of the capital committed during the commitment period, and thereafter based on the remaining invested capital of unrealized investments, or (2) net asset value, gross assets or as otherwise defined in the respective agreements. Included in management fees are certain expense reimbursements where the Company is considered the principal under the agreements and is required to record the expense and related reimbursement revenue on a gross basis.

Advisory and Transaction Fees from Related Parties, Net—Advisory and transaction fees, including directors' fees, are recognized when the underlying services rendered are substantially completed in accordance with the terms of the transaction and advisory agreements. Additionally, during the normal course of business, the Company incurs certain costs related to certain transactions that are not consummated ("broken deal costs"). These costs (e.g., research costs, due diligence costs, professional fees, legal fees and other related items) are determined to be broken deal costs upon management's decision to no longer pursue the transaction. In accordance with the related fund agreement, in the event the deal is deemed broken, all of the costs are reimbursed by the funds and then included as a component of the calculation of the Management Fee Offset (described below). If a deal is successfully completed, Apollo is reimbursed by the fund or fund's portfolio company for all costs incurred and no offset is generated. As the Company acts as an agent for the funds it manages, any transaction costs incurred and paid by the Company on behalf of the respective funds relating to successful or broken deals are recorded net on the Company's consolidated statements of operations, and any receivable from the respective funds is recorded in due from related parties on the consolidated statements of financial condition.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Advisory and transaction fees from related parties, net, also includes underwriting fees. Underwriting fees include gains, losses and fees, net of syndicate expenses, arising from securities offerings in which one of the Company's subsidiaries participates in the underwriter syndicate. Underwriting fees are recognized at the time the underwriting is completed and the income is reasonably assured and are included in the consolidated statements of operations. Underwriting fees recognized but not received are recorded in other assets on the consolidated statements of financial condition.

As a result of providing advisory services to certain private equity and credit portfolio companies, Apollo is generally entitled to receive fees for transactions related to the acquisition, in certain cases, and disposition of portfolio companies as well as ongoing monitoring of portfolio company operations and directors' fees. The amounts due from portfolio companies are recorded in due from related parties, which is discussed further in note 14. Under the terms of the limited partnership agreements for certain funds, the management fee payable by the funds may be subject to a reduction based on a certain percentage of such advisory and transaction fees, net of applicable broken deal costs ("Management Fee Offset"). Advisory and transaction fees from related parties are presented net of the Management Fee Offset in the consolidated statements of operations.

Carried Interest Income (Loss) from Related Parties—Apollo is entitled to an incentive return that can normally amount to as much as 20% of the total returns on a fund's capital, depending upon performance. Performance fees are assessed as a percentage of the investment performance of the funds. The carried interest income from related parties for any period is based upon an assumed liquidation of the fund's net assets on the reporting date, and distribution of the net proceeds in accordance with the fund's income allocation provisions. Carried interest receivable is presented separately in the consolidated statements of financial condition. The carried interest income from related parties may be subject to reversal to the extent that the carried interest income recorded exceeds the amount due to the general partner based on a fund's cumulative investment returns. When applicable, the accrual for potential repayment of previously received carried interest income, which is a component of due to related parties, represents all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner obligation, however, would not become payable or realized until the end of a fund's life.

Carried interest income from related parties also includes a quarterly performance fee on the pre-incentive fee net investment income ("AINV Part I Fees") of Apollo Investment Corporation ("AINV"). For purposes of the AINV Part I Fees, the net investment income of AINV includes interest income, dividend income and certain other income but excludes any realized and unrealized capital gains or losses. Such AINV Part I Fees are paid quarterly and are not subject to repayment (or clawback).

Compensation and Benefits

Equity-Based Compensation—Equity-based awards granted to employees as compensation are measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are expensed over the relevant service period. The Company estimates forfeitures for equity-based awards that are not expected to vest. Equity-based awards granted to non-employees for services provided to related parties are remeasured to fair value at the end of each reporting period and expensed over the relevant service period.

Salaries, Bonus and Benefits—Salaries, bonus and benefits include base salaries, discretionary and non-discretionary bonuses, severance and employee benefits. Bonuses are generally accrued over the related service period.

The Company sponsors a 401(k) savings plan whereby U.S.-based employees are entitled to participate in the plan based upon satisfying certain eligibility requirements. The Company may provide discretionary contributions from time to time. No contributions relating to this plan were made by the Company for the years ended December 31, 2016, 2015 and 2014.

Profit Sharing—Profit sharing expense and profit sharing payable primarily consist of a portion of carried interest earned from certain funds that is allocated to employees, former employees and Contributing Partners. Profit sharing amounts are recognized on an accrued basis as the related carried interest income is earned. Accordingly, profit sharing amounts can be reversed during periods when there is a decline in carried interest income that was previously recognized.

Profit sharing amounts are generally not paid until the related carried interest is distributed to the general partner upon realization of the fund's investments. Under certain profit sharing arrangements, a portion of the carried interest distributed to the general partner is settled by issuance of restricted shares, rather than cash to employees. Prior to distribution of the carried interest to the general partner, the Company records the value of the restricted shares expected to be granted in other assets and other liabilities within the consolidated statements of financial condition. Upon distribution of the carried interest to the general partner,

the general partner expects to purchase the Class A restricted shares on behalf of employees and simultaneously grant those shares to the employee. Such shares are recorded as equity-based compensation expense over the relevant service period.

Additionally, profit sharing amounts previously distributed may be subject to clawback from employees, former employees and Contributing Partners. When applicable, the accrual for potential clawback of previously distributed profit sharing amounts, which is a component of due from related parties on the consolidated statements of financial condition, represents all amounts previously distributed to employees, former employees and Contributing Partners that would need to be returned to the general partner if the Apollo funds were to be liquidated based on the fair value of the underlying funds' investments as of the reporting date. The actual general partner receivable, however, would not become realized until the end of a fund's life.

Profit sharing payable also includes contingent consideration obligations that were recognized in connection with certain Apollo acquisitions. Changes in the fair value of the contingent consideration obligations are reflected in the Company's consolidated statements of operations as profit sharing expense.

The Company has a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company. This arrangement enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying consolidated financial statements.

General, Administrative and Other

General, administrative and other primarily includes professional fees, occupancy, depreciation and amortization, travel, information technology, and administration. For the year ended December 31, 2016, presentation of professional fees, occupancy, and depreciation and amortization was combined with general, administrative and other on the consolidated statements of operations and the prior periods were recast to conform to the current presentation.

Other Income (Loss)

Net Gains (Losses) from Investment Activities—Net gains (losses) from investment activities include both realized gains and losses and the change in unrealized gains and losses in the Company's investments, at fair value between the opening reporting date and the closing reporting date.

Net Gains (Losses) from Investment Activities of Consolidated Variable Interest Entities—Changes in the fair value of the consolidated VIEs' assets and liabilities and related interest, dividend and other income and expenses are presented within net gains (losses) from investment activities of consolidated variable interest entities and are attributable to Non-Controlling Interests in the consolidated statements of operations.

Income from Equity Method Investments—Income from equity method investments includes the Company's share of net income generated from its investments in the private equity, credit and real estate funds it manages, which are not consolidated, but in which the Company exerts significant influence.

Other Income (Loss), Net—Other income (loss), net includes the recognition of gains (losses) arising from the remeasurement of foreign currency denominated assets and liabilities, reversal of a portion of the tax receivable agreement liability (see note 14), gains (losses) arising from the remeasurement of derivative instruments associated with fees from certain of the Company's affiliates, gains arising from extinguishment of contingent consideration obligations and other miscellaneous non-operating income and expenses.

Comprehensive Income (Loss)—U.S. GAAP guidance establishes standards for reporting comprehensive income and its components in a financial statement that is displayed with the same prominence as other financial statements. U.S. GAAP requires that the Company classify items of OCI by their nature in the financial statements and display the accumulated balance of OCI separately in the shareholders' equity section of the Company's consolidated statements of financial condition. Comprehensive income (loss) consists of net income (loss) and OCI. Apollo's OCI is primarily comprised of the effective portion of changes in the fair value of the interest rate swap agreements discussed previously and foreign currency translation adjustments associated with the Company's non-U.S. dollar denominated subsidiaries.

Income Taxes—The Apollo Operating Group and its subsidiaries generally operate as partnerships for U.S. Federal income tax purposes. As a result, except as described below, the Apollo Operating Group has not been subject to U.S. income

taxes. However, these entities in some cases are subject to New York City unincorporated business taxes ("NYC UBT") and non-U.S. entities, in some cases, are subject to non-U.S. corporate income taxes. In addition, certain consolidated entities are, or are treated as, corporations for U.S. and non-U.S. tax purposes and therefore subject to U.S. federal, state and local corporate income tax, and the Company's provision for income taxes is accounted for in accordance with U.S. GAAP.

Significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties. The Company recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit is measured as the largest amount of benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. If a tax position is not considered more likely than not to be sustained, then no benefits of the position are recognized. The Company's tax positions are reviewed and evaluated quarterly to determine whether or not the Company has uncertain tax positions that require financial statement recognition.

Deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amount of assets and liabilities and their respective tax basis using currently enacted tax rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Non-Controlling Interests—For entities that are consolidated, but not 100% owned, a portion of the income or loss and corresponding equity is allocated to owners other than Apollo. The aggregate of the income or loss and corresponding equity that is not owned by the Company is included in Non-Controlling Interests in the consolidated financial statements. The Non-Controlling Interests relating to Apollo Global Management, LLC primarily include the ownership interest in the Apollo Operating Group held by the Managing Partners and Contributing Partners through their limited partner interests in Holdings and other ownership interests in consolidated entities. Non-Controlling Interests also include limited partner interests of Apollo managed funds in certain consolidated VIEs.

Non-Controlling Interests are presented as a separate component of shareholders' equity on the Company's consolidated statements of financial condition. The primary components of Non-Controlling Interests are separately presented in the Company's consolidated statements of changes in shareholders' equity to clearly distinguish the interest in the Apollo Operating Group and other ownership interests in the consolidated entities. Net income (loss) includes the net income (loss) attributable to the holders of Non-Controlling Interests on the Company's consolidated statements of operations. Profits and losses are allocated to Non-Controlling Interests in proportion to their relative ownership interests regardless of their basis.

Net Income (Loss) Per Class A Share—As Apollo has issued participating securities, U.S. GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for distributions declared on all classes of securities to arrive at undistributed earnings. During periods of net losses, the net loss is reduced for distributions declared on participating securities only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity. Participating securities include vested and unvested restricted share units ("RSUs") that participate in distributions, as well as unvested restricted shares.

Whether during a period of net income or net loss, under the two-class method the remaining earnings are allocated to Class A shares and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Earnings or losses allocated to each class of security are then divided by the applicable weighted average outstanding shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding Class A shares and includes the number of additional Class A shares that would have been outstanding if the dilutive potential Class A shares had been issued. The numerator is adjusted for any changes in income or loss that would result from the issuance of these potential Class A shares.

Use of Estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Apollo's most significant estimates include goodwill, intangible assets, income taxes, carried

interest income from related parties, contingent consideration obligations related to acquisitions, non-cash compensation, and fair value of investments and debt. Actual results could differ materially from those estimates.

Recent Accounting Pronouncements

In May 2014, the FASB issued guidance to establish a comprehensive and converged standard on revenue recognition to enable financial statement users to better understand and consistently analyze an entity's revenue across industries, transactions, and geographies. The new guidance requires that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services (i.e., the transaction price). When determining the transaction price under the new guidance, an entity may include variable consideration only to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized would not occur when the uncertainty associated with the variable consideration is resolved. The new guidance also requires improved disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. The new guidance will apply to all entities. In August 2015, the FASB issued its final standard formally amending the effective date of the new revenue recognition guidance. The amended guidance defers the effective date of the new guidance to interim reporting periods within annual reporting periods beginning after December 15, 2017.

Upon adoption, the guidance currently applied by the Company in which it recognizes carried interest income from performance fees on an assumed liquidation basis at each reporting date will no longer be permitted. The Company expects the recognition of carried interest income from incentive fees, which are a form of variable consideration, to be deferred until such fees are no longer subject to significant reversal. Incentive fees are performance fees that are not capital allocations to the general partner or investment manager.

Performance fees, that are capital allocations to the general partner or investment manager, represent the remaining portion of carried interest income on the Company's consolidated statements of operations. In connection with the adoption of the new revenue guidance, the Company will apply a new accounting policy for its performance fees that are capital allocations to the general partner or investment manager. The Company intends to account for such performance fees as financial instruments under the equity method of accounting. The pattern and amount of recognition under the new policy is not expected to differ materially from the Company's existing recognition for such fees. Such performance fees will be reported as a separate line item within revenue (i.e., separate from incentive fee revenue). As performances fees and the related general partner investments are considered to be a single unit of account under the Company's new accounting policy, the equity method income associated with the general partner interests will be combined with the associated performance fees and reported in a single line within revenue.

The Company is currently in the process of implementing the new revenue guidance and is continuing to evaluate the effect this guidance will have on other less material revenue streams, including advisory and transaction fees and management fees, as well as any principal versus agent considerations for reporting revenue gross versus net. The Company expects to adopt the new revenue recognition guidance effective January 1, 2018.

In August 2014, the FASB issued guidance regarding management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The new guidance requires that management evaluate each annual and interim reporting period whether conditions exist that give rise to substantial doubt about the entity's ability to continue as a going concern within one year from the financial statement issuance date, and if so, provide related disclosures. Substantial doubt exists when conditions and events, considered in the aggregate, indicate that it is probable that a company will be unable to meet its obligations as they become due within one year after the financial statement issuance date. The new guidance applies to all companies. The guidance is effective for annual reporting periods ending after December 15, 2016, and for annual and interim periods thereafter. The Company adopted the guidance for the year ended December 31, 2016. The guidance did not have an impact on the consolidated financial statements of the Company.

In May 2015, the FASB issued guidance to eliminate diversity in practice related to how certain investments measured at NAV are categorized within the fair value hierarchy. The guidance removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share practical expedient. The guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2015. Pursuant to the guidance, a reporting entity should apply the amendments retrospectively to all periods presented. The retrospective approach requires that an investment for which fair value is measured using the NAV per share practical expedient be removed from the fair value hierarchy in all periods presented in an entity's financial statements. The Company adopted the guidance for the quarter ended March 31, 2016 and applied the guidance retrospectively. Adoption of the guidance did not have a material impact on the Company's consolidated financial statements. See note 6 for further disclosure related to the adoption of this guidance.

In January 2016, the FASB issued guidance that revises the accounting related to the classification and measurement of investments in equity securities as well as the presentation for certain fair value changes in financial liabilities measured at fair value, and amends certain disclosure requirements. The guidance requires that all equity investments, except those accounted for under the equity method of accounting or those resulting in the consolidation of the investee, be accounted for at fair value with all fair value changes recognized in income. For financial liabilities measured using the fair value option, the guidance requires that any change in fair value caused by a change in instrument-specific credit risk be presented separately in other comprehensive income until the liability is settled or reaches maturity. The guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2017, with early adoption permitted for certain provisions. A reporting entity would generally record a cumulative-effect adjustment to beginning retained earnings as of the beginning of the first reporting period in which the guidance is adopted. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements. However, the guidance is not expected to have a material impact on the consolidated financial statements of the Company.

In February 2016, the FASB issued guidance that amends the accounting for leases. The amended guidance requires recognition of a lease asset and a lease liability by lessees for leases classified as operating leases. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from existing guidance and accounting applied by a lessor is largely unchanged from existing guidance. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2018. Early application is permitted for all entities.

The Company expects its total assets and total liabilities on its consolidated statement of financial condition to increase upon adoption of this guidance as a result of recording a lease asset and lease liability related to our operating leases. The Company is continuing to evaluate the impact that this guidance will have on its consolidated financial statements. The Company expects to adopt the new leasing guidance on January 1, 2019.

In March 2016, the FASB issued guidance that amends the accounting for employee share-based payment awards. The amended guidance affects all entities that issue share-based payment awards to their employees. The amended guidance affects several aspects of accounting for share-based payment transactions including: (1) accounting for income taxes: all excess tax benefits and tax deficiencies should be recognized as income tax expense or benefit in the statements of operations, (2) classification of excess tax benefits on the statements of cash flows: excess tax benefits should be classified along with other income tax cash flows as an operating activity, (3) forfeitures: an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur, (4) minimum statutory tax withholding requirements: the threshold to qualify for equity classification permits withholding up to the maximum statutory tax rates in the applicable jurisdictions; and (5) classification of employee taxes paid on the statements of cash flows when an employer withholds shares for tax-withholding purposes: cash paid by an employer when directly withholding shares for tax-withholding purposes should be classified as a financing activity. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2016. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements.

In August 2016, the FASB issued guidance intended to reduce diversity in practice in how certain cash receipts and payments are classified in the statement of cash flows, including debt prepayment or extinguishment costs, the settlement of contingent liabilities arising from a business combination, proceeds from insurance settlements, and distributions from certain equity method investments. The guidance is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements. However, the guidance is not expected to have a material impact on the consolidated financial statements of the Company.

In October 2016, the FASB issued guidance that amends the consolidation guidance issued in February 2015. Under the amended guidance a decision maker will need to consider only its proportionate indirect interest in a VIE that is held through a related party under common control. Under the originally issued guidance, a decision maker treats the interest of the related party under common control in the VIE as if the decision maker held the interest itself. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2016. Early adoption is permitted for all entities. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements.

In November 2016, the FASB issued guidance to reduce diversity in practice in the classification and presentation of changes in restricted cash on the statement of cash flows. The new guidance requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash. Entities will also be required to reconcile such total to amounts on the Company's statement of financial condition and disclose the nature of

the restrictions. The guidance is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements.

In January 2017, the FASB issued guidance that changes the definition of a business with the objective of adding guidance to assist companies with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The guidance is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements.

In January 2017, the FASB issued guidance to simplify the test for goodwill impairment. The new guidance removes the requirement to perform a hypothetical purchase price allocation to measure goodwill impairment (Step 2). Under the new guidance, a goodwill impairment is calculated as the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill in the reporting unit. The guidance is effective for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019 and should be performed prospectively. Early adoption is permitted for interim or annual goodwill impairment tests performed after January 1, 2017. The Company is in the process of evaluating the impact that this guidance will have on its consolidated financial statements. However, the guidance is not expected to have an impact on the consolidated financial statements of the Company.

3. GOODWILL AND INTANGIBLE ASSETS

On May 5, 2015, the Company acquired 100% of the assets and liabilities of Venator Real Estate Capital Partners (Hong Kong) Limited and its wholly-owned subsidiary, Venator Investment Management Consulting (Shanghai) Limited (together referred to as "Venator"), in exchange for restricted shares of Apollo Global Management, LLC. The acquisition provided the Company's real estate segment with additional real estate investment management and related service capabilities in Asia. The transaction was accounted for as a business combination. Identifiable assets with a combined fair value of $3.0 million were acquired and liabilities with a combined fair value of $2.1 million were assumed, resulting in a bargain purchase gain of $0.9 million as of the acquisition date, which was recorded in other income, net in the consolidated statement of operations.

The carrying value of goodwill was $88.9 million as of both December 31, 2016 and 2015. Goodwill primarily relates to the 2007 Reorganization and the Company's acquisition of Stone Tower Capital LLC and its related management companies ("Stone Tower"). As of both December 31, 2016 and 2015, there was $23.1 million, $64.8 million and 1.0 million of goodwill related to private equity, credit and real estate segments, respectively.

Intangible assets, net consists of the following:

	As of December 31,	
	2016	2015
Finite-lived intangible assets/management contracts	$ 246,060	$ 242,863
Accumulated amortization	(223,339)	(214,243)
Intangible assets, net	$ 22,721	$ 28,620

The changes in intangible assets, net consist of the following:

	For the Year Ended December 31,		
	2016	2015	2014
Balance, beginning of year	$ 28,620	$ 60,039	$ 94,927
Amortization expense	(9,095)	(33,998)	(34,888)
Acquisitions / additions	3,196	2,579	—
Balance, end of year	$ 22,721 (1)	$ 28,620 (1)	$ 60,039

(1) Includes $1.0 million of indefinite-lived intangible assets as of both December 31, 2016 and 2015.

Expected amortization of these intangible assets for each of the next 5 years and thereafter is as follows:

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

	2017	2018	2019	2020	2021	Thereafter	Total
Amortization of intangible assets	$ 6,106	$ 4,486	$ 4,194	$ 3,677	$ 2,250	$ 1,048	$ 21,761

There was no impairment of indefinite-lived intangible assets as of December 31, 2016.

4. INVESTMENTS

The following table represents Apollo's investments:

	As of December 31, 2016	As of December 31, 2015
Investments, at fair value	$ 708,080	$ 539,080
Equity method investments	786,664	615,669
Total Investments	$ 1,494,744	$ 1,154,749

Investments, at Fair Value

Investments, at fair value, consist of investments for which the fair value option has been elected and include the Company's investment in Athene Holding, investments held by the Company's consolidated funds, investments in debt of unconsolidated CLOs, and other investments held by the Company. See note 6 for further discussion regarding investments, at fair value.

Net Gains from Investment Activities

The following table presents the realized and net change in unrealized gains on investments, at fair value for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Realized gains (losses) on sales of investments	$ 400	$ 889	$ (12,651)
Net change in unrealized gains due to changes in fair value	139,321 (1)	120,834 (1)	225,894
Net gains from investment activities	$ 139,721	$ 121,723	$ 213,243

(1) Primarily relates to the Company's investment in Athene Holding. See note 6 for further information regarding the Company's investment in Athene Holding.

Equity Method Investments

Apollo's equity method investments include its investments in Apollo private equity, credit and real estate funds, which are not consolidated, but in which the Company exerts significant influence. Apollo's share of net income generated by these investments is recorded within income from equity method investments in the consolidated statements of operations.

Equity method investments, excluding those for which the fair value option was elected, as of December 31, 2016 and December 31, 2015 consisted of the following:

	Equity Held as of	
	December 31, 2016(5)	December 31, 2015(5)
Private Equity(1)(2)	$ 428,581	$ 273,074
Credit(1)(3)	327,012	313,116
Real Estate	31,071	29,479
Total equity method investments(4)	$ 786,664	$ 615,669

(1) As of December 31, 2016, equity method investments include Fund VIII (Private Equity) and MidCap (Credit) of $260.9 million and $79.5 million, respectively, representing an ownership percentage of 2.2% and 4.3%, respectively. As of December 31, 2015, equity

APOLLO GLOBAL MANAGEMENT, LLC

(dollars in thousands, except share data, except where noted)

method investments include Fund VIII (Private Equity) and MidCap (Credit) of $116.4 million and $79.3 million, respectively, representing an ownership percentage of 2.2% and 4.9%, respectively.

(2) The equity method investment in AP Alternative Assets, L.P. ("AAA") was $66.8 million and $66.0 million as of December 31, 2016 and 2015, respectively. The value of the Company's investment in AAA was $64.9 million and $57.2 million based on the quoted market price as of December 31, 2016 and 2015, respectively.

(3) The equity method investment in AINV was $58.6 million and $61.9 million as of December 31, 2016 and 2015, respectively. The value of the Company's investment in AINV was $52.1 million and $41.8 million based on the quoted market price as of December 31, 2016 and 2015, respectively.

(4) Certain funds invest across multiple segments. The presentation in the table above is based on the classification of the majority of such funds' investments.

(5) Some amounts are included a quarter in arrears.

The Company's equity investment in Athene Holding, for which the fair value option was elected, met the significance criteria as defined by the SEC on an aggregate basis as of December 31, 2016 and for the year ended December 31, 2016. As such, the following tables present summarized financial information of Athene Holding as of December 31, 2016 and for the years ended December 31, 2016, 2015 and 2014.

	As of December 31,	
	2016[(1)]	2015

(1) Certain private equity, credit and real estate fund amounts are as of and for the twelve months ended September 30, 2016, 2015 and 2014.

5. VARIABLE INTEREST ENTITIES

As described in note 2, the Company consolidates entities that are VIEs for which the Company has been designated as the primary beneficiary. There is no recourse to the Company for the consolidated VIEs' liabilities.

Consolidated Variable Interest Entities

Apollo has consolidated VIEs in accordance with the policy described in note 2. Through its role as investment manager of these VIEs, the Company determined that Apollo has the power to direct the activities that most significantly impact the economic performance of these VIEs. Additionally, Apollo determined that its interests, both directly and indirectly from these VIEs, represent rights to returns that could potentially be significant to such VIEs. As a result, Apollo determined that it is the primary beneficiary and therefore should consolidate the VIEs.

Consolidated CLOs

Certain CLOs are consolidated by Apollo as the Company is considered to hold a controlling financial interest through direct and indirect interests in these CLOs exclusive of management and performance based fees received. Through its role as collateral manager of these VIEs, the Company determined that Apollo has the power to direct the activities that most significantly impact the economic performance of these VIEs. These CLOs were formed for the sole purpose of issuing collateralized notes to investors. The assets of these VIEs are primarily comprised of senior secured loans and the liabilities are primarily comprised of debt.

The assets of these consolidated CLOs are not available to creditors of the Company. In addition, the investors in these consolidated CLOs have no recourse against the assets of the Company. The Company measures both the financial assets and the financial liabilities of the CLOs using the fair value of the financial assets as further described in note 2. The Company has elected the fair value option for financial instruments held by its consolidated CLOs, which includes investments in loans and corporate bonds, as well as debt obligations and contingent obligations held by such consolidated CLOs. Other assets include amounts due from brokers and interest receivables. Other liabilities include payables for securities purchased, which represent open trades within the consolidated VIEs and primarily relate to corporate loans that are expected to settle within the next 60 days. From time to time, Apollo makes investments in certain consolidated CLOs denominated in foreign currencies. As of December 31, 2016 and December 31, 2015, the Company held an investment of $41.3 million and $42.3 million, respectively, in consolidated foreign currency denominated CLOs, which eliminates in consolidation.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Net Gains from Investment Activities of Consolidated Variable Interest Entities

The following table presents net gains from investment activities of the consolidated VIEs for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016 (1)	2015 (1)	2014 (1)
Net gains (losses) from investment activities	$ 10,334	$ 15,787	$ (238,534)
Net gains (losses) from debt	(11,921)	3,057	102,554
Interest and other income	41,791	37,404	666,486
Interest and other expenses	(35,189)	(37,198)	(507,942)
Net gains from investment activities of consolidated variable interest entities	$ 5,015	$ 19,050	$ 22,564

(1) Amounts reflect consolidation eliminations.

***Senior Secured Notes and Subordinated Note*s**—Included within debt are amounts due to third-party institutions by the consolidated VIEs. The following table summarizes the principal provisions of the debt of the consolidated VIEs as of December 31, 2016 and December 31, 2015:

	As of December 31, 2016			As of December 31, 2015		
	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years
Senior Secured Notes(2)(3)	$ 704,976	1.83%	12.3	$ 735,792	2.17%	12.1
Subordinated Notes(2)(3)	87,794	N/A (1)	19.2	82,365	N/A	15.1
Total	$ 792,770			$ 818,157		

(1) The subordinated notes do not have contractual interest rates but instead receive distributions from the excess cash flows of the VIEs.
(2) The fair value of Senior Secured Notes and Subordinated Notes as of December 31, 2016 and December 31, 2015 was $786.5 million and $801.3 million, respectively.
(3) The debt at fair value of the consolidated VIEs is collateralized by assets of the consolidated VIEs and assets of one vehicle may not be used to satisfy the liabilities of another vehicle. As of December 31, 2016 and December 31, 2015, the fair value of the consolidated VIE assets was $1,001.8 million and $1,030.8 million, respectively. This collateral consisted of cash and cash equivalents, investments, at fair value, and other assets.

The consolidated VIEs' debt obligations contain various customary loan covenants. As of December 31, 2016, the Company was not aware of any instances of non-compliance with any of these covenants.

As of December 31, 2016, the table below presents the contractual maturities for debt of the consolidated VIEs:

	2017	2018	2019	2020	2021	Thereafter	Total
Senior Secured Notes	$ —	$ —	$ —	$ —	$ —	$ 704,976	$ 704,976
Subordinated Notes	—	—	—	—	—	87,794	87,794
Total Obligations as of December 31, 2016	$ —	$ —	$ —	$ —	$ —	$ 792,770	$ 792,770

Variable Interest Entities Which are Not Consolidated

The Company holds variable interests in certain VIEs which are not consolidated, as it has been determined that Apollo is not the primary beneficiary.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The following tables present the carrying amounts of the assets and liabilities of the VIEs for which Apollo has concluded that it holds a significant variable interest, but that it is not the primary beneficiary as of December 31, 2016 and December 31, 2015. In addition, the tables present the maximum exposure to losses relating to these VIEs.

	As of December 31, 2016		
	Total Assets	**Total Liabilities**	**Apollo Exposure**
Total	$ 7,523,335 (1)	$ 2,818,459 (2)	$ 272,191 (3)

(1) Consists of $231.9 million in cash, $7,253.9 million in investments and $37.5 million in receivables.
(2) Represents $2,818.5 million in debt and other payables.
(3) Represents Apollo's direct investment in those entities in which Apollo holds a significant variable interest and certain other investments. Additionally, cumulative carried interest income is subject to reversal in the event of future losses. The maximum amount of future reversal of carried interest income from all of Apollo's funds, including those entities in which Apollo holds a significant variable interest, was $2.9 billion as of December 31, 2016, as discussed in note 15.

	As of December 31, 2015		
	Total Assets	**Total Liabilities**	**Apollo Exposure**
Total	$ 5,378,456 (1)	$ 1,626,743 (2)	$ 202,146 (3)

(1) Consists of $219.8 million in cash, $5,149.0 million in investments and $9.6 million in receivables.
(2) Represents $1,626.7 million in debt and other payables.
(3) Represents Apollo's direct investment in those entities in which Apollo holds a significant variable interest. Additionally, cumulative carried interest income is subject to reversal in the event of future losses. The maximum amount of future reversal of carried interest income from all of Apollo's funds, including those entities in which Apollo holds a significant variable interest, was $2.4 billion as of December 31, 2015.

Contingent consideration obligations[6]	—	—	79,579	79,579	
Total Liabilities	$ —	$ 801,270	$ 90,990	$ 892,260	

(1) All Level I and Level II assets and liabilities were valued using third party pricing, with the exception of the investment in Athene Holding.
(2) See note 14 for further disclosure regarding the investment in Athene Holding.
(3) See note 5 for further disclosure regarding VIEs.
(4) Pursuant to the adoption of amended fair value guidance effective January 1, 2016, investments for which fair value is based on NAV are no longer required to be included in the fair value hierarchy. As such, prior periods have been recast to conform with the current period presentation. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy disclosure to

Table of Contents

the amounts presented in the consolidated statement of financial condition. See note 2 for further discussion of recent accounting pronouncements.

(5) As of December 31, 2016, liabilities of VIEs, at fair value included debt and other liabilities of $786.5 million and $11.1 million, respectively. As of December 31, 2015, liabilities of VIEs, at fair value included debt and other liabilities of $801.3 million and $11.4 million, respectively. Other liabilities include contingent obligations classified as Level III.

(6) See note 15 for further disclosure regarding contingent consideration obligations.

(7) See note 4 to our consolidated financial statements for further detail regarding our investments at fair value and reconciliation to the consolidated statements of financial condition.

There were no transfers of financial assets or liabilities between Level I and Level II for the years ended December 31, 2016 and 2015.

The following tables summarize the changes in fair value in financial assets measured at fair value for which Level III inputs have been used to determine fair value for the years ended December 31, 2016 and 2015:

	For the Year Ended December 31, 2016				
	Investments of Consolidated Apollo Funds	Other Investments	Investment in Athene Holding	Investments of Consolidated VIEs	Total
Balance, Beginning of Period [1]	$ 1,634	$ 434	$ 510,099	$ 100,941	$ 613,108
Purchases	1,430	46,880	8,937 [4]	74,043	131,290
Sale of investments/Distributions	(1,630)	—	—	(68,653)	(70,283)
Net realized gains (losses)	(77)	—	—	3,086	3,009
Changes in net unrealized gains (losses)	230	1	138,512	(2,842)	135,901
Cumulative translation adjustment	—	(2,161)	—	(2,691)	(4,852)
Transfer into Level III[2]	1,496	—	—	30,173	31,669
Transfer out of Level III[2][3]	(2,516)	—	(657,548)	(41,583)	(701,647)
Balance, End of Period	$ 567	$ 45,154	$ —	$ 92,474	$ 138,195
Change in net unrealized gains included in net gains from investment activities related to investments still held at reporting date	$ 55	$ 1	$ —	$ —	$ 56
Change in net unrealized gains included in net gains from investment activities of consolidated VIEs related to investments still held at reporting date	—	—	—	30	30

(1) Pursuant to the adoption of amended fair value guidance effective January 1, 2016, investments for which fair value is based on NAV are no longer required to be included in the fair value hierarchy. See note 2 for further discussion of recent accounting pronouncements.

(2) Transfers between Level II and III, with the exception of the investment in Athene Holding, were a result of subjecting the broker quotes on these financial assets to various criteria which include the number and quality of broker quotes, the standard deviation of obtained broker quotes and the percentage deviation from independent pricing services.

(3) The investment in the Athene Holding was transferred from Level III to Level II at December 31, 2016, as the Company changed the valuation method used to value the investment in Athene Holding from the GAAP book value multiple approach to the use of Athene’s closing market price, adjusted for a discount due to a lack of marketability (“DLOM”).

(4) Represents a AAA distribution in kind in the form of shares of Athene Holding.

Change in net unrealized gains included in net gains from investment activities of consolidated VIEs related to investments still held at reporting date	—	—	—	—	—	11,543	11,543

(1) Pursuant to the adoption of amended fair value guidance effective January 1, 2016, investments for which fair value is based on NAV are no longer required to be included in the fair value hierarchy. As such, prior periods have been recast to conform with the current period presentation. See note 2 for further discussion of recent accounting pronouncements.
(2) Transfers between Level II and III were a result of subjecting the broker quotes on these financial assets to various criteria which include the number and quality of broker quotes, the standard deviation of obtained broker quotes and the percentage deviation from independent pricing services.
(3) Represents Apollo's investment in preferred stock of RCS Capital Corporation ("RCAP"), which was sold in November 2015.

The following table summarizes the changes in fair value in financial liabilities measured at fair value for which Level III inputs have been used to determine fair value for the years ended December 31, 2016 and 2015:

	For the Years Ended December 31,					
	2016			2015		
	Liabilities of Consolidated VIEs	Contingent Consideration Obligations	Total	Liabilities of Consolidated VIEs	Contingent Consideration Obligations	Total
Balance, Beginning of Period	$ 11,411	$ 79,579	$ 90,990	$ 12,343,021	$ 96,126	$ 12,439,147
Adoption of accounting guidance	—	—	—	(11,433,815)	—	(11,433,815)

Investment in Athene Holding

As of December 31, 2016, Apollo changed the valuation method used to value the opportunistic investment in Athene Holding from the GAAP book value multiple approach to the use of Athene's closing market price, adjusted for a DLOM in order to reflect the post IPO sales restriction on such shares of Athene Holding. The DLOM is calculated based on the remaining length of such sales restrictions and the estimated market price volatility of the associated shares.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

As of December 31, 2016 the fair value of Apollo's investment in Athene Holding was estimated using the closing market price of Athene shares of $47.99 less a DLOM of 9.5%. The DLOM was derived based on the average remaining lock up restrictions on the shares of Athene Holding held by Apollo (23.3 months) and the estimated volatility in such shares of Athene Holding. Due to the limited trading history in Athene Holding shares, the historical share price volatility of a representative set of Athene Holding's publicly traded insurance peers was calculated over a period equivalent to the remaining average lock up on the shares of Athene Holding held by Apollo and used as a proxy to estimate the projected volatility in Athene Holding's shares. The fair value of Apollo's investment in Athene Holding after the application of the DLOM was estimated at a price of $43.43 per share.

As of December 31, 2015, the fair value of Apollo's investment in Athene Holding was estimated under the U.S. GAAP book value multiple approach by applying a book value multiple to the U.S. GAAP book value per share of Athene Holding. The adjustment for the conversion of all Athene management incentive shares was added to Athene's U.S. GAAP book value excluding accumulated other comprehensive income ("AOCI") for purposes of determining U.S. GAAP book value per share. Apollo calculated a multiple for public company peers of Athene by dividing each peer's market capitalization by its reported U.S. GAAP equity, excluding AOCI. A regression analysis was then prepared based on the calculated multiple of each peer relative to its expected return on U.S. GAAP equity, excluding AOCI, relative to Athene.

As of December 31, 2015, the significant unobservable input used in the fair value measurement of the investment in Athene Holding was the U.S. GAAP book value multiple. This input in isolation can cause significant increases or decreases in fair value. Specifically, when the U.S. GAAP book value multiple method is used to determine fair value, the significant input used in the valuation model is the U.S. GAAP book value multiple itself. An increase in the U.S. GAAP book value multiple can significantly increase the fair value of an investment; conversely a decrease in the U.S. GAAP book value multiple can significantly decrease the fair value of an investment. The sensitivity of the valuation to changes in the multiple is directly proportional to the change in the multiple itself.

Investments of Consolidated Apollo Funds

The Company is the sole investor in the Apollo Senior Loan Fund, L.P. and Apollo Alternative Credit Long Short Fund L.P. and therefore consolidates the assets and liabilities of these funds. These funds invest in U.S. denominated senior secured loans, senior secured bonds and other income generating fixed-income investments. Amounts related to these consolidated funds are primarily presented in net gains from investment activities on the consolidated statements of operations and in investments in the consolidated statements of financial condition.

Other Investments

Other investments primarily consists of Apollo's investments in debt of unconsolidated CLOs. The change in the fair value related to these investments is presented in net gains from investment activities on the consolidated statements of operations.

Consolidated VIEs

Investments

As of December 31, 2016, there were no significant unobservable inputs used in the fair value measurement of the equity securities. The significant unobservable inputs used in the fair value measurement of the equity securities as of December 31, 2015 include the discount rate applied and the multiples applied in the valuation models. These unobservable inputs in isolation can cause significant increases or decreases in fair value. Specifically, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. Increases in the discount rate can significantly lower the fair value of an investment; conversely decreases in the discount rate can significantly increase the fair value of an investment. The discount rate is determined based on the market rates an investor would expect for a similar investment with similar risks. When a comparable multiple model is used to determine fair value, the comparable multiples are generally multiplied by the underlying companies' earnings before interest, taxes, depreciation and amortization ("EBITDA") to establish the total enterprise value of the company. The comparable multiple is determined based on the implied trading multiple of public industry peers.

Liabilities

As of December 31, 2016 and December 31, 2015, the debt obligations of the consolidated CLOs were measured on the basis of the fair value of the financial assets of the CLOs as the financial assets were determined to be more observable and, as a result, categorized as Level II in the fair value hierarchy. See note 2 for further discussion of the Company's adoption of CFE guidance.

Contingent Consideration Obligations

The significant unobservable input used in the fair value measurement of the contingent consideration obligations is the discount rate applied in the valuation models. This input in isolation can cause significant increases or decreases in fair value. Specifically, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. Increases in the discount rate can significantly lower the fair value of the contingent consideration obligations; conversely, a decrease in the discount rate can significantly increase the fair value of the contingent consideration obligations. The discount rate was based on the hypothetical cost of equity for Stone Tower. See note 15 for further discussion of the contingent consideration obligations.

Net Investment Hedge

To manage the potential exposure from adverse changes in currency exchange rates arising from the Company's net investment in foreign operations related to Bremer Kreditbank AG, the German subsidiary of Belgian KBC Group NV ("BKB Bank") during June 2016, the Company entered into a foreign currency option contract to hedge a portion of the net investment in the Company's non-U.S. dollar denominated foreign operations related to BKB Bank. As of December 31, 2016, the notional amount of the net investment hedge was €17.6 million. The gains and losses due to changes in fair value attributable to foreign currency derivatives designated as net investment hedges are recognized in other comprehensive income (loss), net of tax. No portion of the net investment hedge was subsequently reclassified to net income or deemed ineffective for the year ended December 31, 2016. The resulting gain on derivative assets was $0.02 million for the year ended December 31, 2016. The resulting loss on derivative liabilities was $0.1 million for the year ended December 31, 2016.

7. CARRIED INTEREST RECEIVABLE

Carried interest receivable from private equity, credit and real estate funds consisted of the following:

	As of December 31, 2016	As of December 31, 2015
Private Equity	$ 798,465	$ 373,871
Credit	426,114	240,844
Real Estate	32,526	29,192
Total carried interest receivable	$ 1,257,105	$ 643,907

The table below provides a roll-forward of the carried interest receivable balance for the years ended December 31, 2016 and 2015:

	Private Equity	Credit	Real Estate	Total
Carried interest receivable, January 1, 2015	$ 672,119	$ 226,430	$ 13,117	$ 911,666
Change related to fair value of funds	42,016	126,426	13,074	181,516
Fund distributions to the Company	(340,264)	(152,370)	(4,035)	(496,669)
Adoption of new accounting guidance	—	40,358	7,036	47,394
Carried interest receivable, December 31, 2015	$ 373,871	$ 240,844	$ 29,192	$ 643,907
Change in fair value of funds	492,910	318,735	17,375	829,020
Fund distributions to the Company	(68,316)	(133,465)	(14,041)	(215,822)
Carried interest receivable, December 31, 2016	$ 798,465	$ 426,114	$ 32,526	$ 1,257,105

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The change in fair value of funds excludes the reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. The general partner obligation is recognized based upon a hypothetical liquidation of a fund's net assets as of the reporting date. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of a fund's investments based on the contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement of the fund. See note 14 for further disclosure regarding the general partner obligation.

The timing of the payment of carried interest due to the general partner or investment manager varies depending on the terms of the applicable fund agreements. Generally, carried interest with respect to the private equity funds and certain credit and real estate funds is payable and is distributed to the fund's general partner upon realization of an investment if the fund's cumulative returns are in excess of the preferred return. For most credit funds, carried interest is payable based on realizations after the end of the relevant fund's fiscal year or fiscal quarter, subject to certain return thresholds, or "high water marks," having been achieved.

8. PROFIT SHARING PAYABLE

Profit sharing payable from private equity, credit and real estate funds consisted of the following:

	As of December 31, 2016	As of December 31, 2015
Private Equity	$ 268,170	$ 118,963
Credit	268,855	165,392
Real Estate	13,123	11,319
Total profit sharing payable	$ 550,148	$ 295,674

The table below provides a roll-forward of the profit sharing payable balance for the years ended December 31, 2016 and 2015:

	Private Equity	Credit	Real Estate	Total
Profit sharing payable, January 1, 2015	$ 240,595	$ 186,307	$ 7,950	$ 434,852
Profit sharing expense(1)(2)	52,807	42,172	5,076	100,055
Payments/other	(174,439)	(63,087)	(1,707)	(239,233)
Profit sharing payable, December 31, 2015	$ 118,963	$ 165,392	$ 11,319	$ 295,674
Profit sharing expense(1)(2)	184,852	186,345	10,387	381,584
Payments/other	(35,645)	(82,882)	(8,583)	(127,110)
Profit sharing payable, December 31, 2016	$ 268,170	$ 268,855	$ 13,123	$ 550,148

(1) Includes (i) changes in amounts payable to employees and former employees entitled to a share of carried interest income in Apollo's funds and (ii) changes to the fair value of the contingent consideration obligations recognized in connection with certain Apollo acquisitions. See notes 6 and 15 for further disclosure regarding the contingent consideration obligations.

(2) The Company has recorded a receivable from the Contributing Partners, certain employees and former employees for the potential return of profit sharing distributions that would be due if certain funds were liquidated in the amount of $39.3 million and $14.7 million as of December 31, 2016 and December 31, 2015, respectively. Profit sharing expense excludes the potential return of these profit sharing distributions. See note 14 for further discussion regarding the potential return of profit sharing distributions.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

9. OTHER ASSETS

Other assets consisted of the following:

	As of December 31,	
	2016	2015
Fixed assets	$ 108,422	$ 105,439
Less: Accumulated depreciation and amortization	(83,268)	(73,803)
Fixed assets, net	25,154	31,636
Prepaid expenses[1]	78,300	48,421
Tax receivables	5,617	4,466
Other	9,789	11,321
Total Other Assets	$ 118,860	$ 95,844

(1) Includes $42.6 million and $7.0 million as of December 31, 2016 and 2015, respectively, related to the restricted shares that are expected to be granted in connection with the settlement of certain profit sharing arrangements. A corresponding amount is included in other liabilities on the consolidated statements of financial condition.

Depreciation expense for the years ended December 31, 2016, 2015 and 2014 was $9.6 million, $10.5 million and $10.2 million, respectively.

10. INCOME TAXES

The Company is treated as a partnership for income tax purposes and is therefore not subject to U.S. federal, state and local income taxes. Certain consolidated entities are, or are treated as, corporations for U.S. and non-U.S. tax purposes and therefore subject to U.S. federal, state, and local corporate income tax. Certain other subsidiaries of the Company are subject to NYC UBT attributable to the Company's operations apportioned to New York City. In addition, certain non-U.S. subsidiaries of the Company are subject to income taxes in their local jurisdictions.

The Company's income tax provision totaled $90.7 million, $26.7 million and $147.2 million for the years ended December 31, 2016, 2015 and 2014, respectively. The Company's effective tax rate was approximately 8.5%, 7.1% and 16.8% for the years ended December 31, 2016, 2015 and 2014, respectively.

The provision for income taxes is presented in the following table:

	For the Years Ended December 31,		
	2016	2015	2014
Current:			
Federal income tax	$ —	$ (10,108)	$ 53,426
Foreign income tax	5,843 [1]	7,842 [1]	6,080
State and local income tax	2,847	2,573	7,369
Subtotal	8,690	307	66,875
Deferred:			
Federal income tax	66,567	19,581	28,702
Foreign income tax	(16) [1]	(256) [1]	(137)
State and local income tax	15,466	7,101	51,805
Subtotal	82,017	26,426	80,370
Total Income Tax Provision	$ 90,707	$ 26,733	$ 147,245

(1) The foreign income tax provision was calculated on $38.8 million and $27.6 million of pre-tax income generated in foreign jurisdictions for the years ended December 31, 2016 and 2015, respectively.

The following table reconciles the U.S. Federal statutory tax rate to the effective income tax rate:

	For the Years Ended December 31,		
	2016	2015	2014
U.S. Statutory Tax Rate	35.0 %	35.0 %	35.0 %
Income Passed Through to Non-Controlling Interests	(21.0)	(26.4)	(23.4)
Income Passed Through to Class A Shareholders	(7.1)	(4.4)	0.1
State and Local Income Taxes (net of Federal Benefit)	1.4	2.1	4.7
Other	0.2	0.8	0.4
Effective Income Tax Rate	8.5 %	7.1 %	16.8 %

Deferred income taxes are provided for the effects of temporary differences between the tax basis of an asset or liability and its reported amount in the consolidated statements of financial condition. These temporary differences result in taxable or deductible amounts in future years.

The Company's deferred tax assets and liabilities on the consolidated statements of financial condition consist of the following:

	As of December 31,	
	2016	2015
Deferred Tax Assets:		
Depreciation and amortization	$ 525,261	$ 567,018
Revenue recognition	26,629	31,363
Net operating loss carryforwards	43,733	47,139
Equity-based compensation - RSUs and AAA RDUs	1,801	4,551
Foreign tax credit	11,746	8,996
Other	4,947	5,472
Total Deferred Tax Assets	614,117	664,539
Deferred Tax Liabilities:		
Unrealized gains from investments	41,346	13,274
Other	508	5,058
Total Deferred Tax Liabilities	$ 41,854	$ 18,332

As of December 31, 2016, the Company had approximately $111.1 million of federal net operating loss ("NOL") carryforwards and $86.6 million of state and local net operating loss carryforwards that will begin to expire after 2035. As a result of certain realization requirements, the Company does not include certain deferred tax assets as of December 31, 2016 that arose directly from tax deductions related to equity-based compensation greater than compensation recognized for financial reporting. As discussed in note 2, upon adoption of new guidance that amends the accounting for employee share-based payment awards, $22.8 million of deferred tax asset will be recognized with a corresponding increase to retained earnings. In addition, the Company's foreign tax credit carryforwards will begin to expire after 2020.

The Company considered its historical and current year earnings, current utilization of existing deferred tax assets and deferred tax liabilities, the 15 year amortization periods of the tax basis of its intangible assets, the 20 year carry forward periods of any NOLs, and short and long term business forecasts in evaluating whether it should establish a valuation allowance. Based on this positive evidence, the Company concluded it is more likely than not that the deferred tax assets will be realized and that no valuation allowance was needed at December 31, 2016.

Under U.S. GAAP, a tax benefit from an uncertain tax position may be recognized when it is more likely than not that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits of the position. Based upon the Company's review of its federal, state, local and foreign income tax returns and tax filing positions, the Company determined that no unrecognized tax benefits for uncertain tax positions were required to be recorded. In addition, the Company does not believe that it has any tax positions for which it is reasonably possible that it will be required to record significant amounts of unrecognized tax benefits within the next twelve months.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The Company's primary jurisdictions in which it operates are the United States, New York State, New York City, California and the United Kingdom. There are no unremitted earnings with respect to the United Kingdom and other foreign entities due to the flow-through nature of these entities. In the normal course of business, the Company is subject to examination by federal and certain state, local and foreign tax authorities. With a few exceptions, as of December 31, 2016, the Company's U.S. federal, state, local and foreign income tax returns for the years 2013 through 2016 are open under the general statute of limitations provisions and therefore subject to examination. Currently, the Internal Revenue Service is examining the tax return of a subsidiary for the 2012 tax year. The State and City of New York is examining certain subsidiaries' tax returns for tax years 2011 to 2013.

The Company has recorded a deferred tax asset for the future amortization of tax basis intangibles as a result of the 2007 Reorganization. The Company recorded additional deferred tax assets as a result of the step-up in tax basis of intangibles from subsequent exchanges of AOG Units for Class A shares. A related tax receivable agreement liability was recorded in due to related parties in the consolidated statements of financial condition for the expected payments under the tax receivable agreement entered into by and among APO Corp., the Managing Partners, the Contributing Partners, and other parties thereto (as amended, the "tax receivable agreement") (see note 14). The increases in the deferred tax asset less the related liability resulted in increases to additional paid in capital which were recorded in the consolidated statements of changes in shareholders' equity for the years ended December 31, 2016, 2015 and 2014. The amortization period for these tax basis intangibles is 15 years and the deferred tax assets will reverse over the same period.

Pursuant to an exchange agreement between Apollo, Holdings and the other parties thereto (as amended, the "Exchange Agreement"), the holders of the AOG Units (and certain permitted transferees thereof) may, upon notice and subject to the applicable vesting and minimum retained ownership requirements, transfer restrictions and other terms of the Exchange Agreement, exchange their AOG Units for the Company's Class A shares on a one-for-one basis a limited number of times each year, subject to customary conversion rate adjustments for splits, distributions and reclassifications. Pursuant to the Exchange Agreement, a holder of AOG Units must simultaneously exchange one partnership unit in each of the Apollo Operating Group partnerships to effectuate an exchange for one Class A share. As a holder exchanges its AOG Units, the Company's indirect interest in the Apollo Operating Group is correspondingly increased.

The tables below present the impact to the deferred tax asset, tax receivable agreement liability and additional paid in capital related to the exchange of AOG Units for Class A shares during the years ended December 31, 2016, 2015 and 2014.

Exchange of AOG Units for Class A shares	Increase in Deferred Tax Asset	Increase in Tax Receivable Agreement Liability	Increase to Additional Paid In Capital
For the Year Ended December 31, 2016	$ 7,342	$ 6,187	$ 1,155
For the Year Ended December 31, 2015	61,720	45,432	16,288
For the Year Ended December 31, 2014	58,696	47,878	10,818

During the years ended December 31, 2016 and 2014, the Company adjusted the estimated rate of tax it expects to pay in the future and thereby reduced its net deferred tax assets, and increased its income tax provision, by $4.5 million and $36.2 million, respectively (see note 14 for details regarding the impact on the tax receivable agreement liability).

During the year ended December 31, 2016, an additional $2.6 million of return-to-provision was recorded to additional paid in capital, reflected in the consolidated statements of changes in shareholders' equity.

11. DEBT

Debt consisted of the following:

	As of December 31, 2016			As of December 31, 2015		
	Outstanding Balance	Fair Value	Annualized Weighted Average Interest Rate	Outstanding Balance	Fair Value	Annualized Weighted Average Interest Rate
2013 AMH Credit Facilities - Term Facility[1]	$ 299,543	$ 298,500 [5]	1.82%	$ 499,327	$ 501,300 [5]	1.44%
2024 Senior Notes[2]	495,208	498,336 [6]	4.00	494,555	495,300 [6]	4.00
2026 Senior Notes[3]	495,165	497,923 [6]	4.40	—	—	—
2014 AMI Term Facility I[4]	14,449	14,449 [5]	2.00	14,543	14,549 [5]	2.15
2014 AMI Term Facility II[4]	16,306	16,306 [5]	1.75	16,830	16,830 [5]	1.85
2016 AMI Term Facility I[4]	17,852	17,852 [5]	1.75	—	—	—
2016 AMI Term Facility II[4]	13,924	13,924 [5]	2.00	—	—	—
Total Debt	$ 1,352,447	$ 1,357,290		$ 1,025,255	$ 1,027,979	

(1) Outstanding balance is presented net of unamortized debt issuance costs of $0.5 million and $0.7 million as of December 31, 2016 and December 31, 2015, respectively.

(2) Includes impact of any amortization of note discount. Outstanding balance is presented net of unamortized debt issuance costs of $4.1 million and $4.6 million as of December 31, 2016 and December 31, 2015, respectively.

(3) Includes impact of any amortization of note discount. Outstanding balance is presented net of unamortized debt issuance costs of $4.4 million as of December 31, 2016.

(4) Apollo Management International LLP ("AMI"), a subsidiary of the Company, entered into the following five year credit agreements and proceeds from the borrowings were used to fund the Company's investment in European CLOs it manages:

Facility	Date	Loan Amount
2014 AMI Term Facility I	July 3, 2014	€ 13,736
2014 AMI Term Facility II	December 9, 2014	€ 15,500
2016 AMI Term Facility I	January 18, 2016	€ 16,970
2016 AMI Term Facility II	June 22, 2016	€ 13,236

(5) Fair value is based on obtained broker quotes and these notes would be classified as a Level III liability within the fair value hierarchy based on the number and quality of broker quotes obtained, the standard deviations of the observed broker quotes and the percentage deviation from independent pricing services. For instances where broker quotes are not available, a discounted cash flow method is used to obtain a fair value.

(6) Fair value is based on obtained broker quotes and these notes would be classified as a Level II liability within the fair value hierarchy based on the number and quality of broker quotes obtained, the standard deviations of the observed broker quotes and the percentage deviation from independent pricing services.

2013 AMH Credit Facilities—On December 18, 2013, AMH and its subsidiaries and certain other subsidiaries of the Company (collectively, the "Borrowers") entered into new credit facilities (the "2013 AMH Credit Facilities") with JPMorgan Chase Bank, N.A. The 2013 AMH Credit Facilities provide for (i) a term loan facility to AMH (the "Term Facility") that includes $750 million of the term loan from third-party lenders and $271.7 million of the term loan held by a subsidiary of the Company and (ii) a $500 million revolving credit facility (the "Revolver Facility"), in each case, with an original maturity date of January 18, 2019. On March 11, 2016, the maturity date of both the Term Facility and the Revolver Facility was extended by two years to January 18, 2021. The extension was determined to be a modification of the 2013 AMH Credit Facilities in accordance with U.S. GAAP.

Interest on the borrowings is based on an adjusted LIBOR rate or alternate base rate, in each case plus an applicable margin, and undrawn revolving commitments bear a commitment fee. In connection with the issuance of the 2024 Senior Notes and the 2026 Senior Notes (as defined below), $250 million of the proceeds and $200 million of the proceeds, respectively, were used to repay a portion of the Term Facility outstanding with third party lenders at par. The interest rate on the $300 million Term Facility as of December 31, 2016 was 2.12% and the commitment fee as of December 31, 2016 on the $500 million undrawn

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Revolver Facility was 0.125%. The $300 million carrying value of debt that is recorded on the consolidated statements of financial condition at December 31, 2016 is the amount for which the Company is obligated to settle the 2013 AMH Credit Facilities.

As of December 31, 2016, the 2013 AMH Credit Facilities were guaranteed by AMH and its subsidiaries, Apollo Management, L.P., Apollo Capital Management, L.P., Apollo International Management, L.P., AAA Holdings, L.P., Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings VI, L.P., Apollo Principal Holdings VII, L.P., Apollo Principal Holdings VIII, L.P., Apollo Principal Holdings IX, L.P., Apollo Principal Holdings X, L.P., Apollo Principal Holdings XI, LLC, ST Holdings GP, LLC and ST Management Holdings, LLC. The 2013 AMH Credit Facilities contain affirmative and negative covenants which limit the ability of the Borrowers, the guarantors and certain of their subsidiaries to, among other things, incur indebtedness and create liens. Additionally, the 2013 AMH Credit Facilities contain financial covenants which require the Borrowers and their subsidiaries to maintain (1) at least $40 billion of Fee-Generating Assets Under Management and (2) a maximum total net leverage ratio of not more than 4.00 to 1.00 (subject to customary equity cure rights). The 2013 AMH Credit Facilities also contain customary events of default, including events of default arising from non-payment, material misrepresentations, breaches of covenants, cross default to material indebtedness, bankruptcy and changes in control of the Company.

Borrowings under the Revolver Facility may be used for working capital and general corporate purposes, including, without limitation, permitted acquisitions. In addition, the Borrowers may incur incremental facilities in respect of the Revolver Facility and the Term Facility in an aggregate amount not to exceed $500 million plus additional amounts so long as the Borrowers are in compliance with a net leverage ratio not to exceed 3.75 to 1.00. As of December 31, 2016 and December 31, 2015, the Revolver Facility was undrawn.

2024 Senior Notes—On May 30, 2014, AMH issued $500 million in aggregate principal amount of its 4.000% Senior Notes due 2024 (the "2024 Senior Notes"), at an issue price of 99.722% of par. Interest on the 2024 Senior Notes is payable semi-annually in arrears on May 30 and November 30 of each year. The 2024 Senior Notes will mature on May 30, 2024. The discount will be amortized into interest expense on the consolidated statements of operations over the term of the 2024 Senior Notes. The face amount of $500 million related to the 2024 Senior Notes is the amount for which the Company is obligated to settle the 2024 Senior Notes.

2026 Senior Notes—On May 27, 2016, AMH issued $500 million in aggregate principal amount of its 4.400% Senior Notes due 2026 (the "2026 Senior Notes"), at an issue price of 99.912% of par. Interest on the 2026 Senior Notes is payable semi-annually in arrears on May 27 and November 27 of each year. The 2026 Senior Notes will mature on May 27, 2026. The discount will be amortized into interest expense on the consolidated statements of operations over the term of the 2026 Senior Notes. The face amount of $500 million related to the 2026 Senior Notes is the amount for which the Company is obligated to settle the 2026 Senior Notes.

As of December 31, 2016, the 2026 Senior Notes and the 2024 Senior Notes were guaranteed by Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings VI, L.P., Apollo Principal Holdings VII, L.P., Apollo Principal Holdings VIII, L.P., Apollo Principal Holdings IX, L.P., Apollo Principal Holdings X, L.P., Apollo Principal Holdings XI, LLC, AMH Holdings (Cayman), L.P. and any other entity that is required to become a guarantor of the notes under the terms of the indentures governing the 2026 Senior Notes and the 2024 Senior Notes (the "Indentures"). The Indentures include covenants that restrict the ability of AMH and, as applicable, the guarantors to incur indebtedness secured by liens on voting stock or profit participating equity interests of their respective subsidiaries or merge, consolidate or sell, transfer or lease assets. The Indentures also provide for customary events of default.

12. NET INCOME PER CLASS A SHARE

U.S. GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for distributions declared on all classes of securities to arrive at undistributed earnings. During periods of undistributed losses, the undistributed loss is allocated to a participating security only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity.

The remaining undistributed earnings are allocated to Class A shares and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Earnings or losses allocated to each class of security are then divided by the applicable number of shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding Class A shares and includes the number of additional Class A shares that would have been outstanding if the dilutive Class A shares had been issued. The numerator is adjusted for any changes in income or loss that would result if the dilutive Class A shares were issued.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The table below presents basic and diluted net income (loss) per Class A share using the two-class method for the years ended December 31, 2016, 2015 and 2014:

	Basic and Diluted		
	For the Years Ended December 31,		
	2016	2015	2014
Numerator:			
Net income attributable to Apollo Global Management, LLC	$ 402,850	$ 134,497	$ 168,229
Distributions declared on Class A shares	(230,713) (1)	(339,397) (1)	(483,458) (1)
Distributions on participating securities(3)	(8,396)	(28,497)	(72,074)
Earnings allocable to participating securities	(6,430)	— (2)	— (2)
Undistributed income (loss) attributable to Class A shareholders: Basic and Diluted	$ 157,311	$ (233,397)	$ (387,303)
Denominator:			
Weighted average number of Class A shares outstanding: Basic and Diluted	183,998,080	173,271,666	155,349,017
Net Income per Class A Share: Basic and Diluted(4)			
Distributed Income	$ 1.25	$ 1.96	$ 3.11
Undistributed Income (Loss)	0.86	(1.35)	(2.49)
Net Income per Class A Share: Basic and Diluted	$ 2.11	$ 0.61	$ 0.62

(1) See note 14 for information regarding the quarterly distributions declared and paid during 2016, 2015 and 2014.
(2) No allocation of undistributed losses was made to the participating securities as the holders do not have a contractual obligation to share in the losses of the Company with Class A shareholders.
(3) Participating securities consist of vested and unvested RSUs that have rights to distributions and unvested restricted shares.
(4) For the years ended December 31, 2016, 2015 and 2014, all of the classes of securities were determined to be anti-dilutive.

The Company has granted RSUs that provide the right to receive, subject to vesting, Class A shares of Apollo Global Management, LLC, pursuant to the Company's 2007 Omnibus Equity Incentive Plan (the "2007 Equity Plan"). Certain RSU grants to employees provide the right to receive distribution equivalents on vested RSUs on an equal basis any time a distribution is declared. The Company refers to these RSU grants as "Plan Grants." For certain Plan Grants, distribution equivalents are paid in January of the calendar year next following the calendar year in which a distribution on Class A shares was declared. In addition, certain RSU grants to employees provide that both vested and unvested RSUs participate in distribution equivalents on an equal basis with the Class A shareholders any time a distribution is declared. The Company refers to these as "Bonus Grants."

Any distribution equivalent paid to an employee will not be returned to the Company upon forfeiture of the award by the employee. Vested and unvested RSUs that are entitled to non-forfeitable distribution equivalents qualify as participating securities and are included in the Company's basic and diluted earnings per share computations using the two-class method. The holder of an RSU participating security would have a contractual obligation to share in the losses of the entity if the holder is obligated to fund the losses of the issuing entity or if the contractual principal or mandatory redemption amount of the participating security is reduced as a result of losses incurred by the issuing entity. Because the RSU participating securities do not have a mandatory redemption amount and the holders of the participating securities are not obligated to fund losses, neither the vested RSUs nor the unvested RSUs are subject to any contractual obligation to share in losses of the Company.

Holders of AOG Units are subject to the vesting requirements (all of which have fully vested) and transfer restrictions set forth in the agreements with the respective holders, and may a limited number of times each year, upon notice (subject to the terms of the Exchange Agreement), exchange their AOG Units for Class A shares on a one-for-one basis. An AOG Unit holder must exchange one unit in each of the Apollo Operating Group partnerships to effectuate an exchange for one Class A share.

Apollo Global Management, LLC has one Class B share outstanding, which is held by BRH Holdings GP, Ltd. ("BRH"). The voting power of the Class B share is reduced on a one vote per one AOG Unit basis in the event of an exchange of AOG Units for Class A shares, as discussed above. The Class B share has no net income (loss) per share as it does not participate in Apollo's earnings (losses) or distributions. The Class B share has no distribution or liquidation rights. The Class B share has voting rights on a pari passu basis with the Class A shares. The Class B share represented 60.5%, 61.4% and 65.4% of the total voting power of the Company's shares entitled to vote as of December 31, 2016, 2015 and 2014, respectively.

The following table summarizes the anti-dilutive securities for the years ended December 31, 2016, 2015 and 2014, respectively.

	For the Years Ended December 31,		
	2016	2015	2014
Weighted average vested RSUs	1,466,803	9,984,862	19,541,458
Weighted average unvested RSUs	5,975,293	4,858,935	9,556,131
Weighted average unexercised options	222,920	227,086	548,441
Weighted average AOG Units outstanding	215,917,462	219,575,738	225,005,386
Weighted average unvested restricted shares	82,301	90,985	—

Issuance of Class A Shares

During the years ended December 31, 2016, 2015 and 2014, the Company issued Class A shares in settlement of vested RSUs. The Company has generally allowed holders of vested RSUs and exercised share options to settle their tax liabilities by reducing the number of Class A shares issued to them, which the Company refers to as "net share settlement." Additionally, the Company has generally allowed holders of share options to settle their exercise price by reducing the number of Class A shares issued to them at the time of exercise by an amount sufficient to cover the exercise price. The net share settlement results in a liability for the Company and a corresponding accumulated deficit adjustment. This adjustment for the years ended December 31, 2016, 2015 and 2014 was $40.7 million, $78.9 million and $0.4 million, respectively.

The table below summarizes the issuances of Class A shares in settlement of vested RSUs and share options for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Class A shares issued	4,625,304	11,296,338	10,491,649
Gross value of shares[(1)]	$ 108,716	$ 325,747	$ 289,000

(1) Based on the closing price of a Class A share at the time of issuance.

Share Repurchase Plan

In February 2016, Apollo adopted a plan to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through net share settlement of equity-based awards granted under the 2007 Equity Plan. During the year ended December 31, 2016, the Company repurchased and canceled 1.0 million Class A shares for $12.9 million and, in connection with net share settlements, reduced Class A shares to be issued to employees under the 2007 Equity Plan by 2.7 million Class A shares resulting in a payment by the Company of $40.7 million to satisfy the applicable withholding obligation.

13. EQUITY-BASED COMPENSATION

RSUs

The Company grants RSUs under the 2007 Omnibus Equity Incentive Plan. These grants are accounted for as a grant of equity awards in accordance with U.S. GAAP. The fair value of all grants is based on the grant date fair value, which considers the public share price of the Company's Class A shares subject to certain discounts, as applicable. The following table summarizes the weighted average discounts for Plan Grants and Bonus Grants for the years ended December 31, 2016, 2015 and 2014.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

	For the Years Ended December 31,		
	2016	2015	2014
Plan Grants:			
Discount for the lack of distributions until vested[(1)]	14.0%	26.0%	32.5%
Marketability discount for transfer restrictions[(2)]	3.8%	4.2%	5.1%
Bonus Grants:			
Marketability discount for transfer restrictions[(2)]	2.1%	2.2%	3.2%

(1) Based on the present value of a growing annuity calculation.
(2) Based on the Finnerty Model calculation.

The estimated total grant date fair value is charged to compensation expense on a straight-line basis over the vesting period, which for Plan Grants is generally up to six years, with the first installment vesting one year after grant and quarterly vesting thereafter, and for Bonus Grants is generally annual vesting over three years. The fair value of grants made during the years ended December 31, 2016, 2015 and 2014 was $62.6 million, $70.6 million and $149.1 million, respectively.

The following table presents the forfeiture rate and equity-based compensation expense recognized for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Actual forfeiture rate	8.8%	1.2%	6.7%
Equity-based compensation	$ 67,958	$ 65,661	$ 80,695

The following table summarizes RSU activity for the year ended December 31, 2016:

	Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of RSUs Outstanding
Balance at January 1, 2016	11,040,143	$ 16.40	6,294,053	17,334,196 (1)
Granted	3,406,655	18.37	—	3,406,655
Forfeited	(1,270,579)	19.74	—	(1,270,579)
Issued	—	16.43	(7,326,251)	(7,326,251)
Vested	(3,784,653)	18.54	3,784,653	—
Balance at December 31, 2016	9,391,566	$ 15.80	2,752,455	12,144,021 (1)

(1) Amount excludes RSUs which have vested and have been issued in the form of Class A shares.

Units Expected to Vest—As of December 31, 2016, approximately 9.0 million RSUs were expected to vest over the next 2.8 years.

Restricted Share Awards

The Company has granted restricted share awards under the 2007 Omnibus Equity Incentive Plan in connection with certain performance-based incentive plans and in connection with the 2015 Venator acquisition. These grants are accounted for as a grant of equity awards in accordance with U.S. GAAP. The fair value of all grants is based on the grant date fair value, which considers the public share price of the Company's Class A shares discounted primarily for transfer restrictions. The grant date fair value of these awards is recognized as equity based compensation expense on a straight-line basis over the vesting period of two to three years.

The following table presents the actual forfeiture rate and equity-based compensation expense recognized for the years ended December 31, 2016, 2015 and 2014:

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

	For the Years Ended December 31,		
	2016	2015	2014(1)
Actual forfeiture rate	1.6%	—%	—%
Equity-based compensation	$ 3,478	$ 2,749	$ —

(1) There were no Restricted Share Awards granted in 2014.

The following table summarizes the restricted share award activity related to a performance-based incentive plan and the 2015 Venator acquisition for the year ended December 31, 2016:

	Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of Restricted Share Awards Outstanding
Balance at January 1, 2016	105,866	$ 21.53	—	105,866
Granted	27,151	17.53	—	27,151
Forfeited	(2,117)	19.81	—	(2,117)
Issued	—	21.42	(51,764)	(51,764)
Vested	(51,764)	21.42	51,764	—
Balance at December 31, 2016	79,136	$ 20.27	—	79,136

Units Expected to Vest—As of December 31, 2016, approximately 75,971 restricted share awards were expected to vest over the next 1.5 years.

Share Options

The Company has granted options under the 2007 Equity Plan. For the years ended December 31, 2016, 2015 and 2014, compensation expense of $0.1 million, $0.1 million and $28.2 million was recognized as a result of these grants, respectively.

There were no share options granted during the years ended December 31, 2016, 2015 and 2014. Apollo measures the fair value of each option award on the date of grant using the Black-Scholes option-pricing model. As of December 31, 2016, there were 222,920 options outstanding, 160,417 options exercisable and 60,000 options. Unamortized compensation cost related to unvested share options at December 31, 2016 was $0.2 million and is expected to be recognized over a weighted average period of 1.5 years.

There were no options exercised or forfeited during the year ended December 31, 2016. The intrinsic value of options exercised was $0.0 million $0.1 million, and $26.6 million for the years ended December 31, 2016, 2015 and 2014, respectively.

AAA RDUs

Incentive units that provide the right to receive AAA restricted depositary units (“RDUs”) following vesting have been granted to employees of the Company. The incentive units granted to employees generally vest over three years and vested AAA RDUs can be converted into ordinary common units of AAA subject to applicable securities law restrictions. For the years ended December 31, 2016, 2015 and 2014, compensation expense of $1.7 million, $0.7 million and $0.4 million was recognized, respectively, in connection with AAA RDU grants. All AAA incentive units were fully vested and settled in the form of RDUs as of December 31, 2016.

Restricted Stock and Restricted Stock Unit Awards—ARI and AMTG

ARI granted restricted stock awards and restricted stock unit awards ("ARI Awards") and Apollo Residential Mortgage, Inc. (“AMTG”) granted restricted stock unit awards (“AMTG RSUs”) to the Company and certain employees of the Company. These awards generally vest over three years, either quarterly or annually.

The awards granted to the Company are recorded as investments under the equity method of accounting and deferred revenue in the consolidated statements of financial condition. As these awards vest, the deferred revenue is recognized as management fees.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The ARI Awards and AMTG RSUs granted to the Company's employees are recorded in other assets and other liabilities in the consolidated statements of financial condition. The grant date fair value of the asset is amortized through equity-based compensation on a straight-line basis over the vesting period. The fair value of the liability is remeasured each period with any changes in fair value recorded in compensation expense in the consolidated statements of operations. Compensation expense is offset by related management fees earned by the Company from ARI and AMTG, respectively.

The grant date fair value of the employees' awards is based on the then public share price of ARI and AMTG at grant, less discounts for transfer restrictions as well as timing of distributions.

On August 31, 2016, pursuant to the terms and conditions of the Agreement and Plan of Merger, dated February 26, 2016 by and among ARI, AMTG and Arrow Merger Sub, Inc., a wholly owned subsidiary of the Company ("Merger Sub"), Merger Sub was merged with and into AMTG (the "first merger"), with AMTG continuing as the surviving entity and as a subsidiary of the Company, and AMTG merged with and into ARI (the "second merger") with ARI continuing as the surviving entity in the second merger. At the effective time of the first merger, each share of common stock of AMTG issued and outstanding immediately prior to the First Merger was converted into the right to receive $6.86 in cash, without interest and 0.417571 shares of ARI's common stock, with limited exceptions.

The following table summarizes the management fees, equity-based compensation expense, and actual forfeiture rates for the ARI Awards for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Management fees	$ 6,643	$ 3,334	$ 1,326
Equity-based compensation	6,643	3,081	1,329
Actual forfeiture rate	3.8%	1.3%	—%

The following table summarizes the management fees, compensation expense, and actual forfeiture rates for the AMTG RSUs for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Management fees	$ 2,478	$ 1,171	$ 915
Equity-based compensation	2,478	1,171	828
Actual forfeiture rate	0.1%	2.5%	2.5%

The following tables summarize activity for the ARI Awards and AMTG RSUs that were granted to certain of the Company's employees for the year ended December 31, 2016:

	ARI Awards Unvested	Weighted Average Grant Date Fair Value	ARI Awards Vested	Total Number of ARI Awards Outstanding
Balance at January 1, 2016	893,810	$ 16.88	365,000	1,258,810
Granted	903,068	16.35	—	903,068

Restricted Share Awards—Athene Holding

The Company has granted Athene Holding restricted share awards to certain employees of the Company. Separately, Athene Holding has also granted restricted share awards to certain employees of the Company. Both awards are collectively referred to as the "AHL Awards". Certain of the AHL Awards function similarly to options as they are exchangeable for Class A shares of Athene Holding upon payment of a conversion price and the satisfaction of certain other conditions. The awards granted are either subject to time-based vesting conditions that generally vest over three to five years or vest upon achieving certain metrics, such as attainment of certain rates of return and realized cash received by certain investors in Athene Holding upon sale of their shares.

The Company records the AHL Awards in other assets and other liabilities in the consolidated statements of financial condition. The fair value of the asset is amortized through equity-based compensation over the vesting period. The fair value of the liability is remeasured each period with any changes in fair value recorded in compensation expense in the consolidated statements of operations. For AHL Awards granted by Athene Holding, compensation expense related to amortization of the asset is offset by related management fees earned by the Company from Athene.

The grant date fair value of the AHL Awards is based on the share price of Athene Holding, less discounts for transfer restrictions. The AHL Awards that function similarly to options were valued using a multiple-scenario model, which considers the price volatility of the underlying stock price of Athene Holding, time to expiration and the risk-free rate, while the other awards were valued using the share price of Athene Holding less any discounts for transfer restrictions.

The following table summarizes the management fees, equity-based compensation expense and actual forfeiture rates for the AHL Awards for the years ended December 31, 2016, 2015 and 2014:

	For the Years Ended December 31,		
	2016	2015	2014
Management fees	$ 19,173	$ 23,697	$ 16,738
Equity-based compensation	20,560	24,180	16,738
Actual forfeiture rate	3.2%	—%	—%

The following table summarizes activity for the AHL Awards that were granted to certain employees of the Company for the year ended December 31, 2016:

	AHL Awards Unvested	Weighted Average Grant Date Fair Value	AHL Awards Vested	Total Number of AHL Awards Outstanding
Balance at January 1, 2016	1,515,878	$ 3.54	1,044,869	2,560,747
Granted	181,105	33.89	—	181,105
Vested	(981,617)	3.68	981,617	—
Forfeited	(54,478)	1.23	—	(54,478)
Delivered	—	4.75	(1,018,462)	(1,018,462)
Balance at December 31, 2016	660,888	$ 11.83	1,008,024	1,668,912

Certain of the AHL Awards were not convertible into Class A shares of Athene Holding until the completion of an initial public offering of Athene Holding.

Table of Contents

Units Expected to Vest—As of December 31, 2016, 423,990 AHL Awards are expected to vest over the next 2.5 years and 236,898 AHL Awards may vest if certain metrics are achieved.

Equity-Based Compensation Allocation

Equity-based compensation is allocated based on ownership interests. Therefore, the amortization of equity-based compensation is allocated to shareholders' equity attributable to Apollo Global Management, LLC and the Non-Controlling Interests, which results in a difference in the amounts charged to equity-based compensation expense and the amounts credited to shareholders' equity attributable to Apollo Global Management, LLC in the Company's consolidated financial statements.

Below is a reconciliation of the equity-based compensation allocated to Apollo Global Management, LLC for the years ended December 31, 2016, 2015 and 2014:

	For the Year Ended December 31, 2016			
	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non-Controlling Interest in Apollo Operating Group[1]	Allocated to Apollo Global Management, LLC
RSUs, share options and restricted share awards	$ 71,562	—%	$ —	$ 71,562
AHL Awards	20,560	53.7	11,049	9,511
Other equity-based compensation awards	10,861	53.7	5,837	5,024
Total equity-based compensation	$ 102,983		16,886	86,097
Less other equity-based compensation awards[2]			(16,886)	(16,510)
Capital increase related to equity-based compensation			$ —	$ 69,587

	For the Year Ended December 31, 2015			
	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non-Controlling Interest in Apollo Operating Group[1]	Allocated to Apollo Global Management, LLC
RSUs, share options and restricted share awards	$ 68,535	—%	$ —	$ 68,535
AHL Awards	24,180	54.4	13,158	11,022
Other equity-based compensation awards	4,961	54.4	2,699	2,262
Total equity-based compensation	$ 97,676		15,857	81,819
Less other equity-based compensation awards[2]			(15,857)	(13,860)
Capital increase related to equity-based compensation			$ —	$ 67,959

	For the Year Ended December 31, 2014			
	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non-Controlling Interest in Apollo Operating Group[1]	Allocated to Apollo Global Management, LLC
RSUs, share options and restricted share awards	$ 107,017	—%	$ —	$ 107,017
AHL Awards	16,738	57.7	9,938	6,800
Other equity-based compensation awards	2,565	57.7	1,517	1,048
Total equity-based compensation	$ 126,320		11,455	114,865
Less other equity-based compensation awards[2]			(11,455)	(5,994)
Capital increase related to equity-based compensation			$ —	$ 108,871

(dollars in thousands, except share data, except where noted)

(1) Calculated based on average ownership percentage for the period considering Class A share issuances during the period.
(2) Includes equity-based compensation reimbursable by certain funds.

14. RELATED PARTY TRANSACTIONS AND INTERESTS IN CONSOLIDATED ENTITIES

Management fees, transaction and advisory fees and reimbursable expenses from the funds and portfolio companies that the Company manages are included in due from related parties in the consolidated statements of financial condition. The Company also typically facilitates the initial payment of certain operating costs incurred by the funds that it manages as well as their related parties. These costs are normally reimbursed by such funds and are included in due from related parties.

Due from related parties and due to related parties are comprised of the following:

	As of December 31, 2016	As of December 31, 2015
Due from Related Parties:		
Due from private equity funds	$ 19,089	$ 21,532
Due from portfolio companies	34,339	36,424
Due from credit funds	112,516	124,660
Due from Contributing Partners, employees and former employees	72,305	42,491
Due from real estate funds	16,604	22,728
Total Due from Related Parties	$ 254,853	$ 247,835
Due to Related Parties:		
Due to Managing Partners and Contributing Partners	$ 506,542	$ 506,162
Due to private equity funds	56,880	16,293
Due to credit funds	66,859	57,981
Due to real estate funds	281	580
Distributions payable to employees	7,564	13,520
Total Due to Related Parties	$ 638,126	$ 594,536

Tax Receivable Agreement and Other

Subject to certain restrictions, each of the Managing Partners and Contributing Partners has the right to exchange their vested AOG Units for the Company's Class A shares. Certain Apollo Operating Group entities have made an election under Section 754 of the U.S. Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), which will result in an adjustment to the tax basis of the assets owned by the Apollo Operating Group at the time of the exchange. These exchanges will result in increases in tax deductions that will reduce the amount of tax that APO Corp. will otherwise be required to pay in the future.

The tax receivable agreement provides for the payment to the Managing Partners and Contributing Partners of 85% of the amount of cash savings, if any, in U.S. federal, state, local and foreign income taxes that APO Corp. would realize as a result of the increases in tax basis of assets that resulted from the 2007 Reorganization and exchanges of AOG Units for Class A shares. APO Corp. retains the benefit from the remaining 15% of actual cash tax savings. If the Company does not make the required annual payment on a timely basis as outlined in the tax receivable agreement, interest is accrued on the balance until the payment date. These payments are expected to occur approximately over the next 15 years.

As a result of the exchanges of AOG Units for Class A shares during the years ended December 31, 2016, 2015 and 2014, a $6.2 million, $45.4 million and $47.9 million liability was recorded, respectively, to estimate the amount of the future expected payments to be made by APO Corp. to the Managing Partners and Contributing Partners pursuant to the tax receivable agreement.

In April, 2015 and 2014, Apollo made cash payments pursuant to the tax receivable agreement resulting from the realized tax benefit for each preceding tax year. Included in the payments was interest paid to the Managing Partners and Contributing Partners. There were no such cash payments made in 2016. The table below presents the cash payments made during 2015 and 2014.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Date	Cash Payment	Interest Paid to Managing Partners	Interest Paid to Contributing Partners
April, 2015	$ 48,420	$ 13,090	$ 555
April, 2014	32,032	8,272	469

During the years ended December 31, 2016 and 2014, the Company reduced the tax receivable agreement liability and recorded $3.2 million and $32.2 million, respectively, in other income, net in the consolidated statement of operations due to changes in estimated tax rates.

Distributions

In addition to other distributions such as payments pursuant to the tax receivable agreement, the table below presents information regarding the quarterly distributions which were made at the sole discretion of the manager of the Company during 2016, 2015 and 2014 (in millions, except per share data):

Distribution Declaration Date	Distribution per Class A Share	Distribution Payment Date	Distribution to Class A Shareholders	Distribution to Non-Controlling Interest Holders in the Apollo Operating Group	Total Distributions from Apollo Operating Group	Distribution Equivalents on Participating Securities

For the year ended December 31, 2016	$ 1.25		$ 230.7	$ 269.8	$ 500.5	$ 8.4

(1) On April 3, 2014, June 16, 2014, September 11, 2014, December 15, 2014 and April 11, 2015, the Company made a $0.22, $0.13, $0.06, $0.11 and $0.10 distribution per AOG Unit to the Non-Controlling Interest holders in the Apollo Operating Group.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Due from Contributing Partners, Employees and Former Employees

As of December 31, 2016 and December 31, 2015, due from Contributing Partners, Employees and Former Employees includes various amounts due to the Company including employee loans and return of profit sharing distributions. As of December 31, 2016 and December 31, 2015, the balance included interest-bearing employee loans receivable of $26.1 million and $25.0 million, respectively. The outstanding principal amount of the loans as well as all accrued and unpaid interest is required to be repaid at the earlier of the eighth anniversary of the date of the relevant loan or at the date of the relevant employee's resignation from the Company.

The Company recorded a receivable from the Contributing Partners and certain employees and former employees for the potential return of profit sharing distributions that would be due if certain funds were liquidated as of December 31, 2016 and December 31, 2015 of $39.3 million and $14.7 million, respectively.

Indemnity

Carried interest income from certain funds that the Company manages can be distributed to the Company on a current basis, but is subject to repayment by the subsidiary of the Apollo Operating Group that acts as general partner of the fund in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, subject to certain limitations, the obligation of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. Pursuant to an existing shareholders agreement includes clauses that the Company has agreed to indemnify each of the Company's Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of certain funds that the Company manages (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that the Company's Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that the Company's Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation for the return of previously made distributions, the Company will be obligated to reimburse the Company's Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though the Company did not receive the certain distribution to which that general partner obligation related. The Company recorded an indemnification liability of $5.9 million and $4.6 million, respectively, as of December 31, 2016 and December 31, 2015.

Due to Private Equity Funds

Based upon a hypothetical liquidation of certain funds as of December 31, 2016, the Company has recorded a general partner obligation to return previously distributed carried interest income, which represents amounts due to these funds. As such, there was a general partner obligation to return previously distributed carried interest income of $56.0 million accrued as of December 31, 2016. As of December 31, 2015, the Company accrued a general partner obligation to return previously distributed carried interest income of $14.2 million. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement of the fund.

Due to Credit Funds

Based upon a hypothetical liquidation of certain of our credit funds, as of December 31, 2016 and December 31, 2015, the Company has recorded a general partner obligation to return previously distributed carried interest income, which represents amounts due to these funds. As such, there was a general partner obligation to return previously distributed carried interest income of $60.6 million accrued as of December 31, 2016. As of December 31, 2015, the Company accrued a general partner obligation to return previously distributed carried interest income of $57.8 million. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement or other governing document of the fund.

Athene

Athene Holding was founded in 2009 to capitalize on favorable market conditions in the dislocated life insurance sector. Athene Holding, through its subsidiaries, is a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The products and services offered by Athene include: fixed and fixed indexed annuity products; reinsurance services offered to third-party annuity providers; and institutional products, such as funding agreements. Athene Holding became an effective registrant on December 9, 2016 under the U.S. Securities Exchange Act of 1934, as amended, and trades on the New York Stock Exchange (NYSE) under the symbol "ATH".

The Company, through its consolidated subsidiary, Athene Asset Management, provides asset management services to Athene, including asset allocation services, direct asset management services, asset and liability matching management, mergers and acquisitions, asset diligence hedging and other asset management services, and receives a gross management fee of 0.40% per annum on all assets under management in accounts owned by or related to Athene (the "Athene Accounts") with certain limited exceptions. Another subsidiary of the Company, AAME, provides investment advisory services to Athene and receives a gross fee of 0.10% per annum on the assets with respect to which it advises.

Under a transaction advisory services agreement with Athene (the "Athene Services Agreement"), effective February 5, 2013 through December 31, 2014, Apollo earned a quarterly monitoring fee of 0.50% of Athene's capital and surplus as of the end of the applicable quarter multiplied by 2.5, excluding the shares of Athene Holding that were newly acquired (and not in satisfaction of prior commitments to buy such shares) by AAA Investments in the contribution of certain assets by AAA to Athene in October 2012 (the "Excluded Athene Shares"). The Athene Services Agreement was amended in connection with the Athene Private Placement described below (the "Amended Athene Services Agreement"). The Amended Athene Services Agreement adjusted the calculation of Athene Holding's capital and surplus downward by an amount equal to (x) the equity capital raised in the Athene Private Placement and (y) certain disproportionate increases to the statutory capital and surplus of Athene, as compared to the stockholders' equity of Athene calculated on a U.S. GAAP basis, as a result of certain future acquisitions by Athene. Prior to the consummation of the Athene Private Placement, all such monitoring fees were paid pursuant to the Athene Services Derivative. In connection with the Athene Private Placement, the Athene Services Derivative was settled on April 29, 2014 by delivery to Apollo of common shares of Athene Holding, and as a result, such derivative was terminated. Following settlement of the Athene Services Derivative, future monitoring fees paid to Apollo pursuant to the Amended Athene Services Agreement, were paid on a quarterly basis in arrears by delivery to Apollo of common shares of Athene Holding. Unsettled monitoring fees pursuant to the Amended Athene Services Agreement are recorded as due from affiliates in the consolidated statements of financial condition. For the year ended December 31, 2014, Apollo earned $226.4 million related to this monitoring fee. The monitoring fee is recorded in advisory and transaction fees from affiliates, net, in the consolidated statements of operations.

In accordance with the services agreement among AAA, AAA Investments and the other service recipients party thereto and Apollo (the "AAA Services Agreement"), Apollo receives a management fee for managing the assets of AAA Investments. In connection with each of the contribution of certain assets by AAA to Athene in October 2012, and the initial closing of the Athene Private Placement on April 4, 2014, the AAA Services Agreement was amended (the "Amended AAA Services Agreement"). Pursuant to the Amended AAA Services Agreement, the parties agreed that there will be no management fees payable by AAA Investments with respect to the Excluded Athene Shares. AAA Investments agreed to continue to pay Apollo the same management fee on its investment in Athene Holding (other than with respect to the Excluded Athene Shares), except that Apollo agreed that the obligation to pay the existing management fee terminated on December 31, 2014 (although services will continue through December 31, 2020). Prior to the consummation of the Athene Private Placement, all such management fees were accrued pursuant to the AAA Services Derivative. In connection with the Athene Private Placement, the AAA Services Derivative was settled on April 29, 2014 by delivery to Apollo of common shares of Athene Holding, and as a result, such derivative was terminated. Following settlement of the AAA Services Derivative, future management fees paid to Apollo pursuant to the Amended AAA Services Agreement were paid on a quarterly basis in arrears by delivery to Apollo of common shares of Athene Holding. There were no management fees receivable as of December 31, 2016 and December 31, 2015 as AAA Investments' obligation to pay the existing management fee terminated on December 31, 2014. The total management fees earned by Apollo related to the Amended AAA Services Agreement were $3.4 million, $3.4 million and $1.9 million for the years ended December 31, 2016, 2015 and 2014, respectively. These management fees are recorded in management fees from affiliates in the consolidated statements of operations.

The Company provides sub-advisory services with respect to a portion of the assets in the Athene Accounts. In addition, from time to time, Athene also invests in funds and investment vehicles that Apollo manages. The Company broadly refers to "Athene Sub-Advised" assets under management as those assets in the Athene Accounts which the Company explicitly sub-advises as well as those assets in the Athene Accounts which are invested directly in funds and investment vehicles Apollo manages ("Athene Assets Directly Invested").

With respect to assets in the Athene Accounts which the Company explicitly sub-advises, the Company earns up to 0.40% per annum on assets up to $10 billion and 0.35% per annum on all such assets in excess of $10 billion, with certain limited

exceptions. These fees are in addition to the gross management fee of 0.40% per annum paid to Athene Asset Management on the portion of such assets that it manages and the gross fee of 0.10% per annum paid to AAME on the portion of such assets that it advises. A majority of the assets in the Athene Accounts which the Company explicitly sub-advises are in accounts that invest in high-grade credit asset classes, such as CLO debt, commercial mortgage backed securities and insurance-linked securities.

With respect to Athene Assets Directly Invested, Apollo receives management fees and carried interest, if applicable, directly from the relevant funds under the investment management agreements and other governing documents of such funds. Fees paid to the Company related to such fund investments vary from 0% per annum to 1.75% per annum with respect to management fees and 0% to 20% with respect to carried interest. These fees are in addition to the gross management fee of 0.40% per annum paid to Athene Asset Management on the portion of such assets that it manages and the gross fee of 0.10% per annum paid to AAME on the portion of such assets it advises.

The Company refers to the portion of the Athene Asset Management assets under management that is not Athene Sub-Advised as "Athene Non-Sub-Advised". Athene Asset Management and other Apollo subsidiaries incur all expenses associated with their provision of services to Athene.

Apollo, as general partner of AAA Investments, is generally entitled to a carried interest that allocates to it 20% of the realized returns (net of related expenses, including borrowing costs) on the investments of AAA Investments, except that Apollo is not entitled to receive any carried interest with respect to the shares of Athene Holding that were acquired (and not in satisfaction of prior commitments to buy such shares) by AAA Investments in the contribution of certain assets by AAA to Athene in October 2012. Apollo may elect to receive payment of carried interest receivable from AAA Investments in cash or in common shares of Athene Holding (valued at the then fair market value); and if Apollo elects to receive payment of such carried interest in cash, then common shares of Athene Holding shall be distributed to Apollo and immediately sold by Apollo to pay for such carried interest in cash. For the years ended December 31, 2016, 2015 and 2014, the Company recorded carried interest income, taking into account the related profit sharing expense, of $47.8 million, $36.1 million and $14.6 million, respectively, from AAA Investments, which is recorded in the consolidated statements of operations. As of December 31, 2016 and December 31, 2015, the Company had a $229.8 million and $185.5 million carried interest receivable, respectively, related to AAA Investments. As of December 31, 2016 and December 31, 2015, the Company had a related profit sharing payable of $80.6 million and $62.8 million, respectively, recorded in profit sharing payable in the consolidated statements of financial condition.

For the years ended December 31, 2016, 2015 and 2014, Apollo earned revenues in the aggregate totaling $547.0 million, $526.5 million and $546.5 million, respectively, consisting of management fees, sub-advisory, monitoring fees and carried interest income from Athene after considering the related profit sharing expense and changes in the market value of the Athene Holding shares owned directly by Apollo, which is recorded in the consolidated statements of operations. These amounts exclude the deferred revenue recognized as management fees associated with the vesting of AHL Awards granted to employees of Athene Asset Management as further described in note 13.

The Company had an approximate 8.9% economic ownership interest in Athene Holding as of December 31, 2016, which comprises Apollo's direct 8.0% economic ownership interest in Athene Holding plus an additional 0.9% economic ownership interest, which is calculated as the sum of the Company's approximate 2.2% economic ownership interest in AAA and the Company's approximate 0.06% economic ownership interest in AAA Investments, multiplied by AAA Investments' approximate 39.4% economic ownership interest in Athene, calculated without giving effect to restricted common shares issued under Athene's management equity plan as of December 31, 2016.

The Company had an approximate 9.2% economic ownership interest in Athene Holding as of December 31, 2015, which comprises Apollo's direct ownership of 8.0% of the economic equity of Athene Holding plus an additional 1.2% economic ownership interest, which is calculated as the sum of the Company's approximate 2.4% economic ownership interest in AAA and the Company's approximate 0.06% economic ownership interest in AAA Investments, multiplied by AAA Investments' approximate 46.3% economic ownership interest in Athene, calculated without giving effect to restricted common shares issued under Athene's management equity plan as of December 31, 2015.

AAA Investments Credit Agreement

On April 30, 2015, Apollo entered into a revolving credit agreement with AAA Investments ("AAA Investments Credit Agreement"). Under the terms of the AAA Investments Credit Agreement, the Company shall make available to AAA Investments one or more advances at the discretion of AAA Investments in the aggregate amount not to exceed a balance of $10.0 million at an applicable rate of LIBOR plus 1.5%. The Company receives an annual commitment fee of 0.125% on the unused portion of

the loan. As of December 31, 2016, $4.0 million had been advanced by the Company and remained outstanding on the AAA Investments Credit Agreement.

Regulated Entities

Apollo Global Securities, LLC ("AGS") is a registered broker dealer with the SEC and is a member of the Financial Industry Regulatory Authority, subject to the minimum net capital requirements of the SEC. AGS was in compliance with these requirements at December 31, 2016. From time to time, this entity is involved in transactions with related parties of Apollo, including portfolio companies of the funds Apollo manages, whereby AGS earns underwriting and transaction fees for its services.

Interests in Consolidated Entities

The table below presents equity interests in Apollo's consolidated, but not wholly-owned, subsidiaries and funds. Net income and comprehensive income attributable to Non-Controlling Interests consisted of the following:

	For the Years Ended December 31,		
	2016	2015	2014
AAA[(1)]	$ —	$ —	$ (196,964)
Interest in management companies and a co-investment vehicle[(2)]	(7,403)	(10,543)	(13,186)
Other consolidated entities	1,614	(10,821)	(17,590)
Net income attributable to Non-Controlling Interests in consolidated entities	(5,789)	(21,364)	(227,740)
Net income attributable to Appropriated Partners' Capital[(3)]	—	—	70,729
Net income attributable to Non-Controlling Interests in the Apollo Operating Group	(561,668)	(194,634)	(404,682)
Net Income attributable to Non-Controlling Interests	$ (567,457)	$ (215,998)	$ (561,693)
Net income attributable to Appropriated Partners' Capital[(4)]	—	—	(70,729)
Other comprehensive loss attributable to Non-Controlling Interests	2,587	7,020	591
Comprehensive Income Attributable to Non-Controlling Interests	$ (564,870)	$ (208,978)	$ (631,831)

(1) Reflects the Non-Controlling Interests in the net (income) loss of AAA and is calculated based on the Non-Controlling Interests ownership percentage in AAA as of December 31, 2014, which was approximately 97.5%. As of December 31, 2014, Apollo owned approximately 2.5% of AAA. AAA was deconsolidated effective January 1, 2015 as a result of the Company's adoption of new accounting guidance, as described in note 2.

(2) Reflects the remaining interest held by certain individuals who receive an allocation of income from certain of our credit funds.

(3) Reflects net income of the consolidated CLOs classified as VIEs.

(4) Appropriated Partners' Capital is included in total Apollo Global Management, LLC shareholders' equity and is therefore not a component of comprehensive income attributable to Non-Controlling Interests on the consolidated statements of comprehensive income.

15. COMMITMENTS AND CONTINGENCIES

Investment Commitments—As a limited partner, general partner and manager of the Apollo funds, Apollo had unfunded capital commitments as of December 31, 2016 and December 31, 2015 of $607.9 million and $566.3 million, respectively.

Debt Covenants—Apollo's debt obligations contain various customary loan covenants. As of December 31, 2016, the Company was not aware of any instances of non-compliance with the financial covenants contained in the documents governing the Company's debt obligations.

Litigation and Contingencies—Apollo is, from time to time, party to various legal actions arising in the ordinary course of business including claims and lawsuits, reviews, investigations or proceedings by governmental and self regulatory agencies regarding its business.

Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of Apollo have received subpoenas and other requests for information from various government regulatory agencies and investors in Apollo's funds, seeking information regarding the use of placement agents. California Public Employees' Retirement System ("CalPERS"), one of Apollo's Strategic Investors, announced on October 14, 2009, that it had initiated a special

review of placement agents and related issues. The report of the CalPERS' Special Review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of Apollo or its affiliates. Apollo is continuing to cooperate with all such investigations and other reviews. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital Research, LLC ("Arvco") (a placement agent that Apollo has used) and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS's purchase of securities in various funds managed by Apollo and another asset manager. Apollo is not a party to the civil lawsuit and the lawsuit does not allege any misconduct on the part of Apollo. Likewise, on April 23, 2012, the SEC filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by Apollo. This lawsuit also does not allege wrongdoing on the part of Apollo, and alleges that Apollo was defrauded by Arvco, Villalobos, and Buenrostro. On March 14, 2013, the United States Department of Justice unsealed an indictment against Messrs. Villalobos and Buenrostro alleging, among other crimes, fraud in connection with those same activities; again, Apollo is not accused of any wrongdoing and in fact is alleged to have been defrauded by the defendants. The criminal action was set for trial in a San Francisco federal court in July 2014, but was put on hold after Mr. Buenrostro pleaded guilty on July 11, 2014. As part of Mr. Buenrostro's plea agreement, he admitted to taking cash and other bribes from Mr. Villalobos in exchange for several improprieties, including attempting to influence CalPERS' investing decisions and improperly preparing disclosure letters to satisfy Apollo's requirements. There is no suggestion that Apollo was aware that Mr. Buenrostro had signed the letters with a corrupt motive. The government has indicated that they will file new charges against Mr. Villalobos incorporating Mr. Buenrostro's admissions. On August 7, 2014, the government filed a superseding indictment against Mr. Villalobos asserting additional charges. Trial had been scheduled for February 23, 2015, but Mr. Villalobos passed away on January 13, 2015. Additionally, on April 15, 2013, Mr. Villalobos, Arvco and related entities (the "Arvco Debtors") brought a civil action in the United States Bankruptcy Court for the District of Nevada (the "Bankruptcy Court") against Apollo. The action is related to the ongoing bankruptcy proceedings of the Arvco Debtors. This action alleges that Arvco served as a placement agent for Apollo in connection with several funds associated with Apollo, and seeks to recover purported fees the Arvco Debtors claim Apollo has not paid them for a portion of Arvco's placement agent services. In addition, the Arvco Debtors allege that Apollo has interfered with the Arvco Debtors' commercial relationships with third parties, purportedly causing the Arvco Debtors to lose business and to incur fees and expenses in the defense of various investigations and litigations. The Arvco Debtors also seek compensation from Apollo for these alleged lost profits and fees and expenses. The Arvco Debtors' complaint asserts various theories of recovery under the Bankruptcy Code and common law. Apollo denies the merit of all of the Arvco Debtors' claims and will vigorously contest them. The Bankruptcy Court had stayed this action pending the result in the criminal case against Mr. Villalobos but lifted the stay on May 1, 2015; in light of Mr. Villalobos's death, the criminal case was dismissed. On August 25, 2016, Christina Lovato, in her capacity as the Chapter 7 Trustee for the Arvco Debtors, filed an amended complaint. No estimate of possible loss, if any, can be made at this time.

On June 18, 2014, BOKF N.A. (the "First Lien Trustee"), the successor indenture trustee under the indenture governing the First Lien Notes issued by Momentive Performance Materials, Inc. ("Momentive"), commenced a lawsuit in the Supreme Court for the State of New York, New York County against AGM and members of an ad hoc group of Second Lien Noteholders (including, but not limited to, Euro VI (BC) S.a.r.l.). The First Lien Trustee amended its complaint on July 2, 2014 (the "First Lien Intercreditor Action"). In the First Lien Intercreditor Action, the First Lien Trustee seeks, among other things, a declaration that the defendants violated an intercreditor agreement entered into between holders of the First Lien Notes and holders of the second lien notes. On July 16, 2014, the successor indenture trustee under the indenture governing the 1.5 Lien Notes (the "1.5 Lien Trustee," and, together with the First Lien Trustee, the "Indenture Trustees") filed an action in the Supreme Court of the State of New York, New York County that is substantially similar to the First Lien Intercreditor Action (the "1.5 Lien Intercreditor Action," and, together with the First Lien Intercreditor Action, the "Intercreditor Actions"). AGM subsequently removed the Intercreditor Actions to federal district court, and the Intercreditor Actions were automatically referred to the Bankruptcy Court adjudicating the Momentive chapter 11 bankruptcy cases. The Indenture Trustees then filed motions with the Bankruptcy Court to remand the Intercreditor Actions back to the state court (the "Remand Motions"). On September 9, 2014, the Bankruptcy Court denied the Remand Motions. On August 15, 2014, the defendants in the Intercreditor Actions (including AGM) filed a motion to dismiss the 1.5 Lien Intercreditor Action and a motion for judgment on the pleadings in the First Lien Intercreditor Action (the "Dismissal Motions"). On September 30, 2014, the Bankruptcy Court granted the Dismissal Motions. In its order granting the Dismissal Motions, the Bankruptcy Court gave the Indenture Trustees until mid-November 2014 to move to amend some, but not all, of the claims alleged in their respective complaints. On November 14, 2014, the Indenture Trustees moved to amend their respective complaints pursuant to the Bankruptcy Court's order (the "Motions to Amend"). On January 9, 2015, the defendants filed their oppositions to the Motions to Amend. On January 16, 2015, the Bankruptcy Court denied the Motions to Amend (the "Dismissal Order"), but gave the Indenture Trustees until March 2, 2015 to seek to amend their respective complaints. On March 2, 2015, the First Lien Trustee filed a motion seeking to amend its complaint. On April 10, 2015, the defendants, including AGM and Euro VI (BC) S.a.r.l., filed an opposition to the First Lien Trustee's motion to amend. Instead of moving again to amend its complaint,

the 1.5 Lien Trustee chose to appeal the Dismissal Order (the "1.5 Lien Appeal"). On March 30, 2015, the 1.5 Lien Trustee filed its Statement of Issues and Designation of Record on Appeal. On March 31, 2015, because the legal issues presented in the 1.5 Lien Appeal are substantially similar to those presented in the First Lien Intercreditor Action, the parties in the 1.5 Lien Appeal submitted a joint stipulation and proposed order to the District Court staying the briefing schedule on the 1.5 Lien Appeal pending the outcome of the First Lien Trustee's most recent motion to amend. On April 13, 2015, the Defendants filed their Counter-Designation of the Record on Appeal in the 1.5 Lien Appeal. On May 8, 2015, the Bankruptcy Court denied the motion to amend filed on March 2, 2015 by the First Lien Trustee. On May 27, 2015, the First Lien Trustee filed a notice of appeal from the orders of the Bankruptcy Court dismissing the First Lien Intercreditor Action and denying the First Lien Trustee's motions to amend (the "First Lien Appeal"). On June 2, 2015, the First Lien Trustee filed its Statement of Issues and Designation of Record on Appeal. On June 24, 2015, the defendants filed their Counter-Designation of the Record on Appeal in the First Lien Appeal. On July 31, 2015, the 1.5 Lien Trustee sent a letter to the federal district court hearing the 1.5 Lien Appeal asking the court to consolidate the 1.5 Lien Appeal with the First Lien Appeal which had been assigned to a different judge (the "Consolidation Request"). On April 8, 2016, the court granted the Consolidation Request. On May 20, 2016, the Indenture Trustees filed their opening appellate brief. The Appellees filed their response brief on July 14, 2016, and the Indenture Trustees filed their reply brief on August 5, 2016. The court has not yet set a date for oral argument. Apollo is unable at this time to assess a potential risk of loss. In addition, Apollo does not believe that AGM is a proper defendant in these actions.

There are several pending actions concerning transactions related to Caesars Entertainment Corporation ("Caesars Entertainment"), Caesars Entertainment Operating Company, Inc. ("CEOC") and certain of their respective subsidiaries.

A. In re: Caesars Entertainment Operating Company, Inc. bankruptcy proceedings, No. 15-01145 (N.D. Ill. Bankr.) (the "Illinois Bankruptcy Action"). On January 17, 2017, an order was entered in the Illinois Bankruptcy Action confirming a plan of reorganization for CEOC and its debtor subsidiaries (the "Plan") which, inter alia, grants broad releases to Apollo (as defined below) and others. The Plan is likely to become effective in the third quarter of 2017 after the conditions to its effectiveness have been satisfied. On the effective date of the Plan (the "Plan Effective Date"), the Apollo Released Parties (as defined below) will be released from the claims in the WSFS Action, the UMB Action, the Trilogy Action, the Danner Action, the BOKF Action, the UMB SDNY Action, the Wilmington Trust Action and the CEOC Action (each as defined below).

- Background: On January 12, 2015, three holders of CEOC second lien notes filed an involuntary bankruptcy petition against CEOC in the United States Bankruptcy Court for the District of Delaware (the "Delaware Bankruptcy Action"). On January 15, 2015, CEOC and certain of its affiliates (collectively the "Debtors") filed the Illinois Bankruptcy Action under Chapter 11 in the Northern District of Illinois. On February 2, 2015, the court in the Delaware Bankruptcy Action ordered that all bankruptcy proceedings relating to the Debtors should take place in the Illinois Bankruptcy Action. The Illinois Bankruptcy Court held an evidentiary hearing to determine whether the Debtors' petition date was January 12, 2015 or January 15, 2015; this motion has not yet been ruled on by the Illinois Bankruptcy Court, and pursuant to the Plan this motion will be dismissed as moot. Certain of the Debtors' creditors indicated in filings with the Illinois Bankruptcy Court that an investigation into certain acts and transactions that predated the Debtors' bankruptcy filing could lead to claims against a number of parties, including AGM and certain of its affiliates. No such claims were brought by the Debtors' prepetition creditors against Apollo in the Illinois Bankruptcy Action. On May 13, 2016, the Official Committee of Second Priority Noteholders (the "Second Lien Noteholders Committee") filed a motion seeking an Order granting it standing to commence, prosecute and settle claims on behalf of the Debtors' estates (the "Standing Motion"). The proposed complaint filed with the Standing Motion names Apollo and many others as defendants (see also "H" below). On or about September 27, 2016, Caesars Entertainment and the Debtors announced that they had received confirmations from representatives of the Debtors' major creditor groups of those groups' support for a term sheet that describes the key economic terms of a proposed consensual chapter 11 plan for the Debtors. On October 4, 2016, the Debtors filed the Third Amended Joint Plan of Reorganization which subsequently was amended and became the Plan. As part of the Plan, and in connection with the merger between Caesars Entertainment and Caesars Acquisition Company ("CAC"), funds managed by Apollo will not retain any of their equity interests in the merged Caesars Entertainment on account of their pre-merger Caesars Entertainment shares. Such equity interests would, instead, be for the benefit of CEOC's creditors. Funds managed by Apollo will, however, retain their equity interests in the merged Caesars Entertainment on account of their CAC shares. The voting deadline on the Plan was November 21, 2016, and approximately 90% in dollar amount of the Debtors' creditors voted in favor of the Plan. On October 17, 2016, the Bankruptcy Court granted the Debtors' requested injunction of the WSFS, Trilogy, Danner, UMB, Wilmington Trust and BOKF Actions (defined below "B", "C", "D", "F" and "G") (the "105 Injunction") through the first omnibus hearing after Plan confirmation, and by order

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

dated January 26, 2017 the 105 Injunction was extended to, inter alia, the Plan Effective Date. At the confirmation hearing, no creditor presented any objection to the Plan. As noted above, the Plan was confirmed by the Illinois Bankruptcy Court and will become effective after the conditions to its effectiveness have been satisfied. The Plan provides several parties, including, Apollo and certain of its affiliates (collectively referred to as the "Apollo Released Parties") with a release of claims that the Debtors and the Debtors' creditors have or may have against any or all of the Apollo Released Parties, including those described below in the WSFS Action, the Trilogy Action, the Danner Action, the UMB Action, the BOKF Action, the Wilmington Trust Action and the CEOC Action.

B. Wilmington Savings Fund Society, FSB v. Caesars Entertainment Corp. et al., No. 10004-CVG (Del. Ch.) (the "WSFS Action"). On August 4, 2014, Wilmington Savings Fund Society, FSB ("WSFS"), as trustee for certain CEOC second-lien notes, sued Caesars Entertainment, CEOC, other Caesars Entertainment-affiliated entities, and certain of Caesars Entertainment's directors, including Marc Rowan, Eric Press, David Sambur (each an Apollo Partner) and Jeffrey Benjamin (a consultant to Apollo), in Delaware's Court of Chancery (the "Delaware Court"). WSFS (i) asserts claims (against some or all of the defendants) for fraudulent conveyance, breach of fiduciary duty, breach of contract, corporate waste, and aiding and abetting related to certain transactions among CEOC and certain of its subsidiaries and Caesars Entertainment and certain of its affiliates, and (ii) requests (among other things) that the Delaware Court unwind the challenged transactions and award damages. WSFS served a subpoena for documents on Apollo on September 11, 2014, but Apollo's response was stayed during the pendency of motions to dismiss under a September 23, 2014 stipulated order. On March 18, 2015, the Delaware Court denied Defendants' motion to dismiss. Apollo served responses and objections to WSFS' subpoena on March 25, 2015. Caesars Entertainment answered the complaint on April 1, 2015. During the pendency of CEOC's bankruptcy proceedings, the WSFS Action has been automatically stayed with respect to CEOC. WSFS additionally advised the Illinois Bankruptcy Court that, during CEOC's bankruptcy proceedings, WSFS would only pursue claims in the WSFS Action relating to whether Caesars Entertainment remains liable on a guarantee of certain of CEOC's second priority notes. On July 17, 2015, WSFS served supplemental subpoenas to several entities affiliated with AGM, and AGM and these entities have substantially completed their production of non-privileged documents responsive to those subpoenas. On March 11, 2016, WSFS filed a motion for partial summary judgment (the "Summary Judgment Motion") on its breach of contract claim against Caesars Entertainment. On April 25, 2016, Caesars Entertainment filed a joint Cross-Motion for Partial Summary Judgment and answering brief in opposition to WSFS' Summary Judgment Motion (the "Cross-Motion"). WSFS filed its joint reply and opposition to Caesars Entertainment's Cross-Motion on May 25, 2016, and Caesars Entertainment filed a reply to WSFS' opposition on June 9, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code enjoining the plaintiffs in the WSFS Action from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the WSFS Action initially through the first omnibus hearing after Plan confirmation, and now through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the WSFS Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

C. Trilogy Portfolio Company, L.L.C., et al. v. Caesars Entertainment Corp., et al., No. 14-cv-7091 (S.D.N.Y.) (the "Trilogy Action"). On September 3, 2014, institutional investors allegedly holding approximately $137 million in CEOC unsecured senior notes sued CEOC and Caesars Entertainment in federal court in New York (the "New York Court") for breach of contract and the implied covenant of good faith, Trust Indenture Act ("TIA") violations, and a declaratory judgment challenging the August 2014 private financing transaction in which a portion of outstanding senior unsecured notes were purchased by Caesars Entertainment, and a majority of the noteholders agreed to amend the indenture to terminate Caesars Entertainment's guarantee of the notes and modify certain restrictions on CEOC's ability to sell assets. Caesars Entertainment and CEOC filed a motion to dismiss on November 12, 2014. On January 15, 2015, the New York Court granted the motion with respect to a TIA claim by Trilogy but otherwise denied the motion. On January 30, 2015, plaintiffs filed an amended complaint seeking relief against Caesars Entertainment only, and Caesars Entertainment answered on February 12, 2015. On October 2, 2014, a related putative class action complaint was filed on behalf of the holders of these notes captioned Danner v. Caesars Entertainment Corp., et al., No. 14-cv-7973 (S.D.N.Y.) (the "Danner Action"), against Caesars Entertainment alleging claims similar to those in the Trilogy Action. On February 19, 2015, plaintiffs filed an amended complaint, and Caesars Entertainment answered the amended complaint on February 25, 2015. In March 2015, each of Trilogy and Danner served subpoenas for documents on Apollo. Apollo produced responsive, non-privileged documents in response to those subpoenas. In July 2015, Trilogy and Danner served subpoenas for depositions on Apollo and those depositions were completed on September 22, 2015. On October 23, 2015, Trilogy and Danner filed motions

for partial summary judgment, related to TIA and breach of contract claims. On December 29, 2015, the New York Court denied the motions for partial summary judgment. On March 23, 2016, the judge presiding over the Trilogy and Danner Actions announced that she was retiring from the bench effective April 28, 2016. A new judge was assigned to preside over the Trilogy and Danner Actions (in addition to the BOKF, UMB SDNY and Wilmington Trust Actions, defined below). On April 6, 2016, the parties agreed to a renewed summary judgment schedule for the Trilogy, Danner, BOKF, UMB SDNY (as defined below) and Wilmington Trust Actions. The moving parties submitted their briefs to the New York Court on May 10, 2016. Opposition briefs were filed on May 31, 2016. Reply briefs were filed on June 14, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code, enjoining the plaintiffs in the Trilogy and Danner Actions from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction, staying the Trilogy and Danner Actions initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the Trilogy and Danner Actions. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

D. UMB Bank v. Caesars Entertainment Corporation, et al., No. 10393 (Del. Ch.) (the "UMB Action"). On November 25, 2014, UMB Bank, as trustee for certain CEOC notes, sued Caesars Entertainment, CEOC, other Caesars Entertainment-affiliated entities and certain of Caesars Entertainment's directors, including Marc Rowan, Eric Press, David Sambur (each an Apollo Partner) and Jeffrey Benjamin (an Apollo consultant), in the Delaware Court. The UMB Action alleges claims for actual and constructive fraudulent conveyance and transfer, insider preferences, illegal dividends, breach of contract, intentional interference with contractual relations, breach of fiduciary duty, aiding and abetting breach of fiduciary duty, usurpation of corporate opportunities, and unjust enrichment. The UMB Action seeks appointment of a receiver for CEOC, a constructive trust and other relief. The UMB Action has been assigned to the same judge overseeing the WSFS Action. The UMB Action has effectively been stayed since April 7, 2016, and on October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the UMB Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the UMB Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

E. Koskie v. Caesars Acquisition Company, et al., No. A-14-711712-C (Clark Cnty Nev. Dist. Ct.) (the "Koskie Action"). On December 30, 2014, Nicholas Koskie brought a shareholder class action on behalf of shareholders of Caesars Acquisition Company ("CAC") against CAC, Caesars Entertainment, and members of CAC's Board of Directors, including Marc Rowan and David Sambur (each an Apollo partner). The lawsuit challenges CAC's and Caesars Entertainment's plan to merge, alleging that the proposed transaction will not give CAC shareholders fair value. Koskie asserts claims for breach of fiduciary duty relating to the director defendants' interrelationships with the entities involved the proposed transaction. The case has been dismissed for failure to prosecute, and the time granted to the plaintiff to refile has passed without there being any refiling.

F. BOKF, N.A. v. Caesars Entertainment Corporation, No. 15-156 (S.D.N.Y) (the "BOKF Action"). On March 3, 2015, BOKF, N.A., as trustee for certain CEOC notes, sued Caesars Entertainment in the New York Court. The lawsuit alleges claims for breach of contract, intentional interference with contractual relations and a declaratory judgment, and seeks to enforce Caesars Entertainment's guarantee of certain CEOC notes. The BOKF Action has been assigned to the same judge in the New York Court as the Trilogy and Danner Actions. On March 25, 2015, Caesars Entertainment filed an answer to the complaint. On May 19, 2015, BOKF sent the New York Court a letter requesting permission to file a partial summary judgment motion on Counts II and V of its complaint, related to the validity and enforceability of Caesars Entertainment's guarantee of certain notes issued by CEOC and alleged violations of the Trust Indenture Act, 15 U.S.C. §§ 76aaa, et seq. The Trilogy and Danner plaintiffs did not join BOKF's request to file for partial summary judgment. On May 28, 2015, the New York Court granted BOKF permission to move for partial summary judgment. On June 15, 2015, another related complaint captioned UMB Bank, N.A. v. Caesars Entertainment Corp., et al., No. 15-cv-4634 (S.D.N.Y.) (the "UMB SDNY Action") was filed by UMB Bank, N.A., solely in its capacity as Indenture Trustee of certain first lien notes ("UMB"), against Caesars Entertainment alleging claims similar to those alleged in the BOKF, Trilogy and Danner Actions. On June 16, 2015, UMB sent a letter to the New York Court requesting permission to file a partial summary judgment motion on the same schedule with BOKF. On June 26, 2015, BOKF and UMB filed partial summary judgment motions (the "Partial Summary Judgment Motions"). On July 24, 2015, Caesars Entertainment filed its opposition to the Partial Summary Judgment Motions, and on August 7, 2015, BOKF and UMB filed reply briefs in

further support of the Partial Summary Judgment Motions. On August 27, 2015, the New York Court denied the Partial Summary Judgment Motions and certified its opinion for an interlocutory appeal to the United States Court of Appeals for the Second Circuit. On December 22, 2015, the Second Circuit declined to hear the interlocutory appeal. Separately, on November 20, 2015, BOKF and UMB filed a second set of motions for partial summary judgment, on the issue of the disputed contract interpretation related to indenture release provisions. On January 5, 2016 the New York Court denied these motions. At a hearing on February 22, 2016, the New York Court bifurcated the trial in the BOKF and UMB SDNY Actions and scheduled the trial on the breach of contract and TIA claims to begin on March 14, 2016. The New York Court ordered a separate trial on the claims for breach of the covenant of good faith and fair dealing and tortious interference with contract to begin at a later date to be determined. On February 26, 2016, the Illinois Bankruptcy Court granted the stay request as to the BOKF Action until May 9, 2016, resulting in a stay of the trial on the breach of contract and TIA claims in the BOKF and UMB SDNY Actions. On February 24, 2016, Caesars Entertainment filed a motion for partial summary judgment to dispose of the claims for (1) breach of the implied covenant of good faith and fair dealing brought by BOKF and UMB, and (2) intentional interference with contractual relations brought by BOKF. The moving parties submitted their briefs on May 10, 2016. Opposition briefs were filed on May 31, 2016. Reply briefs were filed on June 14, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code, enjoining the plaintiffs in the BOKF Action from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, after several motions and appeals relating to extending the stay past August 29, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the BOKF Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the BOKF Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

G. Wilmington Trust, National Association v. Caesars Entertainment Corporation, No. 15-cv-08280 (S.D.N.Y.) (the "Wilmington Trust Action"). On October 20, 2015, Wilmington Trust, N.A., solely in its capacity as Indenture Trustee for the 10.75% Notes due 2016 ("Wilmington Trust"), sued Caesars Entertainment in the New York Court alleging claims similar to those alleged in the BOKF, UMB, Trilogy, and Danner Actions. The parties cross-moved for partial summary judgment on the same schedule as the Trilogy Action. Caesars Entertainment argued that its actions did not violate the TIA and that its guarantee of the 10.75% Notes was automatically released under a certain clause contained in the indenture governing the 10.75% Notes. Wilmington Trust argued that Caesars Entertainment's actions constituted an improper out-of-court reorganization under the TIA and that Caesars Entertainment's guarantee was not released because the necessary conditions precedent did not occur. Although the temporary restraining order and preliminary injunction issued by the Illinois Bankruptcy Court did not apply to the Wilmington Trust Action, on July 6, 2016, Wilmington Trust and Caesars Entertainment filed a stipulation staying the Wilmington Trust Action until August 29, 2016. The New York Court scheduled oral argument for August 30, 2016. A motion was made by CEOC and the other Debtors to the Illinois Bankruptcy Court to extend the stay beyond August 29, 2016, which motion was denied. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the Wilmington Trust Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the Wilmington Trust Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

H. CEOC v. Caesars Entertainment et al., Illinois Bankruptcy Court (the "CEOC Action"). On or about August 9, 2016, CEOC and certain of the other Debtors commenced a "placeholder" lawsuit against Caesars Entertainment, AGM, Caesars Entertainment directors (including Messrs. Rowan, Sambur, Press and Benjamin) and certain of its officers, and many others to, inter alia, prevent the statute of limitations from running respecting any claim owned by a Debtor's estate. This lawsuit basically asserts the claims identified in the Examiner's Report and has been stayed by an order of the Bankruptcy Court. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the CEOC Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

Apollo believes that the claims in the WSFS Action, the UMB Action, the Trilogy Action, the Danner Action, the Koskie Action, the BOKF Action, the UMB SDNY Action, the Wilmington Trust Action and the CEOC Action are without merit. For this reason, and because the confirmed Plan has not become effective yet, no reasonable estimate of possible loss, if any, can be made at this time.

The Bankruptcy Court administering the CEOC bankruptcy proceedings appointed an examiner (the "Examiner") to report on certain transactions engaged in by CEOC and certain of its subsidiaries. The Examiner issued his report on March 16, 2016. The Examiner's report states that potential claims may exist against "Apollo" and persons affiliated with it relating to certain

transactions that occurred in the years preceding CEOC's bankruptcy filing, principally relating to Bankruptcy Code fraudulent conveyance claims as well as aiding and abetting claims. Apollo and persons affiliated with it deny any wrongdoing and deny any liability in connection with such transactions, and if any new claim is asserted against any of them, such claim will be vigorously contested.

Following the January 16, 2014 announcement that CEC Entertainment, Inc. ("CEC") had entered into a merger agreement with certain entities affiliated with Apollo (the "Merger Agreement"), four putative shareholder class actions were filed in the District Court of Shawnee County, Kansas on behalf of purported stockholders of CEC against, among others, CEC, its directors and Apollo and certain of its affiliates, which include Queso Holdings Inc., Q Merger Sub Inc., Apollo Management VIII, L.P., and AP VIII Queso Holdings, L.P. The first purported class action, which is captioned Hilary Coyne v. Richard M. Frank et al., Case No. 14C57, was filed on January 21, 2014 (the "Coyne Action"). The second purported class action, which was captioned John Solak v. CEC Entertainment, Inc. et al., Civil Action No. 14C55, was filed on January 22, 2014 (the "Solak Action"). The Solak Action was dismissed for lack of prosecution on October 14, 2014. The third purported class action, which is captioned Irene Dixon v. CEC Entertainment, Inc. et al., Case No. 14C81, was filed on January 24, 2014 and additionally names as defendants Apollo Management VIII, L.P. and AP VIII Queso Holdings, L.P. (the "Dixon Action"). The fourth purported class action, which is captioned Louisiana Municipal Public Employees' Retirement System v. Frank, et al., Case No. 14C97, was filed on January 31, 2014 (the "LMPERS Action") (together with the Coyne and Dixon Actions, the "Shareholder Actions"). A fifth purported class action, which was captioned McCullough v. Frank, et al., Case No. CC-14-00622-B, was filed in the County Court of Dallas County, Texas on February 7, 2014. This action was dismissed for want of prosecution on May 21, 2014. Each of the Shareholder Actions alleges, among other things, that CEC's directors breached their fiduciary duties to CEC's stockholders in connection with their consideration and approval of the Merger Agreement, including by agreeing to an inadequate price, agreeing to impermissible deal protection devices, and filing materially deficient disclosures regarding the transaction. Each of the Shareholder Actions further alleges that Apollo and certain of its affiliates aided and abetted those alleged breaches. As filed, the Shareholder Actions seek, among other things, rescission of the various transactions associated with the merger, damages and attorneys' and experts' fees and costs. On February 7, 2014 and February 11, 2014, the plaintiffs in the Shareholder Actions pursued a consolidated action for damages after the transaction closed. Thereafter, the Shareholder Actions were consolidated under the caption In re CEC Entertainment, Inc. Stockholder Litigation, Case No. 14C57, and the parties engaged in limited discovery. On July 21, 2015, a consolidated class action complaint was brought by Twin City Pipe Trades Pension Trust in the Shareholder Actions that did not name as defendants Apollo, Queso Holdings Inc., Q Merger Sub Inc., Apollo Management VIII, L.P., or AP VIII Queso Holdings, L.P., continued to assert claims against CEC and its former directors, and added The Goldman Sachs Group Inc. ("Goldman Sachs") as a defendant. The consolidated complaint alleges, among other things, that CEC's former directors breached their fiduciary duties to CEC's stockholders by conducting a deficient sales process, agreeing to impermissible deal protection devices, and filing materially deficient disclosures regarding the transaction. It further alleges that two members of the board who also served as the senior managers of CEC had material conflicts of interest and that Goldman Sachs aided and abetted the board's breaches as a result of various conflicts of interest facing the bank. The consolidated complaint seeks, among other things, to recover damages, attorneys' fees and costs. On October 22, 2015, the parties to the consolidated action moved to dismiss the complaint. Although Apollo cannot predict the ultimate outcome of the consolidated action, and therefore no reasonable estimate of possible loss, if any, can be made at this time, Apollo believes that such action is without merit.

On June 12, 2015, a putative class action was commenced in the United States District Court for the Northern District of California ("California Court") by Rachel Silva ("Silva") and Don Hudson ("Hudson"), on behalf of themselves and all others similarly situated, against Aviva plc; Athene Annuity and Life Company f/k/a Aviva Life and Annuity Company ("Aviva"); Athene USA Corporation f/k/a Aviva USA Corporation; Athene Holding; Athene Life Re Ltd.; Athene Asset Management; and AGM. The original complaint in this action alleged violations of the Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C. Sections 1962(c) and (d). The plaintiffs alleged that commencing in 2007 and continuing thereafter, Aviva and its then management engaged in a scheme to, among other things, falsely represent the financial strength of and hide the true financial condition of Aviva by, among other things, allegedly ceding risky liabilities to Aviva's undercapitalized subsidiaries and affiliates, misvaluing assets, and failing to make required disclosures to purchasers of policies, and that after Athene Holding purchased all of the outstanding stock of Aviva's parent effective October 2, 2013 the scheme was "unwound and rewound" so as to continue, and that as a result thereof some of the purchasers of annuity products issued by Aviva were charged an excessive price and were damaged as a result thereof. All defendants (except Aviva plc) (a) moved to transfer this action to the United States District Court for the Southern District of Iowa ("Iowa Court") and (b) moved to dismiss this action. Aviva plc separately moved to dismiss the action for lack of jurisdiction over it. The California Court granted the motion to transfer to the Iowa Court and denied without prejudice the motions to dismiss. Plaintiff Hudson moved for leave to amend the complaint, which motion was granted by the Iowa Court. The amended complaint removed Silva as a named plaintiff and removed Aviva plc as a defendant, but otherwise substantively makes the same or similar allegations. The Defendants have moved to dismiss the amended complaint, and that motion has been fully briefed. The Court has

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

now stayed its decision on the motion to dismiss and discovery until the Eighth Circuit Court of Appeals renders its decision in a different case that has some of the same jurisdictional issues. If the action is not dismissed, Athene Asset Management and AGM (and the other defendants) will deny the material allegations of the amended complaint and will vigorously defend themselves against these claims. Although neither Athene Asset Management nor AGM can predict the ultimate outcome of this action, each believes that it is without merit, and because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

After the announcement of the execution of the Agreement and Plan of Merger among Apollo Commercial Real Estate Finance, Inc., Apollo Residential Mortgage, Inc. and Arrow Merger Sub, Inc. ("Merger Sub"), two putative class action lawsuits challenging the proposed merger, captioned Aivasian v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-001532, and Wiener v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-001837, were filed in the Circuit Court for Baltimore City. A putative class and derivative lawsuit was later filed in the same Court, captioned Crago v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-002610. Following a hearing on May 6, 2016, the Court entered orders among other things, consolidating the three actions under the caption In Re Apollo Residential Mortgage, Inc. Shareholder Litigation, Case No.: 24-C-16-002610. The plaintiffs have designated the Crago complaint as the operative complaint. The operative complaint includes both direct and derivative claims, names as defendants AGM, AMTG, the board of directors of AMTG (the "AMTG Board"), ARI, Merger Sub and Athene Holding and alleges, among other things, that the members of the AMTG Board breached their fiduciary duties to AMTG's stockholders and that the other defendants aided and abetted such fiduciary breaches. The operative complaint further alleges, among other things, that the proposed merger involves inadequate consideration, was the result of an inadequate and conflicted sales process, and includes unreasonable deal protection devices that purportedly preclude competing offers. It also alleges that the transactions with Athene Holding are unfair and that the registration statement on Form S-4 filed with the SEC on April 6, 2016 contains materially misleading disclosures and omits certain material information. The operative complaint seeks, among other things, certification of the proposed class, declaratory relief, preliminary and permanent injunctive relief, including enjoining or rescinding the merger, unspecified damages, and an award of other unspecified attorneys' and other fees and costs. On May 6, 2016, counsel for the plaintiffs filed with the Court a stipulation seeking the appointment of interim co-lead counsel, which stipulation was approved by the Court on June 9, 2016. Defendants' motions to dismiss have been fully briefed, and oral argument was held on December 8, 2016. Apollo believes that the claims asserted in the complaints are without merit. For this reason, and because the claims are in their early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Following the March 14, 2016 announcement that The Fresh Market, Inc. ("TFM") had entered into a merger agreement with certain entities affiliated with Apollo (the "TFM Merger Agreement"), two Petitions for Appraisal of Stock were filed in the Chancery Court for the State of Delaware. The first, captioned Hudson Bay Master Fund, Ltd. and Brigade Leveraged Capital Structures Fund, Ltd. v. The Fresh Market, Inc., was filed May 23, 2016 on behalf of holders of 1,660,000 shares of common stock of TFM and names only TFM as the respondent. The second captioned Verition Multi-Strategy Master Ltd. and Verition Partners Master Fund Ltd. v. The Fresh Market, Inc. was filed August 22, 2016 on behalf of holders of 1,198,318 shares of common stock of TFM and names only TFM as the respondent. Both actions seek a determination of the fair value of the shares of the common stock of TFM under Section 262 of the Delaware Corporate Code. The two actions have since been consolidated and will proceed together under the caption, In re Appraisal of The Fresh Market, Inc., Case No. 12372-VCG (the "Appraisal Action"). The Court in the Appraisal Action has scheduled a trial on the merits to take place in November 2017. In addition, a purported shareholder class action, captioned Elizabeth Morrison v. Ray Berry, et. al., Case No. 12808-VCG, was filed October 6, 2016 in the Chancery Court for the State of Delaware and names as defendants TFM's former officers and directors (the "Morrison Action"). The Morrison Action alleges, among other things, that the TFM officers and directors breached their fiduciary duties to the TFM shareholders in connection with their consideration and approval of the TFM Merger Agreement, including by engaging in a sale process that improperly favored AGM and/or Apollo Management VIII, L.P., by agreeing to an inadequate price and by filing materially deficient disclosures regarding the transaction. The Court has not yet set a schedule for resolving this Action on the merits. Because each of the pending actions is in the early stages, no reasonable estimate of possible loss, if any, can be made. Apollo believes that each of these actions is without merit.

On March 4, 2016, the Public Employees Retirement System of Mississippi filed a putative securities class action against Sprouts Farmers Market, Inc. ("SFM"), several SFM directors (including Andrew Jhawar, an Apollo partner), AP Sprouts Holdings, LLC and AP Sprouts Holdings (Overseas), L.P. (the "AP Entities"), which are controlled by entities managed by Apollo affiliates, and two underwriters of a March 2015 secondary offering of SFM common stock. The AP Entities sold SFM common stock in the March 2015 secondary offering. The complaint, filed in Arizona Superior Court and captioned Public Employees Retirement System of Mississippi v. Sprouts Farmers Market, Inc. (CV2016-050480), alleges that SFM filed a materially misleading registration statement for the secondary offering that incorporated alleged misrepresentations in SFM's 2014 annual report regarding SFM's business prospects, and failed to disclose alleged accelerating produce deflation. The two causes of action against the AP

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Entities are for alleged violations of Sections 11 and 15 of the Securities Act of 1933. Plaintiff seeks, among other things, compensatory damages for alleged losses sustained from a decline in SFM's stock price. On March 24, 2016, defendants removed the case to United States District Court for the District of Arizona. Plaintiff's April 18, 2016 remand motion was fully briefed as of May 27, 2016. Because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Between February 25 and March 23, 2016, plaintiffs filed five putative class actions in the Superior Court of Maricopa County, Arizona, on behalf of purported stockholders of Apollo Education Group, Inc. The actions were captioned as follows: Casey v. Apollo Education Group, Inc., et al., CV2016-051605 (Ariz. Super. Ct. Feb. 25, 2016); Miglio v. Apollo Education Group, Inc., et al., CV2016-003718 (Ariz. Super. Ct. Feb. 26, 2016); Wagner v. Apollo Education Group, Inc., et al., CV2016-001905 (Ariz. Super. Ct. Mar. 9, 2016); Ladouceur v. Apollo Education Group, Inc., et al., CV2016-002148 (Ariz. Super. Ct. Mar. 17, 2016); Simkhovich v. Apollo Education Group, Inc., et al., CV2016-002339 (Ariz. Super. Ct. Mar. 23, 2016). The defendants include, among others, Apollo Education Group, Inc. ("AEG"), members of AEG's board of directors, AGM, Fund VIII, AP VIII Queso Holdings, L.P., which is a subsidiary of funds affiliated with Apollo Management VIII, L.P., and AGM, and Socrates Merger Sub, Inc., which is a wholly owned subsidiary of AP VIII Queso Holdings, L.P. The complaints allege that AEG's directors breached their fiduciary duties to AEG's stockholders by entering into a merger agreement that provides for AEG to be acquired by AP VIII Queso Holdings, L.P., and Socrates Merger Sub, Inc. Plaintiffs claim that AEG's directors engaged in a flawed sales process, agreed to a price that does not adequately compensate AEG's stockholders, and agreed to certain unfair deal protection terms in connection with the merger agreement. Two of the complaints further allege (1) that AEG's directors breached their fiduciary duty of candor by filing a materially incomplete and misleading preliminary proxy statement, and (2) that the sales process was flawed because of certain alleged conflicts with AEG's financial advisors. All the complaints allege that AP VIII Queso Holdings, L.P., and Socrates Merger Sub, Inc., aided and abetted the alleged breaches. The complaints that name as defendants AGM and Fund VIII, allege that those entities also aided and abetted the alleged breaches. No amount of damages is specified in any of the complaints. On April 12, 2016, the Court consolidated all the actions under the following caption: In re Apollo Education Group, Inc. Shareholder Litigation, Lead Case No. CV2016-001905 (Ariz. Super. Ct.). The parties have informed the Court that they have entered into a memorandum of understanding providing for the settlement of the suit. The settlement contemplated by the memorandum will provide for the dismissal with prejudice on the merits and release of any and all claims by the proposed class against Defendants. The settlement also will recognize that the pendency of the suit was a factor in the decision by the purchasers of AEG to increase the price offered to acquire all of the outstanding shares of AEG's common stock from $9.50 per share to $10.00 per share. The settlement is contingent upon the consummation of the merger agreement, Plaintiffs' taking confirmatory discovery, the execution of definitive settlement papers, certification of the proposed class, and court approval. The parties asked the court to extend the deadline by which the Plaintiffs must file an amended consolidated complaint or designate an operative complaint until November 8, 2016. The Court responded with an order explaining that the case will be dismissed on December 9, 2016, unless the parties submit a stipulated judgment or stipulated dismissal before that date, or the court otherwise extends the deadline for good cause. On December 9, 2016, the parties requested that the court extend the deadline by which Plaintiffs must file their amended complaint to March 10, 2017. The motion explained that the Department of Education had provided its response to a pre-acquisition application for approval of the merger agreement, indicating that the continuing participation of the University of Phoenix in Title IV programs following consummation of the merger would be subject to certain conditions. The motion further explained that the defendants were evaluating the Department of Education's response, its implications for the merger, and that any closing of the merger would be delayed. On December 15, 2016, the Court responded to the parties' motion with an order explaining that it would dismiss the case on March 10, 2017, unless the parties submitted a final judgment or stipulated dismissal before that date, or the Court otherwise extends the deadline for good cause. Because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

On June 20, 2016 Banca Carige S.p.A. ("Carige") commenced a lawsuit in the Court of Genoa (Italy) (No. 8965/2016), against its former Chairman, its former Chief Executive Officer, AGM and certain entities (the "Apollo Entities") organized and owned by investment funds managed by affiliates of AGM. The complaint alleges that AGM and the Apollo Entities (i) aided and abetted breaches of fiduciary duty to Carige allegedly committed by Carige's former Chairman and former CEO in connection with the sale to the Apollo Entities of Carige subsidiaries engaged in the insurance business; and (ii) took wrongful actions aimed at weakening Banca Carige's financial condition supposedly to facilitate an eventual acquisition of Carige. The causes of action are based in tort under Italian law. Carige purportedly seeks damages of €450 million in connection with the sale of the insurance businesses and €800 million for other losses. The first hearing has been scheduled for May 9, 2017. Based on the allegations made in the complaint, Apollo believes that there is no merit to Carige's claims. Additionally, as the case is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

On December 12, 2016, the CORE Litigation Trust (the "Trust"), which was created under the Chapter 11 reorganization plan for CORE Media and other affiliated entities, including CORE Entertainment, Inc. ("CORE"), approved by the Southern

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

District of New York Bankruptcy Court on September 22, 2016, commenced an action in California Superior Court for Los Angeles County, captioned Core Litigation Trust v. Apollo Global Management, LLC, et al., Case No. BC 643732, which was removed to the United States District Court for the Central District of California on February 3, 2017. The Trust's complaint asserts claims for inducing the breach of and tortiously interfering with $360 million in loans under the 2011 loan agreements entered into between CORE and certain First and Second Lien Lenders (the "Lenders"), who assigned their loan-agreement claims to the Trust as part of CORE's Chapter 11 plan of reorganization. The complaint names as defendants: (i) AGM (ii) Apollo Global Securities, LLC, (iii) other AGM subsidiaries, (iv) the funds managed by Apollo that were the beneficial owners of CORE Media (the "CORE Funds"), (v) certain affiliated-entities through which the CORE Funds owned their beneficial interest in CORE Media, (vi) Twenty-First Century Fox, Inc. ("Fox") and certain Fox affiliates, and (vii) Endemol USA Holding, Inc. ("Endemol") and certain Endemol-affiliated entities. The Trust alleges that defendants' participation in certain transactions related to CORE-including the December 12, 2014 formation of the joint venture through which the CORE Funds and Fox beneficially owned CORE Media and Endemol Shine-induced CORE to breach the loan agreements and tortiously interfered with CORE's performance of its obligations under the loan agreements. The Trust seeks unspecified compensatory and punitive damages. Apollo believes these claims are without merit. Because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

In December 2016, the Company received a subpoena from the SEC principally concerning the Company's disclosure of IRR calculations for certain private equity funds, costs associated with a European service provider, and certain personnel changes. These topics generally track matters with which the Company is familiar and has previously examined. The Company is fully cooperating with the SEC in this matter.

Commitments and Contingencies—Apollo leases office space and certain office equipment under various lease and sublease arrangements, which expire on various dates through 2025. As these leases expire, it can be expected that in the normal course of business, they will be renewed or replaced. Certain lease agreements contain renewal options, rent escalation provisions based on certain costs incurred by the landlord or other inducements provided by the landlord. Rent expense is accrued to recognize lease escalation provisions and inducements provided by the landlord, if any, on a straight-line basis over the lease term and renewal periods where applicable. Apollo has entered into various operating lease service agreements in respect of certain assets.

As of December 31, 2016, the approximate aggregate minimum future payments required for operating leases were as follows:

	2017	2018	2019	2020	2021	Thereafter	Total
Aggregate minimum future payments	$ 34,705	$ 30,969	$ 30,198	$ 13,473	$ 4,572	$ 6,853	$ 120,770

Expenses related to non-cancellable contractual obligations for premises, equipment, auto and other assets were $40.5 million, $41.9 million and $42.5 million for the years ended December 31, 2016, 2015 and 2014, respectively, and are included in general, administrative and other on the consolidated statements of operations.

Other long-term obligations relate to payments with respect to certain consulting agreements entered into by Apollo Investment Consulting LLC, a subsidiary of Apollo, as well as long-term service contracts. A significant portion of these costs are reimbursable by funds or portfolio companies. As of December 31, 2016, fixed and determinable payments due in connection with these obligations were as follows:

	2017	2018	2019	2020	2021	Thereafter	Total
Other long-term obligations	$ 19,229	$ 6,398	$ 3,694	$ 1,365	$ 1,365	$ 1,365	$ 33,416

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Contingent Obligations—Carried interest income with respect to private equity funds and certain credit and real estate funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. If all of the existing investments became worthless, the amount of cumulative revenues that have been recognized by Apollo through December 31, 2016 and that would be reversed approximates $2.9 billion. Management views the possibility of all of the investments becoming worthless as remote. Carried interest income is affected by changes in the fair values of the underlying investments in the funds that Apollo manages. Valuations, on an unrealized basis, can be significantly affected by a variety of external factors including, but not limited to, bond yields and industry trading multiples. Movements in these items can affect valuations quarter to quarter even if the underlying business fundamentals remain stable.

Additionally, at the end of the life of certain funds that the Company manages, there could be a payment due to a fund by the Company if the Company, as general partner, has received more carried interest income than was ultimately earned. The general partner obligation amount, if any, will depend on final realized values of investments at the end of the life of each fund or as otherwise set forth in the respective limited partnership agreement of the fund. See note 14 to our consolidated financial statements for further details regarding the general partner obligation.

Certain funds may not generate carried interest income as a result of unrealized and realized losses that are recognized in the current and prior reporting period. In certain cases, carried interest income will not be generated until additional unrealized and realized gains occur. Any appreciation would first cover the deductions for invested capital, unreturned organizational expenses, operating expenses, management fees and priority returns based on the terms of the respective fund agreements.

One of the Company's subsidiaries, AGS, provides underwriting commitments in connection with securities offerings to the portfolio companies of the funds Apollo manages. As of December 31, 2016, there were no underwriting commitments outstanding related to such offerings.

As of December 31, 2016, one of the Company's subsidiaries had unfunded contingent commitments of $22.1 million, to facilitate fundings at closing by lead arrangers for syndicated term loans issued by portfolio companies of a fund managed by Apollo. The commitments expire by February 13, 2017. As of February 13, 2017, the unfunded commitment was approximately $1.0 million.

Contingent Consideration—In connection with the acquisition of Stone Tower in April 2012, the Company agreed to pay the former owners of Stone Tower a specified percentage of any future carried interest income earned from certain of the Stone Tower funds, CLOs, and strategic investment accounts. This contingent consideration liability was determined based on the present value of estimated future carried interest payments, and is recorded in profit sharing payable in the consolidated statements of financial condition. The fair value of the remaining contingent obligation was $106.3 million and $70.9 million as of December 31, 2016 and December 31, 2015, respectively.

In connection with the Gulf Stream Asset Management, LLC ("Gulf Stream") acquisition, the Company agreed to make payments to the former owners of Gulf Stream under a contingent consideration obligation which required the Company to transfer cash to the former owners of Gulf Stream based on a specified percentage of carried interest income. As of December 31, 2016, there was no contingent liability as the Gulf Stream liabilities had been satisfied. The contingent liability had a fair value of $8.7 million as of December 31, 2015, which was recorded in profit sharing payable in the consolidated statements of financial condition.

The contingent consideration obligations will be remeasured to fair value at each reporting period until the obligations are satisfied. The changes in the fair value of the contingent consideration obligations is reflected in profit sharing expense in the consolidated statements of operations.

The contingent consideration obligations are measured at fair value and are characterized as Level III liabilities. See note 6 for further information regarding fair value measurements.

16. SEGMENT REPORTING

Apollo conducts its business primarily in the United States and substantially all of its revenues are generated domestically. Apollo's business is conducted through three reportable segments: private equity, credit and real estate. Segment information is utilized by our Managing Partners, who operate collectively as our chief operating decision maker, to assess performance and to allocate resources. These segments were established based on the nature of investment activities in each underlying fund, including the specific type of investment made and the level of control over the investment.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The performance is measured by the Company's chief operating decision maker on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo's business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the affiliated funds.

Economic Income

Economic Income, or "EI", is a key performance measure used by management in evaluating the performance of Apollo's private equity, credit and real estate segments. Management believes the components of EI, such as the amount of management fees, advisory and transaction fees and carried interest income, are indicative of the Company's performance. Management uses EI in making key operating decisions such as the following:

- Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;
- Decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses; and
- Decisions relating to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in such funds and those of the Company's shareholders by providing such individuals a profit sharing interest in the carried interest income earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on the Company's performance and growth for the year.

EI is a measure of profitability and has certain limitations in that it does not take into account certain items included under U.S. GAAP. EI represents segment income before income tax provision excluding transaction-related charges arising from the 2007 private placement, and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions. In addition, segment data excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements.

Economic Income (Loss) for the years ended December 31, 2015 and 2014 includes a recast of salary, bonus and benefits due to management's change in allocation methodology among the segments during the first quarter of 2016. All prior periods have been recast to conform to the current presentation. The impact to the combined segments' total Economic Income (Loss) for all periods was zero.

	Impact on Economic Income (Loss) For the Year Ended December 31, 2015			
	Private Equity Segment	Credit Segment	Real Estate Segment	Total Reportable Segments

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A. CONTROLS AND PROCEDURES

We maintain "disclosure controls and procedures", as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired objectives.

Our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) are effective at the reasonable assurance level to accomplish their objectives of ensuring that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

No changes in our internal control over financial reporting (as such term is defined in Rules 13a–15(f) and 15d–15(f) under the Exchange Act) occurred during our most recent quarter, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Management of Apollo is responsible for establishing and maintaining adequate internal control over financial reporting. Apollo's internal control over financial reporting is a process designed under the supervision of its principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of its consolidated financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America.

Apollo's internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets, provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors, and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Apollo's assets that could have a material effect on its financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an assessment of the effectiveness of Apollo's internal control over financial reporting as of December 31, 2016 based on the framework established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that Apollo's internal control over financial reporting as of December 31, 2016 was effective.

Deloitte & Touche LLP, an independent registered public accounting firm, has audited Apollo's financial statements included in this annual report on Form 10-K and issued its report on the effectiveness of Apollo's internal control over financial reporting as of December 31, 2016, which is included herein.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors and Executive Officers

The following table presents certain information concerning our board of directors and executive officers:

Name	Age	Position(s)
Leon Black	65	Chairman, Chief Executive Officer and Director
Joshua Harris	52	Senior Managing Director and Director
Marc Rowan	54	Senior Managing Director and Director
Martin Kelly	49	Chief Financial Officer
John Suydam	57	Chief Legal Officer
Michael Ducey	68	Director
Paul Fribourg	63	Director
Robert Kraft	75	Director
A.B. Krongard	80	Director
Pauline Richards	68	Director

Leon Black. Mr. Black is the Chairman of the board of directors and Chief Executive Officer of Apollo and a Managing Partner of Apollo Management, L.P. In 1990, Mr. Black founded Apollo Management, L.P. and Lion Advisors, L.P. to manage investment capital on behalf of a group of institutional investors, focusing on corporate restructuring, leveraged buyouts and taking minority positions in growth-oriented companies. From 1977 to 1990, Mr. Black worked at Drexel Burnham Lambert Incorporated, where he served as a Managing Director, head of the Mergers & Acquisitions Group, and co-head of the Corporate Finance Department. Mr. Black also serves on the board of directors of the general partner of AAA and previously served on the board of directors of Sirius XM Radio Inc. Mr. Black is a Co-Chairman of The Museum of Modern Art and a trustee of The Mount Sinai Medical Center and The Asia Society. He is also a member of The Council on Foreign Relations and The Partnership for New York City. He is also a member of the boards of directors of FasterCures and the Port Authority Task Force. Mr. Black graduated summa cum laude from Dartmouth College in 1973 with a major in Philosophy and History and received an MBA from Harvard Business School in 1975. Mr. Black has significant experience making and managing private equity investments on behalf of Apollo and has over 37 years' experience financing, analyzing and investing in public and private companies. In his prior positions with Drexel and in his positions at Apollo, Mr. Black is responsible for leading and overseeing teams of professionals. His extensive experience allows Mr. Black to provide insight into various aspects of Apollo's business and is of significant value to the board of directors.

Joshua Harris. Mr. Harris is a Senior Managing Director and a member of the board of directors of Apollo and a Managing Partner of Apollo Management, L.P., which he co-founded in 1990. Prior to 1990, Mr. Harris was a member of the Mergers and Acquisitions group of Drexel Burnham Lambert Incorporated. Mr. Harris is a member of the Federal Reserve Bank of New York's Investor Advisory Committee on Financial Markets and the Council of Foreign Relations. He is a Managing Partner of the Philadelphia 76ers, Managing Member of the New Jersey Devils and a General Partner of the Crystal Palace Football Club. Mr. Harris also serves on the Board of Trustees of Mount Sinai Medical Center, Harvard Business School, the Wharton School at the University of Pennsylvania, and the United States Olympic Committee. Mr. Harris has previously served on the board of directors of Berry Plastics Group Inc., EP Energy Corporation, EPE Acquisition, LLC, CEVA Logistics, Constellium N.V., and LyondellBasell Industries B.V. Mr. Harris graduated summa cum laude and Beta Gamma Sigma from the University of Pennsylvania's Wharton School of Business with a B.S. in Economics and received his M.B.A. from the Harvard Business School, where he graduated as a Baker and Loeb Scholar. Mr. Harris has significant experience in making and managing private equity investments on behalf of Apollo and has over 27 years' experience in financing, analyzing and investing in public and private companies. Mr. Harris's extensive knowledge of Apollo's business and experience in a variety of senior leadership roles enhance the breadth of experience of the board of directors.

Marc Rowan. Mr. Rowan is a Senior Managing Director and member of the board of directors of Apollo and a Managing Partner of Apollo Management, L.P., which he co-founded in 1990. Prior to 1990, Mr. Rowan was a member of the Mergers & Acquisitions Group of Drexel Burnham Lambert Incorporated, with responsibilities in high yield financing, transaction idea generation and merger structure negotiation. Mr. Rowan currently serves on the boards of directors of, inter alia, Athene Holding Ltd, Caesars Entertainment Corporation and Caesars Acquisition Co. He has previously served on the boards of directors of, inter alia, the general partner of AAA, AMC Entertainment, Inc., Cablecom GmbH, Caesars Entertainment Operating Co.,

Culligan Water Technologies, Inc., Countrywide Holdings Limited, Furniture Brands International Inc., Mobile Satellite Ventures, LLC, National Cinemedia, Inc., National Financial Partners, Inc., New World Communications, Inc., Norwegian Cruise Lines, Quality Distribution, Inc., Samsonite Corporation, SkyTerra Communications Inc., Unity Media SCA, Vail Resorts, Inc. and Wyndham International, Inc. Mr. Rowan is also active in charitable activities. He is a founding member and Chairman of the YRF-Darca and is a member of the Board of Overseers of the University of Pennsylvania's Wharton School of Business and serves on the boards of directors of Jerusalem Online and the New York City Police Foundation. Mr. Rowan graduated summa cum laude from the University of Pennsylvania's Wharton School of Business with a B.S. and an M.B.A. in Finance. Mr. Rowan has significant experience making and managing private equity investments on behalf of Apollo and has over 28 years' experience financing, analyzing and investing in public and private companies. Mr. Rowan's extensive financial background and expertise in private equity investments enhance the breadth of experience of the board of directors.

Martin Kelly. Mr. Kelly joined Apollo in 2012 as Chief Financial Officer. Mr. Kelly also oversees the Firm's IT, Risk, Operations and Audit groups. From 2008 to 2012, Mr. Kelly was with Barclays Capital and, from 2000 to 2008, Mr. Kelly was with Lehman Brothers Holdings Inc. Prior to departing Barclays Capital, Mr. Kelly served as Managing Director, CFO of the Americas, and Global Head of Financial Control for their Corporate and Investment Bank. Prior to joining Lehman Brothers in 2000, Mr. Kelly spent 13 years with PricewaterhouseCoopers LLP, including serving in the Financial Services Group in New York from 1994 to 2000. Mr. Kelly was appointed a Partner of the firm in 1999. Mr. Kelly received a degree in Commerce, majoring in Finance and Accounting, from the University of New South Wales in 1989.

John Suydam. Mr. Suydam joined Apollo in 2006 and serves as Apollo's Chief Legal Officer. From 2002 to 2006, Mr. Suydam was a partner at O'Melveny & Myers LLP where he served as head of Mergers and Acquisitions and co-head of the Corporate Department. Prior to that time, Mr. Suydam served as Chairman of the law firm O'Sullivan, LLP which specialized in representing private equity investors. Mr. Suydam serves on the boards of The Legal Action Center, Environmental Solutions Worldwide, Inc. and New York University School of Law, and is a member of the Department of Medicine Advisory Board of the Mount Sinai Medical Center. Mr. Suydam received his J.D. from New York University and graduated magna cum laude with a B.A. in History from the State University of New York at Albany.

Michael Ducey. Mr. Ducey has served as an independent director of Apollo and a member of the audit committee and as Chairman of the conflicts committee of our board of directors since 2011. Mr. Ducey was with Compass Minerals International, Inc., from March 2002 to May 2006, where he served in a variety of roles, including as President, Chief Executive Officer and Director prior to his retirement in May 2006. Prior to joining Compass Minerals International, Inc., Mr. Ducey worked for nearly 30 years at Borden Chemical, Inc., in various management, sales, marketing, planning and commercial development positions, and ultimately as President, Chief Executive Officer and Director. Mr. Ducey is currently the Chairman of the compliance and governance committee and the nominations committee of the board of directors of HaloSource, Inc. Mr. Ducey joined Ciner Resources Corporation (formerly OCI Resources LP) as an independent member of the board of directors in September 2014, where he serves on the audit committee and the conflicts committee. From May 2006 to July 2016, Mr. Ducey was a member of the board of directors of Verso Paper Holdings, Inc. and served as Chairman of the audit committee. From September 2009 to December 2012, Mr. Ducey was the non-executive Chairman of TPC Group, Inc. and served on the audit committee and the environmental health and safety committee. From June 2006 to May 2008, Mr. Ducey served on the board of directors of and as a member of the governance and compensation committee of the board of directors of UAP Holdings Corporation. Also, from July 2010 to May 2011, Mr. Ducey was a member of the board of directors and served on the audit committee of Smurfit-Stone Container Corporation. Mr. Ducey graduated from Otterbein University with a degree in Economics and an M.B.A. in finance from the University of Dayton. Mr. Ducey's comprehensive corporate background and his experience serving on various boards and committees add significant value to the board of directors.

Paul Fribourg. Mr. Fribourg has served as an independent director of Apollo and as a member of the conflicts committee of our board of directors since 2011. From 1997 to the present, Mr. Fribourg has served as Chairman and Chief Executive Officer of Continental Grain Company. Prior to 1997, Mr. Fribourg served in a variety of other roles at Continental Grain Company, including Merchandiser, Product Line Manager, Group President and Chief Operating Officer. Mr. Fribourg serves on the boards of directors of Restaurant Brands International Inc., Loews Corporation, Castleton Commodities International LLC and The Estee Lauder Companies, Inc. He also serves as a board member of the Rabobank International North American Agribusiness Advisory Board, the New York University Mitchell Jacobson Leadership Program in Law and Business Advisory Board and Endeavor Global Inc. Mr. Fribourg is also a member of the Council on Foreign Relations and the International Business Leaders Advisory Council for The Mayor of Shanghai. Mr. Fribourg graduated magna cum laude from Amherst College and completed the Advanced Management Program at Harvard Business School. Mr. Fribourg's extensive corporate experience enhances the breadth of experience and independence of the board of directors.

Robert Kraft. Mr. Kraft has served as an independent director of Apollo since 2014. Mr. Kraft is Chairman and Chief Executive Officer of The Kraft Group, which includes the New England Patriots, New England Revolution, Gillette Stadium, Rand-Whitney Group and International Forest Products Corporation. Mr. Kraft serves on a number of NFL Committees, including

the Executive Committee, Finance Committee and Broadcast Committee (Chairman). He also serves as Chairman for both the New England Patriots Charitable Foundation and the Robert and Myra Kraft Family Foundation, and is a director of the Dana Farber Cancer Institute. From 2006 to 2015, Mr. Kraft served as a member of the board of directors of Viacom Inc. Mr. Kraft's corporate strategic and operational experience combined with his strong relationships in the business community make him a valuable member of the board of directors.

A.B. Krongard. Mr. Krongard has served as an independent director of Apollo and as a member of the audit committee of our board of directors since 2011. From 2001 to 2004, Mr. Krongard served as Executive Director of the Central Intelligence Agency. From 1998 to 2001, Mr. Krongard served as Counselor to the Director of Central Intelligence. Prior to 1998, Mr. Krongard served in various capacities at Alex Brown, Incorporated, including serving as Chief Executive Officer beginning in 1991 and assuming additional duties as Chairman of the board of directors in 1994. Upon the merger of Alex Brown, Incorporated with Bankers Trust Corporation in 1997, Mr. Krongard served as Vice-Chairman of the Board of Bankers Trust Corporation and served in such capacity until joining the Central Intelligence Agency. Mr. Krongard serves as the Lead Director and audit committee Chairman of Under Armour, Inc. and also serves as a board member of Iridium Communications Inc. and In-Q-Tel, Inc. Mr. Krongard graduated with honors from Princeton University and received a J.D. from the University of Maryland School of Law, where he also graduated with honors. Mr. Krongard also serves as the Vice Chairman of the Johns Hopkins Health System. Mr. Krongard's comprehensive corporate background contributes to the range of experience of the board of directors.

Pauline Richards. Ms. Richards has served as an independent director of Apollo and as Chairman of the audit committee of our board of directors since 2011. Ms. Richards currently serves as Chief Operating Officer of Armour Group Holdings Limited, a position she has held since 2008. Ms. Richards also serves as a member of the Audit and Compensation Committees of the board of directors of Wyndham Worldwide, a position she has held since 2006; is a director of Hamilton Insurance Group, serving on the audit and investment committees, a position she has held since 2013; and is the Treasurer of the board of directors of PRIDE Bermuda, a drug prevention organization of which she has been a member for over 20 years. Prior to 2008, Ms. Richards served as Director of Development of Saltus Grammar School from 2003 to 2008, as Chief Financial Officer of Lombard Odier Darier Hentsch (Bermuda) Limited from 2001 to 2003, and as Treasurer of Gulf Stream Financial Limited from 1999 to 2000. Ms. Richards also served as a member of the Audit Committee and chair of the Corporate Governance Committee of the board of directors of Butterfield Bank from 2006 to 2013. Ms. Richards graduated from Queen's University, Ontario, Canada, with a BA in psychology and has obtained certification as a CPA, CMA. Ms. Richards' extensive finance experience and her service on the boards of other public companies add significant value to the board of directors.

Our Manager

Our operating agreement provides that so long as the Apollo Group beneficially owns at least 10% of the aggregate number of votes that may be cast by holders of outstanding voting shares, our manager, which is owned and controlled by our Managing Partners, will manage all of our operations and activities and will have discretion over significant corporate actions, such as the issuance of securities, payment of distributions, sales of assets, making certain amendments to our operating agreement and other matters, and our board of directors will have no authority other than that which our manager chooses to delegate to it. We refer to the Apollo Group's beneficial ownership of at least 10% of such voting power as the "Apollo control condition." For purposes of our operating agreement, the "Apollo Group" means (i) our manager and its affiliates, including their respective general partners, members and limited partners, (ii) Holdings and its affiliates, including their respective general partners, members and limited partners, (iii) with respect to each Managing Partner, such Managing Partner and such Managing Partner's "group" (as defined in Section 13(d) of the Exchange Act), (iv) any former or current investment professional of or other employee of an "Apollo employer" (as defined below) or the Apollo Operating Group (or such other entity controlled by a member of the Apollo Operating Group), (v) any former or current executive officer of an Apollo employer or the Apollo Operating Group (or such other entity controlled by a member of the Apollo Operating Group); and (vi) any former or current director of an Apollo employer or the Apollo Operating Group (or such other entity controlled by a member of the Apollo Operating Group). With respect to any person, "Apollo employer" means Apollo Global Management, LLC or such other entity controlled by Apollo Global Management, LLC or its successor as may be such person's employer but does not include any portfolio companies.

Decisions by our manager are made by its executive committee, which is composed of our three Managing Partners. Each Managing Partner will remain on the executive committee for so long as he is employed by us, provided that Mr. Black, upon his retirement, may at his option remain on the executive committee until his death or disability or any commission of an act that would constitute cause if Mr. Black had still been employed by us. Other than those actions that require unanimous consent, actions by the executive committee are determined by majority vote of its voting members, except as to the following matters, as to which Mr. Black will have the right of veto: (i) the designations of directors to our board, or (ii) a sale or other disposition of the Apollo Operating Group and/or its subsidiaries or any portion thereof, through a merger, recapitalization, stock sale, asset sale or otherwise, to an unaffiliated third party (other than through an exchange of Apollo Operating Group units, transfers by a Managing Partner or a permitted transferee to another permitted transferee, or the issuance of bona fide equity incentives to any of our non-Managing Partner employees) that constitutes (x) a direct or indirect sale of a ratable interest (or substantially ratable interest) in

each entity that constitutes the Apollo Operating Group or (y) a sale of all or substantially all of the assets of Apollo (this clause (ii), an "LB Approval Event"). Exchanges of Apollo Operating Group units for Class A shares that are not pro rata among our Managing Partners or in which each Managing Partner has the option not to participate are not subject to Mr. Black's right of veto.

Subject to limited exceptions described in our operating agreement, our manager may not sell, exchange or otherwise dispose of all or substantially all of our assets and those of our subsidiaries, taken as a whole, in a single transaction or a series of related transactions without the approval of holders of a majority of the aggregate number of voting shares outstanding; provided, however, that this does not preclude or limit our manager's ability, in its sole discretion, to mortgage, pledge, hypothecate or grant a security interest in all or substantially all of our assets and those of our subsidiaries (including for the benefit of persons other than us or our subsidiaries, including affiliates of our manager) and does not apply to any forced sale of any or all of our assets pursuant to the foreclosure of, or other realization upon, any such encumbrance.

We will reimburse our manager and its affiliates for all costs incurred in managing and operating us, and our operating agreement provides that our manager will determine the expenses that are allocable to us. The agreement does not limit the amount of expenses for which we will reimburse our manager and its affiliates.

Board Composition and Limited Powers of Our Board of Directors

For so long as the Apollo control condition is satisfied, our manager shall (i) nominate and elect all directors to our board of directors, (ii) set the number of directors of our board of directors and (iii) fill any vacancies on our board of directors. After the Apollo control condition is no longer satisfied, each of our directors will be elected by the vote of a plurality of our shares entitled to vote, voting as a single class, to serve until his or her successor is duly elected or appointed and qualified or until his or her earlier death, retirement, disqualification, resignation or removal. Our board currently consists of eight members. For so long as the Apollo control condition is satisfied, our manager may remove any director, with or without cause, at any time. After such condition is no longer satisfied, a director or the entire board of directors may be removed by the affirmative vote of holders of 50% or more of the total voting power of our shares.

As noted, so long as the Apollo control condition is satisfied, our manager will manage all of our operations and activities, and our board of directors will have no authority other than that which our manager chooses to delegate to it. In the event that the Apollo control condition is not satisfied, our board of directors will manage all of our operations and activities.

Pursuant to a delegation of authority from our manager, which may be revoked, our board of directors has established and at all times will maintain audit and conflicts committees of the board of directors that have the responsibilities described below under "—Committees of the Board of Directors—Audit Committee" and "—Committees of the Board of Directors—Conflicts Committee."

Where action is required or permitted to be taken by our board of directors or a committee thereof, a majority of the directors or committee members present at any meeting of our board of directors or any committee thereof at which there is a quorum shall be the act of our board or such committee, as the case may be. Our board of directors or any committee thereof may also act by unanimous written consent.

Under the Agreement Among Managing Partners (as described under "Item 13. Certain Relationships and Related Transactions—Lenders Rights Agreement—Amendments to Managing Partner Transfer Restrictions"), the vote of a majority of the independent members of our board of directors will decide the following: (i) in the event that a vacancy exists on the executive committee of our manager and the remaining members of the executive committee cannot agree on a replacement (other than a replacement for Mr. Black nominated by Mr. Black or his representative, which requires the approval of only one member of the executive committee), the independent members of our board of directors shall select one of the two nominees to the executive committee of our manager presented to them by the remaining members of such executive committee to fill the vacancy on such executive committee and (ii) in the event that Mr. Black wishes to exercise his ability to cause an LB Approval Event, the affirmative vote of the majority of the independent members of our board of directors shall be required to approve such a transaction. We are not a party to the Agreement Among Managing Partners, and neither we nor our shareholders (other than our Strategic Investors, as described under "Item 13. Certain Relationships and Related Transactions—Lenders Rights Agreement—Amendments to Managing Partner Transfer Restrictions") have any right to enforce the provisions described above. Such provisions can be amended or waived upon agreement of our Managing Partners at any time.

Committees of the Board of Directors

We have established an audit committee as well as a conflicts committee. Our audit committee has adopted a charter that complies with current SEC and NYSE rules relating to corporate governance matters. Our board of directors may from time to time establish other committees of our board of directors.

Audit Committee

The primary purpose of our audit committee is to assist our manager in overseeing and monitoring (i) the quality and integrity of our financial statements, (ii) our compliance with legal and regulatory requirements, (iii) our independent registered public accounting firm's qualifications and independence and (iv) the performance of our independent registered public accounting firm.

The current members of our audit committee are Messrs. Ducey and Krongard and Ms. Richards. Ms. Richards currently serves as Chairperson of the committee. Each of the members of our audit committee meets the independence standards and financial literacy requirements for service on an audit committee of a board of directors pursuant to the Exchange Act and NYSE rules applicable to audit committees and corporate governance. Furthermore, our manager has determined that Ms. Richards is an "audit committee financial expert" within the meaning of Item 407(d)(5) of Regulation S-K. Our audit committee has a charter which is available on our website at www.agm.com under the "Investor Relations" section.

Conflicts Committee

The current members of our conflicts committee are Messrs. Ducey and Fribourg. Mr. Ducey currently serves as Chairman of the committee. The purpose of the conflicts committee is to review specific matters that our manager believes may involve conflicts of interest. The conflicts committee will determine whether the resolution of any conflict of interest submitted to it is fair and reasonable to us. Any matters approved by the conflicts committee will be conclusively deemed to be fair and reasonable to us and not a breach by us of any duties that we may owe to our shareholders. In addition, the conflicts committee may review and approve any related person transactions, other than those that are approved pursuant to our related person policy, as described under "Item 13. Certain Relationships and Related Party Transactions—Statement of Policy Regarding Transactions with Related Persons," and may establish guidelines or rules to cover specific categories of transactions.

Code of Business Conduct and Ethics

We have a Code of Business Conduct and Ethics, which applies to, among others, our principal executive officer, principal financial officer and principal accounting officer. A copy of our Code of Business Conduct and Ethics is available on our website at www.agm.com under the "Investor Relations" section. We intend to disclose any amendment to or waiver of the Code of Business Conduct and Ethics on behalf of an executive officer or director either on our website or in an 8-K filing.

Corporate Governance Guidelines

We have Corporate Governance Guidelines that address significant issues of corporate governance and set forth procedures by which our manager and board of directors carry out their respective responsibilities. The guidelines are available for viewing on our website at www.agm.com under the "Investor Relations" section. We will also provide the guidelines, free of charge, to shareholders who request them. Requests should be directed to our Secretary at Apollo Global Management, LLC, 9 West 57th Street, 43rd Floor, New York, New York 10019.

Communications with the Board of Directors

A shareholder or other interested party who wishes to communicate with our directors, a committee of our board of directors, our independent directors as a group or our board of directors generally may do so in writing. Any such communications may be sent to our board of directors by U.S. mail or overnight delivery and should be directed to our Secretary at Apollo Global Management, LLC, 9 West 57th Street, 43rd Floor, New York, New York 10019, who will forward them to the intended recipient(s). Any such communications may be made anonymously. Unsolicited advertisements, invitations to conferences or promotional materials, in the discretion of our Secretary, are not required, however, to be forwarded to the directors.

Executive Sessions of Independent Directors

The independent directors serving on our board of directors meet periodically in executive sessions during the year at regularly scheduled meetings of our board of directors. These executive sessions will be presided over by one of the independent directors serving on our board of directors selected on an ad-hoc basis.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our officers and directors, and persons who own more than ten percent of a registered class of the Company's equity securities to file initial reports of ownership and reports of changes in ownership with the SEC and furnish us with copies of all Section 16(a) forms they file. To our knowledge, based solely on our review of the copies of such reports furnished to us or written representations from such persons that they were not required to file a Form 5 to report previously unreported ownership or changes in ownership, we believe that, with respect to the fiscal year ended December 31, 2016, such persons complied with all such filing requirements, with the exception of a Form 4 for Ms. Richards reporting one transaction which was filed one day late due to administrative reasons through no fault of the reporting person.

ITEM 11. EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Overview of Compensation Philosophy

Alignment of Interests with Investors and Shareholders. Our principal compensation philosophy is to align the interests of our Managing Partners and other senior professionals with those of our Class A shareholders and fund investors. This alignment, which we believe is a key driver of our success, has been achieved principally by our Managing Partners' and other investment professionals' direct beneficial ownership of equity in our business in the form of AOG Units and Class A shares, their ownership of rights to receive a portion of the incentive income earned from our funds, the direct investment by our investment professionals in our funds, and our practice of paying annual compensation partly in the form of equity-based grants that are subject to vesting. As a result of this alignment, the compensation of our professionals is closely tied to the performance of our businesses. To enhance this alignment and strengthen retention incentives, in 2016 our Managing Partners generally reduced the portion of our professionals' annual compensation that is paid in cash.

Significant Personal Investment. Our investment professionals generally make significant personal investments in our funds (as more fully described under "Item 13. Certain Relationships and Related Party Transactions"), directly or indirectly, and our professionals who receive carried interests in our funds are generally required to invest their own capital in the funds on which they work in amounts that are generally proportionate to the size of their participation in incentive income. We believe that these investments help to ensure that our professionals have capital at risk and reinforce the linkage between the success of the funds we manage, the success of the Company and the compensation paid to our professionals.

Long-Term Performance and Commitment. Most of our professionals have been issued RSUs, which provide rights to receive Class A shares and, in some instances, distribution equivalents on those shares. The vesting requirements and minimum retained ownership requirements for these awards contribute to our professionals' focus on long-term performance while enhancing retention of these professionals. RSUs are not awarded to our Managing Partners, whose beneficial ownership of equity interests in the company is generally in the form of AOG units, as discussed below under "-Note on Distributions on Apollo Operating Group Units."

Discouragement of Excessive Risk-Taking. Although investments in alternative assets can pose risks, we believe that our compensation program includes significant elements that discourage excessive risk-taking while aligning the compensation of our professionals with our long-term performance. For example, notwithstanding that we accrue compensation for our carried interest programs (described below) as increases in the value of the portfolio investments are recorded in the related funds, we generally make payments in respect of carried interest allocations to our employees only after profitable investments have actually been realized. This helps to ensure that our professionals take a long-term view that is consistent with the interests of the Company, our shareholders and the investors in our funds. Moreover, if a fund fails to achieve specified investment returns due to diminished performance of later investments, our carried interest program relating to that fund generally permits, for the benefit of the limited partner investors in that fund, the return of carried interest payments (generally net of tax) previously made to us or our employees. These provisions discourage excessive risk-taking and promote a long-term view that is consistent with the interests of our fund investors and shareholders. Our general requirement that our professionals invest in the funds we manage further aligns the interests of our professionals, fund investors and Class A shareholders. Finally, the minimum retained ownership requirements of our RSUs and AOG Units, as well as a requirement that certain investment professionals use a portion of their distributions of carried interest income and incentive fees to purchase Class A restricted shares, discourage excessive risk-taking because the value of these interests is tied directly to the long-term performance of our Class A shares.

Note on Distributions on Apollo Operating Group Units

We note that all of our Managing Partners beneficially own AOG Units. In particular, as of December 31, 2016, the Managing Partners beneficially owned, through their interest in Holdings, approximately 48% of the total limited partner interests

in the Apollo Operating Group. When made, distributions on these units are in the same amount per unit as distributions made to us in respect of the AOG Units we hold. Although distributions on AOG Units are distributions on equity rather than compensation, they play a central role in aligning our Managing Partners' interests with those of our Class A shareholders, which is consistent with our compensation philosophy. As of December 31, 2016, the Managing Partners were required to retain 70% of their AOG Units.

Compensation Elements for Named Executive Officers

Consistent with our emphasis on alignment of interests with our fund investors and Class A shareholders, compensation elements tied to the profitability of our different businesses and that of the funds that we manage are the primary means of compensating our five executive officers listed in the tables below, or the "named executive officers." The key elements of the compensation of our named executive officers during fiscal year 2016 are described below. We distinguish among the compensation components applicable to our named executive officers as appropriate in the below summary. Messrs. Black, Harris and Rowan are the three members of the group referred to elsewhere in this report as the "Managing Partners."

Annual Salary. Each of our named executive officers receives an annual salary. The base salaries of our named executive officers are set forth in the Summary Compensation Table below, and those base salaries were set by our Managing Partners in their judgment after considering the historic compensation levels of the officer, competitive market dynamics, and each officer's level of responsibility and anticipated contributions to our overall success.

RSUs. In 2016, a portion of our named executive officers' compensation (other than for our Managing Partners) was paid in the form of RSUs. We refer to our annual grants of RSUs as Bonus Grants. The RSUs are subject to multi-year vesting and minimum retained ownership requirements. All named executive officers who have received RSUs were required to retain at least 50% of any Class A shares issued to them pursuant to Bonus Grants granted prior to September 1, 2016, and 25% of any Class A Shares issued to them pursuant to all other RSU awards (including Bonus Grants granted on or after that date), in each case net of the number of gross shares sold or netted to pay applicable income or employment taxes. The Managing Directors determined to make this reduction based on their understanding, informed by publicly available information and independent research by our human capital department, that the previous requirements were high relative to current industry norms. The named executive officer Plan Grants and Bonus Grants are described below under "-Narrative Disclosure to the Summary Compensation Table and Grants of Plan-Based Awards Table-Awards of Restricted Share Units Under the Equity Plan."

Carried Interest and Incentive Fees. Carried interests and incentive fee entitlements with respect to our funds confer rights to receive distributions if a distribution is made to investors following the realization of an investment or receipt of operating profit from an investment by the fund. Distributions of carried interest generally are subject to contingent repayment (generally net of tax) if the fund fails to achieve specified investment returns due to diminished performance of later investments, while distributions in respect of incentive fees are generally not subject to contingent repayment. The actual gross amount of carried interest allocations or incentive fees available for distribution are a function of the performance of the applicable fund. For these reasons, we believe that participation in carried interest and incentive fees generated by our funds aligns the interests of our participating named executive officers with those of our Class A shareholders and fund investors.

We currently have two principal types of carried interest programs, which we refer to as dedicated and incentive pool. Messrs. Kelly and Suydam have been awarded rights to participate in a dedicated percentage of the carried interest or incentive fee income earned by the general partners of certain of our funds. Participation in dedicated carried interest in our private equity funds is typically subject to vesting, which rewards long-term commitment to the firm and thereby enhances the alignment of participants' interests with the Company. As with our distributions in respect of incentive fees, our financial statements characterize the carried interest income allocated to participating professionals in respect of their dedicated carried interests as compensation. Actual distributions in respect of dedicated carried interests and incentive fees are included in the "All Other Compensation" column of the summary compensation table.

Our performance based incentive arrangement referred to as the incentive pool further aligns the overall compensation of certain of our professionals to the realized performance of our business. The incentive pool provides for compensation based on carried interest realizations earned by us during the year and enhances our capacity to offer competitive compensation opportunities to our professionals. "Carried interest realizations earned" means carried interest earned by the general partners of our funds under the applicable fund limited partnership agreements based upon transactions that have closed or other rights to cash that have become fixed in the applicable calendar year period. Under this arrangement, Messrs. Kelly and Suydam, among other of our professionals, were awarded incentive pool compensation based on carried interest realizations earned during 2016. Allocations to participants in the incentive pool contain both a fixed component and a discretionary component, both of which may vary year-to-year, including as a result of our overall realized performance and the contributions and performance of each participant. The Managing Partners determine the amount of the carried interest realizations to place into the incentive pool in their discretion after considering various factors, including Company profitability, management company cash requirements and

anticipated future costs, provided that the incentive pool consists of an amount equal to at least one percent (1%) of the carried interest realizations attributable to profits generated after creation of the incentive pool that were taxable in the applicable year and not allocable to dedicated carried interests. Each participant in the incentive pool is entitled to receive, as a fixed component of participation in the incentive pool, his or her pro rata allocation of this 1% amount each year, provided the participant remains employed by us at the time of allocation. Our financial statements characterize the carried interest income allocated to participating professionals in respect of incentive pool interests as compensation. The "All Other Compensation" column of the summary compensation table includes actual distributions paid from the incentive pool.

Restricted Shares. We require that a portion of the carried interest and incentive fee distributions in respect of certain of the investment funds we manage is used by our employees who receive those distributions to purchase Class A restricted shares issued under our 2007 Omnibus Equity Incentive Plan. This practice further promotes alignment with our shareholders and encourages participating professionals to maximize the success of the Company as a whole. Like our RSUs, the restricted shares are subject to multi-year vesting, which fosters retention. In 2016, the funds with respect to which Messrs. Kelly and Suydam have rights subject to this restricted share purchase requirement had not yet commenced making carried interest or incentive fee distributions.

Determination of Compensation of Named Executive Officers

Our Managing Partners make all final determinations regarding named executive officer compensation. Decisions about the variable elements of a named executive officer's compensation, including participation in our carried interest and incentive fee programs, discretionary bonuses (if any) and grants of equity-based awards, are based primarily on our Managing Partners' assessment of such named executive officer's individual performance, operational performance for the department or division in which the officer (other than a Managing Partner) serves, and the officer's impact on our overall operating performance and potential to contribute to long-term shareholder value. In evaluating these factors, our Managing Partners do not utilize quantitative performance targets but rather rely upon their judgment about each named executive officer's performance to determine an appropriate reward for the current year's performance. The determinations by our Managing Partners are ultimately subjective, are not tied to specified annual, qualitative or individual objectives or performance factors, and reflect discussions among the Managing Partners. Factors that our Managing Partners typically consider in making such determinations include the named executive officer's type, scope and level of responsibilities, active participation in managing a team of professionals, corporate citizenship and the named executive officer's overall contributions to our success. Our Managing Partners also consider each named executive officer's prior-year compensation, the appropriate balance between incentives for long-term and short-term performance, competitive market dynamics, compensation provided to the named executive officer by other entities, and the compensation paid to the named executive officer's peers within the Company. The Managing Partners determined that, based on the above factors, including the named executive officers' overall compensation levels, discretionary cash bonuses would not be awarded to any named executive officer for 2016. For a discussion of our Managing Partners' determinations in respect of our RSU program, see below under "—Narrative Disclosure to the Summary Compensation Table and Grants of Plan-Based Awards Table—Awards of Restricted Share Units Under the Equity Plan."

Compensation Committee Interlocks and Insider Participation

Our board of directors does not have a compensation committee. Our Managing Partners make all compensation determinations with respect to executive officer compensation. For a description of certain transactions between us and the Managing Partners, see "Item 13. Certain Relationships and Related Party Transactions."

Compensation Committee Report

As noted above, our board of directors does not have a compensation committee. The executive committee of our manager identified below has reviewed and discussed with management the foregoing Compensation Discussion and Analysis and, based on such review and discussion, has determined that the Compensation Discussion and Analysis should be included in this Annual Report on Form 10-K.

Leon Black
Joshua Harris
Marc Rowan

Summary Compensation Table

The following summary compensation table sets forth information concerning the compensation earned by, awarded to or paid to our principal executive officer, our principal financial officer, and our three other most highly compensated executive officers for the fiscal year ended December 31, 2016. The earnings of our Managing Partners, Messrs. Black, Harris and Rowan, derive predominantly from distributions they receive as a result of their indirect beneficial ownership of AOG Units and their rights under the tax receivable agreement (described elsewhere in this report, including above under "Item 5. Market for Registrant's

Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities—Cash Distribution Policy"), rather than from compensation, and accordingly are not included in the tables below. The executive officers named in the table are referred to as the named executive officers.

Name and Principal Position	Year	Salary ($)	Stock Awards ($)(1)	All Other Compensation ($)(2)	Total ($)
Leon Black, Chairman, Chief Executive Officer and Director	2016	100,000	—	150,622	250,622
	2015	100,000	—	144,751	244,751
	2014	100,000	—	173,980	273,980
Martin Kelly, Chief Financial Officer	2016	1,000,000	1,897,640	1,050,000	3,947,640
	2015	1,000,000	681,643	1,300,000	2,981,643
	2014	1,000,000	698,444	1,300,000	2,998,444
John Suydam, Chief Legal Officer	2016	2,500,000	498,260	668,934	3,667,194
	2015	2,500,000	499,058	1,640,003	4,639,062
	2014	3,000,000	511,370	5,420,540	8,931,910
Joshua Harris, Senior Managing Director and Director	2016	100,000	—	228,537	328,537
	2015	100,000	—	281,204	381,204
Marc Rowan, Senior Managing Director and Director	2016	100,000	—	215,020	315,020
	2015	100,000	—	169,671	269,671

(1) For Messrs. Kelly and Suydam, represents the aggregate grant date fair value of stock awards granted, as applicable, computed in accordance with FASB ASC Topic 718. The amounts shown do not reflect compensation actually received by the named executive officers, but instead represent the aggregate grant date fair value of the awards. See note 13 to our consolidated financial statements for further information concerning the assumptions made in valuing our RSU awards.

(2) Amounts included for 2016 represent, in part, actual cash distributions in respect of dedicated carried interest allocations for Mr. Suydam of $149,150. The 2016 amounts also include actual incentive pool cash distributions of $1,050,000 for Mr. Kelly and $500,000 for Mr. Suydam. The "All Other Compensation" column for 2016 also includes costs relating to Company-provided cars and drivers for the business and personal use of Messrs. Black, Harris, Rowan and Suydam. We provide this benefit because we believe that its cost is outweighed by the convenience, increased efficiency and added security and confidentiality that it offers. The personal use cost was approximately $135,097 for Mr. Black, $197,012 for Mr. Harris, $199,495 for Mr. Rowan and $17,809 for Mr. Suydam. For Messrs. Black, Harris and Rowan, this amount includes both fixed and variable costs, including lease costs, driver compensation, driver meals, fuel, parking, tolls, repairs, maintenance and insurance, and, for Mr. Rowan, car service costs. For Mr. Suydam, this amount includes the costs to the Company associated with his use of a car service. Except as discussed in this paragraph, no 2016 perquisites or personal benefits individually exceeded the greater of $25,000 or 10% of the total amount of all perquisites and other personal benefits reported for the named executive officer. The cost of excess liability insurance provided to our named executive officers, and the cost of information technology services provided to Mr. Harris, falls below this threshold. Mr. Kelly did not receive perquisites or personal benefits in 2016, except for incidental benefits having an aggregate value of less than $10,000. Our named executive officers also receive secretarial support with respect to personal matters. We incur no incremental cost for the provision of such additional benefits. Accordingly, no such amount is included in the Summary Compensation Table.

Narrative Disclosure to the Summary Compensation Table and Grants of Plan-Based Awards Table

Employment, Non-Competition and Non-Solicitation Agreements with Chairman and Chief Executive Officer and with each Senior Managing Director

On January 4, 2017, we entered into an employment, non-competition and non-solicitation agreement with Leon Black, our chairman and chief executive officer, and with each of Joshua Harris and Marc Rowan, our senior managing directors, all of whom are members of our manager's executive committee. These agreements, which provide for an annual salary of $100,000 and the right to participate in our employee benefit plans as in effect from time to time, superseded but are substantially similar to agreements with our Managing Partners dated July 2012. The 2017 agreements, like the 2012 agreements, have a three-year term. Although the term of the 2012 agreements concluded in 2015, during 2016, our Managing Partners' employment continued on the same terms as provided under those agreements.

Employment, Non-Competition and Non-Solicitation Agreement with Chief Financial Officer

On July 2, 2012, we entered into an employment, non-competition and non-solicitation agreement with Martin Kelly, our chief financial officer. His annual base salary is $1,000,000. As provided in his employment agreement, Mr. Kelly received a Plan Grant of 375,000 RSUs in connection with his commencement of employment. He is eligible for an annual bonus in an amount

to be determined by the Managing Partners in their discretion. Mr. Kelly participates in the incentive pool and is eligible to receive distributions thereunder.

Employment Terms of Chief Legal Officer

John Suydam, our chief legal officer, does not have an employment agreement with us.

Awards of Restricted Share Units Under the Equity Plan

Our equity plan, known as the 2007 Omnibus Equity Incentive Plan, was last approved by our shareholders on March 10, 2011. Grants of RSUs under the plan have been made to certain of our named executive officers primarily pursuant to two programs, which we call the “Plan Grants” and the “Bonus Grants.” Plan Grants have been made to a broad range of our employees, including Mr. Suydam and Mr. Kelly. The Plan Grants generally vest over six years, with the first installment becoming vested approximately one year after grant and the balance vesting thereafter in equal quarterly installments. Holders of Plan Grant RSUs become entitled to distribution equivalents on their vested RSUs if we pay ordinary distributions on our outstanding Class A shares. The administrator of the 2007 Omnibus Equity Incentive Plan determines when shares issued pursuant to the RSU Awards may be disposed of, except that a participant will generally be permitted to sell shares if necessary to cover taxes. Under our retained ownership requirements, as of December 31, 2016, all executive officers who received RSU awards were required to retain at least 50% of any Class A shares issued to them pursuant to RSU awards granted prior to September 1, 2016, and 25% of any Class A Shares issued to them pursuant to RSU awards granted after that date (in each case net of the number of gross shares sold or netted to pay applicable income or employment taxes).

The RSUs advance several goals of our compensation program. The Plan Grants align employee interests with those of our shareholders by making our employees, upon issuance of the underlying Class A shares, shareholders themselves. Because they vest over time, the Plan Grants reward employees for sustained contributions to the Company and foster retention. The size of the Plan Grants is determined by the Plan administrator based on the grantee’s level of responsibility and contributions to the Company. The restrictive covenants contained in the RSU agreements reinforce our culture of fiduciary protection of our fund investors and shareholders by requiring RSU holders to abide by the provisions regarding non-competition, confidentiality and other limitations on behavior described in the immediately preceding paragraph.

The Bonus Grants are also grants of RSUs under the 2007 Omnibus Equity Incentive Plan. However, the Bonus Grants constitute payment of a portion of the annual compensation earned by certain of our professionals, including Messrs. Kelly and Suydam, subject to the employee’s continued service through the vesting dates. Our named executive officers’ Bonus Grants generally differ from their Plan Grants in the following principal ways:

- The RSU Shares underlying Bonus Grants are generally scheduled to vest in three equal annual installments.
- Distribution equivalents are earned on Bonus Grant RSUs (whether or not vested) when ordinary distributions are made on Class A shares after the grant date, but distribution equivalents are earned on Plan Grant RSUs only after they have vested.

In addition to his Bonus Grant, Mr. Kelly received a special Plan Grant in 2016 that vests over three years, in recognition of his contributions to the Company in his role as chief financial officer and the view by our Managing Partners, after considering Mr. Kelly’s oversight of our expanded operations, competitive market dynamics, his prior year compensation, his corporate citizenship and his role in the Company’s success, that his compensation should be increased. This increase was made in the form of RSUs rather than cash consistent with our philosophy that a greater percentage of the compensation of our more highly compensated employees (relative to the compensation of less highly compensated employees) should be variable and subject to risk, to more closely align their interests with those of our shareholders. The committee that administers our 2007 Omnibus Equity Incentive Plan took into account that Mr. Kelly had received in 2016 a grant of 10,000 restricted stock units (having a grant date fair value of $164,200) in respect of shares of ARI, the publicly traded REIT that we manage, pursuant to an approval by its the compensation committee consistent with a recommendation it received from us.

Grants of Plan-Based Awards

The following table presents information regarding RSUs granted to Messrs. Kelly and Suydam under our 2007 Omnibus Equity Incentive Plan in 2016. No options were granted to a named executive officer in 2016.

Name	Grant Date	Estimated Future Payouts under Equity Incentive Plan Awards Target (#)	Stock Awards: Number of Shares of Stock or Units (#)(1)	Grant Date Fair Value or Modification Date Incremental Fair Value of Stock and Option Awards ($)(2)
Leon Black	—	—	—	—
Martin Kelly	December 29, 2016	—	36,632	692,711
	December 29, 2016		71,979	1,204,929
John Suydam	December 29, 2016	—	26,349	498,260
Joshua Harris	—	—	—	—
Marc Rowan	—	—	—	—

(1) Represents the aggregate number of RSUs covering our Class A shares (none of the RSUs awarded in 2016 vested in 2016). For a discussion of these grants, please see the discussion above under "-Narrative Disclosure to the Summary Compensation Table and Grants of Plan-Based Awards Table-Awards of Restricted Share Units Under the Equity Plan." Mr. Kelly's award of 71,979 RSUs is a Plan Grant and the other awards shown in the table are Bonus Grants.

(2) Represents the aggregate grant date fair value of the RSUs granted in 2016, computed in accordance with FASB ASC Topic 718. The amounts shown do not reflect compensation actually received, but instead represent the aggregate grant date fair value of the award.

Outstanding Equity Awards at Fiscal Year-End

The following table presents information regarding unvested RSU awards made by us to our named executive officers under our 2007 Omnibus Equity Incentive Plan that were outstanding at December 31, 2016. Our named executive officers did not hold any options at fiscal year-end.

Name		Stock Awards		
		Number of Unearned Shares, Units or Other Rights That Have Not Vested (#)		Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested ($)(6)
Leon Black	—	—		—
Martin Kelly	December 29, 2016	36,632	(1)	709,196
	December 29, 2016	71,979	(2)	1,393,514
	December 29, 2015	30,581	(3)	592,048
	December 29, 2014	10,284	(4)	199,098
	September 30, 2012	109,375	(5)	2,117,500
John Suydam	December 29, 2016	26,349	(1)	510,117
	December 29, 2015	22,390	(3)	433,470
	December 29, 2014	7,530	(4)	145,781
Joshua Harris	—	—		—
Marc Rowan	—	—		—

(1) Bonus Grant RSUs that vest in substantially equal annual installments on December 31 of each of 2017, 2018 and 2019.

(2) Plan Grant RSUs, one third (1/3) of which vest on December 31, 2017 and the remainder of which vest in substantially equal quarterly installments over the eight calendar quarters beginning March 31, 2018.

(3) Bonus Grant RSUs that vest in substantially equal annual installments on December 31 of each of 2017 and 2018.

(4) Bonus Grant RSUs that vest on December 31, 2017.

(5) Plan Grant RSUs that vest in substantially equal quarterly installments over the seven calendar quarters beginning March 31, 2017.

(6) Amounts calculated by multiplying the number of unvested RSUs held by the named executive officer by the closing price of $19.36 per Class A share on December 31, 2016.

Option Exercises and Stock Vested

The following table presents information regarding the number of outstanding initially unvested RSUs held by our named executive officers that vested during 2016 and the number of options exercised by our named executive officers in 2016. The amounts shown below do not reflect compensation actually received by the named executive officers, but instead are calculations of the number of RSUs that vested during 2016 based on the closing price of our Class A shares on the date of vesting. Shares

received by our named executive officers are subject to our retained ownership requirements. No options were exercised by our named executive officers in 2016.

		Stock Awards	
Name	Type of Award	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting ($)
Leon Black	—	—	—
Martin Kelly	RSUs	94,111	1,699,333 (1)
John Suydam	RSUs	24,350	471,416 (1)
Joshua Harris	—	—	—
Marc Rowan	—	—	—

(1) Amounts calculated by multiplying the number of RSUs held by the named executive officer that vested on each applicable vesting date in 2016 by the closing price per Class A share on that date. Class A shares underlying these vested RSUs are issued to the named executive officer in accordance with the schedules described above under "—Narrative Disclosure to the Summary Compensation Table and Grants of Plan-Based Awards Table—Awards of Restricted Share Units Under the Equity Plan."

Potential Payments upon Termination or Change in Control

None of the named executive officers is entitled to payment or other benefits in connection with a change in control.

None of Messrs. Black, Harris or Rowan is entitled to severance or other payments or benefits in connection with an employment termination. Messrs. Black, Harris and Rowan are required to protect the confidential information of Apollo both during and after employment. In addition, until one year after employment termination, each is required to refrain from soliciting employees under specified circumstances or interfering with our relationships with investors and to refrain from competing with us in a business that involves primarily (i.e., more than 50%) third-party capital. These post-termination covenants survive any termination or expiration of the Agreement Among Managing Partners (described elsewhere in this report under "Item 13. Certain Relationships and Related Party Transactions—Agreement Among Managing Partners"). If any of Messrs. Black, Harris or Rowan becomes subject to a potential termination for cause or by reason of disability, our manager may appoint an investment professional to perform his functional responsibilities and duties until cause or disability definitively results in his termination or is determined not to have occurred, but the manager may so appoint an investment professional only if such Managing Partner is unable to perform his responsibilities and duties or, as a matter of fiduciary duty, should be prohibited from doing so. During any such period, the Managing Partner shall continue to serve on the executive committee of our manager unless otherwise prohibited from doing so pursuant to the Agreement Among Managing Partners.

If Mr. Kelly's employment is terminated by us without cause or he resigns for good reason, he will be entitled to severance of six months' base pay and reimbursement of health insurance premiums paid in the six months following his employment termination. If Mr. Kelly's employment is terminated by us without cause or he resigns for good reason, he will vest in 50% of any unvested portion of his Plan Grant RSUs. If his employment is terminated by reason of death or disability, he will vest in 50% of any unvested portion of his Plan Grant and Bonus Grant RSUs. We may terminate Mr. Kelly's employment with or without cause, and we will provide 90 days' notice (or payment in lieu of such period of notice) prior to a termination without cause. Mr. Kelly is required to give us 90 days' notice prior to a resignation for any reason. He is required to protect the confidential information of Apollo both during and after employment. In addition, during employment and for 12 months after employment, Mr. Kelly is also obligated to refrain from soliciting our employees, interfering with our relationships with investors or other business relations, and competing with us in a business that manages or invests in assets substantially similar to those managed or invested in by Apollo or its affiliates.

If Mr. Suydam's employment is terminated by reason of death or disability, he will vest in 50% of his then unvested RSUs. Mr. Suydam is required to protect our confidential information at all times. During his employment and for 12 months thereafter, Mr. Suydam is also obligated to refrain from soliciting our employees, interfering with our relationships with investors or other business relations, and competing with us in a business that manages or invests in assets substantially similar to those invested in or managed by Apollo or its affiliates. Mr. Suydam is required to provide 90 days' notice prior to a resignation for any reason.

The named executive officers' obligations during and after employment were considered by the Managing Partners in determining appropriate post-employment payments and benefits for the named executive officers.

The following table lists the estimated amounts that would have been payable to each of our named executive officers in connection with a termination that occurred on the last day of our last completed fiscal year and the value of any additional

equity that would vest upon such termination. When listing the potential payments to named executive officers under the plans and agreements described above, we have assumed that the applicable triggering event occurred on December 31, 2016 and that the price per share of our Class A shares was $19.36, which is equal to the closing price on such date. For purposes of this table, RSU values are based on the $19.36 closing price.

Name	Reason for Employment Termination	Estimated Value of Cash Payments ($)	Estimated Value of Equity Acceleration ($)
Leon Black	Cause	—	—
	Death, disability	—	—
Martin Kelly	Without cause, by executive for good reason	516,413 (1)	1,058,750 (2)
	Death, disability	—	2,505,678 (2)
John Suydam	Without cause; by executive for good reason	—	—
	Death, disability	—	544,684 (2)
Joshua Harris	Cause	—	—
	Death, disability	—	—
Marc Rowan	Cause	—	—
	Death, disability	—	—

(1) This amount would have been payable to the named executive officer had his employment been terminated by the Company without cause (and other than by reason of death or disability) or for good reason on December 31, 2016.

(2) This amount represents the additional equity vesting that the named executive officer would have received had his employment terminated in the circumstances described in the column, "Reason for Employment Termination," on December 31, 2016, based on the closing price of a Class A share on such date. Please see our "Outstanding Equity Awards at Fiscal Year-End" table above for information regarding the named executive officer's unvested equity as of December 31, 2016.

Director Compensation

We do not pay additional remuneration to our employees, including Messrs. Black, Harris and Rowan, for their service on our board of directors. The 2016 compensation of Messrs. Black, Harris and Rowan is set forth above on the Summary Compensation Table.

During 2016, each independent director received (1) a base annual director fee of $125,000, (2) an additional annual director fee of $25,000 if he or she was a member of the audit committee, (3) an additional annual director fee of $10,000 if he or she was a member of the conflicts committee, (4) an additional annual director fee of $25,000 (incremental to the fee described in (2)) if he or she served as the chairperson of the audit committee, and (5) an additional annual director fee of $15,000 (incremental to the fee described in (3)) if he or she served as the chairperson of the conflicts committee. In addition, independent directors were reimbursed for reasonable expenses incurred in attending board meetings.

Currently, upon initial election to the board of directors, an independent director receives a grant of RSUs with a value of $300,000 that vests in equal annual installments on June 30 of each of the first, second and third years following the year that the grant is made. Mr. Kraft received this type of award on July 14, 2014 in connection with his appointment to the board of directors. Incumbent independent directors who have fully vested in their initial RSU award receive an annual RSU award with a value of $100,000 that vests on June 30 of the year following the year that the grant is made, and the directors listed on the below table (other than Mr. Kraft) received that award on July 26, 2016.

The following table provides the compensation for our independent directors during the year ended December 31, 2016.

Name	Fees Earned or Paid in Cash ($)	Stock Awards ($)(1)	Total ($)
Michael Ducey	175,000	96,112	271,112
Paul Fribourg	135,000	96,112	231,112
Robert Kraft	129,830	—	129,830
A. B. Krongard	150,000	96,112	246,112
Pauline Richards	175,000	96,112	271,112

(1) Represents the aggregate grant date fair value of stock awards granted, as applicable, computed in accordance with FASB ASC Topic 718. See note 13 to our consolidated financial statements for further information concerning the assumptions made in valuing our RSU awards. The amounts shown do not reflect compensation actually received by the independent directors, but instead represent the aggregate grant date fair value of the awards. Unvested director RSUs are not entitled to distributions or distribution equivalents. As of December 31, 2016, each of Ms. Richards and Messrs. Ducey, Fribourg and Krongard, held 6,583 RSUs that were unvested and outstanding, and Mr. Kraft held 3,620 RSUs that were unvested and outstanding.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth information regarding the beneficial ownership of our Class A shares as of February 8, 2017 by (i) each person known to us to beneficially own more than 5% of the voting Class A shares of Apollo Global Management, LLC, (ii) each of our directors, (iii) each person who is a named executive officer for 2016 and (iv) all directors and executive officers as a group.

Beneficial ownership is determined in accordance with the rules of the SEC. To our knowledge, each person named in the table below has sole voting and investment power with respect to all of the Class A shares and interests in our Class B share shown as beneficially owned by such person, except as otherwise set forth in the notes to the table and pursuant to applicable community property laws. Unless otherwise indicated, the address of each person named in the table is c/o Apollo Global Management, LLC, 9 West 57th Street, New York, NY 10019.

In respect of our Class A shares, the table set forth below assumes the exchange by Holdings of all AOG Units for our Class A shares with respect to which the person listed below has the right to direct such exchange pursuant to the Amended and Restated Exchange Agreement described under “Item 13. Certain Relationships and Related Party Transactions—Amended and Restated Exchange Agreement,” and the distribution of such shares to such person as a limited partner of Holdings.

	Class A Shares Beneficially Owned			Class B Share Beneficially Owned		
	Number of Shares	Percent(1)	Total Percentage of Voting Power(2)	Number of Shares	Percent	Total Percentage of Voting Power(2)
Directors and Executive Officers:						
Leon Black(3)(4)	92,727,166	33.1%	57.9%	1	100%	57.9%
Joshua Harris(3)(4)	53,932,643	22.4%	57.9%	1	100%	57.9%
Marc Rowan(3)(4)	45,731,402	19.6%	57.9%	1	100%	57.9%
Pauline Richards	33,806	*	*	—	—	—
Alvin Bernard Krongard(5)	279,732	*	*	—	—	—
Michael Ducey(6)	36,746	*	*	—	—	—
Robert Kraft(7)	267,240	*	*	—	—	—
Paul Fribourg	33,577	*	*	—	—	—
Martin Kelly	167,777	*	*	—	—	—
John Suydam(8)	835,332	*	*	—	—	—
All directors and executive officers as a group (ten persons)(9)	194,045,421	51.1%	52.2%	1	100%	57.9%
BRH(4)	—	—	—	1	100%	57.9%
AP Professional Holdings, L.P.(10)	215,457,239	53.5%	57.9%	—	—	—
5% Stockholders:						
—	—	—	—	—	—	—

*Represents less than 1%.

(1) The percentage of beneficial ownership of our Class A shares is based on voting and non-voting Class A shares outstanding.

(2) The total percentage of voting power is based on voting Class A shares and the Class B share.

(3) The number of Class A shares presented are held by estate planning vehicles, for which this individual disclaims beneficial ownership except to the extent of his pecuniary interest therein. The number of Class A shares presented do not include any Class A shares owned by Holdings with respect to which this individual, as one of the three owners of all of the interests in BRH, the general partner of Holdings, or as a party to the Agreement Among Managing Partners described under "Item 13. Certain Relationships and Related Party Transactions—Agreement Among Managing Partners" or the Managing Partner Shareholders Agreement described under "Item 13. Certain Relationships and Related Party Transactions—Managing Partner Shareholders Agreement," may be deemed to have shared voting or dispositive power. Each of these individuals disclaims any beneficial ownership of these shares, except to the extent of his pecuniary interest therein.

(4) BRH, the holder of the Class B share, is one third owned by Mr. Black, one third owned by Mr. Harris and one third owned by Mr. Rowan. Pursuant to the Agreement Among Managing Partners, the Class B share is to be voted and disposed of by BRH based on the determination of at least two of the three Managing Partners; as such, they share voting and dispositive power with respect to the Class B share.

(5) Includes 250,000 Class A shares held by a trust for the benefit of Mr. Krongard's children, for which Mr. Krongard's children are the trustees. Mr. Krongard disclaims beneficial ownership with respect to such shares, except to the extent of his pecuniary interest therein.

(6) Includes 2,616 Class A shares held by two trusts for the benefit of Mr. Ducey's grandchildren, for which Mr. Ducey and several of Mr. Ducey's immediate family members are trustees and have shared investment power. Mr. Ducey disclaims beneficial ownership of the Class A shares held in the trusts, except to the extent of his pecuniary interest therein.

(7) Includes 260,000 Class A shares held by two entities, which are under the sole control of Mr. Kraft, and may be deemed to be beneficially owned by Mr. Kraft.

(8) Includes 199,008 Class A shares held by a trust for the benefit of Mr. Suydam's spouse and children, for which Mr. Suydam's spouse is the trustee. Mr. Suydam disclaims beneficial ownership with respect to such shares, except to the extent of his pecuniary interest therein.

(9) Refers to shares beneficially owned by the individuals who were directors and executive officers as of February 8, 2017.

(10) Assumes that no Class A shares are distributed to the limited partners of Holdings. The general partner of Holdings is BRH, which is one third owned by Mr. Black, one third owned by Mr. Harris and one third owned by Mr. Rowan. BRH is also the general partner of BRH Holdings, L.P., the limited partnership through which Messrs. Black, Harris and Rowan indirectly beneficially own (through estate planning vehicles) their limited partner interests in Holdings. These individuals disclaim any beneficial ownership of these Class A shares, except to the extent of their pecuniary interest therein.

Securities Authorized for Issuance under Equity Incentive Plans

The following table sets forth information concerning the awards that may be issued under the Company's Omnibus Equity Incentive Plan as of December 31, 2016.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights[(1)]	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column (a)[(2)]
	(a)	(b)	(c)
Equity Compensation Plans Approved by Security Holders	12,864,223	$17.69	45,230,529
Equity Compensation Plans Not Approved by Security Holders	—	—	—
Total	12,864,223	$17.69	45,230,529

(1) Reflects the aggregate number of outstanding options and RSUs granted under the Company's 2007 Omnibus Equity Incentive Plan (the "Equity Plan") as of December 31, 2016.

(2) The Class A shares reserved under the Equity Plan are increased on the first day of each fiscal year by (i) the amount (if any) by which (a) 15% of the number of outstanding Class A shares and AOG Units exchangeable for Class A shares on a fully converted and diluted basis on the last day of the immediately preceding fiscal year exceeds (b) the number of shares then reserved and available for issuance under the Equity Plan, or (ii) such lesser amount by which the administrator may decide to increase the number of Class A shares. The number of shares reserved under the Equity Plan is also subject to adjustment in the event of a share split, share dividend, or other change in our capitalization. Generally, employee shares that are forfeited, canceled, surrendered or exchanged from awards under the Equity Plan will be available for future awards. We have filed a registration statement and intend to file additional registration statements on Form S-8 under the Securities Act to register Class A shares under the Equity Plan (including pursuant to automatic annual increases). Any such Form S-8 registration statement will automatically become effective upon filing. Accordingly, Class A shares registered under such registration statement will be available for sale in the open market.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Agreement Among Managing Partners

Our Managing Partners have entered into the Agreement Among Managing Partners. The Managing Partners beneficially own Holdings in accordance with their respective sharing percentages, or "Sharing Percentages," as set forth in the Agreement Among Managing Partners. For the purposes of the Agreement Among Managing Partners, "Pecuniary Interest" means, with respect to each Managing Partner, the number of AOG Units that would be distributable to him assuming that Holdings was liquidated and its assets distributed in accordance with its governing agreements.

Pursuant to the Agreement Among Managing Partners, each Managing Partner is vested in full in his respective AOG Units. We may not terminate a Managing Partner except for cause or by reason of disability.

The transfer by a Managing Partner of any portion of his Pecuniary Interest to a permitted transferee will in no way affect any of his obligations under the Agreement Among Managing Partners; provided, that all permitted transferees are required to sign a joinder to the Agreement Among Managing Partners.

The Managing Partners' respective Pecuniary Interests in certain funds, or the "Heritage Funds," within the Apollo Operating Group are not held in accordance with the Managing Partners' respective Sharing Percentages. Instead, each Managing Partner's Pecuniary Interest in such Heritage Funds is held in accordance with the historic ownership arrangements among the Managing Partners, and the Managing Partners continue to share the operating income in such Heritage Funds in accordance with their historic ownership arrangement with respect to such Heritage Funds.

The Agreement Among Managing Partners may be amended and the terms and conditions of the Agreement Among Managing Partners may be changed or modified upon the unanimous approval of the Managing Partners. We, our shareholders (other than the Strategic Investors, as set forth under "—Lenders Rights Agreement—Amendments to Managing Partner Transfer Restrictions") and the Apollo Operating Group have no ability to enforce any provision of the Agreement Among Managing Partners or to prevent the Managing Partners from amending it.

Managing Partner Shareholders Agreement

We have entered into the Managing Partner Shareholders Agreement with our Managing Partners. The Managing Partner Shareholders Agreement provides the Managing Partners with certain rights with respect to the approval of certain matters and the designation of nominees to serve on our board of directors, as well as registration rights for our securities that they own.

Board Representation

The Managing Partner Shareholders Agreement requires our board of directors, so long as the Apollo control condition is satisfied, to nominate individuals designated by our manager such that our manager will have a majority of the designees on our board.

Transfer Restrictions

The Managing Partner Shareholders Agreement provides that no Managing Partner may, nor shall any of such Managing Partner's permitted transferees, directly or indirectly, voluntarily effect cumulative transfers of Pecuniary Interests (as defined in the Managing Partner Shareholders Agreement), representing more than: (i) 30% of his Pecuniary Interests at any time on or after the fifth anniversary and prior to the sixth anniversary of our IPO; and (ii) 100% of his Pecuniary Interests at any time on or after the sixth anniversary of our IPO, other than, in each case, with respect to transfers (a) from one Managing Partner to another Managing Partner, (b) to a permitted transferee of such Managing Partner, or (c) in connection with a sale by one or more of our Managing Partners in one or a related series of transactions resulting in the Managing Partners owning or controlling, directly or indirectly, less than 50.1% of the economic or voting interests in us or the Apollo Operating Group, or any other person exercising control over us or the Apollo Operating Group by contract, which would include a transfer of control of our manager.

The percentages referenced in the preceding paragraph will apply to the aggregate amount of Equity Interests held by each Managing Partner (and his permitted transferees) as of July 13, 2007. Following the sixth anniversary of the IPO, each Managing Partner and his permitted transferees may transfer all of the Pecuniary Interests of such Managing Partner to any person or entity in accordance with Rule 144, in a registered public offering or in a transaction exempt from the registration requirements of the Securities Act. The above transfer restrictions will lapse with respect to a Managing Partner if he dies or becomes disabled.

A "permitted transferee" means, with respect to each Managing Partner and his permitted transferees, (i) such Managing Partner's spouse, (ii) a lineal descendant of such Managing Partner's parents (or any such descendant's spouse), (iii) a charitable institution controlled by such Managing Partner, (iv) a trustee of a trust (whether inter vivos or testamentary), the current

beneficiaries and presumptive remaindermen of which are one or more of such Managing Partner and persons described in clauses (i) through (iii) above, (v) a corporation, limited liability company or partnership, of which all of the outstanding shares of capital stock or interests therein are owned by one or more of such Managing Partner and persons described in clauses (i) through (iv) above, (vi) an individual mandated under a qualified domestic relations order, (vii) a legal or personal representative of such Managing Partner in the event of his death or disability, (viii) any other Managing Partner with respect to transactions contemplated by the Managing Partner Shareholders Agreement, and (ix) any other Managing Partner who is then employed by Apollo or any of its affiliates or any permitted transferee of such Managing Partner in respect of any transaction not contemplated by the Managing Partner Shareholders Agreement, in each case that agrees in writing to be bound by these transfer restrictions.

Any waiver of the above transfer restrictions may only occur with our consent. As our Managing Partners control the management of our company, however, they have discretion to cause us to grant one or more such waivers. Accordingly, the above transfer restrictions might not be effective in preventing our Managing Partners from selling or transferring their Pecuniary Interests.

Indemnity

Carried interest income from our funds can be distributed to us on a current basis, but is subject to repayment by the subsidiaries of the Apollo Operating Group that act as general partners of the funds in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, subject to certain limitations, the obligations of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's, Contributing Partner's or other investment professional's distributions. Pursuant to the Managing Partner Shareholders Agreement, we agreed to indemnify each of our Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of Fund IV, Fund V and Fund VI (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that our Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that our Managing Partners, Contributing Partners and certain other investment professionals are required to pay amounts in connection with a general partner obligation for the return of previously made distributions with respect to Fund IV, Fund V and Fund VI, we will be obligated to reimburse our Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though we did not receive the distribution to which that general partner obligation related.

Registration Rights

Pursuant to the Managing Partner Shareholders Agreement, we have granted Holdings, an entity through which our Managing Partners and Contributing Partners beneficially own their AOG Units, and its permitted transferees the right, under certain circumstances and subject to certain restrictions, to require us to register under the Securities Act our Class A shares held or acquired by them. Under the Managing Partner Shareholders Agreement, the registration rights holders (i) have "demand" registration rights that require us to register under the Securities Act the Class A shares that they hold or acquire, (ii) may require us to make available registration statements permitting sales of Class A shares they hold or acquire in the market from time to time over an extended period and (iii) have the ability to exercise certain piggyback registration rights in connection with registered offerings requested by other registration rights holders or initiated by us. We have agreed to indemnify each registration rights holder and certain related parties against any losses or damages resulting from any untrue statement or omission of material fact in any registration statement or prospectus pursuant to which such holder sells our shares, unless such liability arose from the holder's misstatement or omission, and each registration rights holder has agreed to indemnify us against all losses caused by his misstatements or omissions. We have filed a shelf registration statement in connection with the rights described above.

Roll-Up Agreements

Pursuant to the Roll-Up Agreements, the Contributing Partners received interests in Holdings, which we refer to as AOG Units, in exchange for their contribution of assets to the Apollo Operating Group. The AOG Units received by our Contributing Partners and any units into which they have been exchanged are fully vested. AOG Units were subject to a lock-up until two years after our IPO. Thereafter, 7.5% of the AOG Units became tradable on each of the second, third, fourth and fifth anniversaries of our IPO, with the remaining AOG Units becoming tradable on the sixth anniversary of our IPO or upon subsequent vesting. Our Contributing Partners have the ability to direct Holdings to exercise Holdings' registration rights described above under "—Managing Partner Shareholders Agreement—Registration Rights."

Under their Roll-Up Agreements, each of our Contributing Partners is subject to a noncompetition provision until the first anniversary of the date of termination of his service as a partner to us. During that period, our Contributing Partners are prohibited from (i) engaging in any business activity in which we operate, (ii) rendering any services to any alternative asset management business (other than that of us or our affiliates) that involves primarily (i.e., more than 50%) third-party capital or

(iii) acquiring a financial interest in, or becoming actively involved with, any competitive business (other than as a passive holding of a specified percentage of publicly traded companies). In addition, our Contributing Partners are subject to nonsolicitation, nonhire and noninterference covenants during employment and for at least 12 months thereafter. Our Contributing Partners are also bound to a nondisparagement covenant with respect to us and our Contributing Partners and to confidentiality restrictions. Resignation by any of our Contributing Partners shall require ninety days' notice. Any restricted period applicable to a Contributing Partner will commence after the ninety-day notice of termination period.

Amended and Restated Exchange Agreement

We have entered into an exchange agreement with Holdings under which, subject to certain procedures and restrictions (including any applicable transfer restrictions and lock-up agreements described above) upon 60 days' written notice prior to a designated quarterly date, each Managing Partner and Contributing Partner (or certain transferees thereof) has the right to cause Holdings to exchange the AOG Units that he owns through Holdings for our Class A shares and to sell such Class A shares at the prevailing market price (or at a lower price that such Managing Partner or Contributing Partner is willing to accept). To effect the exchange, Holdings distributes the AOG Units to be exchanged to the applicable Managing Partner or Contributing Partner. Under the exchange agreement, the Managing Partner or Contributing Partner must then simultaneously exchange one AOG Unit (being an equal limited partner interest in each Apollo Operating Group entity) for each Class A share received from our intermediate holding companies. As a Managing Partner or Contributing Partner exchanges his AOG Units, our interest in the AOG Units will be correspondingly increased and the voting power of the Class B share will be correspondingly decreased.

The exchange agreement was amended and restated on May 6, 2013, further amended and restated on March 5, 2014 and further amended and restated on May 5, 2016. The amendments to the original exchange agreement (i) permit exchanging holders certain rights to revoke exchanges of their AOG Units in whole, but not in part, in certain circumstances; (ii) permit transfers of a holder's exchanged shares to a qualifying entity that can sell them under a Rule 10b5-1 trading plan; (iii) require the Company to use its commercially reasonable efforts to file and keep effective a shelf registration statement relating to the exchange of Class A shares received upon an exchange of AOG Units; (iv) modify the exchange mechanics to address certain tax considerations of an exchange for exchanging holders; and (v) require exchanging holders to reimburse APO Corp. for any incremental U.S. federal income tax incurred by APO Corp. as a result of the modification of the exchange mechanics.

Amended and Restated Tax Receivable Agreement

As a result of each of AMH Holdings (Cayman), L.P. and the Apollo Operating Group entities controlled by it or Apollo Management Holdings, L.P. having made an election under Section 754 of the Internal Revenue Code, any exchanges by a Managing Partner or Contributing Partner of AOG Units that he owns through Holdings (together with the corresponding interest in our Class B share) for our Class A shares in a taxable transaction may result in an adjustment to the tax basis of a portion of the assets owned by the Apollo Operating Group at the time of the exchange. The taxable exchanges may result in increases in the tax depreciation and amortization deductions from depreciable and amortizable assets, as well as an increase in the tax basis of other assets, of the Apollo Operating Group that otherwise would not have been available. A portion of these increases in tax depreciation and amortization deductions, as well as the increase in the tax basis of such other assets, will reduce the amount of tax that APO Corp. would otherwise be required to pay in the future. Additionally, our acquisition of AOG Units from the Managing Partners or Contributing Partners, such as our acquisition of AOG Units from the Managing Partners in the Strategic Investors Transaction, have resulted, and may continue to result, in increases in tax deductions and tax basis that reduces the amount of tax that APO Corp. would otherwise be required to pay in the future.

APO Corp. has entered into a tax receivable agreement with our Managing Partners and Contributing Partners that provides for the payment by APO Corp. to an exchanging or selling Managing Partner or Contributing Partner of 85% of the amount of actual cash savings, if any, in U.S. Federal, state, local and foreign income tax that APO Corp. realizes (or is deemed to realize in the case of an early termination payment by APO Corp. or a change of control, as discussed below) as a result of these increases in tax deductions and tax basis, and certain other tax benefits, including imputed interest expense, related to payments pursuant to the tax receivable agreement. APO Corp. expects to benefit from the remaining 15% of actual cash savings, if any, in income tax that it realizes. For purposes of the tax receivable agreement, cash savings in income tax will be computed by comparing our actual income tax liability to the amount of such taxes that APO Corp. would have been required to pay had there been no increase to the tax basis of the tangible and intangible assets of the applicable Apollo Operating Group entity as a result of the transaction and had APO Corp. not entered into the tax receivable agreement. The tax savings achieved may not ensure that we have sufficient cash available to pay our tax liability or generate additional distributions to our investors. Also, we may need to incur additional debt to repay the tax receivable agreement if our cash flow needs are not met. The term of the tax receivable agreement will continue until all such tax benefits have been utilized or expired, unless APO Corp. exercises the right to terminate the tax receivable agreement by paying an amount based on the present value of payments remaining to be made under the agreement with respect to units that have been exchanged or sold and units which have not yet been exchanged or sold. Such present value will be determined based on certain assumptions, including that APO Corp. would have sufficient taxable income to fully utilize

the deductions that would have arisen from the increased tax deductions and tax basis and other benefits related to the tax receivable agreement. In the event that other of our current or future U.S. subsidiaries become taxable as corporations and acquire AOG Units in the future, or if we become taxable as a corporation for U.S. Federal income tax purposes, each U.S. corporation will become subject to a tax receivable agreement with substantially similar terms.

The IRS could challenge our claim to any increase in the tax basis of the assets owned by the Apollo Operating Group that results from the exchanges entered into by the Managing Partners or Contributing Partners. The IRS could also challenge any additional tax depreciation and amortization deductions or other tax benefits we claim as a result of such increase in the tax basis of such assets. If the IRS were to successfully challenge a tax basis increase or tax benefits we previously claimed from a tax basis increase, our Managing Partners and Contributing Partners would not be obligated under the tax receivable agreement to reimburse APO Corp. for any payments previously made to it (although future payments would be adjusted to reflect the result of such challenge). As a result, in certain circumstances, payments could be made to our Managing Partners and Contributing Partners under the tax receivable agreement in excess of 85% of APO Corp.'s actual cash tax savings. In general, estimating the amount of payments that may be made to our Managing Partners and Contributing Partners under the tax receivable agreement is by its nature, imprecise, in the absence of an actual transaction, insofar as the calculation of amounts payable depends on a variety of factors. The actual increase in tax basis and the amount and timing of any payments under the tax receivable agreement will vary depending upon a number of factors, including:

- the timing of the transactions-for instance, the increase in any tax deductions will vary depending on the fair market value, which may fluctuate over time, of the depreciable or amortizable assets of the Apollo Operating Group entities at the time of the transaction;
- the price of our Class A shares at the time of the transaction-the increase in any tax deductions, as well as tax basis increase in other assets, of the Apollo Operating Group entities, is directly proportional to the price of the Class A shares at the time of the transaction;
- the taxability of exchanges–to the extent an exchange is not taxable for any reason, increased deductions will not be available; and
- the amount and timing of our income–APO Corp. will be required to pay 85% of the tax savings as and when realized, if any. If APO Corp. does not have taxable income, it is not required to make payments under the tax receivable agreement for that taxable year because no tax savings were actually realized.

In addition, the tax receivable agreement provides that, upon a merger, asset sale or other form of business combination or certain other changes of control, APO Corp.'s (or its successor's) obligations with respect to exchanged or acquired units (whether exchanged or acquired before or after such change of control) would be based on certain assumptions, including that APO Corp. would have sufficient taxable income to fully utilize the deductions arising from the increased tax deductions and tax basis and other benefits related to entering into the tax receivable agreement. As noted above, no payments will be made if a Managing Partner or Contributing Partner elects to exchange his or her AOG Units in a tax-free transaction.

In connection with the first amendment and restatement of the exchange agreement, the tax receivable agreement was amended and restated on May 6, 2013 to conform the agreement to the amended and restated exchange agreement, particularly to address the modified exchange mechanics, and to make non-substantive updates to recognize certain additional Apollo Operating Group entities that have been formed since the original tax receivable agreement was entered into in 2007.

Strategic Relationship Agreement

On April 20, 2010, we announced a strategic relationship agreement with CalPERS, whereby we agreed to reduce management fees and other fees charged to CalPERS on funds we manage, or in the future will manage, solely for CalPERS by $125 million over a five-year period or as close a period as required to provide CalPERS with that benefit. The agreement further provides that we will not use a placement agent in connection with securing any future capital commitments from CalPERS. Through December 31, 2016, the Company had reduced fees charged to CalPERS on the funds it manages by approximately $103.8 million.

Strategic Investors Transaction

On July 13, 2007, we sold securities to the Strategic Investors in return for a total investment of $1.2 billion. Through our intermediate holding companies, we used all of the proceeds from the issuance of such securities to the Strategic Investors to purchase AOG Units from our Managing Partners, and to purchase from our Contributing Partners a portion of their points. The Strategic Investors hold non-voting Class A shares, which represented 24.3% of our issued and outstanding Class A shares and 11.2% of the economic interest in the Apollo Operating Group, in each case as of December 31, 2016.

As all of their holdings in us are non-voting, neither of the Strategic Investors has any means for exerting control over our company.

Lenders Rights Agreement

In connection with the Strategic Investors Transaction, we entered into a shareholders agreement, or the "Lenders Rights Agreement," with the Strategic Investors.

Transfer Restrictions

Each Strategic Investor may transfer 100% of its non-voting Class A shares at any time after the fifth anniversary of our IPO.

Notwithstanding the foregoing, at no time following the registration effectiveness date may a Strategic Investor make a transfer representing 2% or more of our total Class A shares to any one person or group of related persons.

Registration Rights

Pursuant to the Lenders Rights Agreement, each Strategic Investor is afforded four demand registrations with respect to its non-voting Class A shares, covering offerings of at least 2.5% of our total equity ownership and customary piggyback registration rights. All cutbacks between the Strategic Investors and Holdings (or its partners) in any such demand registration shall be pro rata based upon the number of shares available for sale at such time (regardless of which party exercises a demand).

Amendments to Managing Partner Transfer Restrictions

Each Strategic Investor has a consent right with respect to any amendment or waiver of any transfer restrictions that apply to our Managing Partners.

Apollo Operating Group Limited Partnership Agreements

Pursuant to the partnership agreements of the Apollo Operating Group partnerships, the indirect wholly-owned subsidiaries of Apollo Global Management, LLC that are the general partners of those partnerships have the right to determine when distributions will be made to the partners of the Apollo Operating Group and the amount of any such distributions. If a distribution is authorized, such distribution will be made to the partners of the Apollo Operating Group pro rata in accordance with their respective partnership interests.

The partnership agreements of the Apollo Operating Group partnerships also provide that substantially all of our expenses, including substantially all expenses solely incurred by or attributable to Apollo Global Management, LLC, will be borne by the Apollo Operating Group; provided that obligations incurred under the tax receivable agreement by Apollo Global Management, LLC and its wholly-owned subsidiaries, income tax expenses of Apollo Global Management, LLC and its wholly-owned subsidiaries and indebtedness incurred by Apollo Global Management, LLC and its wholly-owned subsidiaries shall be borne solely by Apollo Global Management, LLC and its wholly-owned subsidiaries.

Employment Arrangements

Please see the section entitled "Item 11. Executive Compensation—Narrative Disclosure to the Summary Compensation Table and Grants of Plan—Based Awards Table" and "—Potential Payments upon Termination or Change in Control" for a description of the employment agreements of our named executive officers who have employment agreements.

In addition, Joshua Black a son of Leon Black, is currently employed by the Company as a Principal in the Company's private equity business. He is entitled to receive a base salary, incentive compensation and employee benefits comparable to those offered to similarly situated employees of the Company during 2016. He is also eligible to receive an annual performance-based bonus in 2016 in an amount determined by the Company in its discretion.

Reimbursements

In the normal course of business, our personnel have made use of aircraft owned as personal assets by Messrs. Black, Rowan and Harris. Messrs. Black, Rowan and Harris paid for their purchases of the aircraft and bear all operating, personnel and maintenance costs associated with their operation for personal use. Payment by us for the business use of these aircraft by Messrs. Black, Rowan and Harris and other of our personnel totaled $1,083,718, $831,997 and $451,401 for 2016 to Messrs. Black, Rowan and Harris, respectively (which amounts are determined based on the lower of the actual costs of operating the aircraft or a specified hourly market rate).

Investments In Apollo Funds

Our directors and executive officers are generally permitted to invest their own capital (or capital of estate planning vehicles that they control) directly in our funds and affiliated entities. In general, such investments are not subject to management fees, and in certain instances, may not be subject to carried interest. The opportunity to invest in our funds in the same manner is available to all of the senior Apollo professionals and to those of our employees whom we have determined to have a status that reasonably permits us to offer them these types of investments in compliance with applicable laws. From our inception through December 31, 2016, our professionals have committed or invested approximately $1.2 billion of their own capital to our funds.

The amount invested in our investment funds by our directors and executive officers (and their estate planning vehicles) during 2016 was $8,798,182, $10,923,518, $4,617,433, $2,664,246, $438,666, $361,789 and $1,243,821 for Messrs. Black, Harris, Rowan, Suydam, Kelly, Ducey, and Kraft, respectively. The amount of distributions, including profits and return of capital to our directors and executive officers (and their estate planning vehicles) during 2016 was $10,751,106, $10,193,345, $4,811,152, $1,638,505, $113,716, $273,917 and $741,690 for Messrs. Black, Harris, Rowan, Suydam, Kelly, Ducey, and Kraft, respectively.

Sub-Advisory Arrangements and Strategic Investment Accounts

From time to time, we have entered into sub-advisory arrangements with, or established strategic investment accounts for, certain of our directors and executive officers or vehicles they manage. Such arrangements have been approved in advance in accordance with our policy regarding transactions with related persons. In addition, such sub-advisory arrangements or strategic investment accounts have been entered into with, or advised by, an Apollo entity serving as investment advisor registered under the Investment Advisers Act, and any fee arrangements, if applicable, have been on an arms-length basis. The amount of such fees paid by our directors and executive officers or vehicles they manage to the Company during 2016 was $140,830 for Mr. Rowan and $152,881 for Mr. Harris.

Indemnification of Directors, Officers and Others

Under our operating agreement, in most circumstances we will indemnify the following persons, to the fullest extent permitted by law, from and against all losses, claims, damages, liabilities, joint or several, expenses (including legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts: our manager; any departing manager; any person who is or was an affiliate of our manager or any departing manager; any person who is or was a member, partner, tax matters partner, officer, director, employee, agent, fiduciary or trustee of us or our subsidiaries, our manager or any departing manager or any affiliate of us or our subsidiaries, our manager or any departing manager; any person who is or was serving at the request of our manager or any departing manager or any affiliate of our manager or any departing manager as an officer, director, employee, member, partner, agent, fiduciary or trustee of another person; or any person designated by our manager. We have agreed to provide this indemnification unless there has been a final and non-appealable judgment by a court of competent jurisdiction determining that these persons acted in bad faith or engaged in fraud or willful misconduct. We have also agreed to provide this indemnification for criminal proceedings. Any indemnification under these provisions will only be out of our assets. We may purchase insurance against liabilities asserted against and expenses incurred by persons for our activities, regardless of whether we would have the power to indemnify the person against liabilities under our operating agreement.

We have entered into indemnification agreements with each of our directors, executive officers and certain of our employees which set forth the obligations described above.

We have also agreed to indemnify each of our Managing Partners and certain Contributing Partners against certain amounts that they are required to pay in connection with a general partner obligation for the return of previously made carried interest distributions in respect of Fund IV, Fund V and Fund VI. See the above description of the indemnity provisions of the Managing Partner Shareholders Agreement.

Statement of Policy Regarding Transactions with Related Persons

Our board of directors has adopted a written statement of policy regarding transactions with related persons, which we refer to as our "related person policy." Our related person policy requires that a "related person" (as defined in paragraph (a) of Item 404 of Regulation S-K) must promptly disclose to our Chief Legal Officer any "related person transaction" (defined as any transaction that is reportable by us under Item 404(a) of Regulation S-K in which we were or are to be a participant and the amount involved exceeds $120,000 and in which any related person had or will have a direct or indirect material interest) and all material facts with respect thereto. Our Chief Legal Officer will then promptly communicate that information to our manager. No related person transaction will be consummated without the approval or ratification of the executive committee of our manager or any committee of our board of directors consisting exclusively of disinterested directors. It is our policy that persons interested in a related person transaction will recuse themselves from any vote of a related person transaction in which they have an interest.

Director Independence

Because more than fifty percent of our voting power is controlled by BRH, we are considered a "controlled company" as defined in the listing standards of the NYSE and we are exempt from the NYSE rules that require that:

- our board of directors be comprised of a majority of independent directors;
- we establish a compensation committee composed solely of independent directors; and
- we establish a nominating and corporate governance committee composed solely of independent directors.

While our board of directors is currently comprised of a majority of independent directors, we plan on availing ourselves of the controlled company exceptions. We have elected not to have a nominating and corporate governance committee comprised entirely of independent directors, nor a compensation committee comprised entirely of independent directors. Our board of directors has determined that five of our eight directors meet the independence standards under the NYSE and the SEC. These directors are Messrs. Ducey, Fribourg, Krongard and Kraft and Ms. Richards.

At such time that we are no longer deemed a controlled company, our board of directors will take all action necessary to comply with all applicable rules within the applicable time period under the NYSE listing standards.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The following table summarizes the aggregate fees for professional services provided by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, the "Deloitte Entities") for the years ended December 31, 2016 and 2015.

	Year Ended December 31,	
	2016	2015
	(in thousands)	
Audit fees	$ 9,506 (1)	$ 10,185 (1)
Audit fees for Apollo fund entities	20,920 (2)	20,389 (2)
Audit-related fees	1,548 (3)(4)	6,138 (3)(4)
Tax fees	3,483 (5)	2,188 (5)
Tax fees for Apollo fund entities	23,367 (2)	19,150 (2)

(1) Audit fees consisted of fees for (a) the audits of our consolidated financial statements in our Annual Report on Form 10-K and services attendant to, or required by, statute or regulation; (b) reviews of the interim condensed consolidated financial statements included in our quarterly reports on Form 10-Q.
(2) Audit and Tax fees for Apollo fund entities consisted of services to investment funds managed by Apollo in its capacity as the general partner and/or manager of such entities.
(3) Audit-related fees consisted of comfort letters, consents and other services related to SEC and other regulatory filings.
(4) Includes audit-related fees for Apollo fund entities of $0.3 million and $0.9 million for the years ended December 31, 2016 and 2015, respectively.
(5) Tax fees consisted of fees for services rendered for tax compliance and tax planning and advisory services.

Our audit committee charter requires the audit committee of our board of directors to approve in advance all audit and non-audit related services to be provided by our independent registered public accounting firm. All services reported in the Audit, Audit-related, Tax and Other categories above were approved by the committee.

PART IV

ITEM 15. EXHIBITS

Exhibit Number	Exhibit Description
3.1	Certificate of Formation of Apollo Global Management, LLC (incorporated by reference to Exhibit 3.1 to the Registrant’s Registration Statement on Form S-1 (File No. 333-150141)).
3.2	Amended and Restated Limited Liability Company Agreement of Apollo Global Management, LLC (incorporated by reference to Exhibit 3.2 to the Registrant’s Registration Statement on Form S-1 (File No. 333-150141)).
4.1	Specimen Certificate evidencing the Registrant’s Class A shares (incorporated by reference to Exhibit 4.1 to the Registrant’s Registration Statement on Form S-1 (File No. 333-150141)).
4.2	Indenture dated as of May 30, 2014, among Apollo Management Holdings, L.P., the Guarantors party thereto and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant’s Form 8-K filed with the Securities and Exchange Commission on May 30, 2014 (File No. 001-35107)).
4.3	First Supplemental Indenture dated as of May 30, 2014, among Apollo Management Holdings, L.P., the Guarantors party thereto and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.2 to the Registrant’s Form 8-K filed with the Securities and Exchange Commission on May 30, 2014 (File No. 001-35107)).
4.4	Form of 4.000% Senior Note due 2024 (included in Exhibit 4.2 to the Registrant’s Form 8-K filed with the Securities and Exchange Commission on May 30, 2014 (File No. 001-35107), which is incorporated by reference).
4.5	Second Supplemental Indenture dated as of January 30, 2015, among Apollo Management Holdings, L.P., the Guarantors party thereto, Apollo Principal Holdings X, L.P. and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.5 to the Registrant’s Form 10-K for the period ended December 31, 2014 (File No. 001-35107)).
4.6	Third Supplemental Indenture dated as of February 1, 2016, among Apollo Management Holdings, L.P., the Guarantors party thereto, Apollo Principal Holdings XI, LLC and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.6 to the Registrant’s Form 10-Q for the period ended March 31, 2016 (File No. 001-35107)).
4.7	Fourth Supplemental Indenture dated as of May 27, 2016, among Apollo Management Holdings, L.P., the Guarantors party thereto and Wells Fargo Bank, National Association, as trustee (incorporated by reference to the Registrant’s Form 8-K filed with the Securities and Exchange Commission on May 27, 2016 (File No. 001-35107)).

Exhibit 10.11

APOLLO GLOBAL MANAGEMENT, LLC
EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT

THIS EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT (this " **Agreement**") is made and entered into as of January 4, 2017 (the "**Effective Date**"), by and between Apollo Global Management, LLC, a Delaware limited liability company (the "**Company**"), and Leon D. Black ("**Executive**"). Where the context permits, references to the "Company" shall include the Company and any successor of the Company. Capitalized terms used herein that are not defined in the paragraph in which they first appear are defined in Section 5(b) or in the Agreement Among Principals.

WITNESSETH:

WHEREAS, the Company desires to secure the continued services of Executive for the benefit of the Company and its Affiliates (as defined below) from and after the Effective Date hereof; and

WHEREAS, Executive desires to continue to provide such services.

NOW, THEREFORE, in consideration of the mutual promises, covenants and agreements herein contained, together with other good and valuable consideration the receipt of which is hereby acknowledged, the parties hereto do hereby agree as follows:

1 . SERVICES AND DUTIES. From and after the Effective Date, Executive shall be employed by the Company in the capacity of its Chairman and Chief Executive Officer. Executive shall be a full-time employee of the Company and shall dedicate substantially all of Executive's working time to the Company and its Affiliates and shall have no other employment and no other business ventures which either are undisclosed to the Company or conflict with Executive's duties under this Agreement. Executive will perform such duties as are required by the Company from time to time and normally associated with Executive's position, together with such additional duties, commensurate with Executive's positions with the Company and with its Affiliates, as may be assigned to Executive from time to time by the Governing Body. The "**Governing Body**" means AGM Management, LLC for so long as it is designated as the principal governing body of the Company pursuant to the Shareholders Agreement and thereafter, the Board. Notwithstanding the foregoing, nothing herein shall prohibit Executive from (i) subject to prior approval of the Governing Body, accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates and does not involve a Competing Business (defined below), (ii) accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates or involve a Competing Business and so long as the role is at a company that is an investment made by the Executive or a member of his Group (as defined below) in accordance with the requirements of the Code of Ethics and Clause F in Exhibit A, (iii) being actively involved in personal investing through the Family Office or otherwise so long as such involvement is consistent with the requirements of the Code of Ethics and Clause F in Exhibit A, (iv) engaging and being actively involved in charitable, cultural, educational and civic activities, so long as such outside interests do not interfere with the performance of Executive's duties hereunder, or (v) engaging in a business of the Apollo Operating Group or a member or Subsidiary thereof or of any Person in which a member or Subsidiary of the Apollo Operating Group holds an Investment in each case on behalf of the Apollo Operating Group.

2. TERM. Executive's employment under the terms and conditions of this Agreement will commence on the Effective Date. The term of this Agreement (the "**Term**") shall commence on the Effective Date and end on the third anniversary thereof. If the Term expires and Executive is employed by the Company thereafter, unless a new employment agreement has been entered into, such employment shall be "at-will." Notwithstanding the foregoing provisions of this Section 2, Executive will have the right to voluntarily terminate his employment with the Company at any time, any such termination being effective on the date on which a written notice thereof is delivered to the Company pursuant to Section 8(a) hereof.

3. COMPENSATION.

(a) Base Salary. In consideration of Executive's full and faithful satisfaction of Executive's duties under this Agreement, the Company agrees to pay to Executive a salary in the amount of one hundred thousand dollars ($100,000.00) per annum (the "**Base Salary**"), payable in such installments as the Company pays its similarly placed employees (but not less frequently than each calendar month), subject to usual and customary deductions for withholding taxes and similar charges, and customary employee contributions to the health, welfare and retirement programs in which Executive is enrolled from time to time.

(b) Withholding. All taxable compensation payable to Executive pursuant to this Section 3 or otherwise pursuant to

this Agreement shall be subject to customary deductions for withholding taxes and such other excise or employment taxes as are required under Federal law or the applicable law of any state or governmental body to be collected with respect to compensation paid by the Company to an employee.

4. BENEFITS AND EXPENSE REIMBURSEMENT.

(a) Retirement and Welfare Benefits. During the Term, Executive will be entitled to all the usual benefits offered to employees at Executive's level, including sick time and participation in the Company's medical, dental and insurance programs, subject to the applicable limitations and requirements imposed by the terms of such benefit plans, in each case in accordance with the terms of such plans as in effect from time to time. Nothing in this Section 4, however, shall require the Company to maintain any benefit plan or provide any type or level of benefits to its employees, including Executive.

(b) Vacation/Paid Time Off. Executive will be entitled to vacation and paid time off ("**PTO**") each year on the most favorable basis afforded to any employee pursuant to the Company's policies as in effect from time to time.

(c) Reimbursement of Expenses. The Company shall reimburse Executive for any expenses reasonably incurred by Executive in furtherance of Executive's duties hereunder, including travel, meals and accommodations, upon submission by Executive of vouchers or receipts and in compliance with such rules and policies relating thereto as the Company may from time to time adopt.

5. TERMINATION. Executive's employment shall be terminated at the earliest to occur of (i) the date on which the Governing Body delivers written notice that Executive is being terminated as a result of a Disability (as defined below), or (ii) the date of Executive's death. In addition, Executive's employment with the Company may be terminated (i) by the Company for Cause (as defined below), effective on the date on which a written notice to such effect is delivered to Executive; or (ii) by Executive at any time, effective on the date on which a written notice to such effect is delivered to the Company. For the avoidance of doubt, this Agreement does not address the consequences of termination of Executive's employment, if any, to the equity interests in the Company or its Affiliates held by Executive or members of his Group.

(a) Termination by the Company with Cause or by Reason of Death or Disability or a Termination by Executive. If Executive's employment with the Company is terminated by the Company with Cause or is terminated voluntarily by Executive or by reason of Executive's death or Disability, Executive shall not be entitled to any further compensation or benefits other than accrued but unpaid Base Salary (payable as provided in Section 3(a) hereof) and accrued and unused PTO pay through the date of such termination.

(b) Definitions. For purposes of this Agreement:

"**Affiliate**" means an affiliate of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

"**Agreement Among Principals**" means the Agreement Among Principals, by and among Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P., MJR Foundation LLC, MJH Partners, L.P., AP Professional Holdings, L.P. and BRH Holdings, L.P., as may be amended, modified, supplemented or restated from time to time.

"**Cause**" means (i) a final, non-appealable conviction of or plea of *nolo contendere* to a felony prohibiting Executive from continuing to provide services as an investment professional to the Company due to legal restriction or physical confinement; or (ii) ceasing to be eligible to continue performing services as an investment professional on behalf of the Company or any of its material Subsidiaries (as defined below), in each case, pursuant to a final, non-appealable legal restriction (such as a final, non-appealable injunction, but expressly excluding a preliminary injunction or other provisional restriction).

"**Covered Business**" has the meaning ascribed to it in the amended and restated exempted limited partnership agreement of BRH Holdings, L.P., a Cayman Islands exempted limited partnership.

"**Disability**" shall refer to any physical or mental incapacity which prevents Executive from carrying out all or substantially all of his duties under this Agreement for any period of one hundred eighty (180) consecutive days or any aggregate period of eight (8) months in any twelve-month (12) period, as determined, in its sole discretion, by a majority of the members of the Governing Body, including a majority of the Continuing Principals who are members of the Governing Body (but for the sake of clarity, not including the Executive in respect of which the determination is being made).

"**Family Office**" means the organization responsible for the day-to-day administration and management of the Executive's financial and personal affairs, which may include, but is not limited to, wealth management, oversight of investments, tax planning, estate planning and philanthropic endeavors, and includes any entity which holds the personal investments of the Executive.

"**Group**" shall mean with respect to Executive, Executive and (i) Executive's spouse, (ii) a lineal descendant of Executive's parents, the spouse of any such descendant or a lineal descendent of any such spouse, (iii) a Charitable Institution solely controlled by Executive and other members of his Group, (iv) a trustee of a trust (whether *inter vivos* or testamentary), all of the current beneficiaries and presumptive remaindermen of which are one or more of Executive and Persons described in clauses (i) through (iii) of this definition, (v) a corporation, limited liability company or partnership, of which all or substantially all of the outstanding shares of capital stock or interests therein are owned by one or more of Executive and Persons described in clauses (i) through (iv) of this definition provided, that the equity not owned by Executive and Persons described in clauses (i) through (iv) of this definition is owned by current or former service providers of such corporation, limited liability company or partnership, (vi) an individual mandated under a qualified domestic relations order, or (vii) the executor, personal representative or administrator of the estate of such Executive or of the estate of any individual described in clauses (i), (ii) or (vi) above. For purposes of this definition, (x) "lineal descendants" shall not include individuals adopted after attaining the age of eighteen (18) years and such adopted individual's descendants; and (y) "presumptive remaindermen" shall refer to those Persons entitled to a share of a trust's assets if it were then to terminate. Executive shall never be a member of the Group of another Principal.

"**Manager**" means AGM Management, LLC, a Delaware limited liability company.

"**Shareholders Agreement**" means the Shareholders Agreement, dated as of July 13, 2007, by and among the Company, AP Professional Holdings, L.P., Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P. and MJR Foundation LLC.

"**Subsidiary**" means a subsidiary of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

(c) Resignation as Officer or Director. Upon the termination of employment for any reason, Executive shall be deemed to have resigned each position (if any) that Executive then holds as an officer or director of the Company or any of its Subsidiaries or any Portfolio Company without any further act to be taken by Executive. Additionally, Executive shall execute and deliver to the Company promptly after the Company's written request, any request for a resignation in form and substance reasonably acceptable to Executive. For the sake of clarity, this provision shall not apply to any right Executive may have under the Agreement Among Principals to continue to serve as a member of the Executive Committee following Executive's retirement.

(d) Disability. The parties acknowledge that there may be a delay between the discovery of a condition that results in Executive's employment termination due to Disability, and the effective date of such termination. In such case, the Governing Body may temporarily appoint a Senior Professional to perform the functional responsibilities and duties of Executive until Disability definitively occurs or is determined not to have occurred; *provided*, *however*, (i) the Governing Body may so appoint a Senior Professional only if Executive is unable to perform his responsibilities and duties to the Company (or such successor thereto or such other entity controlled by the Company or its successor as may be Executive's employer at such time), or, as a matter of fiduciary duty, should be prohibited from performing his responsibilities and duties, and (ii) during such period Executive shall continue to serve on the Executive Committee unless otherwise prohibited from doing so pursuant to the Agreement Among Principals.

(e) Section 409A. To the extent required to avoid the imposition of tax under Section 409A of the Code ("**Section 409A**"), if Executive is a "specified employee" for purposes of Section 409A, amounts that would otherwise be payable under this Section 5 during the six-month (6) period immediately following the employment termination date shall instead be paid on the first (1st) business day after the date that is six (6) months following Executive's "separation from service" within the meaning of Section 409A, or, if earlier, the date of Executive's death.

6. RESTRICTIVE COVENANTS. The parties agree that the restrictive covenants set forth in Exhibit A hereto (the "**Restrictive Covenants**") are incorporated herein by reference and shall be deemed to be contained herein. Executive understands, acknowledges and agrees that the Restrictive Covenants apply (i) during his employment under this Agreement, during any period of employment by (x) the Company or (y) any Affiliate following the termination of this Agreement or the expiration of the Term, and (ii) as provided in Exhibit A hereto, during the periods specified following termination of his employment by the Company and by any Affiliate which may have employed him.

7. ASSIGNMENT. This Agreement, and all of the terms and conditions hereof, shall bind the Company and its successors and assigns and shall bind Executive and Executive's heirs, valid assigns, executors and administrators. No transfer or assignment of this Agreement shall release the Company from any obligation to Executive hereunder. Neither this Agreement, nor any of the Company's rights or obligations hereunder, may be assigned or are otherwise subject to hypothecation by Executive. The Company may assign the rights and obligations of the Company hereunder, in whole or in part, to any of the Company's Subsidiaries or Affiliates, or to any other successor or assign in connection with the sale of all or substantially all of the Company's assets or equity or in connection with any merger, acquisition and/or reorganization, provided the assignee assumes the obligations of the Company hereunder and provided further than any such assignment shall not release the Company from its obligations hereunder.

8. GENERAL.

(a) Notices. Any notices provided hereunder must be in writing and shall be deemed effective upon the earlier of one (1) business day following personal delivery (including personal delivery by e-mail or recognized overnight courier), or the third (3rd) business day after mailing by first class mail to the recipient at the address indicated below:

To the Company:

Apollo Global Management, LLC
9 West 57th Street
43rd Floor
New York, NY 10019
Attention: Chief Legal Officer

To Executive at the location set forth in the Company's records

or to such other address or to the attention of such other Person as the recipient party may have specified by prior written notice to the sending party.

(b) Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof. If any provision of this Agreement, or the application thereof to any Person or any circumstance, is found to be invalid or unenforceable in any jurisdiction, (a) a suitable and equitable provision shall be substituted therefor in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision and (b) the remainder of this Agreement and the application of such provision to other Persons or circumstances shall not be affected by such invalidity or unenforceability, nor shall such invalidity or unenforceability affect the validity or enforceability of such provision, or the application thereof, in any other jurisdiction.

(c) Entire Agreement. This document, together with its attached exhibits, constitutes the final, complete, and exclusive embodiment of the entire agreement and understanding between the parties related to the subject matter hereof and supersedes and preempts any prior or contemporaneous understandings, agreements, or representations by or between the parties, written or oral. Notwithstanding the immediately preceding sentence, this Agreement does not supersede or preempt the Shareholders Agreement, the Agreement Among Principals, the Exchange Agreement, the exempted limited partnership agreement of AP Professional Holdings, L.P., the exempted limited partnership agreement of BRH Holdings, L.P., or any other agreement to which Executive became a party in connection with the Company's initial public offering.

(d) Counterparts. This Agreement may be executed on separate counterparts, any one of which need not contain signatures of more than one party, but all of which taken together will constitute one and the same agreement.

(e) Amendments. No amendments or other modifications to this Agreement may be made except by a writing signed by each party hereto. No amendment or waiver of this Agreement requires the consent of any individual, partnership, corporation or other entity not a party to this Agreement.

(f) Survivorship. The provisions of this Agreement necessary to carry out the intention of the parties as expressed herein (including, without limitation, the Restrictive Covenants provided in Section 6 hereof and Exhibit A hereto) shall survive the termination or expiration of the Term.

(g) Waiver. The waiver by either party of the other party's prompt and complete performance, or breach or violation, of any provision of this Agreement shall not operate nor be construed as a waiver of any subsequent breach or violation, and the failure by any party hereto to exercise any right or remedy which it or he may possess hereunder shall not operate nor be construed as a bar to the exercise of such right or remedy by such party upon the occurrence of any subsequent breach or violation. No waiver shall be deemed to have occurred unless set forth in a writing executed by or on behalf of the waiving party. No such written waiver shall be deemed a continuing waiver unless specifically stated therein, and each such waiver shall operate only as to the specific term or condition waived and shall not constitute a waiver of such term or condition for the future or as to any act other than that specifically waived.

(h) Captions. The captions of this Agreement are for convenience and reference only and in no way define, describe, extend or limit the scope or intent of this Agreement or the intent of any provision hereof.

(i) Construction. The parties acknowledge that this Agreement is the result of arm's-length negotiations between sophisticated parties, each afforded representation by legal counsel. Each and every provision of this Agreement shall be construed as though both parties participated equally in the drafting of the same, and any rule of construction that a document shall be construed against the drafting party shall not be applicable to this Agreement.

(j) Arbitration.

(i) Except as contemplated in Section 8(k) hereof, the parties hereto agree that any dispute, controversy or claim arising out of or relating to this Agreement, whether based on contract, tort, statute, or other legal or equitable theory (including, without limitation, any claim of fraud, intentional misconduct, misrepresentation or fraudulent inducement or any question of validity or effect of this Agreement including this clause) or the breach or termination hereof (the "**Dispute**"), shall be resolved in binding arbitration in accordance with the following provisions:

A. Such Dispute shall be resolved by binding arbitration to be conducted before JAMS in accordance with the provisions of JAMS' Comprehensive Arbitration Rules and Procedures as in effect at the time of the arbitration.

B. The arbitration shall be held before a panel of three arbitrators appointed by JAMS, in accordance with its rules, who are not Affiliates of any party to such arbitration and do not have any actual or reasonable potential for bias or conflict of interest with respect to any of the parties hereto, directly or indirectly, by virtue of any direct or indirect financial interest, family relationship or close friendship.

C. Such arbitration shall be held at such place as the arbitrators appointed by JAMS may determine within the County, City and State of New York, or such other location to which the parties hereto may agree.

D. The arbitrators shall have the authority, taking into account the parties' desire that any arbitration proceeding hereunder be reasonably expedited and efficient, to permit the parties hereto to conduct discovery. Any such discovery shall be (i) guided generally by but be no broader than permitted under the United States Federal Rules of Civil Procedure (the "**FRCP**"), and (ii) subject to the arbitrators and the parties hereto entering into a mutually acceptable confidentiality agreement.

E. The arbitrators shall have the authority to issue subpoenas for the attendance of witnesses and for the production of records and other evidence in connection with discovery and/or at any hearing and may administer oaths. Any such subpoena must be served in the manner for service of subpoenas under the FRCP and enforced in the manner for enforcement of subpoenas under the FRCP.

F. The arbitrators' decision and award in any such arbitration shall be made by majority vote and delivered within thirty (30) calendar days of the conclusion of the evidentiary hearings unless otherwise agreed to by the parties hereto. In addition, the arbitrators shall have the authority to award injunctive relief to any of the parties.

G. The arbitrators' decision shall be in writing and shall be as brief as possible and will include the basis for the arbitrators' decision. A record of the arbitration proceeding shall be kept.

H. Judgment on the award rendered by the arbitrators may be entered in any court having jurisdiction thereof.

I. The parties shall share equally all expenses of JAMS (including those of the arbitrators) incurred in connection with any arbitration; provided, however, the arbitrators may award to the prevailing party in such arbitration its or his reasonable expenses incurred (including reasonable legal fees and expenses) and its or his share of JAMS expenses in connection with such arbitration.

J. The parties hereto agree to participate in any arbitration in good faith.

(ii) If JAMS is unable or unwilling to commence arbitration with regard to any such Dispute within thirty (30) calendar days after the parties have met the requirements for commencement as set forth in Rule 5 of the JAMS Comprehensive Arbitration Rules and Procedures, then the Disputes shall be resolved by binding arbitration, in accordance with the International Arbitration Rules of the American Arbitration Association (the " **AAA**"), before a panel of three arbitrators who shall be selected jointly by the parties involved in such Dispute, or if the parties cannot agree on the selection of the arbitrators, shall be selected by the AAA (provided that any arbitrators selected by the AAA shall meet the requirements of Section 8(j)(i)(B) above). Any such arbitration shall be subject to the provisions of Section 8(j)(i)(C) through 8(j)(i)(J) above (as if the AAA were JAMS). If the AAA is unable or unwilling to commence such arbitration within thirty (30) calendar days after the parties have met the requirements for such commencement set forth in the aforementioned rules, then either party may seek resolution of such Dispute through litigation in accordance with Sections 8(k) and 8(l).

(iii) Except as may be necessary to enter judgment upon the award or to the extent required by applicable law, all claims, defenses and proceedings (including, without limiting the generality of the foregoing, the existence of the controversy and the fact that there is an arbitration proceeding) shall be treated in a confidential manner by the arbitrators, the parties and their counsel, and each of their agents, employees and all others acting on behalf of or in concert with them.

Without limiting the generality of the foregoing, no one shall divulge to any Person not directly involved in the arbitration the contents of the pleadings, papers, orders, hearings, trials, or awards in the arbitration, except as may be necessary to enter judgment upon an award or as required by applicable law. Any court proceedings relating to the arbitration hereunder, including, without limiting the generality of the foregoing, to prevent or compel arbitration; discovery; enforcement of a subpoena; or to confirm, correct, vacate or otherwise enforce an arbitration award, shall be filed under seal with the court, to the extent permitted by law.

(k) Governing Law; Equitable Remedies. THIS AGREEMENT SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK (WITHOUT GIVING EFFECT TO CONFLICT OF LAWS PRINCIPLES THEREOF). The parties hereto agree that irreparable damage would occur in the event that any of the provisions of Section 6 or Exhibit A of this Agreement were not performed in accordance with its specific terms or was otherwise breached. It is accordingly agreed that the parties hereto shall be entitled to an injunction or injunctions and other equitable remedies to prevent breaches of Section 6 or Exhibit A of this Agreement and to enforce specifically the terms and provisions thereof in any of the Selected Courts (as defined below), this being in addition to any other remedy to which they are entitled at law or in equity. In such event, any requirements for the securing or posting of any bond with respect to such remedy are hereby waived by each of the parties hereto. Each party further agrees that, in the event of any action for an injunction or other equitable remedy in respect of such breach or enforcement of specific performance pursuant to this Section 8(k), it or he will not assert the defense that a remedy at law would be adequate.

(l) Consent to Jurisdiction. It is the desire and intent of the parties hereto that any disputes or controversies arising under or in connection with this Agreement be resolved pursuant to arbitration in accordance with Section 8(j); *provided*, *however*, that, to the extent that Section 8(j) is held to be invalid or unenforceable for any reason, and the result is that the parties hereto are precluded from resolving any claim arising under or in connection with this Agreement pursuant to the terms of Section 8(j) (after giving effect to the terms of Section 8(b)), the following provisions of this Section 8(l) shall govern the resolution of all disputes or controversies arising under this Agreement. With respect to any suit, action or proceeding ("**Proceeding**") arising out of or relating to this Agreement or any transaction contemplated hereby each of the parties hereto hereby irrevocably (i) submits to the exclusive jurisdiction of (A) the United States District Court for the Southern District of New York, or (B) in the event that such court lacks jurisdiction to hear the claim, the state courts of New York located in the borough of Manhattan, New York City (the "**Selected Courts**") and waives any objection to venue being laid in the Selected Courts whether based on the grounds of *forum non conveniens* or otherwise and hereby agrees not to commence any such Proceeding other than before one of the Selected Courts; *provided*, *however*, that a party may commence any Proceeding in a court other than a Selected Court solely for the purpose of enforcing an order or judgment issued by one of the Selected Courts or the arbitrators; (ii) consents to service of process in any Proceeding by the mailing of copies thereof by registered or certified mail, postage prepaid, or by recognized international express carrier or delivery service, to their respective addresses referred to in Section 8(a) hereof; *provided*, *however*, that nothing herein shall affect the right of any party hereto to serve process in any other manner permitted by law; and (iii) TO THE EXTENT NOT PROHIBITED BY APPLICABLE LAW THAT CANNOT BE WAIVED, WAIVES, AND COVENANTS THAT IT OR HE WILL NOT ASSERT (WHETHER AS PLAINTIFF, DEFENDANT OR OTHERWISE) ANY RIGHT TO TRIAL BY JURY IN ANY ACTION ARISING IN WHOLE OR IN PART UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS, WHETHER NOW EXISTING OR HEREAFTER ARISING, AND WHETHER SOUNDING IN CONTRACT, TORT OR OTHERWISE, AND AGREES THAT ANY OF THEM MAY FILE A COPY OF THIS PARAGRAPH WITH ANY COURT AS WRITTEN EVIDENCE OF THE KNOWING, VOLUNTARY AND BARGAINED-FOR AGREEMENT AMONG THE PARTIES IRREVOCABLY TO WAIVE ITS OR HIS RIGHT TO TRIAL BY JURY IN ANY PROCEEDING WHATSOEVER BETWEEN THEM RELATING TO THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS AND WILL INSTEAD BE TRIED IN A COURT OF COMPETENT JURISDICTION BY A JUDGE SITTING WITHOUT A JURY.

(m) Third Party Beneficiaries. Except as expressly provided herein, nothing in this Agreement shall confer any rights or remedies upon any Person other than the parties hereto or any and all of Executive's heirs, successors, valid assigns, executors and administrators. In any provision of the Agreement which provides rights or remedies to, or permits the assignment of rights to, Affiliates or Subsidiaries of the Company, the terms "Affiliates" and "Subsidiaries" shall be construed to exclude any Fund or Portfolio Company.

(n) Indemnification.

(i) To the fullest extent permitted by law but subject to the limitations expressly provided in this Agreement, Executive and the Executive's Group (collectively, the "**Indemnified Parties**" and each individually an "**Indemnified Party**") shall be indemnified and held harmless by the Company and its direct and indirect consolidated Subsidiaries from and against any and all losses, claims, damages, liabilities, joint or several, expenses (including reasonable legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising from any and all threatened, pending or completed third-party claims, demands, actions, suits or proceedings, whether civil, criminal, administrative or investigative, and whether

formal or informal and including appeals, directly or indirectly, by reason of or arising from (A) Executive's actions or inactions in connection with the establishment, management, operations or serving on the board of any Covered Business, (B) Executive's actions or inactions with respect to his duties under this Agreement (including resulting from limitations on Executive's actions set forth in Exhibit A), and (C) Executive's actions or inactions with respect to any limited partnership agreement or similar governing document of any Covered Business or any member of the Apollo Operating Group or any direct or indirect Subsidiary, including, for the avoidance of doubt, to the extent related to any breach or alleged breach of this Agreement, any Fund Agreement or the AGM LLC Agreement, whether arising from acts or omissions to act as set forth in this section 8(n)(i) occurring before or after the Effective Date; *provided*, *however*, that the Indemnified Party shall not be indemnified and held harmless if there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter for which the Indemnified Party is seeking indemnification pursuant to this Section 8(n), Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Notwithstanding the preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party in connection with any action, suit or proceeding (or part thereof) commenced by an Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by such Indemnified Party was authorized by the Company in its sole discretion.

(ii) To the fullest extent permitted by law, expenses (including reasonable legal fees and expenses) incurred by an Indemnified Party in appearing at, participating in or defending any indemnifiable claim, demand, action, suit or proceeding pursuant to Section 8(n) shall be advanced by the Company on a monthly basis prior to a final and non-appealable determination that the Indemnified Party is not entitled to be indemnified upon receipt by the Company of an undertaking by or on behalf of an Indemnified Party to repay such amount if it ultimately shall be determined that the Indemnified Party is not entitled to be indemnified pursuant to this Section 8(n). Notwithstanding the immediately preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party pursuant to the immediately preceding sentence in connection with any action, suit or proceeding (or part thereof) commenced by such Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by the Indemnified Party was authorized by the Company in its sole discretion.

(iii) The indemnification provided by this Section 8(n) shall be in addition to any other rights to which the Indemnified Parties may be entitled under any agreement, as a matter of law, in equity or otherwise, both as to actions in Executive's capacity as Executive and as to actions in any other capacity, and shall continue as to the Indemnified Parties if Executive has ceased to serve in such capacity.

(iv) Any indemnification pursuant to this Section 8(n) shall be made only out of the assets of the Company and/or its valid assignees. In no event may the Indemnified Parties subject the members of the Company to personal liability by reason of the indemnification provisions set forth in this Agreement.

(v) No Indemnified Party shall be denied indemnification in whole or in part under this Section 8(n) because such Indemnified Party had an interest in the transaction with respect to which the indemnification applies if the transaction was otherwise permitted by the terms of this Agreement, including, without limitation, Exhibit A, the Agreement Among Principals, the Limited Liability Company Agreement of the Company or the consent of the Governing Body.

(vi) The provisions of this Section 8(n) are for the benefit of the Indemnified Parties and their heirs, successors, valid assigns, executors and administrators and shall not be deemed to create any rights for the benefit of any other Persons.

(vii) Executive shall, in the performance of his duties, be fully protected in relying in good faith upon the records of the Company, its Affiliates and their respective direct or indirect Subsidiaries and on such information, opinions, reports or statements presented to any of the foregoing by any of the respective officers, directors or employees, or committees of the board, or by any other Person as to matters that Executive, as the case may be, reasonably believes are within such other Person's professional or expert competence.

(viii) No amendment, modification or repeal of this Section 8(n) or any provision hereof shall in any manner terminate, reduce or impair the right of the Indemnified Parties or any third party beneficiary to be indemnified by the Company, nor the obligations of the Company to indemnify the Indemnified Parties or any third party beneficiary under and in accordance with the provisions of this Section 8(n) as in effect immediately prior to such amendment, modification or repeal with respect to claims arising from or relating to matters occurring, in whole or-in part, prior to such amendment, modification

or repeal, regardless of when such claims may arise or be asserted.

(ix) If a claim for indemnification (following the final disposition of the action, suit or proceeding for which indemnification is being sought) or advancement of expenses under this Section 8(n) is not paid in full within thirty (30) days after a written claim therefor by an Indemnified Party or any third party beneficiary has been received by the Company, such Indemnified Party or such third party beneficiary, as the case may be, may file suit to recover the unpaid amount of such claim and, if successful in whole or in part, shall be entitled to be paid the expenses of prosecuting such claim, including reasonable attorneys' fees.

(o) Liability of Indemnified Persons. Notwithstanding anything to the contrary herein, no Indemnified Party shall be liable to the Company or any other Persons who have acquired interests in the Company's securities, for any losses, claims, damages, liabilities, joint or several, expenses (including legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising as a result of any act or omission of Executive, or for any breach of contract (including breach of this Agreement) or any breach of duties (including breach of fiduciary duties) whether arising hereunder, at law, in equity or otherwise, unless there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter in question, Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Any amendment, modification or repeal of this Section 8(o) or any provision hereof shall be prospective only and shall not in any way affect the limitations on the liability of an Indemnified Party under this Section 8(o) as in effect immediately prior to such amendment, modification or repeal with respect to claims arising from or relating to matters occurring, in whole or in part, prior to such amendment, modification or repeal, regardless of when such claims may arise or be asserted.

(p) Legal Fees. The Company shall pay or reimburse Executive for all reasonable and documented legal fees and costs incurred by him in connection with the drafting and negotiation of this Agreement and any other agreement or policies directly or indirectly related to Executive's employment arrangement and his rights under Exhibit A.

[Signature page follows]

IN WITNESS WHEREOF AND INTENDING TO BE LEGALLY BOUND THEREBY, the parties hereto have executed and delivered this Agreement as of the year and date first above written.

Exhibit A

Restrictive Covenants

Executive understands, acknowledges and agrees that, by virtue of his equity interest in the Company and/or its Affiliates, his previous services to the Company and its Affiliates, and his employment by the Company pursuant to this Agreement, directly or indirectly, he acquired, had access to, or was otherwise exposed to, and shall acquire, have access to or be otherwise exposed to confidential information of the Company and its Affiliates (the Confidential Information, as defined below) and he has met and developed relationships with, and will meet and develop relationships with, the Company's potential and existing financing sources, capital market intermediaries, investors, employees and consultants.

The Company and its Affiliates are engaged throughout the United States and the world in the business of raising, managing, investing the assets of and making investments in private equity funds, hedge funds, publicly traded alternative investment vehicles and other alternative asset investment vehicles (the "**Business**"). Executive acknowledges that (i) the Business is global in nature and Executive is among the limited number of individuals leading the Business, (ii) the Restrictive Covenants set forth in this Exhibit A are an essential part of this Agreement, (iii) he has been fully advised by counsel in connection with the negotiation of this Agreement and the Restrictive Covenants, (iv) he is familiar with the laws which govern the enforceability of restrictive covenants in the jurisdictions where the Business is carried on, and agrees that these Restrictive Covenants, including, without limitation, the non-competition covenant, are reasonable, valid and enforceable in the context of this Agreement, and (v) compliance with the Restrictive Covenants, including, without limitation, the non-competition covenant, will not create any hardship for Executive as he has independent means and sufficient income to be fully self-supporting without competing with the Company in the Business or violating any of the Restrictive Covenants.

A . Non-competition. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period (as defined below), Executive shall not, directly or indirectly, either as a principal, agent, employee, employer, consultant, partner, member, shareholder of a closely held corporation or shareholder in excess of three percent (3%) of a publicly traded corporation, corporate officer or director, or in any other individual or representative capacity, engage or otherwise participate in any manner or fashion in any business that is a Competing Business (as defined below), either in the United States or in any other place in the world where the Company or any of its Affiliates, successors or assigns engages in the Business. Notwithstanding anything to the contrary contained in this Clause A of this Exhibit A, (i) activities permitted by clause 1 (Services and Duties) of the Employment, Non-Competition and Non-Solicitation Agreement and (ii) investments described in Clause F of this Exhibit A, are permitted.

Solely for purposes of this Exhibit A: "**Competing Business**" means any alternative asset management business (other than the Business of the Company, its successors or assigns or Affiliates) Primarily for Third Party capital that advises, manages or invests the assets of and/or makes investments in private equity funds, hedge funds, collateralized debt obligation funds, business development corporations, special purpose acquisition companies or other alternative asset investment vehicles, or the Persons who manage, advise or own such investment vehicles. "**Primarily**" means with respect to more than fifty percent (50%) of the capital in question. "**Third Party**" means a Person other than Executive or any member of Executive's Group. "**Restricted Period**" means, the period commencing on the date hereof and terminating one (1) year following Executive's termination of employment.

B. Non-solicitation of Employees, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, (i) solicit or induce any officer, director, employee, agent or consultant of the Company or any of its successors, assigns or Affiliates to terminate his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates for the purpose of associating with any Competing Business, or otherwise encourage any such Person to leave or sever his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates, for any other reason, or (ii) hire any such individual who, at the time of hire, Executive knows left the employ of the Company or any of its Affiliates during the immediately preceding twelve (12) months. This provision shall not prohibit Executive from soliciting or hiring the Persons serving as his personal assistant or assistants at or prior to the time of his departure. For purposes of these Clauses B and C of this Exhibit A, "Affiliates" shall not include any Portfolio Company.

C . Non-solicitation of Investors, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, solicit or induce any investors, financing sources or capital market intermediaries of the Company or its successors, assigns or Affiliates to terminate (or diminish in any respect) his, her or its relationship with the Company or its successors, assigns or Affiliates. Nothing in this paragraph applies to those investors, financing sources, or capital market intermediaries who did not conduct business with the Company, or its successors, assigns or Affiliates during Executive's employment with, or the period in which Executive held, directly or indirectly, an ownership interest in, the Company or any Affiliate.

D . Confidentiality. Executive agrees to be bound by Section 5.8 ("**Confidential Information**") of the Agreement Among

Principals.

E . Disparaging Comments. Executive agrees that he shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages, either professionally or personally, the Company or any of its Affiliates, past and present, and each of them, as well as its and their trustees, directors, officers, members, managers, partners, agents, attorneys, insurers, employees, stockholders, representatives, assigns, and successors, past and present, and each of them. The Company agrees that it shall not, and it shall ensure that its Continuing Principals shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages Executive, either professionally or personally. The obligations under this paragraph shall not apply to (i) disclosures compelled by applicable law or order of any court or (ii) any statements or disclosures reasonably necessary to be made directly in connection with any legal proceeding, arbitration or investigation, whether or not compelled (but subject to any confidentiality agreements or orders that may govern such proceeding, arbitration or investigation).

F. Code of Ethics, Family Offices and Personal Investing.

(1) In no event shall Executive make, or assist a member of his Group in making, any investment that violates or conflicts with the Company's then-current code of ethics (the "**Code of Ethics**") or any trading policies of the Company (it being understood that the terms and restrictions of any such policy may be more restrictive than required by applicable law). The Company will notify Executive promptly of any changes to the Code of Ethics or to any of its trading policies. As required by the Code of Ethics, all statements of holdings by the Family Office shall be provided to the Company compliance department ("**Company Compliance**") and all trades by the Family Office that are required to be pre-cleared under the Code of Ethics will be pre-cleared by Company Compliance, except as noted below.

(2) Transactions in the following by the Family Office shall be considered "fully-managed accounts" for purposes of Section 8.2.2 of the Code of Ethics (or any successor section) provided that a certificate is delivered to the Company's Chief Compliance Officer (the "**CCO**") on a quarterly basis from the relevant portfolio manager or the Chief Executive Officer, as applicable (the "Portfolio Manager") of Executive's Family Office and Executive stating that Executive continues to have no investment control, influence or discretion over such investments:

- Bank loans; and
- Equity securities of publicly traded companies with a market capitalization of more than $100 million and less than $10 billion so long as the investment will not result in the Family Office owning more than 3% of the outstanding publicly traded securities of any issuer.

Although the foregoing shall be considered "fully-managed accounts" under the Code of Ethics and thus do not require pre-clearance, the Executive shall nonetheless cause his Family Office to pre-clear with Company Compliance all transactions in equity securities in publicly traded companies with a market capitalization of more than $100 million and less than $10 billion (but not bank loans) to ensure that the Company is not in possession of material non-public information ("**MNPI**") concerning the issuer of the securities.

(3) The provision contained in Section 8.3 of the Code of Ethics which requires Company Compliance to consider whether a "transaction would usurp an opportunity that properly belongs to the Company's clients" is considered satisfied with respect to any investment (including anticipated follow-on investments) that is below the threshold size listed in the attached Schedule I for the type of investment listed (because these investments do not usurp the Company's client opportunities). For avoidance of doubt, such transactions would remain subject to pre-clearance by Company Compliance for MNPI or conflicts purposes.

(4) Investments in the following categories are unlikely to usurp an opportunity that properly belongs to the Company's clients and therefore, Company Compliance will endeavor to expedite any pre-clearance request with respect to these investments:

- Investments in sports teams, leagues or organizations (because these investments are not considered appropriate investments for the Company's clients); and
- Private investments that were introduced to the Family Office by persons other than Executive or sourced by the Family Office and not Executive so long as the Portfolio Manager of Executive's Family Office and Executive deliver a certificate in the form attached as Schedule 2 to the Company's CCO prior to making such investment stating that such investment was introduced to the Family Office by persons other than Executive or sourced by employees or other service providers of the Family Office and not Executive, that Executive was not aware of such investment prior to the Family Office being introduced to or sourcing such investment and that neither the Company nor its employees (including Executive) participated in sourcing such investment. For the avoidance of doubt, once the Family Office is introduced to or sources the investment, Executive may be involved in analyzing the investment and participating in the decision as to whether the Family Office should make such investment.

For the avoidance of doubt, the other factors to be considered in a pre-clearance decision (i.e., the restricted list, MNPI, etc.) remain applicable to the investments listed above in this paragraph F(4).

(5) Any request for pre-clearance to Company Compliance shall include information about anticipated follow-on investments with respect to the investment. If a follow-on investment is pre-cleared at the time of the original investment it shall not require another pre-clearance at the time of actual investment (although sales of such investment may be required to be pre-cleared as provided in the Code of Ethics). If a follow-on investment was not anticipated at the time of the original investment, Executive or his Family Office shall certify that such subsequent funding is required to protect the value of the existing investment and was not contemplated and pre-cleared at the time of the initial investment.

(6) As required by the Code of Ethics, when requesting pre-clearance, Executive's Family Office shall provide sufficient information such that the Company can make a decision but such Family Office will not be obligated to create an investment memorandum solely for pre-clearance purposes.

(7) Where possible, responses to pre-clearance requests shall be granted to Executive's Family Office within 48 hours of the request.

(8) Before agreeing to receive MNPI with respect to an investment, Company Compliance shall check its most recent statement of the Family Office's holdings, and if the receipt of the MNPI could cause the Family Office to restrict its investment, Company Compliance, if practicable, will provide notice to the Family Office that the Company may receive MNPI so that the Family Office has an opportunity to exit the position before the MNPI is received. If the Family Office chooses to exit the position, the Family Office shall request pre-clearance from Company Compliance and Company Compliance may or may not grant approval. Once Company Compliance has completed its internal decision-making about whether to accept MNPI (normally approximately 48 hours later) the Company shall notify the Family Office of its decision, and if the Family Office has not sold its position, it will be subject to restriction on sale.

G . Conflicts of Interest. Executive hereby agrees to promptly disclose to the Governing Body any potential conflict of interest involving Executive, his Group or his Family Office or the Company upon Executive obtaining actual knowledge of such conflict or potential conflict.

H . Director's Fees and Other Sources of Compensation from the Company. All directors' and other fees payable to Executive after July 13, 2012 or equity incentives granted to Executive after July 13, 2012 by a portfolio company shall be transferred to the Company or its designee without any additional consideration therefor. Other than the compensation set forth in this Agreement, Executive will not accept any compensation, director fees, other fees or equity interests from the Company or any of its Subsidiaries.

I. Continuing Obligations to the Company and its Subsidiaries. Commencing on the Effective Date, Executive will cooperate in all reasonable respects with the Company and its Subsidiaries in connection with any and all existing or future litigation, actions or proceedings (whether civil, criminal, administrative, regulatory or otherwise) brought by or against the Company or any of its Affiliates, to the extent the Company reasonably deems Executive's cooperation necessary. Executive shall be reimbursed for all out-of-pocket expenses incurred by him as a result of such cooperation.

J . Acknowledgement. Executive agrees and acknowledges that each Restrictive Covenant herein is reasonable as to duration, terms and geographical area and that the same protects the legitimate interests of the Company and its Affiliates, imposes no undue hardship on Executive, is not injurious to the public, and that any violation of any of these Restrictive Covenants shall be specifically enforceable in any court with jurisdiction upon short notice. Executive agrees and acknowledges that a portion of the compensation paid to Executive under this Agreement to which this Exhibit A is attached will be paid in consideration of the covenants contained in this Exhibit A, the sufficiency of which consideration is hereby acknowledged. If any provision of this Exhibit A as applied to Executive or to any circumstance is adjudged by a court to be invalid or unenforceable, the same shall in no way affect any other circumstance or the validity or enforceability of any other provision of this Exhibit A. If the scope of any such provision, or any part thereof, is too broad to permit enforcement of such provision to its full extent, Executive agrees that the court making such determination shall have the power to reduce the duration and/or area of such provision, and/or to delete specific words or phrases, to the extent necessary to permit enforcement, and, in its reduced form, such provision shall then be enforceable and shall be enforced. Executive agrees and acknowledges that the breach of this Exhibit A will cause irreparable injury to the Company and upon breach of any provision of this Exhibit A, the Company shall be entitled to injunctive relief, specific performance or other equitable relief; *provided*, *however*, that this shall in no way limit any other remedies which the Company may have (including, without limitation, the right to seek monetary damages). The Company shall not bring any claim or action for breach of any provision of this Exhibit A unless (i) it has provided written notice of such alleged claim and provided Executive with at least thirty (30) days to correct or cure the conduct in question and (ii) during such period, Executive has not corrected or cured such conduct. Each of the covenants in this Exhibit A shall be construed as an agreement independent of any other provisions in this Agreement to which it is attached, other than the consideration for such covenant provided in this Agreement.

Exhibit 10.12

APOLLO GLOBAL MANAGEMENT, LLC
EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT

THIS EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT (this " **Agreement**") is made and entered into as of January 4, 2017 (the "**Effective Date**"), by and between Apollo Global Management, LLC, a Delaware limited liability company (the "**Company**"), and Marc J. Rowan ("**Executive**"). Where the context permits, references to the "Company" shall include the Company and any successor of the Company. Capitalized terms used herein that are not defined in the paragraph in which they first appear are defined in Section 5(b) or in the Agreement Among Principals.

WITNESSETH:

WHEREAS, the Company desires to secure the continued services of Executive for the benefit of the Company and its Affiliates (as defined below) from and after the Effective Date hereof; and

WHEREAS, Executive desires to continue to provide such services.

NOW, THEREFORE, in consideration of the mutual promises, covenants and agreements herein contained, together with other good and valuable consideration the receipt of which is hereby acknowledged, the parties hereto do hereby agree as follows:

1. SERVICES AND DUTIES. From and after the Effective Date, Executive shall be employed by the Company in the capacity of its Senior Managing Director. Executive shall be a full-time employee of the Company and shall dedicate substantially all of Executive's working time to the Company and its Affiliates and shall have no other employment and no other business ventures which either are undisclosed to the Company or conflict with Executive's duties under this Agreement. Executive will perform such duties as are required by the Company from time to time and normally associated with Executive's position, together with such additional duties, commensurate with Executive's positions with the Company and with its Affiliates, as may be assigned to Executive from time to time by the Governing Body. The "**Governing Body**" means AGM Management, LLC for so long as it is designated as the principal governing body of the Company pursuant to the Shareholders Agreement and thereafter, the Board. Notwithstanding the foregoing, nothing herein shall prohibit Executive from (i) subject to prior approval of the Governing Body, accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates and does not involve a Competing Business (defined below), (ii) accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates or involve a Competing Business and so long as the role is at a company that is an investment made by the Executive or a member of his Group (as defined below) in accordance with the requirements of the Code of Ethics and Clause F in Exhibit A, (iii) being actively involved in personal investing through the Family Office or otherwise so long as such involvement is consistent with the requirements of the Code of Ethics and Clause F in Exhibit A, (iv) engaging and being actively involved in charitable, cultural, educational and civic activities, so long as such outside interests do not interfere with the performance of Executive's duties hereunder, or (v) engaging in a business of the Apollo Operating Group or a member or Subsidiary thereof or of any Person in which a member or Subsidiary of the Apollo Operating Group holds an Investment in each case on behalf of the Apollo Operating Group.

2. TERM. Executive's employment under the terms and conditions of this Agreement will commence on the Effective Date. The term of this Agreement (the "**Term**") shall commence on the Effective Date and end on the third anniversary thereof. If the Term expires and Executive is employed by the Company thereafter, unless a new employment agreement has been entered into, such employment shall be "at-will." Notwithstanding the foregoing provisions of this Section 2, Executive will have the right to voluntarily terminate his employment with the Company at any time, any such termination being effective on the date on which a written notice thereof is delivered to the Company pursuant to Section 8(a) hereof.

3. COMPENSATION.

(a) Base Salary. In consideration of Executive's full and faithful satisfaction of Executive's duties under this Agreement, the Company agrees to pay to Executive a salary in the amount of one hundred thousand dollars ($100,000.00) per annum (the "**Base Salary**"), payable in such installments as the Company pays its similarly placed employees (but not less frequently than each calendar month), subject to usual and customary deductions for withholding taxes and similar charges, and customary employee contributions to the health, welfare and retirement programs in which Executive is enrolled from time to time.

(b) Withholding. All taxable compensation payable to Executive pursuant to this Section 3 or otherwise pursuant to this Agreement shall be subject to customary deductions for withholding taxes and such other excise or employment taxes as are

required under Federal law or the applicable law of any state or governmental body to be collected with respect to compensation paid by the Company to an employee.

4. BENEFITS AND EXPENSE REIMBURSEMENT.

(a) Retirement and Welfare Benefits. During the Term, Executive will be entitled to all the usual benefits offered to employees at Executive's level, including sick time and participation in the Company's medical, dental and insurance programs, subject to the applicable limitations and requirements imposed by the terms of such benefit plans, in each case in accordance with the terms of such plans as in effect from time to time. Nothing in this Section 4, however, shall require the Company to maintain any benefit plan or provide any type or level of benefits to its employees, including Executive.

(b) Vacation/Paid Time Off. Executive will be entitled to vacation and paid time off ("**PTO**") each year on the most favorable basis afforded to any employee pursuant to the Company's policies as in effect from time to time.

(c) Reimbursement of Expenses. The Company shall reimburse Executive for any expenses reasonably incurred by Executive in furtherance of Executive's duties hereunder, including travel, meals and accommodations, upon submission by Executive of vouchers or receipts and in compliance with such rules and policies relating thereto as the Company may from time to time adopt.

5. TERMINATION. Executive's employment shall be terminated at the earliest to occur of (i) the date on which the Governing Body delivers written notice that Executive is being terminated as a result of a Disability (as defined below), or (ii) the date of Executive's death. In addition, Executive's employment with the Company may be terminated (i) by the Company for Cause (as defined below), effective on the date on which a written notice to such effect is delivered to Executive; or (ii) by Executive at any time, effective on the date on which a written notice to such effect is delivered to the Company. For the avoidance of doubt, this Agreement does not address the consequences of termination of Executive's employment, if any, to the equity interests in the Company or its Affiliates held by Executive or members of his Group.

(a) Termination by the Company with Cause or by Reason of Death or Disability or a Termination by Executive. If Executive's employment with the Company is terminated by the Company with Cause or is terminated voluntarily by Executive or by reason of Executive's death or Disability, Executive shall not be entitled to any further compensation or benefits other than accrued but unpaid Base Salary (payable as provided in Section 3(a) hereof) and accrued and unused PTO pay through the date of such termination.

(b) Definitions. For purposes of this Agreement:

"**Affiliate**" means an affiliate of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

"**Agreement Among Principals**" means the Agreement Among Principals, by and among Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P., MJR Foundation LLC, MJH Partners, L.P., AP Professional Holdings, L.P. and BRH Holdings, L.P., as may be amended, modified, supplemented or restated from time to time.

"**Cause**" means (i) a final, non-appealable conviction of or plea of *nolo contendere* to a felony prohibiting Executive from continuing to provide services as an investment professional to the Company due to legal restriction or physical confinement; or (ii) ceasing to be eligible to continue performing services as an investment professional on behalf of the Company or any of its material Subsidiaries (as defined below), in each case, pursuant to a final, non-appealable legal restriction (such as a final, non-appealable injunction, but expressly excluding a preliminary injunction or other provisional restriction).

"**Covered Business**" has the meaning ascribed to it in the amended and restated exempted limited partnership agreement of BRH Holdings, L.P., a Cayman Islands exempted limited partnership.

"**Disability**" shall refer to any physical or mental incapacity which prevents Executive from carrying out all or substantially all of his duties under this Agreement for any period of one hundred eighty (180) consecutive days or any aggregate period of eight (8) months in any twelve-month (12) period, as determined, in its sole discretion, by a majority of the members of the Governing Body, including a majority of the Continuing Principals who are members of the Governing Body (but for the sake of clarity, not including the Executive in respect of which the determination is being made).

"**Family Office**" means the organization responsible for the day-to-day administration and management of the Executive's financial and personal affairs, which may include, but is not limited to, wealth management, oversight of investments, tax planning, estate planning and philanthropic endeavors, and includes any entity which holds the personal investments of the Executive.

"**Group**" shall mean with respect to Executive, Executive and (i) Executive's spouse, (ii) a lineal descendant of Executive's

parents, the spouse of any such descendant or a lineal descendent of any such spouse, (iii) a Charitable Institution solely controlled by Executive and other members of his Group, (iv) a trustee of a trust (whether *inter vivos* or testamentary), all of the current beneficiaries and presumptive remaindermen of which are one or more of Executive and Persons described in clauses (i) through (iii) of this definition, (v) a corporation, limited liability company or partnership, of which all or substantially all of the outstanding shares of capital stock or interests therein are owned by one or more of Executive and Persons described in clauses (i) through (iv) of this definition provided, that the equity not owned by Executive and Persons described in clauses (i) through (iv) of this definition is owned by current or former service providers of such corporation, limited liability company or partnership, (vi) an individual mandated under a qualified domestic relations order, or (vii) the executor, personal representative or administrator of the estate of such Executive or of the estate of any individual described in clauses (i), (ii) or (vi) above. For purposes of this definition, (x) "lineal descendants" shall not include individuals adopted after attaining the age of eighteen (18) years and such adopted individual's descendants; and (y) "presumptive remaindermen" shall refer to those Persons entitled to a share of a trust's assets if it were then to terminate. Executive shall never be a member of the Group of another Principal.

"**Manager**" means AGM Management, LLC, a Delaware limited liability company.

"**Shareholders Agreement**" means the Shareholders Agreement, dated as of July 13, 2007, by and among the Company, AP Professional Holdings, L.P., Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P. and MJR Foundation LLC.

"**Subsidiary**" means a subsidiary of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

(c) Resignation as Officer or Director. Upon the termination of employment for any reason, Executive shall be deemed to have resigned each position (if any) that Executive then holds as an officer or director of the Company or any of its Subsidiaries or any Portfolio Company without any further act to be taken by Executive. Additionally, Executive shall execute and deliver to the Company promptly after the Company's written request, any request for a resignation in form and substance reasonably acceptable to Executive. For the sake of clarity, this provision shall not apply to any right Executive may have under the Agreement Among Principals to continue to serve as a member of the Executive Committee following Executive's retirement.

(d) Disability. The parties acknowledge that there may be a delay between the discovery of a condition that results in Executive's employment termination due to Disability, and the effective date of such termination. In such case, the Governing Body may temporarily appoint a Senior Professional to perform the functional responsibilities and duties of Executive until Disability definitively occurs or is determined not to have occurred; *provided*, *however*, (i) the Governing Body may so appoint a Senior Professional only if Executive is unable to perform his responsibilities and duties to the Company (or such successor thereto or such other entity controlled by the Company or its successor as may be Executive's employer at such time), or, as a matter of fiduciary duty, should be prohibited from performing his responsibilities and duties, and (ii) during such period Executive shall continue to serve on the Executive Committee unless otherwise prohibited from doing so pursuant to the Agreement Among Principals.

(e) Section 409A. To the extent required to avoid the imposition of tax under Section 409A of the Code ("**Section 409A**"), if Executive is a "specified employee" for purposes of Section 409A, amounts that would otherwise be payable under this Section 5 during the six-month (6) period immediately following the employment termination date shall instead be paid on the first (1st) business day after the date that is six (6) months following Executive's "separation from service" within the meaning of Section 409A, or, if earlier, the date of Executive's death.

6. RESTRICTIVE COVENANTS. The parties agree that the restrictive covenants set forth in Exhibit A hereto (the "**Restrictive Covenants**") are incorporated herein by reference and shall be deemed to be contained herein. Executive understands, acknowledges and agrees that the Restrictive Covenants apply (i) during his employment under this Agreement, during any period of employment by (x) the Company or (y) any Affiliate following the termination of this Agreement or the expiration of the Term, and (ii) as provided in Exhibit A hereto, during the periods specified following termination of his employment by the Company and by any Affiliate which may have employed him.

7. ASSIGNMENT. This Agreement, and all of the terms and conditions hereof, shall bind the Company and its successors and assigns and shall bind Executive and Executive's heirs, valid assigns, executors and administrators. No transfer or assignment of this Agreement shall release the Company from any obligation to Executive hereunder. Neither this Agreement, nor any of the Company's rights or obligations hereunder, may be assigned or are otherwise subject to hypothecation by Executive. The Company may assign the rights and obligations of the Company hereunder, in whole or in part, to any of the Company's Subsidiaries or Affiliates, or to any other successor or assign in connection with the sale of all or substantially all of the Company's assets or equity or in connection with any merger, acquisition and/or reorganization, provided the assignee assumes the obligations of the Company hereunder and provided further than any such assignment shall not release the Company from its obligations hereunder.

8. GENERAL.

(a) Notices. Any notices provided hereunder must be in writing and shall be deemed effective upon the earlier of one (1) business day following personal delivery (including personal delivery by e-mail or recognized overnight courier), or the third (3rd) business day after mailing by first class mail to the recipient at the address indicated below:

To the Company:

Apollo Global Management, LLC
9 West 57th Street
43rd Floor
New York, NY 10019
Attention: Chief Legal Officer

To Executive at the location set forth in the Company's records

or to such other address or to the attention of such other Person as the recipient party may have specified by prior written notice to the sending party.

(b) Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof. If any provision of this Agreement, or the application thereof to any Person or any circumstance, is found to be invalid or unenforceable in any jurisdiction, (a) a suitable and equitable provision shall be substituted therefor in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision and (b) the remainder of this Agreement and the application of such provision to other Persons or circumstances shall not be affected by such invalidity or unenforceability, nor shall such invalidity or unenforceability affect the validity or enforceability of such provision, or the application thereof, in any other jurisdiction.

(c) Entire Agreement. This document, together with its attached exhibits, constitutes the final, complete, and exclusive embodiment of the entire agreement and understanding between the parties related to the subject matter hereof and supersedes and preempts any prior or contemporaneous understandings, agreements, or representations by or between the parties, written or oral. Notwithstanding the immediately preceding sentence, this Agreement does not supersede or preempt the Shareholders Agreement, the Agreement Among Principals, the Exchange Agreement, the exempted limited partnership agreement of AP Professional Holdings, L.P., the exempted limited partnership agreement of BRH Holdings, L.P., or any other agreement to which Executive became a party in connection with the Company's initial public offering.

(d) Counterparts. This Agreement may be executed on separate counterparts, any one of which need not contain signatures of more than one party, but all of which taken together will constitute one and the same agreement.

(e) Amendments. No amendments or other modifications to this Agreement may be made except by a writing signed by each party hereto. No amendment or waiver of this Agreement requires the consent of any individual, partnership, corporation or other entity not a party to this Agreement.

(f) Survivorship. The provisions of this Agreement necessary to carry out the intention of the parties as expressed herein (including, without limitation, the Restrictive Covenants provided in Section 6 hereof and Exhibit A hereto) shall survive the termination or expiration of the Term.

(g) Waiver. The waiver by either party of the other party's prompt and complete performance, or breach or violation, of any provision of this Agreement shall not operate nor be construed as a waiver of any subsequent breach or violation, and the failure by any party hereto to exercise any right or remedy which it or he may possess hereunder shall not operate nor be construed as a bar to the exercise of such right or remedy by such party upon the occurrence of any subsequent breach or violation. No waiver shall be deemed to have occurred unless set forth in a writing executed by or on behalf of the waiving party. No such written waiver shall be deemed a continuing waiver unless specifically stated therein, and each such waiver shall operate only as to the specific term or condition waived and shall not constitute a waiver of such term or condition for the future or as to any act other than that specifically waived.

(h) Captions. The captions of this Agreement are for convenience and reference only and in no way define, describe, extend or limit the scope or intent of this Agreement or the intent of any provision hereof.

(i) Construction. The parties acknowledge that this Agreement is the result of arm's-length negotiations between sophisticated parties, each afforded representation by legal counsel. Each and every provision of this Agreement shall be construed as though both parties participated equally in the drafting of the same, and any rule of construction that a document shall be construed against the drafting party shall not be applicable to this Agreement.

(j) Arbitration.

(i) Except as contemplated in Section 8(k) hereof, the parties hereto agree that any dispute, controversy or claim arising out of or relating to this Agreement, whether based on contract, tort, statute, or other legal or equitable theory (including, without limitation, any claim of fraud, intentional misconduct, misrepresentation or fraudulent inducement or any question of validity or effect of this Agreement including this clause) or the breach or termination hereof (the "**Dispute**"), shall be resolved in binding arbitration in accordance with the following provisions:

A. Such Dispute shall be resolved by binding arbitration to be conducted before JAMS in accordance with the provisions of JAMS' Comprehensive Arbitration Rules and Procedures as in effect at the time of the arbitration.

B. The arbitration shall be held before a panel of three arbitrators appointed by JAMS, in accordance with its rules, who are not Affiliates of any party to such arbitration and do not have any actual or reasonable potential for bias or conflict of interest with respect to any of the parties hereto, directly or indirectly, by virtue of any direct or indirect financial interest, family relationship or close friendship.

C. Such arbitration shall be held at such place as the arbitrators appointed by JAMS may determine within the County, City and State of New York, or such other location to which the parties hereto may agree.

D. The arbitrators shall have the authority, taking into account the parties' desire that any arbitration proceeding hereunder be reasonably expedited and efficient, to permit the parties hereto to conduct discovery. Any such discovery shall be (i) guided generally by but be no broader than permitted under the United States Federal Rules of Civil Procedure (the "**FRCP**"), and (ii) subject to the arbitrators and the parties hereto entering into a mutually acceptable confidentiality agreement.

E. The arbitrators shall have the authority to issue subpoenas for the attendance of witnesses and for the production of records and other evidence in connection with discovery and/or at any hearing and may administer oaths. Any such subpoena must be served in the manner for service of subpoenas under the FRCP and enforced in the manner for enforcement of subpoenas under the FRCP.

F. The arbitrators' decision and award in any such arbitration shall be made by majority vote and delivered within thirty (30) calendar days of the conclusion of the evidentiary hearings unless otherwise agreed to by the parties hereto. In addition, the arbitrators shall have the authority to award injunctive relief to any of the parties.

G. The arbitrators' decision shall be in writing and shall be as brief as possible and will include the basis for the arbitrators' decision. A record of the arbitration proceeding shall be kept.

H. Judgment on the award rendered by the arbitrators may be entered in any court having jurisdiction thereof.

I. The parties shall share equally all expenses of JAMS (including those of the arbitrators) incurred in connection with any arbitration; provided, however, the arbitrators may award to the prevailing party in such arbitration its or his reasonable expenses incurred (including reasonable legal fees and expenses) and its or his share of JAMS expenses in connection with such arbitration.

J. The parties hereto agree to participate in any arbitration in good faith.

(ii) If JAMS is unable or unwilling to commence arbitration with regard to any such Dispute within thirty (30) calendar days after the parties have met the requirements for commencement as set forth in Rule 5 of the JAMS Comprehensive Arbitration Rules and Procedures, then the Disputes shall be resolved by binding arbitration, in accordance with the International Arbitration Rules of the American Arbitration Association (the " **AAA**"), before a panel of three arbitrators who shall be selected jointly by the parties involved in such Dispute, or if the parties cannot agree on the selection of the arbitrators, shall be selected by the AAA (provided that any arbitrators selected by the AAA shall meet the requirements of Section 8(j)(i)(B) above). Any such arbitration shall be subject to the provisions of Section 8(j)(i)(C) through 8(j)(i)(J) above (as if the AAA were JAMS). If the AAA is unable or unwilling to commence such arbitration within thirty (30) calendar days after the parties have met the requirements for such commencement set forth in the aforementioned rules, then either party may seek resolution of such Dispute through litigation in accordance with Sections 8(k) and 8(l).

(iii) Except as may be necessary to enter judgment upon the award or to the extent required by applicable law, all claims, defenses and proceedings (including, without limiting the generality of the foregoing, the existence of the controversy and the fact that there is an arbitration proceeding) shall be treated in a confidential manner by the arbitrators, the

parties and their counsel, and each of their agents, employees and all others acting on behalf of or in concert with them. Without limiting the generality of the foregoing, no one shall divulge to any Person not directly involved in the arbitration the contents of the pleadings, papers, orders, hearings, trials, or awards in the arbitration, except as may be necessary to enter judgment upon an award or as required by applicable law. Any court proceedings relating to the arbitration hereunder, including, without limiting the generality of the foregoing, to prevent or compel arbitration; discovery; enforcement of a subpoena; or to confirm, correct, vacate or otherwise enforce an arbitration award, shall be filed under seal with the court, to the extent permitted by law.

(k) Governing Law; Equitable Remedies. THIS AGREEMENT SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK (WITHOUT GIVING EFFECT TO CONFLICT OF LAWS PRINCIPLES THEREOF). The parties hereto agree that irreparable damage would occur in the event that any of the provisions of Section 6 or Exhibit A of this Agreement were not performed in accordance with its specific terms or was otherwise breached. It is accordingly agreed that the parties hereto shall be entitled to an injunction or injunctions and other equitable remedies to prevent breaches of Section 6 or Exhibit A of this Agreement and to enforce specifically the terms and provisions thereof in any of the Selected Courts (as defined below), this being in addition to any other remedy to which they are entitled at law or in equity. In such event, any requirements for the securing or posting of any bond with respect to such remedy are hereby waived by each of the parties hereto. Each party further agrees that, in the event of any action for an injunction or other equitable remedy in respect of such breach or enforcement of specific performance pursuant to this Section 8(k), it or he will not assert the defense that a remedy at law would be adequate.

(l) Consent to Jurisdiction. It is the desire and intent of the parties hereto that any disputes or controversies arising under or in connection with this Agreement be resolved pursuant to arbitration in accordance with Section 8(j); *provided*, *however*, that, to the extent that Section 8(j) is held to be invalid or unenforceable for any reason, and the result is that the parties hereto are precluded from resolving any claim arising under or in connection with this Agreement pursuant to the terms of Section 8(j) (after giving effect to the terms of Section 8(b)), the following provisions of this Section 8(l) shall govern the resolution of all disputes or controversies arising under this Agreement. With respect to any suit, action or proceeding ("**Proceeding**") arising out of or relating to this Agreement or any transaction contemplated hereby each of the parties hereto hereby irrevocably (i) submits to the exclusive jurisdiction of (A) the United States District Court for the Southern District of New York, or (B) in the event that such court lacks jurisdiction to hear the claim, the state courts of New York located in the borough of Manhattan, New York City (the "**Selected Courts**") and waives any objection to venue being laid in the Selected Courts whether based on the grounds of f*orum non conveniens* or otherwise and hereby agrees not to commence any such Proceeding other than before one of the Selected Courts; *provided*, *however*, that a party may commence any Proceeding in a court other than a Selected Court solely for the purpose of enforcing an order or judgment issued by one of the Selected Courts or the arbitrators; (ii) consents to service of process in any Proceeding by the mailing of copies thereof by registered or certified mail, postage prepaid, or by recognized international express carrier or delivery service, to their respective addresses referred to in Section 8(a) hereof; *provided*, *however*, that nothing herein shall affect the right of any party hereto to serve process in any other manner permitted by law; and (iii) TO THE EXTENT NOT PROHIBITED BY APPLICABLE LAW THAT CANNOT BE WAIVED, WAIVES, AND COVENANTS THAT IT OR HE WILL NOT ASSERT (WHETHER AS PLAINTIFF, DEFENDANT OR OTHERWISE) ANY RIGHT TO TRIAL BY JURY IN ANY ACTION ARISING IN WHOLE OR IN PART UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS, WHETHER NOW EXISTING OR HEREAFTER ARISING, AND WHETHER SOUNDING IN CONTRACT, TORT OR OTHERWISE, AND AGREES THAT ANY OF THEM MAY FILE A COPY OF THIS PARAGRAPH WITH ANY COURT AS WRITTEN EVIDENCE OF THE KNOWING, VOLUNTARY AND BARGAINED-FOR AGREEMENT AMONG THE PARTIES IRREVOCABLY TO WAIVE ITS OR HIS RIGHT TO TRIAL BY JURY IN ANY PROCEEDING WHATSOEVER BETWEEN THEM RELATING TO THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS AND WILL INSTEAD BE TRIED IN A COURT OF COMPETENT JURISDICTION BY A JUDGE SITTING WITHOUT A JURY.

(m) Third Party Beneficiaries. Except as expressly provided herein, nothing in this Agreement shall confer any rights or remedies upon any Person other than the parties hereto or any and all of Executive's heirs, successors, valid assigns, executors and administrators. In any provision of the Agreement which provides rights or remedies to, or permits the assignment of rights to, Affiliates or Subsidiaries of the Company, the terms "Affiliates" and "Subsidiaries" shall be construed to exclude any Fund or Portfolio Company.

(n) Indemnification.

(i) To the fullest extent permitted by law but subject to the limitations expressly provided in this Agreement, Executive and the Executive's Group (collectively, the "**Indemnified Parties**" and each individually an "**Indemnified Party**") shall be indemnified and held harmless by the Company and its direct and indirect consolidated Subsidiaries from and against any and all losses, claims, damages, liabilities, joint or several, expenses (including reasonable legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising from any and all threatened, pending or completed

third-party claims, demands, actions, suits or proceedings, whether civil, criminal, administrative or investigative, and whether formal or informal and including appeals, directly or indirectly, by reason of or arising from (A) Executive's actions or inactions in connection with the establishment, management, operations or serving on the board of any Covered Business, (B) Executive's actions or inactions with respect to his duties under this Agreement (including resulting from limitations on Executive's actions set forth in Exhibit A), and (C) Executive's actions or inactions with respect to any limited partnership agreement or similar governing document of any Covered Business or any member of the Apollo Operating Group or any direct or indirect Subsidiary, including, for the avoidance of doubt, to the extent related to any breach or alleged breach of this Agreement, any Fund Agreement or the AGM LLC Agreement, whether arising from acts or omissions to act as set forth in this section 8(n)(i) occurring before or after the Effective Date; *provided*, *however*, that the Indemnified Party shall not be indemnified and held harmless if there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter for which the Indemnified Party is seeking indemnification pursuant to this Section 8(n), Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Notwithstanding the preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party in connection with any action, suit or proceeding (or part thereof) commenced by an Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by such Indemnified Party was authorized by the Company in its sole discretion.

(ii) To the fullest extent permitted by law, expenses (including reasonable legal fees and expenses) incurred by an Indemnified Party in appearing at, participating in or defending any indemnifiable claim, demand, action, suit or proceeding pursuant to Section 8(n) shall be advanced by the Company on a monthly basis prior to a final and non-appealable determination that the Indemnified Party is not entitled to be indemnified upon receipt by the Company of an undertaking by or on behalf of an Indemnified Party to repay such amount if it ultimately shall be determined that the Indemnified Party is not entitled to be indemnified pursuant to this Section 8(n). Notwithstanding the immediately preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party pursuant to the immediately preceding sentence in connection with any action, suit or proceeding (or part thereof) commenced by such Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by the Indemnified Party was authorized by the Company in its sole discretion.

(iii) The indemnification provided by this Section 8(n) shall be in addition to any other rights to which the Indemnified Parties may be entitled under any agreement, as a matter of law, in equity or otherwise, both as to actions in Executive's capacity as Executive and as to actions in any other capacity, and shall continue as to the Indemnified Parties if Executive has ceased to serve in such capacity.

(iv) Any indemnification pursuant to this Section 8(n) shall be made only out of the assets of the Company and/or its valid assignees. In no event may the Indemnified Parties subject the members of the Company to personal liability by reason of the indemnification provisions set forth in this Agreement.

(v) No Indemnified Party shall be denied indemnification in whole or in part under this Section 8(n) because such Indemnified Party had an interest in the transaction with respect to which the indemnification applies if the transaction was otherwise permitted by the terms of this Agreement, including, without limitation, Exhibit A, the Agreement Among Principals, the Limited Liability Company Agreement of the Company or the consent of the Governing Body.

(vi) The provisions of this Section 8(n) are for the benefit of the Indemnified Parties and their heirs, successors, valid assigns, executors and administrators and shall not be deemed to create any rights for the benefit of any other Persons.

(vii) Executive shall, in the performance of his duties, be fully protected in relying in good faith upon the records of the Company, its Affiliates and their respective direct or indirect Subsidiaries and on such information, opinions, reports or statements presented to any of the foregoing by any of the respective officers, directors or employees, or committees of the board, or by any other Person as to matters that Executive, as the case may be, reasonably believes are within such other Person's professional or expert competence.

(viii) No amendment, modification or repeal of this Section 8(n) or any provision hereof shall in any manner terminate, reduce or impair the right of the Indemnified Parties or any third party beneficiary to be indemnified by the Company, nor the obligations of the Company to indemnify the Indemnified Parties or any third party beneficiary under and in accordance with the provisions of this Section 8(n) as in effect immediately prior to such amendment, modification or repeal

with respect to claims arising from or relating to matters occurring, in whole or-in part, prior to such amendment, modification or repeal, regardless of when such claims may arise or be asserted.

(ix) If a claim for indemnification (following the final disposition of the action, suit or proceeding for which indemnification is being sought) or advancement of expenses under this Section 8(n) is not paid in full within thirty (30) days after a written claim therefor by an Indemnified Party or any third party beneficiary has been received by the Company, such Indemnified Party or such third party beneficiary, as the case may be, may file suit to recover the unpaid amount of such claim and, if successful in whole or in part, shall be entitled to be paid the expenses of prosecuting such claim, including reasonable attorneys' fees.

(o) Liability of Indemnified Persons. Notwithstanding anything to the contrary herein, no Indemnified Party shall be liable to the Company or any other Persons who have acquired interests in the Company's securities, for any losses, claims, damages, liabilities, joint or several, expenses (including legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising as a result of any act or omission of Executive, or for any breach of contract (including breach of this Agreement) or any breach of duties (including breach of fiduciary duties) whether arising hereunder, at law, in equity or otherwise, unless there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter in question, Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Any amendment, modification or repeal of this Section 8(o) or any provision hereof shall be prospective only and shall not in any way affect the limitations on the liability of an Indemnified Party under this Section 8(o) as in effect immediately prior to such amendment, modification or repeal with respect to claims arising from or relating to matters occurring, in whole or in part, prior to such amendment, modification or repeal, regardless of when such claims may arise or be asserted.

(p) Legal Fees. The Company shall pay or reimburse Executive for all reasonable and documented legal fees and costs incurred by him in connection with the drafting and negotiation of this Agreement and any other agreement or policies directly or indirectly related to Executive's employment arrangement and his rights under Exhibit A.

Exhibit A

Restrictive Covenants

Executive understands, acknowledges and agrees that, by virtue of his equity interest in the Company and/or its Affiliates, his previous services to the Company and its Affiliates, and his employment by the Company pursuant to this Agreement, directly or indirectly, he acquired, had access to, or was otherwise exposed to, and shall acquire, have access to or be otherwise exposed to confidential information of the Company and its Affiliates (the Confidential Information, as defined below) and he has met and developed relationships with, and will meet and develop relationships with, the Company's potential and existing financing sources, capital market intermediaries, investors, employees and consultants.

The Company and its Affiliates are engaged throughout the United States and the world in the business of raising, managing, investing the assets of and making investments in private equity funds, hedge funds, publicly traded alternative investment vehicles and other alternative asset investment vehicles (the "**Business**"). Executive acknowledges that (i) the Business is global in nature and Executive is among the limited number of individuals leading the Business, (ii) the Restrictive Covenants set forth in this Exhibit A are an essential part of this Agreement, (iii) he has been fully advised by counsel in connection with the negotiation of this Agreement and the Restrictive Covenants, (iv) he is familiar with the laws which govern the enforceability of restrictive covenants in the jurisdictions where the Business is carried on, and agrees that these Restrictive Covenants, including, without limitation, the non-competition covenant, are reasonable, valid and enforceable in the context of this Agreement, and (v) compliance with the Restrictive Covenants, including, without limitation, the non-competition covenant, will not create any hardship for Executive as he has independent means and sufficient income to be fully self-supporting without competing with the Company in the Business or violating any of the Restrictive Covenants.

A . Non-competition. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period (as defined below), Executive shall not, directly or indirectly, either as a principal, agent, employee, employer, consultant, partner, member, shareholder of a closely held corporation or shareholder in excess of three percent (3%) of a publicly traded corporation, corporate officer or director, or in any other individual or representative capacity, engage or otherwise participate in any manner or fashion in any business that is a Competing Business (as defined below), either in the United States or in any other place in the world where the Company or any of its Affiliates, successors or assigns engages in the Business. Notwithstanding anything to the contrary contained in this Clause A of this Exhibit A, (i) activities permitted by clause 1 (Services and Duties) of the Employment, Non-Competition and Non-Solicitation Agreement and (ii) investments described in Clause F of this Exhibit A, are permitted.

Solely for purposes of this Exhibit A: "**Competing Business**" means any alternative asset management business (other than the Business of the Company, its successors or assigns or Affiliates) Primarily for Third Party capital that advises, manages or invests the assets of and/or makes investments in private equity funds, hedge funds, collateralized debt obligation funds, business development corporations, special purpose acquisition companies or other alternative asset investment vehicles, or the Persons who manage, advise or own such investment vehicles. "**Primarily**" means with respect to more than fifty percent (50%) of the capital in question. "**Third Party**" means a Person other than Executive or any member of Executive's Group. "**Restricted Period**" means, the period commencing on the date hereof and terminating one (1) year following Executive's termination of employment.

B. Non-solicitation of Employees, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, (i) solicit or induce any officer, director, employee, agent or consultant of the Company or any of its successors, assigns or Affiliates to terminate his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates for the purpose of associating with any Competing Business, or otherwise encourage any such Person to leave or sever his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates, for any other reason, or (ii) hire any such individual who, at the time of hire, Executive knows left the employ of the Company or any of its Affiliates during the immediately preceding twelve (12) months. This provision shall not prohibit Executive from soliciting or hiring the Persons serving as his personal assistant or assistants at or prior to the time of his departure. For purposes of these Clauses B and C of this Exhibit A, "Affiliates" shall not include any Portfolio Company.

C . Non-solicitation of Investors, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, solicit or induce any investors, financing sources or capital market intermediaries of the Company or its successors, assigns or Affiliates to terminate (or diminish in any respect) his, her or its relationship with the Company or its successors, assigns or Affiliates. Nothing in this paragraph applies to those investors, financing sources, or capital market intermediaries who did not conduct business with the Company, or its successors, assigns or Affiliates during Executive's employment with, or the period in which Executive held, directly or indirectly, an ownership interest in, the Company or any Affiliate.

D . Confidentiality. Executive agrees to be bound by Section 5.8 ("**Confidential Information**") of the Agreement Among Principals.

E . Disparaging Comments. Executive agrees that he shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages, either professionally or personally, the Company or any of its Affiliates, past and present, and each of them, as well as its and their trustees, directors, officers, members, managers, partners, agents, attorneys, insurers, employees, stockholders, representatives, assigns, and successors, past and present, and each of them. The Company agrees that it shall not, and it shall ensure that its Continuing Principals shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages Executive, either professionally or personally. The obligations under this paragraph shall not apply to (i) disclosures compelled by applicable law or order of any court or (ii) any statements or disclosures reasonably necessary to be made directly in connection with any legal proceeding, arbitration or investigation, whether or not compelled (but subject to any confidentiality agreements or orders that may govern such proceeding, arbitration or investigation).

F. Code of Ethics, Family Offices and Personal Investing.

(1) In no event shall Executive make, or assist a member of his Group in making, any investment that violates or conflicts with the Company's then-current code of ethics (the "**Code of Ethics**") or any trading policies of the Company (it being understood that the terms and restrictions of any such policy may be more restrictive than required by applicable law). The Company will notify Executive promptly of any changes to the Code of Ethics or to any of its trading policies. As required by the Code of Ethics, all statements of holdings by the Family Office shall be provided to the Company compliance department ("**Company Compliance**") and all trades by the Family Office that are required to be pre-cleared under the Code of Ethics will be pre-cleared by Company Compliance, except as noted below.

(2) Transactions in the following by the Family Office shall be considered "fully-managed accounts" for purposes of Section 8.2.2 of the Code of Ethics (or any successor section) provided that a certificate is delivered to the Company's Chief Compliance Officer (the "**CCO**") on a quarterly basis from the relevant portfolio manager or the Chief Executive Officer, as applicable (the "Portfolio Manager") of Executive's Family Office and Executive stating that Executive continues to have no investment control, influence or discretion over such investments:

- Bank loans; and
- Equity securities of publicly traded companies with a market capitalization of more than $100 million and less than $10 billion so long as the investment will not result in the Family Office owning more than 3% of the outstanding publicly traded securities of any issuer.

Although the foregoing shall be considered "fully-managed accounts" under the Code of Ethics and thus do not require pre-clearance, the Executive shall nonetheless cause his Family Office to pre-clear with Company Compliance all transactions in equity securities in publicly traded companies with a market capitalization of more than $100 million and less than $10 billion (but not bank loans) to ensure that the Company is not in possession of material non-public information ("**MNPI**") concerning the issuer of the securities.

(3) The provision contained in Section 8.3 of the Code of Ethics which requires Company Compliance to consider whether a "transaction would usurp an opportunity that properly belongs to the Company's clients" is considered satisfied with respect to any investment (including anticipated follow-on investments) that is below the threshold size listed in the attached Schedule I for the type of investment listed (because these investments do not usurp the Company's client opportunities). For avoidance of doubt, such transactions would remain subject to pre-clearance by Company Compliance for MNPI or conflicts purposes.

(4) Investments in the following categories are unlikely to usurp an opportunity that properly belongs to the Company's clients and therefore, Company Compliance will endeavor to expedite any pre-clearance request with respect to these investments:

- Investments in sports teams, leagues or organizations (because these investments are not considered appropriate investments for the Company's clients); and

- Private investments that were introduced to the Family Office by persons other than Executive or sourced by the Family Office and not Executive so long as the Portfolio Manager of Executive's Family Office and Executive deliver a certificate in the form attached as Schedule 2 to the Company's CCO prior to making such investment stating that such investment was introduced to the Family Office by persons other than Executive or sourced by employees or other service providers of the Family Office and not Executive, that Executive was not aware of such investment prior to the Family Office being introduced to or sourcing such investment and that neither the Company nor its employees (including Executive) participated in sourcing such investment. For the avoidance of doubt, once the Family Office is introduced to or sources the investment, Executive may be involved in analyzing the investment and participating in the decision as to whether the Family Office should make such investment.

For the avoidance of doubt, the other factors to be considered in a pre-clearance decision (i.e., the restricted list, MNPI, etc.) remain applicable to the investments listed above in this paragraph F(4).

(5) Any request for pre-clearance to Company Compliance shall include information about anticipated follow-on investments with respect to the investment. If a follow-on investment is pre-cleared at the time of the original investment it shall not require another pre-clearance at the time of actual investment (although sales of such investment may be required to be pre-cleared as provided in the Code of Ethics). If a follow-on investment was not anticipated at the time of the original investment, Executive or his Family Office shall certify that such subsequent funding is required to protect the value of the existing investment and was not contemplated and pre-cleared at the time of the initial investment.

(6) As required by the Code of Ethics, when requesting pre-clearance, Executive's Family Office shall provide sufficient information such that the Company can make a decision but such Family Office will not be obligated to create an investment memorandum solely for pre-clearance purposes.

(7) Where possible, responses to pre-clearance requests shall be granted to Executive's Family Office within 48 hours of the request.

(8) Before agreeing to receive MNPI with respect to an investment, Company Compliance shall check its most recent statement of the Family Office's holdings, and if the receipt of the MNPI could cause the Family Office to restrict its investment, Company Compliance, if practicable, will provide notice to the Family Office that the Company may receive MNPI so that the Family Office has an opportunity to exit the position before the MNPI is received. If the Family Office chooses to exit the position, the Family Office shall request pre-clearance from Company Compliance and Company Compliance may or may not grant approval. Once Company Compliance has completed its internal decision-making about whether to accept MNPI (normally approximately 48 hours later) the Company shall notify the Family Office of its decision, and if the Family Office has not sold its position, it will be subject to restriction on sale.

G . Conflicts of Interest. Executive hereby agrees to promptly disclose to the Governing Body any potential conflict of interest involving Executive, his Group or his Family Office or the Company upon Executive obtaining actual knowledge of such conflict or potential conflict.

H . Director's Fees and Other Sources of Compensation from the Company. All directors' and other fees payable to Executive after July 13, 2012 or equity incentives granted to Executive after July 13, 2012 by a portfolio company shall be transferred to the Company or its designee without any additional consideration therefor. Other than the compensation set forth in this Agreement, Executive will not accept any compensation, director fees, other fees or equity interests from the Company or any of its Subsidiaries.

I. Continuing Obligations to the Company and its Subsidiaries. Commencing on the Effective Date, Executive will cooperate in all reasonable respects with the Company and its Subsidiaries in connection with any and all existing or future litigation, actions or proceedings (whether civil, criminal, administrative, regulatory or otherwise) brought by or against the Company or any of its Affiliates, to the extent the Company reasonably deems Executive's cooperation necessary. Executive shall be reimbursed for all out-of-pocket expenses incurred by him as a result of such cooperation.

J . Acknowledgement. Executive agrees and acknowledges that each Restrictive Covenant herein is reasonable as to duration, terms and geographical area and that the same protects the legitimate interests of the Company and its Affiliates, imposes no undue hardship on Executive, is not injurious to the public, and that any violation of any of these Restrictive Covenants shall be specifically enforceable in any court with jurisdiction upon short notice. Executive agrees and acknowledges that a portion of the compensation paid to Executive under this Agreement to which this Exhibit A is attached will be paid in consideration of the covenants contained in this Exhibit A, the sufficiency of which consideration is hereby acknowledged. If any provision of this Exhibit A as applied to Executive or to any circumstance is adjudged by a court to be invalid or unenforceable, the same shall in no way affect any other circumstance or the validity or enforceability of any other provision of this Exhibit A. If the scope of any such provision, or any part thereof, is too broad to permit enforcement of such provision to its full extent, Executive agrees that the court making such

determination shall have the power to reduce the duration and/or area of such provision, and/or to delete specific words or phrases, to the extent necessary to permit enforcement, and, in its reduced form, such provision shall then be enforceable and shall be enforced. Executive agrees and acknowledges that the breach of this Exhibit A will cause irreparable injury to the Company and upon breach of any provision of this Exhibit A, the Company shall be entitled to injunctive relief, specific performance or other equitable relief; *provided*, *however*, that this shall in no way limit any other remedies which the Company may have (including, without limitation, the right to seek monetary damages). The Company shall not bring any claim or action for breach of any provision of this Exhibit A unless (i) it has provided written notice of such alleged claim and provided Executive with at least thirty (30) days to correct or cure the conduct in question and (ii) during such period, Executive has not corrected or cured such conduct. Each of the covenants in this Exhibit A shall be construed as an agreement independent of any other provisions in this Agreement to which it is attached, other than the consideration for such covenant provided in this Agreement.

Exhibit 10.13

APOLLO GLOBAL MANAGEMENT, LLC
EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT

THIS EMPLOYMENT, NON-COMPETITION AND NON-SOLICITATION AGREEMENT (this " **Agreement**") is made and entered into as of January 4, 2017 (the "**Effective Date**"), by and between Apollo Global Management, LLC, a Delaware limited liability company (the "**Company**"), and Joshua J. Harris ("**Executive**"). Where the context permits, references to the "Company" shall include the Company and any successor of the Company. Capitalized terms used herein that are not defined in the paragraph in which they first appear are defined in Section 5(b) or in the Agreement Among Principals.

WITNESSETH:

WHEREAS, the Company desires to secure the continued services of Executive for the benefit of the Company and its Affiliates (as defined below) from and after the Effective Date hereof; and

WHEREAS, Executive desires to continue to provide such services.

NOW, THEREFORE, in consideration of the mutual promises, covenants and agreements herein contained, together with other good and valuable consideration the receipt of which is hereby acknowledged, the parties hereto do hereby agree as follows:

1 . SERVICES AND DUTIES. From and after the Effective Date, Executive shall be employed by the Company in the capacity of its Senior Managing Director. Executive shall be a full-time employee of the Company and shall dedicate substantially all of Executive's working time to the Company and its Affiliates and shall have no other employment and no other business ventures which either are undisclosed to the Company or conflict with Executive's duties under this Agreement. Executive will perform such duties as are required by the Company from time to time and normally associated with Executive's position, together with such additional duties, commensurate with Executive's positions with the Company and with its Affiliates, as may be assigned to Executive from time to time by the Governing Body. The "**Governing Body**" means AGM Management, LLC for so long as it is designated as the principal governing body of the Company pursuant to the Shareholders Agreement and thereafter, the Board. Notwithstanding the foregoing, nothing herein shall prohibit Executive from (i) subject to prior approval of the Governing Body, accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates and does not involve a Competing Business (defined below), (ii) accepting directorships, roles equivalent to that of a non-executive chairman and roles that do not involve day-to-day operational involvement so long as in each case the role does not give rise to any conflicts of interest with the Company or its Affiliates or involve a Competing Business and so long as the role is at a company that is an investment made by the Executive or a member of his Group (as defined below) in accordance with the requirements of the Code of Ethics and Clause F in Exhibit A, (iii) being actively involved in personal investing through the Family Office or otherwise so long as such involvement is consistent with the requirements of the Code of Ethics and Clause F in Exhibit A, (iv) engaging and being actively involved in charitable, cultural, educational and civic activities, so long as such outside interests do not interfere with the performance of Executive's duties hereunder, or (v) engaging in a business of the Apollo Operating Group or a member or Subsidiary thereof or of any Person in which a member or Subsidiary of the Apollo Operating Group holds an Investment in each case on behalf of the Apollo Operating Group.

2. TERM. Executive's employment under the terms and conditions of this Agreement will commence on the Effective Date. The term of this Agreement (the "**Term**") shall commence on the Effective Date and end on the third anniversary thereof. If the Term expires and Executive is employed by the Company thereafter, unless a new employment agreement has been entered into, such employment shall be "at-will." Notwithstanding the foregoing provisions of this Section 2, Executive will have the right to voluntarily terminate his employment with the Company at any time, any such termination being effective on the date on which a written notice thereof is delivered to the Company pursuant to Section 8(a) hereof.

3. COMPENSATION.

(a) Base Salary. In consideration of Executive's full and faithful satisfaction of Executive's duties under this Agreement, the Company agrees to pay to Executive a salary in the amount of one hundred thousand dollars ($100,000.00) per annum (the "**Base Salary**"), payable in such installments as the Company pays its similarly placed employees (but not less frequently than each calendar month), subject to usual and customary deductions for withholding taxes and similar charges, and customary employee contributions to the health, welfare and retirement programs in which Executive is enrolled from time to time.

(b) Withholding. All taxable compensation payable to Executive pursuant to this Section 3 or otherwise pursuant to this Agreement shall be subject to customary deductions for withholding taxes and such other excise or employment taxes as are

required under Federal law or the applicable law of any state or governmental body to be collected with respect to compensation paid by the Company to an employee.

4. BENEFITS AND EXPENSE REIMBURSEMENT.

(a) Retirement and Welfare Benefits. During the Term, Executive will be entitled to all the usual benefits offered to employees at Executive's level, including sick time and participation in the Company's medical, dental and insurance programs, subject to the applicable limitations and requirements imposed by the terms of such benefit plans, in each case in accordance with the terms of such plans as in effect from time to time. Nothing in this Section 4, however, shall require the Company to maintain any benefit plan or provide any type or level of benefits to its employees, including Executive.

(b) Vacation/Paid Time Off. Executive will be entitled to vacation and paid time off ("**PTO**") each year on the most favorable basis afforded to any employee pursuant to the Company's policies as in effect from time to time.

(c) Reimbursement of Expenses. The Company shall reimburse Executive for any expenses reasonably incurred by Executive in furtherance of Executive's duties hereunder, including travel, meals and accommodations, upon submission by Executive of vouchers or receipts and in compliance with such rules and policies relating thereto as the Company may from time to time adopt.

5 . TERMINATION. Executive's employment shall be terminated at the earliest to occur of (i) the date on which the Governing Body delivers written notice that Executive is being terminated as a result of a Disability (as defined below), or (ii) the date of Executive's death. In addition, Executive's employment with the Company may be terminated (i) by the Company for Cause (as defined below), effective on the date on which a written notice to such effect is delivered to Executive; or (ii) by Executive at any time, effective on the date on which a written notice to such effect is delivered to the Company. For the avoidance of doubt, this Agreement does not address the consequences of termination of Executive's employment, if any, to the equity interests in the Company or its Affiliates held by Executive or members of his Group.

(a) Termination by the Company with Cause or by Reason of Death or Disability or a Termination by Executive. If Executive's employment with the Company is terminated by the Company with Cause or is terminated voluntarily by Executive or by reason of Executive's death or Disability, Executive shall not be entitled to any further compensation or benefits other than accrued but unpaid Base Salary (payable as provided in Section 3(a) hereof) and accrued and unused PTO pay through the date of such termination.

(b) Definitions. For purposes of this Agreement:

"**Affiliate**" means an affiliate of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

"**Agreement Among Principals**" means the Agreement Among Principals, by and among Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P., MJR Foundation LLC, MJH Partners, L.P., AP Professional Holdings, L.P. and BRH Holdings, L.P., as may be amended, modified, supplemented or restated from time to time.

"**Cause**" means (i) a final, non-appealable conviction of or plea of *nolo contendere* to a felony prohibiting Executive from continuing to provide services as an investment professional to the Company due to legal restriction or physical confinement; or (ii) ceasing to be eligible to continue performing services as an investment professional on behalf of the Company or any of its material Subsidiaries (as defined below), in each case, pursuant to a final, non-appealable legal restriction (such as a final, non-appealable injunction, but expressly excluding a preliminary injunction or other provisional restriction).

"**Covered Business**" has the meaning ascribed to it in the amended and restated exempted limited partnership agreement of BRH Holdings, L.P., a Cayman Islands exempted limited partnership.

"**Disability**" shall refer to any physical or mental incapacity which prevents Executive from carrying out all or substantially all of his duties under this Agreement for any period of one hundred eighty (180) consecutive days or any aggregate period of eight (8) months in any twelve-month (12) period, as determined, in its sole discretion, by a majority of the members of the Governing Body, including a majority of the Continuing Principals who are members of the Governing Body (but for the sake of clarity, not including the Executive in respect of which the determination is being made).

"**Family Office**" means the organization responsible for the day-to-day administration and management of the Executive's financial and personal affairs, which may include, but is not limited to, wealth management, oversight of investments, tax planning, estate planning and philanthropic endeavors, and includes any entity which holds the personal investments of the Executive.

"**Group**" shall mean with respect to Executive, Executive and (i) Executive's spouse, (ii) a lineal descendant of Executive's

parents, the spouse of any such descendant or a lineal descendent of any such spouse, (iii) a Charitable Institution solely controlled by Executive and other members of his Group, (iv) a trustee of a trust (whether *inter vivos* or testamentary), all of the current beneficiaries and presumptive remaindermen of which are one or more of Executive and Persons described in clauses (i) through (iii) of this definition, (v) a corporation, limited liability company or partnership, of which all or substantially all of the outstanding shares of capital stock or interests therein are owned by one or more of Executive and Persons described in clauses (i) through (iv) of this definition provided, that the equity not owned by Executive and Persons described in clauses (i) through (iv) of this definition is owned by current or former service providers of such corporation, limited liability company or partnership, (vi) an individual mandated under a qualified domestic relations order, or (vii) the executor, personal representative or administrator of the estate of such Executive or of the estate of any individual described in clauses (i), (ii) or (vi) above. For purposes of this definition, (x) "lineal descendants" shall not include individuals adopted after attaining the age of eighteen (18) years and such adopted individual's descendants; and (y) "presumptive remaindermen" shall refer to those Persons entitled to a share of a trust's assets if it were then to terminate. Executive shall never be a member of the Group of another Principal.

"**Manager**" means AGM Management, LLC, a Delaware limited liability company.

"**Shareholders Agreement**" means the Shareholders Agreement, dated as of July 13, 2007, by and among the Company, AP Professional Holdings, L.P., Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P. and MJR Foundation LLC.

"**Subsidiary**" means a subsidiary of the Company (or other referenced entity, as the case may be) as defined in Rule 405 promulgated under the Securities Act of 1933, as amended.

(c) Resignation as Officer or Director. Upon the termination of employment for any reason, Executive shall be deemed to have resigned each position (if any) that Executive then holds as an officer or director of the Company or any of its Subsidiaries or any Portfolio Company without any further act to be taken by Executive. Additionally, Executive shall execute and deliver to the Company promptly after the Company's written request, any request for a resignation in form and substance reasonably acceptable to Executive. For the sake of clarity, this provision shall not apply to any right Executive may have under the Agreement Among Principals to continue to serve as a member of the Executive Committee following Executive's retirement.

(d) Disability. The parties acknowledge that there may be a delay between the discovery of a condition that results in Executive's employment termination due to Disability, and the effective date of such termination. In such case, the Governing Body may temporarily appoint a Senior Professional to perform the functional responsibilities and duties of Executive until Disability definitively occurs or is determined not to have occurred; *provided*, *however*, (i) the Governing Body may so appoint a Senior Professional only if Executive is unable to perform his responsibilities and duties to the Company (or such successor thereto or such other entity controlled by the Company or its successor as may be Executive's employer at such time), or, as a matter of fiduciary duty, should be prohibited from performing his responsibilities and duties, and (ii) during such period Executive shall continue to serve on the Executive Committee unless otherwise prohibited from doing so pursuant to the Agreement Among Principals.

(e) Section 409A. To the extent required to avoid the imposition of tax under Section 409A of the Code ("**Section 409A**"), if Executive is a "specified employee" for purposes of Section 409A, amounts that would otherwise be payable under this Section 5 during the six-month (6) period immediately following the employment termination date shall instead be paid on the first (1st) business day after the date that is six (6) months following Executive's "separation from service" within the meaning of Section 409A, or, if earlier, the date of Executive's death.

6. RESTRICTIVE COVENANTS. The parties agree that the restrictive covenants set forth in Exhibit A hereto (the "**Restrictive Covenants**") are incorporated herein by reference and shall be deemed to be contained herein. Executive understands, acknowledges and agrees that the Restrictive Covenants apply (i) during his employment under this Agreement, during any period of employment by (x) the Company or (y) any Affiliate following the termination of this Agreement or the expiration of the Term, and (ii) as provided in Exhibit A hereto, during the periods specified following termination of his employment by the Company and by any Affiliate which may have employed him.

7. ASSIGNMENT. This Agreement, and all of the terms and conditions hereof, shall bind the Company and its successors and assigns and shall bind Executive and Executive's heirs, valid assigns, executors and administrators. No transfer or assignment of this Agreement shall release the Company from any obligation to Executive hereunder. Neither this Agreement, nor any of the Company's rights or obligations hereunder, may be assigned or are otherwise subject to hypothecation by Executive. The Company may assign the rights and obligations of the Company hereunder, in whole or in part, to any of the Company's Subsidiaries or Affiliates, or to any other successor or assign in connection with the sale of all or substantially all of the Company's assets or equity or in connection with any merger, acquisition and/or reorganization, provided the assignee assumes the obligations of the Company hereunder and provided further than any such assignment shall not release the Company from its obligations hereunder.

8. GENERAL.

(a) Notices. Any notices provided hereunder must be in writing and shall be deemed effective upon the earlier of one (1) business day following personal delivery (including personal delivery by e-mail or recognized overnight courier), or the third (3rd) business day after mailing by first class mail to the recipient at the address indicated below:

To the Company:

Apollo Global Management, LLC
9 West 57th Street
43rd Floor
New York, NY 10019
Attention: Chief Legal Officer

To Executive at the location set forth in the Company's records

or to such other address or to the attention of such other Person as the recipient party may have specified by prior written notice to the sending party.

(b) Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof. If any provision of this Agreement, or the application thereof to any Person or any circumstance, is found to be invalid or unenforceable in any jurisdiction, (a) a suitable and equitable provision shall be substituted therefor in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision and (b) the remainder of this Agreement and the application of such provision to other Persons or circumstances shall not be affected by such invalidity or unenforceability, nor shall such invalidity or unenforceability affect the validity or enforceability of such provision, or the application thereof, in any other jurisdiction.

(c) Entire Agreement. This document, together with its attached exhibits, constitutes the final, complete, and exclusive embodiment of the entire agreement and understanding between the parties related to the subject matter hereof and supersedes and preempts any prior or contemporaneous understandings, agreements, or representations by or between the parties, written or oral. Notwithstanding the immediately preceding sentence, this Agreement does not supersede or preempt the Shareholders Agreement, the Agreement Among Principals, the Exchange Agreement, the exempted limited partnership agreement of AP Professional Holdings, L.P., the exempted limited partnership agreement of BRH Holdings, L.P., or any other agreement to which Executive became a party in connection with the Company's initial public offering.

(d) Counterparts. This Agreement may be executed on separate counterparts, any one of which need not contain signatures of more than one party, but all of which taken together will constitute one and the same agreement.

(e) Amendments. No amendments or other modifications to this Agreement may be made except by a writing signed by each party hereto. No amendment or waiver of this Agreement requires the consent of any individual, partnership, corporation or other entity not a party to this Agreement.

(f) Survivorship. The provisions of this Agreement necessary to carry out the intention of the parties as expressed herein (including, without limitation, the Restrictive Covenants provided in Section 6 hereof and Exhibit A hereto) shall survive the termination or expiration of the Term.

(g) Waiver. The waiver by either party of the other party's prompt and complete performance, or breach or violation, of any provision of this Agreement shall not operate nor be construed as a waiver of any subsequent breach or violation, and the failure by any party hereto to exercise any right or remedy which it or he may possess hereunder shall not operate nor be construed as a bar to the exercise of such right or remedy by such party upon the occurrence of any subsequent breach or violation. No waiver shall be deemed to have occurred unless set forth in a writing executed by or on behalf of the waiving party. No such written waiver shall be deemed a continuing waiver unless specifically stated therein, and each such waiver shall operate only as to the specific term or condition waived and shall not constitute a waiver of such term or condition for the future or as to any act other than that specifically waived.

(h) Captions. The captions of this Agreement are for convenience and reference only and in no way define, describe, extend or limit the scope or intent of this Agreement or the intent of any provision hereof.

(i) Construction. The parties acknowledge that this Agreement is the result of arm's-length negotiations between sophisticated parties, each afforded representation by legal counsel. Each and every provision of this Agreement shall be construed as though both parties participated equally in the drafting of the same, and any rule of construction that a document shall be construed against the drafting party shall not be applicable to this Agreement.

(j) Arbitration.

(i) Except as contemplated in Section 8(k) hereof, the parties hereto agree that any dispute, controversy or claim arising out of or relating to this Agreement, whether based on contract, tort, statute, or other legal or equitable theory (including, without limitation, any claim of fraud, intentional misconduct, misrepresentation or fraudulent inducement or any question of validity or effect of this Agreement including this clause) or the breach or termination hereof (the "**Dispute**"), shall be resolved in binding arbitration in accordance with the following provisions:

A. Such Dispute shall be resolved by binding arbitration to be conducted before JAMS in accordance with the provisions of JAMS' Comprehensive Arbitration Rules and Procedures as in effect at the time of the arbitration.

B. The arbitration shall be held before a panel of three arbitrators appointed by JAMS, in accordance with its rules, who are not Affiliates of any party to such arbitration and do not have any actual or reasonable potential for bias or conflict of interest with respect to any of the parties hereto, directly or indirectly, by virtue of any direct or indirect financial interest, family relationship or close friendship.

C. Such arbitration shall be held at such place as the arbitrators appointed by JAMS may determine within the County, City and State of New York, or such other location to which the parties hereto may agree.

D. The arbitrators shall have the authority, taking into account the parties' desire that any arbitration proceeding hereunder be reasonably expedited and efficient, to permit the parties hereto to conduct discovery. Any such discovery shall be (i) guided generally by but be no broader than permitted under the United States Federal Rules of Civil Procedure (the "**FRCP**"), and (ii) subject to the arbitrators and the parties hereto entering into a mutually acceptable confidentiality agreement.

E. The arbitrators shall have the authority to issue subpoenas for the attendance of witnesses and for the production of records and other evidence in connection with discovery and/or at any hearing and may administer oaths. Any such subpoena must be served in the manner for service of subpoenas under the FRCP and enforced in the manner for enforcement of subpoenas under the FRCP.

F. The arbitrators' decision and award in any such arbitration shall be made by majority vote and delivered within thirty (30) calendar days of the conclusion of the evidentiary hearings unless otherwise agreed to by the parties hereto. In addition, the arbitrators shall have the authority to award injunctive relief to any of the parties.

G. The arbitrators' decision shall be in writing and shall be as brief as possible and will include the basis for the arbitrators' decision. A record of the arbitration proceeding shall be kept.

H. Judgment on the award rendered by the arbitrators may be entered in any court having jurisdiction thereof.

I. The parties shall share equally all expenses of JAMS (including those of the arbitrators) incurred in connection with any arbitration; provided, however, the arbitrators may award to the prevailing party in such arbitration its or his reasonable expenses incurred (including reasonable legal fees and expenses) and its or his share of JAMS expenses in connection with such arbitration.

J. The parties hereto agree to participate in any arbitration in good faith.

(ii) If JAMS is unable or unwilling to commence arbitration with regard to any such Dispute within thirty (30) calendar days after the parties have met the requirements for commencement as set forth in Rule 5 of the JAMS Comprehensive Arbitration Rules and Procedures, then the Disputes shall be resolved by binding arbitration, in accordance with the International Arbitration Rules of the American Arbitration Association (the " **AAA**"), before a panel of three arbitrators who shall be selected jointly by the parties involved in such Dispute, or if the parties cannot agree on the selection of the arbitrators, shall be selected by the AAA (provided that any arbitrators selected by the AAA shall meet the requirements of Section 8(j)(i)(B) above). Any such arbitration shall be subject to the provisions of Section 8(j)(i)(C) through 8(j)(i)(J) above (as if the AAA were JAMS). If the AAA is unable or unwilling to commence such arbitration within thirty (30) calendar days after the parties have met the requirements for such commencement set forth in the aforementioned rules, then either party may seek resolution of such Dispute through litigation in accordance with Sections 8(k) and 8(l).

(iii) Except as may be necessary to enter judgment upon the award or to the extent required by applicable law, all claims, defenses and proceedings (including, without limiting the generality of the foregoing, the existence of the controversy and the fact that there is an arbitration proceeding) shall be treated in a confidential manner by the arbitrators, the

parties and their counsel, and each of their agents, employees and all others acting on behalf of or in concert with them. Without limiting the generality of the foregoing, no one shall divulge to any Person not directly involved in the arbitration the contents of the pleadings, papers, orders, hearings, trials, or awards in the arbitration, except as may be necessary to enter judgment upon an award or as required by applicable law. Any court proceedings relating to the arbitration hereunder, including, without limiting the generality of the foregoing, to prevent or compel arbitration; discovery; enforcement of a subpoena; or to confirm, correct, vacate or otherwise enforce an arbitration award, shall be filed under seal with the court, to the extent permitted by law.

(k) Governing Law; Equitable Remedies. THIS AGREEMENT SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK (WITHOUT GIVING EFFECT TO CONFLICT OF LAWS PRINCIPLES THEREOF). The parties hereto agree that irreparable damage would occur in the event that any of the provisions of Section 6 or Exhibit A of this Agreement were not performed in accordance with its specific terms or was otherwise breached. It is accordingly agreed that the parties hereto shall be entitled to an injunction or injunctions and other equitable remedies to prevent breaches of Section 6 or Exhibit A of this Agreement and to enforce specifically the terms and provisions thereof in any of the Selected Courts (as defined below), this being in addition to any other remedy to which they are entitled at law or in equity. In such event, any requirements for the securing or posting of any bond with respect to such remedy are hereby waived by each of the parties hereto. Each party further agrees that, in the event of any action for an injunction or other equitable remedy in respect of such breach or enforcement of specific performance pursuant to this Section 8(k), it or he will not assert the defense that a remedy at law would be adequate.

(l) Consent to Jurisdiction. It is the desire and intent of the parties hereto that any disputes or controversies arising under or in connection with this Agreement be resolved pursuant to arbitration in accordance with Section 8(j); *provided*, *however*, that, to the extent that Section 8(j) is held to be invalid or unenforceable for any reason, and the result is that the parties hereto are precluded from resolving any claim arising under or in connection with this Agreement pursuant to the terms of Section 8(j) (after giving effect to the terms of Section 8(b)), the following provisions of this Section 8(l) shall govern the resolution of all disputes or controversies arising under this Agreement. With respect to any suit, action or proceeding ("**Proceeding**") arising out of or relating to this Agreement or any transaction contemplated hereby each of the parties hereto hereby irrevocably (i) submits to the exclusive jurisdiction of (A) the United States District Court for the Southern District of New York, or (B) in the event that such court lacks jurisdiction to hear the claim, the state courts of New York located in the borough of Manhattan, New York City (the "**Selected Courts**") and waives any objection to venue being laid in the Selected Courts whether based on the grounds of f*orum non conveniens* or otherwise and hereby agrees not to commence any such Proceeding other than before one of the Selected Courts; *provided*, *however*, that a party may commence any Proceeding in a court other than a Selected Court solely for the purpose of enforcing an order or judgment issued by one of the Selected Courts or the arbitrators; (ii) consents to service of process in any Proceeding by the mailing of copies thereof by registered or certified mail, postage prepaid, or by recognized international express carrier or delivery service, to their respective addresses referred to in Section 8(a) hereof; *provided*, *however*, that nothing herein shall affect the right of any party hereto to serve process in any other manner permitted by law; and (iii) TO THE EXTENT NOT PROHIBITED BY APPLICABLE LAW THAT CANNOT BE WAIVED, WAIVES, AND COVENANTS THAT IT OR HE WILL NOT ASSERT (WHETHER AS PLAINTIFF, DEFENDANT OR OTHERWISE) ANY RIGHT TO TRIAL BY JURY IN ANY ACTION ARISING IN WHOLE OR IN PART UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS, WHETHER NOW EXISTING OR HEREAFTER ARISING, AND WHETHER SOUNDING IN CONTRACT, TORT OR OTHERWISE, AND AGREES THAT ANY OF THEM MAY FILE A COPY OF THIS PARAGRAPH WITH ANY COURT AS WRITTEN EVIDENCE OF THE KNOWING, VOLUNTARY AND BARGAINED-FOR AGREEMENT AMONG THE PARTIES IRREVOCABLY TO WAIVE ITS OR HIS RIGHT TO TRIAL BY JURY IN ANY PROCEEDING WHATSOEVER BETWEEN THEM RELATING TO THIS AGREEMENT OR ANY OF THE CONTEMPLATED TRANSACTIONS AND WILL INSTEAD BE TRIED IN A COURT OF COMPETENT JURISDICTION BY A JUDGE SITTING WITHOUT A JURY.

(m) Third Party Beneficiaries. Except as expressly provided herein, nothing in this Agreement shall confer any rights or remedies upon any Person other than the parties hereto or any and all of Executive's heirs, successors, valid assigns, executors and administrators. In any provision of the Agreement which provides rights or remedies to, or permits the assignment of rights to, Affiliates or Subsidiaries of the Company, the terms "Affiliates" and "Subsidiaries" shall be construed to exclude any Fund or Portfolio Company.

(n) Indemnification.

(i) To the fullest extent permitted by law but subject to the limitations expressly provided in this Agreement, Executive and the Executive's Group (collectively, the "**Indemnified Parties**" and each individually an "**Indemnified Party**") shall be indemnified and held harmless by the Company and its direct and indirect consolidated Subsidiaries from and against any and all losses, claims, damages, liabilities, joint or several, expenses (including reasonable legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising from any and all threatened, pending or completed

third-party claims, demands, actions, suits or proceedings, whether civil, criminal, administrative or investigative, and whether formal or informal and including appeals, directly or indirectly, by reason of or arising from (A) Executive's actions or inactions in connection with the establishment, management, operations or serving on the board of any Covered Business, (B) Executive's actions or inactions with respect to his duties under this Agreement (including resulting from limitations on Executive's actions set forth in Exhibit A), and (C) Executive's actions or inactions with respect to any limited partnership agreement or similar governing document of any Covered Business or any member of the Apollo Operating Group or any direct or indirect Subsidiary, including, for the avoidance of doubt, to the extent related to any breach or alleged breach of this Agreement, any Fund Agreement or the AGM LLC Agreement, whether arising from acts or omissions to act as set forth in this section 8(n)(i) occurring before or after the Effective Date; *provided*, *however*, that the Indemnified Party shall not be indemnified and held harmless if there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter for which the Indemnified Party is seeking indemnification pursuant to this Section 8(n), Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Notwithstanding the preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party in connection with any action, suit or proceeding (or part thereof) commenced by an Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by such Indemnified Party was authorized by the Company in its sole discretion.

(ii) To the fullest extent permitted by law, expenses (including reasonable legal fees and expenses) incurred by an Indemnified Party in appearing at, participating in or defending any indemnifiable claim, demand, action, suit or proceeding pursuant to Section 8(n) shall be advanced by the Company on a monthly basis prior to a final and non-appealable determination that the Indemnified Party is not entitled to be indemnified upon receipt by the Company of an undertaking by or on behalf of an Indemnified Party to repay such amount if it ultimately shall be determined that the Indemnified Party is not entitled to be indemnified pursuant to this Section 8(n). Notwithstanding the immediately preceding sentence, except as otherwise provided in Section 8(n)(ix), the Company shall be required to indemnify an Indemnified Party pursuant to the immediately preceding sentence in connection with any action, suit or proceeding (or part thereof) commenced by such Indemnified Party only if the commencement of such action, suit or proceeding (or part thereof) by the Indemnified Party was authorized by the Company in its sole discretion.

(iii) The indemnification provided by this Section 8(n) shall be in addition to any other rights to which the Indemnified Parties may be entitled under any agreement, as a matter of law, in equity or otherwise, both as to actions in Executive's capacity as Executive and as to actions in any other capacity, and shall continue as to the Indemnified Parties if Executive has ceased to serve in such capacity.

(iv) Any indemnification pursuant to this Section 8(n) shall be made only out of the assets of the Company and/or its valid assignees. In no event may the Indemnified Parties subject the members of the Company to personal liability by reason of the indemnification provisions set forth in this Agreement.

(v) No Indemnified Party shall be denied indemnification in whole or in part under this Section 8(n) because such Indemnified Party had an interest in the transaction with respect to which the indemnification applies if the transaction was otherwise permitted by the terms of this Agreement, including, without limitation, Exhibit A, the Agreement Among Principals, the Limited Liability Company Agreement of the Company or the consent of the Governing Body.

(vi) The provisions of this Section 8(n) are for the benefit of the Indemnified Parties and their heirs, successors, valid assigns, executors and administrators and shall not be deemed to create any rights for the benefit of any other Persons.

(vii) Executive shall, in the performance of his duties, be fully protected in relying in good faith upon the records of the Company, its Affiliates and their respective direct or indirect Subsidiaries and on such information, opinions, reports or statements presented to any of the foregoing by any of the respective officers, directors or employees, or committees of the board, or by any other Person as to matters that Executive, as the case may be, reasonably believes are within such other Person's professional or expert competence.

(viii) No amendment, modification or repeal of this Section 8(n) or any provision hereof shall in any manner terminate, reduce or impair the right of the Indemnified Parties or any third party beneficiary to be indemnified by the Company, nor the obligations of the Company to indemnify the Indemnified Parties or any third party beneficiary under and in accordance with the provisions of this Section 8(n) as in effect immediately prior to such amendment, modification or repeal

with respect to claims arising from or relating to matters occurring, in whole or-in part, prior to such amendment, modification or repeal, regardless of when such claims may arise or be asserted.

(ix) If a claim for indemnification (following the final disposition of the action, suit or proceeding for which indemnification is being sought) or advancement of expenses under this Section 8(n) is not paid in full within thirty (30) days after a written claim therefor by an Indemnified Party or any third party beneficiary has been received by the Company, such Indemnified Party or such third party beneficiary, as the case may be, may file suit to recover the unpaid amount of such claim and, if successful in whole or in part, shall be entitled to be paid the expenses of prosecuting such claim, including reasonable attorneys' fees.

(o) Liability of Indemnified Persons. Notwithstanding anything to the contrary herein, no Indemnified Party shall be liable to the Company or any other Persons who have acquired interests in the Company's securities, for any losses, claims, damages, liabilities, joint or several, expenses (including legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts arising as a result of any act or omission of Executive, or for any breach of contract (including breach of this Agreement) or any breach of duties (including breach of fiduciary duties) whether arising hereunder, at law, in equity or otherwise, unless there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that, in respect of the matter in question, Executive acted in bad faith or engaged in actual fraud or willful misconduct. For purposes of clarification, because a conveyance may be allegedly or actually void or voidable or deemed "fraudulent" pursuant to the provisions of Title 11 of the U.S. Code or any similar State or foreign statute does not render an Executive's conduct with respect to the conveyance non-indemnifiable, and an Indemnified Party will be entitled to indemnification with respect to such conveyances unless the Executive "acted in bad faith or engaged in actual fraud or willful misconduct" as provided for herein. Any amendment, modification or repeal of this Section 8(o) or any provision hereof shall be prospective only and shall not in any way affect the limitations on the liability of an Indemnified Party under this Section 8(o) as in effect immediately prior to such amendment, modification or repeal with respect to claims arising from or relating to matters occurring, in whole or in part, prior to such amendment, modification or repeal, regardless of when such claims may arise or be asserted.

(p) Legal Fees. The Company shall pay or reimburse Executive for all reasonable and documented legal fees and costs incurred by him in connection with the drafting and negotiation of this Agreement and any other agreement or policies directly or indirectly related to Executive's employment arrangement and his rights under Exhibit A.

[Signature page follows]

IN WITNESS WHEREOF AND INTENDING TO BE LEGALLY BOUND THEREBY, the parties hereto have executed and delivered this Agreement as of the year and date first above written.

Exhibit A

Restrictive Covenants

Executive understands, acknowledges and agrees that, by virtue of his equity interest in the Company and/or its Affiliates, his previous services to the Company and its Affiliates, and his employment by the Company pursuant to this Agreement, directly or indirectly, he acquired, had access to, or was otherwise exposed to, and shall acquire, have access to or be otherwise exposed to confidential information of the Company and its Affiliates (the Confidential Information, as defined below) and he has met and developed relationships with, and will meet and develop relationships with, the Company's potential and existing financing sources, capital market intermediaries, investors, employees and consultants.

The Company and its Affiliates are engaged throughout the United States and the world in the business of raising, managing, investing the assets of and making investments in private equity funds, hedge funds, publicly traded alternative investment vehicles and other alternative asset investment vehicles (the "**Business**"). Executive acknowledges that (i) the Business is global in nature and Executive is among the limited number of individuals leading the Business, (ii) the Restrictive Covenants set forth in this Exhibit A are an essential part of this Agreement, (iii) he has been fully advised by counsel in connection with the negotiation of this Agreement and the Restrictive Covenants, (iv) he is familiar with the laws which govern the enforceability of restrictive covenants in the jurisdictions where the Business is carried on, and agrees that these Restrictive Covenants, including, without limitation, the non-competition covenant, are reasonable, valid and enforceable in the context of this Agreement, and (v) compliance with the Restrictive Covenants, including, without limitation, the non-competition covenant, will not create any hardship for Executive as he has independent means and sufficient income to be fully self-supporting without competing with the Company in the Business or violating any of the Restrictive Covenants.

A . Non-competition. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period (as defined below), Executive shall not, directly or indirectly, either as a principal, agent, employee, employer, consultant, partner, member, shareholder of a closely held corporation or shareholder in excess of three percent (3%) of a publicly traded corporation, corporate officer or director, or in any other individual or representative capacity, engage or otherwise participate in any manner or fashion in any business that is a Competing Business (as defined below), either in the United States or in any other place in the world where the Company or any of its Affiliates, successors or assigns engages in the Business. Notwithstanding anything to the contrary contained in this Clause A of this Exhibit A, (i) activities permitted by clause 1 (Services and Duties) of the Employment, Non-Competition and Non-Solicitation Agreement and (ii) investments described in Clause F of this Exhibit A, are permitted.

Solely for purposes of this Exhibit A: "**Competing Business**" means any alternative asset management business (other than the Business of the Company, its successors or assigns or Affiliates) Primarily for Third Party capital that advises, manages or invests the assets of and/or makes investments in private equity funds, hedge funds, collateralized debt obligation funds, business development corporations, special purpose acquisition companies or other alternative asset investment vehicles, or the Persons who manage, advise or own such investment vehicles. "**Primarily**" means with respect to more than fifty percent (50%) of the capital in question. "**Third Party**" means a Person other than Executive or any member of Executive's Group. "**Restricted Period**" means, the period commencing on the date hereof and terminating one (1) year following Executive's termination of employment.

B. Non-solicitation of Employees, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, (i) solicit or induce any officer, director, employee, agent or consultant of the Company or any of its successors, assigns or Affiliates to terminate his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates for the purpose of associating with any Competing Business, or otherwise encourage any such Person to leave or sever his, her or its employment or other relationship with the Company or its successors, assigns or Affiliates, for any other reason, or (ii) hire any such individual who, at the time of hire, Executive knows left the employ of the Company or any of its Affiliates during the immediately preceding twelve (12) months. This provision shall not prohibit Executive from soliciting or hiring the Persons serving as his personal assistant or assistants at or prior to the time of his departure. For purposes of these Clauses B and C of this Exhibit A, "Affiliates" shall not include any Portfolio Company.

C . Non-solicitation of Investors, Etc. Executive agrees that during the period of his employment with the Company (or any Affiliate) and during the Restricted Period, Executive shall not, directly or indirectly, solicit or induce any investors, financing sources or capital market intermediaries of the Company or its successors, assigns or Affiliates to terminate (or diminish in any respect) his, her or its relationship with the Company or its successors, assigns or Affiliates. Nothing in this paragraph applies to those investors, financing sources, or capital market intermediaries who did not conduct business with the Company, or its successors, assigns or Affiliates during Executive's employment with, or the period in which Executive held, directly or indirectly, an ownership interest in, the Company or any Affiliate.

D . Confidentiality. Executive agrees to be bound by Section 5.8 ("**Confidential Information**") of the Agreement Among Principals.

E . Disparaging Comments. Executive agrees that he shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages, either professionally or personally, the Company or any of its Affiliates, past and present, and each of them, as well as its and their trustees, directors, officers, members, managers, partners, agents, attorneys, insurers, employees, stockholders, representatives, assigns, and successors, past and present, and each of them. The Company agrees that it shall not, and it shall ensure that its Continuing Principals shall not, directly or indirectly, make or ratify any statement, public or private, oral or written, to any Person that disparages Executive, either professionally or personally. The obligations under this paragraph shall not apply to (i) disclosures compelled by applicable law or order of any court or (ii) any statements or disclosures reasonably necessary to be made directly in connection with any legal proceeding, arbitration or investigation, whether or not compelled (but subject to any confidentiality agreements or orders that may govern such proceeding, arbitration or investigation).

F. Code of Ethics, Family Offices and Personal Investing.

(1) In no event shall Executive make, or assist a member of his Group in making, any investment that violates or conflicts with the Company's then-current code of ethics (the "**Code of Ethics**") or any trading policies of the Company (it being understood that the terms and restrictions of any such policy may be more restrictive than required by applicable law). The Company will notify Executive promptly of any changes to the Code of Ethics or to any of its trading policies. As required by the Code of Ethics, all statements of holdings by the Family Office shall be provided to the Company compliance department ("**Company Compliance**") and all trades by the Family Office that are required to be pre-cleared under the Code of Ethics will be pre-cleared by Company Compliance, except as noted below.

(2) Transactions in the following by the Family Office shall be considered "fully-managed accounts" for purposes of Section 8.2.2 of the Code of Ethics (or any successor section) provided that a certificate is delivered to the Company's Chief Compliance Officer (the "**CCO**") on a quarterly basis from the relevant portfolio manager or the Chief Executive Officer, as applicable (the "Portfolio Manager") of Executive's Family Office and Executive stating that Executive continues to have no investment control, influence or discretion over such investments:

- Bank loans; and
- Equity securities of publicly traded companies with a market capitalization of more than $100 million and less than $10 billion so long as the investment will not result in the Family Office owning more than 3% of the outstanding publicly traded securities of any issuer.

Although the foregoing shall be considered "fully-managed accounts" under the Code of Ethics and thus do not require pre-clearance, the Executive shall nonetheless cause his Family Office to pre-clear with Company Compliance all transactions in equity securities in publicly traded companies with a market capitalization of more than $100 million and less than $10 billion (but not bank loans) to ensure that the Company is not in possession of material non-public information ("**MNPI**") concerning the issuer of the securities.

(3) The provision contained in Section 8.3 of the Code of Ethics which requires Company Compliance to consider whether a "transaction would usurp an opportunity that properly belongs to the Company's clients" is considered satisfied with respect to any investment (including anticipated follow-on investments) that is below the threshold size listed in the attached Schedule I for the type of investment listed (because these investments do not usurp the Company's client opportunities). For avoidance of doubt, such transactions would remain subject to pre-clearance by Company Compliance for MNPI or conflicts purposes.

(4) Investments in the following categories are unlikely to usurp an opportunity that properly belongs to the Company's clients and therefore, Company Compliance will endeavor to expedite any pre-clearance request with respect to these investments:

- Investments in sports teams, leagues or organizations (because these investments are not considered appropriate investments for the Company's clients); and

- Private investments that were introduced to the Family Office by persons other than Executive or sourced by the Family Office and not Executive so long as the Portfolio Manager of Executive's Family Office and Executive deliver a certificate in the form attached as Schedule 2 to the Company's CCO prior to making such investment stating that such investment was introduced to the Family Office by persons other than Executive or sourced by employees or other service providers of the Family Office and not Executive, that Executive was not aware of such investment prior to the Family Office being introduced to or sourcing such investment and that neither the Company nor its employees (including Executive) participated in sourcing such investment. For the avoidance of doubt, once the Family Office is introduced to or sources the investment, Executive may be involved in analyzing the investment and participating in the decision as to whether the Family Office should make such investment.

For the avoidance of doubt, the other factors to be considered in a pre-clearance decision (i.e., the restricted list, MNPI, etc.) remain applicable to the investments listed above in this paragraph F(4).

(5) Any request for pre-clearance to Company Compliance shall include information about anticipated follow-on investments with respect to the investment. If a follow-on investment is pre-cleared at the time of the original investment it shall not require another pre-clearance at the time of actual investment (although sales of such investment may be required to be pre-cleared as provided in the Code of Ethics). If a follow-on investment was not anticipated at the time of the original investment, Executive or his Family Office shall certify that such subsequent funding is required to protect the value of the existing investment and was not contemplated and pre-cleared at the time of the initial investment.

(6) As required by the Code of Ethics, when requesting pre-clearance, Executive's Family Office shall provide sufficient information such that the Company can make a decision but such Family Office will not be obligated to create an investment memorandum solely for pre-clearance purposes.

(7) Where possible, responses to pre-clearance requests shall be granted to Executive's Family Office within 48 hours of the request.

(8) Before agreeing to receive MNPI with respect to an investment, Company Compliance shall check its most recent statement of the Family Office's holdings, and if the receipt of the MNPI could cause the Family Office to restrict its investment, Company Compliance, if practicable, will provide notice to the Family Office that the Company may receive MNPI so that the Family Office has an opportunity to exit the position before the MNPI is received. If the Family Office chooses to exit the position, the Family Office shall request pre-clearance from Company Compliance and Company Compliance may or may not grant approval. Once Company Compliance has completed its internal decision-making about whether to accept MNPI (normally approximately 48 hours later) the Company shall notify the Family Office of its decision, and if the Family Office has not sold its position, it will be subject to restriction on sale.

G . Conflicts of Interest. Executive hereby agrees to promptly disclose to the Governing Body any potential conflict of interest involving Executive, his Group or his Family Office or the Company upon Executive obtaining actual knowledge of such conflict or potential conflict.

H . Director's Fees and Other Sources of Compensation from the Company. All directors' and other fees payable to Executive after July 13, 2012 or equity incentives granted to Executive after July 13, 2012 by a portfolio company shall be transferred to the Company or its designee without any additional consideration therefor. Other than the compensation set forth in this Agreement, Executive will not accept any compensation, director fees, other fees or equity interests from the Company or any of its Subsidiaries.

I. Continuing Obligations to the Company and its Subsidiaries. Commencing on the Effective Date, Executive will cooperate in all reasonable respects with the Company and its Subsidiaries in connection with any and all existing or future litigation, actions or proceedings (whether civil, criminal, administrative, regulatory or otherwise) brought by or against the Company or any of its Affiliates, to the extent the Company reasonably deems Executive's cooperation necessary. Executive shall be reimbursed for all out-of-pocket expenses incurred by him as a result of such cooperation.

J . Acknowledgement. Executive agrees and acknowledges that each Restrictive Covenant herein is reasonable as to duration, terms and geographical area and that the same protects the legitimate interests of the Company and its Affiliates, imposes no undue hardship on Executive, is not injurious to the public, and that any violation of any of these Restrictive Covenants shall be specifically enforceable in any court with jurisdiction upon short notice. Executive agrees and acknowledges that a portion of the compensation paid to Executive under this Agreement to which this Exhibit A is attached will be paid in consideration of the covenants contained in this Exhibit A, the sufficiency of which consideration is hereby acknowledged. If any provision of this Exhibit A as applied to Executive or to any circumstance is adjudged by a court to be invalid or unenforceable, the same shall in no way affect any other circumstance or the validity or enforceability of any other provision of this Exhibit A. If the scope of any such provision, or any part thereof, is too broad to permit enforcement of such provision to its full extent, Executive agrees that the court making such

determination shall have the power to reduce the duration and/or area of such provision, and/or to delete specific words or phrases, to the extent necessary to permit enforcement, and, in its reduced form, such provision shall then be enforceable and shall be enforced. Executive agrees and acknowledges that the breach of this Exhibit A will cause irreparable injury to the Company and upon breach of any provision of this Exhibit A, the Company shall be entitled to injunctive relief, specific performance or other equitable relief; *provided*, *however*, that this shall in no way limit any other remedies which the Company may have (including, without limitation, the right to seek monetary damages). The Company shall not bring any claim or action for breach of any provision of this Exhibit A unless (i) it has provided written notice of such alleged claim and provided Executive with at least thirty (30) days to correct or cure the conduct in question and (ii) during such period, Executive has not corrected or cured such conduct. Each of the covenants in this Exhibit A shall be construed as an agreement independent of any other provisions in this Agreement to which it is attached, other than the consideration for such covenant provided in this Agreement.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in the following Registration Statements of our report, dated February 13, 2017, relating to the consolidated financial statements of Apollo Global Management, LLC and subsidiaries (the "Company"), and the effectiveness of the Company's internal control over financial reporting, appearing in this Annual Report on Form 10-K of the Company for the year ended December 31, 2016:

- Registration Statement No. 333-211226 on Form S-3ASR
- Registration Statement No. 333-211225 on Form S-3ASR
- Registration Statement No. 333-188417 on Form S-3ASR
- Registration Statement No. 333-211227 on Form S-8

/s/ Deloitte & Touche LLP
New York, New York
February 13, 2017

Exhibit 31.1

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, Leon Black, certify that:

1. I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2016 of Apollo Global Management, LLC;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;

4. The Registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and

5. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.

Date: February 13, 2017

Exhibit 31.2

CHIEF FINANCIAL OFFICER CERTIFICATION

I, Martin Kelly, certify that:

1. I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2016 of Apollo Global Management, LLC
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
4. The Registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
5. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.

Exhibit 32.1

Certification of the Chief Executive Officer
Pursuant to 18 U.S.C. Section 1350,
As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

In connection with the Annual Report of Apollo Global Management, LLC (the "Company") on Form 10-K for the year ended December 31, 2016 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Leon Black, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to my knowledge:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: February 13, 2017

Forward-Looking Statements

This quarterly report may contain forward-looking statements that are within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements include, but are not limited to, discussions related to Apollo's expectations regarding the performance of its business, liquidity and capital resources and the other non-historical statements in the discussion and analysis. These forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. When used in this quarterly report, the words "believe," "anticipate," "estimate," "expect," "intend" and similar expressions are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. These statements are subject to certain risks, uncertainties and assumptions, including risks relating to our dependence on certain key personnel, our ability to raise new private equity, credit or real assets funds, market conditions generally, our ability to manage our growth, fund performance, changes in our regulatory environment and tax status, the variability of our revenues, net income and cash flow, our use of leverage to finance our businesses and investments by our funds and litigation risks, among others. We believe these factors include but are not limited to those described under the section entitled "Risk Factors" in the Company's
Annual Report on Form 10-K filed with the United States Securities and Exchange Commission (the "SEC") on February 13, 2017 (the "2016 Annual Report"); as such factors may be updated from time to time in our periodic filings with the SEC, which are accessible on the SEC's website at www.sec.gov. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this report and in our other filings. We undertake no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law.

Terms Used in This Report

In this quarterly report, references to "Apollo," "we," "us," "our" and the "Company" refer collectively to Apollo Global Management, LLC, a Delaware limited liability company, and its subsidiaries, including the Apollo Operating Group and all of its subsidiaries, or as the context may otherwise require;

"AMH" refers to Apollo Management Holdings, L.P., a Delaware limited partnership, that is an indirect subsidiary of Apollo Global Management, LLC;

"Apollo funds", "our funds" and references to the "funds" we manage, refer to the funds (including the parallel funds and alternative investment vehicles of such funds), partnerships, accounts, including strategic investment accounts or "SIAs," alternative asset companies and other entities for which subsidiaries of the Apollo Operating Group provide investment management or advisory services;

"Apollo Operating Group" refers to (i) the limited partnerships through which our Managing Partners currently operate our businesses and (ii) one or more limited partnerships formed for the purpose of, among other activities, holding certain of our gains or losses on our principal investments in the funds, which we refer to as our "principal investments";

"Assets Under Management", or "AUM", refers to the assets of the funds, partnerships and accounts to which we provide investment management, advisory, or certain other investment-related services, including, without limitation, capital that such funds, partnerships and accounts have the right to call from investors pursuant to capital commitments. Our AUM equals the sum of:

(i) the fair value of the investments of the private equity funds, partnerships and accounts we manage or advise plus the capital that such funds, partnerships and accounts are entitled to call from investors pursuant to capital commitments;

(ii) the net asset value, or "NAV," of the credit funds, partnerships and accounts for which we provide investment management or advisory services, other than certain collateralized loan obligations ("CLOs") and collateralized debt obligations ("CDOs"), which have a fee-generating basis other than the mark-to-market value of the underlying assets, plus used or available leverage and/or capital commitments;

(iii) the gross asset value or net asset value of the real assets funds, partnerships and accounts we manage, and the structured portfolio company investments of the funds, partnerships and accounts we manage or advise, which includes the leverage used by such structured portfolio company investments;

(iv) the incremental value associated with the reinsurance investments of the portfolio company assets we manage or advise; and

(v) the fair value of any other assets that we manage or advise for the funds, partnerships and accounts to which we provide investment management, advisory, or certain other investment-related services, plus unused credit facilities, including capital commitments to such funds, partnerships and accounts for investments that may require pre-qualification or other conditions before investment plus any other capital commitments to such funds, partnerships and accounts available for investment that are not otherwise included in the clauses above.

Our AUM measure includes Assets Under Management for which we charge either nominal or zero fees. Our AUM measure also includes assets for which we do not have investment discretion, including certain assets for which we earn only investment-related service fees, rather than management or advisory fees. Our definition of AUM is not based on any definition of Assets Under Management contained in our operating agreement or in any of our Apollo fund management agreements. We consider multiple factors for determining what should be included in our definition of AUM. Such factors include but are not limited to (1) our ability to influence the investment decisions for existing and available assets; (2) our ability to generate income from the underlying assets in our funds; and (3) the AUM measures that we use internally or believe are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers, our calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers. Our calculation also differs from the manner in which our affiliates registered with the SEC report "Regulatory Assets Under Management" on Form ADV and Form PF in various ways;

"Fee-Generating AUM" consists of assets of the funds, partnerships and accounts to which we provide investment management, advisory, or certain other investment-related services and on which we earn management fees, monitoring fees or other investment-related fees pursuant to management or other fee agreements on a basis that varies among the Apollo funds, partnerships and accounts. Management fees are normally based on "net asset value," "gross assets," "adjusted par asset value," "adjusted cost of all unrealized portfolio investments," "capital commitments," "adjusted assets," "stockholders' equity," "invested capital" or "capital contributions," each as defined in the applicable management agreement. Monitoring fees, also referred to as advisory fees, with respect to the structured portfolio company investments of the funds, partnerships and accounts we manage or advise, are generally based on the total value of such structured portfolio company investments, which normally includes leverage, less any portion of such total value that is already considered in Fee-Generating AUM;

"Non-Fee-Generating AUM" refers to AUM that does not produce management fees or monitoring fees. This measure generally includes the following:

(i) fair value above invested capital for those funds that earn management fees based on invested capital;

(ii) net asset values related to general partner and co-investment interests;

(iii) unused credit facilities;

(iv) available commitments on those funds that generate management fees on invested capital;

(v) structured portfolio company investments that do not generate monitoring fees; and

(vi) the difference between gross asset and net asset value for those funds that earn management fees based on net asset value.

"Carry-Eligible AUM" refers to the AUM that may eventually produce carried interest income. All funds for which we are entitled to receive a carried interest income allocation are included in Carry-Eligible AUM, which consists of the following:

(i) "Carry-Generating AUM", which refers to invested capital of the funds, partnerships and accounts we manage, advise, or to which we provide certain other investment-related services, that is currently above its hurdle rate or preferred return, and profit of such funds, partnerships and accounts is being allocated to the general partner in accordance with the applicable limited partnership agreements or other governing agreements;

(ii) "AUM Not Currently Generating Carry", which refers to invested capital of the funds, partnerships and accounts we manage, advise, or to which we provide certain other investment-related services, that is currently below its hurdle rate or preferred return; and

(iii) “Uninvested Carry-Eligible AUM”, which refers to capital of the funds, partnerships and accounts we manage, advise, or to which we provide certain other investment-related services, that is available for investment or reinvestment subject to the provisions of applicable limited partnership agreements or other governing agreements, which capital is not currently part of the NAV or fair value of investments that may eventually produce carried interest income allocable to the general partner.

“AUM with Future Management Fee Potential” refers to the committed uninvested capital portion of total AUM not currently earning management fees. The amount depends on the specific terms and conditions of each fund;

We use AUM as a performance measure of our funds’ investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs. Non-Fee-Generating AUM includes assets on which we could earn carried interest income;

“Advisory” refers to certain assets advised by Apollo Asset Management Europe PC LLP, a wholly-owned subsidiary of Apollo Asset Management Europe LLP (collectively, “AAME”). The AAME entities are subsidiaries of Apollo. Until AAME receives full authorization by the UK Financial Conduct Authority (“FCA”), references to AAME in this report mean AAME and Apollo Management International LLP, an existing FCA authorized and regulated subsidiary of Apollo in the United Kingdom;

“capital deployed” or “deployment” is the aggregate amount of capital that has been invested during a given period (which may, in certain cases, include leverage) by (i) our drawdown funds, (ii) SIAs that have a defined maturity date and (iii) funds and SIAs in our real assets debt strategy;

“carried interest”, “carried interest income” and “incentive income” refer to interests granted to Apollo by an Apollo fund that entitle Apollo to receive allocations, distributions or fees which are based on the performance of such fund or its underlying investments;

“Contributing Partners” refer to those of our partners and their related parties (other than our Managing Partners) who indirectly beneficially own (through Holdings) Apollo Operating Group units;

“drawdown” refers to commitment-based funds and certain SIAs in which investors make a commitment to provide capital at the formation of such funds and SIAs and deliver capital when called as investment opportunities become available. It includes assets of Athene Holding Ltd. (“Athene Holding”) and its subsidiaries (collectively “Athene”) managed by Athene Asset Management, L.P. (“Athene Asset Management” or “AAM”) that are invested in commitment-based funds;

“gross IRR” of a private equity fund represents the cumulative investment-related cash flows (i) for a given investment for the fund or funds which made such investment, and (ii) for a given fund, in the relevant fund itself (and not any one investor in the fund), in each case, on the basis of the actual timing of investment inflows and outflows (for unrealized investments assuming disposition on September 30, 2017 or other date specified) aggregated on a gross basis quarterly, and the return is annualized and compounded before management fees, carried interest and certain other fund expenses (including interest incurred by the fund itself) and measures the returns on the fund’s investments as a whole without regard to whether all of the returns would, if distributed, be payable to the fund’s investors. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor;

“gross IRR” of a credit fund represents the annualized return of a fund based on the actual timing of all cumulative fund cash flows before management fees, carried interest income allocated to the general partner and certain other fund expenses. Calculations may include certain investors that do not pay fees. The terminal value is the net asset value as of the reporting date. Non-U.S. dollar denominated (“USD”) fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor;

“gross IRR” of a real assets fund represents the cumulative investment-related cash flows in the fund itself (and not any one investor in the fund), on the basis of the actual timing of cash inflows and outflows (for unrealized investments assuming disposition on September 30, 2017 or other date specified) starting on the date that each investment closes, and the return is annualized and compounded before management fees, carried interest, and certain other fund expenses (including interest incurred by the fund itself) and measures the returns on the fund’s investments as a whole without regard to whether all of the returns would, if distributed, be payable to the fund’s investors. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor;

"gross return" of a credit or real assets fund is the monthly or quarterly time-weighted return that is equal to the percentage change in the value of a fund's portfolio, adjusted for all contributions and withdrawals (cash flows) before the effects of management fees, incentive fees allocated to the general partner, or other fees and expenses. Returns of Athene sub-advised portfolios and CLOs represent the gross returns on invested assets, which exclude cash. Returns over multiple periods are calculated by geometrically linking each period's return over time;

"Holdings" means AP Professional Holdings, L.P., a Cayman Islands exempted limited partnership through which our Managing Partners and Contributing Partners indirectly beneficially own their interests in the Apollo Operating Group units;

"inflows" represents (i) at the individual segment level, subscriptions, commitments, and other increases in available capital, such as acquisitions or leverage, net of inter-segment transfers, and (ii) on an aggregate basis, the sum of inflows across the private equity, credit and real assets segments;

"liquid/performing" includes CLOs and other performing credit vehicles, hedge fund style credit funds, structured credit funds and SIAs, as well as sub-advised managed accounts owned by or related to Athene. Certain commitment-based SIAs are included as the underlying assets are liquid;

"Managing Partners" refer to Messrs. Leon Black, Joshua Harris and Marc Rowan collectively and, when used in reference to holdings of interests in Apollo or Holdings, includes certain related parties of such individuals;

"net IRR" of a private equity fund means the gross IRR applicable to a fund, including returns for related parties which may not pay fees or carried interest, net of management fees, certain fund expenses (including interest incurred or earned by the fund itself) and realized carried interest all offset to the extent of interest income, and measures returns at the fund level on amounts that, if distributed, would be paid to investors of the fund. To the extent that a fund exceeds all requirements detailed within the applicable fund agreement, the estimated unrealized value is adjusted such that a percentage of up to 20.0% of the unrealized gain is allocated to the general partner of such fund, thereby reducing the balance attributable to fund investors. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor;

"net IRR" of a credit fund represents the annualized return of a fund after management fees, carried interest income allocated to the general partner and certain other fund expenses, calculated on investors that pay such fees. The terminal value is the net asset value as of the reporting date. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor;

"net IRR" of a real assets fund represents the cumulative cash flows in the fund (and not any one investor in the fund), on the basis of the actual timing of cash inflows received from and outflows paid to investors of the fund (assuming the ending net asset value as of September 30, 2017 or other date specified is paid to investors), excluding certain non-fee and non-carry bearing parties, and the return is annualized and compounded after management fees, carried interest, and certain other expenses (including interest incurred by the fund itself) and measures the returns to investors of the fund as a whole. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor;

"net return" of a credit or real assets fund represents the gross return after management fees, incentive fees allocated to the general partner, or other fees and expenses. Returns of Athene sub-advised portfolios and CLOs represent the gross or net returns on invested assets, which exclude cash. Returns over multiple periods are calculated by geometrically linking each period's return over time;

"our manager" means AGM Management, LLC, a Delaware limited liability company that is controlled by our Managing Partners;

"permanent capital vehicles" refers to (a) assets that are owned by or related to Athene ("ATH") or AGER Bermuda Holding Ltd. ("AGER"), (b) assets that are owned by or related to MidCap FinCo Designated Activity Company ("MidCap") and managed by Apollo, (c) assets of publicly traded vehicles managed by Apollo such as Apollo Investment Corporation ("AINV"), Apollo Commercial Real Estate Finance, Inc. ("ARI"), Apollo Tactical Income Fund Inc. ("AIF"), and Apollo Senior Floating Rate Fund Inc. ("AFT"), in each case that do not have redemption provisions or a requirement to return capital to investors upon exiting the investments made with such capital, except as required by applicable law and (d) a non-traded business development company from which Apollo earns certain investment-related service fees. The investment management agreements of AINV, AIF and AFT have one year terms, are reviewed annually and remain in effect only if approved by the boards of directors of such companies or by the affirmative vote of the holders of a majority of the outstanding voting shares of such companies, including in either case, approval by a majority of the directors who are not "interested persons" as defined in the Investment Company Act of 1940. In

addition, the investment management agreements of AINV, AIF and AFT may be terminated in certain circumstances upon 60 days' written notice. The investment management agreement of ARI has a one year term and is reviewed annually by ARI's board of directors and may be terminated under certain circumstances by an affirmative vote of at least two-thirds of ARI's independent directors. The investment management or advisory arrangements between MidCap and Apollo and Athene and Apollo, may also be terminated under certain circumstances. The agreement pursuant to which Apollo earns certain investment-related service fees from a non-traded business development company may be terminated under certain limited circumstances;

"private equity fund appreciation (depreciation)" refers to gain (loss) and income for the traditional private equity funds (as defined below), Apollo Natural Resources Partners, L.P. ("ANRP I"), Apollo Natural Resources Partners II, L.P. ("ANRP II"), Apollo Special Situations Fund, L.P. and AION Capital Partners Limited ("AION") for the periods presented on a total return basis before giving effect to fees and expenses. The performance percentage is determined by dividing (a) the change in the fair value of investments over the period presented, minus the change in invested capital over the period presented, plus the realized value for the period presented, by (b) the beginning unrealized value for the period presented plus the change in invested capital for the period presented. Returns over multiple periods are calculated by geometrically linking each period's return over time;

"private equity investments" refer to (i) direct or indirect investments in existing and future private equity funds managed or sponsored by Apollo, (ii) direct or indirect co-investments with existing and future private equity funds managed or sponsored by Apollo, (iii) direct or indirect investments in securities which are not immediately capable of resale in a public market that Apollo identifies but does not pursue through its private equity funds, and (iv) investments of the type described in (i) through (iii) above made by Apollo funds;

"Realized Value" refers to all cash investment proceeds received by the relevant Apollo fund, including interest and dividends, but does not give effect to management fees, expenses, incentive compensation or carried interest to be paid by such Apollo fund;

"Remaining Cost" represents the initial investment of the fund in a portfolio investment, reduced for any return of capital distributed to date on such portfolio investment;

"Strategic Investor" refers to the California Public Employees' Retirement System, or "CalPERS";

"Total Invested Capital" refers to the aggregate cash invested by the relevant Apollo fund and includes capitalized costs relating to investment activities, if any, but does not give effect to cash pending investment or available for reserves;

"Total Value" represents the sum of the total Realized Value and Unrealized Value of investments;

"traditional private equity funds" refers to Apollo Investment Fund I, L.P. ("Fund I"), AIF II, L.P. ("Fund II"), a mirrored investment account established to mirror Fund I and Fund II for investments in debt securities ("MIA"), Apollo Investment Fund III, L.P. (together with its parallel funds, "Fund III"), Apollo Investment Fund IV, L.P. (together with its parallel fund, "Fund IV"), Apollo Investment Fund V, L.P. (together with its parallel funds and alternative investment vehicles, "Fund V"), Apollo Investment Fund VI, L.P. (together with its parallel funds and alternative investment vehicles, "Fund VI"), Apollo Investment Fund VII, L.P. (together with its parallel funds and alternative investment vehicles, "Fund VII"), Apollo Investment Fund VIII, L.P. (together with its parallel funds and alternative investment vehicles, "Fund VIII") and Apollo Investment Fund IX, L.P. (together with its parallel funds and alternative investment vehicles, "Fund IX");

"Unrealized Value" refers to the fair value consistent with valuations determined in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"), for investments not yet realized and may include pay in kind, accrued interest and dividends receivable, if any. In addition, amounts include committed and funded amounts for certain investments; and

"Vintage Year" refers to the year in which a fund's final capital raise occurred, or, for certain funds, the year in which a fund's investment period commences as per its governing agreements.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

1. ORGANIZATION

Apollo Global Management, LLC ("AGM", together with its consolidated subsidiaries, the "Company" or "Apollo") is a global alternative investment manager whose predecessor was founded in 1990. Its primary business is to raise, invest and manage private equity, credit and real assets funds as well as strategic investment accounts, on behalf of pension, endowment and sovereign wealth funds, as well as other institutional and individual investors. For these investment management services, Apollo receives management fees generally related to the amount of assets managed, transaction and advisory fees and carried interest income related to the performance of the respective funds that it manages. Apollo has three primary business segments:

- ***Private equity***-primarily invests in control equity and related debt instruments, convertible securities and distressed debt investments;
- ***Credit***-primarily invests in non-control corporate and structured debt instruments including performing, stressed and distressed investments across the capital structure; and
- ***Real assets***-primarily invests in real estate equity for the acquisition and recapitalization of real estate assets, portfolios, platforms and operating companies, and real estate debt including first mortgage and mezzanine loans, preferred equity and commercial mortgage backed securities.

Organization of the Company

The Company was formed as a Delaware limited liability company on July 3, 2007 and completed a reorganization of its predecessor businesses on July 13, 2007 (the "2007 Reorganization"). The Company is managed and operated by its manager, AGM Management, LLC, which in turn is indirectly wholly-owned and controlled by Leon Black, Joshua Harris and Marc Rowan, its Managing Partners.

As of September 30, 2017, the Company owned, through six intermediate holding companies that include APO Corp., a Delaware corporation that is a domestic corporation for U.S. federal income tax purposes, APO Asset Co., LLC, a Delaware limited liability company that is a disregarded entity for U.S. federal income tax purposes, APO (FC), LLC, an Anguilla limited liability company that is treated as a corporation for U.S. federal income tax purposes, APO (FC II), LLC, an Anguilla limited liability company that is treated as a corporation for U.S. federal income tax purposes, APO UK (FC), Limited, a United Kingdom incorporated company that is treated as a corporation for U.S. federal income tax purposes, and APO (FC III), LLC, a Cayman Islands limited liability company (collectively, the "Intermediate Holding Companies"), 48.1% of the economic interests of, and operated and controlled all of the businesses and affairs of, the Apollo Operating Group through its wholly-owned subsidiaries.

AP Professional Holdings, L.P., a Cayman Islands exempted limited partnership ("Holdings"), is the entity through which the Managing Partners and certain of the Company's other partners (the "Contributing Partners") indirectly beneficially own interests in each of the partnerships that comprise the Apollo Operating Group ("AOG Units"). As of September 30, 2017, Holdings owned the remaining 51.9% of the economic interests in the Apollo Operating Group. The Company consolidates the financial results of the Apollo Operating Group and its consolidated subsidiaries. Holdings' ownership interest in the Apollo Operating Group is reflected as a Non-Controlling Interest in the accompanying condensed consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements are prepared in accordance with U.S. GAAP for interim financial information and instructions to the Quarterly Report on Form 10-Q. The condensed consolidated financial statements and these notes are unaudited and exclude some of the disclosures required in annual financial statements. Management believes it has made all necessary adjustments (consisting only of normal recurring items) so that the condensed consolidated financial statements are presented fairly and that estimates made in preparing its condensed consolidated financial statements are reasonable and prudent. The operating results presented for interim periods are not necessarily indicative of the results that may be expected for any other interim period or for the entire year. These condensed consolidated financial statements should be read in conjunction with the annual financial statements included in the 2016 Annual Report.

The condensed consolidated financial statements include the accounts of the Company, its wholly-owned or majority-owned subsidiaries, the consolidated entities which are considered to be variable interest entities ("VIEs") and for which the

Company is considered the primary beneficiary, and certain entities which are not considered VIEs but which the Company controls through a majority voting interest.

Intercompany accounts and transactions, if any, have been eliminated upon consolidation.

Certain reclassifications, when applicable, have been made to the prior period's condensed consolidated financial statements and notes to conform to the current period's presentation and are disclosed accordingly.

Consolidation

The types of entities with which Apollo is involved generally include subsidiaries (e.g., general partners and management companies related to the funds the Company manages), entities that have all the attributes of an investment company (e.g., funds) and securitization vehicles (e.g., CLOs). Each of these entities is assessed for consolidation on a case by case basis depending on the specific facts and circumstances surrounding that entity.

Pursuant to the consolidation guidance, the Company first evaluates whether it holds a variable interest in an entity. Fees that are customary and commensurate with the level of services provided, and where the Company does not hold other economic interests in the entity that would absorb more than an insignificant amount of the expected losses or returns of the entity, would not be considered a variable interest. Apollo factors in all economic interests including proportionate interests through related parties, to determine if such interests are considered a variable interest. As Apollo's interests in many of these entities are solely through market rate fees and/or insignificant indirect interests through related parties, Apollo is not considered to have a variable interest in many of these entities and no further consolidation analysis is performed. For entities where the Company has determined that it does hold a variable interest, the Company performs an assessment to determine whether each of those entities qualify as a VIE.

The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and therefore certain of Apollo's funds may qualify as VIEs under the variable interest model whereas others may qualify as voting interest entities ("VOEs") under the voting interest model. The granting of substantive kick-out rights is a key consideration in determining whether a limited partnership or similar entity is a VIE and whether or not that entity should be consolidated.

Under the variable interest model, Apollo consolidates those entities where it is determined that the Company is the primary beneficiary of the entity. The Company is determined to be the primary beneficiary when it has a controlling financial interest in the VIE, which is defined as possessing both (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes initially involved with the VIE and reconsiders that conclusion continuously. Investments and redemptions (either by Apollo, related parties of Apollo or third parties) or amendments to the governing documents of the respective entity may affect an entity's status as a VIE or the determination of the primary beneficiary.

Assets and liabilities of the consolidated VIEs are primarily shown in separate sections within the condensed consolidated statements of financial condition. Changes in the fair value of the consolidated VIEs' assets and liabilities and related interest, dividend and other income and expenses are presented within net gains from investment activities of consolidated variable interest entities in the condensed consolidated statements of operations. The portion attributable to Non-Controlling Interests is reported within net income attributable to Non-Controlling Interests in the condensed consolidated statements of operations. For additional disclosures regarding VIEs, see note 4.

Under the voting interest model, Apollo consolidates those entities it controls through a majority voting interest. Apollo does not consolidate those VOEs in which substantive kick-out rights have been granted to the unrelated investors to either dissolve the fund or remove the general partner.

Fair Value of Financial Instruments

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions.

Except for the Company's debt obligations (as described in note 9), Apollo's financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value. See "Investments, at Fair Value" below. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the

time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Financial instruments' carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings.

Fair Value Hierarchy

U.S. GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of market price observability used in measuring financial instruments at fair value. Market price observability is affected by a number of factors, including the type of financial instrument, the characteristics specific to the financial instrument and the state of the marketplace, including the existence and transparency of transactions between market participants. Financial instruments with readily available quoted prices in active markets generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Financial instruments measured and reported at fair value are classified and disclosed based on the observability of inputs used in the determination of fair values, as follows:

Level I - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The types of financial instruments included in Level I include listed equities and debt. The Company does not adjust the quoted price for these financial instruments, even in situations where the Company holds a large position and the sale of such position would likely deviate from the quoted price.

Level II - Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Financial instruments that are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives where the fair value is based on observable inputs. These financial instruments exhibit higher levels of liquid market observability as compared to Level III financial instruments.

Level III - Pricing inputs are unobservable for the financial instrument and includes situations where there is little observable market activity for the financial instrument. The inputs into the determination of fair value may require significant management judgment or estimation. Financial instruments that are included in this category generally include general and limited partner interests in corporate private equity and real assets funds, opportunistic credit funds, distressed debt and non-investment grade residual interests in securitizations and CDOs and CLOs where the fair value is based on observable inputs as well as unobservable inputs.

When a security is valued based on broker quotes, the Company subjects those quotes to various criteria in making the determination as to whether a particular financial instrument would qualify for classification as Level II or Level III. These criteria include, but are not limited to, the number and quality of the broker quotes, the standard deviations of the observed broker quotes, and the percentage deviation from independent pricing services.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument when the fair value is based on unobservable inputs.

Transfers between levels of the fair value hierarchy are recognized as of the end of the reporting period.

Private Equity Investments

The value of liquid investments in Apollo's private equity funds, where the primary market is an exchange (whether foreign or domestic) is determined using period end market prices. Such prices are generally based on the close price on the date of determination.

Valuation approaches used to estimate the fair value of investments in Apollo's private equity funds that are less liquid include the market approach and the income approach. The market approach provides an indication of fair value based on a comparison of the subject company to comparable publicly traded companies and transactions in the industry. The market approach is driven more by current market conditions, including actual trading levels of similar companies and, to the extent available, actual

transaction data of similar companies. Judgment is required by management when assessing which companies are similar to the subject company being valued. Consideration may also be given to such factors as the Company's historical and projected financial data, valuations given to comparable companies, the size and scope of the Company's operations, the Company's strengths, weaknesses, expectations relating to the market's receptivity to an offering of the Company's securities, applicable restrictions on transfer, industry and market information and assumptions, general economic and market conditions and other factors deemed relevant. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology in the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are assumptions of expected results, the determination of a terminal value and a calculated discount rate.

Credit Investments

The majority of investments in Apollo's credit funds are valued based on quoted market prices and valuation models. Quoted market prices are valued based on the average of the "bid" and the "ask" quotes provided by multiple brokers wherever possible without any adjustments. Apollo will designate certain brokers to use to value specific securities. In order to determine the designated brokers, Apollo considers the following: (i) brokers with which Apollo has previously transacted, (ii) the underwriter of the security and (iii) active brokers indicating executable quotes. In addition, when valuing a security based on broker quotes wherever possible Apollo tests the standard deviation amongst the quotes received and the variance between the concluded fair value and the value provided by a pricing service. When broker quotes are not available Apollo considers the use of pricing service quotes or other sources to mark a position. When relying on a pricing service as a primary source, Apollo (i) analyzes how the price has moved over the measurement period, (ii) reviews the number of brokers included in the pricing service's population and (iii) validates the valuation levels with Apollo's pricing team and traders.

Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing a model based approach to determine fair value. Valuation approaches used to estimate the fair value of illiquid credit investments also may include the market approach and the income approach, as previously described above. The valuation approaches used consider, as applicable, market risks, credit risks, counterparty risks and foreign currency risks.

Real Assets Investments

The estimated fair value of commercial mortgage-backed securities ("CMBS") in Apollo's real assets funds is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Additionally, the loans held-for-investment are stated at the principal amount outstanding, net of deferred loan fees and costs for certain investments. The loans in Apollo's real assets funds are evaluated for possible impairment on a quarterly basis. For Apollo's real assets funds, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

Certain of the private equity, credit, and real assets funds may also enter into foreign currency exchange contracts, total return swap contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized. Realized gains or losses are recognized when contracts are settled. Total return swap and credit default swap contracts are recorded at fair value as an asset or liability with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the total return or credit default swap contract and the original contract price. Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers.

Valuation Process

On a quarterly basis, Apollo utilizes valuation committees consisting of members from senior management, to review and approve the valuation results related to the investments of the funds it manages. For certain publicly traded vehicles managed by the Company, a review is performed by an independent board of directors. The Company also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management

identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. The Company performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analyses. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Financial Instruments held by Consolidated VIEs

The Company measures both the financial assets and financial liabilities of the consolidated CLOs in its condensed consolidated financial statements using the fair value of the financial assets of the consolidated CLOs, which are more observable than the fair value of the financial liabilities of the consolidated CLOs. As a result, the financial assets of the consolidated CLOs are measured at fair value and the financial liabilities are measured in consolidation as: (i) the sum of the fair value of the financial assets and the carrying value of any non-financial assets that are incidental to the operations of the CLOs less (ii) the sum of the fair value of any beneficial interests retained by the Company (other than those that represent compensation for services) and the Company's carrying value of any beneficial interests that represent compensation for services. The resulting amount is allocated to the individual financial liabilities (other than the beneficial interest retained by the Company) using a reasonable and consistent methodology. Under the measurement alternative, net income (loss) attributable to Apollo Global Management, LLC reflects the Company's own economic interests in the consolidated CLOs including (i) changes in the fair value of the beneficial interests retained by the Company and (ii) beneficial interests that represent compensation for collateral management services.

The consolidated VIEs hold investments that could be traded over-the-counter. Investments in securities that are traded on a securities exchange or comparable over-the-counter quotation systems are valued based on the last reported sale price at that date. If no sales of such investments are reported on such date, and in the case of over-the-counter securities or other investments for which the last sale date is not available, valuations are based on independent market quotations obtained from market participants, recognized pricing services or other sources deemed relevant, and the prices are based on the average of the "bid" and "ask" prices, or at ascertainable prices at the close of business on such day. Market quotations are generally based on valuation pricing models or market transactions of similar securities adjusted for security-specific factors such as relative capital structure priority and interest and yield risks, among other factors. When market quotations are not available, a model based approach is used to determine fair value.

As previously noted, the Company measures the debt obligations of the consolidated CLOs on the basis of the fair value of the financial assets of the consolidated CLOs.

Fair Value Option

Apollo has elected the fair value option for the Company's investment in Athene Holding, the assets and liabilities of certain of its consolidated VIEs (including CLOs), the Company's U.S. Treasury securities with original maturities greater than three months when purchased, and certain of the Company's other investments. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by the consolidated VIEs that otherwise would not have been carried at fair value. See notes 3, 4, and 5 for further disclosure on the investments in Athene Holding and financial instruments of the consolidated VIEs and other investments for which the fair value option has been elected.

Cash and Cash Equivalents

Apollo considers all highly liquid short-term investments with original maturities of three months or less when purchased to be cash equivalents. Cash and cash equivalents include money market funds and U.S. treasury securities with original maturities of three months or less when purchased. Interest income from cash and cash equivalents is recorded in interest income in the condensed consolidated statements of operations. The carrying values of the money market funds and U.S. treasury securities of $428.1 million as of September 30, 2017, which approximate their fair values due to their short-term nature and are categorized as Level I within the fair value hierarchy. Substantially all of the Company's cash on deposit is in interest bearing accounts with major financial institutions and exceed insured limits.

U.S. Treasury securities, at fair value

U.S. Treasury securities, at fair value includes U.S. Treasury bills with original maturities greater than three months when purchased. These securities are recorded at fair value. Interest income on such securities is separately presented from the overall change in fair value and is recognized in interest income in the condensed consolidated statements of operations. Any

remaining change in fair value of such securities, that is not recognized as interest income, is recognized in net gains from investment activities in the condensed consolidated statements of operations.

Investments, at Fair Value

Investments, at fair value represent investments of the consolidated funds, investments of the consolidated VIEs and certain financial instruments for which the fair value option has been elected.

The unrealized gains and losses resulting from changes in the fair value of the consolidated VIEs are reflected as net gains from investment activities of consolidated variable interest entities in the condensed consolidated statements of operations.

Net gains from investment activities in the condensed consolidated statements of operations include both realized gains and losses and the change in unrealized gains and losses in the Company's investments, at fair value between the opening reporting date and the closing reporting date.

Equity Method Investments

For investments in entities over which the Company exercises significant influence but which do not meet the requirements for consolidation and for which the Company has not elected the fair value option, the Company uses the equity method of accounting, whereby the Company records its share of the underlying income or loss of such entities. The Company's share of the underlying net income or loss of such entities is recorded in income from equity method investments in the condensed consolidated statements of operations. The carrying amounts of equity method investments are recorded in investments in the condensed consolidated statements of financial condition. As the underlying entities that the Company manages and invests in are, for U.S. GAAP purposes, primarily investment companies which reflect their investments at estimated fair value, the carrying value of the Company's equity method investments in such entities approximates fair value.

Revenues

Revenues are reported in three separate categories that include (i) advisory and transaction fees from related parties, net, which relate to the investments of the funds the Company manages and may include individual monitoring agreements the Company has with the portfolio companies and debt investment vehicles of the private equity funds and credit funds it manages; (ii) management fees from related parties, which are based on committed capital, invested capital, net asset value, gross assets or as otherwise defined in the respective agreements; and (iii) carried interest income from related parties, which is normally based on the performance of the funds the Company manages that are subject to preferred return.

Management Fees from Related Parties-Management fees for private equity, credit, and real assets funds are recognized in the period during which the related services are performed in accordance with the contractual terms of the related agreement, and are generally based upon (1) a percentage of the capital committed during the commitment period, and thereafter based on the remaining invested capital of unrealized investments, or (2) net asset value, gross assets or as otherwise defined in the respective agreements. Included in management fees are certain expense reimbursements where the Company is considered the principal under the agreements and is required to record the expense and related reimbursement revenue on a gross basis.

Advisory and Transaction Fees from Related Parties, Net-Advisory and transaction fees, including directors' fees, are recognized when the underlying services rendered are substantially completed in accordance with the terms of the transaction and advisory agreements. Additionally, during the normal course of business, the Company incurs certain costs related to certain transactions that are not consummated ("broken deal costs"). These costs (e.g., research costs, due diligence costs, professional fees, legal fees and other related items) are determined to be broken deal costs upon management's decision to no longer pursue the transaction. In accordance with the related fund agreement, in the event the deal is deemed broken, all of the costs are reimbursed by the funds and then included as a component of the calculation of the Management Fee Offset (described below). If a deal is successfully completed, Apollo is reimbursed by the fund or fund's portfolio company for all costs incurred and no offset is generated. As the Company acts as an agent for the funds it manages, any transaction costs incurred and paid by the Company on behalf of the respective funds relating to successful or broken deals are recorded net on the Company's condensed consolidated statements of operations, and any receivable from the respective funds is recorded in due from related parties on the condensed consolidated statements of financial condition.

Advisory and transaction fees from related parties, net, also includes underwriting fees. Underwriting fees include gains, losses and fees, net of syndicate expenses, arising from securities offerings in which one of the Company's subsidiaries participates in the underwriter syndicate. Underwriting fees are recognized at the time the underwriting is completed and the

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

income is reasonably assured and are included in the condensed consolidated statements of operations. Underwriting fees recognized but not received are recorded in other assets on the condensed consolidated statements of financial condition.

As a result of providing advisory services to certain private equity and credit portfolio companies, Apollo is generally entitled to receive fees for transactions related to the acquisition, in certain cases, and disposition of portfolio companies as well as ongoing monitoring of portfolio company operations and directors' fees. The amounts due from portfolio companies are recorded in due from related parties, which is discussed further in note 13. Under the terms of the limited partnership agreements for certain funds, the management fee payable by the funds may be subject to a reduction based on a certain percentage of such advisory and transaction fees, net of applicable broken deal costs ("Management Fee Offset"). Advisory and transaction fees from related parties are presented net of the Management Fee Offset in the condensed consolidated statements of operations.

Carried Interest Income from Related Parties-Apollo is entitled to an incentive return that can normally amount to as much as 20% of the total returns on a fund's capital, depending upon performance. Performance fees are assessed as a percentage of the investment performance of the funds. The carried interest income from related parties for any period is based upon an assumed liquidation of the fund's net assets on the reporting date, and distribution of the net proceeds in accordance with the fund's income allocation provisions. Carried interest receivable is presented separately in the condensed consolidated statements of financial condition. The carried interest income from related parties may be subject to reversal to the extent that the carried interest income recorded exceeds the amount due to the general partner based on a fund's cumulative investment returns. When applicable, the accrual for potential repayment of previously received carried interest income, which is a component of due to related parties, represents all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner obligation, however, would not become payable or realized until the end of a fund's life.

Carried interest income from related parties also includes a quarterly performance fee on the pre-incentive fee net investment income ("AINV Part I Fees") of AINV. For purposes of the AINV Part I Fees, the net investment income of AINV includes interest income, dividend income and certain other income but excludes any realized and unrealized capital gains or losses. Such AINV Part I Fees are paid quarterly and are not subject to repayment.

Deferred Revenue-Apollo earns management fees subject to the Management Fee Offset (described above). When advisory and transaction fees are earned by the management company, the Management Fee Offset reduces the management fee obligation of the fund. When the Company receives cash for advisory and transaction fees, a certain percentage of such advisory and/or transaction fees, as applicable, is allocated as a credit to reduce future management fees, otherwise payable by such fund. Such credit is recorded as deferred revenue in the condensed consolidated statements of financial condition. A portion of any excess advisory and transaction fees may be required to be returned to the limited partners of certain funds upon such fund's liquidation. As the management fees earned by the Company are presented on a gross basis, any Management Fee Offsets calculated are presented as a reduction to advisory and transaction fees from related parties in the condensed consolidated statements of operations.

Additionally, Apollo earns advisory fees pursuant to the terms of the advisory agreements with certain of the portfolio companies that are owned by the funds Apollo manages. When Apollo receives a payment from a portfolio company that exceeds the advisory fees earned at that point in time, the excess payment is recorded as deferred revenue in the condensed consolidated statements of financial condition. The advisory agreements with the portfolio companies vary in duration and the associated fees are received monthly, quarterly or annually. Deferred revenue is reversed and recognized as revenue over the period that the agreed upon services are performed.

Under the terms of the funds' partnership agreements, Apollo is normally required to bear organizational expenses over a set dollar amount and placement fees or costs in connection with the offering and sale of interests in the funds it manages to investors. The placement fees are payable to placement agents, who are independent third parties that assist in identifying potential investors, securing commitments to invest from such potential investors, preparing or revising offering and marketing materials, developing strategies for attempting to secure investments by potential investors and/or providing feedback and insight regarding issues and concerns of potential investors, when a limited partner either commits or funds a commitment to a fund. In certain instances the placement fees are paid over a period of time. Based on the management agreements with the funds, Apollo considers placement fees and organizational costs paid in determining if cash has been received in excess of the management fees earned. Placement fees and organizational costs are normally the obligation of Apollo but can be paid for by the funds. When these costs are paid by the fund, the resulting obligations are included within deferred revenue. The deferred revenue balance will also be reduced during future periods when management fees are earned but not paid.

Compensation and Benefits

401(k) Savings Plan

The Company sponsors a 401(k) savings plan (the "401(k) Plan") whereby U.S.-based employees are entitled to participate in the 401(k) Plan based upon satisfying certain eligibility requirements. Effective January 1, 2017, the Company matches 50% of eligible annual employee contributions up to 3% of the eligible employees' annual compensation. Matching contributions vest after three years of service.

Profit Sharing

Profit sharing expense and profit sharing payable primarily consist of a portion of carried interest earned from certain funds that is allocated to employees, former employees and Contributing Partners. Profit sharing amounts are recognized on an accrued basis as the related carried interest income is earned. Accordingly, profit sharing amounts can be reversed during periods when there is a decline in carried interest income that was previously recognized.

Profit sharing amounts are generally not paid until the related carried interest is distributed to the general partner upon realization of the fund's investments. Under certain profit sharing arrangements, a portion of the carried interest distributed to the general partner is allocated by issuance of restricted shares, rather than cash to employees. Prior to distribution of the carried interest to the general partner, the Company records the value of the restricted shares expected to be granted in other assets and other liabilities within the condensed consolidated statements of financial condition. Upon distribution of the carried interest to the general partner, the general partner expects to purchase the Class A restricted shares on behalf of employees and simultaneously grant those shares to the employee. Such shares are recorded as equity-based compensation expense over the relevant service period.

Additionally, profit sharing amounts previously distributed may be subject to clawback from employees, former employees and Contributing Partners. When applicable, the accrual for potential clawback of previously distributed profit sharing amounts, which is a component of due from related parties on the condensed consolidated statements of financial condition, represents all amounts previously distributed to employees, former employees and Contributing Partners that would need to be returned to the general partner if the Apollo funds were to be liquidated based on the fair value of the underlying funds' investments as of the reporting date. The actual general partner receivable, however, would not become realized until the end of a fund's life.

Profit sharing payable also includes contingent consideration obligations that were recognized in connection with certain Apollo acquisitions. Changes in the fair value of the contingent consideration obligations are reflected in the Company's condensed consolidated statements of operations as profit sharing expense.

The Company has a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company. This arrangement enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying condensed consolidated financial statements.

General, Administrative and Other

General, administrative and other primarily includes professional fees, occupancy, depreciation and amortization, travel, information technology, and administration expenses. For the three and nine months ended September 30, 2016, the presentation of professional fees, occupancy, and depreciation and amortization was combined with general, administrative and other on the condensed consolidated statements of operations to conform to the current presentation.

Use of Estimates

The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated financial statements, the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Apollo's most significant estimates include goodwill, intangible assets, income taxes, carried interest income from related parties, contingent consideration obligation related to an acquisition, non-cash compensation, and fair value of investments and debt. Actual results could differ materially from those estimates.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued guidance to establish a comprehensive and converged standard on revenue recognition to enable financial statement users to better understand and consistently analyze an entity's revenue across industries, transactions, and geographies. The new guidance requires that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services (i.e., the transaction price). When determining the transaction price under the new guidance, an entity may include variable consideration only to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized would not occur when the uncertainty associated with the variable consideration is resolved. The new guidance also requires improved disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. The new guidance will apply to all entities. In August 2015, the FASB issued its final standard formally amending the effective date of the new revenue recognition guidance. The amended guidance defers the effective date of the new guidance to interim reporting periods within annual reporting periods beginning after December 15, 2017.

Upon adoption, the guidance currently applied by the Company in which it recognizes carried interest income on an assumed liquidation basis at each reporting date will no longer be permitted. The Company expects the recognition of carried interest income from incentive fees, which are a form of variable consideration, to be deferred until such fees are probable to not be significantly reversed. Incentive fees are carried interest income that is not a capital allocation to the general partner or investment manager.

Carried interest income that is a capital allocation to the general partner or investment manager, represents the remaining portion of carried interest income on the Company's consolidated statements of operations. The determination of which carried interests are considered capital allocations is primarily based on the terms of the agreement. In connection with the adoption of the new revenue guidance, the Company will apply a new accounting policy for its carried interest income that is a capital allocation. The Company intends to account for such carried interest income as a financial instrument under the equity method of accounting. The pattern and amount of recognition under the new policy is not expected to differ materially from the Company's existing recognition for such fees. Such carried interest income will be reported as a separate line item within revenue (i.e., separate from incentive fees). As capital allocation related carried interest income and the related general partner investment are considered to be a single unit of account under the Company's new accounting policy, the equity method income associated with the general partner interests will be combined with the associated carried interest income and reported within revenue.

The Company is currently in the process of implementing the new revenue guidance and is continuing to evaluate the effect this guidance will have on other revenue streams, including management fees and advisory and transaction fees, as well as any principal versus agent considerations for reporting revenue gross versus net. The Company will adopt the new revenue recognition guidance effective January 1, 2018.

In February 2016, the FASB issued guidance that amends the accounting for leases. The amended guidance requires recognition of a lease asset and a lease liability by lessees for leases classified as operating leases. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from existing guidance and accounting applied by a lessor is largely unchanged from existing guidance. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2018. Early application is permitted for all entities.

The Company expects its total assets and total liabilities on its condensed consolidated statements of financial condition to increase upon adoption of this guidance as a result of recording a lease asset and lease liability related to our operating leases. The Company is continuing to evaluate the impact that this guidance will have on its condensed consolidated financial statements. The Company expects to adopt the new leasing guidance on January 1, 2019.

In March 2016, the FASB issued amended guidance on stock compensation. The amendments are intended to simplify several aspects of the accounting for share-based payment transactions, including the accounting for excess tax benefits, forfeitures, and cash flows. The amended guidance requires that all excess tax benefits and deficiencies related to share-based payment transactions be recognized through the income tax provision (benefit) in the condensed consolidated statement of operations. Further, the amended guidance permits an entity to make an accounting policy election either to estimate the number of forfeitures expected to occur or to account for forfeitures when they occur. The amended guidance also requires excess tax benefits related to share-based payment transactions to be presented as operating activities and employee taxes paid to be presented as financing activities in the condensed consolidated statement of cash flows. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2016. The Company adopted the guidance during the first quarter of 2017.

Amendments relating to the recognition of excess tax benefits in the condensed consolidated statements of operations and impacts to the condensed consolidated statements of cash flows have been applied prospectively, with the exception of a $22.9 million cumulative effect adjustment, as of January 1, 2017, to deferred tax assets with a corresponding decrease to accumulated deficit relating to previously unrecognized excess tax benefits.

For forfeitures, the Company made an accounting policy election to no longer estimate forfeitures in determining the number of equity-based awards that are expected to vest. Under the Company's new policy, forfeitures are accounted for when they occur. Any adjustments have been reflected prospectively as of January 1, 2017.

In August 2016, the FASB issued guidance intended to reduce diversity in practice in how certain cash receipts and payments are classified in the statements of cash flows. The guidance is effective for interim and annual periods beginning after December 15, 2017. The Company early adopted the guidance during the first quarter of 2017. Adoption of this guidance did not have an impact on the Company's condensed consolidated financial statements.

In October 2016, the FASB issued guidance that amends the consolidation guidance issued in February 2015. Under the amended guidance a decision maker will need to consider only its proportionate indirect interest in a VIE that is held through a related party under common control. Under the originally issued guidance, a decision maker treats the interest of the related party under common control in the VIE as if the decision maker held the interest itself. The amended guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2016. The Company adopted the guidance during the first quarter of 2017. Adoption of this guidance did not have an impact on the Company's condensed consolidated financial statements.

In November 2016, the FASB issued guidance to reduce diversity in practice in the classification and presentation of changes in restricted cash on the statements of cash flows. The new guidance requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash. Entities will also be required to reconcile such total to amounts on the Company's condensed consolidated statements of financial condition and disclose the nature of the restrictions. The guidance is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The Company is in the process of evaluating the impact that this guidance will have on its condensed consolidated financial statements.

3. INVESTMENTS

The following table represents Apollo's investments:

	As of September 30, 2017	As of December 31, 2016
Investments, at fair value	$ 852,350	$ 708,080
Equity method investments	855,714	786,664
Total Investments	$ 1,708,064	$ 1,494,744

Investments, at Fair Value

Investments, at fair value, consist of investments for which the fair value option has been elected and include the Company's investment in Athene Holding, investments held by the Company's consolidated funds, investments in debt of unconsolidated CLOs, and other investments held by the Company. See note 5 for further discussion regarding investments, at fair value.

Net Gains from Investment Activities

The following table presents the realized and net change in unrealized gains on investments, at fair value for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Realized gains on sales of investments	$ 162	$ 472	$ 14	$ 375
Net change in unrealized gains due to changes in fair value[1]	68,770	17,274	102,922	49,912
Net gains from investment activities	$ 68,932	$ 17,746	$ 102,936	$ 50,287

(1) Primarily relates to the Company's investment in Athene Holding. See note 5 for further information regarding the Company's investment in Athene Holding.

Equity Method Investments

Apollo's equity method investments include its investments in the private equity, credit and real assets funds it manages, which are not consolidated, but in which the Company exerts significant influence. Apollo's share of net income generated by these investments is recorded within income from equity method investments in the condensed consolidated statements of operations.

Equity method investments as of September 30, 2017 and December 31, 2016 consisted of the following:

	Equity Held as of	
	September 30, 2017 [5]	December 31, 2016 [5]
Private Equity[1][2]	$ 495,409	$ 428,581
Credit[1][3]	330,918	327,012
Real Assets	29,387	31,071
Total equity method investments[4]	$ 855,714	$ 786,664

(1) As of September 30, 2017, equity method investments include Fund VIII (Private Equity) and MidCap (Credit) of $340.3 million and $79.9 million, respectively, representing an ownership percentage of 2.2% and 4.3%, respectively. As of December 31, 2016, equity method investments include Fund VIII (Private Equity) and MidCap (Credit) of $260.9 million and $79.5 million, respectively, representing an ownership percentage of 2.2% and 4.3%, respectively.
(2) The equity method investment in AP Alternative Assets, L.P. ("AAA") was $51.8 million and $66.8 million as of September 30, 2017 and December 31, 2016, respectively. The value of the Company's investment in AAA was $51.9 million and $64.9 million based on the quoted market price as of September 30, 2017 and December 31, 2016, respectively.
(3) The equity method investment in AINV was $56.6 million and $58.6 million as of September 30, 2017 and December 31, 2016, respectively. The value of the Company's investment in AINV was $54.3 million and $52.1 million based on the quoted market price as of September 30, 2017 and December 31, 2016, respectively.
(4) Certain funds invest across multiple segments. The presentation in the table above is based on the classification of the majority of such funds' investments.
(5) Some amounts are included a quarter in arrears.

As of September 30, 2017 and for the three and nine months ended September 30, 2017, no equity method investment held by Apollo met the significance criteria as defined by the SEC. Although the following disclosure is not required by the significance criteria for the three and nine months ended September 30, 2017, the Company chose to continue to include this information as it was disclosed in its 2016 Annual Report. The following table presents summarized financial information of Athene Holding for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017 (1)	2016	2017 (1)	2016
	(in millions)			
Statements of Operations				
Revenues	$ 1,763	$ 1,272	$ 4,448	$ 3,039
Expenses	1,426	1,234	3,320	2,708
Income before income tax provision (benefit)	337	38	1,128	331
Income tax provision (benefit)	11	(88)	54	(73)
Net income available to Athene Holding common shareholders	$ 326	$ 126	$ 1,074	$ 404

(1) The financial statement information for the three and nine months ended September 30, 2017 is presented a quarter in arrears and is comprised of the financial information for the three and nine months ended June 30, 2017, which represents the latest available financial information as of the date of this report.

4. VARIABLE INTEREST ENTITIES

As described in note 2, the Company consolidates entities that are VIEs for which the Company has been designated as the primary beneficiary. There is no recourse to the Company for the consolidated VIEs' liabilities.

Consolidated Variable Interest Entities

Apollo has consolidated VIEs in accordance with the policy described in note 2. Through its role as investment manager of these VIEs, the Company determined that Apollo has the power to direct the activities that most significantly impact the economic performance of these VIEs. Additionally, Apollo determined that its interests, both directly and indirectly from these VIEs, represent rights to returns that could potentially be significant to such VIEs. As a result, Apollo determined that it is the primary beneficiary and therefore should consolidate the VIEs.

Consolidated CLOs

Certain CLOs are consolidated by Apollo as the Company is considered to hold a controlling financial interest through direct and indirect interests in these CLOs exclusive of management and performance based fees received. Through its role as collateral manager of these VIEs, the Company determined that Apollo has the power to direct the activities that most significantly impact the economic performance of these VIEs. These CLOs were formed for the sole purpose of issuing collateralized notes to investors. The assets of these VIEs are primarily comprised of senior secured loans and the liabilities are primarily comprised of debt.

The assets of these consolidated CLOs are not available to creditors of the Company. In addition, the investors in these consolidated CLOs have no recourse against the assets of the Company. The Company measures both the financial assets and the financial liabilities of the CLOs using the fair value of the financial assets as further described in note 2. The Company has elected the fair value option for financial instruments held by its consolidated CLOs, which includes investments in loans and corporate bonds, as well as debt obligations and contingent obligations held by such consolidated CLOs. Other assets include amounts due from brokers and interest receivables. Other liabilities include payables for securities purchased, which represent open trades within the consolidated VIEs and primarily relate to corporate loans that are expected to settle within the next 60 days. From time to time, Apollo makes investments in certain consolidated CLOs denominated in foreign currencies. As of September 30, 2017 and December 31, 2016, the Company held investments of $46.6 million and $41.3 million, respectively, in consolidated foreign currency denominated CLOs, which eliminate in consolidation.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Net Gains from Investment Activities of Consolidated Variable Interest Entities

The following table presents net gains from investment activities of the consolidated VIEs for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017 [1]	2016 [1]	2017 [1]	2016 [1]
Net gains (losses) from investment activities	$ (272)	$ 9,466	$ 9,244	$ 7,341
Net gains (losses) from debt	635	(7,745)	3,319	(9,182)
Interest and other income	9,977	11,404	26,420	34,913
Interest and other expenses	(9,495)	(12,325)	(27,898)	(30,255)
Net gains from investment activities of consolidated variable interest entities	$ 845	$ 800	$ 11,085	$ 2,817

(1) Amounts reflect consolidation eliminations.

Senior Secured Notes, Subordinated Notes and Secured Borrowings-Included within debt are amounts due to third-party institutions by the consolidated VIEs. The following table summarizes the principal provisions of the debt of the consolidated VIEs as of September 30, 2017 and December 31, 2016:

	As of September 30, 2017			As of December 31, 2016		
	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years
Senior Secured Notes[2][3]	$ 794,748	1.68%	12.4	$ 704,976	1.83%	12.3
Subordinated Notes[2][3]	98,602	N/A [1]	22.7	87,794	N/A [1]	19.2
Secured Borrowings[4]	90,461	3.00%	9.5	-	N/A	N/A
Total	$ 983,811			$ 792,770		

(1) The subordinated notes do not have contractual interest rates but instead receive distributions from the excess cash flows of the VIEs.
(2) The fair value of Senior Secured Notes, Subordinated Notes and Secured Borrowings as of September 30, 2017 and December 31, 2016 was $972.6 million and $786.5 million, respectively.
(3) The debt at fair value of the consolidated VIEs is collateralized by assets of the consolidated VIEs and assets of one vehicle may not be used to satisfy the liabilities of another vehicle. As of September 30, 2017 and December 31, 2016, the fair value of the assets of the consolidated VIEs was $1,278.5 million and $1,001.8 million, respectively. This collateral consisted of cash and cash equivalents, investments, at fair value, and other assets.
(4) Secured borrowings consist of a consolidated VIE’s obligation through a repurchase agreement redeemable at maturity with a third party lender. The fair value of the secured borrowings as of September 30, 2017 was $90.5 million.

The consolidated VIEs’ debt obligations contain various customary loan covenants. As of September 30, 2017, the Company was not aware of any instances of non-compliance with any of these covenants.

Variable Interest Entities Which are Not Consolidated

The Company holds variable interests in certain VIEs which are not consolidated, as it has been determined that Apollo is not the primary beneficiary.

The following table presents the carrying amounts of the assets and liabilities of the VIEs for which Apollo has concluded that it holds a significant variable interest, but that it is not the primary beneficiary as of September 30, 2017 and December 31, 2016. In addition, the table presents the maximum exposure to losses relating to these VIEs.

	As of September 30, 2017	As of December 31, 2016
Assets:		
Cash	$ 334,339	$ 231,922
Investments	7,389,027	7,253,872
Receivables	68,390	37,541
Total Assets	**$ 7,791,756**	**$ 7,523,335**
Liabilities:		
Debt and other payables	$ 3,089,584	$ 2,818,459
Total Liabilities	**$ 3,089,584**	**$ 2,818,459**
Apollo Exposure[1]	**$ 282,240**	**$ 272,191**

(1) Represents Apollo's direct investment in those entities in which Apollo holds a significant variable interest and certain other investments. Additionally, cumulative carried interest income is subject to reversal in the event of future losses. The maximum amount of future reversal of carried interest income from all of Apollo's funds, including those entities in which Apollo holds a significant variable interest, was $3.6 billion and $2.9 billion as of September 30, 2017 and December 31, 2016, respectively, as discussed in note 14.

5. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

The following tables summarize the Company's financial assets and financial liabilities recorded at fair value by fair value hierarchy level as of September 30, 2017 and December 31, 2016.

Investment in Athene Holding

As of September 30, 2017 and December 31, 2016 the fair value of Apollo's investment in Athene Holding was estimated using the closing market price of Athene Holding shares of $53.84 and $47.99, respectively, less a discount due to a lack of marketability ("DLOM") of 7.0% and 9.5%, respectively, as applicable. The DLOM was derived based on the average remaining lock up restrictions on the shares of Athene Holding held by Apollo (14.3 months and 23.3 months as of September 30, 2017 and December 31, 2016, respectively) and the estimated volatility in such shares of Athene Holding. Due to the limited trading history in Athene Holding shares, the historical share price volatility of a representative set of Athene Holding's publicly traded insurance peers was calculated over a period equivalent to the remaining average lock up on the shares of Athene Holding held by Apollo and used as a proxy to estimate the projected volatility in Athene Holding's shares. The fair value of Apollo's investment in Athene Holding as of September 30, 2017 and December 31, 2016 after the application of the DLOM was estimated at a price of $50.19 and $43.43 per share, respectively.

As of December 31, 2016, Apollo changed the valuation method used to value the opportunistic investment in Athene Holding from the U.S. GAAP book value multiple approach to the use of the closing market price of shares of Athene Holding, adjusted for a DLOM in order to reflect the post IPO sales restriction on such shares of Athene Holding. The DLOM is calculated based on the remaining length of such sales restrictions and the estimated market price volatility of the associated shares.

Investments of Consolidated Apollo Funds

The Company is the sole investor in the Apollo Senior Loan Fund, L.P. and Apollo Alternative Credit Long Short Fund L.P. and therefore consolidates the assets and liabilities of these funds. These funds invest in U.S. denominated senior secured loans, senior secured bonds and other income generating fixed-income investments. Amounts related to these consolidated funds are primarily presented in net gains from investment activities on the condensed consolidated statements of operations and in investments in the condensed consolidated statements of financial condition.

Other Investments

Other investments primarily consists of Apollo's investments in debt of unconsolidated CLOs. The change in the fair value related to these investments is presented in net gains from investment activities on the condensed consolidated statements of operations.

Consolidated VIEs

Investments

As of September 30, 2017, the significant unobservable inputs used in the fair value measurement of the equity securities include the discount rate applied and the book value multiples applied in the valuation models. These unobservable

inputs in isolation can cause significant increases or decreases in fair value. Specifically, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. Increases in the discount rate can significantly lower the fair value of an investment; conversely decreases in the discount rate can significantly increase the fair value of an investment. The discount rate is determined based on the market rates an investor would expect for a similar investment with similar risks. When a comparable multiple model is used to determine fair value, the comparable multiples are generally multiplied by the underlying companies' earnings before interest, taxes, depreciation and amortization ("EBITDA") to establish the total enterprise value of the company. The comparable multiple is determined based on the implied trading multiple of public industry peers.

Liabilities

As of September 30, 2017 and December 31, 2016, the debt obligations of the consolidated CLOs were measured on the basis of the fair value of the financial assets of the CLOs as the financial assets were determined to be more observable and, as a result, categorized as Level II in the fair value hierarchy.

Contingent Consideration Obligations

The significant unobservable input used in the fair value measurement of the contingent consideration obligations is the discount rate applied in the valuation models. This input in isolation can cause significant increases or decreases in fair value. Specifically, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. Increases in the discount rate can significantly lower the fair value of the contingent consideration obligations; conversely, a decrease in the discount rate can significantly increase the fair value of the contingent consideration obligations. The discount rate was based on the hypothetical cost of equity in connection with the acquisition of Stone Tower Capital, LLC (together with its related management companies, "Stone Tower"). See note 14 for further discussion of the contingent consideration obligations.

6. CARRIED INTEREST RECEIVABLE

Carried interest receivable from private equity, credit and real assets funds consisted of the following:

	As of September 30, 2017	As of December 31, 2016
Private Equity	$ 1,128,460	$ 798,465
Credit	413,990	426,114
Real Assets	35,534	32,526
Total carried interest receivable	$ 1,577,984	$ 1,257,105

The table below provides a roll-forward of the carried interest receivable balance for the nine months ended September 30, 2017:

	Private Equity	Credit	Real Assets	Total
Carried interest receivable, January 1, 2017	$ 798,465	$ 426,114	$ 32,526	$ 1,257,105
Change in fair value of funds	651,808	165,987	10,585	828,380
Fund distributions to the Company	(321,813)	(178,111)	(7,577)	(507,501)
Carried interest receivable, September 30, 2017	$ 1,128,460	$ 413,990	$ 35,534	$ 1,577,984

The change in fair value of funds excludes the reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. The general partner obligation is recognized based upon a hypothetical liquidation of a fund's net assets as of the reporting date. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of a fund's investments based on the contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement of the fund. See note 13 for further disclosure regarding the general partner obligation.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The timing of the payment of carried interest due to the general partner or investment manager varies depending on the terms of the applicable fund agreements. Generally, carried interest with respect to the private equity funds and certain credit and real assets funds is payable and is distributed to the fund's general partner upon realization of an investment if the fund's cumulative returns are in excess of the preferred return. For most credit funds, carried interest is payable based on realizations after the end of the relevant fund's fiscal year or fiscal quarter, subject to certain return thresholds, or "high water marks," having been achieved.

7. PROFIT SHARING PAYABLE

Profit sharing payable consisted of the following:

	As of September 30, 2017	As of December 31, 2016
Private Equity	$ 427,456	$ 268,170
Credit	269,233	268,855
Real Assets	14,184	13,123
Total profit sharing payable	$ 710,873	$ 550,148

The table below provides a roll-forward of the profit sharing payable balance for the nine months ended September 30, 2017:

	Private Equity	Credit	Real Assets	Total
Profit sharing payable, January 1, 2017	$ 268,170	$ 268,855	$ 13,123	$ 550,148
Profit sharing expense(1)(2)	266,881	73,909	3,680	344,470
Payments/other	(107,595)	(73,531)	(2,619)	(183,745)
Profit sharing payable, September 30, 2017	$ 427,456	$ 269,233	$ 14,184	$ 710,873

(1) Includes (i) changes in amounts payable to employees and former employees entitled to a share of carried interest income in Apollo's funds and (ii) changes to the fair value of the contingent consideration obligations recognized in connection with certain Apollo acquisitions. See notes 5 and 14 for further disclosure regarding the contingent consideration obligations.

(2) The Company has recorded a receivable from the Contributing Partners, certain employees and former employees for the potential return of profit sharing distributions that would be due if certain funds were liquidated in the amount of $43.9 million and $39.3 million as of September 30, 2017 and December 31, 2016, respectively. Profit sharing expense excludes the potential return of these profit sharing distributions. See note 13 for further discussion regarding the potential return of profit sharing distributions.

8. INCOME TAXES

The Company is treated as a partnership for income tax purposes and is therefore not subject to U.S. federal, state and local income taxes. Certain consolidated entities are, or are treated as, corporations for U.S. and non-U.S. tax purposes and therefore subject to U.S. federal, state, and local corporate income tax. Certain other subsidiaries of the Company are subject to New York City Unincorporated Business Tax ("NYC UBT") attributable to the Company's operations apportioned to New York City. In addition, certain non-U.S. subsidiaries of the Company are subject to income taxes in their local jurisdictions.

The Company's income tax provision totaled $16.5 million and $29.7 million for the three months ended September 30, 2017 and 2016, respectively, and $54.9 million and $62.5 million for the nine months ended September 30, 2017 and 2016, respectively. The Company's effective tax rate was approximately 3.7% and 11.2% for the three months ended September 30, 2017 and 2016, respectively, and 5.3% and 9.8% for the nine months ended September 30, 2017 and 2016, respectively.

Under U.S. GAAP, a tax benefit from an uncertain tax position may be recognized when it is more likely than not that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits of the position. Based upon the Company's review of its federal, state, local and foreign income tax returns and tax filing positions, the Company determined that no unrecognized tax benefits for uncertain tax positions were required to be recorded. In addition, the Company does not believe that it has any tax positions for which it is reasonably possible that it will be required to record significant amounts of unrecognized tax benefits within the next twelve months.

The Company's primary jurisdictions in which it operates are the United States, New York State, New York City, California and the United Kingdom. There are no unremitted earnings with respect to the United Kingdom and other foreign entities

due to the flow-through nature of these entities. In the normal course of business, the Company is subject to examination by federal and certain state, local and foreign tax authorities. With a few exceptions, as of September 30, 2017, the Company's U.S. federal, state, local and foreign income tax returns for the years 2013 through 2016 are open under the general statute of limitations provisions and therefore subject to examination. Currently, the Internal Revenue Service is examining the tax return of certain subsidiaries for the 2011 and 2012 tax years. The State and City of New York are examining certain subsidiaries' tax returns for tax years 2011 to 2013.

The Company has recorded a deferred tax asset for the future amortization of tax basis intangibles as a result of the 2007 Reorganization. The Company recorded additional deferred tax assets as a result of the step-up in tax basis of intangibles from subsequent exchanges of AOG Units for Class A shares. A related tax receivable agreement liability was recorded in due to related parties in the condensed consolidated statements of financial condition for the expected payments under the tax receivable agreement entered into by and among APO Corp., the Managing Partners, the Contributing Partners, and other parties thereto (as amended, the "tax receivable agreement") (see note 13). The increases in the deferred tax asset less the related liability resulted in increases to additional paid in capital which were recorded in the condensed consolidated statements of changes in shareholders' equity for the nine months ended September 30, 2017 and 2016. The amortization period for these tax basis intangibles is 15 years and the deferred tax assets will reverse over the same period.

Pursuant to an exchange agreement between Apollo, Holdings and the other parties thereto (as amended, the "Exchange Agreement"), the holders of the AOG Units (and certain permitted transferees thereof) may, upon notice and subject to the applicable vesting and minimum retained ownership requirements, transfer restrictions and other terms of the Exchange Agreement, exchange their AOG Units for the Company's Class A shares on a one-for-one basis a limited number of times each year, subject to customary conversion rate adjustments for splits, distributions and reclassifications. Pursuant to the Exchange Agreement, a holder of AOG Units must simultaneously exchange one partnership unit in each of the Apollo Operating Group partnerships to effectuate an exchange for one Class A share. As a holder exchanges its AOG Units, the Company's indirect interest in the Apollo Operating Group is correspondingly increased.

The table below presents the impact to the deferred tax asset, tax receivable agreement liability and additional paid in capital related to the exchange of AOG Units for Class A shares during the nine months ended September 30, 2017 and 2016.

Exchange of AOG Units for Class A shares	Increase in Deferred Tax Asset	Increase in Tax Receivable Agreement Liability	Increase to Additional Paid In Capital
For the Nine Months Ended September 30, 2017	$ 46,539	$ 35,946	$ 10,593
For the Nine Months Ended September 30, 2016	$ 1,807	$ 1,519	$ 288

9. DEBT

Debt consisted of the following:

	As of September 30, 2017			As of December 31, 2016		
	Outstanding Balance	Fair Value	Annualized Weighted Average Interest Rate	Outstanding Balance	Fair Value	Annualized Weighted Average Interest Rate
2013 AMH Credit Facilities - Term Facility[(1)]	$ 299,627	$ 298,875 [(3)]	2.28%	$ 299,543	$ 298,500 [(3)]	1.82%
2024 Senior Notes[(1)]	495,697	510,604 [(4)]	4.00	495,208	498,336 [(4)]	4.00
2026 Senior Notes[(1)]	495,550	519,618 [(4)]	4.40	495,165	497,923 [(4)]	4.40
2014 AMI Term Facility I[(2)]	16,199	16,199 [(3)]	2.00	14,449	14,449 [(3)]	2.00
2014 AMI Term Facility II[(2)]	18,283	18,283 [(3)]	1.75	16,306	16,306 [(3)]	1.75
2016 AMI Term Facility I[(2)]	20,050	20,050 [(3)]	1.75	17,852	17,852 [(3)]	1.75
2016 AMI Term Facility II[(2)]	15,638	15,638 [(3)]	2.00	13,924	13,924 [(3)]	2.00
Total Debt	$ 1,361,044	$ 1,399,267		$ 1,352,447	$ 1,357,290	

(1) Includes impact of any amortization of note discount, as applicable. Outstanding balance is presented net of unamortized debt issuance costs, which are presented in the following table:

	As of September 30, 2017		As of December 31, 2016	
2013 AMH Credit Facilities - Term Facility	$	373	$	457
2024 Senior Notes	$	3,637	$	4,051
2026 Senior Notes	$	4,069	$	4,420

(2) Apollo Management International LLP ("AMI"), a subsidiary of the Company, entered into the following five year credit agreements and proceeds from the borrowings were used to fund the Company's investment in European CLOs it manages:

Facility	Date	Loan Amount	
2014 AMI Term Facility I	July 3, 2014	€	13,686
2014 AMI Term Facility II	December 9, 2014	€	15,475
2016 AMI Term Facility I	January 18, 2016	€	16,970
2016 AMI Term Facility II	June 22, 2016	€	13,236

(3) Fair value is based on obtained broker quotes and these notes would be classified as a Level III liability within the fair value hierarchy based on the number and quality of broker quotes obtained, the standard deviations of the observed broker quotes and the percentage deviation from independent pricing services. For instances where broker quotes are not available, a discounted cash flow method is used to obtain a fair value.

(4) Fair value is based on obtained broker quotes and these notes would be classified as a Level II liability within the fair value hierarchy based on the number and quality of broker quotes obtained, the standard deviations of the observed broker quotes and the percentage deviation from independent pricing services.

2013 AMH Credit Facilities-On December 18, 2013, AMH and its subsidiaries and certain other subsidiaries of the Company (collectively, the "Borrowers") entered into new credit facilities (the "2013 AMH Credit Facilities") with JPMorgan Chase Bank, N.A. The 2013 AMH Credit Facilities provide for (i) a term loan facility to AMH (the "Term Facility") that includes $750 million of the term loan from third-party lenders and $271.7 million of the term loan held by a subsidiary of the Company and (ii) a $500 million revolving credit facility (the "Revolver Facility"), in each case, with an original maturity date of January 18, 2019. On March 11, 2016, the maturity date of both the Term Facility and the Revolver Facility was extended by two years to January 18, 2021. The extension was determined to be a modification of the 2013 AMH Credit Facilities in accordance with U.S. GAAP.

Interest on the borrowings is based on an adjusted LIBOR rate or alternate base rate, in each case plus an applicable margin, and undrawn revolving commitments bear a commitment fee. In connection with the issuance of the 2024 Senior Notes and the 2026 Senior Notes (as defined below), $250 million of the proceeds and $200 million of the proceeds, respectively, were used to repay a portion of the Term Facility outstanding with third party lenders at par. The interest rate on the $300 million Term Facility as of September 30, 2017 was 2.45% and the commitment fee as of September 30, 2017 on the $500 million undrawn Revolver Facility was 0.125%. The $300 million carrying value of debt that is recorded on the condensed consolidated statements of financial condition at September 30, 2017 is the amount for which the Company is obligated to settle the 2013 AMH Credit Facilities.

As of September 30, 2017, the 2013 AMH Credit Facilities were guaranteed by AMH and its subsidiaries, Apollo Management, L.P., Apollo Capital Management, L.P., Apollo International Management, L.P., AAA Holdings, L.P., Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings VI, L.P., Apollo Principal Holdings VII, L.P., Apollo Principal Holdings VIII, L.P., Apollo Principal Holdings IX, L.P., Apollo Principal Holdings X, L.P., Apollo Principal Holdings XI, LLC, Apollo Principal Holdings XII, L.P., ST Holdings GP, LLC and ST Management Holdings, LLC. The 2013 AMH Credit Facilities contain affirmative and negative covenants which limit the ability of the Borrowers, the guarantors and certain of their subsidiaries to, among other things, incur indebtedness and create liens. Additionally, the 2013 AMH Credit Facilities contain financial covenants which require the Borrowers and their subsidiaries to maintain (1) at least $40 billion of Fee-Generating Assets Under Management and (2) a maximum total net leverage ratio of not more than 4.00 to 1.00 (subject to customary equity cure rights). The 2013 AMH Credit Facilities also contain customary events of default, including events of default arising from non-payment, material misrepresentations, breaches of covenants, cross default to material indebtedness, bankruptcy and changes in control of the Company.

Borrowings under the Revolver Facility may be used for working capital and general corporate purposes, including, without limitation, permitted acquisitions. In addition, the Borrowers may incur incremental facilities in respect of the Revolver Facility and the Term Facility in an aggregate amount not to exceed $500 million plus additional amounts so long as the Borrowers are in compliance with a net leverage ratio not to exceed 3.75 to 1.00. As of September 30, 2017 and December 31, 2016, the Revolver Facility was undrawn.

2024 Senior Notes-On May 30, 2014, AMH issued $500 million in aggregate principal amount of its 4.000% Senior Notes due 2024 (the "2024 Senior Notes"), at an issue price of 99.722% of par. Interest on the 2024 Senior Notes is payable semi-annually in arrears on May 30 and November 30 of each year. The 2024 Senior Notes will mature on May 30, 2024. The discount will be amortized into interest expense on the condensed consolidated statements of operations over the term of the 2024 Senior Notes. The face amount of $500 million related to the 2024 Senior Notes is the amount for which the Company is obligated to settle the 2024 Senior Notes.

2026 Senior Notes-On May 27, 2016, AMH issued $500 million in aggregate principal amount of its 4.400% Senior Notes due 2026 (the "2026 Senior Notes"), at an issue price of 99.912% of par. Interest on the 2026 Senior Notes is payable semi-annually in arrears on May 27 and November 27 of each year. The 2026 Senior Notes will mature on May 27, 2026. The discount will be amortized into interest expense on the condensed consolidated statements of operations over the term of the 2026 Senior Notes. The face amount of $500 million related to the 2026 Senior Notes is the amount for which the Company is obligated to settle the 2026 Senior Notes.

As of September 30, 2017, the 2026 Senior Notes and the 2024 Senior Notes were guaranteed by Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings VI, L.P., Apollo Principal Holdings VII, L.P., Apollo Principal Holdings VIII, L.P., Apollo Principal Holdings IX, L.P., Apollo Principal Holdings X, L.P., Apollo Principal Holdings XI, LLC, Apollo Principal Holdings XII, L.P., AMH Holdings (Cayman), L.P. and any other entity that is required to become a guarantor of the notes under the terms of the indentures governing the 2026 Senior Notes and the 2024 Senior Notes (the "Indentures"). The Indentures include covenants that restrict the ability of AMH and, as applicable, the guarantors to incur indebtedness secured by liens on voting stock or profit participating equity interests of their respective subsidiaries or merge, consolidate or sell, transfer or lease assets. The Indentures also provide for customary events of default.

The following table presents the interest expense incurred related to the Company's debt for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Interest Expense:(1)				
2013 AMH Term Facility	$ 2,150	$ 1,696	$ 6,109	$ 6,408
2024 Senior Notes	5,163	5,192	15,489	15,572
2026 Senior Notes	5,628	5,630	16,885	7,744
AMI Term Facilities	362	314	1,014	781
Total Interest Expense	$ 13,303	$ 12,832	$ 39,497	$ 30,505

(1) Debt issuance costs incurred in connection with the Term Facility, the 2024 Senior Notes and the 2026 Senior Notes are amortized into interest expense over the term of the debt arrangement.

10. NET INCOME PER CLASS A SHARE

U.S. GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for distributions declared on all classes of securities to arrive at undistributed earnings. During periods of undistributed losses, the undistributed loss is allocated to a participating security only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The remaining undistributed earnings are allocated to Class A shares and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Earnings or losses allocated to each class of security are then divided by the applicable number of shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding Class A shares and includes the number of additional Class A shares that would have been outstanding if the dilutive Class A shares had been issued. The numerator is adjusted for any changes in income or loss that would result if the dilutive Class A shares were issued.

The table below presents basic and diluted net income per Class A share using the two-class method for the three and nine months ended September 30, 2017 and 2016:

	Basic and Diluted			
	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Numerator:				
Net income attributable to Apollo Global Management, LLC Class A Shareholders	$ 198,569	$ 94,619	$ 430,673	$ 235,883
Distributions declared on Class A shares[1]	(100,641)	(68,356)	(279,307)	(165,802)
Distributions on participating securities[2]	(3,265)	(2,404)	(9,419)	(6,293)
Earnings allocable to participating securities	(3,218) [3]	(849)	(5,129)	(2,637)
Undistributed income attributable to Class A shareholders: Basic and Diluted	$ 91,445	$ 23,010	$ 136,818	$ 61,151
Denominator:				
Weighted average number of Class A shares outstanding: Basic and Diluted	192,882,082	184,438,515	190,014,240	183,602,982
Net Income per Class A Share: Basic and Diluted[4]				
Distributed Income	$ 0.52	$ 0.37	$ 1.46	$ 0.90
Undistributed Income	0.48	0.13	0.73	0.34
Net Income per Class A Share: Basic and Diluted	$ 1.00	$ 0.50	$ 2.19	$ 1.24

(1) See note 12 for information regarding the quarterly distributions declared and paid during 2017 and 2016.
(2) Participating securities consist of vested and unvested RSUs that have rights to distributions and unvested restricted shares.
(3) No allocation of undistributed losses was made to the participating securities as the holders do not have a contractual obligation to share in the losses of the Company with Class A shareholders.
(4) For the three and nine months ended September 30, 2017 and 2016, all of the classes of securities were determined to be anti-dilutive.

The Company has granted RSUs that provide the right to receive, subject to vesting, Class A shares of Apollo Global Management, LLC, pursuant to the Company's 2007 Omnibus Equity Incentive Plan (the "2007 Equity Plan"). Certain RSU grants to employees provide the right to receive distribution equivalents on vested RSUs on an equal basis any time a distribution is declared. The Company refers to these RSU grants as "Plan Grants." For certain Plan Grants, distribution equivalents are paid in January of the calendar year next following the calendar year in which a distribution on Class A shares was declared. In addition, certain RSU grants to employees provide that both vested and unvested RSUs participate in distribution equivalents on an equal basis with the Class A shareholders any time a distribution is declared. The Company refers to these as "Bonus Grants."

Any distribution equivalent paid to an employee will not be returned to the Company upon forfeiture of the award by the employee. Vested and unvested RSUs that are entitled to non-forfeitable distribution equivalents qualify as participating securities and are included in the Company's basic and diluted earnings per share computations using the two-class method. The holder of an RSU participating security would have a contractual obligation to share in the losses of the entity if the holder is obligated to fund the losses of the issuing entity or if the contractual principal or mandatory redemption amount of the participating security is reduced as a result of losses incurred by the issuing entity. Because the RSU participating securities do not have a mandatory redemption amount and the holders of the participating securities are not obligated to fund losses, neither the vested RSUs nor the unvested RSUs are subject to any contractual obligation to share in losses of the Company.

Holders of AOG Units are subject to the transfer restrictions set forth in the agreements with the respective holders, and may a limited number of times each year, upon notice (subject to the terms of the Exchange Agreement), exchange their AOG

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Units for Class A shares on a one-for-one basis. An AOG Unit holder must exchange one unit in each of the Apollo Operating Group partnerships to effectuate an exchange for one Class A share.

Apollo Global Management, LLC has one Class B share outstanding, which is held by BRH Holdings GP, Ltd. ("BRH"). The voting power of the Class B share is reduced on a one vote per one AOG Unit basis in the event of an exchange of AOG Units for Class A shares, as discussed above. The Class B share has no net income (loss) per share as it does not participate in Apollo's earnings (losses) or distributions. The Class B share has no distribution or liquidation rights. The Class B share has voting rights on a pari passu basis with the Class A shares. The Class B share represented 54.3% and 60.7% of the total voting power of the Company's shares entitled to vote as of September 30, 2017 and 2016, respectively.

The following table summarizes the anti-dilutive securities for the three and nine months ended September 30, 2017 and 2016, respectively.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Weighted average vested RSUs	210,642	873,973	554,881	1,780,166
Weighted average unvested RSUs	6,196,601	5,867,075	6,334,220	6,054,283
Weighted average unexercised options	210,420	222,920	214,587	222,920
Weighted average AOG Units outstanding	209,522,593	215,869,166	212,224,998	216,034,309
Weighted average unvested restricted shares	400,606	67,101	240,411	85,388

11. EQUITY-BASED COMPENSATION

Equity-based awards granted to employees as compensation are measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are expensed over the relevant service period. Equity-based awards granted to non-employees for services provided to related parties are remeasured to fair value at the end of each reporting period and expensed over the relevant service period.

RSUs

The Company grants RSUs under the 2007 Equity Plan. These grants are accounted for as a grant of equity awards in accordance with U.S. GAAP. The fair value of all grants is based on the grant date fair value, which considers the public share price of the Company's Class A shares subject to certain discounts, as applicable. The following table summarizes the weighted average discounts for Plan Grants and Bonus Grants for the three and nine months ended September 30, 2017 and 2016.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Plan Grants:				
Discount for the lack of distributions until vested(1)	12.9%	8.2%	12.0%	10.1%
Marketability discount for transfer restrictions(2)	4.0%	5.8%	3.5%	5.8%
Bonus Grants:				
Marketability discount for transfer restrictions(2)	2.3%	3.0%	2.3%	3.4%

(1) Based on the present value of a growing annuity calculation.
(2) Based on the Finnerty Model calculation.

The estimated total grant date fair value is charged to compensation expense on a straight-line basis over the vesting period, which for Plan Grants is generally up to six years, with the first installment vesting one year after grant and quarterly vesting thereafter, and for Bonus Grants is generally annual vesting over three years. The fair value of grants made during the nine months ended September 30, 2017 and 2016 was $32.3 million and $2.8 million, respectively.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

In addition, the Company provides for the vesting of RSUs when certain performance metrics have been achieved. In accordance with U.S. GAAP, equity-based compensation expense is recognized only when certain performance metrics are met or deemed probable. Accordingly, for the three and nine months ended September 30, 2017, no equity-based compensation expense was recognized relating to these RSUs.

The following table presents the forfeiture rate and equity-based compensation expense recognized for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Actual forfeiture rate	2.3%	2.7%	9.3%	6.6%
Equity-based compensation	$ 17,106	$ 16,724	$ 50,807	$ 52,564

The following table summarizes RSU activity for the nine months ended September 30, 2017:

	Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of RSUs Outstanding
Balance at January 1, 2017	9,391,566	$ 15.80	2,752,455	12,144,021 (1)
Granted	1,519,021	21.29	-	1,519,021
Forfeited	(1,016,156)	17.80	-	(1,016,156)
Issued	-	18.29	(3,285,664)	(3,285,664)
Vested	(859,553)	17.29	859,553	-
Balance at September 30, 2017	9,034,878 (2)	$ 16.36	326,344	9,361,222 (1)

(1) Amount excludes RSUs which have vested and have been issued in the form of Class A shares.
(2) RSUs were expected to vest over the weighted average period of 2.1 years.

Restricted Share Awards-Athene Holding

The Company has granted Athene Holding restricted share awards to certain employees of the Company. Separately, Athene Holding has also granted restricted share awards to certain employees of the Company. Both awards are collectively referred to as the “AHL Awards”. Certain of the AHL Awards function similarly to options as they are exchangeable for Class A shares of Athene Holding upon payment of a conversion price and the satisfaction of certain other conditions. The awards granted are either subject to time-based vesting conditions that generally vest over three to five years or vest upon achieving certain metrics, such as attainment of certain rates of return and realized cash received by certain investors in Athene Holding upon sale of their shares.

The Company records the AHL Awards in other assets and other liabilities in the condensed consolidated statements of financial condition. The fair value of the asset is amortized through equity-based compensation over the vesting period. The fair value of the liability is remeasured each period with any changes in fair value recorded in compensation expense in the condensed consolidated statements of operations. For AHL Awards granted by Athene Holding, compensation expense related to amortization of the asset is offset, with certain limited exceptions, by related management fees earned by the Company from Athene.

The grant date fair value of the AHL Awards is based on the share price of Athene Holding, less discounts for transfer restrictions. The AHL Awards that function similarly to options were valued using a multiple-scenario model, which considers the price volatility of the underlying share price of Athene Holding, time to expiration and the risk-free rate, while the other awards were valued using the share price of Athene Holding less any discounts for transfer restrictions.

The following table summarizes the management fees, equity-based compensation expense and actual forfeiture rates for the AHL Awards for the three and nine months ended September 30, 2017 and 2016:

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Management fees	$ 2,393	$ 4,015	$ 4,531	$ 9,179
Equity-based compensation	$ 3,528	$ 4,093	$ 6,983	$ 9,441
Actual forfeiture rate	-%	0.4%	-%	0.8%

Equity-Based Compensation Allocation

Equity-based compensation is allocated based on ownership interests. Therefore, the amortization of equity-based compensation is allocated to shareholders' equity attributable to Apollo Global Management, LLC and the Non-Controlling Interests, which results in a difference in the amounts charged to equity-based compensation expense and the amounts credited to shareholders' equity attributable to Apollo Global Management, LLC in the Company's condensed consolidated financial statements.

Below is a reconciliation of the equity-based compensation allocated to Apollo Global Management, LLC for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30, 2017			
	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non-Controlling Interest in Apollo Operating Group[1]	Allocated to Apollo Global Management, LLC
RSUs, share options and restricted share awards	$ 54,901	-%	$ -	$ 54,901
AHL Awards	6,983	51.9	3,624	3,359
Other equity-based compensation awards	8,448	51.9	4,385	4,063
Total equity-based compensation	$ 70,332		8,009	62,323
Less other equity-based compensation awards[2]			(8,009)	(9,881)
Capital increase related to equity-based compensation			$ -	$ 52,442

	For the Nine Months Ended September 30, 2016			
	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non-Controlling Interest in Apollo Operating Group[1]	Allocated to Apollo Global Management, LLC
RSUs, share options and restricted share awards	$ 55,260	-%	$ -	$ 55,260
AHL Awards	9,441	53.9	5,093	4,348
Other equity-based compensation awards	9,502	53.9	5,127	4,375
Total equity-based compensation	$ 74,203		10,220	63,983
Less other equity-based compensation awards[2]			(10,220)	(10,073)
Capital increase related to equity-based compensation			$ -	$ 53,910

(1) Calculated based on average ownership percentage for the period considering Class A share issuances during the period.
(2) Includes equity-based compensation reimbursable by certain funds and distributions related to forfeited RSUs.

FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

12. EQUITY

Class A Shares

Class A shares represent limited liability company interests in the Company. Holders of Class A shares are entitled to participate in distributions from the Company on a pro rata basis. Class A shareholders do not elect the Company's manager or the manager's executive committee and have only limited voting rights.

Issuance of Class A Shares

During the nine months ended September 30, 2017 and 2016, the Company issued Class A shares in settlement of vested RSUs. The Company has generally allowed holders of vested RSUs and exercised share options to settle their tax liabilities by reducing the number of Class A shares issued to them, which the Company refers to as "net share settlement." Additionally, the Company has generally allowed holders of share options to settle their exercise price by reducing the number of Class A shares issued to them at the time of exercise by an amount sufficient to cover the exercise price. The net share settlement results in a liability for the Company and a corresponding accumulated deficit adjustment.

The table below summarizes the reduction of Class A shares to be issued to employees in connection with net share settlements under the 2007 Equity Plan and issuances of Class A shares in settlement of vested RSUs and share options for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30,	
	2017	2016
Reduction of Class A shares issued(1)	1,196,549	2,407,275
Class A shares issued	2,097,249	4,246,760
Gross value of shares(2)	$ 76,803	$ 96,437

(1) Cash paid for tax liabilities associated with net share settlement was $28.0 million and $35.3 million for the nine months ended September 30, 2017 and 2016, respectively.
(2) Based on the closing price of a Class A share at the time of issuance.

Share Repurchase Plan

In February 2016, Apollo adopted a plan to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through net share settlement of equity-based awards granted under the 2007 Equity Plan. During the nine months ended September 30, 2017, the Company repurchased and canceled 233,248 Class A shares for $6.9 million. During the nine months ended September 30, 2016, the Company repurchased and canceled 954,447 Class A shares for $12.9 million.

Preferred Share Issuance

On March 7, 2017, Apollo issued 11,000,000 6.375% Series A Preferred shares (the "Preferred shares") for gross proceeds of $275.0 million, or $264.4 million net of issuance costs. When, as and if declared by the manager of Apollo, distributions on the Preferred shares will be payable quarterly on March 15, June 15, September 15 and December 15 of each year, beginning on June 15, 2017, at a rate per annum equal to 6.375%. Distributions on the Preferred shares are discretionary and non-cumulative.

Subject to certain exceptions, unless distributions have been declared and paid or declared and set apart for payment on the Preferred shares for a quarterly distribution period, during the remainder of that distribution period, Apollo may not declare or pay or set apart payment for distributions on any Class A shares and any other equity securities that the Company may issue in the future ranking, as to the payment of distributions, junior to the Preferred shares ("Junior Shares") and Apollo may not repurchase any Junior Shares. These restrictions are not applicable during the initial distribution period, which is the period from March 7, 2017, the original issue date, to but excluding June 15, 2017.

The Preferred shares may be redeemed at Apollo's option, in whole or in part, at any time on or after March 15, 2022 at a price of $25.00 per Preferred share, plus declared and unpaid distributions to, but excluding, the redemption date, without

payment of any undeclared distributions. Holders of Preferred shares will have no right to require the redemption of the Preferred shares and there is no maturity date.

If a certain change of control event or a certain tax redemption event occurs prior to March 15, 2022, the Preferred shares may be redeemed at Apollo's option, in whole but not in part, upon at least 30 days' notice, within 60 days of the occurrence of such change of control event or such tax redemption event, as applicable, at a price of $25.25 per Preferred share, plus declared and unpaid distributions to, but excluding, the redemption date, without payment of any undeclared distributions. If (i) a change of control event occurs (whether before, on or after March 15, 2022) and (ii) Apollo does not give notice prior to the 31st day following the change of control event to redeem all the outstanding Preferred shares, the distribution rate per annum on the Preferred shares will increase by 5.00%, beginning on the 31st day following such change of control event.

The Preferred shares are not convertible into Class A shares and have no voting rights, except in limited circumstances as provided in the Company's limited liability company agreement. In connection with the issuance of the Preferred shares, certain Apollo Operating Group entities issued for the benefit of Apollo a series of preferred units with economic terms that mirror those of the Preferred shares.

On August 2, 2017, Apollo declared a cash distribution of $0.398438 per Series A Preferred share. The distributions on the Series A Preferred shares were $4.4 million and $9.2 million for the three and nine months ended September 30, 2017, respectively.

Distributions

In addition to other distributions such as payments pursuant to the tax receivable agreement, the table below presents information regarding the quarterly distributions which were made at the sole discretion of the manager of the Company during 2017 and 2016 (in millions, except per share data):

Distribution Declaration Date	Distribution per Class A Share	Distribution Payment Date	Distribution to Class A Shareholders	Distribution to Non-Controlling Interest Holders in the Apollo Operating Group	Total Distributions from Apollo Operating Group	Distribution Equivalents on Participating Securities
February 3, 2016	$ 0.28	February 29, 2016	$ 51.4	$ 60.5	$ 111.9	$ 2.1
May 6, 2016	0.25	May 31, 2016	46.0	54.0	100.0	1.8
August 3, 2016	0.37	August 31, 2016	68.4	79.9	148.3	2.4
October 28, 2016	0.35	November 30, 2016	64.9	75.4	140.3	2.1
For the year ended December 31, 2016	$ 1.25		$ 230.7	$ 269.8	$ 500.5	$ 8.4
February 3, 2017	$ 0.45	February 28, 2017	$ 84.2	$ 97.0	$ 181.2	$ 2.9
April 13, 2017[(1)]	-	April 13, 2017	-	20.5	20.5	-
April 28, 2017	0.49	May 31, 2017	94.5	102.9	197.4	3.3
August 2, 2017	0.52	August 31, 2017	100.6	108.8	209.4	3.2
For the nine months ended September 30, 2017	$ 1.46		$ 279.3	$ 329.2	$ 608.5	$ 9.4

(1) On April 13, 2017, the Company made a $0.10 per AOG Unit pro rata distribution to the Non-Controlling Interest holders in the Apollo Operating Group in connection with a payment made under the tax receivable agreement. See note 13 for more information regarding the tax receivable agreement.

Non-Controlling Interests

The table below presents equity interests in Apollo's consolidated, but not wholly-owned, subsidiaries and funds. Net income and comprehensive income attributable to Non-Controlling Interests consisted of the following:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Net income (loss) attributable to Non-Controlling Interests in consolidated entities:				
Interest in management companies and a co-investment vehicle[1]	$ 1,637	$ 260	$ 3,264	$ 4,804
Other consolidated entities	(589)	(482)	5,703	(913)
Net income (loss) attributable to Non-Controlling Interests in consolidated entities	$ 1,048	$ (222)	$ 8,967	$ 3,891
Net income attributable to Non-Controlling Interests in the Apollo Operating Group:				
Net income	$ 434,363	$ 234,718	$ 982,335	$ 575,960
Net (income) loss attributable to Non-Controlling Interests in consolidated entities	(1,048)	222	(8,967)	(3,891)
Net income after Non-Controlling Interests in consolidated entities	433,315	234,940	973,368	572,069
Adjustments:				
Income tax provision[2]	16,542	29,667	54,926	62,508
NYC UBT and foreign tax benefit[3]	(2,595)	(4,419)	(7,014)	(11,715)
Net income in non-Apollo Operating Group entities	16	66	18	85
Net income attributable to Preferred Shareholders	(4,383)	-	(9,155)	-
Total adjustments	9,580	25,314	38,775	50,878
Net income after adjustments	442,895	260,254	1,012,143	622,947
Weighted average ownership percentage of Apollo Operating Group	52.0%	53.9%	52.7%	54.0%
Net income attributable to Non-Controlling Interests in Apollo Operating Group	$ 230,363	$ 140,321	$ 533,540	$ 336,186
Net Income attributable to Non-Controlling Interests	$ 231,411	$ 140,099	$ 542,507	$ 340,077
Other comprehensive income attributable to Non-Controlling Interests	4,999	545	8,188	1,462
Comprehensive Income Attributable to Non-Controlling Interests	$ 236,410	$ 140,644	$ 550,695	$ 341,539

(1) Reflects the remaining interest held by certain individuals who receive an allocation of income from certain of the credit funds managed by Apollo.
(2) Reflects all taxes recorded in our condensed consolidated statements of operations. Of this amount, U.S. federal, state, and local corporate income taxes attributable to APO Corp. are added back to income of the Apollo Operating Group before calculating Non-Controlling Interests as the income allocable to the Apollo Operating Group is not subject to such taxes.
(3) Reflects NYC UBT and foreign taxes that are attributable to the Apollo Operating Group and its subsidiaries related to its operations in the U.S. as partnerships and in non-U.S. jurisdictions as corporations. As such, these amounts are considered in the income attributable to the Apollo Operating Group.

13. RELATED PARTY TRANSACTIONS AND INTERESTS IN CONSOLIDATED ENTITIES

Management fees, transaction and advisory fees and reimbursable expenses from the funds the Company manages and their portfolio companies are included in due from related parties in the condensed consolidated statements of financial condition. The Company also typically facilitates the payment of certain operating costs incurred by the funds that it manages as well as their related parties. These costs are normally reimbursed by such funds and are included in due from related parties.

Tax Receivable Agreement and Other

Subject to certain restrictions, each of the Managing Partners and Contributing Partners has the right to exchange their vested AOG Units for the Company's Class A shares. Certain Apollo Operating Group entities have made an election under Section 754 of the U.S. Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), which will result in an adjustment to the tax basis of the assets owned by the Apollo Operating Group at the time of the exchange. These exchanges will result in increases in tax deductions that will reduce the amount of tax that APO Corp. will otherwise be required to pay in the future.

The tax receivable agreement provides for the payment to the Managing Partners and Contributing Partners of 85% of the amount of cash savings, if any, in U.S. federal, state, local and foreign income taxes that APO Corp. would realize as a result of the increases in tax basis of assets that resulted from the 2007 Reorganization and exchanges of AOG Units for Class A shares. APO Corp. retains the benefit from the remaining 15% of actual cash tax savings. If the Company does not make the required annual payment on a timely basis as outlined in the tax receivable agreement, interest is accrued on the balance until the payment date. These payments are expected to occur approximately over the next 15 years.

In April 2017, Apollo made a $17.9 million cash payment pursuant to the tax receivable agreement resulting from the realized tax benefit for the 2016 tax year. Additionally, in connection with this payment, the Company made a corresponding pro rata distribution of $20.5 million ($0.10 per AOG Unit) to the Non-Controlling Interest holders in the Apollo Operating Group.

Due from Contributing Partners, Employees and Former Employees

As of September 30, 2017 and December 31, 2016, due from Contributing Partners, Employees and Former Employees includes various amounts due to the Company including employee loans and return of profit sharing distributions. As of September 30, 2017 and December 31, 2016, the balance included interest-bearing employee loans receivable of $15.3 million and $26.1 million, respectively. The outstanding principal amount of the loans as well as all accrued and unpaid interest is required to be repaid at the earlier of the eighth anniversary of the date of the relevant loan or at the date of the relevant employee's resignation from the Company.

The Company recorded a receivable from the Contributing Partners and certain employees and former employees for the potential return of profit sharing distributions that would be due if certain funds were liquidated as of September 30, 2017 and December 31, 2016 of $43.9 million and $39.3 million, respectively.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Indemnity

Carried interest income from certain funds that the Company manages can be distributed to the Company on a current basis, but is subject to repayment by the subsidiary of the Apollo Operating Group that acts as general partner of the fund in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, subject to certain limitations, the obligation of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. Pursuant to an existing shareholders agreement, the Company has agreed to indemnify each of the Company's Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of certain funds that the Company manages (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that the Company's Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that the Company's Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation for the return of previously made distributions, the Company will be obligated to reimburse the Company's Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though the Company did not receive the certain distribution to which that general partner obligation related. The Company recorded an indemnification liability of $10.2 million and $5.9 million, respectively, as of September 30, 2017 and December 31, 2016.

Due to Private Equity Funds

Based upon a hypothetical liquidation of certain of the private equity funds the Company manages, as of September 30, 2017 and December 31, 2016, the Company has recorded a general partner obligation to return previously distributed carried interest income, which represents amounts due to these funds. There was a general partner obligation to return previously distributed carried interest income of $42.2 million and $56.0 million accrued as of September 30, 2017 and December 31, 2016, respectively. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement or other governing document of the fund.

Due to Credit Funds

Based upon a hypothetical liquidation of certain of the credit funds the Company manages, as of September 30, 2017 and December 31, 2016, the Company has recorded a general partner obligation to return previously distributed carried interest income, which represents amounts due to these funds. As such, there was a general partner obligation to return previously distributed carried interest income of $69.3 million and $60.6 million accrued as of September 30, 2017 and December 31, 2016, respectively. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund or as otherwise set forth in the respective limited partnership agreement or other governing document of the fund.

Athene

Athene Holding was founded in 2009 to capitalize on favorable market conditions in the dislocated life insurance sector. Athene Holding, through its subsidiaries, is a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. The products and services offered by Athene include fixed and fixed indexed annuity products; reinsurance services offered to third-party annuity providers; and institutional products, such as funding agreements. Athene Holding became an effective registrant under the Exchange Act on December 9, 2016. Athene Holding currently trades on the New York Stock Exchange (NYSE) under the symbol "ATH".

The Company provides asset management and advisory services to Athene, including asset allocation services, direct asset management services, asset and liability matching management, mergers and acquisitions, asset diligence hedging and other asset management services.

The Company, through its consolidated subsidiary Athene Asset Management, or AAM, earns 0.40% per year on all assets that it manages in accounts owned by Athene in the U.S. and Bermuda or in accounts supporting reinsurance ceded to U.S. and Bermuda subsidiaries of Athene Holding by third-party insurers (the "Athene North American Accounts") up to $65.846 billion

(the level of assets in the Athene North American Accounts as of December 31, 2016) and 0.30% per year on all assets in excess of $65.846 billion, respectively, subject to certain discounts and exceptions.

The Company, through its consolidated subsidiary, AAME, provides investment advisory services to Athene with respect to its German group companies. Such German group companies are currently subsidiaries of AGER, a strategic platform established to acquire or reinsure blocks of insurance business in the German and broader European life insurance market. Apollo receives a gross advisory fee of 0.10% per annum on the assets of Athene's German group companies that it advises, with certain limited exceptions.

The Company, through AAM, provides sub-advisory services with respect to a portion of the assets in the Athene North American Accounts. In addition, Apollo, through AAME, sub-advises certain assets of a German subsidiary of Athene (such assets, together with the assets of Athene's other German group companies collectively, the "Athene European Accounts").

From time to time, Athene also invests in funds and investment vehicles that Apollo manages. The Company refers to such assets which are invested directly as "Athene Assets Directly Invested."

The Company broadly refers to "Athene Sub-Advised" AUM as those assets in the Athene North American Accounts which the Company explicitly sub-advises as well as Athene Assets Directly Invested. The Company broadly refers to "AGER Sub-Advised" AUM as those assets in the Athene European Accounts which the Company explicitly sub-advises as well as those assets in the Athene European Accounts which are invested directly in funds and investment vehicles Apollo manages.

With limited exceptions, the sub-advisory fee arrangements between the Company and Athene and the fee arrangements with respect to Athene Assets Directly Invested are presented in the following table:

	As of September 30, 2017
Athene North American Accounts sub-advised by AAM[1]:	
Assets up to $10.0 billion	0.40%
Assets between $10.0 billion to $12.4 billion	0.35%
Assets between $12.4 billion to $16.0 billion	0.40%
Assets in excess of $16.0 billion	0.35%
Athene European Accounts sub-advised by AAME	0.35%
Athene Assets Directly Invested[2]	0% to 1.75%

(1) The sub-advisory fees with respect to the assets in the Athene North American Accounts are in addition to the fee earned by the Company described above.
(2) With respect to Athene Assets Directly Invested, Apollo earns carried interest of 0% to 20% in addition to the fees presented above. The fees set forth above with respect to the Athene Assets Directly Invested, and the carried interest that Apollo earns on such assets, are in addition to the fees described above, with certain limited exceptions.

Apollo, as general partner of AAA Investments, is generally entitled to a carried interest equal to 20% of the realized returns (net of related expenses, including borrowing costs) on the investments of AAA Investments, except that Apollo is not entitled to receive any carried interest with respect to the shares of Athene Holding that were acquired (and not in satisfaction of prior commitments to buy such shares) by AAA Investments in the contribution of certain assets by AAA to Athene in October 2012. Apollo may elect to receive payment of carried interest receivable from AAA Investments in cash or in common shares of Athene Holding (valued at the fair market value); and if Apollo elects to receive payment of such carried interest in cash, then common shares of Athene Holding shall be distributed to Apollo and immediately sold by Apollo to pay for such carried interest in cash. The following table presents the carried interest income earned from AAA Investments:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in millions)			
Carried interest income from AAA Investments, net[1]	$ 14.5	$ 5.5	$ 27.0	$ 16.5

APOLLO GLOBAL MANAGEMENT, LLC

(dollars in thousands, except share data, except where noted)

(1) Net of related profit sharing expense.

The following table presents the revenues earned in aggregate from Athene and AGER:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in millions)			
Revenues earned in aggregate from Athene and AGER, net[1]	$ 181.0	$ 111.7	$ 434.2	$ 322.6

(1) Consisting of management fees, sub-advisory fees, carried interest income from Athene and AGER (net of related profit sharing expense) and changes in the market value of the Athene Holding shares owned directly by Apollo. These amounts exclude the deferred revenue recognized as management fees associated with the vesting of AHL Awards granted to employees of Apollo as further described in note 11.

The following table presents carried interest receivable and profit sharing payable from AAA Investments:

	As of September 30, 2017	As of December 31, 2016
Carried interest receivable	$ 187,106	$ 229,829
Profit sharing payable	53,689	80,579

The Company's economic ownership interest in Athene Holding is comprised of the following:

	As of September 30, 2017 [1]	As of December 31, 2016 [1]
Indirect interest in Athene Holding:		
Interest in AAA	2.2%	2.2%
Plus: Interest in AAA Investments	0.1%	0.1%
Total Interest in AAA and AAA Investments	2.3%	2.3%
Multiplied by: AAA Investments' interest in Athene Holding	26.2%	39.4%
Indirect interest in Athene Holding	0.5%	0.9%
Plus: Direct interest in Athene Holding	8.3%	8.0%
Total interest in Athene Holding	8.8%	8.9%

(1) Ownership interest percentages are based on approximate share count as of the reporting date.

AAA Investments Credit Agreement

On April 30, 2015, Apollo entered into a revolving credit agreement with AAA Investments ("AAA Investments Credit Agreement"). Under the terms of the AAA Investments Credit Agreement, the Company shall make available to AAA Investments one or more advances at the discretion of AAA Investments in the aggregate amount not to exceed a balance of $10.0 million at an applicable rate of LIBOR plus 1.5%. The Company receives an annual commitment fee of 0.125% on the unused portion of the loan. As of September 30, 2017 and December 31, 2016, $4.0 million had been advanced by the Company and remained outstanding on the AAA Investments Credit Agreement.

Regulated Entities

Apollo Global Securities, LLC ("AGS") is a registered broker dealer with the SEC and is a member of the Financial Industry Regulatory Authority, subject to the minimum net capital requirements of the SEC. AGS was in compliance with these requirements at September 30, 2017. From time to time, this entity is involved in transactions with related parties of Apollo, including portfolio companies of the funds Apollo manages, whereby AGS earns underwriting and transaction fees for its services.

Other Transactions

The Company recognized $6.2 million of other income in the condensed consolidated statement of operations from the assignment of a CLO collateral management agreement to a related party during the three months ended September 30, 2017.

14. COMMITMENTS AND CONTINGENCIES

Investment Commitments-As a limited partner, general partner and manager of the Apollo funds, Apollo had unfunded capital commitments as of September 30, 2017 and December 31, 2016 of $1.5 billion and $0.6 billion, respectively.

Debt Covenants-Apollo's debt obligations contain various customary loan covenants. As of September 30, 2017, the Company was not aware of any instances of non-compliance with the financial covenants contained in the documents governing the Company's debt obligations.

Guarantees-Apollo entered into an agreement to guarantee 20% of a consolidated VIE's outstanding secured borrowings of $90.5 million with a third party lending institution. The amount guaranteed by Apollo as of September 30, 2017 was $18.1 million.

Litigation and Contingencies-Apollo is, from time to time, party to various legal actions arising in the ordinary course of business including claims and lawsuits, reviews, investigations or proceedings by governmental and self-regulatory agencies regarding its business.

Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of Apollo have received subpoenas and other requests for information from various government regulatory agencies and investors in Apollo's funds, seeking information regarding the use of placement agents. California Public Employees' Retirement System ("CalPERS") announced on October 14, 2009, that it had initiated a special review of placement agents and related issues. The report of the CalPERS' Special Review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of Apollo or its affiliates. Apollo is continuing to cooperate with all such investigations and other reviews. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital Research, LLC ("Arvco") (a placement agent that Apollo has used) and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS's purchase of securities in various funds managed by Apollo and another asset manager. Apollo is not a party to the civil lawsuit and the lawsuit does not allege any misconduct on the part of Apollo. Likewise, on April 23, 2012, the SEC filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by Apollo. This lawsuit also does not allege wrongdoing on the part of Apollo, and alleges that Apollo was defrauded by Arvco, Villalobos, and Buenrostro. On March 14, 2013, the United States Department of Justice unsealed an indictment against Messrs. Villalobos and Buenrostro alleging, among other crimes, fraud in connection with those same activities; again, Apollo is not accused of any wrongdoing and in fact is alleged to have been defrauded by the defendants. The criminal action was set for trial in a San Francisco federal court in July 2014, but was put on hold after Mr. Buenrostro pleaded guilty on July 11, 2014. As part of Mr. Buenrostro's plea agreement, he admitted to taking cash and other bribes from Mr. Villalobos in exchange for several improprieties, including attempting to influence CalPERS' investing decisions and improperly preparing disclosure letters to satisfy Apollo's requirements. There is no suggestion that Apollo was aware that Mr. Buenrostro had signed the letters with a corrupt motive. The government has indicated that they will file new charges against Mr. Villalobos incorporating Mr. Buenrostro's admissions. On August 7, 2014, the government filed a superseding indictment against Mr. Villalobos asserting additional charges. Trial had been scheduled for February 23, 2015, but Mr. Villalobos passed away on January 13, 2015. Additionally, on April 15, 2013, Mr. Villalobos, Arvco and related entities (the "Arvco Debtors") brought a civil action in the United States Bankruptcy Court for the District of Nevada (the "Bankruptcy Court") against Apollo. The action is related to the ongoing bankruptcy proceedings of the Arvco Debtors. This action alleges that Arvco served as a placement agent for Apollo in connection with several funds associated with Apollo, and seeks to recover purported fees the Arvco Debtors claim Apollo has not paid them for a portion of Arvco's placement agent services. In addition, the Arvco Debtors allege that Apollo has interfered with the Arvco Debtors' commercial relationships with third parties, purportedly causing the Arvco Debtors to lose business and to incur fees and expenses in the defense of various investigations and litigations. The Arvco Debtors also seek compensation from Apollo for these alleged lost profits and fees and expenses. The Arvco Debtors' complaint asserts various theories of recovery under the Bankruptcy Code and common law. Apollo denies the merit of all of the Arvco Debtors' claims and will vigorously contest them. The Bankruptcy Court had stayed this action pending the result in the criminal case against Mr. Villalobos but lifted the stay on May 1, 2015; in light of Mr. Villalobos's death, the criminal case was dismissed. On August 25, 2016, Christina Lovato, in her capacity as the

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

Chapter 7 Trustee for the Arvco Debtors, filed an amended complaint. On March 20, 2017, the court granted Apollo's motion to dismiss the equitable claims asserted in the amended complaint, leaving just two breach of contract claims remaining. On October 20, 2017, Apollo moved for summary judgment as to the trustee's remaining claims and a counterclaim by Apollo that seeks indemnification for attorneys' fees and expenses. No estimate of possible loss, if any, can be made at this time.

On June 18, 2014, BOKF N.A. (the "First Lien Trustee"), the successor indenture trustee under the indenture governing the First Lien Notes issued by Momentive Performance Materials, Inc. ("Momentive"), commenced a lawsuit in the Supreme Court for the State of New York, New York County against AGM and members of an ad hoc group of Second Lien Noteholders (including, but not limited to, Euro VI (BC) S.a.r.l.). The First Lien Trustee amended its complaint on July 2, 2014 (the "First Lien Intercreditor Action"). In the First Lien Intercreditor Action, the First Lien Trustee seeks, among other things, a declaration that the defendants violated an intercreditor agreement entered into between holders of the First Lien Notes and holders of the second lien notes. On July 16, 2014, the successor indenture trustee under the indenture governing the 1.5 Lien Notes (the "1.5 Lien Trustee," and, together with the First Lien Trustee, the "Indenture Trustees") filed an action in the Supreme Court of the State of New York, New York County that is substantially similar to the First Lien Intercreditor Action (the "1.5 Lien Intercreditor Action," and, together with the First Lien Intercreditor Action, the "Intercreditor Actions"). AGM subsequently removed the Intercreditor Actions to federal district court, and the Intercreditor Actions were automatically referred to the Bankruptcy Court adjudicating the Momentive chapter 11 bankruptcy cases. The Indenture Trustees then filed motions with the Bankruptcy Court to remand the Intercreditor Actions back to the state court (the "Remand Motions"). On September 9, 2014, the Bankruptcy Court denied the Remand Motions. On August 15, 2014, the defendants in the Intercreditor Actions (including AGM) filed a motion to dismiss the 1.5 Lien Intercreditor Action and a motion for judgment on the pleadings in the First Lien Intercreditor Action (the "Dismissal Motions"). On September 30, 2014, the Bankruptcy Court granted the Dismissal Motions. In its order granting the Dismissal Motions, the Bankruptcy Court gave the Indenture Trustees until mid-November 2014 to move to amend some, but not all, of the claims alleged in their respective complaints. On November 14, 2014, the Indenture Trustees moved to amend their respective complaints pursuant to the Bankruptcy Court's order (the "Motions to Amend"). On January 9, 2015, the defendants filed their oppositions to the Motions to Amend. On January 16, 2015, the Bankruptcy Court denied the Motions to Amend (the "Dismissal Order"), but gave the Indenture Trustees until March 2, 2015 to seek to amend their respective complaints. On March 2, 2015, the First Lien Trustee filed a motion seeking to amend its complaint. On April 10, 2015, the defendants, including AGM and Euro VI (BC) S.a.r.l., filed an opposition to the First Lien Trustee's motion to amend. Instead of moving again to amend its complaint, the 1.5 Lien Trustee chose to appeal the Dismissal Order (the "1.5 Lien Appeal"). On March 30, 2015, the 1.5 Lien Trustee filed its Statement of Issues and Designation of Record on Appeal. On March 31, 2015, because the legal issues presented in the 1.5 Lien Appeal are substantially similar to those presented in the First Lien Intercreditor Action, the parties in the 1.5 Lien Appeal submitted a joint stipulation and proposed order to the District Court staying the briefing schedule on the 1.5 Lien Appeal pending the outcome of the First Lien Trustee's most recent motion to amend. On April 13, 2015, the Defendants filed their Counter-Designation of the Record on Appeal in the 1.5 Lien Appeal. On May 8, 2015, the Bankruptcy Court denied the motion to amend filed on March 2, 2015 by the First Lien Trustee. On May 27, 2015, the First Lien Trustee filed a notice of appeal from the orders of the Bankruptcy Court dismissing the First Lien Intercreditor Action and denying the First Lien Trustee's motions to amend (the "First Lien Appeal"). On June 2, 2015, the First Lien Trustee filed its Statement of Issues and Designation of Record on Appeal. On June 24, 2015, the defendants filed their Counter-Designation of the Record on Appeal in the First Lien Appeal. On July 31, 2015, the 1.5 Lien Trustee sent a letter to the federal district court hearing the 1.5 Lien Appeal asking the court to consolidate the 1.5 Lien Appeal with the First Lien Appeal which had been assigned to a different judge (the "Consolidation Request"). On April 8, 2016, the court granted the Consolidation Request. On May 20, 2016, the Indenture Trustees filed their opening appellate brief. The Appellees filed their response brief on July 14, 2016, and the Indenture Trustees filed their reply brief on August 5, 2016. On October 2, 2017, the court stayed the Intercreditor Actions pending a decision by the U.S. Court of Appeals for the Second Circuit in an appeal concerning the Momentive chapter 11 bankruptcy cases. On October 20, 2017, the Second Circuit issued its ruling in the appeal concerning the Momentive chapter 11 bankruptcy cases, but no further proceedings have been held in the Intercreditor Actions. Apollo is unable at this time to assess a potential risk of loss. In addition, Apollo does not believe that AGM is a proper defendant in these actions.

As at September 30, 2017, there still were several pending actions concerning transactions related to Caesars Entertainment Corporation ("Caesars Entertainment"), Caesars Entertainment Operating Company, Inc. ("CEOC") and certain of their respective subsidiaries. However, on October 6, 2017 all of the conditions precedent to the effectiveness of the Plan (as defined below in A.) were fulfilled and the Plan became effective. As a result, the cases referred to below in B., C., D., F., G. and H. have been dismissed with prejudice (the case referred to below in E. had previously been dismissed) and the release of claims running in favor of the Apollo Released Parties (as defined below in A.) have become effective. The descriptions of the cases set forth below are as at September 30, 2017 and are subject to this post-September 30, 2017 update.

APOLLO GLOBAL MANAGEMENT, LLC

FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

A. In re: Caesars Entertainment Operating Company, Inc. bankruptcy proceedings, No. 15-01145 (N.D. Ill. Bankr.) (the "Illinois Bankruptcy Action"). On January 17, 2017, an order was entered in the Illinois Bankruptcy Action confirming a plan of reorganization for CEOC and its debtor subsidiaries (the "Plan") which, inter alia, grants broad releases to Apollo and others. The Plan is likely to become effective in the third quarter of 2017 after the conditions to its effectiveness have been satisfied. On the effective date of the Plan (the "Plan Effective Date"), the Apollo Released Parties (as defined below) will be released from the claims in the WSFS Action, the UMB Action, the Trilogy Action, the Danner Action, the BOKF Action, the UMB SDNY Action, the Wilmington Trust Action and the CEOC Action (each as defined below).

- Background: On January 12, 2015, three holders of CEOC second lien notes filed an involuntary bankruptcy petition against CEOC in the United States Bankruptcy Court for the District of Delaware (the "Delaware Bankruptcy Action"). On January 15, 2015, CEOC and certain of its affiliates (collectively the "Debtors") filed the Illinois Bankruptcy Action under Chapter 11 in the Northern District of Illinois. On February 2, 2015, the court in the Delaware Bankruptcy Action ordered that all bankruptcy proceedings relating to the Debtors should take place in the Illinois Bankruptcy Action. The Illinois Bankruptcy Court held an evidentiary hearing to determine whether the Debtors' petition date was January 12, 2015 or January 15, 2015; this motion has not yet been ruled on by the Illinois Bankruptcy Court, and pursuant to the Plan this motion will be dismissed as moot. Certain of the Debtors' creditors indicated in filings with the Illinois Bankruptcy Court that an investigation into certain acts and transactions that predated the Debtors' bankruptcy filing could lead to claims against a number of parties, including AGM and certain of its affiliates. No such claims were brought by the Debtors' prepetition creditors against Apollo in the Illinois Bankruptcy Action. On May 13, 2016, the Official Committee of Second Priority Noteholders (the "Second Lien Noteholders Committee") filed a motion seeking an Order granting it standing to commence, prosecute and settle claims on behalf of the Debtors' estates (the "Standing Motion"). The proposed complaint filed with the Standing Motion names Apollo and many others as defendants (see also "H" below). On or about September 27, 2016, Caesars Entertainment and the Debtors announced that they had received confirmations from representatives of the Debtors' major creditor groups of those groups' support for a term sheet that describes the key economic terms of a proposed consensual chapter 11 plan for the Debtors. On October 4, 2016, the Debtors filed the Third Amended Joint Plan of Reorganization which subsequently was amended and became the Plan. As part of the Plan, and in connection with the merger between Caesars Entertainment and Caesars Acquisition Company ("CAC"), funds managed by Apollo will not retain any of their equity interests in the merged Caesars Entertainment on account of their pre-merger Caesars Entertainment shares. Such equity interests would, instead, be for the benefit of CEOC's creditors. Funds managed by Apollo will, however, retain their equity interests in the merged Caesars Entertainment on account of their CAC shares. The voting deadline on the Plan was November 21, 2016, and approximately 90% in dollar amount of the Debtors' creditors voted in favor of the Plan. On October 17, 2016, the Bankruptcy Court granted the Debtors' requested injunction of the WSFS, Trilogy, Danner, UMB, Wilmington Trust and BOKF Actions (defined below "B", "C", "D", "F" and "G") (the "105 Injunction") through the first omnibus hearing after Plan confirmation, and by order dated January 26, 2017 the 105 Injunction was extended to, inter alia, the Plan Effective Date. At the confirmation hearing, no creditor presented any objection to the Plan. As noted above, the Plan was confirmed by the Illinois Bankruptcy Court and will become effective after the conditions to its effectiveness have been satisfied. The Plan provides several parties, including, AGM and certain of its affiliates (collectively referred to as the "Apollo Released Parties") with a release of claims that the Debtors and the Debtors' creditors have or may have against any or all of the Apollo Released Parties, including those described below in the WSFS Action, the Trilogy Action, the Danner Action, the UMB Action, the BOKF Action, the Wilmington Trust Action and the CEOC Action.

B. Wilmington Savings Fund Society, FSB v. Caesars Entertainment Corp. et al., No. 10004-CVG (Del. Ch.) (the "WSFS Action"). On August 4, 2014, Wilmington Savings Fund Society, FSB ("WSFS"), as trustee for certain CEOC second-lien notes, sued Caesars Entertainment, CEOC, other Caesars Entertainment-affiliated entities, and certain of Caesars Entertainment's directors, including Marc Rowan, Eric Press, David Sambur (each an Apollo Partner) and Jeffrey Benjamin (a consultant to Apollo), in Delaware's Court of Chancery (the "Delaware Court"). WSFS (i) asserts claims (against some or all of the defendants) for fraudulent conveyance, breach of fiduciary duty, breach of contract, corporate waste, and aiding and abetting related to certain transactions among CEOC and certain of its subsidiaries and Caesars Entertainment and certain of its affiliates, and (ii) requests (among other things) that the Delaware Court unwind the challenged transactions and award damages. WSFS served a subpoena for documents on Apollo on September 11, 2014, but Apollo's response was stayed during the pendency of motions to dismiss under a September 23, 2014 stipulated order. On March 18, 2015, the Delaware Court denied Defendants' motion to dismiss. Apollo served responses and objections to WSFS'

subpoena on March 25, 2015. Caesars Entertainment answered the complaint on April 1, 2015. During the pendency of CEOC's bankruptcy proceedings, the WSFS Action has been automatically stayed with respect to CEOC. WSFS additionally advised the Illinois Bankruptcy Court that, during CEOC's bankruptcy proceedings, WSFS would only pursue claims in the WSFS Action relating to whether Caesars Entertainment remains liable on a guarantee of certain of CEOC's second priority notes. On July 17, 2015, WSFS served supplemental subpoenas to several entities affiliated with AGM, and AGM and these entities have substantially completed their production of non-privileged documents responsive to those subpoenas. On March 11, 2016, WSFS filed a motion for partial summary judgment (the "Summary Judgment Motion") on its breach of contract claim against Caesars Entertainment. On April 25, 2016, Caesars Entertainment filed a joint Cross-Motion for Partial Summary Judgment and answering brief in opposition to WSFS' Summary Judgment Motion (the "Cross-Motion"). WSFS filed its joint reply and opposition to Caesars Entertainment's Cross-Motion on May 25, 2016, and Caesars Entertainment filed a reply to WSFS' opposition on June 9, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code enjoining the plaintiffs in the WSFS Action from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the WSFS Action initially through the first omnibus hearing after Plan confirmation, and now through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the WSFS Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

C. Trilogy Portfolio Company, L.L.C., et al. v. Caesars Entertainment Corp., et al., No. 14-cv-7091 (S.D.N.Y.) (the "Trilogy Action"). On September 3, 2014, institutional investors allegedly holding approximately $137 million in CEOC unsecured senior notes sued CEOC and Caesars Entertainment in federal court in New York (the "New York Court") for breach of contract and the implied covenant of good faith, Trust Indenture Act ("TIA") violations, and a declaratory judgment challenging the August 2014 private financing transaction in which a portion of outstanding senior unsecured notes were purchased by Caesars Entertainment, and a majority of the noteholders agreed to amend the indenture to terminate Caesars Entertainment's guarantee of the notes and modify certain restrictions on CEOC's ability to sell assets. Caesars Entertainment and CEOC filed a motion to dismiss on November 12, 2014. On January 15, 2015, the New York Court granted the motion with respect to a TIA claim by Trilogy but otherwise denied the motion. On January 30, 2015, plaintiffs filed an amended complaint seeking relief against Caesars Entertainment only, and Caesars Entertainment answered on February 12, 2015. On October 2, 2014, a related putative class action complaint was filed on behalf of the holders of these notes captioned Danner v. Caesars Entertainment Corp., et al., No. 14-cv-7973 (S.D.N.Y.) (the "Danner Action"), against Caesars Entertainment alleging claims similar to those in the Trilogy Action. On February 19, 2015, plaintiffs filed an amended complaint, and Caesars Entertainment answered the amended complaint on February 25, 2015. In March 2015, each of Trilogy and Danner served subpoenas for documents on Apollo. Apollo produced responsive, non-privileged documents in response to those subpoenas. In July 2015, Trilogy and Danner served subpoenas for depositions on Apollo and those depositions were completed on September 22, 2015. On October 23, 2015, Trilogy and Danner filed motions for partial summary judgment, related to TIA and breach of contract claims. On December 29, 2015, the New York Court denied the motions for partial summary judgment. On March 23, 2016, the judge presiding over the Trilogy and Danner Actions announced that she was retiring from the bench effective April 28, 2016. A new judge was assigned to preside over the Trilogy and Danner Actions (in addition to the BOKF, UMB SDNY and Wilmington Trust Actions, defined below). On April 6, 2016, the parties agreed to a renewed summary judgment schedule for the Trilogy, Danner, BOKF, UMB SDNY (as defined below) and Wilmington Trust Actions. The moving parties submitted their briefs to the New York Court on May 10, 2016. Opposition briefs were filed on May 31, 2016. Reply briefs were filed on June 14, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code, enjoining the plaintiffs in the Trilogy and Danner Actions from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction, staying the Trilogy and Danner Actions initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the Trilogy and Danner Actions. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

D. UMB Bank v. Caesars Entertainment Corporation, et al., No. 10393 (Del. Ch.) (the "UMB Action"). On November 25, 2014, UMB Bank, as trustee for certain CEOC notes, sued Caesars Entertainment, CEOC, other Caesars Entertainment-affiliated entities and certain of Caesars Entertainment's directors, including Marc Rowan, Eric Press, David Sambur (each an Apollo Partner) and Jeffrey Benjamin (an Apollo consultant), in the Delaware Court. The UMB Action alleges claims for actual and constructive fraudulent conveyance and transfer, insider preferences, illegal dividends, breach of contract, intentional interference with contractual relations, breach of fiduciary duty, aiding and abetting breach of fiduciary

duty, usurpation of corporate opportunities, and unjust enrichment. The UMB Action seeks appointment of a receiver for CEOC, a constructive trust and other relief. The UMB Action has been assigned to the same judge overseeing the WSFS Action. The UMB Action has effectively been stayed since April 7, 2016, and on October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the UMB Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the UMB Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

E. Koskie v. Caesars Acquisition Company, et al., No. A-14-711712-C (Clark Cnty Nev. Dist. Ct.) (the “Koskie Action”). On December 30, 2014, Nicholas Koskie brought a shareholder class action on behalf of shareholders of Caesars Acquisition Company (“CAC”) against CAC, Caesars Entertainment, and members of CAC’s Board of Directors, including Marc Rowan and David Sambur (each an Apollo partner). The lawsuit challenges CAC’s and Caesars Entertainment’s plan to merge, alleging that the proposed transaction will not give CAC shareholders fair value. Koskie asserts claims for breach of fiduciary duty relating to the director defendants’ interrelationships with the entities involved the proposed transaction. The case has been dismissed for failure to prosecute, and the time granted to the plaintiff to refile has passed without there being any refiling.

F. BOKF, N.A. v. Caesars Entertainment Corporation, No. 15-156 (S.D.N.Y) (the “BOKF Action”). On March 3, 2015, BOKF, N.A., as trustee for certain CEOC notes, sued Caesars Entertainment in the New York Court. The lawsuit alleges claims for breach of contract, intentional interference with contractual relations and a declaratory judgment, and seeks to enforce Caesars Entertainment’s guarantee of certain CEOC notes. The BOKF Action has been assigned to the same judge in the New York Court as the Trilogy and Danner Actions. On March 25, 2015, Caesars Entertainment filed an answer to the complaint. On May 19, 2015, BOKF sent the New York Court a letter requesting permission to file a partial summary judgment motion on Counts II and V of its complaint, related to the validity and enforceability of Caesars Entertainment’s guarantee of certain notes issued by CEOC and alleged violations of the Trust Indenture Act, 15 U.S.C. §§ 76aaa, et seq. The Trilogy and Danner plaintiffs did not join BOKF’s request to file for partial summary judgment. On May 28, 2015, the New York Court granted BOKF permission to move for partial summary judgment. On June 15, 2015, another related complaint captioned UMB Bank, N.A. v. Caesars Entertainment Corp., et al., No. 15-cv-4634 (S.D.N.Y.) (the “UMB SDNY Action”) was filed by UMB Bank, N.A., solely in its capacity as Indenture Trustee of certain first lien notes (“UMB”), against Caesars Entertainment alleging claims similar to those alleged in the BOKF, Trilogy and Danner Actions. On June 16, 2015, UMB sent a letter to the New York Court requesting permission to file a partial summary judgment motion on the same schedule with BOKF. On June 26, 2015, BOKF and UMB filed partial summary judgment motions (the “Partial Summary Judgment Motions”). On July 24, 2015, Caesars Entertainment filed its opposition to the Partial Summary Judgment Motions, and on August 7, 2015, BOKF and UMB filed reply briefs in further support of the Partial Summary Judgment Motions. On August 27, 2015, the New York Court denied the Partial Summary Judgment Motions and certified its opinion for an interlocutory appeal to the United States Court of Appeals for the Second Circuit. On December 22, 2015, the Second Circuit declined to hear the interlocutory appeal. Separately, on November 20, 2015, BOKF and UMB filed a second set of motions for partial summary judgment, on the issue of the disputed contract interpretation related to indenture release provisions. On January 5, 2016 the New York Court denied these motions. At a hearing on February 22, 2016, the New York Court bifurcated the trial in the BOKF and UMB SDNY Actions and scheduled the trial on the breach of contract and TIA claims to begin on March 14, 2016. The New York Court ordered a separate trial on the claims for breach of the covenant of good faith and fair dealing and tortious interference with contract to begin at a later date to be determined. On February 26, 2016, the Illinois Bankruptcy Court granted the stay request as to the BOKF Action until May 9, 2016, resulting in a stay of the trial on the breach of contract and TIA claims in the BOKF and UMB SDNY Actions. On February 24, 2016, Caesars Entertainment filed a motion for partial summary judgment to dispose of the claims for (1) breach of the implied covenant of good faith and fair dealing brought by BOKF and UMB, and (2) intentional interference with contractual relations brought by BOKF. The moving parties submitted their briefs on May 10, 2016. Opposition briefs were filed on May 31, 2016. Reply briefs were filed on June 14, 2016. On June 15, 2016, the Illinois Bankruptcy Court issued a temporary restraining order and preliminary injunction pursuant to Section 105(a) of the Bankruptcy Code, enjoining the plaintiffs in the BOKF Action from prosecuting actions against Caesars Entertainment until August 29, 2016. On October 17, 2016, after several motions and appeals relating to extending the stay past August 29, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the BOKF Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the BOKF Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

G. Wilmington Trust, National Association v. Caesars Entertainment Corporation, No. 15-cv-08280 (S.D.N.Y.) (the "Wilmington Trust Action"). On October 20, 2015, Wilmington Trust, N.A., solely in its capacity as Indenture Trustee for the 10.75% Notes due 2016 ("Wilmington Trust"), sued Caesars Entertainment in the New York Court alleging claims similar to those alleged in the BOKF, UMB, Trilogy, and Danner Actions. The parties cross-moved for partial summary judgment on the same schedule as the Trilogy Action. Caesars Entertainment argued that its actions did not violate the TIA and that its guarantee of the 10.75% Notes was automatically released under a certain clause contained in the indenture governing the 10.75% Notes. Wilmington Trust argued that Caesars Entertainment's actions constituted an improper out-of-court reorganization under the TIA and that Caesars Entertainment's guarantee was not released because the necessary conditions precedent did not occur. Although the temporary restraining order and preliminary injunction issued by the Illinois Bankruptcy Court did not apply to the Wilmington Trust Action, on July 6, 2016, Wilmington Trust and Caesars Entertainment filed a stipulation staying the Wilmington Trust Action until August 29, 2016. The New York Court scheduled oral argument for August 30, 2016. A motion was made by CEOC and the other Debtors to the Illinois Bankruptcy Court to extend the stay beyond August 29, 2016, which motion was denied. On October 17, 2016, the Illinois Bankruptcy Court granted the 105 Injunction staying the Wilmington Trust Action initially through the first omnibus hearing after Plan confirmation and now by order dated January 26, 2017 through, inter alia, the Plan Effective Date. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the Wilmington Trust Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

H. CEOC v. Caesars Entertainment et al., Illinois Bankruptcy Court (the "CEOC Action"). On or about August 9, 2016, CEOC and certain of the other Debtors commenced a "placeholder" lawsuit against Caesars Entertainment, AGM, Caesars Entertainment directors (including Messrs. Rowan, Sambur, Press and Benjamin) and certain of its officers, and many others to, inter alia, prevent the statute of limitations from running respecting any claim owned by a Debtor's estate. This lawsuit basically asserts the claims identified in the Examiner's Report and has been stayed by an order of the Bankruptcy Court. Pursuant to the Plan, the Apollo Released Parties will be released from all claims relating to the CEOC Action. As aforementioned, the Plan was confirmed by an order dated January 17, 2017.

Apollo believes that the claims in the WSFS Action, the UMB Action, the Trilogy Action, the Danner Action, the Koskie Action, the BOKF Action, the UMB SDNY Action, the Wilmington Trust Action and the CEOC Action are without merit. For this reason, and because the confirmed Plan has not become effective yet, no reasonable estimate of possible loss, if any, can be made at this time.

The Bankruptcy Court administering the CEOC bankruptcy proceedings appointed an examiner (the "Examiner") to report on certain transactions engaged in by CEOC and certain of its subsidiaries. The Examiner issued his report on March 16, 2016. The Examiner's report states that potential claims may exist against "Apollo" and persons affiliated with it relating to certain transactions that occurred in the years preceding CEOC's bankruptcy filing, principally relating to Bankruptcy Code fraudulent conveyance claims as well as aiding and abetting claims. Apollo and persons affiliated with it deny any wrongdoing and deny any liability in connection with such transactions, and if any new claim is asserted against any of them, such claim will be vigorously contested.

Following the January 16, 2014 announcement that CEC Entertainment, Inc. ("CEC") had entered into a merger agreement with certain entities affiliated with Apollo (the "Merger Agreement"), four putative shareholder class actions were filed in the District Court of Shawnee County, Kansas on behalf of purported stockholders of CEC against, among others, CEC, its directors and Apollo and certain of its affiliates, which include Queso Holdings Inc., Q Merger Sub Inc., Apollo Management VIII, L.P., and AP VIII Queso Holdings, L.P. The first purported class action, which is captioned Hilary Coyne v. Richard M. Frank et al., Case No. 14C57, was filed on January 21, 2014 (the "Coyne Action"). The second purported class action, which was captioned John Solak v. CEC Entertainment, Inc. et al., Civil Action No. 14C55, was filed on January 22, 2014 (the "Solak Action"). The Solak Action was dismissed for lack of prosecution on October 14, 2014. The third purported class action, which is captioned Irene Dixon v. CEC Entertainment, Inc. et al., Case No. 14C81, was filed on January 24, 2014 and additionally names as defendants Apollo Management VIII, L.P. and AP VIII Queso Holdings, L.P. (the "Dixon Action"). The fourth purported class action, which is captioned Louisiana Municipal Public Employees' Retirement System v. Frank, et al., Case No. 14C97, was filed on January 31, 2014 (the "LMPERS Action") (together with the Coyne and Dixon Actions, the "Shareholder Actions"). A fifth purported class action, which was captioned McCullough v. Frank, et al., Case No. CC-14-00622-B, was filed in the County Court of Dallas County, Texas on February 7, 2014. This action was dismissed for want of prosecution on May 21, 2014. Each of the Shareholder Actions alleges, among other things, that CEC's directors breached their fiduciary duties to CEC's stockholders in connection with their consideration and approval of the Merger Agreement, including by agreeing to an inadequate price, agreeing to impermissible deal protection devices, and filing materially deficient disclosures regarding the transaction. Each of the Shareholder Actions

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

further alleges that Apollo and certain of its affiliates aided and abetted those alleged breaches. As filed, the Shareholder Actions seek, among other things, rescission of the various transactions associated with the merger, damages and attorneys' and experts' fees and costs. On February 7, 2014 and February 11, 2014, the plaintiffs in the Shareholder Actions pursued a consolidated action for damages after the transaction closed. Thereafter, the Shareholder Actions were consolidated under the caption In re CEC Entertainment, Inc. Stockholder Litigation, Case No. 14C57, and the parties engaged in limited discovery. On July 21, 2015, a consolidated class action complaint was brought by Twin City Pipe Trades Pension Trust in the Shareholder Actions that did not name as defendants Apollo, Queso Holdings Inc., Q Merger Sub Inc., Apollo Management VIII, L.P., or AP VIII Queso Holdings, L.P., continued to assert claims against CEC and its former directors, and added The Goldman Sachs Group Inc. ("Goldman Sachs") as a defendant. The consolidated complaint alleges, among other things, that CEC's former directors breached their fiduciary duties to CEC's stockholders by conducting a deficient sales process, agreeing to impermissible deal protection devices, and filing materially deficient disclosures regarding the transaction. It further alleges that two members of the board who also served as the senior managers of CEC had material conflicts of interest and that Goldman Sachs aided and abetted the board's breaches as a result of various conflicts of interest facing the bank. The consolidated complaint seeks, among other things, to recover damages, attorneys' fees and costs. On October 22, 2015, the parties to the consolidated action moved to dismiss the complaint. On March 1, 2017, the special master appointed by the Kansas court to oversee pre-trial proceedings recommended that the Kansas court grant defendants' motions to dismiss the complaint. On March 30, 2017, plaintiff moved for leave to amend the consolidated complaint. The proposed amended consolidated complaint does not name as defendants CEC or its former directors, and purports to substitute Goldman, Sachs & Co. in place of the Goldman Sachs Group Inc. on the claim for aiding and abetting breach of fiduciary duty. On June 1, 2017, the Court granted the parties' joint motion to dismiss all claims against CEC and the former directors, and dismissed the former CEC directors from the action. Although Apollo cannot predict the ultimate outcome of the consolidated action, and therefore no reasonable estimate of possible loss, if any, can be made at this time, Apollo believes that such action is without merit.

After the announcement of the execution of the Agreement and Plan of Merger among Apollo Commercial Real Estate Finance, Inc., Apollo Residential Mortgage, Inc. and Arrow Merger Sub, Inc. ("Merger Sub"), two putative class action lawsuits challenging the proposed merger, captioned Aivasian v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-001532, and Wiener v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-001837, were filed in the Circuit Court for Baltimore City. A putative class and derivative lawsuit was later filed in the same Court, captioned Crago v. Apollo Residential Mortgage, Inc., et al., No. 24-C-16-002610. Following a hearing on May 6, 2016, the Court entered orders among other things, consolidating the three actions under the caption In Re Apollo Residential Mortgage, Inc. Shareholder Litigation, Case No.: 24-C-16-002610. The plaintiffs have designated the Crago complaint as the operative complaint. The operative complaint includes both direct and derivative claims, names as defendants AGM, AMTG, the board of directors of AMTG (the "AMTG Board"), ARI, Merger Sub and Athene Holding and alleges, among other things, that the members of the AMTG Board breached their fiduciary duties to AMTG's stockholders and that the other defendants aided and abetted such fiduciary breaches. The operative complaint further alleges, among other things, that the proposed merger involves inadequate consideration, was the result of an inadequate and conflicted sales process, and includes unreasonable deal protection devices that purportedly preclude competing offers. It also alleges that the transactions with Athene Holding are unfair and that the registration statement on Form S-4 filed with the SEC on April 6, 2016 contains materially misleading disclosures and omits certain material information. The operative complaint seeks, among other things, certification of the proposed class, declaratory relief, preliminary and permanent injunctive relief, including enjoining or rescinding the merger, unspecified damages, and an award of other unspecified attorneys' and other fees and costs. On May 6, 2016, counsel for the plaintiffs filed with the Court a stipulation seeking the appointment of interim co-lead counsel, which stipulation was approved by the Court on June 9, 2016. Defendants' motions to dismiss were fully briefed on October 31, 2016, and oral argument was held on December 8, 2016. On August 14, 2017, the Court granted the defendants' motions and issued an opinion dismissing the operative complaint in its entirety with prejudice. The time to appeal the order dismissing the lawsuit has expired, and no appeals have been filed.

On March 4, 2016, the Public Employees Retirement System of Mississippi filed a putative securities class action against Sprouts Farmers Market, Inc. ("SFM"), several SFM directors (including Andrew Jhawar, an Apollo partner), AP Sprouts Holdings, LLC and AP Sprouts Holdings (Overseas), L.P. (the "AP Entities"), which are controlled by entities managed by Apollo affiliates, and two underwriters of a March 2015 secondary offering of SFM common stock. The AP Entities sold SFM common stock in the March 2015 secondary offering. The complaint, filed in Arizona Superior Court and captioned Public Employees Retirement System of Mississippi v. Sprouts Farmers Market, Inc. (CV2016-050480), alleges that SFM filed a materially misleading registration statement for the secondary offering that incorporated alleged misrepresentations in SFM's 2014 annual report regarding SFM's business prospects, and failed to disclose alleged accelerating produce deflation. The two causes of action against the AP Entities are for alleged violations of Sections 11 and 15 of the Securities Act of 1933. Plaintiff seeks, among other things, compensatory damages for alleged losses sustained from a decline in SFM's stock price. Defendants removed the case to United

FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

States District Court for the District of Arizona, but the court granted plaintiff's motion to remand the case to state court, which the defendants have appealed. Meanwhile, defendants moved to dismiss the action in state court, but the court denied that motion and the case is proceeding to discovery. Because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Between February 25 and March 23, 2016, plaintiffs filed five putative class actions in the Superior Court of Maricopa County, Arizona, on behalf of purported stockholders of Apollo Education Group, Inc. ("AEG") asserting claims for breaches of fiduciary duties and aiding and abetting the alleged breaches in connection with a proposed acquisition of AEG. The defendants include, among others, AEG, members of AEG's board of directors, AGM, Fund VIII, and certain subsidiaries of funds managed by Apollo. On April 12, 2016, the Court consolidated all the actions under the following caption: In re Apollo Education Group, Inc. Shareholder Litigation, Lead Case No. CV2016-001905 (Ariz. Super. Ct.). Shortly thereafter, the parties informed the Court that they had entered into a memorandum of understanding for a settlement that would, among other things, (i) provide for the dismissal with prejudice on the merits and release of any and all claims by the proposed class against the Defendants; and (ii) recognize that the pendency of the suit was, in part, a factor in the decision by the purchasers of AEG to increase the price offered to acquire all of the outstanding shares of AEG's common stock from $9.50 per share to $10.00 per share. On April 10, 2017, the parties filed settlement papers for the Court's review following the consummation of the merger agreement on February 1, 2017, the completion by plaintiffs of three confirmatory discovery depositions on February 27, 2017, and the execution of a stipulation of settlement by the parties. On October 6, 2017, the Court entered an Order and Final Judgment in which it (i) decreed that the class notice had been provided to the proposed class pursuant to and in the manner directed by the Order for Notice and Hearing entered on May 23, 2017 and June 29, 2017, (ii) certified the non-opt-out settlement class, and (iii) fully and finally approved the settlement in all respects, including the dismissal of the action with prejudice in full and final discharge of any and all claims by the class against the defendants. The Order and Final Judgment further provides for the agreed upon award of $2.1 million to plaintiffs' counsel for fees and expenses and that amount has in fact been paid by Apollo Education Group.

On June 20, 2016 Banca Carige S.p.A. ("Carige") commenced a lawsuit in the Court of Genoa (Italy) (No. 8965/2016), against its former Chairman, its former Chief Executive Officer, AGM and certain entities (the "Apollo Entities") organized and owned by investment funds managed by affiliates of AGM. The complaint alleges that AGM and the Apollo Entities (i) aided and abetted breaches of fiduciary duty to Carige allegedly committed by Carige's former Chairman and former CEO in connection with the sale to the Apollo Entities of Carige subsidiaries engaged in the insurance business; and (ii) took wrongful actions aimed at weakening Banca Carige's financial condition supposedly to facilitate an eventual acquisition of Carige. The causes of action are based in tort under Italian law. Carige purportedly seeks damages of €450 million in connection with the sale of the insurance businesses and €800 million for other losses. The first hearings were held on May 17, 2017 and on June 14, 2017. Based on the allegations made in the complaint, Apollo believes that there is no merit to Carige's claims. Additionally, as the case is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

On December 12, 2016, the CORE Litigation Trust (the "Trust"), which was created under the Chapter 11 reorganization plan for CORE Media and other affiliated entities, including CORE Entertainment, Inc. ("CORE"), approved by the Southern District of New York Bankruptcy Court on September 22, 2016, commenced an action in California Superior Court for Los Angeles County, captioned Core Litigation Trust v. Apollo Global Management, LLC, et al., Case No. BC 643732, which was removed to the United States District Court for the Central District of California on February 3, 2017. On April 5, 2017, the C.D. Cal. District Court granted Defendants' motion to transfer the case to the Southern District of New York ("SDNY") and denied the Trust's motion to remand the action to California state court, without prejudice to the Trust refiling its remand motion in the SDNY. On April 20, 2017, the SDNY District Court referred the case to the SDNY Bankruptcy Court. On July 17, 2017, the SDNY Bankruptcy Court granted the Trust's motion for mandatory abstention and remanded the case to Los Angeles County Superior Court. On October 3, 2017, the Los Angeles County Superior Court granted defendants' motion to stay all proceedings in the California state court action on forum non conveniens grounds in favor of litigating the case in New York state court. The Trust has not yet filed an action in New York state court. The Trust's complaint asserts claims for inducing the breach of and tortiously interfering with $360 million in loans under the 2011 loan agreements entered into between CORE and certain First and Second Lien Lenders (the "Lenders"), who assigned their loan-agreement claims to the Trust as part of CORE's Chapter 11 plan of reorganization. The complaint names as defendants: (i) AGM, (ii) Apollo Global Securities, LLC, (iii) other AGM subsidiaries, (iv) the funds managed by Apollo that were the beneficial owners of CORE Media (the "CORE Funds"), (v) certain affiliated-entities through which the CORE Funds owned their beneficial interest in CORE Media, (vi) Twenty-First Century Fox, Inc. ("Fox") and certain Fox affiliates, and (vii) Endemol USA Holding, Inc. ("Endemol") and certain Endemol-affiliated entities. The Trust alleges that defendants' participation in certain transactions related to CORE, including the December 12, 2014 formation of the joint venture through which the CORE Funds and Fox beneficially owned CORE Media and Endemol Shine, induced CORE to breach the loan agreements and tortiously interfered with CORE's performance of its obligations under the loan agreements. The Trust seeks unspecified

compensatory and punitive damages. Apollo believes these claims are without merit. Because this action is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

In December 2016, the Company received a subpoena from the SEC principally concerning the Company's disclosure of IRR calculations for certain private equity funds, costs associated with a European service provider, and certain personnel changes. These topics generally track matters with which the Company is familiar and has previously examined. The Company is fully cooperating with the SEC in this matter.

On August 3, 2017, a putative class action was commenced in the United States District Court for the Middle District of Florida against AGM, Gareth Turner (an Apollo Partner) and Mark Beith (a former Apollo Principal) by Michael McEvoy on behalf of a class of current and former employees of subsidiaries of CEVA Group, LLC (“CEVA Group”) who purchased restricted Class A shares in CEVA Investment Limited (“CIL”), the former parent company of CEVA Group. The complaint alleges that the defendants breached fiduciary duties to and defrauded the plaintiffs by inducing them to purchase shares in CIL and subsequently participating in a debt restructuring of CEVA Group in which shareholders of CIL did not receive a recovery. The complaint purports to seek damages in excess of €14 million. On October 18, 2017, the bankruptcy trustee for CIL filed a motion in the Bankruptcy Court for the Southern District of New York to prevent Mr. McEvoy and his counsel from continuing to prosecute the Florida action on the basis that the relevant claims belong to the CIL bankruptcy estate. The Bankruptcy Court has not yet ruled on the motion. Based on the allegations in the complaint, Apollo believes that there is no merit to the claims. Additionally, as the case is in its early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Between July 25 and August 15, 2017, plaintiffs filed three purported stockholder class actions in the Nevada state and federal court against ClubCorp Holdings Inc. (“ClubCorp”), the directors of ClubCorp, and AGM, in connection with the proposed acquisition of ClubCorp. The cases in the District Court for Clark County, Nevada were originally captioned Meng v. ClubCorp Holdings, Inc., et al., No. A-17-758912-B (“Meng”); Baum v. Affeldt, et al., No. A-17-759227-C (“Baum”); and Solak v. Affeldt, et al., No. A-17-759987-B (“Solak”). On August 16, 2017, the Meng and Baum actions were consolidated with two other similar actions that did not name AGM as a defendant. The consolidated action is captioned In re ClubCorp Holdings Shareholder Litigation, Case No. A-17-758912-B (“In re ClubCorp”). On September 21, 2017, the Solak action was consolidated into In re ClubCorp. On October 12, 2017, plaintiffs in In re ClubCorp filed a consolidated amended complaint. The complaint purports to assert claims against the directors of ClubCorp for allegedly breaching their fiduciary duties of loyalty, due care, good faith, and candor owed to the plaintiff and the public stockholders of ClubCorp. The complaint includes allegations that the directors, among other things, agreed to a transaction at an unreasonably low price, failed to take the necessary steps to maximize stockholder value, gave preferential severance benefits to certain executives, agreed to preclusive deal protection provisions, and included materially incomplete and misleading information in the proxy statement recommending that stockholders vote in favor of the acquisition. The complaint also purports to assert a claim against AGM for aiding and abetting the directors’ purported breach of fiduciary duty. Because this action is in the early stages, no reasonable estimate of possible loss, if any, can be made.

Commitments and Contingencies-Apollo leases office space and certain office equipment under various lease and sublease arrangements, which expire on various dates through 2025. As these leases expire, it can be expected that in the normal course of business, they will be renewed or replaced. Certain lease agreements contain renewal options, rent escalation provisions based on certain costs incurred by the landlord or other inducements provided by the landlord. Rent expense is accrued to recognize lease escalation provisions and inducements provided by the landlord, if any, on a straight-line basis over the lease term and renewal periods where applicable. Apollo has entered into various operating lease service agreements in respect of certain assets.

As of September 30, 2017, the approximate aggregate minimum future payments required for operating leases were as follows:

	Remaining 2017	2018	2019	2020	2021	Thereafter	Total
Aggregate minimum future payments	$ 9,266	$ 34,643	$ 33,702	$ 15,563	$ 6,055	$ 13,313	$ 112,542

The Company received $19.0 million in proceeds in connection with the early termination of a lease during the three months ended September 30, 2017 which was recorded in other income (loss), net on the condensed consolidated statements of operations.

Expenses related to non-cancellable contractual obligations for premises, equipment, auto and other assets were $8.5 million and $10.0 million for the three months ended September 30, 2017 and 2016, respectively, and $28.3 million and $30.1 million for the nine months ended September 30, 2017 and 2016, respectively.

Other long-term obligations relate to payments with respect to certain consulting agreements entered into by Apollo Investment Consulting LLC, a subsidiary of Apollo, as well as long-term service contracts. A significant portion of these costs are reimbursable by funds or portfolio companies. As of September 30, 2017, fixed and determinable payments due in connection with these obligations were as follows:

	Remaining 2017	2018	2019	2020	2021	Thereafter	Total
Other long-term obligations	$ 8,291	$ 12,413	$ 3,525	$ 1,956	$ 1,956	$ 1,611	$ 29,752

Contingent Obligations**-**Carried interest income with respect to private equity funds and certain credit and real assets funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. If all of the existing investments became worthless, the amount of cumulative revenues that have been recognized by Apollo through September 30, 2017 and that would be reversed approximates $3.6 billion. Management views the possibility of all of the investments becoming worthless as remote. Carried interest income is affected by changes in the fair values of the underlying investments in the funds that Apollo manages. Valuations, on an unrealized basis, can be significantly affected by a variety of external factors including, but not limited to, bond yields and industry trading multiples. Movements in these items can affect valuations quarter to quarter even if the underlying business fundamentals remain stable.

Additionally, at the end of the life of certain funds that the Company manages, there could be a payment due to a fund by the Company if the Company, as general partner, has received more carried interest income than was ultimately earned. The general partner obligation amount, if any, will depend on final realized values of investments at the end of the life of each fund or as otherwise set forth in the respective limited partnership agreement of the fund. See note 13 to our condensed consolidated financial statements for further details regarding the general partner obligation.

Certain funds may not generate carried interest income as a result of unrealized and realized losses that are recognized in the current and prior reporting period. In certain cases, carried interest income will not be generated until additional unrealized and realized gains occur. Any appreciation would first cover the deductions for invested capital, unreturned organizational expenses, operating expenses, management fees and priority returns based on the terms of the respective fund agreements.

One of the Company's subsidiaries, AGS, provides underwriting commitments in connection with securities offerings to the portfolio companies of the funds Apollo manages. As of September 30, 2017, there were no underwriting commitments outstanding related to such offerings.

As of September 30, 2017, one of the Company's subsidiaries had unfunded contingent commitments of $29.8 million, to facilitate fundings at closing by lead arrangers for syndicated term loans issued by portfolio companies of funds managed by Apollo. The commitments expired on November 2, 2017 and were not funded.

Contingent Consideration**-**In connection with the acquisition of Stone Tower in April 2012, the Company agreed to pay the former owners of Stone Tower a specified percentage of any future carried interest income earned from certain of the Stone Tower funds, CLOs, and strategic investment accounts. This contingent consideration liability was determined based on the present value of estimated future carried interest payments, and is recorded in profit sharing payable in the condensed consolidated statements of financial condition. The fair value of the remaining contingent obligation was $87.3 million and $106.3 million as of September 30, 2017 and December 31, 2016, respectively.

The contingent consideration obligations will be remeasured to fair value at each reporting period until the obligations are satisfied and are characterized as Level III liabilities. The changes in the fair value of the contingent consideration obligations is reflected in profit sharing expense in the condensed consolidated statements of operations. See note 5 for further information regarding fair value measurements.

15. SEGMENT REPORTING

Apollo conducts its business primarily in the United States and substantially all of its revenues are generated domestically. Apollo's business is conducted through three reportable segments: private equity, credit and real assets. Segment

information is utilized by our Managing Partners, who operate collectively as our chief operating decision maker, to assess performance and to allocate resources. These segments were established based on the nature of investment activities in each underlying fund, including the specific type of investment made and the level of control over the investment.

The performance is measured by the Company's chief operating decision maker on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo's business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the affiliated funds.

Economic Income

Economic Income, or "EI", is a key performance measure used by management in evaluating the performance of Apollo's private equity, credit and real assets segments. Management believes the components of EI, such as the amount of management fees, advisory and transaction fees and carried interest income, are indicative of the Company's performance. Management uses EI in making key operating decisions such as the following:

- Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;
- Decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses; and
- Decisions relating to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in such funds and those of the Company's shareholders by providing such individuals a profit sharing interest in the carried interest income earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on the Company's performance and growth for the year.

EI is a measure of profitability and has certain limitations in that it does not take into account certain items included under U.S. GAAP. EI represents segment income before income tax provision excluding transaction-related charges arising from the 2007 private placement, and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions. In addition, segment data excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the condensed consolidated financial statements.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The following tables present financial data for Apollo's reportable segments as of and for the three months ended September 30, 2017 and 2016. Prior period financial data has been updated to conform to the current presentation.

	As of and for the Three Months Ended September 30, 2017			
	Private Equity Segment	Credit Segment	Real Assets Segment	Total Reportable Segments

FINANCIAL STATEMENTS
(dollars in thousands, except share data, except where noted)

The following table reconciles total consolidated revenues to total revenues for Apollo's reportable segments for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30,	
	2017	2016
Total Consolidated Revenues	$ 1,740,655	$ 1,285,004
Equity awards granted by unconsolidated related parties and reimbursable expenses[1]	(53,234)	(51,275)
Adjustments related to consolidated funds and VIEs[1]	2,725	2,800
Other[1]	-	8,515
Total Reportable Segments Revenues	$ 1,690,146	$ 1,245,044

(1) Represents advisory fees, management fees and carried interest income earned from consolidated VIEs which are eliminated in consolidation. Includes non-cash revenues related to equity awards granted by unconsolidated related parties to employees of the Company and certain compensation and administrative related expense reimbursements.

The following table reconciles total consolidated expenses to total expenses for Apollo's reportable segments for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30,	
	2017	2016
Total Consolidated Expenses	$ 967,997	$ 767,554
Equity awards granted by unconsolidated related parties and reimbursable expenses[1]	(53,234)	(52,980)
Transaction-related compensation charges[1]	(6,409)	(16,799)
Reclassification of interest expenses	(39,496)	(30,505)
Amortization of transaction-related intangibles[1]	(4,381)	(6,608)
Other[1]	(5)	36
Total Reportable Segments Expenses	$ 864,472	$ 660,698

(1) Represents the addition of expenses of consolidated funds and VIEs, transaction-related charges, non-cash expenses related to equity awards granted by unconsolidated related parties to employees of the Company and certain compensation and administrative expenses. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions.

The following table reconciles total consolidated other income to total other income for Apollo's reportable segments for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30,	
	2017	2016
Total Consolidated Other Income	$ 264,603	$ 121,018
Reclassification of interest expense	(39,496)	(30,505)
Adjustments related to consolidated funds and VIEs[1]	(8,433)	(2,077)
Other	(21)	(7,820)
Total Reportable Segments Other Income	$ 216,653	$ 80,616

(1) Represents the addition of other income of consolidated funds and VIEs.

The following table presents the reconciliation of income before income tax provision reported in the condensed consolidated statements of operations to Economic Income for the nine months ended September 30, 2017 and 2016:

	For the Nine Months Ended September 30,	
	2017	2016
Income before income tax provision	$ 1,037,261	$ 638,468
Adjustments:		
Net income attributable to Non-Controlling Interests in consolidated entities	(8,967)	(3,891)
Transaction-related charges, net[1]	10,789	25,315
Total consolidation adjustments and other	1,822	21,424
Economic Income	$ 1,039,083	$ 659,892

(1) Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions. Equity-based compensation adjustment includes non-cash revenues and expenses related to equity awards granted by unconsolidated related parties to employees of the Company.

The following table presents the reconciliation of Apollo's total reportable segment assets to total assets as of September 30, 2017 and December 31, 2016:

	As of September 30, 2017	As of December 31, 2016
Total reportable segment assets	$ 5,658,902	$ 4,694,643
Adjustments[1]	1,201,452	934,910
Total assets	$ 6,860,354	$ 5,629,553

(1) Represents the addition of assets of consolidated funds and VIEs and consolidation elimination adjustments.

16. SUBSEQUENT EVENTS

On November 1, 2017, the Company declared a cash distribution of $0.39 per Class A share, which will be paid on November 30, 2017 to holders of record on November 21, 2017.

On November 1, 2017, the Company declared a cash distribution of $0.398438 per Preferred share, which will be paid on December 15, 2017 to holders of record on December 1, 2017.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with Apollo Global Management, LLC's condensed consolidated financial statements and the related notes included within this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those included in the section entitled "Risk Factors" in our Form 10-K for the year ended December 31, 2016 filed with the SEC on February 13, 2017 (the "2016 Annual Report"). The highlights listed below have had significant effects on many items within our condensed consolidated financial statements and affect the comparison of the current period's activity with those of prior periods.

General

Our Businesses

Founded in 1990, Apollo is a leading global alternative investment manager. We are a contrarian, value-oriented investment manager in private equity, credit and real assets with significant distressed expertise and a flexible mandate in the majority of our funds which enables our funds to invest opportunistically across a company's capital structure. We raise, invest and manage funds on behalf of some of the world's most prominent pension, endowment and sovereign wealth funds as well as other institutional and individual investors. Apollo is led by our Managing Partners, Leon Black, Joshua Harris and Marc Rowan, who have worked together for more than 30 years and lead a team of 1,024 employees, including 381 investment professionals, as of September 30, 2017.

Apollo conducts its business primarily in the United States and substantially all of its revenues are generated domestically. These businesses are conducted through the following three reportable segments:

(i) ***Private equity***-primarily invests in control equity and related debt instruments, convertible securities and distressed debt instruments;

(ii) ***Credit***-primarily invests in non-control corporate and structured debt instruments including performing, stressed and distressed instruments across the capital structure; and

(iii) ***Real assets***-primarily invests in real estate equity for the acquisition and recapitalization of real estate assets, portfolios, platforms and operating companies, and real estate debt including first mortgage and mezzanine loans, preferred equity and commercial mortgage backed securities.

These business segments are differentiated based on the varying investment strategies. The performance is measured by management on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo's business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the managed funds.

Our financial results vary since carried interest, which generally constitutes a large portion of the income we receive from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

In addition, the growth in our Fee-Generating AUM during the last year has primarily been in our credit segment. The average management fee rate for these new credit products is at market rates for such products and in certain cases is below our historical rates. Also, due to the complexity of these new product offerings, the Company has incurred and will continue to incur additional costs associated with managing these products. To date, these additional costs have been offset by realized economies of scale and ongoing cost management.

As of September 30, 2017, we had total AUM of $241.6 billion across all of our businesses. More than 90% of our total AUM was in funds with a contractual life at inception of seven years or more, and 41% of such AUM was in permanent capital vehicles. As of September 30, 2017, Fund IX commitments totaled $24.7 billion. On December 31, 2013, Fund VIII held a final closing raising a total of $17.5 billion in third-party capital and approximately $880 million of additional capital from Apollo and affiliated investors, and as of September 30, 2017, Fund VIII had $6.8 billion of uncalled commitments remaining. Additionally, Fund VII held a final closing in December 2008, raising a total of $14.7 billion, and as of September 30, 2017, Fund VII had $2.1 billion of uncalled commitments remaining. We have consistently produced attractive long-term investment returns in our traditional private equity funds, generating a 39% gross IRR and a 25% net IRR on a compound annual basis from inception through

September 30, 2017. Apollo's private equity fund appreciation was 7.3% and 18.1% for the three and nine months ended September 30, 2017, respectively.

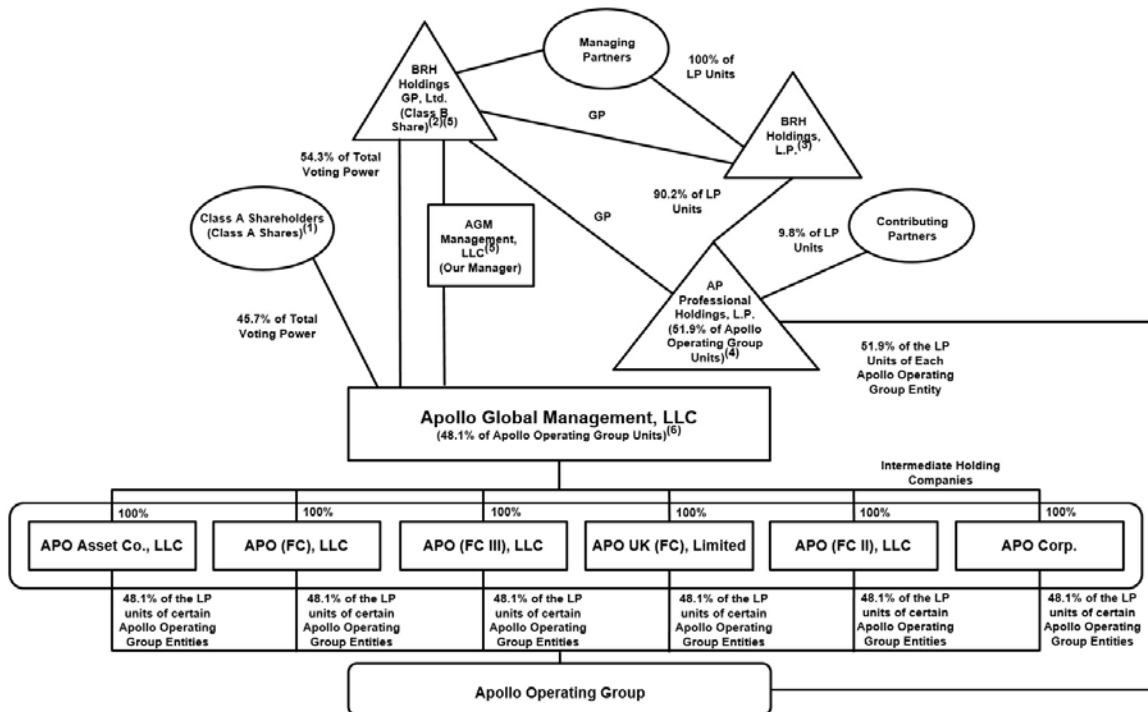
For our credit segment, total gross and net returns, excluding Athene and AGER assets that are managed by Apollo but not directly invested in Apollo funds and investment vehicles or sub-advised by Apollo, were 1.9% and 1.6%, respectively, for the three months ended September 30, 2017 and 6.0% and 5.1%, respectively, for the nine months ended September 30, 2017.

For our real assets segment, total combined gross and net returns for AGRE U.S. Real Estate Fund, L.P. ("U.S. RE Fund I") and Apollo U.S. RE Fund II, L.P. ("U.S. RE Fund II") including co-investment capital were 3.8% and 3.3%, respectively, for the three months ended September 30, 2017 and 13.5% and 11.5%, respectively, for the nine months ended September 30, 2017.

For further detail related to fund performance metrics across all of our businesses, see "-The Historical Investment Performance of Our Funds."

Holding Company Structure

The diagram below depicts our current organizational structure:



Note: The organizational structure chart above depicts a simplified version of the Apollo structure. It does not include all legal entities in the structure. Ownership percentages are as of November 2, 2017.

(1) The Strategic Investor holds 9.0% of the Class A shares outstanding and 4.3% of the economic interests in the Apollo Operating Group. The Class A shares held by investors other than the Strategic Investor represent 45.7% of the total voting power of our shares entitled to vote and 43.8% of the economic interests in the Apollo Operating Group. Class A shares held by the Strategic Investor do not have voting rights. However, such Class A shares will become entitled to vote upon transfers by the Strategic Investor in accordance with the agreements entered into in connection with the investments made by the Strategic Investor.

(2) Our Managing Partners own BRH Holdings GP, Ltd., which in turn holds our only outstanding Class B share. The Class B share represents 54.3% of the total voting power of our shares entitled to vote but no economic interest in Apollo Global Management, LLC. Our Managing Partners' economic interests are instead represented by their indirect beneficial ownership, through Holdings, of 46.8% of the limited partner interests in the Apollo Operating Group.

(3) Through BRH Holdings, L.P., our Managing Partners indirectly beneficially own through estate planning vehicles, limited partner interests in Holdings.

(4) Holdings owns 51.9% of the limited partner interests in each Apollo Operating Group entity. The AOG Units held by Holdings are exchangeable for Class A shares. Our Managing Partners, through their interests in BRH and Holdings, beneficially own 46.8% of the AOG Units. Our Contributing Partners, through their ownership interests in Holdings, beneficially own 5.1% of the AOG Units.

(5) BRH Holdings GP, Ltd. is the sole member of AGM Management, LLC, our manager. The management of Apollo Global Management, LLC is vested in our manager as provided in our operating agreement.

(6) Represents 48.1% of the limited partner interests in each Apollo Operating Group entity, held through the intermediate holding companies. Apollo Global Management, LLC, also indirectly owns 100% of the general partner interests in each Apollo Operating Group entity.

Each of the Apollo Operating Group partnerships holds interests in different businesses or entities organized in different jurisdictions.

Our structure is designed to accomplish a number of objectives, the most important of which are as follows:

- We are a holding company that is qualified as a partnership for U.S. federal income tax purposes. Our intermediate holding companies enable us to maintain our partnership status and to meet the qualifying income exception.
- We have historically used multiple management companies to segregate operations for business, financial and other reasons. Going forward, we may increase or decrease the number of our management companies or partnerships within the Apollo Operating Group based on our views regarding the appropriate balance between (a) administrative convenience and (b) continued business, financial, tax and other optimization.

Business Environment

As a global investment manager, we are affected by numerous factors, including the condition of financial markets and the economy. Price fluctuations within equity, credit, commodity, foreign exchange markets, as well as interest rates, which may be volatile and mixed across geographies, can significantly impact the valuation of our funds' investments and related income we may recognize.

In the U.S., the S&P 500 Index rose by 4.0% in the third quarter of 2017, following an increase of 2.6% in the second quarter of 2017. Outside the U.S., global equity markets also rose during the third quarter of 2017. The MSCI All Country World ex USA Index rose 6.2% following an increase of 5.8% in the second quarter of 2017.

Conditions in the credit markets also have a significant impact on our business. Credit markets rose in the third quarter of 2017, with the BofAML HY Master II Index increasing 2.0% and the S&P/LSTA Leveraged Loan Index increasing 1.0%. Benchmark interest rates remained stable in the third quarter, with the U.S. 10-year Treasury yield remaining at 2.3%, as investors generally expect the next interest rate increase during the fourth quarter of 2017.

Foreign exchange rates can impact the valuations of our funds' investments that are denominated in currencies other than the U.S. dollar. Relative to the U.S. dollar, the Euro appreciated 3.4% in the third quarter of 2017, after appreciating 7.3% in the second quarter of 2017, while the British pound appreciated 2.9% in the third quarter of 2017, after appreciating by 3.8% in the second quarter of 2017. Commodities were generally mixed in the third quarter of 2017, with energy prices rebounding. The price of crude oil increased 12.2% during the third quarter of 2017, following a decline of 9.0% in the second quarter of 2017.

In terms of economic conditions in the U.S., the Bureau of Economic Analysis reported real GDP increased at an annual rate of 3.0% in the third quarter of 2017, compared to a 3.1% increase in the second quarter of 2017. As of July 2017, the International Monetary Fund estimated that the U.S. economy will expand by 2.1% in 2017 and by 2.1% in 2018. Additionally, the U.S. unemployment rate stood at 4.2% as of September 30, 2017, the lowest level since the financial crisis of 2008.

Regardless of the market or economic environment at any given time, Apollo relies on its contrarian, value-oriented approach to consistently invest capital on behalf of its fund investors by focusing on opportunities that management believes are often overlooked by other investors. As such, Apollo's global integrated investment platform deployed $3.3 billion and $12.8 billion of capital through the funds it manages during the three and twelve months ended September 30, 2017, respectively. We believe Apollo's expertise in credit and its focus on nine core industry sectors, combined with more than 27 years of investment experience, has allowed Apollo to respond quickly to changing environments. Apollo's core industry sectors include chemicals, manufacturing and industrial, natural resources, consumer and retail, consumer services, business services, financial services, leisure, and media/telecom/technology. Apollo believes that these attributes have contributed to the success of its private equity funds investing in buyouts and credit opportunities during both expansionary and recessionary economic periods.

In general, institutional investors continue to allocate capital towards alternative investment managers for more attractive risk-adjusted returns in a low interest rate environment, and we believe the business environment remains generally accommodative to raise larger successor funds, launch new products, and pursue attractive strategic growth opportunities. As such, Apollo had $7.9 billion and $55.5 billion of capital inflows during the three and twelve months ended September 30, 2017, respectively. While Apollo continues to attract capital inflows, it also continues to generate realizations for fund investors. Apollo returned $1.7 billion and $7.8 billion of capital and realized gains to the investors in the funds it manages during the three and twelve months ended September 30, 2017, respectively.

Managing Business Performance

We believe that the presentation of Economic Income, or EI, supplements a reader's understanding of the economic operating performance of each of our segments.

Economic Income

EI has certain limitations in that it does not take into account certain items included under U.S. GAAP. EI represents segment income before income tax provision excluding transaction-related charges arising from the 2007 private placement and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets, contingent consideration and certain other charges associated with acquisitions. In addition, segment data excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements from unconsolidated related parties, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the condensed consolidated financial statements. We believe the exclusion of the non-cash charges related to the 2007 Reorganization for equity-based compensation provides investors with a meaningful indication of our performance because these charges relate to the equity portion of our capital structure and not our core operating performance.

Economic Net Income represents EI adjusted to reflect income tax provision on EI that has been calculated assuming that all income is allocated to Apollo Global Management, LLC, which would occur following an exchange of all AOG Units for Class A shares of Apollo Global Management, LLC. The economic assumptions and methodologies that impact the implied income tax provision are similar to those methodologies and certain assumptions used in calculating the income tax provision for Apollo's condensed consolidated statements of operations under U.S. GAAP. ENI is net of preferred distributions, if any, to Series A Preferred shareholders.

We believe that EI is helpful for an understanding of our business and that investors should review the same supplemental financial measure that management uses to analyze our segment performance. This measure supplements and should be considered in addition to and not in lieu of the results of operations discussed below in "-Overview of Results of Operations" that have been prepared in accordance with U.S. GAAP. See note 15 to the condensed consolidated financial statements for more details regarding management's consideration of EI.

EI may not be comparable to similarly titled measures used by other companies and is not a measure of performance calculated in accordance with U.S. GAAP. We use EI as a measure of operating performance, not as a measure of liquidity. EI should not be considered in isolation or as a substitute for net income or other income data prepared in accordance with U.S. GAAP. The use of EI without consideration of related U.S. GAAP measures is not adequate due to the adjustments described above. Management compensates for these limitations by using EI as a supplemental measure to U.S. GAAP results, to provide a more complete understanding of our performance as management measures it. A reconciliation of EI to its most directly comparable U.S. GAAP measure of income before income tax provision can be found in the notes to our condensed consolidated financial statements.

Fee Related Earnings

Fee Related Earnings ("FRE") is derived from our segment reported results and refers to a component of EI that is used as a supplemental measure to assess whether revenues that we believe are generally more stable and predictable in nature, primarily consisting of management fees, are sufficient to cover associated operating expenses and generate profits. FRE is the sum across all segments of (i) management fees, (ii) advisory and transaction fees, (iii) carried interest income earned from a publicly traded business development company we manage and (iv) other income, net excluding gains (losses) arising from the reversal of a portion of the tax receivable agreement liability, less (y) salary, bonus and benefits, excluding equity-based compensation and (z) other associated operating expenses.

Distributable Earnings

Distributable Earnings ("DE"), as well as DE After Taxes and Related Payables are derived from our segment reported results, and are supplemental non-U.S. GAAP measures to assess performance and the amount of earnings available for distribution to Class A shareholders, holders of RSUs that participate in distributions and holders of AOG Units. DE represents the amount of net realized earnings without the effects of the consolidation of any of the related funds. DE, which is a component of EI, is the sum across all segments of (i) total management fees and advisory and transaction fees, (ii) other income (loss), excluding the gains (losses) arising from the reversal of a portion of the tax receivable agreement liability (iii) realized carried interest income, and (iv) realized investment income, less (x) compensation expense, excluding the expense related to equity-based awards, (y) realized profit sharing expense, and (z) non-compensation expenses, excluding depreciation and amortization expense. DE After Taxes and Related Payables represents DE less estimated current corporate, local and non-U.S. taxes as well as the payable under Apollo's tax receivable agreement. DE After Taxes and Related Payables is net of preferred distributions, if any, to Series A Preferred shareholders. A reconciliation of DE and EI to their most directly comparable U.S. GAAP measure of income before income tax provision can be found in "- Summary of Non-U.S. GAAP Measures".

Fee Related EBITDA

Fee related EBITDA is a non-U.S. GAAP measure derived from our segment reported results and is used to assess the performance of our operations as well as our ability to service current and future borrowings. Fee related EBITDA represents FRE plus amounts for depreciation and amortization. "Fee related EBITDA +100% of net realized carried interest" represents fee-related EBITDA plus realized carried interest less realized profit sharing.

We use FRE, DE and Fee related EBITDA as measures of operating performance, not as measures of liquidity. These measures should not be considered in isolation or as a substitute for net income or other income data prepared in accordance with U.S. GAAP. The use of these measures without consideration of their related U.S. GAAP measures is not adequate due to the adjustments described above.

Operating Metrics

We monitor certain operating metrics that are common to the alternative investment management industry. These operating metrics include Assets Under Management, capital deployed and uncalled commitments.

Assets Under Management

The tables below present Fee-Generating and Non-Fee-Generating AUM by segment as of September 30, 2017 and 2016 and December 31, 2016:

	As of September 30, 2017			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating	$ 30,067	$ 126,907	$ 9,284	$ 166,258
Non-Fee-Generating	40,402	31,018	3,887	75,307
Total Assets Under Management	$ 70,469	$ 157,925	$ 13,171	$ 241,565

	As of September 30, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating	$ 30,630	$ 110,123	$ 7,916	$ 148,669
Non-Fee-Generating	11,551	25,273	3,143	39,967
Total Assets Under Management	$ 42,181	$ 135,396	$ 11,059	$ 188,636

	As of December 31, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating	$ 30,722	$ 111,781	$ 8,295	$ 150,798
Non-Fee-Generating	12,906	24,826	3,158	40,890
Total Assets Under Management	$ 43,628	$ 136,607	$ 11,453	$ 191,688

The table below presents AUM with Future Management Fee Potential, which is a component of Non-Fee-Generating AUM, for each of Apollo's three segments as of September 30, 2017 and 2016 and December 31, 2016.

	As of September 30, 2017	As of September 30, 2016	As of December 31, 2016
	(in millions)		
Private Equity	$ 25,796	$ 2,148	$ 1,977
Credit	8,565	7,818	6,533
Real Assets	874	927	639
Total AUM with Future Management Fee Potential	$ 35,235	$ 10,893	$ 9,149

The following tables present the components of Carry-Eligible AUM for each of Apollo's three segments as of September 30, 2017 and 2016 and December 31, 2016:

	As of September 30, 2017			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Carry-Generating AUM	$ 25,213	$ 26,634	$ 803	$ 52,650
AUM Not Currently Generating Carry	492	15,722	395	16,609
Uninvested Carry-Eligible AUM	34,290	11,927	1,281	47,498
Total Carry-Eligible AUM	$ 59,995	$ 54,283	$ 2,479	$ 116,757

	As of September 30, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Carry-Generating AUM	$ 19,063	$ 31,648	$ 697	$ 51,408
AUM Not Currently Generating Carry	1,225	7,852	509	9,586
Uninvested Carry-Eligible AUM	13,945	8,549	1,251	23,745
Total Carry-Eligible AUM	$ 34,233	$ 48,049	$ 2,457	$ 84,739

	As of December 31, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Carry-Generating AUM	$ 21,521	$ 33,306	$ 776	$ 55,603
AUM Not Currently Generating Carry	487	7,219	365	8,071
Uninvested Carry-Eligible AUM	13,136	11,119	976	25,231
Total Carry-Eligible AUM	$ 35,144	$ 51,644	$ 2,117	$ 88,905

The following table presents AUM Not Currently Generating Carry for funds that have commenced investing capital for more than 24 months as of September 30, 2017 and the corresponding appreciation required to reach the preferred return or high watermark in order to generate carried interest:

Category / Fund	Invested AUM Not Currently Generating Carry	Investment Period Active > 24 Months	Appreciation Required to Achieve Carry[(1)]
	(in millions)		
Private Equity:			
Total Private Equity	$ 492	$ 459	20%
Credit:			
Drawdown	4,175	3,832	31%

Real Assets:			
Total Real Assets	395	250	> 250bps
Total	$ 16,609	$ 13,443	

(1) All investors in a given fund are considered in aggregate when calculating the appreciation required to achieve carry presented above. Appreciation required to achieve carry may vary by individual investor.

The components of Fee-Generating AUM by segment as of September 30, 2017 and 2016 and December 31, 2016 are presented below:

	As of September 30, 2017			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating AUM based on capital commitments	$ 21,803	$ 8,749	$ 784	$ 31,336
Fee-Generating AUM based on invested capital	7,443	6,696	4,882	19,021
Fee-Generating AUM based on gross/adjusted assets	821	94,159	3,563	98,543
Fee-Generating AUM based on NAV	-	17,303	55	17,358
Total Fee-Generating AUM	$ 30,067 (1)	$ 126,907	$ 9,284	$ 166,258

(1) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at September 30, 2017 was 59 months.

	As of September 30, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating AUM based on capital commitments	$ 21,682	$ 6,425	$ 724	$ 28,831
Fee-Generating AUM based on invested capital	8,137	4,302	4,205	16,644
Fee-Generating AUM based on gross/adjusted assets	293	88,606	2,910	91,809
Fee-Generating AUM based on NAV	518	10,790	77	11,385
Total Fee-Generating AUM	$ 30,630 (1)	$ 110,123	$ 7,916	$ 148,669

(1) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at September 30, 2016 was 68 months.

	As of December 31, 2016			
	Private Equity	Credit	Real Assets	Total
	(in millions)			
Fee-Generating AUM based on capital commitments	$ 21,782	$ 8,072	$ 724	$ 30,578
Fee-Generating AUM based on invested capital	8,058	4,212	4,374	16,644
Fee-Generating AUM based on gross/adjusted assets	882	88,196	3,131	92,209
Fee-Generating AUM based on NAV	-	11,301	66	11,367
Total Fee-Generating AUM	$ 30,722 (1)	$ 111,781	$ 8,295	$ 150,798

(1) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at December 31, 2016 was 66 months.

The following table presents total AUM and Fee-Generating AUM amounts for our private equity segment:

	Total AUM			Fee-Generating AUM		
	As of September 30,		As of December 31,	As of September 30,		As of December 31,
	2017	2016	2016	2017	2016	2016
	(in millions)					
Traditional Private Equity Funds	$ 56,823	$ 30,227	$ 30,490	$ 23,842	$ 24,634	$ 24,457
Natural Resources	4,702	4,822	5,223	4,042	4,046	4,181
Other[(1)]	8,944	7,132	7,915	2,183	1,950	2,084
Total	$ 70,469	$ 42,181	$ 43,628	$ 30,067	$ 30,630	$ 30,722

(1) Includes co-investments contributed to Athene by AAA through its investment in AAA Investments as discussed in note 13 of the condensed consolidated financial statements.

The following table presents total AUM and Fee-Generating AUM amounts for our credit segment by category type:

	Total AUM			Fee-Generating AUM		
	As of September 30,		As of December 31,	As of September 30,		As of December 31,
	2017	2016	2016	2017	2016	2016
	(in millions)

(1) The Company refers to the portion of the AUM related to AGER that is not sub-advised by Apollo or invested in funds and or investment vehicles managed by Apollo as “AGER Non-Sub-Advised” AUM. Athene Non-Sub-Advised and AGER Non-Sub-Advised reflects total combined AUM of $81.9 billion less $18.1 billion of assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo included within other asset categories. AGER Non-Sub-Advised includes $4.2 billion of AUM for which AAME provides investment advisory services.

Table of Contents

The following table presents the Athene and AGER assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo:

	Total AUM

Realizations	(2,794)	(2,125)	(1,114)	(6,033)	(512)	(1,226)	(1,956)	(3,694)
Market Activity[3][4]	5,061	5,431	285	10,777	1,286	2,809	213	4,308
End of Period	$ 70,469	$ 157,925	$ 13,171	$ 241,565	$ 42,181	$ 135,396	$ 11,059	$ 188,636

(1) At the individual segment level, inflows include new subscriptions, commitments, capital raised, other increases in available capital, purchases, acquisitions and portfolio company appreciation. Outflows represent redemptions, other decreases in available capital and portfolio company depreciation. Realizations represent fund distributions of realized proceeds. Market activity represents gains (losses), the impact of foreign exchange rate fluctuations and other income.
(2) Outflows for Total AUM include redemptions of $693.6 million and $1,190.9 million during the nine months ended September 30, 2017 and 2016, respectively.
(3) Includes foreign exchange impacts of $209.6 million, $2.8 billion and $133.3 million for private equity, credit and real assets, respectively, during the nine months ended September 30, 2017.
(4) Includes foreign exchange impacts of $58.3 million, $318.8 million and $(91.5) million for private equity, credit and real assets, respectively, during the nine months ended September 30, 2016.

Total AUM was $241.6 billion at September 30, 2017, an increase of $9.7 billion, or 4.2%, compared to $231.8 billion at June 30, 2017. The net increase was primarily due to:

Net flows of $7.3 billion primarily related to:
- a $6.1 billion increase related to funds we manage in the credit segment primarily consisting of subscriptions of $3.0 billion related to our liquid/performing funds, Financial Credit Investment III, L.P. (“FCI III”) and Apollo European Principal Finance Fund III, L.P. (“EPF III") of $1.0 billion, $1.0 billion and $0.8 billion, respectively, an increase in AUM relating to Athene of $2.4 billion and an increase in AUM relating to Advisory assets of $0.5 billion;
- a $0.6 billion increase related to funds we manage in the private equity segment primarily consisting of subscriptions attributable to Fund IX of $0.4 billion; and
- a $0.6 billion increase related to funds we manage in the real assets segment primarily consisting of net segment transfers and subscriptions of $0.2 billion and $0.2 billion, respectively.

Market activity of $4.2 billion primarily related to $2.5 billion and $1.7 billion of appreciation in the funds we manage in the private equity and credit segments, respectively.

Offsetting these increases were:

Realizations of $1.7 billion primarily related to:
- $1.0 billion related to funds we manage in the credit segment primarily consisting of distributions of $0.7 billion from Apollo European Principal Finance Fund II, L.P. (“EPF II”);
- $0.4 billion related to funds we manage in the private equity segment primarily consisting of distributions from our traditional private equity funds; and
- $0.3 billion related to funds we manage in the real assets segment primarily consisting of distributions from our real estate debt funds.

Total AUM was $241.6 billion at September 30, 2017, an increase of $49.9 billion, or 26.0%, compared to $191.7 billion at December 31, 2016. The net increase was primarily due to:

Table of Contents

Net flows of $45.1 billion primarily related to:

- a $24.6 billion increase related to funds we manage in the private equity segment primarily consisting of subscriptions attributable to Fund IX of $24.7 billion;
- an $18.0 billion increase related to funds we manage in the credit segment primarily consisting of a net increase in AUM relating to Athene and AGER of $8.0 billion and $2.5 billion, respectively, subscriptions of $7.4 billion primarily related to our liquid/performing funds, EPF III and FCI III of $4.1 billion, $1.5 billion and $1.5 billion, respectively, and an increase in AUM relating to Advisory assets of $2.2 billion, offset by net segment transfers of $2.3 billion; and
- a $2.5 billion increase related to funds we manage in the real assets segment primarily consisting of net segment transfers of $1.7 billion and subscriptions of $0.9 billion.

Market activity of $10.8 billion primarily related to $5.4 billion and $5.1 billion of appreciation in the funds we manage in the credit and private equity segments, respectively.

Offsetting these increases were:

Realizations of $6.0 billion primarily related to:

- $2.8 billion related to funds we manage in the private equity segment primarily consisting of distributions of $1.8 billion, $0.6 billion and $0.4 billion from our traditional private equity funds, natural resources funds and co-investment vehicles, respectively;
- $2.1 billion related to funds we manage in the credit segment primarily consisting of distributions of $1.0 billion, $0.5 billion and $0.4 billion from EPF II, other drawdown funds and liquid/performing funds, respectively; and
- $1.1 billion related to funds we manage in the real assets segment primarily consisting of distributions of $0.9 billion from our real estate debt funds.

The following tables summarize changes in Fee-Generating AUM for each of Apollo's three segments for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,							
	2017				2016			
	Private Equity	Credit	Real Assets	Total	Private Equity	Credit	Real Assets	Total

Realizations	(503)	(1,180)	(889)	(2,572)	(77)	(762)	(1,191)	(2,030)
Market Activity[3]	102	2,713	160	2,975	(49)	1,111	37	1,099
End of Period	$ 30,067	$ 126,907	$ 9,284	$ 166,258	$ 30,630	$ 110,123	$ 7,916	$ 148,669

(1) At the individual segment level, inflows include new subscriptions, commitments, capital raised, other increases in available capital, purchases, acquisitions and portfolio company appreciation. Outflows represent redemptions, other decreases in available capital and portfolio company depreciation. Realizations represent fund distributions of realized proceeds. Market activity represents gains (losses), the impact of foreign exchange rate fluctuations and other income.

(2) Outflows for Fee-Generating AUM include redemptions of $570.3 million and $944.6 million during the three and nine months ended September 30, 2017 and 2016, respectively.

(3) Includes foreign exchange impacts of $1.3 billion and $64.7 million for credit and real assets, respectively, during the nine months ended September 30, 2017, and foreign exchange impacts of $209.2 million and $(30.6) million for credit and real assets, respectively, during the nine months ended September 30, 2016.

Total Fee-Generating AUM was $166.3 billion at September 30, 2017, an increase of $5.3 billion or 3.3%, compared to $161.0 billion at June 30, 2017. The net increase was primarily due to:

Net flows of $5.2 billion primarily related to:

- a $5.3 billion increase related to funds we manage in the credit segment primarily consisting of subscriptions of $2.5 billion primarily related to FCI III, EPF III and our liquid/performing funds of $1.0 billion, $0.8 billion and $0.6 billion, respectively, an increase in AUM relating to Athene of $2.4 billion and fee-generating capital deployment of $1.4 billion. This was offset by fee-generating capital reduction of $1.4 billion and net segment transfers of $0.2 billion.

Market activity of $0.9 billion primarily related to appreciation in the funds we manage in the credit segment.

Offsetting these increases were:

Realizations of $0.8 billion primarily related to:

- $0.5 billion related to funds we manage in the credit segment primarily driven by distributions of $0.3 billion and $0.1 billion from EPF II and our liquid/performing funds, respectively; and
- $0.3 billion related to funds we manage in the real assets segment primarily driven by our real estate debt funds.

Total Fee-Generating AUM was $166.3 billion at September 30, 2017, an increase of $15.5 billion or 10.3%, compared to $150.8 billion at December 31, 2016. The net increase was primarily due to:

Net flows of $15.1 billion primarily related to:

- a $13.6 billion increase related to funds we manage in the credit segment primarily consisting of an increase in AUM relating to Athene of $8.0 billion, subscriptions of $5.6 billion primarily related to our liquid/performing funds, EPF III and FCI III of $2.6 billion, $1.5 billion and $1.5 billion, respectively, and an increase in fee-generating capital deployment of $3.2 billion. This was offset by net segment transfers of $1.4 billion, fee-generating capital reduction of $1.3 billion and redemptions of $0.5 billion; and
- a $1.7 billion increase related to funds we manage in the real assets segment primarily consisting of net segment transfers of $1.5 billion and subscriptions of $0.6 billion. This was offset by fee-generating capital reduction of $0.3 billion.

Market activity of $3.0 billion primarily related to appreciation in the funds we manage in the credit segment.

Offsetting these increases were:

Realizations of $2.6 billion primarily related to:

- $1.2 billion related to funds we manage in the credit segment primarily driven by distributions from our liquid/performing funds, EPF II and our permanent capital vehicles of $0.4 billion, $0.3 billion and $0.2 billion, respectively;
- $0.9 billion related to funds we manage in the real assets segment primarily driven by distributions from our real estate debt funds; and
- $0.5 billion related to funds we manage in the private equity segment primarily driven by distributions of $0.3 billion from our traditional private equity funds.

Capital Deployed and Uncalled Commitments

Capital deployed is the aggregate amount of capital that has been invested during a given period by our drawdown funds, SIAs that have a defined maturity date and funds and SIAs in our real estate debt strategy. Uncalled commitments, by contrast, represents unfunded capital commitments that certain of Apollo’s funds and SIAs have received from fund investors to fund future or current fund investments and expenses.

Capital deployed and uncalled commitments are indicative of the pace and magnitude of fund capital that is deployed or will be deployed, and which therefore could result in future revenues that include management fees, transaction fees and incentive income to the extent they are fee-generating. Capital deployed and uncalled commitments can also give rise to future costs that are related to the hiring of additional resources to manage and account for the additional capital that is deployed or will be deployed. Management uses capital deployed and uncalled commitments as key operating metrics since we believe the results measure our fund’s investment activities.

Capital Deployed

The following table summarizes by segment the capital deployed for funds and SIAs with a defined maturity date and certain funds and SIAs in Apollo’s real estate debt strategy during the specified reporting periods:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in millions)			
Private Equity	$ 1,129	$ 3,048	$ 3,417	$ 8,187
Credit	1,430	729	3,577	2,686
Real Assets[(1)]	712	567	2,324	1,550
Total capital deployed	$ 3,271	$ 4,344	$ 9,318	$ 12,423

(1) Included in capital deployed is $690 million and $2,152 million for the three and nine months ended September 30, 2017, respectively, and $498 million and $1,405 million for the three and nine months ended September 30, 2016, respectively, related to funds in Apollo’s real estate debt strategy.

Uncalled Commitments

The following table summarizes the uncalled commitments by segment during the specified reporting periods:

	As of September 30, 2017	As of December 31, 2016
	(in millions)	
Private Equity	$ 37,786	$ 16,079
Credit	15,168	11,816
Real Assets	1,399	1,414
Total uncalled commitments[(1)]	$ 54,353	$ 29,309

(1) As of September 30, 2017 and December 31, 2016, $48.8 billion and $25.9 billion, respectively, represented the amount of capital available for investment or reinvestment subject to the provisions of the applicable limited partnership agreements or other governing agreements of the funds, partnerships and accounts we manage. These amounts exclude uncalled commitments which can only be called for fund fees and expenses.

The Historical Investment Performance of Our Funds

Below we present information relating to the historical performance of our funds, including certain legacy Apollo funds that do not have a meaningful amount of unrealized investments, and in respect of which the general partner interest has not been contributed to us.

When considering the data presented below, you should note that the historical results of our funds are not indicative of the future results that you should expect from such funds, from any future funds we may raise or from your investment in our Class A shares.

An investment in our Class A shares is not an investment in any of the Apollo funds, and the assets and revenues of our funds are not directly available to us. The historical and potential future returns of the funds we manage are not directly linked to returns on our Class A shares. Therefore, you should not conclude that continued positive performance of the funds we manage will necessarily result in positive returns on an investment in our Class A shares. However, poor performance of the funds that we manage would cause a decline in our revenue from such funds, and would therefore have a negative effect on our performance and in all likelihood the value of our Class A shares.

Moreover, the historical returns of our funds should not be considered indicative of the future results you should expect from such funds or from any future funds we may raise. There can be no assurance that any Apollo fund will continue to achieve the same results in the future.

Finally, our private equity IRRs have historically varied greatly from fund to fund. For example, Fund IV generated a 12% gross IRR and a 9% net IRR since its inception through September 30, 2017, while Fund V generated a 61% gross IRR and a 44% net IRR since its inception through September 30, 2017. Accordingly, the IRR going forward for any current or future fund may vary considerably from the historical IRR generated by any particular fund, or for our private equity funds as a whole. Future returns will also be affected by the applicable risks, including risks of the industries and businesses in which a particular fund invests. See “Item 1A. Risk Factors-Risks Related to Our Businesses-The historical returns attributable to our funds should not be considered as indicative of the future results of our funds or of our future results or of any returns expected on an investment in our Class A shares” in the 2016 Annual Report.

Table of Contents

Investment Record

The following table summarizes the investment record by segment of Apollo's significant drawdown funds and SIAs that have a defined maturity date in which investors make a commitment to provide capital at the formation of such funds and deliver capital when called as investment opportunities become available. The funds included in the investment record table below have greater than $500 million of AUM and/or form part of a flagship series of funds. The SIAs included in the investment record table below have greater than $200 million of AUM and did not predominantly invest in other Apollo funds or SIAs.

All amounts are as of September 30, 2017, unless otherwise noted:

									As of September 30, 2017

(1) Refer to the definitions of Vintage Year, Total Invested Capital, Realized Value, Remaining Cost, Unrealized Value, Total Value, Gross IRR and Net IRR described elsewhere in this report.
(2) Returns have not been presented as the fund commenced investing capital less than 24 months prior to the period indicated and therefore such return information was deemed not meaningful.
(3) The general partners and managers of Funds I, II and MIA, as well as the general partner of Fund III, were excluded assets in connection with the 2007 Reorganization. As a result, Apollo did not receive the economics associated with these entities. The investment performance of these funds, combined with Fund IV, is presented to illustrate fund performance associated with Apollo's Managing Partners and other investment professionals.
(4) Total IRR is calculated based on total cash flows for all funds presented.
(5) Funds are denominated in Euros and historical figures are translated into U.S. dollars at an exchange rate of €1.00 to $1.18 as of September 30, 2017.
(6) Amounts presented have been aggregated for (i) drawdown funds with AUM greater than $500 million that do not form part of a flagship series of funds and (ii) SIAs with AUM greater than $200 million that do not predominantly invest in other Apollo funds or SIAs. Certain SIAs' historical figures are denominated in Euros and translated into U.S. dollars at an exchange rate of €1.00 to $1.18 as of September 30, 2017. Additionally, certain SIAs totaling $1.8 billion of AUM have been excluded from Total Invested Capital, Realized Value, Remaining Cost, Unrealized Value

and Total Value. These SIAs have an open ended life and a significant turnover in their portfolio assets due to the ability to recycle capital. These SIAs had $10.3 billion of Total Invested Capital through September 30, 2017.

(7) U.S. RE Fund I, U.S. RE Fund II and Asia RE Fund had $158 million, $390 million and $245 million of co-investment commitments raised as of September 30, 2017, respectively, which are included in the figures in the table. A co-invest entity within U.S. RE Fund I is denominated in GBP and translated into U.S. dollars at an exchange rate of £1.00 to $1.34 as of September 30, 2017.

(8) As part of the acquisition of Citi Property Investors ("CPI"), Apollo acquired general partner interests in fully invested funds. CPI Funds refers to CPI Capital Partners North America, CPI Capital Partners Asia Pacific, CPI Capital Partners Europe and other CPI funds or individual investments of which Apollo is not the general partner or manager and only receives fees pursuant to either a sub-advisory agreement or an investment management and administrative agreement. For CPI Capital Partners North America, CPI Capital Partners Asia Pacific and CPI Capital Partners Europe, the gross and net IRRs are presented in the investment record table since acquisition on November 12, 2010. The aggregate net IRR for these funds from their inception to September 30, 2017 was (2)%. This net IRR was primarily achieved during a period in which Apollo did not make the initial investment decisions and Apollo only became the general partner or manager of these funds upon completing the acquisition on November 12, 2010.

(9) Private equity co-investment vehicles, and funds with AUM less than $500 million have been excluded. These co-investment vehicles and funds had $8.2 billion of aggregate AUM as of September 30, 2017.

(10) Certain credit funds and SIAs with AUM less than $500 million and $200 million, respectively, have been excluded. These funds and SIAs had $1.7 billion of aggregate AUM as of September 30, 2017.

(11) Certain accounts owned by or related to Athene, certain co-investment vehicles and certain funds with AUM less than $500 million have been excluded. These accounts, co-investment vehicles and funds had $5.3 billion of aggregate AUM as of September 30, 2017.

(12) Remaining cost for certain of our credit funds may include physical cash called, invested or reserved for certain levered investments.

(13) The investor in this U.S. Dollar denominated fund has chosen to make contributions and receive distributions in the local currency of each underlying investment. As a result, Apollo has not entered into foreign currency hedges for this fund and the returns presented include the impact of foreign currency gains or losses. The investor's gross and net IRR, before the impact of foreign currency gains or losses, from the fund's inception to September 30, 2017 was 10% and 9%, respectively.

Private Equity

The following table summarizes the investment record for distressed investments made in our traditional private equity fund portfolios, since the Company's inception. All amounts are as of September 30, 2017:

	Total Invested Capital	Total Value	Gross IRR
	(in millions)		
Distressed for Control	$ 7,885	$ 18,777	29%
Non-Control Distressed	5,416	8,414	71
Total	13,301	27,191	49
Corporate Carve-outs, Opportunistic Buyouts and Other Credit[1]	41,297	75,325	22
Total	$ 54,598	$ 102,516	39%

(1) Other Credit is defined as investments in debt securities of issuers other than portfolio companies that are not considered to be distressed.

Table of Contents

The following tables provide additional detail on the composition of the Fund VIII, Fund VII and Fund VI private equity portfolios based on investment strategy. Amounts for Fund I, II, III, IV and V are included in the table above but not presented below as their remaining value is less than $100 million or the fund has been liquidated. All amounts are as of September 30, 2017:

Fund VIII[1]

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 2,318	$ 3,889
Opportunistic Buyouts	9,191	12,956
Distressed	514	745
Total	$ 12,023	$ 17,590

Fund VII[1]

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 2,252	$ 4,463
Opportunistic Buyouts	4,338	10,507
Distressed/Other Credit[2]	9,583	18,517
Total	$ 16,173	$ 33,487

Fund VI

	Total Invested Capital	Total Value
	(in millions)	
Corporate Carve-outs	$ 3,397	$ 5,819
Opportunistic Buyouts	6,374	10,496
Distressed/Other Credit[2]	2,686	4,974
Total	$ 12,457	$ 21,289

(1) Committed capital less unfunded capital commitments for Fund VIII and Fund VII was $11.5 billion and $14.1 billion, respectively, which represents capital commitments from limited partners to invest in such funds less capital that is available for investment or reinvestment subject to the provisions of the applicable limited partnership agreement or other governing agreements.

(2) The distressed investment strategy includes distressed for control, non-control distressed and other credit.

During the recovery and expansionary periods of 1994 through 2000 and late 2003 through the first half of 2007, our private equity funds invested or committed to invest approximately $13.7 billion primarily in traditional and corporate partner buyouts. During the recessionary periods of 1990 through 1993, 2001 through late 2003 and the recessionary and post recessionary periods (beginning the second half of 2007 through September 30, 2017), our private equity funds have invested $43.2 billion, of which $18.8 billion was in distressed buyouts and debt investments when the debt securities of quality companies traded at deep discounts to par value. Our average entry multiple for Fund VIII, VII and VI was 5.7x, 6.1x and 7.7x, respectively, as of September 30, 2017. Our average entry multiple for a private equity fund is the average of the total enterprise value over an applicable adjusted earnings before interest, taxes, depreciation and amortization which may incorporate certain adjustments based on the investment team's estimate and we believe captures the true economics of our funds' investments in portfolio companies. The average entry multiple of actively investing funds may include committed investments not yet closed.

Credit

The following table presents the AUM and gross and net returns information for Apollo's credit segment by category type:

	As of September 30, 2017				Gross Returns[1]		Net Returns[1]	
	AUM	Fee-Generating AUM	Carry-Eligible AUM	Carry-Generating AUM	For the Three Months Ended September 30, 2017	For the Nine Months Ended September 30, 2017	For the Three Months Ended September 30, 2017	For the Nine Months Ended September 30, 2017
Category	(in millions)							
Liquid/Performing	$ 41,765	$ 36,176	$ 21,245	$ 9,292	1.4%	4.9%	1.3%	4.5%
Drawdown[2]	27,223	17,253	22,634	8,235	2.7	8.2	2.2	6.8
Permanent capital vehicles ex Athene Non-Sub-Advised[3]	12,978	12,165	10,404	9,107	2.9	8.8	2.0	5.9
Athene Non-Sub-Advised[3]	57,029	57,029	-	-	N/A	N/A	N/A	N/A
AGER Non-Sub-Advised[3]	6,747	4,284	-	-	N/A	N/A	N/A	N/A
Advisory	12,183	-	-	-	N/A	N/A	N/A	N/A
Total Credit	$ 157,925	$ 126,907	$ 54,283	$ 26,634	1.9%	6.0%	1.6%	5.1%

(1) The gross and net returns for the three and nine months ended September 30, 2017 for total credit excludes assets managed by AAM that are not directly invested in Apollo funds and investment vehicles or sub-advised by Apollo.

(2) As of September 30, 2017, significant drawdown funds and SIAs had inception-to-date gross and net IRRs of 16.0% and 12.2%, respectively. Significant drawdown funds and SIAs include funds and SIAs with AUM greater than $200 million that do not predominantly invest in other Apollo funds or SIAs.

(3) Athene Non-Sub-Advised and AGER Non-Sub-Advised reflects total combined AUM of $81.9 billion less $18.1 billion of assets that were either sub-advised by Apollo or invested in funds and investment vehicles managed by Apollo included within other asset categories. AGER Non-Sub-Advised includes $4.2 billion of AUM for which AAME provides investment advisory services.

Liquid/Performing

The following table summarizes the investment record for funds in the liquid/performing category within Apollo's credit segment. The significant funds included in the investment record table below have greater than $200 million of AUM and do not predominantly invest in other Apollo funds or SIAs.

			Net Returns			
	Vintage Year	Total AUM	For the Three Months Ended September 30, 2017	For the Nine Months Ended September 30, 2017	For the Three Months Ended September 30, 2016	For the Nine Months Ended September 30, 2016
Credit:		(in millions)				
Hedge Funds[1]	Various	$ 6,617	1%	4%	3%	9%
CLOs[2]	Various	11,937	1	3	3	7
SIAs / Other	Various	23,211	2	6	4	8
Total		$ 41,765				

(1) Hedge Funds primarily includes Apollo Credit Strategies Master Fund Ltd., Apollo Credit Master Fund Ltd. and Apollo Credit Short Opportunities Fund.

(2) CLO returns are calculated based on gross return on invested assets, which excludes cash. Included within Total AUM of CLOs is $1.0 billion of AUM related to a standalone, self-managed asset management business established in connection with risk-retention rules, from which Apollo earns investment-related service fees, but for which Apollo does not provide management or advisory services. CLO returns exclude performance related to this AUM.

Permanent Capital

The following table summarizes the investment record for our permanent capital vehicles by segment, excluding Athene-related and AGER-related assets managed or advised by Athene Asset Management and AAME:

		Total AUM	Total Returns[1]			
	IPO Year[2]	As of September 30, 2017	For the Three Months Ended September 30, 2017	For the Nine Months Ended September 30, 2017	For the Three Months Ended September 30, 2016	For the Nine Months Ended September 30, 2016
Credit:		(in millions)				
MidCap[3]	N/A	$ 7,680	3%	9%	3%	7%
AIF	2013	390	2	11	10	20
AFT	2011	431	1	1	9	18
AINV[4]	2004	4,435	(2)	12	7	22
Real Assets:						
ARI	2009	4,151	-	17%	5%	3%
Total		$ 17,087				

(1) Total returns are based on the change in closing trading prices during the respective periods presented taking into account dividends and distributions, if any, as if they were reinvested without regard to commission.
(2) An IPO year represents the year in which the vehicle commenced trading on a national securities exchange.
(3) MidCap is not a publicly traded vehicle and therefore IPO year is not applicable. The returns presented are a gross return based on NAV. The net returns based on NAV were 2% and 2% for the three months ended September 30, 2017 and 2016, respectively, and 6% and 4% for the nine months ended September 30, 2017 and 2016, respectively.
(4) All amounts are as of June 30, 2017 except for total returns. Refer to www.apolloic.com for the most recent financial information on AINV. The information contained on AINV's website is not part of this report. Included within Total AUM of AINV is $1.7 billion of AUM related to a non-traded business development company from which Apollo earns investment-related service fees, but for which Apollo does not provide management or advisory services. Net returns exclude performance related to this AUM.

Athene and SIAs

As of September 30, 2017, Apollo managed or advised $81.9 billion of total AUM in accounts owned by or related to Athene and AGER, of which approximately $18.1 billion was either sub-advised by Apollo or invested in Apollo funds and investment vehicles managed by Apollo. Of the approximately $18.1 billion of AUM, the vast majority were in sub-advisory managed accounts that manage high grade credit asset classes, such as CLO debt, commercial mortgage backed securities, and insurance-linked securities.

As of September 30, 2017, Apollo managed approximately $21 billion of total AUM in SIAs, which include certain SIAs in the investment record tables above and capital deployed from certain SIAs across Apollo's private equity, credit and real assets funds.

Overview of Results of Operations

Revenues

Advisory and Transaction Fees from Related Parties, Net. As a result of providing advisory services with respect to actual and potential private equity, credit, and real assets investments, we are entitled to receive fees for transactions related to the acquisition and, in certain instances, disposition of portfolio companies as well as fees for ongoing monitoring of portfolio company operations and directors' fees. We also receive advisory fees for advisory services provided to certain credit funds. In addition, monitoring fees are generated on certain structured portfolio company investments. Under the terms of the limited partnership agreements for certain funds, the management fee payable by the funds may be subject to a reduction based on a certain percentage of such advisory and transaction fees, net of applicable broken deal costs ("Management Fee Offset"). Such amounts are presented as a reduction to advisory and transaction fees from related parties, net, in the condensed consolidated statements of operations. See note 2 to our condensed consolidated financial statements for more detail on advisory and transaction fees from related parties, net.

The Management Fee Offsets are calculated for each fund as follows:

- 65%-100% for private equity funds, gross advisory, transaction and other special fees;
- 65%-100% for certain credit funds, gross advisory, transaction and other special fees; and

- 100% for certain real assets funds, gross advisory, transaction and other special fees.

Management Fees from Related Parties. The significant growth of the assets we manage has had a positive effect on our revenues. Management fees are typically calculated based upon any of "net asset value," "gross assets," "adjusted par asset value," "adjusted costs of all unrealized portfolio investments," "capital commitments," "invested capital," "adjusted assets," "capital contributions," or "stockholders' equity," each as defined in the applicable limited partnership agreement and/or management agreement of the unconsolidated funds.

Carried Interest Income from Related Parties. The general partners of our funds, in general, are entitled to an incentive return that can normally amount to as much as 20% of the total returns on fund capital, depending upon performance of the underlying funds and subject to preferred returns and high water marks, as applicable. The carried interest income from related parties is recognized in accordance with U.S. GAAP guidance applicable to accounting for arrangement fees based on a formula. In applying the U.S. GAAP guidance, the carried interest from related parties for any period is based upon an assumed liquidation of the funds' assets at the reporting date, and distribution of the net proceeds in accordance with the funds' allocation provisions.

As of September 30, 2017, approximately 54% of the value of our funds' investments on a gross basis was determined using market-based valuation methods (i.e., reliance on broker or listed exchange quotes) and the remaining 46% was determined primarily by comparable company and industry multiples or discounted cash flow models. For our private equity, credit and real assets segments, the percentage determined using market-based valuation methods as of September 30, 2017 was 23%, 72% and 40%, respectively. See "Item 1A. Risk Factors-Risks Related to Our Businesses-Our funds' performance, and our performance, may be adversely affected by the financial performance of our funds' portfolio companies and the industries in which our funds invest" in the 2016 Annual Report for a discussion regarding certain industry-specific risks that could affect the fair value of our private equity funds' portfolio company investments.

Carried interest income fee rates can be as much as 20% for our private equity funds. In our private equity funds, the Company does not earn carried interest income until the investors in the fund have achieved cumulative investment returns on invested capital (including management fees and expenses) in excess of an 8% hurdle rate. Additionally, certain of our credit and real assets funds have various carried interest rates and hurdle rates. Certain of our credit and real assets funds allocate carried interest to the general partner in a similar manner as the private equity funds. In our private equity, certain credit and real assets funds, so long as the investors achieve their priority returns, there is a catch-up formula whereby the Company earns a priority return for a portion of the return until the Company's carried interest income equates to its incentive fee rate for that fund; thereafter, the Company participates in returns from the fund at the carried interest income rate. Carried interest income is subject to reversal to the extent that the carried interest income distributed exceeds the amount due to the general partner based on a fund's cumulative investment returns. The Company recognizes potential repayment of previously received carried interest income as a general partner obligation representing all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner obligation, however, would not become payable or realized until the end of a fund's life or as otherwise set forth in the respective limited partnership agreement of the fund.

The table below presents an analysis of Apollo's (i) carried interest receivable on an unconsolidated basis and (ii) realized and unrealized carried interest income (loss) for Apollo's combined segments as of and for the three and nine months ended September 30, 2017:

	As of September 30, 2017	For the Three Months Ended September 30, 2017			For the Nine Months Ended September 30, 2017		
	Carried Interest Receivable on an Unconsolidated Basis	Unrealized Carried Interest Income (Loss)	Realized Carried Interest Income	Total Carried Interest Income (Loss) from Related Parties	Unrealized Carried Interest Income (Loss)	Realized Carried Interest Income	Total Carried Interest Income (Loss) from Related Parties

(1) As of September 30, 2017, the remaining investments and escrow cash of Fund VII and Fund VI were valued at 99% and 97% of the fund's unreturned capital, respectively, which were below the required escrow ratio of 115%. As a result, these funds are required to place in escrow current and future carried interest income distributions to the general partner until the specified return ratio of 115% is met (at the time of a future distribution) or upon liquidation. As of September 30, 2017, Fund VI had $167.6 million of gross carried interest income, or $110.7 million net of profit sharing, in escrow. As of September 30, 2017, Fund VII had $69.7 million of gross carried interest income, or $38.8 million net of profit sharing, in escrow. With respect to Fund VII and Fund VI, realized carried interest income currently distributed to the general partner is limited to potential tax distributions per the fund's partnership agreement.

(2) AAA/Other includes $187.1 million of carried interest receivable, or $133.4 million net of profit sharing, from AAA Investments, L.P. which Apollo may elect to receive in cash or in common shares of Athene Holding (valued at the fair market value); and if Apollo elects to receive payment of such carried interest in cash, then common shares of Athene Holding shall be distributed to Apollo and immediately sold by Apollo to pay for such carried interest in cash.

(3) As of September 30, 2017, certain credit funds and private equity funds had $69.3 million and $42.2 million, respectively, in general partner obligations to return previously distributed carried interest income. The fair value gain on investments and income at the fund level needed to reverse the general partner obligations for certain credit funds and certain private equity funds was $340.2 million and $164.4 million, respectively, as of September 30, 2017.

(4) There was a corresponding profit sharing payable of $710.9 million as of September 30, 2017, including profit sharing payable related to amounts in escrow and a contingent consideration obligation of $87.3 million.

(5) Other includes certain SIAs.

The general partners of the private equity, credit and real assets funds listed in the table above were accruing carried interest income as of September 30, 2017. The investment manager of AINV accrues carried interest as it is earned. The general partners of certain of our credit funds accrue carried interest when the fair value of investments exceeds the cost basis of the individual investors' investments in the fund, including any allocable share of expenses incurred in connection with such investments, which we refer to as "high water marks." These high water marks are applied on an individual investor basis. Certain of our credit funds have investors with various high water marks, the achievement of which is subject to market conditions and investment performance.

Carried interest income from our private equity funds and certain credit and real assets funds is subject to contingent repayment by the general partner in the event of future losses to the extent that the cumulative carried interest distributed from inception to date exceeds the amount computed as due to the general partner at the final distribution. These general partner obligations, if applicable, are included in due to related parties on the condensed consolidated statements of financial condition.

The following table summarizes our carried interest since inception for our combined segments through September 30, 2017:

	Carried Interest Since Inception[(1)]				
	Undistributed by Fund and Recognized	Distributed by Fund and Recognized[(2)]	Total Undistributed and Distributed by Fund and Recognized[(3)]	General Partner Obligation as of September 30, 2017[(3)]	Maximum Carried Interest Income Subject to Potential Reversal[(4)]

(1) Certain funds are denominated in Euros and historical figures are translated into U.S. dollars at an exchange rate of €1.00 to $1.18 as of September 30, 2017.
(2) Amounts in "Distributed by Fund and Recognized" for the CPI, Gulf Stream Asset Management, LLC ("Gulf Stream") and Stone Tower funds and SIAs are presented for activity subsequent to the respective acquisition dates.
(3) Amounts were computed based on the fair value of fund investments on September 30, 2017. Carried interest income has been allocated to and recognized by the general partner. Based on the amount of carried interest income allocated, a portion is subject to potential reversal or, to the extent applicable, has been reduced by the general partner obligation to return previously distributed carried interest income or fees at September 30, 2017. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund.
(4) Represents the amount of carried interest income that would be reversed if remaining fund investments became worthless on September 30, 2017. Amounts subject to potential reversal of carried interest income include amounts undistributed by a fund (i.e., the carried interest receivable), as well as a portion of the amounts that have been distributed by a fund, net of taxes not subject to a general partner obligation to return previously distributed carried interest income, except for those funds that are gross of taxes as defined in the respective funds' governing documents.
(5) Amounts exclude AINV, as carried interest income from this entity is not subject to contingent repayment.
(6) Other includes certain SIAs.

Expenses

Compensation and Benefits. Our most significant expense is compensation and benefits expense. This consists of fixed salary, discretionary and non-discretionary bonuses, profit sharing expense associated with the carried interest income earned from private equity, credit and real assets funds and compensation expense associated with the vesting of non-cash equity-based awards.

Our compensation arrangements with certain partners and employees contain a significant performance-based incentive component. Therefore, as our net revenues increase, our compensation costs also rise or can be lower when net revenues decrease. In addition, our compensation costs reflect the increased investment in people as we expand geographically and create new funds.

In addition, certain professionals and selected other individuals have a profit sharing interest in the carried interest income earned in relation to our private equity, certain credit and real assets funds in order to better align their interests with our own and with those of the investors in these funds. Profit sharing expense is part of our compensation and benefits expense and is generally based upon a fixed percentage of private equity, credit and real assets carried interest income on a pre-tax and a pre-consolidated basis. Profit sharing expense can reverse during periods when there is a decline in carried interest income that was previously recognized. Profit sharing amounts are normally distributed to employees after the corresponding investment gains have been realized and generally before preferred returns are achieved for the investors. Therefore, changes in our unrealized gains (losses) for investments have the same effect on our profit sharing expense. Profit sharing expense increases when unrealized gains increase. Realizations only impact profit sharing expense to the extent that the effects on investments have not been recognized previously. If losses on other investments within a fund are subsequently realized, the profit sharing amounts previously distributed are normally subject to a general partner obligation to return carried interest income previously distributed back to the funds. This general partner obligation due to the funds would be realized only when the fund is liquidated, which generally occurs at the end of the fund's term. However, indemnification obligations also exist for pre-reorganization realized gains, which, although our Managing Partners and Contributing Partners would remain personally liable, may indemnify our Managing Partners and Contributing Partners for 17.5% to 100% of the previously distributed profits regardless of the fund's future performance. See note 13 to our condensed consolidated financial statements for further discussion of indemnification.

Each Managing Partner receives $100,000 per year in base salary for services rendered to us. Additionally, our Managing Partners can receive other forms of compensation. In addition, AHL Awards (as defined in note 11 to our condensed consolidated financial statements) and other equity-based compensation awards have been granted to the Company and certain employees, which amortize over the respective vesting periods. In addition, the Company grants equity awards to certain employees, including RSUs, restricted Class A shares and options, that generally vest and become exercisable in quarterly installments or annual installments depending on the contract terms over a period of three to six years. See note 11 to our condensed consolidated financial statements for further discussion of equity-based compensation.

Other Expenses. The balance of our other expenses includes interest, placement fees, and general, administrative and other operating expenses. Interest expense consists primarily of interest related to the 2013 AMH Credit Facilities, the 2024 Senior Notes and the 2026 Senior Notes as discussed in note 9 to our condensed consolidated financial statements. Placement fees are incurred in connection with our capital raising activities. General, administrative and other expenses includes occupancy expense, depreciation and amortization, professional fees and costs related to travel, information technology and administration. Occupancy expense represents charges related to office leases and associated expenses, such as utilities and maintenance fees. Depreciation and amortization of fixed assets is normally calculated using the straight-line method over their estimated useful lives, ranging from two to sixteen years, taking into consideration any residual value. Leasehold improvements are amortized over the shorter of the useful life of the asset or the expected term of the lease. Intangible assets are amortized based on the future cash flows over the expected useful lives of the assets.

Other Income (Loss)

Net Gains (Losses) from Investment Activities. Net gains (losses) from investment activities include both realized gains and losses and the change in unrealized gains and losses in our investment portfolio between the opening reporting date and the closing reporting date. Net unrealized gains (losses) are a result of changes in the fair value of unrealized investments and reversal of unrealized gains (losses) due to dispositions of investments during the reporting period. Significant judgment and estimation goes into the assumptions that drive these models and the actual values realized with respect to investments could be materially different from values obtained based on the use of those models. The valuation methodologies applied impact the reported value of investment company holdings and their underlying portfolios in our condensed consolidated financial statements.

Net Gains (Losses) from Investment Activities of Consolidated Variable Interest Entities. Changes in the fair value of the consolidated VIEs' assets and liabilities and related interest, dividend and other income and expenses subsequent to consolidation are presented within net gains (losses) from investment activities of consolidated variable interest entities and are attributable to Non-Controlling Interests in the condensed consolidated statements of operations.

Other Income (Losses), Net. Other income (losses), net includes gains (losses) arising from the remeasurement of foreign currency denominated assets and liabilities, reversal of a portion of the tax receivable agreement liability and other miscellaneous non-operating income and expenses.

Income Taxes. The Apollo Operating Group and its subsidiaries generally operate as partnerships for U.S. federal income tax purposes. As a result, except as described below, the Apollo Operating Group has not been subject to U.S. income taxes. However, the U.S. entities, in some cases, are subject to NYC UBT, and non-U.S. entities, in some cases, are subject to non-U.S. corporate income taxes. In addition, certain consolidated entities are, or are treated as, corporations for U.S. and non-U.S. tax purposes and therefore subject to federal, state, local and foreign corporate income tax. The Company's provision for income taxes is accounted for in accordance with U.S. GAAP.

Significant judgment is required in determining the provision for income taxes and in evaluating income tax positions, including evaluating uncertainties. We recognize the income tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained upon examination, including resolutions of any related appeals or litigation, based on the technical merits of the positions. The tax benefit is measured as the largest amount of benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. If a tax position is not considered more likely than not to be sustained, then no benefits of the position are recognized. The Company's income tax positions are reviewed and evaluated quarterly to determine whether or not we have uncertain tax positions that require financial statement recognition or de-recognition.

Deferred tax assets and liabilities are recognized for the expected future tax consequences, using currently enacted tax rates, of differences between the carrying amount of assets and liabilities and their respective tax basis. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Non-Controlling Interests

For entities that are consolidated, but not 100% owned, a portion of the income or loss and corresponding equity is allocated to owners other than Apollo. The aggregate of the income or loss and corresponding equity that is not owned by the Company is included in Non-Controlling Interests in the condensed consolidated financial statements. The Non-Controlling Interests relating to Apollo Global Management, LLC primarily include the 51.9% and 53.9% ownership interest in the Apollo Operating Group held by the Managing Partners and Contributing Partners through their limited partner interests in Holdings as of September 30, 2017 and 2016, respectively. Non-Controlling Interests also include limited partner interests in certain consolidated funds and VIEs.

The authoritative guidance for Non-Controlling Interests in the condensed consolidated financial statements requires reporting entities to present Non-Controlling Interest as equity and provides guidance on the accounting for transactions between an entity and Non-Controlling Interests. According to the guidance, (1) Non-Controlling Interests are presented as a separate component of shareholders' equity on the Company's condensed consolidated statements of financial condition, (2) net income (loss) includes the net income (loss) attributable to the Non-Controlling Interest holders on the Company's condensed consolidated statements of operations, (3) the primary components of Non-Controlling Interest are separately presented in the Company's condensed consolidated statements of changes in shareholders' equity to clearly distinguish the interests in the Apollo Operating Group and other ownership interests in the consolidated entities and (4) profits and losses are allocated to Non-Controlling Interests in proportion to their ownership interests regardless of their basis.

Results of Operations

Below is a discussion of our condensed consolidated results of operations for the three and nine months ended September 30, 2017 and 2016. For additional analysis of the factors that affected our results at the segment level, see "-Segment Analysis" below:

	For the Three Months Ended September 30,		Amount Change	Percentage Change	For the Nine Months Ended September 30,		Amount Change	Percentage Change

Note:"NM" denotes not meaningful. Changes from negative to positive amounts and positive to negative amounts are not considered meaningful. Increases or decreases from zero and changes greater than 500% are also not considered meaningful.

Revenues

Our revenues and other income include fixed components that result from measures of capital and asset valuations and variable components that result from realized and unrealized investment performance, as well as the value of successfully completed transactions.

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Management fees from related parties increased by $27.1 million for the three months ended September 30, 2017 as compared to the three months ended September 30, 2016. This change was primarily attributable to increased management fees earned with respect to EPF III, Athene and FCI III of $20.5 million, $7.6 million and $6.7 million, respectively, offset by a decrease in management fees earned with respect to ANRP II of $12.7 million during the three months ended September 30, 2017 as compared to the same period in 2016. Management fees earned from EPF III and FCI III increased as a result of capital raises that occurred after September 30, 2016, as well as a one-time catch-up of management fees during the three months ended September 30, 2017 of $7.4 million and $4.9 million from EPF III and FCI III, respectively. Management fees earned from ANRP II decreased primarily as a result of a catch-up of management fees during the three months ended September 30, 2016 of $13.2 million.

Advisory and transaction fees from related parties, net, decreased by $13.6 million for the three months ended September 30, 2017 as compared to the three months ended September 30, 2016. This change was primarily attributable to a decrease in net advisory and transaction fees earned with respect to Fund VIII's portfolio companies of $15.3 million during the three months ended September 30, 2017 as compared to the same period in 2016.

Carried interest income from related parties increased by $147.0 million for the three months ended September 30, 2017 as compared to the three months ended September 30, 2016. This change was primarily attributable to increased carried interest income earned from our private equity funds of $223.6 million, offset by decreased carried interest income earned from our credit funds of $75.7 million during the three months ended September 30, 2017 as compared to the same period in 2016. For additional details regarding changes in carried interest income in each segment, see "-Segment Analysis" below.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Management fees from related parties increased by $77.1 million for the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. This change was primarily attributable to increased management fees earned from EPF III, Athene and FCI III of $43.1 million, $24.2 million, and $10.0 million, respectively, during the nine months ended September 30, 2017 as compared to the same period during 2016. Management fees earned from EPF III and FCI III increased as a result of capital raises that occurred after September 30, 2016, as well as a one-time catch-up of management fees during the nine months ended September 30, 2017 of $10.8 million and $7.0 million from EPF III and FCI III, respectively.

Advisory and transaction fees from related parties, net, decreased by $47.8 million for the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. This change was primarily attributable to a decrease in net advisory and transaction fees earned with respect to Fund VIII's portfolio companies of $49.0 million during the nine months ended September 30, 2017 as compared to the same period during 2016.

Carried interest income from related parties increased by $426.3 million for the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. This change was primarily attributable to increased carried interest income earned from our private equity funds of $519.0 million, offset by decreased carried interest income earned from our credit funds of $98.8 million during the nine months ended September 30, 2017 as compared to the same period in 2016. For additional details regarding changes in carried interest income in each segment, see "-Segment Analysis" below.

Expenses

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Compensation and benefits increased by $61.7 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in profit sharing expense of $47.1 million due to increased carried interest income during the three months ended September 30, 2017, as compared to the same period in 2016. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. In addition, this change was attributable to an increase in salary, bonus and benefits of $16.3 million for the three months ended September 30, 2017, as compared to the same period in 2016 as a result of an increase in headcount.

Included in profit sharing expense is $13.7 million and $10.4 million for the three months ended September 30, 2017 and 2016, respectively, related to a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company (referred to herein as the "Incentive Pool"). Allocations to participants in the Incentive Pool contain both a fixed component and a discretionary component, each of which may vary year to year. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period. See "-Profit Sharing Expense" in the Critical Accounting Policies section for an overview of the Incentive Pool.

General, administrative and other expenses increased by $9.6 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016 primarily due to an increase in professional fees during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016.

Placement fees increased by $3.4 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016 primarily as a result of placement fees related to the launches of EPF III and Fund IX of $2.6 million and $2.3 million, respectively, during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Compensation and benefits increased by $182.0 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in profit sharing expense of $159.9 million due to increased carried interest income during the nine months ended September 30, 2017, as compared to the same period in 2016. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $54.0 million and $41.9 million for the nine months ended September 30, 2017 and 2016, respectively, related to the Incentive Pool. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period. See "-Profit Sharing Expense" in the Critical Accounting Policies section for an overview of the Incentive Pool.

Interest expense increased by $9.0 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 primarily as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 9 to our condensed consolidated financial statements.

General, administrative and other expense increased by $2.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 primarily as a result of increased fund organizational expenses related to Fund IX during the nine months ended September 30, 2017, as compared to the same period in 2016.

Placement fees increased by $6.8 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 as a result of placement fees related to the launch of EPF III of $7.5 million during the nine months ended September 30, 2017.

Other Income (Loss)

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Net gains from investment activities increased by $51.2 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company's investment in Athene Holding during the three months ended September 30, 2017, as compared to the same period in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company's investment in Athene Holding.

Income from equity method investments increased by $24.3 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by increases in the value of investments held by certain Apollo funds and other entities in which the Company has a direct interest, mainly with respect to Fund VIII of $21.4 million, during the three months ended September 30, 2017 as compared to the same period in 2016.

Other income, net increased by $25.4 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to $19.0 million in proceeds received in connection with the Company's early termination of a lease during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Net gains from investment activities increased by $52.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company's investment in Athene Holding during the nine months ended September 30, 2017, as compared to the same period in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company's investment in Athene Holding.

Net gains from investment activities of consolidated VIEs increased by $8.3 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. See note 4 to the condensed consolidated financial statements for details regarding net gains from investment activities of consolidated VIEs.

Income from equity method investments increased by $38.5 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily driven by increases in the value of investments held by certain Apollo funds and other entities in which the Company has a direct interest, mainly with respect to Fund VIII and AAA of $29.5 million and $6.5 million, respectively, during the nine months ended September 30, 2017, as compared to the same period in 2016.

Other income, net increased by $44.3 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 primarily attributable to $19.0 million in proceeds received in connection with the Company's early termination of a lease during the nine months ended September 30, 2017, in addition to $17.5 million in insurance proceeds received during the nine months ended September 30, 2017 in connection with fees and expenses relating to a legal proceeding.

Net Income Attributable to Non-Controlling Interests and Preferred Shareholders

For information related to net income attributable to Non-Controlling Interests and net income attributable to preferred shareholders, see note 12 to the condensed consolidated financial statements.

Income Tax Provision

The Apollo Operating Group and its subsidiaries generally operate as partnerships for U.S. federal income tax purposes. As a result, only a portion of the income we earn is subject to corporate-level tax in the United States and foreign jurisdictions. The provision for income taxes includes federal, state and local income taxes in the United States and foreign income taxes.

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

The income tax provision decreased by $13.1 million for three months ended September 30, 2017, as compared to the three months ended September 30, 2016. The decrease in the income tax provision was primarily due to an overall change in the mix of earnings when comparing the amount of earnings that are subject to corporate-level taxation to those earnings that are not subject to corporate-level tax as these earnings are passed through to Non-Controlling Interests and Class A shareholders. The provision for income taxes includes federal, state, local and foreign income taxes resulting in an effective income tax rate of 3.7% and 11.2% for the three months ended September 30, 2017 and 2016, respectively. The most significant reconciling items between our U.S. federal statutory income tax rate and our effective income tax rate were due to the following: (i) income passed through to Non-Controlling Interests; (ii) income passed through to Class A shareholders; and (iii) state and local income taxes including NYC UBT (see note 8 to the condensed consolidated financial statements for further details regarding the Company's income tax provision).

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

The income tax provision decreased by $7.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. The decrease was primarily due to an overall change in the mix of earnings when comparing the amount of earnings that are subject to corporate-level taxation to those earnings that are not subject to corporate-level tax as these earnings are passed through to Non-Controlling Interests and Class A shareholders. The provision for income taxes includes federal, state, local and foreign income taxes resulting in an effective income tax rate of 5.3% and 9.8% for the nine months ended September 30, 2017 and 2016, respectively. The most significant reconciling items between our U.S. federal statutory income tax rate and our effective income tax rate were due to the following: (i) income passed through to Non-Controlling Interests; (ii) income passed through to Class A shareholders; and (iii) state and local income taxes including NYC UBT (see note 8 to the condensed consolidated financial statements for further details regarding the Company's income tax provision).

Segment Analysis

Discussed below are our results of operations for each of our reportable segments. They represent the segment information available and utilized by our executive management, which consists of our Managing Partners, who operate collectively as our chief operating decision maker, to assess performance and to allocate resources. Management divides its operations into three reportable segments: private equity, credit and real assets. These segments were established based on the nature of investment activities in each underlying fund, including the specific type of investment made and the level of control over the investment. Segment results represent segment income (loss) before income tax provision excluding transaction-related charges arising from the 2007 private placement, and any acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets and contingent consideration and certain other charges associated with acquisitions. In addition, segment results exclude non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the condensed consolidated financial statements.

Our financial results vary, since carried interest, which generally constitutes a large portion of the income from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

Private Equity

The following table sets forth our segment statement of operations information and our supplemental performance measure, EI, within our private equity segment for the three and nine months ended September 30, 2017 and 2016. Prior period financial data has been updated to conform to the current presentation.

(1) Included in unrealized carried interest income (loss) from related parties for the nine months ended September 30, 2017 and 2016 was a reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. See note 13 to our condensed consolidated financial statements for further detail regarding the general partner obligation.

Revenues

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Management fees from affiliates decreased by $15.5 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to a decrease in management fees earned with respect to ANRP II of $12.7 million during the three months ended September 30, 2017 as compared to the three months ended September 30, 2016 primarily due to a one-time catch-up of management fees during the three months ended September 30, 2016 of $13.2 million.

Advisory and transaction fees from related parties, net decreased by $16.0 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to a decrease in net advisory and transaction fees earned with respect to Fund VIII’s portfolio companies of $15.3 million during the three months ended September 30, 2017 as compared to the three months ended September 30, 2016.

Carried interest income from related parties increased by $223.6 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to increases in carried interest income earned from Fund VIII, Fund VII and Fund VI of $156.3 million, $40.8 million and $33.8 million, respectively. The increase in carried interest income earned from Fund VIII was primarily driven by appreciation in value in the fund's private portfolio companies. The increases in carried interest income earned from Fund VII and Fund VI were primarily driven by appreciation in value in the funds' public portfolio companies.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Management fees from related parties decreased by $12.2 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to decreases in management fees earned with respect to ANRP II during the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016 primarily due to a one-time catch-up of management fees during the nine months ended September 30, 2016 of $14.8 million.

Advisory and transaction fees from related parties, net decreased by $46.0 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to a decrease in net advisory and transaction fees earned with respect to Fund VIII's portfolio companies of $49.0 million during the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016.

Carried interest income from related parties increased by $519.0 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to increases in carried interest income earned from Fund VIII, Fund VI and Fund VII of $271.0 million, $198.7 million and $46.1 million, respectively, during the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. The increase in carried interest income earned from Fund VIII and Fund VII was primarily driven by appreciation in value in the funds' private portfolio companies. The increase in carried interest income earned from Fund VI was primarily driven by appreciation in value in the fund's public portfolio companies.

Expenses

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Compensation and benefits expense increased by $87.3 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in profit sharing expense of $88.7 million as a result of a corresponding increase in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds that are generating carried interest in the period.

Included in profit sharing expense is $9.3 million and $2.9 million related to the Incentive Pool for the three months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other increased by $1.6 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by an increase in professional fees during the three months ended September 30, 2017, as compared to the same period in 2016.

Placement fees increased by $1.9 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by placement fees incurred in connection with capital raising activity relating to Fund IX of $2.3 million during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Compensation and benefits expense increased by $224.7 million for the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in profit sharing expense of $227.3 million as a result of a corresponding increase in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $40.5 million and $2.9 million related to the Incentive Pool for the nine months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and

may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

Placement fees increased by $1.3 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily driven by placement fees incurred during the nine months ended September 30, 2017 of $3.5 million in connection with capital raising activity relating to Fund IX. Placement fees during the nine months ended September 30, 2016 were primarily incurred in connection with capital raising activity relating to ANRP II of $2.1 million.

Other Income

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Income from equity method investments increased by $25.5 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to increases in the income from Apollo’s equity ownership interest in Fund VIII and Fund VII of $21.4 million and $3.0 million, respectively, during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016.

Net gains from investment activities increased by $6.8 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company’s investment in Athene Holding during the three months ended September 30, 2017, as compared to the same period in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company’s investment in Athene Holding.

Other income, net increased by $7.2 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to proceeds received in connection with the Company’s early termination of a lease which occurred during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Income from equity method investments increased by $41.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to increases in income from Apollo’s equity ownership interest in Fund VIII, AAA and AION of $29.5 million, $6.5 million and $5.5 million, respectively, during the nine months ended September 30, 2017, as compared to the same period in 2016.

Net gains from investment activities increased by $7.7 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company’s investment in Athene Holding during the nine months ended September 30, 2017, as compared to the same period in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company’s investment in Athene Holding.

Net interest loss increased by $3.1 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016, primarily due to additional interest expense incurred during the nine months ended September 30, 2017 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 9 to our condensed consolidated financial statements.

Other income, net increased by $25.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to proceeds received in connection with the Company’s early termination of a lease which occurred during the nine months ended September 30, 2017, in addition to $17.5 million in insurance proceeds received during the nine months ended September 30, 2017 in connection with fees and expenses relating to a legal proceeding.

Credit

The following table sets forth segment statement of operations information and EI within our credit segment for the three and nine months ended September 30, 2017 and 2016. Prior period financial data has been updated to conform to the current presentation.

(1) Included in unrealized carried interest income (loss) from related parties for the nine months ended September 30, 2017 and 2016 was a reversal of previously realized carried interest income due to the general partner obligation to return previously distributed carried interest income. See note 13 to our condensed consolidated financial statements for further detail regarding the general partner obligation.

Revenues

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Management fees from related parties increased by $36.5 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to increases in management fees earned from EPF III, Athene and FCI III of $20.5 million, $7.6 million and $6.7 million, respectively, during the three months ended September 30, 2017, as compared to the same period during 2016. Management fees earned from EPF III and FCI III increased as a result of capital raises that occurred after September 30, 2016, as well as a one-time catch-up of management fees during the three months ended September 30, 2017 of $7.4 million and $4.9 million from EPF III and FCI III, respectively.

Advisory and transaction fees from affiliates, net, increased by $1.6 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by an increase in net

advisory and transaction fees from FCI III of $2.0 million during the three months ended September 30, 2017, as compared to the same period during 2016.

Carried interest income from related parties decreased by $75.7 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to decreases in carried interest income earned from EPF II, CLOs, Apollo Credit Master Fund Ltd and FCI II of $19.6 million, $11.7 million, $12.0 million and $6.2 million, respectively, during the three months ended September 30, 2017, as compared to the same period in 2016.

The decrease in carried interest income earned from EPF II was primarily attributable to decreased appreciation of European and UK hotel assets and German commercial real estate investments in the fund's portfolio for the three months ended September 30, 2017 as compared to the same period in 2016. The decrease in carried interest income earned from the CLOs was due to under-performance relative to each respective CLO hurdle rate and lower appreciation and gains from the leveraged loan markets during the three months ended September 30,2017 as compared to the same period in 2016. The decrease in carried interest income earned from Apollo Credit Master Fund Ltd. was due to under-performance relative to the fund's hurdle rate during the three months ended September 30, 2017, as compared to the same period in 2016 as a result of lower appreciation on investments in the financial and technology sectors during the three months ended September 30, 2017. The decrease in carried interest income related to FCI II was due to lower valuations of the fund's life settlements portfolio during the three months ended September 30, 2017 as compared to the same period in 2016.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Management fees from related parties increased by $70.9 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to increases in management fees earned from EPF III, Athene and FCI III of $43.1 million, $24.2 million and $10.0 million, respectively. Management fees earned from EPF III and FCI III increased as a result of capital raises that occurred after September 30, 2016, as well as a one-time catch-up of management fees during the nine months ended September 30, 2017 of $10.8 million and $7.0 million from EPF III and FCI III, respectively. These increases were partially offset by a decrease in management fees earned from EPF II of $17.7 million during the nine months ended September 30, 2017, as compared to the same period during 2016, primarily resulting from a step down in fee basis from committed capital to invested capital during the nine months ended September 30, 2017.

Carried interest income from related parties decreased by $98.8 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to a decrease in carried interest income earned from Apollo Credit Master Fund Ltd, CLOs, EPF II, SCRF III and FCI II of $31.0 million, $22.3 million, $13.2 million, $9.9 million and $9.8 million, respectively, during the nine months ended September 30, 2017, as compared to the same period during 2016.

The decrease in carried interest income related to Apollo Credit Master Fund Ltd. was due to under-performance relative to the fund's hurdle rate during the nine months ended September 30, 2017, as compared to the same period in 2016 as a result of lower appreciation on investments in the financial and technology sectors during the nine months ended September 30, 2017. The decrease in carried interest income earned from the CLOs was due to under-performance relative to each respective CLO hurdle rate and lower appreciation and gains from the leveraged loan markets during the nine months ended September 30,2017 as compared to the same period in 2016. The decrease in carried interest income from EPF II was primarily attributable to lower appreciation of European and UK hotel assets in the fund's portfolio for the nine months ended September 30, 2017 as compared to the same period in 2016. The decrease in carried interest income related to SCRF III was attributable to carried interest income being generated at a slower rate as the fund began to unwind during the nine months ended September 30, 2017. The decrease in carried interest income earned from FCI II was due to lower valuations of the fund's life settlements portfolio during the nine months ended September 30, 2017 as compared to the same period in 2016.

Expenses

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Compensation and benefits expense decreased by $13.4 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily due to decreases in profit sharing expense of $28.4 million, offset by increases in salary, bonus and benefits of $13.9 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016 primarily due to increased headcount. Profit sharing expense decreased as a result of a corresponding decrease in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period.

Included in profit sharing expense is $3.9 million and $5.7 million related to the Incentive Pool for the three months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and

may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other increased by $6.5 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by an increase in professional fees during the three months ended September 30, 2017, as compared to the same period in 2016.

Placement fees increased by $2.4 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily driven by placement fees incurred in connection with capital raising activity relating to EPF III of $2.6 million during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Compensation and benefits expense decreased by $30.2 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to a decrease in profit sharing expense of $54.4 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 as a result of a corresponding decrease in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. The decrease in profit sharing expense was partially offset by an increase in salary, bonus and benefits of $21.7 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016 primarily due to increased headcount.

Included in profit sharing expense is $12.5 million and $35.6 million related to the Incentive Pool for the nine months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other increased by $4.4 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. The change was primarily driven by an increase in fund organizational expenses related to the launch of EPF III as well as an increase in professional fees during the nine months ended September 30, 2017, as compared to the same period in 2016.

Placement fees increased by $6.7 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily driven by placement fees incurred in connection with capital raising activity relating to EPF III of $7.5 million during the nine months ended September 30, 2017.

Other Income

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Net gains from investment activities increased by $44.4 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company's investment in Athene Holding during the three months ended September 30, 2017, as compared to the same period in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company's investment in Athene Holding.

Other income (loss), net increased by $21.3 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to proceeds received in connection with the Company's early termination of a lease and the Company's recognition of $6.2 million of other income from the assignment of a CLO collateral management agreement during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Income from equity method investments decreased by $1.3 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily driven by a decrease in income from Apollo's equity ownership interest in Apollo Energy Opportunity Fund, L.P. ("AEOF") and EPF II of $4.3 million and $2.1 million, respectively, partially offset by an increase in income from Apollo's equity ownership interest in AINV of $5.4 million during the nine months ended September 30, 2017, as compared to the same period in 2016.

Net gains from investment activities increased by $45.5 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in the fair value of the Company's investment in Athene Holding during the nine months ended September 30, 2017, as compared to the same period

in 2016. See note 5 to the condensed consolidated financial statements for further information regarding the Company's investment in Athene Holding.

Net interest loss increased by $4.4 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016, primarily due to additional interest expense incurred during the nine months ended September 30, 2017 as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 9 to our condensed consolidated financial statements.

Other income (loss), net increased by $22.4 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to proceeds received in connection with the Company's early termination of a lease and proceeds received from the assignment of a CLO collateral management agreement during the nine months ended September 30, 2017.

Non-Controlling Interests

For information related to Non-Controlling Interests, see note 12 to the condensed consolidated financial statements for further details.

Real Assets

The following table sets forth our segment statement of operations information and EI within our real assets segment for the three and nine months ended September 30, 2017 and 2016. Prior period financial data has been updated to conform to the current presentation.

Revenues

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Management fees from related parties increased by $2.9 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to increases in management fees earned with respect to ARI and Apollo Asia Real Estate Fund, L.P. (“Asia RE Fund”) of $2.5 million and $0.6 million, respectively, during the three months ended September 30, 2017, as compared to the same period during 2016, in connection with capital raises for the funds during 2017.

Carried interest income from related parties decreased by $4.6 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. Carried interest income earned from certain funds, including U.S. RE Fund I and II, includes an allocation of carried interest income from a strategic investment account that invests in the funds. This change was primarily attributable to decreases in carried interest income earned from strategic investment accounts and U.S. RE Fund II of $2.3 million and $1.1 million, respectively. The decrease in carried interest income earned from U.S. RE Fund II was primarily the result of stronger operating performance across many of the funds’ underlying properties and higher appreciation of several real estate investments during the three months ended September 30, 2016 as compared to the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Management fees from related parties increased by $11.6 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to increases in management fees earned with respect to ARI and Asia RE Fund of $7.2 million and $2.8, respectively, during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016, in connection with capital raises for the funds during 2017.

Advisory and transaction fees from related parties, net, decreased by $2.7 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to decreases in net advisory and transaction fees earned with respect to AGRE Debt Fund I, L.P. ("AGRE Debt Fund I") and U.S. RE Fund II of $2.0 million and $0.4 million, respectively, during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016.

Carried interest income from related parties increased by $2.8 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to an increase in carried interest income earned from U.S. RE Fund II of $3.3 million, partially offset by a decrease in carried interest income earned from U.S. RE Fund I of $1.5 million during the nine months ended September 30, 2017, as compared to the same period during 2016. The increase in carried interest income earned from U.S. RE Fund II was primarily due to strong operating performance across many of the fund's underlying properties and appreciation of several real estate investments during the nine months ended September 30, 2017. The decrease in carried interest income earned from U.S. RE Fund I was primarily due to lower appreciation of several investments during the nine months ended September 30, 2017, as compared to the same period during 2016.

Expenses

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Compensation and benefits decreased by $4.2 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to a decrease in profit sharing expense of $5.7 million during the three months ended September 30, 2017 as compared to the three months ended September 30, 2016 as a result of a corresponding decrease in carried interest income as described above. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. The decrease in profit sharing expense was partially offset by an increase in salary, bonus and benefits of $1.4 million during the three months ended September 30, 2017, as compared to the same period during 2016 primarily due to increased headcount.

Included in profit sharing expense is $0.5 million and $1.8 million related to the Incentive Pool for the three months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other increased by $0.8 million during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. This change was primarily attributable to an increase in professional fees during the three months ended September 30, 2017, as compared to the three months ended September 30, 2016.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Compensation and benefits decreased by $1.4 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to a decrease in profit sharing expense of $3.2 million during the nine months ended September 30, 2017 as compared to the nine months ended September 30, 2016. In any period the blended profit sharing percentage is impacted by the respective profit sharing ratios of the funds generating carried interest in the period. The decrease in profit sharing expense was partially offset by an increase in salary, bonus and benefits of $1.8 million during the nine months ended September 30, 2017, as compared to the same period during 2016 primarily due to increased headcount.

Included in profit sharing expense is $0.9 million and $3.5 million related to the Incentive Pool for the nine months ended September 30, 2017 and 2016, respectively. The Incentive Pool is separate from the fund related profit sharing expense and may result in greater variability in compensation and have a variable impact on the blended profit sharing percentage during a particular period.

General, administrative and other decreased by $0.9 million during the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016. This change was primarily attributable to fund organizational expenses related to U.S. RE Fund II incurred during the nine months ended September 30, 2016.

Other Income (Loss)

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Other income (loss), net increased by $2.1 million for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016, primarily attributable to proceeds received in connection with the Company's early termination of a lease during the three months ended September 30, 2017.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Net interest loss increased by $0.7 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016, primarily due to additional interest expense incurred during the nine months ended September 30, 2017 primarily as a result of the issuance of the 2026 Senior Notes in May 2016, as described in note 9 to our condensed consolidated financial statements.

Other income (loss), net increased by $2.4 million for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016, primarily attributable to proceeds received in connection with the Company's early termination of a lease during the nine months ended September 30, 2017.

Summary of Fee Related Earnings

The following table is a summary of Fee Related Earnings for the three and nine months ended September 30, 2017 and 2016.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in thousands)			
Management Fees	$ 282,434	$ 258,485	$ 801,395	$ 731,051
Advisory and Transaction Fees from Related Parties, net	16,209	30,251	54,905	103,149
Carried Interest Income from Related Parties[1]	6,173	2,307	12,636	17,516
Salary, Bonus and Benefits	(101,007)	(86,804)	(294,288)	(273,696)
Non-compensation Expenses	(66,325)	(53,006)	(181,094)	(170,375)
Other Income (Loss) attributable to Fee Related Earnings[2]	26,456	(4,240)	46,818	(4,166)
Non-Controlling Interest	(1,751)	(510)	(3,244)	(5,070)
Fee Related Earnings	$ 162,189	$ 146,483	$ 437,128	$ 398,409

(1) Represents carried interest income earned from a publicly traded business development company we manage.

(2) Includes $19.0 million in proceeds received in connection with the Company's early termination of a lease during the three and nine months ended September 30, 2017. Includes $17.5 million in insurance proceeds received in connection with fees and expenses relating to a legal proceeding during the nine months ended September 30, 2017.

Table of Contents

Summary of Distributable Earnings

The following table is a reconciliation of Distributable Earnings per share of common and equivalents[1] to net distribution per share of common and equivalent for the three and nine months ended September 30, 2017 and 2016.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in thousands, except per share data)			
Distributable Earnings	$ 185,131	$ 152,636	$ 682,442	$ 421,706
Taxes and related payables[2]	(7,272)	(4,105)	(20,344)	(9,346)
Preferred distributions	(4,383)	-	(9,155)	-
Distributable Earnings After Taxes and Related Payables	173,476	148,531	652,943	412,360
Add back: Tax and related payables attributable to common and equivalents	4,706	3	14,091	9
Distributable Earnings before certain payables[3]	178,182	148,534	667,034	412,369
Percent to common and equivalents	49%	47%	49%	47%
Distributable Earnings before other payables attributable to common and equivalents	87,078	69,821	325,981	193,841
Less: Taxes and related payables attributable to common and equivalents	(4,706)	(3)	(14,091)	(9)
Distributable Earnings attributable to common and equivalents	$ 82,372	$ 69,818	$ 311,890	$ 193,832
Distributable Earnings per share of common and equivalent[4]	$ 0.42	$ 0.36	$ 1.59	$ 1.01
Retained capital per share of common and equivalent[4][5]	(0.03)	(0.01)	(0.19)	(0.04)
Net distribution per share of common and equivalent[4]	$ 0.39	$ 0.35	$ 1.40	$ 0.97

(1) Common and equivalents refers to Class A shares outstanding and RSUs that participate in distributions.
(2) Represents the estimated current corporate, local and non-U.S. taxes as well as the payable under Apollo's tax receivable agreement.
(3) Distributable earnings before certain payables represents Distributable Earnings before the deduction for the estimated current corporate taxes and the payable under Apollo's tax receivable agreement.
(4) Per share calculations are based on end of period Distributable Earnings Shares Outstanding, which consists of total Class A shares outstanding, AOG Units and RSUs that participate in distributions (collectively referred to as "common & equivalents").
(5) Retained capital is withheld pro-rata from common and equivalent holders and AOG Unit holders.

Table of Contents

Summary of Non-U.S. GAAP Measures

The table below sets forth a reconciliation of net income attributable Apollo Global Management, LLC Class A Shareholders to our non-U.S. GAAP performance measures for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
	(in thousands)			
Net Income Attributable to Apollo Global Management, LLC Class A Shareholders	$ 198,569	$ 94,619	$ 430,673	$ 235,883
Preferred distributions	4,383	-	9,155	-
Net income (loss) attributable to Non-Controlling Interests in consolidated entities	1,048	(222)	8,967	3,891
Net income attributable to Non-Controlling Interests in the Apollo Operating Group	230,363	140,321	533,540	336,186

Distributable Earnings After Taxes and Related Payables	$ 173,476	$ 148,531	$ 652,943	$ 412,360

(1) See note 15 for more details regarding Economic Income for the combined segments.
(2) Excludes carried interest income from a publicly traded business development company we manage.
(3) Includes equity-based compensation related to RSUs (excluding RSUs granted in connection with the 2007 private placement), share options and restricted share awards.

Liquidity and Capital Resources

Historical

Although we have managed our historical liquidity needs by looking at deconsolidated cash flows, our historical condensed consolidated statements of cash flows reflect the cash flows of Apollo, as well as those of the consolidated Apollo funds and VIEs.

The primary cash flow activities of Apollo are:

- Generating cash flow from operations;
- Making investments in Apollo funds;
- Meeting financing needs through credit agreements; and
- Distributing cash flow to equity holders and Non-Controlling Interests.

Primary cash flow activities of the consolidated Apollo funds and VIEs are:

- Raising capital from their investors, which have been reflected historically as Non-Controlling Interests of the consolidated subsidiaries in our financial statements;
- Using capital to make investments;
- Generating cash flow from operations through distributions, interest and the realization of investments;
- Distributing cash flow to investors; and
- Issuing debt to finance investments (CLOs).

While primarily met by cash flows generated through fee income and carried interest income received, working capital needs have also been met (to a limited extent) through borrowings as described in note 9 to the condensed consolidated financial statements.

We determine whether to make capital commitments to our funds in excess of our minimum required amounts based on a variety of factors, including estimates regarding our liquidity resources over the estimated time period during which commitments will have to be funded, estimates regarding the amounts of capital that may be appropriate for other funds that we are in the process of raising or are considering raising, and our general working capital requirements.

Cash Flows

Significant amounts from our condensed consolidated statements of cash flows for the nine months ended September 30, 2017 and 2016 are summarized and discussed within the table and corresponding commentary below:

	For the Nine Months Ended September 30,	
	2017	2016
	(in thousands)	
Operating Activities	$ 667,484	$ 573,171
Investing Activities	(244,204)	(172,325)
Financing Activities	(295,901)	(85,222)
Net Increase in Cash and Cash Equivalents	$ 127,379	$ 315,624

Operating Activities

Our net cash provided by operating activities was $667.5 million and $573.2 million during the nine months ended September 30, 2017 and 2016, respectively. These amounts were primarily driven by:

- net income of $982.3 million and $576.0 million during the nine months ended September 30, 2017 and 2016, respectively, as well as non-cash adjustments, net of $(69.4) million and $27.1 million, respectively;
- a net increase in our carried interest receivable of $(325.8) million and $(348.8) million during the nine months ended September 30, 2017 and 2016, respectively, due to a change in the fair value of our funds that generate carried interest of $828.4 million and $451.0 million during the nine months ended September 30, 2017 and 2016, respectively, offset

by fund distributions to the Company of $507.5 million and $103.1 million during the nine months ended September 30, 2017 and 2016, respectively;

- purchases of investments held by consolidated VIEs in the amount of $517.7 million and $396.8 million, offset by proceeds from sales of investments held by consolidated VIEs in the amount of $385.0 million and $422.9 million during the nine months ended September 30, 2017 and 2016, respectively;
- a net increase in due from related parties in the amount of $47.5 million and $49.9 million during the nine months ended September 30, 2017 and 2016, respectively;
- a net (decrease) increase in due to related parties in the amount of $(12.8) million and $68.7 million during the nine months ended September 30, 2017 and 2016, respectively;
- a net increase in accrued compensation and benefits in the amount of $91.9 million and $65.6 million during the nine months ended September 30, 2017 and 2016, respectively;
- payments made towards the satisfaction of our contingent obligations of $23.6 million and $10.1 million during the nine months ended September 30, 2017 and 2016, respectively;
- a net (decrease) increase in deferred revenue in the amount of $(17.3) million and $29.2 million during the nine months ended September 30, 2017 and 2016, respectively; and
- a net increase in our profit sharing payable of $179.7 million and $168.7 million during the nine months ended September 30, 2017 and 2016, respectively, due to profit sharing expense of $344.5 million and $210.5 million during the nine months ended September 30, 2017 and 2016, respectively, offset by payments of $183.7 million and $40.1 million during the nine months ended September 30, 2017 and 2016, respectively.

Investing Activities

Our net cash used in investing activities was $(244.2) million and $(172.3) million during the nine months ended September 30, 2017 and 2016, respectively. These amounts were primarily driven by:

- net cash contributions to our equity method investments of $35.9 million and $119.9 million during the nine months ended September 30, 2017 and 2016, respectively;
- purchases of fixed assets of $5.9 million and $4.9 million during the nine months ended September 30, 2017 and 2016, respectively;
- purchases of U.S. Treasury securities of $198.9 million the during the nine months ended September 30, 2017;
- issuance of related party loans of $5.8 million offset by repayment of related party loans of $17.7 million during the nine months ended September 30, 2017; and
- purchases of investments in the amount of $14.8 million and $44.5 million during the nine months ended September 30, 2017 and 2016, respectively.

Financing Activities

Our net cash used in financing activities was $(295.9) million and $(85.2) million during the nine months ended September 30, 2017 and 2016, respectively. These amounts were primarily driven by:

- cash received, net of issuance costs, in connection with the issuance of Preferred shares of $264.4 million during the nine months ended September 30, 2017;
- cash distributions paid to our Class A shareholders of $288.7 million and $172.1 million, during the nine months ended September 30, 2017 and 2016, respectively;
- cash distributions paid to the Non-Controlling Interest holders in the Apollo Operating Group of $329.2 million and $194.4 million during the nine months ended September 30, 2017 and 2016, respectively;
- cash contributions from Non-Controlling Interest holders in consolidated VIEs of $42.5 million and $12.9 million during the nine months ended September 30, 2017 and 2016, respectively;
- cash used for purchases of Class A shares of $18.5 million and $13.0 million during the nine months ended September 30, 2017 and 2016, respectively;
- net distributions related to tax liabilities associated with issuances of Class A shares in settlement of RSUs of $28.0 million and $35.3 million during the nine months ended September 30, 2017 and 2016, respectively;
- issuance of debt of consolidated VIEs of $534.6 million offset by repayments of debt of consolidated VIEs of $442.6 million during the nine months ended September 30, 2017; and
- issuance of debt of $532.7 million offset by repayments of debt of $200.0 million during the nine months ended September 30, 2016.

Distributions

In addition to other distributions such as payments pursuant to the tax receivable agreement, see note 12 to the condensed consolidated financial statements for information regarding the quarterly distributions which were made at the sole discretion of the Company's manager during 2017 and 2016.

Future Cash Flows

Our ability to execute our business strategy, particularly our ability to increase our AUM, depends on our ability to establish new funds and to raise additional investor capital within such funds. Our liquidity will depend on a number of factors, such as our ability to project our financial performance, which is highly dependent on our funds and our ability to manage our projected costs, fund performance, our access to credit facilities, our being in compliance with existing credit agreements, as well as industry and market trends. Also during economic downturns the funds we manage might experience cash flow issues or liquidate entirely. In these situations we might be asked to reduce or eliminate the management fee and incentive fees we charge, which could adversely impact our cash flow in the future.

An increase in the fair value of our funds' investments, by contrast, could favorably impact our liquidity through higher management fees where the management fees are calculated based on the net asset value, gross assets and adjusted assets. Additionally, higher carried interest income not yet realized would generally result when investments appreciate over their cost basis which would not have an impact on the Company's cash flow.

As of September 30, 2017, Fund VII's and Fund VI's remaining investments and escrow cash were valued at 99% and 97% of the fund's unreturned capital, respectively, which was below the required escrow ratio of 115%. As a result, these funds are required to place in escrow current and future carried interest income distributions to the general partner until the specified return ratio of 115% is met (at the time of a future distribution) or upon liquidation.

On April 20, 2010, the Company announced that it entered into a strategic relationship agreement with CalPERS. The strategic relationship agreement provides that Apollo will reduce fees charged to CalPERS on funds it manages, or in the future will manage, solely for CalPERS by $125 million over a five-year period or as close a period as required to provide CalPERS with that benefit. The agreement further provides that Apollo will not use a placement agent in connection with securing any future capital commitments from CalPERS. As of September 30, 2017, the Company had reduced fees charged to CalPERS on the funds it manages by approximately $105.7 million.

Although we expect to pay distributions according to our distribution policy, we may not pay distributions according to our policy, or at all, if, among other things, we do not have the cash necessary to pay the intended distributions. To the extent we do not have cash on hand sufficient to pay distributions, we may have to borrow funds to pay distributions, or we may determine not to pay distributions. The declaration, payment and determination of the amount of our quarterly distributions are at the sole discretion of our manager.

In February 2016, Apollo adopted a plan to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through a reduction of Class A shares to be issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the 2007 Equity Plan, which we refer to as net share settlement. Under the share repurchase program, shares may be repurchased from time to time in open market transactions, in privately negotiated transactions or otherwise, with the size and timing of these repurchases depending on legal requirements, price, market and economic conditions and other factors. See note 12 to the condensed consolidated financial statements for further information regarding the Company's share repurchase program and net share settlement during the three and nine months ended September 30, 2017 and 2016.

On March 11, 2016, it was announced that Apollo intended to embark on a program to purchase $50 million of AINV's common stock, subject to certain regulatory approvals. Under the program, shares may be purchased from time to time in open market transactions and in accordance with applicable law. As of September 30, 2017, Apollo had purchased approximately 871 thousand shares, or approximately $4.9 million of AINV's common stock.

On April 14, 2017, Apollo made an unfunded commitment to AGER, a strategic platform established to acquire or reinsure blocks of insurance business in the German and broader European life insurance market. The unfunded commitment of €125 million to purchase new Class B-1 equity interests in AGER during the commitment period may be reduced to the extent that certain employees, officers, directors and advisors of the Company, AGER, Apollo and/or their respective affiliates hereafter commit to purchase from AGER more than €25 million of new equity interests in AGER. Apollo further committed to purchase new Class C-1 equity interests in AGER on the closing date that represent a profits interest in AGER which, upon meeting certain vesting triggers, will be convertible by Apollo into additional Class B-1 equity interests in AGER. Apollo and Athene will be

minority investors in AGER and long term strategic partners with aggregate voting powers of 35% and 10%, respectively. For more information regarding unfunded general partner commitments, see "-Contractual Obligations, Commitments and Contingencies".

Carried interest income from our funds can be distributed to us on a current basis, but is subject to repayment by the subsidiaries of the Apollo Operating Group that act as general partner of such funds in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, to the extent of their ownership interest, subject to certain limitations, the obligations of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. Pursuant to the shareholders agreement dated July 13, 2007, as amended (the "Shareholders Agreement"), we agreed to indemnify each of our Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of Fund IV, Fund V and Fund VI (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that our Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that our Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation to return previously distributed carried interest income with respect to Fund IV, Fund V and Fund VI, we will be obligated to reimburse our Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though we did not receive the distribution to which that general partner obligation related.

The Company has future debt obligations. See note 9 to the condensed consolidated financial statements for further information regarding the Company's debt arrangements.

On March 7, 2017, Apollo issued 11,000,000 6.375% Series A Preferred shares (the "Preferred shares") for gross proceeds of $275.0 million, or $264.4 million net of issuance costs. See note 12 to the condensed consolidated financial statements for further information regarding the Company's Preferred shares.

On November 1, 2017, the Company declared a cash distribution of $0.39 per Class A share, which will be paid on November 30, 2017 to holders of record on November 21, 2017. Also, the Company declared a cash distribution of $0.398438 per Preferred share, which will be paid on December 15, 2017 to holders of record on December 1, 2017.

Investment Management and Sub-Advisory Agreements - Athene Asset Management

Apollo, through its consolidated subsidiary, AAM, provides asset management services to Athene with respect to assets in the Athene North American Accounts, including asset allocation services, direct asset management services, asset and liability matching management, mergers and acquisitions, asset diligence, hedging and other asset management services and receives management fees for providing these services. In addition, the Company, through AAM, provides sub-advisory services with respect to a portion of the assets in the Athene North American Accounts. See note 13 to the condensed consolidated financial statements for more details regarding the fee rates of the investment management, sub-advisory and other fee arrangements with respect to the assets in the Athene North American Accounts.

Investment Advisory and Sub-Advisory Agreements - AAME

Apollo, through AAME, provides investment advisory services with respect to certain assets in the Athene European Accounts and sub-advises certain assets in the Athene European Accounts. See note 13 to the condensed consolidated financial statements for more details regarding the fee rates of the investment advisory, sub-advisory and other fee arrangements with respect to the assets in the Athene European Accounts.

Athene Non-Sub-Advised AUM and AGER Non-Sub-Advised AUM

The Company refers to the portion of the AUM in the Athene North American Accounts that is not Athene Sub-Advised AUM as "Athene Non-Sub-Advised" AUM.

AGER currently is the holding company of Athene's German group companies. In addition, AGER has received subscriptions representing $2.6 billion from Athene and a number of global institutional investors for a capital raise conducted through a private placement. The closing of AGER is subject to regulatory approval. The Company refers to the portion of the AGER AUM that is not AGER Sub-Advised AUM as "AGER Non-Sub-Advised" AUM.

The following table presents the AUM for Athene and AGER as of September 30, 2017:

	As of September 30, 2017		
	Sub-Advised AUM[(2)]	Non-Sub-Advised AUM	Total AUM
Athene	16,947	57,029	73,976
AGER[(1)]	1,149	6,747	7,896
Total	18,096	63,776	81,872

(1) AUM relating to AGER includes $5.3 billion of AUM of Athene's German group companies, for which AGER currently is the holding company, and $2.6 billion of AUM in connection with its capital raise. AUM related to Athene in the table above does not include AUM related to AGER.

(2) Of the total $18.1 billion Athene Sub-Advised AUM and AGER Sub-Advised AUM as of September 30, 2017, $3.0 billion was Athene Assets Directly Invested.

Athene Holding Follow-on Offerings

In connection with the Athene Private Placement, Athene Holding amended its registration rights agreement to provide (i) investors who are party to such agreement, including AAA Investments, the potential opportunity for liquidity on their shares of Athene Holding through sales in registered public offerings over a 15 month period beginning on the date of Athene Holding's initial public offering (the "Athene IPO") and (ii) Athene Holding the right to cause certain investors who are party to the registration rights agreement to include in such offerings a certain percentage of their common shares of Athene Holding subject to the terms and conditions set forth in the agreement. However, pursuant to the registration rights agreement, any shares of Athene Holding held by Apollo (other than shares distributed to AAA in payment of carried interest to be sold for cash) will not be subject to such arrangements and instead will be subject to a lock-up period of two years following the effective date of the registration statement relating to the Athene IPO, but Athene Holding will not have the right to cause any shares owned by Apollo to be included in the Athene IPO or any follow-on offering. Apollo may elect to receive payment of carried interest in cash or in common shares of Athene Holding (valued at the fair market value); and if Apollo elects to receive payment of such carried interest in cash, then common shares of Athene Holding shall be distributed to Apollo and immediately sold by Apollo to pay for such carried interest in cash. On March 16, 2017 and May 22, 2017, AAA announced a conditional distribution of freely tradeable common shares of Athene Holding to its unitholders. The distribution was conditioned upon the pricing of an underwritten follow-on secondary offering of Class A common shares of Athene Holding. On March 28, 2017 and June 6, 2017, Athene Holding announced the base follow-on offering size of 27.5 million shares and 16.2 million shares of Athene Holding, respectively, at a price of $48.50 per share and $49.00 per share, respectively. The March and May offerings were subsequently increased to 31.6 million and 18.6 million shares of Athene Holding, respectively, after the underwriters' exercise of a 15% over-allotment option.

Distributions to Managing Partners and Contributing Partners

The three Managing Partners who became employees of Apollo on July 13, 2007 each receive a $100,000 base salary. Additionally, our Managing Partners can receive other forms of compensation. Any additional consideration will be paid to them in their proportional ownership interest in Holdings. Additionally, as a result of the tax receivable agreement, 85% of any tax savings APO Corp. recognizes will be paid to the Managing Partners.

Subsequent to the 2007 Reorganization, the Contributing Partners retained ownership interests in subsidiaries of the Apollo Operating Group. Therefore, any distributions that flow up to management or general partner entities in which the Contributing Partners retained ownership interests are shared pro rata with the Contributing Partners who have a direct interest in such entities prior to flowing up to the Apollo Operating Group. These distributions are considered compensation expense.

The Contributing Partners are entitled to receive the following:

- Profit sharing related to private equity carried interest income, from direct ownership of advisory entities. Any changes in fair value of the underlying fund investments would result in changes to Apollo Global Management, LLC's profit sharing payable;
- Additional consideration based on their proportional ownership interest in Holdings; and
- As a result of the tax receivable agreement, 85% of any tax savings APO Corp. recognizes will be paid to the Contributing Partners.

Potential Future Costs

We may make grants of RSUs or other equity-based awards to employees and independent directors that we appoint in the future.

Critical Accounting Policies

This Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon the condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from these estimates. A summary of our significant accounting policies is presented in note 2 to our condensed consolidated financial statements. The following is a summary of our accounting policies that are affected most by judgments, estimates and assumptions.

Consolidation

The Company assesses all entities with which it is involved for consolidation on a case by case basis depending on the specific facts and circumstances surrounding each entity. Pursuant to the consolidation guidance, the Company first evaluates whether it holds a variable interest in an entity. Apollo factors in all economic interests including proportionate interests through related parties, to determine if such interests are to be considered a variable interest. As Apollo's interest in many of these entities is solely through market rate fees and/or insignificant indirect interests through related parties, Apollo is generally not considered to have a variable interest in many of these entities under the guidance and no further consolidation analysis is performed. For entities where the Company has determined that it does hold a variable interest, the Company performs an assessment to determine whether each of those entities qualify as a VIE.

The determination as to whether an entity qualifies as a VIE depends on the facts and circumstances surrounding each entity and therefore certain of Apollo's funds may qualify as VIEs under the variable interest model whereas others may qualify as VOEs under the voting interest model. The granting of substantive kick-out rights is a key consideration in determining whether a limited partnership or similar entity is a VIE and whether or not that entity should be consolidated.

Under the voting interest model, Apollo consolidates those entities it controls through a majority voting interest. Apollo does not consolidate those VOEs in which substantive kick-out rights have been granted to the unaffiliated investors to either dissolve the fund or remove the general partner.

Under the variable interest model, Apollo consolidates those entities where it is determined that the Company is the primary beneficiary of the entity. The Company is determined to be the primary beneficiary if it holds a controlling financial interest in the VIE defined as possessing both (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. If Apollo alone is not considered to have a controlling financial interest in the VIE but Apollo and its related parties under common control in the aggregate have a controlling financial interest in the VIE, Apollo will still be deemed to be the primary beneficiary if it is the party within the related party group that is most closely associated with the VIE. If Apollo and its related parties not under common control in the aggregate have a controlling financial interest in a VIE, then Apollo is deemed to be the primary beneficiary if substantially all the activities of the entity are performed on behalf of Apollo. Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes initially involved with the VIE and reconsiders that conclusion continuously. Investments and redemptions (either by Apollo, related parties of Apollo or third parties) or amendments to the governing documents of the respective entity may affect an entity's status as a VIE or the determination of the primary beneficiary.

The assessment of whether an entity is a VIE and the determination of whether Apollo should consolidate such VIE requires judgment by our management. Those judgments include, but are not limited to: (i) determining whether the total equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support, (ii) evaluating whether the holders of equity investment at risk, as a group, can make decisions that have a significant effect on the success of the entity, (iii) determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive the expected residual returns from an entity and (iv) evaluating the nature of the relationship and activities of those related parties with shared power or under common control for purposes of determining which party within the related-party group is most closely associated with the VIE. Judgments are also made in determining whether a member in the equity group has a controlling financial interest including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that could be potentially significant to the VIE. This analysis considers all relevant economic interests including proportionate interests held through related parties.

Revenue Recognition

Carried Interest Income (Loss) from Related Parties. We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Such carried interest income generally is earned based upon a fixed percentage of realized and unrealized gains of various funds after meeting any applicable hurdle rate or threshold minimum. Carried interest income from certain of the funds that we manage is subject to contingent repayment and is generally paid to us as particular investments made by the funds are realized. If, however, upon liquidation of a fund, the aggregate amount paid to us as carried interest exceeds the amount actually due to us based upon the aggregate performance of the fund, the excess (in certain cases net of taxes) is required to be returned by us to that fund. For a majority of our credit funds, once the annual carried interest income has been determined, there generally is no look-back to prior periods for a potential contingent repayment, however, carried interest income on certain other credit funds can be subject to contingent repayment at the end of the life of the fund. We have elected to adopt Method 2 from U.S. GAAP guidance applicable to accounting for management fees based on a formula, and under this method, we accrue carried interest income quarterly based on fair value of the underlying investments and separately assess if contingent repayment is necessary. The determination of carried interest income and contingent repayment considers both the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. See "Investments, at Fair Value" below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our private equity, credit and real assets funds.

Management Fees from Related Parties. The management fees related to our private equity funds are generally based on a fixed percentage of the committed capital or invested capital. The corresponding fee calculations that consider committed capital or invested capital are both objective in nature and therefore do not require the use of significant estimates or assumptions. Management fees related to our credit funds, by contrast, can be based on net asset value, gross assets, adjusted cost of all unrealized portfolio investments, capital commitments, adjusted assets, capital contributions, or stockholders' equity all as defined in the respective partnership agreements. The credit management fee calculations that consider net asset value, gross assets, adjusted cost of all unrealized portfolio investments and adjusted assets are normally based on the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. The management fees related to our real assets funds are generally based on a specific percentage of the funds' stockholders' equity or committed or net invested capital or the capital accounts of the limited partners. See "Investments, at Fair Value" below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our private equity, credit and real assets funds.

Investments, at Fair Value

On a quarterly basis, Apollo utilizes valuation committees consisting of members from senior management, to review and approve the valuation results related to the investments of the funds it manages. For certain publicly traded vehicles managed by Apollo, a review is performed by an independent board of directors. The Company also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. The Company performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analyses. However, because of the inherent uncertainty of valuation, the estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Private Equity Investments. The majority of the illiquid investments within our private equity funds are valued using the market approach, which provides an indication of fair value based on a comparison of the subject company to comparable publicly traded companies and transactions in the industry.

Market Approach. The market approach is driven by current market conditions, including actual trading levels of similar companies and, to the extent available, actual transaction data of similar companies. Judgment is required by management when assessing which companies are similar to the subject company being valued. Consideration may also be given to any of the following factors: (1) the subject company's historical and projected financial data; (2) valuations given to comparable companies; (3) the size and scope of the subject company's operations; (4) the subject company's individual strengths and weaknesses; (5) expectations relating to the market's receptivity to an offering of the subject company's securities; (6) applicable restrictions on transfer; (7) industry and market information; (8) general economic and market conditions; and (9) other factors deemed relevant. Market approach valuation models typically employ a multiple that is based on one or more of the factors described above. Enterprise value as a multiple of EBITDA is common and relevant for most companies and industries, however, other industry specific multiples are employed where available and appropriate. Sources for gaining additional knowledge related to comparable

companies include public filings, annual reports, analyst research reports, and press releases. Once a comparable company set is determined, we review certain aspects of the subject company's performance and determine how its performance compares to the group and to certain individuals in the group. We compare certain measurements such as EBITDA margins, revenue growth over certain time periods, leverage ratios and growth opportunities. In addition, we compare our entry multiple and its relation to the comparable set at the time of acquisition to understand its relation to the comparable set on each measurement date.

Income Approach. For investments where the market approach does not provide adequate fair value information, we rely on the income approach. The income approach is also used to validate the market approach within our private equity funds. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology for the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are significant assumptions related to the subject company's expected results, the determination of a terminal value and a calculated discount rate, which is normally based on the subject company's weighted average cost of capital, or "WACC." The WACC represents the required rate of return on total capitalization, which is comprised of a required rate of return on equity, plus the current tax-effected rate of return on debt, weighted by the relative percentages of equity and debt that are typical in the industry. The most critical step in determining the appropriate WACC for each subject company is to select companies that are comparable in nature to the subject company and the credit quality of the subject company. Sources for gaining additional knowledge about the comparable companies include public filings, annual reports, analyst research reports, and press releases. The general formula then used for calculating the WACC considers the after-tax rate of return on debt capital and the rate of return on common equity capital, which further considers the risk-free rate of return, market beta, market risk premium and small stock premium, if applicable. The variables used in the WACC formula are inferred from the comparable market data obtained. The Company evaluates the comparable companies selected and concludes on WACC inputs based on the most comparable company or analyzes the range of data for the investment.

The value of liquid investments, where the primary market is an exchange (whether foreign or domestic), is determined using period end market prices. Such prices are generally based on the close price on the date of determination.

Credit Investments. The majority of investments in Apollo's credit funds are valued based on quoted market prices and valuation models.

Quoted market prices are valued based on the average of the "bid" and the "ask" quotes provided by multiple brokers wherever possible without any adjustments. Apollo designates certain brokers to value specific securities. In order to determine the designated brokers, Apollo considers the following: (i) brokers with which Apollo has previously transacted, (ii) the underwriter of the security and (iii) active brokers indicating executable quotes. In addition, when valuing a security based on broker quotes wherever possible Apollo tests the standard deviation amongst the quotes received and the variance between the concluded fair value and the value provided by a pricing service. When broker quotes are not available, we use pricing service quotes or other sources to mark a position. When relying on a pricing service as a primary source, (i) Apollo analyzes how the price has moved over the measurement period, (ii) reviews the number of brokers included in the pricing service's population and (iii) validates the valuation levels with Apollo's pricing team and traders.

Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing a model based approach to determine fair value. Valuation approaches used to estimate the fair value of illiquid credit investments also may include the market approach and the income approach, as previously described above. The valuation approaches used consider, as applicable, market risks, credit risks, counterparty risks and foreign currency risks.

Real Assets Investments. For the CMBS portfolio of Apollo's funds, the estimated fair value of the CMBS portfolio is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Additionally, the loans held-for-investment are stated at the principal amount outstanding, net of deferred loan fees and costs. The loans in Apollo's real assets funds are evaluated for possible impairment on a quarterly basis. For Apollo's real assets funds, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers, and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

Certain of our funds may also enter into foreign currency exchange contracts, total return swap contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized gains or losses. Realized gains or losses are recognized when contracts are settled. Derivative contracts such as total

return swaps and credit default swaps are recorded at fair value as an asset or liability, with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the total return or credit default swap contract and the original contract price. Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers.

The fair values of the investments in our funds can be impacted by changes to the assumptions used in the underlying valuation models. For further discussion on the impact of changes to valuation assumptions see "Item 7A. Quantitative and Qualitative Disclosures About Market Risk-Sensitivity" in our 2016 Annual Report. There have been no material changes to the valuation approaches utilized during the periods that our financial results are presented in this report.

Fair Value of Financial Instruments

Except for the Company's debt obligations (each as defined in note 9 to our condensed consolidated financial statements), Apollo's financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value. See "-Investments, at Fair Value" above. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Financial instruments' carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings.

Profit Sharing Expense. Profit sharing expense is primarily a result of agreements with our Contributing Partners and employees to compensate them based on the ownership interest they have in the general partners of the Apollo funds. Therefore, changes in the fair value of the underlying investments in the funds we manage and advise affect profit sharing expense. The Contributing Partners and employees are allocated approximately 30% to 50% of the total carried interest income which is driven primarily by changes in fair value of the underlying fund's investments and is treated as compensation expense. Additionally, profit sharing expenses paid may be subject to clawback from employees, former employees and Contributing Partners to the extent not indemnified. When applicable, the accrual for potential clawback of previously distributed profit sharing amounts, which is a component of due from related parties on the condensed consolidated statements of financial condition, represents all amounts previously distributed to employees, former employees and Contributing Partners that would need to be returned to the general partner if the Apollo funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner receivable, however, would not become realized until the end of a fund's life.

The Incentive Pool enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying condensed consolidated financial statements. The Company adopted the Incentive Pool to attract and retain, and provide incentive to, partners and employees of the Company and to more closely align the overall compensation of partners and employees with the overall realized performance of the Company. Allocations to the Incentive Pool and to its participants contain both a fixed and a discretionary component and may vary year-to-year depending on the overall realized performance of the Company and the contributions and performance of each participant. There is no assurance that the Company will continue to compensate individuals through performance-based incentive arrangements in the future and there may be periods when the executive committee of the Company's manager determines that allocations of realized carried interest income are not sufficient to compensate individuals, which may result in an increase in salary, bonus and benefits.

Fair Value Option. Apollo has elected the fair value option for the Company's investment in Athene Holding, the assets and liabilities of certain of its consolidated VIEs (including CLOs), the Company's U.S. Treasury securities with original maturities greater than three months when purchased and certain of the Company's other investments. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by the consolidated VIEs that otherwise would not have been carried at fair value. See notes 3, 4, and 5 to the condensed consolidated financial statements for further disclosure on the investments in Athene Holding and financial instruments of the consolidated VIEs and other investments for which the fair value option has been elected.

Equity-Based Compensation. Equity-based compensation is accounted for in accordance with U.S. GAAP, which requires that the cost of employee services received in exchange for an award is generally measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are recognized over the relevant service period. As discussed in note 2, in connection with the adoption of new share-based payment guidance during the quarter ended March 31, 2017, the Company made an accounting policy election to no longer estimate forfeitures in determining the number of equity-based awards that are expected

to vest. Under the Company's new policy, which was applied prospectively as of January 1, 2017, forfeitures are accounted for when they occur. Apollo's equity-based awards consist of, or provide rights with respect to, AOG Units, RSUs, share options, restricted shares, AHL Awards and other equity-based compensation awards. For more information regarding Apollo's equity-based compensation awards, see note 11 to our condensed consolidated financial statements. The Company's assumptions made to determine the fair value on grant date are embodied in the calculations of compensation expense.

A significant part of our compensation expense is derived from amortization of RSUs. The fair value of all RSU grants after March 29, 2011 is based on the grant date fair value, which considers the public share price of the Company. RSUs are comprised of Plan Grants, which generally do not pay distributions until vested and, for grants made after 2011, the underlying shares are generally issued by March 15th after the year in which they vest, and Bonus Grants, which pay distributions on both vested and unvested grants and are generally issued after vesting on an approximate two-month lag. For Plan Grants, the grant date fair value is based on the public share price of the Company, and is discounted for transfer restrictions and lack of distributions until vested. For Bonus Grants, the grant date fair value is based on the public share price of the Company, and is discounted for transfer restrictions.

We utilize the present value of a growing annuity formula to calculate a discount for the lack of pre-vesting distributions on Plan Grant RSUs. The weighted average for the inputs utilized for the shares granted during the three and nine months ended September 30, 2017 and 2016 are presented in the table below for Plan Grants:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Distribution Yield(1)	6.0%	7.5%	6.1%	7.5%
Cost of Equity Capital Rate(2)	10.5%	9.3%	11.0%	9.4%

(1) Calculated based on the historical distributions paid during the twelve months ended September 30, 2017 and the Company's Class A share price as of the measurement date of the grant on a weighted average basis.
(2) Assumes a discount rate that was equivalent to the opportunity cost of foregoing distributions on unvested Plan Grant RSUs as of the valuation date, based on the Capital Asset Pricing Model ("CAPM"). CAPM is a commonly used mathematical model for developing expected returns.

The following table summarizes the weighted average discounts for Plan Grants for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Plan Grants:				
Discount for the lack of distributions until vested(1)	12.9%	8.2%	12.0%	10.1%

(1) Based on the present value of a growing annuity calculation.

We utilize the Finnerty Model to calculate a marketability discount on the Plan Grant and Bonus Grant RSUs to account for the lag between vesting and issuance. The Finnerty Model provides for a valuation discount reflecting the holding period restriction embedded in a restricted security preventing its sale over a certain period of time.

The Finnerty Model proposes to estimate a discount for lack of marketability such as transfer restrictions by using an option pricing theory. This model has gained recognition through its ability to address the magnitude of the discount by considering the volatility of a company's stock price and the length of restriction. The concept underpinning the Finnerty Model is that a restricted security cannot be sold over a certain period of time. Further simplified, a restricted share of equity in a company can be viewed as having forfeited a put on the average price of the marketable equity over the restriction period (also known as an "Asian Put Option"). If we price an Asian Put Option and compare this value to that of the assumed fully marketable underlying security, we can effectively estimate the marketability discount.

The inputs utilized in the Finnerty Model are (i) length of holding period, (ii) volatility and (iii) distribution yield. The weighted average for the inputs utilized for the shares granted during the three and nine months ended September 30, 2017 and 2016 are presented in the table below for Plan Grants and Bonus Grants:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Plan Grants:				
Holding Period Restriction (in years)	0.6	0.7	0.6	0.7
Volatility[1]	23.4%	31.6%	22.1%	31.7%
Distribution Yield[2]	6.0%	7.5%	6.1%	7.5%
Bonus Grants:				
Holding Period Restriction (in years)	0.2	0.2	0.2	0.2
Volatility[1]	23.0%	28.1%	22.6%	33.4%
Distribution Yield[2]	6.0%	7.5%	5.4%	7.5%

(1) The Company determined the expected volatility based on the volatility of the Company's Class A share price as of the grant date with consideration to comparable companies.
(2) Calculated based on the historical distributions paid during the twelve months ended September 30, 2017 and the Company's Class A share price as of the measurement date of the grant on a weighted average basis.

The following table summarizes the weighted average marketability discounts for Plan Grants and Bonus Grants for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Plan Grants:				
Marketability discount for transfer restrictions[1]	4.0%	5.8%	3.5%	5.8%
Bonus Grants:				
Marketability discount for transfer restrictions[1]	2.3%	3.0%	2.3%	3.4%

(1) Based on the Finnerty Model calculation.

Bonus Grants constitute a component of the discretionary annual compensation awarded to certain of our professionals. During 2016, the Company increased the default portion of annual compensation to be awarded as a discretionary Bonus Grant relative to the portion awarded in previous years. The increase in the proportion of discretionary annual compensation awarded as a Bonus Grant will be offset by a decrease in discretionary annual cash bonuses. These changes are intended to further align the interests of Apollo's employees and stakeholders and strengthen the long-term commitment of our partners and employees.

Fair Value Measurements

See note 5 to our condensed consolidated financial statements for a discussion of the Company's fair value measurements.

Recent Accounting Pronouncements

A list of recent accounting pronouncements that are relevant to Apollo and its industry is included in note 2 to our condensed consolidated financial statements.

Off-Balance Sheet Arrangements

In the normal course of business, we engage in off-balance sheet arrangements, including transactions in derivatives, guarantees, commitments, indemnifications and potential contingent repayment obligations. See note 14 to our condensed consolidated financial statements for a discussion of guarantees and contingent obligations and note 2 for a discussion of derivatives.

Contractual Obligations, Commitments and Contingencies

As of September 30, 2017, the Company's material contractual obligations consisted of lease obligations, contractual commitments as part of the ongoing operations of the funds and debt obligations. Fixed and determinable payments due in connection with these obligations are as follows:

	Remaining 2017	2018	2019	2020	2021	Thereafter	Total
				(in thousands)			
Operating lease obligations	$ 9,266	$ 34,643	$ 33,702	$ 15,563	$ 6,055	$ 13,313	$ 112,542
Other long-term obligations[1]	8,291	12,413	3,525	1,956	1,956	1,611	29,752
2013 AMH Credit Facilities - Term Facility[2]	1,837	7,347	7,347	7,347	300,367	-	324,245
2013 AMH Credit Facilities - Revolver Facility[3]	156	625	625	625	8	-	2,039
2024 Senior Notes [4]	5,000	20,000	20,000	20,000	20,000	548,333	633,333
2026 Senior Notes [5]	5,500	22,000	22,000	22,000	22,000	596,983	690,483
2014 AMI Term Facility I	81	324	324	324	16,460	-	17,513
2014 AMI Term Facility II	80	320	320	320	320	18,397	19,757
2016 AMI Term Facility I	88	351	351	351	20,063	-	21,204
2016 AMI Term Facility II	78	313	313	313	15,787	-	16,804
Obligations as of September 30, 2017	$ 30,377	$ 98,336	$ 88,507	$ 68,799	$ 403,016	$ 1,178,637	$ 1,867,672

(1) Includes (i) payments on management service agreements related to certain assets and (ii) payments with respect to certain consulting agreements entered into by the Company. Note that a significant portion of these costs are reimbursable by funds.

(2) $300 million of the outstanding Term Facility matures in January 2021. The interest rate on the $300 million Term Facility as of September 30, 2017 was 2.45%. See note 9 of the condensed consolidated financial statements for further discussion of the 2013 AMH Credit Facilities.

(3) The commitment fee as of September 30, 2017 on the $500 million undrawn Revolver Facility was 0.125%. See note 9 of the condensed consolidated financial statements for further discussion of the 2013 AMH Credit Facilities.

(4) $500 million of the 2024 Senior Notes matures in May 2024. The interest rate on the 2024 Senior Notes as of September 30, 2017 was 4.00%. See note 9 of the condensed consolidated financial statements for further discussion of the 2024 Senior Notes.

(5) $500 million of the 2026 Senior Notes matures in May 2026. The interest rate on the 2026 Senior Notes as of September 30, 2017 was 4.40%. See note 9 of the condensed consolidated financial statements for further discussion of the 2026 Senior Notes.

Note: Due to the fact that the timing of certain amounts to be paid cannot be determined or for other reasons discussed below, the following contractual commitments have not been presented in the table above.

(i) As noted previously, we have entered into a tax receivable agreement with our Managing Partners and Contributing Partners which requires us to pay to our Managing Partners and Contributing Partners 85% of any tax savings received by APO Corp. from our step-up in tax basis. The tax savings achieved may not ensure that we have sufficient cash available to pay this liability and we might be required to incur additional debt to satisfy this liability.

(ii) Debt amounts related to the consolidated VIEs are not presented in the table above as the Company is not a guarantor of these non-recourse liabilities.

(iii) In connection with the Stone Tower acquisition, the Company agreed to pay the former owners of Stone Tower a specified percentage of any future carried interest income earned from certain of the Stone Tower funds, CLOs and strategic investment accounts. This contingent consideration liability is remeasured to fair value at each reporting period until the obligations are satisfied. See note 14 to the condensed consolidated financial statements for further information regarding the contingent consideration liability.

(iv) Commitments from certain of our subsidiaries to contribute to the funds we manage and certain related parties.

Commitments

Certain of our management companies and general partners are committed to contribute to the funds we manage and certain related parties. While a small percentage of these amounts are funded by us, the majority of these amounts have historically been funded by our related parties, including certain of our employees and certain Apollo funds. The table below presents the commitment and remaining commitment amounts of Apollo and its related parties, the percentage of total fund commitments of Apollo and its related parties, the commitment and remaining commitment amounts of Apollo only (excluding related parties), and the percentage of total fund commitments of Apollo only (excluding related parties) for each private equity, credit and real assets fund as of September 30, 2017 as follows ($ in millions):

Fund	Apollo and Related Party Commitments	% of Total Fund Commitments	Apollo Only (Excluding Related Party) Commitments	Apollo Only (Excluding Related Party) % of Total Fund Commitments	Apollo and Related Party Remaining Commitments	Apollo Only (Excluding Related Party) Remaining Commitments
Private Equity:						
Fund IX[1]	$ 1,847.5	7.47%	$ 822.5	3.33%	$ 1,847.5	$ 822.5
Fund VIII	1,543.5	8.40	395.5	2.15	583.3	151.4
Fund VII	467.2	3.18	178.1	1.21	70.5	26.1
Fund VI	246.3	2.43	6.1	0.06	9.7	0.2

(1) Apollo Only (Excluding Related Party) Remaining Commitments related to Fund IX are subject to future syndication to Apollo employees.
(2) Apollo’s commitment in these funds is denominated in Euros and translated into U.S. dollars at an exchange rate of €1.00 to $1.18 as of September 30, 2017.

(3) Figures for U.S. RE Fund I include base, additional, and co-investment commitments. A co-investment vehicle within U.S. RE Fund I is denominated in pound sterling and translated into U.S. dollars at an exchange rate of £1.00 to $1.34 as of September 30, 2017. Figures for U.S. RE Fund II and Asia RE Fund include co-investment commitments.

On April 30, 2015, Apollo entered into the AAA Investments Credit Agreement (see note 13 for further disclosure regarding this facility). The 2013 AMH Credit Facilities, 2024 Senior Notes and 2026 Senior Notes will have future impacts on our cash uses. See note 9 of our condensed consolidated financial statements for information regarding the Company's debt arrangements.

Contingent Obligation-Carried interest income with respect to private equity funds and certain credit and real assets funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. See note 14 to our condensed consolidated financial statements for a description of our contingent obligation.

One of the Company's subsidiaries, AGS, provides underwriting commitments in connection with securities offerings to the portfolio companies of the funds Apollo manages. As of September 30, 2017, there were no underwriting commitments outstanding related to such offerings.

As of September 30, 2017, one of the Company's subsidiaries had unfunded contingent commitments of $29.8 million, to facilitate funding at closing by lead arrangers for syndicated term loans issued by portfolio companies of funds managed by Apollo. The commitments expired on November 2, 2017.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our predominant exposure to market risk is related to our role as investment manager and general partner for our funds and the sensitivity to movements in the fair value of their investments and resulting impact on carried interest income and management fee revenues. Our direct investments in the funds also expose us to market risk whereby movements in the fair values of the underlying investments will increase or decrease both net gains (losses) from investment activities and income (loss) from equity method investments. For a discussion of the impact of market risk factors on our financial instruments see "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies-Investments, at Fair Value."

The fair value of our financial assets and liabilities of our funds may fluctuate in response to changes in the value of investments, foreign exchange, commodities and interest rates. The net effect of these fair value changes impacts the gains and losses from investments in our condensed consolidated statements of operations. However, the majority of these fair value changes are absorbed by the Non-Controlling Interests.

The Company is subject to a concentration risk related to the investors in its funds. Although there are more than 1,000 investors in Apollo's active private equity, credit and real assets funds, no individual investor accounts for more than 10% of the total committed capital to Apollo's active funds.

Risks are analyzed across funds from the "bottom up" and from the "top down" with a particular focus on asymmetric risk. We gather and analyze data, monitor investments and markets in detail, and constantly strive to better quantify, qualify and circumscribe relevant risks.

Each risk management process is subject to our overall risk tolerance and philosophy and our enterprise-wide risk management framework. This framework includes identifying, measuring and managing market, credit and operational risks at each segment, as well as at the fund and Company level.

Each segment runs its own investment and risk management process subject to our overall risk tolerance and philosophy:

- The investment process of our private equity funds involves a detailed analysis of potential acquisitions, and investment management teams assigned to monitor the strategic development, financing and capital deployment decisions of each portfolio investment.
- Our credit funds continuously monitor a variety of markets for attractive trading opportunities, applying a number of traditional and customized risk management metrics to analyze risk related to specific assets or portfolios, as well as, fund-wide risks.

At the direction of the Company's manager, the Company has established a risk committee comprised of various members of senior management including the Company's Chief Financial Officer, Chief Legal Officer, and the Company's Chief Risk Officer. The risk committee is tasked with assisting the Company's manager in monitoring and managing enterprise-wide

risk. The risk committee generally meets on a quarterly basis and reports to senior management of the Company's manager at such times as the committee deems appropriate and at least on an annual basis.

On at least a monthly basis, the Company's risk department provides a summary analysis of fund level market and credit risk to the portfolio managers of the Company's funds and the heads of the various business segments. On a periodic basis, the Company's risk department presents a consolidated summary analysis of fund level market and credit risk to the Company's risk committee. In addition, the Company's Chief Risk Officer reviews specific investments from the perspective of risk mitigation and discusses such analysis with the Company's risk committee and/or the executive committee of the Company's manager at such times as the Company's Chief Risk Officer determines such discussions are warranted. On an annual basis, the Company's Chief Risk Officer provides senior management of the Company's manager with a comprehensive overview of risk management along with an update on current and future risk initiatives.

Impact on Management Fees-Our management fees are based on one of the following:

- capital commitments to an Apollo fund;
- capital invested in an Apollo fund;
- the gross, net or adjusted asset value of an Apollo fund, as defined; or
- as otherwise defined in the respective agreements.

Management fees could be impacted by changes in market risk factors and management could consider an investment permanently impaired as a result of (i) such market risk factors causing changes in invested capital or in market values to below cost, in the case of our private equity funds and certain credit funds or (ii) such market risk factors causing changes in gross or net asset value, for the credit funds. The proportion of our management fees that are based on NAV is dependent on the number and types of our funds in existence and the current stage of each fund's life cycle.

Impact on Advisory and Transaction Fees-We earn transaction fees relating to the negotiation of private equity, credit and real assets transactions and may obtain reimbursement for certain out-of-pocket expenses incurred. Subsequently, on a quarterly or annual basis, ongoing advisory fees, and additional transaction fees in connection with additional purchases, dispositions, or follow-on transactions, may be earned. Management Fee Offsets and any broken deal costs, if applicable, are reflected as a reduction to advisory and transaction fees from related parties. Advisory and transaction fees will be impacted by changes in market risk factors to the extent that they limit our opportunities to engage in private equity, credit and real assets transactions or impair our ability to consummate such transactions. The impact of changes in market risk factors on advisory and transaction fees is not readily predicted or estimated.

Impact on Carried Interest Income-We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Our carried interest income will be impacted by changes in market risk factors. However, several major factors will influence the degree of impact:

- the performance criteria for each individual fund in relation to how that fund's results of operations are impacted by changes in market risk factors;
- whether such performance criteria are annual or over the life of the fund;
- to the extent applicable, the previous performance of each fund in relation to its performance criteria; and
- whether each funds' carried interest distributions are subject to contingent repayment.

As a result, the impact of changes in market risk factors on carried interest income will vary widely from fund to fund. The impact is heavily dependent on the prior and future performance of each fund, and therefore is not readily predicted or estimated.

Market Risk-We are directly and indirectly affected by changes in market conditions. Market risk generally represents the risk that values of assets and liabilities or revenues and expenses will be adversely affected by changes in market conditions. Market risk is inherent in each of our investments and activities, including equity investments, loans, short-term borrowings, long-term debt, hedging instruments, credit default swaps and derivatives. Just a few of the market conditions that may shift from time to time, thereby exposing us to market risk, include fluctuations in interest and currency exchange rates, equity prices, changes in the implied volatility of interest rates and price deterioration. Volatility in debt and equity markets can impact our pace of capital deployment, the timing of receipt of transaction fee revenues and the timing of realizations. These market conditions could have an impact on the value of fund investments and rates of return. Accordingly, depending on the instruments or activities impacted, market risks can have wide ranging, complex adverse effects on our results from operations and our overall financial condition.

We monitor market risk using certain strategies and methodologies which management evaluates periodically for appropriateness. We intend to continue to monitor this risk going forward and continue to monitor our exposure to all market factors.

Interest Rate Risk-Interest rate risk represents exposure we and our funds have to instruments whose values vary with the change in interest rates. These instruments include, but are not limited to, loans, borrowings, investments in interest bearing securities and derivative instruments. We may seek to mitigate risks associated with the exposures by having our funds take offsetting positions in derivative contracts. Hedging instruments allow us to seek to mitigate risks by reducing the effect of movements in the level of interest rates, changes in the shape of the yield curve, as well as, changes in interest rate volatility. Hedging instruments used to mitigate these risks may include related derivatives such as options, futures and swaps.

Credit Risk-Certain of our funds are subject to certain inherent risks through their investments.

Certain of our entities invest substantially all of their excess cash in open-end money market funds and money market demand accounts, which are included in cash and cash equivalents. The money market funds invest primarily in government securities and other short-term, highly liquid instruments with a low risk of loss. We continually monitor the funds' performance in order to manage any risk associated with these investments.

Certain of our funds hold derivative instruments that contain an element of risk in the event that the counterparties may be unable to meet the terms of such agreements. We seek to minimize our risk exposure by limiting the counterparties with which our funds enter into contracts to banks and investment banks who meet established credit and capital guidelines. As of September 30, 2017, we do not expect any counterparty to default on its obligations and therefore do not expect to incur any loss due to counterparty default.

Foreign Exchange Risk-Foreign exchange risk represents exposures our funds have to changes in the values of current fund holdings and future cash flows denominated in other currencies and investments in non-U.S. companies. The types of investments exposed to this risk include investments in foreign subsidiaries, foreign currency-denominated loans, foreign currency-denominated transactions, and various foreign exchange derivative instruments whose values fluctuate with changes in currency exchange rates or foreign interest rates. Instruments used to mitigate this risk are foreign exchange options, currency swaps, futures and forwards. These instruments may be used to help insulate our funds against losses that may arise due to volatile movements in foreign exchange rates and/or interest rates.

In our capacity as investment manager of the funds we manage, we continuously monitor a variety of markets for attractive opportunities for managing risk. For example, certain of the funds we manage may put in place foreign exchange hedges or borrowings with respect to certain foreign currency denominated investments to provide a hedge against foreign exchange exposure.

Non-U.S. Operations-We conduct business throughout the world and are continuing to expand into foreign markets. We currently have offices outside the U.S. in Toronto, London, Frankfurt, Madrid, Luxembourg, Mumbai, Delhi, Singapore, Hong Kong and Shanghai and have been strategically growing our international presence. Our fund investments and our revenues are primarily derived from our U.S. operations. With respect to our non-U.S. operations, we are subject to risk of loss from currency fluctuations, social instability, changes in governmental policies or policies of central banks, expropriation, nationalization, unfavorable political and diplomatic developments and changes in legislation relating to non-U.S. ownership. Our funds also invest in the securities of companies which are located in non-U.S. jurisdictions. As we continue to expand globally, we will continue to focus on monitoring and managing these risk factors as they relate to specific non-U.S. investments.

ITEM 4. CONTROLS AND PROCEDURES

We maintain "disclosure controls and procedures", as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired objectives.

Our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end

of the period covered by this report, our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) are effective at the reasonable assurance level to accomplish their objectives of ensuring that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

No changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during our most recent quarter, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II-OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See note 14 to our condensed consolidated financial statements for a summary of the Company’s legal proceedings.

ITEM 1A. RISK FACTORS

For a discussion of our potential risks and uncertainties, see the information under the heading "Risk Factors" in our 2016 Annual Report, which is accessible on the Securities and Exchange Commission's website at www.sec.gov. There have been no material changes to the risk factors for the three months ended September 30, 2017.

The risks described in our 2016 Annual Report are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/ or operating results.

ITEM 2. UNREGISTERED SALE OF EQUITY SECURITIES

On August 4, 2017 we issued 233,248 Class A shares, net of taxes to Apollo Management Holdings, L.P., a subsidiary of Apollo Global Management, LLC, in connection with issuances of shares to participants in the Company’s 2007 Equity Plan for an aggregate purchase price of $6.7 million, respectively. The issuance was exempt from registration under the Securities Act in accordance with Section 4(a)(2) and Rule 506(b) thereof, as transactions by the issuer not involving a public offering. We determined that the purchaser of Class A shares in the transactions, Apollo Management Holdings, L.P., was an accredited investor.

Issuer Purchases of Equity Securities

The following table sets forth purchases of our Class A shares made by us or on our behalf during the fiscal quarter ended September 30, 2017.

Period	Total Number of Class A Shares Purchased[(1)]	Average Price Paid per Share	Class A Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Units that May be Purchased Under the Plan or Programs
July 1, 2017 through July 31, 2017	-	$ -	-	$ 137,062,230
August 1, 2017 through August 31, 2017	381,715	29.35	233,248	130,216,401
September 1, 2017 through September 30, 2017	-	-	-	130,216,401
Total	381,715		233,248	

(1) During the fiscal quarter ended September 30, 2017, we repurchased 148,467 Class A shares at an average price paid per share of $29.35 in open-market transactions not pursuant to a publicly-announced repurchase plan or program. Such number of Class A shares was equal to the number of Class A restricted shares issued under the 2007 Equity Plan during the quarter.

In February 2016, the Company announced its adoption of a program to repurchase up to $250 million in the aggregate of its Class A shares, including up to $150 million in the aggregate of its outstanding Class A shares through a share repurchase program and up to $100 million through a reduction of Class A shares to be issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the 2007 Equity Plan, which we refer to as net share settlement. Under the share repurchase program, shares may be repurchased from time to time in open market transactions, in privately negotiated transactions or otherwise, with the size and timing of these repurchases depending on legal requirements, price, market and economic conditions and other factors. The Company expects that the share repurchase program, which has no expiration date, will be in effect until the maximum approved dollar amount has been used to repurchase Class A shares. The share

repurchase program does not require the Company to repurchase any specific number of Class A shares, and the share repurchase program may be suspended, extended, modified or discontinued at any time. Reductions of Class A shares issued to employees to satisfy associated tax obligations in connection with the settlement of equity-based awards granted under the 2007 Equity Plan are not included in the table.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

BSCR	Bermuda Solvency Capital Requirement
CAGR	Compound annual growth rate
CAL	Company action level RBC as defined by the model created by the National Association of Insurance Commissioners
CLO	Collateralized loan obligation
CMBS	Commercial mortgage-backed securities
CML	Commercial mortgage loans
Capital ratio	Ratios calculated (1) with respect to our U.S. insurance subsidiaries, by reference to RBC, (2) with respect to ALRe, by reference to BSCR, and (3) with respect to our German Group Companies, by reference to SCR
Cost of crediting	The interest credited to the policyholders on our fixed annuities, including, with respect to our FIAs, option costs
DAC	Deferred acquisition costs
Deferred annuities	FIAs, annual reset annuities and MYGAs
DSI	Deferred sales inducement
Excess capital	Capital in excess of the level management believes is needed to support our current operating strategy
FIA	Fixed indexed annuity, which is an insurance contract that earns interest at a crediting rate based on a specified index on a tax-deferred basis
Fixed annuities	FIAs together with fixed rate annuities
Fixed rate annuity	Fixed rate annuity is an insurance contract that offers tax-deferred growth and the opportunity to produce a guaranteed stream of retirement income for the lifetime of its policyholder
Flow reinsurance	A transaction in which the ceding company cedes a portion of newly issued policies to the reinsurer
GLWB	Guaranteed living withdrawal benefits
GMDB	Guaranteed minimum death benefits
IID	Iowa Insurance Division
IMA	Investment management agreement
IMO	Independent marketing organization
IMR	Interest maintenance reserve, which is a reserve required by U.S. statutory accounting principles to accumulate realized gains and losses resulting from fluctuations in interest rates
Invested assets	The sum of (a) total investments on the consolidated balance sheet with AFS securities at amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) consolidated variable interest entities' assets, liabilities and noncontrolling interest and (f) policy loans ceded (which offset the direct policy loans in total investments). Invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions).
Investment margin	Investment margin applies to deferred annuities and is the excess of our net investment earned rate over the cost of crediting to our policyholders
IRIS	Insurance Regulatory Information System
LIMRA	Life Insurance and Market Research Association
MCR	Minimum capital requirements

Term or Acronym	Definition
MMS	Minimum margin of solvency
Modco	Modified coinsurance
MVA	Market value adjustment
MYGA	Multi-year guaranteed annuity
NAIC	National Association of Insurance Commissioners
Net investment earned rate	Income from our invested assets divided by the average invested assets for the relevant period.
North America Accounts	The invested assets in our U.S. and Bermuda accounts owned by us or in accounts supporting reinsurance ceded to our subsidiaries by third-party insurers
NYSDFS	New York State Department of Financial Services
OTTI	Other-than-temporary impairment
Payout annuities	Annuities with a current cash payment component, which consist primarily of SPIAs, supplemental contracts and structured settlements
Policy loan	A loan to a policyholder under the terms of, and which is secured by, a policyholder's policy
RBC	Risk-based capital
Reserve liabilities	The sum of (a) interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverables, excluding policy loans ceded. Reserve liabilities also includes the reserves related to assumed modco agreements in order to appropriately match the costs incurred in the consolidated statements of income with the liabilities. Reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and therefore we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements.
Rider reserves	Guaranteed living withdrawal benefits and guaranteed minimum death benefits reserves
RMBS	Residential mortgage-backed securities
RML	Residential mortgage loan
Sales	All money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers)
SPIA	Single premium immediate annuity
Surplus assets	Assets in excess of policyholder obligations, determined in accordance with the applicable domiciliary jurisdiction's statutory accounting principles
TAC	Total adjusted capital as defined by the model created by the NAIC
Total return	A measure of the historical performance of a portfolio computed using the modified Dietz method, which divides the total gain or loss in value of the portfolio, net of external flows, by the average value of the portfolio over the period of measurement
U.S. RBC Ratio	The CAL RBC ratio for AADE, our parent U.S. insurance company
VIE	Variable interest entity
VOBA	Value of business acquired

As used in this Form 10-K, unless the context otherwise indicates, any reference to "Athene," "our Company," "the Company," "us," "we" and "our" refer to Athene Holding Ltd. together with its consolidated subsidiaries and any reference to "AHL" refers to Athene Holding Ltd. only.

Forward-Looking Statements

Certain statements in this Annual Report on Form 10-K (report), other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results and the assumptions upon which those statements are based are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as “anticipate,” “estimate,” “expect,” “project,” “plan,” “intend,” “seek,” “assume,” “believe,” “may,” “will,” “should,” “could,” “would,” “likely” and other words and terms of similar meaning, including the negative of these or similar words and terms, in connection with any discussion of the timing or nature of future operating or financial performance or other events. However, not all forward-looking statements contain these identifying words. Forward-looking statements appear in a number of places throughout and give our current expectations and projections relating to our financial condition, results of operations, plans, strategies, objectives, future performance, business and other matters.

We caution you that forward-looking statements are not guarantees of future performance and that our actual consolidated results of operations, financial condition and liquidity may differ materially from those made in or suggested by the forward-looking statements contained in this report. There can be no assurance that actual developments will be those anticipated by us. In addition, even if our consolidated results of operations, financial condition and liquidity are consistent with the forward-looking statements contained in this report, those results or developments may not be indicative of results or developments in subsequent periods. A number of important factors could cause actual results or conditions to differ materially from those contained or implied by the forward-looking statements, including the risks discussed in *Item 1A. Risk Factors*. Factors that could cause actual results or conditions to differ from those reflected in the forward-looking statements contained in this report include:

- the accuracy of management’s assumptions and estimates;
- variability in the amount of statutory capital that our insurance and reinsurance subsidiaries have;
- interest rate fluctuations;
- our potential need for additional capital in the future and the potential unavailability of such capital to us on favorable terms or at all;
- the activities of our competitors and our ability to grow our retail business in a highly competitive environment;
- the impact of general economic conditions on our ability to sell our products and the fair value of our investments;
- our ability to successfully acquire new companies or businesses and/or integrate such acquisitions into our existing framework;
- downgrades, potential downgrades or other negative actions by rating agencies;
- our dependence on key executives and inability to attract qualified personnel, or the potential loss of Bermudian personnel as a result of Bermuda employment restrictions;
- market and credit risks that could diminish the value of our investments;
- foreign currency fluctuations;
- changes in consumer perception regarding the desirability of annuities as retirement savings products;
- introduction of the proposed European Union financial transaction tax;
- potential litigation (including class action litigation), enforcement investigations or regulatory scrutiny against us and our subsidiaries, which we may be required to defend against or respond to;
- the impact of new accounting rules or changes to existing accounting rules on our business;
- interruption or other operational failures in telecommunication and information technology and other operating systems, as well as our ability to maintain the security of those systems;
- the termination by Athene Asset Management, L.P. (AAM) or Apollo Asset Management Europe, LLP (AAME) of its investment management or advisory agreements with us and limitations on our ability to terminate such arrangements;
- AAM’s or AAME’s dependence on key executives and inability to attract qualified personnel;
- increased regulation or scrutiny of alternative investment advisers and certain trading methods;
- potential changes to regulations affecting, among other things, transactions with our affiliates, the ability of our subsidiaries to make dividend payments or distributions to us, acquisitions by or of us, minimum capitalization and statutory reserve requirements for insurance companies and fiduciary obligations on parties who distribute our products;
- suspension or revocation of our subsidiaries’ insurance and reinsurance licenses;
- Athene Holding Ltd. (AHL) or Athene Life Re Ltd. (ALRe) becoming subject to U.S. federal income taxation;
- adverse changes in U.S. tax law;
- our being subject to U.S. withholding tax under Foreign Account Tax Compliance Act;
- our potential inability to pay dividends or distributions; and
- other risks and factors listed under *Item 1A. Risk Factors*.

We caution you that the important factors referenced above may not be exhaustive. In addition, we cannot assure you that we will realize the results or developments we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our operations in the way we expect or anticipate. In light of these risks, you should not place undue reliance upon any forward-looking statements contained in this report. The forward-looking statements included in this report are made only as of the date hereof. We undertake no obligation, except as may be required by law, to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise. Comparisons of results for current and any prior periods are not intended to express any future trends, or indications of future performance, unless expressed as such, and should only be viewed as historical data.

Item 1. Business

Overview

We are a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. We generate attractive financial results for our policyholders and shareholders by combining our two core competencies of (1) sourcing long-term, generally illiquid liabilities and (2) investing in a high quality investment portfolio, which takes advantage of the illiquid nature of our liabilities. Our steady and significant base of earnings generates capital that we opportunistically invest across our business to source attractively-priced liabilities and capitalize on opportunities. Our differentiated investment strategy benefits from our strategic relationship with Apollo Global Management, LLC (Apollo) and its indirect subsidiary, AAM. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services, including investment compliance, tax, legal and risk management support. Our relationship with Apollo and AAM also provides us with access to Apollo's investment professionals across the world as well as Apollo's global asset management infrastructure that, as of December 31, 2016, supported more than $191 billion of assets under management (AUM) across a broad array of asset classes. We are led by a highly skilled management team with extensive industry experience. We are based in Bermuda with our U.S. subsidiaries' headquarters located in Iowa.

We began operating in 2009 when the burdens of the financial crisis and resulting capital demands caused many companies to exit the retirement market, creating the need for a well-capitalized company with an experienced management team to fill the void. Taking advantage of this market dislocation, we have been able to acquire substantial blocks of long-duration liabilities and reinvest the related investments to produce profitable returns. We have been able to generate strong financial returns in a multi-year low rate environment. We believe we have fewer legacy liability issues than our peers given that all of our retail and flow reinsurance liabilities were underwritten after the financial crisis, and the majority of the liabilities we acquired through our acquisitions and block reinsurance were acquired at a discount to book value.

We have established a significant base of earnings and, as of December 31, 2016, have an expected annual investment margin of 2-3% over the 7.8 year weighted-average life of our deferred annuities, which make up a substantial portion of our reserve liabilities. Even as we have grown to $72.4 billion in investments, including related parties, $71.8 billion in invested assets and $86.7 billion of total assets as of December 31, 2016, we have continued to approach both sides of the balance sheet with an opportunistic mindset because we believe quickly identifying and capitalizing on market dislocations allows us to generate attractive, risk-adjusted returns for our shareholders. Further, our multiple distribution channels support growing origination across market environments and better enable us to achieve continued balance sheet growth while maintaining attractive profitability. We believe that in a typical market environment, we will be able to profitably grow through our organic channels, including retail, flow reinsurance and institutional products. In more challenging market environments, we believe that we will see additional opportunities to grow through our inorganic channels, including acquisitions and block reinsurance, due to market stress during those periods. We are diligent in setting our return targets based on market conditions and risks inherent to our products offered and acquisitions or block reinsurance transactions. In general, we may accept lower returns on products which may provide more certain return characteristics, such as funding agreements, and we may require higher returns for products or transactions where there is more inherent risk in meeting our return targets, such as with acquisitions. Generally, we target mid-teen returns for sources of organic growth and higher returns for sources of inorganic growth. If we are unable to source liabilities with our desired return profile in one of our channels, we generally will not sacrifice profitability solely for the sake of increasing market share and instead we will typically focus on our other channels to identify growth opportunities that meet our preferred risk and return profile.

As a result of our focus on issuing, reinsuring and acquiring attractively-priced liabilities, our differentiated investment strategy and our significant scale, for the year ended December 31, 2016, in our Retirement Services segment described below, we generated an investment margin on deferred annuities of 2.77% and an operating ROE excluding AOCI of 19.1%. We currently maintain what we believe to be high capital ratios for our rating and hold more than $1.5 billion of capital in excess of the level we believe is needed to support our current operating strategy, and view this excess as strategic capital available to reinvest into organic and inorganic growth opportunities. Because we hold this strategic capital to implement our opportunistic strategy and to enable us to explore deployment opportunities as they arise, and because we are investing for future growth, our consolidated ROE for the year ended December 31, 2016 was 13.1%, and our consolidated operating ROE excluding AOCI for the same period was 12.5%, in each case, without the benefit of any financial leverage or capital return through dividends or share buyback programs. On a consolidated basis, for the year ended December 31, 2016, we generated net income available to AHL shareholders of $805 million, and operating income, net of tax, of $760 million. Investment margin, operating income, net of tax, and operating ROE excluding AOCI are not calculated in accordance with GAAP. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Key Operating and Non-GAAP Measures* for additional discussions regarding non-GAAP measures.

As of December 31, 2016, we had $6.9 billion of total AHL shareholders' equity and $6.5 billion of total AHL shareholders' equity excluding AOCI. Our top-level U.S. insurance subsidiary, Athene Annuity & Life Assurance Company (AADE), had a U.S. RBC ratio of 478% and ALRe had a Bermuda Solvency Capital Requirement (BSCR) ratio of 228%, each as of December 31, 2016. Our ALRe RBC ratio, which is used in evaluating our capital position and the amount of capital needed to support our Retirement Services segment, was 529% as of December 31, 2016, when applying the National Association of Insurance Commissioners (NAIC) RBC factors. Our main insurance subsidiaries are rated A- for financial strength by each of S&P and Fitch, each with a stable outlook, and by A.M. Best, with a positive outlook. AHL has a counterparty credit rating of BBB from S&P and an issuer default rating of BBB from Fitch, each with a stable outlook, and an issuer credit rating of bbb- from A.M. Best, with a positive outlook. See *Financial Strength Ratings*. We currently have no financial leverage, and have an undrawn $1.0 billion credit facility in place to provide an additional liquidity cushion in challenging economic or business environments or to provide additional capital support.

Item 1. Business

We operate our core business strategies out of one reportable segment, Retirement Services. In addition to Retirement Services, we report certain other operations in Corporate and Other. Retirement Services is comprised of our U.S. and Bermuda operations, which issue and reinsure retirement savings products and institutional products. Retirement Services has retail operations, which provide annuity retirement solutions to our policyholders. Retirement Services also has reinsurance operations, which reinsure multi-year guaranteed annuities (MYGA), fixed indexed annuities (FIA), traditional one year guarantee fixed deferred annuities, immediate annuities and institutional products from our reinsurance partners. In addition, our funding agreement backed notes (FABN) program is included in our Retirement Services segment. Corporate and Other includes certain other operations related to our corporate activities and our German operations, which is primarily comprised of participating long-duration savings products. In addition to our German operations, included in Corporate and Other are corporate allocated expenses, merger and acquisition costs, debt costs, certain integration and restructuring costs, certain stock-based compensation and intersegment eliminations. In Corporate and Other we also hold more than $1.5 billion of capital in excess of the level of capital we hold in Retirement Services to support our operating strategy.

We believe we hold a sufficient amount of capital in our Retirement Services segment to support our core operating strategies. This level of capital may fluctuate depending on the mix of both our assets and our liabilities, and also reflects the level of capital needed to support or improve our current ratings as well as our risk appetite based on our internal risk models. The level of capital we currently allocate to our Corporate non-reportable segment is our U.S. subsidiaries' statutory capital in excess of a U.S. RBC ratio of 400%, as well as the Bermuda capital for ALRe in excess of 400% RBC when also applying NAIC RBC factors. We view this excess as strategic capital, which we expect to deploy for additional organic and inorganic growth opportunities as well as expect to contribute to ratings improvements over time. We manage our capital to levels which we believe would remain consistent with our current ratings in a recessionary environment. For additional information regarding our segments, including financial information related thereto, refer to *Note 19 - Segment Information* to the consolidated financial statements.

We have developed organic and inorganic channels to address the retirement services market and grow our assets and liabilities. By focusing on the retirement services market, we believe that we will benefit from several demographic and economic trends, including the increasing number of retirees in the United States, the lack of tax advantaged alternatives for people trying to save for retirement and expectations of a rising interest rate environment. To date, most of our products sold and acquired have been fixed annuities, which offer people saving for retirement a product that is tax advantaged, has a minimum guaranteed rate of return or minimum cash value, and provides protection against investment loss. Our policies often include surrender charges (86% of our deferred annuity products, as of December 31, 2016) or market value adjustments (MVA) (73% of our deferred annuity products, as of December 31, 2016), both of which increase persistency and protect our ability to meet our obligations to policyholders.

Our organic channels have provided deposits of $8.8 billion, $3.9 billion and $2.9 billion for the years ended December 31, 2016, 2015 and 2014, respectively. Withdrawals on our deferred annuities were $4.2 billion, $4.4 billion and $4.4 billion for the years ended December 31, 2016, 2015 and 2014, respectively. While there can be no assurance that we will meet our growth targets, we believe that our new deposits should continue to significantly surpass our withdrawals as we continue to grow our retail and flow reinsurance channels. Absent any significant unexpected market conditions or regulatory impacts and assuming we can meet our pricing targets, we believe that with our ratings and the strong growth in our organic channel in 2016, new deposits from our organic channels and withdrawal experience with respect to our deferred annuities should be similar in the near-to-mid-term to our 2016 production and withdrawal experience, respectively. Within our organic channels, we have focused on developing a diverse suite of products that allow us to meet our risk and return profiles, even in today's low rate environment. As a result, not only were we able to deliver strong organic growth in 2016, but we were able to do so without sacrificing profitability. Going forward, we believe the 2015 upgrade of our financial strength ratings to A- by each of S&P, Fitch and A.M. Best, as well as our 2016 outlook upgrade to positive by A.M. Best and our recent FIA and MYGA new product launches will continue to enable us to increase penetration in our existing organic channels and access new markets within our retail channel, such as selling through financial institutions. This increased penetration will allow us to source additional volumes of profitably underwritten liabilities. Our organic channels currently include:

- Retail, from which we provide retirement solutions to our policyholders primarily through approximately 60 independent marketing organizations (IMO). Within our retail channel we had fixed annuity sales of $5.3 billion, $2.5 billion and $2.5 billion for the years ended December 31, 2016, 2015 and 2014, respectively.
- Flow reinsurance, which provides a diversified channel for us to source long-term liabilities with attractive crediting rates. Within our flow reinsurance channel, we generated $3.5 billion, $1.1 billion and $349 million in deposits for the years ended December 31, 2016, 2015 and 2014, respectively.
- Institutional products, which include funding agreements and pension risk transfer transactions. In October 2015, we sold a $250 million funding agreement in our inaugural transaction under our FABN program and, in the first quarter of 2017, we sold funding agreements in the aggregate principal amount of $650 million under our FABN program. We are pursuing pension risk transfer transactions in 2017.

Our inorganic channels, including acquisitions and block reinsurance, have contributed significantly to our growth. We believe our internal acquisitions team, with support from Apollo, has an industry-leading ability to source, underwrite and expeditiously close transactions, which makes us a competitive counterparty for acquisition or block reinsurance transactions. We are highly selective in the transactions that we pursue; ultimately closing only those that are well aligned with our core competencies and pricing discipline. Since our inception, we have evaluated a significant number of merger and acquisition opportunities and have closed on five acquisitions. In connection with our five acquisitions through December 31, 2016, we sourced reserve liabilities backed by approximately $65.9 billion in total assets (net of $9.3 billion in assets

ceded through reinsurance). The aggregate purchase price of our acquisitions was less than the aggregate statutory book value of the businesses acquired.

We have sourced a high quality portfolio of invested assets. Because we have remained disciplined in underwriting attractively priced liabilities, we have the ability to invest in a broad range of high quality assets and generate attractive earnings. As of December 31, 2016, approximately 93.2% of our AFS fixed maturity securities, including related parties, were rated NAIC 1 or NAIC 2, the two highest credit rating designations under the NAIC'S criteria (with investments of our German operations rated by applying NRSRO equivalent ratings to map NAIC ratings). In addition to our core fixed income portfolio, we opportunistically allocate 5-10% of our portfolio to alternative investments where we primarily focus on fixed income-like, cash flow-based investments. For instance, our alternative investment positions include significant equity stakes in two asset platforms that originate high quality credit assets (such as residential mortgage loans (RML), leveraged loans and mortgage servicing rights) that are well aligned with our investment strategy. Our relationship with AAM and Apollo allows us to take advantage of our generally illiquid liability profile and identify asset opportunities with an emphasis on earning incremental yield by taking liquidity risk and complexity risk, rather than assuming solely credit risk. While alternative investments are a relatively small portion of our overall portfolio, our alternative investments strategy has been an important driver of returns. In general, we target returns for alternative investments of 10% or higher on an internal rate of return (IRR) basis over the expected lives of such investments.

Through our efficient corporate structure and operations, we believe we have built a cost-effective platform to support our growth opportunities. We believe our fixed operating cost structure supports our ability to maintain an attractive financial profile across market environments. Additionally, we believe we have designed our platform to be highly scalable and support growth without significant incremental investment in infrastructure, which allows us to scale our business production up or down because of our cost-effective platform. As a result, we believe we will be able to convert a significant portion of our new business spread into operating income.

Relationship with Apollo

We have a strategic relationship with Apollo which allows us to leverage the scale of its asset management platform. Apollo's indirect subsidiary, AAM, serves as our investment manager. In addition to co-founding the Company, Apollo assists us in identifying and capitalizing on acquisition opportunities that have been critical to our ability to significantly grow our business. The Apollo Group consists of (1) Apollo,
(2) AAA Guarantor - Athene, L.P. (AAA Investor), (3) any investment fund or other collective investment vehicle whose general partner or managing member is owned, directly or indirectly, by Apollo or one or more of Apollo's subsidiaries, (4) BRH Holdings GP, Ltd. and its shareholders and (5) any affiliate of any of the foregoing (except that AHL and its subsidiaries and employees of AHL, its subsidiaries or AAM are not members of the Apollo Group). Members of the Apollo Group are significant owners of our common shares and Apollo employees serve on our board of directors. We expect our strategic relationship with Apollo to continue for the foreseeable future. See *Item 13. Certain Relationships and Related Transactions, and Director Independence.*

The Apollo Group controls and is expected to continue to control 45% of the total voting power of AHL and five of our 13 directors are employees of or consultants to Apollo and our Chairman, Chief Executive Officer and Chief Investment Officer is a dual employee of both AHL and AAM. Further, our bye-laws generally limit the voting power of our Class A common shares (and certain other of our voting securities) such that no person owns (or is treated as owning) more than 9.9% of the total voting power of our common shares (with certain exceptions).

Competitive Strengths

We believe the following strengths will allow us to capitalize on the growth prospects for our business:

- **Ideal Platform to Capitalize on Positive Demographic and Market Trends.** We have designed our products to capitalize on the growing need for retirement savings solutions. Our products provide protection against market downturns and offer interest which compounds on a tax-deferred basis until funds are distributed. Many of our products also provide the potential to earn interest based on the performance of a market index. These features provide distinct advantages over traditional savings vehicles such as bank CDs and variable annuities. Despite a challenging interest rate environment, we have been able to profitably source $5.3 billion of fixed annuity products through our retail channel in 2016 by leveraging our product design capabilities, our investment acumen, which allows us to invest at appropriate investment margins, and our scalable operating platform. We offer prudent product features at attractive prices. If investment rates increase due to a rise in interest rates or widening credit spreads, we would be able to offer higher crediting rates, which we believe would generate additional demand for our products and therefore increased sales. Even in a long-term low rate environment, we believe our underwriting expertise and ability to find and compete in areas of the market that are rationally priced will allow us to maintain strong operating results. For example, in prior years, our retail operations have generally not competed aggressively in the guaranteed income rider segment as we historically believed that such riders were not priced within our pricing discipline. However, recently, competitors have been issuing annuities with what we believe are more rationally-priced lifetime income benefit features. In the current environment, we believe that we can grow our retail sales by offering competitive guaranteed income rates while earning an attractive return.

Item 1. Business

- **Multiple Distribution Channels.** We have four dedicated distribution channels to capitalize on retirement services opportunities across market environments and grow our liabilities. Our key distribution channels are retail, reinsurance (including flow and block reinsurance), institutional products (focused on the sale of funding agreements and pension risk transfer transactions) and acquisitions. We intend to maintain a presence within each of these distribution channels with the ability to underwrite liabilities. However, we do not have any market share targets across our organization, which we believe provides us flexibility to respond to changing market conditions in one or more channels and to opportunistically grow liabilities that generate our desired levels of profitability. In a rising interest rate environment, we believe we will be able to profitably increase the volume of our retail, flow reinsurance and institutional product sales and we believe we will see increased acquisition and block reinsurance opportunities in more challenging market environments. We are diligent in setting our return targets based on market conditions and risks inherent to our products offered and acquisitions or block reinsurance transactions. In general, we may accept lower returns on products which may provide more certain return characteristics, such as FABN, and we may require higher returns for products or transactions where there is more inherent risk in meeting our return targets, such as with acquisitions. If market conditions or risks inherent to a product or transaction create return profiles that are not acceptable to us, we generally will not sacrifice our profitability merely to facilitate growth.
- **Superior and Unique Investment Capabilities.** We believe our relationships with AAM and Apollo provide access to superior and unique investment capabilities that allow us to invest a portion of our assets in securities that earn us incremental yield by taking liquidity risk and complexity risk, capitalizing on our long-dated and persistent liability profile to prudently achieve higher net investment earned rates, rather than assuming solely credit risk. Our investing capabilities support our ability to sell fixed annuities profitably and to price acquisitions competitively while meeting our return targets. Through AAM, we have access to more than 100 investment and operations professionals who are highly familiar with our business objectives and funding structure. This enables AAM to customize asset allocations and select investments for us that are most appropriate for our business. In addition, our strategic relationship with Apollo provides us with access to Apollo's broad credit and alternative investment platforms and allows us to leverage the scale, sourcing and investing capabilities, and infrastructure of an asset manager with more than $191 billion of AUM, which includes approximately $71.8 billion of our invested assets as of December 31, 2016. Apollo's global asset sourcing capabilities in a diverse array of asset classes provide AAM with the opportunity to capitalize on attractive investments for us.
    - In each of our U.S. acquisitions, we have successfully reinvested our acquired investment portfolio with the objective of achieving higher returns than were achieved on such investments prior to the acquisition. For example, we have reinvested a substantial portion of the investment portfolio acquired in our acquisition of Aviva USA, which contributed to the increase in fixed income and other net investment earned rates on this block of business to 4.12% for the year ended December 31, 2015 from 3.50% (on an annualized basis) for the fourth quarter of 2013.
    - Apollo and AAM work collaboratively to identify and quickly capitalize on opportunities in various asset classes. For example, we were an early investor in distressed non-agency residential mortgage-backed securities (RMBS) during 2009 and 2010, prior to the strong recovery of that market in later years. By the end of 2010, we had acquired a portfolio of $448 million (approximately 24% of our total invested assets at such time) of non-agency RMBS at discounts to par, well in advance of the significant price improvements in these investments. Today, RMBS continues to represent an important asset class within our investment portfolio. As of December 31, 2016, 14.8% of our invested assets were invested in RMBS, with such securities having an amortized book price of 84% of aggregate par value.
    - AAM selects investments and develops investment strategies prior to our purchase in accordance with our investment limits, and works in concert with our risk management team to stress-test the underwritten assets and asset classes under various negative scenarios. For the years ended December 31, 2016 and 2015, our other-than-temporary impairment (OTTI) as a percentage of our average invested assets was 4 and 5 basis points, respectively.
    - We also have access to expertise and capabilities to directly originate a wide range of asset classes through AAM and Apollo. Direct origination allows the selection of assets that meet our liability profile and the sourcing of better quality investments.
- **Efficient Corporate Platform to Support Profitability.** We believe we have designed an efficient corporate platform to support our portfolio of $71.0 billion of reserve liabilities as of December 31, 2016. Over the 7.8 year weighted average life of our deferred annuities, we expect to generate an annual investment margin of 2-3%.

In addition, our corporate platform enables us to be highly scalable and allows us to onboard incremental business without significant additional investment in infrastructure and with low incremental fixed operating cost. As a result, we believe we should be able to convert a significant portion of incremental net investment income from additional invested assets and liabilities into operating income.

- **Strength of Balance Sheet.** We believe the strength of our balance sheet provides confidence to our policyholders and business partners and positions us for continued growth. We presently hold over $1.5 billion in excess capital and have no financial leverage. We maintain what we believe to be high capital ratios for our rating, with our top level insurance subsidiary, AADE, having a U.S. RBC ratio of 478% and ALRe having a BSCR ratio of 228%, each as of December 31, 2016. Our ALRe RBC ratio was 529% as of December 31, 2016, when applying the NAIC RBC factors. To further reinforce our strong liquidity profile, we have access to a $1.0 billion revolving credit facility that is currently undrawn. Our invested assets comprise what we believe to be a highly rated and well diversified portfolio. As of December 31, 2016, approximately 93.2% of our AFS fixed maturity securities, including related parties, were rated NAIC 1 or NAIC 2. These assets are managed against what we believe to be prudently underwritten liabilities, which were, in each case, priced by us after the financial crisis.

- **Robust Risk Management.** We have established a comprehensive enterprise risk management (ERM) framework and risk management controls throughout our organization, which are further supported by AAM's and Apollo's own risk management capabilities that are intended to help us maintain our continued financial strength. We manage our business, capital and liquidity profile with the objective of withstanding severe adverse shocks, such as the 2007-2008 financial crisis, while maintaining a meaningful buffer above regulatory minimums and above certain capital thresholds to meet our desired credit ratings. Risk management is embedded in all of our business decisions and processes, including acquisitions, asset purchases, product design and underwriting, liquidity and liability management. Certain of the key attributes of our risk management profile are:
  - We maintain a risk committee of the board of directors charged with the oversight of the development and implementation of systems and processes designed to identify, manage and mitigate reasonably foreseeable material risks and with the duty to assist our board of directors and our other board committees with fulfilling their oversight responsibilities for our risk management function.
  - We believe that we underwrite liabilities and manage new product development prudently. Further, we believe that our strong fixed annuity underwriting provides us with long-dated and persistent liabilities, which we believe are priced at desirable levels to enable us to achieve attractive, risk-adjusted returns.
  - We believe we have designed our asset liability management (ALM) procedures to protect the Company, within limits, against significant changes in interest rates.
  - As of December 31, 2016, approximately 86% of our deferred annuity products had surrender charges and 73% had MVAs, each of which provide stability to our reserve liabilities.
  - As of December 31, 2016, 29% of our invested assets were floating rate investments which would allow us the flexibility to quickly increase our crediting rates in a rising interest rate environment, if desired.
  - We believe that we maintain an appropriate amount of assets that could be quickly liquidated, if needed, and have an additional liquidity cushion through a $1.0 billion revolving credit facility, which is undrawn as of the date hereof.
  - We believe we hold a high-quality portfolio, with approximately 93.2% of our AFS fixed maturity securities, including related parties, rated as NAIC 1 or NAIC 2 as of December 31, 2016 (with investments of our German operations rated by applying NRSRO equivalent ratings to map NAIC ratings).
  - AAM evaluates our structured securities at the time of acquisition using AAM's proprietary credit models.
  - Even during periods of moderate economic stress, based on our modeled estimates, we maintain what we believe to be an appropriate amount of liquidity to invest in opportunities as they arise.
- **Highly Experienced Management Team with Demonstrable Track Record.** Our highly successful, entrepreneurial senior management team has extensive experience in building companies, insurance operations, and investment management. We have assembled a management team of individuals who bring strong capabilities and experience to each facet of running our company. We are led by three well known and well respected industry executives with an average of 30 years of experience. James R. Belardi, our Chairman and founder, spent the majority of his career as the President of SunAmerica Life Insurance Company and Chief Investment Officer of American International Group, Inc. (AIG) Retirement Services, Inc. William J. Wheeler, our President, served as President of the Americas Group and Chief Financial Officer at MetLife Inc. (MetLife) prior to joining our company, and Martin P. Klein, our Chief Financial Officer, was previously Chief Financial Officer of Genworth Financial, Inc. Our management team oversees the Company's activities and its day-to-day management, including through various committees designed to manage our strategic initiatives, risk appetite and investment portfolio.

Growth Strategy

The key components of our growth strategy are as follows:

- **Continue Organic Growth by Expanding Our Distribution Channels.** We plan to grow organically by expanding our retail, reinsurance and institutional product distribution channels. We believe that we have the right people, infrastructure and scale to position us for continued growth. We aim to grow our retail channel in the United States by deepening our relationships with our approximately 60 IMOs and approximately 28,000 independent agents. Our strong financial position and capital efficient products allow us to be a dependable partner with IMOs and consistently write new business. We work with our IMOs to develop customized, and at times exclusive, products that help drive sales.

We expect our retail channel to continue to benefit from the ratings upgrade in 2015, our improving credit profile and recent product launches. We believe this should support growth in sales at our desired cost of crediting through increased volumes via current IMOs and access to new distribution channels, including small to mid-sized banks and regional broker-dealers. We are implementing the necessary technology platform, hiring and training a specialized sales force, and have created products to capture new potential distribution opportunities.

Our reinsurance channel also benefited from the 2015 ratings upgrade. We target reinsurance business consistent with our preferred liability characteristics, and as such, reinsurance provides another opportunistic channel for us to source long-term liabilities with attractive crediting rates. For the years ended December 31, 2016, 2015 and 2014 we generated deposits through our flow reinsurance channel of $3.5 billion, $1.1 billion and $349 million, respectively. We expect to grow this channel further as we continue to add new partners, some of which prefer to do business with higher rated counterparties such as us.

In addition, after having sold our first funding agreement under our FABN program in 2015, we sold additional funding agreements in the first quarter of 2017 and expect to grow our institutional products channel over time. We are pursuing pension risk transfer transactions in 2017.

- **Pursue Attractive Acquisitions.** We plan to continue leveraging our expertise in sourcing and evaluating transactions to grow our business profitably. From our founding through December 31, 2016, we have grown to $71.8 billion in invested assets and $71.0 billion in reserve liabilities, primarily through acquisitions and block reinsurance transactions. We believe that our demonstrated ability to successfully consummate complex transactions, as well as our relationship with Apollo, provide us with distinct advantages relative to other acquirers and reinsurance companies. Furthermore, our business has achieved sufficient scale to provide meaningful operational synergies for the businesses and blocks of business that we acquire. Consequently, we believe we are often sought out by companies looking to transact in the acquisitions and block reinsurance markets.

In furtherance of our strategy of growth through acquisitions, we routinely review and conduct investigations of potential acquisitions of business or blocks of business, some of which may be material. When we believe a favorable opportunity exists, we seek to enter into discussions with target companies or sellers regarding the possibility of such acquisitions. At any given time, we may be in discussions with one or more counterparties. There can be no assurances that any such negotiations will lead to definitive agreements, or if such agreements are reached, that any transactions would be consummated.

- **Expand Our Product Offering and International Presence.** Our efforts to date have focused on developing and sourcing retirement savings products and we are continuing such efforts by expanding our retail product offerings. On April 11, 2016, we launched our largest new retail product initiative, whereby we: (1) enhanced our most popular accumulation product, “Performance Elite,” with two new indices, (2) announced a new MYGA product designed for the bank and broker-dealer channel and (3) introduced an income-focused product, “Ascent Pro.” With the introduction of our new MYGA product and Ascent Pro, our retail channel is now competing in a much broader segment of the overall retirement market. For the nine months ended December 31, 2016, new MYGA sales in the IMO and financial institution channels were $603 million and Ascent Pro sales were $1.3 billion.

Additionally, while our organic growth initiatives and acquisitions have largely been focused on opportunities in the United States, our acquisition of Delta Lloyd Deutschland AG (DLD) in October 2015 demonstrated the geographic scalability of our strategy and our ability to capitalize quickly on international market environments as well. While we continue to believe that the European market provides a compelling growth opportunity to amass liabilities at one of the most favorable costs of funding in a number of years, we have come to realize that the opportunity over the next several years is larger than we initially anticipated. We have concluded that, in order to fully capitalize on this opportunity, we would need to commit capital to the European market at a level in excess of our targeted investment size, creating the need for third party capital to support growth. See further discussion on the AGER equity offering within *Products-German Products* below.

Recently, we have also developed our capabilities to undertake pension risk transfer transactions. Pension risk transfer transactions usually involve the issuance of a group annuity contract, sometimes through a separate account, in exchange for the transfer of pension liabilities from a terminating defined benefit plan. U.S. pension liabilities are estimated to be $2 to $3 trillion with an estimated $1 trillion of liabilities that may become available for closeout, with approximately $15 to $20 billion of expected annual closeout activity over the next several years. We are focused on medium- and large-sized deals where we believe that we can be competitive. We believe that we can leverage our sourcing expertise to underwrite these transactions and maintain our focus on writing profitable new business.

- **Leverage Our Unique Relationship with Apollo and AAM**. We intend to continue leveraging our unique relationship with Apollo and AAM to source high-quality assets with attractive risk-adjusted returns. Apollo’s global scale and reach provide us with broad market access across environments and geographies and allow us to actively source assets that exhibit our preferred risk and return characteristics. For instance, through our relationship with Apollo and AAM, we have indirectly invested in companies including MidCap FinCo Limited (MidCap) and AmeriHome Mortgage Company, LLC (AmeriHome). In 2013, Apollo presented us with an opportunity to fund the acquisition of MidCap, a middle-market lender focused on asset-backed loans, leveraged loans, real estate, rediscount loans and venture loans. Our equity investment in MidCap provides us with an alternative investment that meets the key characteristics we look for including an attractive risk-return profile. Our equity investment in MidCap is held indirectly through an investment fund, AAA Investment (Co-Invest VII), L.P. (CoInvest VII), of which MidCap constituted the majority of the fund's investments. CoInvest VII returned an annualized net investment earned rate of 15.15% and 15.98% for the years ended December 31, 2016 and 2015, respectively. As of December 31, 2016, our equity investment and loans to Midcap were valued at $524 million and $237 million, respectively.

Similarly, in 2013, AAM proposed that Athene and an Apollo co-investor fund and launch AmeriHome, a mortgage lender and servicer with expertise in mortgage industry fundamentals that we believe are key to operating a successful and sustainable mortgage lender/servicer. Like our investment in MidCap, our equity investment in AmeriHome meets the key characteristics we look for in an alternative investment. Our equity investment in AmeriHome is held indirectly through an investment fund, A-A Mortgage Opportunities, LP (A-A Mortgage), and AmeriHome is currently A-A Mortgage’s only investment. Abiding by its core principles, AmeriHome has grown profitably, with A-A Mortgage returning an annualized net investment earned rate of 11.62% and 14.05% for

the years ended December 31, 2016 and 2015, respectively. As of December 31, 2016, our equity investment in A-A Mortgage was valued at $417 million.

- **Dynamic Approach to Asset Allocation during Market Dislocations.** As we have done successfully in the past, we plan to fully capitalize on future market dislocations to opportunistically reposition our portfolio to capture incremental yield. For example, during 2009-2010, we reinvested a significant portion of our portfolio into RMBS. Additionally, regulatory changes in the wake of the financial crisis have made it more expensive for banks and other traditional lenders to hold certain illiquid and complex assets, notwithstanding the fact that these assets may have prudent credit characteristics. This change in demand has provided opportunities for investors to acquire high-quality assets that offer attractive returns. For example, we see emerging opportunities as banks retreat from direct mortgage lending, structured and asset-backed products, and middle-market commercial loans. We intend to maintain a flexible approach to asset allocation, which will allow us to act quickly on similar opportunities that may arise in the future across a wide variety of asset types.
- **Maintain Risk Management Discipline.** Our risk management strategy is to proactively manage our exposure to risks associated with interest rate duration, credit risk and structural complexity of our invested assets. We address interest rate duration and liquidity risks through managing the duration of the liabilities we source with the assets we acquire, and through ALM modeling. We assess credit risk by modeling our liquidity and capital under a range of stress scenarios. We manage the risks related to the structural complexity of our invested assets through AAM’s modeling efforts. The goal of our risk management discipline is to be able to continue growth and to achieve profitable results across various market environments.

Products

We principally offer two product lines: annuities and funding agreements. Our primary product line is annuities and includes fixed deferred and immediate annuities. We sell funding agreements to institutional investors and investors in our FABN program.

The following summarizes our total premiums and deposits, comprised of all products deposits, which generally are not included in revenues on the consolidated statements of income, and premiums collected. Premiums and deposits by product, including those assumed through reinsurance and net of those ceded through reinsurance, are as follows:

	Years ended December 31,		
(In millions)	2016	2015	2014
Annuities			
Fixed indexed annuities	$ 5,322	$ 2,808	$ 2,560
Fixed rate annuities	3,565	883	323
Payout annuities	128	219	195
Total annuities products	9,015	3,910	3,078
Funding agreements	-	250	-
Life and other (excluding German products)	31	72	83
German products	212	81	-
Total premiums and deposits, net of ceded	$ 9,258	$ 4,313	$ 3,161

Reserve liabilities represents our policyholder liability obligations, including liabilities assumed through reinsurance and net of liabilities ceded through reinsurance, and therefore does not correspond to interest sensitive contract liabilities, future policy benefits, dividends payable to policyholders and other policy claims and benefits as disclosed on our consolidated balance sheets. Reserve liabilities includes the reserves related to assumed modified coinsurance (modco) and funds withheld agreements in order to appropriately match the costs incurred in the consolidated statements of income with the liabilities. Reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and, therefore, we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. The majority of our ceded reinsurance is a result of reinsuring large blocks of life business following acquisitions.

The following summarizes our reserve liabilities by product:

	December 31,			
(In millions, except percentages)	2016		2015	
Annuities				
Fixed indexed annuities	$ 43,501	61.3%	$ 39,594	60.7%
Fixed rate annuities	13,490	19.0%	10,882	16.7%
Payout annuities	5,446	7.7%	5,708	8.7%
Total annuities products	62,437	88.0%	56,184	86.1%
Funding agreements	957	1.4%	1,451	2.2%
Life and other (excluding German products)	2,176	3.0%	2,094	3.2%
German products	5,381	7.6%	5,542	8.5%
Total reserve liabilities	$ 70,951	100.0%	$ 65,271	100.0%

Annuities

We offer deferred and immediate annuities, which are focused on meeting the needs and objectives of people preparing for, approaching or living in retirement. The combination of financial strength, innovative product design and an effective sales strategy enables us to compete successfully in the market and meet the evolving needs of the rapidly growing population of retirees.

Fixed Indexed Annuities - The majority of our reserve liabilities are FIAs. An FIA is a type of insurance contract in which the policyholder makes one or more premium deposits which earn interest at a crediting rate based on a specified market index on a tax deferred basis and is entitled to receive periodic or lump sum payments a specified number of years after the contract has been issued. FIAs allow policyholders the possibility of earning such interest without risk to principal, unless the contract is surrendered during a surrender charge period. A market index tracks the performance of a specific group of stocks or other assets representing a particular segment of the market, or in some cases, an entire market. Our FIAs include a provision for a minimum guaranteed surrender value calculated in accordance with applicable law, as well as death benefits as required by non-forfeiture regulations. We generally buy options on the indices to which the FIAs are tied to hedge the associated market risk. The cost of the option is priced into the overall economics of the product as an option budget.

The value to the policyholder of an FIA contract is equal to the sum of premiums paid, premium bonuses, if any, and index credits based on the change in the relevant market index, subject to a cap (a maximum rate that may be credited), spread (a credited rate determined by deducting a specific rate from the index return) and/or a participation rate (a credited rate equal to a percentage of the index return), less any fees for riders. Caps on our FIA products generally range from 2% to 5% when measured annually and 0.5% to 2% when measured monthly. Participation rates generally range from 25% to 100% of the performance of the applicable market index. Caps, spreads and participation rates can typically be reset no more frequently than annually, and in some instances no more frequently than every two to four years, at the relevant U.S. insurance subsidiary's discretion, subject to stated policy minimums. Certain riders provide a variety of benefits, such as lifetime income or additional liquidity, for a set charge. As this charge is fixed, the policyholder may lose principal if the index credits received do not exceed the amount of such charge.

We generate FIA income from our investment margin, which is based on the difference between income earned on the investments supporting the liabilities and the interest credited to customers, and fees received for riders. For the year ended December 31, 2016, retail sales of FIA products were $4.5 billion and flow reinsurance of FIA products was $686 million. According to sales information from participating members of LIMRA, for the nine months ended September 30, 2016 (the most recent period that data is currently available), we were the 3rd largest FIA provider in the United States based on retail FIA sales. For the year ended December 31, 2015, retail sales of FIA products were $2.4 billion and flow reinsurance of FIA products was $298 million. According to sales information from participating members of LIMRA, for the year ended December 31, 2015, we were the 6th largest FIA provider in the United States based on retail FIA sales and according to information from participating members of LIMRA, as of December 31, 2015 (the most recent period that specific market share data is currently available), we were the 3rd largest FIA provider based on fixed indexed deferred annuity assets (exclusive of reinsurance).

Fixed Rate Annuities - Fixed rate annuities include annual reset annuities and MYGAs. Unlike FIAs, fixed rate annuities earn interest at a set rate (or declared crediting rate), rather than a rate that may vary based on an index. Fixed rate annual reset annuities have a crediting rate that is guaranteed for one year. After such period, we have the ability to change the crediting rate once annually to any rate at or above a guaranteed minimum rate at our discretion. MYGAs are similar to annual reset annuities except that the initial crediting rate is guaranteed for a specified number of years, rather than just one year, before it may be changed at our discretion. On April 11, 2016, we introduced our first MYGA product designed for the financial institutions channel. For the year ended December 31, 2016, we had retail sales of $6 million of annual reset annuities and $772 million of MYGAs, as well as flow reinsurance of $2.8 billion of MYGAs. For the year ended December 31, 2015, we had retail sales of $14 million of annual reset annuities and $14 million of MYGAs, as well as flow reinsurance of $830 million of MYGAs. As of December 31, 2016, crediting rates on outstanding annual reset annuities ranged from 1% to 6% and crediting rates on outstanding MYGAs ranged from 1% to 6%. As of December 31, 2016, 53% of our fixed rate annuities were set at the guaranteed minimum crediting rate.

Retirement Services cost of crediting on deferred annuities for the years ended December 31, 2016, 2015 and 2014, was 1.96%, 1.92% and 1.94%, respectively.

Payout Annuities - Payout annuities primarily consist of single premium immediate annuities (SPIA), supplemental contracts and structured settlements. Payout annuities provide a series of periodic payments for a fixed period of time or for the life of the policyholder, based upon the policyholder's election at the time of issuance. The amounts, frequency and length of time of the payments are fixed at the outset of the annuity contract. SPIAs are often purchased by persons at or near retirement age who desire a steady stream of payments over a future period of years. Supplemental contracts are typically created upon the conversion of a death claim or the annuitization of a deferred annuity. Structured settlements generally relate to legal settlements.

Income Riders to Fixed Annuity Products - Many of our in-force deferred annuities are issued with riders that provide guaranteed living withdrawal benefits (GLWB). Riders providing GLWB features are sometimes referred to as income riders and permit policyholders to elect to receive guaranteed payments for life from their contract without having to annuitize their policies, which provides policyholders with greater flexibility in the future. Income riders, particularly on FIAs, have become very popular among policyholders. LIMRA estimates that 62% of FIA premium for the nine months ended September 30, 2016 (the most recent period that specific market share data is currently available) included an income rider.

We broadly characterize the income riders on our deferred annuities as either guaranteed or participating. Guaranteed income riders provide policyholders with a guaranteed lifetime withdrawal amount that is determined based upon the age of the policyholder when the policy is purchased and the age of the policyholder when he or she elects lifetime income. Participating income riders tend to have lower levels of guaranteed income but policyholders have the opportunity to receive greater levels of income if the policies' indexed crediting strategies perform well.

Our in-force block of deferred annuities contains policies with income riders that were sourced through both retail operations and acquisitions, such as the acquisition of a substantial block of policies having such riders in connection with the Aviva USA acquisition. With respect to our retail operations, we have generally not competed aggressively in the guaranteed income rider segment as we historically believed that such riders were not priced within our pricing discipline. However, recently competitors have been issuing annuities with what we believe are more rationally-priced lifetime income benefit features. In the current environment, we believe that we can grow our retail sales by offering competitive guaranteed income rates while earning an attractive spread, and on April 11, 2016, we introduced "Ascent Pro," offering policyholders the option to select a guaranteed income rider. In connection with this product offering and others involving income riders, we sometimes use reinsurance with third parties, which assume the risks arising from such products that are in excess of our pricing tolerance. We continually monitor market rationality for opportunities to grow our business, including in the area of guaranteed income riders, taking into account what we believe to be optimal product and product feature mix.

Withdrawal Options for Deferred Annuities - After the first year following the issuance of a deferred annuity, the policyholder is typically permitted to make withdrawals up to 5% or 10% (depending on the contract) of the prior year's value without a surrender charge or MVA, subject to certain limitations. Withdrawals in excess of the allowable amounts are assessed a surrender charge and MVA if such withdrawals are made during the surrender charge period of the policy. For the years ended December 31, 2016, 2015 and 2014, withdrawals on our deferred annuities were $4.2 billion, $4.4 billion and $4.4 billion, respectively. The surrender charge of most of our products is typically between 8% and 15% of the contract value at contract inception and generally decreases by approximately one percentage point per year during the surrender charge period. The surrender charge period of our most popular products ranges from 3 to 15 years. The average surrender charge (excluding the impact of MVAs) is 7.6% for our deferred annuities as of December 31, 2016.

At maturity, the policyholder may elect to receive proceeds in the form of a single payment or an annuity. If the annuity option is selected, the policyholder will receive a series of payments either over his or her lifetime or over a fixed number of years, depending upon the terms of the contract. Some contracts permit annuitization prior to maturity. In addition to the foregoing rights, a policyholder may also elect to purchase a guaranteed minimum withdrawal benefit rider which provides the policyholder with a guaranteed minimum withdrawal benefit for the life of the contract.

Funding Agreements

We focus on opportunistically issuing funding agreements to institutional investors at attractive prices. Funding agreements are negotiated privately between an investor and an insurance company. They are designed to provide an agreement holder with a guaranteed return of principal and periodic interest payments, while offering competitive yields and predictable returns. The interest rate can be fixed or floating. If the interest rate is a floating rate, it may be linked to the London Interbank Offered Rate (LIBOR), the federal funds rate or other major index.

Life and Other (Excluding German Products)

Life and other products include other retail products, including run-off or ceded business, statutory closed blocks and ceded life insurance.

German Products

Our German products include the annuity, life insurance and unit-linked products managed by the Athene Deutschland GmbH (AD), Athene Deutschland Holding GmbH & Co. KG (ADKG), Athene Deutschland Verwaltungs GmbH, Athene Lebensversicherung AG (ALV) and Athene Pensionskasse AG (APK) (collectively, German Group Companies). Our primary German product type is endowment policies, which are traditional German life insurance policies that include legally guaranteed interest, the right of policyholders to participate in certain portions of ALV's results and a death benefit. The legally guaranteed interest rate is reset annually and ranges from 1.75% to 4.00%. The policyholder

makes one or more premium deposits and is entitled to receive periodic or lump sum payments. These policies include a provision for minimum guaranteed surrender value calculated in accordance with applicable law, as well as death benefits. In addition, AD manages unit-linked life insurance policies, in which premium deposits are invested in fund units specified by the policyholder, and which includes a death benefit the value of which is tied to the performance of the fund units in which the premium deposits are invested. AD also manages pension insurance and disability insurance.

AGER Equity Offering

While we continue to believe that the European market provides a compelling growth opportunity to amass liabilities at one of the most favorable costs of funding in a number of years, we have come to realize that the opportunity over the next several years is larger than we initially anticipated. We have concluded that, in order to fully capitalize on this opportunity, we would need to commit capital to the European market at a level in excess of our targeted investment size, creating the need for third party capital to support growth. We, together with Apollo, have undertaken a process whereby our subsidiary, AGER Bermuda Holding Ltd., a Bermuda domiciled holding company and the holding company of our German Group Companies (AGER) is seeking to raise capital as part of a private offering of its equity securities (AGER Offering) in order to pursue expansion opportunities in Europe. As a founding investor, we expect to retain a sizable equity stake in AGER. However, in the event the AGER Offering is successful, our stake in AGER will be reduced and ultimately held as an alternative investment rather than as a consolidated subsidiary. Additionally, as described in further detail below, we expect to have the opportunity to be AGER's preferred reinsurer for spread liabilities, which will establish a new potential funding channel for our business.

Subject to the approval of a special committee of our board of directors comprised solely of disinterested directors, it is currently being proposed that Apollo and Athene will collectively commit up to €500 million in the AGER Offering. Our contribution would include the valuation of our German Group Companies at approximately €90 million (which is in line with our invested capital in our German Group Companies). This valuation of our German Group Companies will be fixed at the time of the closing of the commitments for the AGER Offering regardless of whether our German Group Companies operate at a profit or at a loss or otherwise increase or decrease in value from the time the commitments are final until the time of the capital call from AGER that results in AGER and its subsidiaries being deconsolidated from us, which may be as long as nine months or more. As a result, to the extent that our invested capital and/or fair value of our German Group Companies increases or decreases during such time period, we may incur a gain or loss upon deconsolidation.

The completion of the AGER Offering is conditioned upon obtaining (1) a sufficient amount of subscription commitments to allow AGER to take advantage of the opportunities in the European market over the next two to four years, (2) any required regulatory approvals, and (3) other customary terms and conditions. Prior to the successful completion of the AGER Offering and the initial material capital call in exchange for the issuance of new equity interests of AGER, AGER and our German Group Companies will continue to be consolidated subsidiaries of AHL. We expect the AGER Offering, if successful, to raise €1 billion or more from third parties.

In order to align the interests of Athene and AGER, upon the completion of the AGER Offering, we expect to enter into a cooperation agreement with AGER, pursuant to which, among other things, (1) we will agree not to compete with AGER in Europe (other than the United Kingdom), and (2) AGER will agree not to compete with us in the United States and the United Kingdom. Under the cooperation agreement, we would also have the right to reinsure approximately 20% of the spread business written or reinsured by any insurance or reinsurance company owned or acquired by AGER. An affiliate of Apollo is expected to act as investment adviser in regard to AGER's investment portfolio and provide investment services and advice. Both the services Apollo provides for AGER, and the fee they receive for doing so, may differ from the existing services provided to our German Group Companies.

In the event the AGER Offering is not completed for any reason, AGER and the German Group Companies would continue to be consolidated subsidiaries of AHL.

Distribution Channels

We have developed four dedicated distribution channels: retail, reinsurance (including flow and block reinsurance), institutional products and acquisitions, which support opportunistic origination across differing market environments and which we believe enable us to achieve stable asset growth while maintaining attractive returns.

Retail

We have built a scalable platform that allows us to originate and rapidly grow our business in fixed annuity products directly from our customers in spite of today's low-rate environment. We have developed a suite of retirement savings products, distributed through our network of approximately 28,000 independent agents in all 50 states. Sales of fixed annuities were $5.3 billion, $2.5 billion and $2.5 billion for the years ended December 31, 2016, 2015 and 2014, respectively. We expect that our upgrade to a financial strength rating of A- by each of S&P, Fitch and A.M. Best in 2015 will continue to allow us to increase our share with existing IMOs and enter into relationships with regional banks, broker-dealers and other financial institutions, resulting in a potential increase in annual sales at an attractive cost of crediting. We are focused in every aspect of our retail channel on providing high quality products and service to our policyholders and maintaining appropriate financial protection over the life of their policies.

Item 1. Business

Reinsurance

Reinsurance is an arrangement under which an insurance company, the reinsurer, agrees to indemnify another insurance company, the ceding company or cedant, for all or a portion of the insurance risks underwritten by the ceding company. Reinsurance is designed to (1) reduce the net amount at risk on individual risks, thereby enabling the ceding company to increase the volume of business it can underwrite, as well as increase the maximum risk it can underwrite on a single risk, (2) stabilize operating results by leveling fluctuations in the ceding company’s loss experience, (3) assist the ceding company in meeting applicable regulatory requirements and (4) enhance the ceding company’s financial strength and surplus position. As mentioned above, reinsurance can also be used to acquire or sell blocks of business. In general, annuity reinsurance is executed in the form of a flow transaction or a block transaction.

We conduct the majority of our reinsurance transactions through our subsidiary, ALRe. Founded on June 9, 2009, ALRe is licensed as a Class E insurer carrying on long-term business in Bermuda; one of the largest reinsurance markets in the world by reserves, with a regulatory regime deemed equivalent to the European Union’s Directive (2009/138/EC) (Solvency II) for commercial insurers. As a fixed annuity reinsurer, ALRe partners with life and annuity insurance companies to develop solutions to their capital requirements, enhance their presence in the retirement market and improve their financial results. The specific liabilities ALRe targets to reinsure include MYGAs, FIAs, traditional one year guarantee fixed deferred annuities, immediate annuities and institutional products. ALRe only targets business consistent with our preferred liability characteristics, and as such, reinsurance provides another opportunistic channel for us to source long-term liabilities with attractive crediting rates. For various transaction-related reasons, from time to time, our U.S. insurance subsidiaries, in particular AADE, will reinsure business from third-party ceding companies and retrocede a portion of the reinsured business to ALRe. Our flow reinsurance channel generated deposits of approximately $3.5 billion, $1.1 billion and $349 million for the years ended December 31, 2016, 2015 and 2014, respectively.

ALRe has been involved in reinsurance and retrocession transactions with 16 third-party cedents. Since inception through December 31, 2016, deposits from such transactions totaled approximately $10.7 billion, inclusive of third-party cedent business that flows through AADE, split between block transactions of $3.6 billion and flow business of $7.1 billion. As of December 31, 2016, ALRe had on-going flow reinsurance and retrocession treaties involving six third-party cedents rated A- or better for a quota share of such cedents’ new deposits, including both MYGAs and FIAs. ALRe was first rated by A.M. Best, Fitch and S&P in early 2015, which we believe is helpful in establishing reinsurance relationships with third-party cedents.

In our reinsurance transactions, as opposed to acquisitions, we acquire assets and liabilities associated with a certain book of business, as opposed to the assets or stock of a target company, which allows us to acquire only that portion of the target’s business that we wish to acquire without assuming additional liabilities.

Institutional Products

Funding Agreements - We participate in a FABN program, which is a medium term note program under which funding agreements are issued to a special-purpose trust that issues marketable notes. The proceeds of the issuance of a series of notes are used by the trust to acquire a funding agreement with matching interest and maturity payment terms from AADE. The notes are underwritten and marketed by major investment banks’ broker-dealer operations and are sold to institutional investors. In 2015, we issued our first funding agreement under the FABN program in the aggregate principal amount of $250 million. The funding agreement has a carrying value of $246 million as of December 31, 2016 and matures in October 2018. In the first quarter of 2017, we issued additional funding agreements under the FABN program in the aggregate principal amount of $650 million, of which $600 million matures in January 2022 and $50 million matures in October 2018.

Athene Annuity and Life Company (AAIA) is a member of the Federal Home Loan Bank of Des Moines (FHLBDM) and Athene Life Insurance Company (ALIC) is a member of the Federal Home Loan Bank of Indianapolis (FHLBI). Each issued funding agreements to the relevant Federal Home Loan Bank (FHLB) in exchange for cash advances in an aggregate amount of $641 million outstanding, with respect to AAIA, and $50 million outstanding, with respect to ALIC, each as of December 31, 2016. We have decided to wind down the ALIC entity. In connection with that decision, we decided to withdraw our membership in the FHLBI.

Pension Risk Transfer - We have developed capabilities to undertake pension risk transfer transactions. Pension risk transfer transactions usually involve a single premium group annuity contract issued for the purpose of discharging certain pension plan liabilities. Our planned pension risk transfer annuities are nonparticipating contracts. The assets supporting the guaranteed benefits for each contract may be held in a separate account. We will fully guarantee all benefit payments as provided for in the group annuity contract. The group annuity benefits may be purchased for retired and terminated employees or employees covered under terminating or ongoing pension plans. Both immediate and deferred annuities may be purchased by a single premium at issue. There are generally no cash surrender rights, with some exceptions including certain contracts that include liabilities for cash balance pension plans or lump sums. Under GAAP, these annuity contracts are treated as general account products. We are focused on medium- and large-sized deals where we believe we can be competitive.

Acquisitions

Acquisitions are an important source of growth in our business. We have a proven ability to acquire businesses in complex transactions at terms favorable to us, manage the liabilities that we acquire and reinvest the associated assets. Through December 31, 2016, we have closed four acquisition transactions in the U.S.: Liberty Life Insurance Corporation (Liberty Life), Investors Insurance Corporation, Presidential Life Corporation and Aviva USA; and one international acquisition, DLD, collectively representing reserve liabilities backed by approximately $65.9 billion in total assets (net of $9.3 billion in assets ceded through reinsurance).

Item 1. Business

The acquisition of Aviva USA marked a significant milestone in our history. As a result of the acquisition we grew to approximately four times our size immediately prior to the acquisition (as measured by total assets). The acquisition significantly enhanced our retail channel, increased our scale, improved our infrastructure and further demonstrated our integration abilities, in this case having successfully integrated a company with a significantly larger employee headcount and IT and operational footprint.

In October 2015, we acquired the German life insurance business of Delta Lloyd N.V., an Amsterdam-based financial services provider. The German life insurance businesses acquired have been in run-off since the beginning of 2010 by action of the predecessor owner. Accordingly, our German insurance subsidiaries do not write new life insurance business, except for a limited number of new co-insurance policies, and all distribution partner contracts have been terminated.

We plan to continue leveraging our expertise in sourcing and evaluating transactions to profitably grow our business. We believe that our demonstrated ability to source transactions, consummate complex transactions and reinvest assets into higher yielding investments as well as our relationship with Apollo provides us with distinct advantages relative to other acquirers.

In general, we seek to reinsure or otherwise dispose of those portions of the target company's business that we do not wish to retain, if any. Our largest dispositions of such businesses are described below.

Global Atlantic
As part of our acquisition of Aviva USA, we effectuated a sale or transferred the risk of substantially all of Aviva USA's life insurance business by reinsuring such business to affiliates of Global Atlantic. A description of the transactions is as follows:

- We entered into a 100% coinsurance and assumption agreement with Accordia. The agreement covers all open block life insurance business issued by AAIA, with the exception of enhanced guarantee universal life insurance products. Under the terms of the agreement, Accordia maintains a custody account with assets equal to or greater than an agreed-upon required statutory balance that as of December 31, 2016 was $2.9 billion. The agreement provides separate excess of loss coverage for policy liabilities of AAIA related to the former AmerUs Life Insurance Company (AmerUs) closed block (AmerUs Closed Block) that are also subject to existing reinsurance through Athene Re IV, a captive reinsurer that is a subsidiary of AAIA. As of December 31, 2016, outstanding obligations ceded pursuant to this arrangement which remained unnovated amounted to $2.8 billion in statutory reserves. We have no continuing contractual obligations with respect to policies that have been novated.

- We entered into a 100% coinsurance agreement with Accordia to cede all policy liabilities for the closed block established in connection with the demutualization of Indianapolis Life Insurance Company (ILICO), which had been previously acquired by Aviva USA. The ILICO Closed Block consists primarily of participating whole life insurance policies. Effective December 1, 2015, Accordia retroceded substantially all of the policy liabilities for the ILICO Closed Block to Ameritas Life Insurance Corp. (Ameritas). Under the terms of the retrocession agreement, Ameritas maintains a trust account with assets equal to or greater than a required statutory balance that as of December 31, 2016 was $717 million. AAIA is permitted to withdraw funds from the trust account under certain circumstances. As of December 31, 2016, outstanding obligations ceded pursuant to this arrangement amounted to $747 million in statutory reserves.

- We entered into the following coinsurance and funds withheld agreements with First Allmerica Financial Life Insurance Company (FAFLIC) to cede substantially all policy liabilities for the below described life insurance policies.

  - Athene Life Insurance Company of New York (ALICNY) entered into a 100% funds withheld coinsurance agreement with FAFLIC covering certain term and universal life policies which have reserves that are subject to financing arrangements. Under the terms of the agreement, ALICNY maintains a funds withheld account with an agreed-upon statutory balance that as of December 31, 2016 was $243 million.

  - ALICNY entered into a 100% coinsurance agreement with FAFLIC covering certain term and universal life policies which have reserves that are not subject to financing arrangements. Under the terms of the agreement, FAFLIC maintains a trust account with an agreed-upon required statutory balance that as of December 31, 2016 was $309 million.

  - ALICNY entered into a 100% coinsurance and assumption agreement with FAFLIC covering substantially all of ALICNY's in-force life business that is not ceded pursuant to the agreements described in the preceding two paragraphs. Under the terms of the agreement, FAFLIC maintains a trust account with an agreed-upon required statutory balance that as of December 31, 2016 was $217 million.

  - As of December 31, 2016, outstanding obligations ceded pursuant to the three FAFLIC reinsurance agreements discussed above amounted to $1.0 billion in statutory reserves.

We continue to have the primary legal obligation to satisfy claims and obligations relating to those policies not novated to Accordia or FAFLIC. As a consequence, if Accordia or FAFLIC were unable to satisfy its reinsurance obligations on such life policies, we would be responsible for satisfying those contractual obligations reinsured by Accordia or FAFLIC, respectively. We do not maintain a security interest in the custody account discussed above, and therefore in the event of an Accordia insolvency, the assets of the custody account may be available to satisfy the

claims of Accordia's general creditors. In addition, in the event of an Accordia insolvency, our claims against Accordia would be subordinated to those of its policyholders. As of December 31, 2016, both Accordia and FAFLIC were rated A- by A.M. Best.

Protective Life Insurance Company (Protective)
On April 29, 2011, AADE ceded substantially all of its life and health business to Protective under a coinsurance agreement. As part of this transaction, we transferred assets backing reserves and miscellaneous other liabilities on the life and health business. The reserve assets were placed in a trust account maintained by Protective for our benefit to secure the obligations of the reinsurer of the acquired business. As of December 31, 2016, the statutory book value of assets in this trust was $1.5 billion and the outstanding obligations ceded pursuant to the arrangement amounted to $1.5 billion. In the event that Protective is unable to satisfy its reinsurance obligations with respect to the policies ceded and the trust assets prove insufficient to satisfy the resulting obligations, we would have the primary legal obligation to satisfy such deficiency. In the event of a Protective insolvency, our claim against Protective would be subordinated to those of its policyholders. As of December 31, 2016, Protective was rated A+ by A.M. Best.

Investment Management

Investment activities are an integral part of our business and our net investment income is a significant component of our total revenues. Our investment philosophy in the United States is to invest a portion of our assets in securities that earn us incremental yield by taking liquidity risk and complexity risk and capitalizing on our long-dated and persistent liability profile to prudently achieve higher net investment earned rates, rather than assuming solely credit risk. We have established a significant base of earnings and as of December 31, 2016 have an expected annual investment margin of 2-3% over the 7.8 year weighted-average life of our deferred annuities, which make up a substantial portion of our reserve liabilities. Because we have remained disciplined in underwriting attractively priced liabilities, we have the ability to invest in a broad range of high quality assets to generate attractive earnings.

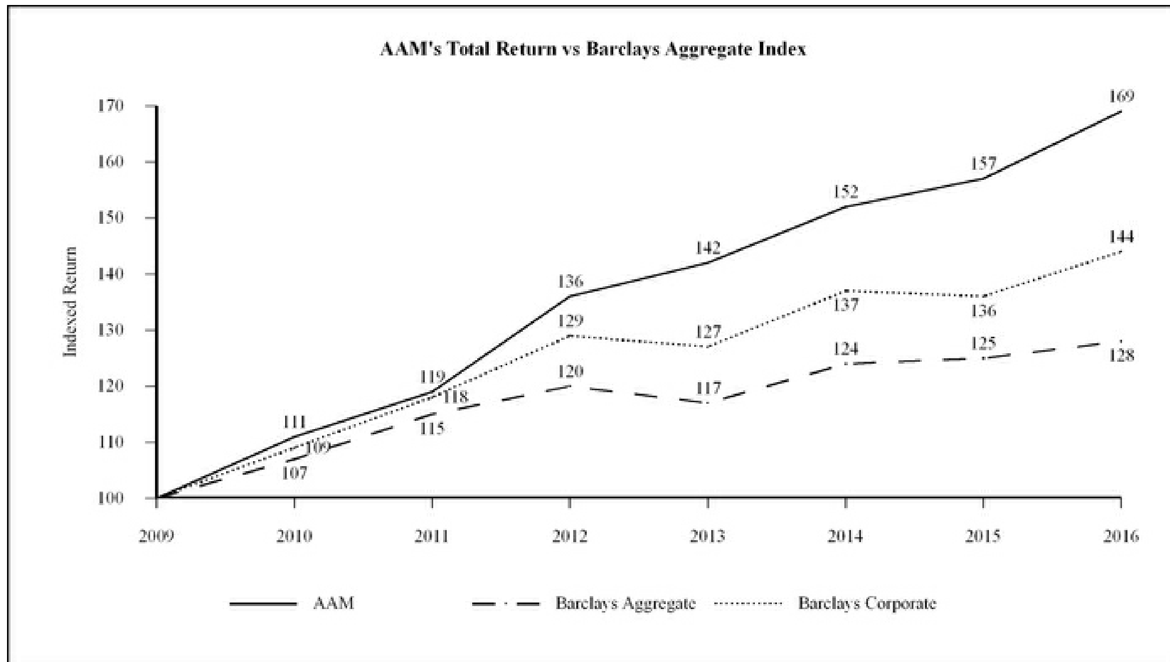
Our differentiated investment strategy benefits from our strategic relationship with Apollo and its indirect subsidiary, AAM. AAM provides a full suite of services for our investment portfolio, including direct investment management, asset allocation, mergers and acquisition asset diligence and certain operational support services, including investment compliance, tax, legal and risk management support. AAM provides portfolio management services for substantially all of our invested assets (excluding our German invested assets) and currently provides direct asset selection for 81% of our investment portfolio (excluding Germany). The remaining 19% is outsourced to Apollo and its affiliates to access additional sourcing and underwriting capabilities. Substantially all of the assets subject to a sub-advisory arrangement are sub-advised by Apollo affiliates. AAM allocates portions of our asset portfolio to sub-advisors to manage based on market opportunities. AAM also provides a slate of other asset and portfolio management services to us.

Through our relationship with Apollo, AAM has identified unique investment opportunities for us. AAM's knowledge of our funding structure and regulatory requirements allows it to design bespoke strategies and investments for our portfolio. For example, we hold a significant investment in MidCap through a consolidated investment fund managed by Apollo, together with loans made directly to MidCap. When we originally invested in MidCap Financial Holdings, LLC (MidCap Financial) in November 2013, MidCap Financial was a specialty finance company which primarily originated lending opportunities in the healthcare sector. With the assistance of Apollo, MidCap Financial entered new lending markets, raised substantial equity capital and restructured as MidCap in January 2015. MidCap represents a unique investment in an origination platform made available to us through our relationship with Apollo and, from time to time, provides us with access to assets for our investment portfolio. As of December 31, 2016, our exposure, including loaned amounts, to MidCap and its predecessor entities approximated $761 million, which represented 1% of our total invested assets and 11% of total AHL shareholders' equity. As of December 31, 2016, the value of our equity investment in MidCap had increased by 30% since our original investment in November 2013.

Item 1. Business

Since its inception, AAM has developed a track record for delivering sound investment returns. According to AAM, for the years ended December 31, 2016, 2015 and 2014, it generated total returns on the invested assets in our U.S. and Bermuda accounts owned by us or in accounts supporting reinsurance ceded to our subsidiaries by third-party insurers (the North America Accounts), net of management and sub-advisory fees, but gross of any other direct or indirect fees and expenses paid or payable directly or indirectly by us, of 6.41%, 3.30% and 6.82%, respectively. See *Item 13. Certain Relationships and Related Transactions, and Director Independence* for further discussion of fees paid or payable to Apollo and its affiliates, including AAM, and *Item 1A. Risk Factors-Risks Relating to Our Investment Manager* for further discussion regarding the risks inherent in historical total return figures.

Below is AAM's total return compared to the Barclays Aggregate Index and the Barclays Corporate Index. AAM has outperformed the Barclays Aggregate Index and the Barclays Corporate Index since 2009.



Note: This chart presents AAM’s total return relative to the performance of the Barclays Aggregate Index and the Barclays Corporate Index, with each index presented without any deduction for fees given that such indices are not actual portfolios managed by investment advisors. Such presentation is provided solely as an indication of the performance of fixed income strategies. No index, including the Barclays indices presented here, is directly comparable to AAM’s total return as the composition of the portfolio generating AAM’s total return inherently differs from the portfolio of securities represented by the respective index. In particular, with respect to the above presentation, the AAM total return figures reflect the performance of certain equity securities, structured securities and other asset classes not represented in either of the Barclays indices presented above. Athene’s historical results are not necessarily indicative of its future operating results. This chart is not intended to imply that AAM’s total return is correlated with the performance of either of the indices presented and AAM’s total return, and the volatility of such return, may be, and in many cases is likely to be, materially different from the performance of such indices.

We are downside focused and our asset allocations reflect the results of stress testing. Additionally, we establish what we believe are conservative risk thresholds which in turn define risk tolerance across a wide range of factors, including credit risk, liquidity risk, concentration risk and caps on specific asset classes. We protect against rising interest rates, as our assets are generally slightly shorter in effective duration than our liabilities, resulting in a risk profile that we believe could sustain substantial increases in rates over and above what is implied by current futures markets without sustaining net losses. See *Hedging Program and Derivatives* for further discussion. As of December 31, 2016, 29% of our invested assets were floating rate investments which would allow us the flexibility to quickly increase our crediting rates in a rising interest rate environment, if desired.

As a result of our robust combination of underwriting and investment management capabilities, we are able to achieve investment margins that provide attractive risk-adjusted returns and that provide us with a base of future earnings. We generated net investment income of $2.9 billion, $2.5 billion and $2.3 billion for the years ended December 31, 2016, 2015 and 2014, respectively. We generated consolidated net investment earned rates of 4.35%, 4.24% and 4.29% for the years ended December 31, 2016, 2015 and 2014, respectively. We believe that achieving an investment margin of 2-3% on our deferred annuities would maintain our attractive financial profile and is achievable given our underwriting and asset management capabilities. Moreover, our investing capabilities support our ability to sell fixed annuities profitably and to competitively price acquisitions while meeting our earnings expectations.

The deep experience of the AAM investment team and Apollo's credit portfolio managers assists us in sourcing and underwriting complex asset classes. AAM has selected a diverse array of corporate bonds and more structured, but highly rated asset classes. We also maintain holdings in floating rate and less rate-sensitive investments, including collateralized loan obligations (CLO), non-agency RMBS and various types of structured products. These asset classes permit us to earn incremental yield by assuming liquidity risk and complexity risk, rather than assuming solely credit risk.

In addition to our core fixed income portfolio, we opportunistically allocate 5-10% of our portfolio to alternative investments where we primarily focus on fixed income-like, cash flow-based investments. Our alternative investment strategy is inherently opportunistic rather than being derived from allocating a fixed percentage of assets to the asset class and the strategy is subject to internal concentration limits. Individual alternative investments are selected based on the investment's risk-reward profile, incremental effect on diversification and potential for attractive returns due to sector and/or market dislocations. We have a strong preference for alternative investments that have the following characteristics, among others: (1) investments that constitute a direct investment or an investment in a fund with a high degree of co-investment; (2) investments with debt-like characteristics (for example, a stipulated maturity and par value), or alternatively, investments with reduced volatility when compared to pure equity; and (3) investments that have less downside risk. In general, we target returns for alternative investments of 10% or higher on an IRR basis over the expected lives of such investments.

As of December 31, 2016, 93.2% of our AFS fixed maturity securities, including related parties, were rated NAIC 1 or NAIC 2 (with investments of our German operations rated by applying NRSRO equivalent ratings to map NAIC ratings).

Our asset portfolio is managed within the limits and constraints set forth in our Investment and Credit Risk Policy. Under this policy, we set limits on investments in our portfolio by asset class, such as corporate bonds, emerging markets securities, municipal bonds, non-agency RMBS, commercial mortgage-backed securities (CMBS), CLO, commercial mortgage whole loans and mezzanine loans and alternative investments. We also set credit risk limits for exposure to a single issuer that vary based on ratings. In addition, our asset portfolio is constrained by its scenario-based capital ratio limit and its stressed liquidity limit.

As part of our reinvestment strategy for the investment portfolios of our acquired companies, we generally seek to reinvest assets at yields higher than the related assets being liquidated for reinvestment. We have reinvested a substantial portion of the investment portfolio acquired in our acquisition of Aviva USA, which contributed to the increase in fixed income and other net investment earned rates on this block of business to 4.12% for the year ended December 31, 2015 from 3.50% (on an annualized basis) for the fourth quarter of 2013.

In Germany, our wholly owned subsidiary, ADKG, provides investment management services to our other German Group Companies. ADKG entered into an investment advisory agreement with AAME pursuant to which AAME provides advisory services for a significant portion of our German investment portfolio.

Reserves

We establish and carry actuarially-determined reserves that are calculated to meet our future obligations, which require us to make certain assumptions regarding expenses, investment yields, mortality, morbidity and persistency, with a provision for adverse deviation as appropriate, each as of the date of issue or acquisition. The assumptions used require considerable judgment. We review overall policyholder experience at least annually and update these assumptions when deemed necessary based on additional information that becomes available. For immediate annuity products, assumptions used in the reserve calculation can only be changed if the reserve is deemed to be insufficient. For all other insurance products, current assumptions are used in the calculation of reserves. For FIAs, the aggregate initial liability is equal to the deposit received plus a bonus, if applicable, and is split into a host component and an embedded derivative component. Thereafter, the host contract accretion rate is updated each quarter so that the present value of actual and expected guaranteed cash flows is equal to the initial host value and the embedded derivative liability is recognized at fair value, with the change in fair value recorded in interest sensitive contract benefits in our consolidated statements of income. Changes in, or deviations from, the assumptions used to set our reserves can significantly affect our reserve levels and related results of operations. See *Item 1A. Risk Factors-Risks Relating to Our Business* for additional discussion on assumptions and estimates.

Persistency is the probability that a policy will remain in force from one period to the next. We make assumptions about persistency based on expected policyholder behavior in future periods, including full and partial contract surrenders. Policyholder behavior is influenced by a number of factors including, but not limited to, recent and current performance of the policy, contractual guarantees contained within the policy, availability of alternative products and general economic conditions.

A surrender rate is the percentage of account value surrendered by the policyholder. A lapse rate is the percentage of account value canceled by us due to nonpayment of premiums or surrender of the policy. Our surrender rate experience on our FIA products for the years ended December 31, 2016 and 2015 was within our assumed ranges. Our estimate of surrender behavior is based on assumptions reflecting actual experience and we believe that, over the duration of the policies, we may experience a wide range of policyholder behavior and market conditions.

Mortality is the incidence of death among policyholders triggering the payment of underlying insurance benefits by the insurer. In addition, mortality also refers to the ceasing of payments on life-contingent annuities due to the death of the annuitant. We utilize a combination of actual and industry experience when setting our mortality assumptions.

We also set reserves for the guaranteed minimum benefits for some of our products. The assumptions used to establish the liabilities for our product guarantees require considerable judgment. At issue, and at each subsequent valuation, we determine the present value of the cost of guaranteed minimum benefits contained in our policies in excess of benefits that are funded by the account value. We also calculate the expected value of the future cost of providing these benefits. In making these projections, a number of assumptions are made and we update these assumptions as experience emerges, when required. We have limited experience to date on policyholder behavior for our guaranteed minimum benefit products which our acquirees began issuing in 2006, and as a result, future experience could lead to significant changes in our assumptions. If emerging experience deviates from our assumptions on utilizations of these benefits, such deviations could have a significant effect on our reserve levels and related results of operations. We periodically review these assumptions and, if necessary, update them based on additional information that becomes available. Changes in or deviations from the assumptions used can significantly affect our reserve levels and related results of operations.

To the extent actual experience differs from assumptions and estimates used to establish reserves, we may be required to increase or decrease our reserves to reflect changes in our expectations. Any such increase could cause a material increase in our liabilities and a reduction in our profitability, including operating losses and a reduction of capital.

Outsourcing

With regard to our U.S. business, we outsource some portion or all of each of the following functions to third-party service providers:

- hosting of financial systems;
- service of existing policies;
- custody;
- administration of annuities issued in support of pension risk transfer transactions;
- some information technology development and maintenance; and
- call centers.

We closely manage our outsourcing partners and integrate their services into our operations. We believe that outsourcing such functions allows us to focus capital and our employees on our core business operations and perform differentiating functions, such as actuarial, product development and risk management functions. In addition, we believe an outsourcing model provides predictable pricing, service levels and volume capabilities and allows us to benefit from technological developments that enhance our customer self-service and sales processes that we would not otherwise be able to take advantage of without reinvesting more of our own capital.

The majority of our new business and policy administration is handled in-house. For some closed in-force blocks of business we partner with Alliance - One Services, Inc., Concentrix Insurance Administrative Solutions Corporation and Infosys McCamish Systems, LLC to provide policy administration services. For administration of annuities issued in support of pension risk transfer transactions, we intend to use Conduent. For information technology services, we use some providers for managed services or supplemental labor, including Tata Consulting Services Limited and UST Global Inc., and use Hewlett Packard Company for data center, infrastructure and related services. For investment management services, we use AAM, AAME and Apollo. We believe that we have a good relationship with our principal outsource service providers.

Affiliated Reinsurance

Our U.S. insurance subsidiaries participate in reinsurance arrangements pursuant to which each cedes certain insurance risks to ALRe. ALRe is a fully licensed, operational and fully equity capitalized reinsurance company with third-party clients. Our U.S. insurance subsidiaries have entered into modco agreements with ALRe under which they cede to ALRe a 100% quota share of their respective obligations to repay the principal upon maturity or earlier termination and to make periodic interest payments under funding agreements issued by them. Our U.S. insurance subsidiaries have similar arrangements with ALRe with respect to substantially all of their other core business, under which generally 80% of all such business is ceded to ALRe on a modco basis. To support these internal reinsurance arrangements, ALRe holds the substantial majority of our capital with $6.1 billion of statutory capital as of December 31, 2016. ALRe had a BSCR ratio of 228% as of December 31, 2016.

Hedging Program and Derivatives

We use, and may continue to use, derivatives, including swaps, options, futures and forward contracts and reinsurance contracts to hedge risks such as current or future changes in the fair value of our assets and liabilities, current or future changes in cash flows, changes in interest rates, equity markets, currency fluctuations and changes in longevity. In particular, we purchase options and equity futures to hedge the market risk exposure inherent in our FIA products, which have crediting rates tied to certain market indices. Our hedging program is focused on hedging our economic risk exposures and reducing the variation in our realized investment margin.

We use a combination of equity options; equity index futures; and variance, interest rate, and currency swaps to hedge the risks from the equity derivatives embedded in our FIAs. Through the use of our hedging strategy, we are able to minimize the net impact on capital and surplus of market variations affecting our embedded derivatives.

In addition to hedging the risks from embedded derivatives, we also use currency swaps and futures to hedge mismatches between the currency of our liability cash flows and our assets. Although cash-flow matching and ALM analyses are employed to manage our interest rate and funding exposures, we may also use interest rate derivatives to ensure that our net economic interest rate exposure is within our risk tolerances.

Despite utilizing sophisticated risk management tools and strategies in selecting assets as well as hedges, we remain subject to the risk that our hedging strategies may not have the desired impact on the results of operations or financial condition due to inaccuracy of management's assumptions or estimates or to the transaction costs or execution risk associated with those strategies. See *Item 1A. Risk Factors* for further discussion on risks associated with hedging and derivatives.

Financial Strength Ratings

Our access to funding and our related cost of borrowing, the attractiveness of certain of our subsidiaries' products to customers, our attractiveness as a reinsurer to potential ceding companies and requirements for derivatives collateral posting are affected by our credit ratings and insurance financial strength ratings, as well as those of our subsidiaries, which are periodically reviewed by the rating agencies. Financial strength ratings and credit ratings are important factors affecting consumer confidence in an insurer and its competitive position in marketing products as well as critical factors considered by ceding companies in selecting a reinsurer.

As of December 31, 2016, Fitch, S&P and A.M. Best had issued credit ratings, financial strength ratings and/or outlook statements regarding us, as listed below. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurer or reinsurer to meet its obligations under an insurance policy or reinsurance arrangement and generally involve quantitative and qualitative evaluations by rating agencies of a company's financial condition and operating performance. Generally, rating agencies base their financial strength ratings upon information furnished to them by the Company and upon their own investigations, studies and assumptions. Financial strength ratings are based upon factors of concern to policyholders, agents, intermediaries and ceding companies and are not directed toward the protection of investors. Credit and financial strength ratings are not recommendations to buy, sell or hold securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

Item 1. Business

Rating Agency	Financial Strength Rating Scale	Senior Unsecured Notes Credit Rating Scale
A.M. Best[1]	“A++” to “S”	“aaa” to “rs”
S&P[2]	“AAA” to “R”	“AAA” to “D”
Fitch[3]	“AAA” to “C”	“AAA” to “D”

[1] *A.M. Best’s financial strength rating is an independent opinion of an insurer’s or reinsurer’s financial strength and ability to meet its ongoing insurance policy and contract obligations. It is based on a comprehensive quantitative and qualitative evaluation of a company’s balance sheet strength, operating performance and business profile or, where appropriate, the specific nature and details of a security. The analysis may include comparisons to peers, industry standards and proprietary benchmarks as well as assessments of operating plans, philosophy, management, risk appetite and the implicit or explicit support of a parent or affiliate. A.M. Best’s long-term credit ratings reflect its assessment of the ability of an obligor to pay interest and principal in accordance with the terms of the obligation. Ratings from "aa" to "ccc" may be enhanced with a "+" (plus) or "-" (minus) to indicate whether credit quality is near the top or bottom of a category. A.M. Best’s short-term credit rating is an opinion as to the ability of the rated entity to meet its senior financial commitments on obligations maturing in generally less than one year.*

[2] *S&P’s insurer financial strength rating is a forward-looking opinion about the financial security characteristics of an insurance organization with respect to its ability to pay under its insurance policies and contracts in accordance with their terms. Generic rating categories range from "AAA" to "D". A "+" or "-" indicates relative strength within a generic category. An S&P credit rating is an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Short-term issuer credit ratings reflect the obligor’s creditworthiness over a short-term time horizon.*

[3] *Fitch’s financial strength ratings provide an assessment of the financial strength of an insurance organization. The National Insurer Financial Strength Rating is assigned to the insurance company’s policyholder obligations, including assumed reinsurance obligations and policyholder obligations, such as guaranteed investment contracts. Within long-term and short-term ratings, a “+” or a “-” may be appended to a rating to denote relative status within major rating categories.*

In addition to the financial strength ratings, rating agencies use an outlook statement to indicate a medium or long-term trend which, if continued, may lead to a rating change. A positive outlook indicates a rating may be raised and a negative outlook indicates a rating may be lowered. A stable outlook is assigned when ratings are not likely to be changed. Outlooks should not be confused with expected stability of the issuer’s financial or economic performance. A rating may have a stable outlook to indicate that the rating is not expected to change, but a stable outlook does not preclude a rating agency from changing a rating at any time without notice.

A.M. Best, S&P and Fitch review their ratings of insurance companies from time to time. There can be no assurance that any particular rating will continue for any given period of time or that it will not be changed or withdrawn entirely if, in their judgment, circumstances so warrant. While the degree to which ratings adjustments will affect sales and persistency is unknown, we believe if our ratings were to be negatively adjusted for any reason, we could experience a material decline in the sales of our products and the persistency of our existing business. See *Item 1A. Risk Factors* for further discussion about risks associated with financial strength ratings.

Competition

We operate in highly competitive markets. We face a variety of large and small industry participants, including diversified financial institutions and insurance and reinsurance companies. These companies compete in one form or another for the growing pool of retirement assets driven by a number of external factors such as the continued aging of the population and the reduction in safety nets provided by governments and private employers. In many segments, product differentiation is difficult as product development and life cycles have shortened. In addition, we have experienced pressure on fees as product unbundling and lower cost alternatives have emerged. As a result, scale and the ability to provide value-added services and build long-term relationships are important factors to compete effectively. See *Item 1A. Risk Factors - Risks Relating to Our Business* for further discussion on competitive risks. We believe that our leading presence in the retirement market, diverse range of capabilities and broad distribution network uniquely position us to effectively serve consumers’ increasing demand for retirement solutions, particularly in the FIA market.

We face competition in the FIA market from traditional insurance carriers such as Allianz Life Insurance Company of North America (Allianz) and American Equity Investment Life Insurance Company (AEL). Principal competitive factors for FIAs are initial crediting rates, reputation for renewal crediting action, product features, brand recognition, customer service, cost, distribution capabilities and financial strength ratings of the provider. Competition may affect, among other matters, both business growth and the pricing of our products and services. According to LIMRA, for the nine months ended September 30, 2016 (the most recent period that specific market share data is currently available), the leading two providers of FIAs were Allianz and AEL with market shares of 17.7% and 9.6%, respectively. The aggregate market share of the top ten providers of FIAs for the same period was 65.9%. For the nine months ended September 30, 2016 (the most recent period that data is currently available), we were the 3rd largest FIA provider in the United States based on retail FIA sales, and our market share for the same period was 6.9%. According to LIMRA, for the year ended December 31, 2015, the leading two providers of FIAs were Allianz and AEL with market shares of 16.0% and 12.5%, respectively. The aggregate market share of the top ten providers of FIAs for the same period was 66.0%. For the year ended December 31, 2015, we were the 6th largest FIA provider in the United States based on retail FIA sales, and our market share for the same period was 4.5%.

Item 1. Business

Reinsurance markets are highly competitive, as well as cyclical by product and market. As a reinsurer, ALRe competes on the basis of many factors, including, among other things, financial strength, pricing and other terms and conditions of reinsurance agreements, reputation, service and experience in the types of business underwritten. The market impact of these and other factors related to reinsurance is generally not consistent across lines of business, domestic and international geographical areas and distribution channels. ALRe's competition includes other insurance and reinsurance companies, such as Reinsurance Group of America, Incorporated and Global Atlantic.

We also face competition in the market for acquisition targets, such as profitable blocks of insurance and whole businesses. Such competition is likely to intensify as insurance businesses become more attractive acquisition targets for both other insurance companies and financial and other institutions and as the already substantial consolidation in the financial services industry continues. We believe that our demonstrated ability to source and consummate complex transactions is a competitive advantage over other similar acquirers. We also compete for potential acquisition opportunities based on a number of factors including perceived financial strength, brand recognition, reputation and the pricing we are able to offer, which, to the extent we determine to finance a transaction, is in turn dependent on our ability to do so on suitable terms.

Finally, we face strong competition within our institutional products channel. With respect to funding agreements, namely those issued in connection with our FABN program, we compete with other insurers that have active FABN programs, such as AIG and MetLife. Within the funding agreement market, we complete primarily on the basis of interest rates and term. With respect to pension risk transfer, we compete with other insurers that offer pension risk transfer annuities, such as MetLife and Prudential Financial, Inc. Within the pension risk transfer market, we compete primarily on the basis of price, underwriting and investment capabilities.

Employees

As of December 31, 2016, we had approximately 1,125 employees located in Bermuda and the United States, and approximately 200 employees located in Germany and the United Kingdom. We believe that our employee relations are good. Whereas none of our employees located in Bermuda or the United States are subject to collective bargaining agreements and we are not aware of any current efforts to implement such agreements, one of our German Group Companies, ALV, is a member of the employers' association of insurance companies in Germany (*Arbeitgeberverband der Versicherungsunternehmen in Deutschland e.V.*). As such, ALV is required to apply the collective bargaining agreements entered into with the association and the relevant trade union to those employees that are members of the trade union. In addition, each of the German Group Companies applies these collective bargaining agreements based on individual agreements to most of the non-unionized staff as well. As of December 31, 2016, approximately 200 employees of our German Group Companies were directly or indirectly subject to such agreements. The collective bargaining agreements are for an indefinite term and apply as long as the relevant German Group Company is a member of the employers' association. There are also joint local employee representative bodies for the German operations, such as works councils and an economics committee, which have statutory co-determination, information and participation rights in accordance with German laws. The German Group Companies are required to apply and comply with various collective agreements with these local employee representations, such as works agreements. Two employee representatives are members of the supervisory board of our principal German life insurance carrier, ALV.

Regulation

Our U.S. insurance subsidiaries are licensed to transact insurance business in, and are subject to regulation and supervision by, all 50 states of the United States and the District of Columbia. Our German Group Companies licensed as insurers are subject to the relevant laws and regulations applicable to insurers in Germany, including but not limited to the German Insurance Supervision Act (*Versicherungsaufsichtsgesetz* (VAG)), and ALRe, a Bermuda domiciled insurer, is subject to regulation and supervision by the Bermuda Monetary Authority (BMA) and compliance with all applicable Bermuda law and Bermuda insurance statutes and regulations, including but not limited to Bermuda's Insurance Act 1978 (Bermuda Insurance Act). Our U.S. insurance subsidiaries are licensed, regulated and supervised in all jurisdictions where they conduct insurance business. The extent of such regulation varies, however; most jurisdictions have regulations and laws that require insurers and agents to be licensed and set standards of solvency and business conduct to be maintained by the insurer. Additionally, state statutes and regulations often require state approval of policy forms, policy language, rates and in some instances, marketing materials. Most states' statutes and regulations prescribe permitted types and concentrations of investments. Our U.S. insurance subsidiaries are required to file detailed annual financial statements with supervisory agencies in each of the jurisdictions in which they transact an insurance business.

From time to time, in the ordinary course of business and like others in the insurance and financial services industries, our U.S. insurance subsidiaries receive requests for information from government agencies in connection with such agencies' regulatory or investigatory authority. Such requests can include market conduct examinations, subpoenas or demand letters for documents to assist the government in audits or investigations. Each such subsidiary reviews such requests and notices and takes appropriate action. Our U.S. insurance subsidiaries have been subject to certain requests for information and investigations in the past and could be subject to them in the future.

Item 1. Business

United States

General

Each of our U.S. insurance subsidiaries is organized and domiciled in one of the following states: Delaware, Iowa, or New York (each, an Athene Domiciliary State) and is also licensed in such state as an insurer. The insurance department of each Athene Domiciliary State regulates the applicable U.S. insurance subsidiary, and each U.S. insurance subsidiary is regulated by each of the insurance regulators in the other states where such company is authorized to transact insurance business. The primary purpose of such regulatory supervision is to protect policyholders rather than holders of any securities, such as the AHL common shares.

In addition, as part of our acquisition of Aviva USA, we acquired a special purpose insurance company, Athene Re IV, which is a subsidiary of AAIA. Athene Re IV is domiciled in Vermont and provides reinsurance to AAIA in order to facilitate the reserve financing associated with a closed block of policies resulting from the demutualization of a prior insurance company currently part of AAIA. As part of the acquisition of AAIA, the liabilities associated with such closed block of insurance policies, including any exposure to payments due from such special purpose insurance company subsidiary, were reinsured to Accordia. We do not write business that requires the use of captive reinsurers. The substantial majority of all policyholder obligations written or held by our insurance subsidiaries are reinsured to ALRe, a fully licensed, operational and fully equity capitalized reinsurance company with third-party clients. For more information on our reinsurance structures, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Generally, insurance products underwritten by our U.S. insurance subsidiaries must be approved by the insurance regulators in each state in which they are sold. Those products are also substantially affected by federal and state tax laws. For example, changes in tax law could reduce or eliminate the tax-deferred accumulation of interest credited on the premiums paid by the holders of annuities and life insurance products, which could make such products less attractive to potential purchasers. A shift away from annuity products could reduce the investment income that our U.S. insurance subsidiaries earn on premiums or deposits received from the sale of such products, as well as the assets upon which our U.S. insurance subsidiaries earn income. In addition, certain insurance policies may also be subject to the Employee Retirement Income Security Act of 1974 (as amended, ERISA).

State insurance authorities have broad administrative powers over our U.S. insurance subsidiaries with respect to all aspects of their insurance business including: (1) licensing to transact business; (2) licensing of producers; (3) prescribing which assets and liabilities are to be considered in determining statutory surplus; (4) regulating premium rates for certain insurance products; (5) approving policy forms and certain related materials; (6) determining whether a reasonable basis exists as to the suitability of the annuity purchase recommendations producers make; (7) regulating unfair trade and claims practices; (8) establishing reserve requirements, solvency standards and minimum capital requirements (MCR); (9) regulating the amount of dividends that may be paid in any year; (10) regulating the availability of reinsurance or other substitute financing solutions, the terms thereof and the ability of an insurer to take credit on its financial statements for insurance ceded to reinsurers or other substitute financing solutions; (11) fixing maximum interest rates on life insurance policy loans, minimum crediting rates on accumulation products and minimum allowable surrender values; (12) regulating the type, amounts and valuations of investments permitted; (13) setting parameters for transactions with affiliates; and (14) regulating other matters.

The rates, forms, terms and conditions of our U.S. insurance subsidiaries' reinsurance agreements with unaffiliated third parties generally are not directly subject to regulation by any state insurance department in the United States. This contrasts with primary insurance where, as discussed above, the policy forms and premium rates are generally regulated by state insurance departments.

From time to time, increased scrutiny has been placed upon the U.S. insurance regulatory framework, and a number of state legislatures have considered or enacted legislative measures that alter, and in many cases increase, state authority to regulate insurance and reinsurance companies. In addition to legislative initiatives of this type, the NAIC and state insurance regulators are regularly involved in a process of reexamining existing laws and regulations and their application to insurance and reinsurance companies.

Furthermore, while the federal government in most contexts currently does not directly regulate the insurance business, federal legislation and administrative policies in a number of areas, such as employee benefits regulation, age, sex and disability-based discrimination, financial services regulation and federal taxation, can significantly affect the insurance business. It is not possible to predict the future impact of changing regulation on the operations of Athene. See *Item 1A. Risk Factors*.

NAIC

The NAIC is an organization, the mandate of which is to benefit state insurance regulatory authorities and consumers by promulgating model insurance laws and regulations for adoption by the states. The NAIC also provides standardized insurance industry accounting and reporting guidance through the NAIC Accounting Manual. However, model insurance laws and regulations are only effective when adopted by the states, and statutory accounting and reporting principles continue to be established by individual state laws, regulations and permitted practices. Changes to the NAIC Accounting Manual or modifications by the various state insurance departments may affect the statutory capital and surplus of our U.S. insurance subsidiaries. AHL has entered into capital maintenance agreements with each of its material U.S. insurance subsidiaries, pursuant to which AHL agrees to provide capital to the subsidiary to the extent that the capital of the subsidiary falls below a specified threshold as set with the applicable subsidiary's domestic regulator.

Some of the NAIC pronouncements, particularly as they affect accounting issues, take effect automatically in the various states without affirmative action by the states. Statutes, regulations and interpretations may be applied with retroactive impact, particularly in areas such as accounting and reserve requirements. Also, regulatory actions with prospective impact can potentially have a significant impact on currently sold products. The NAIC continues to work to reform state regulation in various areas, including comprehensive reforms relating to life insurance reserves.

Pursuant to its “Solvency Modernization Initiative,” the NAIC reviewed the U.S. financial regulatory system and all aspects of financial regulation affecting insurance companies. Though broad in scope, the Solvency Modernization Initiative focused on: (1) capital requirements; (2) corporate governance and risk management; (3) group supervision; (4) statutory accounting and financial reporting; and (5) reinsurance. This initiative has resulted in the recent adoption by the NAIC of the Own Risk and Solvency Assessment (ORSA) Model Act, which has been enacted by a number of states, including Delaware, Iowa and New York, and requires insurance companies to assess the adequacy of their and their group’s risk management and current and future solvency position. Under the ORSA Model Act, certain insurers must undertake an internal risk management review no less often than annually (but also at any time when there are significant changes to the risk profile of the insurer or its insurance group), in accordance with the NAIC’s ORSA Guidance Manual, and prepare an ORSA Report assessing the adequacy of the insurer’s risk management and capital in light of its current and future business plans. The ORSA Report is required to be filed with a company’s lead state regulator and made available to other domiciliary regulators within the holding company system. As of December 31, 2016, we were in compliance with all ORSA Report filing requirements.

In December 2012, the NAIC approved a new valuation manual containing a principle-based approach to life insurance company reserves. Principle-based reserving is designed to tailor the reserving process to specific products in an effort to create a principle-based modeling approach to reserving rather than the factor-based approach historically employed. Pursuant to the NAIC’s Standard Valuation Law (SVL), a minimum of 42 states representing at least 76% of total life insurance premiums written in the United States must pass legislation substantially similar to the SVL for the SVL to become operative as an NAIC model law. As of July 1, 2016, these minimum threshold requirements have been satisfied such that the SVL is now operative, and principle-based reserving became effective prospectively on January 1, 2017. Delaware and Iowa have each adopted a form of the SVL. New York is expected to adopt a form of the SVL in January 2018.

In November 2014, the NAIC adopted the Corporate Governance Annual Disclosure Model Act and Model Regulation (together, the Corporate Governance Model Act), which requires an insurer to provide an annual disclosure regarding its corporate governance practices to its lead state and/or domestic regulator. As adopted by the NAIC, the requirements of the Corporate Governance Model Act were intended to be effective January 1, 2016, with the first annual disclosure due by June 1, 2016. The Corporate Governance Model Act must be adopted by the individual states for the new requirements to apply, and specifically in Delaware, Iowa and New York for the changes to apply to our U.S. insurance subsidiaries. Iowa has adopted a form of the Corporate Governance Annual Disclosure Model Act, and the first corporate governance annual disclosure under that law was due on June 1, 2016. Neither Delaware nor New York has adopted the Corporate Governance Model Act, and it is not possible to predict whether Delaware and/or New York may adopt the Corporate Governance Model Act in the future; however, the NAIC is seeking to make the Corporate Governance Model Act part of its accreditation standards for state solvency regulation, which may motivate states to adopt the Corporate Governance Model Act.

Insurance Holding Company Regulation

Each direct and indirect parent of our U.S. insurance subsidiaries (including AHL) is subject to the insurance holding company laws of each of the Athene Domiciliary States. These laws generally require an insurance holding company and insurers that are members of such holding company system to register with their U.S. insurance regulators and to file certain reports with those authorities, including information concerning their capital structure, ownership, financial condition, certain intercompany transactions and general business operations. Generally, under these laws, transactions between our U.S. insurance subsidiaries and their affiliates, including any reinsurance transactions, must be fair and reasonable and, if material or of a specified category, require prior notice and approval or non-disapproval by the insurance department of each applicable Athene Domiciliary State.

Item 1. Business

Most states, including each of the Athene Domiciliary States, have insurance laws that require regulatory approval of a direct or indirect change of control of an insurer, which would include a change of control of its holding company. Laws such as these prevent any person from acquiring direct or indirect control of any of our U.S. insurance subsidiaries or their holding companies unless that person has filed a statement with specified information with the commissioner or director of the insurance department of the applicable Athene Domiciliary State (each, a Commissioner) and has obtained the Commissioner's prior approval. Under most states' statutes, including those of each of the Athene Domiciliary States, acquiring 10% or more of a voting interest in an insurance company or its parent company is presumptively considered a change of control, although such presumption may be rebutted. Accordingly, any person who acquires 10% or more of a voting interest in a direct or indirect parent of any of our U.S. insurance subsidiaries (or AHL) without the prior approval of the Commissioner of the applicable Athene Domiciliary State will be in violation of the applicable Athene Domiciliary State's law and may be subject to injunctive action requiring the disposition or seizure of those securities by the Commissioner or prohibiting the voting of those securities and to other actions determined by the Commissioner. Further, a willful violation of these laws is punishable in each Athene Domiciliary State as a criminal offense. In addition, the Model Insurance Holding Company System Regulatory Act (Amended Holding Company Model Act) requires any controlling person of a U.S. insurer seeking to divest its controlling interest in the insurance company to file with the relevant insurance commissioner a confidential notice of the proposed divestiture at least thirty days prior to the cessation of control (unless a person acquiring control from the divesting party has filed notice of the proposed acquisition of control with the Commissioner). After receipt of the notice, the Commissioner must determine those instances in which the parties seeking to divest or to acquire a controlling interest will be required to file for or obtain approval of the transaction. These laws may discourage potential acquisition proposals and may delay, deter or prevent an acquisition of control of a direct or indirect parent of any of our U.S. insurance subsidiaries (including AHL) (in particular through an unsolicited transaction), even if the shareholders of such parent consider such transaction to be desirable. Our bye-laws include limitations on the voting power exercisable by shareholders of the Company other than the Apollo Group so that certain persons or groups (Control Groups) are deemed not to hold more than 9.9% of the total voting power conferred by our shares.

Holding company system regulations currently in effect in New York require prospective acquirers of New York domiciled insurers to provide detailed disclosure with respect to intended changes to the business operations of the insurer, and expressly authorize the New York State Department of Financial Services (NYSDFS) to impose additional conditions on such acquisitions. Pursuant to these regulations, the NYSDFS may limit the changes that the acquirer may make to the insurer's business operations for a specified period of time following the acquisition without the NYSDFS' prior approval. In particular, the regulation provides the NYSDFS with the specific authority to require acquirers of New York domiciled life insurers to post assets in a trust account for the benefit of the target company's policyholders. In making such determination, the NYSDFS may consider whether the acquirer is, or is controlled by or under common control with, an investment manager such as Apollo. The NAIC's former Private Equity Issues Working Group, which was formed to develop best practice recommendations relating to acquisitions of control of insurance or reinsurance companies by private equity and hedge funds, adopted narrative guidance for state insurance examiners to consider in reviewing applications for an acquisition of an insurer. Such guidance has been adopted by the NAIC and is included in the 2015 Annual/2016 Quarterly edition of the NAIC's Financial Analysis Handbook.

Although Athene Re IV is not subject to insurance holding company laws, the Vermont insurance regulator may use all or a part of the holding company law framework described above in determining whether to approve a proposed change of control.

In December 2010, the NAIC adopted the Amended Holding Company Model Act. The Amended Holding Company Model Act introduces the concept of "enterprise risk" within an insurance holding company system and imposes more extensive informational requirements on parents and other affiliates of licensed insurers or reinsurers, with the purpose of protecting the licensed companies from enterprise risk, including requiring an annual enterprise risk report by each ultimate controlling person identifying the material risks within the insurance holding company system that could pose enterprise risk to the licensed companies. An enterprise risk is an activity or event involving affiliates of an insurer that could have a material adverse effect on the insurer or the insurer's holding company system. The Amended Holding Company Model Act must be adopted by the individual states for the new requirements to apply. Iowa, Delaware and New York have each adopted a form of the Amended Holding Company Model Act.

In December 2014, the NAIC adopted additional amendments to the Amended Holding Company Model Act for consideration by the various states that address the authority of an insurance commissioner to act as the group-wide supervisor for an internationally active insurance group or to acknowledge the authority of another regulatory official, from another jurisdiction, to so act. These changes to the Amended Holding Company Model Act must be enacted by the individual states before they will become effective, and specifically in Delaware, Iowa and New York for the changes to apply to our U.S. insurance subsidiaries. Delaware has adopted a form of these changes to the Amended Holding Company Model Act, and Iowa has adopted similar provisions under a predecessor statute. It is not possible to predict with any degree of certainty the additional capital requirements, compliance costs or other burdens these changes may impose in the future.

In addition, the NAIC has adopted a revised Suitability in Annuity Transactions Model Regulation (SAT), which places new responsibilities upon issuing insurance companies with respect to the suitability of annuity sales, including responsibilities for training agents. Many states, including Iowa, Delaware and New York, have already enacted laws and/or regulations based on SAT, thus imposing suitability standards with respect to sales of FIAs and variable annuities. The NYSDFS recently issued a circulated letter emphasizing insurers' obligations under laws and regulations based on SAT when replacing a deferred annuity contract with an immediate annuity contract. Future changes in such laws and regulations, including those that may result from any delay, repeal or modification of the DOL fiduciary rule, could adversely impact the way we market and sell our annuity products.

Item 1. Business

Restrictions on Dividends and Other Distributions

Current law of two of the Athene Domiciliary States, Delaware and Iowa, permits the payment of dividends or distributions which, together with dividends or distributions paid during the preceding twelve months do not exceed the *greater* of (a) 10% of the insurer's surplus as regards policyholders as of the immediately preceding year end or (b) the net gain from operations of the insurer for the preceding twelve-month period ending as of the immediately preceding year end. Current law of New York permits the payment of dividends or distributions which, together with dividends or distributions paid during any calendar year, (1) do not exceed the *greater* of (a) 10% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (b) the net gain from operations of the insurer for the immediately preceding calendar year, not including realized capital gains, not to exceed 30% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (2) do not exceed the *lesser* of (a) 10% of the insurer's surplus as regards policyholders as of the end of the immediately preceding calendar year or (b) the net gain from operations of the insurer for the immediately preceding calendar year, not including realized capital gains. Any proposed dividend in excess of these amounts is considered an extraordinary dividend or extraordinary distribution and may not be paid until it has been approved, or a 30-day waiting period has passed during which it has not been disapproved, by the Commissioner. Additionally, under current law of the Athene Domiciliary States, AAIA may only pay dividends from the insurer's earned profits on its business, which shall not include contributed capital or contributed surplus, and AADE may only pay dividends from that part of its available and accumulated surplus funds which is derived from realized net operating profits on its business and realized capital gains, and ALICNY may only pay dividends pursuant to the "greater of" standard described above from that part of its positive unassigned funds, excluding 85% of the change in net unrealized capital gains or losses less capital gains tax, for the immediately preceding calendar year. Further, as a condition to each of the NYSDFS' and Iowa Insurance Division's (IID) approval of Athene's acquisition of Aviva Life and Annuity Company of New York (ALACNY, now ALICNY) and AAIA, respectively, in connection with the broader Aviva USA acquisition, Athene agreed not to cause ALACNY or AAIA to declare, distribute or pay any dividend for five years from the date of acquisition of control of ALACNY or AAIA without the prior written consent of the NYSDFS or the IID, as applicable. The Athene Domiciliary States' insurance laws and regulations also require that each of our U.S. insurance subsidiaries' surplus as regards policyholders following any dividend or distribution be reasonable in relation to such U.S. insurance subsidiary's outstanding liabilities and adequate to meet its financial needs.

Credit for Reinsurance Ceded

The ability of a ceding insurer to take reserve and capital credit for the reinsurance purchased from reinsurance companies is a significant component of reinsurance regulation. Typically, a ceding insurer will only enter into a reinsurance agreement if it can obtain credit on its statutory basis financial statements against its reserves (report lower net reserves) and/or toward its MCR (the denominator in its RBC calculation) for the reinsurance ceded to the reinsurer. With respect to U.S.-domiciled ceding companies, credit is usually granted when the reinsurer is licensed or accredited in the state where the ceding company is domiciled. States also generally permit ceding insurers to take credit for reinsurance if the reinsurer: (1) is domiciled in a state with a credit for reinsurance law that is substantially similar to the credit for reinsurance law in the ceding insurer's state of domicile, and (2) meets certain financial requirements. Credit for reinsurance purchased from a reinsurer that does not meet the foregoing conditions is generally allowed to the extent that such reinsurer secures its obligations with qualified collateral.

ALRe has provided, and may in the future provide, reinsurance to our U.S. insurance subsidiaries in the normal course of business. Our U.S. insurance subsidiaries have entered into modco agreements with ALRe under which they will cede to ALRe a 100% quota share of their respective obligations to repay the principal upon maturity or earlier termination and to make periodic interest payments under funding agreements issued by them. Our U.S. insurance subsidiaries have similar arrangements with ALRe with respect to substantially all of their other core business, under which between 80% and 100% of all such business is ceded to ALRe on a modco basis, net of third party reinsurance. ALRe is not licensed, accredited or approved in any state in the United States and, consequently, ALRe must collateralize its obligations to our U.S. insurance subsidiaries or any third-party cedant in order for any of our U.S. insurance subsidiaries or any third-party cedant to obtain credit against its reserves on its statutory basis financial statements (unless the basis for such reinsurance transaction is modco). ALRe is domiciled in Bermuda, one of the largest reinsurance markets in the world by reserves with a regulatory regime deemed by the European Commission (EC) in November 2015 to be equivalent to the European Union (EU) Solvency II. The delegated act granting Bermuda equivalency under Solvency II was approved by the European Parliament and Council in March 2016.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) provides that only the state in which a ceding insurer is domiciled may regulate the financial statement credit for reinsurance taken by that ceding insurer; other states are no longer able to require additional collateral from unauthorized reinsurers or otherwise impose their own credit for reinsurance laws on ceding insurers that are licensed, but not domiciled, in such other states.

In November 2011, the NAIC adopted amendments to its Credit for Reinsurance Model Law and Regulation to implement reinsurance collateral reform. Under the amended Credit for Reinsurance Model Law and Regulation, collateral requirements may be reduced from 100% for unauthorized or non-accredited reinsurers meeting certain criteria as to financial strength and reliability that are domiciled in jurisdictions that are found to have strong systems of insurance regulation (each, a "Qualified Jurisdiction"). Once a state legislature enacts the amendments to the Credit for Reinsurance Model Law and Regulation and the standards become operative in that state, such reinsurers will be eligible to apply for "certified reinsurer" status and reinsurers that become so certified will be permitted to post collateral at reduced levels in that state. The new collateral levels will apply on a prospective basis only. The NAIC recently made the reinsurance collateral reform provisions of the amended Credit for Reinsurance Model Law and Regulation an accreditation standard. Delaware and Iowa have adopted the reduced collateral requirements under the Credit for Reinsurance Model Law and Regulation, and New York has adopted the reduced collateral requirements under a predecessor statute.

In December 2014, the NAIC approved Bermuda as a "Qualified Jurisdiction," effective January 1, 2015, with respect to certain classes of insurers, including Class E insurers such as ALRe. The recognition of Bermuda as a Qualified Jurisdiction permits ALRe to apply for "certified reinsurer" status with the ability (if so certified) to post reduced collateral for coverage provided by ALRe to ceding insurers in the United States (including our U.S. insurance subsidiaries). The amount of collateral required to be posted by insurers with this designation varies based upon the insurers' credit rating. ALRe is not currently certified to post reduced collateral in any state.

Statutory Investment Valuation Reserves

Life insurance companies domiciled in the U.S. are required to establish an asset valuation reserve (AVR) to stabilize statutory policyholder surplus from fluctuations in the market value of investments. The AVR consists of two components: (1) a "default component" for possible credit-related losses on fixed maturity investments and (2) an "equity component" for possible market-value losses on all types of equity investments, including real estate-related investments. Although future additions to the AVR will reduce the future statutory capital and surplus of our U.S. insurance subsidiaries, we do not believe that the impact under current regulations of such reserve requirements will materially affect our U.S. insurance subsidiaries. Insurers domiciled in the U.S. also are required to establish an interest maintenance reserve (IMR) for net realized capital gains and losses, net of tax, on fixed maturity investments where such gains and losses are attributable to changes in interest rates, as opposed to credit-related causes. The IMR is required to be amortized into statutory earnings on a basis reflecting the remaining period to maturity of the fixed maturity securities. These reserves are required by state insurance regulatory authorities to be established as liabilities on a life insurer's statutory financial statements and may also be included in the liabilities assumed by our U.S. insurance subsidiaries pursuant to their reinsurance agreements with U.S.-based life insurer ceding companies.

Policy and Contract Reserve Adequacy Analysis

The Athene Domiciliary States and other states have adopted laws and regulations with respect to policy and contract reserve sufficiency. Under applicable insurance laws, our U.S. insurance subsidiaries are each required to annually conduct an analysis of the adequacy of all life insurance and annuity statutory reserves. A qualified actuary appointed by each such subsidiary's board must submit an opinion annually for each such subsidiary which states that the statutory reserves make adequate provision, according to accepted actuarial standards of practice, for the anticipated cash flows resulting from the contractual obligations and related expenses of such subsidiary. The adequacy of the statutory reserves is considered in light of the assets held by such U.S. insurance subsidiary with respect to such reserves and related actuarial items, including, but not limited to, the investment earnings on such assets and the consideration anticipated to be received and retained under the related policies and contracts. At a minimum, such testing is done over a number of economic scenarios prescribed by the states, with the scenarios designed to stress anticipated cash flows for higher and/or lower future levels of interest rates. Our U.S. insurance subsidiaries may find it necessary to increase reserves, which may decrease their statutory surplus, in order to pass additional cash flow testing requirements.

U.S. Statutory Reports and Regulatory Examinations

Our U.S. insurance subsidiaries are required to file detailed annual reports, including financial statements, in accordance with prescribed statutory accounting rules, with regulatory officials in the jurisdictions in which they conduct business. In addition, each U.S. insurance subsidiary is required to file quarterly reports prepared on the same basis, though with considerably less detail.

As part of their routine regulatory oversight process, state insurance departments conduct periodic detailed examinations, generally once every three to five years, of the books, records, accounts and operations of insurance companies that are domiciled in their states. Examinations are generally carried out in cooperation with the insurance departments of other, non-domiciliary states under guidelines promulgated by the NAIC. There are currently no such examinations ongoing.

Vermont insurance laws and regulations applicable to Athene Re IV require it to file financial statements with the Commissioner of the Insurance Division of the Vermont Department of Financial Regulation. Additionally, Athene Re IV is subject to periodic financial examinations by the Insurance Division of the Vermont Department of Financial Regulation. The Vermont Department of Financial Regulation recently completed an examination of Athene Re IV for the period from January 1, 2011 through December 31, 2014. The final report was issued on September 21, 2016. There were no issues noted in the report.

Market Conduct Regulation

State insurance laws and regulations include numerous provisions governing the marketplace activities of insurers, including provisions governing claims settlement practices, the form and content of disclosure to consumers, illustrations, advertising, sales and complaint process practices. State regulatory authorities generally enforce these provisions through periodic market conduct examinations. In addition, our U.S. insurance subsidiaries must file, and in many jurisdictions and for some lines of business obtain regulatory approval for, rates and forms relating to the insurance written in the jurisdictions in which they operate. Our U.S. insurance subsidiaries are currently undergoing the following market conduct examinations, each in the ordinary course of business: (1) the Missouri Department of Insurance, Financial Institutions & Professional Registration is conducting a market conduct examination of AAIA, (2) the NYSDFS is conducting a triennial examination of AANY, (3) the Wisconsin Office of the Commissioner of Insurance is conducting a general market conduct examination of AAIA, (4) the New York Office of the State Comptroller is conducting an audit of AANY and ALICNY regarding abandoned property, (5) the State of Connecticut Insurance Department is conducting an examination survey of the market conduct practices of AAIA and (6) the State of Massachusetts is conducting a limited scope market conduct examination of AAIA. The California Department of Insurance is completing a review of the rating and underwriting practices of AAIA, AADE and AANY.

State insurance regulators have been scrutinizing claims settlement practices of insurance companies with regard to payment of death benefits. Through their authority to regulate market conduct, including claims settlement practices, state insurance regulators have been examining the use by insurance companies of the U.S. Social Security Administration’s Social Security Death Index (Death Master File) to identify deceased persons and the processes by which insurance companies search for beneficiaries of life and annuity contracts. In particular, these regulators have been looking at how insurance companies handle unreported deaths, maturity of life insurance and annuity contracts, and contracts that have exceeded limiting age to determine if the companies are appropriately identifying when death benefits or other payments under the contracts should be made. Several states have enacted new laws or adopted new regulations mandating the use by insurance companies of the Death Master File or other similar databases to identify deceased persons and more rigorous processes to find beneficiaries. The NAIC currently is developing a new model law to address the issue of unclaimed benefits.

In 2013, prior to our acquisition of Aviva USA, it entered into multi-state settlement agreements with the insurance regulators and treasurers for 48 states in connection with certain of its subsidiaries’ use of the Death Master File. As part of the settlement, AAIA and its subsidiary ALICNY agreed to pay a $4 million assessment for examination, compliance and monitoring costs without admitting any liability or wrongdoing, and further agreed to adopt policies and procedures reasonably designed to ensure timely payment of valid claims to beneficiaries in accordance with insurance laws and to timely report and remit unclaimed proceeds to the appropriate states in connection with unpaid property laws. Our U.S. insurance subsidiaries could continue to be subject to risks related to unpaid benefits, the Death Master File, and the procedures required by the prior multi-state settlement as they relate to our annuity business. Furthermore, administrative challenges associated with implementing the procedures described above may make compliance with the multi-state settlement and applicable law difficult and could have a material and adverse effect on our results of operations. AADE is currently undergoing a multi-state unclaimed property examination led by Verus Financial, on behalf of California, Florida, Georgia, Indiana, Louisiana, North Carolina, Ohio, Pennsylvania, Tennessee and Texas. Further, AADE is also a defendant in a lawsuit filed by the West Virginia Treasurer, State of West Virginia ex rel. John D. Perdue v. Liberty Life Ins. Co., Case No. 12-C-419, pursuant to which the Treasurer alleges that Liberty Life, now known as AADE, failed to adopt reasonable procedures, such as using the Death Master File, to identify deceased insureds with unpaid death benefits and timely escheat those unclaimed benefits to the state. The Treasurer accordingly seeks to recover unpaid death benefits, statutory interest and penalties.

Another area of focus by state insurance regulators has been on the use of third-party administrators (TPAs) to administer insurance policies. Our U.S. insurance subsidiaries rely on TPAs to service certain annuity and life insurance policies and have experienced increased service and administration complaints related to the conversion and administration of the Aviva USA life insurance policies reinsured to affiliates of Global Atlantic by the TPA retained by such Global Atlantic affiliates to provide services on such policies, as well as on certain annuity policies that were on Aviva USA’s life systems that were also converted to and are being administered by the same TPA. As a result of these increased complaints and service-related issues, our U.S. insurance subsidiaries may be subject to increased regulatory scrutiny, including fines and penalties, and policyholder litigation.

Capital Requirements

Regulators of each state have discretionary authority in connection with our U.S. insurance subsidiaries’ continued licensing to limit or prohibit sales to policyholders within their respective states if, in their judgment, the regulators determine that such entities have not maintained the required level of minimum surplus or capital or that the further transaction of business would be hazardous to policyholders.

In order to enhance the regulation of insurers’ solvency, the NAIC adopted a model law to implement RBC requirements for life, health and property and casualty insurance and reinsurance companies. All states have adopted the NAIC’s model law or a substantively similar law. The NAIC Risk-Based Capital for Insurers Model Act requires life insurance companies to submit an annual report (the Risk-Based Capital Report), which compares an insurer’s total adjusted capital (TAC) to its authorized control level RBC (ACL), each such term as defined pursuant to applicable state law. A company’s RBC is calculated by using a specified formula that applies factors to various risks inherent in the insurer’s operations, including risks attributable to its assets, underwriting experience, interest rates and other business expenses. The factors are higher for those items deemed to have greater underlying risk and lower for items deemed to have less underlying risk. Statutory RBC is measured on two bases, with ACL calculated as one-half company action level RBC (CAL). Regulators typically use ACL in assessing companies and reviewing solvency requirements. Companies themselves typically report and are compared using the CAL standard.

The Risk-Based Capital Report is used by regulators to set in motion appropriate regulatory actions relating to insurers that show indications of weak or deteriorating conditions. RBC is an additional standard for MCR that insurers must meet to avoid being placed in rehabilitation or liquidation by regulators. The annual Risk-Based Capital Report, and the information contained therein, is not intended by the NAIC as a means to rank insurers.

RBC is a method of measuring the level of capital appropriate for an insurance company to support its overall business operations, in light of its size and risk profile. It provides a means of assessing capital adequacy, where the degree of risk taken by the insurer is the primary determinant. The value of an insurer's TAC in relation to its RBC, together with its trend in its TAC, is used as a basis for determining regulatory action that a state insurance regulator may be authorized or required to take with respect to an insurer. The four action levels include:

1. CAL: The insurer is required to submit a plan for corrective action when its TAC is equal to or less than 200% of ACL;
2. Regulatory Action Level: The insurer is required to submit a plan for corrective action and is subject to examination, analysis and specific corrective action when its TAC is equal to or less than 150% of ACL;
3. ACL: Regulators may place the insurer under regulatory control when its TAC is equal to or less than 100% of ACL; and
4. Mandatory Control Level: Regulators are required to place the insurer under regulatory control when its TAC is equal to or less than 70% of ACL.

TAC and RBC are calculated annually by insurers, as of December 31 of each year. As of December 31, 2016, each of our U.S. insurance subsidiaries' TAC was significantly in excess of the levels that would prompt regulatory action under the laws of the Athene Domiciliary States. As of December 31, 2016, our U.S. RBC ratio was 478%. The calculation of RBC requires certain judgments to be made, and, accordingly, our U.S. insurance subsidiaries' current RBC may be greater or less than the RBC calculated as of any date of determination.

Under U.S. statutory accounting principles (SAP), our U.S. domiciled subsidiaries defer the portion of realized capital gains and losses on fixed maturity securities attributable to changes in the general level of interest rates into an IMR. The IMR amortizes into future year statutory operating results based on a formula prescribed by the NAIC. The IMR provides a buffer to our statutory capital and surplus in the event we have to sell securities in an unrealized loss position. As of December 31, 2016 and 2015, our aggregate IMR balance was $217 million and $238 million, respectively.

Insurance Regulatory Information System Ratios

The NAIC has established the Insurance Regulatory Information System (IRIS) to assist state insurance departments in their oversight of the financial condition of insurance companies operating in their respective states. IRIS is a series of financial ratios calculated by the NAIC based on financial information submitted by insurers on an annual basis. Each ratio has an established "usual range" of results. The NAIC shares the IRIS ratios calculated for each insurer with the interested state insurance departments. Generally, an insurance company will be required to explain ratios that fall outside the usual range, and may be subject to regulatory scrutiny and action if one or more of its ratios fall outside the specified ranges. None of our U.S. insurance subsidiaries are currently subject to non-ordinary course regulatory scrutiny based on their IRIS ratios.

Regulation of Investments

Each of our U.S. insurance subsidiaries is subject to laws and regulations in each Athene Domiciliary State that require diversification of its investment portfolio and limit the amounts of investments in certain asset categories, such as below-investment grade fixed income securities, real estate-related equity, partnerships, other equity investments, derivatives and alternative investments. Failure to comply with these laws and regulations would cause investments exceeding regulatory limitations to be treated as non-admitted assets for purposes of measuring statutory surplus and, in some instances, could require the divestiture of such non-qualifying investments. Accordingly, the investment laws in the Athene Domiciliary States could prevent our U.S. insurance subsidiaries from pursuing investment opportunities which they believe are beneficial to their shareholders, which could in turn preclude Athene from realizing its investment objectives. We believe that the investments our U.S. insurance subsidiaries have made are in compliance, in all material respects, with such laws and regulations as of December 31, 2016.

Item 1. Business

Guaranty Associations

All 50 states and the District of Columbia have insurance guaranty fund laws requiring insurance companies doing business within those jurisdictions to participate in guaranty associations. Guaranty associations are organized to cover, subject to limits, contractual obligations under insurance policies issued by life insurance companies which later become impaired or insolvent. These associations levy assessments, up to prescribed limits, on each member insurer doing business in a particular state on the basis of their proportionate share of the premiums written by all member insurers in the lines of business in which the impaired or insolvent insurer previously engaged. Most states limit assessments in any year to 2% of the insurer's average annual premium for the three years preceding the calendar year in which the impaired insurer became impaired or insolvent. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets, usually over a period of years. Assessments levied against our U.S. insurance subsidiaries by guaranty associations during each of the past five years have not been material. While Athene cannot accurately predict the amount of future assessments or future insolvencies of competitors which would lead to such assessments, Athene believes that assessments with respect to pending insurance company impairments and insolvencies will not have a material effect on Athene's financial condition or results of operations.

Federal Oversight

Although the insurance business in the United States is primarily regulated by the states, federal initiatives can affect the businesses of our U.S. insurance subsidiaries in a variety of ways. From time to time, federal measures are proposed which may significantly affect the insurance business. These areas include financial services regulation, securities regulation, derivatives regulation, pension regulation, money laundering, privacy regulation, taxation and the economic and trade sanctions implemented by the Office of Foreign Assets Control (OFAC). OFAC maintains and enforces economic sanctions against certain foreign countries and groups and prohibits U.S. persons from engaging in certain transactions with certain persons or entities. OFAC has imposed civil penalties on persons, including insurance and reinsurance companies, arising from violations of its economic sanctions program. In addition, various forms of direct and indirect federal regulation of insurance have been proposed from time to time, including proposals for the establishment of an optional federal charter for insurance companies.

Title I of the Dodd-Frank Act established the Financial Stability Oversight Council (FSOC), which has authority to designate non-bank financial companies as systemically important financial institutions (SIFIs), thereby subjecting them to enhanced prudential standards and supervision by the Board of Governors of the Federal Reserve System (Federal Reserve). The prudential standards for non-bank SIFIs include enhanced RBC requirements, leverage limits, liquidity requirements, single counterparty exposure limits, governance requirements for risk management, stress test requirements, special debt-to-equity limits for certain companies, early remediation procedures, and recovery and resolution planning. Athene USA Corporation (Athene USA) and certain of our U.S. insurance subsidiaries may be above the initial quantitative threshold for treatment as a non-bank SIFI (total consolidated assets of $50 billion). If the FSOC were to determine that Athene USA or any of our U.S. subsidiaries is a non-bank SIFI, such entity would become subject to certain of these enhanced prudential standards.

The Dodd-Frank Act, which effected the most far-reaching overhaul of financial regulation in the U.S. in decades, established the Federal Insurance Office within the U.S. Department of the Treasury (Treasury Department). While currently not having a general supervisory or regulatory authority over the business of insurance, the Director of the Federal Insurance Office performs various functions with respect to insurance, including serving as a non-voting member of the FSOC and making recommendations to the FSOC regarding non-bank financial companies to be designated as SIFIs. The Federal Insurance Office has been charged with providing reports to the U.S. Congress on (1) the global reinsurance market (provided in January 2015), (2) modernization of U.S. insurance regulation and possible federal involvement in supervision of insurance group holding companies (provided in December 2013) and (3) state regulators' ability to access reinsurance information (provided in November 2013). Such reports could ultimately lead to changes in the regulation of insurers and reinsurers in the United States, including insurance group holding companies.

The Dodd-Frank Act also authorizes the Federal Insurance Office to assist the Secretary of the Treasury Department in negotiating covered agreements. A covered agreement is an agreement between the United States and one or more foreign governments, authorities or regulatory entities, regarding prudential measures with respect to insurance or reinsurance. The Federal Insurance Office is further charged with determining, in accordance with the procedures and standards established under the Dodd-Frank Act, whether state laws are preempted by a covered agreement. Pursuant to this authority, as of January 13, 2017, the Treasury Department and the Office of the U.S. Trade Representative have negotiated a covered agreement with the European Union (Covered Agreement) to address, among other things, reinsurance collateral requirements. The Covered Agreement remains subject to the U.S. and the European Union completing their respective internal requirements and procedures necessary for the Covered Agreement to take effect with respect to each party. As such, it is uncertain when, if ever, the Covered Agreement will take effect.

Item 1. Business

FIAs

In recent years, the Securities and Exchange Commission (SEC) and state securities regulators have questioned whether FIAs, such as those sold by our U.S. insurance subsidiaries, should be treated as securities under the federal and state securities laws rather than as insurance products exempted from such laws. On December 17, 2008, the SEC voted to approve Rule 151A, and apply federal securities oversight to FIAs issued on or after January 12, 2011. Under the Dodd-Frank Act, annuities that meet specific requirements are specifically exempted from being treated as securities by the SEC. We expect that the types of FIAs our U.S. insurance subsidiaries sell will meet applicable requirements for exemption from treatment as securities and therefore will remain exempt from being treated as securities by the SEC and state securities regulators. However, there can be no assurance that federal or state securities laws or state insurance laws and regulations will not be amended or interpreted to impose further requirements on FIAs. Treatment of these products as securities would require additional registration and licensing of these products and the agents selling them, as well as cause our U.S. insurance subsidiaries to seek new or additional marketing relationships for these products, any of which may impose significant restrictions on their ability to conduct business as currently operated. On July 12, 2010, the District of Columbia Circuit Court of Appeals vacated Rule 151A.

Unclaimed Property Laws

Each of our U.S. insurance subsidiaries is subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of abandoned or unclaimed money or property. State treasurers, controllers and revenue departments have been scrutinizing escheatment practices of life insurance companies with regard to unclaimed life insurance and annuity death benefits. As with state insurance regulators, state revenue authorities have been looking at how life insurance companies handle unreported deaths, maturity of life insurance and annuity contracts, and contracts that have exceeded limiting age to determine if the companies are appropriately determining when death benefits or other payments under the contracts should be treated as unclaimed property. State treasurers, controllers and revenue departments have audited life insurance companies, required escheatments and imposed interest penalties on amounts escheated for failure to escheat death benefits or other contract benefits when beneficiaries could not be found at the expiration of statutory dormancy periods.

Regulation of OTC Derivatives

We use derivatives to mitigate a wide range of risks in connection with our businesses, including options purchased to hedge the derivatives embedded in the FIAs that we have issued, and swaps, futures and/or options may be used to manage the impact of increased benefit exposures from our annuity products that offer guaranteed benefits. Title VII of the Dodd-Frank Act creates a comprehensive framework for the federal oversight and regulation of the OTC derivatives market and entities, such as us, that participate in the market and requires U.S. regulators to promulgate rules and regulations implementing its provisions. Regulations have been finalized and implemented in many areas and are being finalized for implementation in others.

The Dodd-Frank Act divides the regulatory responsibility for swaps in the United States between the SEC and the Commodity Futures Trading Commission (CFTC). The CFTC regulates swaps and swap entities, and the SEC regulates security-based swaps and security based swap entities. The CFTC and the SEC have jointly finalized certain regulations under the Dodd-Frank Act, including critical rulemakings on the definitions of “swap,” “security-based swap,” “swap dealer,” “security-based swap dealer,” “major swap participant” and “major security-based swap participant.” In addition, the CFTC has substantially finalized its required rulemaking under the Dodd-Frank Act, including regulations relating to the registration and regulation of swap dealers, major swap participants and swap execution facilities, reporting, recordkeeping, mandatory clearing and mandatory on-facility trade execution. The SEC has yet to implement its regulatory regime for security-based swaps and market participants transacting in security-based swaps, including security-based swap dealers and major security-based swap participants subject to the SEC’s oversight. As a result of this bifurcation and the different pace at which the agencies have promulgated and implemented regulations, different transactions are subject to different levels of regulation.

The Dodd-Frank Act and the CFTC rules thereunder require us, in connection with certain swap transactions, to comply with mandatory clearing and on-facility trade execution requirements, and it is anticipated that the types of swaps subject to these requirements will be expanded over time. In addition, new regulations require us to comply with mandatory minimum margin requirements for uncleared swaps and, in some instances, uncleared security-based swaps. Uncleared swap variation margin regulations issued by U.S. bank prudential regulators, the CFTC and regulators in certain other jurisdictions, such as the European Union and Canada, are scheduled to take effect on March 1, 2017. These regulations require market participants to enter into agreements consistent with the requirements thereunder and a failure to do so could result in trading disruptions. Derivative clearing requirements and mandatory margin requirements could increase the cost of our risk mitigation and could have other implications. For example, increased margin requirements, combined with netting restrictions and restrictions on securities that qualify as eligible collateral, could reduce our liquidity and require increased holdings of cash and highly liquid securities with lower yields causing a reduction in income. In addition, the requirement that certain trades be centrally cleared through clearinghouses subjects us to documentation that is significantly more counterparty-favorable and may entitle counterparties to unilaterally change such terms as trading limits and the amount of margin required. The ability of any such counterparty to take such actions could create trading disruptions and liquidity concerns. Finally, the requirement that certain trades be centrally cleared through clearinghouses concentrates counterparty risk in both clearinghouses and clearing members. The failure of a clearinghouse could have a significant impact on the financial system. Even if a clearinghouse does not fail, large losses could force significant capital calls on clearinghouse members during a financial crisis, which could lead clearinghouse members to default. Because clearinghouses are still developing and the related bankruptcy process is untested, it is difficult to anticipate or identify all actual risks related to the default of a clearinghouse.

Item 1. Business

The Dodd-Frank Act and new regulations thereunder and similar regulations issued by non-U.S. jurisdictions that may indirectly apply to us could significantly increase the cost of derivative contracts, reduce the availability of derivatives to protect against risks we encounter, reduce our ability to monetize or restructure our existing derivative contracts, and increase our credit risk exposure. If we reduce our use of derivatives as a result of the Dodd-Frank Act and the regulations thereunder and other similar regulations, our results of operations may become more volatile and our cash flows may be less predictable which could adversely affect our financial performance. Additionally, we have always been subject to the risk that hedging and other management procedures might prove ineffective in reducing the risks to which insurance policies expose us or that unanticipated policyholder behavior or mortality, combined with adverse market events, could produce economic losses beyond the scope of the risk management techniques employed. Any such losses could be increased by the increased cost of entering into derivatives and the reduced availability of customized derivatives that might result from the implementation of the Dodd-Frank Act.

Notwithstanding the foregoing, the future of Title VII of the Dodd-Frank Act and the related regulations implemented by the CFTC and the SEC and their impact on us remain uncertain and unpredictable, particularly in light of actions taken by the Trump administration. On February 3, 2017, President Trump signed an Executive Order that establishes core principles for regulating the U.S. financial system and provides a framework for comprehensive change to current financial regulation, and on February 24, 2017, President Trump also signed an Executive Order that requires federal agencies to designate a “Regulatory Reform Officer” and a “Regulatory Reform Task Force” to evaluate existing regulations and make recommendations to repeal, replace or modify regulations that, among others, inhibit job creation, are ineffective or impose costs that exceed benefits. At this point it is difficult to predict the impact of these Executive Orders on Title VII of the Dodd-Frank Act, derivatives regulatory schemes in other jurisdictions and our derivatives activities.

Consumer Protection Laws and Privacy and Data Security Regulation

Numerous other federal and state laws also affect Athene’s earnings and activities, including federal and state consumer protection laws. As part of the Dodd-Frank Act, Congress established the Consumer Financial Protection Bureau (CFPB) to supervise and regulate institutions that provide certain financial products and services to consumers. Although the consumer financial services subject to the CFPB’s jurisdiction generally exclude insurance business of the kind in which our U.S. insurance subsidiaries engage, the CFPB does have authority to regulate non-insurance consumer services which are offered by issuers of securities in our U.S. insurance subsidiaries’ investment portfolio.

Federal and state laws and regulations require financial institutions, including insurers, to protect the security and confidentiality of nonpublic personal information, including certain health-related and customer information, and to notify customers and other individuals about their policies and practices relating to their collection and disclosure of health-related and customer information and their practices relating to protecting the security and confidentiality of that information. State laws regulate use and disclosure of Social Security numbers and federal and state laws require notice to affected individuals, law enforcement, regulators and others if there is a breach of the security of certain nonpublic personal information, including Social Security numbers. In addition, state laws and regulations restrict the disclosure of the medical record and health status information obtained by insurers.

Federal and state lawmakers and regulatory bodies may be expected to consider additional or more detailed regulation regarding these subjects and the privacy and security of nonpublic personal information. Furthermore, the issues surrounding data security and the safeguarding of consumers’ protected information are under increasing regulatory scrutiny by state and federal regulators, particularly in light of the number and severity of recent U.S. companies’ data breaches. The Federal Trade Commission, the Federal Bureau of Investigation, the Federal Communications Commission, the NYSDFS and the NAIC have undertaken various studies, reports and actions regarding data security for entities under their respective supervision. Some states have recently enacted new insurance laws that require certain regulated entities to implement and maintain comprehensive information security programs to safeguard the personal information of insureds and enrollees.

The NAIC recently instituted a 50-state market conduct examination of multiple insurers that were the subject of separate data breaches. The NAIC also has created a Cybersecurity Task Force to look into various data security issues. In June 2015, the NAIC adopted a guidance document that sets forth twelve principles for effective insurance regulation of cybersecurity risks based on similar regulatory guidance adopted by the Securities Industry and Financial Markets Association. In December 2015, the NAIC adopted the “Roadmap for Cybersecurity Consumer Protections”, which describes the protections to which the NAIC believes consumers should be entitled from their insurance companies, agents and other businesses concerning the collection and maintenance of consumers’ personal information, as well as what consumers should expect when such information has been involved in a data breach. In March 2016, the NAIC’s Cybersecurity Task Force exposed for public comment a draft of a new model law addressing cybersecurity, which is intended to establish the exclusive standards for data security and breaches applicable to insurance licensees in states adopting such law. After receiving input from industry groups and regulators, a second draft of the model law was published for comment. If adopted in its current form, upon the occurrence of a data breach, the model law could subject us to two separate and different data breach legal frameworks, depending on the state in which the breach is deemed to have occurred, as many states have pre-existing and broadly applicable privacy laws and regulations presently in effect. We cannot predict the effect or the compliance costs if state and federal regulators pursue investigations and increase the regulatory requirements for the security of protected information.

In addition to the NAIC’s proposed model law, state lawmakers and regulatory bodies may consider additional or more detailed regulation regarding these subjects and the privacy and security of nonpublic personal information. The NYSDFS recently published a new regulation entitled Cybersecurity Requirements for Financial Services Companies (23 NYCRR 500), which became effective on March 1, 2017, with ongoing compliance deadlines over the next 24 months. We are in the process of updating processes and procedures to comply with the new requirements. We cannot predict the effect or the amount of compliance costs that will be incurred if state and federal regulators pursue investigations and increase the regulatory requirements for the security of protected information.

Item 1. Business

Further, the Gramm-Leach-Bliley Act of 1999, which implemented fundamental changes in the regulation of the financial services industry in the United States, includes privacy requirements for financial institutions, including obligations to protect and safeguard consumers' nonpublic personal information and records, and limitations on the re-disclosure and re-use of such information.

Finally, our investment in a limited partnership which is in the business of originating RML, as well as our direct investment in any residential or other mortgage loans, may expose us to various environmental and other regulation. For example, to the extent that we hold whole mortgage loans as part of our investment portfolio, we may be responsible for certain tax payments or subject to liabilities under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980. Additionally, we may be subject to regulation by the CFPB as a mortgage holder or property owner. We are currently unable to predict the impact of such regulation on our business.

Broker-dealers

Our securities operations, principally conducted by our limited purpose SEC-registered broker-dealer, Athene Securities, LLC, are subject to federal and state securities and related laws, and are regulated principally by the SEC, state securities authorities and FINRA. Athene Securities, LLC does not hold customer funds or safekeep customer securities or otherwise engage in any securities transactions. Athene Securities, LLC was the principal underwriter of a block of variable annuity contracts which has been closed to new investors since 2002. The closed block of variable annuity contracts was issued by a predecessor of AAIA. Athene Securities, LLC continues to receive concessions on those variable annuity contracts. Athene Securities, LLC also provides supervisory oversight to Athene employees who are registered representatives.

Employees or personnel registered with Athene Securities, LLC are subject to the Securities Exchange Act of 1934, as amended (Exchange Act) and to regulation and examination by the SEC, FINRA and state securities commissioners. The SEC and other governmental agencies and self-regulatory organizations, as well as state securities commissions in the United States, have the power to conduct administrative proceedings that can result in censure, fines, cease-and-desist orders or suspension, termination or limitation of the activities of the regulated entity or its employees.

As a registered broker-dealer and member of various self-regulatory organizations, Athene Securities, LLC is subject to the SEC's net capital rule, which specifies the minimum level of net capital a broker-dealer is required to maintain and requires a minimum part of its assets to be kept in relatively liquid form. These net capital requirements are designed to measure the financial soundness and liquidity of broker-dealers. The net capital rule imposes certain requirements that may have the effect of preventing a broker-dealer from distributing or withdrawing capital and may require that prior notice to the regulators be provided prior to making capital withdrawals. Compliance with net capital requirements could limit operations that require the intensive use of capital, such as trading activities and underwriting, and may limit the ability of our broker-dealer subsidiaries to pay dividends to us.

ERISA

We also may be subject to regulation by the DOL when providing a variety of products and services to employee benefit plans governed by ERISA. ERISA is a comprehensive federal statute that applies to U.S. employee benefit plans sponsored by private employers and labor unions. Plans subject to ERISA include pension and profit sharing plans and welfare plans, including health, life and disability plans. Among other things, ERISA imposes reporting and disclosure obligations, prescribes standards of conduct that apply to plan fiduciaries and prohibits transactions known as "prohibited transactions," such as conflict-of-interest transactions, self-dealing and certain transactions between a benefit plan and a "party in interest." ERISA also provides for a scheme of civil and criminal penalties and enforcement. Our insurance businesses provide services to employee benefit plans subject to ERISA. We are also subject to ERISA's prohibited transaction rules for transactions with ERISA plans, which may affect our ability to, or the terms upon which we may, enter into transactions with those plans, even in businesses unrelated to those giving rise to "party in interest" status. The applicable provisions of ERISA and the U.S. Internal Revenue Code of 1986, as amended (Internal Revenue Code) are subject to enforcement by the DOL, the Internal Revenue Service (IRS) and the U.S. Pension Benefit Guaranty Corporation. Severe penalties are imposed for breach of duties under ERISA.

On April 6, 2016, the DOL issued a new regulation more broadly defining the circumstances under which a person is considered to be a fiduciary by reason of giving investment advice or recommendations to an employee benefit plan or a plan's participants or to individual retirement account (IRA) holders. In addition to releasing the investment advice regulation, the DOL: (1) issued a new prohibited transaction class exemption referred to as the "Best Interest Contract Exemption" (BICE), to be used in connection with the sale of FIAs or variable annuities, and (2) updated the previous prohibited transaction class exemption 84-24, to be used in connection with the sale of traditional fixed rate annuities. To satisfy the requirements under the BICE, a "Financial Institution" (defined under the exemption as a registered investment adviser, bank, registered broker-dealer, or insurance company) must, among other things, accept fiduciary responsibility for the recommendations of the producer and, in the case of a retirement investor that is an IRA, enter into a contract with the IRA. To assist in understanding the regulation, the DOL, on October 27, 2016, issued its first in a series of frequently asked questions followed by its second series on January 13, 2017, responding to questions submitted by various retirement market participants impacted by the regulation. The frequently asked questions, among other things, clarified that an insurance-only licensed producer can meet the best interest requirements even though he or she is limited to selling insurance products. In addition, the DOL clarified that an insurance carrier that acts as a Financial Institution will only act as such with respect to the sale of that insurance carrier's products. The DOL issued the Proposed Best Interest Contract Exemption for Insurance Intermediaries on January 19, 2017, in an attempt to provide a separate exemption for IMOs to act as Financial Institutions for the sale of insurance products. The proposed rule sets forth various requirements, including a minimum annual premium volume requirement and reserve or errors and omissions coverage requirements, limiting the availability of the exemption to only very large IMOs in the industry. The rule was subject to a comment period that ended on February 21, 2017.

Item 1. Business

On February 3, 2017, the President of the United States issued an executive memorandum directing the DOL to examine the fiduciary rule to determine whether the fiduciary rule has harmed or is likely to cause harm to investors by limiting access to certain retirement products or related financial advice, whether the fiduciary rule has resulted in dislocations in the retirement services industry that may adversely affect investors or retirees, or whether the fiduciary rule is likely to cause increased litigation and increased costs for investors and retirees. In direct response to the memorandum, the acting secretary of the DOL stated that the DOL will consider its legal options to delay the applicability date of the rule in order to comply with the memorandum. The DOL has published a proposed amendment to the fiduciary rule that will delay the applicability date for 60 days to allow the DOL to fully review the rule in light of the executive memorandum. The DOL has provided a 15-day comment period to respond to the proposed delay and it is anticipated it will issue the final rule officially delaying the applicability date in late March. In addition to the 15-day comment period for the delay itself, the DOL has opened a 45-day comment period to collect responses to the questions raised in the executive memorandum. We anticipate a delay, with a possible replacement of the rule that is less burdensome but still requires sales to be in the best interest of clients. However, until the rule is officially delayed, we continue to move forward in preparation for the April 10, 2017 applicability date.

While there remains significant uncertainty regarding our distributors' response to the DOL's regulation and our distributors' ability to meet the requirement of the BICE, we believe many of our producers have a path to an entity capable of being a Financial Institution because the IMOs with which they are affiliated have a broker-dealer or registered investment adviser or because such producers are otherwise a registered representative of a broker-dealer that could sign the contract required by the BICE. In June 2016 we undertook a review of our producer relationships and estimated that approximately 84% of our retail sales of FIAs are through producers with a path to a Financial Institution under the regulation. While we cannot confirm this figure with certainty, we have used this assumption in preparing for implementation of the regulation. The following table summarizes the percentages of our new deposits for the year ended December 31, 2016, by various categories we believe are relevant to understanding the impact of the DOL regulation on our business.

Reinsured Qualified Deposits	Reinsured Non-Qualified Deposits	Retail Non-Qualified Deposits	Retail MYGA Qualified Deposits (84-24)	Retail FIA Qualified Deposits
15%	24%	20%	4%	37%
Rule does not apply to reinsurers directly but may affect cedants' volumes and risks	Rule does not apply to non-qualified sales	Rule does not apply to non-qualified sales	Sales must satisfy 84-24 exemption	Sales must satisfy BICE exemption; estimated that 84% of such sales (or 31% of total deposits) have a path to a Financial Institution

Given the uncertainty surrounding our distributors' response to the DOL regulation, we are preparing to act as the Financial Institution for sales of our FIAs, subject to various conditions and qualifications, for a transitional period, during which our current distributors do not have access or the ability to be a Financial Institution with respect to sales of FIAs. In the event that we must serve as the Financial Institution, we expect to adjust the compensation paid to producers on the sales of our FIAs to compensate us for various compliance costs incurred in acting as the Financial Institution, as well as for the additional risk associated with such fiduciary sales.

We cannot predict with any certainty the impact of the regulation and exemptions, but the regulation and exemptions could alter the way our products and services are marketed and sold, particularly to purchasers of IRAs and individual retirement annuities. If implemented in its current form, the DOL regulation could have an adverse effect on our ability to write new business.

The SEC also has indicated that it may propose rules creating a uniform standard of conduct applicable to broker-dealers and investment advisers, which, if adopted, may affect the distribution of our products. Should the SEC rules, if adopted, not align with the finalized DOL regulations related to conflicts of interest in the provision of investment advice, the distribution of our products could be further complicated. The DOL has also issued a number of regulations recently, and may issue similar additional regulations, that increase the level of disclosure that must be provided to plan sponsors and participants. These ERISA disclosure requirements will likely increase the regulatory and compliance burden on us, resulting in increased costs.

Bermuda

General

The Bermuda Insurance Act regulates the insurance business of ALRe, and provides that no person may carry on any insurance business in or from within Bermuda unless registered as an insurer under the Bermuda Insurance Act by the BMA. The BMA is required by the Bermuda Insurance Act to determine whether the applicant is a fit and proper body to be engaged in the insurance business and, in particular, whether it has, or has available to it, adequate knowledge and expertise to operate an insurance business. See also *Fit and Proper Controllers* below.

The continued registration of an insurer is subject to the insurer complying with the terms of its registration and such other conditions as the BMA may impose from time to time. The Bermuda Insurance Act also grants to the BMA powers to supervise, investigate and intervene in the affairs of insurance companies.

The Bermuda Insurance Act imposes on Bermuda insurance companies solvency standards as well as auditing and reporting requirements. Certain significant aspects of the Bermuda insurance regulatory framework are set forth below.

Classification of Insurers

The Bermuda Insurance Act distinguishes between insurers carrying on long-term business, insurers carrying on special purpose business and insurers carrying on general business. Long-term business is generally defined as life, annuity and accident and health insurance, while general business broadly includes all types of insurance that are not long-term business (property and casualty business). Special purpose business is fully funded insurance business approved by the BMA to be written by a company registered as a Special Purpose Insurer. There are five classifications of insurers carrying on long-term business, ranging from Class A insurers (pure captives) to Class E insurers (larger commercial carriers). Class A insurers are subject to the lightest regulation and Class E insurers are subject to the strictest regulation.

ALRe, which is incorporated to carry on long-term business, is registered as a Class E insurer which is the license class for long-term insurers and reinsurers with total assets of more than $500 million that are not registrable as a single-parent or multi-owner long-term captive insurer or reinsurer. ALRe is not licensed to carry on general business and has not sought authorization as a reinsurer or approval as an accredited reinsurer in any state or jurisdiction of the United States. Consequently, in order for its ceding companies to receive statutory reserve or RBC credit for the reinsurance provided by ALRe, ALRe typically structures its reinsurance transactions in one of three ways: (1) coinsurance, where ALRe’s liabilities to ceding companies in connection with reinsurance transactions are secured by assets held in trust for the benefit of the applicable ceding company, (2) funds withheld, where, although ALRe recognizes an insurance reserve liability, the assets to secure such liabilities are held and maintained by the applicable ceding company, or (3) modco, where both the insurance reserves and assets supporting the reserves are retained by the applicable ceding company.

Cancellation of Insurer’s Registration

The BMA could revoke or suspend ALRe’s license in circumstances in which (1) it is shown that false, misleading or inaccurate information has been supplied to the BMA by ALRe or on its behalf for the purposes of any provision of the Bermuda Insurance Act, (2) ALRe has ceased to carry on business, (3) ALRe has persistently failed to pay fees due under the Bermuda Insurance Act, (4) ALRe has been shown to have not complied with a condition attached to its registration or with a requirement made of it under the Bermuda Insurance Act, (5) ALRe is convicted of an offense against a provision of the Bermuda Insurance Act or (6) ALRe is, in the opinion of the BMA, found not to have been carrying on business in accordance with sound insurance principles.

Head Office and Principal Representative

An insurer is required to establish and maintain its head and principal office in Bermuda, which requires certain officers and a director to reside in Bermuda, and to appoint and maintain a principal representative in Bermuda. For the purpose of the Bermuda Insurance Act, the ALRe principal representative is Zachary Jones and his principal office for these purposes is AHL’s Bermuda office. It is the duty of the principal representative to forthwith notify the BMA where the principal representative believes there is a likelihood of the insurer becoming insolvent or that a reportable “event” has, to the principal representative’s knowledge, occurred or is believed to have occurred. Examples of such a reportable “event” include failure by the insurer to comply substantially with a condition imposed upon the insurer by the BMA relating to a solvency margin or other ratio or a significant loss which is likely to cause the insurer to fail to comply with its Enhanced Capital Requirement (ECR), as discussed below.

Public Disclosure

The Bermuda Insurance Act provides the BMA with powers to set standards on public disclosure. Using this power, the BMA requires all commercial insurers and insurance groups to prepare and publish a Financial Condition Report on their website. According to the BMA’s guiding principles on public disclosure, an obligation to disclose exists only if it would not compromise competitive advantage and confidentiality. The BMA has discretion in granting exemptions.

Independent Approved Auditor

Insurers must appoint an independent auditor who will annually audit and report on the insurer’s financial statements (Bermuda Financial Statements) prepared under GAAP or International Financial Reporting Standards (IFRS) and statutory financial returns, each of which are required to be filed annually with the BMA. The auditor must be approved by the BMA as the independent auditor of the insurer.

Approved Actuary

Long-term insurers must appoint an actuary approved by the BMA. In order to be approved, the actuary must be a member in good standing of either the Canadian Institute of Actuaries, the Casualty Actuarial Society, the Institute of Actuaries of Australia, the Institute and Faculty of Actuaries (for the United Kingdom (UK)), the Society of Actuaries, the American Academy of Actuaries or a member of an actuarial body recognized by the BMA. Additionally, the actuary must be qualified to provide an opinion in accordance with the requirements of the Bermuda Insurance Act.

Item 1. Business

A Class E insurer is required to submit annually an opinion of its approved actuary with its capital and solvency return. The approved actuary's opinion must state, among other things, whether or not the aggregate amount of technical provisions shown in the statutory economic balance sheet as of the end of the relevant financial year meets the requirements of the Bermuda Insurance Act and makes reasonable provision for the total technical provisions of the insurer under the terms of its insurance contracts and agreements.

Non-insurance Business

Pursuant to an amendment to the Bermuda Insurance Act, after a grandfathered period ending on December 31, 2016, as a Class E insurer, ALRe will not be permitted to engage in non-insurance business unless that non-insurance business is ancillary to its core business. Non-insurance business means any business other than insurance business and includes carrying on investment business, managing an investment fund as operator, carrying on business as a fund administrator, carrying on banking business, underwriting debt or securities or otherwise engaging in investment banking, engaging in commercial or industrial activities and carrying on the business of management, sales or leasing of real property.

Annual Financial Statements, Annual Statutory Financial Return and Annual Capital and Solvency Return

Class E insurers must file annual Bermuda Financial Statements and statutory financial returns within four months of the end of each fiscal year. The Bermuda Insurance Act prescribes rules for the preparation and substance of statutory financial returns (which include, in statutory form, an insurer information sheet, an auditor's report, a balance sheet, income statement, a statement of capital and surplus and notes thereto). The statutory financial returns include detailed information and analysis regarding premiums, claims, reinsurance and investments of the insurer.

A Class E insurer is required to file with the BMA its Bermuda Financial Statements and a statutory financial return no later than four months after its financial year end (unless specifically extended). The statutory financial return includes, among other matters, a report of the approved independent auditor on the statutory financial returns of the insurer.

In addition, each year a Class E insurer is required to file with the BMA a capital and solvency return along with its annual statutory financial return. The prescribed form of capital and solvency return comprises the insurer's BSCR model or an approved internal capital model in lieu thereof, a schedule of fixed income and equity investments by BSCR rating, a schedule of funds held by ceding reinsurers in segregated accounts/trusts by BSCR rating, a schedule of long-term premiums written by line of business, a schedule of risk management, a schedule of fixed income securities, a schedule of long-term business data, a schedule of long-term variable annuity guarantees data and reconciliation, a schedule of long-term variable annuity guarantees - internal capital model, a schedule of eligible capital, a schedule of commercial insurer's solvency self-assessment (CISSA), a statutory economic balance sheet, the approved actuary's opinion, a schedule of particulars of ceded reinsurance, a schedule of cash and cash equivalents counterparty analysis, a schedule of currency risk, a schedule of concentration risk and a schedule of anti-money laundering assessment.

Neither the statutory financial return nor the capital and solvency return is available for public inspection.

Minimum Margin of Solvency (MMS), ECR and Restrictions on Dividends and Distributions

Class E insurers must at all times maintain an MMS and an ECR in accordance with the provisions of the Bermuda Insurance Act. Each year the insurer is required to file with the BMA a capital and solvency return within four months of its relevant financial year end (unless specifically extended). The Bermuda Insurance Act mandates certain actions and filings with the BMA if an insurer fails to meet and/or maintain its ECR or MMS including the filing of a written report detailing the circumstances giving rise to the failure and the manner and time within which the insurer intends to rectify the failure.

An insurer is prohibited from declaring or paying a dividend if in breach of its ECR or MMS or if the declaration or payment of such dividend would cause such a breach. Where an insurer fails to meet its MMS on the last day of any financial year, it is prohibited from declaring or paying any dividends during the next financial year without the approval of the BMA. Under the Bermuda Insurance Act, ALRe is prohibited from paying a dividend in an amount exceeding 25% of the prior year's total statutory capital and surplus, unless at least two members of ALRe's board of directors and its principal representative sign and submit to the BMA an affidavit attesting that a dividend in excess of this amount would not cause ALRe to fail to meet its relevant margins. In certain instances, ALRe would also be required to provide prior notice to the BMA in advance of the payment of dividends. In the event that such an affidavit is submitted to the BMA in accordance with the Bermuda Insurance Act, and further subject to ALRe meeting its MMS and ECR, ALRe is permitted to distribute up to the sum of 100% of statutory surplus and an amount less than 15% of its total statutory capital. Distributions in excess of this amount require the approval of the BMA. Further, ALRe must obtain the BMA's prior approval before reducing its total statutory capital as shown in its previous financial year statutory balance sheet by 15% or more. ALRe is also required to obtain a certification from its approved actuary prior to declaring or paying any dividends and such certificate will not be given unless the value of its long-term business assets exceeds its long-term business liabilities, as certified by its approved actuary, by the amount of the dividend and at least the MMS. These restrictions on declaring or paying dividends and distributions under the Bermuda Insurance Act are in addition to those under Bermuda's Companies Act 1981 (the Companies Act) which apply to all Bermuda companies.

Item 1. Business

At the time of filing its statutory financial statements, a Class E insurer is also required to deliver to the BMA a declaration of compliance, in such form and with such content as may be prescribed by the BMA, declaring whether or not the Class E insurer has, with respect to the preceding financial year (1) complied with all requirements of the minimum criteria applicable to it; (2) complied with the MMS as at its financial year end; (3) complied with the applicable enhanced capital requirements as at its financial year end; and (4) complied with applicable conditions, directions and restrictions imposed on, or approvals granted to, the Class E insurer. The declaration of compliance is required to be signed by two directors of the Class E insurer and if the Class E insurer has failed to comply with any of the requirements referenced in (1) through (4) above or observe any limitations, restrictions or conditions imposed upon the issuance of its license, if applicable, the Class E insurer will be required to provide the BMA with particulars of such failure in writing. A Class E insurer shall be liable to civil penalty by way of a fine for failure to comply with a duty imposed on it in connection with the delivery of the declaration of compliance.

The MMS that a Class E insurer is required to maintain with respect to its long-term business is the greater of (1) $8 million, (2) 2% of the first $500 million of assets plus 1.5% of assets above $500 million (assets for this purpose are defined as the total assets reported in the insurer’s statutory balance sheet on Line 15, Column C in the relevant year less the aggregate of the amounts held in a segregated account reported on Lines 13(b) and (c) Column C) or (3) 25% of the ECR as reported at the end of the relevant year. We are well above each of these MMS requirements.

The BMA has embedded an economic balance sheet (EBS) framework as part of the Capital and Solvency Return that forms the basis for an insurer’s ECR. The premise underlying the EBS framework is the idea that assets and liabilities should be valued on a consistent economic basis. Under the Bermuda Regulatory Framework there are two solvency calculations: (1) a Class E Insurer must have total statutory capital and surplus as reported on the insurer’s statutory balance sheet greater than the MMS calculated pursuant to the Insurance Account Rules 2016; and (2) under the Insurance (Prudential Standards) (Class C, Class D and Class E Solvency Requirement) Rules 2011 an insurer is required to maintain available statutory economic capital and surplus to an amount that is equal to or exceeds the value of its ECR. Effective January 1, 2016, the method for preparing these statutory financial statements was amended, and in addition, the requirements and rules for preparing the Class E statutory EBS became effective. Prior to January 1, 2016, a Class E insurer's ECR and its total statutory capital and surplus were calculated using the company's statutory balance sheet. Following January 1, 2016, a Class E insurer's ECR and total statutory economic capital and surplus is calculated using the Class E statutory EBS.

A Class E insurer is required to maintain available statutory capital and surplus at a level equal to or in excess of its ECR which is established by reference to the Class E BSCR model. The BSCR model provides a method for determining an insurer’s capital requirements (statutory capital and surplus) by taking into account the risk characteristics of different aspects of the insurer’s business. The BSCR formula establishes capital requirements for fourteen categories of risk: fixed income investment risk, equity investment risk, long-term interest rate/liquidity risk, currency risk, concentration risk, credit risk, operational risk and seven categories of long-term insurance risk. For each category, the capital requirement is determined by applying factors to asset, premium, reserve, creditor, probable maximum loss and operation items, with higher factors applied to items with greater underlying risk and lower factors for less risky items.

As of December 31, 2016, ALRe’s EBS capital and surplus, measured under the new regime in place after January 1, 2016, resulted in a BSCR ratio of 228%. ALRe’s total statutory capital and surplus as of December 31, 2015, measured under the regime in place prior to January 1, 2016, was 323% of its ECR.

While not specifically referred to in the Bermuda Insurance Act, target capital level (TCL) is also an important threshold for statutory capital and surplus. TCL is equal to 120% of ECR as calculated pursuant to the BSCR formula. TCL serves as an early warning tool for the BMA. If an insurer fails to maintain statutory capital at least equal to its TCL, such failure will likely result in increased regulatory oversight by the BMA. A Class E insurer which at any time fails to meet its applicable ECR shall, upon becoming aware of such failure or upon having reason to believe that such a failure has occurred, immediately notify the BMA in writing. Within 14 days of such notification, such Class E insurer shall file with the BMA a written report containing details of the circumstances leading to the failure and a plan detailing the specific actions to be taken to rectify the failure, and the time within which the Class E insurer intends to rectify the failure. Within 45 days of becoming aware of such failure, or of having reason to believe that such a failure has occurred, such Class E insurer shall furnish the BMA with (1) unaudited statutory economic balance sheets and unaudited interim statutory financial statements prepared in accordance with GAAP covering such period as the BMA may require; (2) an opinion of the approved actuary in relation to total long-term business insurance technical provisions as set out in the statutory economic balance sheet, where applicable; (3) a long-term business solvency certificate in respect of the financial statements; and (4) a capital and solvency return reflecting an ECR prepared using post-failure data where applicable.

All Bermuda companies must comply with the provisions of the Companies Act regulating the payment of dividends and making distributions from contributed surplus. A company may not declare or pay a dividend, or make a distribution out of contributed surplus, if there are reasonable grounds for believing that: (1) the company is, or would after the payment be, unable to pay its liabilities as they become due, or (2) the realizable value of the company’s assets would thereby be less than its liabilities.

Eligible Capital

To enable the BMA to better assess the quality of the insurer’s capital resources, a Class E insurer is required to disclose the makeup of its capital in accordance with the recently introduced ‘3-tiered capital system.’ Under this system, all of the insurer’s capital instruments will be classified as either basic or ancillary capital which in turn will be classified into one of three tiers based on their “loss absorbency” characteristics. Highest quality capital will be classified as Tier 1 Capital, lesser quality capital will be classified as either Tier 2 Capital or Tier 3 Capital. Under this regime, up to certain specified percentages of Tier 1, Tier 2 and Tier 3 Capital may be used to support the insurer’s MMS,

Item 1. Business

ECR and TCL. The Bermuda Insurance Act requires that Class E insurers have Tier 1 Capital equal to or greater than 50% of the value of its ECR and Tier 3 Capital of not more than 17.65% of the aggregate of its Tier 1 Capital and Tier 2 Capital.

The characteristics of the capital instruments that must be satisfied to qualify as Tier 1, Tier 2 and Tier 3 Capital are set out in the Insurance (Eligible Capital) Rules 2012, and any amendments thereto. Under these rules, Tier 1, Tier 2 and Tier 3 Capital may, until January 1, 2024, include capital instruments that do not satisfy the requirement that the instrument be non-redeemable or settled only with the issuance of an instrument of equal or higher quality upon a breach, or that the coupon payment on the instrument be cancellable or deferrable indefinitely, upon breach, or if it would cause a breach, of the ECR.

Where the BMA has previously approved the use of certain instruments for capital purposes, the BMA's consent will need to be obtained if such instruments are to remain eligible for use in satisfying the MMS and the ECR. We do not currently use any such instruments.

Code of Conduct

Every Bermuda registered insurer must comply with the Insurance Code of Conduct (Code of Conduct) which prescribes the duties and standards that must be complied with to ensure sound corporate governance, risk management and internal controls are implemented. The BMA will assess an insurer's compliance with the Code of Conduct in a proportionate manner relative to the nature, scale and complexity of its business. Failure to comply with the requirements of the Code of Conduct will be taken into account by the BMA in determining whether an insurer is conducting its business in a sound and prudent manner as prescribed by the Bermuda Insurance Act and may result in the BMA exercising its powers of intervention and investigation (see below) and, in the case of ALRe, as a Class E insurer, will be a factor in calculating the operational risk charge under the insurer's BSCR or approved internal model.

Fit and Proper Controllers

The BMA maintains supervision over the "controllers" of all registered insurers in Bermuda. For these purposes, a "controller" includes (1) the managing director of the registered insurer or its parent company, (2) the chief executive of the registered insurer or of its parent company, (3) a shareholder controller, and (4) any person in accordance with whose directions or instructions the directors of the registered insurer or its parent company are accustomed to act.

The definition of shareholder controller is set out in the Bermuda Insurance Act but generally refers to (1) a person who holds 10% or more of the shares carrying rights to vote at a shareholders' meeting of the registered insurer or its parent company, (2) a person who is entitled to exercise 10% or more of the voting power at any shareholders' meeting of such registered insurer or its parent company or (3) a person who is able to exercise significant influence over the management of the registered insurer or its parent company by virtue of its shareholding or its entitlement to exercise, or control the exercise of, the voting power at any shareholders' meeting.

Based on the shares as described above, shareholder controller ownership is defined as follows:

Actual Shareholder Controller Ownership	Defined Shareholder Controller Ownership
10% or more but less than 20%	10%
20% or more but less than 33%	20%
33% or more but less than 50%	33%
50% or more	50%

Where the shares of a registered insurer, or the shares of its parent company, are traded on a recognized stock exchange, and such shareholder becomes a 10%, 20%, 33%, or 50% shareholder controller of the insurer, that shareholder shall, within 45 days, notify the BMA in writing that such shareholder has become, or as a result of a disposition ceased to be, a controller of any such category.

Under our bye-laws, we have imposed restrictions on the ownership by holders of our Class A common shares (other than the Apollo Group) controlling more than 9.9% of the voting power associated with our common shares. The voting rights exercisable by shareholders of the Company other than the Apollo Group will be limited so that Control Groups are not deemed to hold more than 9.9% of the total voting power conferred by our shares. In addition, our board of directors retains certain discretion to make adjustments to the aggregate number of votes attaching to the shares of any person or group that they consider fair and reasonable in all the circumstances to ensure that such person or group will not hold more than 9.9% of the total voting power represented by our then outstanding shares. As such, other than the Apollo Group (at the 33% to 50% shareholder controller level), no shareholder will be considered, according to the Bermuda Insurance Act, a shareholder controller of ALRe.

Any person or entity who contravenes the Bermuda Insurance Act by failing to give notice or knowingly becoming a controller of any description before the required 45 days has elapsed is guilty of an offense under Bermuda law and liable to a fine of $25,000 on summary conviction.

The BMA may file a notice of objection to any person or entity who has become a controller of any description where it appears that such person or entity is not, or is no longer, fit and proper to be a controller of the registered insurer. Before issuing a notice of objection, the BMA is required to serve upon the person or entity concerned a preliminary written notice stating the BMA's intention to issue formal notice of

objection. Upon receipt of the preliminary written notice, the person or entity served may, within 28 days, file written representations with the BMA which shall be taken into account by the BMA in making its final determination. Any person or entity who continues to be a controller of any description after having received a notice of objection is guilty of an offense and liable on summary conviction to a fine of $25,000 (and a continuing fine of $500 per day for each day that the offense is continuing) or, if convicted on indictment, to a fine of $100,000 and/or 2 years in prison.

Notice of Change of Controllers and Officers

All registered insurers are required to give written notice to the BMA of the fact that a person has become, or ceased to be, a controller or officer of the registered insurer within 45 days of becoming aware of such fact. An officer in relation to a registered insurer means a director, chief executive or senior executive performing duties of underwriting, actuarial, risk management, compliance, internal audit, finance or investment matters.

Notification of Material Changes

All registered insurers are required to give notice to the BMA of their intention to effect a material change within the meaning of the Bermuda Insurance Act. For the purposes of the Bermuda Insurance Act, the following changes are material: (1) the transfer or acquisition of insurance business, including portfolio transfers or corporate restructurings, pursuant to a court-approved scheme of arrangement under Section 25 of the Bermuda Insurance Act or Section 99 of the Companies Act, (2) the amalgamation with or acquisition of another firm, (3) engaging in unaffiliated, third-party business that is retail business, (4) the acquisition of a controlling interest in an undertaking that is engaged in non-insurance business which offers services and products to persons who are not affiliates of the insurer, (5) outsourcing all or substantially all of the company’s actuarial, risk management and compliance or internal audit functions, (6) outsourcing all or a material part of an insurer’s underwriting activity, (7) the transfer other than by way of reinsurance of all or substantially all of a line of business, (8) the expansion into a material new line of business, (9) the sale of an insurer and (10) outsourcing of an “officer” role, as such term is defined by the Bermuda Insurance Act.

As a registered insurer, ALRe may not take any steps to give effect to such a material change unless it has first served notice on the BMA that it intends to effect such material change and before the end of 30 days, either the BMA has notified ALRe in writing that it has no objection to such change or that period has lapsed without the BMA having issued a notice of objection.

Before issuing a notice of objection, the BMA would be required to serve upon ALRe a preliminary written notice stating the BMA’s intention to issue formal notice of objection. Upon receipt of the preliminary written notice, ALRe could, within 28 days, file written representations with the BMA which the BMA would be required to take into account in making its final determination.

Supervision, Investigation and Intervention

The BMA may appoint an inspector with powers to investigate the affairs of an insurer if the BMA believes that an investigation is required in the interests of the insurer’s policyholders or potential policyholders. In order to verify or supplement information otherwise provided to the inspector, the BMA may direct an insurer to produce documents or information relating to matters connected with its business.

If it appears to the BMA that there is a risk of an insurer becoming insolvent, or that it is in breach of the Bermuda Insurance Act or any conditions imposed upon its registration, the BMA may, among other things, direct the insurer (1) not to take on any new insurance business, (2) not to vary any insurance contract if the effect would be to increase its liabilities, (3) not to make certain investments, (4) to realize certain investments, (5) to maintain or transfer to the custody of a specified bank, certain assets, (6) not to declare or pay any dividends or other distributions or to restrict the making of such payments, (7) to limit its premium income, (8) not to enter into any specified transaction with any specified persons or persons of a specified class, (9) to provide such written particulars relating to the financial circumstances of the insurer as the BMA thinks fit, (10) to obtain the opinion of an actuary loss reserve specialist and to submit it to the BMA, and (11) to remove a controller or officer.

Group Supervision

The BMA may, in respect of an insurance group, determine whether it is appropriate for it to act as its group supervisor. An insurance group is defined as a group of companies that conducts exclusively, or mainly, insurance business. The BMA may make such determination where it ascertains that (1) the group is headed by a “specified insurer” (that is to say, it is headed by either a Class 3A, Class 3B or Class 4 general business insurer or a Class C, Class D or Class E long-term insurer or another class of insurer designated by order of the BMA); or (2) where the insurance group is not headed by a “specified insurer,” where it is headed by a parent company which is incorporated in Bermuda or (3) where the parent company of the group is not a Bermuda company, in circumstances where the BMA is satisfied that the insurance group is directed and managed from Bermuda or the insurer with the largest balance sheet total is a specified insurer.

Where the BMA determines that it should act as the group supervisor, it shall designate a specified insurer that is a member of the insurance group to be the designated insurer (the “Designated Insurer”) and it shall give to the Designated Insurer and other competent authorities written notice of its intention to act as group supervisor. Once the BMA has been designated as group supervisor, the Designated Insurer must ensure that an approved group actuary is appointed to provide an opinion as to the adequacy of the insurance group’s insurance reserves as reported in its group statutory financial returns.

Pursuant to its powers under the Bermuda Insurance Act, the BMA will maintain a register of particulars for every insurance group for which it acts as the group supervisor detailing, among other things, the names and addresses of the Designated Insurer, each member company of the insurance group falling within the scope of group supervision, the principal representative of the insurance group in Bermuda, other competent authorities supervising other member companies of the insurance group, and the insurance group auditors. The Designated Insurer must notify the BMA of any changes to the above details entered on the register of an insurance group.

As group supervisor, the BMA will perform a number of supervisory functions including (1) coordinating the gathering and dissemination of information which is of importance for the supervisory task of other competent authorities, (2) carrying out a supervisory review and assessment of the insurance group, (3) carrying out an assessment of the insurance group's compliance with the rules on solvency, risk concentration, intra-group transactions and good governance procedures, (4) planning and coordinating, with other competent authorities, supervisory activities in respect of the insurance group, both as a going concern and in emergency situations, (5) coordinating any enforcement action that may need to be taken against the insurance group or any of its members and (6) planning and coordinating meetings of colleges of supervisors (consisting of insurance regulators) in order to facilitate the carrying out of the functions described above.

In carrying out its functions, the BMA may make rules for (1) assessing the financial situation and the solvency position of the insurance group and/or its members and (2) regulating intra-group transactions, risk concentration, governance procedures, risk management and regulatory reporting and disclosure.

The BMA has not yet designated any long-term life reinsurers, such as ALRe, for group supervision, accordingly, we are not currently subject to group supervision. The BMA may, however, exercise its authority to act as our group supervisor in the future.

Disclosure of Information

In addition to powers under the Bermuda Insurance Act to investigate the affairs of an insurer, the BMA may require certain information from an insurer (or certain other persons) to be produced to the BMA. Further, the BMA has been given powers to assist other regulatory authorities, including foreign insurance regulatory authorities, with their investigations involving insurance and reinsurance companies in Bermuda but subject to restrictions. For example, the BMA must be satisfied that the assistance being requested is in connection with the discharge of regulatory responsibilities of the foreign regulatory authority. Further, the BMA must consider whether cooperation is in the public interest. The grounds for disclosure are limited and the Bermuda Insurance Act provides for sanctions for breach of the statutory duty of confidentiality.

Certain Other Bermuda Law Considerations

All Bermuda "exempted companies" are exempt from certain Bermuda laws restricting the percentage of share capital that may be held by non-Bermudians. However, exempted companies may not participate in certain business transactions, including (1) the acquisition or holding of land in Bermuda except that which is required for their business and held by way of lease or tenancy for terms of not more than 50 years or, with the consent of the Bermuda Minister of Finance, land which is used to provide accommodation or recreational facilities for officers and employees for a term not exceeding 21 years, (2) the taking of mortgages on land in Bermuda to secure an amount in excess of $50,000 without the consent of the Bermuda Minister of Finance, (3) the acquisition of any bonds or debentures secured by any land in Bermuda, other than certain types of Bermuda government securities or securities issued by Bermuda public authorities or (4) the carrying on of business of any kind in Bermuda, except in furtherance of the business carried on outside Bermuda or under license granted by the Bermuda Minister of Finance. Generally it is not permitted without a special license granted by the Bermuda Minister of Finance to insure Bermuda domestic risks or risks of persons of, in or based in Bermuda.

Exchange Control

The permission of the BMA is required, pursuant to the provisions of the Exchange Control Act 1972 and related regulations, for all issuances and transfers of shares (which includes the Class A common shares) of Bermuda companies to or from a non-resident of Bermuda for exchange control purposes, other than in cases where the BMA has granted a general permission. The BMA, in its notice to the public dated June 1, 2005, has granted a general permission for the issue and subsequent transfer of any securities of a Bermuda company from and/or to a non-resident of Bermuda for exchange control purposes for so long as any "Equity Securities" of the company (which includes the Class A common shares) are listed on an "Appointed Stock Exchange" (which includes the New York Stock Exchange (NYSE)). The BMA accepts no responsibility for our financial soundness or the correctness of any of the statements made or opinions expressed in this report.

Germany

The following paragraphs outline the most relevant legal provisions applicable to our German business and Athene Real Estate Management Company s.a.r.l (Luxembourg subsidiary).

Basic Legal Framework

Our German Group Companies licensed as insurers are subject to the relevant laws and regulation applicable to insurers in Germany. Our German Group Companies acting as insurance holding companies are subject to the relevant laws and regulations applicable to insurance holding companies in Germany. The relevant laws include the VAG, which constitutes the basic regulatory framework for operating an

insurance business in Germany and which also includes a limited set of provisions that apply to insurance holding companies. The VAG is supplemented by various ordinances implemented by the German Ministry of Finance and/or Federal Financial Supervisory Authority (BaFin) which regulate and mandate, among other things, eligibility criteria for investments, policyholder participation in income, accounting principles, corporate governance requirements, regulatory capital and reporting of insurance undertakings. The relevant insurance contracts are governed by the Insurance Contracts Act and the German Civil Code and further specific consumer protection laws, data protection requirements and anti-money-laundering requirements.

Profit Sharing and Dividend Restriction

German insurance law provides that policyholders participate in the income of the insurance undertaking unless explicitly excluded in the contracts (which is not the case for the portfolio of our German Group Companies). In particular, the minimum transfer ordinance provides for a minimum profit participation in the amount of 90% of the investment result, 90% of the insurance result and 50% of the other results of the insurance undertaking. Additionally, on maturity policyholders are entitled to 50% of the unrealized capital gains, which are hidden reserves which have not yet materialized from an accounting perspective. Unrealized gains on fixed-interest investments and interest-rate hedges only participate in excess of a certain safety requirement necessary to ensure payment of the guaranteed interest.

Distribution of dividends by insurance undertakings is only permitted in excess of a safety requirement, which is an amount that is necessary in order to secure the payment of the insurer's liabilities in case the guaranteed interest is above a certain reference rate (based on a zero-coupon euro swap with a maturity of ten years).

BaFin and European Insurance and Occupational Pensions Authority (EIOPA)

Our German Group Companies are subject to supervision by BaFin, which is the central financial regulatory authority for Germany. As part of an enhanced system of financial markets regulation in Europe, EIOPA has been set up as a regulatory authority on the European level. EIOPA has certain powers in relation to the Solvency II regime, including issuing guidelines interpreting Solvency II which are addressed to the national supervisory authorities. It cannot be predicted how EIOPA intends to apply its powers in practice and whether the new authority will result in more intrusive and intensive regulation, adding additional burdens to our resources.

Solvency II

The EC has implemented a new prudential framework for insurance companies, known as Solvency II, that replaced the previous life, non-life, reinsurance and insurance group's directives in Europe from 2016 onwards. Solvency II uses a more principle- and risk-based approach.

Solvency II is set up based on a four-level legislative process. The "Level 1" directive, dated November 25, 2009, as amended by the proposed Omnibus II Directive, sets out a framework which is supplemented by the more detailed Commission Delegated Regulation (EU) 2015/35 (Solvency II Delegated Regulation) and implementing measures as issued by the EC at "Level 2" and technical standards, which are directly applicable in Germany. "Level 3" consists of standards and guidance developed by EIOPA and at "Level 4," the EC monitors uniform implementation of the rules.

Insurance undertakings to which Solvency II applies, including ALV, have become subject to changes with regard to solvency capital and own funds requirements, the valuation of assets and liabilities, provisions concerning business organization (governance) and reporting and disclosure requirements.

Solvency II further provides for the supervision of insurance groups and imposes a group-level capital requirement in relation to certain insurance groups. In Germany, the relevant regulatory changes triggered by Solvency II are implemented via a restatement of the VAG, which was enacted in April 2015 and became effective on January 1, 2016.

Credit for Reinsurance Ceded

Whereas under the previous regime, the reduction for ceded reinsurance was a fixed function based on the primary insurer's liabilities, Solvency II implements a risk-based approach pursuant to which insurance undertakings have to take into account their own risk profile in determining their solvency requirements. Under Solvency II, capital charges for ceded reinsurance thus depends on a variety of factors, including in particular the financial strength of the reinsurer, spread, rating and the number of reinsurers employed by the primary insurer.

Capital Requirements

Under the Solvency II regime, MCR, as well as solvency capital requirements (SCR), are imposed. As of 2016, our German Group Companies licensed as insurance undertakings are obliged to meet these requirements in order to be able to fulfill, subject to a certain confidence level of 99.5%, in case of the SCR, or 85%, in case of the MCR, over a one-year period, all obligations arising from existing business as well as the new business expected to be written over the following 12 months. Failure to maintain adequate capital levels may result in regulatory action by BaFin.

Item 1. Business

Regulation of Investments

Our German Group Companies are subject to certain regulatory provisions on eligible investments, including the prudent person principle under Solvency II.

Consumer Protection Laws

The German insurance law is strongly focused on protection of policyholders. Various specific rights, including cancellation rights, are granted to policyholders, aimed in particular at protecting their right of due information and transparency. As a general tendency, courts (the European Court of Justice as well as national German courts) tend to strengthen the policyholders' position vis-à-vis insurance undertakings.

Privacy Regulation

As to our German Group Companies, personal data of customers is collected, processed and used in Germany. As a consequence, German data protection laws apply which are considered to be rather strict in comparison to U.S. data protection laws. In general, the Federal German Data Protection Act requires either consent of the respective customer or statutory permission in order to collect, process and/or use personal data of customers (further requirements apply to the processing of health data). Furthermore, under the German Criminal Act, employees of private health, accident or life insurance companies are subject to statutory confidentiality obligations. A transfer to a reinsurer or other third party of customer data falling under such insurance categories generally requires consent of the respective customer. On April 27, 2016, the General Data Protection Regulation (GDPR) was adopted by the EU Parliament providing for more harmonized data protection standards applicable in all EU Member States beginning May 25, 2018. Until then, Germany has time to adopt a new Federal German Data Protection Act adapted to the GDPR and providing for Germany specific supplements where the GDPR leaves room for national derogations. In early 2017, the German government issued its second draft of such new Federal German Data Protection Act, although it is likely that further amendments will be made to such draft before the act is adopted.

Luxembourg Regulation

Our Luxembourg subsidiary is subject to supervision by the CSSF and Luxembourg regulation for management companies of investment funds. We do not believe that our Luxembourg subsidiary is governed by the directive 2011/61/EU of the European Parliament and of the Council of June 8, 2011 on Alternative Investment Fund Managers and it is currently registered accordingly with the Commission de Surveillance du Secteur Financier (CSSF) on the basis of a self-assessment. In the absence of a final decision by the relevant Luxembourg authorities, and subject to any policy changes and changes in circumstances on which the self-assessment is based, namely regarding the holding and investment structure, we cannot exclude the risk of our Luxembourg subsidiary qualifying as an Alternative Investment Fund Manager. Such a determination would require an enhanced administration, organization and financing of our Luxembourg subsidiary. The Luxembourg investment fund managed by our Luxembourg subsidiary is regulated as a specialized investment fund under Luxembourg law and thus is also subject to legislative and/or regulatory developments, which may impact the position and performance of our Luxembourg subsidiary.

Available Information

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended (Exchange Act) are made available, free of charge, on or through the "Investor Relations" portion of our website *www.athene.com*. Information contained on our website is not part of, nor is it incorporated by reference in, this report or any of our periodic reports. The public may read and copy any materials that the Company has filed with the SEC at the SEC's Public Reference Room located at 100 F Street, NE, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 800-SEC-0330. Reports filed with or furnished to the SEC will also be available as soon as reasonably practicable after they are filed with or furnished to the SEC and are available over the internet at the SEC's website at *www.sec.gov*.

Item 1A. Risk Factors

Risks Relating to Our Business

Our business, financial condition, liquidity, results of operations and cash flows depend on the accuracy of our management's assumptions and estimates, and we could face significant losses if these assumptions and estimates differ significantly from actual results.

We make and rely on certain assumptions and estimates regarding many items, including interest rates, investment returns, expenses and operating costs, tax assets and liabilities, business mix, surrender activity, mortality and contingent liabilities, related to our business and anticipated results that affect amounts reported in our consolidated financial statements and notes thereto. We also use these assumptions and estimates to make decisions crucial to our business operations, including establishing pricing, target returns and expense structures for our insurance subsidiaries' products, determining the amount of reserves we are required to hold for our policy liabilities, the price we will pay to acquire or reinsure business, the hedging strategies to manage risks to our business and operations and the amount of regulatory and rating agency capital that our insurance subsidiaries must hold to support their businesses. The factors influencing these business decisions cannot be predicted with certainty and if our assumptions and estimates differ significantly from actual outcomes and results, our business, financial condition, liquidity, results of operations and cash flows may be materially and adversely affected.

Insurance Products and Liabilities

Pricing of our annuity and other insurance products, whether issued by us or acquired through reinsurance or acquisitions, is based upon assumptions about persistency. A factor which may affect persistency for some of our products is the value of guaranteed minimum benefits. An increase in the value of guaranteed minimum benefits could result in our policies remaining in force longer than we have estimated, which could adversely affect our results of operations. This could be caused by extended periods of poor equity market performance and/or low interest rates, developments affecting customer perception and other factors outside our control. Alternatively, our persistency estimates could be negatively affected during periods of rising equity markets or interest rates or by other factors outside our control, which could result in fewer policies remaining in force than estimated. Therefore, our results will vary based on differences between actual and expected withdrawals from our subsidiaries' products.

Certain of our deferred annuity products also contain optional benefit riders, including guaranteed lifetime income or death benefits, that may be exercised at certain points of time under the terms of a contract. We set prices for such products using assumptions about mortality, the rate of election of deferred annuity living benefits and other optional benefits offered to our policyholders. The profitability of these products may be lower than expected if actual policyholder utilization of these benefits varies adversely from our assumptions.

We license analytic software with actuarial modeling capabilities from third parties to facilitate the pricing of our products, make projections of our in-force business for planning purposes and objectively assess the risks in our subsidiaries' insurance and reinsurance asset and liability portfolios. These actuarial models help us to measure and control risk accumulation, inform management and other stakeholders of capital requirements and manage the risk/return profile and amount of capital required to cover the risks in each of our subsidiaries' insurance and reinsurance contracts and our overall portfolio of insurance and reinsurance contracts. However, given the inherent uncertainty of modeling techniques and the application of such techniques, these models and databases may not accurately address the emergence of a variety of matters which might impact certain of our subsidiaries' products. Accordingly, these models may inaccurately predict the exposures that our subsidiaries are assuming and our financial results may be adversely impacted, perhaps significantly.

If emerging or actual experience deviates from our assumptions regarding any of the above factors, such deviations could have a significant effect on our reserve levels and our related results of operations and financial condition. For example, a significant portion of our in-force and newly issued products contain riders that offer guaranteed lifetime income or death benefits. These riders expose us to mortality, longevity and policyholder behavior risks. If actual utilization of certain rider benefits is adverse when compared to our estimates used in setting our reserves for future policy benefits, these reserves may prove to be inadequate and we may be required to increase them. Conversely, if policies lapse at a significantly higher rate than expected, we may need to accelerate the amortization of deferred acquisition costs (DAC), value of business acquired (VOBA) and deferred sales inducement (DSI) balances. More generally, deviations from our pricing expectations could result in our subsidiaries earning less of a spread between the investment income earned on our subsidiaries' assets and the interest credited to such products and other costs incurred in servicing the products, or may require our subsidiaries to make more payments under certain products than our subsidiaries had projected. We have limited experience to date on policyholder behavior for our guaranteed minimum benefit products. As a result, future experience could deviate significantly from our assumptions. Such acceleration of expense amortization, reduced spread or increased payments could materially and adversely affect our financial condition, results of operations or cash flows.

Determination of Fair Value

As defined under GAAP, fair value is the price that would be received to sell an asset or paid to transfer a liability between market participants in the principal market or in the most advantageous market when no principal market exists. Adjustments to transaction prices or quoted market prices may be required in illiquid or disorderly markets in order to estimate fair value. Different valuation techniques may be appropriate under the circumstances to determine the value that would be received to sell an asset or paid to transfer a liability in an orderly transaction. Market participants are assumed to be independent, knowledgeable, able and willing to transact an exchange and not under duress. Nonperformance or credit risk is considered in determining fair value. Considerable judgment may be required in interpreting market data used to develop the

estimates of fair value. Accordingly, estimates of fair value are not necessarily indicative of the amounts that could be realized in a current or future market exchange.

For example, the valuation of investments involves considerable judgment, is subject to considerable variability and is revised as additional information becomes available. As such, changes in, or deviations from, the assumptions used in such valuations can significantly affect our financial statements. During periods of market disruption, including periods of rapidly changing credit spreads or illiquidity, if trading becomes less frequent or market data becomes less observable, it has been and will likely continue to be difficult to value certain of our investments, such as certain of our real-estate related investments, structured products and alternative investments. There may be certain asset classes in active markets with significant observable data that could become illiquid in a difficult financial environment. Further, rapidly changing credit and equity market conditions could materially impact the valuation of investments as reported within our financial statements, and the period-to-period changes in value could vary significantly. Our ability to sell investments, or the price ultimately realized for investments, depends upon the demand and liquidity in the market and increases the use of judgment in determining the estimated fair value of certain investments. Even if our assumptions and valuations are accurate at the time that they are made, the same factors influencing our valuations of such investments could cause the market value of these investments to decline, which could materially and adversely impact our financial condition, results of operations or cash flows.

Additionally, we also use, and may in the future use, derivatives, including swaps, options, futures and forward contracts, and reinsurance contracts to hedge risks such as current or future changes in the fair value of our assets and liabilities, current or future changes in cash flows, changes in interest rates, equity markets and credit spreads, the occurrence of credit defaults, currency fluctuations and changes in mortality and longevity. We use equity derivatives to hedge the liabilities associated with our FIAs. Our hedging strategies also rely on assumptions and projections regarding our assets, liabilities (including with respect to the optional benefits offered as part of our products), general market factors and the creditworthiness of our counterparties that may prove to be incorrect or inadequate. Accordingly, our hedging activities may not have the desired beneficial impact on our financial condition or results of operations. Hedging strategies involve transaction and other costs, and if we terminate any hedging arrangements, including reinsurance contracts, we may also be required to pay additional costs, such as transaction fees or breakage costs. We may also incur losses on transactions after taking into account our hedging strategies, which may have a material and adverse effect on our financial condition and cash flows.

Financial Statements and Results

The preparation of our consolidated financial statements and notes thereto in accordance with GAAP requires management to make various estimates and assumptions that affect the reported amounts in our financial statements. These estimates include, but are not limited to, the fair value of investments, impairment of investments and valuation allowances, the valuation of derivatives, including embedded derivatives, DAC, DSI and VOBA, future policy benefit reserves, valuation allowances on deferred tax assets, and stock-based compensation. For example, the calculations we use to estimate DAC, DSI and VOBA are necessarily complex and involve analyzing and interpreting large quantities of data. The assumptions and estimates required for these calculations involve judgment and by their nature are imprecise and subject to changes and revisions over time. Accordingly, our results may be adversely affected from time to time by actual results differing from assumptions, changes in estimates and changes resulting from implementing more sophisticated administrative systems and procedures that facilitate the calculation of more precise estimates. Any of these inaccuracies could require us, among other things, to accelerate the amortization of DAC, DSI and VOBA, which would result in a charge to earnings, or in a restatement of our historical financial statements or other material adjustments to our financial statements. Additionally, the potential for unforeseen developments, including changes in laws, may result in losses and loss expenses materially different from the reserves initially established, which could also materially and adversely impact our business, financial condition, results of operations and prospects.

The amount of statutory capital that our insurance and reinsurance subsidiaries have, or that they are required to hold, can vary significantly from time to time and is sensitive to a number of factors outside of our control.

Our U.S. insurance subsidiaries are subject to state regulations that provide for MCR based on RBC formulas for life insurance companies relating to insurance, business, asset, interest rate and certain other risks. Similarly, ALRe is subject to MCR imposed by the BMA through its ECR and MMS. The BSCR is based on the BMA's Economic Balance Sheet (EBS) regulatory framework, which was granted equivalency to Solvency II in March 2016. EBS is effective as of January 1, 2016, with the first filing due in 2017 for the year ended December 31, 2016.

Our German Group Companies are subject to SCR and MCR pursuant to Solvency II, which applies at the level of ALV and at the level of the group.

In any particular year, our subsidiaries' capital ratios and/or statutory surplus amounts may increase or decrease depending on a variety of factors, most of which are outside of our control, including, but not limited to, the following:

- the amount of statutory income or losses generated by our insurance subsidiaries (which itself is sensitive to equity and credit market conditions);
- the amount of additional capital our insurance subsidiaries must hold to support their business growth;
- changes in reserve requirements applicable to our insurance subsidiaries;
- changes in market value of certain securities in our investment portfolio;
- changes in the credit ratings of investments held in our investment portfolio;
- the value of certain derivative instruments;

- changes in interest rates;
- credit market volatility;
- changes in policyholder behavior;
- changes to the RBC formulas and interpretations of the NAIC instructions with respect to RBC calculation methodologies;
- changes to the ECR, BSCR, or TCL formulas and interpretations of the BMA's instructions with respect to ECR, BSCR, or TCL calculation methodologies; and
- changes to the SCR formulas and interpretations with respect to SCR calculation methodologies and MCR pursuant to Solvency II and German regulations.

The financial strength and credit ratings of our insurance subsidiaries are significantly influenced by their statutory surplus amounts and these MCRs. NRSROs may also implement changes to their internal models, which differ from the RBC, BSCR and SCR capital models, that have the effect of increasing or decreasing the amount of statutory capital our subsidiaries must hold in order to maintain their current ratings. Additional statutory reserves may be required as the result of mandatory annual asset adequacy analysis, and rising or falling interest rates and widening credit spreads could alter this cash flow testing analysis. In addition, NRSROs may downgrade the investments held in our portfolio, which could result in impairments and therefore a reduction of the RBC ratios of our U.S. domiciled insurance subsidiaries, a decrease in the solvency ratio of our German Group Companies, or an increase in the ECR of ALRe.

To the extent that one of our insurance subsidiary's solvency or capital ratios is deemed to be insufficient by one or more NRSROs, we may take actions either to increase the capitalization of the insurer or to reduce the capitalization requirements. If we are unable to accomplish such actions, NRSROs may view this as a reason for a ratings downgrade. If a subsidiary's solvency or capital ratios reach certain minimum levels, it could subject us to further examination or corrective action imposed by our insurance regulators, including limitations on our subsidiaries' ability to write additional business, supervision by regulators, seizure or liquidation, each of which could materially and adversely affect our business, financial condition, results of operations, cash flows and prospects.

The BMA released consultation papers in November 2016 and March 2017 that propose further updates to certain aspects of the EBS framework. The BMA has not finalized any changes and expects to release additional guidance later in 2017 after reviewing trial run results of these changes. If the final guidance, when completed and adopted, materially increases the ECR, it could materially and adversely affect our BSCR ratio and, correspondingly, our capital in excess of BMA requirements.

Interest rate fluctuations could adversely affect our business, financial condition, liquidity, results of operations and cash flows.

Interest rate risk is a significant market risk for us. We define interest rate risk as the risk of an economic loss due to changes in interest rates. This risk arises from our holdings in interest rate-sensitive assets and liabilities, primarily as a result of issuing or reinsuring fixed deferred and immediate annuities and investing primarily in fixed income assets. As of December 31, 2016, reserves for fixed deferred and immediate annuities net of reinsurance made up substantially all of our reserve liabilities. Substantial and sustained increases or decreases in market interest rates can affect the profitability of our insurance products and the fair value of our investments. These fluctuations could materially and adversely affect our business, financial condition, liquidity, results of operations and cash flows, including in the following respects:

- Significant changes in interest rates expose us to the risk of not realizing anticipated spreads between overall net investment earned rates and the crediting rates to our policyholders, which are a significant source of our operating profits. We have the ability to adjust crediting rates, including caps and participation rates for FIAs, on many of our annuity liabilities (subject to minimum guaranteed values). However, we may not be able to adjust such rates in a timely manner or to the extent desired to adequately respond to the effect that changes in interest rates may have on the returns on our investments. Many of our annuity products have surrender and withdrawal penalty provisions designed to prevent early policyholder withdrawals in rising interest rate environments and to help ensure targeted spreads are earned. However, competitive factors, including the need or desire to manage levels of surrenders and withdrawals, may limit our ability to adjust or maintain crediting rates at levels necessary to avoid narrowing of spreads under certain market conditions.

- Changes in interest rates may also negatively affect the value of our assets and our ability to realize gains or avoid losses from the sale of those assets, all of which also ultimately affect our earnings and/or capital. Significant volatility in interest rates may have a larger adverse impact on certain assets in our investment portfolio which are highly structured or have limited liquidity, including our real estate-related assets, structured products and alternative investments, which may not have active trading markets, making the disposition of such assets difficult.

- Changes in interest rates may also affect changes in prepayment rates on certain of the real estate-related assets, structured products and alternative investments we invest in. For instance, falling interest rates may accelerate the rate of prepayment on mortgage loans, while rising interest rates may decrease such prepayments below the level of our expectations. At the same time, falling interest rates may result in the lengthening of duration for our policies and liabilities due to the guaranteed minimum benefits contained in our products, while rising interest rates could lead to increased policyholder withdrawals and a shortening of duration for our liabilities. In either case, we could experience a mismatch in our assets and liabilities and potentially incur economic losses, which may have an adverse effect on our financial condition, results of operations and cash flows.

- During periods of declining interest rates or a prolonged period of low interest rates, life insurance and annuity products may be relatively more attractive to consumers due to minimum guarantees that are mandated by law or by regulators at the time that we price

these products, resulting in a higher persistency than we anticipated, potentially resulting in greater claims costs on our guaranteed minimum benefit riders than we expected and cash flow mismatches between our assets and liabilities. In addition, the surrender and withdrawal penalties we impose on certain of our annuity products may further increase persistency during such periods. Certain statutory capital and reserve requirements are based on formulas or models that consider interest rates, and an extended period of low interest rates may increase the statutory capital we are required to hold and the amount of assets we must allocate to support statutory reserves, which could decrease the spread income that we are able to earn from these products. This reduced spread could also force us to accelerate amortization of DAC and/or VOBA, which would have an adverse effect on our financial condition and results of operations. Our German life insurance company subsidiaries are required by law to set up an additional premium reserve if the interest rate guaranteed to policyholders of certain endowment and annuity products issued exceeds a certain reference rate which is based on the rolling ten-year average of an AAA rated Eurobond. If interest rates remain at current low levels or further decline as a result of further quantitative easing in response to declining economic conditions, we could be required to provide additional capital to our German insurance company subsidiaries or increase reserves allocated to certain products which could in turn have a material adverse effect on our financial condition and results of operations.

- Additionally, during periods of declining interest rates, we may have to reinvest the cash we receive as interest or return of principal on our investments into lower-yielding high-grade instruments or seek lower-credit instruments in order to maintain comparable returns, each of which could have a material and adverse effect on our financial condition and results of operations.

- Certain securitized financial assets are accounted for based on expectations of future cash flows. To the extent the coupon on these instruments or the underlying collateral is based on a reference rate (for example, LIBOR), we use the market observed forward curve in our cash flow projections. As of December 31, 2016, we held $17.8 billion of securitized financial assets that have floating rate coupons or adjustable rate collateral. To the extent interest rates are lower than we have projected, we will experience slower accretion of discounts on these assets and will have a lower yield on our portfolio, which would adversely affect our financial condition and results of operations.

- An extended period of declining interest rates or a prolonged period of low interest rates may cause us to change our long-term view of the interest rates that we can earn on our investments, causing us to change the long-term interest rate that we assume in our evaluation of our insurance liabilities, reducing the attractiveness of our subsidiaries' products.

- In periods of rapidly increasing interest rates, withdrawals from and/or surrenders of annuity contracts may increase as policyholders choose to seek higher investment returns elsewhere. Obtaining cash to satisfy these obligations may require our insurance subsidiaries to liquidate fixed income investments at a time when market prices for those assets are depressed because of increases in interest rates. This may result in realized investment losses. Regardless of whether we realize an investment loss, such cash payments would result in a decrease in total invested assets and may decrease our levels of profitability or results of operations. Premature withdrawals or unexpected surrenders may also cause us to accelerate amortization of DAC and/or VOBA, which would also adversely affect our financial condition and results of operations.

- An increase in market interest rates could also reduce the value of certain of our alternative investments held as collateral under reinsurance agreements and create a need for ALRe to provide additional collateral to support the reserve requirements of our ceding companies, thereby reducing our available capital and potentially creating a need for additional capital which may not be available to us on favorable terms, or at all, when needed.

We may want or need additional capital in the future, and such capital may not be available to us on favorable terms or at all due to volatility in the equity or credit markets, adverse economic conditions or our creditworthiness.

We may want or need to raise additional capital in the future through offerings of debt or equity securities or otherwise to:

- operate and expand our business;
- make acquisitions or assume business through reinsurance;
- fund our liquidity needs caused by investment losses;
- replace capital lost in the event of significant investment, insurance or reinsurance losses or adverse reserve developments;
- meet rating agency or regulatory capital requirements; or
- meet other requirements and obligations.

Additional capital may not be available on terms favorable to us, or at all, when we seek to raise such capital. Availability of additional capital will depend on a variety of factors such as market conditions, our credit ratings and adverse regulatory actions taken against us. Our inability to raise capital at such times can have a range of effects, including forcing us to forego profitable growth opportunities and impairing the capital ratios of our insurance subsidiaries. This would have the potential to decrease both our profitability and our financial flexibility. Further, any additional capital raised through the sale of equity could dilute your ownership interest in our company and may cause the value of our shares to decline.

Item 1A. Risk Factors

If we do not manage our growth effectively, our financial performance could be adversely affected; our historical growth rates may not be indicative of our future growth.

We have experienced rapid growth since we commenced operations in 2009. As of December 31, 2016, our reserve liabilities have grown to $71.0 billion, our work force has grown to approximately 1,325 employees, and our independent agent base has grown to approximately 28,000 agents. We intend to continue to grow by recruiting new independent agents, increasing the productivity of our existing agents, expanding our insurance distribution network, making strategic acquisitions, developing new products, expanding into new product lines and continuing to develop new incentives for our sales agents. We believe that we have the right people, infrastructure and scale to position us for continued growth. Future growth will impose significant added responsibilities on our management, including the need to identify, recruit, maintain and integrate additional employees, including management. There can be no assurance that our systems, procedures and controls will be adequate to support our operations as they expand. In addition, due to our rapid growth and resulting increased size, it may be necessary to expand the scope of our investing activities to asset classes in which we historically have not invested or have not had significant exposure. If we are unable to adequately manage our investments in these classes, our financial condition and results of operations in the future could be less favorable than in the past. Further, we have utilized reinsurance to support our growth and the future availability of such reinsurance is uncertain. Our failure to manage growth effectively, or our inability to recruit, maintain and integrate additional qualified employees and independent agents, could have a material adverse effect on our business, financial condition and results of operations. In addition, due to our rapid growth, our historical growth rates are not likely to accurately reflect our future growth rates or our growth potential. We cannot assure you that our future revenues will increase or that we will continue to be profitable.

If our risk management policies and procedures, which include the use of derivatives and reinsurance, are not adequate to protect us, we may be exposed to unidentified, unanticipated or inadequately managed risks.

We place a high priority on risk management and risk control. We have developed risk management policies and procedures, including hedging programs and risk management programs that utilize derivatives and reinsurance, and expect to continually refine and enhance these techniques, strategies and assessment methods. Nonetheless, our policies and procedures to identify, monitor and manage risks may not be fully effective, particularly during extremely turbulent market conditions. Many of our methods of managing risk and exposures are based upon observed historical market behavior or statistics based on historical data. These methods are also based upon certain assumptions and estimates made by management. As a result, these methods may not accurately anticipate future market outcomes or policyholder behavior, which could result in volatility that is significantly greater than historical measures indicate. Other risk management methods depend on the evaluation of information regarding markets, customers or other matters that are publicly available or otherwise accessible to management. This information may not always be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risks requires, among other things, policies and procedures to record and verify large numbers of transactions and events. These policies and procedures may not be fully effective to manage or mitigate our risks which may have a material and adverse effect on our business, financial condition, liquidity, results of operations, cash flows and prospects.

We operate in a highly competitive industry that includes a number of competitors, many of which are larger and more well-known than we are, which could limit our ability to achieve our growth strategies and could materially and adversely affect our business, financial condition, results of operations, cash flows and prospects.

We operate in highly competitive markets and compete with large and small industry participants. These companies compete for an increasing pool of retirement assets, driven primarily by aging of the U.S. population and the reduction in, and concerns about the viability of, financial safety nets historically provided by governments and employers. In each of our subsidiaries' businesses we face intense competition, including from U.S. and non-U.S. insurance and reinsurance companies, broker-dealers, financial advisors, asset managers and diversified financial institutions, both for customers for our subsidiaries' products and in the acquisition and block reinsurance markets. We compete based on a number of factors including perceived financial strength, credit ratings, brand recognition, reputation, quality of service, performance of our products, product features, scope of distribution and price. A decline in our competitive position as to one or more of these factors could adversely affect our profitability. In addition, we may in the future sacrifice our competitive or market position in order to improve our short-term profitability, particularly in the highly competitive retail markets, which may adversely affect our long-term growth and results of operations. Alternatively, we may sacrifice short-term profitability to maintain market share and longer term growth.

In recent years, there has been substantial consolidation among companies in the financial services industry due to economic turmoil resulting in increased competition from large, efficient, well-capitalized financial services firms. Many of our competitors are large and well-established and some have greater market share or breadth of distribution, offer a broader range of products, services or features, assume a greater level of risk while maintaining financial strength ratings or have higher financial strength, claims-paying or credit ratings than we do. Our competitors may also have lower operating costs or return on capital requirements than us which may allow them to price products, reinsurance arrangements or acquisitions more competitively. The competitive pressures arising from consolidation could result in increased pressure on the pricing of certain of our products and services, and could harm our ability to maintain or increase profitability. In addition, if our financial strength and credit ratings remain lower than the ratings of certain of our competitors, we may experience increased surrenders and/or an inability to reach sales targets, which may have a material and adverse effect on our growth, business, financial condition, results of operations, cash flows and prospects.

Item 1A. Risk Factors

A significant portion of our retail annuities are sold through a proprietary distribution network.

We distribute annuity products through independent producers affiliated with certain IMOs. A significant portion of our retail annuity production results from sales of product in our BalancedChoice Annuity product series, which contains certain product features that are licensed from a third-party actuarial firm. Only IMOs which are affiliated with the Annexus Group are permitted to distribute the BalancedChoice Annuity product series. If we experienced a disruption in our relationship with the Annexus Group, it could have an adverse effect for a period of time on our annuity sales of this product series.

We are subject to general economic conditions, including prevailing interest rates, levels of unemployment and financial and equity and credit market performance, which may affect, among other things, our ability to sell our products, the fair value of our investments and whether such investments become impaired and the surrender rate and profitability of our policies.

Our business and results of operations are materially affected by conditions in the global capital markets and the economy generally. A general economic slowdown could adversely affect us in the form of changes in consumer behavior and decreases in the returns on and value of our investment portfolio. Concerns over the slow economic recovery, the level of U.S. national debt, currency fluctuations and volatility, the stability of the EU and the potential exit of the UK (Brexit) and of certain other EU members, the rate of growth of China and other Asian economies, unemployment, the availability and cost of credit, the U.S. housing market, inflation levels, negative interest rates, energy costs and geopolitical issues have contributed to increased volatility and diminished expectations for the economy and the markets. Declining economic growth rates globally and resultant diverging paths of monetary policy could increase volatility in the credit markets, potentially impacting the availability and cost of credit.

Factors such as equity prices, equity market volatility, interest rates, counterparty risks, availability of credit, inflation rates, economic uncertainty, changes in laws or regulations (including laws relating to the financial markets generally or the taxation or regulation of the insurance industry), trade barriers, commodity prices, currency exchange rates and controls and national and international political circumstances (including governmental instability, wars, terrorist acts or security operations) can have a material impact on the value of our investment portfolio and our subsidiaries' ability to sell their products. Equity market volatility can negatively affect our revenues and profitability in various ways, particularly as a result of guaranteed minimum withdrawal or surrender benefits in our products. The estimated cost of providing guaranteed minimum withdrawal benefits incorporates various assumptions about the overall performance of equity markets over certain time periods. Periods of significant and sustained downturns in equity markets, increased equity volatility or reduced interest rates could result in an increase in the valuation of the future policy benefit or policyholder account balance liabilities associated with such products, resulting in a reduction in our revenues and net income. The rate of amortization of DAC and VOBA costs relating to FIA products and the cost of providing guaranteed minimum withdrawal or surrender benefits could also increase if equity market performance is worse than assumed, which could have a material and adverse effect on our growth, business, financial condition, results of operations and cash flows.

Additionally, the possibility of volatility in the capital markets spreading through a highly integrated and interdependent banking system remains. These factors, combined with reduced business and consumer confidence, have negatively impacted U.S. economic growth. The Federal Reserve has scaled back programs that have in recent years fostered a historically low interest rate environment, which could generate volatility in debt and equity markets including increases in interest rates and associated declining values on fixed income investments. As the Federal Reserve moves towards normalizing monetary policy and moving short-term interest rates off of their lower levels, the central bank may adversely affect prospects for continued economic recovery with little room for incremental monetary accommodation.

Furthermore, long-term structural concerns remain with regard to the Eurozone's move towards a closer currency, fiscal, economic and monetary union, particularly in the wake of the UK's vote to exit the EU. In addition, significant risks persist regarding the sovereign debt of Greece, as well as certain other countries, which in some cases have required countries to obtain emergency financing. While economic policy measures and commitments have stabilized the Euro's volatility, the EU's fiscal outlook remains negative, and further substantial decline in the value of the Euro could expose us to significantly greater foreign currency exposure than we estimate at this time. The financial turmoil in Europe, including the recent downgrades of the sovereign rating of the UK and uncertainty resulting from Brexit, continues to be a long-term threat to global capital markets and remains a challenge to global financial stability. If these or other countries require additional financial support or if sovereign credit ratings decline further, yields on the sovereign debt of certain countries may increase, the cost of borrowing may increase and the availability of credit may become more limited. Our results of operations and investment portfolio are exposed to these risks and may be adversely affected as a result. In addition, in the event of extreme prolonged market events, such as the recent global credit crisis, we could incur significant losses.

Our investments are subject to market and credit risks that could diminish their value and these risks could be greater during periods of extreme volatility or disruption in the financial and credit markets, which could adversely impact our business, financial condition, liquidity and results of operations.

Our investments and derivative financial instruments are subject to risks of credit defaults and changes in market values. Periods of extreme volatility or disruption in the financial and credit markets could increase these risks. Underlying factors relating to volatility affecting the financial and credit markets could lead to other than temporary impairment of assets in our investment portfolio. We are also subject to the risk that cash flows resulting from payments on assets that serve as collateral underlying the structured products we own may differ from our expectations in timing or size. In addition, many of our classes of investments, but in particular our alternative investments, may produce investment income that fluctuates from period to period and is more variable than may be the case with other asset classes, such as corporate bonds. Any event reducing the estimated fair value of these securities, other than on a temporary basis, could have a material and adverse effect

on our business, results of operations, financial condition and cash flows. If our investment manager, AAM, or our German subsidiaries' investment adviser, AAME, fails to react appropriately to difficult market, economic and geopolitical conditions, our investment portfolio could incur material losses. Some of our investments are more vulnerable to these risks than others, as described more fully below.

As of December 31, 2016, 82% of our total invested assets were invested in fixed maturity securities, equity securities, and short-term investments, including our investments in investment grade and high-yield corporate bonds and structured products, which include RMBS and CLOs. As of December 31, 2016, 47% of our total invested assets were invested in non-structured investment grade bonds, 3% in high-yield non-structured securities, and 5% in structured securities (other than CMBS, RMBS and CLOs). Issuers or guarantors of such fixed income securities may default on principal or interest payments they owe us, or the underlying collateral may default on such payments, causing an adverse change in cash flows. An economic downturn affecting the issuers or underlying collateral of these securities, a ratings downgrade affecting the issuers or guarantors of such securities, or similar trends and issues could cause the estimated fair value of our fixed income securities portfolio and our earnings to decline and the default rates of the fixed income securities in our portfolio to increase.

As of December 31, 2016, 8% of our total invested assets were invested in senior and mezzanine tranches issued by CLOs and 0.4% was invested in equity tranches issued by CLOs. As of December 31, 2016, 95% of our investments in CLOs were managed by Apollo and its affiliates other than AAM. CLOs are a form of securitization where payments from multiple large business loans, generally below investment grade, are pooled together and sold to different classes of owners in various tranches. Senior tranches of CLOs have some protection from credit losses by more junior tranches while junior tranches often have higher yields than those of the collateral loans and receive higher coupons to compensate for higher risk. CLOs thus provide investment opportunities with varying risk/return profiles and diversified exposure to multiple borrowers. Control over the CLOs in which we invest is exercised through collateral managers, who may take actions that could adversely affect our interests, and we may not have the right to direct collateral management. There may also be less information available to us regarding the underlying debt instruments held by CLOs than if we had invested directly in the debt of the underlying companies. Additionally, as subordinated interests, the estimated fair values of CLOs tend to be much more sensitive to adverse economic downturns and underlying borrower defaults than those of more senior securities. For example, as the secondary market pricing of the loans underlying CLOs deteriorated during the fourth quarter of 2008, it is our understanding that many investors were forced to raise cash by selling their interests in performing loans which resulted in a forced deleveraging cycle of price declines, compulsory sales and further price declines. While loan prices have recovered from the low levels experienced during the financial crisis, conditions in the large corporate leveraged loan market may deteriorate again, which may cause pricing levels to decline. Furthermore, our investments in CLOs are also subject to liquidity risk as there is a limited market for CLOs. Accordingly, we may suffer unrealized depreciation and could incur realized losses in connection with the sale of our CLO interests, which could have a material adverse effect on our business, financial condition and results of operations.

Included in assets of AAA Investment (Co-Invest VI), L.P. (CoInvest VI), one of our consolidated variable interest entities (VIE), are equity investments in publicly traded shares of Caesars Entertainment Corporation (CEC) and Caesars Acquisition Company (CAC). We received the CEC and CAC shares as part of a contribution agreement in 2012 with AAA Guarantor - Athene, L.P. and its subsidiary, Apollo Life Re Ltd., in order to provide a capital base to support future acquisitions. There are pending claims against CEC, CAC and/or others, related to certain guaranties issued for debt of Caesars Entertainment Operating Company, Inc. (CEOC) and/or certain transactions involving CEOC and certain of its subsidiaries (collectively, Debtors), CEC, CAC and others. CEC and the Debtors announced on or about September 26, 2016, that CEC and CEOC had received confirmations from representatives of CEOC's major creditor groups of those groups' support for a term sheet that describes the key economic terms of a proposed consensual chapter 11 plan for the Debtors. The plan, containing such terms and further including such other terms respecting, among other things, the merger of CAC into CEC, that CoInvest VI and others will not retain their pre-merger CEC shares, that CoInvest VI and others will retain the value of their CAC shares when receiving shares in the merged CEC, and that CoInvest VI and others will receive releases to the fullest extent permitted by law, was confirmed by the Bankruptcy Court by order dated January 17, 2017. Conditions precedent to the effective date of the plan include regulatory approvals from the various gaming regulators, CEC and CAC shareholders approval of the proposed merger, and securing required financings. As a result, CoInvest VI recorded a liability of $27 million during 2016 for the entire carrying value of the CEC shares. As of December 31, 2016, CoInvest VI's investment in CAC is carried at its fair value of $45 million.

We have a risk management framework in place to identify, assess and prioritize risks, including the market and credit risks to which our investments are subject. As part of that framework, we test our investment portfolio based on various market scenarios. Under certain stressed market scenarios, unrealized losses on our investment portfolio could lead to material reductions in its carrying value. Under some extreme scenarios, total AHL shareholders' equity could be negative for the period of time prior to any potential market recovery. See *Item 7A. Quantitative and Qualitative Disclosures About Market Risks*.

A decline in fair value below the amortized cost of a security requires management to assess whether an OTTI has occurred. The decision on whether to record an OTTI is determined in part by our assessment of the financial condition and prospects of a particular issuer, projections of future cash flows and recoverability of the particular security as well as management's assertion of whether it is more likely than not that we will sell the particular security before recovery.

Our investments linked to real estate are subject to credit, market and servicing risk, which could diminish the value that we obtain from such investments.

As of December 31, 2016, 18% of our total invested assets were invested in fixed maturity and equity securities linked to real estate, such as CMBS and RMBS. Additionally, as of December 31, 2016, 8% of our total invested assets were invested in commercial mortgage loans (CML) and RML, and 1% of our total invested assets were invested in real estate held for investment. In total, as of December 31, 2016, 27% of our

total invested assets were invested in assets linked to real estate. Defaults by third parties in the payment or performance of their obligations underlying these assets could reduce our investment income and realized investment gains or result in the recognition of investment losses. For example, the value of our real estate-related assets depends in part on the financial condition of the borrowers, the value of the real properties underlying the mortgages and, for commercial properties, the financial condition of the tenants of the properties underlying those mortgages, as well as general and specific economic trends affecting the overall default rate. An unexpectedly high rate of default on mortgages held by a CMBS or RMBS may limit substantially the ability of the issuer of such security to make payments to holders of such securities, reducing the value of those securities or rendering them worthless. The risk of such defaults is generally higher in the case of mortgage securitizations that include “sub-prime” or “alt-A” mortgages. As of December 31, 2016, 30% of our holdings in assets linked to real estate were invested in such “sub-prime” mortgages and “alt-A” mortgages. Changes in laws and other regulatory developments relating to mortgage loans may impact the investments of our portfolio linked to real estate in the future. Additionally, cash flow variability arising from an unexpected acceleration in mortgage prepayment behavior can be significant, and could cause a decline in the estimated fair value of certain “interest only” securities or loans.

The CML we hold, and CML underlying the CMBS that we hold, face both default and delinquency risk. For CML that we hold directly, we establish loan specific estimated impairments at each balance sheet date based on the excess carrying value of a loan over the present value of expected future cash flows discounted at the loan’s original effective interest rate, the estimated fair value of the loan’s collateral if the loan is in the process of foreclosure or otherwise collateral dependent, or the loan’s observable market price. We also establish valuation allowances for loan losses when it is probable that a credit event has occurred and the amount of loss can be reasonably estimated. As of December 31, 2016, our CML investments comprised 8% of our total invested assets, of which 0.3% were in the process of foreclosure. Legislative proposals that would allow or require modifications to the terms of CML, an increase in the delinquency or default rate of our CML portfolio or geographic or sector concentration within our CML portfolio could materially and adversely impact our financial condition and results of operations.

Our investments in RML and RMBS also involve credit risks. Higher than expected rates of default or loss severities on our RML investments and the assets underlying our RMBS investments may adversely affect the value of such assets. A significant number of the mortgages underlying our RML and RMBS investments are concentrated in certain geographic areas. Certain markets within those areas experienced significant decreases in home values during the financial crisis of 2007-2008 and the years thereafter. Any event that adversely affects the economic or real estate market in any of these areas could have a disproportionately adverse effect on our RML and RMBS investments. While we actively monitor our exposure to these and other risks inherent in this strategy, we cannot assure you that our hedging and risk management strategies will be effective; any failure to manage these risks effectively could materially and adversely affect our results of operations and financial condition. A rise in home prices, the concern over further introduction of or changes to government policies aimed at altering prepayment behavior, and an increased availability of housing-related credit could combine to increase expected or actual prepayment speeds, which would likely lower the valuations of RML and the valuations of RMBS that are structured as interest only securities and inverse interest only securities. In general, any material decline in the economy or significant problems in a particular real estate market would likely cause a decline in the value of residential properties securing the mortgages in that market, thereby increasing the risk of delinquency, default and foreclosure. This could, in turn, have a material adverse effect on our credit loss experience in the affected market.

Control over the underlying assets in all of our real estate-related investments is exercised through a servicer that we do not control. If a servicer is not vigilant in seeing that borrowers make their required periodic payments, borrowers may be less likely to make these payments, resulting in a higher frequency of default. If a servicer takes longer to liquidate non-performing mortgages, our losses related to those loans may be higher than originally anticipated. Any failure by a servicer to service mortgages in which we are invested or which underlie a RMBS in which we are invested could negatively impact the value of our investments in the related RML or RMBS.

Our German Group Companies and the Luxembourg investment fund managed by our Luxembourg subsidiary in which we have invested are significantly (directly or indirectly) invested in real estate in Germany and rely to a large extent on earnings from rentals and mortgage loan financing. Rents, real estate prices and default risk of mortgage loans largely depend on economic and business conditions in Germany. Declining economic conditions could cause us to be unable to re-let our real estate on the current terms, encounter difficulties in divesting parts of the real estate and lead to an increased number of mortgage loan defaults. This could impair the performance of our German Group Companies and the Luxembourg investment fund managed by our Luxembourg subsidiary in which we have invested (including the investments of the Luxembourg investment fund, in particular Elementae S.A., a holding company in which the Luxembourg investment fund is the sole shareholder) and have material adverse effects on our business, financial condition, results of operations and cash flows. The Luxembourg investment fund managed by our Luxembourg subsidiary in which we have invested may also (directly or indirectly) hold investments located elsewhere, which may depend on local economic and business conditions and which may be similarly adversely affected.

In addition to the credit and market risk that we face in relation to all of our real estate-related investments, certain of these investments may expose us to various environmental, regulatory and other risks. For example, our investment in RML could result in claims being assessed against us as a mortgage holder or property owner, including assignee liability, responsibility for tax payments, environmental hazards and other liabilities, including liabilities under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980. We may continue to be liable under such claims after foreclosing on a property securing a mortgage loan held by us. Additionally, we may be subject to regulation by the CFPB as a mortgage holder or property owner. We are currently unable to predict the impact of such regulation on our business. Any adverse environmental claim or regulatory action against us resulting from our investment in RML could adversely impact our reputation, business and results of operations.

Item 1A. Risk Factors

Many of our invested assets are relatively illiquid and we may fail to realize profits from these assets for a considerable period of time, or lose some or all of the principal amount we invest in these assets if we are required to sell our invested assets at a loss at inopportune times to cover policyholder withdrawals or to meet our insurance, reinsurance or other obligations.

We offer certain products that allow policyholders to withdraw their funds under defined circumstances. In order to meet such obligations, we seek to manage our liabilities and configure our investment portfolios to provide and maintain sufficient liquidity to support expected withdrawal demands and contract benefits and maturities. However, in order to provide necessary long-term returns and to achieve our strategic goals, a certain portion of our assets are relatively illiquid. Many of our investments are in securities that are not publicly traded or that otherwise lack liquidity, such as our privately placed fixed maturity securities, below investment grade securities, investments in mortgage loans and alternative investments.

We record our relatively illiquid types of investments at fair value. If we were forced to sell certain of our assets, there can be no assurance that we would be able to sell them for the prices at which we have recorded them and we might be forced to sell them at significantly lower prices. In many cases, we may be prohibited by contract or applicable securities laws from selling such securities for a period of time. When we hold a security or position, it is vulnerable to price and value fluctuations and may experience losses if we are unable to timely sell, hedge or transfer the position. Thus, it may be impossible or costly for us to liquidate positions rapidly in order to meet unexpected withdrawal or recapture obligations. This potential mismatch between the liquidity of our assets and liabilities could have a material and adverse effect on our business, financial condition, results of operations and cash flows.

Our investment portfolio may be subject to concentration risk, particularly with regards to our investments in MidCap, AmeriHome and real estate.

Concentration risk arises from exposure to significant asset defaults of a single issuer, industry or class of securities, based on economic conditions, geography or as a result of adverse regulatory or court decisions. When an investor's assets are concentrated and that particular asset or class of assets experiences significant defaults, the default of such assets could threaten the investor's financial condition. Our most significant potential exposure to concentration risk are our investments in MidCap, a provider of revolving and term debt facilities to middle market companies in North America and Europe, and in A-A Mortgage and its indirect investment in AmeriHome, a mortgage lender and mortgage servicer. As of December 31, 2016, our exposure, including loaned amounts, to MidCap was $761 million, which represented 1% of our total invested assets and 11% of total AHL shareholders' equity. As of December 31, 2016, our exposure to A-A Mortgage was $417 million, which represented less than 1% of our total invested assets and 6% of total AHL shareholders' equity. To the extent that we suffer a significant loss on our investment in MidCap or A-A Mortgage, our financial condition and results of operations could be adversely affected.

As of December 31, 2016, 27% of our total invested assets were invested in real estate-related assets. Any significant decline in the value of real estate generally or the occurrence of any of the risks described above with respect to our real estate related-investments could materially and adversely affect our financial condition and results of operations.

Our investment portfolio may include investments in securities of issuers based outside the United States, including emerging markets, which may be riskier than securities of U.S. issuers.

We may invest in securities of issuers organized or based outside the United States that may involve heightened risks in comparison to the risks of investing in U.S. securities, including unfavorable changes in currency rates and exchange control regulations, reduced and less reliable information about issuers and markets, less stringent accounting standards, illiquidity of securities and markets, higher brokerage commissions, transfer taxes and custody fees, local economic or political instability and greater market risk in general. In particular, investing in securities of issuers located in emerging market countries involves additional risks, such as exposure to economic structures that are generally less diverse and mature than, and to political systems that can be expected to have less stability than, those of developed countries, national policies that restrict investment by foreigners in certain issuers or industries of that country, the absence of legal structures governing foreign investment and private property and an increased risk of foreclosure on collateral located in such countries, a lack of liquidity due to the small size of markets for securities of issuers located in emerging markets and price volatility. The vote in 2016 by the UK to exit the EU has created significant volatility in the global financial markets. The effect of Brexit on our investment portfolios at this time is uncertain and this uncertainty will likely continue as negotiations commence to determine the future terms of the UK's relationship with the EU. Brexit is likely to continue to adversely affect European and worldwide economic conditions and could contribute to greater instability in the global financial markets before and after the terms of the UK's future relationship with the EU are settled.

As of December 31, 2016, 32% of the carrying value of our AFS fixed maturity securities, including related parties, was comprised of securities of issuers based outside of the United States and debt securities of foreign governments. Of our total AFS fixed maturity securities, including related parties as of December 31, 2016, 9% were invested in CLOs of Cayman Islands issuers (where underlying assets are largely loans to U.S. issuers), 6% were invested in securities of non-U.S. issuers by our German Group Companies and 17% were invested in other non-U.S. issuers. While we invest in securities of non-U.S. issuers, the currency denominations of such securities usually match the currency denominations of the liabilities that the assets support. When the currency denominations of the assets and liabilities do not match, we generally undertake hedging activities to eliminate or mitigate currency mismatch risk. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Consolidated Investment Portfolio* for further information on international exposure.

Item 1A. Risk Factors

We previously identified material weaknesses in our internal control over financial reporting. If we fail to maintain effective internal control over financial reporting, we may not be able to accurately report our consolidated financial results.

We identified material weaknesses in our internal control over financial reporting as of and for the years ended December 31, 2014 and 2013. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. If we fail to maintain effective internal control over financial reporting, we may not be able to accurately report our consolidated financial results.

During the process of preparing and completing our consolidated financial statements for the year ended December 31, 2013, we determined we did not have sufficient internal control over financial reporting related to: (1) actuarial balances of the blocks of business acquired from Aviva USA and (2) the preparation and accuracy of income tax balances, each of which constituted a material weakness. To address the material weakness over actuarial balances, we designed and implemented controls to review the data inputs, models, reserve systems, valuations and other processes related to material reserves acquired from Aviva USA. Finally, we designed and implemented review controls over actuarial model changes in the actuarial units across our company. To address the material weakness over income tax balances, we took several actions, including adding expertise and resources to our tax staff through adding a global senior head of tax with significant experience, and enhancing our capabilities and processes to support financial reporting for income taxes. Additionally, we have designed controls to support the comprehensive review over our income tax processes, which include providing supporting documentation and analyses of our income tax accounting positions in a timely manner and managing the response to complex accounting for the income tax consequences of insurance acquisitions to prevent or detect misstatements in the determination of the income tax consequences of future acquisitions. Management believes that these deficiencies no longer constituted material weaknesses as of December 31, 2015, and as of December 31, 2016, assessed these deficiencies as significant deficiencies.

Due to a transition period established by rules of the SEC for newly public companies, we are not required to conduct an evaluation of our internal controls over financial reporting as required under Section 404 of the Sarbanes-Oxley Act of 2002 until the year ended December 31, 2017, nor have we conducted such an evaluation. Such an evaluation would include documenting internal control activities and procedures over financial reporting, assessing the design effectiveness of such controls, and testing the operating effectiveness of such controls, and could result in the identification of additional material weaknesses in our internal control over financial reporting.

Any failure to maintain adequate internal control over financial reporting or to implement required, new or improved internal controls, or difficulties encountered in their implementation, could cause us to report additional material weaknesses in our internal control over financial reporting, and may result in our inability to accurately report our consolidated financial results. Any such failure could have a material and adverse effect on our consolidated financial results and the value of our common shares.

Our growth strategy includes acquiring business through acquisitions of other insurance companies and reinsurance of insurance obligations written by unaffiliated insurance companies, and our ability to consummate these acquisitions on economically advantageous terms acceptable to us in the future is unknown.

We have grown and intend to grow our business in the future in part by acquisitions of other insurance companies and businesses, including through reinsurance, which could require additional capital, systems development and skilled personnel. We may experience challenges identifying, financing, consummating and integrating such acquisitions. While we have reviewed various acquisition opportunities and have successfully completed acquisitions in the past to facilitate our growth, competition exists in the market for profitable blocks of insurance and businesses. Such competition is likely to intensify as insurance businesses become more attractive acquisition targets. It is also possible that merger and acquisition transactions will become less frequent, which could also make it more difficult for us to implement our growth strategy as we have done in the past. Thus, in the future, we may not be able to find suitable acquisition opportunities that are available at attractive valuations, if at all. Even if we do find suitable acquisition opportunities, we may not be able to consummate the acquisitions on commercially acceptable terms. In addition, to the extent we determine to finance an acquisition, suitable financing arrangements may not be available on acceptable terms, on a timely basis, or at all. Our acquisition activities may also divert the attention of our management from our business, which may have an adverse effect on our business and results of operations.

Occasionally we may acquire or seek to acquire an insurance company or business that writes traditional life insurance business or other businesses that are not core to our business. In the past, except in limited circumstances, we have arranged for the sale or transfer, through reinsurance or otherwise, of such business prior to or following our acquisitions to the extent that we did not want to retain these non-core businesses. As we grow, the ability of our management to transfer or source sufficient reasonably priced reinsurance for traditional life insurance or other non-core businesses that we may acquire and want to dispose of may be limited. As we acquire new businesses and write a larger volume of business, it may be difficult to find buyers or reinsurers willing to assume increased risk, and added reinsurance may increase the associated costs. Ultimately, we may not be able to find buyers or source adequate reinsurance at all. In the event that we were unable to find buyers or purchase adequate reinsurance, we would have to accept an increase in our net risk exposures, revise our pricing to reflect higher reinsurance premiums, or otherwise modify our acquisitions and product offerings, each of which could have an adverse effect on our business, financial condition, results of operations and cash flows.

In furtherance of our strategy of growth through acquisitions, we routinely review and conduct investigations of potential acquisitions of business or blocks of business, some of which may be material. When we believe a favorable opportunity exists, we seek to enter into discussions with target companies or sellers regarding the possibility of such acquisitions. At any given time, we may be in discussions with one

or more counterparties. There can be no assurance that any such negotiations will lead to definitive agreements, or if such agreements are reached, that any transactions would be consummated.

We may not be able to successfully integrate future acquisitions and such acquisitions may result in greater risks to us, our business, financial condition, results of operations, cash flows and prospects.

Any failure to manage our growth and integrate our future acquisitions successfully may adversely affect us. Additionally, our ability to incorporate effectively the components of any businesses we may in the future acquire into our previously existing framework is unknown.

Potential difficulties that we may encounter in integrating new acquisitions include, but are not limited to:

- our failure to successfully execute plans to reinvest investments acquired in such acquisitions into higher yielding assets at acceptable levels of credit and other risks;
- the risks relating to integrating accounting and financial systems and accounting policies and the related risk of having to restate our historical financial statements;
- the challenge of integrating complex systems, operating procedures, regulatory compliance programs, technology, pricing structures, networks and other assets and strategies in a manner that minimizes any adverse impact on customers, suppliers, employees and other constituencies;
- the challenge of integrating workforces;
- potential unknown liabilities that are significantly larger than we anticipate at the time of acquisition, and unforeseen increased expenses or delays associated with acquisitions, including costs in excess of the cash transition costs that we estimate at the outset of a transaction;
- conditions that we must comply with in order to obtain regulatory approvals for such acquisitions;
- the diversion of the attention of our management and other key employees;
- the potential loss of key employees or business at the target company;
- the inability to successfully combine our businesses in a manner that permits us to achieve the synergies and other benefits anticipated to result from future acquisitions;
- the challenge of forming and maintaining a cohesive management team;
- the risks of incurring significant goodwill and/or VOBA impairment charges in the future;
- the risk that the target will incur dramatic and significant lapses, withdrawals or sales declines shortly after signing or closing of an acquisition;
- our inability to secure hedges on adverse changes on interest rates, currencies and spreads on assets in the target company's investment portfolio on commercially reasonable terms or at all, or that such hedges perform poorly and do not properly hedge these risks;
- potential ratings downgrades of us or of the acquired entity;
- increased regulatory scrutiny as a result of our entry into new markets or our increase in size or market share; and
- branding or rebranding initiatives that involve substantial costs and may not be favorably received by customers of the target.

The failure to appropriately mitigate these difficulties and manage our growth effectively could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

If we are unable to attract and retain IMOs and agents, sales of our products may be adversely affected.

We distribute our annuity products through a variable cost distribution network which currently includes approximately 60 IMOs and approximately 28,000 independent agents. Insurance companies compete vigorously for productive and profitable agents. We must attract and retain such marketers and agents to sell our products. We compete with other life insurance companies for marketers and agents primarily on the basis of our financial position, support services, compensation and product features. Such marketers and agents may promote products offered by other life insurance companies that may offer a larger variety of products than we do. Our competitiveness for such marketers and agents also depends upon the long-term relationships we develop with them. There can be no assurance that such relationships will continue in the future. In addition, as a result of our ratings upgrades in 2015, our growth plans include distributing annuity products through small and mid-size banks and regional broker-dealers. If we are unable to attract and retain sufficient marketers and agents to sell our products or we are not successful in expanding our distribution channels through the bank and broker-dealer markets, our ability to compete and our revenues and resulting financial condition and results of operations could be adversely affected.

Repurchase agreement programs subject us to potential liquidity and other risks.

We may engage in repurchase agreement transactions whereby we sell fixed income securities to third parties, primarily major brokerage firms or commercial banks, with a concurrent agreement to repurchase such securities at a determined future date. These repurchase agreements provide us with liquidity and in certain instances also allow us to earn spread income. Under such agreements we may be required to deliver additional securities or cash as margin to the counterparty if the value of the securities sold decreases prior to the repurchase date. The cash proceeds received by us under such repurchase agreements are typically invested in fixed income securities and may not be available to be returned prior to the scheduled repurchase date, and it is possible that we will enter into other repurchase transactions and use cash proceeds from such transactions to pay the repurchase prices on maturing repurchase transactions. Repurchase agreements, however, are generally not committed arrangements, and market and other conditions on the repurchase date or at other times may limit our ability to enter into new repurchase transactions or to enter into transactions on favorable terms. To the extent that we are not able to enter into new transactions or to

enter into sufficient new transactions, we may need to find other sources to pay the repurchase prices under these transactions, which may or may not be available to us. Additionally, during difficult market situations, we may not be able to access funds under such repurchase agreements, which may require us to sell securities on unfavorable terms in order to ensure short-term liquidity.

In some cases, the maturity of the securities purchased by us with the cash proceeds received in the repurchase transaction may exceed the term of the related transaction and/or the market value of securities sold in such repurchase transactions may fall below stipulated margin requirements in the applicable repurchase agreement. If we are required to return significant amounts of cash collateral or post cash or securities as margin on short notice and we are forced to sell securities to meet such obligations, we may have difficulty doing so in a timely manner, may be forced to sell securities in a volatile or illiquid market for less than they otherwise would have been able to realize under normal market conditions, or both. In addition, under adverse capital market and economic conditions, liquidity may broadly deteriorate, which would further restrict our ability to sell securities.

A financial strength rating downgrade, potential downgrade or any other negative action by a rating agency could make our product offerings less attractive, inhibit our ability to acquire future business through acquisitions or reinsurance and increase our cost of capital, which could have a material adverse effect on our business.

Various NRSROs review the financial performance and condition of insurers and reinsurers, including our subsidiaries, and publish their financial strength ratings as indicators of an insurer's ability to meet policyholder obligations. These ratings are important to maintaining public confidence in our insurance subsidiaries' products, our insurance subsidiaries' ability to market their products and our competitive position. Factors that could negatively influence this analysis include:

- changes to our business practices or organizational business plan in a manner that no longer supports our ratings;
- unfavorable financial or market trends;
- a need to increase reserves to support our outstanding insurance obligations;
- our inability to retain our senior management and other key personnel;
- rapid or excessive growth, especially through large reinsurance or acquisitions, beyond the bounds of capital sufficiency or management capabilities as judged by the NRSROs;
- significant losses to our investment portfolio; and
- changes in NRSROs' capital adequacy assessment methodologies in a manner that would adversely affect the financial strength ratings of our insurance subsidiaries.

Some other factors may also relate to circumstances outside of our control, such as views of the NRSRO and general economic conditions. Any downgrade or other negative action by a NRSRO with respect to the financial strength ratings of our insurance subsidiaries, or an entity we acquire, or our credit ratings, could materially adversely affect us and our ability to compete in many ways, including the following:

- reducing new sales of insurance products;
- harming relationships with or perceptions of distributors, IMOs and sales agents;
- increasing the number or amount of policy lapses or surrenders and withdrawals of funds, which may result in a mismatch of our overall asset and liability position;
- requiring us to offer higher crediting rates or greater policyholder guarantees on our insurance products in order to remain competitive;
- increase our borrowing costs;
- reducing our level of profitability and capital position generally or hindering our ability to raise new capital; or
- requiring us to collateralize obligations under or result in early or unplanned termination of hedging agreements and harming our ability to enter into new hedging agreements.

In order to improve or maintain their financial strength ratings, our subsidiaries may attempt to implement business strategies to improve their capital ratios. We cannot guarantee any such measures will be successful. We cannot predict what actions NRSROs may take in the future, and failure to improve or maintain current financial strength ratings could materially and adversely affect our business, financial condition, results of operations and cash flows.

We are subject to significant operating and financial restrictions imposed by our credit agreement.

The credit agreement dated January 22, 2016, by and among AHL, ALRe and Athene USA, as borrowers, each lender from time to time party thereto and Citibank, N.A., as administrative agent (Credit Facility) contains various restrictive covenants which limit, among other things, AHL's, ALRe's and Athene USA's ability, and in certain instances, some or all of their subsidiaries' ability, to:

- incur additional indebtedness, make guarantees and enter into derivative arrangements;
- create liens on our or such subsidiaries' assets;
- make fundamental changes;
- engage in certain transactions with affiliates;
- make changes in the nature of our business; and
- pay dividends and distributions or repurchase our common shares.

These covenants, some of which are financial, may prevent or restrict us from capitalizing on business opportunities, including making additional acquisitions or growing our business. In addition, if AHL undergoes a "change of control" as defined in the Credit Facility, the lenders under the Credit Facility will have the right to terminate the facility and/or accelerate the maturity of all outstanding loans. As of the date of this report, AHL is in compliance with all covenants and no borrowings under the Credit Facility are outstanding. As a result of these restrictions and their effects on us, we may be limited in how we conduct our business and may be unable to raise additional debt financing to compete effectively or to take advantage of new business opportunities. The terms of any future indebtedness we may incur may contain additional restrictive covenants.

We are subject to the credit risk of our counterparties, including ceding companies who reinsure business to ALRe, reinsurers who assume liabilities from our subsidiaries and derivative counterparties.

Our insurance subsidiaries may cede insurance and transfer related assets and certain liabilities to third-party insurance companies through reinsurance. Under such reinsurance agreements, our insurance subsidiaries will be liable for losses on insurance risks if such reinsurers fail to perform under their respective reinsurance agreements with our subsidiaries.

In connection with the acquisitions of our two largest U.S. insurance subsidiaries, we entered into reinsurance agreements with Protective and Global Atlantic. As part of our acquisition of AADE, we effected a sale of substantially all of AADE's life insurance business by reinsuring such business to Protective. Similarly, in connection with our acquisition of Aviva USA, we effectuated a sale of substantially all of Aviva USA's life insurance business by reinsuring such business to Global Atlantic. Because these agreements involve reinsurance of entire business segments, each covers a much larger volume of business than a traditional reinsurance agreement. Additionally, although certain of Protective's financial obligations under its reinsurance agreement with us are secured by assets placed in a trust for our benefit and Global Atlantic is obligated to maintain assets in custody accounts for our benefit to support substantially all of its financial obligations under its reinsurance agreements with us, as each of Protective and Global Atlantic are the only counterparties under each respective agreement, we face a heightened risk of default with respect to those reinsurers in particular. In addition, we do not have a security interest in the assets in the custody accounts supporting the Global Atlantic reinsurance agreements. Therefore, in the event of an insolvency of the Global Atlantic insurance company acting as reinsurer, our claims would be subordinated to those of such insurance company's policyholders and the assets in the relevant custody accounts may be available to satisfy the claims of such insurance company's general creditors in addition to us. As with any other reinsurance agreement, we remain liable to our policyholders even if Protective or Global Atlantic fail to perform. Although each agreement provides that Protective and Global Atlantic, respectively, agree to indemnify us for losses sustained in connection with their respective performances of each agreement, such indemnification may not be adequate to compensate us for losses actually incurred in the event that Protective or Global Atlantic are either unable or unwilling to perform according to the agreements' terms. In addition to possible losses that could be incurred if our subsidiaries are forced to recapture these blocks, such subsidiaries may also face a substantial shortfall in capital to support the recaptured business, possibly resulting in material declines to the insurer's RBC ratio and/or creditworthiness and potentially expose the insurer to ratings downgrades, regulatory intervention, increased policyholder withdrawals or other negative effects.

Conversely, ALRe and certain of our U.S. insurance subsidiaries assume liabilities from other insurance companies. Changes in the ratings, creditworthiness or market perception of such ceding companies or in the administration of policies reinsured to us could cause policyholders of contracts reinsured to us to surrender or lapse their policies in unexpected amounts. In addition, to the extent such ceding companies do not perform under their reinsurance agreements with us, we may not achieve the results we intended and could suffer unexpected losses. In either case, we have exposure to our subsidiaries' reinsurance counterparties which could materially adversely affect our business, financial condition, results of operations and cash flows.

Finally, we are exposed to credit loss in the event of nonperformance by our counterparties on derivative agreements. We seek to further reduce the risk associated with such agreements by entering into such agreements with large, well-established financial institutions. In addition, rules recently adopted by the CFTC and the prudential regulators will require us and our swap dealer counterparties to collect and post initial and variation margin with respect to non-cleared swaps. Any initial margin required to be posted to our swap dealer counterparties under these rules will be segregated with a third-party custodian. However, there can be no assurance that we will not suffer losses in the event a counterparty or custodian fails to perform or is subject to a bankruptcy or similar proceeding.

We rely significantly on third parties for investment services and certain other services related to our policies, and we may be held responsible for obligations that arise from the acts or omissions of third parties under their respective agreements with us if they are deemed to have acted on our behalf.

We rely significantly on various third parties to provide investment services to us as well as to sell, distribute and provide administrative services for our subsidiaries' policies. As such, our results may be affected by the performance of those parties. Additionally, our operations are dependent on various service providers and on various technologies, some of which are provided or maintained by certain key outsourcing partners and other parties.

Item 1A. Risk Factors

Many of our subsidiaries' products and services are sold through third-party intermediaries. In particular, our insurance businesses are reliant on such intermediaries to describe and explain their products to potential customers, and although we take precautions to avoid this result, such intermediaries may be deemed to have acted on our behalf. If that occurs, the intentional or unintentional misrepresentation of our subsidiaries' products and services in advertising materials or other external communications, or inappropriate activities by our personnel or an intermediary could result in liability for us and have an adverse effect on our reputation and business prospects, as well as lead to potential regulatory actions or litigation. In addition, as a result of our acquisitions, we rely on TPAs to administer a portion of our annuity contracts, as well as a small amount of legacy life insurance business. We currently rely on these TPAs to administer a number of our policies. In addition, to the extent any of these TPAs do not administer our business appropriately, we may experience customer complaints, regulatory intervention and other adverse impacts, which could affect our future growth and profitability. If any of these TPAs or their employees are found to have made material misrepresentations to our policyholders, violated applicable insurance, privacy or other laws and regulations or otherwise engaged in misconduct, we could be held liable for their actions, which could adversely affect our reputation and business prospects, as well as lead to potential regulatory actions or litigation. Additionally, if any of these TPAs fails to perform in accordance with our standards, we may incur additional costs in connection with finding and retaining new TPAs, which may divert the time and attention of our senior management from our business.

Additionally, past or future misconduct by agents that distribute our subsidiaries' products or employees of our vendors could result in violations of law by us, regulatory sanctions and/or serious reputational or financial harm and the precautions we take to prevent and detect this activity may not be effective in all cases. Although we employ controls and procedures designed to monitor associates' business decisions and to prevent us from taking excessive or inappropriate risks, associates may take such risks regardless of such controls and procedures. In addition, annuity sales to seniors have been the subject of increased scrutiny by FINRA and state insurance regulators, and have been the source of industry litigation in situations where annuity sales have allegedly been unsuitable for the financial needs of seniors.

Further, on April 6, 2016, the DOL issued a new regulation which imposes upon third parties who sell annuities within ERISA plans or to individual retirement account IRA holders a fiduciary duty to the retirement investor. For the year ended December 31, 2016, of our total deposits of $8.8 billion from our organic channels, 42% was associated with sales of FIAs to employee benefit plans and IRAs and 14% was associated with traditional fixed annuities sold to employee benefit plans and IRAs. The requirements of the regulation will begin to be implemented on April 10, 2017, with full implementation on January 1, 2018. The DOL has published a proposed amendment to the fiduciary rule that will delay the applicability date for 60-days to allow the DOL to fully review the rule in light of the executive memorandum. The DOL has provided a 15-day comment period to respond to the proposed delay and it is anticipated it will issue the final rule officially delaying the applicability date in late March. In addition to the 15-day comment period relating to the delay, the DOL has opened a 45-day comment period to collect responses to the questions raised in the executive memorandum. We anticipate a delay, with a possible replacement of the rule that is less burdensome but still requires sales to be in the best interest of clients. However, until the rule is officially delayed, we continue to move forward in preparation for the April 10, 2017 applicability date.

The DOL regulation regarding fiduciary obligations of distributors of products to retirement accounts may result in additional compliance costs to us, regulatory scrutiny and litigation, as well as reduced sales of our products. As the fiduciary regulations are not currently in effect, we are not able to assess the actual impact that such regulations may have on us and our associates. However, when fully implemented such regulations may have an adverse effect on our results of operations and financial condition.

If we lose or fail to retain our senior executives or other key personnel and are unable to attract qualified personnel, our ability to execute our growth plans and operate our business could be impeded or adversely affected, which could significantly and negatively affect our business.

Our success depends in large part on our ability to attract and retain key people, including senior executives, sales and distribution professionals, actuarial and finance professionals and information technology professionals. Intense competition exists for key employees with demonstrated ability, and we may be unable to hire or retain such employees. Accordingly, the loss of services of one or more of the members of our senior management could delay or prevent us from fully implementing our business strategy and, consequently, significantly and negatively impact our business. The unexpected loss of members of our senior management or other key employees could have a material adverse effect on our operations due to the loss of their skills, knowledge of our business and their years of industry experience as well as the potential difficulty of promptly finding qualified replacement employees. We also rely upon the knowledge and experience of employees involved in functions that require technical expertise in order to provide for sound operational controls for our overall enterprise, including the accurate and timely preparation of required regulatory filings and financial statements and operation of internal controls. A loss of such employees could adversely impact our ability to execute key operational functions and could adversely affect our operational controls, including our internal control over financial reporting.

Foreign currency fluctuations may reduce our net income and our capital levels, adversely affecting our financial condition.

We are exposed to foreign currency exchange rate risk both as a result of our acquisition of our German Group Companies, which conduct business in a variety of non-U.S. currencies, and the investments in our investment portfolio that are denominated in currencies other than the U.S. dollar or are issued by entities which primarily conduct their business outside of the U.S. We may employ various strategies (including hedging) to largely manage our exposure to foreign currency exchange risk. To the extent that these exposures are not fully hedged or the hedges are ineffective, our results or equity may be reduced by fluctuations in foreign currency exchange rates that could materially adversely affect our financial condition and results of operations.

Item 1A. Risk Factors

The vote by the United Kingdom mandating its withdrawal from the EU could have an adverse effect on our business and investments.

The vote in 2016 by the UK to exit the EU, or Brexit, has created significant volatility in the global financial markets. However, the eventual effects of the UK's withdrawal from the EU on our business or our investment portfolios is uncertain at this time and will depend on agreements the UK makes to retain access to EU markets either during a transitional period or more permanently. Brexit could impair the ability of our German companies to transact business in the future in the UK, including by restricting the free travel of employees from and to the UK and through legal uncertainty and potentially divergent national laws and regulations as the UK determines which EU laws to replace or replicate. Furthermore, Brexit is likely to continue to adversely affect European and worldwide economic conditions and could contribute to greater instability in the global financial markets before and after the terms of the UK's future relationship with the EU are settled. Brexit's impact could have an adverse effect on our business and investments.

Our operations may be affected by the introduction of an EU financial transaction tax (FTT).

On February 14, 2013, the EC published a proposal for a Directive for a common FTT in those EU Member States which choose to participate (the FTT Zone) and the proposal was included in the EC's work program for 2014, published on October 22, 2013.

The proposed FTT has broad scope and would apply to financial transactions where at least one party to the transaction is established in the FTT Zone and either that party or another party is a financial institution established in the FTT Zone. The term "financial institution" covers a wide range of entities, including insurance and reinsurance undertakings. The term "financial transaction" includes the sale and purchase of a financial instrument, a transfer of risk associated with a financial instrument and the conclusion or modification of a derivative. The proposed minimum rate of tax is 0.1% of the consideration, or 0.01% of the notional amount in relation to a derivative. A financial institution may be deemed to be "established" in the FTT Zone, even if it has no business presence there, for example, if the underlying financial instrument is issued in the FTT Zone.

In the period following its publication in February 2013, the FTT proposal has both been subject to significant negotiation between the participating EU Member States and the subject of a legal challenge. As a result, both the scope of any FTT, as well as the timing of implementation, has been somewhat unclear.

In December 2015, those EU Member States that remain committed to the introduction of the FTT (the FTT 10) announced that they had reached a broad understanding as to the possible foundations for the FTT. At that time, the FTT 10 intended to reach a final agreement by the summer of 2016. Although an agreement was not reached during the summer of 2016, the FTT 10 reached an agreement in October 2016 on the basic outline of the FTT, and directed the EC to draft an EU directive authorizing the FTT. A draft of this directive and the FTT legislation was expected to be finalized at the meeting of the Economic and Financial Affairs Council of the EU (ECOFIN) on December 6, 2016. At its meeting on December 6, 2016 ECOFIN was informed that the FTT 10 is still working on a number of open questions and trying to reach a compromise on the core elements. No further dates have been set at this time for the development of the FTT.

It remains clear that further work will still be required in order to settle both the scope and application of any FTT, and further legal challenges may yet arise. The introduction of an FTT in this or similar form could have an adverse effect on our results of operations.

Our business in Bermuda could be adversely affected by Bermuda employment restrictions.

As of December 31, 2016, we employed approximately 25 non-Bermudians in our Bermuda office (other than spouses of Bermudians, holders of permanent residents' certificates, and holders of working residents' certificates). We may hire additional non-Bermudians as our business grows. Under Bermuda law, non-Bermudians (other than spouses of Bermudians, holders of permanent residents' certificates, and holders of working residents' certificates) generally may not engage in any gainful occupation in Bermuda without a valid government work permit (with certain exceptions). A work permit is generally granted or renewed upon showing that, after proper public advertisement, no Bermudian, spouse of a Bermudian, or holder of a permanent resident's or working resident's certificate who meets the minimum standards reasonably required by the employer has applied for the job. Work permit terms that are available for request range from three months to five years. We may not be able to use the services of one or more of our non-Bermudian employees if we are not able to obtain work permits for them, which could have a material adverse effect on our business, financial condition and results of operations.

Interruption or other operational failures in telecommunications, information technology and other operational systems or a failure to maintain the security, integrity, confidentiality or privacy of sensitive data residing on those systems, including as a result of human error, could have a material adverse effect on our business.

We are highly dependent on automated and information technology systems to record and process our internal transactions and transactions involving our customers, as well as to calculate reserves, value our investment portfolio and complete certain other components of our financial statements. We could experience a failure of one of these systems, our employees or agents could fail to monitor and implement enhancements or other modifications to a system in a timely and effective manner or our employees or agents could fail to complete all necessary data reconciliation or other conversion controls when implementing a new software system or modifications to an existing system. Additionally, anyone who is able to circumvent our security measures and penetrate our information technology systems could access, view, misappropriate, alter or delete information in the systems, including personally identifiable customer information and proprietary business information. Information security risks also exist with respect to the use of portable electronic devices, such as laptops, which are particularly vulnerable to loss and theft.

We believe that we have established and implemented appropriate security measures, controls and procedures to safeguard our information technology systems and to prevent unauthorized access to such systems and any data processed or stored in such systems, and we periodically evaluate and test the adequacy of such systems, controls and procedures. In addition, we have established a business continuity plan which is designed to ensure that we are able to maintain all aspects of our key business processes functioning in the midst of certain disruptive events, including any disruptions to or breaches of our information technology systems. Despite the implementation of security and back-up measures, our information technology systems may be vulnerable to physical or electronic intrusions, viruses or other attacks, programming errors and similar disruptions. We may also be subject to disruptions of any of these systems arising from events that are wholly or partially beyond our control (for example, natural disasters, acts of terrorism, epidemics, computer viruses and electrical or telecommunications outages). All of these risks are also applicable where we rely on outside vendors to provide services to us and our customers. The failure of any one of these systems for any reason, or errors made by our employees or agents, could in each case cause significant interruptions to our operations, which could harm our reputation, adversely affect our internal control over financial reporting or have a material adverse effect on our business, financial condition and results of operations.

We retain confidential information in our information technology systems and those of our business partners, and we rely on industry standard commercial technologies to maintain the security of those systems. Despite our implementation of network security measures, our servers could be subject to physical and electronic intrusions, and similar disruptions from unauthorized tampering with our computer systems. While we perform annual penetration tests and have adopted a number of measures to protect the security of customer and company data, and to our knowledge have not experienced a successful cyber attack that has resulted in any material compromise in the security of our information technology systems, there is no guarantee that such an attack will not occur or be successful in the future.

In addition, an increasing number of jurisdictions require that customers be notified if a security breach results in the disclosure of personally identifiable customer information. Any compromise of the security of our information technology systems that results in inappropriate disclosure or use of personally identifiable customer information could damage the reputation of our brand in the marketplace, deter purchases of our products, subject us to heightened regulatory scrutiny or significant civil and criminal liability and require us to incur significant technical, legal and other expenses.

We may be the target or subject of, and may be required to defend against or respond to, litigation (including class action litigation), enforcement investigations or regulatory scrutiny.

We, like other financial services companies, are involved in litigation and arbitration in the ordinary course of business. More generally, we operate in an industry in which various practices are subject to regulatory scrutiny and potential litigation, including class actions and enforcement investigations. Plaintiffs may seek large or indeterminate amounts of damages, including compensatory, liquidated, treble and/or punitive damages. In addition, we sell our products through third parties, including IMOs, whose activities may be difficult to monitor. Civil jury verdicts have been returned against insurers and other financial services companies involving sales, underwriting practices, product design, product disclosure, administration, denial or delay of benefits, charging excessive or impermissible fees, recommending unsuitable products to customers, breaching fiduciary or other duties to customers, refund or claims practices, alleged agent misconduct, failure to properly supervise representatives, relationships with agents or other persons with whom the insurer does business, payment of sales or other contingent commissions and other matters. Such lawsuits can result in substantial judgments that are disproportionate to actual damages, including material amounts of punitive or non-economic compensatory damages. In some states, juries, judges and arbitrators have substantial discretion in awarding punitive, or non-economic, compensatory damages, which creates the potential for unpredictable material adverse judgments or awards in any given lawsuit or arbitration. Arbitration awards are subject to very limited appellate review. In addition, in some class action and other lawsuits, financial services companies have made material settlement payments. Given the large or indeterminate amounts sometimes sought, and the inherent unpredictability of litigation, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation matters could have a material and adverse effect on our financial condition. See *Item 3. Legal Proceedings*.

Risks Relating to Our Investment Manager

We rely on our investment management or advisory agreements with AAM and AAME for the management of our investment portfolio. AAM and AAME may terminate these arrangements at any time, and there are limitations on our ability to terminate such arrangements, which may adversely affect our investment results.

We rely on AAM and AAME to provide us with investment management and advisory services pursuant to various investment management agreements (IMAs) and advisory agreements. AAM and AAME rely in part on their ability to attract and retain key people, and the loss of services of one or more of the members of AAM's or AAME's senior management could delay or prevent AAM or AAME from fully implementing our investment strategy.

Item 1A. Risk Factors

IMA Termination Rights
Our bye-laws currently provide that we may not, and will cause our subsidiaries not to, terminate any IMA or advisory agreement among us, our subsidiaries and AAM or AAME without cause before October 31, 2018 (or any third anniversary thereafter) (each such date, an IMA Termination Date) and any termination on an IMA Termination Date without cause requires (1) the approval of our board of directors and at least 50% of the total issued shares of AHL that are entitled to vote (giving effect to the voting allocation provisions set forth in our bye-laws) and (2) six months' prior written notice to AAM or AAME of such termination. Notwithstanding the foregoing, any such IMA may be terminated by our board of directors for cause (as defined in our bye-laws), which includes (a) material violations of law relating to AAM's or AAME's advisory business, (b) AAM's or AAME's gross negligence, willful misconduct or reckless disregard of AAM's or AAME's obligations under the relevant agreement, (c) a determination by the board of directors, in its sole discretion and acting in good faith, of unsatisfactory long-term performance of AAM or AAME, or (d) a determination by the board of directors, in its sole discretion and acting in good faith, that the fees being charged by AAM or AAME are unfair and excessive compared to a comparable asset manager (provided, that in the case of the immediately preceding clauses (c) and (d), the board of directors must deliver notice of such determination to AAM or AAME, as applicable, and AAM or AAME, as applicable, will have 30 days after receipt of such notice to address the board of directors' concerns, and provided, further, that in the case of the immediately preceding clause (d), AAM or AAME has the right to lower its fees to match the fees of such comparable asset manager). However, our organizational documents give our board of directors complete discretion as to whether to determine if a for cause termination event has occurred under any IMA and therefore the board of directors may never elect to make such a determination. Five of our 13 directors are employees of or consultants to Apollo and our Chairman, Chief Executive Officer and Chief Investment Officer is an employee of AAM, and under Bermuda law, such directors would be allowed to vote on any resolution to terminate an IMA as long as they declare their conflict prior to any such vote.

Proposed Bye-law Amendment
A proposed amendment to our bye-laws that has been approved by our board of directors and is subject to approval by our shareholders at our 2017 Annual General Meeting provides that we may not, and will cause our subsidiaries not to, terminate any IMA or advisory agreement among us or any of our subsidiaries, on the one hand, and AAM or AAME, on the other hand, before October 31, 2018 (or any anniversary thereafter) (each such date, an IMA Termination Election Date) and any termination on an IMA Termination Election Date requires (i) the approval of two-thirds of our Independent Directors (as defined below) and (ii) written notice to AAM or AAME of such termination at least 30 days' prior to an IMA Termination Election Date. If our Independent Directors make any such election to terminate and notice of such termination is delivered, the termination will be effective on the second anniversary of the applicable IMA Termination Election Date (IMA Termination Effective Date). Notwithstanding the foregoing, under such proposed amendment, (A) our Independent Directors may only elect to terminate an IMA or advisory agreement on an IMA Termination Election Date if two-thirds of our Independent Directors determine, in their sole discretion and acting in good faith, that either (i) there has been unsatisfactory long-term performance materially detrimental to us by AAM or AAME, or (ii) the fees being charged by AAM or AAME are unfair and excessive compared to a comparable asset manager (provided, that in either case such Independent Directors must deliver notice of any such determination to AAM or AAME, as applicable, and AAM or AAME, as applicable, will have until the applicable IMA Termination Effective Date to address such concerns, and provided, further, that in the case of such a determination that the fees being charged by AAM or AAME are unfair and excessive, AAM or AAME, as applicable, has the right to lower its fees to match the fees of such comparable asset manager) and (B) upon the determination by two-thirds of our Independent Directors, we or our subsidiaries may also terminate an IMA or advisory agreement with AAM or AAME as a result of either (i) a material violation of law relating to AAM's or AAME's advisory business, or (ii) AAM's or AAME's gross negligence, willful misconduct or reckless disregard of AAM's or AAME's obligations under the relevant agreement, and in either case the delivery of at least 30 days' prior written to such termination and such termination will be effective at the end of such 30-day period (the events described in the foregoing clauses (A) and (B) are referred to in more detail in our bye-laws as "AHL Cause"). For purposes of these provisions of the bye-laws (as amended pursuant to such proposed amendment), an "Independent Director" cannot be (x) an officer or employee of ours or any of our subsidiaries or (y) an officer or employee of (1) any member of the Apollo Group described in clauses (i) through (iv) of the definition of "Apollo Group" as set forth in our bye-laws or (2) AGM or any of its subsidiaries (excluding any subsidiary that constitutes any portfolio company (or investment) of (A) an investment fund or other investment vehicle whose general partner, managing member or similar governing person is owned, directly or indirectly, by AGM or by one or more of its subsidiaries or (B) a managed account agreement (or similar arrangement) whereby AGM or one or more of its subsidiaries serves as general partner, managing member or in a similar governing position).

Our organizational documents give our Independent Directors complete discretion, while acting in good faith, as to whether to determine if an AHL Cause event has occurred with respect to any IMA or advisory agreement with AAM or AAME, and therefore our Independent Directors are under no obligation to make, and therefore may exercise their discretion never to make, such a determination.

The boards of directors of AHL's subsidiaries may terminate an IMA or advisory agreement with AAM or AAME relating to the applicable subsidiary if such subsidiary's board of directors determines that such termination is required in the exercise of its fiduciary duties. If our subsidiaries do elect to terminate any such agreement, other than as provided above, we may be in breach of our bye-laws, which could subject us to regulatory scrutiny, expose us to shareholder lawsuits and could have a negative effect on our financial condition and results of operations.

Investment Management Fees
Further, except in limited circumstances, we currently pay AAM 40 basis points per annum on assets managed and we pay additional fees to Apollo and its affiliates for providing sub-advisory services and acting as manager of investment funds in which we invest. Any such fees may be higher than what other investment managers may be willing to charge us currently for investment services. Because of the services and the unique acquisition opportunities provided by AAM that we are able to access that many other companies cannot access, we do not currently expect our board of directors or our Independent Directors would elect to terminate any IMA. These limitations on our ability to terminate the IMAs or advisory agreements with AAM or AAME could have a negative effect on our financial condition and results of operations.

Termination by AAM or AAME
Conversely, we may be adversely affected if AAM or AAME elect to terminate an IMA at a time when such agreement remains advantageous to us. We depend upon AAM and AAME to implement our investment strategy. However, AAM and AAME do not face the restrictions described above with regards to its ability to terminate any of its agreements with us and may terminate such agreements at any time. If AAM or AAME choose to terminate such agreements, there is no assurance that we could find a suitable replacement or that certain of the opportunities made available to us as a result of our relationship with AAM and AAME would be offered by a suitable replacement, and therefore our results of operations and financial condition could be adversely impacted by our failure to retain a satisfactory investment manager.

Interruption or other operational failures in telecommunications, information technology and other operational systems at AAM or AAME or a failure to maintain the security, integrity, confidentiality or privacy of sensitive data residing on AAM's or AAME's systems, including as a result of human error, could have a material adverse effect on our business.

We are highly dependent on AAM and AAME, as our investment manager and adviser, respectively, to maintain information technology and other operational systems to record and process their transactions with respect to our investment portfolio, which includes providing information to us to enable us to value our investment portfolio that may affect our GAAP or U.S. statutory accounting principles financial statements. AAM or AAME could experience a failure of one of these systems, their employees or agents could fail to monitor and implement enhancements or other modifications to a system in a timely and effective manner or their employees or agents could fail to complete all necessary data reconciliation or other conversion controls when implementing a new software system or modifications to an existing system. Additionally, anyone who is able to circumvent AAM's or AAME's security measures and penetrate their information technology systems could access, view, misappropriate, alter or delete information in the systems, including proprietary information relating to our investment portfolio. The maintenance and implementation of these systems at AAM and AAME is not within our control. Should AAM's or AAME's systems fail to accurately record information pertaining to our investment portfolio, we may inadvertently include inaccurate information in our financial statements and experience a lapse in our internal control over financial reporting. The failure of any one of these systems at AAM or AAME for any reason, or errors made by their employees or agents, could in each case cause significant interruptions to their operations, which could adversely affect our internal control over financial reporting or have a material adverse effect on our business, financial condition and results of operations.

The historical performance of AAM and AAME should not be considered as indicative of the future results of our investment portfolio, our future results or any returns expected on our common shares.
